There are no formal requirements for ratification. Any of the former minor's words or acts after reaching majority that indicate with reasonable clarity his intent to be bound by the contract are sufficient. Ratification can be *expressed* in an oral or written statement, or, as is more often the case, it can be *implied* by conduct on the part of the former minor. Naturally, ratification is clearest when the former minor has made some express statement of his intent to be bound. Predicting whether a court will determine that a contract has been ratified is a bit more difficult when the only evidence of the alleged ratification is the conduct of the minor. A former minor's acceptance or retention of benefits given by the other party for an unreasonable time after he has reached majority can constitute ratification. Also, a former minor's continued performance of his part of the contract after reaching majority has been held to imply his intent to ratify the contract.

Duties upon Disaffirmance

Duty to Return Consideration If neither party has performed his part of the contract, the parties' relationship will simply be canceled by the disaffirmance. Since neither party has given anything to the other party, no further adjustments are necessary. But what about the situation where, as is often the case, the minor has paid money to the adult and the adult has given property to the minor? Upon disaffirmance, each party has the duty to return to the other any consideration that the other has given. This means that the minor must return any consideration given to him by the adult that remains in his possession. However, if the minor is unable to return the consideration, most states will still permit him to disaffirm the contract.

The duty to return consideration also means that the minor has the right to recover any consideration he has given to the adult party. He even has the right to recover some property that has been transferred to third parties. One exception to the minor's right to recover property from third parties is found in section 2-403 of the Uniform Commercial Code, however. Under this section, a

²Okla. Stat. Ann. tit. 15 sec. 18 (1983).

minor cannot recover *goods* that have been transferred to a good faith purchaser. For example, Simpson, a minor, sells a 1980 Ford to Mort's Car Lot. Mort's then sells the car to Vane, a good faith purchaser. If Simpson disaffirmed the contract with Mort's, he would *not* have the right to recover the Ford from Vane.

Must the Disaffirming Minor Make Restitution? A Split of Authority If the consideration given by the adult party has been lost, damaged, destroyed, or simply has depreciated in value, is the minor required to make restitution to the adult for the loss? The traditional rule is that the minor who cannot fully return the consideration that was given to her is *not* obligated to pay the adult for the benefits she has received or to compensate the adult for loss or depreciation of the consideration. Some states still follow this traditional rule. (As you will read in the next section, however, a minor's misrepresentation of age can, even in some of these states, make her responsible for reimbursing the other party upon disaffirmance.)

The rule that restitution is not required is designed to protect minors by discouraging adults from dealing with them. After all, if an adult knew that he might be able to demand the return of anything that he transferred to a minor, he would have little incentive to refrain from entering into contracts with minors.

The traditional rule, however, can work harsh results for innocent adults who have dealt fairly with minors. It strikes many people as unprincipled that a doctrine intended to protect against unfair exploitation of one class of people can be used to unfairly exploit another class of people. As courts sometimes say, the minor's right to disaffirm was designed to be used as a "shield rather than as a sword." For these reasons, a growing number of states have rejected the traditional rule. The courts and legislatures of these states have adopted rules that require minors who disaffirm their contracts and seek refunds of purchase price to reimburse adults for the use or depreciation of their property. The *Dodson* case follows this approach.

Dodson v. Shrader

824 S.W.2d 545 (Tenn. Sup. Ct. 1992)

Joseph Dodson, age 16, bought a 1984 Chevrolet truck from Burns and Mary Shrader, owners of Shrader's Auto Sales, for \$4,900 cash. At the time, Burns Shrader, believing Dodson to be 18 or 19, did not ask Dodson's age and Dodson did not volunteer it. Dodson drove the truck for about eight months, when he learned from an auto mechanic that there was a burned valve in the engine. Dodson did not have the money for the repairs, so he continued to drive the truck without repair for another month until the engine "blew up" and stopped operating. He parked the car in the front yard of his parents' house. He then contacted the Shraders, rescinding the purchase of the truck and requesting a full refund. The Shraders refused to accept the truck or to give Dodson a refund. Dodson then filed an action seeking to rescind the contract and recover the amount paid for the truck. Before the court could hear the case, a hit-and-run driver struck Dodson's parked truck, damaging its left front fender. At the time of the circuit court trial, the truck was worth only \$500. The Shraders argued that Dodson should be responsible for paying the difference between the present value of the truck and the \$4,900 purchase price. The trial court found in Dodson's favor, ordering the Shraders to refund the \$4,900 purchase price upon delivery of the truck. The Tennessee Court of Appeals affirmed this judgment, and the Shraders appealed.

O'Brien, Justice

The law on the subject of the protection of infants' rights has been slow to evolve. The underlying purpose of the "infancy doctrine" is to protect minors from their lack of judgment and from squandering their wealth through improvident contracts with crafty adults who would take advantage of them in the marketplace.

There is, however, a modern trend among the states, either by judicial action or by statute, in the approach to the problem of balancing the rights of minors against those of innocent merchants. As a result, two minority rules have developed which allow the other party to a contract with a minor to refund less than the full consideration paid in the event of rescission. The

first of these minority rules is called the "Benefit Rule." This rule holds that, upon rescission, recovery of the full purchase price is subject to a deduction for the minor's use of the merchandise. This rule recognizes that the traditional rule in regard to necessities has been extended so far as to hold an infant bound by his contracts, where he failed to restore what he has received under them to the extent of the benefit actually derived by him from what he has received from the other party to the transaction. The other minority rule holds that the minor's recovery of the full purchase price is subject to a deduction for the minor's "use" of the consideration he or she received under the contract, or for the "depreciation" or "deterioration" of the consideration in his or her possession.

We are impressed by the statement made by the Court of Appeals of Ohio:

At a time when we see young persons between 18 and 21 years of age demanding and assuming more responsibilities in their daily lives; when we see such persons charged with the responsibility for committing crimes; when we see such persons being sued in tort claims for acts of negligence; when we see such persons subject to military service; when we see such persons engaged in business and acting in almost all other respects as an adult, it seems timely to re-examine the case law pertaining to contractual rights and responsibilities of infants to see if the law as pronounced and applied by the courts should be redefined.

We state the rule to be followed hereafter, in reference to a contract of a minor, to be where the minor has not been overreached in any way, and there has been no undue influence, and the contract is a fair and reasonable one, and the minor has actually paid money on the purchase price, and taken and used the article purchased, that he ought not to be permitted to recover the amount actually paid, without allowing the vendor of the goods reasonable compensation for the use of, depreciation, and willful or negligent damage to the article purchased, while in his hands. If there has been any fraud or imposition on the part of the seller or if the contract is unfair, or any unfair

advantage has been taken of the minor inducing him to make the purchase, then the rule does not apply. This rule will fully and fairly protect the minor against injustice or imposition, and at the same time it will be fair to a business person who has dealt with such minor in good faith.

This rule is best adapted to modern conditions under which minors are permitted to, and do in fact, transact a great deal of business for themselves, long before they have reached the age of legal majority. Many young people work and earn money and collect it and spend it oftentimes without any oversight or restriction. The law does not question their right to buy if they have the money to pay for their purchases. It seems intolerably burdensome on everyone concerned if merchants cannot deal with them safely, in a fair and reasonable way. Further, it does not appear consistent with practice of proper moral influence upon young people, tend to encourage honesty and integrity, or lead them to a good and useful business future if they are taught that they can make purchases with their own money, for their own benefit, and after paying for them, and using them until they are worn out and destroyed, go back and compel the vendor to return to them what they have paid upon the purchase price. Such a doctrine can only lead to the corruption of principles and encourage young people in habits of trickery and dishonesty.

Reversed and remanded in favor of the Shraders.

Minors' Obligation to Pay Reasonable Value of Necessaries Though the law regarding minors' contracts is designed to discourage adults from dealing with (and possibly taking advantage of) minors, it would be undesirable for the law to discourage adults from selling minors the items that they need for basic survival. For this reason, disaffirming minors are required to pay the reasonable value of items that have been furnished to them that are classified as **necessaries**. A necessary is something that is essential for the minor's continued existence and general welfare that has not been provided by the minor's parents or guardian. Examples of necessities include food, clothing, shelter, medical care, tools of the minor's trade, and basic educational or vocational training.

A minor's liability for necessities supplied to him is **quasi contractual**. That is, the minor is liable for the *reasonable value* of the necessities that she actually receives. She is not liable for the entire price agreed on if that price exceeds the actual value of the necessities, and she is not liable for necessities that she contracted for but did not receive. For example, Joy Jones, a minor, signs a one-year lease for an apartment in Mountain Park at a rent of \$300 per month. After living in the

apartment for three months, Joy breaks her lease and moves out. Because she is a minor, Joy has the right to disaffirm the lease. If shelter is a necessary in this case, however, she must pay the reasonable value of what she has actually received—three months' rent. If she can establish that the actual value of what she has received is less than \$300 per month, she will be bound to pay only that lesser amount. Furthermore, she will not be obligated to pay for the remaining nine months' rent, because she has not received any benefits from the remainder of the lease.

Whether a given item is considered a necessary depends on the facts of a particular case. The minor's age, station in life, and personal circumstances are all relevant to this issue. An item sold to a minor is not considered a necessary if the minor's parent or guardian has already supplied him with similar items. For this reason, the range of items that will be considered necessities is broader for married minors and other emancipated minors than it is for unemancipated minors.

The following *Young* case involves a situation in which the court is challenged to determine whether a minor has been provided with a necessary.

Young v. Weaver

883 So.2d 234 (Ala. Ct. Civ. App. 2003)

In the fall of 2001, Kim Young, who at the time was 18 years old and had been living with her parents all of her life, decided that she “wanted to move out and get away from [her] parents and be on [her] own.” Young and a friend, Ashley Springer, also a minor at the time, signed a contract for the lease of an apartment with Phillip Weaver on September 20, 2001. No adult signed the lease as a guarantor. Young was employed on a full-time basis at a Lowe’s hardware store at the time she entered into the lease agreement. Young paid a security deposit in the amount of \$300; the rent for the apartment was \$550 per month, and the lease was set to expire on July 31, 2002. Young and Springer moved into the apartment in late September and, together, paid rent at the agreed-upon rate for the portion of that month in which they lived in the apartment. Young and Springer continued to live in the apartment during October and most of November 2001. Young moved out near the end of November and returned to live with her parents. Young paid the full amount of her portion of the rent for October and November, but she stopped making any rent payments after she moved out of the apartment. Young had a dog that stayed in the apartment with the roommates, and the dog damaged part of the floor and the bathroom door in the apartment, causing \$270 in damage. Young did not pay for this damage before vacating the apartment. Weaver managed to rent the apartment to someone else in June 2002. Weaver filed a claim against Young in Small Claims, seeking damages for the unpaid rent and the damage done by Young’s dog to the apartment. The court ruled in favor of Weaver and awarded \$1,370 in damages. Young appealed the decision to the Tuscaloosa Circuit Court, which tried the case and also entered a judgment in favor of Weaver and awarded him \$1,095, the amount of Young’s share of the unpaid rent for December 2001 and January and February 2002, as well as the \$270 in damage caused by Young’s dog. Young appealed.

Murdock, Judge

Young argues on appeal that the apartment was not a “necessity” and that, therefore, as a minor, she was not legally bound by the lease and owes Weaver nothing. Under Alabama law, one who is unmarried and has not reached the age of 19 years is deemed to be a minor. It is a well-established general rule at common-law, and recognized in this state, that a minor is not liable on any contract he makes and that he may disaffirm the same. Alabama law, like the law of most other states, provides that persons providing “necessaries” of life to minors may recover the reasonable value of such necessities irrespective of the existence, or nonexistence, of a voidable contract respecting those necessities.

Determining whether the subject of a contract is a necessity to a minor entails a two-step analysis. First, a court must determine whether the subject of the contract is generally considered a necessity. If the subject is so considered, then it is for the fact-finder to determine, on the particular facts and circumstances of the case, whether the subject of the contract is, in fact, a necessity to that minor. The first inquiry is a question of law; the second inquiry entails a factual determination.

There is little question that, in general, lodging is considered a necessity. Typical necessities include things for bodily need—food, support and maintenance, clothing, medicine and medical attention, and lodging. Thus, the question in this case is whether the trial court erred in concluding as a factual matter that the apartment leased by Young was a necessity for her. Young contends that the apartment was not a necessity to her because, she argues, her parents did not “kick” her out of their house and they kept her room waiting so that she could return

to their home at any time. Young’s father testified that every time he talked to his daughter on the telephone while she lived in the apartment he asked her to move back in with them; he also testified that he was willing to take Young back at any time. In essence, because Young’s parents were able and willing to house Young at the same time she contracted to lease the apartment, Young argues that in this case the particular lodging at issue was not a necessity.

Several authorities from other states support this position. *Webster Street Partnership, Ltd. v. Sheridan* (Neb. 1985), involved facts similar to those in this case. In *Sheridan*, two minor boys signed a lease with a real estate company for an apartment in mid-September 1982. The lease was to last through mid-August 1983. The boys paid the required rent for September and October, but in mid-November they found themselves financially unable to make that month’s rental payment. Because they were unable to pay, the boys vacated the premises. The real estate company sued the boys to obtain damages for unpaid rent and expenses for November and December of the previous year. The boys denied any liability based on their status as minors. The Nebraska Supreme Court noted that “[j]ust what are necessities, however, has no exact definition. The term is flexible and varies according to the facts of each individual case.” The court then observed that the evidence showed that the two boys “were living away from home, apparently with the understanding that they could return home at any time,” and that “[i]t would therefore appear that neither [minor] was in need of shelter but, rather, had chosen to voluntarily leave home, with the understanding that they could return whenever they desired.” Based on this evidence,

the Nebraska Supreme Court ruled that the apartment was not a necessity.

Likewise, in *Ballinger v. Craig* (Ohio Ct. App. 1933), the defendants were husband and wife and were minors at the time they purchased a house trailer. Both were employed. However, before they purchased the trailer, the defendants were living with the parents of the husband. The Ohio Court of Appeals ruled that under the facts presented the house trailer was not a necessity, reasoning that “to enable an infant to contract for articles as necessities, he must have been in actual need of them, and obliged to procure them for himself. They are not necessities as to him, however necessary they may be in their nature, if he was already supplied with sufficient articles of the kind, or if he had a parent or guardian who was able and willing to supply them.”

As discussed above, Young’s parents were willing and able to provide lodging for their daughter at the time she rented the apartment from Weaver. Given the authorities cited above and the particular facts of this case, we conclude that the trial court erred in its determination that the apartment in question was a necessity for Young. Therefore, as a minor, Young is not legally bound under the lease agreement. This result may seem unjust in some ways, but as the Supreme Court observed: “The law has fixed its policy with reference to the protection of infants with regard to their contracts, and those who deal with them, except when actually supplying them with necessities, deal with them at their peril.”

Reversed and remanded in favor of Young.

Effect of Misrepresentation of Age It is not unheard of for a minor to occasionally pretend to be older than he is. The normal rules dealing with the minor’s right to disaffirm and his duties upon disaffirmance can be affected by a minor’s misrepresentation of his age.³ Suppose, for example, that Jones, age 17, wants to lease a car from Acme Auto Rentals, but knows that Acme rents only to people who are at least 18. Jones induces Acme to lease a car to him by showing a false identification that represents his age to be 18. Acme relies on the misrepresentation. Jones wrecks the car, attempts to disaffirm the contract, and asks for the return of his money. What is the effect of Jones’s misrepresentation? State law is not uniform on this point.

The traditional rule was that a minor’s misrepresentation about his age did not affect his right to disaffirm and did not create any obligation to reimburse the adult for damages or pay for benefits received. The theory behind this rule is that one who lacks capacity cannot acquire it merely by claiming to be of legal age. As you can imagine, this traditional approach does not “sit well” with modern courts, at least in those cases in which the adult has dealt with the minor fairly and in good faith, because it creates severe hardship for innocent adults who have relied on minors’ misrepresentations of age.

State law today is fairly evenly divided among those states that take the position that the minor who misrepresents his age will be *estopped* (prevented) from asserting

his infancy as a defense and those that will allow a minor to disaffirm regardless of his misrepresentation of age. Among the states that allow disaffirmance despite the minor’s misrepresentation, most hold the disaffirming minor responsible for the losses suffered by the adult, either by allowing the adult to counterclaim against the minor for the tort of deceit or by requiring the minor to reimburse the adult for use or depreciation of his property.

Capacity of Mentally Impaired Persons

Theory of Incapacity Like minors, people who suffer from a mental illness or defect are at a disadvantage in their ability to protect their own interests in the bargaining process. Contract law makes their contracts either void or voidable to protect them from the results of their own impaired perceptions and judgment and from others who might take advantage of them.

Test for Mental Incapacity Incapacity on grounds of mental illness or defect, which is often referred to in cases and texts as “insanity,” encompasses a broad range of causes of impaired mental functioning, such as mental illness, brain damage, mental retardation, or senility. The mere fact that a person suffers from some mental illness or defect does not necessarily mean that he lacks capacity to contract, however. He could still have full capacity unless the defect or illness affects the particular transaction in question.

³You might want to refer back to Chapter 13 to review the elements of misrepresentation.

The usual test for mental incapacity is a *cognitive* one; that is, courts ask whether the person had sufficient mental capacity to understand the nature and effect of the contract. Some courts have criticized the traditional test as unscientific because it does not take into account the fact that a person suffering from a mental illness or defect might be unable to *control* his conduct. Section 15 of the *Restatement (Second) of Contracts* provides that a person's contracts are voidable if he is unable to *act* in a reasonable manner in relation to the transaction and the other party has reason to know of his condition. Where the other party has reason to know of the condition of the mentally impaired person, the *Restatement (Second)* standard would provide protection to people who understood the transaction but, because of some mental defect or illness, were unable to exercise appropriate judgment or to control their conduct effectively.

The Effect of Incapacity Caused by Mental Impairment

The contracts of people who are suffering from a mental defect at the time of contracting are usually considered to be *voidable*. In some situations, however, severe mental or physical impairment may prevent a person from even being able to manifest consent. In such a case, no contract could be formed.

As mentioned at the beginning of this chapter, contract law makes a distinction between a contract involving a person who has been *adjudicated* (judged by a court) incompetent at the time the contract was made and a contract involving a person who was suffering from some mental impairment at the time the contract was entered but whose incompetency was not established until *after* the contract was formed. If a person is under guardianship at the time the contract is formed—that is, if a court has found a person mentally incompetent after holding a hearing on his mental competency and has appointed a guardian for him—the contract is considered *void*. You

will see an example of this in the following *Kenai Chrysler v. Denison* case. On the other hand, if *after* a contract has been formed, a court finds that the person who manifested consent lacked capacity on grounds of mental illness or defect, the contract is usually considered *voidable* at the election of the party who lacked capacity (or his guardian or personal representative).

The Right to Disaffirm If a contract is found to be voidable on the ground of mental impairment, the person who lacked capacity at the time the contract was made has the right to disaffirm the contract. A person formerly incapacitated by mental impairment can ratify a contract if he regains his capacity. Thus, if he regains capacity, he must disaffirm the contract unequivocally within a reasonable time, or he will be deemed to have ratified it.

As is true of a disaffirming minor, a person disaffirming on the ground of mental impairment must return any consideration given by the other party that remains in his possession. A person under this type of mental incapacity is liable for the reasonable value of necessities in the same manner as are minors. Must the incapacitated party reimburse the other party for loss, damage, or depreciation of nonnecessaries given to him? This is generally said to depend on whether the contract was basically fair and on whether the other party had reason to be aware of his impairment. If the contract is fair, bargained for in good faith, and the other party had no reasonable cause to know of the incapacity, the contract cannot be disaffirmed unless the other party is placed in *status quo* (the position she was in before the creation of the contract). However, if the other party had reason to know of the incapacity, the incapacitated party is allowed to disaffirm without placing the other party in *status quo*. This distinction discourages people from attempting to take advantage of mentally impaired people, but it spares those who are dealing in good faith and have no such intent.

Kenai Chrysler Center, Inc. v. Denison

167 P.3d 1240 (Alaska Sup. Ct. 2007)

David Denison is a developmentally disabled young man who has been under the legal guardianship of his parents since 1999, when he turned 18. In October 2002, David was living in his own apartment, but his parents strictly controlled his finances. They visited him at least once each week to make sure he had a clean and safe place to live and was budgeting his food money properly. They also visited him socially several times every week and spoke with him nearly every day.

The Denisons first learned that David wanted to buy a car when David called his father, Michael, from Kenai Chrysler and asked him to cosign for a used car; David did not tell his father where he was when he called. Michael refused to cosign. The next day, David again tried to purchase a car from Kenai Chrysler. This time, he was trying to buy a new car, a Dodge

Neon, which he could finance without a cosigner. David called his mother, Dorothy, to ask for money for a down payment. Dorothy refused and told him not to buy a car. She assumed her word would be final because she did not realize that David could obtain any appreciable amount of money with his debit card. David used his debit card and bought the Neon. Kenai Chrysler charged a total price of \$17,802, including taxes, fees, and extended service plan. Kenai Chrysler gave David credit for trading in his 1994 Pontiac Grand Am, and applied a \$2,000 factory rebate to the down payment, which allowed David to buy the new Neon with only \$500 in cash. Kenai Chrysler financed the remaining \$12,851.77 at 11.99 percent APR for five years.

One or two days after David signed the contract, Dorothy came to Kenai Chrysler with David and informed the salesman who had sold the car to David and a Kenai Chrysler manager that David was under the legal guardianship of his parents and had no legal authority to enter into a contract to buy the Neon. Dorothy showed the manager David's guardianship papers and asked him to take back the car. The manager refused; according to Dorothy, he told her that Kenai Chrysler would not take back the car, and that the company sold cars to "a lot of people who aren't very smart." Dorothy insisted that the contract was void, but the Kenai Chrysler manager ignored her and handed the keys to David over Dorothy's objection. David drove off in the new car. Dorothy contacted Duane Bannock, the general manager of Kenai Chrysler, the next day; he told her that he had seen the guardianship papers, but he still thought that the contract was valid and that David was bound by it.

A couple of days after Kenai Chrysler gave David the keys, David damaged the Neon in a one-car accident. The Denisons then managed to get the car away from David and return it to Kenai Chrysler, but six days later, when David called Kenai Chrysler to ask for his Pontiac back, someone at the dealership told him that he could not have it but could pick up his new car any time. David got a ride to Kenai Chrysler and picked up the Neon. The next day the Denisons were able to convince David to return the car to Kenai Chrysler yet again, and this time he left the car there.

While they were trying to handle the immediate challenge of returning the Neon to Kenai Chrysler and preventing anyone there from giving it back to David, the Denisons also sought legal advice about the validity of the contract. They consulted the Alaska State Association for Guardianship and Advocacy and the Disability Law Center; advocates at both offices confirmed Dorothy's belief that the contract was void. Michael Denison also contacted the court-appointed investigator for David's guardianship case. The investigator contacted Kenai Chrysler's general manager, Bannock, and advised Bannock that the guardianship did indeed make the contract legally void; Bannock refused to listen to the advice. An advocate from the Disability Law Center contacted Robert Favretto, the owner of Kenai Chrysler, on the Denisons' behalf. Favretto would not listen to the advocate's advice. Despite these contacts, Kenai Chrysler sought no legal advice concerning the validity of the sales contract until November 15, a full month after the sale.

During this time, Kenai Chrysler continued in its active efforts to enforce the contract. The company promptly assigned David's loan to the General Motors Acceptance Corporation (GMAC) but never informed GMAC of David's incapacity. It also demanded storage fees from David for keeping the Neon on its lot. It sold David's Pontiac trade-in on the same day the Denisons brought the Neon back for the second time, even though the Denisons were still contesting the sale. GMAC eventually repossessed the Neon and sold it, resulting in a deficiency on the loan. After the Denisons' attorney informed GMAC of David's guardianship, GMAC agreed to treat the loan as uncollectible. Kenai Chrysler paid GMAC the deficiency without asking whether GMAC intended to collect the loan.

The Denisons sued the company, seeking a judgment declaring that the sales contract was void because of the guardianship and seeking additional relief. Kenai Chrysler counterclaimed for restitution, including reimbursement for paying the deficiency to GMAC. The Denisons moved for summary judgment on their claim for declaratory relief and the trial court granted it. Kenai Chrysler appealed.

Bryner, Chief Justice

The Denisons moved for summary judgment on their claim for a declaratory judgment that the contract between David and Kenai Chrysler was void and not merely voidable. On appeal, Kenai Chrysler contests the order granting summary judgment. Kenai Chrysler points out that Alaska has not expressly held that a valid guardianship order automatically

voids an attempt by the ward to create a binding contract. In Kenai Chrysler's view, the party contracting with the ward should at least be entitled to restitution; and in any event, Kenai Chrysler maintains, factual issues existed here as to the validity of David's guardianship.

These arguments lack merit. Under the *Restatement (Second) of Contracts*, the existence of a valid legal guardianship

precludes the formation of a valid contract with the guardian-ship's ward. In keeping with the *Restatement's* view, we ruled in *Pappert v. Sargent* that a party who attempted to enter into a contract with a ward would be entitled to restitution only in the absence of actual or constructive knowledge of the ward's incompetence. Kenai Chrysler nevertheless cites *Pappert* as a case supporting its position that a genuine issue of material fact existed as to whether the dealership had notice of David's guardianship. But Kenai Chrysler misreads *Pappert*. The incompetent party in *Pappert* was not under a legal guardianship, and the circumstances of the disputed transaction in that case failed to create any reason to suspect incompetence. By contrast, in the present case, David Denison was a ward under a formal guardianship order that declared him incompetent to enter into a contract. And under the *Restatement (Second) of Contracts*, the guardianship order gave notice to the public of David's incapacity:

The guardianship proceedings are treated as giving public notice of the ward's incapacity and establish his status with respect to transactions during guardianship even though the other party to a particular transaction may have no knowledge or reason to know of the guardianship: the guardian is not required to give personal notice to all persons who may deal with the ward. *Restatement (Second) of Contracts* § 13, cmt. a(1981).

Since Kenai Chrysler had constructive notice of David's incapacity, it was not entitled to restitution.

Kenai Chrysler's position also ignores Alaska's territorial case law. In *The Emporium v. Boyle*, the Alaska territorial court followed opinions from several states recognizing that an adjudication of insanity is notice to all the world of the fact that from that time on neither the lunatic nor his estate can be held upon any contract except those completed before that time. Applying this principle, the court in *The Emporium* held that a letter of credit authorizing another person to purchase goods on account was automatically revoked when the person who wrote the letter was declared incompetent. This conclusion was justified, the court explained, "because the world was charged with notice of the adjudication." Based on these authorities, we conclude that the superior court correctly interpreted and applied the law.

The *Restatement* makes it clear that a ward does not regain the ability to enter into a contract merely by having a "lucid interval"; instead, to establish restored ability to enter into a contract, the evidence must show that the guardianship was "terminated or abandoned." Although Kenai Chrysler argues here that evidence of the Denisons' neglect might have supported a finding of restored capacity, the *Restatement's* standard requires more than a showing of mere neglect. The *Restatement* refers to

the termination of a guardianship occurring by death or removal of the guardian, or by lapse where the "ward resumes full control of his property without interference over a substantial period of time."

To support its claim that the Denisons abandoned David as their ward, Kenai Chrysler alleges that the Denisons (1) failed to produce evidence that they had filed a visitor report as required by [Alaska law]; (2) allowed David to use his own bank account; (3) permitted David to work in a retail establishment where he used a cash register; (4) failed to prevent David from entering into the Dodge Neon transaction; (5) failed to inform Kenai Chrysler promptly of the guardianship's existence; (6) failed to prevent David from driving the Neon; and (7) failed to appoint a conservator for David when they encountered trouble controlling his purchases. But these circumstances fail to raise a genuine question of material fact on the issue of abandonment. The absence of a routine report hardly amounts to abandonment. Nor can abandonment be shown by evidence suggesting that the Denisons encouraged David to act independently. To the contrary, the terms of David's guardianship order instructed his guardians to encourage David to be as independent as possible while still protecting him. Allowing David a bank account and a job falls squarely within the scope of these instructions by encouraging David's development. Furthermore, the guardianship order did not oblige the Denisons to watch David's every movement in order to prevent him from trying to enter into contracts. Instead, as we have already observed, the guardianship order itself gave legal notice to all potential contracting parties to avoid entering into a bargain with David. Accordingly, neither the Denisons' failure to prevent the Kenai Chrysler contract nor their failure to give Kenai Chrysler advance warnings could reasonably be construed to imply abandonment of the guardianship.

We also note that Dorothy Denison unequivocally informed Kenai Chrysler of the guardianship within two days of the sale, when she tried to return the car. And in any event, the Denisons' inability to prevent David from driving the Neon after Kenai Chrysler refused to accept the car has no bearing on the guardianship's validity earlier, or when David actually signed the contract. Finally, the Denisons' supposed inability to control David's spending does not reasonably suggest an abandonment; the uncontradicted evidence of their ongoing efforts to control David's finances shows just the opposite. The Denisons are David's guardians, not his guarantors. We thus affirm the superior court's summary judgment order declaring the contract void as a matter of law.

Affirmed in favor of the Denisons.

Contracts of Intoxicated Persons

Intoxication and Capacity Intoxication (either from alcohol or the use of drugs) can deprive a person of capacity to contract. The mere fact that a party to a contract had been drinking when the contract was formed would *not* normally affect his/her capacity to contract, however. Intoxication is a ground for lack of capacity only when it is so extreme that the person is unable to understand the nature of the business at hand. Section 16 of the *Restatement (Second) of Contracts* further provides that intoxication is a ground for lack of capacity only if *the other party has reason to know* that the affected person is so intoxicated that he/she cannot understand or act reasonably in relation to the transaction.

The rules governing the capacity of intoxicated persons are very similar to those applied to the capacity of people who are mentally impaired. The basic right to disaffirm contracts made during incapacity, the duties upon disaffirmance, and the possibility of ratification upon regaining capacity are the same for an intoxicated person as for a person under a mental impairment. In practice, however, courts traditionally have been less sympathetic with a person who was intoxicated at the time of contracting than with minors or those suffering from a mental impairment. It is rare for a person to actually escape his contractual obligations on the ground of intoxication. A person incapacitated by intoxication at the time of contracting might nevertheless be bound to his/her contract if he/she fails to disaffirm in a timely manner.

Problems and Problem Cases

- Williams was 18 years old when she was admitted to Baptist Health Systems for treatment of serious health conditions. The age of majority for contracting in Williams's state was 19. Williams was hospitalized for two days, during which she had a variety of medical procedures and tests. At this time, Williams had been admitted to college and was awaiting enrollment, did not work, had no source of income, and was dependent on her mother to provide support. According to her, she believed that she was covered by her mother's health insurance, and that is what she told the hospital, but in fact, she was not covered. Williams's mother was listed in the hospital records as "guarantor." The hospital bill was \$12,144. Williams's mother did not pay the bill. The hospital sued both Williams and her mother for the principal amount plus interest. Was Williams legally obligated to pay the bill, despite the fact that she was a minor when the contract was formed?
- Robertson, while a minor, contracted to borrow money from his father for a college education. His father mortgaged his home and took out loans against his life insurance policies to get some of the money he lent to Robertson, who ultimately graduated from dental school. Two years after Robertson's graduation, his father asked him to begin paying back the amount of \$30,000 at \$400 per month. Robertson agreed to pay \$24,000 at \$100 per month. He did this for three years before stopping the payments. His father sued for the balance of the debt. Could Robertson disaffirm the contract?
- Green, age 16, contracted to buy a Camaro from Star Chevrolet. Green lived about six miles from school and one mile from his job, and used the Camaro to go back and forth to school and work. When he did not have the car, he used a car pool to get to school and work. Several months later, the car became inoperable with a blown head gasket, and Green gave notice of disaffirmance to Star Chevrolet. Star Chevrolet refused to refund the purchase price, claiming, in part, that the car was a necessary. Was it?
- In 1987, Hauer suffered a brain injury in a motorcycle accident. She was subsequently adjudicated to be incompetent, resulting in a guardian being appointed by the court. On September 20, 1988, Hauer's guardianship was terminated based upon a letter from her treating physician, who opined that Hauer had recovered to the point where she had ongoing memory, showed good judgment, was reasonable in her goals and plans, and could manage her own affairs. Her monthly income after the accident was \$900, which consisted of Social Security disability and interest income from a mutual fund worth approximately \$80,000. Around June of 1989, Hauer met Eilbes. Eilbes had been trying to raise sufficient funds for a new business venture. He had borrowed some money from Union State Bank but had been unable to borrow

as much as he needed and had defaulted on the loan. Hauer's daughter told Eilbes about the existence of Hauer's mutual fund. Eilbes subsequently discussed his business with Hauer on several occasions and Hauer expressed an interest in becoming an investor in the business. Because Hauer could only sell her stocks at certain times, Eilbes suggested that she take out a short-term loan using the stocks as collateral. Eilbes told Hauer that if she loaned him money, he would give her a job, pay her interest on the loan, and pay the loan when it came due. Hauer agreed. Eilbes then contacted Schroeder, assistant vice president of Union State Bank, and told Schroeder that Hauer wanted to invest in his business but that she needed short-term financing and could provide adequate collateral. Eilbes told Schroeder that he would use the money invested by Hauer in part to either bring the payments current on his defaulted loan or pay the loan off in full. Schroeder then called Hauer's stockbroker and financial consultant, Landolt, in an effort to verify the existence of Hauer's fund. Landolt told Schroeder that Hauer needed the interest income to live on and that he wished the bank would not use it as collateral for a loan. Schroeder also conceded that it was possible that Landolt told him that Hauer was suffering from brain damage, but did not specifically recall that part of their conversation. At some later date Eilbes met personally with Schroeder in order to further discuss the potential loan to Hauer, after which Schroeder indicated that the bank would be willing to loan Hauer \$30,000. Schroeder gave Eilbes a loan application to give to Hauer to fill out. In October 1989, Hauer and Eilbes went to the Bank to meet with Schroeder and sign the necessary paperwork to borrow \$30,000. Prior to this date, Schroeder had not spoken to or met with Hauer. During this meeting Schroeder explained the terms of the loan to Hauer: that she would sign a consumer single-payment note due in six months and give the bank a security interest in her mutual fund as collateral. Schroeder did not notice anything that would cause him to believe that Hauer did not understand the loan transaction. In April 1990, the date on which the loan matured, Hauer filed suit against the bank and Eilbes. Hauer's testimony indicated a complete lack of understanding of the nature and consequences of the transaction. Also, Hauer's psychological expert testified that when he treated her in 1987, Hauer was "very deficient in her cognitive abilities, her abilities to remember and to read, write and spell . . . she was very malleable,

gullible, people could convince her of almost anything." He further testified that because Hauer's condition had not changed in any significant way by 1990 when he next evaluated her, she was "incompetent and . . . unable to make reasoned decisions" on the date she made the loan. Was the loan contract voidable?

5. At a time when the age of majority in Ohio was 21, Lee, age 20, contracted to buy a 1964 Plymouth Fury for \$1,552 from Haydocy Pontiac. Lee represented herself to be 21 when entering the contract. She paid for the car by trading in another car worth \$150 and financing the balance. Immediately following delivery of the car to her, Lee permitted one John Roberts to take possession of it. Roberts delivered the car to someone else, and it was never recovered. Lee failed to make payments on the car, and Haydocy Pontiac sued her to recover the car or the amount due on the contract. Lee repudiated the contract on the ground that she was a minor at the time of purchase. Can Lee disaffirm the contract without reimbursing Haydocy Pontiac for the value of the car?
6. On or about December 8, 1989, Joseph Muller and Tina Muller, who are brother and sister, both signed a loan application with CES Credit Union. Tina was seeking the loan so that she could purchase Joseph's 1987 Buick Skylark. The loan application indicated that Joseph's birth date was February 10, 1972, and indicated that he had an automobile loan with BancOhio in the amount of \$7,200 that would be paid off if the loan to Tina was approved. Once the loan application was approved, both Joseph and Tina Muller signed the loan contract. While Tina signed the contract on December 26, 1989, as the debtor, Joseph, on December 22, 1989, signed as a co-signor. At this time, Joseph was two months shy of his eighteenth birthday and the age of majority for contracting in his state was 18. The amount of the loan was \$6,160.00. Joseph then transferred the Buick Skylark to his sister and his auto loan with BancOhio was paid off. Tina later defaulted on the loan, the Skylark was repossessed and sold at auction, leaving a balance of \$4,915.73 owing to the credit union. In January 2003, the credit union sued Tina and Joseph seeking a judgment against them for the remaining principal and interest. Joseph defended on the ground that he was a minor when he signed the contract and that he therefore lacked capacity to contract. Is this a good argument?

7. In 1984, when Andrew Kavovit was 12 years of age, he and his parents entered into a contract with Scott Eden Management whereby Scott Eden became the exclusive personal manager to supervise and promote Andrew's career in the entertainment industry. This agreement ran from February 8, 1984, to February 8, 1986, with an extension for another three years to February 8, 1989. It provided that Scott Eden was entitled to a 15 percent commission on Andrew's gross compensation. It stated, "With respect to contracts entered into by [Andrew] . . . during the term of this agreement . . . [Scott Eden] shall be entitled to [its] commission from the residuals or royalties of such contracts, the full term of such contracts, including all extensions or renewals thereof, notwithstanding the earlier termination of this agreement." In 1986, Andrew signed an agency contract with the Andreadis Agency, a licensed agent selected by Scott Eden pursuant to industry requirements. This involved an additional 10 percent commission. Thereafter, Andrew signed several contracts for his services. The most important contract, from a financial and career point of view, secured a role for Andrew on *As the World Turns*, a long-running television soap opera. Income from this employment contract appears to have begun on December 28, 1987, and continued through December 28, 1990, with a strong possibility for renewal. One week before the contract with Scott Eden was to expire, Andrew's attorney notified Scott Eden that his "clients hereby disaffirm the contract on the grounds [sic] of infancy." Up until then, the Andreadis Agency had been forwarding Scott Eden its commissions, but by letter of February 4, 1989, Andrew's father advised Andreadis that Andrew's salary would go directly to Andrew and that he would send Andreadis its 10 percent. No further

commissions were sent to Scott Eden. Was Scott Eden legally entitled to commissions for contracts entered into by Andrew during the term of his contract with Scott Eden?

8. In October 1995, Mitchell, a 17-year-old married minor, was injured in an auto accident while riding in a car owned by her father and driven by her husband. Subsequently, while Mitchell was still 17, she signed a release with State Farm Mutual Automobile Insurance Co. to settle her bodily injury claims for \$2,500. No guardian or conservator was appointed at the time Mitchell signed this release. Mitchell then claimed that the release was voidable because she lacked capacity at the time she signed it. State Farm argued that the release was enforceable because she was married at the time she signed it. Will Mitchell be able to disaffirm the contract?
9. A boy bought an Ernie Banks rookie card for \$12 from an inexperienced clerk in a baseball card store owned by Johnson. The card had been marked "1200," and Johnson, who had been away from the store at the time of the sale, had intended the card to be sold for \$1,200, not \$12. Can Johnson get the card back by asserting the boy's lack of capacity?

chapter 15

ILLEGALITY

Wilson had been licensed to practice architecture in Hawaii, but his license lapsed in 1971 because he had failed to pay a required \$15 renewal fee. A Hawaii statute provides that any person who practices architecture without having been registered and “without having a valid unexpired certificate of registration . . . shall be fined not more than \$500 or imprisoned not more than one year, or both.” In 1972, Wilson performed architectural and engineering services for Kealakekua Ranch, and billed the Ranch over \$33,000 for the work.

- Is this a legal contract?
- Would it matter if Wilson had never met the licensing requirements to be licensed in Hawaii?
- Is Kealakekua Ranch required to pay Wilson anything for his work?
- Is it ethical for the Ranch to refuse to pay Wilson, even if he is unlicensed?

ALTHOUGH THE PUBLIC INTEREST normally favors the enforcement of contracts, there are times when the interests that usually favor the enforcement of an agreement are subordinated to conflicting social concerns. As you read in Chapter 13, Reality of Consent, and Chapter 14, Capacity to Contract, for example, people who did not truly consent to a contract or who lacked the capacity to contract have the power to cancel their contracts. In these situations, concerns about protecting disadvantaged persons and preserving the integrity of the bargaining process outweigh the usual public interest in enforcing private agreements. Similarly, when an agreement involves an act or promise that violates some legislative or court-made rule, the public interests threatened by the agreement outweigh the interests that favor its enforcement. Such an agreement will be denied enforcement on the ground of *illegality*, even if there is voluntary consent between two parties who have capacity to contract.

Meaning of Illegality

When a court says that an agreement is illegal, it does not necessarily mean that the agreement violates a criminal law, although an agreement to commit a crime is one type of illegal agreement. Rather, an agreement is illegal either because the legislature has declared that particular type of contract to be unenforceable or void or because

the agreement violates a **public policy** that has been developed by courts or that has been manifested in constitutions, statutes, administrative regulations, or other sources of law.

The term *public policy* is impossible to define precisely. Generally, it is taken to mean a widely shared view about what ideas, interests, institutions, or freedoms promote public welfare. For example, in our society, there are strong public policies favoring the protection of human life and health, free competition, and private property. Judges' and legislators' perceptions of desirable public policy influence the decisions they make about the resolution of cases or the enactment of statutes. Public policy may be based on a prevailing moral code, on an economic philosophy, or on the need to protect a valued social institution such as the family or the judicial system. If the enforcement of an agreement would create a threat to a public policy, a court may determine that it is illegal.

Determining Whether an Agreement Is Illegal

If a statute states that a particular type of agreement is unenforceable or void, courts will apply the statute and refuse to enforce the agreement. Relatively few such statutes exist, however. More frequently, a legislature will forbid certain conduct but will not address the enforceability of contracts that involve the forbidden

conduct. In such cases, courts must determine whether the importance of the public policy that underlies the statute in question and the degree of interference with that policy are sufficiently great to outweigh any interests that favor enforcement of the agreement.

In some cases, it is relatively easy to predict that an agreement will be held to be illegal. For example, an agreement to commit a serious crime is certain to be illegal. However, the many laws enacted by legislatures are of differing degrees of importance to the public welfare. The determination of **illegality** would not be so clear if the agreement violated a statute that was of relatively small importance to the public welfare. For example, in one Illinois case,¹ a seller of fertilizer failed to comply with an Illinois statute requiring that a descriptive statement accompany the delivery of the fertilizer. The sellers prepared the statements and offered them to the buyers but did not give them to the buyers at the time of delivery.

¹*Amoco Oil Co. v. Toppert*, 56 Ill. App. 3d 1294 (Ill. Ct. App. 1978).

The court enforced the contract despite the sellers' technical violation of the law because the contract was not seriously injurious to public welfare. You will see that approach in the *Riggs* case later in this chapter.

Similarly, the public policies developed by courts are rarely absolute; they, too, depend on a balancing of several factors. In determining whether to hold an agreement illegal, a court will consider the importance of the public policy involved and the extent to which enforcement of the agreement would interfere with that policy. They will also consider the seriousness of any wrongdoing involved in the agreement and how directly that wrongdoing was connected with the agreement.

For purposes of our discussion, illegal agreements will be classified into three main categories: (1) agreements that violate statutes, (2) agreements that violate public policy developed by courts, and (3) unconscionable agreements and contracts of adhesion.

You will see the court grapple with conflicting public policies in deciding the following *Coma Corporation* case.

Coma Corporation v. Kansas Department of Labor 154 P.3d 1080 (Kan. Sup. Ct. 2007)

Cesar Martinez Corral was an undocumented worker who was not legally permitted to work in the United States. He was nevertheless employed by Coma Corporation, which did business as Burrito Express. Corral stated that Coma's manager, Luis Calderon, had agreed to pay him \$6 per hour, with payment made weekly. Corral maintained that he worked 50 to 60 hours per week, 6 or 7 days per week, but that he was paid "\$50 or \$60 bucks a week."

Coma fired Corral, and Corral filed a claim with the Kansas Department of Labor for earned but unpaid wages under the Kansas Wage Payment Act. He was awarded a total of \$7,657 against Coma and its president. Coma filed a petition for judicial review of final order. The district court held that the employment contract was illegal due to Corral's status as an undocumented worker and remanded to the Kansas Department of Labor for recalculation at the applicable minimum wage. The Kansas Department of Labor appealed.

Nuss, Judge

Coma argues that Corral's employment contract was illegal and unenforceable because he is an illegal alien. Intertwined with this argument is another: Coma claims that federal immigration law preempts the Kansas Wage Payment Act. Coma's purported trumping argument is based upon [The Immigration Reform and Control Act (IRCA)], which makes employment of unauthorized aliens illegal. Preemption, however, is not presumed. It is well established that the states enjoy broad authority under their police powers to regulate employment relationships to protect workers within the state. Minimum and other wage laws and workmen's compensation law are only a few examples of the exercise of this broad authority. We conclude that under this case's facts, Coma has not overridden the presumption against

federal preemption. Finally, we agree with the rationale set forth in *Flores v. Amigon*, where the court granted Fair Labor Standards Act protections to an undocumented worker and determined that payment of unpaid wages for work actually performed furthers the federal immigration policy:

Indeed, it is arguable that enforcing the FLSA's provisions requiring employers to pay proper wages to undocumented aliens when the work had been performed actually furthers the goal of the IRCA, which requires the employer to discharge any worker upon discovery of the worker's undocumented alien status. If employers know that they will not only be subject to civil penalties when they hire illegal aliens, but they will also be required to pay them at the same rates as legal workers for work actually performed, there are

virtually no incentives left for an employer to hire an undocumented alien in the first instance. Whatever benefit an employer might have gained by paying less than the minimum wage is eliminated and the employer's incentive would be to investigate and obtain proper documentation from each of his workers.

Coma also asserts that Corral's employment contract is illegal under state law. Specifically, it argues that Kansas Department of Labor regulations require that a contract of employment contain lawful provisions in order to be enforceable. Coma reasons that because Corral does not have a legal right to be or to work in the United States, his contract violates IRCA and is unenforceable under Kansas Department of Labor regulations and state law.

Prior to IRCA's enactment, the Alaska Supreme Court confronted the issue of whether a contract of employment entered into by a Canadian alien was barred by illegality. *Gates v. Rivers Construction Co., Inc.* The court first discussed the nature of illegal contracts:

Generally, a party to an illegal contract cannot recover damages for its breach. But as in the case of many such simplifications, the exceptions and qualifications to the general rule are numerous and complex. Thus, when a statute imposes sanctions but does not specifically declare a contract to be invalid, it is necessary to ascertain whether the legislature intended to make unenforceable contracts entered into in violation of the statute.

The *Gates* court then concluded that enforcement of the employment contract with the Canadian alien was not barred. It looked at the statutory language:

[I]t is clear that the contract involved here should be enforced. First, it is apparent that the statute itself does not specifically declare the labor or service contracts of aliens seeking to enter the United States for the purpose of performing such labor or services to be void. The statute only specifies that aliens who enter this country for such purpose, without having received the necessary certification, "shall be ineligible to receive visas and shall be excluded from admission into the United States."

The court next advanced the concept of equity and fairness to the employee:

Second, that the employer, who knowingly participated in an illegal transaction, should be permitted to profit thereby at the expense of the employee is a harsh and undesirable consequence of the doctrine that illegal contracts are not to be enforced. This result, so contrary to general considerations of equity and fairness, should be countenanced only when clearly demonstrated to have been intended by the legislature.

Finally, in a general foreshadowing of the benefit described in *Flores*, that is, of reducing employer incentives to violate the law, the *Gates* court stated:

Third, since the purpose of this section would appear to be the safeguarding of American labor from unwanted competition, the appellant's contract should be enforced, because such an objective would not be furthered by permitting employers knowingly to employ excludable aliens and then, with impunity, to refuse to pay them for their services. *Indeed, to so hold could well have the opposite effect from the one intended, by encouraging employers to enter into the very type of contracts sought to be prevented.*

We agree with Kansas Department of Labor's position concerning the strong and longtime Kansas public policy of protecting wages and wage earners. As we stated in *Burriss v. Northern Assurance Co.*, "[t]hroughout the history of this state, the protection of wages and wage earners has been a principal objective of many of our laws in order that they and the families dependent upon them are not destitute." Accordingly, we conclude that to deny or to dilute an action for wages earned but not paid on the ground that such employment contracts are "illegal," would thus directly contravene the public policy of the State of Kansas. We hold for the above reasons that the district court erred in concluding that Corral's employment contract was illegal and therefore not enforceable.

Reversed in favor of Kansas Department of Labor.

Agreements in Violation of Statute

Agreements Declared Illegal by Statute

State legislatures occasionally enact statutes that declare certain types of agreements unenforceable, void, or voidable. In a case in which a legislature has specifically

stated that a particular type of contract is void, a court need only interpret and apply the statute. These statutes differ from state to state. Some are relatively uncommon. For example, an Indiana statute declares surrogate birth contracts to be void.² Others, such as statutes setting limits on the amount of interest that can be charged for a

²Ind. Code 31-20-1-1 and 31-20-1-2.

loan or forbearance (usury statutes) and statutes prohibiting or regulating wagering or gambling are common.

Agreements That Violate the Public Policy of a Statute

As stated earlier, an agreement can be illegal even if no statute specifically states that that particular sort of agreement is illegal. Legislatures enact statutes in an effort to resolve some particular problem. If courts enforced agreements that involve the violation of a statute, they would frustrate the purpose for which the legislature passed the statute. They would also promote disobedience of the law and disrespect for the courts.

Agreements to Commit a Crime For the reasons stated above, contracts that require the violation of a criminal statute are illegal. If Grimes promises to pay Judge John Doe a bribe of \$5,000 to dismiss a criminal case against Grimes, for example, the agreement is illegal. Sometimes the very formation of a certain type of contract is a crime, even if the acts agreed on are never carried out. An example of this is an agreement to murder another person. Naturally, such agreements are considered illegal under contract law as well as under criminal law.

Agreements That Promote Violations of Statutes

Sometimes a contract of a type that is usually perfectly legal—say, a contract to sell goods—is deemed to be illegal under the circumstances of the case because it promotes or facilitates the violation of a statute. Suppose Davis sells Sims goods on credit. Sims uses the goods in some illegal manner and then refuses to pay Davis for the goods. Can Davis recover the price of the goods from Sims? The answer depends on whether Davis knew of the illegal purpose and whether he intended the sale to further that illegal purpose. Generally speaking, such agreements will be legal unless there is a direct connection between the illegal conduct and the agreement in the form of active, intentional participation in or facilitation of the illegal act. Knowledge of the other party's illegal purpose, standing alone, is generally not sufficient to render an agreement illegal. When a person is aware of the other's illegal purpose *and* actively helps to accomplish that purpose, an otherwise legal agreement—such as a sale of goods—might be labeled illegal.

Licensing Laws: Agreement to Perform an Act for Which a Party Is Not Properly Licensed

Congress and the state legislatures have enacted a variety of statutes that regulate professions and businesses. A common type of regulatory statute is one that requires a person to obtain

a license, permit, or registration before engaging in a certain business or profession. For example, state statutes require lawyers, physicians, dentists, teachers, and other professionals to be licensed to practice their professions. In order to obtain the required license, they must meet specified requirements such as attaining a certain educational degree and passing an examination. Real estate brokers, stockbrokers, insurance agents, sellers of liquor and tobacco, pawnbrokers, electricians, barbers, and others too numerous to mention are also often required by state statute to meet licensing requirements to perform services or sell regulated commodities to members of the public.

What is the status of an agreement in which one of the parties agrees to perform an act regulated by state law for which she is not properly licensed? This will often be determined by looking at the purpose of the legislation that the unlicensed party has violated. If the statute is **regulatory**—that is, the purpose of the legislation is to protect the public against dishonest or incompetent practitioners—an agreement by an unlicensed person is generally held to be unenforceable. For example, if Spencer, a first-year law student, agrees to draft a will for Rowen for a fee of \$150, Spencer could not enforce the agreement and collect a fee from Rowen for drafting the will because she is not licensed to practice law. This result makes sense, even though it imposes a hardship on Spencer. The public interest in ensuring that people on whose legal advice others rely have an appropriate educational background and proficiency in the subject matter outweighs any interest in seeing that Spencer receives what she bargained for.

On the other hand, where the licensing statute was intended primarily as a **revenue-raising** measure—that is, as a means of collecting money rather than as a means of protecting the public—an agreement to pay a person for performing an act for which she is not licensed will generally be enforced. For example, suppose that in the example used above, Spencer is a lawyer who is licensed to practice law in her state and who met all of her state's educational, testing, and character requirements but neglected to pay her annual registration fee. In this situation, there is no compelling public interest that would justify the harsh measure of refusing enforcement and possibly inflicting forfeiture on the unlicensed person.

Whether a statute is a regulatory statute or a revenue-raising statute depends on the intent of the legislature, which may not always be expressed clearly. Generally, statutes that require proof of character and skill and impose penalties for violation are considered to be regulatory in nature. Their requirements indicate that they were intended for the protection of the public. Those that

impose a significant license fee and allow anyone who pays the fee to obtain a license are usually classified as revenue raising. The fact that no requirement other than the payment of the fee is imposed indicates that the purpose of the law is to raise money rather than to protect the public. Because such a statute is not designed for the protection of the public, a violation of the statute is not as threatening to the public interest as is a violation of a regulatory statute.

It would be misleading to imply that cases involving unlicensed parties always follow such a mechanical test. In some cases, courts may grant recovery to an unlicensed

party even where a regulatory statute is violated. If the public policy promoted by the statute is relatively trivial in relation to the amount that would be forfeited by the unlicensed person and the unlicensed person is neither dishonest nor incompetent, a court may conclude that the statutory penalty for violation of the regulatory statute is sufficient to protect the public interest and that enforcement of the agreement is appropriate.

The following *Riggs* case illustrates how courts consider the degree of threat to the public interest when deciding whether to enforce a contract involving a violation of statute.

Riggs v. Woman to Woman, P.C.

812 N.E.2d 1027 (Ill. Ct. App. 2004)

In September 2000, Dr. Mary Riggs entered into a physician agreement with Woman to Woman Obstetrics and Gynecology, P.C., whereby she joined its medical practice. This agreement contained a covenant not to compete. At the time of the agreement, Woman to Woman assured Dr. Riggs in writing that the “Corporation [was] registered to practice medicine in the State of Illinois.” Dr. Riggs started working for Woman to Woman in October 2000. Dr. Riggs resigned from Woman to Woman on December 20, 2002, after she discovered that Woman to Woman allegedly had engaged in a fraudulent accounting scheme designed to reduce her compensation and that Woman to Woman was not a licensed professional corporation.

On that same date, Dr. Riggs filed suit against Woman to Woman, based on various breaches and misrepresentations allegedly made by it. Dr. Riggs also sought a declaration that she was not required to abide by the terms, including the covenant not to compete, contained in her physician agreement. Dr. Riggs claimed that Woman to Woman’s failure to register as a professional corporation with the Illinois Department of Professional Regulation (IDPR) under Illinois’s Professional Service Corporation Act rendered the agreement void. Woman to Woman counterclaimed, seeking enforcement of Dr. Riggs’s covenant not to compete.

The trial court granted Dr. Riggs’s motion for summary judgment and dismissed Woman to Woman’s counterclaim, finding that the professional registration act was intended to be regulatory for the protection of the public health and safety in the practice of medicine and that the physician agreement was void. However, finding that there was substantial ground for difference of opinion regarding its legal conclusion, the trial certified the following questions for review by the appellate court:

- (1) Whether the Act’s licensing requirements for medical corporations is intended to protect the public’s health, safety, or welfare.
- (2) Whether defendant’s failure to comply with the Act’s certificate of registration requirement rendered the employment agreement void.

Byrne, Judge

The facts pertaining to Woman to Woman’s lack of a certificate of registration from the IDPR are undisputed. Woman to Woman was originally formed as a professional corporation in July 1999. At that time, Woman to Woman’s legal counsel requested that the IDPR issue a certificate of registration for the corporation. Although Woman to Woman did not realize it at the time, the IDPR followed up on Woman to Woman’s application by requesting that some minor, technical changes be made in the application. However, Woman to Woman never received the letter from the IDPR with respect to those defects because

IDPR sent the letter to the wrong address. Around November 2002, the IDPR again sent a letter to Woman to Woman to the wrong address. This time, however, the letter was forwarded to Woman to Woman’s office. In that notice, dated November 12, 2002, the IDPR explained that Woman to Woman’s application for a certificate of registration had expired and, therefore, was denied. Woman to Woman later determined that its original application for registration was defective because the IDPR required that a suite number be added to the address and that the statement of purpose for the corporation be modified to remove the phrase “rendering the profession of obstetrics and

gynecology.” As soon as Woman to Woman discovered the circumstances relating to its original application, it promptly proceeded to file a new application and pay the necessary \$50 fee for registering with the IDPR. Ultimately, a certificate of registration was issued to Woman to Woman by the IDPR, effective January 14, 2003, after the suit was filed. The IDPR has not fined Woman to Woman, conducted any investigation, or otherwise taken any action, except to issue the new certificate of registration to Woman to Woman as a result of the inadvertent expiration of Woman to Woman’s initial application. At all times, every physician-employee of Woman to Woman has been duly licensed by the IDPR to practice medicine in the State of Illinois.

The first question we are called upon to answer is whether the Act’s licensing requirements for medical corporations is intended to protect the public’s health, safety, or welfare. We find nothing in any section of the Act that leads to this conclusion. It is clear that the function of the Act is primarily permissive, allowing professionals, who would otherwise not be entitled to enjoy the benefits of incorporating, to establish corporate entities for their professional practices. We find nothing in the Act that signifies that it was enacted for the protection of the public. Section 12 requires a corporation to pay an annual fee to renew its registration, but there are no civil or criminal penalties for noncompliance. The Act assigns only minor, administrative functions to the IDPR, whose tasks are more ministerial than regulatory. The only enforcement authority provided to the IDPR under the Act is the ability to suspend or revoke a certificate of registration or to collect an additional \$100 fee when a registrant’s certificate lapses and it continues to practice without a certificate. It is generally recognized that professional service corporation legislation, similar to the Act, arose “out of the desire of professional groups to realize the tax benefits open to employees under the qualified pension, profit-sharing, and annuity plan provisions of the Internal Revenue Code.” J. Rydstrom, *Practice by Attorneys & Physicians as Corporate Entities or Associations Under Professional Service Corporation Statutes* (2003). In addition to providing certain tax breaks, incorporation under the Act reduces potential civil liability.

Clearly, the intent of the legislature here is not to advance the public welfare but to allow professionals to incorporate in order to enjoy certain tax benefits and to reduce their potential civil liability.

Furthermore, statutes that have been interpreted as necessary for the public safety are those that have been enacted to provide assurance of adequately trained professionals, such as those statutes requiring licenses for doctors or lawyers. Indeed, the Act does not include any of the indicia of such regulatory intent, including examinations for competency. Our supreme court in *People v. Brigham* (1992) determined that a lawyer’s failure to pay his registration fee did not prevent him from providing competent legal advice. Similarly, we do not believe that a medical corporation’s failure to pay its corporate registration fees would undermine the public’s trust that its licensed doctors can practice medicine competently. Dr. Riggs appears to equate the lack of a certificate of registration under the Act to practice as a professional corporation with the lack of a license to practice medicine. Clearly, there is a difference. Those statutes requiring licenses to practice a profession are necessary for the public safety because they have been enacted to provide assurance of adequately trained professionals. A violation of the Act does not necessarily mean that the doctors lack the requisite medical skills to practice medicine. Accordingly, because we find nothing that signifies that the Act was enacted for the benefit of the health, safety, or welfare of the public, we answer the first question in the negative.

The second question we are called upon to answer is whether Woman to Woman’s failure to comply with the Act’s certificate of registration requirement rendered the employment agreement void. Dr. Riggs attempts to be excused from her contractual obligations due to Woman to Woman’s failure to register as a corporation. Dr. Riggs, no doubt, enjoyed certain corporate benefits when she was employed by Woman to Woman. To excuse Dr. Riggs from her contractual obligations due to Woman to Woman’s failure to register would be disproportionate to the wrong committed by Woman to Woman.

Certified questions answered in favor of Woman to Woman.

Agreements That May Be in Violation of Public Policy Articulated by Courts

Courts have broad discretion to articulate public policy and to decline to lend their powers of enforcement to an agreement that would contravene what they deem to be

in the best interests of society. There is no simple rule for determining when a particular agreement is contrary to public policy. Public policy may change with the times; changing social and economic conditions may make behavior that was acceptable in an earlier time unacceptable today, or vice versa. The following are examples of agreements that are frequently considered vulnerable to attack on public policy grounds.

Agreements in Restraint of Competition

The policy against restrictions on competition is one of the oldest public policies declared by the common law. This same policy is also the basis of federal and state antitrust statutes. The policy against restraints on competition is based on the economic judgment that the public interest is best served by free competition. Nevertheless, courts have long recognized that some contractual restrictions on competition serve legitimate business interests and should be enforced. Therefore, agreements that limit competition are scrutinized very closely by the courts to determine whether the restraint imposed is in violation of public policy.

If the *sole* purpose of an agreement is to restrain competition, it violates public policy and is illegal. For example, if Martin and Bloom, who own competing businesses, enter an agreement whereby each agrees not to solicit or sell to the other's customers, such an agreement would be unenforceable. Where the restriction on competition was part of (*ancillary to*) an otherwise legal contract, the result may be different because the parties may have a legitimate interest to be protected by the restriction on competition.

For example, if Martin had *purchased* Bloom's business, the goodwill of the business was part of what she paid for. She has a legitimate interest in making sure that Bloom does not open a competing business soon after the sale and attract away the very customers whose goodwill she paid for. Or suppose that Martin hired Walker to work as a salesperson in her business. She wants to assure herself that she does not disclose trade secrets, confidential information, or lists of regular customers to Walker only to have Walker quit and enter a competing business.

To protect herself, the buyer or the employer in the above examples might bargain for a contractual clause that would provide that the seller or employee agrees not to engage in a particular competing activity in a specified *geographic area* for a specified *time* after the sale of the business or the termination of employment. This type of clause is called an **ancillary covenant not to compete**, or, as it is more commonly known, a **noncompetition clause** or "**noncompete.**" Such clauses most frequently appear in *employment contracts*, *contracts for the sale of a business*, *partnership agreements*, and *small-business buy-sell agreements*. In an employment contract, the noncompetition clause might be the only part of the contract that the parties put in writing.

Enforceability of Noncompetition Clauses Although noncompetition clauses restrict competition and thereby affect the public policy favoring free competition, courts enforce them if they meet the following three criteria.

1. *Clause must serve a legitimate business purpose.* This means that the person protected by the clause must have some justifiable interest—such as an interest in protecting goodwill or trade secrets—that is to be protected by the noncompetition clause. It also means that the clause must be *ancillary* to, or part of, an otherwise valid contract. For example, a noncompetition clause that is one term of an existing employment contract would be ancillary to that contract. By contrast, a promise not to compete would not be enforced if the employee made the promise *after* he had already resigned his job, because the promise not to compete was not ancillary to any existing contract.

2. *The restriction on competition must be reasonable in time, geographic area, and scope.* Another way of stating this is that the restrictions must not be any greater than necessary to protect a legitimate interest. It would be unreasonable for an employer or buyer of a business to restrain the other party from engaging in some activity that is not a competing activity or from doing business in a territory in which the employer or buyer does not do business, because this would not threaten his legitimate interests.

3. *The noncompetition clause should not impose an undue hardship.* A court will not enforce a noncompetition clause if its restraints are unduly burdensome either on the public or on the party whose ability to compete would be restrained. In one case, for example, the court refused to enforce a noncompetition clause against a gastroenterologist because of evidence that the restriction would have imposed a hardship on patients and other physicians requiring his services.³ Noncompetition clauses in employment contracts that have the practical effect of preventing the restrained person from earning a livelihood are unlikely to be enforced as well. This is discussed further in the next section.

Noncompetition Clauses in Employment Contracts

In employment contracts, noncompetition clauses are one form of agreement that places restrictions on an employee's conduct after the employment is over. Other restrictions on employees' postemployment conduct can include **confidentiality** or **nondisclosure agreements**, which constrain the employee from divulging or using certain information gained during his employment, and **nonsolicitation agreements**, which forbid an employee from soliciting the employer's employees, clients, or

³*Iredell Digestive Disease Clinic, P.A. v. Petrozza*, 373 S.E.2d 449 (N.C. Ct. App. 1988).

customers. In many cases, employees sign all these forms of postemployment restrictions. In others, the postemployment restriction may reflect just one or two of these forms of restraints.

Restrictions on competition work a greater hardship on an employee than on a person who has sold a business. For this reason, courts tend to judge noncompetition clauses contained in employment contracts by a stricter standard than they judge similar clauses contained in contracts for the sale of a business. In some states, statutes limit or even prohibit noncompetition clauses in employment contracts. In others, there is a trend toward refusing enforcement of these clauses in employment contracts unless the employer can bring forth very good evidence that he has a protectible interest that compels enforcement of the clause. The employer can do this by showing that he has entrusted the employee with trade secrets or confidential information,

or that his goodwill with “near-permanent” customers is threatened. In the absence of this kind of proof, a court might conclude that the employer is just trying to avoid competition with a more efficient competitor and refuse enforcement because there is no legitimate business interest that requires protection.

Furthermore, many courts refuse to enforce noncompetition clauses if they restrict employees from engaging in a “common calling.” A common calling is an occupation that does not require extensive or highly sophisticated training but instead involves relatively simple, repetitive tasks. Under this common calling restriction, various courts have refused to enforce noncompetition clauses against salespersons, a barber, and an auto trim repairperson.

In the following *Nasc Services* case, the court determines whether to enjoin employees from violating their noncompete agreement.

Nasc Services, Inc. v. Jervis 2008 U.S. Dist. LEXIS 40502 (U.S. Dist. Ct. D. N.J. 2008)

Gary Russell began running a soccer camp program in 1969 and, over the years, grew his business into a large organization, Nasc Services, which does business as MLS Camps. Nasc Services and Russell (“the plaintiffs”) operate soccer camps and provide soccer instruction to youths throughout the United States. The New York–New Jersey area is one of their most active regions. In this area, plaintiffs provided soccer camp services to roughly 185 soccer clubs in the past year, accounting for approximately \$1.5 million in annual revenue.

David Jervis, Adrian Moses, Steven Jones, Simon Barrow, Benjamin Moffett, and Simon Nee (“the defendants”) are citizens of the United Kingdom and have played, taught, coached, and worked in the soccer industry most of their lives. The plaintiffs hired them to provide services for its soccer camps in the New York–New Jersey area. Each of the defendants entered into an employment contract with the plaintiffs. These employment contracts all included three relevant covenants: a covenant not to compete with the plaintiffs, a covenant not to solicit the plaintiffs’ customers, and a covenant not to disclose the plaintiffs’ confidential information.

The plaintiffs placed the defendants in positions in which they were responsible for developing and nurturing the plaintiffs’ relationships with customers in the area. Some of the defendants were stationed in Red Bull New York, a soccer organization in Secaucus, New Jersey, to which the plaintiffs provided soccer camp services. Although defendants worked at the Red Bull facilities, they were the plaintiffs’ employees. Between August and November of 2007, the defendants separated from the plaintiffs and assumed positions with the Red Bull, where they helped Red Bull launch soccer camps in the New York–New Jersey area in direct competition with their former employer. Though their specific reasons for leaving the plaintiffs differ, defendants all wished to distance themselves from Russell, MLS Camps’ owner, because of alleged mistreatment, deception, bullying, and abuse.

Plaintiffs allege that, since defendants left their employment with plaintiffs, plaintiffs have experienced an immediate drop in customers in the New York–New Jersey area. They filed a motion for a preliminary injunction to prevent the defendants from violating the noncompetition, nonsolicitation, and nondisclosure clauses of their employment contracts.

Cavanaugh, U.S. District Judge

An employer’s ongoing professional relationship with its clients is generally recognized as a legitimate business interest which may be protected through a restrictive covenant. Every employer has a patently legitimate interest in protecting his

trade secrets as well as his confidential business information and he has an equally legitimate interest in protecting his customer relationships. Plaintiffs argue that the covenants are reasonable both as to duration and geographic extent. Plaintiffs’ soccer camp business is nationwide, with special concentration

in the New York–New Jersey area. Furthermore, a two-year limitation is reasonable.

According to defendants, however, the noncompetition clauses appear to be unreasonable because they are unnecessary to protect plaintiffs' legitimate business interest. Defendants provide no unique services nor possess any extraordinary skills that could harm plaintiffs if they continue to work for the Red Bull or for any other employer in the soccer industry. Under Connecticut law, it would be an extraordinary stretch to extend mandatory injunctive relief under these circumstances. Plaintiffs nonetheless claim that the noncompetition clauses must be enforced because defendants possess allegedly confidential information concerning plaintiffs' methods of teaching soccer.

Plaintiffs have no legitimate protectable interest in preventing defendants from continuing to teach children how to play soccer. In the course of their work for MLS Camps, defendants were not exposed to information that represents a trade secret. Their jobs required them to coach, teach, organize, sell and manage youth soccer camps. There is nothing confidential about how to teach soccer. Moreover, the "secrets" of Russell's allegedly proprietary "Strengths-Based Coaching" program are readily available to anyone. For a nominal fee, anyone can sign-up *via* one of Russell's websites to purchase all of the materials necessary to master Russell's program. Russell's teaching methodology is nothing more than a collection of practices obtained from a variety of public sources. Likewise, plaintiffs' "client-list" constitutes nothing more than names of area soccer clubs who might be interested in youth programs, clinics or camps for children in their programs. It appears likely that plaintiffs' list could be easily replicated from the vast array of

information available *via* the Internet. Furthermore, plaintiffs have not submitted evidence that defendants misappropriated confidential or proprietary information. Defendants claim that they have not divulged any information to Red Bull that they acquired from plaintiffs and that they have no intention in doing so. Likewise, defendants claim that none of Red Bull's employees have asked them to disclose any of plaintiffs' information.

There are strong public policy reasons for supporting noncompetition agreements. Such legally enforceable agreements make it possible for an employer to hire and train employees, to entrust them with responsibilities and to work with them in developing marketing strategies, secure in the knowledge that they will not, having gained these confidences, take them to a competitor's establishment and turn them against their former employer. Thus, judicial enforcement of noncompetition provisions of employment contracts serves the public interest by promoting stability and certainty in business and employment relationships.

In the current case, however, the balancing of the equities supports denial of plaintiffs' application for injunctive relief. If plaintiffs' application is granted, defendants will be forced to stop working for the Red Bull and be barred from working for any comparable business in any capacity in any part of the world. Five of the six defendants will also be forced to leave the United States because their visas depend upon their employment. This would create an oppressive and unfair scenario for defendants.

Motion for preliminary injunction denied in favor of the defendants.

The Effect of Overly Broad Noncompetition Clauses

The courts of different states treat unreasonably broad noncompetition clauses in different ways. Some courts will strike the entire restriction if they find it to be unreasonable and will refuse to grant the buyer or employer any protection. Others will refuse to enforce the restraint as written, but will adjust the clause and impose such restraints as would be reasonable. In case of breach of

an enforceable noncompetition clause, the person benefited by the clause may seek damages or an injunction (a court order preventing the promisor from violating the covenant).

Exculpatory Clauses An **exculpatory clause** (often called a "release" or "liability waiver") is a provision in a contract that purports to relieve one of the parties from tort liability. Exculpatory clauses are suspect on public policy grounds for two reasons. First, courts are concerned that a party who can contract away his liability for negligence will not have the incentive to use care to avoid hurting others. Second, courts are concerned that an agreement that accords one party such a powerful advantage might have been the result of the abuse of superior bargaining power rather than truly voluntary choice.

LOG ON

Want to know more about noncompetition agreements? Try this Web site: Business Owner's Toolkit,

Noncompete Agreements, www.toolkit.com/small_business_guide/sbg.aspx?nid=P05_5750.

Although exculpatory agreements are often said to be “disfavored” in the law, courts do not want to prevent parties who are dealing on a fair and voluntary basis from determining how the risks of their transaction shall be borne if their agreement does not threaten public health or safety.

Courts enforce exculpatory clauses in some cases and refuse to enforce them in others, depending on the circumstances of the case, the identity and relationship of the parties, and the language of the agreement. A few ground rules can be stated. First, an exculpatory clause cannot protect a party from liability for any wrongdoing greater than negligence. One that purports to relieve a person from liability for fraud or some other willful tort will be considered to be against public policy. In some states, in fact, exculpatory clauses have been invalidated on this ground because of broad language stating that one of the parties was relieved of “all liability.” Second, exculpatory clauses will not be effective to exclude tort liability on the part of a party who owes a duty to the public (such as an airline) because this would present an obvious threat to the public health and safety.

A third possible limitation on the enforceability of exculpatory clauses arises from the increasing array of statutes and common law rules that impose certain obligations on one party to a contract for the benefit of the other party to the contract. Workers’ compensation statutes and laws requiring landlords to maintain leased property in a habitable condition are examples of such

laws. Sometimes the person on whom such an obligation is placed will attempt to escape it by inserting an exculpatory or waiver provision in a contract. Such clauses are often—though not always—found to be against public policy because, if enforced, they would frustrate the very purpose of imposing the duty in question. For example, an employee’s agreement to relieve her employer from workers’ compensation liability is likely to be held illegal as a violation of public policy.

Even if a clause is not against public policy on any of the above three grounds, a court may still refuse to enforce it if a court finds that the clause was **unconscionable**, a **contract of adhesion**, or some other product of abuse of superior bargaining power. (Unconscionability and contracts of adhesion are discussed later in this chapter.) This determination depends on all of the facts of the case. Facts that tend to show that the exculpatory clause was not the product of *knowing* consent increase the likelihood that the clause will not be enforced. A clause that is written in clear language and conspicuous print is more likely to be enforced than one written in “legalese” and presented in fine print. Facts that tend to show that the exculpatory clause was the product of *voluntary* consent increase the likelihood of enforcement of the clause. For example, a clause contained in a contract for a frivolous or unnecessary activity is more likely to be enforced than is an exculpatory clause contained in a contract for a necessary activity such as medical care.

You will see an example of the analysis of an exculpatory clause in the following *McCune* case.

McCune v. Myrtle Beach Indoor Shooting Range, Inc. 612 S.E.2d 462 (S.C. Ct. App. 2005)

Christine McCune went to the Myrtle Beach Indoor Shooting Range to participate in a paintball game with her husband and friends. Before being allowed to participate, McCune signed and dated a waiver that purported to release the Range from liability for all known or unknown dangers for any reason with the exception of gross negligence on the part of the Range. The language of the release provided in part:

I, for myself and on behalf of my heirs HEREBY RELEASE AND HOLD HARMLESS THE AMERICAN PAINTBALL LEAGUE (APL), THE APL CERTIFIED MEMBER FIELD, the owners and lessors of premises used to conduct the paintball activities, their Officers, officials, agents, and/or employees, WITH RESPECT TO ANY AND ALL INJURY, DISABILITY, DEATH, or loss or damage to person or property, WHETHER CAUSED BY THE NEGLIGENCE OF THE RELEASEES OR OTHERWISE, except that which is the result of gross negligence and/or wanton misconduct.

I HAVE READ THIS RELEASE OF LIABILITY AND ASSUMPTION OF RISK AGREEMENT, FULLY UNDERSTANDING ITS TERMS, UNDERSTAND THAT I HAVE GIVEN UP SUBSTANTIAL RIGHTS BY SIGNING IT, AND SIGN IT FREELY AND VOLUNTARILY WITHOUT ANY INDUCEMENT.

During her paintball session, McCune used a mask provided by the Range. During her play, the mask was loose and ill fitting. She tried to have the mask tightened or replaced several times and an employee of the Range attempted to properly

fit the mask for McCune. While playing in a match, McCune caught the mask on the branch of a tree. The tree was obscured from her field of vision by the top of the mask. The mask was raised off her face because it was loose, and provided no protection against an incoming paintball pellet. The pellet struck McCune in the eye, rendering her legally blind in the eye.

McCune brought a negligence suit against the Range. The Range filed a motion for summary judgment, alleging the waiver barred liability on its part. The court granted the Range's motion, and McCune appealed.

Beatty, Judge

McCune maintains the trial court erred in granting summary judgment to the Range on the basis of the exculpatory language in the release of liability signed by McCune. McCune asserts she did not anticipate the harm that was inflicted or the manner in which it occurred. Additionally, she contends the failure of the equipment was unexpected and she could not have voluntarily assumed such a risk. We disagree. Express assumption of risk is contrasted with implied assumption of risk, which arises when the plaintiff implicitly, rather than expressly, assumes known risks.

In the instant case, we are confronted with a defense based upon McCune's express assumption of the risk. She signed a release from liability prior to participating in the paintball match. The courts of South Carolina have analyzed express assumption of the risk cases in terms of exculpatory contracts. Exculpatory contracts, such as the one in this case, have previously been upheld by the courts of this state. However, notwithstanding the general acceptance of exculpatory contracts, since such provisions tend to induce a want of care, they are not favored by the law and will be strictly construed against the party relying thereon.

The release in the instant case explicitly and unambiguously limited the Range's liability. The agreement was voluntarily signed and specifically stated: (1) she assumed the risks, whether known or unknown; and (2) she released the Range from liability, even from injuries sustained because of the

Range's own negligence. It is clear McCune voluntarily entered into the release in exchange for being allowed to participate in the paintball match. Additionally, she expressly assumed the risk for all known and unknown risks while participating and cannot now complain because she did not fully appreciate the exact risk she faced.

We find the release entered into by the parties does not contravene public policy. In *Huckaby v. Confederate Motor Speedway, Inc.*, the plaintiff signed a waiver similar to the one above, which was required before he could participate in a sanctioned automobile race. He maintained his injuries were caused by the speedway's faulty installation and maintenance of a guardrail. As was found in *Huckaby*, participation in a paintball match is voluntary. "If these agreements, voluntarily entered into, were not upheld, the effect would be to increase the liability of those organizing or sponsoring such events to such an extent that no one would be willing to undertake to sponsor a sporting event. Clearly, this would not be in the public interest."

Although our research reveals no South Carolina case that deals specifically with a release for paintball, other jurisdictions have found similarly worded releases to be unambiguous. Accordingly, we hold the trial court properly determined the release signed by McCune was sufficient to release the Range from all liability in this incident.

Affirmed in favor of the Range.

Family Relationships and Public Policy

In view of the central position of the family as a valued social institution, it is not surprising that an agreement that unreasonably tends to interfere with family relationships will be considered illegal. Examples of this type of contract include agreements whereby one of the parties agrees to divorce a spouse or agrees not to marry.

In recent years, courts have been presented with an increasing number of agreements between unmarried cohabitants that purport to agree upon the manner in which the parties' property will be shared or divided upon separation. It used to be widely held that contracts between unmarried cohabitants were against public policy because they were based on an immoral relationship.

As unmarried cohabitation has become more widespread, however, the law concerning the enforceability of agreements between unmarried couples has changed. For example, in the 1976 case of *Marvin v. Marvin*, the California Supreme Court held that an agreement between an unmarried couple to pool income and share property could be enforceable.⁴ Today, most courts hold that agreements between unmarried couples are not against public policy unless they are explicitly based on illegal sexual relations as the consideration for the contract or unless one or more of the parties is married to someone else.

⁴134 Cal. Rptr. 815 (1976).

Unfairness in Agreements: Contracts of Adhesion and Unconscionable Contracts

Under classical contract law, courts were reluctant to inquire into the fairness of an agreement. Because the prevailing social attitudes and economic philosophy strongly favored freedom of contract, American courts took the position that so long as there had been no fraud, duress, misrepresentation, mistake, or undue influence in the bargaining process, unfairness in an agreement entered into by competent adults did not render it unenforceable.

As the changing nature of our society produced many contract situations in which the bargaining positions of the parties were grossly unequal, the classical contract assumption that each party was capable of protecting himself was no longer persuasive. The increasing use of standardized contracts (preprinted contracts) enabled parties with superior bargaining power and business sophistication to virtually dictate contract terms to weaker and less sophisticated parties.

Legislatures responded to this problem by enacting a variety of statutory measures to protect individuals against the abuse of superior bargaining power in specific situations. Examples of such legislation include minimum wage laws and rent control ordinances. Courts became more sensitive to the fact that superior bargaining power often led to **contracts of adhesion** (contracts in which a stronger party is able to determine the terms of a contract, leaving the weaker party no practical choice but to “adhere” to the terms). Some courts responded by borrowing a doctrine that had been developed and used for a long time in courts of equity,⁵ the doctrine of **unconscionability**. Under this doctrine, courts would refuse to grant the equitable remedy of specific performance for breach of a contract if they found the contract to be oppressively unfair. Courts today can use the concepts of unconscionability or adhesion to analyze contracts that are alleged to be so unfair that they should not be enforced.

Unconscionability One of the most far-reaching efforts to correct abuses of superior bargaining power was the enactment of section 2–302 of the Uniform Commercial Code, which gives courts the power to refuse to enforce all or part of a contract for the sale of goods or to modify such a contract if it is found to be

unconscionable. By virtue of its inclusion in Article 2 of the Uniform Commercial Code, the prohibition against unconscionable terms applies to every contract for the sale of goods. The concept of unconscionability is not confined to contracts for the sale of goods, however. Section 208 of the *Restatement (Second) of Contracts*, which closely resembles the unconscionability section of the UCC, provides that courts may decline to enforce unconscionable terms or contracts. The prohibition of unconscionability has been adopted as part of the public policy of many states by courts in cases that did not involve the sale of goods, such as banking transactions and contracts for the sale or rental of real estate. It is therefore fair to state that the concept of unconscionability has become part of the general body of contract law.

Consequences of Unconscionability The UCC and the *Restatement (Second) sections* on unconscionability give courts the power to manipulate a contract containing an unconscionable provision so as to reach a just result. If a court finds that a contract or a term in a contract is unconscionable, it can do one of three things: it can refuse to enforce the entire agreement; it can refuse to enforce the unconscionable provision but enforce the rest of the contract; or it can “limit the application of the unconscionable clause so as to avoid any unconscionable result.” This last alternative has been taken by courts to mean that they can make adjustments in the terms of the contract.

Meaning of Unconscionability Neither the UCC nor the *Restatement (Second) of Contracts* attempts to define the term *unconscionability*. Though the concept is impossible to define with precision, unconscionability is generally taken to mean the *absence of meaningful choice* together with *terms unreasonably advantageous* to one of the parties.

The facts of each individual case are crucial to determining whether a contract term is unconscionable. Courts will scrutinize the process by which the contract was reached to see if the agreement was reached by fair methods and whether it can fairly be said to be the product of knowing and voluntary consent.

Procedural Unconscionability Courts and writers often refer to unfairness in the bargaining process as *procedural unconscionability*. Some facts that may point to procedural unconscionability include the use of fine print or inconspicuously placed terms, complex, legalistic language, and high-pressure sales tactics. One of the most significant facts pointing to procedural unconscionability is the lack of voluntariness as shown by a

⁵Chapter 1 discusses courts of equity.

marked imbalance in the parties' bargaining positions, particularly where the weaker party is unable to negotiate more favorable terms because of economic need, lack of time, or market factors. In fact, in most contracts that have been found to be unconscionable, there has been a serious inequality of bargaining power between the parties. It is important to note, however, that the mere existence of unequal bargaining power does not make a contract unconscionable. If it did, every consumer's contract with the telephone company or the electric company would be unenforceable. Rather, in an unconscionable contract, the party with the stronger bargaining power *exploits* that power by driving a bargain containing a term or terms that are so unfair that they "shock the conscience of the court."

Substantive Unconscionability In addition to looking at facts that might indicate procedural unconscionability, courts will scrutinize the contract terms themselves to determine whether they are oppressive, unreasonably one-sided, or unjustifiably harsh. This aspect of unconscionability is often referred to as *substantive unconscionability*. Examples include situations in which a party to the contract bears a disproportionate amount of the risk or other negative aspects of the transaction and

situations in which a party is deprived of a remedy for the other party's breach. In some cases, unconscionability has been found in situations in which the contract provides for a price that is greatly in excess of the usual market price.

There is no mechanical test for determining whether a clause is unconscionable. Generally, in cases in which courts have found a contract term to be unconscionable, there are elements of *both* procedural and substantive unconscionability. Though courts have broad discretion to determine what contracts will be deemed to be unconscionable, it must be remembered that the doctrine of unconscionability is designed to prevent oppression and unfair surprise—not to relieve people of the effects of bad bargains.

The cases concerning unconscionability are quite diverse. Some courts have found unconscionability in contracts involving grossly unfair sales prices. Although the doctrine of unconscionability has been raised primarily by victimized consumers, there have been cases in which businesspeople in an inherently weak bargaining position have been successful in asserting unconscionability.

You will see an example of unconscionability analysis in the following *Circuit City* case.

Circuit City Stores, Inc. v. Mantor

335 F.3d 1101 (9th Cir. 2003)

Paul Mantor began working for Circuit City in August 1992. When Circuit City hired Mantor, it had no arbitration program. In 1995, Circuit City instituted an arbitration program called the "Associate Issue Resolution Program" (AIRP). Circuit City emphasized to managers the importance of full participation in the AIRP, claiming that the company had been losing money because of lawsuits filed by employees. Circuit City management stressed that employees had little choice in this matter. It suggested that employees should sign the agreement or prepare to be terminated. Although Circuit City circulated the forms regarding the AIRP in 1995, Mantor was able to avoid either signing up or openly refusing to participate in the AIRP for three years. In 1998, two Circuit City managers arranged a meeting with Mantor to discuss his participation in the AIRP. During this meeting, Mantor asked the two Circuit City managers what would happen should he decline to participate in the arbitration program. They responded to the effect that he would have no future with Circuit City. In February 1998, Mantor agreed to participate in the AIRP, acknowledging in writing his receipt of (1) an "Associate Issue Resolution Handbook," (2) the "Circuit City Dispute Resolution Rules and Procedures," and (3) a "Circuit City Arbitration Opt-Out Form."

In October 2000, Circuit City terminated Mantor's employment. A year later, Mantor brought a civil action in state court, alleging 12 causes of action. To preserve his right to arbitrate his claims in the event that a court determined that his claims were subject to arbitration, he also submitted an Arbitration Request Form to Circuit City's arbitration coordinator. Circuit City petitioned the district court to compel arbitration, and the district court granted Circuit City's motion to compel arbitration. Mantor appealed, arguing that the arbitration agreement was unenforceable because it was unconscionable.

Pregerson, Circuit Judge

In California, courts may refuse to enforce an arbitration agreement if it is unconscionable. Unconscionability exists when one party lacks meaningful choice in entering a contract or negotiating its terms and the terms are unreasonably favorable to

the other party. Accordingly, a contract to arbitrate is unenforceable under the doctrine of unconscionability when there is both a procedural and substantive element of unconscionability. But procedural and substantive unconscionability need not be present in the same degree. The more substantively oppressive

the contract term, the less evidence of procedural unconscionability is required to come to the conclusion that the term is unenforceable, and vice versa. To determine whether Circuit City's arbitration agreement with Mantor is procedurally unconscionable we must evaluate how the parties negotiated the contract and the circumstances of the parties at that time. One factor courts consider to determine whether a contract is procedurally unconscionable is whether the contract is oppressive. Courts have defined oppression as springing from an inequality of bargaining power [that] results in no real negotiation and an absence of meaningful choice. Another factor courts look to is surprise, defined as the extent to which the supposedly agreed-upon terms of the bargain are hidden in the prolix printed form drafted by the party seeking to enforce the disputed terms.

Circuit City argues that because Mantor was given an opportunity to "opt-out" of the arbitration agreement, the agreement was not oppressive—and therefore not procedurally unconscionable. In support of its argument, Circuit City cites our decisions in *Circuit City Stores, Inc. v. Najd*, and *Circuit City Stores, Inc. v. Ahmed*. We do not agree that *Najd* and *Ahmed* guide our analysis here; in both *Najd* and *Ahmed*, the arbitration agreement did not prove procedurally unconscionable specifically because both *Najd* and *Ahmed* had a *meaningful* opportunity to opt-out of the arbitration program. Mantor had no such *meaningful* opportunity. In 1995, Mantor was given an "opt-out" form by which he could elect not to participate in the arbitration program. But Circuit City management impliedly and expressly pressured Mantor not to opt-out, and even resorted to threatening his job outright should Mantor exercise his putative "right" to opt-out. The fact that Circuit City management pressured and even threatened Mantor into assenting to the arbitration agreement demonstrates that he had no *meaningful* opportunity to opt-out of the program. When a party to a contract possesses far greater bargaining power than another party, or when the stronger party pressures, harasses, or compels another party into entering into a contract, oppression and, therefore, procedural unconscionability, are present. A meaningful opportunity to negotiate or reject the terms of a contract must mean something more than an empty choice. At a minimum, a party must have reasonable notice of his opportunity to negotiate or reject the terms of a contract, *and* he must have an actual, meaningful, and reasonable choice to exercise that discretion. In light of Circuit City's insistence that Mantor sign the arbitration agreement—under pain of forfeiting his future with the company—the fact that in 1995 Mantor was presented with an opt-out form does not save the agreement from being oppressive, for Mantor had no meaningful choice, nor any legitimate opportunity, to negotiate or reject the terms of the arbitration agreement. Accordingly, because Circuit City

presented the arbitration agreement to Mantor on an "adhere-or-reject" basis we conclude that the arbitration agreement was procedurally unconscionable.

We turn now to consider whether the arbitration agreement is substantively unconscionable. Substantive unconscionability concerns the terms of the agreement and whether those terms are so one-sided as to shock the conscience. To evaluate the substantive terms of a contract, a court must analyze the contract as of the time [it] was made. Many of the terms we have already held to be substantively unconscionable in earlier versions of Circuit City's arbitration agreement remain in the 2001 version we review in this case. The substantively unconscionable provisions concerning the statute of limitations, class actions, cost-splitting, and Circuit City's unilateral power to modify or terminate the arbitration agreement remain in the version of the agreement we review in this case. For the reasons expressed in prior decisions, we again hold that these terms are substantively unconscionable.

Under its arbitration program, Circuit City requires an employee to pay a seventy-five dollar filing fee to initiate an arbitration proceeding. In *Ingle v. Circuit City Stores, Inc.*, we criticized the filing fee rule in the 1998 version of the arbitration agreement because the employee is required to pay Circuit City for the privilege of bringing a complaint. This, we held, was not the *type* of expense that the employee would be required to bear in federal court. Thus, we concluded that it was improperly one-sided. We also observed that "Circuit City's arbitration agreement makes no provision for waiver of the filing fee (or other fees and costs of arbitration). In federal court, indigent plaintiffs may be exempt from having to pay court fees. In the 2001 version of the arbitration agreement we review here, Circuit City has revised the rule to allow for waiver of the filing fee. But the fact that Circuit City vests in itself the sole discretion to consider applications for waivers indicates that the process of filing could be halted unilaterally by Circuit City if an employee does not have the means to pay the seventy-five dollar filing fee. The fee waiver provision might not be one-sided if the discretion to waive the fee were assigned to a disinterested party. However, because the fee waiver rule (1) provides that an employee must pay an interested party for the privilege of bringing a complaint and (2) assigns Circuit City, an interested party, the responsibility for the decision whether to waive the filing fee, this rule is manifestly one-sided, and therefore, substantively unconscionable.

Under California law, a court has discretion whether to sever particular unconscionable terms or invalidate a contract entirely. To assess whether unconscionable terms can be severed, a court considers whether the illegality is central or collateral to the purpose of the contract to determine whether an entire contract should be invalidated or whether only a particular

term or set of terms should be severed. Under California contract law, a party may not fashion an adhesive arbitration agreement that significantly limits the other party's ability to substantiate his legal claims. The arbitration agreement between Circuit City and Mantor violates that rule: the arbitration agreement was procedurally unconscionable and numerous provisions in Circuit City's arbitration agreement operate to

benefit itself at its employees' expense. Because any earnest attempt to ameliorate the unconscionable aspects of Circuit City's arbitration agreement would require this court to assume the role of contract author rather than interpreter, we hold that this agreement is unenforceable in its entirety.

Reversed and remanded in favor of Mantor.

Contracts of Adhesion

A contract of adhesion is a contract, usually on a standardized form, offered by a party who is in a superior bargaining position on a "take-it-or-leave-it" basis. The person presented with such a contract has no opportunity to negotiate the terms of the contract; they are imposed on him if he wants to receive the goods or services offered by the stronger party. In addition to not having a "say" about the terms of the contract, the person who signs a standardized contract of adhesion may not even know or understand the terms of the contract that he is signing. When these factors are present, the objective theory of contracts and the normal duty to read contracts before signing them may be modified. These factors may be viewed as a form of procedural unconscionability. A court may use the word *adhesion* to describe procedural unconscionability.

All of us have probably entered contracts of adhesion at one time or another. The mere fact that a contract is a contract of adhesion does not, in and of itself, mean that the contract is unenforceable. Courts will not refuse enforcement to such a contract unless the term complained of is either substantively unconscionable or is a term that the adhering party could not reasonably expect to be included in the form that he was signing.

Unenforceable contracts of adhesion can take different forms. The first is seen when the contract of adhesion contains a term that is harsh or oppressive. In this kind of case, the party offering the contract of adhesion has used his superior bargaining power to dictate unfair terms. The second situation in which contracts of adhesion are refused enforcement occurs when a contract of adhesion contains a term that, while it may not be harsh or oppressive, is a term that the adhering party could *not* be expected to have been aware that he was agreeing to. This type of case relates to the fundamental concept of agreement in an era in which lengthy, complex, standardized contracts are common. If a consumer presented with a

contract of adhesion has no opportunity to negotiate terms and signs the contract without knowing or fully understanding what he is signing, is it fair to conclude that he has consented to the terms? It is reasonable to conclude that he has consented at least to the terms that he could have expected to be in the contract, but *not* to any terms that he could not have expected to be contained in the contract.

Effect of Illegality

General Rule: No Remedy for Breach of Illegal Agreements As a general rule, courts will refuse to give any remedy for the breach of an illegal agreement. A court will refuse to enforce an illegal agreement and will also refuse to permit a party who has fully or partially performed her part of the agreement to recover what she has parted with. The reason for this rule is to serve the public interest, not to punish the parties.

In some cases, the public interest is best served by allowing some recovery to one or both of the parties. Such cases constitute exceptions to the "hands-off" rule. The following discussion concerns the most common situations in which courts will grant some remedy even though they find the agreement to be illegal.

Exceptions

Excusable Ignorance of Facts or Legislation Though it is often said that ignorance of the law is no excuse, courts will, under certain circumstances, permit a party to an illegal agreement who was excusably ignorant of facts or legislation that rendered the agreement illegal to recover damages for breach of the agreement. This exception is used where only *one* of the parties acted in ignorance of the illegality of the agreement and the other party was aware that the agreement was illegal. For this exception to apply, the facts or legislation of which the person

Ethics in Action

Murphy, a welfare recipient with four minor children, saw an advertisement in the local newspaper that had been placed by McNamara, a television and stereo dealer. It stated:

Why buy when you can rent? Color TV and stereos. *Rent to own!* Use our Rent-to-own plan and let TV Rentals deliver either of these models to your home. *We feature—* Never a repair bill—No deposit—No credit needed—No long term obligation—Weekly or monthly rates available—Order by phone—Call today—Watch color TV tonight.

As a result of the advertisement, Murphy leased a 25-inch Philco color console TV set from McNamara under the “Rent to Own” plan. The lease agreement provided that Murphy would pay a \$20 delivery charge and 78 weekly payments of \$16. At the end of the period, Murphy would own the set. The

agreement also provided that the customer could return the set at any time and terminate the lease as long as all rental payments had been made up to the return date. Murphy entered the lease because she believed that she could acquire ownership of a TV set without first establishing credit as was stressed in McNamara’s ads. At no time did McNamara inform Murphy that the terms of the lease required her to pay a total of \$1,268 for the TV. The retail sales price for the same TV was \$499. After making \$436 in payments over a period of about six months, Murphy read a newspaper article criticizing the lease plan and realized the amount that the agreement required her to pay. She stopped making payments and McNamara sought to repossess the TV. Murphy argued that the agreement was unconscionable. Was it ethical to market the Rent to Own plan? Was McNamara ethically required to inform Murphy that the total price of the TV would be \$1,268 under the Rent to Own plan?

claiming damages was ignorant must be of a relatively minor character—that is, it must not involve an immoral act or a serious threat to the public welfare. Finally, the person who is claiming damages cannot recover damages for anything that he does after learning of the illegality. For example, Warren enters a contract to perform in a play at Craig’s theater. Warren does not know that Craig does not have the license to operate a theater as required by statute. Warren can recover the wages agreed on in the parties’ contract for work that he performed before learning of the illegality.

When *both* of the parties are ignorant of facts or legislation of a relatively minor character, courts will not permit them to enforce the agreement and receive what they had bargained for, but they will permit the parties to recover what they have parted with.

Rights of Parties Not Equally in the Wrong The courts will often permit a party who is not equally in the wrong (in technical legal terms, not in *pari delicto*) to recover what she has parted with under an illegal agreement. One of the most common situations in which this exception is used involves the rights of “protected parties”—people who were intended to be protected by a regulatory statute—who contract with parties who are not properly licensed under that statute. Most regulatory statutes are intended to protect the public. As a general rule if a person guilty of violating a regulatory statute enters into an agreement with another person for whose protection the

statute was adopted, the agreement will be enforceable by the party whom the legislature intended to protect.

Another common situation in which courts will grant a remedy to a party who is not equally in the wrong is one in which the less guilty party has been induced to enter the agreement by misrepresentation, fraud, duress, or undue influence.

Rescission before Performance of Illegal Act Obviously, public policy is best served by any rule that encourages people not to commit illegal acts. People who have fully or partially performed their part of an illegal contract have little incentive to raise the question of illegality if they know that they will be unable to recover what they have given because of the courts’ hands-off approach to illegal agreements. To encourage people to cancel illegal contracts, courts will allow a person who rescinds such a contract before any illegal act has been performed to recover any consideration that he has given. For example, Dixon, the owner of a restaurant, pays O’Leary, an employee of a competitor’s restaurant, \$1,000 to obtain some of the competitor’s recipes. If Dixon has second thoughts and tells O’Leary the deal is off before receiving any recipes, he can recover the \$1,000 he paid O’Leary.

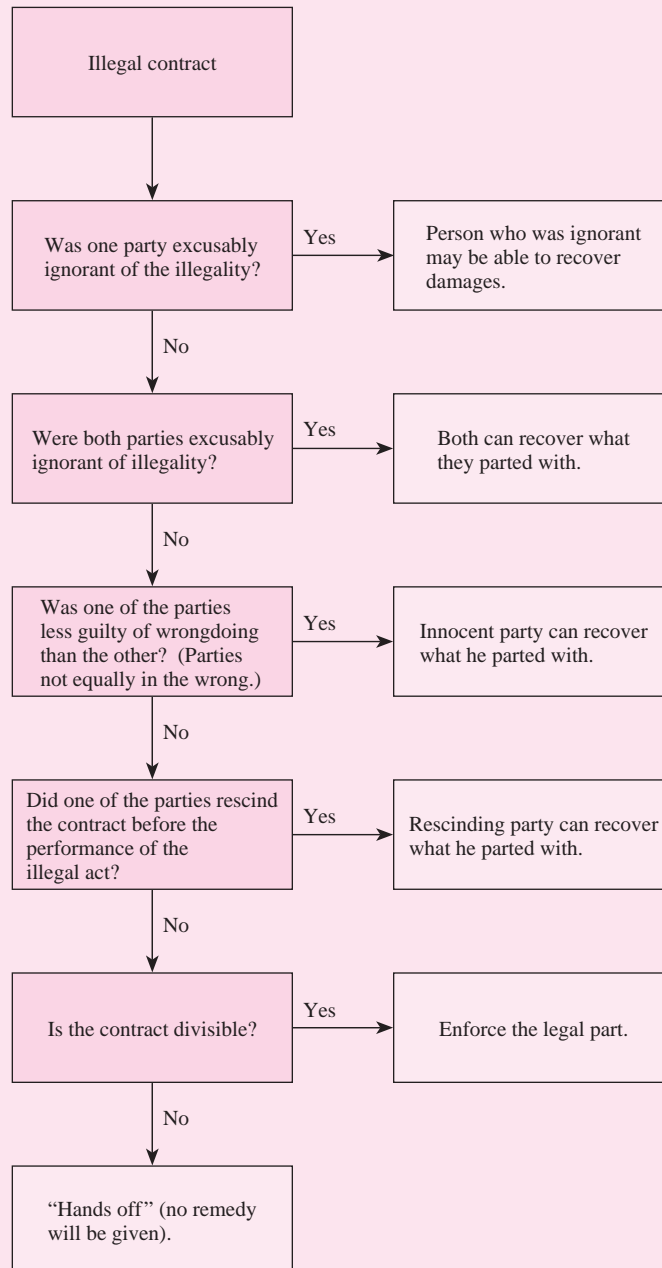

Divisible Contracts If part of an agreement is legal and part is illegal, the courts will enforce the legal part so long as it is possible to separate the two parts. A contract

is said to be *divisible*—that is, the legal part can be separated from the illegal part—if the contract consists of several promises or acts by one party, each of which corresponds with an act or a promise by the other party. In other words, there must be a separate consideration

for each promise or act for a contract to be considered divisible.

Where no separate consideration is exchanged for the legal and illegal parts of an agreement, the agreement is said to be *indivisible*. As a general rule, an indivisible

Figure 1 Effect of Illegality

contract that contains an illegal part will be entirely unenforceable unless it comes within one of the exceptions discussed above. However, if the major portion of a contract is legal but the contract contains an illegal provision that does not affect the primary, legal portion, courts will often enforce the legal part of the agreement and simply decline to enforce the illegal part. For example, suppose Alberts sells his barbershop to Bates. The contract of

sale provides that Alberts will not engage in barbering anywhere in the world for the rest of his life. The major portion of the contract—the sale of the business—is perfectly legal. A provision of the contract—the ancillary covenant not to compete—is overly restrictive, and thus illegal. A court would enforce the sale of the business but modify or refuse to enforce the restraint provision. See Figure 1.

Problems and Problem Cases

1. Goldstein, an attorney, hired Patterson as a paralegal in her law firm. Goldstein orally agreed to pay Patterson an annual salary plus bonus wages calculated as 10 percent of Goldstein's attorney's fees from cases on which Patterson worked. At that time, Patterson did not know that the bonus arrangement violated the Florida Bar's Rules of Professional Conduct. When Goldstein failed to pay Patterson more than a portion of the bonus wages due under their agreement, Patterson pressed Goldstein for the unpaid bonuses. Goldstein promised that she would pay them, but stated that she could not put that promise into writing because of a problem with "the Bar." Goldstein thereafter refused to pay Patterson the remaining bonus wages due under their agreement. The employment relationship terminated, Patterson sued Goldstein for \$87,300 in unpaid wages. Goldstein argued that the agreement was not enforceable against her because her own promise to pay Patterson the bonus wages was "unethical and thus void as against public policy." Will Goldstein's promise to give Patterson the bonus wages be enforced?
2. Broemmer, age 21, was unmarried and 16 or 17 weeks pregnant. She was a high school graduate earning less than \$100 a week and had no medical benefits. Broemmer was in considerable turmoil and confusion. The father-to-be insisted that she have an abortion, but her parents advised against it. Broemmer went to Abortion Services with her mother and was escorted into an adjoining room and asked to complete three forms: a consent to treatment form, a questionnaire asking for a detailed medical history, and an agreement to arbitrate. The agreement to arbitrate stated that "any dispute arising between the Parties as a result of the fees and/or services: would be settled by binding arbitration" and that "any arbitrators appointed by the AAA [American Arbitration Association] shall be licensed medical doctors who specialize in obstetrics/gynecology." No one made any effort to explain this to Broemmer, and she was not provided with a copy of the agreement. She completed all three forms in less than five minutes. After Broemmer returned the forms to the front desk, she was taken into an examination room where preoperation procedures were performed. She was then instructed to return at 7:00 AM the next morning. She returned the following day and a physician performed the abortion. As a result of this procedure, Broemmer suffered a punctured uterus, which required medical treatment. Broemmer later filed a malpractice lawsuit against Abortion Services. Abortion Services moved to dismiss the suit on the ground that arbitration was required under the agreement. Should the arbitration clause be enforced in this situation?
3. Piatek had served a 10-year term in San Quentin State Prison for assault with a deadly weapon with great bodily injury. His criminal background prevented him from acquiring the license to sell insurance that was required by state law. Nevertheless, he sold insurance for American Income Life Insurance Company under several false names. He then sued American Income Life Insurance to recover commissions on the sales that he had made. Will he be successful?
4. Strickland attempted to bribe Judge Sylvania Woods to show leniency toward one of Strickland's friends who had a case pending before the judge. Judge Woods immediately reported this to the state's attorney and was asked to play along with Strickland until the actual payment of money occurred. Strickland gave \$2,500 to the judge, who promptly turned it over to the state's attorney's office. Strickland was indicted for bribery, pled guilty, and was sentenced to a four-year prison term. Three months after the

criminal trial, Strickland filed a motion for the return of his \$2,500. Will the court order the return of his money?

5. Steamatic of Kansas City, Inc., specialized in cleaning and restoring property damaged by fire, smoke, water, or other elements. It employed Rhea as a marketing representative. His duties included soliciting customers, preparing cost estimates, supervising restoration work, and conducting seminars. At the time of his employment, Rhea signed a noncompetition agreement prohibiting him from entering into a business in competition with Steamatic within six counties of the Kansas City area for a period of two years after the termination of his employment with Steamatic. Late in 1987, Rhea decided to leave Steamatic. In contemplation of the move, he secretly extracted the agreement restricting his postemployment activity from the company's files and destroyed it. Steamatic learned of this and discharged Rhea. Steamatic filed suit against Rhea to enforce the noncompetition agreement when it learned that he was entering a competing business. Will the noncompetition agreement be enforced?
6. Deno, Tisdale, Adams, Fairley, and Dickerson were all employees at the Waffle House restaurant in Grand Bay, Alabama. Seward was a regular customer at the restaurant. On several occasions, Seward would travel to Florida and buy lottery tickets. On his return, he would give the tickets to various friends and family members, including the employees of the Waffle House. A drawing for the Florida lottery was scheduled for Saturday night, March 6, 1999. Seward traveled to Florida in the week before that drawing and purchased several lottery tickets. He placed each individual ticket in a separate envelope and wrote the name of the intended recipient on the outside of the envelope. On the eve of the drawing, Seward presented three of the employees with an envelope containing a ticket, but none of them won. The day after the drawing, Seward gave Dickerson and another employee envelopes containing tickets. When Dickerson opened her envelope, she determined that the numbers of her ticket matched the winning numbers drawn in the lottery the night before. The ticket won a prize of approximately \$5 million. Shortly afterward, Dickerson's four co-employees sued her, alleging that they and Dickerson had orally contracted with each other that if any one of them should win, the winner would share any lottery winnings with the

other ticket recipients. An Alabama statute states that "all contracts founded in whole or in part on a gambling consideration are void." Must Dickerson share the lottery proceeds with her co-employees?

7. Kelly Services is a staffing services company that provides a range of employment staffing and consulting services. Greene, who was 24 years old, began working for Kelly Services six months after graduating from college. At the beginning of her employment, she signed an agreement that contained both noncompete and confidentiality clauses. The noncompete clause stated in part: "I will not compete against Kelly or associate myself with any Kelly competitor as an employee, owner, partner. . . . These same limitations apply for one year after I leave Kelly in any market area in which I worked or had responsibility during the past five years of my employment with Kelly."

She was a "staffing supervisor" for Kelly Services for more than two years. As a staffing supervisor, Greene serviced and maintained relationships with customers, developed new business, and recruited candidates throughout Cumberland and York Counties in Maine. About 75 percent of Greene's work at Kelly Services involved recruiting activities for Anthem Blue Cross/Blue Shield, Unum, and Citigroup Financial, including spending one full year on-site at Unum. Greene voluntarily resigned from Kelly Services in December 2007, at least in part because of repeated statements about possible layoffs made by a supervisor at Kelly Services. She began working for the Portland office of Maine Staffing Group as a "staffing specialist," where her duties were primarily clerical. The Portland office of Maine Staffing recruits blue-collar positions for the construction and trade industries and does not recruit for clients seeking to fill office or clerical positions. In her new job she did not seek new accounts or customers and did not solicit business involving white-collar personnel. She did not retain any Kelly Services documents and has not used any protected information from Kelly Services in her new job. Kelly Services filed a motion for a preliminary injunction against Greene for violating the noncompete that she signed. Is the noncompete clause likely to be enforced so as to prevent her from working at Maine Staffing?

8. Carlos Leon joined the Family Fitness Center, signing a contract called a "Club Membership Agreement (Retail Installment Contract)." The contract is

a legal-length, single sheet of paper covered with writing front and back. The front page was divided into two columns, with the right-hand column containing blanks for insertion of financial and “Federal Truth in Lending” data plus approximately 76 lines of text of varying sizes, some highlighted with bold print. The left-hand column contains approximately 90 lines of text undifferentiated in size, with no highlighting and no paragraph headings or any other indication of its contents. The back of the agreement contains approximately 90 lines of text. The exculpatory clause is located at the bottom of the left-hand column of the front page and states the following:

Buyer is aware that participation in a sport or physical exercise may result in accidents or injury, and Buyer assumes the risk connected with the participation in a sport or exercise and represents that Member is in good health and suffers from no physical impairment which would limit their use of FFC’s facilities. Buyer acknowledges that FFC has not and will not render any medical services including medical diagnosis of Member’s physical condition. Buyer specifically agrees that FFC, its officers, employees and agents shall not be liable for any claim, demand, cause of action of any kind whatsoever for, or on account of death, personal injury, property damage or loss of any kind resulting from or related to Member’s use of the facilities or participation in any sport, exercise or activity within or without the club premises, and Buyer agrees to hold FFC harmless from same.

Months later, Leon sustained head injuries when a sauna bench on which he was lying collapsed beneath him at Family Fitness. Leon filed an action against Family Fitness for personal injuries. Will the exculpatory agreement he signed be enforced?

9. A New York statute states that surrogate parenting agreements—agreements whereby insemination or impregnation is done specifically for the purpose of creating a child for adoption, and a surrogate mother agrees at the time of insemination or impregnation to surrender the child for adoption—are against public policy and void. Itskov alleges that Dr. Sultan had agreed to perform in vitro fertilization on a surrogate mother in order to create a child for Itskov to adopt. Later, she sued Dr. Sultan for breach of contract. Is the contract enforceable?
10. Gianni Sport was a New York manufacturer and distributor of women’s clothing. Gantos was a clothing retailer headquartered in Grand Rapids, Michigan. In 1980, Gantos’s sales total was 20 times greater than Gianni Sport’s, and in this industry, buyers were “in the driver’s seat.” In June 1980, Gantos submitted to Gianni Sport a purchase order for women’s holiday clothing to be delivered on October 10, 1980. The purchase order contained the following clause:

Buyer reserves the right to terminate by notice to Seller all or any part of this Purchase Order with respect to Goods that have not actually been shipped by Seller or as to Goods which are not timely delivered for any reason whatsoever.

Gianni Sport made the goods in question especially for Gantos. This holiday order comprised 20 to 22 percent of Gianni Sport’s business. In late September 1980, before the goods were shipped, Gantos canceled the order. Was the cancellation clause unconscionable?

chapter 16

WRITING

Moore went to First National Bank and requested the president of the bank to allow his adult sons, Rocky and Mike, to open an account in the name of Texas Continental Express, Inc. Moore promised to bring his own business to the bank and orally agreed to make good any losses that the bank might incur from receiving dishonored checks from Texas Continental. The bank then furnished a regular checking account and bank draft services to Texas Continental. Several years later, Texas Continental wrote checks totaling \$448,942.05 that were returned for insufficient funds. Texas Continental did not cover the checks and the bank turned to Moore for payment.

- Was Moore's **oral** promise to pay Texas Continental's dishonored checks enforceable?
- If not, what would have been required in the nature of a writing to make the promise enforceable?
- Suppose there had been a written agreement between Moore and the bank: Would the bank have been able to enforce an oral promise made by Moore that was **not** stated in the written contract?
- Would it be ethical of Moore *not* to pay the bank?

YOUR STUDY OF CONTRACT law so far has focused on the requirements for the formation of a valid contract. You should be aware, however, that even when all the elements of a valid contract exist, the enforceability of the contract and the nature of the parties' obligations can be greatly affected by the *form* in which the contract is set out and by the *language* that is used to express the agreement. This chapter discusses the ways in which the enforceability of a contract and the scope of contractual obligations can be affected by the manner in which people express their agreements.

The Significance of Writing in Contract Law

Purposes of Writing Despite what many people believe, there is no general requirement that contracts be in writing. In most situations, oral contracts are legally enforceable, assuming that they can be proven. Still, oral contracts are less desirable than written contracts in many ways. They are more easily misunderstood or forgotten than written contracts. They are also more subject to the danger that a person might fabricate terms

or fraudulently claim to have made an oral contract when none exists.

Writing is important in contract law and practice for a number of reasons. When people memorialize their contracts in a writing, they are enhancing their chances of proving that an obligation was undertaken and making it harder for the other party to deny making the promise. A person's signature on a written contract allows a basis for the contract to be authenticated, or proved to be genuinely the contract of the signer. In addition, signing a writing also communicates to any of us entering the contract the seriousness of the occasion. Occasionally there are problems with proving the genuineness of the writing and often there are disagreements about the interpretation of language in a contract, but the written form is still very useful in increasing the chances that you will be able to depend on the enforcement of your contracts.

Writing and Contract Enforcement In contract law, there are certain situations in which a promise that is not in writing can be denied enforcement. In such situations, an otherwise valid contract can become unenforceable if it does not comply with the formalities required by state law. These situations are controlled by a type of statute called the Statute of Frauds.

Overview of the Statute of Frauds

History and Purposes In 17th-century England, the dangers inherent in oral contracts were exacerbated by a legal rule that prohibited parties to a lawsuit from testifying in their own cases. Since the parties to an oral contract could not give testimony, the only way they could prove the existence of the contract was through the testimony of third parties. As you might expect, third parties were sometimes persuaded to offer false testimony about the existence of contracts. In an attempt to stop the widespread fraud and perjury that resulted, Parliament enacted the Statute of Frauds in 1677. It required written evidence before certain classes of contracts would be enforced. Although the possibility of fraud exists in every contract, the statute focused on contracts in which the potential for fraud was great or the consequences of fraud were especially serious. The legislatures of American states adopted very similar statutes, also known as statutes of frauds. These statutes, which require certain kinds of contracts to be evidenced by a signed writing, are exceptions to the general rule that oral contracts are enforceable.

Statutes of frauds have produced a great deal of litigation, due in part to the public's ignorance of their provisions. It is difficult to imagine an aspect of contract law that is more practical for businesspeople to know about than the circumstances under which an oral contract will not suffice.

Effect of Violation of the Statute of Frauds The statute of frauds applies only to executory contracts. If an oral contract has been completely performed by both parties, the fact that it did not comply with the statute of frauds would not be a ground for rescission of the contract.

What happens if an executory contract is within the statute of frauds but has not been evidenced by the type of writing required by the statute? It is not treated as an illegal contract because the statute of frauds is more of a formal rule than a rule of substantive law. Rather, the

contract that fails to comply with the statute of frauds is *unenforceable*. Although the contract will not be enforced, a person who has conferred some benefit on the other party pursuant to the contract can recover the reasonable value of his performance in an action based on *quasi-contract*.

Contracts Covered by the Statute of Frauds

A contract is said to be “within” (covered by) the statute of frauds if the statute requires that sort of contract to be evidenced by a writing. In almost all states, the following types of contracts are *within* the statute of frauds:

1. Collateral contracts in which a person promises to perform the obligation of another person.
2. Contracts for the sale of an interest in real estate.
3. Bilateral contracts that cannot be performed within a year from the date of their formation.
4. Contracts for the sale of goods for a price of \$500 or more.
5. Contracts in which an executor or administrator promises to be personally liable for the debt of an estate.
6. Contracts in which marriage is the consideration.

Of this list, the first four sorts of contracts have the most significance today, and our discussion will focus primarily on them.

The statutes of frauds of the various states are not uniform. Some states require written evidence of other contracts in addition to those listed above. For example, a number of states require written evidence of contracts to pay a commission for the sale of real estate. Others require written evidence of ratifications of infants' promises or promises to pay debts that have been barred by the statute of limitations or discharged by bankruptcy.

The following discussion examines in greater detail the sorts of contracts that are within most states' statute of frauds.

The Global Business Environment

Under the CISG, there is no requirement that a contract be evidenced by a writing. A contract need not take any particular form, and can be proven

by any means. The CISG does permit parties to a written contract to require that any modifications of the contract be in writing, however.

Collateral Contracts A collateral contract is one in which one person (the *guarantor*) agrees to pay the debt or obligation that a second person (the *principal debtor*) owes to a third person (the *obligee*) if the principal debtor fails to perform. For example, Cohn, who wants to help Davis establish a business, promises First Bank that he will repay the loan that First Bank makes to Davis if Davis fails to pay it. Here, Cohn is the guarantor, Davis is the principal debtor, and First Bank is the obligee. Cohn's promise to First Bank must be in writing to be enforceable.

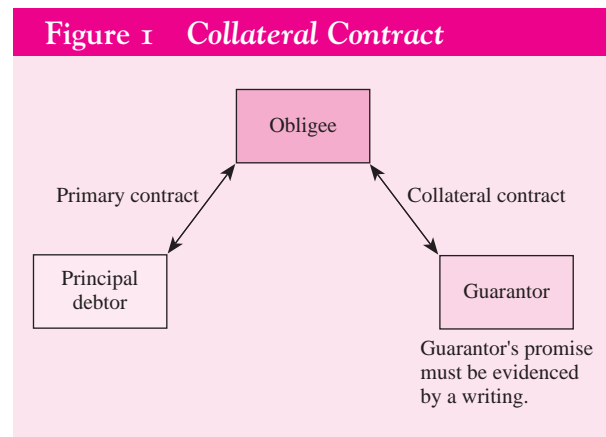

Figure 1 shows that a collateral contract involves at least three parties and at least two promises to perform (a promise by the principal debtor to pay the obligee and a promise by the guarantor to pay the obligee). In a collateral contract, the guarantor promises to pay *only if the principal debtor fails to do so*. The essence of the collateral contract is that the debt or obligation is owed primarily by the principal debtor and the guarantor's debt is *secondary*. Thus, not all three-party transactions are collateral contracts.

When a person undertakes an obligation that is *not* conditioned on the default of another person, and the debt is his own rather than that of another person, his obligation is said to be *original*, not collateral. For example, when Timmons calls Johnson Florist Company and says, "Send flowers to Elrod," Timmons is undertaking an obligation to pay *her own*—not someone else's—debt.

When a contract is determined to be collateral, however, it will be unenforceable unless it is evidenced by a writing. You will see an example of this principle in the *Wintersport* case which follows below.

Exception: Main Purpose or Leading Object Rule

There are some situations in which a contract that is technically collateral is treated like an original contract because the person promising to pay the debt of another

does so for the primary purpose of securing some personal benefit. Under the **main purpose** or **leading object** rule, no writing is required where the guarantor makes a collateral promise for the main purpose of obtaining some personal economic advantage. When the consideration given in exchange for the collateral promise is something the guarantor seeks primarily for his own benefit rather than for the benefit of the primary debtor, the contract is outside the statute of frauds and does not have to be in writing. Suppose, for example, that Penn is a major creditor of Widgetmart, a retailer. To help keep Widgetmart afloat and increase the chances that Widgetmart will repay the debt it owes him, Penn orally promises Rex Industries, one of the Widgetmart's suppliers, that he will guarantee Widgetmart's payment for goods that Rex sells to Widgetmart. In this situation, Penn's oral agreement could be enforced under the main purpose rule if the court finds that Penn was acting for his own personal financial benefit.

In the following *Wintersport* case, the court considers whether the main purpose or leading object rule applies to a shareholder who guarantees a corporation's debt.

Wintersport Ltd. v. Millionaire.com, Inc. 2004 Wash. App. LEXIS 1071 (Ct. App. Wash. 2004) (unpublished opinion)

Wintersport Ltd. contacted Millionaire.com, Inc., to offer advertising, production, and printing services for Millionaire.com's magazine, Opulence. Wintersport and Millionaire.com entered into a \$170,000 contract for the printing of one monthly issue in October 2000. They performed that contract and entered negotiations to print the next month's issue. David Strong, senior vice president of Millionaire.com, and Ron Leiter, president of Wintersport, handled most of the negotiations and communications. Due to financial difficulties, Millionaire.com reduced the size of its order for the second issue and requested payment terms on the reduced price of \$80,000. Concerned about Millionaire.com's creditworthiness, Leiter told Strong that Wintersport would only extend credit to Millionaire.com if Millionaire.com paid a \$10,000 down payment and White personally guaranteed the balance due. During a phone call between their respective offices in Washington and South Carolina,

Leiter requested and received White's oral agreement to the personal guaranty. Leiter then sent a confirming fax to White's office, and White express-mailed to Wintersport a \$10,000 check drawn on Millionaire.com's account. When Millionaire.com failed to pay the amount due on the contract, Wintersport filed suit against White and others.

The trial court entered judgment in Wintersport's favor against Millionaire.com and White. White appealed, arguing that the action should have been dismissed because the statute of frauds prevented the enforcement of his oral guaranty.

Coleman, Judge

The statute of frauds provides that “every special promise to answer for the debt, default, or misdoings of another person” must be in writing. There is a distinction, however, between original promises, which do not fall within the statute, and collateral promises, which do. Wintersport argues that White's oral guaranty is outside the statute of frauds because White received a personal benefit from the guaranty due to his interest in continuing the business of Millionaire.com. White argues, however, that standing alone, ownership of stock is insufficient to support a finding that his promise was original. An original promise occurs when the promisor receives some consideration or direct benefit from the promise. If the leading object is to benefit the promisor, it does not matter if the effect of the promise is to pay the debt of another. A frequent scenario in which courts enforce oral original promises is when promisors agree to be billed directly for services provided to a third party. White contends that this case presents the classic example of an unenforceable promise in which a promisor agrees to pay the debts of another if that party fails to pay.

Smith v. Twohy held that in such circumstances a showing of direct benefit is necessary to take the promise out of the statute of frauds. *Twohy* further held that the benefits accruing as incidents of stock ownership are insufficient to show a

direct benefit. The direct benefit inquiry here is the sole criteria for determining whether the promise was original or collateral. This case presents a situation where White promises to pay if Millionaire.com does not; but under *Twohy*, mere status as a shareholder is insufficient to take this kind of promise out of the statute of frauds. Wintersport has not shown that White's benefit amounted to anything more than an indirect incident of share ownership. Although White owned stock in Millionaire.com, there is not substantial evidence to support the trial court's findings that White received a personal benefit from Millionaire.com's successful completion of the printing contract with Wintersport.

At trial, Wintersport argued that Millionaire.com's future and White's job depended on the success of *Opulence* and that White received a substantial benefit to his company by entering into a guaranty. There is, however, no direct evidence of this. White describes Wintersport's claims as “speculative,” and he is correct. The record is devoid of any evidence that could support these arguments. Since the burden was on Wintersport to prove the benefit White received and it failed to sustain its burden, we conclude that White's oral guaranty fell within the statute of frauds.

Reversed and dismissed in favor of White.

Interest in Land Any contract that creates or transfers an interest in land is within the statute of frauds. The inclusion of real estate contracts in the statute of frauds reflects the values of an earlier, agrarian society in which land was the primary basis of wealth. Our legal system historically has treated land as being more important than other forms of property. Courts have interpreted the land provision of the statute of frauds broadly to require written evidence of any transaction that will affect the ownership of an interest in land. Thus, a contract to sell or mortgage real estate must be evidenced by a writing, as must an option to purchase real estate or a contract to grant an easement or permit the mining and removal of minerals on land. A lease is also a transfer of an interest in land, but most states' statutes of frauds do not require leases to be in writing unless they are long-term leases,

usually those for one year or more. On the other hand, a contract to erect a building or to insure a building would not be within the real estate provision of the statute of frauds because such contracts do not involve the transfer of interests in land.¹

Exception: Full Performance by the Vendor An oral contract for the sale of land that has been completely performed by the vendor (seller) is “taken out of the statute of frauds”—that is, is enforceable without a writing. For example, Peterson and Lincoln enter into an oral contract for the sale of Peterson's farm at an agreed-on price and Peterson, the vendor, delivers a deed to the farm to

¹Note, however, that a writing might be required under state insurance statutes.

Lincoln. In this situation, the vendor has completely performed and most states would treat the oral contract as being enforceable.

Exception: Part Performance (Action in Reliance) by the Vendee When the vendee (purchaser of land) does an act in clear reliance on an oral contract for the sale of land, an equitable doctrine commonly known as the “part performance doctrine” permits the vendee to enforce the contract notwithstanding the fact that it was oral. The part performance doctrine is based on both evidentiary and reliance considerations. The doctrine recognizes that a person’s conduct can “speak louder than words” and can indicate the existence of a contract almost as well as a writing can. The part performance doctrine is also based on the desire to avoid the injustice that would otherwise result if the contract were repudiated after the vendee’s reliance.

Under section 129 of the *Restatement (Second) of Contracts*, a contract for the transfer of an interest in land can be enforced even without a writing if the person seeking enforcement:

1. Has *reasonably relied* on the contract and on the other party’s assent.
2. Has changed his position to such an extent that *enforcement of the contract is the only way to prevent injustice*.

In other words, the vendee must have done some act in reliance on the contract and the nature of the act must be such that restitution (returning his money) would not be an adequate remedy. The part performance doctrine will not permit the vendee to collect damages for breach of contract, but it will permit him to obtain the equitable remedy of **specific performance**, a remedy whereby the court orders the breaching party to perform his contract.²

A vendee’s reliance on an oral contract could be shown in many ways. Traditionally, many states have required that the vendee pay part or all of the purchase price and either make substantial improvements on the property or take possession of it. For example, Contreras and Miller orally enter into a contract for the sale of Contreras’s land. If Miller pays Contreras a substantial part of the purchase price and either takes possession of the land or begins to make improvements on it, the contract would be enforceable without a writing under the part performance doctrine. These are not the only sorts of acts in reliance that would make an oral contract enforceable, however. Under the *Restatement (Second)* approach, if the promise to

transfer land is clearly proven or is admitted by the breaching party, it is not necessary that the act of reliance include making payment, taking possession, or making improvements.³ It still is necessary, however, that the reliance be such that restitution would not be an adequate remedy. For this reason, a vendee’s payment of the purchase price, standing alone, is usually *not* sufficient for the part performance doctrine.

Contracts That Cannot Be Performed within One Year

A bilateral, executory contract that cannot be performed within one year from the day on which it comes into existence is within the statute of frauds and must be evidenced by a writing. The apparent purpose of this provision is to guard against the risk of faulty or willfully inaccurate recollection of long-term contracts. Courts have tended to construe it very narrowly.

One aspect of this narrow construction is that most states hold that a contract that has been fully performed by *one* of the parties is “taken out of the statute of frauds” and is enforceable without a writing. For example, Nash enters into an oral contract to perform services for Thomas for 13 months. If Nash has already fully performed his part of the contract, Thomas will be required to pay him the contract price.

In addition, this provision of the statute has been held to apply only when the terms of the contract make it impossible for the contract to be completed within one year. You will see an example of this principle in the following *Schaadt v. St. Jude Medical S.C.* case. If the contract is for an indefinite period of time, it is not within the statute of frauds. This is true even if, in retrospect, the contract was not completed within a year. Thus, Weinberg’s agreement to work for Wolf for an indefinite period of time would not have to be evidenced by a writing, even if Weinberg eventually works for Wolf for many years. The mere fact that performance is unlikely to be completed in one year does not bring the contract within the statute of frauds. In most states, a contract “for life” is not within the statute of frauds because it is possible—since death is an uncertain event—for the contract to be performed within a year. In a few states such as New York, contracts for life are within the statute of frauds.

Computing Time In determining whether a contract is within the one-year provision, courts begin counting time on the day when the contract comes into existence. If, under the terms of the contract, it is possible to perform

²Specific performance is discussed in more detail in Chapter 18.

³*Restatement (Second) of Contracts* § 129, comment *d*.

it within one year from this date, the contract does not fall within the statute of frauds and does not have to be in writing. If, however, the terms of the contract make it impossible to complete performance of the contract (without breaching it) within one year from the date on which the contract came into existence, the contract falls within the statute and must meet its requirements to be enforceable. Thus, if Hammer Co. and McCrea agree on

August 1, 2009, that McCrea will work for Hammer Co. for one year, beginning October 1, 2009, the terms of the contract dictate that it is not possible to complete performance until October 1, 2010. Because that date is more than one year from the date on which the contract came into existence, the contract falls within the statute of frauds and must be evidenced by a writing to be enforceable.

Schaadt v. St. Jude Medical S.C., Inc. 2007 U.S. Dist. LEXIS 59586 (U.S. Dist. Ct. D. Minn. 2007)

St. Jude is a large medical device manufacturer. In July 2001, Schaadt began working as a product manager in St. Jude's Cardiac Rhythm Management Division. By all accounts, she performed well. Eventually, though, she became frustrated by sexual harassment and sexual discrimination within her division, so she applied for and obtained a position within another St. Jude division, the U.S. Sales Division (USD).

Schaadt began working in USD as a field marketing manager in May 2004. Shortly after she started her new position, USD asked her and all of the other field marketing managers to sign a written contract containing nonsolicitation and confidentiality provisions. In return for agreeing to these provisions, the field marketing managers—who would otherwise be employees at will—were given one-year terms of employment. The contract required St. Jude to employ Schaadt for a minimum of one year, and it prohibited Schaadt from soliciting St. Jude's employees for one year after the termination of her employment with St. Jude. USD gave the employment agreement to Schaadt and asked her to sign it. The parties dispute whether Schaadt signed it—she alleged that she did sign it—but there is no proof that any representative of St. Jude signed the contract.

Schaadt had conflicts with her supervisor in USD and began looking for another job. She told recruiters that she did not like her current position and wanted to pursue another opportunity. Before Schaadt could quit, though, she was fired. Schaadt sued St. Jude for breach of contract as well as other claims, and St. Jude moved for summary judgment of the breach of contract claim on the ground that it was barred by the statute of frauds.

Schlitz, U.S. District Judge

A contract falls within the statute of frauds unless the contract, by its terms, is capable of being fully performed within one year.

1. Performance Within One Year

Schaadt argues that the statute of frauds is inapplicable because her contract with St. Jude was capable of being fully performed within one year. According to Schaadt, she could have quit her job 30 seconds after she agreed to the contract. That would have triggered the running of the one-year nonsolicitation commitment, and she could have fulfilled that commitment within one year of the date that she entered the contract.

Schaadt's argument is unavailing. The test under the statute of frauds is whether the parties to a contract—all parties—can perform their obligations within one year. In any contract, something might arise within one year that excuses performance. That obviously cannot be enough to defeat application of the statute of frauds, or no contract would ever be covered by the statute. For purposes of the statute of frauds, the question is not whether something might arise within one year that would

excuse performance, but whether the parties can fully perform their obligations under the contract within one year if those obligations are not excused.

The St. Jude–Schaadt contract contains two commitments: a commitment by St. Jude to employ Schaadt for at least one year, and a commitment by Schaadt not to solicit St. Jude's employees for one year after leaving the employ of St. Jude. The parties could not fully perform all of their duties under the contract within one year. True, if Schaadt quit her job 30 seconds (or 30 days) after entering the contract, St. Jude would be excused from performing its obligation to employ Schaadt for a year. But St. Jude would not have performed its obligation. St. Jude needed one full year to perform its obligation under the employment provision, and Schaadt, of course, needed an additional year to perform her obligation under the nonsolicitation provision.

If the law were as Schaadt would have it, then no employment contract would ever fall within the statute of frauds because an employee can always quit (or become disabled or die) a few seconds after entering the contract. For example, an employee could allege that an employment contract for a term of

five years was not within the statute of frauds because the employee could have quit the day after agreeing to the contract. Minnesota courts have consistently rejected such arguments. In sum, the St. Jude–Schaadt “agreement [was] . . . by its terms . . . not to be performed within one year from the making thereof.” Minn. Stat. § 513.01. St. Jude, the party charged with breach, did not sign the contract, and therefore, under the Minnesota statute of frauds, the contract is unenforceable at St. Jude’s option.

2. Necessity of a Signature

Schaadt argues that, despite the fact that St. Jude did not sign the contract, St. Jude drafted the agreement and that is sufficient to satisfy the statute of frauds. Schaadt relies most heavily on *Beach v. Anderson* (Minn. Ct. App. 1988). In *Beach*, the parties entered into an oral contract that included a six-year noncompete provision. The oral contract in *Beach* was transcribed by a court reporter. In addition, both parties in *Beach* explicitly assented to be bound by the contract, and their assent was transcribed by the court reporter. Disputes later arose between the parties, and one of the parties attempted to avoid the contract by arguing that it was subject to the statute of frauds (because of the six-year noncompete provision) and that the statute had not been satisfied because the contract had never been reduced to writing and signed. The Minnesota Court of Appeals agreed that

the contract was within the statute of frauds, but held that the statute’s requirements were met because not merely the terms of the contract, but the parties’ assent to those terms, had been transcribed. *Beach* is obviously distinguishable from the present case. Here, as was true in *Beach*, there is no real doubt about the terms of the contract. St. Jude asked Schaadt to sign the same form contract that it provided to many other employees. But here, as was not true in *Beach*, there is substantial doubt about whether both parties assented to the contract.

The court has a great deal of sympathy for Schaadt. When there is no real doubt about the terms of the proposed St. Jude–Schaadt contract—and no real doubt that St. Jude would have signed the contract if it had timely received a signed copy from Schaadt—it does seem that dismissing Schaadt’s breach-of-contract claim exalts form over substance. But the statute of frauds is, by its nature, a formalistic statute; it provides that, in some circumstances, form is just as important as substance. This is the decision of the Minnesota legislature, and this court is obligated to honor that decision. When the Minnesota statute of frauds clearly requires that the St. Jude–Schaadt contract be reduced to writing and signed by the party against whom enforcement is sought, the court will not expand *Beach* to eliminate the need for any objective evidence of assent.

Summary judgment granted in favor of St. Jude.

Sale of Goods for \$500 or More The original English Statute of Frauds required a writing for contracts for the sale of goods for a price of 10 pounds sterling or more. In the United States today, the writing requirement for the sale of goods is governed by section 2–201 of the Uniform Commercial Code. This section provides that contracts for the sale of goods for the price of \$500 or more are not enforceable without a writing or other specified evidence that a contract was made. There are a number of alternative ways of satisfying the requirements of section 2–201. These will be explained later in this chapter.

Modifications of Existing Sales Contracts Just as some contracts to extend the time for performance fall within the one-year provision of the statute of frauds, agreements to modify existing sales contracts can fall within the statute of frauds if the contract as modified is for a price of \$500 or more.⁴ UCC section 2–209(3) provides that the requirements of the statute of frauds

must be satisfied if the contract as modified is within its provisions. For example, if Carroll and Kestler enter into a contract for the sale of goods at a price of \$490, the original contract does *not* fall within the statute of frauds. However, if they later modify the contract by increasing the contract price to \$510, the modification falls within the statute of frauds and must meet its requirements to be enforceable.

Promise of Executor or Administrator to Pay a Decedent’s Debt Personally

When a person dies, a personal representative is appointed to administer his estate. One of the important tasks of this personal representative, who is called an executor if the person dies leaving a will or an administrator if the person dies without a will, is to pay the debts owed by the decedent. No writing is required when an executor or administrator—acting in his representative capacity—promises to pay the decedent’s debts from the funds of the decedent’s estate. The statute of frauds requires a writing, however, if the executor, acting in her capacity as a private individual rather than in her representative capacity, promises to pay one of the decedent’s

⁴Modifications of sales contracts are discussed in greater detail in Chapter 12.

CONCEPT REVIEW

Contracts within the Statute of Frauds

| Provision | Description | Exceptions (Situations in Which Contract Does Not Require a Writing) |
|--|--|--|
| Marriage | Contracts, other than mutual promises to marry, where marriage is the consideration | — |
| Year | Bilateral contracts that, <i>by their terms</i> , cannot be performed within one year from the date on which the contract was formed | Full (complete) performance by one of the parties |
| Land | Contracts that create or transfer an ownership interest in real property | <ol style="list-style-type: none"> 1. Full performance by vendor (vendor deeds property to vendees) or 2. “Part performance” doctrine: Vendee relies on oral contract—for example, by: <ol style="list-style-type: none"> a. Paying substantial part of purchase price, and b. Taking possession or making improvements |
| Executor’s Promise | Executor promises to pay estate’s debt out of his own funds | — |
| Sale of Goods at Price \$500 or More (UCC § 2–201) | Contracts for the sale of goods for a contract price of \$500 or more; also applies to modifications of contracts for goods where price as modified is \$500 or more | See alternative ways of satisfying statute of frauds under UCC |
| Collateral Contracts Guaranty | Contracts where promisor promises to pay the debt of another if the primary debtor fails to pay | “Main purpose” or “leading object” exception: Guarantor makes promise primarily for her own economic benefit |

debts out of her own (the executor’s) funds. For example, Thomas, who has been appointed executor of his Uncle Max’s estate, is presented with a bill for \$10,500 for medical services rendered to Uncle Max during his last illness by the family doctor, Dr. Barnes. Feeling bad that there are not adequate funds in the estate to compensate Dr. Barnes for his services, Thomas promises to pay Dr. Barnes from his own funds. Thomas’s promise would have to be evidenced by a writing to be enforceable.

Contract in Which Marriage Is the Consideration The statute of frauds also requires a writing when marriage is the consideration to support a contract. The marriage provision has been interpreted to be inapplicable to agreements that involve only mutual

promises to marry. It can apply to any other contract in which one party’s promise is given in exchange for marriage or the promise to marry on the part of the other party. This is true whether the promisor is one of the parties to the marriage or a third party. For example, if Hicks promises to deed his ranch to Everett in exchange for Everett’s agreement to marry Hicks’s son, Everett could not enforce Hicks’s promise without written evidence of the promise.

Prenuptial (or antenuptial) agreements present a common contemporary application of the marriage provision of the statute of frauds. These are agreements between couples who contemplate marriage. They usually involve such matters as transfers of property, division of property upon divorce or death, and various lifestyle

issues. Assuming that marriage or the promise to marry is the consideration supporting these agreements, they are within the statute of frauds and must be evidenced by a writing.⁵

Meeting the Requirements of the Statute of Frauds

Nature of the Writing Required The statutes of frauds of the various states are not uniform in their formal requirements. However, most states require only a *memorandum* of the parties' agreement; they do not require that the entire contract be in writing. Essential terms of the contract must be stated in the writing. The memorandum must provide written evidence that a contract was made, but it need not have been created with the intent that the memorandum itself would be binding. In fact, in some cases, written offers that were accepted orally have been held sufficient to satisfy the writing requirement. Typical examples include letters, telegrams, receipts, or any other writing indicating that the parties had a contract. The memorandum need not be made at the same time the contract comes into being; in fact, the memorandum may be made at any time before suit is filed. If a memorandum of the parties' agreement is lost, its loss and its contents may be proven by oral testimony.

Contents of the Memorandum Although there is a general trend away from requiring complete writings to satisfy the statute of frauds, an adequate memorandum must still contain several things. The essential terms of the contract generally must be indicated in the memorandum. States differ in their requirements concerning how specifically the terms must be stated, however. The identity of the parties must be indicated in some way, and the subject matter of the contract must be identified with reasonable certainty. This last requirement causes particular problems in contracts for the sale of land, since many statutes require a detailed description of the property to be sold.

Contents of Memorandum under the UCC The standard for determining the sufficiency of the contents of a memorandum is more flexible in cases concerning

contracts for the sale of goods. This looser standard is created by the language of UCC section 2-201, which states that the writing must be sufficient to indicate that a contract for sale has been made between the parties, but a writing can be sufficient even if it omits or incorrectly states a term agreed on. However, the memorandum is not enforceable for more than the quantity of goods stated in the memorandum. Thus, a writing that does not indicate the *quantity* of goods to be sold would not satisfy the Code's writing requirement.

Signature Requirement The memorandum must be signed by the *party to be charged* or his authorized agent. (The party to be charged is the person using the statute of frauds as a defense—generally the defendant unless the statute of frauds is asserted as a defense to a counterclaim.) This means that it is not necessary for purposes of meeting the statute of frauds for both parties' signatures to appear on the document. It is, however, in the best interests of both parties for both signatures to appear on the writing; otherwise, the contract evidenced by the writing is enforceable only against the signing party. Unless the statute expressly provides that the memorandum or contract must be signed at the end, the signature may appear anywhere on the memorandum. Any writing, mark, initials, stamp, engraving, or other symbol placed or printed on a memorandum will suffice as a signature, as long as the party to be charged intended it to authenticate (indicate the genuineness of) the writing.

Memorandum Consisting of Several Writings In many situations, the elements required for a memorandum are divided among several documents. For example, Wayman and Allen enter into a contract for the sale of real estate, intending to memorialize their agreement in a formal written document later. While final drafts of a written contract are being prepared, Wayman repudiates the contract. Allen has a copy of an unsigned preliminary draft of the contract that identifies the parties and contains all of the material terms of the parties' agreement, an unsigned note written by Wayman that contains the legal description of the property, and a letter signed by Wayman that refers to the contract and to

⁵Note, however, that "nonmarital" agreements between unmarried cohabitants who do not plan marriage are not within the marriage provision of the statute of frauds, even though the agreement may concern the same sorts of matters that are typically covered in a prenuptial agreement.

The Electronic Signatures Act,

www.willinghamcote.com/articles/pfc-esignact.pdf

the other two documents. None of these documents, standing alone, would be sufficient to satisfy the statute of frauds. However, Allen can combine them to meet the requirements of the statute, provided that they all relate to the same agreement. This can be shown by physical attachment, as where the documents are stapled or bound together, or by references in the documents themselves that indicate that they all apply to the same transaction. In some cases, it has also been shown by the fact that the various documents were executed at the same time.

UCC: Alternative Means of Satisfying the Statute of Frauds in Sale of Goods Contracts

As you have learned, the basic requirement of the UCC statute of frauds [2–201] is that a contract for the sale of goods for the purchase price of \$500 or more must be evidenced by a written memorandum that indicates the existence of the contract, states the quantity of goods to be sold, and is signed by the party to be charged. Recognizing that the underlying purpose of the statute of frauds is to provide more evidence of the existence of a contract than the mere oral testimony of one of the parties, however, the Code also permits the statute of frauds to be satisfied by any of four other types of evidence. These different methods of satisfying the UCC statute of frauds are depicted in Figure 2. Under the UCC, then, a contract for the sale of goods for a purchase price of \$500 or more for which there is no written memorandum signed by the party to be charged can meet the requirements of the statute of frauds in any of the following ways:

1. *Confirmatory memorandum between merchants.* Suppose Gardner and Roth enter into a contract over the telephone for the sale of goods at a price of \$5,000. Gardner then sends a memorandum to Roth confirming the deal they made orally. If Roth receives the memo and does not object to it, it would be fair to say that the parties' conduct provides some evidence that a contract exists. Under some circumstances, the UCC permits such confirmatory memoranda to satisfy the statute of frauds even though the writing is signed by the party who is seeking to enforce the contract rather than the party against whom enforcement is sought [2–201(2)]. This exception applies only when *both* of the parties to a contract are *merchants*. Furthermore, the memo must be sent within a reasonable time after the contract is made and must be sufficient to bind the person who sent it if enforcement were sought against him (that is, it must indicate that a contract was made, state a quantity, and be

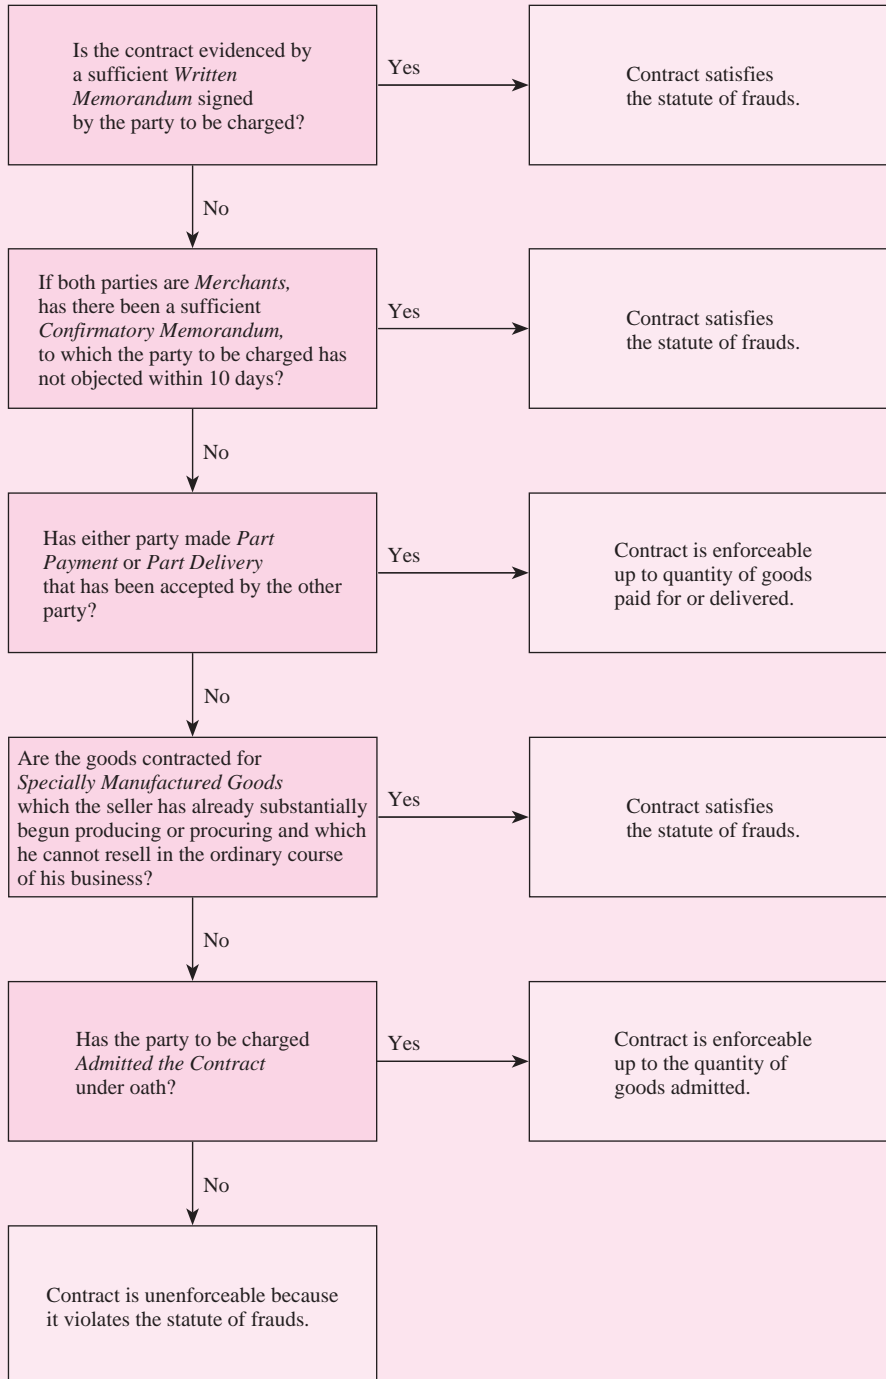

signed by the sender). If the party against whom enforcement is sought receives the memo, has reason to know its contents, and yet fails to give written notice of objection to the contents of the memo within 10 days after receiving it, the memo can be introduced to meet the requirements of the statute of frauds.

2. *Part payment or part delivery.* Suppose Rice and Cooper enter a contract for the sale of 1,000 units of goods at \$1 each. After Rice has paid \$600, Cooper refuses to deliver the goods and asserts the statute of frauds as a defense to enforcement of the contract. The Code permits part payment or part delivery to satisfy the statute of frauds, but only for the quantity of goods that have been delivered or paid for [2–201(3)(c)]. Thus, Cooper would be required to deliver only 600 units rather than the 1,000 units Rice alleges that he agreed to sell.

3. *Admission in pleadings or court.* Another situation in which the UCC statute of frauds can be satisfied without a writing occurs when the party being sued admits the existence of the oral contract in his trial testimony or in any document that he files with the court. For example, Nelson refuses to perform an oral contract he made with Smith for the sale of \$2,000 worth of goods, and Smith sues him. If Nelson admits the existence of the oral contract in pleadings or in court proceedings, his admission is sufficient to meet the statute of frauds. This exception is justified by the strong evidence that such an admission provides. After all, what better evidence of a contract can there be than is provided when the party being sued admits under penalty of perjury that a contract exists? When such an admission is made, the statute of frauds is satisfied as to the quantity of goods admitted [2–201(3)(b)]. For example, if Nelson admits contracting only for \$1,000 worth of goods, the contract is enforceable only to that extent. The following *Jones* case illustrates this method of satisfying the statute of frauds.

4. *Specially manufactured goods.* Finally, an oral contract within the UCC statute of frauds can be enforced without a writing in some situations involving the sale of specially manufactured goods. This exception to the writing requirement will apply only if the nature of the specially manufactured goods is such that they are not suitable for sale in the ordinary course of the seller's business. Completely executory oral contracts are not enforceable under this exception. The seller must have made a substantial beginning in manufacturing the goods for the buyer, or must have made commitments for their procurement, before receiving notice that the buyer was repudiating the sale [2–201(3)(a)]. For example, Bennett Co. has an oral

Figure 2 Satisfying the Statute of Frauds through a Contract for the Sale of Goods with a Price of \$500 or More

CYBERLAW IN ACTION

E-Signatures and the Statute of Frauds

The necessity of being able to prove the existence of a contract is as great online as it is in offline transactions. When we communicate or transact business online, we cannot depend on the traditional means of authenticating a contract—reading a person’s distinctive signature, seeing the face, or hearing the voice of the other party, for example. Practical questions flow from this state of affairs, such as how can we be sure that a transmission arrives in the same condition as it left the sender, and that it has not been altered or forged? Technologies to increase security online have been developed and new ones are emerging all the time. One method of increasing security in electronic transmissions is the use of **digital signatures**. A digital signature is an electronic identifier that tells a person receiving the document whether it is genuinely from the sender and whether it has been altered in any way. It is important to note that a digital signature is not an electronic image of a person’s signature or a person’s name typed out. Rather, digital signatures employ encryption technology to create a unique identifier for a sender that can be verified by the receiver.

The absence of traditional authentication methods also raises legal questions as well, such as whether a contract formed electronically, such as over e-mail or on an e-tailer’s Web site, satisfies the statute of frauds. Few courts have dealt with this issue. However, the vast majority of states have enacted some form of legislation to accommodate formal legal requirements to the realities of e-commerce. The trouble is that this legislation has not been uniform. Some states’ legislation has been tied into a particular technology, such as recognizing only digital signatures as satisfying legal requirements.

The **Uniform Electronic Transactions Act (UETA)** takes a different approach. It is a proposed uniform state law that was designed to “remove barriers to electronic commerce by validating and effectuating electronic records and signatures.”⁶ It is not tied to any particular technology. The UETA states that an “electronic signature” (defined as an “electronic sound, symbol, or process attached to or logically associated with an electronic record and executed or adopted by a person with the intent to sign the electronic record”) satisfies any law requiring a signature. Thus, digital signatures, which are one form of electronic signature, would satisfy the UETA, but so would a more commonplace symbol or event such as a type-written name at the end of an e-mail or a click of a mouse. The UETA has been enacted in 47 states and the District of Columbia at the time of this writing.

Against the background of lack of uniformity in state law, the federal government enacted the **Electronic Signatures in Global and National Commerce Act (E-Sign)** in 2000. E-Sign provides that in transactions that are in or affecting interstate commerce, “a signature, contract, or other record relating to such transaction may not be denied legal effect, validity, or enforceability solely because it is in electronic form,” nor can “a contract relating to such a transaction be denied legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation.” Like UETA, E-Sign broadly interprets the concept of electronic signature—using, in fact, the same statutory definition of electronic signature as that which is used in UETA. E-Sign overrides any state law that is inconsistent with UETA, thus helping to harmonize U.S. law about the interaction of formal requirements such as the statute of frauds and electronic contracts.

⁶Uniform Electronic Transactions Act, Prefatory Note (1999).

contract with Stevenson for the sale of \$2,500 worth of calendars imprinted with Bennett Co.’s name and address. If Bennett Co. repudiates the contract before Stevenson has made a substantial beginning in manufacturing the calendars, the contract will be unenforceable under the statute of frauds. If, however, Bennett Co. repudiated the

contract after Stevenson had made a substantial beginning, the oral contract would be enforceable. The specially manufactured goods provision is based both on the evidentiary value of the seller’s conduct and on the need to avoid the injustice that would otherwise result from the seller’s reliance.

Jones v. The Baran Company

660 S.E.2d 420 (Ga. Ct. App. 2008)

In June 2003, Clifton Jones sought to buy a Mercedes-Benz McLaren SLR, an exotic race car that was hand built and manufactured in an extremely limited quantity. Jones planned to buy the vehicle and resell it for a profit. As such, he wanted to buy the vehicle at a price equal to the manufacturer’s suggested retail price (MSRP), rather than at fair market value as independently determined by a dealership. Jones and his wife contacted a dealership, Mercedes-Benz of Buckhead.

The dealership had recently opened for business, operations were chaotic, and no one was able to quote a specific price for the vehicle. However, the salesperson told Jones that, in return for a \$50,000 deposit, he would be entitled to purchase the vehicle at the MSRP once it was manufactured and delivered to the dealership. The salesperson further informed Jones that the dealership's general manager had approved the sale at MSRP. According to the salesperson, the MSRP would "probably [be] somewhere in the mid-[\$400,000] range," but no actual price had been determined at that time. At the salesperson's request, Jones signed a preprinted form entitled "Additional Terms and Conditions of Order Agreement for a Mercedes-Benz SLR McLaren Coupe Vehicle." Jones subsequently sent his \$50,000 deposit to the dealership, which retained the funds for over one-and-a-half years pending the manufacture and delivery of the vehicle.

The vehicle was delivered from the factory to the dealership in December 2004 with an MSRP established as \$465,650. By that time, the original salesperson was no longer employed by the dealership, and her pending sales transactions had been taken over by another salesperson. The new salesperson had no knowledge of the prior price agreement reached with Jones and was instructed to quote Jones a final sales price of fair market value. As such, the new salesperson quoted Jones a final sales price of \$800,000, the alleged fair market value of the vehicle. Jones disputed the quoted final sales price and refused to pay any amount above the MSRP. The dealership's counsel later wrote a letter to Jones offering a sales price of \$700,000. Jones rejected the offer, and his deposit was returned to him by the dealership. The dealership later sold the vehicle to another customer for \$505,000.

Jones filed suit for breach of contract seeking against the dealership, alleging that the dealership had entered into a contract to sell him the vehicle at a price equal to the MSRP. Jones moved for summary judgment and the trial court denied his motion. Jones appealed.

Newkirk, Judge

A contract for sale of goods may be made in any manner sufficient to show agreement, including conduct by both parties which recognizes the existence of such a contract. Furthermore, "[e]ven though one or more terms are left open a contract for sale does not fail for indefiniteness if the parties have intended to make a contract and there is a reasonably certain basis for giving an appropriate remedy." UCC § 2-204(3). Hence, if otherwise sufficient, the contract need not reflect an agreement on a specific price term.

Here, Jones presented testimony that there was an oral agreement under which the dealership was to sell Jones the vehicle at the MSRP in return for Jones making a \$50,000 deposit and agreeing to purchase the vehicle once it was manufactured and delivered to the dealership, and that the terms of the oral agreement were supplemented by the "Additional Terms & Conditions of Order" form signed by Jones. Jones testified to this effect in his deposition, and the dealership's salesperson confirmed that she had promised Jones that he would be entitled to purchase the vehicle at the MSRP in return for his deposit and that the general manager had approved the agreement. The dealership failed to present any direct evidence that contradicted the positive testimony of Jones and its salesperson. We therefore conclude that the uncontroverted evidence shows that an oral contract had been formed for the sale of the vehicle, with the price term being the MSRP ultimately arrived at by the manufacturer.

Since evidence shows the existence of the oral agreement, the next issue is whether the agreement is enforceable. In this

respect, the dealership argues that Jones's version of the contract is unenforceable because it violates the Statute of Frauds. It is true that:

a contract for the sale of goods for the price of \$500.00 or more is not enforceable by way of action or defense unless there is some writing sufficient to indicate that a contract for sale has been made between the parties and signed by the party against whom enforcement is sought or by his authorized agent or broker.

UCC § 2-201(1). Notwithstanding the writing and signature requirements of the Statute of Frauds, however, a contract for the sale of goods is still enforceable "[i]f the party against whom enforcement is sought admits in his pleading, testimony, or otherwise in court that a contract for sale was made." UCC § 2-201(3)(b).

It is sufficient that the party admit both that a contract was made and that the contract specified a quantity of goods. In the present case, the dealership's answer to the complaint admitted that the dealership had entered into a contract with Jones. The dealership did not otherwise dispute the existence of a contract, and in fact, retained Jones's deposit for the vehicle. Furthermore, the dealership's representative deposed under [Georgia law] testified that there was a contract between the parties. The dealership disagreed, however, as to the terms of the contract of sale. Under these circumstances, where the dealership admitted that a contract existed for the sale of a specific quantity of goods (namely, one vehicle) but on different terms and conditions than those alleged by Jones,

the oral agreement between Jones and the dealership was enforceable under the exception to the Statute of Frauds set forth in UCC § 2–201(3)(b).

We conclude that the trial court erred in granting summary judgment to the dealership on the breach of contract claim. Furthermore, the trial court should have granted summary

judgment to Jones on the issue of liability, since the dealership failed to present evidence sufficient to contradict the direct evidence brought forward by Jones as to the existence and terms of the contract between the parties.

Summary judgment reversed in favor of Jones.

Promissory Estoppel and the Statute of Frauds

The statute of frauds, which was created to prevent fraud and perjury, has often been criticized because it can create unjust results. One of the troubling features of the statute is that it can as easily be used to defeat a contract that was actually made as to defeat a fictitious agreement. As you have seen, courts and legislatures have created several exceptions to the statute of frauds that reduce the statute's potential for creating unfair results. In recent years, courts in some states have allowed the use of the doctrine of **promissory estoppel**⁷ to enable some parties to recover under oral contracts that the statute of frauds would ordinarily render unenforceable.

Courts in these states hold that, when one of the parties would suffer serious losses because of her reliance on an oral contract, the other party is estopped from raising the statute of frauds as a defense. This position has been approved in the *Restatement (Second) of Contracts*. Section 139 of the *Restatement (Second)* provides that a promise that induces action or forbearance can be enforceable notwithstanding the statute of frauds if the reliance was foreseeable to the person making the promise and if injustice can be avoided only by enforcing the promise. The idea behind this section and the cases employing promissory estoppel is that the statute of frauds, which is designed to prevent injustice, should not be allowed to work an injustice. Section 139 and these cases also impliedly recognize the fact that the reliance required by promissory estoppel to some extent provides evidence of the existence of a contract between the parties, since it is unlikely that a person would materially rely on a nonexistent promise.

The use of promissory estoppel as a means of circumventing the statute of frauds is still controversial, however. Many courts fear that enforcing oral contracts on the basis of a party's reliance will essentially negate the statute. In cases involving the UCC statute of frauds, an

additional source of concern involves the interpretation of section 2–201. Some courts have construed the provisions listing specific alternative methods of satisfying section 2–201's formal requirements to be *exclusive*, precluding the creation of any further exceptions by courts.

The Parol Evidence Rule

Explanation of the Rule In many situations, contracting parties prefer to express their agreements in writing even when they are not required to do so by the statute of frauds. Written contracts rarely come into being without some prior discussions or negotiations between the parties, however. Various promises, proposals, or representations are usually made by one or both of the parties before the execution of a written contract. What happens when one of those prior promises, proposals, or representations is not included in the terms of the written contract? For example, suppose that Jackson wants to buy Stone's house. During the course of negotiations, Stone states that he will pay for any major repairs that the house needs for the first year that Jackson owns it. The written contract that the parties ultimately sign, however, does not say anything about Stone paying for repairs, and, in fact, states that Jackson will take the house "as is." The furnace breaks down three months after the sale, and Stone refuses to pay for its repair. What is the status of Stone's promise to pay for repairs? The basic problem is one of defining the boundaries of the parties' agreement. Are all the promises made in the process of negotiation part of the contract, or do the terms of the written document that the parties signed supersede any preliminary agreements?

The **parol evidence rule** provides the answer to this question. The term *parol evidence* means written or spoken statements that are *not contained in the written contract*. The parol evidence rule provides that, when parties enter a *written contract* that they intend as a complete **integration** (a complete and final statement of their agreement), a court will not permit the use of evidence of

⁷The doctrine of promissory estoppel is discussed in Chapters 9 and 12.

prior or *contemporaneous* statements to add to, alter, or contradict the terms of the written contract. This rule is based on the presumption that when people enter into a written contract, the best evidence of their agreement is the written contract itself. It also reflects the idea that later expressions of intent are presumed to prevail over earlier expressions of intent. In the hypothetical case involving Stone and Jackson, assuming that they intended the written contract to be the final integration of their agreement, Jackson would not be able to introduce evidence of Stone's promise to pay for repairs. The effect of excluding preliminary promises or statements from consideration is, of course, to confine the parties' contract to the terms of the written agreement. The lesson to be learned from this example is that people who put their agreements in writing should make sure that all the terms of their agreement are included in the writing. The *Carrow v. Arnold* case illustrates the application of the parol evidence rule.

Scope of the Parol Evidence Rule The parol evidence rule is relevant only in cases in which the parties have expressed their agreement in a written contract. Thus, it would not apply to a case involving an oral contract or to a case in which writings existed that were not intended to embody the final statement of at least part of the parties' contract. The parol evidence rule has been made a part of the law of sales in the Uniform Commercial Code [2–202], so it is applicable to contracts for the sale of goods as well as to contracts governed by the common law of contracts. Furthermore, the rule excludes only evidence of statements made *prior to* or *during* the signing of the written contract. It does not apply to statements made after the signing of the contract. Thus, evidence of subsequent statements is freely admissible.

Admissible Parol Evidence In some situations, evidence of statements made outside the written contract is admissible notwithstanding the parol evidence rule. Parol evidence is permitted in the situations discussed below either because the writing is not the best evidence of the contract or because the evidence is offered, not to contradict the terms of the writing, but to explain the writing or to challenge the underlying contractual obligation that the writing represents.

1. Additional terms in partially integrated contracts. In many instances, parties will desire to introduce evidence of statements or agreements that would supplement rather than contradict the written contract. Whether they

can do this depends on whether the written contract is characterized as *completely integrated* or *partially integrated*. A completely integrated contract is one that the parties intend as a *complete and exclusive statement* of their entire agreement. A partially integrated contract is one that expresses the parties' final agreement as to some but not all of the terms of their contract. When a contract is only partially integrated, the parties are permitted to use parol evidence to prove the *additional* terms of their agreement. Such evidence cannot, however, be used to contradict the written terms of the contract. To determine whether a contract is completely or partially integrated, a court must determine the parties' intent. A court judges intent by looking at the language of the contract, the apparent completeness of the writing, and all the surrounding circumstances. It will also consider whether the contract contains a **merger clause** (also known as an **integration clause**). These clauses, which are very common in form contracts and commercial contracts, provide that the written contract is the complete integration of the parties' agreement. They are designed to prevent a party from giving testimony about prior statements or agreements and are generally effective in indicating that the writing was a complete integration. Even though a contract contains a merger clause, parol evidence could be admissible under one of the following exceptions.

2. Explaining ambiguities. Parol evidence can be offered to explain an ambiguity in the written contract. Suppose a written contract between Lowen and Matthews provides that Lowen will buy "Matthews's truck," but Matthews has two trucks. The parties could offer evidence of negotiations, statements, and other circumstances preceding the creation of the written contract to identify the truck to which the writing refers. Used in this way, parol evidence helps the court interpret the contract. It does not contradict the written contract.

3. Circumstances invalidating contract. Any circumstances that would be relevant to show that a contract is not valid can be proven by parol evidence. For example, evidence that Holden pointed a gun at Dickson and said, "Sign this contract, or I'll kill you," would be admissible to show that the contract was voidable because of duress. Likewise, parol evidence would be admissible to show that a contract was illegal or was induced by fraud, misrepresentation, undue influence, or mistake.

4. Existence of condition. It is also permissible to use parol evidence to show that a writing was executed with the understanding that it was *not to take effect until the*

CONCEPT REVIEW

Parol Evidence Rule

| Parol Evidence Rule | Applies when: | Provides that: |
|-----------------------------------|---|---|
| | Parties create a writing intended as a final and complete integration of at least part of the parties' contract. | Evidence of statements of promises made before or during the creation of the writing cannot be used to supplement, change, or contradict the terms of the written contract. |
| But Parol Evidence Can Be Used to | <ol style="list-style-type: none"> 1. Prove consistent, additional terms when the contract is <i>partially integrated</i>. 2. Explain an ambiguity in the written contract. 3. Prove that the contract is void, voidable, or unenforceable. 4. Prove that the contract was subject to a condition. 5. Prove that the parties subsequently modified the contract or made a new agreement. | |

occurrence of a condition (a future, uncertain event that creates a duty to perform). Suppose Farnsworth signs a contract to purchase a car with the agreement that the contract is not to be effective unless and until Farnsworth gets a new job. If the written contract is silent about any conditions that must occur before it becomes effective, Farnsworth could introduce parol evidence to prove the existence of the condition. Such proof merely elaborates on, but does not contradict, the terms of the writing.

5. *Subsequent agreements*. As you read earlier, the parol evidence rule does not forbid parties to introduce proof

of *subsequent agreements*. This is true even if the terms of the later agreement cancel, subtract from, or add to the obligations stated in the written contract. The idea here is that when a writing is followed by a later statement or agreement, the writing is no longer the best evidence of the agreement. You should be aware, however, that subsequent modifications of contracts may sometimes be unenforceable because of lack of consideration or failure to comply with the statute of frauds. In addition, contracts sometimes expressly provide that modifications must be written. In this situation, an oral modification would be unenforceable.

Carrow v. Arnold

2006 Del. Ch. LEXIS 191 (Del. Ct. Ch. 2006)

Lloyd Carrow owned a farm consisting of approximately 223 acres. Lloyd Arnold and Rodney Mitchell are partners in a real estate partnership. Al Moor, a long-time acquaintance of Carrow, had heard a rumor that Carrow wanted to sell his farm. He knew that Arnold and Mitchell were looking to buy real estate in the area, so he introduced them to Carrow. In mid-April 2003, Arnold, Mitchell, and Moor met with Carrow at his farm. At their first meeting, Carrow gave his visitors a tour of his farm but expressed reservations about selling it. Indeed, Arnold offered Carrow \$1.2 million for the farm, but Carrow declined. During the meeting, Carrow showed Arnold a letter from the New Jersey Nature Conservancy offering to buy his farm for \$1.5 million. During their discussions, Arnold told Carrow that if Carrow sold him the farm, he could continue to live on the farm and to till the land as long as Arnold owned it.

Approximately a week later, Arnold and Mitchell returned to the farm and negotiated with Carrow over the terms and conditions of a sale. During these negotiations, Carrow again expressed reservations about selling the farm because he did not want to leave it. Carrow testified that Arnold assured him that "Nothing would ever change for you, nothing. . . ." and that Carrow could "go right on farming this farm the rest of your life. . . ." Carrow claimed that Arnold assured him that he wanted to buy the land to use strictly as a hunting farm, and he understood this to mean that Arnold did not intend to develop the property or to transfer it any time in the near future. Carrow later testified that he would not have sold the farm without these representations.

Arnold admitted that during various stages of the negotiations he assured Carrow that Carrow could continue to live on and farm the land and that Arnold would never develop it. He also agreed that he told Carrow that he wanted the land for hunting purposes. According to Arnold, however, in making this and other assurances to Carrow, he always included the qualifier “as long as I own it.” After some back and forth bargaining, Carrow agreed to sell the farm to Arnold for \$1.4 million, not including the farm equipment.

Within a few days of their second meeting, Arnold returned to the farm and left a draft of a written contract with Carrow. Carrow put the contract on a shelf and did not discuss it with anyone for approximately one week. Although he saw provisions in the draft agreement that he did not like, he did not pay too much attention to it and did not “look at [the agreement] like I should have.” Carrow did not seek the advice of an attorney, nor did he tell his adult children that he was selling the farm. He instead sought the assistance of his accountant. On April 28, 2003, Carrow and Arnold met in the accountant’s office to discuss the proposed contract. Carrow expressed reservations about certain provisions in the contract, and the parties changed those provisions in response to Carrow’s concerns. One section of the contract, for example, gave Carrow a life interest in the farmhouse and the approximately two acres around it. At least two provisions in the agreement were qualified by the statement “for as long as Purchaser shall own” the property or a similar language. At the conclusion of the meeting, the parties signed the Agreement and Arnold gave Carrow a \$200,000 deposit. Within days of executing the Agreement, Arnold and Mitchell began to have the land surveyed for subdivision.

On May 16, Mitchell submitted plans to the Kent County Department of Planning Services to have the land approved for residential development. Arnold and Mitchell testified that they never had any intention to actually develop the land, but submitted the plans to the county because the land would be more valuable if approved for residential development. Consistent with this testimony, Arnold and Mitchell tried to enter into a transaction whereby they would sell the land for less than its appraised value to the Delaware Chapter of The Nature Conservancy, a nonprofit organization dedicated to preserving undeveloped land. Since part of the transaction would be considered a charitable contribution, the higher the appraised value of the land, the higher the tax deduction Arnold and Mitchell would receive. After learning that the Carrow farm was under a contract to be sold, the Conservancy had contacted Mitchell to see if it could purchase the farm. During the negotiations with the Conservancy, Arnold bargained for contractual provisions that would allow Carrow to remain on the farm and continue to till it for as long as he wanted. Eventually, the proposed transaction with the Conservancy fell apart, mostly because of tax difficulties.

By early May, Carrow was having reservations about selling his farm, so he called Arnold and told him that he wanted to return the deposit. Arnold replied that Carrow could not back out of the deal. Carrow says that he began to reconsider the agreement after he saw surveyors on various parts of the property. He asserted that he did not know that Arnold and Mitchell were professional real estate developers, and he thought he sold the farm for substantially less than its true value. Arnold, on the other hand, argued that Carrow simply had seller’s remorse and wanted more money. Carrow filed suit to have the agreement rescinded, and Arnold later counterclaimed for enforcement of the contract.

Parsons, Vice Chancellor

Carrow alleges that the agreement was procured through fraud and misrepresentation. His allegation of fraud, however, consists entirely of the claim that Arnold made oral representations and promises before the execution of the written agreement and that such representations and promises have not been honored. Arnold contends that the agreement is an integrated agreement and the parol evidence rule bars consideration of earlier representations or promises that he allegedly made. These competing contentions raise several legal and factual issues.

The first issue that must be resolved, however, is whether the court is precluded from considering Arnold’s oral representations because their consideration is barred by the parol evidence rule. I find that the parol evidence rule generally would bar admission of the oral representations, but the analysis cannot stop

there. Carrow argues that parol evidence is admissible under one or both of two exceptions to the rule: (1) for instances where the contract language is ambiguous; and (2) when the contract is the product of fraud or misrepresentation.

The Parol Evidence Rule

When a written contract is intended to be the final expression of the parties’ agreement, the parol evidence rule bars the introduction of evidence of prior or contemporaneous oral understandings that vary the written terms of the agreement. The parol evidence rule prevents the use of extrinsic evidence of an oral agreement to vary a fully integrated agreement that the parties have reduced to writing. Where a written agreement is meant to be final and complete, it is a totally integrated contract. If a written agreement is final and incomplete, it is a

partially integrated contract. The parol evidence rule prevents the consideration of oral evidence that would contradict either total or partial[ly] integrated agreements.

Thus, to apply the parol evidence rule, the court first must decide whether the parties' written contract was intended to be the final expression of their agreement, and second whether the alleged oral representations would contradict the written terms of the agreement.

1. Integration

When determining whether a written contract is the final expression of the parties' agreement, a court should consider the facts and circumstances surrounding the execution of the instrument. Some of the factors a court should consider are: the intent of the parties, where such intent is discernible; the language of the contract itself and whether it contains an integration clause; whether the instrument was carefully and formally drafted; the amount of time the parties had to consider the terms of the contract; whether the parties bargained over specific terms; and whether the contract addresses questions that naturally arise out of the subject matter.

The Agreement of Sale [in this case] is a final, integrated contract. The written contract does not contain an integration clause stating that it is intended to be the parties' final agreement. Such a clause would create a presumption of integration. The absence of an integration clause, however, does not necessarily mean that the parties did not intend the contract to be the final and complete expression of their agreement. Although lacking an integration clause, the Agreement of Sale is a formally drafted instrument. It is typewritten, and Carrow and Arnold had their signatures witnessed by a notary. Having the contract witnessed reflects a certain solemnity which shows that the parties acted deliberately and intended to be legally bound to the contract as written.

Furthermore, Carrow had approximately a week to study the proposed contract. Nothing prevented Carrow from reviewing the draft agreement with an attorney or discussing the sale with his family. Instead, Carrow chose to consult only his accountant about the agreement. At the meeting with Arnold in [the accountant's] office, Carrow and his accountant bargained over, and achieved concessions on, several specific terms in the final Agreement. If, as Carrow contends, the written contract was inconsistent with oral promises and representations Arnold had made earlier, Carrow had ample opportunity and motive to raise these issues with Arnold before signing the Agreement. He did not. In addition, the written Agreement addresses issues that normally arise in connection with the sale of land.

I find that the Agreement of Sale is a final, integrated contract. Because it is a final, integrated contract, the parol

evidence rule bars the admission of oral promises and representations that are inconsistent with its written terms, unless an exception to the rule applies in this case.

2. Consistency

The Court further finds that the alleged oral representations Arnold made to Carrow during their negotiations, if admitted for purposes of construing their contract, would be inconsistent with the written terms of their final Agreement. Thus, in the absence of an exception such as ambiguity or fraud, the parol evidence rule precludes the admission of Carrow's evidence of alleged oral modifications.

3. Ambiguity

Carrow argues that the Agreement is ambiguous and that extrinsic evidence should be admitted to clarify the alleged ambiguity. To avoid repeating points made elsewhere in this opinion, I will not discuss each argument for ambiguity advanced by Carrow. The following is fairly representative. Carrow argues that the phrase "as long as Purchaser shall own it" is ambiguous as to the length of time that it represents. Carrow claims to have understood this phrase as implying that his rights to remain on the farm would last into the foreseeable future. I find the challenged language unambiguous. A contract is only ambiguous if its language is susceptible to two competing reasonable interpretations. I consider Carrow's interpretation unreasonable. Merely disliking the implications of a contractual provision does not render it ambiguous. The ordinary meaning of the phrase "as long as Purchaser shall own it" places no restriction on the length of time that ultimately may turn out to be.

4. The Fraud Exception to the Parol Evidence Rule

Carrow argues that parol evidence should be admitted because Arnold fraudulently induced Carrow to enter the Agreement. Courts have long recognized that where fraud or misrepresentation is alleged, evidence of oral promises or representations which are made prior to the written agreement will be admitted. To successfully allege fraudulent misrepresentation, a plaintiff must show that: (1) the defendant made a false representation, usually one of fact; (2) the defendant knew or believed that the representation was false, or made it with reckless indifference to the truth; (3) the defendant's false representation was intended to induce the plaintiff to act or refrain from acting; (4) the plaintiff's action or inaction was taken in justifiable reliance upon the representation; and (5) the plaintiff was damaged by such reliance.

Carrow alleges that Arnold committed fraud by making the following promises and representations: (1) that Carrow could remain on the land and continue to farm it; (2) that if Carrow sold his farm to Arnold, nothing would change for him; (3) that

Arnold intended to use the farm for agricultural and hunting purposes, which Carrow understood to mean that he did not intend to transfer the property for a long time; and (4) that Arnold would not develop or build on the land. Even assuming that Arnold promised each of these things, Carrow's arguments suffer from two serious flaws. First, these promises preceded the execution of the written contract and are not false statements of fact. Second, Carrow knew that there were provisions in the proposed Agreement that he did not like because they seemed inconsistent with the alleged oral promises. He had the opportunity to, and actually did, bargain for specific terms ameliorating some of those concerns, but not others. Thus, any reliance Carrow placed on the prior oral representations was unjustified.

Prior oral promises usually do not constitute "false representations of fact" that would satisfy the first element of fraudulent misrepresentation. A viable claim of fraud concerning a contract must allege misrepresentations of present facts (rather than merely of future intent) that were collateral to the contract and which induced the allegedly defrauded party to enter into the contract. All of the statements Carrow characterizes as fraudulent are either promises or statements of future intent. The problem with allowing a party to use promises and statements of

intention to invoke the fraud exception to the parol evidence rule is that the very point of the rule is to exclude such things. Parties exchange various representations and supposed offers during negotiations, and reasonable misunderstandings can, and do, occur. By putting their understandings into a written contract, the parties highlight the points on which they have reached agreement and in some cases, the points on which they still diverge. The presumption embodied in the parol evidence rule is that the final written contract reflects the positions and compromises upon which the parties finally reached agreement. If the only showing required to invoke the fraud exception to the parol evidence rule were inconsistent prior oral statements, such oral statements would often (usually) be admitted, and the exception would swallow the rule.

The parties have entered a binding contract, represented by a written instrument, for the sale of Carrow's farm to Arnold. The parol evidence rule bars the admission of the oral statements and representations Carrow alleges Arnold made during the course of negotiations because those alleged representations are inconsistent with the express written terms of the Agreement.

Rescission denied and contract enforced in favor of Arnold.

Interpretation of Contracts

Once a court has decided what promises are included in a contract, it is faced with *interpreting* the contract to determine the *meaning* and *legal effect* of the terms used by the parties. Courts have adopted broad, basic standards of interpretation that guide them in the interpretation process.

The court will first attempt to determine the parties' *principal objective*. Every clause will then be determined in the light of this principal objective. Ordinary words will be given their usual meaning and technical words (such as those that have a special meaning in the parties' trade or business) will be given their technical meaning, unless a different meaning was clearly intended.

Guidelines grounded in common sense are also used to determine the relationship of the various terms of the contract. Specific terms that follow general terms are presumed to qualify those general terms. Suppose that a provision that states that the subject of the contract is "guaranteed for one year" is followed by a provision describing the "one-year guarantee against defects in workmanship." Here, it is fair to conclude

that the more specific term qualifies the more general term and that the guarantee described in the contract is a guarantee of workmanship only, and not of parts and materials.

Sometimes, there is internal conflict in the terms of an agreement and courts must determine which term should prevail. When the parties use a form contract or some other type of contract that is partially printed and partially handwritten, the handwritten provisions will prevail. If the contract was drafted by one of the parties, any ambiguities will be resolved against the party who drafted the contract.

If both parties to the contract are members of a trade, profession, or community in which certain words are commonly given a particular meaning (this is called a *usage*), the courts will presume that the parties intended the meaning that the usage gives to the terms they use. For example, if the word *dozen* in the bakery business means 13 rather than 12, a contract between two bakers for the purchase of 10 dozen loaves of bread will be presumed to mean 130 loaves of bread rather than 120. Usages can also add provisions to the parties' agreement. If the court finds that a certain practice is a matter of

Ethics in Action

For those who draft and proffer standardized form contracts, the parol evidence rule can be a powerful ally because it has the effect of limiting the scope of an integrated, written contract to the terms of the writing. Although statements and promises made to a person before he signs a contract might be highly influential in persuading him to enter the contract, the parol evidence rule

effectively prevents these precontract communications from being legally enforceable. Consider also that standardized form contracts are usually drafted for the benefit of and proffered by the more sophisticated and powerful party in a contract (e.g., the landlord rather than the tenant, the bank rather than the customer). Considering all of this, do you believe that the parol evidence rule promotes ethical behavior?

common usage in the parties' trade, it will assume that the parties intended to include that practice in their agreement. If contracting parties are members of the

same trade, business, or community but do not intend to be bound by usage, they should specifically say so in their agreement.

Problems and Problem Cases

1. In August 2003, R.F. Cunningham & Co., a farms product dealer, and Driscoll, a farmer in Cayuga County, entered into an oral contract for the sale of 4,000 bushels of soybeans at a price of \$5.50 per bushel, to be picked up after harvest time. Immediately afterward, Cunningham sent to Driscoll a "purchase confirmation," and Driscoll did not object to its contents. Later in October 2003, Driscoll's lawyer claimed that his client had no legal obligation to complete the contract and refused to sell his soybeans. As a result, Cunningham was forced to purchase replacement soybeans at the then-prevailing market price of \$7.74 per bushel, and suffered a financial loss of \$8,960.00, which was the difference between the contract price and Cunningham's costs to obtain the replacement soybeans. Cunningham sued Driscoll for breach of contract. Driscoll moved for summary judgment on the ground that the contract did not satisfy the statute of frauds. Will he win?
2. For several years, AutoZone sponsored events conducted by Professional Bull Riders (PBR). For the years 2001 and 2002, PBR prepared a written agreement to provide for AutoZone's sponsorship. Section I of that agreement states:

The term of this agreement shall commence as of December 29, 2000, and end on December 31, 2002, unless terminated earlier in accordance with the provisions of this Agreement. Notwithstanding the preceding

sentence, AutoZone may, at its option, elect to terminate this Agreement and its sponsorship of PBR and the Series effective as of the end of the Finals in 2001, by giving PBR written notice of termination by no later than August 15, 2001.

AutoZone never signed this agreement. However PBR alleges that by its actions, AutoZone tacitly accepted its terms set forth in the proposed written agreement and that, as a result, the parties entered into an oral agreement on the terms set forth in writing. In January 2002, AutoZone notified PBR that AutoZone would not be sponsoring PBR events in 2002. However, despite this notice, PBR allegedly continued to use AutoZone's trademark and service mark in connection with its programs. PBR then sued AutoZone for breach of the oral sponsorship agreement. Was this agreement unenforceable because of the statute of frauds?

3. On two occasions in 1980, Hodge met with Tilley, president and chief operating officer of Evans Financial Corporation, to discuss Hodge's possible employment by Evans. Hodge was 54 years old at that time and was assistant counsel and assistant secretary of Mellon National Corporation and Mellon Bank of Pittsburgh. During these discussions, Tilley asked Hodge what his conditions were for accepting employment with Evans, and Hodge replied, "Number 1, the job must be permanent. Because of my age, I have a great fear about going back into the marketplace again. I want to be here until I retire." Tilley

allegedly responded, "I accept that condition." Regarding his retirement plans, Hodge later testified, "I really questioned whether I was going to go much beyond 65." Hodge later accepted Evans's offer of employment as vice president and general counsel. He moved from Pittsburgh to Washington, D.C., in September 1980 and worked for Evans from that time until he was fired by Tilley on May 7, 1981. Hodge brought a breach of contract suit against Evans. Evans argued that the oral contract was unenforceable because of the statute of frauds. Is this correct?

4. Green owns a lot (Lot S) in the Manomet section of Plymouth, Massachusetts. In July 1980, she advertised it for sale. On July 11 and 12, the Hickeys discussed with Green purchasing Lot S and orally agreed to a sale for \$15,000. On July 12, Green accepted the Hickeys' check for \$500. Hickey had left the payee line of the deposit check blank because of uncertainty whether Green or her brother was to receive the check. Hickey asked Green to fill in the appropriate name. Green, however, held the check, did not fill in the payee's name, and neither cashed nor endorsed it. Hickey told Green that his intention was to sell his home and build on the lot he was buying from Green. Relying on the arrangements with Green, the Hickeys advertised their house in newspapers for three days in July. They found a purchaser quickly. Within a short time, they contracted with a purchaser for the sale of their house and accepted the purchaser's deposit check. On the back of this check, above the Hickeys' signatures endorsing the check, was noted: "Deposit on purchase of property at Sachem Rd. and First St., Manomet, Ma. Sale price, \$44,000." On July 24, Green told Hickey that she no longer intended to sell her property to him and instead had decided to sell it to someone else for \$16,000. Hickey offered to pay Green \$16,000 for the lot, but she refused this offer. The Hickeys then filed a complaint against Green seeking specific performance. Green asserted that relief was barred by the statute of frauds. Is this correct?
5. Iams is in the business of manufacturing and selling pet foods. For many years, Watkins was a nonexclusive distributor of Iams products in Michigan. In 1986 or 1987, Iams began to require Watkins (as well as its other distributors) to sign yearly written distributorship agreements. Until 1987, Watkins was the sole distributor of Iams products in Michigan,

but in 1986, Wolverton, Inc., also began selling Iams products in the state. In 1989, Iams began offering its distributors a 2 percent discount on its products in return for a commitment from the distributors to sell Iams products exclusively. The discount was significant, given the low profit margins customary in the business. Watkins alleges that in 1990, Iams promised it that if it became an exclusive Iams distributor, Iams would grant it an exclusive sales territory in Michigan when Iams changed to a distribution system of exclusive territories. Watkins claims that it became an exclusive distributor in reliance on this promise. It entered into an exclusivity agreement in July 1990 and annually thereafter through 1993. The contract of January 31, 1993, between Iams and Watkins contains the following provisions:

Notwithstanding the appointment herein the Company [Iams] reserves the right for itself to sell Products within the Territory. In addition, the Company may appoint any other distributor to sell Products within the Territory.

This Agreement shall be effective on February 1, 1993, and shall automatically expire, without any further action by either party required, on January 31, 1994, unless earlier terminated as set forth in Section 4.2 or 4.3 or otherwise in accordance with the provisions of this Agreement. This Agreement may be renewed thereafter on terms mutually agreeable to the parties only in a writing signed by the parties hereto . . .

With the exception of Schedule I, which may be unilaterally amended by the Company as provided in this Agreement . . . and except as otherwise provided in this Agreement, no change, modification or amendment of any provision of this Agreement will be binding unless made in writing and signed by the parties hereto.

THIS AGREEMENT TOGETHER WITH THE COMPANY'S STANDARD TERMS AND CONDITIONS OF SALE REPRESENT THE ENTIRE AGREEMENT BETWEEN THE PARTIES AND SUPERSEDES ALL PRIOR, EXISTING, AND CONTEMPORANEOUS AGREEMENTS, WHETHER WRITTEN OR ORAL . . .

Instead of making Watkins its exclusive dealer, Iams notified Watkins in September 1993, that it would not renew its distributorship contract, and the contract expired, in accordance with its terms, on January 31, 1994. Iams subsequently entered into an exclusive distribution contract in Michigan with Wolverton.

Watkins brought suit against Iams on a number of grounds, including breach of contract, fraud, and promissory estoppel. Will Watkins win?

6. Southridge Presbyterian Church, owner of a residential home, placed it on the market for \$134,500. Ayalla viewed the home and made a written offer to buy the home for \$130,000. The written offer was made on a residential real estate sale contract form furnished by Southridge Presbyterian's real estate agent, Henderson. Ayalla gave Henderson a check for \$1,000 as an earnest money deposit. Henderson orally notified Ayalla's mortgage broker that Southridge Presbyterian had accepted Ayalla's offer. The mortgage broker left a message with Ayalla's nephew about this acceptance. The following day, Henderson orally told Ayalla personally of Southridge Presbyterian's acceptance. They agreed to meet on May 1, 2005, to complete the paperwork, and Ayalla made plans to take that day off work. She also scheduled a home inspection to take place on May 2 or 3. Ayalla and her friends and family gathered together on May 1 to celebrate. Before her scheduled meeting with Henderson, however, Henderson called and told Ayalla that Southridge Presbyterian had accepted a higher offer of \$142,500 from a third party. Was Southridge Presbyterian legally obligated to sell the home to Ayalla?
7. Dyer purchased a used Ford from Walt Bennett Ford for \$5,895. She signed a written contract, which showed that no taxes were included in the sales price. Dyer contended, however, that the salesperson who negotiated the purchase with her told her both before and after her signing of the contract that the sales tax on the automobile had been paid. The contract Dyer signed contained the following language:

The above comprises the entire agreement pertaining to this purchase and no other agreement of any kind, verbal understanding, representation, or promise whatsoever will be recognized.

It also stated:

This contract constitutes the entire agreement between the parties and no modification hereof shall be valid in any event and Buyer expressly waives the right to rely thereon, unless made in writing, signed by Seller.

Later, when Dyer attempted to license the automobile, she discovered that the Arkansas sales tax had not been paid on it. She paid the sales tax and sued Bennett for breach of contract. What result?
8. In July 2004, the HARRISES entered into a contract with the HALLBERGS to purchase a home in Waccabuc, New York, for the sum of \$1.9 million. Later, they had second thoughts about the purchase. In November 2004, the HARRISES and HALLBERGS signed an agreement which provided that, upon the forfeiture of the HARRISES' down payment, "all contractual obligations" that the parties owed each other under the contract of sale would be terminated, and each party would "have no further obligation" toward the other. The release was consistent with the terms of the contract of sale, which had specified the HALLBERGS' remedy in the event of a default by the HARRISES. Both parties were represented by independent counsel during the transaction and Mr. Harris is a lawyer. Later, the HARRISES alleged that, prior to signing the release, the parties entered into an oral agreement whereby the HALLBERGS agreed that, if they could sell the property for more than the sum of \$1.9 million, they would return all or part of the HARRISES' down payment. The HARRISES alleged that, although the HALLBERGS had apparently sold the property for the sum of \$2.4 million, they had refused to return any part of the down payment. Do the HARRISES have the legal right to enforce the alleged oral agreement for the return of the down payment?
9. ROOSE hired the law firm of GALLAGHER, LANGLAS and GALLAGHER, P.C., to represent her in her divorce. Langlas, an attorney in the firm, signed an attorney fee contract and gave it to ROOSE to sign and return. He also requested a \$2,000 retainer fee. ROOSE never signed or returned the contract, and did not pay the retainer fee in full. The firm represented ROOSE even though she did not sign the contract or pay the retainer fee in full. In April 1995, the GALLAGHER attorneys met with ROOSE and her father, BURCO. The attorneys told BURCO that the expense of his daughter's child custody trial would be approximately \$1,000 per day. The firm would not guarantee BURCO that the trial would last for only two or three days. The firm contends that during that meeting, BURCO gave the firm a check for \$1,000 to pay the outstanding balance on ROOSE's account and said he would pay for future services. Before the trial, an attorney with the firm contacted BURCO and requested an additional retainer to secure fees to be incurred. BURCO told her, "My word as a gentleman should be enough . . . I told Mr. Langlas I would pay and I will pay." ROOSE failed to pay her legal fees. In July 1995,

the attorneys sent Burco a letter requesting \$5,000 for Roose's legal fees or the signing of a promissory note. At the end of July 1995, they sent Burco another letter asking him to sign a promissory note for \$10,000. Neither Roose nor Burco paid the fees or signed the note. The firm represented Roose in the July 1995 trial. Burco took an active part in the trial by testifying and participating in conferences with counsel during recesses. After trial, Burco returned the second letter and promissory note with a notation stating that he was not responsible for his daughter's attorney fees. The firm sued Roose and Burco for the unpaid fees. Is Burco legally responsible for the fees?

10. Rosenfeld, an art dealer, claimed that Jean-Michel Basquiat, an acclaimed neoexpressionist artist, had agreed to sell to her three paintings entitled *Separation of the "K," Atlas*, and *Untitled Head*. She claimed that she went to Basquiat's apartment on October 25, 1982, and while she was there he agreed to sell her three paintings for \$4,000 each, and that she picked out the three works. According to Rosenfeld, Basquiat asked for a cash deposit of 10 percent. She

left his loft and later returned with \$1,000 in cash, which she paid him. When she asked for a receipt, he insisted on drawing up a "contract," and got down on the floor and wrote it out in crayon on a large piece of paper, remarking that "some day this contract will be worth money." She identified a handwritten document listing the three paintings, bearing her signature and that of Basquiat, which stated: "\$12,000—\$1,000 DEPOSIT—OCT 25 82." Is this writing sufficient to satisfy the statute of frauds?

chapter 17

RIGHTS OF THIRD PARTIES

Peterson was employed by Post-Network as a newscaster-anchorman on station WTOP-TV Channel 9 under a three-year employment contract with two additional one-year terms at the option of Post-Network. During the first year of Peterson's employment, Post-Network sold its operation license to Evening News in a sale that provided for the assignment of all contracts, including Peterson's employment contract. Peterson continued working for the station for more than a year after the change of ownership, but then found a job at a competing station and resigned. Evening News sued Peterson for breach of the employment contract.

- Can a person who was not an original party to a contract sue to enforce it?
- Was the assignment of Peterson's employment contract a valid transfer, or does Peterson have a right not to have his employment transferred to another employer?
- Does Peterson have any right to enforce the contract between Post-Network and Evening News?
- Would it be ethical for Evening News to prevent Peterson from changing jobs and working for a competing station?

IN PRECEDING CHAPTERS, WE have emphasized the way in which an agreement between two or more people creates legal rights and duties *on the part of the contracting parties*. Since a contract is founded on the consent of the contracting parties, it might seem to follow that they are the only ones who have rights and duties under the contract. Although this is generally true, there are two situations in which people who were not parties to a contract have legally enforceable rights under it: when a contract has been *assigned* (transferred) to a third party and when a contract is *intended to benefit a third person* (a *third-party beneficiary*). This chapter discusses the circumstances in which third parties have rights under a contract.

Assignment of Contracts

Contracts give people both rights and duties. If Murphy buys Wagner's motorcycle and promises to pay him \$1,000 for it, Wagner has the *right* to receive Murphy's promised performance (the payment of the \$1,000) and Murphy has the *duty* to perform the promise by paying \$1,000. In most situations, contract rights can be transferred to a third person and contract duties can be delegated to a third person. The transfer of a *right* under a

contract is called an **assignment**. The appointment of another person to perform a *duty* under a contract is called a **delegation**.

Nature of Assignment of Rights A person who owes a duty to perform under a contract is called an **obligor**. The person to whom he owes the duty is called the **obligee**. For example, Samson borrows \$500 from Jordan, promising to repay Jordan in six months. Samson, who owes the duty to pay the money, is the obligor, and Jordan, who has the right to receive the money, is the obligee. An assignment occurs when the obligee transfers his right to receive the obligor's performance to a third person. When there has been an assignment, the person making the assignment—the original obligee—is then called the **assignor**. The person to whom the right has been transferred is called the **assignee**. Figure 1 summarizes these key terms.

Suppose that Jordan, the obligee in the example above, assigns his right to receive Samson's payment to Kane. Here, Jordan is the assignor and Kane is the assignee. The relationship between the three parties is represented in Figure 2. Notice that the assignment is a separate transaction: It occurs after the formation of the original contract.

Figure 1 Assignment: Key Terms

| Obligor | Obligee | Assignment | Assignor | Assignee |
|-------------------------------------|---|--|--|--|
| Person who owes the duty to perform | Person who has the right to receive obligor's performance | Transfer of the right to receive obligor's performance | Obligee who transfers the right to receive obligor's performance | Person to whom the right to receive obligor's performance is transferred |

Figure 2 Assignment

The effect of the assignment is to extinguish the assignor's right to receive performance and to transfer that right to the assignee. In the above example, Kane now owns the right to collect payment from Samson. If Samson fails to pay, Kane, as an assignee, now has the right to file suit against Samson to collect the debt.

People assign rights for a variety of reasons. A person might assign a right to a third party to satisfy a debt that he owes. For example, Jordan, the assignor in the above example, owes money to Kane, so he assigns to Kane the right to receive the \$500 that Samson owes him. A person might also sell or pledge the rights owed to him to obtain financing. In the case of a business, the money owed to the business by customers and clients is called *accounts receivable*. A business's accounts receivable are an asset to the business that can be used to raise money in several ways. For example, the business may pledge its accounts receivable as collateral for a loan. Suppose Ace Tree Trimming Co. wants to borrow money from First Bank and gives First Bank a security interest (an interest in the debtor's property that secures the debtor's performance of an obligation) in its accounts receivable.¹ If Ace defaults in its payments to First Bank, First Bank will acquire Ace's rights to collect the accounts receivable. A person might also make an assignment of a contract right as a

gift. For example, Lansing owes \$2,000 to Father. Father assigns the right to receive Lansing's performance to Son as a graduation gift.

Evolution of the Law Regarding Assignments Contract rights have not always been transferable. Early common law refused to permit assignment or delegation because debts were considered to be too personal to transfer. A debtor who failed to pay an honest debt was subject to severe penalties, including imprisonment, because such a failure to pay was viewed as the equivalent of theft. The identity of the creditor was of great importance to the debtor, since one creditor might be more lenient than another. Courts also feared that the assignment of debts would stir up unwanted litigation. In an economy that was primarily land-based, the extension of credit was of relatively small importance. As trade increased and became more complex, however, the practice of extending credit became more common. The needs of an increasingly commercial society demanded that people be able to trade freely in intangible assets such as debts. Consequently, the rules of law regarding the assignment of contracts gradually became more liberal. Today, public policy favors free assignability of contracts.

Sources of Assignment Law Today Legal principles regarding assignment are found not only in the common law of contracts but also in Articles 2 and 9 of the

¹Security interests in accounts and other property are discussed in Chapter 29.

Uniform Commercial Code. Section 2–210 of Article 2 contains principles applicable to assignments of rights under a contract for the sale of *goods*. Article 9 governs security interests in accounts and other contract rights as well as the outright sale of accounts. Article 9’s treatment of assignments will be discussed in more detail in Chapter 29, Security Interests in Personal Property, but some provisions of Article 9 relating to assignments will be discussed in this chapter.

Creating an Assignment An assignment can be made in any way that is sufficient to show the assignor’s intent to assign. No formal language is required, and a writing is not necessary unless required by a provision of the statute of frauds or some other statute. Many states do have statutes requiring certain types of assignments to be evidenced by a writing, however. Additionally, an assignment for the purposes of security must meet Article 9’s formal requirements for security interests.²

It is not necessary that the assignee give any consideration to the assignor in exchange for the assignment. Gratuitous assignments (those for which the assignee

gives no value) are generally revocable until such time as the obligor satisfies the obligation, however. They can be revoked by the assignor’s death or incapacity or by notification of revocation given by the assignor to the assignee.

Assignability of Rights Most, but not all, contract rights are assignable. Although the free assignability of contract rights performs a valuable function in our modern credit-based economy, assignment is undesirable if it would adversely affect some important public policy or if it would materially vary the bargained-for expectations of the parties. There are several basic limitations on the assignability of contract rights.

First, an assignment will not be effective if it is *contrary to public policy*. For example, most states have enacted statutes that prohibit or regulate a wage earner’s assignment of future wages. These statutes are designed to protect people against unwisely impoverishing themselves by signing away their future incomes. State law may prohibit assignment of lottery prizes or certain kinds of lawsuits on grounds of public policy. You will see an example of an assignment that is invalid based on public policy in the following *PPG Industries* case.

²These requirements are discussed in Chapter 29.

PPG Industries, Inc. v. JMB/Houston Center 146 S.W._{3d} 79 (Tex. Sup. Ct. 2004)

One Houston Center, a 46-story skyscraper in downtown Houston, was completed in April 1978 and originally owned by Houston Center Corporation (HCC). The exterior included more than 12,000 Twindows, a dual-pane glass window unit manufactured and installed by PPG. Twindows were chosen for their insulating ability and color, which blended with other buildings in the Houston Center complex. By July 1982, a large number of the Twindows showed fogging and discoloration. At HCC’s request, PPG manufactured and installed replacements for one-fourth of the building’s windows pursuant to a contractual warranty. The replacement project took more than two years.

Several years later, HCC entered negotiations to sell One Houston Center to JMB. During its due diligence, JMB learned of the earlier window problems, and that to a limited extent they continued. When JMB inquired whether any warranties still applied, PPG replied that all had expired. JMB bought the building “as is” in December 1989 as part of a \$375 million purchase. HCC assigned to JMB all warranties relating to the building, and JMB waived all Deceptive Trade Practices Act (DTPA)—a state statute that provides remedies for certain unfair trade practices—claims against HCC.

When extensive Twindows problems appeared in 1991, JMB sued PPG for violating the DTPA and breaching warranties issued to HCC. A jury found for JMB on all claims, assessing the cost to replace every Twindow in the building with comparable but nondefective window units at \$4,745,037. The trial court trebled the award under the mandatory provisions of the 1973 DTPA, and after a bench trial awarded another \$1,716,181 in attorney fees. The court of appeals affirmed the judgment. PPG appealed.

Brister, Judge

PPG first attacks the DTPA award, asserting that DTPA claims cannot be assigned. To determine whether DTPA claims are assignable, we look first to the words of the statute. The UCC

expressly provides that warranty claims are assignable, while the DTPA says nothing about assignment. In some cases of statutory silence, we have looked to the statute’s purpose for guidance. Accordingly, we next look to the purposes of the

DTPA to determine whether assignment of claims is consistent with its goals. The DTPA's primary goal was to protect consumers by encouraging them to bring consumer complaints. While the DTPA allows the attorney general to bring consumer protection actions, one of the statute's primary purposes is to encourage consumers themselves to file their own complaints. One purpose of the DTPA's treble damages provisions is to encourage privately initiated consumer litigation, reducing the need for public enforcement. Making DTPA claims assignable would have just the opposite effect: instead of swindled consumers bringing their own DTPA claims, they will be brought by someone else.

The Legislature did not intend the DTPA for everybody. It limited DTPA complaints to "consumers," and excluded a number of parties and transactions from the DTPA, including claims by businesses with more than \$25 million in assets, and certain claims in which consumers were represented by legal counsel. If DTPA claims can be assigned, a party excluded by the statute (such as JMB here) could nevertheless assert DTPA claims by stepping into the shoes of a qualifying assignor. This would frustrate the clear intent of the Legislature. Commercial trading in almost any kind of claim would likely encourage its proliferation, but raises a host of other concerns. First, the DTPA's treble-damage provisions were intended to motivate affected consumers; they may provide a different motivation for those who might traffic in such claims. It is one thing to place the power of treble damages in the hands of aggrieved parties or the attorney general; it is quite another to place it in the hands of those considering litigation for commercial profit.

Second, appraising the value of a chose in action is never easy, due to the absence of objective measures or markets. Consumers are likely to be at a severe negotiating disadvantage with the kinds of entrepreneurs willing to buy DTPA claims cheap and settle them dear. The result of making DTPA claims assignable is likely to be that some consumers will be deceived twice. Third, in many cases consumers may not even know they have DTPA claims when they sign a general assignment included in contractual boilerplate. If such assignments are valid, the claims meant to protect consumers will quite literally be gone before they know it. Every conceivable purpose of the statute is defeated if consumers may lose their claims by accident.

With respect to the assignment of claims, we have recognized the collapse of the common-law rule that generally prohibited such assignments. But the assignability of most claims does not mean all are assignable; exceptions may be required due to equity and public policy. Courts addressing assignability have often distinguished between claims that are property-based and remedial and claims that are personal and punitive,

holding that the former are assignable and the latter are not. The DTPA claims here clearly fall in the latter category. There must be a "personal" aspect in being "duped" that does not pass to subsequent buyers the way a warranty does. DTPA claims generally are also punitive rather than remedial. Frequently, the DTPA is pleaded not because it is the only remedy, but because it is the most favorable remedy. In this case, for example, the contract and warranty claims offered a remedy, but only the DTPA offered treble damages.

Finally, we must consider whether assignment of DTPA claims may increase or distort litigation. We have prohibited assignments that may skew the trial process, confuse or mislead the jury, promote collusion among nominal adversaries, or misdirect damages from more culpable to less culpable defendants. First, DTPA claims are unlike most contract-related claims in providing for mental anguish and punitive damages. Jurors are bound to experience some confusion in assessing mental anguish of a consumer, or punitive damages based on the situation and sensibilities of the parties, when the affected consumer is not a party. The Legislature intended DTPA lawsuits to be efficient and economical; assessing personal and punitive damages in these circumstances is likely to make that goal difficult.

But more important, there is a serious risk here of skewing the adversarial process. When A sells goods to B who sells them to C, if the goods prove defective and there were no dealings between A and C (as is often the case in the stream of commerce), C will naturally look to B for a breach-of-contract remedy. But if DTPA claims are assignable, B and C both have a strong incentive to direct the suit elsewhere for relief. If B settles with C for a small amount and assigns any DTPA claims it may have against A, C now has a case with potential punitive damages, and B has avoided potential liability. In this case JMB made no complaints against HCC, even though the window problems JMB discovered were very similar to the ones HCC encountered a few years before. Further, to avoid any discovery rule problems, HCC joined JMB in downplaying the earlier problems that must have seemed disastrous to HCC at the time. We cast no aspersions on the litigants here; we only note that assignability of DTPA claims may encourage some buyers to cooperate—if not collude—with a seller who may have been the one that actually misled them.

The DTPA is primarily concerned with people—both the deceivers and the deceived. This gives the entire act a personal aspect that cannot be squared with a rule that allows assignment of DTPA claims as if they were merely another piece of property.

Reversed in favor of PPG.

Second, an assignment will not be effective if it *adversely affects the obligor* in some significant way. An assignment is ineffective if it materially changes the obligor's duty or increases the burden or risk on the obligor. Naturally, any assignment will change an obligor's duty to some extent. The obligor will have to pay money or deliver goods or render some other performance to one party instead of to another. These changes are not considered to be sufficiently material to render an assignment ineffective. Thus, a right to receive money or goods or land is generally assignable. In addition, covenants not to compete are generally considered to be assignable to buyers of businesses. For example, Jefferson sells RX Drugstore to Waldman, including in the contract of sale a covenant whereby Jefferson promises not to operate a competing drugstore within a 30-mile radius of RX for 10 years after the sale. Waldman later sells RX to Tharp. Here, Tharp could enforce the covenant not to compete against Jefferson. The reason for permitting assignment of covenants not to compete is that the purpose of such covenants is to protect an asset of the business—goodwill—for which the buyer has paid.

An assignment could be ineffective because of its variation of the obligor's duty, however, if the contract right involved a *personal relationship* or an element of *personal skill, judgment, or character*. For this reason, contracts of employment in which an employee works under the direct and personal supervision of an employer cannot be assigned to a new employer. An employer could assign a contract of employment, however, if the assignee-employer could perform the contract without adversely affecting the interests of the employee, such as would be the case when an employment relationship does not involve personal supervision by an individual employer.

A purported assignment is ineffective if it significantly increases the burden of the obligor's performance. For example, if Walker contracts to sell Dwyer all of its requirements of wheat, a purported assignment of Dwyer's rights to a corporation that has much greater requirements of wheat would probably be ineffective because it would significantly increase the burden on Walker.

Contract Clauses Prohibiting Assignment A contract right may also be nonassignable because the original contract expressly forbids assignment. For example, leases often contain provisions forbidding assignment or requiring the tenant to obtain the landlord's permission for assignment.³

Antiassignment clauses in contracts are generally enforceable. Because of the strong public policy favoring assignability, however, such clauses are often interpreted narrowly. For example, a court might view an assignment made in violation of an antiassignment clause as a breach of contract for which damages may be recovered but not as an invalidation of the assignment. Another tactic is to interpret a contractual ban on assignment as prohibiting only the delegation of duties.

The UCC takes this latter position. Under section 2–210(2), general language prohibiting assignment of “the contract” or “all my rights under the contract” is interpreted as forbidding only the delegation of duties, unless the circumstances indicate to the contrary. Section 2–210 also states that a right to damages for breach of a whole sales contract or a right arising out of the assignor's performance of his entire obligation may be assigned even if a provision of the original sales contract prohibited assignment. In addition, UCC section 9–318(4) invalidates contract terms that prohibit (or require the debtor's consent to) an assignment of an account or creation of a security interest in a right to receive money that is now due or that will become due.

Nature of Assignee's Rights When an assignment occurs, the assignee is said to “step into the shoes of his assignor.” This means that the assignee acquires all of the rights that his assignor had under the contract. The assignee has the right to receive the obligor's performance, and if performance is not forthcoming, the assignee has the right to sue in his own name for breach of the obligation. By the same token, the assignee acquires no greater rights than those possessed by the assignor.

Because the assignee has no greater rights than did the assignor, the obligor may assert any defense or claim against the assignee that he could have asserted against the assignor, subject to certain time limitations discussed below. A contract that is void, voidable, or unenforceable as between the original parties does not become enforceable just because it has been assigned to a third party. For example, if Richards induces Dillman's consent to a contract by duress and subsequently assigns his rights under the contract to Keith, Dillman can assert the doctrine of duress against Keith as a ground for avoiding the contract.

Importance of Notifying the Obligor An assignee should promptly notify the obligor of the assignment. Although notification of the obligor is not necessary for the assignment to be valid, such notice is of great practical importance. One reason notice is important is that an

³The assignment of leases is discussed further in Chapter 25.

obligor who does not have reason to know of the assignment could render performance to the assignor and claim that his obligation had been discharged by performance. An obligor who renders performance to the assignor without notice of the assignment has no further liability under the contract. For example, McKay borrows \$500 from Goodheart, promising to repay the debt by June 1. Goodheart assigns the debt to Rogers, but no one informs McKay of the assignment, and McKay pays the \$500 to Goodheart, the assignor. In this case, McKay is not liable for any further payment. But if Rogers had immediately notified McKay of the assignment and, after receiving notice, McKay had mistakenly paid the debt to Goodheart, McKay would still have the legal obligation to pay \$500 to Rogers. Having been given adequate notice of the assignment, he may remain liable to the assignee even if he later renders performance to the assignor.

An assignor who accepts performance from the obligor after the assignment holds any benefits that he receives as a trustee for the assignee. If the assignor fails to pay those benefits to the assignee, however, an obligor who has been notified of the assignment and renders performance to the wrong person may have to pay the same debt twice.

An obligor who receives notice of an assignment from the assignee will want to assure himself that the assignment has in fact occurred. He may ask for written evidence of the assignment or contact the assignee and ask for verification of the assignment. Under UCC section 9–318(3), a notification of assignment is ineffective unless it reasonably identifies the rights assigned. If requested by the account debtor (an obligor who owes money for goods sold or leased or services rendered), the assignee must furnish reasonable proof that the assignment has been made, and, unless he does so, the account debtor may disregard the notice and pay the assignor.

Defenses against the Assignee An assignee's rights in an assignment are subject to the defenses that the obligor could have asserted against the assignor. Keep in mind that the assignee's rights are limited by the terms of the underlying contract between the assignor and the obligor. When defenses arise from the terms or performance of that contract, they can be asserted against the assignee even if they arise after the obligor receives notice of the assignment. For example, on June 1, Worldwide Widgets assigns to First Bank its rights under a contract with Widgetech, Inc. This contract obligates Worldwide Widgets to deliver a quantity of widgets to Widgetech by September 1, in return for

which Widgetech is obligated to pay a stated purchase price. First Bank gives prompt notice of the assignment to Widgetech. Worldwide Widget fails to deliver the widgets and Widgetech refuses to pay. If First Bank brought an action against Widgetech to recover the purchase price of the widgets, Widgetech could assert Worldwide Widget's breach as a defense, even though the breach occurred after Widgetech received notice of the assignment.⁴

In determining what other defenses can be asserted against the assignee, the time of notification plays an important role. After notification, as we discussed earlier, payment by the obligor to the assignor will not discharge the obligor.

Subsequent Assignments An assignee may "reassign" a right to a third party, who would be called a **subassignee**. The subassignee then acquires the rights held by the prior assignee. He should give the obligor prompt notice of the subsequent assignment, because he takes his interest subject to the same principles discussed above regarding the claims and defenses that can be asserted against him.

Successive Assignments Notice to the obligor may be important in one other situation. If an assignor assigns the same right to two assignees in succession, both of whom pay for the assignment, a question of priority results. An assignor who assigns the same right to different people will be held liable to the assignee who acquires no rights against the obligor, but which assignee is entitled to the obligor's performance? Which assignee will have recourse only against the assignor? There are several views on this point.

In states that follow the "American rule," the first assignee has the better right. This view is based on the rule of property law that a person cannot transfer greater rights in property than he owns. In states that follow the "English rule," however, the assignee who first gives notice of the assignment to the obligor, without knowledge of the other assignee's claim, has the better right. The *Restatement (Second) of Contracts* takes a third position. Section 342 of the *Restatement (Second)* provides that

⁴Similarly, if the assignor's rights were subject to discharge because of other factors such as the nonoccurrence of a condition, impossibility, impracticability, or public policy, this can be asserted as a defense against the assignee even if the event occurs after the obligor receives notice of assignment. See *Restatement (Second) of Contracts* § 336(3). The doctrines relating to discharge from performance are explained in Chapter 18.

the first assignee has priority unless the subsequent assignee gives value (pays for the assignment) and, without having reason to know of the other assignee's claim, does one of the following: obtains payment of the obligation, gets a judgment against the obligor, obtains a new contract with the obligor by novation, or possesses a writing of a type customarily accepted as a symbol or evidence of the right assigned (such as a passbook for a savings account).

Assignor's Warranty Liability to Assignee Suppose that Ross, a 16-year-old boy, contracts to buy a used car for \$2,000 from Donaldson. Ross pays Donaldson \$500 as a down payment and agrees to pay the balance in equal monthly installments. Donaldson assigns his right to receive the balance of the purchase price to Beckman, who pays \$1,000 in cash for the assignment. When Beckman later attempts to enforce the contract, however, Ross disaffirms the contract on grounds of lack of capacity. Thus, Beckman has paid \$1,000 for a worthless claim. Does Beckman have any recourse against Donaldson? When an assignor is paid for making an assignment, the assignor is held to have made certain implied warranties about the claim assigned.

The assignor impliedly warrants that the claim assigned is valid. This means that the obligor has capacity to contract, the contract is not illegal, the contract is not voidable for any other reason known to the assignor (such as fraud or duress), and the contract has not been discharged prior to assignment. The assignor also warrants that he has good title to the rights assigned and that any written instrument representing the assigned claim is genuine. In addition, the assignor impliedly agrees that he will not do anything to impair the value of the assignment. These guarantees are imposed by law unless the assignment agreement clearly indicates to the contrary. One important aspect of the assigned right that the assignor does not impliedly warrant, however, is that the obligor is solvent.

Delegation of Duties

Nature of Delegation A **delegation** of duties occurs when an obligor indicates his intent to appoint another person to perform his duties under a contract. For example, White owns a furniture store. He has numerous existing contracts to deliver furniture to customers, including a contract to deliver a sofa to Coombs. White is the *obligor* of the duty to deliver the sofa and Coombs is the *obligee*. White decides to sell his business to Rosen. As a part of the sale of the business, White assigns the rights in the existing contracts to Rosen and delegates to him the performance of those contracts, including the duty to deliver the sofa to Coombs. Here, White is the *delegator* and Rosen is the *delegatee*. White is appointing Rosen to carry out his duties to the obligee, Coombs. Figure 3 summarizes the key terms regarding delegation.

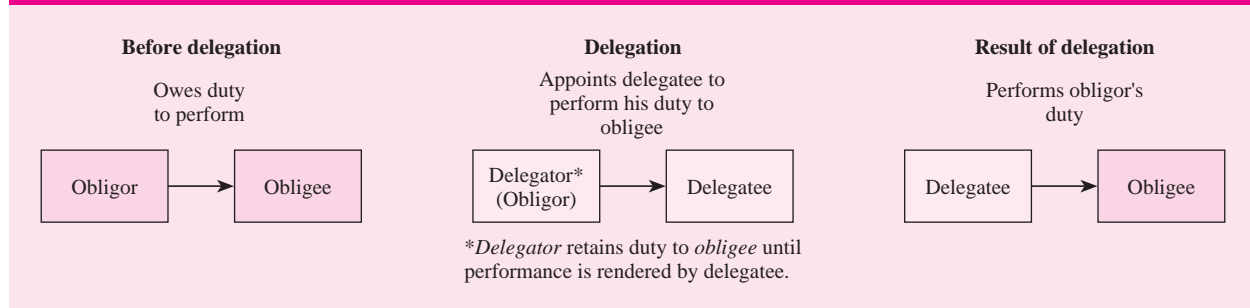

In contrast to an assignment of a right, which extinguishes the assignor's right and transfers it to the assignee, the delegation of a *duty* does *not* extinguish the duty owed by the delegator. The delegator remains liable to the obligee unless the obligee agrees to substitute the delegatee's promise for that of the delegator (this is called a *novation* and will be discussed in greater detail later in this chapter). This makes sense because, if it were possible for a person to escape his duties under a contract by merely delegating them to another, any party to a contract could avoid liability by delegating duties to an insolvent acquaintance. The significance of an effective delegation is that performance by the delegatee will discharge the delegator. In addition, if the duty is a delegable one, the obligee cannot insist on performance by the delegator; he must accept the performance of the delegatee. The relationship between the parties in a delegation is shown in Figure 4.

Delegable Duties A duty that can be performed fully by a number of different persons is delegable. Not all duties are delegable, however. The grounds for

Figure 3 Delegation: Key Terms

| Obligor | Obligee | Delegation | Delegator | Delegatee |
|-------------------------------------|---|--|---|--|
| Person who owes the duty to perform | Person who has the right to receive obligor's performance | Appointment of another person to perform the obligor's duty to the obligee | Obligor who appoints another to perform his duty to obligee | Person who is appointed to perform the obligor's duty to the obligee |

Figure 4 Delegation

finding a duty to be nondelegable resemble closely the grounds for finding a right to be nonassignable. A duty is nondelegable if delegation would violate public policy or if the original contract between the parties forbids delegation. In addition, both section 2–210(1) of the UCC and section 318(2) of the *Restatement (Second) of Contracts* take the position that a party to a contract may delegate his duty to perform to another person unless the parties have agreed to the contrary or unless the other party has a *substantial interest* in having the original obligor perform the acts required by the contract. The key factor used in determining whether the obligee has such a substantial interest is the degree to which performance is dependent on the individual traits, skill, or judgment of the person who owes the duty to perform. For example, if Jansen hires Skelton, an artist, to paint her portrait, Skelton could not effectively delegate the duty to paint the portrait to another artist. Similarly, an employee could not normally delegate her duties under an employment contract to some third person, because employment contracts are made with the understanding that the person the employer hires will perform the work. The situation in which a person hires a general contractor to perform specific work is distinguishable, however. In that situation, the person hiring the general contractor would normally understand that at least part of the work would be delegated to subcontractors.

Language Creating a Delegation No special, formal language is necessary to create an effective delegation of duties. In fact, since parties frequently confuse the terms *assignment* and *delegation*, one of the problems frequently presented to courts is determining whether the parties intended an assignment only or both an assignment and a delegation. Unless the agreement indicates a contrary intent, courts tend to interpret assignments as including a delegation of the assignor's

duties. Both the UCC 2–210(4) and section 328 of the *Restatement (Second) of Contracts* provide that, unless the language or the circumstances indicate to the contrary, general language of assignment such as language indicating an assignment of “the contract” or of “all my rights under the contract” is to be interpreted as creating *both* an assignment and a delegation.

Assumption of Duties by Delegatee A delegation gives the delegatee the right to perform the duties of the delegator. The mere fact that duties have been delegated does not always place legal responsibility on the delegatee to perform. This is discussed in the following *Watts* case. The delegatee who fails to perform will not be liable to either the delegator or the obligee unless the delegatee has assumed the duty by expressly or impliedly undertaking the obligation to perform. However, both section 2–210(4) of the UCC and section 328 of the *Restatement (Second)* provide that an assignee's acceptance of an assignment is to be construed as a promise by him to perform the duties under the contract, unless the language of the assignment or the circumstances indicate to the contrary. Frequently, a term of the contract between the delegator and the delegatee provides that the delegatee assumes responsibility for performance. A common example of this is the assumption of an existing mortgage debt by a purchaser of real estate. Suppose Morgan buys a house from Friedman, agreeing to assume the outstanding mortgage on the property held by First Bank. By this assumption, Morgan undertakes personal liability to both Friedman and First Bank. If Morgan fails to make the mortgage payments, First Bank has a cause of action against Morgan personally. An assumption does *not* release the delegator from liability, however. Rather, it creates a situation in which both the delegator and the assuming delegatee owe duties to the obligee. If the assuming delegatee fails to pay,

the delegator can be held liable. Thus, in the example described above, if Morgan fails to make mortgage payments and First Bank is unable to collect the debt

from Morgan, Friedman would have secondary liability. Friedman, of course, would have an action against Morgan for breach of their contract.

Watts v. Simpson

2007 Ky. App. LEXIS 247 (Ky. Ct. App. 2007)

On June 12, 2003, J. R. and Lillian Watts entered into a real estate contract with MW Development for the sale of a 40-acre tract of land. The contract provided that the closing would occur on or before July 31, 2003. MW Development paid the Wattses \$212,000 as a down payment, which left \$1,917,222 to be paid. According to the contract terms, if MW Development failed to close by the designated date for reasons not attributable to the fault of the Wattses, MW Development would pay 8 percent interest on the amount due to the Wattses until the date of closing.

Harry D. Simpson, Jr., was not a party to the real estate contract. However, Simpson loaned MW Development \$212,000 for the down payment. To provide security for the repayment of the loan, Richard Taylor, as manager of MW Development, executed a promissory note to Simpson and an assignment pursuant to which MW Development assigned “all of its right, title and interest in and to” the real estate contract entered into with the Wattses. Because he was recuperating in Florida from an injury, Simpson did not see the note and assignment until June 22, 2003. Upon realizing that the promissory note did not become due until August 4, 2003, and that it further provided for a 10-day grace period before Simpson could pursue collection or exercise his rights under the terms of the assignment, he contacted an attorney requesting an agreement granting him the exclusive right to purchase the property if MW Development defaulted on the real estate contract and the promissory note.

After the agreement was drafted, Simpson met with the Wattses’ son, Wayne Watts, and discussed the potential for the loss of the deposit money and the need for a 14-day period in which he could purchase the property after any default by MW Development. The precise content of their conversation differs. Simpson states that at no time was there any conversation or agreement that he would purchase the 40-acre tract while the Wattses recalled that Simpson affirmatively represented that if MW Development defaulted, he would purchase the property. As a result of their discussions, the Wattses and Simpson executed the prepared written agreement which states in part that:

In consideration of the respective rights of the parties, IT IS HEREBY AGREED AS FOLLOWS: In the event M.W. defaults on the CONTRACT and defaults on the PROMISSORY NOTE, SIMPSON is hereby granted the exclusive right, for a period of fourteen (14) days after M.W. defaults on the CONTRACT, to purchase the property described in the CONTRACT for the sum of \$2,129,222.00 in cash. Less the sum of \$212,900.00, the amount paid to WATTS as a deposit, all according to the other terms and conditions of the CONTRACT.

A copy of the real estate sales contract, promissory note, and assignment were attached to the agreement and, by reference, incorporated into the agreement.

After MW Development failed to purchase the property, the Wattses sued MW Development, Richard Taylor, and Simpson for breach of contract. In January 2004, the court approved an agreed order which gave Simpson the right to purchase the property pursuant to the June 2003 real estate contract through and including February 25, 2004. The order further provided that if Simpson did not exercise his right to purchase, the Wattses could sell the property to a third party. After Simpson declined to exercise his right to purchase the property, the property was sold to a third party for \$1,800,000. The trial court entered partial summary judgment in favor of the Wattses against MW Development in the amount of \$91,605.78, which represented the interest accrued on the \$1,917,222. It denied the Wattses’ motions for summary judgment against Simpson. It also dismissed the complaint against Simpson. The Wattses appealed. They argued that because of the assignment contract entered into between Simpson and MW Development, Simpson is obligated to perform all of the obligations set forth in the real estate contract, including the purchase of the property.

Thompson, Judge

The question, therefore, is whether Simpson can be held responsible for damages, including the difference with the original sale price as stated in the real estate contract between the

Wattses and MW Development and the interest due after default. Although the parties have failed to cite a Kentucky case specifically addressing the assignment of a real estate purchase contract, the law is well settled in other jurisdictions and is

summarily recited in *Kneberg v. H.L. Green Co.*, wherein it stated:

It is quite generally the law that a contract for the sale of land, which has been assigned by the purchaser, cannot be specifically enforced against the assignee, by reason of the assignment, unless the assignee has entered into a binding contract with the assignor or vendor to assume the assignor's obligations. It is also the rule, however, that if the assignee expressly assumes the burdens of the contract or if he accepts the benefits thereof and adopts the same by seeking performance of the contract or by any equivalent act, indicative of an intention upon his part to adopt and become bound, so that he may be held impliedly to have assumed the burdens thereof, specific performance will lie against him.

In this case, there is no language in the assignment contract between Simpson and the Wattses which can be reasonably construed to obligate him to purchase the property pursuant to the terms of the real estate contract between MW Development and the Wattses. The purpose of the assignment was to secure the \$212,000 loan to MW Development. Thus, the assignment contract expressly states that: "As security for the above loan, First Party (MWD) hereby conditionally assigns unto the Second Party (Simpson), all of its right, title and interest in and to that certain real estate purchase agreement. . . ." It continues to state that the assignment "shall become effective and absolute upon any default by First Party in the payment of the aforesaid note according to its terms." The assignment, therefore, was not

effective until MW Development defaulted on the promissory note, which was after the closing date stated in the real estate contract. The unambiguous language of the assignment contradicts the Wattses' argument that it operated as an assignment of MW Development's obligation to purchase the property. To construe the assignment contract to have also assigned MW Development's obligation to purchase the Wattses' property, would be contrary to the ordinary meaning of the language used and the intention of Simpson and MW Development. Thus, the Wattses cannot assert a claim against Simpson on the basis of the assignment contract entered into between Simpson and MW Development.

The Wattses contend that even if the assignment did not assign MW Development's obligation under the purchase contract, the July 31, 2003, agreement entered into between them and Simpson imposed the obligation on Simpson to purchase the property if MW Development defaulted. We find that the Wattses' reliance on the July 2003 agreement is misplaced. Like the assignment, the agreement unambiguously states that it is conditioned upon MW Development's default on the real estate contract. Notably absent from the agreement are any words which impose an obligation upon Simpson to purchase the property. Although during the 14 days after MW Development's default Simpson had the right to purchase the property, he did not have the obligation to do so.

Affirmed in favor of Simpson.

Discharge of Delegator by Novation

As you have seen, the mere delegation of duties—even when the delegatee assumes those duties—does not release the delegator from his legal obligation to the obligee. A delegator can, however, be discharged from performance by **novation**.

A novation is a particular type of substituted contract in which the obligee agrees to discharge the original obligor and to substitute a new obligor in his place. The effects of a novation are that the original obligor has no further obligation under the contract and the obligee has

the right to look to the new obligor for fulfillment of the contract. A novation requires more than the obligee's consent to having the delegatee perform the duties. In the example used above, the mere fact that First Bank accepted mortgage payments from Morgan would not create a novation. Rather, there must be some evidence that the obligee agrees to discharge the old obligor and substitute a new obligor. As you will see in the following *Rosenberg* case, this can be inferred from language of a contract or such other factors as the obligee's conduct or the surrounding circumstances.

Rosenberg v. Son, Inc.

491 N.W.2d 71 (Sup. Ct. N.D. 1992)

In February 1980, Mary Pratt entered into a contract to buy a Dairy Queen restaurant located in Grand Forks's City Center Mall from Harold and Gladys Rosenberg. The terms of the contract for the franchise, inventory, and equipment were a purchase price totaling \$62,000, a \$10,000 down payment, and \$52,000 due in quarterly payments at 10 percent interest over a 15-year period. The sales contract also contained a provision denying the buyer a right of prepayment for the first five years of the contract. In October 1982, Pratt assigned her rights and delegated her duties under this contract to Son, Inc. The

assignment between Pratt and Son contained a “Consent to Assignment” clause, which was signed by the Rosenbergs. It also contained a “save harmless” clause, in which Son promised to indemnify Pratt for any claims, demands, or actions that might result from Son’s failure to perform the agreement. After this transaction, Pratt moved to Arizona and had no further knowledge of or involvement with the Dairy Queen business. Also following the assignment, the Dairy Queen was moved from the mall to a different location in Grand Forks.

Son assigned the contract to Merit Corporation in June 1984. This assignment did not include a consent clause, but the Rosenbergs knew of the assignment and apparently acquiesced in it. They accepted a large prepayment from Merit, reducing the principal balance to \$25,000. After the assignment, Merit pledged the inventory and equipment of the Dairy Queen as collateral for a loan from Valley Bank and Trust. Payments from Merit to the Rosenbergs continued until June 1988, at which time the payments ceased, leaving an unpaid principal balance of \$17,326.24 plus interest. The Rosenbergs attempted collection of the balance from Merit, but Merit filed bankruptcy. The business assets pledged as collateral for the loan from Valley Bank and Trust were repossessed. The Rosenbergs brought this action for collection of the outstanding debt against Son and Pratt. The trial court granted summary judgment in favor of Son and Pratt and against the Rosenbergs, and the Rosenbergs appealed.

Erickstad, Chief Justice

It is a well-established principle in the law of contracts that a contracting party cannot escape its liability on the contract by merely assigning its duties and rights under the contract to a third party. This rule of law applies to all categories of contracts, including contracts for the sale of goods, which is present in the facts of this case.

Thus, when Pratt entered into the “assignment agreement” with Son, a simple assignment alone was insufficient to release her from any further liability on the contract. It is not, however, a legal impossibility for a contracting party to rid itself of an obligation under a contract. It may seek the approval of the other original party for release, and substitute a new party in its place. In such an instance, the transaction is no longer called an assignment; instead, it is called a novation. If a novation occurs in this manner, it must be clear from the terms of the agreement that a novation is intended by all parties involved. Both original parties to the contract must intend and mutually assent to the discharge of the obligor from any further liability on the original contract.

It is evident from the express language of the assignment agreement between Pratt and Son that only an assignment was intended, not a novation. The agreement made no mention of discharging Pratt from any further liability on the contract. To the contrary, the latter part of the agreement contained an indemnity clause holding Pratt harmless in the event of a breach by Son. Thus, it is apparent that Pratt contemplated being held ultimately responsible for performance of the obligation. Furthermore, the agreement was between Pratt and Son; they were the parties signing the agreement, not the Rosenbergs. An agreement between Pratt and Son cannot unilaterally affect the Rosenbergs’ rights under the contract. The Rosenbergs did sign a consent to the assignment at the bottom of the agreement. However, by merely consenting to the assignment the Rosenbergs did not consent to a discharge of the principal

obligor—Pratt. Nothing in the language of the consent clause supports such an allegation. A creditor is free to consent to an assignment without releasing the original obligor. Thus, the express language of the agreement and intent of the parties at the time the assignment was made did not contemplate a novation by releasing Pratt and substituting Son in her stead. The inquiry as to Pratt’s liability does not end at this juncture. The trial court released Pratt from any liability on the contract due to the changes or alterations which took place following her assignment to Son. While it is true that Pratt cannot be forced to answer on the contract irrespective of events occurring subsequent to her assignment, it is also true that she cannot be exonerated for every type of alteration or change that may develop.

The trial court decided that any alteration in the underlying obligation resulted in a release of Pratt on the contract. It appears that not every type of alteration is sufficient to warrant discharge of the assignor. As suggested by Professor Corbin in the language highlighted above, the alteration must “prejudice the position of the assignor.”⁴ *Corbin on Contracts* section 866 at 459.

If the changes in the obligation prejudicially affect the assignor, a new agreement has been formed between the assignee and the other original contracting party. More concisely, a novation has occurred and the assignor’s original obligation has been discharged. Although we have previously determined that the terms of the assignment agreement between Pratt and Son did not contemplate a novation, there are additional methods of making a novation besides doing so in the express terms of an agreement. The question of whether or not there has been a novation is a question of fact. The trial court should not have granted summary judgment. There are questions of fact remaining as to the result of the changes in the contract. Thus, we reverse the summary judgment and remand for further proceedings.

Reversed and remanded in favor of the Rosenbergs.

Third-Party Beneficiaries

There are many situations in which the performance of a contract would constitute some benefit to a person who was not a party to the contract. Despite the fact that a nonparty may expect to derive advantage from the performance of a contract, the general rule is that no one but the parties to a contract or their assignees can enforce it. In some situations, however, parties contract for the purpose of benefiting some third person. In such cases, the benefit to the third person is an essential part of the contract, not just an incidental result of a contract that was really designed to benefit the parties. Where the parties to a contract *intended* to benefit a third party, courts will give effect to their intent and permit the third party to enforce the contract. Such third parties are called **third-party beneficiaries**. Figure 5 illustrates the relationship of third-party beneficiaries to the contracting parties.

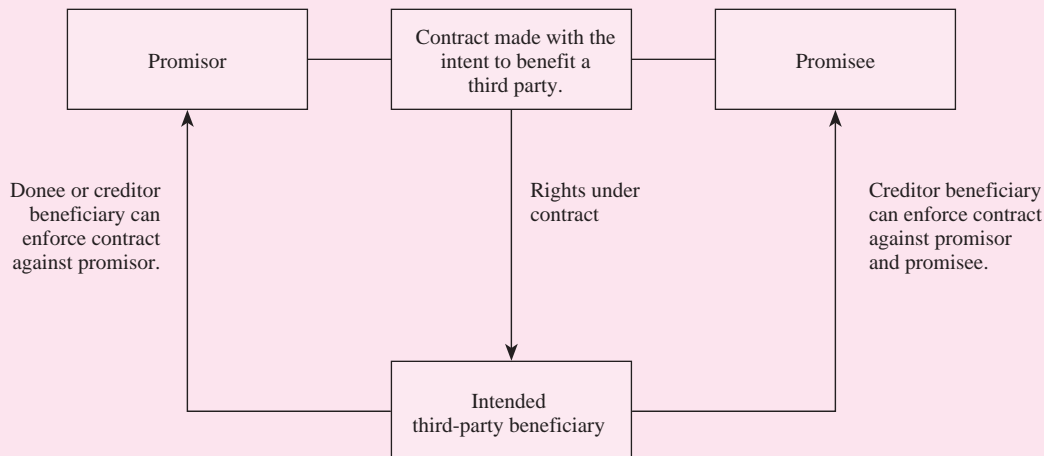

Intended Beneficiaries versus Incidental Beneficiaries For a third person (other than an assignee) to have the right to enforce a contract, she must be able to establish that the contract was made with the intent to benefit her. A few courts have required that both parties must have intended to benefit the third party. Most courts, however, have found it to be sufficient if the person to whom the promise to perform was made (the *promisee*) intended to benefit the third party. In ascertaining intent to benefit the third party, a court will look at the language used by the parties and all the surrounding circumstances. That point is made in the *Locke* case, which follows shortly. One factor that is

frequently important in determining intent to benefit is whether the party making the promise to perform (the *promisor*) was to render performance directly to the third party. For example, if Allison contracts with Jones Florist to deliver flowers to Kirsch, the fact that performance was to be rendered to Kirsch would be good evidence that the parties intended to benefit Kirsch. This factor is not conclusive, however. There are some cases in which intent to benefit a third party has been found even though performance was to be rendered to the promisee rather than to the third party. Intended beneficiaries are often classified as either *creditor* or *donee beneficiaries*. These classifications are discussed in greater detail below.

A third party who is unable to establish that the contract was made with the intent to benefit her is called an *incidental beneficiary*. A third party is classified as an incidental beneficiary when the benefit derived by that third party was merely an unintended by-product of a contract that was created for the benefit of those who were parties to it. Incidental beneficiaries acquire no rights under a contract. For example, Hutton contracts with Long Construction Company to build a valuable structure on his land. The performance of the contract would constitute a benefit to Keller, Hutton's next-door neighbor, by increasing the value of Keller's land. The contract between Hutton and Long was made for the purpose of benefiting themselves, however. Any advantage derived by Keller is purely incidental to their primary purpose. Thus, Keller could not sue and recover damages if either Hutton or Long breaches the contract.

As a general rule, members of the public are held to be incidental beneficiaries of contracts entered into by

Figure 5 Third-Party Beneficiaries

their municipalities or other governmental units in the regular course of carrying on governmental functions. A member of the public cannot recover a judgment in a suit against a promisor of such a contract, even though all taxpayers will suffer some injury from nonperformance. A different result may be reached, however, if a party contracting with a governmental unit agrees to reimburse members of the public for damages or if the party undertakes to perform some duty for individual members of the public.

Creditor Beneficiaries If the promisor's performance is intended to satisfy a legal duty that the promisee owes to a third party, the third party is a **creditor beneficiary**. The creditor beneficiary has rights against both the promisee (because of the original obligation) and the promisor. For example, Smith buys a car on credit from Jones Auto Sales. Smith later sells the car to Carmichael, who agrees to pay the balance due on the car to Jones

Auto Sales. (Note that Smith is delegating his duty to pay to Carmichael, and Carmichael is assuming the personal obligation to do so.) In this case, Jones Auto Sales is a creditor beneficiary of the contract between Smith and Carmichael. It has rights against both Carmichael and Smith if Carmichael does not perform.

Donee Beneficiaries If the promisee's primary purpose in contracting is to make a gift of the agreed-on performance to a third party, that third party is classified as a *donee beneficiary*. If the contract is breached, the donee beneficiary will have a cause of action against the promisor, but not against the promisee (donor). For example, Miller contracts with Perpetual Life Insurance Company, agreeing to pay premiums in return for which Perpetual agrees to pay \$100,000 to Miller's husband when Miller dies. Miller's husband is a donee beneficiary and can bring suit and recover judgment against Perpetual if Miller dies and Perpetual does not pay.

Locke v. Ozark City Board of Education

2005 Ala. LEXIS 55 (Ala. Sup. Ct. 2005)

Wesley Locke is a physical education teacher employed by the Dale County Department of Education. For a number of years, Locke also served as an umpire for high school baseball games. Locke was a member of the Southeast Alabama Umpires Association (SAUA), which provides officials to athletic events sponsored by the Alabama High School Athletic Association (AHSAA). On March 30, 1999, Locke was serving as the head umpire in a baseball game between Carroll High School and George W. Long High School. The game was being played at Carroll High School, and the principal and the athletic director of Carroll High School were in attendance; however, Carroll High School did not provide police protection or other security personnel for the game. After the baseball game, Mixon Cook, the parent of one of the baseball players for Carroll High School, attacked Locke, punching him three times in the face—in his right eye, on the right side of his face, and on the left side of his neck. As a result, Locke sustained physical injuries to his neck and face that caused him pain, discomfort, scarring, and blurred vision. Locke sued the Ozark City Board of Education, alleging breach of contract.

Locke specifically alleged that because Carroll High School, through the Board, is a member of the AHSAA, it is therefore required to follow the rules and regulations of the AHSAA. According to Locke, the AHSAA Directory provides that all school principals have the duty to “insure good game administration and supervision by providing for the following: . . . adequate police protection” at athletic events. Locke alleged that, by not fulfilling its duty under the Directory, the Board breached its contract with the AHSAA by failing to provide police protection at the baseball game, that he was an intended third-party beneficiary of the contract, and that he was injured as a result of the Board's breach of the contract. The trial court entered a summary judgment in favor of the Board, and Locke appealed.

See, Justice

Locke argues that he is an intended third-party beneficiary of a contract between the Board and the AHSAA. To recover under a third-party beneficiary theory, the complainant must show: 1) that the contracting parties intended, at the time the contract was created, to bestow a direct benefit upon a third party; 2) that the complainant was the intended beneficiary of the contract; and 3) that the contract was breached. Further, it has long been the rule in Alabama that one who seeks recovery as a third-party beneficiary of a contract must establish that the

contract was intended for his direct, as opposed to incidental, benefit. We look to the complaints and the surrounding circumstances of the parties to ascertain the existence of that direct benefit.

In *Zeigler v. Blount Bros. Construction Co.*, this court addressed what is necessary to establish status as a third-party beneficiary of a contract. In that case, a dam commissioned by a power company and built by a contractor collapsed. Zeigler, a customer of the electrical power company, sued the contractor that had built the dam, arguing that his status as a consumer of

electrical power made him a third-party beneficiary of the contract between the electrical power company and the contractor. Specifically, Zeigler argued that because the contractor failed to construct the dam properly and the dam subsequently collapsed, he was being forced to pay higher bills for electricity than he would have had to pay had the dam been properly constructed. In determining whether Zeigler was a third-party beneficiary of the contract under the “surrounding circumstances” test, this court looked to whether the power company itself was directly benefited by the contract, or whether the benefit manifested itself mainly to third parties. This court noted that the contract itself did not mention third parties or any benefits third parties would reap from the construction of the dam. This court found that performance of the contracts would, and did, result in an enhancement of [the power company’s] property holdings, to the direct benefit of the [power company] itself. This court further noted that there was no evidence indicating that the power company had considered the fees their customers would have to pay if the dam was built, and that there was no evidence indicating that a properly constructed dam would have necessarily resulted in lower electrical bills for the consumer. Therefore, this court held that because the contract directly benefited the power company and would not necessarily benefit the customer, Zeigler was an incidental, rather than an intended direct, beneficiary of the contract between the power company and the contractor.

On the other hand, in *H.R.H. Metals, Inc. v. Miller*, Vulcan Materials Company contracted with H.R.H Metals, Inc., to purchase and remove three buildings located on property belonging to Vulcan. H.R.H. signed a contract with Vulcan that provided, in pertinent part:

[H.R.H.] covenants to follow Vulcan’s safety rules and to maintain its own safety and health program for its employees, subcontractors, and agents sufficient to prevent injury or illness to such persons resulting from their presence on the Vulcan premises . . .

H.R.H. hired a subcontractor, Miller, to demolish and remove one of the buildings. While in the process of demolishing the building, Miller walked across a skylight and fell 20 feet, seriously injuring himself. Miller sued H.R.H., alleging, among other things, that H.R.H. had breached its contract with Vulcan to provide safety equipment to subcontractors, that he

was a third-party beneficiary of the contract between Vulcan and H.R.H., that H.R.H. had breached that contract, and that he had been injured by H.R.H.’s breach of the contract. This Court noted that in order for a person to be a third-party beneficiary of a contract, the contracting parties must have intended to bestow benefits on third parties. This Court held that to ascertain the intent of the parties, we must first look to the contract itself, because the intention of the parties is to be derived from the contract itself where the language is plain and unambiguous. This court held that the language reflects an intention on the part of the contracting parties to bestow a direct benefit on [the plaintiff].

In this case, the Board argues that Locke was not an intended beneficiary of the AHSAA contract. The contract between the Board and the AHSAA specifically provides that principals are to “provide good game administration and supervision by providing . . . adequate police protection.” The contract before us between the Board and the AHSAA, like the one in *H.R.H.* and unlike the one in *Zeigler*, anticipates the existence of a third party. SAUA, which provided umpires, specifically Locke, for the game, provides officials only to athletic events that are sponsored by the AHSAA. The contract states that the purpose of “adequate police protection” is to “provide good game administration and supervision.” Game administration and supervision necessarily involve umpires. The fact that the AHSAA and the Board intended for the police protection to directly benefit the umpires, who are involved in game administration and supervision, is evidenced by the letter from the AHSAA sanctioning Carroll High School for the incident involving Locke. Because this matter is before us on the appeal of a summary judgment, we need determine only whether Locke has presented substantial evidence creating a genuine issue of material fact as to whether he was an intended direct beneficiary of the contract. We hold, based on the plain language of the contract and on the surrounding circumstances, that the contract anticipates third-party umpires, that the contract was intended to directly benefit umpires like Locke, and that Locke has presented substantial evidence creating a genuine issue of fact as to whether he was an intended direct beneficiary of the contract between the Board and the AHSAA.

Reversed and remanded in favor of Locke.

Vesting of Beneficiary’s Rights Another possible threat to the interests of the third-party beneficiary is that the promisor and the promisee might modify or discharge their contract so as to extinguish or alter the beneficiary’s rights. For example, Gates, who owes \$500

to Sorenson, enters into a contract with Connor whereby Connor agrees to pay the \$500 to Sorenson. What happens if, before Sorenson is paid, Connor pays the money to Gates and Gates accepts it or Connor and Gates otherwise modify the contract? Courts have held that there is

Ethics in Action

Westendorf bought her friend a Gateway computer, which, at her request, Gateway delivered directly to her friend. Several months later, the same friend purchased a Gateway computer, which he requested be delivered directly to Westendorf. Westendorf received and kept that computer. In the shipment, Gateway included its Standard Terms and Conditions Agreement, which contains an arbitration clause. Westendorf allegedly began experiencing

numerous and serious difficulties when attempting to use the Gateway.net service. She brought a class action against Gateway. Westendorf argues that she is not bound by the arbitration clause because as a nonpurchasing user of the computer she never expressly agreed to arbitration. Is it ethical to obligate a donee beneficiary such as Westendorf to the arbitration clause that was part of the contract between the friend who gave her the computer and Gateway?

a point at which the rights of the beneficiary vest—that is, the beneficiary’s rights cannot be lost by modification or discharge. A modification or discharge that occurs after the beneficiary’s rights have vested cannot be asserted as a defense to a suit brought by the beneficiary. The exact time at which the beneficiary’s rights vest differs from jurisdiction to jurisdiction. Some courts have held that vesting occurs when the contract is formed, while others hold that vesting does not occur until the beneficiary learns of the contract and consents to it or does some act in reliance on the promise.

The contracting parties’ ability to vary the rights of the third-party beneficiary can also be affected by the terms of their agreement. A provision of the contract between the promisor and the promisee stating that the duty to the beneficiary cannot be modified would be effective to prevent modification. Likewise, a contract provision in which the parties specifically reserved the right to change beneficiaries or modify the duty to the beneficiary would be enforced. For example, provisions reserving the right to change beneficiaries are very common in insurance contracts.

Problems and Problem Cases

1. Schauer and Erstad went shopping for an engagement ring on August 15, 1999. After looking at diamonds in premier jewelry establishments such as Tiffany and Company and Cartier, they went to Mandarin Gem’s store, where they found a ring that salesperson Joy said featured a 3.01 carat diamond with a clarity grading of “SI1.” Erstad bought the ring the same day for \$43,121.55. The following month, for insurance purposes, Mandarin Gem provided Erstad a written appraisal verifying the ring had certain characteristics, including an SI1 clarity rating and an average replacement value of \$45,500. Lam, a graduate gemologist with the European Gemological Laboratory (EGL), signed the appraisal. The couple’s subsequent short-term marriage was dissolved in a North Dakota judgment awarding each party “the exclusive right, title and possession of all personal property . . . which such party now owns, possesses, holds or hereafter acquires.” Schauer’s personal property included the engagement ring given to her by Erstad. On June 3,

2002, after the divorce, Schauer had the ring evaluated by the Gem Trade Laboratory, which gave the diamond a rating of “SI2” quality, an appraisal with which other unidentified jewelers, including one at Mandarin Gem’s store agreed. Schauer alleged that the true clarity of the diamond and its actual worth, which is some \$23,000 less than what Erstad paid for it. Schauer sued Mandarin Gems on several theories, alleging that she was a third-party beneficiary of Erstad’s contract with Mandarin Gems. Is she correct?

2. Douglass was a highly trained servicer of hardness-testing machinery, who was employed by Page-Wilson. In August and April 1983, Douglass signed two employment agreements governing the terms and conditions of his employment with Page-Wilson. The first agreement prohibited Douglass, while he was working for Page-Wilson and for one year after the termination of his employment, from using, to Page-Wilson’s detriment, any of its customer list or other intellectual property acquired from his job there. The

second agreement, which applied to the same time period, prohibited Douglass from accepting employment from or serving as a consultant to any business that was in competition with Page-Wilson. In April 1987, Canrad Corporation purchased all assets and contractual rights of Page-Wilson, including Douglass's two employment contracts. Special Products Manufacturing, a wholly owned subsidiary of Canrad, assumed plant operations. Douglas worked for Special Products until his resignation in February 1988. Shortly after that time, Special Products filed suit against Douglass, alleging that Douglass had affixed his name and home telephone number to the machines he serviced, so that the ensuing maintenance calls would reach him personally. It also alleged that, following his resignation, Douglass established a competing business and actively solicited Special Products' clientele. Douglass claims that Special Products did not have the right to enforce the agreements not to compete. Is Douglass correct?

3. Kethan's employment contract with his employer, MedEcon, included a noncompete. No clause in the contract directly addressed the issue of whether Kethan's contract could be assigned. Most of MedEcon's assets, including Kethan's employment contract, were acquired by the plaintiff, MHA. A short time after this acquisition, Kethan resigned and, in violation of the noncompete, went to work for a competitor. MHA brought suit seeking to enforce Kethan's noncompete with MedEcon. Was the noncompete assignable?
4. Perry sold its Auto Works Division to Northern Retail. Northern Retail's parent, Northern Pacific (later called NP Holding) agreed to assume Perry's debts and indemnify Perry for damages relating to Auto Works Division. After the contract was formed but before the closing, Northern Retail assigned the purchase contract to Auto Works, Inc. At the closing, Perry transferred the Auto Works Division to Auto Works, Inc. (not to Northern Retail), with the assumption instrument being executed by Auto Works, Inc., Later, Northern Retail sold Auto Works, Inc., to a third party, who put it into bankruptcy, thereby failing to pay rent due under leases that it had assumed from Perry. NP Holding dissolved. Northern Retail became CSKG (a subsidiary of CSK Auto), and then was dissolved, with a transfer of its assets to CSK Auto. Perry claimed that CSK and NP Holding were obligated to indemnify it for the leases. Perry argued that the sale of the Auto Works Division to Auto Works, Inc., did not release Northern Retail from its obligations and was not a novation. Was this a good argument?
5. Jones paid Sullivan, the chief of the Addison Police Department, \$6,400 in exchange for Sullivan's cooperation in allowing Jones and others to bring marijuana by airplane into the Addison airport without police intervention. Instead of performing the requested service, Sullivan arrested Jones. The \$6,400 was turned over to the district attorney's office and was introduced into evidence in the subsequent trial in which Jones was tried for and convicted of bribery. After his conviction, Jones assigned his alleged claim to the \$6,400 to Melvyn Bruder. Based on the assignment, Bruder brought suit against the state of Texas to obtain possession of the money. Will he be successful?
6. GWI is a manufacturer of beauty supply products. Sullivan is a distributor of beauty supply products in New England and operates more than two dozen wholesale beauty supply stores in that region. In February 1998, the parties entered into a distribution agreement, pursuant to which GWI granted Sullivan the exclusive right to sell its products to professional stores in New Hampshire, Vermont, and Maine, and to sell its products to both professional stores and salons in Massachusetts. Among other things, the agreement provided that "[a]ll disputes and claims relating to or arising under or out of this Agreement shall be fully and finally settled by arbitration." This agreement expired in 2003, but the parties continued their relationship under the same terms and conditions as had governed the relationship during the duration of the contract. In 2006, another of GWI's regional distributors—Kaleidoscope/BOA, Inc.—assigned to Sullivan all of its "right, title, and interest under the Kaleidoscope Distribution Agreement [with GWI] dated August 16, 2004, save and except the right to distribute Graham Webb Classic line products to salons in the territory." GWI consented to this assignment. By acquiring an assignment of Kaleidoscope's rights under its distribution agreement with GWI, Sullivan obtained the exclusive right to distribute GWI products to professional salons in Maine, New Hampshire, and Vermont (previously, it had the exclusive right to distribute GWI products only to professional stores in those states). Like the original distribution agreement between GWI and Sullivan, both the distribution agreement between Kaleidoscope and GWI (the rights under which were assigned

to Sullivan) and the agreement evidencing that assignment contained arbitration provisions. Despite the fact that the Sullivan Distribution Agreement (SDA) had expired, the Assignment Agreement specifically referenced that document, describing the parties' respective rights and obligations and noting that the SDA will have to be amended to take into account Sullivan's newly expanded distribution rights. The parties' reference to the SDA in the Assignment Agreement provides strong evidence that, although the SDA agreement had expired, the parties were continuing their business relationship pursuant to its terms. A little more than a year later, GWI notified Sullivan of its intention to terminate its distribution relationship with Sullivan, effective April 1, 2007. In that letter, GWI specifically invoked the termination provisions contained in both the SDA and the Kaleidoscope Distribution Agreement. When Sullivan was unable to persuade GWI to change its mind, it sued GWI for breach of contract and other claims. Sullivan asserted that the arbitration provision in the Assignment Agreement was not relevant to this dispute and that it was not bound by the arbitration provisions in the Kaleidoscope Distribution Agreement. Is this a good argument?

7. Francis brought suit against Piper and his law firm, alleging Piper committed legal malpractice when he drafted a series of wills for Heine, Francis's brother. Heine, who had never married, had no children; Francis was his sole sibling and closest living relative. In 1987, after Heine suffered a stroke, the district court appointed a conservator for him. In 1990, Heine met Resick, a waitress at a deli he frequented. In December 1991, Resick referred Heine, who did not have a will, to Piper. Piper prepared three successive wills for Heine. The first left all of Heine's estate to a church. The second left \$20,000 to Resick and the remainder of Heine's estate to a church. The third left all of Heine's estate to Resick. If Heine had not executed a will, Francis would have been Heine's sole heir under the intestacy laws. After Heine's death, Resick submitted the third will to probate. Francis challenged the will, and eventually reached a settlement with Resick that provided Resick would receive \$80,000 and Francis the remainder of Heine's estate. Francis then brought this action against Piper, alleging Piper was negligent because Heine was under a conservatorship, lacked testamentary capacity, and was suffering from the effects of undue influence. Piper moved
8. The Sheriff of Polk County employed Prison Health Services (PHS) to provide total health care services for inmates and detainees housed in Polk County Jail and Jail Annex. In 1992, employees of the Sheriff's office booked Cherry into the jail to begin serving a 30-day sentence for driving under the influence of alcohol. At the time of his incarceration, Cherry informed the PHS medical staff that he consumed approximately a case of beer daily. Over the next two days, Cherry repeatedly requested medical attention for symptoms of alcohol withdrawal. Cherry's wife notified a Sheriff's office employee that her husband had a history of delirium tremens during alcohol withdrawal and that he was in immediate need of a doctor's attention. About two hours later, the inmates sharing Cherry's cell asked Sheriff's office to check on Cherry's condition. The employees found Cherry in his cell hallucinating and shaking violently. The employee notified PHS Nurse Gill, who examined Cherry and reported his symptoms to PHS Nurse Smith. Nurse Smith requested that Cherry be sent to the infirmary for observation. At the infirmary, a Sheriff's office employee shackled Cherry, who was still hallucinating, to his bed, with the knowledge and acquiescence of Nurse Smith. The next morning, while still suffering from hallucinations associated with delirium tremens, Cherry either walked or jumped off the end of his bed. Because the leg shackle did not allow his feet to advance beyond the top of the bed, Cherry landed head first on the concrete floor. Cherry died five days later as a result of his injuries. Cherry's estate filed suit against PHS, Nurse Smith, and the Sheriff's office for breach of contract, alleging that Cherry was a third-party beneficiary to the contract between the Sheriff and PHS. Will Cherry's estate prevail?
9. Lewis, a dairyman, was a member of the Mountain Empire Dairymen's Association (MEDA). MEDA was the exclusive agent for marketing Lewis's dairy products. Lewis borrowed \$194,850 from Mid-States Sales and secured the loan with certain of his cattle and their products. Lewis assigned his right to receive some of the proceeds from the sale of his

milk each month to Mid-States, and notified MEDA of the assignment. After paying Mid-States for over a year under this agreement, MEDA received notice from Lewis that he was canceling his membership in MEDA. MEDA notified Mid-States and other assignees of Lewis that Lewis was canceling his membership, and asked them to sign a release of assignment. The other assignees signed the releases, but Mid-States did not. MEDA made the last payout on the milk it sold for Lewis directly to Lewis rather than to Mid-States. After Lewis filed for bankruptcy, Mid-States sued MEDA for the payment. Will it prevail?

Online Research

Assignment of Leases

Leases often contain clauses that specifically address the right to assign the lease. Using your favorite search engine and key words such as lease AND assignment, locate a lease that contains a provision addressing assignment. How would the concepts of this chapter apply if the lessor or the lessee of the lease you found assigns the lease?

chapter 18

PERFORMANCE AND REMEDIES

The Warrens hired Denison, a building contractor, to build a house on their property for \$73,400. Denison's construction deviated somewhat from the specifications for the project. These deviations were presumably unintentional, and the cost of repairing them was \$1,941.50. The finished house had a market value somewhat higher than the market value would have been without the deviations. The Warrens refused to pay the \$48,400 balance due under the contract, alleging that Denison had used poor workmanship in building the house and they were under no obligation to perform further duties under the contract.

- Do the Warrens have the right to withhold all further payment?
- What are the consequences of Denison's breach of contract?
- What are the appropriate remedies for Denison's breach of contract?
- Are the Warrens under an ethical duty to pay Denison?

CONTRACTS ARE GENERALLY FORMED before either of the parties renders any actual performance to the other. A person may be content to bargain for and receive the other person's promise at the formation stage of a contract because this permits him to plan for the future. Ultimately, however, all parties bargain for the *performance* of the promises that have been made to them.

In most contracts, each party carries out his promise and is *discharged* (released from all of his obligations under the contract) when his performance is complete. Sometimes, however, a party fails to perform or performs in an unsatisfactory manner. In such cases, courts are often called on to determine the respective rights and duties of the parties. This frequently involves deciding such questions as whether performance was due, whether the contract was breached, to what extent it was breached, and whether performance was excused. This task is made more difficult by the fact that contracts often fail to specify the consequences of nonperformance or defective performance. In deciding questions involving the performance of contracts and remedies for breach of contract, courts draw on a variety of legal principles that attempt to do justice, prevent forfeiture and unjust enrichment, and effectuate the parties' presumed intent.

This chapter presents an overview of the legal concepts that are used to resolve disputes arising in the performance stage of contracting. It describes how courts

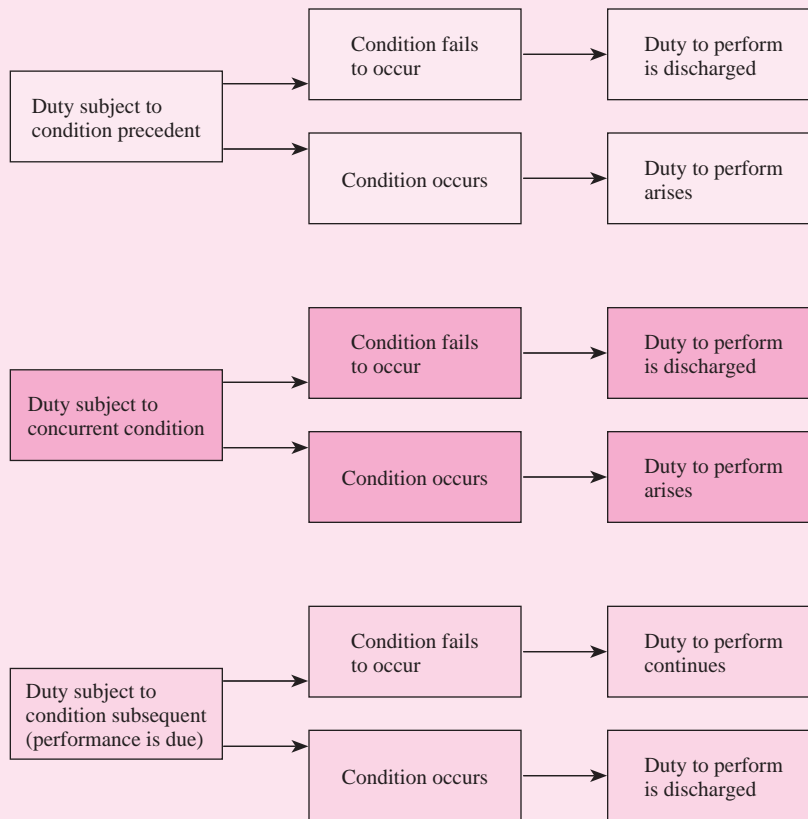

determine whether performance is due and what kind of performance is due, the consequences of contract breach, and the excuses for a party's failure to perform. It also includes a discussion of the remedies that are used when a court determines that a contract has been breached.

Conditions

Nature of Conditions One issue that frequently arises in the performance stage of a contract is whether a party has the duty to perform. Some duties are *unconditional* or *absolute*—that is, the duty to perform does not depend on the occurrence of any further event other than the passage of time. For example, if Root promises to pay Downing \$100, Root's duty is unconditional. When a party's duty is unconditional, he has the duty to perform unless his performance is excused. (The various excuses for nonperformance will be discussed later in this chapter.) When a duty is unconditional, the promisor's failure to perform constitutes a *breach of contract*.

In many situations, however, a promisor's duty to perform depends on the occurrence of some event that is called a **condition**. A condition is an uncertain, future event that affects a party's duty to perform. For example, if Melman contracts to buy Lance's house on condition that First Bank approve Melman's application for a mortgage loan by January 10, Melman's duty to buy Lance's

Figure 1 Effect of Conditions

house is *conditioned* on the bank's approving his loan application by January 10. When a promisor's duty is conditional, his duty to perform is affected by the occurrence of the condition. In this case, if the condition does not occur, Melman has no duty to buy the house. His failure to buy it because of the nonoccurrence of the condition will *not* constitute a breach of contract. Rather, he is discharged from further obligation under the contract.

Almost any event can be a condition. Some conditions are beyond the control of either party, such as when Morehead promises to buy Pratt's business if the prime rate drops by a specified amount. Others are within the control of a party, such as when one party's performance of a duty under the contract is a condition of the other party's duty to perform.

Types of Conditions There are two ways of classifying conditions. One way of classifying conditions focuses on the effect of the condition on the duty to

perform. The other way focuses on the way in which the condition is created.

Classifications of Conditions Based on Their Effect on the Duty to Perform As Figure 1 illustrates, conditions vary in their effects on the duty to perform.

1. Condition precedent. A condition precedent is a future, uncertain event that creates the duty to perform. If the condition does not occur, performance does not become due. If the condition does occur, the duty to perform arises. In the following *Smith* case, you will see an example of a condition precedent.

2. Concurrent condition. When the contract calls for the parties to perform at the same time, each person's performance is conditioned on the performance or tender of performance (offer of performance) by the other. Such conditions are called **concurrent conditions**. For example, if Martin promises to buy Johnson's car for \$5,000, the parties' respective duties to perform are subject to a

concurrent condition. Martin does not have the duty to perform unless Johnson tenders his performance, and vice versa.

3. Condition subsequent. A **condition subsequent** is a future, uncertain event that **discharges** the duty to perform. When a duty is subject to a condition subsequent, the duty to perform arises but is discharged if the future, uncertain event occurs. For example, Wilkinson and Jones agree that Wilkinson will begin paying Jones

\$2,000 per month, but that if XYZ Corporation dissolves, Wilkinson's obligation to pay will cease. In this case, Wilkinson's duty to pay is subject to being discharged by a condition subsequent. The major significance of the distinction between conditions precedent and conditions subsequent is that the plaintiff bears the burden of proving the occurrence of a condition precedent, while the defendant bears the burden of proving the occurrence of a condition subsequent.

Smith v. Carter & Burgess, Inc.

2005 Tex. App. LEXIS 1140 (Tex. Ct. App. 2005)

Chris Smith and 14 co-workers signed identical employment agreements with Carter & Burgess, Inc. (C&B). The employment agreements provided the employees could be terminated "for any reason, or no reason at all" after completion of an initial eight-week orientation period. The employment contracts also provided for an incentive payment under certain circumstances:

In the event Employee remains employed with Carter & Burgess for two years after the Effective Date of this Agreement, complies with the terms of this Agreement, and reaffirms the commitment to comply with the provisions of Paragraphs 3 and 4 of this Agreement [dealing with nondisclosure of information], Employee shall be eligible to receive deferred salary in the sum of \$15,000. In the event Employee resigns before two years after the Effective Date of this Agreement or is terminated for Cause (as defined in paragraph 1), Employee is responsible for all costs for Employee to return to his/her home location and also forfeits the Incentive Payment.

Smith and the 14 co-workers were terminated after the orientation period but before the expiration of two years' employment when the project for which they were hired was canceled. C&B did not make any incentive payments. The employees sued for breach of contract and promissory estoppel, claiming they were entitled to the incentive payments because they had not resigned or been terminated for cause. The trial court granted a summary judgment in favor of C&B, and Smith and the other employees appealed.

Gardner, Judge

The first sentence of the contracts in this case provides that if an employee completes two years of service with the employer, the employee is eligible for an incentive bonus. The parties disagree as to the effect of the language in the second sentence of the contracts. Plaintiffs interpret the contracts to provide the incentive bonus even if the employees did not work for the employer for two years, so long as they were not terminated for cause or did not voluntarily cease working for C&B. Conversely, C&B contends that the contracts provide the bonus incentive if, and only if, plaintiffs worked for the employer for two years and also provide that even if the employee has served more than two years with the employer and is terminated for cause or quits, the employee must not only provide for his or her own transportation home, but also forfeit the incentive bonus.

We conclude that the only reasonable interpretation of the incentive payment contract provisions is that they required the plaintiffs to remain employed for two years before becoming eligible for the incentive bonus. Reading the contracts to allow the eligibility for an incentive bonus even if the plaintiffs did

not remain an employee for two years would render the first sentence of the employment contracts meaningless.

We must next determine whether the two-year employment requirement is a condition precedent. To determine whether a condition precedent exists, the court will ascertain the intention of the parties, and that can be done only by looking at the entire contract. In order to make performance specifically conditional, a term such as "if," "provided that," "on condition that," or some similar language normally must be included. If no such language is used, the terms will be construed as a covenant in order to avoid forfeiture. While such language is not required, absence of such language is probative of the parties' intention that a promise be made, rather than a condition imposed. The contracts in this case use such words.

Thus, we conclude that the only reasonable interpretation of the contracts is that they contained a condition precedent requiring plaintiffs to complete two years of service before becoming eligible for the incentive bonus. The words "in the event that" evidence an intent to create a condition precedent. Furthermore, if a contract is to be interpreted as to give effect to

all provisions of the contract, interpreting the employment contract to contain a promise to be made, rather than a condition precedent to performance, would render the first sentence of the contract meaningless. Therefore, a proper interpretation of the employment contracts would be to construe as a condition precedent the requirement that appellants complete two years of employment in order to be eligible for the incentive bonus.

Because we hold that the contract was unambiguous and contained a condition precedent requiring plaintiffs to be employed by C&B for two years before they would become eligible for an incentive payment, we affirm the trial court's summary judgment.

Affirmed in favor of C&B.

Classifications of Conditions Based on the Way in Which They Were Created Another way of classifying conditions is to focus on the means by which the condition was created.

1. Express condition. An **express condition** is a condition that is specified in the language of the parties' contract. For example, if Grant promises to sell his regular season football tickets to Carson on condition that Indiana University wins the Rose Bowl, Indiana's winning the Rose Bowl is an express condition of Grant's duty to sell the tickets.

When the contract expressly provides that a party's duty is subject to a condition, courts take it very seriously. When a duty is subject to an express condition, that condition must be strictly complied with in order to give rise to the duty to perform.

2. Implied-in-fact condition. An **implied-in-fact condition** is one that is not specifically stated by the parties but is *implied* by the nature of the parties' promises. For example, if Summers promises to unload cargo from Knight's ship, the ship's arrival in port would be an implied-in-fact condition of Summer's duty to unload the cargo.

3. Constructive condition. **Constructive conditions** (also known as *implied-in-law conditions*) are conditions that are imposed by law rather than by the agreement of the parties. The law imposes constructive conditions to do justice between the parties. In contracts in which one of the parties is expected to perform before the other, the law normally infers that performance is a constructive condition of the other party's duty to perform. For example, if Thomas promises to build a house for King, and the parties' understanding is that King will pay Thomas an agreed-on price when the house is built, King's duty to pay is subject to the constructive condition that Thomas complete the house. Without such a constructive condition, a person who did not receive the performance promised him would still have to render his own performance.

Creation of Express Conditions Although no particular language is required to create an express condition, the conditional nature of promises is usually indicated by such words as *provided that*, *subject to*, *on condition that*, *if*, *when*, *while*, *after*, and *as soon as*. The process of determining the meaning of conditions is not a mechanical one. Courts look at the parties' overall intent as indicated in language of the entire contract.

The following discussion explores two common types of express conditions.

Example of Express Condition: Satisfaction of Third Parties It is common for building and construction contracts to provide that the property owner's duty to pay is conditioned on the builder's production of certificates to be issued by a specific architect or engineer. These certificates indicate the satisfaction of the architect or engineer with the builder's work. They are often issued at each stage of completion, after the architect or engineer has inspected the work done.

The standard usually used to determine whether the condition has occurred is a *good faith* standard. As a general rule, if the architect or engineer is acting honestly and has some good faith reason for withholding a certificate, the builder cannot recover payments due. In legal terms, the condition that will create the owner's duty to pay has not occurred.

If the builder can prove that the withholding of the certificate was fraudulent or done in bad faith (as a result of collusion with the owner, for example), the court may order that payment be made despite the absence of the certificate. In addition, production of the certificate may be excused by the death, insanity, or incapacitating illness of the named architect or engineer.

Example of Express Condition: Personal Satisfaction Contracts sometimes provide that a promisee's duty to perform is conditioned on his personal satisfaction with the promisee's performance. For example, Moore

commissions Allen to paint a portrait of Moore's wife, but the contract provides that Moore's duty to pay is conditioned on his personal satisfaction with the portrait.

In determining which standard of satisfaction to apply, courts distinguish between cases in which the performance bargained for involves personal taste and comfort and cases that involve mechanical fitness or suitability for a particular purpose. If personal taste and comfort are involved, as they would be in the hypothetical case described above, a promisor who is honestly dissatisfied with the promisee's performance has the right to reject the performance without being liable to the promisee. If, however, the performance involves mechanical fitness or suitability, the court will apply a reasonable person test. If the court finds that a reasonable person would be satisfied with the performance, the condition of personal satisfaction has been met and the promisor must accept the performance and pay the contract price.

Excuse of Conditions In most situations involving conditional duties, the promisor does not have the duty to perform unless and until the condition occurs. There are, however, a variety of situations in which the occurrence of a condition will be excused. In such a case, the person whose duty is conditional will have to perform even though the condition has not occurred.

One ground for excusing a condition is that the occurrence of the condition has been *prevented* or *hindered* by the party who is benefited by the condition. For example, Connor hires Ingle to construct a garage on Connor's land, but when Ingle attempts to begin construction, Connor refuses to allow Ingle access to the land. In this case, Connor's duty to pay would normally be subject to a constructive condition that Ingle build the garage.

However, since Connor prevented the occurrence of the condition, the condition will be excused, and Ingle can sue Connor for damages for breach of contract even though the condition has not occurred. The following *Harbor Park Market* case considers whether a condition should be excused because of prevention.

Other grounds for excuse of a condition include **waiver** and **estoppel**. When a person whose duty is conditional voluntarily gives up his right to the occurrence of the condition (waiver), the condition will be excused. Suppose that Buchman contracts to sell his car to Fox on condition that Fox pay him \$2,000 by June 14. Fox fails to pay on June 14, but, when he tenders payment on June 20, Buchman accepts and cashes the check without reservation. Buchman has thereby *waived* the condition of payment by June 14.

When a person whose duty is conditional leads the other party to rely on his noninsistence on the condition, the condition will be excused because of estoppel. For example, McDonald agrees to sell his business to Brown on condition that Brown provide a credit report and personal financial statement by July 17. On July 5, McDonald tells Brown that he can have until the end of the month to provide the necessary documents. Relying on McDonald's assurances, Brown does not provide the credit report and financial statement until July 29. In this case, McDonald would be *estopped* (precluded) from claiming that the condition did not occur.

A condition may also be excused when performance of the act that constitutes the condition becomes *impossible*. For example, if a building contract provides that the owner's duty to pay is conditioned on the production of a certificate from a named architect, the condition would be excused if the named architect died or became incapacitated before issuing the certificate.

Harbor Park Market v. Gronda

743 N.W.2d 585 (Mich. Ct. App. 2007)

William and Linda Gronda owned a party store and land along with fixtures, equipment, and a liquor license. On October 11, 2004, Harbor Park Market submitted a \$55,000 offer to the Grondas for the purchase of their liquor license and fixtures. On October 14, 2004, the Grondas accepted Harbor Park Market's offer to buy the liquor license and fixtures, but their "acceptance" was expressly conditioned (and agreed to by Harbor Park Market) on their attorney's approval of the purchase agreement. The specific language within the agreement was: "This Purchase Agreement is subject to review & approval of attorney Lynn Stedman, on or before Oct. 22, 2004."

Before their attorney had an opportunity to review the purchase agreement, the Grondas conditionally accepted a second offer, this one from Carleton Enterprises, to purchase the real property, along with the business, liquor license, and fixtures, for \$250,000. That acceptance, too, was expressly conditioned on the approval of the purchase agreement by the Grondas' attorney.

Lynn Stedman, the Grondas' attorney, reviewed the competing agreements together when he returned from a vacation. He approved the Carleton agreement. The Grondas thereafter refused to complete the sale to Harbor Park Market, and, instead, attempted to close their sale with Carleton. However, Harbor Park Market filed suit for breach of contract against the Grondas and Carleton and asked the court to require the Grondas to perform the contract.

After a one-day bench trial, the trial court concluded that, by soliciting and submitting a competing purchase agreement to Stedman for review, the Grondas placed an obstacle in the way of Stedman's approval of Harbor Park Market's agreement and hindered the fulfillment of the condition precedent. It found in favor of Harbor Park Market and ordered the Grondas to perform the contract. The Grondas appealed.

Murray, Judge

The dispositive issue on appeal is whether the Grondas interfered with, and therefore waived, the condition precedent by simultaneously submitting to Stedman a second conditional agreement. The goal of contract interpretation is to first determine, and then enforce, the intent of the parties based on the plain language of the agreement. If no reasonable person could dispute the meaning of ordinary and plain contract language, the Court must accept and enforce the language as written, unless the contract is contrary to law or public policy. Plain and unambiguous contract language cannot be rewritten by the Court “under the guise of interpretation,” as the parties must live by the words of their agreement.

The parties agree that the attorney-approval clause was a condition precedent. A condition precedent, like the one at issue in this case, is a fact or event that the parties intend must take place before there is a right to performance. If the condition is not satisfied, there is no cause of action for a failure to perform the contract. However, the Grondas, as promisors, cannot avoid liability on the contract for the failure of a condition precedent where they caused the failure of the condition. As the Supreme Court has stated, when a contract contains a condition precedent, “there is an implied agreement that the promisor will place no obstacle in the way of the happening of such event. . . .” *Mehling v. Evening News Ass'n*. Where a party prevents the occurrence of a condition, the party, in effect, waives the performance of the condition. Hence, the performance of a condition precedent is discharged or excused, and the conditional promise made an absolute one.

Our case law generally reflects that a party must prevent the condition from occurring by either taking some affirmative action, or by refusing to take action required under the contract, before a court will find a waiver of a condition precedent. For example, in *Mehling*, the Court concluded that the plaintiffs waived the condition precedent that the parties agree on the appraiser's compensation before the property was appraised, because the plaintiffs refused to meet with the defendant and two other appraisers to discuss compensation.

Here, the language of the contract was clear and unambiguous. Quite simply, the agreement stated that the Grondas'

acceptance of Harbor Park Market's offer was subject to their attorney's review and approval of “this agreement.” Thus, because there was no limitation on what aspects of the agreement were subject to Stedman's approval, Stedman was authorized to review and approve (or disapprove) any part of the contract, or the entire contract as a whole. Since the parties failed to include an express limitation in the language of the condition precedent that restricted Stedman's approval authority, we will not judicially impose one ourselves. Certainly, language limiting the scope of Stedman's approval could have been included by the parties, but it was not. Hence, because the contract language giving the Grondas' attorney complete discretion to approve or disapprove the agreement for whatever reason was clear and unambiguous, it has to be accepted and enforced as written.

Additionally, there was no finding by the trial court that the Grondas otherwise actively interfered with Stedman's approval, such as instructing the attorney to disapprove the agreement. The attorney-approval clause in Harbor Park Market's agreement required the Grondas to submit the purchase agreement to their lawyer for review. The Grondas submitted the agreement to Stedman in a timely manner, and the agreement required them to do no more. Nor did it prevent the Grondas from submitting other offers to Stedman before he decided whether to approve the Harbor Park Market offer. Thus, it cannot be disputed that the Grondas did not fail to perform as required under the contract. In similar situations, courts have routinely held that submitting a second, competing agreement for review when not precluded by the contract does not constitute a waiver of the condition precedent. Several of our sister states have provided some insightful cases on this precise point. In *Stevens v. Manchester*, the Ohio Court of Appeals held that a broad attorney-approval clause gave the attorneys the right to reject the contract for any reason, including a better competing offer.

In short, the evidence does not support the trial court's finding that the sellers or their attorneys acted in bad faith in disapproving Stevens's offer. The attorney-approval clause gave the sellers' attorneys the right to disapprove Stevens's offer for any reason. Stevens did not object to the language contained in the

clause. The sellers' attorneys testified that they disapproved the contract based on potential tax problems for their clients associated with the purchase-price-allocation clause and the architect, inspection, and financing contingencies contained in Stevens's offer. Even assuming, as the trial court did, that the attorneys rejected Stevens's offer solely to accept the more favorable offer, such action does not constitute bad faith. As we have already made clear, the contract did not forbid the Grondas

from considering other offers, and it did not require them to take their property off the market while the attorney was reviewing plaintiff's offer. Considering that the second purchase agreement was not legally impermissible where the first was only conditionally accepted, it was not a bad-faith act to accept it and submit it for review.

Reversed and remanded in favor of the Grondas.

Performance of Contracts

When a promisor has performed his duties under a contract, he is discharged. Because his performance constitutes the occurrence of a constructive condition, the other party's duty to perform is also triggered, and the person who has performed has the right to receive the other party's performance. In determining whether a promisor is discharged by performance and whether the constructive condition of his performance has been fulfilled, courts must consider the standard of performance expected of him.

Level of Performance Expected of the Promisor In some situations, no deviation from the promisor's promised performance is tolerated; in others, less-than-perfect performance will be sufficient to discharge the promisor and give him the right to recover under the contract.

Strict Performance Standard A **strict performance** standard is a standard of performance that requires virtually perfect compliance with the contract terms. Remember that when a party's duty is subject to an express condition, that condition must be strictly and completely complied with in order to give rise to a duty of performance. Thus, when a promisor's performance is an express condition of the promisee's duty to perform, that performance must strictly and completely comply with the contract in order to give rise to the other promisee's duty to perform. For example, if McMillan agrees to pay Jester \$500 for painting his house "on condition that" Jester finish the job no later than June 1, 2006, a standard of strict or complete performance would be applied to Jester's performance. If Jester does not finish the job by June 1, his breach will have several consequences. First, since the condition precedent to McMillan's duty to pay has not occurred, McMillan does not have a duty to

pay the contract price. Second, since it is now too late for the condition to occur, McMillan is discharged. Third, McMillan can sue Jester for breach of contract. The law's commitment to freedom of contract justifies such results in cases in which the parties have expressly bargained for strict compliance with the terms of the contract.

The strict performance standard is also applied to contractual obligations that can be performed either exactly or to a high degree of perfection. Examples of this type of obligation include promises to pay money, deliver deeds, and, generally, promises to deliver goods. A promisor who performs such promises completely and in strict compliance with the contract is entitled to receive the entire contract price. The promisor whose performance deviates from perfection is not entitled to receive the other party's performance if he does not render perfect performance within an appropriate time. He may, however, be able to recover the value of any benefits that he has conferred on the other party under a theory of quasi-contract.

Substantial Performance Standard A **substantial performance** standard is a somewhat lower standard of performance that is applied to duties that are difficult to perform without some deviation from perfection *if* performance of those duties is *not* an express condition. A common example of this type of obligation is a promise to erect a building. Other examples include promises to construct roads, to cultivate crops, and to render some types of personal or professional services. Substantial performance is performance that falls short of complete performance in minor respects. It does not apply when a contracting party has been deprived of a material part of the consideration he bargained for. When a substantial performance standard is applied, the promisor who has substantially performed is discharged. His substantial performance triggers the other party's duty to pay the contract price less any damages resulting from the defects

CONCEPT REVIEW

Substantial Performance

| Definition | Application | Effects | Limitation |
|---|--|---|---------------------------------|
| Performance that falls short of complete performance in some minor respect but that does not deprive the other party of a material part of the consideration for which he bargained | Applies to performance that (1) is <i>not</i> an express condition of the other party's duty to perform and (2) is difficult to do perfectly | Triggers other party's duty to perform; requires other party to pay the contract price minus any damages caused by defects in performance | Breach cannot have been willful |

in his performance. The obvious purpose behind the doctrine of substantial performance is to prevent forfeiture by a promisor who has given the injured party most of what he bargained for. Substantial performance is generally held to be inapplicable to a situation in which the breach of contract has been *willful*, however.

Good Faith Performance One of the most significant trends in modern contract law is that courts and legislatures have created a duty to perform in good faith in an expanding range of contracts.¹ The Uniform Commercial Code specifically imposes a duty of good faith in every contract within the scope of any of the articles of the Code [1–203]. A growing number of courts have applied the duty to use good faith in transactions between lenders and their customers as well as insurance contracts, employment contracts, and contracts for the sale of real property.

This obligation to carry out a contract in good faith is usually called the **implied covenant of good faith and fair dealing**. It is a broad and flexible duty that is imposed by law rather than by the agreement of the parties. It is generally taken to mean that neither party to a contract will do anything to prevent the other from obtaining the benefits that he has the right to expect from the parties' agreement or their contractual relationship. The law's purpose in imposing such a term in contracts is to prevent abuses of power and encourage ethical behavior.

Breach of the implied covenant of good faith gives rise to a contract remedy. In some states, it can also

constitute a tort, depending on the severity of the breach. A tort action for breach of the implied covenant of good faith is more likely to be recognized in situations in which a contract involves a special relationship of dependency and trust between the parties or where the public interest is adversely affected by a contracting party's practices. Numerous cases exist, for example, in which insurance companies' bad faith refusal to settle claims or perform duties to their insured and lenders' failure to exercise good faith in their dealings with their customers have led to large damage verdicts. Likewise, in states in which the implied duty of good faith has been held applicable to contracts of employment, employers who discharge employees in bad faith have been held liable for damages.²

Breach of Contract

When a person's performance is due, any failure to perform that is not excused is a breach of contract. Not all breaches of contract are of equal seriousness, however. Some are relatively minor deviations, whereas others are so extreme that they deprive the promisee of the essence of what he bargained for. The legal consequences of a given breach depend on the extent of the breach.

At a minimum, a party's breach of contract gives the nonbreaching party the right to sue and recover for any damages caused by that breach. When the breach is serious enough to be called a **material breach**, further legal consequences ensue.

¹This trend is discussed in Chapter 9.

²This is discussed in Chapter 51.

Effect of Material Breach A material breach occurs when the promisor's performance fails to reach the level of performance that the promisee is justified in expecting under the circumstances. In a situation in which the promisor's performance is judged by a substantial performance standard, saying that he failed to give substantial performance is the same thing as saying that he materially breached the contract.

The party who is injured by a material breach has the right to withhold his own performance. He is discharged from further obligations under the contract and may cancel it. He also has the right to sue for damages for total breach of contract.

Effect of Nonmaterial Breach By contrast, when the breach is not serious enough to be material, the nonbreaching party may sue for only those damages caused by the particular breach. In addition, he does not have the right to cancel the contract, although a nonmaterial breach can give him the right to suspend his performance until the breach is remedied. Once the breach is remedied, however, the nonbreaching party must go ahead and render his performance, minus any damages caused by the breach.

Determining the Materiality of the Breach The standard for determining materiality is a flexible one that takes into account the facts of each individual case. The key question is whether the breach deprives the injured party of the benefits that he reasonably expected. For example, Norman, who is running for mayor, orders campaign literature from Prompt Press, to be delivered in September. Prompt Press's failure to deliver the literature until after the election in November deprives Norman of the essence of what he bargained for and would be considered a material breach.

In determining materiality, courts take into account the extent to which the breaching party will suffer forfeiture if the breach is held to be material. They also consider the magnitude (amount) of the breach and the willfulness or good faith exercised by the breaching party. The timing of the breach can also be important. A breach that occurs early on in the parties' relationship is more likely to be viewed as material than is one that occurs after an extended period of performance. Courts also consider the extent to which the injured party can be adequately compensated by the payment of damages. The *Arnhold* case, which follows shortly, contains an analysis of whether a breach is material.

Time for Performance A party's failure to perform on time is a breach of contract that may be serious enough to constitute a material breach, or it may be relatively trivial under the circumstances.

At the outset, it is necessary to determine when performance is due. Some contracts specifically state the time for performance, which makes it easy to determine the time for performance. In some contracts that do not specifically state the time for performance, such a time can be inferred from the circumstances surrounding the contract. In the Norman and Prompt Press campaign literature example, the circumstances surrounding the contract probably would have implied that the time for performance was some time before the election, even if the parties had not specified the time for performance. In still other contracts, no time for performance is either stated or implied. When no time for performance is stated or implied, performance must be completed within a "reasonable time," as judged by the circumstances of each case.

Consequences of Late Performance After a court determines when performance was due, it must determine the consequences of late performance. In some contracts, the parties expressly state that "time is of the essence" or that timely performance is "vital." This means that each party's timely performance by a specific date is an express condition of the other party's duty to perform. Thus, in a contract that contains a time is of the essence provision, any delay by either party normally constitutes a material breach. Sometimes, courts will imply such a term even when the language of the contract does not state that time is of the essence. A court would be likely to do this if late performance is of little or no value to the promisee. For example, Schrader contracts with the local newspaper to run an advertisement for Christmas trees from December 15, 2000, to December 24, 2000, but the newspaper does not run the ad until December 26, 2000. In this case, the time for performance is an essential part of the contract and the newspaper has committed a material breach.

When a contract does not contain language indicating that time is of the essence and a court determines that the time for performance is not a particularly important part of the contract, the promisee must accept late performance rendered within a reasonable time after performance was due. The promisee is then entitled to deduct or set off from the contract price any losses caused by the delay. Late performance is not a material breach in such cases unless it is unreasonably late.

Arnhold v. Ocean Atlantic Woodland Corp.

284 F.3d 693 (7th Cir. 2002)

Edith Arnhold and John Argoudelis are lifelong farmers who own 280 acres of land near Plainfield, Illinois, a far southwestern suburb of Chicago that is presently regarded as one of the fastest growing areas in the state. In exchange for \$7.56 million payable over three years, Arnhold and Argoudelis agreed in August 1997 to sell their farm to Ocean Atlantic, a sophisticated development corporation that planned to transform the land into a residential subdivision with more than 700 homes. The parties scheduled the initial closing on November 15, 1997, and agreed to cooperate and ensure that all the conditions precedent to initial closing—such as the rezoning and annexation of the land by the Plainfield Village Board—would be met in a timely manner. Despite their best efforts, however, the parties realized that they were in no position to meet the November 15, 1997, deadline, for they had neither executed the necessary documents nor obtained the Board’s approval of the annexation. At this juncture, Arnhold and Argoudelis granted Ocean Atlantic’s request to extend the initial closing to January 15, 1999.

Throughout the spring and summer of 1998, Ocean Atlantic met with local planning officials to discuss their proposed development involving the sellers’ land. However, by the fall, Ocean Atlantic still had not presented the Board with a petition for annexation of the property. Arnhold and Argoudelis accused Ocean Atlantic of dragging its feet. Ocean Atlantic repeatedly proposed to renegotiate the purchase price of the land as well. The parties negotiated and even litigated their respective rights. They then agreed to a second extension of the contract, which pushed back the initial date of closing to November 30, 1999. The sellers thereafter notified Ocean Atlantic on numerous occasions that they would consider the contract terminated if the closing failed to occur by that date.

As the November 30 deadline loomed, Ocean Atlantic sought to delay the initial closing for a third time. After more negotiation and litigation, Arnhold and Argoudelis and Ocean Atlantic signed the settlement agreement containing the time-essence clause that is the basis of this lawsuit. The new date was scheduled for January 25, 2001. Throughout the negotiations preceding the settlement agreement, the sellers insisted upon a rigid, absolute closing date. Ocean Atlantic had the right to schedule the closing on any of the 91 days between October 26, 2000, and January 25, 2001. Nevertheless, it exercised that right by informing the sellers that it had chosen to close January 24—a mere one day prior to the “drop-dead” date. On January 18, Ocean Atlantic sent the sellers a letter demanding that they move the closing to May 1 and pay an additional \$680,000 in development fees. These fees had never been the subject of any prior negotiations nor were they embodied in any prior agreement between the parties. The sellers rejected Ocean Atlantic’s demand and warned that “if the closing does not occur in accordance with the terms of the settlement agreement, your clients will have no rights whatsoever to the property after January 25, 2001, as clearly spelled out in that same agreement.” At this point, Ocean Atlantic withdrew its proposals and thereafter assured the sellers that it would “fully participate in the scheduled closing [January 24], pursuant to the settlement agreement.” However, when the sellers arrived for the closing on the morning of January 24, they executed each and every document and were ready to close that day, but the closing failed to occur on either January 24 (the date selected by Ocean Atlantic) or January 25 (the absolute, final drop-dead date in the Settlement Agreement) because Ocean Atlantic failed to tender the purchase price of \$7.267 million for deposit into the sellers’ escrow account. Arnhold and Argoudelis’s attorneys notified Ocean Atlantic that the contract was terminated. After receiving this notice, Ocean Atlantic pleaded with Arnhold and Argoudelis to go forward with the sale, but they refused. Ocean Atlantic sued Arnhold and Argoudelis, seeking specific performance of the contract. Arnhold and Argoudelis asked the district court to rule that the contract was null and void. The district court decided in favor of Arnhold and Argoudelis, and Ocean Atlantic appealed.

Coffey, Circuit Judge

“What a difference a day makes . . . twenty-four little hours.”

The only issue before us is whether Ocean Atlantic materially breached the Settlement Agreement by failing to tender \$7.267 million and close on the property by January 25, 2001.

A. The Two-Step Materiality Inquiry

Parties to a contract may make “time is of the essence” a provision of the contract, meaning that performance by one party

at the time or within the time frame specified in the contract is essential to enable him to require counterperformance by the other party. Timely performance often is an absolute requirement even if the contract does not contain the talismanic phrase “time is of the essence”; it is well-settled that the intention of the parties as expressed by the agreement controls, and courts will give effect to this provision when no peculiar circumstances have intervened to prevent or excuse strict compliance. A party that fails to perform its contractual duties is liable for

breach of contract, and a material breach of the terms of the contract will serve to excuse the other party from its duty of counterperformance.

The materiality inquiry focuses on two interrelated issues: (1) the intent of the parties with respect to the disputed provision; and (2) the equitable factors and circumstances surrounding the breach of the provision. When analyzing the materiality of a time-essence clause, the factfinder initially must ask whether performance by a particular date was truly of such significance that the contract would not have been made if the provision had not been included. A negative answer to this initial question means that the clause did not meet the materiality test and that the breach was minor, provided that the party has completed performance within a reasonable period of time. On the other hand, an affirmative answer to the first question does not end the materiality inquiry. Even where the parties clearly intended to regard a specific payment date as crucial, equity will refuse to enforce such a provision when to do so would be unconscionable or would give one party an unfair advantage over the other. As a result, even if the factfinder concludes that timely performance is an essential element of the contract, he or she must also decide whether to award damages and require counterperformance in spite of the breach.

The factfinder must take into account the totality of the circumstances and focus on the inherent justice of the matter. The focus should be on factors such as: whether the breach defeated the bargained-for objective of the parties, whether the nonbreaching party suffered disproportionate prejudice, and whether undue economic inefficiency and waste, or an unreasonable or unfair advantage, would inure to the nonbreaching party. We review the district court's analysis of these factors below.

1. Step one: Intent of the parties

Paragraph 15 of the settlement agreement states:

It is intended by Sellers and Purchasers that January 25, 2001 shall be the absolute final date for closing. . . . If closing has not occurred on or before January 25, 2001, for any reason other than Sellers' default. . . . Purchaser shall have no right to purchase or otherwise encumber the Property or Homestead parcel, the Contract shall be terminated, and Purchaser shall have no rights with respect to the Property or Homestead Parcel.

The magistrate judge found that this clause was "an essential (if not 'the' essential) term of the Settlement Agreement," and we agree. In the case before us, the district court considered the language of the settlement agreement, along with the substance of the parties' negotiations and their course of performance. All three categories of evidence support a finding of materiality. The explicit and unequivocal language of the

contract is an unambiguous expression of intent, referring to January 25, 2001 as an "absolute, final date for closing" that "shall" be enforced without exception. The record reflects that the initial contract contemplated closing in November 1997, and nearly three years had passed without reaching that objective. Thus, by the time the most recent settlement agreement was drafted, the sellers testified that their heart was no longer in selling their property to Ocean Atlantic, and Ocean Atlantic's president similarly testified that he was "sick and tired" of dealing with the sellers.

We are convinced that the settlement agreement reflects a compromise. The sellers agreed to continue their relationship through January 25, 2001 and give Ocean Atlantic one last, final chance to comply with the language of the contract and purchase the farmland. In exchange, Ocean Atlantic agreed that absolutely no further delays would be tolerated. We agree that the clause was a material term of the contract.

2. Step two: Totality of the circumstances

Even when the parties agree to make timely performance an essential element of the contract, the factfinder must also consider whether the breach was material as to justify the other party's subsequent refusal to perform, based upon the totality of the circumstances.

b. The relevant factors

i. Bargained-for objective

When Ocean Atlantic failed to pay the sellers any money and failed to take title to the property by January 25, 2001, it deprived the sellers of the finality for which they had bargained. This breach went to the very heart and substance of the contract. It was material; indeed, it is difficult to imagine anything more material, given nearly three years of delays, three contract extensions, and two federal lawsuits involving the sale of this very property. The sellers displayed the patience of Job by waiting nearly 3½ years to accomplish the sale of farmland that was originally intended to be transferred within six months.

ii. Proportionality of prejudice

The proportionality-of-prejudice element of the materiality test requires the factfinder to compare the relative burdens that each side would suffer if the contract were terminated. In the case before us, the district court found that Ocean Atlantic spent \$1.7 million in fees and expenses related to the annexation, rezoning, planning, preliminary engineering, and marketing of the property between 1997 and 2001. However, a reasonable factfinder, believing that promises conditioned upon timely performance should be kept when made, could have determined that the loss was not enough to warrant granting Ocean Atlantic's motion for specific performance.

iii. Unreasonable, unfair advantage

Two important factors to consider at this juncture are: (1) whether the breaching party used reasonable efforts to perform its contractual obligations; and (2) whether the parties contemplated that the breaching party would forfeit its contractual rights if it committed the type of breach that is at issue. Neither of these factors favors Ocean Atlantic. Although Ocean Atlantic blames its investment partner and its lender of choice for its failure to comply with the drop-dead clause, it appears to us that the problem more likely was caused by Ocean Atlantic waiting until the eleventh hour to execute and revise all the requisite documents. When parties wait until the last minute to comply with a deadline, they are playing with fire.

Conclusion

“Never put off until tomorrow what you can do today.”

Although contract law allows parties to choose the reasonable extent of their duties and obligations towards one another, neither law nor equity guarantees that a party may specifically enforce a contract if it fails to perform its material obligations thereunder. A reasonable factfinder concluded that Ocean Atlantic treated the material, bargained-for deadlines in this agreement as if they were trivial details that could be flouted with impunity. As a result, Ocean Atlantic has lost any and all rights to purchase the sellers’ farmland.

Affirmed in favor of Arnhold and Argoudelis.

CONCEPT REVIEW**Time for Performance**

| Contract Language | Time for Performance | Consequences of Late Performance |
|--|---|---|
| “Time is of the essence” or similar language | The time stated in the contract | Material breach |
| Specific time is stated in or implied by the contract and later performance would have little or no value | The time stated in or implied by the contract | Material breach |
| Specific time is stated in or implied by the contract, but the time for performance is a relatively unimportant part of the contract | The time stated in or implied by the contract | Not a material breach unless performance is unreasonably late |
| No time for performance is stated in or implied by the contract | Within a reasonable time | Not material breach unless performance is unreasonably late |

Anticipatory Repudiation One type of breach of contract occurs when the promisor indicates before the time for his performance that he is unwilling or unable to carry out the contract. This is called **anticipatory repudiation** or **anticipatory breach**. Anticipatory breach generally constitutes a material breach of contract that discharges the promisee from all further obligation under the contract.

In determining what constitutes anticipatory repudiation, courts look for some unequivocal statement or voluntary act that clearly indicates that the promisor cannot or will not perform his duties under the contract. This may

take the form of an express statement by the promisor. The promisor’s intent not to perform could also be implied from actions of the promisor such as selling to a third party the property that the promisor was obligated to sell to the promisee. For example, if Ross, who is obligated to convey real estate to Davis, conveys the property to some third person instead, Ross has repudiated the contract.

When anticipatory repudiation occurs, the promisee is faced with several choices. For example, Marsh and Davis enter a contract in which Davis agrees to deliver a quantity of bricks to Marsh on September 1, 2007, and

Marsh agrees to pay Davis a sum of money in two installments. The agreement specifies that Marsh will pay 50 percent of the purchase price on July 15, 2007, and 50 percent of the purchase price within 30 days after delivery. On July 1, 2007, Davis writes Marsh and unequivocally states that he will not deliver the bricks. Must Marsh go ahead and send the payment that is due on July 15? Must he wait until September 1 to bring suit for total breach of contract? The answer to both questions is no.

When anticipatory repudiation occurs, the nonbreaching party is justified in withholding his own performance and suing for damages right away, without waiting for the time for performance to arrive.³ If he can show that he was ready, willing, and able to perform his part of the contract, he can recover damages for total breach of the contract. The nonbreaching party is not obligated to do this, however. If he chooses, he may wait until the time for performance in case the other party changes his mind and decides to perform.

Recovery by a Party Who Has Committed Material Breach

A party who has materially breached the contract (that is, has not substantially performed) does not have the right to recover the contract price. If a promisor who has given some performance to the promisee cannot recover under the contract, however, the promisor will face forfeiture and the promisee will have obtained an unearned gain. There are two possible avenues for a party who has committed material breach to obtain some compensation for the performance he has conferred on the nonbreaching party.

³Uniform Commercial Code rules regarding anticipatory repudiation in contracts for the sale of goods are discussed in Chapter 21.

1. *Quasi-contract.* A party who has materially breached a contract might recover the reasonable value of any benefits he has conferred on the promisee by bringing an action under quasi-contract.⁴ This would enable him to obtain compensation for the value of any performance he has given that has benefited the nonbreaching party. Some courts take the position that a person in material breach should not be able to recover for benefits he has conferred, however.

2. *Partial performance of a divisible contract.* Some contracts are divisible; that is, each party's performance can be divided in two or more parts and each part is exchanged for some corresponding consideration from the other party. For example, if Johnson agrees to mow Peterson's lawn for \$20 and clean Peterson's gutters for \$50, the contract is divisible. When a promisor performs one part of the contract but materially breaches another part, he can recover at the contract price for the part that he did perform. For example, if Johnson breached his duty to clean the gutters but fully performed his obligation to mow the lawn, he could recover at the contract price for the lawn-mowing part of the contract.

Excuses for Nonperformance

Although nonperformance of a duty that has become due will ordinarily constitute a breach of contract, there are some situations in which nonperformance is excused because of factors that arise after the formation of the contract. When this occurs, the person whose performance is made impossible or impracticable by these

⁴Quasi-contract is discussed in Chapter 9. It involves the use of the remedy of restitution, which is discussed later in this chapter.

Ethics in Action

Marsh, a contractor, enters into a contract with Needmore Tree Farm to build a structure on Needmore's property that Needmore plans to use as a sales office for selling Christmas trees to the public. The contract provides that Needmore will pay Marsh \$110,000 for the structure, with 50 percent of the payment in advance and 50 percent upon completion. It also provides that Marsh will complete the construction and have the structure ready for occupation by December 1. With regard to this last provision, the contract states, "time is of the

essence." The December 1 date is significant to Needmore because it wanted to be sure to have the sales office ready for Christmas season. On December 1, the construction has progressed substantially, but the structure is not going to be ready for occupation for several more weeks. Needmore fires Marsh and refuses to pay him the remaining 50 percent due under the contract. Assuming that Marsh has materially breached the contract, does Needmore have an ethical duty to pay Marsh for the benefit that Marsh has conferred on it?

factors is discharged from further obligation under the contract. The following discussion concerns the most common grounds for excuse of nonperformance.

Impossibility When performance of a contractual duty becomes impossible after the formation of the contract, the duty will be discharged on grounds of **impossibility**. This does not mean that a person can be discharged merely because he has contracted to do something that he is simply unable to do or that causes him hardship or difficulty. Impossibility in the legal sense of the word means “it cannot be done by anyone” rather than “I cannot do it.” Thus, promisors who find that they have agreed to perform duties that are beyond their capabilities or that turn out to be unprofitable or burdensome are generally not

excused from performance of their duties. This principle is illustrated in the following *East Capitol* case. Impossibility will provide an excuse for nonperformance, however, when some unexpected event arises after the formation of the contract and renders performance objectively impossible. The event that causes the impossibility need not have been entirely unforeseeable. Normally, however, the event will be one that the parties would not have reasonably thought of as a real possibility that would affect performance.

There are a variety of situations in which a person’s duty to perform may be discharged on grounds of impossibility. The three most common situations involve illness or death of the promisor, supervening illegality, and destruction of the subject matter of the contract.

East Capitol View Community Development Corporation v. Robinson 941 A.2d 1036 (D.C. Ct. App. 2008)

East Capitol hired Denean Robinson in a written employment contract for a one-year term. Before the end of that term, however, East Capitol informed her that her employment would be terminated early for lack of funding. Although the employment contract stated that Robinson’s “continued employment with [East Capitol] will be contingent on successfully achieving all performance goals and outcomes,” there was no language stating that a lack of funding could excuse East Capitol from prematurely terminating Robinson’s contract. Robinson filed suit against East Capitol for breach of contract. The trial judge declined to give the jury an instruction about the impossibility of performance defense. The jury returned a verdict in favor of Robinson, and East Capitol appealed.

Washington, Chief Judge

East Capitol contends that the trial court erred in failing to instruct the jury on the impossibility of performance defense. In essence, East Capitol argues that it was entitled to an impossibility of performance instruction “because the central issue in the case was whether East Capitol had an excuse for terminating the contract with Robinson because its [g]rant funding had been cancelled and it was no longer able to pay her salary.” A jury instruction is not warranted without some evidence to support it. In order to receive an impossibility of performance instruction, East Capitol must demonstrate that there was evidence that could at least support such a defense.

A party’s obligation to perform under a contract may be excused if performance is rendered impossible. To establish impossibility or commercial impracticability, a party must show (1) the unexpected occurrence of an intervening act; (2) the risk of the unexpected occurrence was not allocated by agreement or custom; and (3) the occurrence made performance impractical. The doctrine of impossibility relieves nonperformance only in extreme circumstances. Moreover, courts will generally only excuse nonperformance where performance is

objectively impossible—that is, the contract is incapable of performance by anyone—rather than instances where the party subjectively claims the inability to perform. The *Restatement* recognizes the objective/subjective distinction, concluding that while a party’s duty to perform is discharged if it is made objectively impracticable, “if the performance remains practicable and it is merely beyond the party’s capacity to render it, he is ordinarily not discharged.” *Restatement (Second) of Contracts* § 261 cmt. e (1981).

Under this analysis, a party’s alleged financial inability to perform a contract that it voluntarily entered would rarely, if ever, excuse nonperformance; though a party may prove that it can no longer afford performance, it will be hard-pressed to prove that nonperformance exist[s] in the nature of the thing to be done. Although this court has not directly ruled on whether financial inability to meet a contractual obligation excuses nonperformance, most, if not all, other jurisdictions that have addressed this issue agree that it does not. Indeed, even insolvency is unlikely to excuse performance. Nor does the promisor’s reliance on some third party for the ability to perform convert financial inability to perform into an objective impossibility.

“[T]he rationale is that a party generally assumes the risk of his own inability to perform his duty. Even if a party contracts to render a performance that depends on some act by a third party, he is not ordinarily discharged because of a failure by that party because this is also a risk that is commonly understood to be on the obligor.” *Restatement (Second) of Contracts* § 261 cmt. e. For example, in *International Bhd. of Firemen & Oilers v. Board of Education*, the Pennsylvania Supreme Court rejected a school district’s claimed inability to comply with a new bargaining agreement to pay increased salaries and benefits to its employees because the Philadelphia City Council failed to provide it with sufficient funding. Thus, the anticipation of funding from one source does not alter the party’s duty to perform.

Of course, parties may contractually reallocate risk to the other party. However, in this case, there is no evidence that East Capitol assigned the risk of its financial instability to

[Robinson]. Though East Capitol maintained that the revocation of funding deprived the corporation of sufficient assets to continue paying its employees, it failed to include such a possibility as a condition precedent in the employment agreement. Indeed, while East Capitol specifically included language warning Robinson that her continued employment was contingent upon successful performance, it failed to address funding in any way. The agreement does not mention the source of the salary, let alone warn Robinson that her continued employment was contingent upon continued grant funding. Robinson’s employment contract was objectively capable of performance, and East Capitol did nothing to reallocate the risk of its own inability to pay. As East Capitol was not entitled to a defense of impossibility, the trial court’s decision to withhold the impossibility defense jury instruction was not error.

Affirmed in favor of Robinson.

Illness or Death of Promisor Incapacitating illness or death of the promisor excuses nonperformance when the promisor has contracted to perform personal services. For example, if Pauling, a college professor who has a contract with State University to teach for an academic year, dies before the completion of the contract, her estate will not be liable for breach of contract. The promisor’s death or illness does not, however, excuse the nonperformance of duties that can be delegated to another, such as the duty to deliver goods, pay money, or convey real estate. For example, if Odell had contracted to convey real estate to Ruskin and died before the closing date, Ruskin could enforce the contract against Odell’s estate.

Supervening Illegality If a statute or governmental regulation enacted after the creation of a contract makes performance of a party’s duties illegal, the promisor is excused from performing. Statutes or regulations that merely make performance more difficult or less profitable do not, however, excuse nonperformance.

Destruction of the Subject Matter of the Contract If something that is essential to the promisor’s performance is destroyed after the formation of the contract through no fault of the promisor, the promisor is excused from performing. For example, Woolridge contracts to sell his car to Rivkin. If an explosion destroys the car after the contract has been formed but before Woolridge has made delivery, Woolridge’s nonperformance will be excused.

The destruction of nonessential items that the promisor intended to use in performing does not excuse nonperformance if substitutes are available, even though securing them makes performance more difficult or less profitable. Suppose that Ace Construction Company had planned to use a particular piece of machinery in fulfilling a contract to build a building for Worldwide Widgets Company. If the piece of machinery is destroyed but substitutes are available, destruction of the machinery before the contract is performed would *not* give Ace an excuse for failing to perform.

Commercial Impracticability Section 2–615 of the Uniform Commercial Code has extended the scope of the common law doctrine of impossibility to cases in which unforeseen developments make performance by the promisor highly impracticable, unreasonably expensive, or of little value to the promisee. Rather than using a standard of impossibility, then, the Code uses the more relaxed standard of **impracticability**. Despite the less stringent standard applied, cases actually excusing nonperformance on grounds of impracticability are relatively rare. To be successful in claiming excuse based on impracticability, a promisor must be able to establish that the event that makes performance impracticable occurred without his fault and that the contract was made with the basic assumption that this event would not occur. This basically means that the event was beyond the scope of the risks that the parties contemplated at the time of contracting and that the promisor did not

expressly or impliedly assume the risk that the event would occur.

Case law and official comments to UCC section 2–615 indicate that neither increased cost nor collapse of a market for particular goods is sufficient to excuse nonperformance, because those are the types of business risks that every promisor assumes. However, drastic price increases or severe shortages of goods resulting from unforeseen circumstances such as wars and crop failures can give rise to impracticability.

If the event causing impracticability affects only a part of the seller's capacity to perform, the seller must allocate production and deliveries among customers in a "fair and reasonable" manner and must notify them of any delay or any limited allocation of the goods. You can read more about commercial impracticability in Chapter 21, Performance of Sales Contracts.

Other Grounds for Discharge

Earlier in this chapter, you learned about several situations in which a party's duty to perform could be discharged even though that party had not himself performed. These include the nonoccurrence of a condition precedent or concurrent condition, the occurrence of a condition subsequent, material breach by the other party, and excuse from performance by impossibility, impracticability, or frustration. The following discussion deals with additional ways in which a discharge can occur.

Discharge by Mutual Agreement Just as contracts are created by mutual agreement, they can also be discharged by *mutual agreement*. An agreement to discharge a contract must be supported by consideration to be enforceable.

Discharge by Accord and Satisfaction

An **accord** is an agreement whereby a promisee who has an existing claim agrees with the promisor that he will accept some performance different from that which was originally agreed on. When the promisor performs the accord, that is called a **satisfaction**.⁵ When an accord and satisfaction occurs, the parties are discharged. For example, Root contracts with May to build a garage on May's property for \$30,000. After Root has performed his part of the bargain, the parties then agree that instead of paying money, May will transfer a one-year-old Porsche to Root instead. When this is done, both parties are discharged.

⁵Accord and satisfaction is also discussed in Chapter 12.

Discharge by Waiver A party to a contract may voluntarily relinquish any right he has under a contract, including the right to receive return performance. Such a relinquishment of rights is known as a **waiver**. If one party tenders an incomplete or defective performance and the other party accepts that performance without objection, knowing that the defects will not be remedied, the party to whom performance was due will have discharged the other party from his duty of performance. For example, a real estate lease requires Long, the tenant, to pay a \$5 late charge for late payments of rent. Long pays his rent late each month for five months, but the landlord accepts it without objection and without assessing the late charge. In this situation, the landlord has probably waived his right to collect the late charge.

To avoid waiving rights, a person who has received defective performance should give the other party prompt notice that she expects complete performance and will seek damages if the defects are not corrected.

Discharge by Alteration If the contract is represented by a *written* instrument, and one of the parties intentionally makes a material alteration in the instrument without the other's consent, the alteration acts as a discharge of the other party. If the other party consents to the alteration or does not object to it when he learns of it, he is not discharged. Alteration by a third party without the knowledge or consent of the contracting parties does not affect the parties' rights.

Discharge by Statute of Limitations

Courts have long refused to grant a remedy to a person who delays bringing a lawsuit for an unreasonable time. All of the states have enacted statutes known as **statutes of limitation**, which specify the period of time in which a person can bring a lawsuit.

The time period for bringing a contract action varies from state to state, and many states prescribe time periods for cases concerning oral contracts that are different from those for cases concerning written contracts. Section 2–725 of the Uniform Commercial Code provides for a four-year statute of limitations for contracts involving the sale of goods.

The statutory period ordinarily begins to run from the date of the breach. It may be delayed if the party who has the right to sue is under some incapacity at that time (such as minority or insanity) or is beyond the jurisdiction of the state. A person who has breached a contractual duty is discharged from liability for breach if no lawsuit is brought before the statutory period elapses.

Discharge by Decree of Bankruptcy

The contractual obligations of a debtor are generally discharged by a decree of bankruptcy. Bankruptcy is discussed in Chapter 30.

Remedies for Breach of Contract

Our discussion of the performance stage of contracts so far has focused on the circumstances under which a party has the duty to perform or is excused from performing. In situations in which a person is injured by a breach of contract and is unable to obtain compensation by a settlement out of court, a further important issue remains: What remedy will a court fashion to compensate for breach of contract?

Contract law seeks to encourage people to rely on the promises made to them by others. Contract remedies focus on the economic loss caused by breach of contract, not on the moral obligation to perform a promise. The objective of granting a remedy in a case of breach of contract is simply to compensate the injured party.

Types of Contract Remedies There are a variety of ways in which this can be done. The basic categories of contract remedies include:

1. Legal remedies (money damages).
2. Equitable remedies.
3. Restitution.

The usual remedy is an award of money damages that will compensate the injured party for his losses. This is called a **legal remedy** or **remedy at law**, because the imposition of money damages in our legal system originated in courts of law. Less frequently used but still important are **equitable remedies** such as specific performance. Equitable remedies are those remedies that had their

origins in courts of equity rather than in courts of law.⁶ Today, they are available at the discretion of the judge. A final possible remedy is **restitution**, which requires the defendant to pay the value of the benefits that the plaintiff has conferred on him.

Interests Protected by Contract Remedies

Remedies for breach of contract protect one or more of the following interests that a promisee may have:⁷

1. Expectation interest. A promisee's **expectation interest** is his interest in obtaining the objective or opportunity for gain that he bargained for and "expected." Courts attempt to protect this interest by formulating a remedy that will place the promisee in the position he would have been in if the contract had been performed as promised.

2. Reliance interest. A promisee's **reliance interest** is his interest in being compensated for losses that he has suffered by changing his position in reliance on the other party's promise. In some cases, such as when a promisee is unable to prove his expectation interest with reasonable certainty, the promisee may seek a remedy to compensate for the loss suffered as a result of relying on the promisor's promise rather than for the expectation of profit.

3. Restitution interest. A **restitution interest** is a party's interest in recovering the amount by which he has enriched or benefited the other. Both the reliance and restitution interests involve promisees who have changed their position. The difference between the two is that the reliance interest involves a loss to the promisee that does not benefit the promisor, whereas the restitution interest involves a loss to the promisee that does constitute an unjust enrichment to the promisor. A remedy based on restitution enables a party who has performed or partially performed her contract and has benefited the other party to obtain compensation for the value of the benefits that she has conferred.

Legal Remedies (Damages)

Limitations on Recovery of Damages in Contract Cases An injured party's ability to recover damages in a contract action is limited by three principles:

1. A party can recover damages only for those losses that he can prove with reasonable certainty. Losses that are purely speculative are not recoverable. Thus, if Jones

and 'Lectric Law Library's *Nonperformance and Breach of Contract*,

www.lectlaw.com/files/bul08.htm.

⁶The nature of equitable remedies is also discussed in Chapter 1.

⁷*Restatement (Second) of Contracts* § 344.

Publishing Company breaches a contract to publish Powell's memoirs, Powell may not be able to recover damages for lost royalties (her expectation interest), since she may be unable to establish, beyond speculation, how much money she would have earned in royalties if the book had been published. (Note, however, that Powell's reliance interest might be protected here; she could be allowed to recover provable losses incurred in reliance on the contract.)

2. A breaching party is responsible for paying only those losses that were foreseeable to him at the time of contracting. A loss is foreseeable if it would ordinarily be expected to result from a breach or if the breaching party had reason to know of particular circumstances that would make the loss likely. For example, if Prince Manufacturing Company renders late performance in a contract to deliver parts to Cheatum Motors without knowing that Cheatum is shut down waiting for the parts, Prince will not have to pay the business losses that result from Cheatum's having to close its operation.

3. Plaintiffs injured by a breach of contract have the duty to mitigate (avoid or minimize) damages. A party cannot recover for losses that he could have avoided without undue risk, burden, or humiliation. For example, an employee who has been wrongfully fired would be entitled to damages equal to his wages for the remainder of the employment period. The employee, however, has the duty to minimize the damages by making reasonable efforts to seek a similar job elsewhere.

Compensatory Damages Subject to the limitations discussed above, a person who has been injured by a breach of contract is entitled to recover **compensatory damages**. In calculating the compensatory remedy, a court will attempt to protect the expectation interest of the injured party by giving him the "benefit of his bargain" (placing him in the position he would have been in *had the contract been performed as promised*). To do this, the court must compensate the injured person for the provable losses he has suffered as well as for the provable gains that he has been prevented from realizing by the breach of contract. Normally, compensatory damages include one or more of three possible items: loss in value, any allowable consequential damages, and any allowable incidental damages.

1. Loss in value. The starting point in calculating compensatory damages is to determine the **loss in value** of the performance that the plaintiff had the right to expect. This is a way of measuring the expectation interest. The

calculation of the loss in value experienced by an injured party differs according to the sort of contract involved and the circumstances of the breach. In contracts involving nonperformance of the sale of real estate, for example, courts normally measure loss in value by the difference between the contract price and the market price of the property. Thus, if Willis repudiates a contract with Renfrew whereby Renfrew was to purchase land worth \$20,000 from Willis for \$10,000, Renfrew's loss in value was \$10,000. Where a seller has failed to perform a contract for the sale of goods, courts may measure loss in value by the difference between the contract price and the price that the buyer had to pay to procure substitute goods.⁸ In cases in which a party breaches by rendering defective performance—say, by breaching a warranty in the sale of goods—the loss in value would be measured by the difference between the value of the goods if they had been in the condition warranted by the seller and the value of the goods in their defective condition.⁹ You will see an example of this concept in the *Furst* case later in this chapter.

2. Consequential damages. Consequential damages (also called **special damages**) compensate for losses that occur as a consequence of the breach of contract. Consequential losses occur because of some special or unusual circumstances of the particular contractual relationship of the parties. For example, Apex Trucking Company buys a computer system from ABC Computers. The system fails to operate properly, and Apex is forced to pay its employees to perform the tasks manually, spending \$10,000 in overtime pay. In this situation, Apex might seek to recover the \$10,000 in overtime pay in addition to the loss of value that it has experienced.

Lost profits flowing from a breach of contract can be recovered as consequential damages if they are foreseeable and can be proven with reasonable certainty. It is important to remember, however, that the recovery of consequential damages is subject to the limitations on damage recovery discussed earlier.

3. Incidental damages. Incidental damages compensate for reasonable costs that the injured party incurs after the breach in an effort to avoid further loss. For example, if Smith Construction Company breaches an employment contract with Brice, Brice could recover as incidental damages those reasonable expenses he must

⁸Remedies under Article 2 of the Uniform Commercial Code are discussed in detail in Chapter 22.

⁹See Chapter 20 for further discussion of the damages for breach of warranty in the sale of goods.

incur in attempting to procure substitute employment, such as long-distance telephone tolls or the cost of printing new résumés.

Alternative Measures of Damages The foregoing discussion has focused on the most common formulation of damage remedies in contracts cases. The normal measure of compensatory damages is not appropriate in every case, however. When it is not appropriate, a court may use an alternative measure of damages. For example, where a party has suffered losses by performing or preparing to perform, he might seek damages based on his *reliance interest* instead of his expectation interest. In such a case, he would be compensated for the provable losses he suffered by relying on the other party's promise. This measure of damages is often used in cases in which a promise is enforceable under promissory estoppel.¹⁰

Nominal Damages **Nominal damages** are very small damage awards that are given when a technical breach of contract has occurred without causing any actual or provable economic loss. The sums awarded as nominal damages typically vary from 2 cents to a dollar.

Liquidated Damages The parties to a contract may expressly provide in their contract that a specific sum shall

be recoverable if the contract is breached. Such provisions are called **liquidated damages** provisions. For example, Murchison rents space in a shopping mall in which she plans to operate a retail clothing store. She must make improvements in the space before opening the store, and it is very important to her to have the store opened for the Christmas shopping season. She hires Ace Construction Company to construct the improvements. The parties agree to include in the contract a liquidated damages provision stating that, if Ace is late in completing the construction, Murchison will be able to recover a specified sum for each day of delay. Such a provision is highly desirable from Murchison's point of view because, without a liquidated damages provision, she would have a difficult time in establishing the precise losses that would result from delay. Courts scrutinize these agreed-on damages carefully, however.

If the amount specified in a liquidated damages provision is reasonable and if the nature of the contract is such that actual damages would be difficult to determine, a court will enforce the provision. When liquidated damages provisions are enforced, the amount of damages agreed on will be the injured party's exclusive damage remedy. If the amount specified is unreasonably great in relation to the probable loss or injury, however, or if the amount of damages could be readily determined in the event of breach, the courts will then declare the provision to be a penalty and will refuse to enforce it.

¹⁰Promissory estoppel is discussed in Chapters 9 and 12.

Furst v. Einstein Moomjy, Inc.

860 A.2d 435 (N.J. Sup. Ct. 2004)

Einstein Moomjy, Inc. is a large retail distributor of carpets with stores located in Paramus, North Plainfield, Whippany, and Manhattan. In August 1999, at an annual clearance sale held by Einstein Moomjy, Henry Furst purchased five remnant carpets for his home for \$10,139.68. One of these carpets was the "Mystery Ivory" carpet. Attached to the Mystery Ivory carpet at the time of its sale was a tag containing the following information:

The Back Yd.
Einstein Moomjy, The Carpet Department Store
REMNANT
REDUCED FOR CLEARANCE
SIZE: n1 11'4" in × 31'
REGULAR PRICE \$5,775-
SALE PRICE
\$1,499-
QUALITY: Mystery
COLOR: Ivory
Fibre: Wool
Sale
1,199

When the *Mystery Ivory* carpet was delivered to his home, Furst noticed that the carpet was damaged and smaller than the size indicated on the sales invoice. He complained about the condition and size of the carpet to Einstein Moomjy, who offered either a refund of the sale price of \$1,199 or a similar carpet at an additional price. Einstein Moomjy claimed that the *Mystery Ivory* carpet was a high quality “Ireloom” white wool carpet that had been tagged mistakenly with the wrong sale price. Furst demanded that Einstein Moomjy comply with the warranty on the back of the sales invoice. The invoice promised that if the carpets purchased were not delivered by the scheduled delivery date, Furst had the choice of canceling the “order with a prompt full refund” or “accepting delivery at a specific later date.” Furst insisted on delivery of an undamaged Ireloom carpet at the size he ordered and at the price he paid.

When Einstein Moomjy refused to replace the Ireloom carpet at that price, Furst filed a multicount lawsuit against Einstein Moomjy. The trial court entered summary judgment on liability in favor of Furst, finding that Einstein Moomjy had violated the Consumer Protection Act. Einstein Moomjy does not contest that ruling. The court also determined that Furst’s “ascertainable loss” was the fair market or replacement value of the carpet, but it would not permit him to introduce evidence of the price tag to prove replacement value. The trial court determined that replacement value had to be proved through expert testimony and excluded the use of the unmarked-down regular price on the sales tag as evidence of the market value of the Ireloom carpet. The court also barred testimony from Furst’s interior decorator regarding her investigation of market prices and testimony from defendant Moomjy regarding the market value of the Ireloom carpet. Because Furst could not prove replacement value, the court awarded him the purchase price. Under the Consumer Protection Act, an injured consumer’s ascertainable losses are trebled, so the trial court awarded Furst the trebled purchase price of \$1,199 and attorney fees, a remedy permitted by the act. Both parties appealed. The Appellate Division agreed that replacement value was the proper measure of ascertainable loss and the sales tag was sufficient evidence to create a triable issue of fact. Einstein Moomjy appealed.

Albin, Judge

Our analysis is informed by basic principles of contract law. In an ordinary breach-of-contract case, the function of damages is simply to make the injured party whole. Under the Uniform Commercial Code, the remedy for a buyer who has accepted defective goods is the difference between the “value of the goods accepted and the value they would have had if they had been as warranted.” Similarly, in a breach-of-contract case, the innocent party must be given the “benefit of his bargain” and placed in “as good a position as he would have been in had the contract been performed.” Indeed, under the *Restatement*, the innocent party has a right to damages “based on his expectation interest as measured by . . . the loss in the value to him” caused by the breaching party’s nonperformance. *Restatement (Second) of Contracts* at § 347. If we apply those fundamental principles of contract law, we are led inexorably to the conclusion that replacement cost is the proper measure of damages sustained by the consumer in this case. In light of the Legislature’s clear intent, it would be incongruous to provide consumers with a form of damages less than what is available in an ordinary breach-of-contract case. The “expectation interest” of the consumer who purchases merchandise at a discount is the benefit of the bargain. We conclude that a consumer who suffers an ascertainable loss is entitled to the benefit of the bargain in this case, the replacement value of the carpet trebled under the Act.

We next address whether Furst proffered sufficient evidence of the replacement value of the carpet to warrant a damages trial. The sales tag advertised a carpet “reduced for clearance” and contained the following information: the quality, color, and fiber of the carpet; its size; and its regular price (\$5,775), its pre-marked-down price (\$1,499), and its final marked-down price (\$1,199). The description of the damaged carpet as *Mystery Ivory Wool* is relevant for the purpose of identifying the item for replacement value. The final marked-down price, the price paid for the carpet, is relevant as one possible measure of damages. We also find that the regular price on the sales sticker is evidence that tends to establish replacement value. In deciding that the regular price on the Ireloom carpet sales sticker is evidence of replacement value, we look to the reality of the marketplace and the role that advertising plays in inducing consumers to purchase products. The strong remedial policy undergirding the Consumer Fraud Act leads us to conclude that the regular price advertised on the sales sticker is a relevant benchmark from which to impute replacement value. Accordingly, there will be a rebuttable presumption that the regular price on the sales sticker is the replacement value of the carpet.

Reversed and remanded in favor of Furst.

Punitive Damages **Punitive damages** are damages awarded in addition to the compensatory remedy that are designed to punish a defendant for particularly reprehensible behavior and to deter the defendant and others from committing similar behavior in the future. The traditional rule is that punitive damages are not recoverable in contracts cases unless a specific statutory provision (such as some consumer protection statutes) allows them or the defendant has committed *fraud* or some other independent tort. A few states will permit the use of punitive damages in contracts cases in which the defendant's conduct, though not technically a tort, was malicious, oppressive, or tortious in nature.

Punitive damages have also been awarded in many of the cases involving breach of the implied covenant of good faith. In such cases, courts usually circumvent the traditional rule against awarding punitive damages in contracts cases by holding that breach of the duty of good faith is an independent tort. The availability of punitive damages in such cases operates to deter a contracting party from deliberately disregarding the other party's rights. Insurance companies have been the most frequent target for punitive damages awards in bad faith cases, but employers and banks have also been subjected to punitive damages verdicts.

Equitable Remedies In exceptional cases in which money damages alone are not adequate to fully compensate for a party's injuries, a court may grant an **equitable remedy** either alone or in combination with a legal remedy. Equitable relief is subject to several limitations, however, and will be granted only when justice is served by doing so. The primary equitable remedies for breach of contract are specific performance and injunction.¹¹

Specific Performance **Specific performance** is an equitable remedy whereby the court orders the breaching party to perform his contractual duties as promised. For example, if Barnes breached a contract to sell a tract of land to Metzger and a court granted specific performance of the contract, the court would require Barnes to deed the land to Metzger. (Metzger, of course, must pay the purchase price.) This remedy can be advantageous to the injured party because he is not faced with the complexities of proving damages, he does not have to worry

about whether he can actually collect the damages, and he gets exactly what he bargained for. However, the availability of this remedy is subject to the limitations discussed below.

The Availability of Specific Performance Specific performance, like other equitable remedies, is available only when the injured party has no adequate remedy at law—in other words, when money damages do not adequately compensate the injured party. This generally requires a showing that the subject of the contract is unique or at least that no substitutes are available. Even if this requirement is met, a court will withhold specific performance if the injured party has acted in bad faith, if he unreasonably delayed in asserting his rights, or if specific performance would require an excessive amount of supervision by the court.

Contracts for the sale of real estate are the most common subjects of specific performance decrees because every tract of real estate is considered to be unique. Specific performance is rarely granted for breach of a contract for the sale of goods because the injured party can usually procure substitute goods. However, there are situations involving sales of goods contracts in which specific performance is given. These cases involve goods that are unique or goods for which no substitute can be found. Examples include antiques, heirlooms, works of art, and objects of purely sentimental value.¹² Specific performance is not available for the breach of a promise to perform a personal service (such as a contract for employment, artistic performance, or consulting services). A decree requiring a person to specifically perform a personal-services contract would probably be ineffective in giving the injured party what he bargained for. It would also require a great deal of supervision by the court. In addition, an application of specific performance in such cases would amount to a form of involuntary servitude.

Injunction Injunction is an equitable remedy that is employed in many different contexts and is sometimes used as a remedy for breach of contract. An **injunction** is a court order requiring a person to do something (**mandatory injunction**) or ordering a person to refrain from doing something (**negative injunction**). Unlike legal remedies that apply only when the breach has already occurred, the equitable remedy of injunction can be invoked when a breach has merely been *threatened*.

¹¹Another equitable remedy, *reformation*, allows a court to reform or "rewrite" a written contract when the parties have made an error in expressing their agreement. Reformation is discussed, along with the doctrine of mistake, in Chapter 13.

¹²Specific performance under § 2-716(1) of the UCC is discussed in Chapter 22.

Injunctions are available only when the breach or threatened breach is likely to cause *irreparable injury*.

In the contract context, specific performance is a form of mandatory injunction. Negative injunctions are appropriately used in several situations, such as contract cases in which a party whose duty under the contract is forbearance threatens to breach the contract. For example, Norris sells his restaurant in Gas City, Indiana, to Ford. A term of the contract of sale provides that Norris agrees not to own, operate, or be employed in any restaurant within 30 miles of Gas City for a period of two years after the sale.¹³ If Norris threatens to open a new restaurant in Gas City several months after the sale is consummated, a court could *enjoin* Norris from opening the new restaurant.

Restitution Restitution is a remedy that can be obtained either at law or in equity. Restitution applies when one party's performance or reliance has conferred a benefit on the other. A party's restitution interest is protected by compensating him for the value of benefits he has conferred on the other person.¹⁴ This can be done through

¹³Ancillary covenants not to compete, or noncompetition agreements, are discussed in detail in Chapter 15.

¹⁴Quasi-contract is discussed in detail in Chapter 9.

specific restitution, in which the defendant is required to return the exact property conferred on him by the plaintiff, or **substitutionary restitution**, in which a court awards the plaintiff a sum of money that reflects the amount by which he benefited the defendant. In an action for damages based on quasi-contract, substitutionary restitution would be the remedy.

Restitution can be used in a number of circumstances. Sometimes, parties injured by breach of contract seek restitution as an alternative remedy instead of damages that focus on their expectation interest. In other situations, a *breaching party* who has partially performed seeks restitution for the value of benefits he conferred in excess of the losses he caused. In addition, restitution often applies in cases in which a person rescinds a contract on the grounds of lack of capacity, misrepresentation, fraud, duress, undue influence, or mistake. Upon rescission, each party who has been benefited by the other's performance must compensate the other for the value of the benefit conferred. Another application of restitution occurs when a party to a contract that violates the statute of frauds confers a benefit on the other party. For example, Boyer gives Blake a \$10,000 down payment on an oral contract for the sale of a farm. Although the contract is unenforceable (that is, Boyer could not get compensation for his expectation interest), the court would give Boyer restitution of his down payment.

Problems and Problem Cases

1. Smith hired attorney Lewis to represent her as a plaintiff in a personal injury suit. They signed a contract of employment that provided that attorney fees would be paid based upon a "contingency fee of forty percent (40%) of final recovery whether by trial or by settlement. . . ." Lewis pursued the litigation on Smith's behalf for almost two years. Smith spoke little English, so Lewis communicated with her using interpreters. Lewis arranged for a settlement, and he claims that Lee, an interpreter for Smith, expressed Smith's authorization of the settlement. Later, however, another interpreter called to ask about the status of the case and indicated that Smith had not authorized the settlement. Lewis then rescinded the settlement and successfully prevented the other party from enforcing it. However, Smith fired Lewis and hired another attorney to pursue the case further. Lewis filed an attorney's lien and sued Smith for \$5,000, which represented 40 percent of the rejected \$12,500 settlement that he negotiated, plus the \$883.44 in expenses that he had paid. Does the contract of employment give Lewis the right to a 40 percent fee?
2. Optus hired Silvestri under a two-year employment contract that provided that Optus had the right to terminate him for failure to perform his duties to the satisfaction of the company. Silvestri had been hired to help resolve difficulties with technical support. The company continued to receive complaints from customers and resellers about technical support, however, and ultimately Optus fired Silvestri. Silvestri brought a breach of contract action, alleging that there was no objective reason for lack of satisfaction with his performance. Will Silvestri prevail?
3. Light contracted to build a house for the Mullers. After the job was completed, the Mullers refused to pay Light the balance they owed him under the

contract, claiming that he had done some of the work in an unworkmanlike manner. When Light sued for the money, the Mullers counterclaimed for \$5,700 damages for delay under a liquidated damages clause in the contract. The clause provided that Light must pay \$100 per day for every day of delay in completion of the construction. The evidence indicated that the rental value of the home was between \$400 and \$415 per month. Should the liquidated damages provision be enforced?

4. In 1992, White and J.M. Brown Amusement Co. entered into a contract giving Brown exclusive rights to place “certain coin-operated amusement machines” in 13 of White’s stores, all in Oconee and Anderson counties in South Carolina. The contract was for a term of 15 years. Under the contract, White agreed “not to allow other machines on the premises without the express written consent of [Brown].” Brown placed the machines in White’s stores as the contract provided. In 1993, the state legislature enacted a local option law as part of the Video Game Machines Act, permitting counties to hold an individual referendum to determine whether cash payouts for video gaming should remain legal. As a result of local referenda held in November 1994, 12 counties, including Oconee and Anderson, voted to ban cash payouts. The South Carolina Department of Revenue revoked the licenses required to operate the machines Brown had placed in White’s stores, effective July 1, 1995, as required by the Act. Consequently, Brown removed the video poker machines from White’s stores. Brown did not replace the machines with any other coin-operated amusement machines. In November 1996, the South Carolina Supreme Court struck down the local option law contained in the Act as unconstitutional. Given this Court’s ruling, Brown planned to return the video poker machines to White’s stores, but White informed Brown that the contract was no longer valid. White then filed suit seeking to have the contract declared void and unenforceable so that he would be free to sign a contract with another provider of legal video and amusement machines. Approximately one month after filing suit, White entered into an agreement with Hughes Entertainment, Inc. giving Hughes exclusive rights to place “all video game terminals and all coin operated music and amusement machines” in 12 of the same stores listed in the Brown contract. Was White’s duty to perform the contract with Brown excused?
5. The Bassos contracted with Dierberg to purchase her property for \$1,310,000. One term of the contract stated, “[t]he sale under this contract shall be closed . . . at the office of Community Title Company . . . on May 16, 1988 at 10:00 AM. . . . Time is of the essence of this contract.” After forming the contract, the Bassos assigned their right to purchase Dierberg’s property to Miceli and Slonim Development Corp. At 10:00 AM on May 16, 1988, Dierberg appeared at Community Title for closing. No representative of Miceli and Slonim was there, nor did anyone from Miceli and Slonim inform Dierberg that there would be any delay in the closing. At 10:20 AM, Dierberg declared the contract null and void because the closing did not take place as agreed, and she left the title company office shortly thereafter. Dierberg had intended to use the purchase money to close another contract to purchase real estate later in the day. At about 10:30 AM, a representative of Miceli and Slonim appeared at Community Title to begin the closing, but the representative did not have the funds for payment until 1:30 PM. Dierberg refused to return to the title company, stating that Miceli and Slonim had breached the contract by failing to tender payment on time. She had already made alternative arrangements to finance her purchase of other real estate to meet her obligation under that contract. Miceli and Slonim sued Dierberg, claiming that the contract did not require closing exactly at 10:00 AM, but rather some time on the day of May 16. Will they prevail?
6. Hart entered into a contract with Brad Smith Roofing on October 16, 2000, for the company to install gutters and replace, prime, and paint the fascia board on two buildings he owned, for the price of \$1,073. Hart then paid \$300 as a deposit on the contract. Brad Smith Roofing never began performance, and, in April 2001, Hart wrote to the company requesting a schedule of completion and also informing it of his intention to seek another bid if it failed to respond. Having received no reply to this letter, Hart then obtained a bid for the gutter work from Broadview Roofing & Remodeling, Inc., for the price of \$1,375. He again wrote to Brad Smith Roofing in June 2001, notifying it of his receipt of that bid and his intention to have Broadview perform the work unless Brad Smith Roofing started performance as contracted, as well as his intention to hold it liable for the differences in the contract prices. Subsequently, Broadview

did the gutter work for Hart in October 2001, for which Hart paid \$1,375. Hart then sued Brad Smith Roofing, seeking damages in the amount of \$602. After a hearing, a magistrate filed a report awarding Hart \$300 for his deposit only, but denying recovery on the \$302 damages claim. Was this a correct ruling?

7. Falconer served as an employee of Wysong & Miles Company for approximately 30 years. In October 1981, Falconer and Wysong & Miles entered into an agreement that provided for Falconer to receive supplemental retirement and death benefits from Wysong & Miles in recognition of his years of faithful service, loyalty to the company (including a noncompete provision), and required physical check-ups. Falconer retired from Wysong & Miles in 1987. Wysong & Miles was obligated to him in the sum of \$2,620.80 per month under the agreement. It made all payments until the fall of 2000. At that point, Wysong & Miles suspended its payments to Falconer. Falconer filed suit against Wysong & Miles, claiming that it had missed eight payments, and owed him the principal sum of \$20,966.40 plus interest. Wysong & Miles admitted that it had failed to make the payments, but it claimed that its duty to perform was discharged by impracticability. It stated that the precipitous decline in the metalworking machine manufacturing industry, for which Wysong was not in any way responsible, and the nonoccurrence of which was a basic assumption on which the agreement was made, made its performance impracticable. Will Wysong & Miles prevail on this argument?
8. In May 2001, Bush purchased an African safari package for herself and her fiancé. She paid a 20 percent deposit. The contract stated that in case of cancellation more than 60 days in advance of the tour, there would be a \$50 per person penalty, and in case of cancellation 30–60 days in advance, the penalty would be 20 percent of the total retail tour rate. Sixty-four days before the tour was to begin, September 11 terror attacks on New York City occurred. As a result of the concern about terrorism surrounding that time, Bush and her fiancé decided to cancel the trip. They began to attempt to cancel on September 12, but phones were down and offices were closed, so Bush did not manage to convey her cancellation to ProTravel until September 27, which was within the 30–60 day period. ProTravel did not manage to convey the cancellation to Micato, the tour operator, until October 4, also within the 30–60 days/20 percent penalty period. Because of this, the tour operator and travel agency kept the deposit. Bush claimed that impossibility because of frustration of the means of performance prevented her from canceling within the more-than-60-day period. ProTravel filed a motion for summary judgment. Should the court grant it?
9. Ross was recruited to play basketball at Creighton University. He came from an academically disadvantaged background, and at the time he enrolled, Ross was at an academic level far below that of the average Creighton student. Creighton realized Ross's academic limitations when it admitted him, and to induce him to attend and play basketball, assured him that he would receive sufficient tutoring so that he "would receive a meaningful education while at Creighton." Ross attended Creighton from 1978 to 1982. He maintained a D average and earned 96 of the 128 credits needed to graduate. On the advice of the athletics department, he took many of these credits in courses such as marksmanship and theory of basketball, which did not count toward a university degree. He also alleged that the university hired a secretary to read his assignments and prepare and type his papers. When he left Creighton, Ross had the overall language skills of a fourth grader and the reading skills of a seventh grader. He took remedial classes for a year at a preparatory school at Creighton's expense, attending classes with grade-school children, and then enrolled at Roosevelt University. He was forced to withdraw there for lack of funds. Ross sued Creighton for breach of contract, among other theories. Can Ross win this suit?
10. Dove had been employed by Rose Acre Farm, operated by Rust, its president and principal owner, in the summers and other times from 1972 to 1979. Rust had instituted and maintained extensive bonus programs. In June 1979, Rust called in Dove and other construction crew leaders and offered a bonus of \$6,000 each if certain detailed construction work was completed in 12 weeks. In addition to completing the work, Dove would be required to work at least five full days a week for 12 weeks to qualify for the bonus. On the same day Dove's bonus agreement, by mutual consent, was amended to 10 weeks with a bonus of \$5,000 to enable him to return to law school by September 1. To qualify for the bonus

he would have to work 10 weeks, five days a week, commencing at starting time and quitting only at quitting time. Dove was aware of the provisions concerning absenteeism and tardiness as they affected bonuses, and knew that if he missed any work, for any reason, including illness, he would forfeit the bonus. No exception had ever been made except as may have occurred by clerical error or inadvertence. In the tenth week, Dove came down with strep throat. On Thursday of that week he reported to work with a temperature of 104 degrees, and told Rust that he was unable to work. Rust told him, in effect, that if he went home, he would forfeit the bonus. Rust offered him the opportunity to stay there and lie on a couch, or make up his lost days on Saturday and/or Sunday. Rust told him he could sleep and still qualify for the bonus. Dove left to seek medical treatment and missed two days in the tenth week of the bonus program. Rust refused Dove the bonus based

solely upon his missing the two days of work. Was Rust within his legal rights to refuse to pay the bonus?

Online Research

Researching Remedies in Web Site Terms and Conditions

Many Web sites have pages called “Terms of Use” or “Terms & Conditions,” and these pages often restrict the remedies that can be recovered in case of nonperformance or loss. Find a “Terms of Use” page and look for a provision that addresses remedies. What does the page you found have to say about remedies that will or will not be available in case of nonperformance?

FORMATION AND TERMS OF SALES CONTRACTS

Paul Reynolds used the Trek Web site to purchase a racing bike with a frame utilizing a newly developed high-strength but lightweight alloy. He selected the model he wanted and provided the company with the necessary information to place the \$2,200 purchase price and \$75.00 shipping costs on his Visa card. The bicycle was damaged during shipment when the box was punctured by a forklift truck that was loading other boxes onto the carrier's truck. Paul took the damaged bicycle to a local bicycle dealer to have it repaired. After the bicycle was repaired, but before Paul could pick it up, a clerk in the store, by mistake, sold the bicycle for \$1,500 to Melissa Stevenson who bought it as a birthday gift for her boyfriend. This situation raises a number of legal issues that, among others, will be covered in this chapter, including:

- Can a legally enforceable contract for the sale of goods be formed electronically?
- Between Paul and Trek, who had the risk of loss or damage to the bicycle during the time it was under shipment to him?
- Would Paul be entitled to recover possession of the bicycle from Melissa and her boyfriend?
- Even if Melissa and her boyfriend are not legally required to return the bicycle to Paul, would returning it be the ethical thing to do?

IN PART 3, CONTRACTS, we introduced the common law rules that govern the creation and performance of contracts generally. Throughout much of history, special rules, known as the law merchant, were developed to control mercantile transactions in goods. Because transactions in goods commonly involve buyers and sellers located in different states—and even different countries—a common body of law to control these transactions can facilitate the smooth flow of commerce. To address this need, the Uniform Commercial Code (UCC or Code) was prepared to simplify and modernize the rules of law governing commercial transactions.

In 2003, the American Law Institute adopted a series of proposed amendments to Article 2 (Sales) of the UCC that are intended to further modernize and clarify some of its provisions. The amendments are not effective until they have been adopted by a state and incorporated into its version of Article 2. There is some controversy concerning the proposed amendments, and because at the time this book went to press they had not been adopted by any state, they are not incorporated in the discussion of Article 2 that follows.

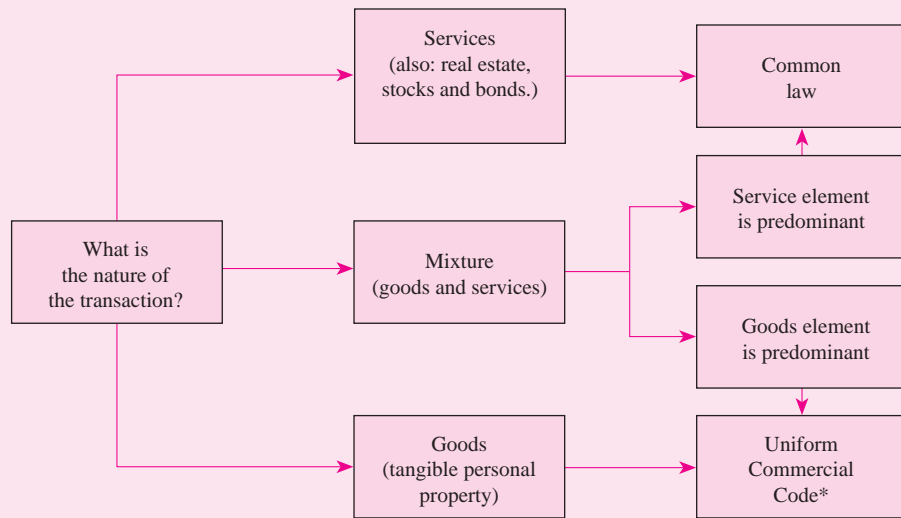

This chapter reviews some Code rules that govern the formation of sales contracts previously discussed. It also covers some key terms in sales contracts, such as delivery terms, title, and risk of loss. Finally, it discusses the rules governing sales on trial, such as sales on approval and consignments.

Sale of Goods

The **sale of goods** is the transfer of ownership to tangible personal property in exchange for money, other goods, or the performance of services. The law of sales of goods is codified in Article 2 of the Uniform Commercial Code. While the law of sales is based on the fundamental principles of contract and personal property, it has been modified to accommodate current practices of merchants. In large measure, the Code discarded many technical requirements of earlier law that did not serve any useful purpose in the marketplace and replaced them with rules that are consistent with commercial expectations.

Article 2 of the Code applies only to *transactions in goods*. Thus, it does not cover contracts to provide

Figure 1 Choice of Law

*If there is no specific Uniform Commercial Code provision governing the transaction, use the common law.

services or to sell real property. However, some courts have applied the principles set out in the Code to such transactions. When a contract appears to call for the furnishing of both goods and services, a question may arise as to whether the Code applies. For example, the operator of a hair salon may use a commercial solution intended to be used safely on humans that causes injury to a person's head. The injured person then might bring a lawsuit claiming that there was a breach of the Code's warranty of the suitability of the solution. In such cases, the courts commonly ask whether the sale of goods is the *predominant* part of the transaction

or merely an *incidental* part; where the sale of goods predominates, courts normally apply Article 2. The *Dealer Management Systems* case, which follows, illustrates the type of analysis courts use to determine whether a particular contract should be governed by the Code.

Thus, the first question you should ask when faced with a contracts problem is: Is this a contract for the sale of goods? If it is not, then the principles of common law that were discussed in Part 3, Contracts, apply. If the contract is one for the sale of goods, then the Code applies. This analysis is illustrated in Figure 1.

Dealer Management Systems, Inc. v. Design Automotive Group, Inc. 822 N.E.2d 556 (App. Ct. Ill. 2005)

In 2000, Design Automotive Group, Inc., issued a purchase order to Dealer Management Systems, Inc. (DMS), for "computer programs and other services." In the purchase order, DMS agreed to provide Design Automotive with an "Accounting Information Management" system consisting of various separately priced software components. The price of the individual components totaled \$24,000, but DMS agreed to provide them as a package for \$20,000 plus an additional \$795 for an item described as "RMCBALRUNTIME SYSTEM FOR UNIX 16." The purchase order also contained the following language:

Software changes to AIM System to provide the same or better function as compared with current system. Develop a MRP subsystem to meet manufacturing needs. Also, includes data file conversion program from our current system and load programs in the AIM system. Also includes user training and support for 1 year.

@\$15,000

Includes source code license for internal use only and not for resale to anyone or any company.

DMS brought suit against Design Automotive alleging that it had breached the contract for failing to pay the \$20,000 purchase price for the software, and also seeking recovery in quantum meruit for other computer programs that it claimed to have written for Design Automotive. Design Automotive moved to dismiss the contract claim on the grounds that because it had not signed the purchase order, the agreement was unenforceable under section 2–201(1) of the Uniform Commercial Code—Sales—the statute of frauds—which provides in pertinent part:

A contract for the sale of goods for the price of \$500 or more is not enforceable by way of action or defense unless there is some writing sufficient to indicate that a contract for sale has been made between the parties and signed by the party against whom enforcement is sought.

Callam, Justice

The UCC's statute of frauds for the sale of goods appears in Article 2, which applies to "transactions in goods." "Goods" is defined, in pertinent part, as "all things, including specially manufactured goods, which are movable at the time of identification to the contract." A sampling of decisions from various jurisdictions shows that courts have generally recognized that computer software qualifies as a "good" for purposes of the UCC. However, whether a particular transaction involving computer software constitutes a "transaction in goods" depends on various considerations. Most courts would probably agree that an ordinary sale of "off-the-rack" software is a transaction in goods. In contrast, a transaction predominantly involving the intellectual property rights to the software is outside the scope of Article 2.

Some courts have concluded that a contract to develop entirely new software is one for services rather than goods. On the other hand, a contract that calls for the modification or customization of existing software may still be a transaction in goods.

Contracts for the sale of software often also involve the provision of services. Where there is a mixed contract for goods and services, there is a "transaction in goods" only if the contract is predominantly for goods and incidentally for services. Article 2 applies to software transactions where the services provided are not substantially different from those generally accompanying package sales of computer systems consisting of hardware and software. Comparing the relative costs of materials and labor may be helpful in the analysis, but is not dispositive.

Finally, although the statute of frauds applies only to contracts for the "sale" of goods, the labels used by the parties to

describe a transaction are not controlling. Thus, a transaction that nominally involves a mere license to use software will be considered a sale under the UCC if it involves a single payment giving the buyer an unlimited period in which it has a right to possession.

Applying these principles here, we conclude, as a matter of law, that the contract was predominantly for goods and only incidentally for services, and that it amounted to a "sale of goods" under the UCC. The written agreement is entitled "purchase order." It lists various software "subsystems" with descriptions corresponding to standard accounting tasks (e.g., "Accounts Receivable Subsys.," "Inventory Control Subsys.>"). There is nothing in the purchase order to suggest that these components were developed "from scratch." The subsystems are separately priced, but sold as a package for \$20,000.

The price for services, in comparison, is only \$15,000. Moreover, this amount includes customization of the software. Customization may be treated as the "manufacture" of the good from existing software rather than as a service. Thus, more than \$20,000 of the contract price is for goods and less than \$15,000 is for services. In addition, the services provided—installation, training, and support—are not substantially different from those generally accompanying package sales of computer systems consisting of hardware and software. The agreement is a sale subject to the statute of frauds because it provided for the transfer of the software for an unlimited time for a single payment. Accordingly, DMS has not shown the existence of a meritorious claim that could have withstood the UCC's statute of frauds.

Judgment affirmed for Design Automotive Group, Inc.

Leases

A lease of goods is a transfer of the right to possess and use goods belonging to another. Although the rights of one who leases goods (a lessee) do not constitute ownership of the goods, leasing is mentioned here because it is

an important way of acquiring the use of many kinds of goods, from automobiles to farm equipment. In most states, Article 2 and Article 9 of the UCC are applied to such leases by analogy. However, rules contained in these articles sometimes are inadequate to resolve special problems presented by leasing. For this reason, a new

article of the UCC dealing exclusively with leases of goods, Article 2A, was written in 1987 and has been adopted by 49 states and the District of Columbia. Because of space limitations, this textbook does not cover Article 2A in detail. However, the article itself is reprinted in its entirety in Appendix B.

Merchants

Many of the Code's provisions apply only to **merchants** or to transactions between merchants.¹ In addition, the Code sets a higher standard of conduct for merchants because persons who regularly deal in goods are expected to be familiar with the practices of that trade and with commercial law. Ordinary consumers and nonmerchants, on the other hand, frequently have little knowledge of or experience in these matters.

Code Requirements

The Code requires that parties to sales contracts act in good faith and in a commercially reasonable manner. Further, when a contract contains an unfair or unconscionable clause, or the contract as a whole is unconscionable, the courts have the right to refuse to enforce the unconscionable clause or contract [2–302].² The Code's treatment of unconscionability is discussed in detail in Chapter 15, Illegality.

A number of the Code provisions concerning the sale of goods were discussed in the chapters on contracts. The Concept Review (page 484) lists some of the important provisions discussed earlier, together with the chapters in the text where the discussion can be found.

Terms of Sales Contracts

Gap Fillers The Code recognizes the fact that parties to sales contracts frequently omit terms from their agreements or state terms in an indefinite or unclear manner. The Code deals with these situations by filling in the blanks with common trade practices, or by giving

commonly used terms a specific meaning that is applied unless the parties' agreement clearly indicates a contrary intent.

Price Terms A fixed price is not essential to the creation of a binding sales contract. Of course, if price has been the subject of a dispute between the parties that has never been resolved, no contract is created because a "meeting of the minds" never occurred. However, if the parties omitted a price term or left the price to be determined at a future date or by some external means, the Code supplies a price term [2–305]. Under the common law, such contracts would have failed due to "indefiniteness." If a price term is simply omitted, or if the parties agreed that the price would be set by some external agency (like a particular market or trade journal) that fails to set the price, the Code says the price is a *reasonable price at the time for delivery* [2–305(1)]. If the agreement gives either party the power to fix the price, that party must do so in *good faith* [2–305(2)]. If the surrounding circumstances clearly indicate that the parties did not intend to be bound in the event a price was not determined in the agreed-upon manner, no contract results [2–305(4)].

Quantity Terms In some cases, the parties may state the quantity of goods covered by their sales contract in an indefinite way. Contracts that obligate a buyer to purchase a seller's *output* of a certain item or all of the buyer's *requirements* of a certain item are commonly encountered. These contracts caused frequent problems under the common law because of the indefiniteness of the parties' obligations. If the seller decided to double its output, did the buyer have to accept the entire amount? If the market price of the item soared much higher than the contract price, could the buyer double or triple its demands?

Output and Needs Contracts In an "output" contract, one party is bound to sell its entire output of particular goods and the other party is bound to buy that output. In a "needs" or "requirements" contract, the quantity of goods is based on the needs of the buyer. In determining the quantity of goods to be produced or taken pursuant to an output or needs contract, the rule of *good faith* applies. Thus, no quantity can be demanded or taken that is unreasonably disproportionate to any stated estimate in the contract or to "normal" prior output or requirements if no estimate is stated [2–306(2)].

For example, assume the Manhattan Ice Company enters into a five-year agreement with the Madison Square

¹Under the Code, a "merchant" is defined as a "person who deals in goods of the kind or otherwise by his occupation holds himself out as having knowledge or skill peculiar to the practices or goods involved in the transaction or to whom such knowledge or skill may be attributed by his employment of an agent or broker or other intermediary who by his occupation holds himself out as having such knowledge or skill" [2–104(1)].

²The numbers in brackets refer to sections of the Uniform Commercial Code.

CONCEPT REVIEW

Formation of Contracts

Offer and Acceptance (Chapters 10 and 11)

1. A contract can be formed in any manner sufficient to show agreement, including conduct by both parties that recognizes the existence of a contract.
2. The fact that the parties did not agree on all the terms of their contract does not prevent the formation of a contract.
3. A firm written offer by a merchant that contains assurances it will be held open is irrevocable for a period of up to three months.
4. Acceptance of an offer may be made by any reasonable manner and is effective on dispatch.
5. A timely expression of acceptance creates a contract even if it contains terms different from the offer or states additional terms *unless* the attempted acceptance is expressly conditioned on the offer's agreement to the terms of the acceptance.
6. An offer inviting a prompt shipment may be accepted either by a prompt promise to ship or a prompt shipment of the goods.

Consideration (Chapter 12)

1. Consideration is not required to make a firm offer in writing by a merchant irrevocable for a period of up to three months.
2. Consideration is not required to support a modification of a contract for the sale of goods.

Statute of Frauds (Chapter 16)

1. Subject to several exceptions, all contracts for the sale of goods for \$500 or more must be evidenced by a writing signed by the party against whom enforcement of the contract is sought. It is effective only as to the quantity of goods stated in the writing.
2. A signed writing is not required if the party against whom enforcement is sought is a merchant, received a written memorandum from the other party, and did not object in writing within 10 days of his receipt of it.
3. An exception to the statute of frauds is made for specially manufactured goods not suitable for sale to others on which the seller has made a substantial beginning in manufacturing or has entered into a binding contract to acquire.
4. An exception to the statute of frauds is made for contracts that a party admits the existence of in court testimony or pleadings.
5. If a party accepts goods or payment for goods, the statute of frauds is satisfied to the extent of the payment made or the goods accepted.

Unconscionability (Chapter 15)

If a court finds a contract for the sale of goods to be unconscionable, it can refuse to enforce it entirely, enforce it without any unconscionable clause, or enforce it in a way that avoids an unconscionable result.

CYBERLAW IN ACTION

Electronic Writings and the Statute of Frauds

The Electronic Signatures in Global and National Commerce Act (the “E-Sign” act) was enacted by Congress and became effective in the United States on October 1, 2000. The E-Sign law covers many everyday transactions including sales transactions even where the law of the state involved still has a version of Article 2 that requires a “signed writing” or another means of satisfying the Article 2

statute of frauds found in Section 2–201. Federal laws “pre-empt,” that is, displace state laws if the two sets of laws are in conflict. If state law requires a signed writing or another indicator that the purported buyer and seller actually intended to form a contract, E-Sign allows the parties to use electronic authentications instead of signed writings. E-mail messages and online orders sent by the buyer would suffice. States that have adopted the Uniform Electronic Transactions Act (UETA) also allow online communications to satisfy the Section 2–201 statute of frauds requirement.

Garden Corporation to provide at a fixed, specified price all the ice required for the concession stands at Madison Square Garden. Manhattan Ice expands its capacity to make ice to fulfill the anticipated requirements and during the first two years of the contract delivers between 1.25 and 1.5 million pounds of ice to the Garden. If in the third year of the agreement, Madison Square Garden wants Manhattan Ice to deliver approximately twice that much ice so that it can be used at other arenas owned by the corporation, Manhattan Ice would not be obligated to pro-

vide the additional ice. Similarly, Madison Square Garden would not be able to reduce its request to 100,000 pounds of ice because it decides to make its own ice on the premises. In the latter case, it is obligated to continue to acquire all of its requirements for ice from Manhattan Ice.

In the *Noble Roman’s* case that follows, the court looked to the contract and to the parties’ course of performance to conclude that the contract was a “requirements” contract and not an order for a specified number of pizza boxes.

Noble Roman’s, Inc. v. Pizza Boxes, Inc. 57 UCCRep.2d 901 (Ct. App. Indiana 2005)

Noble Roman’s is a franchisor of pizza restaurants, but the company does not own or operate any restaurants. Noble Roman’s franchisees order supplies approved by Noble Roman’s. Pizza Boxes is a broker that acts as an intermediary for vendors who manufacture pizza boxes.

In 2002 William Gilbert, director of R&D and distribution for Noble Roman’s, e-mailed Michael Rosenberg, vice president of Pizza Boxes, regarding Noble Roman’s interest in “clamshell” boxes for use in a new “pizza-by-the-slice” program. Gilbert stated that the estimated usage at this stage is from 400,000 to a million units per year to start. After Noble Roman’s approved the box design, the parties worked out the details for the purchase. Gilbert explained that the pizza-by-the-slice program was just getting started at one of its franchise locations, but he anticipated that other locations would implement the program over time. The two agreed that 2.5 million boxes would be needed annually; that Multifoods, Noble Roman’s distributor, would submit orders for the boxes and pay the invoices; and that Multifoods would pick up the boxes after the orders were filled.

On November 1, 2002, Rosenberg sent Gilbert a confirming letter, which stated:

Dear Bill:

Please sign in the space below to confirm the following order:

Item: 18/6 Slice Box 220/case

Quantity: 2,500,000

Print: Two colors

Price: \$101.45/M

FOB: Bakersfield or Stockton, Ca. (in trailer load quantity—approx. 230,000 per load)

To be picked up by Multifoods. PBI remits invoice Multifoods.

Extras for printing preps are included at \$4,500 (\$1.80/M) and amortized over the entire order. In the event that the total of 2.5 million boxes are not manufactured, Noble Roman's is responsible for any portion of the prep charge remaining.

Gilbert signed and dated the letter and returned it to Rosenberg. On its own initiative, Pizza Boxes, through its vendor, Dopaco, Inc., manufactured 519,200 boxes in anticipation of Multifoods' future orders. Multifoods submitted an initial purchase order to Pizza Boxes for six cases (12,000 boxes), and Multifoods paid Pizza Boxes for that order. However, after the initial order, Multifoods did not order any more boxes. When Rosenberg called Multifoods to inquire why it had not ordered more boxes, he was told that the franchisees were "not using this product."

Pizza Boxes then asked Noble Roman's to pay for approximately 500,000 boxes that Pizza Boxes had made but Multifoods had not ordered. Noble Roman's responded that it was a franchisor and not an operator of restaurants that specifies and arranges for the manufacture of products and supplies sold by its franchisees, and that Noble Roman's does not purchase any supplies or products. Once Noble Roman's includes products or supplies in its specifications, then any purchase order is signed by the distributor who buys all of the supplies and distributes them to the franchisees who sign purchase orders with the distributor.

Pizza Boxes then filed suit against Noble Roman's alleging breach of contract, seeking \$54,901.44 for the unpaid inventory and tooling charges. The trial court entered summary judgment in favor of Pizza Boxes and Noble Roman's appealed.

Najam, Judge

Noble Roman's contends that the trial court erred when it entered summary judgment in favor of Pizza Boxes. In particular, Noble Roman's maintains that its only obligation under the November 1, 2002, letter was to pay the "printing prep" charges remaining in the event Pizza Boxes did not manufacture the 2.5 million boxes. We agree.

Initially, we note that Pizza Boxes' complaint suggests that the November 1, 2002, letter is a purchase order, that is, "[a] document authorizing a seller to deliver goods with payment to be made later." But the plain and ordinary meaning of the letter shows that it is a requirements contract. See UCC 2-306. The letter is not an order for 2.5 million boxes but, on its face, contemplates the possibility that not all 2.5 million boxes would be manufactured. Thus, it is not a purchase order. And, despite the inclusion in the letter of a specific estimate of quantity, it is clear that there was no meeting of the minds on how many boxes Pizza Boxes would ultimately produce under the requirements contract.

Noble Roman's contends, and we agree, that the letter is unambiguous and provides that it is only responsible for the unpaid "printing prep" charges "in the event that the total of 2.5 million boxes are not manufactured." In interpreting an unambiguous contract, a court gives effect to the parties' intentions as expressed in the four corners of the instrument, and clear, plain and unambiguous terms are conclusive of that intent. Particular words and phrases cannot be read alone, and the parties' intentions must be determined by reading the contract as a whole.

The terms of the November 1 letter show that: (1) Multifoods would pick up the boxes; (2) Pizza Boxes would remit the invoices to Multifoods; and (3) Noble Roman's was responsible for "any portion of the [printing] prep charges remaining in the event that not all 2.5 boxes were manufactured." While the terms regarding quantity and price might, at first glance, suggest the letter is a purchase order from Noble Roman's for 2.5 million boxes, when the letter is read as a whole it shows that it is a requirements contract under which, Multifoods, not Noble Roman's, is the purchaser. In effect, Multifoods is a third-party beneficiary of the contract, in that Noble Roman's established the specifications for the manufacture, and negotiated the price of the boxes for the benefit of Multifoods.

In addition, the parties' course of performance shows that Pizza Boxes did not expect that Noble Roman's would be responsible for paying for the boxes. Indiana Code Section 2-208 provides in relevant part:

Where the contract for sale involves repeated occasions for performance by either party with knowledge of the nature of the performance and opportunity for objection to it by the other, any course of performance accepted or acquiesced in without objection shall be relevant to determine the meaning of the agreement.

Indiana Code Section 2-202 provides in relevant part:

Terms with respect to which the confirmatory memoranda of the parties agree or which are otherwise set forth in a writing intended by the parties as a final expression of their

agreement with respect to such terms as are included therein may not be contradicted by evidence of any prior agreement or a contemporaneous oral agreement but *may be explained or supplemented*:

- (a) by course of dealing or usage of trade (1–205) or *by course of performance* (2–208).

Here, the requirements contract involved “repeated occasions for performance” in that not all 2.5 million boxes would be ordered, manufactured, and purchased at once.

Multifoods submitted a purchase order for sixty cases to Pizza Boxes; Pizza Boxes submitted an invoice to Multifoods; and Multifoods paid Pizza Boxes for the boxes. When Multifoods did not submit any subsequent orders, Rosenberg looked to Multifoods for an explanation and telephoned its buyer to ask why no other orders had been submitted. The conduct of Multifoods in submitting the order to Pizza Boxes and paying

Pizza Boxes, and Pizza Boxes in submitting the invoice to Multifoods and contacting Multifoods to inquire about additional orders, establish a course of performance between them, consistent with the terms of the letter, all of which shows that Multifoods is the purchaser. Pizza Boxes did not suggest that the November 1, 2002, letter obligated Noble Roman’s until it realized that Multifoods was not going to submit any additional purchase orders.

Noble Roman’s did not order the boxes in dispute and is entitled to summary judgment on Pizza Boxes’ breach of contract claim for the cost of the boxes as a matter of law. However, under the terms of contract, Noble Roman’s is liable to Pizza Boxes for the portion of the prep charges still owed for the boxes that were not manufactured.

Judgment reversed in favor of Noble Roman’s and remanded with instructions.

Exclusive Dealing Contracts The Code takes a similar approach to *exclusive dealing contracts*. Under the common law, these contracts were sources of difficulty due to the indefinite nature of the parties’ duties. Did the dealer have to make any effort to sell the manufacturer’s products, and did the manufacturer have any duty to supply the dealer? The Code says that unless the parties agree to the contrary, sellers have an obligation to use their best efforts to supply the goods to the buyer and the buyers are obligated to use their best efforts to promote their sale [2–306(2)].

Time for Performance If no time for performance is stated in the sales contract, a *reasonable time* for performance is implied. If a contract requires successive performances over an indefinite period of time, the contract is valid for a reasonable time; however, either party can terminate it at any time upon the giving of reasonable notice unless the parties have agreed otherwise as to termination [2–309]. For example, Farmer Jack agrees to sell his entire output of apples each fall to a cannery at the then-current market price. If the contract does not contain a provision spelling out how and when the contract can be terminated, Farmer Jack can terminate it if he gives the cannery a reasonable time to make arrangements to acquire apples from someone else.

Delivery Terms Standardized shipping terms that through commercial practice have come to have a specific meaning are customarily used in sales contracts.

The terms **FOB (free on board)** and **FAS (free alongside ship)** are basic delivery terms. If the delivery term of the contract is FOB or FAS the place at which the goods originate, the seller is obligated to deliver to the carrier goods that *conform to the contract* and *are properly prepared for shipment* to the buyer, and the seller must make a *reasonable contract for transportation of the goods* on behalf of the buyer. Under such delivery terms, the goods are at the risk of the buyer during transit and he must pay the shipping charges. If the term is *FOB destination*, the seller must deliver the goods to the designated destination and they are at the seller’s risk and expense during transit. These terms will be discussed in more detail later in this chapter.

Title

Passage of Title Title to goods cannot pass from the seller to the buyer until the goods are identified to the contract [2–401(1)]. For example, if Seller agrees to sell Buyer 50 chairs and Seller has 500 chairs in his warehouse, title to 50 chairs will not pass from Seller to Buyer until the 50 chairs that Buyer has purchased are selected and identified as the chairs sold to Buyer.

The parties may agree between themselves when title to the goods will pass from the seller to the buyer. If there is no agreement, then the general rule is that the *title to*

CYBERLAW IN ACTION

Buying Beer on the Internet

While his parents were away from home on vacation, Hunter Butler, a minor, used a credit card in his name to order 12 bottles of beer through Beer Across America's Internet site on the World Wide Web. When his mother, Lynda Butler, returned home she found several bottles from the shipment of beer remaining in the refrigerator. Lynda Butler then filed a civil lawsuit against Beer Across America seeking damages under Section 6–5–70 of the Alabama Civil Damages Act. The Civil Damages Act provides for a civil action by the parent or guardian of a minor against anyone who knowingly sells or furnishes liquor to the minor. A threshold issue in the lawsuit was whether the sale of the beer had taken place in Alabama so that a court in Alabama would have personal jurisdiction over Beer Across America.

Beer Across America was an Illinois corporation involved in the marketing and sale of alcoholic beverages and other

merchandise. The beer was brought by carrier from Illinois to Alabama. The sales invoice and shipping documents provided that the sale was FOB the seller, with the carrier acting as the buyer's agent. Moreover, the invoice included a charge for sales tax but no charge for beer tax; Alabama law requires that sales tax be collected for out-of-state sale of goods which are then shipped to Alabama but requires beer tax be collected only on sales within Alabama.

The court held that the sale arranged over the Internet took place in Illinois. The court noted that under the versions of the Uniform Commercial Code in effect in both Illinois and Alabama, a sale consists in the passing of title from the seller to the buyer. Title to goods passes at the time and place of the shipment when the contract does not require the seller to make delivery at the destination. Accordingly, ownership to the beer passed to Hunter Butler upon tender of the beer to the carrier. The court then transferred the case to the U.S. District Court for the Northern District of Illinois. *Butler v. Beer Across America*, 40 UCC Rep.2d 1008 (U.S.D.C. N.D. Ala. 2000).

the goods passes to the buyer when the seller completes his obligations as to delivery of the goods:

1. If the contract requires the seller to “ship” the goods to the buyer, then title passes to the buyer when the seller delivers conforming goods to the carrier.
2. If the contract requires the seller to “deliver” the goods to the buyer, title does not pass to the buyer until the goods are delivered to the buyer and tendered to him.
3. If delivery is to be made without moving the goods, then title passes at the time and place of contracting. An exception is made if title to the goods is represented by a document of title such as a warehouse receipt; then, title passes when the document of title is delivered to the buyer.
4. If the buyer rejects goods tendered to him, title reverts to the seller [2–401(4)].

Importance of Title At common law, most of the problems relating to risks, insurable interests in goods, remedies, and similar rights and liabilities were determined on the basis of who was the technical title owner at the particular moment the right or liability arose. Under the Code, however, the rights of the seller and buyer and of third persons are determined irrespective of the technicality of who has the title, unless the provision of the Code expressly refers to title.

Determination of who has title to the goods is important in instances in which the rights of the seller's or the buyer's creditors in the goods are an issue. Another instance in which the identity of the title holder may be important is in determining whether the seller's insurance policy covers a particular loss.

The *Cardwell* case, which follows, illustrates the application of these rules.

State of Connecticut v. Cardwell

718 A.2d 954 (Conn. Sup. Ct. 1998)

The State of Connecticut brought suit against Roderick Cardwell, a resident of Connecticut and the owner of Ticketworld, contending that he was engaged in “ticket scalping” in violation of Connecticut law. A Connecticut statute makes it an unfair or deceptive trade practice to sell tickets to sporting and entertainment events to be held in Connecticut to purchasers located in Connecticut, for a price more than \$3 in excess of the price, including tax, printed on the face of the ticket, or fixed for admission.

Cardwell was engaged in the business of selling tickets to entertainment and sporting events to be held in Connecticut. Ticketworld operated from two locations, one in Hartford and one in Springfield, Massachusetts. In order to obtain business, Ticketworld advertised in newspapers, including newspapers that circulate in Connecticut. The advertisements that appeared in Connecticut newspapers instructed prospective purchasers to telephone the Hartford office of Ticketworld for tickets to events that would take place outside of Connecticut, and to telephone the Springfield office for tickets to events that would be held in Connecticut. In the event that a prospective customer telephoned the Hartford office for tickets to a Connecticut event, the prospective customer was instructed to telephone the Springfield office in order to purchase those tickets.

On many occasions, Ticketworld sold tickets to Connecticut events from its Springfield office for which it charged a price that exceeded the fixed price of the ticket, tax included, by more than \$3. The trial court found, specifically, that Ticketworld (1) had charged Mary Lou Lupovitch \$125 per ticket for tickets to an event at the Connecticut Tennis Court in New Haven, although those tickets had a fixed price of \$32.50 per ticket; and (2) had charged Cyrilla Bergeron \$137 per ticket for tickets to an event in Hartford, although those tickets had a fixed price of \$53.50 per ticket. The court determined that Ticketworld, in selling these tickets for a price in excess of the fixed price for admission, had violated section 53–289. Consequently, it issued a permanent injunction prohibiting Cardwell from engaging in any activity within the state in connection with selling, offering for sale, attempting to sell, mailing or otherwise delivering, or advertising or promoting the sale of any ticket to an event to be held in Connecticut sold for a price more than \$3 in excess of the fixed price of the ticket, including tax.

Cardwell appealed, contending that since he sold tickets to events in Connecticut only through Ticketworld’s office in Springfield, Massachusetts, the “sales” did not take place in Connecticut and thus did not violate Connecticut law.

Berdon, Associate Justice

In Connecticut, the sale of goods is governed by the Connecticut Uniform Commercial Code—Sales (code). Under the code, a “sale” is defined as “the passing of title from the seller to the buyer for a price. . . .” Section 2–106(1). The code further provides that “[u]nless otherwise explicitly agreed title passes to the buyer at the time and place at which the seller completes his performance with reference to the physical delivery of the goods, despite any reservation of a security interest and even though a document of title is to be delivered at a different time or place. . . .” Section 2–401(2). In addition, the code provides that “if the contract requires or authorizes the seller to send the goods to the buyer but does not require him to deliver them at destination, title passes to the buyer at the time and place of shipment. . . .” Section 2–401(2)(a).

The latter provision reflects the distinction made by the code between “shipment” and “destination” contracts. Under the code, when a carrier is used to transport the goods sold, shipment contracts and destination contracts are the only two types of sales contracts recognized. Section 2–401(2). Furthermore, under the code, “[t]he ‘shipment’ contract is regarded as the [general rule].” Under a shipment contract, the seller is either required or authorized to ship the goods to the buyer, but is not required to deliver them at a particular destination, and delivery to the carrier constitutes delivery to the buyer. Section 2–401(2)(a). Under a destination contract,

the seller is required to deliver the goods to the buyer at the named destination and delivery occurs upon tender of the goods at that destination. A strong presumption against the creation of destination contracts is contained in the code such that, in the absence of specific proof of agreement by the seller to deliver the goods to a particular destination and to bear the attendant risk of loss until such delivery, a sales contract that merely provides that the goods will be shipped to a certain location will be deemed to be a shipment contract.

In this case, the contracts made by Cardwell for the sale of tickets do not contain any explicit agreement by Cardwell to deliver the goods to a particular destination or to bear the attendant risk of loss until such time as the goods are delivered. Therefore, the contracts at issue in this case are properly classified as shipment contracts. Because delivery of the goods to the carrier constitutes delivery to the buyer under a shipment contract, section 2–401(2)(a), with respect to each sale of tickets made by Cardwell, delivery is made to the post office or other commercial carrier, and hence to the buyer, within Massachusetts. As a result, the “sale” of the tickets, as defined by the code, occurs in Massachusetts. Consequently, the trial court’s determination that Cardwell sells tickets within Connecticut, and thereby violates the Connecticut statute, was incorrect.

Judgment reversed in favor of Cardwell.

Title and Third Parties

Obtaining Good Title A fundamental rule of property law is that a buyer cannot receive better title to goods than the seller had. If Thief steals a digital camera from Adler and sells it to Brown, Brown does not get good title to the camera, because Thief had no title to it. Adler would have the right to recover the camera from Brown. Similarly, if Brown sold the camera to Carroll, Carroll could get no better title to it than Brown had. Adler would have the right to recover the camera from Carroll.

Under the Code, however, there are several exceptions to the general rule that a buyer cannot get better title to goods than his seller had. The most important exceptions include the following: (1) a person who has a voidable title to goods can pass good title to a bona fide purchaser for value; (2) a person who buys goods in the regular course of a retailer's business usually takes free of any interests in the goods that the retailer has given to others; and (3) a person who buys goods in the ordinary course of a dealer's business takes free of any claim of a person who entrusted those goods to the dealer.

Transfers of Voidable Title A seller who has a **voidable title** has the power to pass good title to a *good faith purchaser for value* [2-403(1)]. A seller has a voidable title to goods if he has obtained his title through fraudulent representations. For example, a person would

have a voidable title if he obtained goods by impersonating another person or by paying for them with a bad check or if he obtained goods without paying the agreed purchase price when it was agreed that the transaction was to be a cash sale. Under the Code, **good faith** means "honesty in fact in the conduct or transaction concerned" [1-201(19)] and a buyer has given **value** if he has given any consideration sufficient to support a simple contract [1-201(44)].

For example, Jones goes to the ABC Appliance Store, convinces the clerk that he is really Clark, who is a good customer of ABC, and leaves with a DVD player charged to Clark's account. If Jones sells the DVD player to Davis, who gives Jones value for it and has no knowledge of the fraud that Jones perpetrated on ABC, Davis gets good title to the DVD player. ABC cannot recover the DVD player from Davis; instead, it must look for Jones, the person who deceived it. In this situation, both ABC and Davis were innocent of wrongdoing, but the law considers Davis to be the more worthy of its protection because ABC was in a better position to have prevented the wrongdoing by Jones and because Davis bought the goods in good faith and for value.

The same result would be reached if Jones had given ABC a check that later bounced and then sold the DVD player to Davis, who was a good faith purchaser for value. Davis would have good title to the DVD player, and ABC would have to pursue its right against Jones on the bounced check.

These principles are illustrated in the *Tempur-Pedic* case that follows.

Tempur-Pedic International, Inc. v. Waste to Charity, Inc. 62 UCC Rep.2d 457 (U.S.D.C., W.D. Ark. 2007)

Tempur-Pedic (TP) manufactures, markets, and distributes mattresses, pillows, cushions, slippers, and similar products through a network of authorized and approved retail distributors. Each mattress model references the TEMPUR-PEDIC mark in its name.

Mattresses sold in the ordinary course of business by authorized TP distributors are enclosed in a hypoallergenic cover, sealed in a plastic bag, and packed in cardboard boxes labeled with TP's registered trademarks. Goods packaged for charitable donations are packaged differently. The mattresses do not include the hypoallergenic cover and are not boxed in the cardboard boxes. Instead, the mattresses are wrapped in clear plastic, stacked on wooden pallets, and then the entire load is wrapped in another layer of heavy-duty plastic. There were similar differences between the packing of pillows and slippers intended for retail distribution and those intended for donation.

In 2005, TP decided to make a donation of approximately \$15 million in mattress, slipper, and pillow inventory to Gulf Coast residents victimized by Hurricane Katrina. The donations included approximately 7,800 mattresses to Waste to Charity (WCT), which was supposed to distribute those products to Hurricane Katrina victims. On November 14, 2005, TP entered into a charitable donation agreement with Jack Fitzgerald and his company, WCT, to distribute mattresses, slippers, and pillows. As a recipient of charitable produce donations, WCT agreed to the following restrictions:

1. All products donated by Tempur-Pedic are not to be resold, distributed for sale or otherwise sold for profit in any venue.

5. Should you wish to dispose of the Tempur-Pedic Products or any of them, you will notify us and give us an opportunity to retrieve them or designate their disposition, and you will comply with any reasonable request for their disposition.

TP made approximately 50 deliveries of donated goods to WTC. After these deliveries were made, TP learned that the donated products were not being provided to Hurricane Katrina victims but were instead being sold for profit in violation of the terms of the charitable donation agreement. Fitzgerald represented that all the property donated by TP had been distributed to three charitable organizations, Operation Compassion, Rhema International, and Hope Ministries.

An investigation by TP, a consultant it hired, and the FBI discovered the donated mattresses being offered for sale in a variety of ways: from trucks parked in shopping centers, from a warehouse where WTC had stored some of the donations, by a number of individuals affiliated in various ways with the warehouse, and on eBay. When an effort to sell a large quantity of TP mattresses from a warehouse in Booneville, Arkansas, was uncovered by the FBI and TP, the owner of a company known as CSS, Inc., stepped forward and claimed to be the legitimate owner of the mattresses. It maintained that they were used TP mattresses that had been returned to TP pursuant to its full refund within 30 days policy and that because the mattresses could not be sold by TP again as new, TP had sold them to Action Distributors, Inc. (ADI). CSS said it had purchased the mattresses from ADI, a company that it had been doing business with for several years.

TP brought an action for replevin, breach of contract, and fraud against WTC and CSS, and sought a temporary restraining order enjoining any sale or other disposition of the mattresses until the case could be decided by the court. The district court judge, relying on a report and recommendation from the magistrate judge, issued the preliminary injunction. A critical question for the magistrate judge was whether TP was likely to prevail on its claim against CSS.

Marschewski, Magistrate Judge

The crux of the parties' arguments can be simply summarized. TP maintains WTC misappropriated the donated property and that a purchaser from a thief acquires no title against the true owner. It therefore contends CSS acquired no title to the mattresses. Alternatively, if the court determines WTC did obtain "voidable title" to the donated property, TP argues CSS is not a good-faith purchaser for value based on the circumstances surrounding the alleged sale.

In contrast, CSS maintains the provisions of the Uniform Commercial Code apply to the transaction and WTC held "voidable title" and could therefore pass good title to good-faith purchasers for value without knowledge of WTC's alleged fraudulent conduct. CSS maintains that having purchased its mattresses from ADI it is such a good-faith purchaser for value without knowledge of WTC's fraudulent conduct. CSS contends TP cannot, therefore, show a likelihood of success on the merits and the motion for a preliminary injunction must be denied.

The Uniform Commercial Code applies to all "transactions in goods." [2-102] A purchase is defined to include "taking by sale . . . gift, or any other voluntary transaction creating an interest in property." [1-201(32)]

Section 2-403 recognizes a legal distinction between a sale of stolen goods and a sale of goods procured through fraud. Absent exigent circumstances, one who purchases from a thief acquires no title as against the true owner. However, under

section 2-403, the result is different when property obtained by fraud is conveyed to a bona fide purchaser.

Section 2-403 in applicable part provides as follows:

- (1) A purchaser of goods acquires all title which his transferor had or had power to transfer except that a purchaser of a limited interest acquires rights only to the extent of the interest purchased. A person with voidable title has power to transfer a good title to a good faith purchaser for value. When goods have been delivered under a transaction of purchase the purchaser has such power even though
 - (a) the transferor was deceived as to the identity of the purchaser; or
 - (b) the delivery was in exchange for a check which is later dishonored; or
 - (c) it was agreed that the transaction was to be a "cash sale"; or
 - (d) the delivery was procured through fraud punishable as larcenous under the criminal law.

The good-faith purchaser exception is designed to promote finality in commercial transactions and thus encourage purchases and to foster commerce. It does so by protecting the title of a purchaser who acquires property for valuable consideration and who, at the time of the purchase, is without notice that the seller lacks valid and transferable title to the property.

Here, TP voluntarily gave the property to WTC. There is no showing that WTC was just a sham operation. From the

evidence before the court, the court believes that WTC lawfully came into possession of the property. Thus, it appears clear that WTC did acquire voidable title to the donated property.

After the donations were made, TP has presented evidence that at least a portion of the donated products were sold at various places around the country rather than put to their intended charitable use. WTC, although it claimed no knowledge of the sales, had sufficient control over the property, at least with respect to the Bowling Green warehouse, to represent that it had moved slippers from it after it was discovered they were being sold from that facility.

With respect to the mattresses purchased by CSS from ADI, the issue becomes whether CSS was a good-faith purchaser. “Good faith” is defined to mean “honesty in fact in the conduct or transaction concerned. [1–201(19)]. . . . I conclude TP has shown a probability that it will succeed on the merits of establishing that CSS was not a good-faith purchaser for value of the mattresses.

A number of factors lead the court to this conclusion. First, the price of the mattresses was substantially below market value. The average price per mattress paid by CSS was \$125. TP’s witness testified that the value of these mattresses would be substantially above that figure and that some of these

mattresses could go from \$600 and up. Even a witness for the defendants acknowledged that the range of TP mattresses, on the Web page, would go from \$600 to \$1,995. Second, the terms of the purported sale were suspicious: all tags had been removed; while the mattresses were confirmed to be TP mattresses they could not be sold as such; no sales could be made to TP dealers; and the representation was made that TP has confirmed the mattresses would not have tags on them.

Third, both the timing of the attempted sales, and the use of a building material supplier re some of the offered sales, lends support to the conclusion that CSS was not a good-faith purchaser for value. Fourth, the president of CSS acknowledged that he knew TP did not authorize the sale of used mattresses. Fifth, the corporate charter of ADI had been revoked both before and during the relevant period of time. It should be noted that Michael H. Lowe was listed as the Agent for the defunct ADI corporation in New Jersey. This is the same individual that was operating the fork lift at the Boonville warehouse. Sixth, the president of CSS had done a Web search of another representative of ADI and the search revealed very negative information.

Motion for preliminary injunction granted.

Buyers in the Ordinary Course of Business A person who buys goods in the ordinary course of business from a person dealing in goods of that type takes free of any security interest in the goods given by his seller to another person [9–307(1)]. **A buyer in ordinary course** is a person who in good faith and without knowledge that the sale to him is in violation of the ownership rights of a third party buys goods in the ordinary course of business of a person selling goods of that kind, other than a pawnbroker [1–201(9)].

For example, Brown Buick may borrow money from Bank in order to finance its inventory of new Buicks; in turn, Bank may take a security interest in the inventory to secure repayment of the loan. If Carter buys a new Buick from Brown Buick, he gets good title to the Buick free and clear of the Bank’s security interest if he is a buyer in the ordinary course of business and without knowledge that the sale is in violation of a security interest. The basic purpose of this exception is to protect those who innocently buy from merchants and thereby to promote confidence in such commercial transactions. The exception also reflects the fact that the bank is more interested

in the proceeds from the sale than in the inventory. Security interests and the rights of buyers in the ordinary course of business are discussed in more detail in Chapter 29, Security Interests in Personal Property.

Entrusting of Goods A third exception to the general rule is that if goods are entrusted to a merchant who deals in goods of that kind, the merchant has the power to transfer all rights of the entruster to a buyer in the ordinary course of business [2–403(2)]. In the scenario presented at the beginning of this chapter, Paul takes his damaged bicycle for repair to a shop that sells and repairs bicycles. By mistake, a clerk in the bicycle shop sells the bicycle to Melissa. The bicycle shop can pass good title to Melissa, a buyer in the ordinary course of business. In such a case, Paul would have to sue the bicycle shop for damages for conversion of the bicycle; he could not get it back from Melissa. The purpose behind this rule is to protect commerce by giving confidence to buyers that they will get good title to the goods they buy from merchants in the ordinary course of business. However, a merchant-seller cannot pass

CONCEPT REVIEW

Title and Third Parties

General Rule

A seller cannot pass better title to goods than he has.

Exceptions to General Rule

1. A person who has voidable title to goods can pass good title to a bona fide purchaser for value.
2. A buyer in the ordinary course of a retailer's business usually takes free of any interests in the goods that the retailer has given to others.
3. A person who buys goods in the ordinary course of a dealer's business takes free of any claims of a person who entrusted those goods to the dealer.

good title to stolen goods even if the buyer is a buyer in the ordinary course of business. This is because the original owner did nothing to facilitate the transfer.

Risk of Loss

The transportation of goods from sellers to buyers can be a risky business. The carrier of the goods may lose, damage, or destroy them; floods, hurricanes, and other natural catastrophes may take their toll; thieves may steal all or part of the goods. If neither party is at fault for the loss, who should bear the risk? If the buyer has the risk when the goods are damaged or lost, the buyer is liable for the contract price. If the seller has the risk, he is liable for damages unless substitute performance can be tendered.

The common law placed the risk on the party who had technical title at the time of the loss. The Code rejects this approach and provides specific rules governing risk of loss that are designed to provide certainty and to place the risk on the party best able to protect against loss and most likely to be insured against it. Risk of loss under the Code depends on the terms of the parties' agreement, on the moment the loss occurs, and on whether one of the parties was in breach of contract when the loss occurred.

Terms of the Agreement The contracting parties, subject to the rule of good faith, may specify who has the risk of loss in their agreement [2-509(4)]. This they may do directly or by using certain commonly accepted shipping terms in their contract. In addition, the Code has certain general rules on risk of loss that

amplify specific shipping terms and control risk of loss in cases where specific terms are not used [2-509].

Shipment Contracts If the contract requires the seller to ship the goods by carrier but does not require their delivery to a specific destination, the risk passes to the buyer when the seller delivers the goods to the carrier [2-509(1)(a)]. Shipment contracts are considered to be the normal contract where the seller is required to send goods to the buyer but is not required to guarantee delivery at a particular location.

The following are commonly used shipping terms that create shipment contracts:

1. *FOB (free on board) point of origin*. This term calls for the seller to deliver the goods free of expense and at the seller's risk at the place designated. For example, a contract between a seller located in Chicago and a buyer in New York calls for delivery FOB Chicago. The seller must deliver the goods at his expense and at his risk to a carrier in the place designated in the contract, namely Chicago, and arrange for their carriage. Because the shipment term in this example is FOB Chicago, the seller bears the risk and expense of delivering the goods to the carrier, but the seller is not responsible for delivering the goods to a specific destination. If the term is "FOB vessel, car, or other vehicle," the seller must load the goods on board at his own risk and expense [2-319(1)].
2. *FAS (free alongside ship)*. This term is commonly used in maritime contracts and is normally accompanied by the name of a specific vessel and port—for example, "FAS Calgary [the ship], Chicago Port Authority." The

Ethics in Action

Perils of Entrusting Goods

Suppose you are the owner of a small jewelry store that sells new and antique jewelry. A customer leaves a family heirloom—an elaborate diamond ring—with you for

cleaning and resetting. By mistake, a clerk in your store sells it to another customer. What would you do? If you were the buyer of the ring and had given it to your fiancée as a gift and then were informed of the circumstances, what would you do?

seller must deliver the goods alongside the vessel *Calgary* at the Chicago Port Authority at his own risk and expense [2–319(2)].

3. *CIF (cost, insurance, and freight)*. This term means that the price of the goods includes the cost of shipping and insuring them. The seller bears this expense and the risk of loading the goods [2–320].

4. *C & F*. This term is the same as CIF, except that the seller is not obligated to insure the goods [2–320].

The *Windows, Inc.* case, which follows, provides an example of the risk borne by a buyer in a shipment contract.

Windows, Inc. v. Jordan Panel Systems Corp. 38 UCC Rep.2d 267 (2nd Cir. 1999)

Windows, Inc., was a fabricator and seller of windows, based in South Dakota. *Jordan Panel Systems, Inc.*, was a construction subcontractor, which contracted to install window wall panels at an air cargo facility at JFK International Airport in New York City. *Jordan* ordered custom-made windows from *Windows*. The purchase contract specified that the windows were to be shipped properly packaged for cross-country motor freight transit and “delivered to New York City.”

Windows constructed the windows according to *Jordan*’s specifications. It arranged to have them shipped to *Jordan* by a common carrier, *Consolidated Freightways Corp.*, and delivered them to *Consolidated* intact and properly packaged. During the course of shipment, however, the goods sustained extensive damage. Much of the glass was broken and many of the window frames were gouged and twisted. *Jordan*’s president signed a delivery receipt noting that approximately two-thirds of the shipment was damaged due to “load shift.” *Jordan*, seeking to stay on its contractor’s schedule, directed its employees to disassemble the window frames in an effort to salvage as much of the shipment as possible.

Jordan made a claim with *Consolidated* for damages it had sustained as a result of the casualty, including labor costs from its salvage efforts and other costs from *Jordan*’s inability to perform its own contractual obligations on schedule. *Jordan* also ordered a new shipment from *Windows*, which was delivered without incident.

Jordan did not pay *Windows* for either the first shipment of damaged windows or the second, intact shipment. *Windows* filed suit to recover payment from *Jordan* for both shipments. *Jordan* counterclaimed, seeking incidental and consequential damages resulting from the damaged shipment. *Windows* then brought a third-party claim against *Consolidated*. *Windows* settled its claims against *Consolidated*, and *Windows* later withdrew its claims against *Jordan*.

The district court granted *Windows*’ motion for summary judgment on *Jordan*’s counterclaim against *Windows* for incidental and consequential damages. *Jordan* appealed.

Leval, Circuit Judge

Jordan seeks to recover incidental and consequential damages pursuant to UCC section 2–715. Under that provision, *Jordan*’s entitlement to recover incidental and consequential damages depends on whether those damages “result[ed] from the seller’s breach.” A destination contract is covered by section 2–503(3);

it arises where “the seller is *required to deliver* at a particular destination.” Section 2–504 (emphasis added). Under a shipment contract, the seller must “put the goods in the possession of such a carrier and make such a contract for their transportation as may be reasonable having regard to the nature of the goods and other circumstances of the case.” Section 2–504(a).

Where the terms of an agreement are ambiguous, there is a strong presumption under the UCC favoring shipment contracts. Unless the parties “expressly specify” that the contract requires the seller to deliver to a particular destination, the contract is generally construed as one for shipment.

Jordan’s confirmation of its purchase order, by letter to Windows dated September 22, 1993, provided, “All windows to be shipped properly crated/packaged/boxed suitable for cross-country motor freight transit and delivered to New York City.” We conclude that this was a shipment contract rather than a destination contract.

To overcome the presumption favoring shipment contracts, the parties must have explicitly agreed to impose on Windows the obligation to effect delivery at a particular destination. The language of this contract does not do so. Nor did Jordan use any commonly recognized industry term indicating that a seller is obligated to deliver the goods to the buyer’s specified destination.

Given the strong presumption favoring shipment contracts and the absence of explicit terms satisfying both requirements for a destination contract, we conclude that the contract should be deemed a shipment contract.

Under the terms of its contract, Windows thus satisfied its obligations to Jordan when it put the goods, properly packaged, into the possession of the carrier for shipment. Upon Windows’ proper delivery to the carrier, Jordan assumed the risk of loss, and cannot recover incidental or consequential damages from the seller caused by the carrier’s negligence.

The allocation of risk is confirmed by the terms of UCC section 2–509(1)(a), entitled “Risk of Loss in the Absence of Breach.” It provides that where the contract “does not require [the seller] to deliver [the goods] at a particular destination, the risk of loss passes to the buyer when the goods are duly delivered to the carrier.” UCC section 2–509(1)(a). As noted earlier, Jordan does not contest the court’s finding that Windows duly delivered conforming goods to the carrier. Accordingly, as Windows had already fulfilled its contractual obligations at the time the goods were damaged and Jordan had assumed the risk of loss, there was no “seller’s breach” as is required for a buyer to claim incidental and consequential damages under section 2–715. Summary judgment for Windows was therefore proper.

We are mindful of Jordan’s concern that it not be left “holding the bag” for the damages it sustained through no fault of its own. The fact that Jordan had assumed the risk of loss under section 2–509(1)(a) by the time the goods were damaged does not mean it is without a remedy. Under the 1906 Carmack Amendment to the Interstate Commerce Act, a buyer or seller has long been able to recover directly from an interstate common carrier in whose care their goods are damaged. Liability attaches unless the carrier can establish one of several affirmative defenses; for example, by showing that the damage was the fault of the shipper or caused by an Act of God.

Judgment affirmed in favor of Windows.

Destination Contracts If the contract requires the seller to deliver the goods to a specific destination, the seller bears the risk and expense of delivery to that destination [2–509(1)(b)]. The following are commonly used shipping terms that create destination contracts:

1. **FOB destination.** An FOB term coupled with the place of destination of the goods puts the expense and risk of delivering the goods to that destination on the seller [2–319(1)(b)]. For example, a contract between a seller in Chicago and a buyer in Phoenix might call for shipment FOB Phoenix. The seller must ship the goods to Phoenix at her own expense, and she also retains the risk of delivery of the goods to Phoenix.
2. **Ex-ship.** This term does not specify a particular ship, but it places the expense and risk on the seller until the goods are unloaded from whatever ship is used [2–322].

3. **No arrival, no sale.** This term places the expense and risk during shipment on the seller. If the goods fail to arrive through no fault of the seller, the seller has no further liability to the buyer [2–324].

For example, a Chicago-based seller contracts to sell a quantity of Weber grills to a buyer FOB Phoenix, the buyer’s place of business. The grills are destroyed en route when the truck carrying the grills is involved in an accident. The risk of the loss of the grills is on the seller, and the buyer is not obligated to pay for them. The seller may have the right to recover from the trucking company, but between the seller and the buyer, the seller has the risk of loss. If the contract had called for delivery FOB the seller’s manufacturing plant, then the risk of loss would have been on the buyer. The buyer would have had to pay for the grills and then pursue any claims that he had against the trucking company.

Goods in the Possession of Third Parties

If the goods are in the possession of a bailee and are to be delivered without being moved, the risk of loss passes to the buyer upon delivery to him of a negotiable document of title for the goods; if no negotiable document of title has been used, the risk of loss passes when the bailee indicates to the buyer that the buyer has the right to the possession of the goods [2-509(2)]. For example, if Farmer sells Miller a quantity of grain currently stored at Grain Elevator, the risk of loss of the grain will shift from Farmer to Miller (1) when a negotiable warehouse receipt for the grain is delivered to Miller or (2) when Grain Elevator notifies Miller that it is holding the grain for Miller.

Risk Generally If the transaction does not fall within the situations discussed above, the risk of loss passes to the buyer upon *receipt* of the goods if the seller is a merchant; if the seller is not a merchant, then the risk of loss passes to the buyer upon the *tender of delivery* of the goods to the buyer [2-509(3)]. If Jones bought a television set from ABC Appliance on Monday, intending to pick it up on Thursday, and the set was stolen on Wednesday, the risk of loss remained with ABC. However, if Jones had purchased the set from his next-door neighbor and could have taken delivery of the set on Monday (i.e., delivery was tendered then), the risk of loss was Jones's.

Effect of Breach on Risk of Loss When a seller tenders goods that do not conform to the contract and the buyer has the right to reject the goods, the risk of loss remains with the seller until any defect is cured or until the buyer accepts the goods [2-510(1)]. Where the buyer rightfully revokes his acceptance of goods, the risk of loss is with the seller to the extent that any loss is not covered by the buyer's insurance [2-510(2)]. This rule gives the seller the benefit of any insurance carried by the buyer.

For example, if Adler bought a new Buick from Brown Buick that he later returned to Brown because of serious defects in it and if through no fault of Adler the automobile was damaged while in his possession, then the risk of loss would be with Brown. However, if Adler had insurance on the automobile covering the damage to it and recovered from the insurance company, Adler would have to turn the insurance proceeds over to Brown or use them to fix the car before returning it to Brown.

When a buyer repudiates a contract for goods and those goods have already been set aside by the seller, the

risk of loss stays with the buyer for a commercially reasonable time after the repudiation if the seller's insurance is not sufficient to cover any loss [2-510(3)].

Suppose Popcorn, Inc., contracts to buy Farmer's entire crop of popcorn. Farmer picks the popcorn, shells it, stores it in his barn, and informs Popcorn, Inc., that he is preparing to have the popcorn shipped to it. Popcorn, Inc., then tells Farmer that it does not intend to honor the contract because the market for popcorn has dropped and it can acquire the popcorn it desires at a lower price from someone else. Shortly thereafter, but before Farmer has an opportunity to find another buyer for the popcorn, there is a fire in his barn and the popcorn is ruined when it pops prematurely. If Farmer's insurance covers only part of the loss, Popcorn, Inc., must bear the rest of the loss.

Insurable Interest The general practice of insuring risks is recognized and provided for under the Code. A buyer may protect his interest in goods that are the subject matter of a sales contract before he actually obtains title. The buyer obtains an insurable interest in existing goods when they are identified as the goods covered by the contract even though they are in fact nonconforming. The seller retains an insurable interest in goods so long as he has either title or a security interest in them [2-501(2)].

Sales on Trial

A common commercial practice is for a seller of goods to entrust possession of goods to a buyer to either give the buyer an opportunity to decide whether or not to buy them or to try to resell them to a third person. The entrusting may be known as a **sale on approval**, a **sale or return**, or a **consignment**, depending on the terms of the entrusting. Occasionally, the goods may be damaged, destroyed, or stolen, or the creditors of the buyer may try to claim them; on such occasions, the form of the entrusting will determine whether the buyer or the seller had the risk of loss and whether the buyer's creditors can successfully claim the goods.

Sale on Approval In a sale on approval, the goods are delivered to the buyer with an understanding that he may use or test them for the purpose of determining whether he wishes to buy them [2-326(1)(a)]. In a sale on approval, neither the risk of loss nor title to the goods passes to the buyer until he accepts the goods. The buyer has the right to use the goods in any manner consistent with the purpose of the trial, but any unwarranted exercise of ownership over the goods is considered to be

CONCEPT REVIEW

Risk of Loss

The point at which the risk of loss or damage to goods identified to a contract passes to the buyer is as follows:

1. If there is an agreement between the parties, the risk of loss passes to the buyer at the time they have agreed to.
2. If the contract requires the seller to ship the goods by carrier but does not require that the seller guarantee their delivery to a specific destination (shipment contract), the risk of loss passes to the buyer when the seller has delivered the goods to the carrier and made an appropriate contract for their carriage.
3. If the contract requires the seller to guarantee delivery of the goods to a specific destination (destination contract), the risk of loss passes to the buyer when the seller delivers the goods to the designated destination.
4. If the goods are in the hands of a third person and the contract calls for delivery without moving the goods, the risk of loss passes to the buyer when the buyer has the power to take possession of the goods—for example, when he receives a document of title.
5. In any situation other than those noted above where the seller is a merchant, the risk of loss passes to the buyer on his receipt of the goods.
6. In any situation other than those noted above where the seller is not a merchant, the risk of loss passes to the buyer on the tender of delivery to the buyer by the seller.
7. When a seller tenders goods that the buyer lawfully could reject because they do not conform to the contract description, the risk of loss stays on the seller until the defect is cured or the buyer accepts them.
8. When a buyer rightfully revokes acceptance of goods, the risk of loss is on the seller from the beginning to the extent it is not covered by the buyer's insurance.
9. If a buyer repudiates a contract for identified, conforming goods before risk of loss has passed to the buyer, the buyer is liable for a commercially reasonable time for any loss or damage to the goods that is not covered by the seller's insurance.

an acceptance of the goods. Similarly, if the buyer fails to notify the seller of his election to return the goods, he is considered to have accepted them [2–327]. For example, if Dealer agrees to let Hughes take a new automobile home to drive for a day to see whether she wants to buy it and Hughes takes the car on a two-week vacation trip, Hughes will be considered to have accepted the automobile because she used it in a manner beyond that contemplated by the trial and as if she were its owner. If Hughes had driven the automobile for a day, decided not to buy it, and parked it in her driveway for two weeks without telling Dealer of her intention to return it, Hughes would also be deemed to have accepted the automobile.

Once the buyer has notified the seller of his election to return the goods, the return of the goods is at the seller's expense and risk. Because the title and risk of loss of goods delivered on a sale on approval remain with

the seller, goods held on approval are not subject to the claims of the buyer's creditors until the buyer accepts them [2–326].

Sale or Return In a sale or return, goods are delivered to a buyer for resale with the understanding that the buyer has the right to return them [2–326(1)(b)]. Under a sale or return, the title and risk of loss are with the buyer. While the goods are in the buyer's possession, they are subject to the claims of his creditors [2–326 and 2–327]. For example, if Publisher delivers some paperbacks to Bookstore on the understanding that Bookstore may return any of the paperbacks that remain unsold at the end of six months, the transaction is a sale or return. If Bookstore is destroyed by a fire, the risk of loss of the paperbacks was Bookstore's and it is responsible to Publisher for the purchase price. Similarly, if Bookstore becomes

The Global Business Environment

Risk of Loss in International Sales

Risk of loss is an important concept in the sale of goods—and takes on additional significance in international sales because of the substantial distances and multiple modes of transportation that may be involved. Between the time a contract is formed and the time the obligations of the parties are completed, the goods that are the subject of the contract may be lost, damaged, or stolen. Both the UCC and the Convention on Contracts for International Sale of Goods (CISG) explicitly address risk of loss in four different situations: (1) where goods are being held by the seller; (2) where goods are being held by a third person or bailee; (3) where goods are in transit; and (4) where goods are in the control of the buyer. Moreover, the CISG deals with risk of loss where goods have been sold or resold while in transit. Under both the UCC and the CISG, breach by a party may alter the basic rules regarding risk of loss.

Before discussing the CISG provisions, it is important to note that the definitions of some terms in the UCC differ from the meaning those terms may have in international trade. The International Chamber of Commerce has compiled a list of widely accepted international shipping terms in a document known as “INCOTERMS.” The most recent version, INCOTERMS 2000, includes 13 different terms that are placed in four different categories, depending on the seller’s responsibilities concerning the goods.

Under the first category (known as Group “E”), the seller’s obligation is only to make the goods available to the buyer at the seller’s place of business. This is referred to as an EXW, or EX Works, term. Risk passes from the seller to the buyer when the goods are placed at the buyer’s disposal. Under the second category (known as Group “F”), the seller is required to deliver the goods to a carrier designated by the buyer. This category includes terms like “F.O.B.” (Free on Board) and “F.A.S.” (Free Along Side Ship). Passage of risk varies with the term.

Terms in the third category (Group “C”) require the seller to contract for carriage of the goods but not to assume the risk of loss after shipment. Terms in the fourth category (Group “D”) impose on the seller the costs and risks of bringing the goods to the country of destination. Under one such term, “D.A.F.” (Delivered at Frontier), the seller must pay for the carriage of goods to some defined point after that where goods have been cleared for export in the country of origin but before the customs boundary of another identified, usually adjoining, country.

The CISG, like the UCC, provides a set of default rules governing risk of loss where the parties do not explicitly address risk of loss in their contract. However, it also permits parties to contract out of those rules. Parties to international agreements commonly utilize the INCOTERMS and incorporate them into contracts otherwise governed by the CISG. Thus, the INCOTERMS are used to define when risk of loss passes, and CISG, in turn, provides the legal consequences of the passage of the risk of loss in a particular case.

insolvent and is declared a bankrupt, the paperbacks will be considered part of the bankruptcy estate. If the buyer elects to return goods held on a sale or return basis, the return is at the buyer’s risk and expense.

Sale on Consignment Sometimes, goods are delivered to a merchant on consignment. If the merchant to whom goods are consigned maintains a place of business dealing in goods of that kind under a name other than that of the person consigning the goods, then the consignor must take certain steps to protect his interest in the goods or they will be subject to the claims of the merchant’s creditors. The consignor must (1) make sure that a sign indicating the consignor’s interest is prominently posted at the place of business, or (2) make sure that the merchant’s creditors know that he is generally in the business of selling goods owned by others, or (3) comply with the filing provisions of Article 9 of the Code—Secured Transactions.

For example, Jones operates a retail music store under the name of City Music Store. Baldwin Piano Company delivers some pianos to Jones on consignment. If no notices are posted indicating Baldwin’s interest in the pianos, if Jones is not generally known to be selling from a consigned inventory, and if Baldwin does not file its interest with the recording office pursuant to Article 9 of the Code, then the goods are subject to the claims of Jones’s creditors. This is crucial to Baldwin because it may have intended to retain title. However, the Code treats a consignment to a person doing business under a name other than that of the consignor as a “sale or return” [2–326(3)]. If Jones did business as the Baldwin Piano Company, Baldwin’s interest would be protected from the claims of Jones’s creditors without the need for Baldwin to post a sign or to file under Article 9.

The risk taken by a consignor who does not take appropriate steps to protect his interest is illustrated in the following case, *In re Corvette Collection of Boston, Inc.*

In Re Corvette Collection of Boston, Inc. 294 B.R. 409 (U.S.B.C., S.D. Fla. 2003)

Corvette Collection of Boston, Inc., was a used Corvette dealership located in Pompano Beach, Florida. Corvette Collection owned some of its inventory and held the rest on consignment. In addition, the company also serviced Corvettes and sold Corvette parts. On November 20, 2001, Corvette Collection (the debtor) filed a voluntary Chapter 11 (reorganization) petition in bankruptcy. On January 22, 2002, the petition was converted to a case under Chapter 7 (liquidation).

On the date the petition in bankruptcy was filed, Corvette Collection had in its possession six Corvettes that had been consigned to it by The Corvette Experience, Inc. Three of the cars were assigned pursuant to written consignment agreements and three by oral consignment agreements. In each case, the cars were owned by individuals who held title to them, and the cars had been assigned to Corvette Experience. Corvette Experience had not filed a UCC financing statement or recorded a security agreement with the Florida Department of Motor Vehicles (see Chapter 29—Security Interests in Personal Property for a discussion of these concepts). Rather, Corvette Experience withheld the respective Corvette certificates of title prior to placing the vehicles on consignment with Corvette Collection. Pursuant to the consignment agreements, if Corvette Collection had sold the Corvettes at the minimum price permitted by the agreement, Corvette Experience would have been required to turn over the titles.

The Bankruptcy Trustee asserted that the six vehicles were consigned by Corvette Experience to Corvette Collection and that because Corvette Experience did not properly perfect its consignment interest by complying with the Florida UCC section 2–326, Corvette Collection held the consigned Corvettes “sale or return,” thereby subjecting the vehicles to the claims of Corvette Collection’s creditors. On the other hand, Corvette Experience contended that because the creditors of Corvette Collection were aware that it was substantially engaged in selling the consigned vehicles, the vehicles were held by Corvette Collection “sale on approval.” As such, the Corvettes would not be subject to the claims of Corvette Collection’s creditors.

Friedman, Bankruptcy Judge

Consignments are governed by UCC section 2–326(1). This provision recognizes two types of consignments. In a “sale on approval” transaction, the consignor delivers goods to the consignee primarily for use. Goods held on approval are not subject to the claims of the consignee’s creditors until acceptance, and the consignor need not take any action to protect its interest in the goods. On the other hand, in a “sale or return” consignment, the consignor delivers goods to the consignee primarily for resale. Goods held “sale or return” are subject to the claims of the consignee’s creditors. More importantly, pursuant to section 544(a) of the Bankruptcy Code, all goods held by the debtor sale or return become assets of the estate.

With regard to consigned goods, there is a presumption that goods are held by the debtor “sale or return”; therefore, the goods are subject to the claims of the debtor’s creditors. However, the consignor may overcome this presumption by proving (1) he or she has complied with an applicable law providing for a consignor’s interest or the like to be evidenced by a sign, or (2) he or she established that the person conducting the business is generally known by his or her creditors to be substantially engaged in selling the goods of others, or (3) he or she complied with the filing provisions of the chapter on secured transactions. In the instant case, it is undisputed that Corvette Experience had not complied with two of the exceptions since they neither recorded a UCC–1 financing statement nor placed

a sign above the Corvettes stating that they were held on consignment. Thus, the second issue before this Court is whether the debtor is a company that is generally known by its creditors to be substantially engaged in selling the goods of others.

Since there is a presumption that the debtor holds the Corvettes on a “sale or return” basis, the burden of proof is on Corvette Experience to prove by a preponderance of the evidence that the debtor was generally known by its creditors to be substantially engaged in the sale of goods of others. Corvette Experience must prove by a preponderance of the evidence (1) that the consignee is substantially engaged in selling the goods of others and (2) that the debtor is generally known by the creditors of the consignee that this is the case. Both prongs of this test must be satisfied in order for the consignor to overcome the presumption that the goods are held “sale or return.”

As to the first prong, whether the debtor was substantially engaged in selling the goods of others, Corvette Experience presented no evidence regarding the debtor’s inventory on the petition date. The parties stipulated that the debtor was a used Corvette dealership that also serviced Corvettes and sold Corvette parts. The parties also stipulated that the debtor owned some of its used Corvettes and consigned the rest. To meet their burden, Corvette Experience, experienced consignors, testified that most of the debtor’s inventory was held on consignment and that everybody who wanted to sell a Corvette knew that the debtor primarily sold consigned vehicles. This testimony falls

well short of Corvette Collection's burden of proving by a preponderance of the evidence that the consignee was substantially engaged in selling the goods of others.

With regard to the second prong, Corvette Experience, the defendants, also fell short of its burden. To satisfy the "generally known" prong of the test, the consignors must prove that a majority of the debtor-consignee's creditors were aware that the consignee was substantially engaged in selling the goods of others, that is, consignment sales. That majority is determined by the number of creditors, not by the amount of their claims.

According to the debtor's schedules, consignors constitute only a portion of the debtor's creditors. The debtor has a number of trade creditors such as utility companies and parts suppliers. The trustee presented the testimony of representatives of two trade creditors, Inter-Tel Technologies (a telephone leasing company) and Dixie Staffing (an employee staffing company), both of whom testified that they had no knowledge as to whether the debtor owned any inventory on consignment. Corvette Experience provided no evidence to establish that a traditional trade creditor would believe that the debtor was substantially engaged in the sale of goods of others. In fact, Mr. Finley testified that it would have been detrimental to the debtor had third parties known that the debtor was a consignment shop because potential purchasers would try to contact the Corvette owners directly to "cut out the middle-man" and obtain a better price. Furthermore, in order to satisfy their burden of proof, Corvette Experience testified that they believed Corvette Collection's creditors perceived the debtor to be a consignment shop. This testimony is insufficient to satisfy Corvette Experience's burden of proof. Testimony as to general knowledge in the industry is insufficient to prove knowledge by a majority of creditors.

This case is factually similar to *In re Valley Media, Inc.*, (Bankr. D. Del. 2002). In *Valley Media*, some of the debtor's

vendors had entered into consignment arrangements with the debtor prior to the debtor's filing for bankruptcy. The consigned inventory was commingled with all of the other inventory of the debtor at two warehouse locations. No signs were posted at the warehouses, and there were no signs or markings on the consigned inventory indicating that the inventory had been obtained on a consignment basis. When the debtor moved the bankruptcy court to sell all of its inventory, the consignment vendors objected arguing that they owned their consignment inventory by virtue of their consignment arrangements. The court observed that the consignors could have obtained a prior interest in their consigned goods if they had either (1) filed UCC-1 financing statements identifying their goods as required under UCC Article 9, or (2) proved that the consignee was generally known by its creditors to be substantially engaged in selling the goods of others.

In the instant case, like in *Valley Media*, Corvette Experience could have obtained a prior interest in their consigned goods if they had either filed UCC-1 financing statements identifying their goods as required under UCC Article 9, or proved that the debtor was generally known by its creditors to be substantially engaged in selling the goods of others. However, the instant Corvette Experience did neither. They did not file an appropriate UCC financing statement, and they did not prove by a preponderance of the evidence that the debtor was substantially engaged in selling the goods of others. Therefore, the debtor held the Corvettes on a "sale or return" basis at the time the debtor filed for bankruptcy. Accordingly, the Corvettes are subject to the claims of the debtor's creditors, and the trustee may, for the benefit of the estate, sell the Corvettes free and clear of Corvette Experience's (and its assignees') interests.

Judgment in favor of the Bankruptcy Trustee.

Problems and Problem Cases

1. Star Coach, L.L.C., is in the business of converting sport utility vehicles and pickup trucks into custom vehicles. Star Coach performs the labor involved in installing parts supplied by other companies onto vehicles owned by dealers. Heart of Texas Dodge purchased a new Dodge Durango from Chrysler Motors and entered into an agreement with Star coach whereby Star Coach would convert the Durango to a

Shelby 360 custom performance vehicle and then return the converted vehicle to Heart of Texas Dodge. The manufacturer delivered the dealer's Durango to Star Coach and, over a period of several months, Star Coach converted the vehicle using parts supplied by another company, Performance West. Several months later, Star Coach delivered the vehicle to Heart of Texas Dodge, and Heart of Texas Dodge paid Star Coach the contract price of \$15,768 without inspecting the vehicle. Two days later, Heart of Texas Dodge

inspected the vehicle and concluded that the workmanship was faulty. It stopped payment on the check and Star Coach filed suit against Heart of Texas Dodge. One of the issues in the litigation was whether the UCC applied to the contract in this case. Does the UCC apply to a contract for the conversion of a van that involves both goods and services?

2. Keith Russell, a boat dealer, contracted to sell a 19-foot Kinswater boat to Robert Clouser for \$8,500. The agreement stipulated that Clouser was to make a down payment of \$1,700, with the balance due when he took possession of the boat. According to the contract, Russell was to retain possession of the boat in order to install a new engine and drive train. While the boat was still in Russell's possession, it was completely destroyed when it struck a seawall. Transamerica, Russell's insurance company, refused to honor Russell's claim for the damages to the boat.

The insurance policy between Transamerica and Russell covered only watercraft under 26 feet in length that were not owned by Russell. Transamerica argued that the boat was not covered by the policy since Russell still owned it at the time of the accident. Did Russell have title to the boat at the time of the accident?

3. In December 1990, Arlene Bradley entered Alsafi Oriental Rugs and advised the owner that she was an interior decorator and that she was interested in selling some of his rugs to one of her customers. Alsafi did not know Bradley and had never done business with her. However, he allowed her to take three rugs out on consignment with the understanding that she would return them if her customer was not interested. In fact, however, Bradley was not obtaining the rugs for a "customer" but was instead working for another individual, Walid Salaam, a rug dealer.

A friend of Bradley's had introduced her to Salaam earlier. Salaam had advised the two women that he was the owner of a recently closed oriental rug store that he was attempting to reopen. He offered to teach them how to become decorators and told them that when his store reopened, they could operate out of the store. Salaam advised them that until he got his store restocked, however, he wanted them to "check out" rugs on approval from other rug dealers in town. As they had no experience with oriental rugs, Salaam instructed them which rugs to look for. He then instructed them to go to rug dealers in Memphis and

advise them that they were interior decorators with customers that wanted to purchase oriental rugs.

After Bradley obtained possession of the three rugs from Alsafi, she turned them over to Salaam, who in turn took them to a pawnshop operated by the American Loan Company. There Salaam pawned the rugs, obtaining approximately \$5,000 after filling out the required paperwork. Salaam failed to redeem the rugs. Following the default, the pawnshop gave the appropriate notice that it intended to dispose of them.

In April 1991 Alsafi learned that his rugs were at the pawnshop. After visiting the pawnshop and identifying the three rugs as his, he brought suit to recover possession of them.

Was Alsafi entitled to recover the rugs from the pawnshop?

4. On May 8, 2000, Paul Sutton delivered his 1995 Harley Davidson Model FLF motorcycle to Super Bikes to allow it to display the motorcycle for sale. Sutton retained the keys and the certificate of title to the motorcycle, but the keys were not necessary to drive it. The written consignment agreement provided that Sutton would receive \$18,000 on the sale of the motorcycle and that Super Bikes would retain everything over that; there also was a pencil notation of "low dollars 17,000." On August 17, 2000, Mike Snider paid Super Bikes \$17,500, the price it asked for the vehicle, and took possession of the motorcycle. He was aware that Super Bikes held it on consignment but was not aware of the consignor or of any of the terms of the consignment. Snider testified that Super Bikes said it would deliver the title to him as soon as his check cleared.

Super Bikes never paid Sutton for the motorcycle. Sutton discovered that Snider had the motorcycle and sent letters to both Snider and to the owners of Super Bikes demanding either the return of possession of the motorcycle or the payment of \$17,500. Sutton then brought a lawsuit against Snider seeking return of the motorcycle. Snider asserted that he had obtained good title to the motorcycle as a buyer in the ordinary course of business from a dealer in goods of that kind. Did Snider get good title to the motorcycle as a buyer in the ordinary course of business?

5. Legendary Homes, a home builder, purchased various appliances from Ron Mead T.V. & Appliance, a retail merchant selling home appliances. They were intended

to be installed in one of Legendary Homes' houses and were to be delivered on February 1. At 5 o'clock on that day, the appliances had not been delivered. Legendary Homes' employees closed the home and left. Sometime between 5 and 6:30, Ron Mead delivered the appliances. No one was at the home so the deliveryman put the appliances in the garage. During the night, someone stole the appliances. Legendary Homes denied it was responsible for the loss and refused to pay Ron Mead for the appliances. Ron Mead then brought suit for the purchase price. Did Legendary Homes have the risk of loss of the appliances?

6. The Cedar Rapids YMCA bought a large number of cases of candy from Seaway Candy under an agreement by which any unused portion could be returned. The YMCA was to sell the candy to raise money to send boys to camp. The campaign was less than successful, and 688 cases remained unsold. They were returned to Seaway Candy by truck. When delivered to the common carrier, the candy was in good condition; when it arrived at Seaway four days later, it had melted and was completely worthless. Seaway then brought suit against the YMCA to recover the purchase price of the candy spoiled in transit. Between Seaway and the YMCA, which had the risk of loss?
7. In June, Ramos entered into a contract to buy a motorcycle from Big Wheel Sports Center. He paid the purchase price of \$893 and was given the papers necessary to register the cycle and get insurance on it. Ramos registered the cycle but had not attached the license plates to it. He left on vacation and told the salesperson for Big Wheel Sports Center that he would pick up the cycle on his return. While Ramos was on vacation, there was an electric power blackout in New York City and the cycle was stolen by looters. Ramos then sued Big Wheel Sports Center to get back his \$893. Did Big Wheel Sports Center have the risk of loss of the motorcycle?
8. On December 14, 1998, Shepherd Machinery Co. sold five Caterpillar tractors to O.C.T. Equipment. At the time of the sale, the tractors were parked at the Keen Transport yard in Santa Paula, California, and were shown to Mike Clark, O.C.T.'s representative, on that date. The parties agreed, among other things, that all of the tractors would be painted yellow and that a winch would be installed on one of the tractors before delivery. An invoice was faxed to O.C.T. on December 22, and it wired payment to Shepherd later that day. The tractors remained at Keen from the time Clark viewed them and agreed to purchase them. Shepherd sent instructions to Keen not to release any of the tractors to O.C.T.'s carrier until Keen had received a bill of lading for each tractor and a release from a Shepherd employee.

On December 23, Shepherd sent O.C.T. a fax indicating that the tractors would be ready for pickup on December 28. O.C.T. had asked that each of the tractors be checked for antifreeze levels because of a concern they would be going through high elevations en route to Oklahoma. The levels were checked and sent to O.C.T. The list showed that tractor JAK0012531 had no antifreeze level, and Keen was asked to recheck that tractor for antifreeze.

Keen contacted Shepherd on December 31 to advise it that on the prior evening, before the tractor had been picked up, a security guard at Keen had driven tractor JA0012531 at a point when it had no antifreeze/coolant in it and that the engine was burned up and ruined. Shepherd then reported the problem to O.C.T. and also took the position that O.C.T. owned the tractor and would have to work with Keen to resolve the damage. O.C.T. refused to take delivery of the damaged tractor, and after it and Shepherd were unable to agree on who had the risk of loss to the tractor, O.C.T. brought suit to recover from Shepherd the \$43,000 it had paid Shepherd for the tractor. Had the risk of loss passed to O.C.T. at the time the tractor was damaged while in the hands of the bailee?
9. Edd and Diane Auclair maintained a place of business in Covington County, Alabama, where they operated a gun shop and convenience store named Heath Grocery and Final Chapter Firearms. In November 1989, Luke Jackson delivered about 70 firearms to the Auclairs to sell on consignment. The consignment agreement provided as follows: "I Edd Auclair have received a number of guns, of which a list will be attached and I will sign. As I sell a gun I will pay James E. 'Luke' Jackson or Betty King with them giving me a receipt for that particular gun. If something should happen to Luke Jackson the guns are to be returned to Betty King or at that time Betty King and Edd Auclair can enter into an agreement. If something should happen to Edd Auclair, Diane agrees to return all guns that have not been paid for to Luke Jackson or Betty King and pay for any that has [*sic*] been sold." The agreement was signed by Jackson, King, and the Auclairs.

On June 28, 1990, the Auclairs filed a petition in bankruptcy under Chapter 11 of the Bankruptcy Act. Shortly thereafter Jackson removed the firearms he had consigned from the Auclairs' store. The bankruptcy trustee representing the Auclairs' creditors claimed that the firearms were the property of the bankruptcy estate. Were the firearms that Jackson had delivered to the Auclairs pursuant to the consignment agreement subject to the claims of the Auclairs' creditors?

Online Research

Using the Internet to Buy a Computer

Assume you are considering the purchase of a new computer. Use the Internet to access the Web site of the manufacturer of the computer you are considering. Ascertain the following: (1) the purchase price of the model you prefer; (2) the cost of having the computer shipped to you; (3) the warranties, if any, that will be provided; and (4) whether you would be able to get a full refund if you do not find the computer acceptable after it is delivered to you.

chapter 20

PRODUCT LIABILITY

In recent years, newly developed prescription pain relievers known as COX-2 Inhibitors proved to be especially effective for arthritis sufferers and other persons who experienced chronic pain. Various pharmaceutical companies, including Merck & Co., produced such pain relievers. Merck's heavily advertised Vioxx brand became one of the most widely prescribed COX-2 Inhibitors and generated very large sales figures from 1999 to 2004. As 2004 wore on, however, news stories began to focus on a growing number of complaints that certain Vioxx users had experienced a heart attack or a stroke after using Vioxx over a prolonged period of time.

With the public reading and hearing about a possible—and previously undisclosed—relationship between long-term Vioxx use and greater risk of heart attack or stroke, there were calls in some quarters for the federal Food and Drug Administration (FDA) to order the removal of Vioxx from the market. Similar views were expressed regarding other firms' COX-2 Inhibitors. Merck decided, on its own, to cease Vioxx sales after a 2004 Merck study indicated a potential link between Vioxx use of at least 18 months and an increased heart attack or stroke risk. (The FDA later required the withdrawal from the market of Bextra, one of two COX-2 Inhibitors produced by Pfizer, Inc. Pfizer's Celebrex remained on the market but was subject to a requirement to warn users of a possible increase in their heart attack and stroke risks.)

By mid-2005, Merck faced approximately 4,000 pending or threatened lawsuits in which former Vioxx users or their estates contended that Vioxx use had caused the users to experience heart attacks or strokes. In these product liability cases, the plaintiffs typically alleged that Merck had known of such a link as far back as 1997 but had failed to inform physicians and their patients of the potential danger. The first of these cases to go to trial resulted in an August 2005 verdict in favor of the estate of Robert Ernst, a Vioxx user who experienced a heart arrhythmia that proved fatal. The verdict of approximately \$250 million in damages—\$25 million compensatory and \$225 million punitive—shocked Merck, whose spokespersons asserted that the jury had erred in finding the existence of adequate proof of a specific causation link between Vioxx use and Ernst's heart condition. In addition, Merck protested that no study had linked Vioxx use with heart arrhythmia, as opposed to other cardiac problems. Despite its vow to appeal the verdict, and its later success in several of the Vioxx cases brought against it, Merck found itself having to decide whether to continue following its previously announced policy of aggressively defending against all Vioxx cases instead of attempting to settle them. In November 2007, Merck agreed to set up a fund of \$4.85 billion to settle Vioxx-related claims against the company. Approximately 45,000 of 60,000 potentially eligible claimants had enrolled in the settlement plan as of March 2008.

As you read this chapter, think about the preceding paragraphs and consider the following questions:

- On what product liability theory or theories would the plaintiffs in the Vioxx cases have been relying?
- What legal elements must the plaintiffs prove in order to win the Vioxx cases?
- Are punitive damages routinely awarded, in addition to compensatory damages, in product liability cases?

What would the plaintiff in the *Ernst* case have had to prove in order for punitive damages to have been assessed against Merck?

- If a manufacturer's product works well for most users but the manufacturer is aware that some users may experience harm as a result of using it, what would utilitarians and rights theorists say concerning whether the manufacturer has an ethical obligation to warn about the risk of harm or to suspend sales of the product? (You may wish to consult the discussion of ethical theories in Chapter 4 as you answer this question.)

SUPPOSE YOU HOLD AN executive position in a firm that makes products for sale to the public. One of your concerns would be the company's exposure to civil liability for defects in those products. In particular, you might worry about legal developments that make such liability more likely or more expensive. In other situations, however, such developments might appeal to you—especially if *you* are harmed by defective products you purchase as a consumer. You might also appreciate certain liability-imposing legal theories if your firm wants to sue a supplier that has sold it defective products.

Each of these situations involves the law of *product liability*, the body of legal rules governing civil lawsuits for losses and harms resulting from a defendant's furnishing of defective goods. After sketching product liability law's historical evolution, this chapter discusses the most important *theories of product liability* on which plaintiffs rely. The second part of the chapter considers certain legal problems that may be resolved differently under different theories of recovery.

The Evolution of Product Liability Law

The 19th Century A century or so ago, the rules governing suits for defective goods were very much to manufacturers' and other sellers' advantage. This was the era of *caveat emptor* (let the buyer beware). In contract cases involving defective goods, there usually was no liability unless the seller had made an express promise to the buyer and the goods did not conform to that promise. In negligence cases, the "no liability without fault" principle was widely accepted, and plaintiffs often had difficulty proving negligence because the necessary evidence was under the defendant's control. In both contract and negligence cases, finally, the doctrine of "no liability outside privity of contract"—that is, no liability without a direct contractual relationship between plaintiff and defendant—often prevented plaintiffs from recovering against parties with whom they had not directly dealt.

The laissez-faire approach that influenced public policy and the law helped lead to such prodefendant rules. One illustration of that approach was the notion that manufacturers and other sellers should be contractually bound only when they deliberately assumed such liability by making a promise to someone with whom they dealt directly. Another factor limiting manufacturers' liability for defective products was the perceived importance of promoting industrialization by preventing potentially crippling damage recoveries against infant industries. Even though the 19th century's approach to product liability was prodefendant, some commentators maintain that most plaintiffs were not especially disadvantaged by the applicable legal rules. Goods tended to be simple, so buyers often could inspect them for defects. Before the emergence of large corporations late in the 19th century, moreover, sellers and buyers often were of relatively equal size, sophistication, and bargaining power. Thus, they could deal on a relatively equal footing.

The 20th and 21st Centuries Today, laissez-faire values, while still influential, do not pack the weight they once did. With the development of a viable industrial economy, there has been less perceived need to protect manufacturers from liability for defective goods. The emergence of long chains of distribution has meant that consumers often do not deal directly with the parties responsible for defects in the products they buy. Because large corporations tend to dominate the economy, consumers are less able to bargain freely with the corporate sellers with which they deal. Finally, the growing complexity of goods has made buyers' inspections of the goods more difficult.

In response to these changes, product liability law has moved from its earlier *caveat emptor* emphasis to a stance of *caveat venditor* (let the seller beware). To protect consumers, modern courts and legislatures effectively intervene in private contracts for the sale of goods and sometimes impose liability regardless of fault. As a result, sellers and manufacturers face greater liability

and higher damage assessments for defects in their products. Underlying the shift toward *caveat venditor* is the belief that sellers, manufacturers, and their insurers are better able to bear the economic costs associated with product defects, and that they usually can pass on these costs through higher prices. Thus, the economic risk associated with defective products has been effectively spread throughout society, or “socialized.”

The Current Debate over Product Liability Law

Modern product liability law and its socialization-of-risk rationale have come under increasing attack over the past three decades. Such attacks often focus on the difficulty sellers and manufacturers encounter in obtaining product liability insurance and the increased costs of such insurance. Some observers blame insurance industry practices for these developments, whereas others trace them to the increased liability and greater damage recoveries just discussed. Whatever their origin, these problems have sometimes put sellers and manufacturers in a difficult spot. Businesses unwilling or unable to buy expensive product liability insurance run the risk of being crippled by large damage awards unless they self-insure, which can be an expensive option. Firms that purchase insurance, on the other hand, often must pay higher prices for it. In either case, the resulting costs may be difficult to pass on to consumers. Those costs may also deter the development and marketing of innovative new products.

For these reasons and others, recent years have witnessed many efforts to scale back the proplaintiff aspects of modern product liability law. This is one aspect of the tort reform movement discussed in Chapter 7. However, despite calls for federal reform bills, Congress had not made significant changes in product liability law as of the time this book went to press in 2008. As we note later in this chapter, however, some tort reform efforts have occurred in the states.

Theories of Product Liability Recovery

Some theories of product liability recovery are contractual and some are tort-based. The contract theories involve a product **warranty**—an express or implied promise about the nature of the product sold. In warranty cases, plaintiffs claim that the product failed to live up to the seller’s promise. In tort cases, on the other hand, plaintiffs usually argue that the defendant was negligent or that strict liability should apply.

Express Warranty

Creation of an Express Warranty UCC section 2–313(1) states that an **express warranty** may be created in any of three ways.

1. *If an affirmation of fact or promise* regarding the goods becomes part of the basis of the bargain (a requirement to be discussed shortly), there is an express warranty that the goods will conform to the affirmation or promise. For instance, if a computer manufacturer’s Web site says that a computer has a certain amount of memory, this statement may create an express warranty to that effect.
2. *Any description* of the goods that becomes part of the basis of the bargain creates an express warranty that the goods will conform to the description. Descriptions include (1) statements that goods are of a certain brand, type, or model (e.g., a Hewlett-Packard laser printer); (2) adjectives that characterize the product (e.g., shatter-proof glass); and (3) drawings, blueprints, and technical specifications.
3. Assuming it becomes part of the basis of the bargain, a *sample* or *model* of goods to be sold creates an express warranty that the goods will conform to the sample or model. A sample is an object drawn from an actual collection of goods to be sold, whereas a model is a replica offered for the buyer’s inspection when the goods themselves are unavailable.

The first two types of express warranties may often overlap; also, each may be either written or oral. “Magic” words such as *warrant* or *guarantee* are not necessary for creation of an express warranty.

Value, Opinion, and Sales Talk Statements of *value* (“This chair would bring you \$2,000 at an auction”) or *opinion* (“I think this chair might be an antique”) do not create an express warranty. The same is true of statements that amount to *sales talk* or *puffery* (“This chair is a good buy”). No sharp line separates such statements from express warranties. In close cases, a statement is more likely to be an express warranty if it is specific rather than indefinite, if it is stated in the sales contract rather than elsewhere,¹ or if it is unequivocal rather than hedged or qualified. The relative knowledge possessed by the seller and the buyer also matters. For instance, a

¹Parol evidence rule problems may arise in express warranty cases. For example, a seller who used a written contract may argue that the rule excludes an alleged oral warranty. On the parol evidence rule, see Chapter 16.

car salesperson's statement about a used car may be more likely to be an express warranty where the buyer knows little about cars than where the buyer is another car dealer. The *Felley* case, which follows shortly, discusses some of the express warranty issues addressed so far, as well as the important basis-of-the-bargain requirement to which we now turn.

The Basis-of-the-Bargain Requirement Under pre-UCC law, there was no recovery for breach of an express warranty unless the buyer significantly relied on that warranty in making the purchase. The UCC, however, requires—though ambiguously—that the affirmation, promise, description, or sample or model have become *part of the basis of the bargain* in order for an express warranty to be created. Some courts read the Code's basis-of-the-bargain test as saying that significant reliance still is necessary. Others require only that the seller's warranty have been a *contributing factor* in the buyer's decision to purchase. Still others do not require any specific reliance on the buyer's part.

Advertisements Statements made in advertisements, catalogs, or brochures may be express warranties. How-

ever, such sources often are filled with sales talk. Basis-of-the-bargain problems may arise if it is unclear whether or to what degree the statement induced the buyer to make the purchase. For example, suppose that the buyer read an advertisement containing a supposed express warranty one month before actually purchasing the product.

Multiple Express Warranties What happens when a seller gives two or more express warranties and those warranties arguably conflict? UCC section 2-317 says that such warranties should be read as consistent with each other and as cumulative if this is reasonable. If not, the parties' intention controls. In determining that intention (1) exact or technical specifications defeat a sample, a model, or general descriptive language; and (2) a sample defeats general descriptive language.

As indicated by the *Felley* case, which follows, any seller—professional or not—may make an express warranty. When such a warranty has been breached (because the goods were not as warranted), the plaintiff who demonstrates resulting losses is entitled to compensatory damages.

Felley v. Singleton

705 N.E.2d 930 (Ill. App. 1999)

On June 8, 1997, Brian Felley went to the home of Thomas and Cheryl Singleton to look at a used car that the Singletons had offered for sale. The car, a 1991 Ford Taurus, had approximately 126,000 miles on it. Felley test-drove the car and discussed its condition with the Singletons. The Singletons told him that the car was in "good mechanical condition" and that they had experienced no brake problems. This was a primary consideration for Felley, who purchased the car from the Singletons for \$5,800. Felley soon began experiencing problems with the car. On the second day after he bought it, he noticed a problem with the clutch. Over the next few days, the clutch problem worsened to the point where he was unable to shift the gears, no matter how far he pushed in the clutch pedal. He had to pay \$942.76 for the removal and repair of the clutch. Within the first month that Felley owned the car, it developed serious brake problems, the repairs of which cost Felley more than \$1,400.

Felley brought a small claims action against the Singletons, claiming that they had made and breached an express warranty to him. At trial, an expert witness testified that based on his examination of the car and discussion with Felley about the car and other factors, it was his opinion that the car's brake and clutch problems probably existed when Felley bought the car. The trial court ruled in Felley's favor and ordered the Singletons to pay him \$2,343.03. The Singletons appealed.

Bowman, Presiding Justice

On appeal, the Singletons contend that the trial court erred when it determined that the statements they made to Felley regarding the condition of the car constituted an express warranty. The Singletons argue that their statements were nothing more than expressions of opinion in the nature of puffery that could not properly be deemed an express warranty.

Section 2-313 of the Uniform Commercial Code governs the formation of express warranties by affirmation in the

context of a sale of goods such as a used car. Section 2-313 provides, in relevant part:

(1) Express warranties by the seller are created as follows:

(a) Any affirmation of fact or promise made by the seller to the buyer which relates to the goods and becomes part of the basis of the bargain creates an express warranty that the goods shall conform to the affirmation or promise.

(2) It is not necessary to the creation of an express warranty that the seller use formal words such as “warrant” or “guarantee” or that he have a specific intention to make a warranty, but an affirmation merely of the value of the goods or a statement purporting to be merely the seller’s opinion or commendation of the goods does not create a warranty.

The Singletons point to subsection (2) of section 2–313 as support for their argument that their statements to Felley did not constitute an express warranty. The Singletons also cite the official comments to subsection (2), which state:

Concerning affirmations of value or a seller’s opinion or commendation under subsection (2), the basic question remains the same: What statements of the seller have in the circumstances and in objective judgment become part of the basis of the bargain? As indicated above, all of the statements of the seller do so unless good reason is shown to the contrary. The provisions of subsection (2) are included, however, since common experience discloses that some statements or predictions cannot fairly be viewed as entering into the bargain.

In the Singletons’ view, their statements to Felley cannot fairly be viewed as entering into the bargain. They assert that they are not automobile dealers or mechanics with specialized knowledge of the brake and clutch systems of the car and therefore their statements were merely expressions of a vendor’s opinion that did not constitute an express warranty. Felley responds that the trial court correctly determined that the Singletons’ statements were affirmations of fact that became a basis of the bargain and therefore constituted an express warranty. In support of his position, Felley cites *Weng v. Allison* (Ill. App. 1997).

Whether an express warranty exists is a factual issue to be determined by the trier of fact. Consequently, it is well settled that a reviewing court may not reverse a trial court judgment regarding the existence of an express or implied warranty merely because different conclusions might have been drawn. *Weng* involved the sale of a 10-year-old used car for \$800. The car had 96,000 miles on it. When the buyers attempted to drive the car home, it failed to operate properly. An inspection at an automobile dealership revealed that the car was unsafe to drive and needed repairs costing about \$1,500. The seller had told the

buyers that the car was “mechanically sound,” “in good condition,” “a reliable car,” “a good car,” and had “no problems.” The trial court ruled that such representations could not become part of the basis of the bargain unless the buyer relied on them and that no one could reasonably rely on such statements with respect to such a car. In *Weng*, the appellate court disagreed and reversed the trial court. The appellate court determined that the representations made by the sellers were affirmations of fact that created an express warranty. The court stated that affirmations of fact made during a bargaining process regarding the sale of goods are presumed to be part of the basis of the bargain unless clear affirmative proof to the contrary is shown; that a showing of reliance on the affirmations by the buyer is not necessary for the creation of an express warranty; and that the seller has the burden to establish by clear affirmative proof that the affirmations did not become part of the basis of the bargain. The court also stated that the seller may be accountable for breach of warranty where affirmations are a basis of the bargain and the goods fail to conform to the affirmations.

We believe that the principles set out in *Weng* are correct. We agree with the *Weng* court that, in the context of a used car sale, representations by the seller such as the car is “in good mechanical condition” are presumed to be affirmations of fact that become part of the basis of the bargain. Because they are presumed to be part of the basis of the bargain, such representations constitute express warranties, regardless of the buyer’s reliance on them, unless seller shows by clear affirmative proof that the representations did not become part of the basis of the bargain. In this case, it is undisputed that Felley asked the Singletons about the car’s mechanical condition and the Singletons responded that the car was in good mechanical condition. Under the foregoing principles, the Singletons’ representations are presumed to be affirmations of fact that became a part of the basis of the bargain. Nothing in the record indicates that the Singletons made a clear and affirmative showing that their representations did not become part of the basis of the bargain. The trial court, as the fact finder in this case, could have reasonably found that the Singletons asserted a fact of which Felley was ignorant when they told Felley that the car was in good mechanical condition.

Judgment in favor of Felley affirmed.

Implied Warranty of Merchantability

An **implied warranty** is a warranty created by operation of law rather than the seller’s express statements. UCC section 2–314(1) creates the Code’s **implied warranty of merchantability** with this language: “[A] warranty

that the goods shall be merchantable is implied in a contract for their sale if the seller is a merchant with respect to goods of that kind.” This is a clear example of the modern tendency of legislatures to intervene in private contracts to protect consumers.

In an implied warranty of merchantability case, the plaintiff argues that the seller breached the warranty by selling unmerchantable goods and that the plaintiff should therefore recover damages. Under section 2–314, such claims can succeed only where the seller is a *merchant with respect to goods of the kind sold*.² An accounting professor’s sale of homemade preserves and a hardware store owner’s sale of a used car, for example, do not trigger the implied warranty of merchantability.

UCC section 2–314(2) states that, to be merchantable, goods must at least (1) pass without objection in the trade; (2) be fit for the ordinary purposes for which such goods are used; (3) be of even kind, quality, and quantity within each unit (case, package, or carton); (4) be adequately contained, packaged, and labeled; (5) conform to any promises or statements of fact made on the container or label; and (6) in the case of fungible goods, be of fair average quality. The most important of these requirements is that the goods must be *fit for the ordinary purposes for which such goods are used*. (In the *Moss* case, which appears later in the chapter, the implied warranty of merchantability was made but was not breached, because the relevant goods were suitable for ordinary purposes.) As indicated by the *Crowe* case,

²The term *merchant* is defined in Chapter 9.

which follows below, the goods need not be perfect to be fit for their ordinary purposes. Rather, they need only meet the reasonable expectations of the average consumer.

This broad, flexible test of merchantability is almost inevitable given the wide range of products sold in the United States today and the varied defects they may present. Still, a few generalizations about merchantability determinations are possible. Goods that fail to function properly or that have harmful side effects normally are not merchantable. A computer that fails to work properly or that destroys the owner’s programs, for example, is not fit for the ordinary purposes for which computers are used. In cases involving allergic reactions to drugs or other products, courts may find the defendant liable if it was reasonably foreseeable that an appreciable number of consumers would suffer the reaction. As revealed by *Newton v. Standard Candy Co.*, which appears immediately after the *Crowe* case, there is disagreement over the standard for food products that are alleged to be unmerchantable because they contain harmful objects or substances. Under the *foreign–natural* test, the defendant is liable if the object or substance is “foreign” to the product, but not liable if it is “natural” to the product. Increasingly, however, courts ask whether the food product met the consumer’s reasonable expectations.

Crowe v. CarMax Auto Superstores, Inc.

612 S.E.2d 90 (Ga. App. 2005)

In October 2002, Tina and Thad Crowe purchased a 1999 Dodge Durango automobile from CarMax Auto Superstores, Inc. They received a 30-day/1,000-mile express warranty from CarMax. In addition, the Crowes purchased an 18-month/18,000-mile “Mechanical Repair Agreement” (MRA). The obligated party on this extended warranty was a corporation other than CarMax. Over the course of the next year, the Crowes brought the vehicle to CarMax and other repair facilities numerous times for a variety of repairs. Some of these repairs are discussed in the edited version of the court’s opinion that appears below. All repairs within the original and extended warranty periods were done at little or no cost to the Crowes. However, the Crowes lost confidence in the vehicle because of the numerous times repairs had been necessary. In May 2003, the Crowes sued CarMax, contending that CarMax had breached the implied warranty of merchantability. After the trial court granted summary judgment in favor of CarMax, the Crowes appealed to the Georgia Court of Appeals.

Adams, Judge

We recently considered the implied warranty of merchantability [in] *Soto v. CarMax Auto Superstores*, 611 S.E.2d 108 (Ga. App. 2005):

Under [a Georgia statute], “a warranty that the goods shall be merchantable is implied in a contract for their sale if the seller is a merchant with respect to goods of that kind.” This warranty protects consumers from defects or conditions existing at the time of sale. . . . [I]t is clear that “the implied warranties warrant against defects or conditions existing at

the time of sale, but [they] do not provide a warranty of continuing serviceability.” [Case citation omitted.] It follows that proof that the [vehicle] was defective *when it was sold* is an essential element of [a] claim for breach of the implied warranty of merchantability.

The Crowes contend the trial court erred by finding that they did not meet their burden of showing that a jury question exists concerning whether the vehicle was defective at the time of sale. We find no error. Although the vehicle was first returned to CarMax just five days after it was sold [shortly before

mid-October 2002], the record shows that those repairs were primarily to remedy cosmetic defects that CarMax agreed to fix at the time of sale. The Crowes returned the car again on October 22, after what they contend was 11 days of actual use. (The odometer reading on that date was 41,536. At the time of purchase it was 40,376, indicating the car had been driven over 1,100 miles.) The problems noted on that visit were that the vehicle was consuming massive amounts of oil, that the instrument panel lights were flickering, and that the four-wheel-drive illumination light was not working. Tina Crowe testified that the problems were fixed on that visit.

The vehicle was returned to CarMax on November 13, 2002, because the “check engine” light was on. The repair ticket indicated that “false codes” were detected and removed. However, the problem with the check engine light reappeared in January 2003, and the vehicle was returned to CarMax. At this time a broken ground wire was found. Tina Crowe testified the problem was fixed to her satisfaction, as was a problem with the rear windshield wiper, which was remedied by replacing the wiper motor.

On the January visit, it was also noted that the vehicle was jerking and the engine was revving up to 6,000 rpm when [the car was being driven]. Tina Crowe testified that the problem with the engine revving persisted for several months and that she returned the car for repairs several times before the control module was replaced and the problem fixed in April 2003. The record shows that during this same period the engine was running rough, but that problem was attributed to carbon build-up in the cylinders and was also remedied. Tina Crowe testified she did not take the vehicle back to CarMax after the MRA expired, but instead took it to another facility for repair when it began stalling out in June 2003. At that time, a fuel system tune-up was performed. [A] speed sensor was replaced in August, and a ball bearing was replaced on the front of the car in October 2003. At that time, the Crowes had owned the vehicle a little over a year, and the odometer reading was at 65,621 miles, indicating the car had been driven over 25,000 miles

during [the Crowe’s ownership of the car]. Tina Crowe testified that at the time of her deposition in December 2003 there were no current problems with the car.

Based on this evidence, the trial court found that the Crowes failed to establish that the vehicle was defective when sold. We agree that this evidence does not present a jury question on this essential element of their claim. Although the vehicle was repaired on numerous occasions over the course of the first year of ownership, . . . for the most part these repairs were for different items or concerns on each occasion, and the problems were all remedied at the time the car was first brought in or on a subsequent visit. And although the Crowes argue strenuously that at least some evidence of a defect at the time of sale is shown by the fact that the car had to be returned for repairs after it was driven for just 11 days, the record shows that the primary complaint at that time was that the vehicle was consuming massive amounts of oil. [T]hat problem was remedied on that repair visit and did not recur. Moreover, although the vehicle had only been owned for a short period, it had already been driven in excess of 1,100 miles. The recurring problem with the engine revving was not detected until about three months later, and at that time the car had been driven almost 5,000 more miles. Although it took several attempts, that problem was also fixed. We note also that by the time the bearings had to be replaced in October 2003, the car had been driven over 25,000 miles since it was purchased about 13 months previously. Moreover, at the time of Tina Crowe’s deposition in December 2003, there were no current problems with the car.

Under these facts, we agree that no defect has been shown to exist at the time of purchase. [T]o find otherwise would require the jury to rely on speculation or conjecture, improper bases for imposing liability. The trial court did not err in granting summary judgment [in favor of CarMax].

Trial court’s grant of summary judgment to defendant affirmed.

Newton v. Standard Candy Co.

2008 U.S. Dist. LEXIS 21886 (D. Neb. 2008)

Standard Candy Co., a Tennessee firm, produces candy bars, including one known as the “Goo Goo Cluster.” The Goo Goo Cluster candy bar contains peanuts provided to Standard Candy by an outside supplier. When Nebraska resident James Newton II purchased a Goo Goo Cluster and bit into it, he encountered what he claimed to be an undeveloped peanut. Newton maintained that biting the undeveloped peanut caused him to experience a damaged tooth as well as recurring jaw-locking and hearing loss problems. Relying on diversity of citizenship jurisdiction, Newton filed a breach of implied warranty of merchantability lawsuit against Standard Candy in the U.S. District Court for the District of Nebraska. Standard Candy moved for summary judgment in its favor.

Bataillon, Chief District Judge

On a motion for summary judgment, the question before the court is whether the record, when viewed in the light most favorable to the nonmoving party, shows that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law.

Standard Candy argues there are two potential theories of recovery for Newton: (1) the “foreign-natural” doctrine, and (2) the “reasonable expectation of the consumer” test. [Asserting] that there are no clear cases in Nebraska dealing with this issue, [Standard Candy] relies on cases from other [states in an effort] to show that no matter what doctrine Nebraska follows, Newton would not win [his breach of implied warranty of merchantability claim]. Standard Candy contends that Newton must produce an expert under either of these theories and has failed to do so. [Newton’s witness list contains] two dental experts, but he has not listed any experts regarding an undeveloped peanut.

The “foreign-natural” doctrine provides there is no liability if the food product is natural to the ingredients, whereas liability exists [for resulting injuries] if the substance is foreign to the ingredients. *See, e.g., Mitchell v. T.G.I. Fridays*, 748 N.E.2d 89, 93 (Ohio App. 2000) (applying both tests, but concluding that a consumer who eats meat dishes knows there might be bones present under the foreign-natural doctrine). Standard Candy argues that if Nebraska follows this doctrine, it is clearly not liable. Newton’s injuries were a result of a peanut, which is part of the ingredients found in a Goo Goo Cluster.

Likewise, under the “reasonable expectation of the consumer” doctrine, Standard Candy argues that Newton cannot assert liability. *Jackson v. Nestle-Beich, Inc.*, 589 N.E.2d 547, 548 (Ill. 1992). In the *Jackson* case, the court stated: “The reasonable expectation test provides that, regardless whether a substance in a food product is natural to an ingredient thereof, liability will lie for injuries caused by the substance where the consumer of the product would not reasonably have expected to find the substance in the product.” Standard Candy argues that under this test, Newton would [have been] reasonably aware of peanuts in a Goo Goo Cluster candy bar. Further, Standard Candy contends that this is not a fact issue, but is a legal one. *See Mitchell* (clam shell piece in a clam strip was, as a matter of law, under either foreign-natural test or reasonable expectation test, reasonably expected to be there by the consumer); *Allen v. Grafton*, 164 N.E.2d 167, 174–75 (1960) (oyster shell in fried oysters did not create liability); *Koperwas v. Publix Supermarkets, Inc.*, 534 So.2d 872, 873 (Fla. App. 1988) (clam shell in clam chowder known to consumer and can be expected to reasonably guard against it); *Ex parte Morrison’s Cafeteria of Montgomery, Inc.*, 431 So.2d 975, 979 (Ala. 1983) (bone in fish filet not [a basis for liability]).

In response to Standard Candy’s motion for summary judgment, . . . Newton argues that [the supposed] undeveloped peanut [in the Goo Goo Cluster was] much like a rock. [Although Newton did not identify an expert witness who could testify on his behalf about undeveloped peanuts,] Newton took the deposition of Scott Sherry, [a Standard Candy employee on whom Standard Candy relies to make determinations concerning suitability of peanuts for use in Standard Candy products]. Sherry [testified] that when peanuts have skins on them, it [is] difficult to find peanuts that should not be used. He also [stated that he] knows there is a risk of an undeveloped peanut in [Standard Candy’s products] . . . but that Standard Candy . . . does nothing to reinspect beyond what is done by [Standard Candy’s peanuts supplier]. When he attempted to cut through one peanut in Newton’s candy wrapper during the deposition, Sherry was unable to initially do so. He determined that [the peanut] looked more like a burnt peanut [than an undeveloped one]. [Sherry] agreed that this peanut was either undeveloped or overcooked, which made it rock-like. [He also conceded] in his deposition that Standard Candy knew as far back as 1997 that rock-like peanuts were [sometimes] included in the candy bars.

Newton also took the deposition of Zhaneta Shraybman, who has worked for Standard Candy since 2002 and deals with incoming claims [by consumers against the company]. She testified as to exhibits showing injuries as far back as 1991 where people damaged their teeth on hard or rock-like peanuts in the Goo Goo Clusters candy bar.

Newton argues that this court should adopt the reasonable expectation test, as even Standard Candy admits it is the more modern and accepted approach. Newton cites a series of cases in his brief indicating disfavor with the foreign-natural approach. Further, he argues that there is no need for an additional expert in this case. The two employees of Standard Candy [should] be sufficient, argues Newton, to make his case.

The court concludes that the motion for summary judgment must be denied. There are significant factual disputes that must be decided by the jury. The court also finds that Newton does not necessarily need an expert [on undeveloped peanuts] to prove his case. The testimony of Standard Candy’s employees, Sherry and Shraybman, [is] sufficient to establish the existence of both burnt and undeveloped peanuts. Mr. Sherry will be able to testify as to his knowledge regarding undeveloped peanuts based on his work observations. In addition, he might very well qualify as an expert in this regard. Additionally, Ms. Shraybman . . . will be permitted to testify . . . based on [her] experience working for Standard Candy.

Standard Candy’s motion for summary judgment denied; case to proceed to trial.

Implied Warranty of Fitness UCC section 2–315’s **implied warranty of fitness for a particular purpose** arises where (1) the seller has reason to know a particular purpose for which the buyer requires the goods; (2) the seller has reason to know that the buyer is relying on the seller’s skill or judgment for the selection of suitable goods; and (3) the buyer actually relies on the seller’s skill or judgment in purchasing the goods. If these tests are met, there is an implied warranty that the goods will be fit for the buyer’s *particular* purpose. Any seller—merchant or nonmerchant—may make this implied warranty, the breach of which will give rise to liability for damages.

In many fitness warranty cases, buyers effectively put themselves in the seller’s hands by making their needs known and by saying that they are relying on the seller to select goods that will satisfy those needs. This may happen, for example, when a seller sells a computer system specially manufactured or customized for a buyer’s particular needs. Sellers also may be liable when the circumstances reasonably indicate that the buyer has a particular purpose and is relying on the seller to

satisfy that purpose, even though the buyer fails to make either explicit. However, buyers may have trouble recovering if they are more expert than the seller, submit specifications for the goods they wish to buy, inspect the goods, actually select them, or insist on a particular brand.

As indicated in *Moss v. Batesville Casket Co.*, which follows shortly, the implied warranty of fitness differs from the implied warranty of merchantability. The tests for the creation of each warranty plainly are different. Under section 2–315, moreover, sellers warrant only that the goods are fit for the buyer’s *particular* purposes, not the *ordinary* purposes for which such goods are used. If a 400-pound man asks a department store for a hammock that will support his weight but is sold a hammock that can support only average-sized people, there is a breach of the implied warranty of fitness but no breach of the implied warranty of merchantability. Depending on the facts of the case, therefore, one of the implied warranties may be breached but the other is satisfied, both implied warranties may be breached, or, as in *Moss*, neither ends up being breached.

Moss v. Batesville Casket Co.

935 So.2d 393 (Miss. Sup. Ct. 2006)

Nancy Moss Minton, a Mississippi resident, died on March 7, 1999. Her four adult children became the plaintiffs in the lawsuit described below and will be referred to as “the plaintiffs” during this summary of the facts giving rise to their case. The plaintiffs engaged Ott & Lee Funeral Home, a Mississippi firm, to handle the arrangements for their mother’s burial. From the models on Ott & Lee’s showroom floor, the plaintiffs selected a cherry wood casket manufactured by Batesville Casket Co. According to the deposition testimony later provided by each of the plaintiffs, aesthetic reasons played a key role in the choice of the cherry wood casket. The casket “looked like” their mother and “suited her” because all the furniture in her home was cherry wood. The plaintiffs contended that Ott & Lee told them the casket was “top of the line.”

At the time the wooden casket was selected, Ott & Lee informed the plaintiffs that unlike a metal casket, a wooden casket could not be sealed. The plaintiffs testified in their depositions that Ott & Lee so informed them and that at Ott & Lee’s suggestion, they chose to use a concrete vault with the wooden casket. According to the plaintiffs, Ott & Lee said the vault would keep the pressure of the dirt off the casket and would prevent water from reaching the casket. Ott & Lee made no representations to the plaintiffs about the ability of a wooden casket to preserve the remains contained inside it. The plaintiffs made no inquiry about whether the casket could or would preserve the remains.

The wooden casket chosen by the plaintiffs carried Batesville’s written limited warranty, which specified that Batesville would replace the casket if, “at any time prior to the interment of this casket,” defects in materials or workmanship were discovered. Thus, Batesville expressly warranted the casket until the time of Ms. Minton’s burial, which took place on March 9, 1999. Later, believing that a medical malpractice claim may have existed against Ms. Minton’s medical care providers, the plaintiffs had their mother’s body exhumed for an autopsy on August 10, 2001. When the casket was exhumed, the plaintiffs observed visible cracks and separation in the casket. As the casket was removed, it began to dismantle. The body remained in the casket, and none of the plaintiffs saw the body.

After the exhumation, the plaintiffs filed suit against Ott & Lee and Batesville in a Mississippi court. The plaintiffs claimed that given the casket’s cracked, separated, and partially dismantled condition, as revealed during the exhumation, the defendants had breached the implied warranties of merchantability and fitness for particular purpose. Ott & Lee and Batesville each moved for summary judgment. The plaintiffs presented affidavits from expert witnesses whose specialties

were wood rot and adhesives, as opposed to caskets per se. These experts opined that the casket appeared as it did during the exhumation because of a probable failure of the adhesives used when it was manufactured. There was no evidence that Ms. Minton's body had not been properly preserved or that there was any damage to the body because of the cracks and separation in the casket. After the Mississippi circuit court granted the defendants' motions for summary judgment, the plaintiffs appealed to the Supreme Court of Mississippi.

Easley, Justice

The Mississippi Rules of Civil Procedure provide that summary judgment shall be granted by a court if there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law. The moving party has the burden of demonstrating that there is no genuine issue of material fact in existence, while the non-moving party should be given the benefit of every reasonable doubt.

Implied Warranty of Fitness for Particular Purpose

Miss. Code Ann. § 75-2-315 establishes the foundation for the concept of an implied warranty for fitness for a particular purpose. The statute provides in pertinent part [that] “where the seller at the time of contracting has reason to know any particular purpose for which the goods are required and that the buyer is relying on the seller's skill or judgment to select or furnish suitable goods, there is an implied warranty that the goods shall be fit for such purpose.” The warranty of fitness for a particular purpose does not arise unless there is reliance on the seller by the buyer, and the seller selects goods which are unfit for the particular purpose.

During discovery, depositions were taken from the plaintiffs. These depositions, which were provided to the trial court [in connection with] the motion for summary judgment, demonstrate that the plaintiffs purchased the wooden casket for its aesthetic value. [One plaintiff] testified:

We spotted the cherry wood casket. [An Ott & Lee employee] walked us over there to it and we all decided, standing there—us four—that it looked like our mother. That's—I mean—she had everything in her house was cherry wood. I mean, it just looked like her. We asked . . . about the casket. I mean, I'm not stupid. I know a casket won't seal—a wood casket.

[Another plaintiff] testified: “We were looking at the different caskets, and when we saw the wood casket, we knew that we wanted this one for Mother because it looked just like her—a wood cherry casket. And we were just all . . . agreement with it.” [A third plaintiff] testified that the reason he chose this casket was because his mother “just liked cherry wood furniture.” He further stated [that] “[i]t just suited her.”

In [its] conclusions of law, the trial court stated: “The court is convinced from the deposition testimony that the plaintiffs were well aware of the characteristic differences between a

wooden casket as compared to a metal one, but that the former was selected because of their mother's love of cherry wood.” The trial court found that “the fitness-purpose aspect was served during the time the decedent's body was placed in the casket and viewed by family members, loved ones, and friends at the funeral home.”

Here, the evidence did not justify the submission of this case to a jury on the [implied] warranty of fitness for a particular purpose [claim]. Nothing in the record provides that the plaintiffs identified any particular purpose to the defendants when the casket was selected. Furthermore, assuming arguendo that the plaintiffs sought to preserve their mother's remains for some unspecified, indefinite period of time in the wooden casket, the record is completely devoid of any proof that the body had been damaged in any way by the alleged problems with the casket. As such, the burial had preserved the remains until the plaintiffs had their mother's remains unearthed and the autopsy performed. [T]he trial court did not err in granting summary judgment [in favor of the defendants on this implied warranty claim].

Implied Warranty of Merchantability

Miss. Code Ann. § 75-2-314 establishes the statutory foundation for the concept of an implied warranty for merchantability. [The statute] provides in pertinent part: “[A] warranty that the goods shall be merchantable is implied in a contract for their sale if the seller is a merchant with respect to goods of that kind.” [The statute also states that in order for goods to be merchantable, they must be] “fit for the ordinary purposes for which such goods are used.”

The plaintiffs argue that, as reasonable consumers, they expected the casket to preserve the remains for an indefinite period of time. The defendants contend that even if the plaintiffs' theory that the ordinary purpose of the casket was to preserve the remains for an indefinite or some unknown period of time is accepted as true, there is no evidence in the record which indicates the remains were not in fact properly preserved for an indefinite or unknown period of time. When the remains were exhumed by the plaintiffs approximately two and one-half years after burial, the record reflects the remains were preserved. The plaintiffs present no claim that the remains had been damaged in any way by the cracks and separations. As such, the defendants assert the plaintiffs' alleged ordinary purpose of the casket was satisfied.

In *Craigmiles v. Giles*, 110 F. Supp. 2d 658, 662 (E.D. Tenn. 2000), the district court stated:

A casket is nothing more than a container for human remains. Caskets are normally constructed of metal or wood, but can be made of other materials. Some have “protective seals,” but those seals do not prevent air and bacteria from exiting. All caskets leak sooner or later, and all caskets, like their contents, eventually decompose.

Likewise, Batesville contends that the ordinary purpose of a wooden casket is to house the remains of the departed until interment. Batesville argues that the ordinary purpose includes uses which the manufacturer intended and those which are reasonably foreseeable. Accordingly, Batesville asserts that it would not be reasonably foreseeable that any customer would expect a wooden casket to preserve the remains for an indefinite period of time, as claimed by the plaintiffs.

[T]he record does not indicate that the plaintiffs ever stated a specified period of time that they, as reasonable customers,

would have reasonably expected the wooden casket to last. The plaintiffs contend that they reasonably expected the casket to protect the remains for an indefinite period of time. *Indefinite* is defined as “without fixed boundaries or distinguishing characteristics; not definite, determinate, or precise.” *Black’s Law Dictionary* 393 (5th ed. 1983). [Under the circumstances, the] trial court [appropriately] found that the ordinary purpose for which the casket was designed ceased once the pallbearers bore the casket from the hearse to the grave site for burial. [In any event,] [a]s previously stated, the record also fails to demonstrate that the remains were damaged in any way from the alleged cracks and separation when the casket and body were exhumed.

Accordingly, [we reject] the plaintiffs’ assignment of error [concerning the lower court’s grant of summary judgment in favor of the defendants on the breach of implied warranty of merchantability claim].

Summary judgment in favor of defendants affirmed.

Negligence Product liability lawsuits brought on the **negligence** theory discussed in Chapter 7 usually allege that the seller or manufacturer breached a duty to the plaintiff by failing to eliminate a reasonably foreseeable risk of harm associated with the product. Such cases typically involve one or more of the following claims: (1) negligent *manufacture* of the goods (including improper materials and packaging), (2) negligent *inspection*, (3) negligent failure to provide *adequate warnings*, and (4) negligent *design*.

Negligent Manufacture Negligence claims alleging the manufacturer’s improper assembly, materials, or packaging often encounter obstacles because the evidence needed to prove a breach of duty is under the defendant’s control. However, modern discovery rules and the doctrine of *res ipsa loquitur* may help plaintiffs establish a breach in such situations.³

Negligent Inspection Manufacturers have a duty to inspect their products for defects that create a reasonably foreseeable risk of harm, if such an inspection would be practicable and effective. As noted above, *res ipsa loquitur* and modern discovery rules may help plaintiffs prove their case against the manufacturer.

Most courts have held that middlemen such as retailers and wholesalers have a duty to inspect the goods they sell only when they have actual knowledge or reason to know of a defect. In addition, such parties generally have no duty to inspect if inspection would be unduly difficult, burdensome, or time-consuming. Unless the product defect is obvious, for example, middlemen usually are not liable for failing to inspect goods sold in the manufacturer’s original packages or containers.

On the other hand, sellers that prepare, install, or repair the goods they sell ordinarily have a duty to inspect those goods. Examples include restaurants, automobile dealers, and installers of household products. In general, the scope of the inspection need only be consistent with the preparation, installation, or repair work performed. It is unlikely, therefore, that such sellers must unearth hidden or latent defects.

If there is a duty to inspect and the inspection reveals a defect, further duties may arise. For example, a manufacturer or other seller may be required not to sell the product in its defective state, or at least to give a suitable warning.

Negligent Failure to Warn Sellers and manufacturers often have a duty to give an appropriate warning when their products pose a reasonably foreseeable risk of harm. In determining whether there was a duty to warn and whether the defendant’s warning was adequate, however, courts often consider other factors besides the reasonable

³Chapter 2 discusses discovery. Chapter 7 discusses *res ipsa loquitur*.

foreseeability of the risk. These include the *magnitude or severity* of the likely harm, the *ease or difficulty of providing an appropriate warning*, and the *likely effectiveness of a warning*. Many courts, moreover, hold there is no duty to warn if the risk is *open and obvious*.

Negligent Design Manufacturers have a duty to design their products so as to avoid reasonably foreseeable risks of harm. As in failure-to-warn cases, however, design defect cases frequently involve other factors such as the *magnitude or severity* of the foreseeable harm. Three other factors are *industry practices* at the time the product was manufactured, the *state of the art* (the state of existing scientific and technical knowledge) at that time,

and the product's compliance or noncompliance with *government safety regulations*.

Sometimes courts employ *risk–benefit analysis* when weighing these factors. In such analyses, three other factors—the design's *social utility*, the *effectiveness of alternative designs*, and the *cost of safer designs*—may figure in the weighing process. Even when the balancing process indicates that the design was not defective, courts still may require a suitable warning.

The *Croskey* case, which follows, illustrates various issues that arise in negligent design cases involving motor vehicles, including the role that evidence of prior similar incidents may play. In addition, *Croskey* addresses negligent failure to warn issues.

Croskey v. BMW of North America, Inc. 2008 U.S. App. LEXIS 14544 (6th Cir. 2008)

William Croskey was seriously injured in July 2000 when his girlfriend's 1992 BMW automobile overheated and he opened the hood to add fluid. Because the plastic neck on the car's radiator failed, scalding radiator fluid spewed out and came in contact with Croskey, severely burning him. Relying on diversity of citizenship jurisdiction, Croskey filed suit in the U.S. District Court for the Eastern District of Michigan against the car's manufacturer, Bayerische Motoren Werk Aktiengesellschaft (BMWAG), and the North American distributor of BMW vehicles, BMW of North America, Inc. (BMW NA).

Croskey pleaded two alternative claims: (1) negligent design on the part of BMWAG; and (2) negligent failure to warn on the part of BMWAG and BMW NA. Deciding an evidentiary question prior to trial, the district court ruled that Croskey could use evidence of substantially similar incidents of plastic neck failure if those incidents came to the attention of the defendants and if the incidents occurred between 1991 and the date Croskey was injured. However, the court allowed this evidence to be used only in regard to the negligent failure to warn claim, and prohibited its use in regard to the negligent design claim. The court also ruled that concerning the negligent failure to warn claim, the defendants could introduce evidence of the number of BMWs sold with plastic-necked radiators between 1994 (when the defendants first learned of a neck failure) and the date of the Croskey incident. The purpose of such evidence was to show the likelihood—or lack of likelihood—of a neck failure.

The case proceeded to trial. Rejecting Croskey's negligent design and negligent failure to warn claims, the jury returned a verdict in favor of the defendants. Croskey appealed to the U.S. Court of Appeals for the Sixth Circuit.

Merritt, Circuit Judge

A negligence claim in a product liability action looks to the [defendant's] *conduct* and not the mere existence of a product's defect to determine whether the [defendant's] conduct was reasonable under the circumstances. [The plaintiff, Croskey,] claims that the defendants were negligent because they knew that the plastic used on the radiator “neck” could become brittle and break over time (the “defect”), exposing consumers to the possibility of severe burns if the consumer was standing near the car with the hood up when the neck failed and allowed hot liquid to escape from the radiator. The plaintiff also claims that [available] alternative designs . . . could have been used to minimize the type of radiator neck failure that led to the plaintiff's injuries.

[Croskey's other] negligence theory contends that even if the defendants did not know the product was defective when it left [their] possession, [they] became aware later of the defect and were under a duty to warn consumers. This . . . theory of negligence arises from the plaintiff's allegation that even if the radiator neck was not defective when it left the defendants' possession due to either a design defect or a manufacturing defect, over time the defendants became aware of the problem in older model cars and had a duty to warn customers about the problem in BMWs manufactured with this type of plastic radiator neck.

The primary issue in this appeal [centers around] the plaintiff's efforts to prove negligence under a theory of design defect. To prove a design defect under Michigan law, a plaintiff must show that the product was not reasonably safe for its foreseeable

uses and that a risk-utility analysis favored a safer design. Under this approach, a plaintiff must show that (1) the product was not reasonably safe when it left the control of the manufacturer; and (2) a “feasible alternative production practice was available that would have prevented the harm without significantly impairing the usefulness or desirability of the product to users.” [Citations of authority omitted.] Plaintiffs may use both direct and circumstantial evidence to prove a design defect claim.

A risk-utility balancing test invites the trier of fact to consider the alternatives and risks faced by the manufacturer in designing the product and to determine whether in light of certain factors “the manufacturer exercised reasonable care in making the design choices it made.” [Case citation omitted.] Under Michigan’s risk-utility test, a plaintiff must show:

- (1) that the severity of the injury was foreseeable by the manufacturer;
- (2) that the likelihood of the occurrence of the injury was foreseeable by the manufacturer at the time of distribution of the product;
- (3) that there was a reasonable alternative design available;
- (4) that the alternative available design was practicable;
- (5) that the available and practicable reasonable alternative design would have reduced the foreseeable risk of harm posed by the defendant’s product; and
- (6) that the omission of the available and practicable reasonable alternative design rendered the defendant’s product not reasonably safe.

The plaintiff may demonstrate a defendant’s negligence under these factors through a “battle of the experts,” with [each party] introducing expert testimony concerning the efficacy and practicability of using a certain design versus an alternative design. Or the plaintiff may demonstrate that the defendants knew or should have known about the risk of the radiator neck failures by introducing evidence of similar incidents involving the same neck piece.

The Michigan Supreme Court stated the general rule concerning the admissibility of other incidents in *Savage v. Peterson Dist. Co.*, 150 N.W.2d 804 (1967), [in which the court] rejected the defendant’s argument that the trial court erred in admitting testimony of other consumers who experienced the same problems [complained about by the plaintiff]. [According to the *Savage* court, it] “was proper to show these circumstantial facts as some evidence from which the jury might conclude that there was a pattern of causally connected carelessness at [the defendant’s] plant in manufacturing, for the market at the particular time, [the defendant’s] various types of mink food [the allegedly defective product].”

A recent case in the Michigan Court of Appeals, decided after the district court’s ruling in the trial below, relied upon the *Savage* case to allow the introduction of similar incidents to

prove negligence in a design defect case. *City of Madison Heights v. Elgin Sweeper Co.*, 2007 Mich. App. LEXIS 1219 (Mich. App. 2007). In *City of Madison Heights*, the City purchased a 1998 Elgin GeoVac Street Sweeper. In 2003, a fire destroyed a number of vehicles owned by the [City’s] Public Works Department. Experts testified that the most likely cause of the fire was the GeoVac’s electrical system and that the fire originated in the GeoVac’s auxiliary engine compartment. The City claimed that a design defect in the GeoVac caused the fire. Discovery revealed seven other incidents of GeoVacs involved in fires between 1998 and 2004, all involving GeoVacs produced in 1997 or 1998. The City sought to introduce evidence of other fires involving the Elgin GeoVac Street Sweeper, and it filed an interlocutory appeal after the trial court granted defendant’s motion to exclude evidence of other fires involving Elgin GeoVac Street Sweepers. The Michigan Court of Appeals concluded that two of the incidents were “substantially similar” to the incident giving rise to the City’s allegations and that the trial court should have found the incidents relevant.

Relying on *Savage* and *City of Madison Heights*, . . . we hold it was error for the district court to make a blanket exclusion of all “other incidents” evidence by plaintiff to prove a negligence claim involving a design defect. Prior accidents must be “substantially similar” to the one at issue before they will be admitted into evidence. Substantial similarity means that the accidents must have occurred under similar circumstances or share the same cause. The plaintiff has the burden of showing the substantial similarity between prior accidents and his own.

The plaintiff also claims that it was an abuse of discretion for the district court to allow testimony concerning the number of BMWs sold with the same type of radiator as the subject product between 1994 (the date that BMW received notice of the first breakage of a radiator neck) and the date of the plaintiff’s accident. In the trial below, the plaintiff was allowed to introduce evidence of similar incidents between 1991 and July 2000 to prove defendants were negligent in their failure to warn. On retrial, the plaintiff will also be allowed to put on similar incidents evidence to prove his design defect claim. To rebut that evidence, the defendants should be allowed to put on evidence of the total number of cars sold during that same time with the same radiator neck piece to demonstrate the likelihood of failure of the radiator neck. Evidence of a small number of incidents versus the total number of similar model cars on the road has been permitted to refute evidence of prior accidents. A positive safety history may be admissible under certain conditions. See *McCormick On Evidence* § 200 (where a plaintiff has presented evidence of prior accidents to the jury, “it would seem perverse to tell a jury that one or two persons besides the plaintiff tripped on defendant’s stairwell while withholding

from them the further information that another thousand persons descended the same stairs without incident”).

The plaintiff argues that any number that includes all cars—new and old—is misleading as it skews the numbers in such a way as to make the percentage of neck failures artificially small because new cars are counted equally with the older cars that are more prone to the problem. The district court properly

ruled that the plaintiff would be able to cross-examine defendants on the statistics to help the jury understand that the plastic necks generally do not fail until after the cars have been on the road for a few years.

District court’s decision reversed; case remanded for new trial on negligent design claim.

Strict Liability Strict liability for certain defective products has been a feature of the legal landscape for roughly the past 45 years. The movement toward imposing strict liability received a critical boost when the American Law Institute promulgated section 402A of the *Restatement (Second) of Torts* in 1965. By now, the vast majority of the states have adopted some form of strict liability, either by statute or under the common law. The most important reason is the socialization-of-risk strategy discussed earlier. By not requiring plaintiffs to prove a breach of duty, strict liability makes it easier for them to recover; sellers then may pass on the costs of this liability through higher prices. Another justification for strict liability is that it stimulates manufacturers to design and build safer products.

Section 402A’s Requirements Because it is the most common version of strict liability in the products context, we limit our discussion of the subject to section 402A. It provides that a “seller . . . engaged in the business of selling” a product is liable for physical harm or property damage suffered by the ultimate user or consumer of that product, if the product was “in a defective condition unreasonably dangerous to the user or consumer or to his property.” This rule applies even though “the seller has exercised all possible care in the preparation and sale of his product.” Thus, section 402A states a strict liability rule, which does not require plaintiffs to prove a breach of duty.

Each element required by section 402A must be present in order for strict liability to be imposed.

1. The seller must be *engaged in the business of selling the product that harmed the plaintiff*. Thus, section 402A binds only parties who resemble UCC merchants because they regularly sell the product at issue. For example, the section does not apply to a plumber’s or a clothing store’s sale of a used car.
2. The product must be in a *defective condition* when sold, and also must be *unreasonably dangerous* because

of that condition. The usual test of a product’s defective condition is whether the product meets the reasonable expectations of the average consumer. An unreasonably dangerous product is one that is dangerous to an extent beyond the reasonable contemplation of the average consumer. For example, good whiskey is not unreasonably dangerous even though it can cause harm, but whiskey contaminated with a poisonous substance qualifies. Some courts balance the product’s social utility against its danger when determining whether it is unreasonably dangerous.

Section 402A’s requirement of unreasonable dangerousness means that strict liability applies to a smaller range of product defects than does the implied warranty of merchantability. A power mower that simply fails to operate is not unreasonably dangerous, although it would not be merchantable. Some courts, however, blur the requirements of defective condition and unreasonable dangerousness, and a few have done away with the latter requirement.

3. Finally, defendants may avoid section 402A liability where the product was *substantially modified* by the plaintiff or another party after the sale, and the modification contributed to the plaintiff’s injury or other loss.

Applications of Section 402A Design defect and failure-to-warn claims can be brought under section 402A. Even though section 402A is a strict liability provision, the factors considered in such cases resemble those taken into account in the negligence cases discussed in the previous section. (Sometimes plaintiffs bring alternative claims for strict liability and negligence in the same case.)

Because it applies to professional sellers, section 402A covers retailers and other middlemen who market goods containing defects that they did not create and may not have been able to discover. Even though such parties often escape negligence liability, courts have held them liable under section 402A’s strict liability rule.

The Global Business Environment

By virtue of a 1985 European Union (EU) Council Directive premised on consumer protection grounds, *producers* of defective products face strict liability for the personal injuries and property damage those products cause. The 1985 Directive defined *product* as

all movables, with the exception of primary agricultural products and game, even though incorporated into another movable or into an immovable. “Primary agricultural products” means the products of the soil, of stock-farming and of fisheries, excluding products which have undergone initial processing. “Product” includes electricity.

A 1999 amendment, however, broadened the Directive’s definition of *product* and coverage of the strict liability regime by eliminating the original version’s exclusion of agricultural products. After the 1999 amendment, *product* includes “all movables even if incorporated into another movable or into an immovable.” The 1999 amendment also retained the original version’s inclusion of “electricity” within the definition of *product*.

The Directive states that a product is considered *defective* when it does not provide the safety which a person is entitled to expect, taking all circumstances into account, including: (a) the presentation of the product; (b) the use to which it could reasonably be expected that the product would be put; [and] (c) the time when the product was put into circulation.

Because the Directive contemplates strict liability, the harmed consumer need not show a failure to use reasonable care on the part of the producer. The typical tendency among the states of the United States is to require, in a strict liability case, proof that the product was both defective and unreasonably dangerous. The Directive, however, takes a different approach to strict liability. Although the consumer must demonstrate personal injury or property damage resulting from use of the product, the Directive’s definition of *defective* does not contemplate a separate showing that the harm-causing product was defective to the point of being unreasonably dangerous. Only limited possible defenses against liability are provided for producers in the Directive.

Some states, however, have given middlemen protection against 402A liability or have required the manufacturer or other responsible party to indemnify them.

What about products, such as some medications, that have great social utility but pose serious and unavoidable risks? Imposing strict liability regarding such “unavoidably unsafe” products might deter manufacturers from developing and marketing them. When products of this kind cause harm and a lawsuit follows, many courts follow comment k to section 402A. Comment k says that

unavoidably unsafe products are neither defective nor unreasonably dangerous if they are properly prepared and accompanied by proper directions and a proper warning. For this rule to apply, the product must be genuinely incapable of being made safer.

In the *Simo* case, which follows, the court examines the legal requirements that govern a strict liability case involving a claim of defective design of an SUV. The case also illustrates the role that expert testimony may play in product liability litigation.

Simo v. Mitsubishi Motors North America, Inc. 2007 U.S. App. LEXIS 19421 (4th Cir. 2007)

In the early morning hours of October 11, 2002, Chefik Simo was a passenger in a 2000 Mitsubishi P45 Montero Sport, a sport-utility vehicle (SUV). The vehicle was designed, manufactured, and sold by Mitsubishi Motors Corp. and Mitsubishi Motors North America, Inc. Simo suffered severe injuries when the Montero Sport rolled over on an interstate highway in South Carolina, after the driver suddenly steered left to avoid another vehicle and then attempted to correct his course by quickly turning back to the right. While the vehicle was on its side, it was struck by a Federal Express truck.

At the time of the accident, Simo was an 18-year-old freshman on the varsity soccer team at Furman University. In the litigation referred to below, Simo presented testimony that he was the top soccer recruit in the country the year he entered college and was among the best players on the United States’ “Under-20” national team. Simo had intended to begin his professional career in Europe following the conclusion of the soccer season at Furman. Many European teams, including some at the top levels, had expressed interest in signing Simo when he became available.

Simo's injuries from the accident included a fractured shoulder blade, a fractured pelvis, a dislocated shoulder, a ruptured small intestine, a broken wrist, a knee dislocation in his left leg involving a complete separation of the thigh bone from the shin bone, and tears of three of the four major ligaments in the knee. He suffered irreparable nerve damage that resulted in a "drop foot." As a result of these injuries, Simo underwent a number of surgeries and incurred more than \$277,000 in medical bills. He engaged in arduous rehabilitation efforts in an attempt to resume his soccer career. When he returned to the field, however, he ended up overcompensating for his injuries to his left side, leading to painful stress fractures that forced him to terminate his comeback.

Relying on diversity jurisdiction, Simo filed a strict liability lawsuit in the U.S. District Court for the District of South Carolina against Mitsubishi Motors and Mitsubishi Motors North America (collectively referred to here as "Mitsubishi"). Simo contended in his complaint that the Montero Sport was unreasonably dangerous because its center of gravity was too high, causing it to roll over in certain circumstances on flat, dry pavement (to roll over "untripped"). At the trial, Simo presented the expert testimony of David Bilek, a mechanical engineering specialist who had run stability tests and utilized data to evaluate vehicle dynamics for over 20 years in a litigation-consultant capacity. Bilek discussed stability tests he performed on the Montero Sport, a wider and lower prototype that he designed, and various SUVs comparable to the Montero Sport. Bilek explained that an unreasonably top-heavy vehicle (such as, in his view, the Montero Sport) could roll over untripped when the lateral forces on the vehicle reached a certain level. Had the Montero Sport been wider and a few inches shorter, Bilek asserted, the untripped rollover danger would not have been present. Bilek also opined that in light of information disseminated from other manufacturers, a reasonable manufacturer would have tested its vehicles to ensure that they would not roll over untripped. He stated his view that handling tests performed by Mitsubishi, in which the drivers did not expose the vehicles to forces strong enough to roll the vehicles over, were not sufficient.

Also providing testimony for Simo was engineer Michael Gilbert, who testified that the Montero Sport rolled over untripped under certain circumstances, whereas on-the-market SUVs with different designs did not. He further testified that designing an SUV so as to avoid untripped rollovers was not difficult, and offered the opinion that if the Montero Sport had been designed to have the stability of other SUVs, the accident in which Simo was injured would not have occurred.

Simo offered expert testimony regarding earnings that he lost as a result of the accident. Patrick McCabe, a former collegiate and professional soccer player and then-current soccer agent and talent scout, was his chief expert in that regard. McCabe testified concerning his familiarity with talent levels of soccer players, his experience in identifying players chosen for North American and European professional soccer teams, and his knowledge of players' market values in North America and Europe. McCabe offered the opinion that prior to his injuries, Simo was destined to become a top professional player, that he could have expected to play for 15 years in Europe, and that his career earnings would have fallen within the range of \$3 million to \$10 million.

Mitsubishi moved for a directed verdict at the close of all of the evidence, but the district court denied the motion and allowed Simo's strict liability claim to go to the jury. The jury returned a verdict in favor of Simo and awarded him \$7 million in compensatory damages, an amount the district judge reduced to just over \$6 million after giving Mitsubishi credit for amounts Simo received in settlement of claims against other parties. Mitsubishi appealed to the U.S. Court of Appeals for the Fourth Circuit.

Traxler, Circuit Judge

Mitsubishi first argues that Simo failed to establish the existence of an alternative feasible design that would have prevented or reduced Simo's injuries, and that the district court [therefore] erred in denying its motion for [a directed verdict]. We disagree.

Under South Carolina law, which the parties agree applies in this diversity suit, . . . a plaintiff must show [the following in order to win a strict liability claim]: (1) he was injured by the product; (2) the injury occurred because the product was in a defective condition, unreasonably dangerous to the user; and (3) the product at the time of the accident was in essentially the same condition as when it left the hands of the defendant. Prov-

ing the existence of an alternative feasible design is a crucial aspect of this required showing.

Simo presented expert testimony that designing an SUV that will not roll over untripped is not difficult so long as the issue is addressed early in the design process. *See Restatement (Third) of Torts: Product Liability* § 2 cmt. f (1998) (explaining that qualified expert testimony may establish that an alternative feasible design existed "if it reasonably supports the conclusion that [such a] design could have been practically adopted at the time of sale"). Indeed, Simo presented evidence that, at the time Mitsubishi sold the Montero Sport at issue here, several other SUVs already on the market had centers of gravity sufficiently low that the vehicles would not roll over untripped.

Thus, the district court correctly denied Mitsubishi's motion [insofar as it was premised on a supposed failure of Simo to identify a reasonable alternative design]. See *Restatement (Third)* § 2 cmt. f (noting that "other products already available on the market . . . may serve as reasonable alternatives to the product in question").

Mitsubishi also contends that the district court erred in admitting expert testimony from David Bilek. We disagree. The admissibility of expert testimony is governed by Federal Rule of Evidence 702, which provides:

If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education, may testify there to in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) the testimony is the product of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

Bilek was experienced in applying mechanical engineering principles. After obtaining his bachelor of science degree in mechanical engineering technology, Bilek received training in vehicle stability issues. In doing litigation consulting-type work, Bilek gained extensive experience and knowledge over twenty years concerning how to perform stability testing on vehicles. He has specialized knowledge concerning the tests that manufacturers employ and experience in evaluating the effectiveness of different design modifications in protecting against rollovers. Bilek also has reviewed many documents and reports prepared by vehicle engineers, the National Highway Traffic Safety Administration, and the Society of Automotive Engineers. All of this training qualified Bilek to testify, as he did, regarding the physics involved in rollovers, his testing of the various vehicles to determine whether they roll over untripped, and the state of knowledge of the risk of SUV rollovers.

Mitsubishi appears to argue, however, that Bilek was not qualified to offer expert testimony concerning whether his notion of designing the Montero Sport to be lower and wider could be feasibly implemented. Even assuming that Bilek was not qualified to offer testimony concerning the feasibility of his own design—the prototype—he did not purport to do so. As we have explained, there was no need for Bilek to theorize about whether Mitsubishi could design an SUV with utility equal to the Montero Sport that would not roll over untripped because Simo presented testimony that several such vehicles were already on the market.

Mitsubishi next maintains that the district court erred in admitting the expert testimony of Patrick McCabe. Mitsubishi argues that the testimony violated the standard of admissibility established in Federal Rule of Evidence 702. [Given McCabe's background and experience, we] conclude that the district court was within its discretion in admitting McCabe's testimony. While neither McCabe nor anyone else could predict with certainty what the future would have held for Simo, South Carolina damages law did not require such certainty. See *South Carolina Fin. Corp. of Anderson v. W. Side Fin. Co.*, 113 S.E.2d 329, 336 (S.C. 1960) ("The law does not require absolute certainty of data upon which lost profits are to be estimated, but all that is required is such reasonable certainty that damages may not be based wholly upon speculation and conjecture, and it is sufficient if there is a certain standard or fixed method by which profits sought to be recovered may be estimated and determined with a fair degree of accuracy"). McCabe explained that his [income] projections encompassed "a range of averages," rather than a precise prediction of Simo's future. And, it is noteworthy that even Mitsubishi's expert testified that he was sufficiently informed to offer a "probable career path" for Simo.

District court's judgment in favor of Simo affirmed.

The Restatement (Third) In 1998, the American Law Institute published its *Restatement (Third) of Torts: Product Liability*. Although many courts now discuss the new *Restatement*, it has not supplanted negligence and section 402A in most states as we write in 2008. The *Restatement (Third)*, however, may signal the likely evolution of product liability law in the coming years. As indicated by citations to it in the *Simo* case, which appeared earlier, the *Restatement (Third)* may be influential even when courts continue to adhere to the traditional product liability theories of negligence and strict liability.

Basic Provisions The *Restatement (Third)*'s basic product liability rule states: "One engaged in the business of selling or otherwise distributing products who sells or distributes a defective product is subject to liability for harm to persons or property caused by the defect." As does section 402A, this rule covers only those who are engaged in the business of selling the kind of product that injured the plaintiff. The rule also resembles 402A in covering not only manufacturers, but other sellers down the product's chain of distribution. Unlike 402A, however, the *Restatement (Third)* does not require that the product be unreasonably dangerous.

Specific Rules The *Restatement (Third)* states special rules governing the sale of product components, prescription drugs, medical devices, food products, and used goods. More importantly, it adds substance to the general rule just stated by describing three kinds of product defects.

1. Manufacturing defects. A manufacturing defect occurs when the product does not conform to its intended design at the time it leaves the manufacturer's hands. This includes products that are incorrectly assembled, physically flawed, or damaged.

2. Inadequate instructions or warnings. Although the *Restatement (Third)* applies strict liability to manufacturing defects, liability for inadequate instructions or warnings resembles negligence more than strict liability. (The *Restatement (Third)* rules regarding failures to warn do not use the term *negligence*, however.) This liability exists when reasonable instructions or warnings could have reduced the product's foreseeable risk of harm, but the seller did not provide such instructions or warnings and the product thus was not reasonably safe.

Manufacturers and sellers are liable only for failing to instruct or warn about *reasonably foreseeable* harms, and not about every conceivable risk their products might present. As with negligence and 402A, moreover, they need not warn about obvious and generally known risks. The other failure-to-warn factors discussed earlier probably apply under the new *Restatement* as well.

3. Design defects. Design defect liability under the *Restatement (Third)* is determined under principles resembling those of negligence (though the *Restatement (Third)* rule for such cases again avoids using the term *negligence*). A product is defective in design when its foreseeable risks of harm could have been reduced or avoided by a reasonable alternative design, and the omission of that design rendered the product not reasonably safe. The plaintiff must prove that a reasonable alternative design was possible at the time of the sale.

In the *Wright* case, which follows, the Iowa Supreme Court announces that in design defect cases, Iowa will follow the *Restatement (Third)*'s rule rather than the previously applied rules of strict liability and negligence.

Wright v. Brooke Group Limited

652 N.W. 2d 159 (Iowa Sup. Ct. 2002)

Robert and DeAnn Wright sued various cigarette manufacturers in federal district court in an effort to obtain damages for harms allegedly resulting from Robert's cigarette smoking. The plaintiffs made various claims, including negligence, strict liability, breach of implied warranty, breach of express warranty, fraudulent misrepresentation and nondisclosure, and civil conspiracy. The defendants' motion to dismiss was largely overruled by the federal court. Thereafter, the defendants asked the federal court to certify questions of law to the Iowa Supreme Court, in accordance with Iowa Code § 684A.1.

Concluding that the case presented potentially determinative state law questions as to which there was either no controlling precedent or ambiguous precedent, the federal court certified various questions to the Iowa Supreme Court. Two of the certified questions dealt with strict liability. They read as follows: "In a design defect products liability case, what test applies under Iowa law to determine whether cigarettes are unreasonably dangerous? What requirements must be met under the applicable test?"

The Iowa Supreme Court issued an opinion answering the various questions certified by the federal court. The portions of the opinion included here dealt with the above-quoted questions regarding strict liability.

Ternus, Justice

The Iowa Supreme Court first applied strict liability in tort for a product defect in 1970, adopting *Restatement (Second) of Torts* § 402A (1965). Section 402A provides:

- (1) One who sells any product in a defective condition unreasonably dangerous to the user or consumer or to his property is subject to liability for physical harm thereby caused to the ultimate user or consumer, or to his property, if
 - (a) the seller is engaged in the business of selling such a product, and

- (b) it is expected to and does reach the user or consumer without substantial change in the condition in which it is sold.
- (2) The rule stated in Subsection (1) applies although
 - (a) the seller has exercised all possible care in the preparation and sale of his product, and
 - (b) the user or consumer has not bought the product from or entered into any contractual relation with the seller.

Our purpose in adopting this provision was to relieve injured plaintiffs of the burden of proving the elements of

warranty or negligence theories, thereby insuring “that the costs of injuries resulting from defective products are borne by the manufacturers that put such products on the market.” *Hawkeye-Security Insurance Co. v. Ford Motor Co.* (Iowa 1970). Consistent with this purpose, we held that a plaintiff seeking to recover under a strict liability theory need not prove the manufacturer’s negligence. Moreover, we concluded that application of strict liability in tort was not exclusive and did not preclude liability based on the alternative ground of negligence, when negligence could be proved. Although *Hawkeye-Security* was a manufacturing defect case, our opinion implied that strict liability in tort was applicable to design defects as well.

In *Aller v. Rodgers Machinery Manufacturing Co.* (Iowa 1978), a design defect case, our court discussed in more detail the test to be applied in strict liability cases. In that case, the plaintiff asked the court to eliminate the “unreasonably dangerous” element of strict products liability, arguing that to require proof that the product was *unreasonably* dangerous injected considerations of negligence into strict liability, thwarting the purpose of adopting a strict liability theory. We rejected the plaintiff’s request to eliminate the “unreasonably dangerous” element, concluding the theories of strict liability and negligence were distinguishable: “In strict liability the plaintiff’s proof concerns the condition (dangerous) of a product which is designed or manufactured in a particular way. In negligence the proof concerns the reasonableness of the manufacturer’s conduct in designing and selling the product as he did.”

[This articulated distinction was], however, somewhat obscured by [Aller’s] explanation of the proof required in a strict liability case. Relying on comment *i* to § 402A, we held that a plaintiff seeking to prove a product was in a “defective condition unreasonably dangerous” must show that the product was “dangerous to an extent beyond that which would be contemplated by the ordinary consumer who purchases it, with the ordinary knowledge common to the community as to its characteristics.” We went on, however, to discuss *how* the plaintiff is to prove the defective condition was unreasonably dangerous:

In order to prove that a product is unreasonably dangerous, the injured plaintiff must prove the product is dangerous and that it was unreasonable for such a danger to exist. Proof of unreasonableness involves a balancing process. On one side of the scale is the utility of the product and on the other is the risk of its use. Whether the doctrine of negligence or strict liability is being used to impose liability *the same process is going on in each instance*, i.e., weighing the utility of the article against the risk of its use.

Two conclusions can be drawn from [the above] discussion in *Aller*: (1) the legal principles applied in a strict liability case

include both a consumer expectation or consumer contemplation test and a risk/benefit or risk/utility analysis; and (2) the risk/benefit analysis employed in a strict liability design defect case is the same weighing process as that used in a negligence case.

Since *Aller*, this court has varied in its application of the tests set forth in that decision, sometimes applying both tests and sometimes applying only the consumer expectation test. On the other hand, we have continued to equate the strict liability risk/benefit analysis used in a design defect case with that applied in a [negligent] design case.

One final development in product liability law in Iowa is worth mentioning before we address the precise issue in this case. In *Olson v. Prosoco* (Iowa 1994), this court rejected the distinction between negligence and strict liability claims first articulated in *Aller*. Examining a failure-to-warn case, we abandoned the analysis that differentiated strict liability from negligence on the basis that negligence focuses on the defendant’s conduct while strict liability focuses on the condition of the product. We concluded that “inevitably the conduct of the defendant in a failure-to-warn case becomes the issue,” and [that as a result], the product/conduct distinction had “little practical significance.” Our acknowledgment that the test for negligence and strict liability were in essence the same led this court to discard the theory of strict liability in failure-to-warn cases and hold that such claims should be submitted under a theory of negligence only.

[W]e turn now to the parties’ arguments on the question of the applicable test for determining whether cigarettes are unreasonably dangerous. The parties disagree as to whether the consumer contemplation test and the risk/benefit analysis are alternative tests or whether both apply in all product defect cases. The defendants assert that only the consumer contemplation test . . . should be used to determine whether cigarettes are unreasonably dangerous. Their desire for this test stems from their related argument that common knowledge of the risks of cigarette smoking precludes a finding that cigarettes are dangerous “to an extent beyond that which would be contemplated by the ordinary consumer.” *Restatement (Second) of Torts* § 402A, comment *i*. The defendants argue that the risk/utility test should not be applied because it was designed for those products, unlike cigarettes, “about which the ordinary consumer would not normally have an expectation of safety or dangerousness.”

The plaintiffs contend that both the consumer contemplation and risk/utility tests apply in design defect cases to determine whether a product is unreasonably dangerous. Alternatively, [the plaintiffs suggest that] this case presents an appropriate opportunity for the court to adopt the principles . . . set forth in § 2 of *Restatement (Third) of Torts: Product Liability* [hereinafter “Products Restatement”].

In determining what test should be applied in assessing whether cigarettes are unreasonably dangerous, we are confronted with the anomaly of using a risk/benefit analysis for purposes of strict liability based on defective design that is identical to the test employed in proving negligence in product design. This incongruity has drawn our attention once again to the “debate over whether the distinction between strict liability and negligence theories should be maintained when applied to a design defect case.” *Lovick v. Wil-Rich* (Iowa 1999). We are convinced such a distinction is illusory, just as we found[, in *Olson*,] no real difference between strict liability and negligence principles in failure-to-warn cases. Because the Products Restatement is consistent with our conclusion, we think it sets forth an intellectually sound set of legal principles for product defect cases.

Before we discuss these principles, we first explain our dissatisfaction with the consumer expectation test advocated by the defendants. As one writer has suggested, the consumer expectation test in reality does little to distinguish strict liability from ordinary negligence:

The consumer expectations test for strict liability operates effectively when the product defect is a construction or manufacturing defect. . . . An internal standard exists against which to measure the product’s condition—the manufacturer’s own design standard. In essence, a product flawed in manufacture frustrates the manufacturer’s own design objectives. Liability is imposed on manufacturers in these cases even if the manufacturer shows it acted reasonably in making the product. . . . When the claim of defect is based on the product’s plan or design, however, the consumer expectations test is inadequate. The test seems to function as a negligence test because a consumer would likely expect the manufacturer to exercise reasonable care in designing the product and using the technology available at that time. . . . Although the consumer expectations test purports to establish [that] the manufacturer’s conduct is unimportant, it does not explain what truly converts it into a standard of strict liability.

Keith Miller, *Design Defect Litigation in Iowa: The Myths of Strict Liability*, 40 Drake L. Rev. 465, 473–74 (1991). We agree that the consumer contemplation test is inadequate to differentiate a strict liability design defect claim from a negligent design case. Consequently, any attempts to distinguish the two theories in the context of a defective design are in vain. That brings us to the Products Restatement, which reflects a similar conclusion by its drafters.

The Products Restatement demonstrates a recognition that strict liability is appropriate in manufacturing defect cases, but negligence principles are more suitable for other defective product cases. Accordingly, it “establishes separate standards of liability for manufacturing defects, design defects, and

defects based on inadequate instructions or warnings.” Products Restatement § 2, comment *a*. Initially, § 1 of the Products Restatement provides: “One engaged in the business of selling or otherwise distributing products who sells or distributes a defective product is subject to liability for harm to persons or property caused by the defect.” The “unreasonably dangerous” element of § 402A has been eliminated and has been replaced with a multifaceted definition of defective product. This definition is set out in § 2:

A product is defective when, at the time of sale or distribution, it contains a manufacturing defect, is defective in design, or is defective because of inadequate instructions or warning. A product:

(a) contains a manufacturing defect when the product departs from its intended design even though all possible care was exercised in the preparation and marketing of the product;

(b) is defective in design when the foreseeable risks of harm posed by the product could have been reduced or avoided by the adoption of a reasonable alternative design by the seller or other distributor, or a predecessor in the commercial chain of distribution, and the omission of the alternative design renders the product not reasonably safe;

(c) defective because of inadequate instructions or warnings when the foreseeable risks of harm posed by the product could have been reduced or avoided by the provision of reasonable instructions or warnings by the seller or other distributor, or a predecessor in the commercial chain of distribution, and the omission of the instructions or warnings renders the product not reasonably safe.

The commentators give the following explanation for the analytical framework adopted in the Products Restatement:

In contrast to manufacturing defects, design defects and defects based on inadequate instructions or warnings are predicated on a different concept of responsibility. In the first place, such defects cannot be determined by reference to the manufacturer’s own design or marketing standards because those standards are the very ones that the plaintiffs attack as unreasonable. Some sort of independent assessment of advantages and disadvantages, to which some attach the label “risk-utility balancing,” is necessary. Products are not generically defective merely because they are dangerous. Many product-related accident costs can be eliminated only by excessively sacrificing product features that make products useful and desirable. Thus, the various trade-offs need to be considered in determining whether accident costs are more fairly and efficiently borne by accident victims, on the one hand, or, on the other hand, by consumers generally through the mechanism of higher product prices attributable to liability costs imposed by the courts on product sellers.

Products Restatement § 2, comment *a*. [T]he Products Restatement has essentially dropped the consumer expectation test traditionally used in the strict liability analysis and adopted a risk-utility analysis traditionally found in the negligence standard. The Products Restatement[, however,] does not place a conventional label, such as negligence or strict liability, on design defect cases. We question the need for or usefulness of *any* traditional doctrinal label in design defect cases because, as [a Products Restatement comment indicates], a court should not submit both a negligence claim and a strict liability claim based on the same design defect since both claims rest on an identical risk-utility evaluation. Moreover, to persist in using two names for the same claim only continues the dysfunction engendered by § 402A. Therefore, we prefer to label a claim based on a defective product design as a design defect claim without reference to strict liability or negligence.

In summary, we now adopt *Restatement (Third) of Torts: Product Liability* §§ 1 and 2 for product defect cases. Under these sections, a plaintiff seeking to recover damages on the basis of a design defect must prove “the foreseeable risks of harm posed by the product could have been reduced or avoided by the adoption of a reasonable alternative design by the seller or other distributor, or a predecessor in the commercial chain of distribution, and the omission of the alternative design renders the product not reasonably safe.” Products Restatement § 2(b); accord *Hawkeye Bank v. State* (Iowa 1994) (requiring “proof of an alternative safer design that is practicable under the circumstances” in negligent design case).

Certified questions answered through Iowa Supreme Court’s holding that design defect cases will be governed by the test and requirements of Restatement (Third) of Torts: Product Liability, §§ 1 and 2.

Other Theories of Recovery

The Magnuson-Moss Act The relevant civil-recovery provisions of the federal Magnuson-Moss Warranty Act apply to sales of *consumer products* costing more than \$10 per item. A consumer product is tangible personal property normally used for personal, family, or household purposes. If a seller gives a *written warranty* for such a product to a *consumer*, the warranty must be designated as full or limited. A seller who gives a full warranty promises to (1) *remedy* any defects in the product and (2) *replace* the product or *refund* its purchase price if, after a reasonable number of attempts, it cannot be repaired.⁴ A seller who gives a limited warranty is bound to whatever promises it actually makes. However, neither warranty applies if the seller simply declines to give a written warranty.

⁴Also, many states have enacted so-called “lemon laws” that may apply only to motor vehicles or to various other consumer products as well. The versions applying to motor vehicles generally require the manufacturer to replace the vehicle or refund its purchase price once certain conditions are met. These conditions may include the following: a serious defect covered by warranty; a certain number of unsuccessful attempts at repair or a certain amount of downtime because of attempted repairs; and the manufacturer’s failure to show that the defect is curable.

Misrepresentation Product liability law has long allowed recoveries for misrepresentations made by sellers of goods. The *Restatement (Third)* does likewise. Its rule applies to merchantlike sellers engaged in the business of selling the product in question. The rule includes fraudulent, negligent, or innocent misrepresentations made by such sellers. The misrepresentation must involve a *material fact* about the product—a fact that would matter to a reasonable buyer. This means that sellers are not liable for inconsequential misstatements, sales talk, and statements of opinion. However, the product need not be defective. Unlike past law, moreover, the misrepresentation need not be made to the public, and the plaintiff need not have justifiably relied upon it. However, it must have made the plaintiff suffer personal injury or property damage.

Industrywide Liability The legal theory we call **industrywide liability** is a way for plaintiffs to bypass problems of causation that exist where several firms within an industry have manufactured a harmful standardized product, and it is impossible for the plaintiff to prove which firm produced the product that injured her. The main reasons for these proof problems are the number of firms producing the product and the time lag between exposure to the product and the appearance of the injury. Most of the cases presenting such problems have involved DES (an antimiscarriage drug that has produced

Ethics in Action

Litigation against tobacco companies has proliferated in recent years. Many cases have been brought by cigarette smokers or the estates of deceased smokers in an effort to obtain damages for the adverse health effects resulting from their years of smoking cigarettes. Sometimes class action suits brought by groups of smokers or persons exposed to secondhand smoke have been instituted. The federal government and many state governments have also sued tobacco companies in an effort to recoup health care costs incurred by those governments in regard to citizens whose health problems allegedly resulted from smoking.

The cases against tobacco firms—particularly those brought by private parties—have been pursued on a wide variety of legal theories that initially included breach of express or implied warranty, negligent design, negligent failure to warn, and strict liability. Results have been mixed, with tobacco companies frequently prevailing but plaintiffs occasionally receiving jury verdicts for very large amounts of damages (some of which have been subject to reduction or outright elimination by the trial judge or an appellate court). During the past few years, plaintiffs have had greater success in cases against tobacco companies than they once did, in large part because plaintiffs have acquired access to old tobacco industry documents they previously did not have. Some of these documents have helped plaintiffs augment the traditional product liability claims referred to above with claims for fraudulent concealment of, and conspiracy to conceal, the full extent of the health risks of smoking during a time when tobacco firms' public pronouncements allegedly minimized or soft-pedaled those risks. Although plaintiffs' cases against tobacco companies remain far from surefire winners, there is no doubt that plaintiffs' chances of winning such cases are somewhat better today than they were 15 years ago.

In addition to the many legal issues spawned by cases against tobacco companies, various ethical issues come to mind. Consider, for instance, the questions set forth below. Some of them pertain to tobacco litigation, whereas others pertain to related issues for business and society. In considering these questions, you may wish to employ the ethical theories outlined in Chapter 4, as well as that chapter's suggested process for making decisions that carry potential ethical implications.

- Given what is now known about the dangers of tobacco use, are the production and sale of tobacco products ethically

justifiable business activities? What are the arguments each way? Does it make a difference whether the health hazards of smoking have, or have not, been fully disclosed by the tobacco companies?

- Would the federal government be acting ethically if it took the step of outlawing the production and sale of tobacco products? Why or why not?
- If a company that produces a product—whether tobacco or another product—acquires information indicating that its product may be or is harmful to users of it, does the company owe an ethical duty to disclose this actual or potential danger? If so, at what point? What considerations should be taken into account?
- If a manufacturer's product—whether tobacco or another product—is well received by users but poses a significant risk of harm when used as intended by the manufacturer, does the manufacturer owe an ethical duty to take steps to redesign the product so as to lessen the risk or severity of the harm? Justify your conclusion, noting the considerations you have taken into account.
- When tobacco companies comply with federal law by placing the mandated health warnings on packages of their cigarettes and in their cigarette advertisements, have they simultaneously taken care of any ethical obligations they may have regarding disclosure of health risks? Why or why not?
- Are smokers' (or smokers' estates') lawsuits against tobacco companies ethically justifiable? If so, is this true of all of them or only some of them, and why? If only some are ethically justifiable, which ones, and why? If you believe that such lawsuits are not ethically justifiable, why do you hold that view?
- Some critics have taken the position that health care cost–recouping litigation brought by the federal government and state governments against tobacco companies reflects hypocrisy, because our governments extend support to tobacco farmers and collect considerable tax revenue from parties involved in tobacco growing, tobacco product manufacturing, and tobacco product sales. How do you weigh in on this issue? Are there ethical dimensions here? If our federal and state governments are “in bed” with the tobacco industry, did our governments act unethically in pursuing this litigation, or would our governments have been acting unethically if they had not pursued this litigation? Be prepared to justify your conclusions.

various ailments in daughters of the women to whom it was administered) or diseases resulting from long-term exposure to asbestos. In such cases, each manufacturer of the product can argue that the plaintiff should lose because she cannot show that its product harmed her.

How do courts handle these cases? Most of the time, they continue to deny recovery under traditional causation rules because the special circumstances necessary to trigger application of industrywide liability are found not to be present. However, using various approaches

whose many details are beyond the scope of this text, other courts have made it easier for plaintiffs to recover in appropriate cases. Where recovery is allowed, some of these courts have apportioned damages among the firms that might have produced the harm-causing product. Such an apportionment is typically based on market share at some chosen time.

Time Limitations

We now turn to several problems that are common to each major product liability theory but that may be resolved differently from theory to theory. One such problem is the time within which the plaintiff must sue or else lose the case. Traditionally, the main time limits on product liability suits have been the applicable contract and tort **statutes of limitations**. The usual UCC statute of limitations for express and implied warranty claims is four years after the seller offers the defective goods to the buyer (usually, four years after the sale). In tort cases, the applicable statute of limitations may be shorter, depending upon applicable state law. It begins to run, however, only when the defect was or should have been discovered—often, the time of the injury.

In part because of tort reform, some states now impose various other limitations on the time within which product liability suits must be brought. Among these additional time limitations are (1) special statutes of limitations for product liability cases involving death, personal injury, or property damage (e.g., from one to three years after the time the death or injury occurred or should have been discovered); (2) special time limits for “delayed manifestation” injuries such as those resulting from exposure to asbestos; (3) useful safe life defenses (which prevent plaintiffs from suing once the product’s “useful safe life” has passed); and (4) statutes of repose (whose aim is similar). Statutes of repose usually run for a 10- to 12-year period that begins when the product is sold to the first buyer not purchasing for resale—usually an ordinary consumer. In a state with a 10-year statute of repose, for example, such parties cannot recover for injuries that occur more than 10 years after they purchased the product causing the harm. This is true even when the suit is begun quickly enough to satisfy the applicable statute of limitations.

Damages in Product Liability Cases

The damages obtainable under each theory of product liability recovery strongly influence a plaintiff’s strategy. Here, we describe the major kinds of damages awarded

in product liability cases, along with the theories under which each can be recovered. One lawsuit may involve claims for all these sorts of damages.

1. Basis-of-the-bargain damages. Buyers of defective goods have not received full value for the goods’ purchase price. The resulting loss, usually called basis-of-the-bargain damages or **direct economic loss**, is the value of the goods as promised under the contract, minus the value of the goods as received.

Basis-of-the-bargain damages are almost never awarded in tort cases. In express and implied warranty cases, however, basis-of-the-bargain damages are recoverable where there was *privity of contract* (a direct contractual relation) between the plaintiff and the defendant. As discussed in the next section, however, only occasionally will a warranty plaintiff who lacks privity with the defendant obtain basis-of-the-bargain damages. Such recoveries most often occur where an express warranty was made to a remote plaintiff through advertising, brochures, or labels.

2. Consequential damages. Consequential damages include **personal injury, property damage** (damage to the plaintiff’s other property), and **indirect economic loss** (e.g., lost profits or lost business reputation) resulting from a product defect. The *Simo* case, which appeared earlier in the chapter, illustrates consequential damages of the sort just noted. Consequential damages also include **noneconomic loss**—for example, pain and suffering, physical impairment, mental distress, loss of enjoyment of life, loss of companionship or consortium, inconvenience, and disfigurement. Noneconomic loss usually is part of the plaintiff’s personal injury claim. Recently, some states have limited noneconomic loss recoveries, typically by imposing a dollar cap on them.

Plaintiffs in tort cases normally can recover for personal injury and property damage. Recoveries for foreseeable indirect economic loss sometimes are allowed.

In express and implied warranty cases where *privity exists* between the plaintiff and the defendant, the plaintiff can recover for (1) personal injury and property damage, if either proximately resulted from the breach of warranty; and (2) indirect economic loss, if the defendant had reason to know that this was likely. As discussed in the next section, a UCC plaintiff who *lacks privity* with the defendant has a reasonably good chance of recovering for personal injury or property damage. Recovery for indirect economic loss is rare because remote sellers usually cannot foresee such losses.

3. Punitive damages. Unlike the compensatory damages discussed above, punitive damages are not designed to

compensate the plaintiff for harms suffered (even though the plaintiff typically becomes entitled to collect any punitive damages assessed against the defendant). Punitive damages are intended to punish defendants who have acted in an especially outrageous fashion, and to deter them and others from so acting in the future. Of the various standards for awarding punitive damages, probably the most common is the defendant's conscious or reckless disregard for the safety of those likely to be affected by the goods. Examples include concealment of known product hazards, knowing violation of government or industry product safety standards, failure to correct known dangerous defects, and grossly inadequate product testing or quality control procedures.

In view of their perceived frequency, size, and effect on business and the economy, punitive damages were targeted for some states' tort reform efforts during the 1980s and 1990s. The approaches taken by the resulting statutes vary. Some set the standards for punitive damage assessment and the plaintiff's burden of proof; some articulate factors courts should consider when ruling on punitive damage awards; and some create special procedures for punitive damage determinations. A number of states have also limited the size of punitive damage recoveries, usually by restricting them to some multiple of the plaintiff's compensatory damages or by putting a flat dollar cap on them. Moreover, decisions of the U.S. Supreme Court have revealed that constitutional concerns may be implicated by a punitive damages award that does not bear a reasonable relation to the amount of compensatory damages awarded.

Assuming that the standards just described have been met, punitive damages are recoverable in tort cases. Because of the traditional rule that punitive damages are not available in contract cases, they seldom are awarded in express and implied warranty cases.

The No-Privity Defense

Today, defective products often move through long chains of distribution before reaching the person they harm. This means that a product liability plaintiff often has not dealt directly with the party ultimately responsible for her losses. For example, in a chain of distribution involving defective component parts, the parts may move *vertically* from their manufacturer to the manufacturer of a product in which those parts are used, and then to a wholesaler and a retailer before reaching the eventual buyer. The defect's consequences may move *horizontally* as well, affecting members of the buyer's family, guests in her home, and even bystanders. If the buyer or one of these

parties suffers loss because of the defect in the component parts, may she successfully sue the component parts manufacturer or any other party in the vertical chain of distribution with whom she did not directly deal?

Such cases were unlikely to succeed under 19th-century law. At that time, there was no recovery for defective goods without privity of contract between the plaintiff and the defendant. In many such cases, a buyer would have been required to sue his dealer. If the buyer was successful, the retailer might have sued the wholesaler, and so on up the chain. For various reasons, the party ultimately responsible for the defect often escaped liability.

Tort Cases By now, the old no-liability-outside-privity rule effectively has been eliminated in tort cases. It has no effect in strict liability cases, where even bystanders can recover against remote manufacturers. In negligence cases, a plaintiff generally recovers against a remote defendant if the plaintiff's loss was a reasonably foreseeable consequence of the defect. Depending on the circumstances, therefore, bystanders and other distant parties may recover in a negligence case against a manufacturer. The *Restatement (Third)* suggests that tort principles should govern the privity determination. This should mean a test of reasonable foreseeability in most instances.

Warranty Cases The no-privity defense retains some vitality in UCC cases. Unfortunately, the law on this subject is complex and confusing. Under the Code, the privity question is formally governed by section 2-318, which comes in three alternative versions. Section 2-318's language, however, is a less-than-reliable guide to the courts' actual behavior in UCC privity cases.

UCC Section 2-318 Alternative A to section 2-318 states that a seller's express or implied warranty runs to natural persons in the family or household of *his* (the seller's) buyer and to guests in his buyer's home, if they suffer personal injury and if it was reasonable to expect that they might use, consume, or be affected by the goods sold. On its face, Alternative A does little to undermine the traditional no-privity defense.

Alternatives B and C go much further. Alternative B extends the seller's express or implied warranty to any natural person who has suffered personal injury, if it was reasonable to expect that this person would use, consume, or be affected by the goods. Alternative C is much the same, but it extends the warranty to any person (not just natural persons) and to those suffering injury in

general (not just personal injury). If the reasonable-to-expect test is met, these two provisions should extend the warranty to many remote parties, including bystanders.

Departures from Section 2–318 For various reasons, section 2–318’s literal language sometimes has little relevance in UCC privity cases. Some states have adopted privity statutes that differ from any version of 2–318. One of the comments to section 2–318, moreover, allows courts to extend liability beyond what the section expressly permits. Finally, versions B and C are fairly open-ended as written. The plaintiff’s ability to recover outside privity in warranty cases thus varies from state to state and situation to situation. The most important factors affecting resolution of this question are:

1. Whether it is *reasonably foreseeable* that a party such as the plaintiff would be harmed by the product defect in question.
2. The *status of the plaintiff*. On average, consumers and other natural persons fare better outside privity than do corporations and other business concerns.
3. The *type of damages* the plaintiff has suffered. In general, remote plaintiffs are (a) most likely to recover for personal injury, (b) somewhat less likely to recover for property damage, (c) occasionally able to obtain basis-of-the-bargain damages, and (d) seldom able to recover for indirect economic loss. Recall from the previous section that a remote plaintiff is most likely to receive basis-of-the-bargain damages where an express warranty was made to him through advertising, brochures, or labels.

In the *Hyundai* case, which follows, the court discusses the privity requirement’s history and the alternative versions of section 2–318 before rejecting the defendant’s argument that the absence of privity should bar the plaintiff’s implied warranty claim.

Hyundai Motor America, Inc. v. Goodin

822 N.E.2d 947 (Ind. Sup. Ct. 2005)

Sandra Goodin purchased a new Hyundai Sonata automobile in November 2000 from an Evansville, Indiana, dealer. The Sonata’s manufacturer, Hyundai Motor America, Inc., provided a written express warranty of a limited nature, but the dealer did not furnish an express warranty. The contract of sale between the dealer and Goodin contained the dealer’s disclaimer of the implied warranty of merchantability. (Disclaimers will be discussed later in the chapter.) Because Hyundai provided a written warranty, the federal Magnuson-Moss Warranty Act prohibited Hyundai from disclaiming the implied warranty of merchantability. (This aspect of the Magnuson-Moss Act will be addressed later in the chapter.)

For a two-year period that ran essentially from the time of purchase, Goodin complained that the car vibrated excessively and that its brakes groaned, squeaked, and made a grinding noise when applied. Various repairs were performed by the dealer that sold Goodin the car and by another Hyundai dealer. Hyundai Motor America, Inc.’s limited warranty covered most of these repairs. Goodin incurred the cost of other repairs conducted after the expiration of Hyundai’s limited warranty. None of the repairs, however, completely took care of the problems Goodin had consistently pointed out.

In April 2002, Goodin’s attorney retained an expert to examine the car. The expert noted the brake-related problems and the excessive vibration, and expressed the view that the car was “defective and unmerchantable at the time of manufacture and unfit for operation on public roadways.” In October 2002, a district service manager for Hyundai inspected and test-drove Goodin’s car. Although he did not notice excessive vibration or the brake-related noises about which Goodin complained, he heard “a droning noise” that probably resulted from a failed wheel bearing. The district service manager said he regarded the wheel bearing problem as a serious one that should have been covered by Hyundai’s limited warranty.

Goodin later sued Hyundai in an Indiana court for breach of express warranty and breach of the implied warranty of merchantability. Over Hyundai’s objection, the trial judge’s instructions to the jury on the implied warranty of merchantability claim made no mention of any privity requirement. The jury returned a verdict for Hyundai on Goodin’s breach of express warranty claim, but awarded Goodin \$3,000 on her claim for breach of the implied warranty of merchantability. (Goodin’s counsel was later awarded attorney’s fees of \$19,237.50 pursuant to fee-shifting provisions in the Magnuson-Moss Warranty Act.)

Hyundai appealed, asserting that a lack of privity between Goodin and Hyundai barred Goodin’s recovery for breach of the implied warranty of merchantability. The Indiana Court of Appeals reversed the lower court’s decision. In holding that the absence of privity barred Goodin’s claim, the Court of Appeals regarded itself as bound by language in a footnote in a 1993 decision of the Supreme Court of Indiana. Goodin appealed to the state Supreme Court.

Boehm, Justice

Goodin's claim . . . for breach of the implied warranty of merchantability . . . lives or dies on the resolution of [this issue:] whether Indiana requires privity between buyer and manufacturer for a claim of breach of implied warranty.

Indiana has adopted the Uniform Commercial Code, notably its provision that "[a] warranty that the goods shall be merchantable is implied in a contract for their sale if the seller is a merchant with respect to goods of that kind. . . ." Hyundai asserts [that] Indiana law requires vertical privity between manufacturer and consumer when economic damages are sought. In this case, Goodin seeks only direct economic damages for the decreased value of the Sonata by reason of [its] allegedly defective [nature]. Goodin argues that traditional privity of contract between the consumer and manufacturer is not required for a claim against a manufacturer for breach of the implied warranty of merchantability.

Privity originated as a doctrine limiting tort relief for breach of warranties. The lack of privity defense was first recognized in [an English case in the 1840s]. [H]owever, *MacPherson v. Buick Motor Co.*, 111 N.E.2d 150 (N.Y. Ct. App. 1916), and *Henningsen v. Bloomfield Motors, Inc.*, 161 A.2d 69 (N.J. Sup. Ct. 1960), established that lack of privity between an automobile manufacturer and a consumer would not preclude the consumer's action for personal injuries and property damage caused by the negligent manufacture of an automobile. "Vertical" privity typically becomes an issue when a purchaser files a breach of warranty action against a vendor in the purchaser's distribution chain who is not the purchaser's immediate seller. Simply put, vertical privity exists only between immediate links in a distribution chain. A buyer in the same chain who did not purchase directly from a seller is "remote" as to that seller. "Horizontal" privity, in contrast, refers to claims by nonpurchasers, typically someone who did not purchase the product but who was injured while using it. Goodin[, who] purchased her car from a dealership and is thus remote from the manufacturer[.] . . . lacks "vertical" privity with Hyundai.

"Although warranty liability originated as a tort doctrine, it was assimilated by the law of contracts and ultimately became part of the law of sales." [Citation of authority omitted.] But "privity is more than an accident of history. It permitted manufacturers and distributors to control in some measure their risks of doing business." [Citation of authority omitted.] Because vertical privity involves a claim by a purchaser who voluntarily acquired the goods, it enjoys a stronger claim to justification on the basis of freedom of contract or consensual relationship. It nevertheless has come under criticism in recent years, and this is the first opportunity for this court to give full consideration to this issue.

This court has mentioned the common law privity requirement in the context of actions sounding in contract only once, and that in a footnote. *Martin Rispens & Son v. Hall Farms, Inc.*, 621 N.E.2d 1078 (Ind. Sup. Ct. 1993), addressed negligence and express and implied warranty claims by a farmer against both the direct seller and the grower of seed that allegedly damaged the farmer's crops. The footnote cited the UCC and two Court of Appeals decisions, and other courts have taken the footnote as settled Indiana law on this issue. As the Court of Appeals put it in its decision in this case:

The [footnote] indicates our Supreme Court's unequivocal acceptance that privity between a consumer and a manufacturer is required in order to maintain a cause of action for breach of an implied warranty of merchantability. . . . To the extent Goodin argues that this result is inequitable, we are not entirely unsympathetic. Whether the cons of the vertical privity rule outweigh the pros is something for either our Supreme Court or the General Assembly [the Indiana legislature] to address.

In *Martin Rispens*, the implied warranty claims were rejected based on an effective disclaimer of implied warranty, under [an Indiana statute that] permits parties to agree to exclude or modify implied warranties if [the disclaimer meets certain requirements]. The farmer did not present privity as an issue on [appeal] to this court and neither party briefed it. It was not necessary to the decision. Accordingly, the language in *Martin Rispens*, though often cited, is dicta and we accept the invitation from the Court of Appeals to reconsider it.

Indiana law, as developed in the Court of Appeals, has already eroded the privity requirement to some degree. In [a 1977 case], the Court of Appeals permitted the plaintiff to recover on an implied warranty where it was shown that the contractual arrangements between the manufacturer and the dealer who sold to the plaintiff created an agency relationship; and the manufacturer's agents participated significantly in the sale both through advertising and personal contact with the buyer. Under those circumstances the Court of Appeals held that the manufacturer was a [merchant seller for purposes of the plaintiff's implied warranty claim]. [A later decision of the Court of Appeals] involved a defective boat sold by a dealer. . . . [The facts showed that] the manufacturer's agents engaged in personal contact with the buyer by giving demonstrations and [by] attempting to adjust the loss after the sale. The Court of Appeals . . . held that the participation in the sale by the manufacturer was sufficient to bring it into the transaction as a [potentially liable party for purposes of the plaintiff's implied warranty claim]. However, if the plaintiff could not show perfect vertical privity or an exception to the rule [because of the manufacturer's participation in the sale], then the plaintiff could not prove the claim. [Case citations omitted.]

[Indiana's] Product Liability Act does not require a personal injury plaintiff to prove vertical privity in order to assert a product liability claim against the manufacturer. Even before the [enactment of the] Product Liability Act in 1978, the requirement of privity of contract in warranty actions in Indiana began to erode in 1963 with the passage of the Uniform Commercial Code [and its] section 2-318:

A seller's warranty whether express or implied extends to any natural person who is in the family or household of his buyer or who is a guest in his home if it is reasonable to expect that such person may use, consume or be affected by the goods and who is injured in person by breach of the warranty. A seller may not exclude or limit the operation of this section.

Section 2-318 was taken verbatim from the UCC as [drafted] in 1952. It eliminated "horizontal" privity as a requirement for warranty actions. However, that version of section 2-318 took no position on the requirement of vertical privity.

The purpose of the original version of section 2-318, which remains unchanged in Indiana today, was to give standing to certain nonprivity plaintiffs to sue as third-party beneficiaries of the warranties that a buyer received under a sales contract. That version of section 2-318 provided only that the benefit of a warranty automatically extended to the buyer's family, household, and houseguests. It was intended to, and did, accomplish its goal of "freeing any such beneficiaries from any technical rules as to [horizontal] privity." [Quoting an official comment of the UCC drafters.] Some states refused to enact this version of section 2-318, and others adopted nonuniform versions of the statute. In 1966, in response to this proliferation of deviant versions of a purportedly uniform code, the drafters proposed three alternative versions of section 2-318. [All but three states chose an alternative to enact from among the three alternative versions.]

The majority of states, including Indiana, retained or adopted the 1952 version of section 2-318, which now appears in the Uniform Commercial Code as "Alternative A." Alternative B provides that "any natural person who may reasonably be expected to use, consume or be affected by the goods and who is injured in person by breach of warranty" may institute a breach of warranty action against the seller. Alternative B expands the class of potential plaintiffs beyond family, household, and guests, and also implicitly abolishes the requirement of vertical privity because the seller's warranty is not limited to "his buyer" and persons closely associated with that buyer.

[Although] Alternatives A and B of 2-318 are limited to cases where the plaintiff is "injured in person," they do not [contain language barring] a nonprivity plaintiff from recovery against a remote manufacturer for direct economic loss.

[Accordingly], Alternatives A and B do not prevent a court from [eliminating] the *vertical* privity requirement [when] a nonprivity buyer [sues to recover] direct economic loss.

Alternative C is the most expansive in eliminating the lack-of-privity defense. It provides that "[a] seller's warranty whether express or implied extends to any person who may reasonably be expected to use, consume, or be affected by the goods and who is injured by breach of the warranty." Alternative C expands the class of plaintiffs to include other nonpurchasers such as the buyer's employees and invitees, and bystanders. Alternative C also eliminates the vertical privity requirement, but is not restricted to "personal" injury. Because Alternative C refers simply to "injury," plaintiffs sustaining only property damage or economic loss in some states have been held to have standing to sue under this language.

The commentaries to the UCC . . . explain that the three alternatives were not to be taken as excluding the development of the common law on the issue of vertical privity. There is a split of authority in other jurisdictions with similar or identical versions of section 2-318 on the availability of implied warranty claims by remote purchasers, particularly if only economic loss is claimed, as in the present case. Courts of other [states] that have retained or adopted Alternative A note that the statute speaks only to horizontal privity, and is silent as to vertical privity. As the Pennsylvania Supreme Court put it: "Merely to read the language [of § 2-318] is to demonstrate that the code simply fails to treat this problem. . . . There thus is nothing to prevent this court from joining in the growing number of jurisdictions which, although bound by the code, have nevertheless abolished vertical privity in breach of warranty cases." [Case citation omitted.] Indiana has not legislated on this issue since 1966 when the UCC adopted these three alternatives. In short, the General Assembly, in keeping Alternative A, left to this court the issue of [the] extent [to which] vertical privity of contract will be required.

Several jurisdictions that have adopted Alternative A have abolished [vertical] privity. Others have retained the common law privity rule. Courts that have abolished vertical privity have cited a variety of reasons. Principal among these is the view that, in today's economy, manufactured products typically reach the consuming public through one or more intermediaries. As a result, any loss from an unmerchantable product is likely to be identified only after the product is attempted to be used or consumed. Others have cited the concern that privity encourages thinly capitalized manufacturers by insulating them from responsibility for inferior products. Yet others have focused on the point that if implied warranties are effective against remote sellers, it produces a chain of lawsuits or cross-claims against those up the distribution chain. And some focus

on the reality . . . that manufacturers focus on the consumer in communications promoting the product.

Finally, some jurisdictions have abolished privity in warranty actions where only economic losses were sought based on the notion that there is “no reason to distinguish between recovery for personal and property injury, on the one hand, and economic loss on the other.” [Case citation omitted.] A variance on this theme is the view that abolishing privity “simply recognizes that economic loss is potentially devastating to the buyer of an unmerchantable product and that it is unjust to preclude any recovery from the manufacturer for such loss because of a lack of privity, when the slightest physical injury can give rise to strict liability under the same circumstances.” [Case citation omitted.] One court preserving the privity requirement expressed the view that “there may be cases where the plaintiff may be unfairly prejudiced by the operation of the economic loss rule in combination with the privity requirement.” [Case citation omitted.]

In Indiana, the economic loss rule applies to bar recovery in tort “where a negligence claim is based upon the failure of a product to perform as expected and the plaintiff suffers only economic damages.” [Quoting *Martin Rispens*.] Possibly because of the economic loss rule, Goodin did not raise a negligence claim here. Furthermore, at oral argument, Goodin’s attorney pointed to the warranty disclaimer in the [contract between Goodin and the dealer] as a bar to Goodin’s ability to sue her direct seller, AutoChoice, which could then have sued Hyundai for reimbursement. This disclaimer, Goodin contends, precluded a chain of claims ultimately reaching the manufacturer. Therefore, Goodin claims that if this court does not abolish the vertical privity requirement, she will be left without a remedy for Hyundai’s breach of its implied warranty of merchantability, and Hyundai’s implied warranty becomes nonexistent in practical terms.

The basis for the privity requirement in a contract claim is essentially the idea that the parties to a sale of goods are free to bargain for themselves, and thus allocation of risk of failure of a product is best left to the private sector. The Indiana Court of Appeals summarized this view [in a 1979 decision]:

Generally privity extends to the parties to the contract of sale. It relates to the bargained-for expectations of the buyer and seller. Accordingly, when the cause of action arises out of economic loss related to the loss of the bargain or profits and consequential damages related hereto, the bargained-for expectations of buyer and seller are relevant and privity between them is still required. Implied warranties of merchantability and fitness for a particular use, as they relate to economic loss from the bargain, cannot then ordinarily be sustained between the buyer and a remote manufacturer.

We think that this rationale has eroded to the point of invisibility as applied to many types of consumer goods in today’s economy. The UCC recognizes an implied warranty of merchantability if “goods” are sold to “consumers” by one who ordinarily deals in this product. Warranties are often explicitly promoted as marketing tools, as was true in this case of the Hyundai warranties. Consumer expectations are framed by these legal developments to the point where technically advanced consumer goods are virtually always sold under express warranties, which, as a matter of federal law run to the consumer without regard to privity. [The federal] Magnuson-Moss Warranty Act precludes a disclaimer of the implied warranty of merchantability as to consumer goods where an express warranty is given. Given this framework, we think ordinary consumers are entitled to, and do, expect that a consumer product sold under a warranty is merchantable, at least at the modest level of merchantability set by UCC section 2–314, where hazards common to the type of product do not render the product unfit for normal use.

Even if one party to the contract—the manufacturer—intends to extend an implied warranty only to the immediate purchaser, . . . doing away with the privity requirement for a [consumer] product subject to the Magnuson-Moss Warranty Act, rather than rewriting the deal, simply gives the consumer the contract the consumer expected. The manufacturer, on the other hand, is encouraged to build quality into its products. To the extent there is a cost of adding uniform or standard quality in all products, the risk of a lemon is passed to all buyers in the form of pricing and not randomly distributed among those unfortunate enough to have acquired one of the lemons. [E]limination of the privity requirement gives consumers such as Goodin the value of their expected bargain. . . . The remedy for breach of implied warranty of merchantability is in most cases, including this one, the difference between “the value of the goods accepted and the value they would have had if they had been as warranted.” [Citation of Indiana statute omitted.] This gives the buyer the benefit of the bargain. In most cases, however, if any additional damages are available under the UCC as the result of abolishing privity, Indiana law would award the same damages under the Product Liability Act as personal injury or damage to “other property” from a “defective” product. [Case citation omitted.]

For the reasons given above, we conclude that Indiana law does not require vertical privity between a consumer and a manufacturer as a condition to a claim by the consumer against the manufacturer for breach of the manufacturer’s implied warranty of merchantability.

Judgment of Court of Appeals reversed.

Disclaimers and Remedy Limitations

A product liability **disclaimer** is a clause in the sales contract whereby the seller attempts to eliminate *liability* it might otherwise have under the theories of recovery described earlier in the chapter. A **remedy limitation** is a clause attempting to block recovery of certain *damages*. If a disclaimer is effective, no damages of any sort are recoverable under the legal theory attacked by the disclaimer. A successful remedy limitation prevents the plaintiff from recovering certain types of damages but does not attack the plaintiff's theory of recovery. Damages not excluded still may be recovered because the theory is left intact.

The main justification for enforcing disclaimers and remedy limitations is freedom of contract. Why, however, would any rational contracting party freely accept a disclaimer or remedy limitation? Because sellers need not insure against lawsuits for defective goods accompanied by an effective disclaimer or remedy limitation, they should be able to sell those goods more cheaply. Thus, enforcing such clauses allows buyers to obtain a lower price by accepting the economic risk of a product defect. For purchases by ordinary consumers and other unsophisticated buyers, however, this argument often is illusory. Sellers normally present the disclaimer or remedy limitation in a standardized, take-it-or-leave-it fashion. It is also doubtful whether many consumers read disclaimers and remedy limitations at the time of purchase, or would comprehend them if they did read them. As a result, there is little or no genuine bargaining over disclaimers or remedy limitations in consumer situations. Instead, they are effectively dictated by a seller with superior size and organization. These observations, however, are less valid when the buyer is a business entity with the capability to engage in genuine bargaining with sellers.

Because the realities surrounding the sale differ from situation to situation, and because some theories of recovery are more hospitable to contractual limitation than others, the law on product liability disclaimers and remedy limitations is complicated. We begin by discussing implied warranty disclaimers. Then we examine disclaimers of express warranty liability, negligence liability, 402A liability, and liability under the *Restatement (Third)*, before considering remedy limitations separately.

Implied Warranty Disclaimers

The Basic Tests of UCC Section 2-316(2) UCC section 2-316(2) makes it relatively easy for sellers to disclaim the implied warranties of merchantability and

fitness for a particular purpose. The section states that to exclude or modify the implied warranty of merchantability, a seller must (1) use the word *merchantability*, and (2) make the disclaimer conspicuous if it is written. To exclude or modify the implied warranty of fitness, a seller must (1) use a writing, and (2) make the disclaimer conspicuous. A disclaimer is conspicuous if it is written so that a reasonable person ought to have noticed it. Capital letters, larger type, contrasting type, and contrasting colors usually suffice.

Unlike the fitness warranty disclaimer, a disclaimer of the implied warranty of merchantability can be oral. Although disclaimers of the latter warranty must use the word *merchantability*, no special language is needed to disclaim the implied warranty of fitness. For example, a conspicuous written statement that “THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF” disclaims the implied warranty of fitness but not the implied warranty of merchantability.

Other Ways to Disclaim Implied Warranties: Section 2-316(3) According to UCC section 2-316(3)(a), sellers may also disclaim either implied warranty by using such terms as “with all faults,” “as is,” and “as they stand.” Some courts have held that these terms must be conspicuous to be effective as disclaimers. Other courts have allowed such terms to be effective disclaimers only in sales of used goods.

UCC section 2-316(3)(b) describes two situations in which the buyer's *inspection* of the goods or her *refusal to inspect* may operate as a disclaimer. If a buyer examines the goods before the sale and fails to discover a defect that should have been reasonably apparent to her, there can be no implied warranty claim based on that defect. Also, if a seller requests that the buyer examine the goods and the buyer refuses, the buyer cannot base an implied warranty claim on a defect that would have been reasonably apparent had she made the inspection. The definition of a reasonably apparent defect varies with the buyer's expertise. Unless the defect is blatantly obvious, ordinary consumers may have little to fear from section 2-316(3)(b).

Finally, UCC section 2-316(3)(c) says that an implied warranty may be excluded or modified by *course of dealing* (the parties' previous conduct), *course of performance* (the parties' previous conduct under the same contract), or *usage of trade* (any practice regularly observed in the trade). For example, if it is accepted in the local cattle trade that buyers who inspect the seller's cattle and reject certain animals must accept all defects in the cattle actually purchased, such buyers cannot mount an implied warranty claim regarding those defects.

Unconscionable Disclaimers From the previous discussion, it seems that any seller who retains a competent attorney can escape implied warranty liability at will. In fact, however, a seller's ability to disclaim implied warranties sometimes is restricted by the doctrine of **unconscionability** established by UCC section 2-302 and discussed in Chapter 15. In appropriate instances, courts may apply section 2-302's unconscionability standards to implied warranty disclaimers even though those disclaimers satisfy UCC section 2-316(2). Despite a growing willingness to protect smaller firms that deal with corporate giants, however, courts still tend to reject unconscionability claims where business parties have contracted in a commercial context. Implied warranty disclaimers often are declared unconscionable, however, in personal injury cases brought by ordinary consumers.

The Impact of Magnuson-Moss The Magnuson-Moss Act also limits a seller's ability to disclaim implied warranties. If a seller gives a consumer a full warranty on consumer goods whose price exceeds \$10, the seller may not disclaim, modify, or limit the duration of any implied warranty. If a limited warranty is given, the seller may not disclaim or modify any implied warranty but may limit its duration to the duration of the limited warranty if this is done conspicuously and if the limitation is not unconscionable. These are significant limitations on a seller's power to disclaim implied warranties. Presumably, however, a seller still can disclaim by refusing to give a written warranty while placing the disclaimer on some other writing.

Express Warranty Disclaimers UCC section 2-316(1) says that an express warranty and a disclaimer should be read consistently if possible, but that the disclaimer must yield if such a reading is unreasonable. Because it normally is unreasonable for a seller to exclude with one hand what he has freely and openly promised with the other, it is quite difficult to disclaim an express warranty.

Disclaimers of Tort Liability Disclaimers of negligence liability and strict liability are usually ineffective in cases involving ordinary consumers. However, some courts enforce such disclaimers where both parties are business entities that (1) dealt in a commercial setting, (2) had relatively equal bargaining power, (3) bargained over the product's specifications, and (4) negotiated the risk of loss from product defects (e.g., the disclaimer itself). Even though it has a provision that seems to bar all disclaimers, the same should be true under the *Restatement (Third)*.

Limitation of Remedies In view of the expense they can create for sellers, consequential damages are the usual target of remedy limitations. When a limitation of consequential damages succeeds, buyers of the product may suffer. For example, suppose that Dillman buys a computer system for \$20,000 under a contract that excludes consequential damages and limits the buyer's remedies to the repair or replacement of defective parts. Suppose also that the system never works properly, causing Dillman to suffer \$10,000 in lost profits. If the remedy limitation is enforceable, Dillman could only have the system replaced or repaired by the seller and could not recover his \$10,000 in consequential damages.

In tort cases, the tests for the enforceability of remedy limitations resemble the previous tests for disclaimers. Under the UCC, however, the standards for remedy limitations differ from those for disclaimers. UCC section 2-719 allows the limitation of consequential damages in express and implied warranty cases unless the limitation of remedy "fails of its essential purpose" or is unconscionable. The section adds that a limitation of consequential damages is very likely to be unconscionable where the sale is for *consumer goods* and the plaintiff has suffered *personal injury*. Where the loss is "commercial," however, the limitation may or may not be unconscionable.

Whether a limitation of remedy "fails of its essential purpose" depends on all of the relevant facts and circumstances. In a fairly recent case, for instance, the court concluded that a limitation of remedy in a contract for the sale of a motor home failed of its essential purpose when a collection of problems caused the motor home to be out of service for 162 days during the first year after the buyer purchased it.⁵

Defenses

Various matters—for example, the absence of privity or a valid disclaimer—can be considered defenses to a product liability suit. Here, however, our initial concern is with product liability defenses that involve the plaintiff's behavior. Although the *Restatement (Third)* has a "comparative responsibility" provision that apportions liability among the plaintiff, the seller, and distributors, and various states have similar rules, the following discussion is limited to two-party situations.

⁵*Pack v. Damon Corp.*, 2006 U.S. App. LEXIS 2303 (6th Cir. 2006).

CYBERLAW IN ACTION

In Chapters 9 and 11, you read about shrinkwrap and clickwrap contracts, which are often used in sales of computer hardware and licenses of software and in establishing terms of use for access to networks and Web sites. It is extremely common for these shrinkwrap or clickwrap contracts to contain **warranty disclaimers** and **limitation of remedy** clauses. For some examples of how these disclaimers and limitations of remedy look, see *Warranty and Liability Disclaimer Clauses in Current Shrinkwrap and Clickwrap Contracts*, www.cptech.org/ecom/ucita/licenses/liability.html.

The courts that have considered the enforceability of clickwrap or shrinkwrap warranty disclaimers or limitations of remedy have upheld them. For example, in *M. A. Mortenson Company, Inc. v. Timberline Software Corp.*, 998 P.2d 305 (Wash. Sup. Ct. 2000), Mortenson, a general contractor, purchased Timberline's licensed software and used it to prepare a

construction bid. Mortenson later discovered that its bid was \$1.95 million too low because of a malfunction of the software. When Mortenson sued Timberline and others for breach of warranty, Timberline asserted that the limitation of remedies clause contained in the software license, which limited Mortenson's remedies to the purchase price of the software, prevented Mortenson from recovering any consequential damages caused by a defect in the software. Although Mortenson contended that it never saw or agreed to the terms of the license agreement, the Washington Supreme Court held that the terms of the license became part of the parties' contract. The terms were set forth or referenced in various places, such as the shrinkwrap packaging for the program disks, the software manuals, and the protection devices for the software. Applying the principle that limitations of remedy are generally enforceable unless they are unconscionable, the court found the limitation of remedies clause to be conscionable and enforceable.

The Traditional Defenses Traditionally, the three main defenses in a product liability suit have been the overlapping trio of product misuse, assumption of risk, and contributory negligence. **Product misuse** (or abnormal use) occurs when the plaintiff uses the product in some unusual, unforeseeable way, and this causes the loss for which he sues. Examples include ignoring the manufacturer's instructions, mishandling the product, and using the product for purposes for which it was not intended. If, however, the defendant had reason to foresee the misuse and failed to take reasonable precautions against it, there is no defense. Product misuse traditionally has been a defense in warranty, negligence, and strict liability cases.

Assumption of risk, discussed in Chapter 7, is the plaintiff's voluntary consent to a known danger. It can occur anytime the plaintiff willingly exposes herself to a known product hazard—for example, by consuming obviously adulterated food. As with product misuse, assumption of risk ordinarily has been a defense in warranty, negligence, and strict liability cases.

Contributory negligence, also discussed in Chapter 7, is the plaintiff's failure to act reasonably and prudently. In the product liability context, perhaps the most common example is the simple failure to notice a hazardous product defect. Contributory negligence is a defense in a negligence case (if state law has not replaced the contributory negligence defense with the comparative rules discussed below), but courts have disagreed about whether

or when it should be a defense in warranty and strict liability cases.

Comparative Principles Where they are allowed and proven, the three traditional product liability defenses completely absolve the defendant from liability. Dissatisfaction with this all-or-nothing situation has spurred the increasing use of comparative principles in product liability cases.⁶ Rather than letting the traditional defenses completely absolve the defendant, nearly all states now require apportionment of damages on the basis of relative fault. They do so by requiring that the fact-finder establish the plaintiff's and the defendant's percentage shares of the total fault for the injury and then award the plaintiff his total provable damages times the defendant's percentage share of the fault.

Unsettled questions persist among the states that have adopted comparative principles. First, it is not always clear what kinds of fault will reduce the plaintiff's recovery. Some state comparative negligence statutes, however, have been read as embracing assumption of risk and product misuse, and state comparative fault statutes usually define fault broadly. Second, comparative

⁶Comparative negligence and comparative fault are discussed in Chapter 7. Although courts and commentators often use the terms comparative fault and comparative negligence interchangeably, comparative fault usually includes forms of blameworthiness other than negligence.

principles may assume either the *pure* or the *mixed* forms described in Chapter 7. In “mixed” states, for example, the defendant has a complete defense when the plaintiff was more at fault than the defendant. There is also some uncertainty about the theories of recovery and the types of damage claims to which comparative principles apply.

Preemption and Regulatory Compliance?

What if Congress—or an administrative agency acting within the scope of power delegated to it by Congress—enacts legislation or promulgates regulations dealing with safety standards for a certain type of product, and the product’s manufacturer has met those standards? Does the manufacturer’s compliance with the federal standards serve as a defense when a plaintiff brings state law claims such as negligence, strict liability, or breach of implied warranty in an effort to hold the manufacturer liable for supposed defects in product? The answer: *Sometimes*. The questions just posed, and the indefinite answer just offered, pertain to two potential defenses: the *preemption* defense, and the *regulatory compliance* defense.

The preemption defense rests on a federal supremacy premise—the notion that federal law overrides state law when the two conflict or when state law stands in the way of the objectives underlying federal law. Sometimes a federal statute dealing with a certain type of product may contain a provision that calls for preemption of state law-based claims under circumstances specified in the federal law’s preemption provision. In that event, courts must determine whether the plaintiff’s state law-based claim (e.g., negligence, strict liability, or breach of implied warranty) is preempted. Such a determination depends heavily upon the language used in the statute and the specific nature of the plaintiff’s claim. When preemption occurs, the federal law controls and the state law-based claim cannot serve as a basis for relief—meaning that the plaintiff loses. For instance, in *Riegel v. Medtronic, Inc.*, an almost certainly influential 2008 decision that follows shortly, the Supreme Court interpreted a preemption provision in the federal statute dealing with medical devices as barring the plaintiffs’ state law-based claims against the manufacturer of an allegedly defective medical device.

Even when a federal law dealing with product safety does not contain a preemption section, it is conceivable that courts could interpret the statute as having a preemptive effect if the federal law sets up a highly specific regulatory regime that the court believes would be undermined by allowance of liability claims brought under state law. The absence of a specific preemption section

from the relevant federal statute, however, makes it less likely that a court would consider a plaintiff’s state law-based claims to be preempted. For example, there is no preemption provision in the federal statute requiring Food and Drug Administration (FDA) approval of new drugs before they go to the marketplace (in contrast with the preemption section in the medical device approval statute interpreted in *Riegel*). Accordingly, in a case involving a plaintiff’s state law-based claim regarding an allegedly defective drug, the court presumably might not be as likely to order preemption as it would be in a case regarding an allegedly defective medical device. Portions of *Riegel*, however, can be read as supporting a wide berth for the preemption defense—suggesting that defendants in product liability cases will be likely to argue for preemption even when the relevant federal law does not contain a preemption section. When this book went to press, a then-pending Supreme Court case called for a decision on such a preemption question in the context of a negligence law-suit concerning an FDA-approved drug.

A controversial recent development has suggested potential for added litigation over preemption issues. In the waning months of the Bush Administration, certain federal agencies indicated an intent to promulgate regulations whose content would call for preemption of state law-based claims, even in instances where there was no preemption clause in the relevant federal statute from which the agencies derived their authority to regulate. Proponents of such action saw it as a sensible way to underscore the federal control that they believed should be present when a detailed federal regulatory regime existed, whether in regard to product safety or some other subject. Critics derided such action as overreaching attempts by federal agencies to go beyond the authority extended to them by Congress, and as back-door devices for achieving, through regulations promulgated by unelected agency personnel, what could not be achieved in the political give-and-take of the congressional arena. Given the controversy, litigation over the preemption-by-agency-regulation issue seems inevitable.

Regulatory compliance is the other potential defense connected with the questions asked earlier. Even if outright preemption of the plaintiff’s negligence, strict liability, or breach-of-warranty claim is not appropriate, defendants in product liability cases have become increasingly likely in recent years to argue that their products complied with applicable federal safety standards and that this compliance should shield them from liability. This defense becomes highly fact-specific, with its potential for success depending upon the particular

product and product defect at issue and the specific content of the federal standards.

In some cases, courts may not treat regulatory compliance as a full-fledged defense, but may still allow it to be considered as a factor in determining whether the defendant should be held liable. For instance, in a negligence case, the court may regard the defendant's compliance with federal standards as being among the relevant

factors in a determination of whether the defendant failed to use reasonable care in the design or manufacturing of the product or in not issuing a warning about a supposed danger presented by the product. Similarly, in a strict liability case, the court may decide to take the defendant's compliance with federal standards into account in determining whether the product was both defective and unreasonably dangerous.

Riegel v. Medtronic, Inc.

128 S. Ct. 999 (U.S. Sup. Ct. 2008)

The case referred to below centered around an allegedly defective medical device—a balloon catheter—that was produced by Medtronic, Inc., and was inserted into Charles Riegel's right coronary artery during an angioplasty procedure. Before further discussion of the case's facts and identification of the key issues presented, explanation of the federal regulatory process regarding medical devices is necessary.

A federal statute, the Food, Drug, and Cosmetic Act, has long required Food and Drug Administration (FDA) approval prior to the introduction of new drugs into the marketplace. Until the Medical Device Amendments of 1976 (MDA), however, the introduction of new medical devices was left largely for the states to supervise as they saw fit. The regulatory landscape changed in the 1960s and 1970s, as complex devices proliferated and some failed. In the absence of federal regulation, several states adopted regulatory measures requiring premarket approval of medical devices. In 1976, Congress federalized the medical device approval requirement by enacting the MDA, 21 U.S.C. § 360(c) et seq., which imposed a regime of detailed federal oversight of medical devices.

The new regulatory regime established by the MDA set differing levels of oversight for medical devices, depending on the risks they present. Class I, which includes such devices as elastic bandages and examination gloves, is subject to the lowest level of oversight: “general controls” such as labeling requirements. Class II, which includes such devices as powered wheelchairs and surgical drapes, is subject in addition to “special controls” such as performance standards and postmarket surveillance measures. Class III devices receive the most federal oversight. That class includes such devices as replacement heart valves, implanted cerebella stimulators, and pacemaker pulse generators. In general, a device is assigned to Class III if it cannot be established that a less stringent classification would provide reasonable assurance of safety and effectiveness, and the device is “purported or represented to be for a use in supporting or sustaining human life or for a use which is of substantial importance in preventing impairment of human health,” or the device “presents a potential unreasonable risk of illness or injury.” 21 U.S.C. § 360c(a)(1)(C)(ii).

Although the MDA established a rigorous regime of premarket approval for new Class III devices, it grandfathered many that were already on the market. Devices sold before the MDA's effective date may remain on the market until the FDA promulgates a regulation requiring premarket approval. A related provision seeks to limit the competitive advantage grandfathered devices thus would appear to receive. According to that provision, a new device need not undergo premarket approval if the FDA finds it is “substantially equivalent” to another device exempt from premarket approval. The FDA's review of devices for substantial equivalence is known as the § 510(k) process, named after the section of the MDA describing the review. Most new Class III devices enter the market through § 510(k). In 2005, for example, the FDA authorized the marketing of 3,148 devices under § 510(k) and granted premarket approval to just 32 devices.

Premarket approval is a rigorous process involving the device manufacturer's submission of a multivolume application, detailed explanations of the device's components, ingredients, and properties, and detailed reports regarding studies and investigations into the device's safety and effectiveness. Before deciding whether to approve the application, the FDA may refer it to a panel of outside experts and may request additional data from the manufacturer. The FDA spends an average of 1,200 hours reviewing each application for premarket approval (as opposed to roughly 20 hours for the typical § 510(k) substantial equivalence application). The premarket approval process also includes review of the device's proposed labeling. The FDA evaluates safety and effectiveness under the conditions of use set forth on the label, and must determine that the proposed labeling is neither false nor misleading.

After completing its review, the FDA may grant or deny premarket approval, or may also condition approval on adherence to performance standards or other specific conditions or requirements. Premarket approval is to be granted only if the

FDA concludes there is a “reasonable assurance” of the device’s “safety and effectiveness.” § 360e(d). The agency must “weig[h] any probable benefit to health from the use of the device against any probable risk of injury or illness from such use.” § 360c(a)(2)(C).

The MDA includes an express preemption provision, § 360k(a), which states, in pertinent part:

[N]o State or political subdivision of a State may establish or continue in effect with respect to a device intended for human use any requirement—

- (1) which is different from, or in addition to, any requirement applicable under this chapter to the device, and
- (2) which relates to the safety or effectiveness of the device or to any other matter included in a requirement applicable to the device under this chapter.

Inclusion of the preemption provision causes the MDA to differ from the Food, Drug, and Cosmetic Act’s sections requiring FDA approval prior to the introduction of new drugs into the marketplace. No such preemption provision appears in the drug approval sections of the Food, Drug, and Cosmetic Act.

Medtronic’s Evergreen Balloon Catheter Company Profile is a Class III device that received premarket approval from the FDA in 1994. Changes to its label received supplemental approvals in 1995 and 1996. Charles Riegel underwent coronary angioplasty in 1996, shortly after suffering a myocardial infarction. His right coronary artery was diffusely diseased and heavily calcified. Riegel’s doctor inserted the Evergreen Balloon Catheter into his patient’s coronary artery in an attempt to dilate the artery, even though the device’s labeling stated that use was contraindicated for patients with diffuse or calcified stenoses. The label also warned that the catheter should not be inflated beyond its rated burst pressure of eight atmospheres. Riegel’s doctor inflated the catheter five times, to a pressure of 10 atmospheres. On its fifth inflation, the catheter ruptured. Riegel developed a heart block, was placed on life support, and underwent emergency coronary bypass surgery.

In 1999, Riegel and his wife, Donna, sued Medtronic in the United States District Court for the Northern District of New York. Their complaint raised various claims centering around the allegations that Medtronic’s catheter was designed, labeled, and manufactured in a manner that violated New York common law, and that these defects caused Riegel to suffer severe and permanent injuries. The district court held that the MDA preempted the Riegels’ claims of strict liability, breach of implied warranty, and negligence in the design, testing, manufacturing, inspection, distribution, labeling, marketing, and sale of the catheter. After the U.S. Court of Appeals for the Second Circuit affirmed, the U.S. Supreme Court granted the Riegels’ petition for a writ of certiorari.

Scalia, Justice

We consider whether the pre-emption clause enacted in the MDA, 21 U.S.C. § 360k, bars common-law claims challenging the safety and effectiveness of a medical device given premarket approval by the Food and Drug Administration (FDA). Since the MDA expressly pre-empts only state requirements “different from, or in addition to, any requirement applicable . . . to the device” under federal law, § 360k(a)(1), we must determine whether the federal government has established requirements applicable to Medtronic’s catheter. If so, we must then determine whether the Riegels’ common-law claims are based upon New York requirements with respect to the device that are “different from, or in addition to” the federal ones, and that relate to safety and effectiveness. § 360k(a).

We turn to the first question. In *Medtronic, Inc. v. Lohr*, 518 U.S. 470 (1996), . . . this Court interpreted the MDA’s preemption provision [and] concluded that federal manufacturing and labeling requirements applicable across the board to almost all medical devices did not pre-empt the common-law claims of negligence and strict liability at issue in [the case]. The federal requirements, we said, were not requirements

specific to the device in question—they reflected “entirely generic concerns about device regulation generally.” While we disclaimed a conclusion that general federal requirements could never pre-empt, or [that] general state duties [could] never be pre-empted, we held that no pre-emption occurred in the case at hand based on a careful comparison between the state and federal duties at issue.

Even though substantial-equivalence review under § 510(k) is device specific, *Lohr* also rejected the manufacturer’s contention that § 510(k) approval [(which the device at issue in the case had received)] imposed device-specific “requirements.” We regarded the fact that products entering the market through § 510(k) may be marketed only so long as they remain substantial equivalents of the relevant pre-1976 devices as a qualification for an exemption rather than a requirement.

Premarket approval, in contrast, imposes “requirements” under the MDA as we interpreted it in *Lohr*. Unlike general labeling duties, premarket approval is specific to individual devices. And it is in no sense an exemption from federal safety review—it is federal safety review. Thus, the attributes that

Lohr found lacking in § 510(k) review are present here. While § 510(k) is “focused on equivalence, not safety” (quoting *Lohr*), premarket approval is focused on safety, not equivalence. While devices that enter the market through § 510(k) have “never been formally reviewed under the MDA for safety or efficacy” (quoting *Lohr*), the FDA may grant premarket approval only after it determines that a device offers a reasonable assurance of safety and effectiveness. § 360e(d). And while the FDA does not require that a device allowed to enter the market as a substantial equivalent “take any particular form for any particular reason” (quoting *Lohr*), the FDA requires a device that has received premarket approval to be made with almost no deviations from the specifications in its approval application, for the reason that the FDA has determined that the approved form provides a reasonable assurance of safety and effectiveness.

We turn, then, to the second question: whether the Riegels’ common-law claims rely upon “any requirement” of New York law applicable to the catheter that is “different from, or in addition to” federal requirements and that “relates to the safety or effectiveness of the device or to any other matter included in a requirement applicable to the device.” § 360k(a). Safety and effectiveness are the very subjects of the Riegels’ common-law claims, so the critical issue is whether New York’s tort duties constitute “requirements” under the MDA.

In *Lohr*, five Justices [expressed the view] that common-law causes of action for negligence and strict liability do impose “requirement[s]” and would be pre-empted by federal requirements specific to a medical device [if such device-specific requirements, not present in *Lohr*, were present in an appropriate case]. We adhere to that view. In interpreting two other statutes we have likewise held that a provision pre-empting state “requirements” pre-empted common-law duties. *Bates v. Dow Agrosciences LLC*, 544 U.S. 431 (2005), found common-law actions to be pre-empted by a provision of the Federal Insecticide, Fungicide, and Rodenticide Act that said certain states “shall not impose or continue in effect any requirements for labeling or packaging in addition to or different from those required under this subchapter.” *Cipollone v. Liggett Group, Inc.*, 505 U.S. 504 (1992), held [certain] common-law [claims] pre-empted by a provision of the Public Health Cigarette Smoking Act of 1969, which said that “[n]o requirement or prohibition based on smoking and health shall be imposed under state law with respect to the advertising or promotion of any cigarettes” whose packages were labeled in accordance with federal law.

Congress is entitled to know what meaning this Court will assign to terms regularly used in its enactments. Absent other indication, reference to a state’s “requirements” includes its common-law duties. As the plurality opinion said in *Cipollone*, common-law liability is “premised on the existence of a legal

duty,” and a tort judgment therefore establishes that the defendant has violated a state-law obligation. And while the common-law remedy is limited to damages, a liability award[, as noted in *Cipollone*,] “can be, indeed is designed to be, a potent method of governing conduct and controlling policy.”

In the present case, there is nothing to contradict this normal meaning. To the contrary, in the context of this legislation excluding common-law duties from the scope of pre-emption would make little sense. State tort law that requires a manufacturer’s catheters to be safer, but hence less effective, than the model the FDA has approved disrupts the federal scheme no less than state regulatory law to the same effect. Indeed, one would think that tort law, applied by juries under a negligence or strict-liability standard, is less deserving of preservation. A state statute, or a regulation adopted by a state agency, could at least be expected to apply cost-benefit analysis similar to that applied by the experts at the FDA: How many more lives will be saved by a device which, along with its greater effectiveness, brings a greater risk of harm? A jury, on the other hand, sees only the cost of a more dangerous design, and is not concerned with its benefits; the patients who reaped those benefits are not represented in court. As Justice Breyer explained in [his concurring opinion in] *Lohr*, it is implausible that the MDA was meant to “grant greater power (to set state standards different from, or in addition to, federal standards) to a single state jury than to state officials acting through state administrative or legislative lawmaking processes.” That perverse distinction is not required or even suggested by the broad language Congress chose in the MDA, and we will not turn somersaults to create it.

The dissent would narrow the pre-emptive scope of the term “requirement” on the ground that it is “difficult to believe that Congress would, without comment, remove all means of judicial recourse” for consumers injured by FDA-approved devices (quoting Justice Ginsburg’s dissent). But, as we have explained, this is exactly what a pre-emption clause for medical devices does by its terms. It is not our job to speculate upon congressional motives. If we were to do so, however, the only indication available—the text of the statute—suggests that the solicitude for those injured by FDA-approved devices, which the dissent finds controlling, was overcome in Congress’s estimation by solicitude for those who would suffer without new medical devices if juries were allowed to apply the tort law of 50 states to all innovations.

The dissent also describes at great length the experience under the FDCA with respect to drugs and food and color additives. Two points render the conclusion the dissent seeks to draw from that experience—that the pre-emption clause permits tort suits—unreliable. (1) It has not been established (as the dissent assumes) that no tort lawsuits are pre-empted by drug or additive approval under the FDCA. (2) If, as the dissent

believes, the pre-emption clause permits tort lawsuits for medical devices just as they are (by hypothesis) permitted for drugs and additives; and if, as the dissent believes, Congress wanted the two regimes to be alike, Congress could have applied the pre-emption clause to the entire FDCA. It did not do so, but instead wrote a pre-emption clause that applies only to medical devices.

The Riegels contend that the duties underlying negligence, strict-liability, and implied-warranty claims are not pre-empted even if they impose “requirements,” because general common-law duties are not requirements maintained “‘with respect to devices.’” Again, a majority of [the justices] suggested otherwise in *Lohr*. And with good reason. The language of the statute does not bear the Riegels’ reading. The MDA provides that no state “may establish or continue in effect with respect to a device . . . any requirement” relating to safety or effectiveness

that is different from, or in addition to, federal requirements. § 360k(a). The Riegels’ suit depends upon New York’s “continu[ing] in effect” general tort duties “with respect to” Medtronic’s catheter. Nothing in the statutory text suggests that the pre-empted state requirement must apply only to the relevant device, or only to medical devices and not to all products and all actions in general.

State requirements are pre-empted under the MDA only to the extent that they are “different from, or in addition to” the requirements imposed by federal law. § 360k(a)(1). Thus, § 360k does not prevent a state from providing a damages remedy for claims premised on a violation of FDA regulations; the state duties in such a case parallel, rather than add to, federal requirements.

Court of Appeals judgment in favor of Medtronic affirmed.

Problems and Problem Cases

1. Hall Farms, Inc., ordered 40 pounds of Prince Charles watermelon seed from Martin Rispens & Son, a seed dealer. Rispens had obtained the seed from Petoseed Company, Inc., a seed producer. The label on Petoseed’s can stated that the seeds are “top quality seeds with high vitality, vigor and germination.” Hall Farms germinated the seeds in a greenhouse, before transplanting the small watermelon plants to its fields. Although the plants had a few abnormalities, they grew rapidly. By mid-July, however, purple blotches had spread over most of the crop, and by the end of July the crop was ruined. It was later determined that the crop had been destroyed by “watermelon fruit blotch.” Hall Farms’ lost profits on the crop came to \$180,000. Hall Farms sued Petoseed for, among other things, breach of express warranty. Petoseed moved for summary judgment, but the trial court denied the motion. Petoseed appealed. Was Petoseed entitled to summary judgment in its favor?
2. Hilda Forbes was the driver in an accident in which the front end of her car struck another vehicle. The driver’s airbag did not deploy, and she sustained serious injuries. She later filed suit against the car’s manufacturer because of the failure of the airbag to deploy. The owner’s manual for the car—a manual prepared by the manufacturer—contained a statement that if a front-end collision was “hard enough,” the air bag would deploy. Although Forbes did not read the manual before buying the car, she told the salesman with whom she negotiated the purchase that a working air bag was important to her. The salesman informed Forbes of the gist of what the owner’s manual said about a functioning air bag. In her lawsuit, Forbes presented the testimony of an expert witness who offered the opinion that the collision in which she was involved was severe enough to cause a properly functioning airbag to deploy. Under the circumstances, did the owner’s manual’s “hard enough” statement constitute an express warranty concerning the airbag. If so, why? If not, why not? If the “hard enough” statement constituted an express warranty, was the warranty breached?
3. Steven Taterka purchased a 1972 Ford Mustang from a Ford dealer in January 1972. In October 1974, after Taterka had put 75,000 miles on the car and Ford’s express warranty had expired, he discovered that the taillight assembly gaskets on his Mustang had been installed in such a way that water was permitted to enter the taillight assembly, causing rust to form. Even though the rusting problem was a recurrent one of which Ford was aware, Ford did nothing for Taterka. Was Ford liable to Taterka under the implied warranty of merchantability?
4. Yong Cha Hong bought take-out fried chicken from a Roy Rogers Family Restaurant owned by the

Marriott Corporation. While eating a chicken wing from her order, she bit into an object that she perceived to be a worm. Claiming permanent injuries and great physical and emotional upset from this incident, Hong sued Marriott in federal district court. She claimed that Marriott had breached the implied warranty of merchantability. After introducing an expert's report opining that the object in the chicken wing was not a worm but was instead the chicken's aorta or trachea, Marriott moved for summary judgment. What two alternative tests might the court have applied in deciding whether the chicken wing was merchantable? Which of the two alternative tests did the court decide to apply? Under that test, was Marriott entitled to summary judgment?

5. In 1994, David and Corrine Bako signed a contract with Don Walter Kitchen Distributors, Inc. (DW), for the purchase and installation of cabinets in their new home. DW ordered the cabinets from a manufacturer, Crystal Cabinet Works, Inc. Crystal shipped the cabinets to DW, which installed them in the Bakos' residence. Soon after the installation, Corrine Bako contacted a DW employee, Neil Mann, and asked whether DW could provide a stain to match the kitchen cabinets. She informed Mann that the stain would be applied to the wood trim primarily on the first floor of the house. Mann ordered two one-gallon cans of stain from Crystal, which shipped the stain to DW in unmarked cans. There were no labels, instructions, or warnings regarding improper use or application of the stain. The cans arrived at DW's store in unmarked cardboard boxes and were delivered to the Bakos in this manner. The stain in the cans turned out to be lacquer-based. Shortly thereafter, Corrine Bako again contacted Mann about purchasing additional stain in a slightly different color to apply to a hardwood floor. At Mann's suggestion, she contacted Crystal's paint lab and spoke with a Crystal employee. The Crystal employee shipped the Bakos a series of samples from which Corrine ordered two gallons of stain. This stain was also a lacquer-based stain and was shipped directly from Crystal to the Bakos in unmarked cans. Once again, there were no instructions for use, no warning regarding improper use or application of the product, no label indicating that it was a lacquer-based stain, and no label indicating that a special topcoat was required because it was a lacquer-based stain. The Bakos applied the stain to their floor.
- The Bakos then obtained a polyurethane topcoat sealant and applied it to the wood surfaces they had stained with the stain purchased from DW and Crystal. Following this application of the sealant, all of the stained and sealed areas suffered severe and permanent damage as a result of the nonadherence of the polyurethane sealant to the lacquer-based stain. Evidence adduced at the trial of the case referred to below established that lacquer-based stains are incompatible with the polyurethane topcoat that the Bakos applied to their home's wood surfaces. In October 1996, the Bakos filed suit against Crystal and DW for breach of the implied warranty of merchantability and breach of the implied warranty of fitness for a particular purpose. They also claimed that the defendants had been negligent. An Ohio trial court found for the Bakos and held the defendants liable for approximately \$25,000 in compensatory damages. Contending that the Bakos should not have prevailed on any of their claims, Crystal appealed to the Court of Appeals of Ohio. How did the appellate court rule on the Bakos' two breach of implied warranty claims?
6. Connie Daniell attempted to commit suicide by locking herself inside the trunk of her 1973 Ford LTD. She remained in the trunk for nine days, but survived after finally being rescued. Later, Daniell brought a negligence action against Ford in an effort to recover for her resulting physical and psychological injuries. She contended that the LTD was defectively designed because its trunk did not have an internal release or opening mechanism. She also argued that Ford was liable for negligently failing to warn her that the trunk could not be unlocked from within. Was Ford liable for negligent design and/or negligent failure to warn?
7. A six-day-old 1991 Ford Aerostar driven by Kathleen Jarvis suddenly accelerated, resulting in an accident in which Jarvis sustained severe injuries. Jarvis contended that the Aerostar "took off" even though she had not depressed the accelerator and that she was unable to stop the van by pumping the brakes. She sued Ford Motor Company in a federal district court, claiming that Ford's negligence in designing the Aerostar's cruise control system led to the sudden acceleration and her accident. The injury sustained by Jarvis in the accident prevented her from returning to her previous employment. Jarvis testified at trial that she started the Aerostar in the driveway of her home with her right foot "lightly on the

brake.” After she turned on the ignition, the engine suddenly revved and the vehicle “took off.” As the van accelerated, Jarvis pumped the brake with both feet. The van would not stop. She steered to avoid people walking in the road and then heard saplings brushing against the side of the van before she blacked out.

George Pope, an accident reconstruction specialist who testified for Jarvis, stated that the van traveled approximately 330 feet and did some braking that slowed it to 15 to 20 miles per hour before it entered a ditch and turned over. Pope testified that the Aerostar had vacuum power brakes that draw their vacuum from the engine, but that the engine does not create the necessary vacuum when accelerating full throttle. Even though a check valve traps a reservoir of vacuum for use when the engine vacuum is low, this reserve can be depleted after one-and-a-half hard brake applications. Therefore, according to Pope, if Jarvis pumped the brakes in an effort to stop the Aerostar after it began accelerating at full throttle, she would have lost approximately 1,000 pounds of additional force that the booster normally could have supplied to the brakes. Pope concluded that “under those circumstances . . . , it will feel to a person like they’ve lost their brakes, [because] they’re pushing and nothing is happening.” In support of her claim that the Aerostar had suddenly accelerated even though she did not press the accelerator, Jarvis presented testimony from five Aerostar owners who recounted having had similar problems with their 1989 or 1990 Aerostars. In addition, the jury was presented with evidence that Ford had received reports of incidents of sudden acceleration in a total of 560 Aerostars. Samuel J. Sero, an electrical engineer, also testified as an expert for Jarvis. He offered a theory noting possible electrical malfunctions and mechanical reasons that could have caused the sudden acceleration to occur. This theory focused on the design and workings of Aerostar’s cruise control system. Sero also testified concerning a possible alternative design of the Aerostar’s cruise control system—a design that he believed would have prevented the sudden acceleration problem if the design had been implemented by Ford.

In its defense, Ford claimed principally that the acceleration was the result of a driver error by Jarvis. Ford contended that Jarvis must have been unaware that the parking brake had been set and must have mistaken the accelerator pedal for the brake pedal.

Ford also presented expert testimony that the Aerostar would not have malfunctioned in the manner suggested by Jarvis’s expert. In addition, Ford maintained that the existence of the Aerostar’s dump valve, a spring-loaded plunger designed to open when the brake pedal is depressed, would have effectively stopped the Aerostar from accelerating when Jarvis applied the brakes, even if the cruise control had malfunctioned as Sero suggested. Ford’s expert testified that he tested the dump valve after the accident and found that it had no leaks.

The jury concluded that Ford negligently designed the Aerostar’s cruise control system, that this was a substantial factor in causing the accident, and that Jarvis’s negligence was also a substantial factor in causing the accident. It apportioned 65 percent of the fault to Ford and 35 percent to Jarvis, presumably because of evidence that the Aerostar owner’s manual directs drivers to apply the brakes firmly with one stoke and not in a pumping action. The jury awarded Jarvis more than \$1 million in damages for past and future medical insurance premiums, lost earnings, and pain and suffering. Asserting that the only logical conclusion to be drawn from the evidence was that Jarvis never applied the brake pedal and mistakenly applied the accelerator instead, Ford moved for judgment as a matter of law (judgment notwithstanding the verdict). The trial judge granted Ford’s motion, set aside the verdict, and entered judgment in Ford’s favor. Jarvis appealed to the United States Court of Appeals for the Second Circuit. Did the trial court rule correctly in setting aside the jury’s verdict and entering judgment in Ford’s favor?

8. Robyn Williams placed her purse on top of the refrigerator at her family’s apartment. Later, her two-year-old son, Jerome, managed to pull the purse down. Jerome then retrieved a Cricket disposable butane cigarette lighter from the purse. The lighter lacked any child-resistant feature. Jerome’s five-year-old brother, Neil, saw Jerome use the lighter to ignite some linens. As the fire spread throughout the apartment, Neil unsuccessfully attempted to rouse his mother. Neil then made his way to a window and began screaming. A neighbor rescued him, but Robyn, Jerome, and another one of Robyn’s children, Alphonso, died in the fire.

Acting as Neil’s guardian and as administrator of the estates of Robyn, Jerome, and Alphonso, Gwendolyn Phillips filed suit against the manufacturers

and distributors of the Cricket lighter. Her complaint included strict liability and negligence claims. These claims were predicated on the basic contention that the defendants' lighter was defectively designed because it did not have childproof features. The defendants moved for summary judgment. Concerning the design defect claim brought on strict liability grounds, the trial court noted that the plaintiff was required to establish that the Cricket lighter was unsafe for its intended use. Observing that "intended use . . . necessarily entails the participation of the intended user" and that a two-year-old child was not the intended user of a cigarette lighter, the trial court concluded that the defendants could not be held strictly liable. In addition, the court reasoned that if a product is found to be nondefective for strict liability purposes, a design defect claim brought on negligence grounds must also fail. Therefore, the trial court granted summary judgment in favor of the defendants.

Phillips appealed to the Superior Court of Pennsylvania, the state's intermediate appellate court. That court reversed the lower court's grant of summary judgment. The appellate court held that for strict liability purposes, a product must be safe for its intended use—here, to create a flame—when used by any user, whether intended or unintended. Concerning the negligent design claim, the Superior Court concluded that summary judgment had been improperly granted in favor of the defendants because the trial court had made the erroneous assumption that if a strict liability claim for defective design fails, a negligence claim dealing with design issues must also fail. The defendants appealed to the Supreme Court of Pennsylvania. How did that court rule on the strict liability claim, and how did it rule on the negligent design claim?

9. Arlyn and Rose Spindler were dairy farmers who leased a feed storage silo from Agristor Leasing. The silo was supposed to limit the oxygen reaching the feed and thus to hinder its spoilage. The Spindlers alleged that the silo was defective and that the dairy feed it contained was spoiled as a result. They further alleged that due to the spoilage of the feed, their dairy herd suffered medically and reproductively, and their milk production dropped. The Spindlers sued Agristor in negligence and under section 402A for their resulting lost income. What *type* of damages are they claiming? Under the majority rule, can

they recover for such damages in negligence or under section 402A? Would your answer be different if the Spindlers had sued for the damage to the *dairy feed* itself? Assume for purposes of argument that both section 402A and negligence claims are possible under this equipment lease.

10. Matthew Kovach, a nine-year-old child, was admitted to Surgicare, LLC (Surgicare), to undergo a scheduled adenoidectomy. While he recovered in the ambulatory surgery center, a nurse administered Capital of Codeine, an opiate, to him. To administer the drug, the nurse used a graduated medicine cup (the Cup), manufactured and/or sold by various parties that later became defendants in the case described below. (Those defendants will be referred to here as the Cup Defendants.) The Cup is made of flexible translucent plastic which is not completely clear and denotes various volume measurement graduation markings, including milliliters (ml), drams, ounces, teaspoons, tablespoons, and cubic centimeters. These measurement markers are located on the interior surface of the Cup and have a similar translucency as the Cup. The vertical distance between the ml volume graduation markings varies: the smallest volume of ml measurement for the graduations between empty and 10 ml is 2.5 ml; while the smallest volume of ml measurement for the graduations between 10 ml and 30 ml is 15 ml. The Cup holds 30 ml or more of medicine when full. Matthew was prescribed 15 ml, or one-half of the Cup's volume, of Capital of Codeine. Although the nurse stated that she gave Matthew only 15 ml of Codeine, Matthew's father, Jim Kovach, who was in the room at the time, testified that the Cup was completely full. Matthew drank all of the medicine in the Cup. After being discharged from Surgicare and arriving home, Matthew went into respiratory arrest. He was transported to a hospital, where he was pronounced dead of asphyxia due to an opiate overdose. The autopsy revealed that Matthew's blood contained between 280 and 344 nanograms per ml of codeine, more than double the recommended therapeutic level of the drug.

Jim and Jill Kovach (Matthew's mother) filed suit in an Indiana trial court against the Cup Defendants, asserting claims for (1) breach of the implied warranty of merchantability; (2) breach of the implied warranty of fitness for a particular purpose; (3) negligent design; and (4) strict liability. Their claims centered around contentions that the design of the

Cup was defective, largely because its translucency and lack of clear, easily distinguishable measurement markings led to a danger of measurement errors, and because the Cup Defendants issued no warning to the effect that the Cup should not be used when a precise measurement of medication quantity was important. By way of affidavit, the Kovaches' expert witness, a pharmacy professor with many years of experience, offered an opinion consistent with the above contentions regarding the Cup's design and lack of warning. The trial court granted the Cup Defendants' motion for summary judgment on each of the claims filed against them by the Kovaches. Did the trial court rule correctly in doing so? In your answer, consider each of the four claims brought by the plaintiffs.

11. Duane Martin, a small farmer, placed an order for cabbage seed with the Joseph Harris Company, a large national producer and distributor of seed. Harris's order form included the following language:

NOTICE TO BUYER: Joseph Harris Company, Inc. warrants that seeds and plants it sells conform to the label descriptions as required by Federal and State seed laws. IT MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY, FITNESS FOR PURPOSE, OR OTHERWISE, AND IN ANY EVENT ITS LIABILITY FOR BREACH OF ANY WARRANTY OR CONTRACT WITH RESPECT TO SUCH SEEDS OR PLANTS IS LIMITED TO THE PURCHASE PRICE OF SUCH SEEDS OR PLANTS.

All of Harris's competitors used similar clauses in their contracts.

After Martin placed his order, and unknown to Martin, Harris stopped using a cabbage seed treatment that had been effective in preventing a certain cabbage fungus. Later, Martin planted the seed he had ordered from Harris, but a large portion of the resulting crop was destroyed by fungus because the seed did not contain the treatment Harris had previously used. Martin sued Harris for his losses under the implied warranty of merchantability.

Which portion of the notice quoted above is an attempted disclaimer of implied warranty liability, and which is an attempted limitation of remedies? Will the disclaimer language disclaim the implied warranty of merchantability under UCC section 2-316(2)? If Martin had sued under the implied warranty of fitness for a particular purpose, would the

disclaimer language disclaim that implied warranty as well? Assuming that the disclaimer and the remedy limitation contained the correct legal boilerplate needed to make them effective, what argument could Martin still make to block their operation? What are his chances of success with this argument?

12. McKinnon Bridge Company was a general contractor primarily involved in heavy construction and bridge construction. Trinity Industries, Inc., a steel fabricator, was the supplier of structural steel to McKinnon for use in building the bridge at issue in the case described below. The relationship between the parties began after the state of Tennessee awarded McKinnon a contract to build a bridge over the Tennessee River. Soon after McKinnon was awarded this contract, Trinity presented McKinnon with a bid (i.e., an offer) to supply fabricated steel for the bridge in return for payments totaling \$2,535,000 from McKinnon. McKinnon's president, acting on behalf of the firm, accepted Trinity's offer and thereby caused the parties' contract to come into being. During construction, McKinnon discovered that several girders and cross-frame stiffeners supplied by Trinity contained misaligned holes, which prevented proper construction and assembly of the bridge. After McKinnon notified Trinity of the problem, the parties agreed on a remedial plan that was approved by the state. Trinity's representatives went to the job site and redrilled the holes. The redrilled holes were approved by McKinnon. In the litigation described below, McKinnon claimed that it later encountered other problems with the steel such as incorrect length, lack of proper curvature, dimensional and fitting errors, and poor quality. None of the steel received from Trinity had been rejected by McKinnon, however, as of May 16, 1995. On that date, the partially constructed bridge collapsed.

After the collapse of the bridge, McKinnon Bridge retained experts, some of whom concluded that the steel provided by Trinity was defective and caused or contributed to the structure's collapse. McKinnon therefore ceased payment on the contract for that steel. At approximately the same time, the state informed McKinnon's president that the firm could reconstruct the bridge with Trinity-supplied steel that was in storage, as long as certain modifications were made to the steel. The state agreed to pay for these changes. McKinnon, however, ordered replacement steel from another supplier without

asking Trinity to repair or replace the allegedly defective steel. When asked why his company did not use the steel from Trinity, McKinnon's president stated that it would have been necessary for the steel

to have been picked up [and] taken to Carolina . . . where it was fabricated—and all that freight and allowance, and I made a decision not to use it. . . . Cost was some consideration. It just wasn't worth it, to get in all of the trouble you could have if it didn't work. I would be responsible. They have already put the responsibility on McKinnon Bridge Company's back for that to work, and I didn't want the responsibility.

Trinity filed suit in a Tennessee state court against McKinnon, seeking the remaining \$1.6 million due under the steel subcontract. McKinnon counterclaimed and sought damages from Trinity because of Trinity's alleged breach of contract in furnishing steel that did not conform to the contract terms and specifications. Trinity moved for summary judgment on McKinnon's counterclaim. Trinity asserted that the parties' contract expressly limited McKinnon's remedies to repair or replacement of any defective goods (and thus, in Trinity's view, eliminated money damages as a possible remedy). The court granted Trinity summary judgment on McKinnon's counterclaim. A trial was later held on Trinity's breach of contract claim against McKinnon. After concluding that none of the nonconformities or defects in the Trinity-supplied steel caused or contributed to the collapse of the bridge, the court held in favor of Trinity for all sums still owed by McKinnon under the contract. McKinnon appealed to the Tennessee Court of Appeals, arguing that it should have prevailed on its counterclaim because, in its view, the contract's limitation of remedy clause—the repair-or-replace clause—should have been treated by the lower court as unconscionable or as having failed of its essential purpose. Was the limited remedy clause unconscionable? Did it fail of its essential purpose?

13. Richard Jimenez was injured when a disc for the handheld electric disc grinder he had purchased from Sears Roebuck shattered while he used the grinder to smooth down a steel weld. When Jimenez brought a strict liability lawsuit against Sears, the defendant argued that he had misused the grinder, and that this misuse caused his injury. Assuming that

Sears was right, what effect would this have in a state that has not adopted comparative negligence or comparative fault? What effect would it have in a comparative fault state?

14. On June 25, 1986, a general contractor completed the Oceanside at Pine Point Condominium. In the construction, the contractor used windows manufactured by Peachtree Doors, Inc. Peachtree delivered the windows to the contractor in December 1985. After sale of the condominium units to the public, the condominium building suffered significant water damage around the windows. Thus, Pine Point's owners' association brought a class action product liability suit against Peachtree on December 31, 1991. The suit included claims based on Article 2 of the UCC. Have the plaintiffs satisfied Article 2's statute of limitations?
15. James Bainbridge and Daniel Fingarette formulated a plan for a three-dimensional photography business through four independent companies. In January 1988, Bainbridge met with officials of the Minnesota Mining & Manufacturing Company (3M) to seek assistance with the three-dimensional film development process. In mid-1989, 3M formulated a new emulsion that it claimed would work well with the film development process. 3M apparently understood that this emulsion would be used in combination with a backcoat sauce that 3M had also developed. In December 1989, 3M began selling the new emulsion and backcoat sauce to two of the claimants' four companies, but not to the two others. After Bainbridge and Fingarette began using 3M's new emulsion, they encountered a problem with the film development process: the photographs faded, losing their three-dimensional effect. By early 1990, the claimants experienced a significant decline in camera sales. 3M eventually solved the problem, but the claimants' business ultimately failed.

The four companies established by Bainbridge and Fingarette sued 3M in a Texas trial court for breach of express and implied warranties. They argued that the photographic fading was caused by the incompatibility of 3M's new emulsion and its old backcoat sauce. The jury concluded that 3M breached an express warranty for the emulsion and implied warranties for the emulsion and the backcoat sauce. Applying Minnesota law, the trial court

awarded the four firms \$29,873,599 in lost profits. An intermediate appellate court upheld this award. The Supreme Court of Texas withheld final judgment and certified the following question to the Supreme Court of Minnesota: “For breach of warranty under [Minnesota’s version of UCC section 2–318], is a seller liable to a person who never acquired any goods from the seller, directly or indirectly, for pure economic damages (e.g., lost profits), unaccompanied by any injury to the person or the person’s property?” This question arose because two of the plaintiff companies, while suffering losses due to 3M’s breaches of warranty, had not dealt directly with 3M. How did the Supreme Court of Minnesota answer the certified question?

Online Research

Parked Vehicles and Fire Risks

Media reports in recent years told the stories of consumers who claimed that well after they parked their Ford Motor Co. vehicle and turned off the ignition, the vehicle had caught fire. Some consumers suffered serious burns and experienced property damage to their garages and houses as a result of such fires.

Using at least two online sources, find out more information about incidents of the sort described above, including what experts believe was the probable reason why the vehicles caught fire. Then prepare a two-page essay in which you (1) identify the legal theories that affected consumers could use if they pursued litigation against Ford regarding the vehicles’ fires, and (2) explain what the key issues would be in regard to each of the theories you identified.

chapter 21

PERFORMANCE OF SALES CONTRACTS

Sarah Saunders was interested in purchasing a new hybrid-fueled vehicle. Using the Web page of a large volume dealer in a nearby city, she provided the dealer with the make, model, color, and primary options for the vehicle she was seeking. The dealer indicated that he could obtain a vehicle meeting Sarah's specifications, quoted her a very favorable price, and offered to deliver the vehicle to her at the apartment house where she lived. Sarah accepted the offer and wired a deposit to the dealer. When the vehicle arrived, the truck driver refused to unload it from the car carrier or let Sarah inspect it until she had given him a certified check for the balance due. Then he gave her the title to the vehicle, unloaded it, and drove away. Sarah subsequently discovered a number of scratches in the paint and that some of the options she had bargained for—such as a CD player—were not on the vehicle. When she complained to the dealer, he offered her a monetary “allowance” to cover the defects. She also discovered that the vehicle had a tendency to stall and have to be restarted when she stopped at intersections. Despite repeated trips to the nearby city to have the dealer remedy the problem, those efforts have been unavailing. Sarah has indicated that she wants to return the vehicle to the dealer and get a vehicle that performs properly, but the dealer insists that she has to give him additional time to try to fix it. This situation raises a number of legal questions that, among others, will be discussed in this chapter, including:

- Did Sarah have the right to inspect the vehicle before she paid the balance of the purchase price?
- When Sarah discovered the scratches on the vehicle and that it did not conform to the contract specifications, could she have refused to accept the car and required the dealer to provide one that met the contract?
- Does Sarah have the right to return the defective vehicle to the dealer and obtain either a new vehicle or her money back, or must she give the dealer the opportunities he wants to try to remedy the defect?
- If the dealer knew the vehicle he was delivering to Sarah did not conform to the contract and was damaged, was it ethical for him to deliver it anyway?

IN THE TWO PREVIOUS chapters, we discussed the formation and terms of sales contracts, including those terms concerning express and implied warranties. In this chapter, the focus is on the legal rules that govern the performance of contracts. Among the topics covered are the basic obligations of the buyer and seller with respect to delivery and payment, the rights of the parties when the goods delivered do not conform to the contract, and the circumstances that may excuse the performance of a party's contractual obligations.

General Rules

The parties to a contract for the sale of goods are obligated to perform the contract according to its terms. The Uniform Commercial Code (UCC or Code) gives the parties great flexibility in deciding between themselves how they will perform a contract. The practices in the trade or business as well as any past dealings between the parties may supplement or explain the contract. The Code gives both the buyer and the seller certain rights,

Ethics in Action

What Should You Do When the Price Rises—or Falls?

When goods that are the subject of a contract are in significantly shorter supply than when the agreement was made and the price has risen, the seller may be tempted to look for an excuse so that he can sell to someone else and realize a greater profit. This situation often arises in the sale of commodities, such as crops, fuel oil, gasoline, and natural gas. Similarly, if goods are in significantly more plentiful supply

than when a contract was made, a buyer might be tempted to create an excuse to cancel so that she could buy elsewhere at a lower price. When, if ever, is a seller or buyer ethically justified in trying to find a way out of a contractual obligation because the supply or market conditions have so changed that he or she can make a much better deal elsewhere? Concomitantly, are there circumstances under which the other party, acting in an ethically responsible manner, should voluntarily release the disadvantaged party from his or her contractual commitment?

and it also sets out what is expected of them on points that they did not deal with in their contract. It should be kept in mind that the Code changes basic contract law in a number of respects.

Good Faith The buyer and seller must act in good faith in the performance of a sales contract [1–203].¹ Good faith is defined to mean “honesty in fact” in performing the duties assumed in the contract or in carrying out the transaction [1–201(19)]. And, in the case of a merchant, **good faith**, means honesty in fact as well as the observance of reasonable commercial standards of fair dealing in the trade [2–103(1)(b)]. Thus, if the contract requires the seller to select an assortment of goods for the buyer, the selection must be made in good faith; the seller should pick out a reasonable assortment [2–311]. It would not, for example, be good faith to include only unusual sizes or colors.

Course of Dealing The terms in the contract between the parties are the primary means for determining the obligations of the buyer and seller. The meaning of those terms may be explained by looking at any performance that has already taken place. For example, a contract may call for periodic deliveries of goods. If the seller has made a number of deliveries without objection by the buyer, the way the deliveries were made shows

¹The numbers in brackets refer to sections of the Uniform Commercial Code.

how the parties intended them to be made. Similarly, if there were any past contracts between the parties, the way the parties interpreted those contracts is relevant to the interpretation of the present contract. If there is a conflict between the express terms of the contract and the past course of dealing between the parties, the express terms of the contract prevail [1–205(4)].

In the case below, *Grace Label, Inc. v. Kliff*, the court looked to the prior dealing between the parties to explain or supplement the terms of a current contract between the parties.

Usage of Trade In many kinds of businesses, there are customs and practices of the trade that are known by people in the business and that are usually assumed by parties to a contract for goods of that type. Under the Code, the parties and courts may use these trade customs and practices—known as usage of trade—in interpreting a contract [2–202; 1–205]. If there is a conflict between the express terms of the contract and trade usage, the express terms prevail [1–205(4)].

An example of usage of trade comes from the building supply business where one common lumber item is referred to as a “two-by-four” and might be assumed to measure two inches by four inches by someone not familiar with trade practice. If you were to buy two-by-fours of varying lengths from your local lumberyard or building supply store, you would find that they in fact measure 1½ inches by 3¼ inches.

Grace Label, Inc. v. Kliff

355 F.Supp.2d 965 (S.D. Iowa 2005)

Steve Kliff, a citizen of California, is a sole proprietor in the business of brokering printing projects. On May 24, 2002, Barcel S.A. de C.V. (Barcel), a Mexican company, by purchase order contracted with Kliff for at least 47,250,000 foil trading cards bearing the likeness of Britney Spears. Barcel is a large, multinational corporation which sells a variety of food products. It indicated that the cards would be placed in snack food packaging and would come in direct contact with the food contents.

On May 30, Kliff by purchase order contracted with Grace Label to produce the Spears cards. Grace is an Iowa corporation engaged in the business of manufacturing pressure-sensitive labels and flexible packaging. The purchase order described the product as a “Foil Trading Card (Direct Food Contact Compatible).” It also specified the printing process was to use “FDA Varnish,” which Grace Label understood it was to use to accomplish the food contact compatibility requirement. Grace Label did not have any direct communication with Barcel because Kliff did not want it to be in touch with his customer.

The Spears job was the third or fourth Barcel job Grace Label had worked on with Kliff in about a year’s time. Two of the jobs were arranged while Kliff was employed by Chromium Graphics; together they involved 58,000,000 “scratch off” game piece cards where customers rubbed off a coating to determine if they had won a prize. In February 2002, Kliff arranged for Grace Label to do the “Ponte Sobre Ruedas Job,” which involved printing about 42,000,000 “peel apart” game piece cards whereby consumers peeled off a top layer to see if they had won a prize. The Spears card was simply a trading card with no “scratch off” or “peel apart” feature. The Spears card was varnished on both sides, the others were varnished on one side. The “direct food compatible” description appeared only in the Spears card purchase order. All of the cards manufactured by Grace Label for the various Barcel projects were inserted in packages of Barcel’s snack food products. On several occasions Kliff advised Grace Label that he wanted the same materials used for the Spears cards as had been used on the prior jobs.

The adhesive used on the Chromium Graphics cards was Rad-Cure 12PSFLV, as specified by Chromium Graphics. This particular adhesive is not listed on the Rad-Cure Web site as being among Rad-Cure’s FDA (Food & Drug Administration) food grade adhesives—but Grace Label was unaware of this. Other than ordering the FDA-approved varnish, Grace Label did nothing to determine if the other materials used to produce the Spears cards were compatible for direct contact with food items. Before its work for Barcel, Grace Label had not produced a product intended to be in direct contact with food—and it assumed that the materials it was told to use had been approved by Chromium Graphics or Barcel.

Grace Label produced prototype cards, using leftover materials from the past Barcel jobs (except for the foil, which has no odor), and submitted them to Barcel, through Kliff, for approval. Grace Label understood that Barcel was interested in the size and weight of the cards to make sure they would fit in the Barcel dispensing units. Kliff was on the Grace Label premises during the first week of production and had many boxes of cards brought to him for inspection. He raised no issues concerning the cards.

On June 28, 2002, Grace Label shipped 17,138,000 production cards directly to Barcel. An additional 7,500,000 cards were shipped to Barcel on July 5, 2002. After receipt of the production cars, Barcel complained to Kliff that the cards emitted a foul odor and were not fit for use in the potato chip bags for which they were intended. Grace Label suggested they be aired out to eliminate the odor. Barcel attempted to do this—but the odor persisted despite Grace Label’s contention that the Spears production cards smelled the same as the cards for the other Barcel jobs that Grace Label had printed and which had been accepted by Kliff and Barcel.

Barcel rejected the cards under its contract with Kliff before the final production of cards was shipped from Grace Label. Kliff thereupon canceled the remaining order with Grace Label. Beyond a \$90,000 down payment, Kliff did not pay Grace Label the contract amount for the cards. Grace Label then brought suit against Kliff for breach of contract. Kliff contended that the cards smelled bad and that the smell was caused by a chemical (beta-phenoxyethyl acrylate [BPA]) in the adhesive, which was not direct food compatible. Kliff’s expert stated that the BPA was undetectable in the prototype cards but that in the production cards, the concentration of BPA far exceeded that in uncured or cured Rad-Cure. Grace Label’s response was that Kliff specified and approved of the material components of the cards and it relied on Kliff and Barcel to select appropriate material as it had no expertise in the area. This argument would require the court to consider the course of dealing between the parties; Kliff objected to the introduction of this evidence.

Walters, Chief United States Magistrate Judge

The parol evidence rule does not bar the course of dealing between the parties. The UCC codifies a commercial version of the rule:

Terms with respect to which the confirmatory memoranda of the parties agree or which are otherwise set forth in a writing intended as a final expression of their agreement

with respect to such terms as are included therein and may not be contradicted by evidence of any prior agreement or of a contemporaneous oral agreement but may be explained or supplemented (a) by a course of dealing or usage of trade . . . or by course of performance.

[2–202(a)]. “Course of dealing” is a defined term meaning “a sequence of previous conduct between the parties to a particular

transaction which is fairly to be regarded as establishing a common basis for interpreting their expressions and other conduct.” [1–205(3)]. A course of dealing “gives particular meaning to and supplements or qualifies terms of an agreement.” [1–205(3)]. “Whenever reasonable” express terms and the course of dealing are to be construed consistent with each other. The rule incorporated in the UCC reflects the common-sense assumption that the course of prior dealings between the parties and usages of trade were taken for granted when the contract document was phrased.

[Author’s note: The court then held that the written contract could be explained or supplemented by “course of dealing”

between the parties. Such evidence would be intended not to change or vary the contract terms, but rather to explain what the parties meant by them. At the same time, the court concluded that there were genuine issues of material fact that precluded giving summary judgment at this time. These included (1) whether the parties intended, on the basis of successful use of adhesive and other material on prior jobs, that the trading cards made with the same materials would be “direct food compatible” within the meaning of the contract and (2) whether the odor on the cards was worse than what had been accepted before.]

Motion for summary judgment denied.

Modification Under the Code, consideration is not required to support a modification or rescission of a contract for the sale of goods. However, the parties may specify in their agreement that modification or rescission must be in writing, in which case a signed writing is necessary for enforcement of any modification to the contract or its rescission [2–209].

Waiver In a contract that entails a number of instances of partial performance (such as deliveries or payments) by one party, the other party must be careful to object to any late deliveries or payments. If the other party does not object, it may waive its rights to cancel the contract if other deliveries or payments are late [2–208(3), 2–209(4)]. For example, a contract calls for a

CYBERLAW IN ACTION

The Internet and E-Commerce Facilitate Contract Modifications

Buyers and sellers sometimes change parts of their contracts after formation. For example, the buyer may need the goods slightly sooner or somewhat later than originally planned. Or the seller may only be able to supply yellow life jackets instead of the buyer’s preferred blue and red mix of life jackets. So long as the parties agree to change the particulars of the performance contracted for, an event that Article 2 calls a “modification,” they may change their contract. Modifications are quite common in deals between two merchants and are not uncommon in sales in which one lay buyer and one merchant participate.

Let’s assume that the buyer decides that her customers like the first shipment of goods under a contract so much that she should order more. To change the quantity in her office, she can do several things—call the seller, send a telegram, or send a revised contract for the seller to sign and return.

E-commerce makes this easier—the buyer can send an e-mail asking the seller to send more of the same goods, preferably by specifying the number above that provided in the earlier agreement that the buyer now wishes to buy. If the buyer bought three \$60 life jackets for her own use, Article 2

allows a court to enforce the seller’s commitment to sell three at \$60 each even without worrying about the statute of frauds in Section 2–201. However, if the buyer wanted to increase her order from three to 15 life jackets, the dollar amount of the purchase would rise above \$500—and courts would not enforce the larger purchase unless the deal met the statute of frauds. How does the Internet help buyers and sellers who want to be able to enforce their agreements in court if the other party does not perform? Using either the federal E-Sign law or state-enacted versions of the Uniform Electronic Transactions Act (UETA), the party seeking to enforce the larger quantity could send an e-mail or message using a click-through form provided by a seller’s Web site, and could use that e-mail or other electronically revised order to show the fact of the revision to the “order” and, as applicable, the existence of a reply message from the seller confirming the seller’s agreement to the change.

As a further example of how e-mail and the Internet assist sales transactions, sellers now routinely send or post confirmations that shipment has occurred. These messages help buyers plan for the arrival of goods, otherwise keep track of delays in orders that they may need to act upon, and also check that their insurance is effective for a particular purchase or that their warehouse is ready to receive the goods sent.

fish wholesaler to deliver fish to a supermarket every Thursday and for the supermarket to pay on delivery. If the fish wholesaler regularly delivers the fish on Friday and the supermarket does not object, the supermarket will be unable to cancel the contract for that reason. Similarly, if the supermarket does not pay cash but sends a check the following week, then unless the fish wholesaler objects, it will not be able to assert the late payments as grounds for later canceling the contract. A party that has waived rights to a portion of the contract not yet performed may retract the waiver by giving reasonable notice to the other party that strict performance will be required. The retraction of the waiver is effective unless it would be unjust because of a material change of position by the other party in reliance on the waiver [2–209(5)].

Assignment Under the Code, the buyer and/or the seller may delegate their duties to someone else. If there is a strong reason for having the original party perform the duties, perhaps because the quality of the performance might differ otherwise, the parties may not delegate their duties. Also, they may not delegate their duties if the parties agree in the contract that there is to be no assignment of duties. However, they may assign rights to receive performance—for example, the right to receive goods or payment [2–210].

Delivery

Basic Obligation The basic duty of the seller is to deliver the goods called for by the contract. The basic duty of the buyer is to accept and pay for the goods if they conform to the contract [2–301]. The buyer and seller may agree that the goods are to be delivered in several lots or installments. If there is no such agreement, then a single delivery of all the goods must be made. Where delivery is to be made in lots, the seller may demand the price of each lot upon delivery unless there has been an agreement for the extension of credit [2–307].

Place of Delivery The buyer and seller may agree on the place where the goods will be delivered. If no such agreement is made, then the goods are to be delivered at the seller's place of business. If the seller does not have a place of business, then delivery is to be made at his home. If the goods are located elsewhere than the seller's place of business or home, the place of delivery is the place where the goods are located [2–308].

Seller's Duty of Delivery The seller's basic obligation is to tender delivery of goods that conform to the contract with the buyer. Tender of delivery means that the seller must make the goods available to the buyer. This must be done during reasonable hours and for a reasonable period of time, so that the buyer can take possession of the goods [2–503]. The contract of sale may require the seller merely to ship the goods to the buyer but not to deliver the goods to the buyer's place of business. If this is the case, the seller must put the goods into the possession of a carrier, such as a trucking company or a railroad. The seller must also make a reasonable contract with the carrier to take the goods to the buyer. Then, the seller must notify the buyer that the goods have been shipped [2–504]. Shipment terms were discussed in Chapter 19, Formation and Terms of Sales Contracts.

If the seller does not make a reasonable contract for delivery or notify the buyer and a material delay or loss results, the buyer has the right to reject the shipment. Suppose the goods are perishable, such as fresh produce, and the seller does not ship them in a refrigerated truck or railroad car. If the produce deteriorates in transit, the buyer can reject the produce on the ground that the seller did not make a reasonable contract for shipping it.

In some situations, the goods sold may be in the possession of a bailee such as a warehouse. If the goods are covered by a negotiable warehouse receipt, the seller must endorse the receipt and give it to the buyer [2–503(4)(a)]. This enables the buyer to obtain the goods from the warehouse. Such a situation exists when grain being sold is stored at a grain elevator. The law of negotiable documents of title, including warehouse receipts, is discussed in Chapter 23, Personal Property and Bailments.

If the goods in the possession of a bailee are not covered by a negotiable warehouse receipt, then the seller must notify the bailee that it has sold the goods to the buyer and must obtain the bailee's consent to hold the goods for delivery to the buyer or release the goods to the buyer. The risk of loss as to the goods remains with the seller until the bailee agrees to hold them for the buyer [2–503(4)(b)].

Inspection and Payment

Buyer's Right of Inspection Normally, the buyer has the right to inspect the goods before he accepts or pays for them. The buyer and seller may agree on the time, place, and manner in which the buyer will inspect the goods. If no agreement is made, then the buyer may

inspect the goods at any reasonable time and place and in any reasonable manner [2–513(1)].

If the shipping terms are cash on delivery (COD), then the buyer must pay for the goods before inspecting them unless they are marked “Inspection Allowed.” However, if it is obvious even without inspection that the goods do not conform to the contract, the buyer may

reject them without paying for them first [2–512(1)(a)]. For example, if a farmer contracted to buy a bull and the seller delivered a cow, the farmer would not have to pay for it. The fact that a buyer may have to pay for goods before inspecting them does not deprive the buyer of remedies against the seller if the goods do not conform to the contract [2–512(2)].

The Global Business Environment

Assurance of Payment

Perhaps the most important provisions in the international sales contract cover the manner by which the buyer pays the seller. Frequently, a foreign buyer’s contractual promise to pay when the goods arrive does not provide the seller with sufficient assurance of payment. The seller may not know the overseas buyer well enough to determine the buyer’s financial condition or inclination to refuse payment if the buyer no longer wants the goods when they arrive. When the buyer fails to make payment, the seller will find it difficult and expensive to pursue its legal rights under the contract. Even if the seller is assured that the buyer will pay for the goods on arrival, the time required for shipping the goods often means that payment is not received until months after shipment.

To solve these problems, the seller often insists on receiving an **irrevocable letter of credit**. The buyer obtains a letter of credit from a bank in the buyer’s country. The letter of credit obligates the buyer’s bank to pay the amount of the sales contract to the seller. To obtain payment, the seller must produce a **negotiable bill of lading** and other documents proving that it shipped the goods required by the sales contract in conformity with the terms of the letter of credit.¹ A letter of credit is irrevocable when the buyer’s bank cannot withdraw its obligation to pay without the consent of the seller and the buyer.

Letters of credit may be confirmed or advised. Under a **confirmed letter of credit**, the seller’s bank agrees to assume liability on the letter of credit. Typically, under a confirmed letter of credit, the buyer’s bank issues a letter of credit to the seller; the seller’s bank confirms the letter of credit; the seller delivers the goods to a carrier; the carrier issues a negotiable bill of lading to the seller; the seller delivers the bill of lading to the seller’s bank and presents a draft² drawn on the buyer

demanding payment for the goods; the seller’s bank pays the seller for the goods; the buyer’s bank reimburses the seller’s bank; and the buyer reimburses its bank.

With an **advised letter of credit**, the seller’s bank merely acts as an agent for collection of the amount owed to the seller. The seller’s bank acts as agent for the seller by collecting from the buyer’s bank and giving the payment to the seller. The buyer’s bank is reimbursed by the buyer.

The confirmed letter of credit is the least risky payment method for sellers. The confirmation is needed because the seller, unlike the confirming bank, may not know any more about the financial integrity of the issuing bank than it knows about that of the buyer. The seller has a promise of immediate payment from an entity it knows to be financially solvent—the confirming bank. If the draft drawn pursuant to the letter of credit is not paid, the seller may sue the confirming bank, which is a bank in his home country.

Under the confirmed letter of credit, payment is made to the seller well before the goods arrive. Thus, the buyer cannot claim that the goods are defective and refuse to pay for them. When the goods are truly defective on arrival, however, the customer can commence an action for damages against the seller based on their original sales contract.

Figure 1 (page 552) summarizes the confirmed letter of credit transaction.

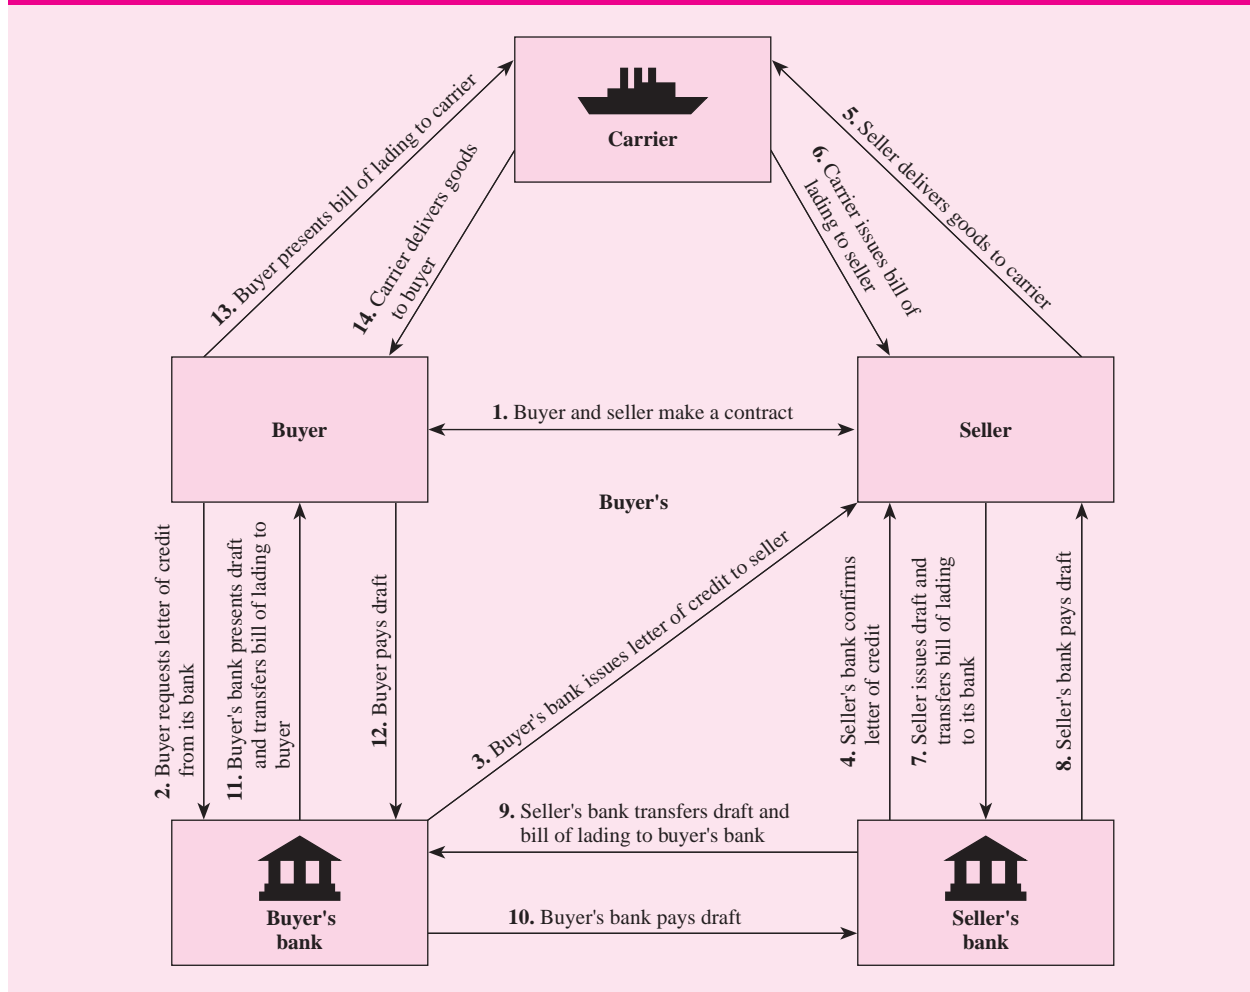

Confirming and Nonconforming Documents

In a letter of credit transaction, the promises made by the buyer’s and seller’s banks are independent of the underlying sales contract between the seller and the buyer. Therefore, when the seller presents a bill of lading and other documents that *conform* to the terms of the letter of credit, the issuing bank and the confirming bank are required to pay, even if the buyer refuses to pay its bank or even, generally, if the buyer claims to know that the goods are defective. However, if the bill of lading or other required documents do not conform to the terms of the letter of credit, a bank may properly refuse to pay. A bill of lading is *nonconforming* when, for example, it indicates the wrong goods were shipped, states the wrong person to receive the goods, or states a buyer’s address differently than the letter of credit.

¹A bill of lading is a document issued by a carrier acknowledging that the seller has delivered particular goods to it and entitling the holder of the bill of lading to receive these goods at the place of destination. Bills of lading are discussed in Chapter 23.

²A draft is a negotiable instrument by which the drawer (in this case, the seller) orders the drawee (the buyer) to pay the payee (the seller). Drafts are discussed in Chapter 31.

Figure 1 Confirmed Letter of Credit Transaction

If the goods conform to the contract, the buyer must pay the expenses of inspection. However, if the goods are nonconforming, he may recover his inspection expenses from the seller [2-513(2); 2-715(1)].

Payment The buyer and seller may agree in their contract that the price of the goods is to be paid in money or in other goods, services, or real property. If all or part of the price of goods is payable in real property, then only the transfer of goods is covered by the law of sales of goods. The transfer of the real property is covered by the law of real property [2-304].

The contract may provide that the goods are sold on credit to the buyer and that the buyer has a period of time to pay for them. If there is no agreement for extending

credit to the buyer, the buyer must pay for them upon delivery. The buyer usually can inspect goods before payment except where the goods are shipped COD, in which case the buyer must pay for them before inspecting them.

Unless the seller demands cash, the buyer may pay for the goods by personal check or by any other method used in the ordinary course of business. If the seller demands cash, the seller must give the buyer a reasonable amount of time to obtain it. If payment is made by check, the payment is conditional on the check's being honored by the bank when it is presented for payment [2-511(3)]. If the bank refuses to pay the check, the buyer has not satisfied the duty to pay for the goods. In that case, the buyer does not have the right to retain the goods and must give them back to the seller.

Acceptance, Revocation, and Rejection

Acceptance Acceptance of goods occurs when a buyer, after having a reasonable opportunity to inspect them, either indicates that he will take them or fails to reject them. To **reject** goods, the buyer must notify the seller of the rejection and specify the defect or nonconformity. If a buyer treats the goods as if he owns them, the buyer is considered to have accepted them [2–606].

For example, Ace Appliance delivers a new large flat screen television set to Baldwin. Baldwin has accepted the set if, after trying it and finding it to be in working order, she says nothing to Ace or tells Ace that she will keep it. Even if the set is defective, Baldwin is considered to have accepted it if she does not give Ace timely notice that she does not want to keep it because it is not

in working order. If she takes the set to her vacation home even though she knows that it does not work properly, this is also an acceptance. In the latter case, her use of the television set would be inconsistent with its rejection and the return of ownership to the seller.

If a buyer accepts any part of a **commercial unit** of goods, he is considered to have accepted the whole unit [2–606(2)]. A commercial unit is any unit of goods that is treated by commercial usage as a single whole. It can be a single article (such as a machine), a set or quantity of articles (such as a dozen, bale, gross, or carload), or any other unit treated as a single whole [2–105(6)]. Thus, if a bushel of apples is a commercial unit, then a buyer purchasing 10 bushels of apples who accepts 8½ bushels is considered to have accepted 9 bushels.

In the *Weil v. Murray* case, which follows, the buyer was considered to have accepted goods that it had handled inconsistently with a claim of rejection and return of ownership of the goods to the seller.

Weil v. Murray

2001 WL 345222 (U.S.D.C. S.D.N.Y. 2001)

On October 19, 1997, Mark Murray, a New York art dealer and gallery owner, traveled to Montgomery, Alabama, to view various paintings in the art collection owned by Robert Weil. Murray examined one of the paintings under ultraviolet light—a painting by Edgar Degas entitled Aux Courses. Murray discussed the Degas with Ian Peck, another art dealer, who indicated an interest in buying it and asked Murray to arrange to have it brought to New York.

Murray and Weil executed an agreement which provided for consignment of the Degas to Murray's gallery "for a private inspection in New York for a period of a week from November 3" to be extended only with the express permission of the consignor. The director of Murray's Gallery picked up the painting, which was subsequently shown by Murray to Peck. Peck agreed to purchase the painting for \$1,225,000 with Murray acting as a broker. On November 8, Murray advised Weil that he had a buyer for the Degas and they orally agreed to the sale. Subsequently, they entered into a written agreement for the sale of the painting for \$1 million that indicated, among other things, that if Weil did not receive full payment by December 8, Murray would disclose the name of the undisclosed principal on whose behalf he was acting.

Neither Murray nor anyone else ever paid Weil the \$1 million. Nonetheless, Murray maintained possession of the Degas from November 3, 1997, through March 25, 1998, when Weil requested its return. At some point in mid-November, Weil and Peck took the Degas to an art conservator. A condition report prepared by the conservator and dated December 3, 1997, showed that the conservator had cleaned the painting and sought to correct some deterioration. Weil brought an action to recover the price of the painting from Murray.

Mukasey, District Judge

The undisputed facts establish also that Murray accepted the Degas. "Goods that a buyer has in its possession necessarily are accepted or rejected by the time a reasonable opportunity for inspecting them passes." Murray first inspected the Degas under an ultraviolet light when he viewed it at the Weils' home in late October. Murray had the opportunity to further examine the Degas at his gallery in New York pursuant to the consignment agreement and his continued possession of the painting following the expiration of the consignment agreement. It is also

undisputed that Murray was present when Simon Parkes assessed the condition of the painting sometime between November 3 and November 19, 1997. Not only did Murray have a reasonable time to inspect the goods, but also it is undisputed that he actually did inspect the Degas. There is no evidence that Murray found the painting unsatisfactory or nonconforming. See *Integrated Circuits Unltd. v. E. F. Johnson Co.*, (2d Cir. 1989) (discussing acceptance as the failure to make an effective rejection after a reasonable time to inspect). Although the question of whether the buyer has had a reasonable time to inspect is

generally a question for the trier of fact, no reasonable jury could find that Murray did not accept the Degas in light of the undisputed facts that he inspected the Degas on at least two occasions, signed the written agreement, and continued to retain possession of the Degas. See *Sessa v. Riegle*, (D.C. Pa. 1977) (finding acceptance when buyer was permitted unlimited inspection of a horse and then indicated that he would buy the horse).

Moreover, it is undisputed that, without Weil's consent, Murray, at a minimum, permitted the painting to be cleaned and restored in late November or early December. Murray's participation in the alteration of the painting, regardless of

whether such alteration increased its value, was an act inconsistent with Weils' ownership. See *In re Fran Char Press, Inc.*, (Bankr. E.D.N.Y. 1985) (finding that buyer had accepted posters by taking possession of them and mounting them on cardboard); *Industria De Calcados Martini Ltd. v. Maxwell Shoe Co.*, (Mass. App. Ct. 1994) (finding acceptance where buyer had shoes refinished). The Weils have established that Murray agreed to purchase the Degas, accepted it, and nonetheless failed to pay the purchase price.

Summary judgment granted in favor of the Weils.

Effect of Acceptance Once a buyer has accepted goods, he cannot later reject them unless at the time they were accepted, the buyer had reason to believe that the nonconformity would be cured. By accepting goods, the buyer does not forfeit or waive all remedies against the seller for any nonconformities in the goods. However, if the buyer wishes to hold the seller responsible, he must give the seller timely notice that the goods are nonconforming.

The buyer is obligated to pay for goods that are accepted. If the buyer accepts all of the goods sold, she is, of course, responsible for the full purchase price. If the buyer accepts only part of the goods, she must pay for that part at the contract rate [2-607(1)].

Revocation of Acceptance Under certain circumstances, a buyer may **revoke** or undo the acceptance. A buyer may revoke acceptance of nonconforming goods where (1) the nonconformity substantially impairs the value of the goods and (2) the buyer accepted them without knowledge of the nonconformity because of the difficulty of discovering the nonconformity, or the buyer accepted the goods because of the seller's assurances that it would cure the defect [2-608(1)].

The buyer must exercise her right to revoke acceptance within a reasonable time after the buyer discovers or should have discovered the nonconformity. Revocation is not effective until the buyer notifies the seller of

the intention to revoke acceptance. After a buyer revokes acceptance, her rights are the same as they would have been if the goods had been rejected when delivery was offered [2-608].

The right to revoke acceptance could arise, for example, where Arnold buys a new car from Dealer. While driving the car home, Arnold discovers that it has a seriously defective transmission. When she returns the car to Dealer, Dealer promises to repair it, so Arnold decides to keep the car. If the dealer does not fix the transmission after repeated efforts to fix it, Arnold could revoke her acceptance on the grounds that the nonconformity substantially impairs the value of the car, that she took delivery of the car without knowledge of the nonconformity, and that her acceptance was based on Dealer's assurances that he would fix the car. Similarly, revocation of acceptance might be involved where a serious problem with the car not discoverable by inspection shows up in the first month's use.

Revocation must occur prior to any substantial change in the goods, however, such as serious damage in an accident or wear and tear from using them for a period of time. What constitutes a "substantial impairment in value" and when there has been a "substantial change in the goods" are questions that courts frequently have to decide when an attempted revocation of acceptance results in a lawsuit. The *Waddell* case illustrates a number of the issues that arise in situations where a buyer is seeking to revoke her acceptance.

Waddell v. L.V.R.V. Inc.

58 UCC Rep.2d 654 (Sup. Ct. Nev. 2006)

In 1996, Arthur and Roswitha Waddell served jointly as president of the Las Vegas area Coachmen Association Camping Club. During the course of one of the group's meetings, they spoke with Tom Pender, the sales manager of Wheeler's Las Vegas RV (Wheeler's), about upgrading the motor home they owned to a "diesel pusher" motor coach. Pender took the Waddells to the Wheeler's lot and showed them a 1996 Coachmen Santara model diesel pusher coach. The Waddells

test-drove and eventually agreed to purchase the RV and an extended warranty. Before they took possession of the RV, they requested that Wheeler's perform various repairs including service on the RV's engine cooling system, new batteries, and alignment of the door frames. Wheeler's told the Waddells that the repairs had been performed as requested, and they took delivery of the RV on September 1, 1997.

The Waddells first noticed a problem with the RV's engine shortly after taking possession of it. They drove the RV from Las Vegas to Hemet, California. On the return trip, the entry door popped open, and the RV's engine overheated while ascending a moderate grade to such a degree that Mr. Waddell had to pull over to the side of the road and wait for the engine to cool down.

When the Waddells returned from California, they took the RV back to Wheeler's for repairs. Despite Wheeler's attempts to repair the RV, the Waddells continually experienced more problems with the RV, including further episodes of the engine overheating. Between September 1997 and March 1999, Wheeler's service department spent a total of seven months during different periods of time attempting to repair the RV.

On June 9, 2000, the Waddells brought suit against Wheeler's seeking both equitable relief and monetary damages. The trial court concluded that the RV's nonconformities substantially impaired its value to the Waddells and allowed them to revoke their acceptance of the RV. The court also ordered Wheeler's to return all of the Waddells' out-of-pocket expenses. Wheeler's appealed the judgment.

Gibbons, Justice

The district court found that despite Wheeler's good-faith attempts to repair the RV, the nonconformities persisted and rendered the RV unfit for its intended use. Some of those nonconformities included: the bedroom air conditioning does not cool, the front air conditioning does not cool, the dash heater does not blow hot air, RV batteries do not stay charged, and chronic engine overheating. The district court concluded that these nonconformities and others substantially impaired the RV's value to the Waddells and that the Waddells had revoked their acceptance of the RV within a reasonable time.

We have never before determined when a nonconformity substantially impairs the value of a good to the buyer. Other jurisdictions treat this determination as an issue of fact, which is made in light of the totality of the circumstances of each particular case, including the number of deficiencies and type of nonconformity and the time and inconvenience spent in downtime and attempts at repair.

The Supreme Court of Oregon has established a two-part test to determine whether a nonconformity, under the totality of the circumstances, substantially impairs the value of the goods to the buyer. The test has both an objective and a subjective prong:

Since the statute provides that the buyer may revoke acceptance of goods "whose nonconformity substantially impairs its value *to him*," the value of the conforming goods *to the plaintiff* must first be determined. This is a subjective question in the sense it calls for a consideration of the needs and circumstances of the plaintiff who seeks to revoke, not the needs and circumstances of an average buyer. The second inquiry is whether the nonconformity in fact substantially impairs the value of the goods to the buyer, having in mind his particular needs. This is an objective question in the sense that it calls for evidence of something more than

plaintiff's assertion that the nonconformity impaired the value to him; it requires evidence from which it can be inferred that plaintiff's needs were not met because of the nonconformity.

Subjective value to the Waddells

Arthur Waddell testified that he purchased the RV to enjoy the RV lifestyle. Before purchasing the RV, the Waddells owned similar vehicles that they used both as a residence and for camping trips. In fact, Mr. Waddell testified that he and his wife intended to sell their house and spend two to three years traveling around the country.

Mr. Waddell further testified that he shopped at Wheeler's based on Wheeler's advertisements. Marlene Wheeler, president and chief operating officer, testified that Wheeler's advertising encouraged the purchase of an RV to find unlimited freedom. When Mr. Waddell spoke with Tom Pender, sales manager at Wheeler's about upgrading to an RV for those purposes, Pender told him that he had an RV on the lot that would meet his needs.

Mr. Waddell's testimony demonstrates that the RV's subjective value to the Waddells was based on their ability to spend two or three years driving the RV around the country. Thus, we must consider whether the RV's nonconformity substantially impaired the value of the RV based on the Waddells' particular needs.

Objective impairment

Mr. Waddell testified that as a result of the RV's defects, he and his wife were unable to enjoy the RV as they had intended. Mr. Waddell further testified that the RV's engine would overheat within ten miles of embarking if the travel involved any climbing.

Consequently, the RV spent a total of 213 days, or seven months and one day, at Wheeler's service department during the eighteen months immediately following the purchase. This testimony is sufficient to demonstrate an objective, substantial impairment of value.

The Supreme Court of Ohio has stated that a nonconformity effects a substantial impairment of value if it "shakes the buyer's faith or undermines his confidence in the reliability of the purchased item." The Supreme Judicial Court of Massachusetts has recognized that "even cosmetic or minor defects that go unrepaired . . . or defects which do not totally prevent the buyer from using the goods, but circumscribe that use . . . can substantially impair the goods' value to the buyer." The United States District Court for the District of Nevada recently reiterated that "the seller's inability to correct defects in motor vehicles creates a major hardship and an unacceptable economic burden on the consumer."

In this case, the chronic engine overheating shook the Waddells' faith in the RV and undermined their confidence in the RV's reliability and integrity. Not only did this problem make travel in the RV unreliable and stressful to the Waddells, the overheating made travel in the vehicle objectively unsafe.

Reasonable time for revoking acceptance

Wheeler's argues that the Waddells should not have been allowed to revoke their acceptance when they did not attempt to revoke within a reasonable time after purchasing the RV. We disagree.

Under section 2-608(2), "revocation of acceptance must occur within a reasonable time after the buyer discovers or should have discovered the ground for it and before any substantial change in the condition of goods which is not caused by their own defects." The statute further provides that revocation "is not effective until the buyer notifies the seller of it." We have never before determined a reasonable timeline for revocation of acceptance. However, other jurisdictions have held that the reasonable time determination "depends upon the nature, purpose and circumstances of the transaction."

Here, the district court found that the Waddells were entitled to revoke their acceptance since they notified Wheeler's of their intent to revoke within a reasonable time.

Mr. Waddell testified that he first notified the RV's defects immediately after his purchase. Mr. Waddell took the RV to Wheeler's service department whenever he noticed a defect and Wheeler's always attempted, often unsuccessfully, to repair the RV. As a result of those defects, Wheeler's service department kept the RV for approximately seven months of the eighteen months that the Waddells owned the RV. Roger Beauchemin, a former employee of Wheeler's service department, testified that Wheeler's was unable to repair some of the defects, including the engine's chronic overheating problems. In January 1999, the Waddells again brought the RV to Wheeler's complaining of persistent engine overheating. The Waddells demanded a full refund of the purchase price in March 1999 and sought legal counsel. Through counsel, the Waddells wrote to Wheeler's during the summer of 1999 to resolve the matter. Wheeler's did not respond to those inquiries until early 2000. Unable to resolve the dispute with Wheeler's, the Waddells revoked their acceptance of the RV in June 2000.

The seller of nonconforming goods must generally receive an opportunity to cure the deformity before the buyer may revoke his acceptance. However, the seller may not postpone revocation in perpetuity by fixing everything that goes wrong. Rather there comes a time when the buyer is entitled to say, "that's all," and revoke, notwithstanding the seller's repeated good faith to cure.

Furthermore, the seller's attempts to cure do not count against the buyer regarding timely revocation. The United States District Court for the District of Nevada has held that the "time for revocation of acceptance will be tolled while the seller attempts repairs." Tolling the reasonable time for revocation of acceptance is appropriate given the buyer's obligation to act in good faith and to afford the seller a reasonable opportunity to cure any defect in the goods.

The Waddells gave Wheeler's several opportunities to repair the defects before revoking their acceptance. Because Wheeler's was unable to repair the defects after a total of seven months, the Waddells were entitled to say "that's all" and revoke their acceptance, notwithstanding Wheeler's good-faith efforts to repair the RV. Also the reasonable time for revocation was tolled during the seven months that Wheeler's kept the RV and attempted to repair the defects.

Judgment affirmed in favor of the Waddells.

Buyer's Rights on Improper Delivery If the goods delivered by the seller do not conform to the contract, the buyer has several options. The buyer can (1) reject all of the goods, (2) accept all of them, or (3) accept

any commercial units and reject the rest [2-601]. The buyer, however, cannot accept only part of a commercial unit and reject the rest. The buyer must pay for the units accepted at the price per unit provided in the contract.

CYBERLAW IN ACTION

Providing Notice

Sections 2–602 and 2–607 require that the buyer notify the seller if the buyer wishes to reject goods the seller has tendered to the buyer, or if the buyer decides to revoke acceptance of goods that the seller has promised to repair or replace and has neither repaired nor replaced the goods as promised—or where the buyer gets goods that have a latent (hard-to-find) defect. “Notice” does not have to be in writing to be effective under 2–602 or 2–607, but many buyers prefer to have a record that they gave notice to the seller and the

time of the notice given. This reduces the risk that a court will find that the buyer’s failure to give notice deprives the buyer of her right to a remedy (see Section 2–607(3)(a)). Electronic commerce tools, including e-mail, allow buyers to provide speedy and reliable information to sellers in cases such as these. Buyers whose e-mail systems provide confirmation that the seller recipient actually has received the message about the buyer’s concerns about the goods, or who show the time and date that the intended recipient opened the e-mail, should make providing notice easier and less expensive than using traditional means of communication.

Where the contract calls for delivery of the goods in separate installments, the buyer’s options are more limited. The buyer may reject an installment delivery only if the nonconformity *substantially affects the value* of that delivery and *cannot be corrected* by the seller in a timely fashion. If the nonconformity is relatively minor, the buyer must accept the installment. The seller may offer to replace the defective goods or give the buyer an allowance in the price to make up for the nonconformity [2–612].

Where the nonconformity or defect in one installment impairs the value of the whole contract, the buyer may treat it as a breach of the whole contract but must proceed carefully so as not to reinstate the remainder of the contract [2–612(3)].

Rejection If a buyer has a basis for rejecting a delivery of goods, the buyer must act within a *reasonable time* after delivery. The buyer must also give the seller *notice* of the rejection, preferably in writing [2–602]. The buyer should be careful to state all of the defects on which he is basing the rejection,

including all of the defects that a reasonable inspection would disclose. This is particularly important if these are defects that the seller might cure (remedy) and the time for delivery has not expired. In that case, the seller may notify the buyer that he intends to redeliver conforming goods.

If the buyer fails to state in connection with his rejection a particular defect that is ascertainable by reasonable inspection, he cannot use the defect to justify his rejection if the seller could have cured the defect had he been given reasonable notice of it. In a transaction taking place between merchants, the seller has, after rejection, a right to a written statement of all the defects in the goods on which the buyer bases his right to reject, and the buyer may not later assert defects not listed in justification of his rejection [2–605].

If the buyer wrongfully rejects goods, she is liable to the seller for breach of the sales contract [2–602(3)].

In the case that follows, *Fitl v. Strek*, the court addressed the question of whether a buyer had acted in a timely fashion to notify the seller of a significant defect in an otherwise very valuable baseball trading card.

Fitl v. Strek

690 N.W.2d 605 (Sup. Ct. Neb. 2005)

In September 1995, James Fitl attended a sports card show in San Francisco where Mark Strek, doing business as Star Cards of San Francisco, was an exhibitor. Fitl purchased from Strek a 1952 Mickey Mantle Topps baseball card for \$17,750. According to Fitl, Strek represented that the card was in near mint condition. After Strek delivered the card to Fitl in Omaha, Nebraska, Fitl placed it in a safe-deposit box.

In May 1997, Fitl sent the baseball card to Professional Sports Authenticators (PSA), a leading grading service for sports cards that is located in Newport, California. PSA reported to Fitl that the card was ungradable because it had been discolored

and doctored. The expert from the firm stated that any alteration of a card, including the touchup or trimming of a card would render it valueless. In this case, the edges of the card had been trimmed and reglued. One spot on the front of the card and a larger spot on the back had been repainted, which left the card with no value. He also said that the standard for sports memorabilia was a lifetime guarantee and that a reputable dealer would stand behind what he sold and refund the money if an item were fake or had been altered.

On May 29, 1997, Fitl wrote to Strek and indicated that he planned to pursue “legal methods” to resolve the matter. Strek replied that Fitl should have initiated a return of the baseball card in a timely fashion so that Strek could have confronted his source and remedied the situation. Strek asserted that a typical grace period for the unconditional return of a card was from seven days to one month.

In August 1997, Fitl sent the baseball card to ASA Accugrade, Inc. (ASA) in Longwood, Florida, for a second opinion. ASA also concluded that the baseball card had been refinished and trimmed.

On September 8, 1997, Fitl sued Strek, alleging that Strek knew the baseball card had been recolored or otherwise altered and concealed this fact from him. Fitl claimed he had relied on Strek’s status as a reputable dealer. The trial court entered judgment for Fitl in the amount of \$17,750 and costs. The court found that Fitl notified Strek as soon as he realized the baseball card was altered and worthless and that Fitl had notified Strek of the defect within a reasonable time after its discovery. The court rejected Strek’s theory that Fitl should have determined the authenticity of the baseball card immediately after it had been purchased.

Wright, Justice

Strek claims that the court erred in determining that notification of the defective condition of the baseball card two years after the date of purchase was timely pursuant to UCC section 2–607(3)(a).

Section 2–607(3)(a) states: “Where a tender has been accepted . . . the buyer must within a reasonable time after he discovers or should have discovered any breach notify the seller of breach or be barred from any remedy.” “What is a reasonable time for taking any action depends on the nature, purpose and circumstances of such action.” [2–204(2)].

The notice requirement set forth in section 2–607(3)(a) serves three purposes. It provides the seller with an opportunity to correct any defect, to prepare for negotiation and litigation, and to protect itself against stale claims before it is too late for the seller to investigate. Whether the notice given is satisfactory and whether it is given within reasonable time are generally questions of fact to be measured by all the circumstances of the case.

Fitl purchased the baseball card in 1995 and immediately placed it in a safe-deposit box. Two years later, he retrieved the baseball card, had it appraised, and learned that it was of no value. Fitl testified that he had relied on Strek’s position as a dealer of sports cards and on his representation that the baseball card was authentic. In *Cao v. Nguyen* (2000), we stated a party is justified in relying upon a representation made to the party as a positive statement of fact when an investigation would be required to ascertain its falsity. In order for Fitl to have determined that the baseball card had been altered, he would have been required to conduct an investigation. We find that he was not required to do so. Once Fitl

learned that the baseball card had been altered, he gave notice to Strek.

As the court noted in *Maybank v. Kresge Co.* (1981), one of the most important policies behind the notice requirement of 2–607(3)(a) is to allow the seller to cure the breach by making adjustments or replacements to minimize the buyer’s damages and the seller’s liability. However, even if Fitl had learned immediately upon taking possession of the baseball card that it was not authentic and had notified Strek at that time, there is no evidence that Strek could have made any adjustment or taken any action that would have minimized his liability. In its altered condition, the baseball card was worthless.

Strek claimed via his correspondence to Fitl that if Strek had received notice earlier, he could have contacted the person who sold him the baseball card to determine the source of the alteration, but there is no evidence to support this allegation. Earlier notification would not have helped Strek prepare for negotiation in a suit because the damage to Fitl could not be repaired. Thus, the policies behind the notice requirement, to allow the seller to repair a defect, to prepare for negotiation and litigation, and to protect against stale claims at a time beyond which an investigation can be completed, were not unfairly prejudiced by the lack of an earlier notice to Strek. Any problem Strek may have had with the party from whom he obtained the baseball card was a separate matter from his transaction with Fitl, and an investigation into the source of the altered card would not have minimized Fitl’s damages.

Judgment affirmed in favor of Fitl.

Right to Cure If the seller has some reason to believe that the buyer would accept nonconforming goods, then the seller can take a reasonable time to re-ship conforming goods. The seller has this opportunity even if the original time for delivery has expired. For example, Ace Manufacturing contracts to sell 200 red, white, and blue soccer balls to Sam's Sporting Goods, with delivery to be made by April 1. On March 1, Sam's receives a package from Ace containing 200 all-white soccer balls and refuses to accept them. Ace can notify Sam's that it intends to cure the improper delivery by supplying 200 red, white, and blue soccer balls, and it has until April 1 to deliver the correct balls to Sam's. If Ace thought that Sam's would accept the all-white soccer balls because on past shipments Sam's did not object to the substitution of white balls for red,

white, and blue balls, then Ace has a reasonable time even after April 1 to deliver the red, white, and blue soccer balls [2–508].

Buyer's Duties after Rejection If the buyer is a merchant, then the buyer owes certain duties concerning the goods that he rejects. First, the buyer must follow any reasonable instructions that the seller gives concerning disposition of the goods. The seller, for example, might request that the rejected goods be shipped back to the seller. If the goods are perishable or may deteriorate rapidly, then the buyer must make a reasonable effort to sell the goods. The seller must reimburse the buyer for any expenses that the buyer incurs in carrying out the seller's instructions or in trying to resell perishable goods. In reselling goods, the

CONCEPT REVIEW

Acceptance, Revocation, and Rejection

Acceptance

1. Occurs when buyer, having had a reasonable opportunity to inspect goods, either (a) indicates he will take them or (b) fails to reject them.
2. If buyer accepts any part of a commercial unit, he is considered to have accepted the whole unit.
3. If buyer accepts goods, he cannot later reject them *unless* at the time they were accepted the buyer had reason to believe that the nonconformity would be cured.
4. Buyer is obligated to pay for goods that are accepted.

Revocation

1. Buyer may revoke acceptance of nonconforming goods where (a) the nonconformity *substantially impairs the value* of the goods and (b) buyer accepted the goods without knowledge of the nonconformity because of the difficulty of discovering the nonconformity *or* buyer accepted because of assurances by the seller.
2. Right to revoke must be exercised within a *reasonable* time after buyer discovers *or* should have discovered the nonconformity.
3. Revocation must be invoked before there is any *substantial* change in the goods.
4. Revocation is not effective until buyer notifies seller of his intent to revoke acceptance.

Rejection

1. Where the goods delivered do not conform to the contract, buyer may (a) reject all of the goods, (b) accept all of the goods, or (c) accept any commercial unit and reject the rest. Buyer must pay for goods accepted.
2. Where the goods are to be delivered in installments, an installment delivery may be rejected *only if* the nonconformity substantially affects the value of that delivery and cannot be corrected by the seller.
3. Buyer must act within a reasonable time after delivery.

buyer must act reasonably and in good faith [2–603(2) and (3)].

If the rejected goods are not perishable or if the seller does not give the buyer instructions, then the buyer has several options. First, the buyer can store the goods for the seller. Second, the buyer can reship them to the seller. Third, the buyer can resell them for the seller’s benefit. If the buyer resells the goods, the buyer may keep his expenses and a reasonable commission on the sale. If the buyer stores the goods, the buyer should exercise care in handling them. The buyer also must give the seller a reasonable time to remove the goods [2–604].

If the buyer is not a merchant, then her obligation after rejection is to hold the goods with reasonable care for a sufficient time to give the seller an opportunity to remove them. The buyer is not obligated to ship the goods back to the seller [2–602].

Assurance, Repudiation, and Excuse

Assurance The buyer or seller may become concerned that the other party may not be able to perform his contract obligations. If there is a reasonable basis for that concern, the buyer or seller can demand **assurance** from the other party that the contract will be performed. If such assurances are not given within a reasonable time not exceeding 30 days, the party is considered to have repudiated the contract [2–609].

In the case that follows, *Koch Materials Co. v. Shore Slurry Seal, Inc.*, the court held that a party obligated on a contract failed to provide adequate assurance that its commitments would be met and was found to have repudiated the contract.

Koch Materials Co. v. Shore Slurry Seal, Inc.

205 F.Supp.2d 324 (D.N.J. 2002)

Koch Materials Company is a manufacturer of asphalt and other road surfacing materials. In February 1998, Koch bought from Shore Slurry Seal, Inc., an asphalt plant in New Jersey as well the domestic license rights to a specialty road surfacing substance known as “Novachip.” Koch’s purchase price was \$5 million, payable in three installments. The last and smallest of the three installments in the amount of \$500,000 was not due until 2004.

As part of the sale, Shore entered into two side contracts with Koch. First, Shore and Koch signed an Exclusive Supply Agreement, under which Shore agreed that for the seven years following the sale it would purchase all of its asphalt requirements from Koch, and in any event at least two million gallons of asphalt per year. The Agreement provided that, in the event Shore purchased less than six million gallons over the first three years of the contract, the \$500,000 installment payment would be reduced by the same percentage by which Shore missed the six million gallon mark. Second, Shore promised to utilize at least 2.5 million square yards of Novachip annually, either in its own business or through sublicense agreements in certain permitted regions, and to pay royalties to Koch accordingly.

For the first three years of the contract, Shore met or exceeded its two million gallon minimum under the Exclusive Supply contract, but sold somewhat less than the 7.5 million square yards of Novachip the Sublicense Agreement called for. As the contracts provided, the parties adjusted the third-year installment payment to account for the shortfall.

On March 16, 2001, Robert Capoferri (“Capoferri”), the president and sole shareholder of Shore, sent a letter to Koch’s general manager. The letter provided in relevant part that:

I have decided to retire from the road construction business. . . .

The attorney for the buyer purchasing my assets has been in contact with our legal counsel, and they are close to having drafts prepared for the proposed purchase agreement. In addition to the sale of all balance sheet assets, it is also intended that 100% of any and all existing Shore Slurry Seal, Inc., contracts will be assigned and/or sold to the prospective buyer.

Given that the Nova Chip Sublicense Agreement is not part of this proposed asset sale, Shore Slurry Seal, Inc., will continue to exist beyond the closing date in order to primarily collect and remit Nova Chip royalties on behalf of Koch Pavement Solutions.

Koch responded on April 3, 2001, with a letter from its attorney to the attorney for Shore. After referencing the Capoferri letter, Koch’s missive stated:

We have concerns about the sale because, during the next four years, Koch is owed a substantial amount of money from Shore under the February, 1998, Sale and Purchase Agreement, namely under the two schedules providing for exclusive

supply and for Novachip royalties. In particular, we are concerned as to Shore's continued capacity to live up to its two million gallon per year commitment to buy asphalt emulsions and cutbacks and to meet its minimum square yardage requirements for Novachip.

Mr. Capoferri's secrecy surrounding Shore's negotiations and the terms and conditions of sale are adding to our discomfort. We do not know the prospective purchaser, the closing date or what, if any, arrangements have been made to provide for an assignment of Shore's obligations to the new purchaser. Further, we have no indication that Shore is providing, or is willing to provide any type of security to satisfy its obligations to Koch. To date we know only that the sign in front of Shore's current offices has been changed to read "Asphalt Paving Systems" and that several company vehicles are now bearing this new moniker.

Of course, once Shore has provided Koch with adequate assurance of performance of its obligations to Koch the process which we began with this letter can be terminated.

Shore's answer, on April 6, 2001, was again a letter from Capoferri to Koch's general manager. Capoferri noted that he had conferred with his attorney, and went on to argue that:

There has not been a failure to pay amounts due or to comply with requirements under any of the agreements we have with Koch. Nothing in any of the agreements drafted by Koch prohibit me from retiring business, nor do they require me to provide any type of security, collateral, or personal guarantee of payments similar to those we imposed upon our Nova Chip sublicensees.

Regarding the assertion of secrecy contained in Mr. Hull's letter of April 3, 2001, I am not aware of provisions within our agreements requiring me to notify Koch of any business negotiations that I may be involved in.

Finding little comfort in Shore's response, Koch filed a lawsuit seeking recognition of its right to treat Shore's failure to give adequate assurances as a repudiation of the contract, pursuant to New Jersey's Uniform Commercial Code, 2-609(1) (1962), and the common law of contracts.

Orlofsky, District Judge

When, in a contract for the sale of goods, one party has reasonable grounds to doubt that the other party will be able to perform, the doubting party may demand of its counterpart assurance that performance will occur. Section 2-609 (1). If no adequate assurance is forthcoming within a commercially reasonable time, or in any event within 30 days, the doubting party may treat its counterparty as having repudiated the contract. Section 609(3), (4). A party need not wait for an actual material breach to demand assurances; it need only show that it reasonably believed that such an event might be in the offing.

Turning then, to the pertinent facts, I conclude that no reasonable fact-finder could fail to conclude that Koch had a commercially reasonable basis for demanding assurances on both the Exclusive Supply and Sublicense Agreements. The Sublicense Agreement analysis is straightforward. Shore reported that it planned to sell all of its "balance-sheet assets," but retain, rather than assign, the Sublicense Agreement. Even assuming that historically, Shore had met most of its Novachip obligations by selling sublicenses to third parties, rather than laying its own road surfacing, any reasonable person would wonder how Shore planned to sell *anything* with no telephones, no computers, and no office furniture. That Shore might well have leased these items only prompts further questions: Would Shore have had the financial capacity to obtain leases and hire

a sales staff? Or were the proceeds of the sale going directly to Capoferri?

The Exclusive Supply Agreement is a bit more complex, but no less certain. In entering the ESA, Shore promised Koch not only a minimum annual purchase, but also all of the potential upside of Shore's requirements over and above the minimum should Shore's demand for asphalt grow over time. Thus, the identity of the purchaser, its future business plans, and its anticipated need for Koch's product could all affect significantly the amount of money that Koch would realize under the ESA, not only from the two million gallon minimum, but also from the potential upside. Capoferri's letter, it is true, promised that Shore's contracts, presumably including the ESA, would be assigned to the purchaser. Start-up construction businesses, however, begin unbonded, unable to win any bid for their first year and unable to secure sufficient bonding for large construction bids for several years. Koch had no way of knowing whether Asphalt was already a going business, and, if not, whether it would be able to win sufficient subcontracting bids even to meet the minimum requirements, let alone approach the potential upside of an established enterprise like Shore.

Even aside from the particular facts of the construction industry, counterparty risk is an important feature of any requirements contract. Courts have often refused to permit assignment or delegation of duties under requirements or "best efforts"

contracts where the assignment or delegation would be contrary to the justified expectations of the opposite contracting party.

Indeed, the ESA protected Koch against the risk of assignment of contract rights to unknown third parties, by requiring Koch's "prior written consent" before assignment. At the time of the April 3 letter, Koch knew that some of Shore's offices and assets were now under the control of an unknown new party, Asphalt. Koch also knew that it had certainly never agreed to any assignment of the contract. Koch could reasonably have believed that a sale had already happened, either with no assignment of the ESA, or with an assignment in violation of the ESA's terms. Given the importance of the identity of the counterparty to the contract, the possibility that requirement might have been in danger of breach would alone have been reasonable grounds at least to seek assurances otherwise.

Shore also argues that, regardless of whether Koch had reasonable grounds for doubt, the April 3, 2001, letter was insufficient, as a matter of law, to trigger any obligation on the part of Shore to respond. Koch's letter tracked closely the language of section 609, and was sent from one attorney to another. In Shore's view, Koch should have not only quoted from the U.C.C., but also actually cited section 609. Yet courts have

routinely accepted as sufficient under section 609 requests for assurances of a far less formal nature. I conclude, therefore, that Shore was required to give Koch adequate assurances that it would perform the contracts.

The remaining question, then, is whether it did so. Based on the summary judgment record, it appears that any reasonable fact-finder would determine that Shore did not. Far from assuring Koch that Shore would secure Koch's permission before assigning the ESA, Capoferri's April 6 letter asserted that "I am not aware of provisions within our agreements requiring me to notify Koch of any business negotiations that I may be involved in." This evasive answer not only failed to give Koch any information about the potential successor party to the contract, but also raised a new inference that Shore might be actively planning to *evade* the exclusive supply aspects of the ESA. It was, furthermore, close to a vow to breach P 14 of the ESA. Nor did Shore give any indication about its ability to meet the Sublicense Agreement volume requirements.

I conclude, therefore, that Shore repudiated the ESA and Sublicense Agreement as of May 3, 2001.

Judgment for Koch on its motion for partial summary judgment on the question of whether Shore had repudiated the contract.

The Global Business Environment

Insecurity in International Transactions

The Convention on Contracts for the International Sale of Goods (CISG) has provisions concerning insecurity, assurance, and anticipatory repudiation that parallel those in the UCC. Under Article 71 of CISG, a party may suspend performance of his obligations if after the contract is entered it "becomes apparent that the other party will not perform a substantial part of his obligations as a result of: (a) a serious deficiency in his ability to perform or his creditworthiness; or (b) his conduct in preparing to perform or in performing the contract." The party suspending performance must immediately give notice to the other party and must continue with performance if the other party provides adequate assurance of its performance.

Under Article 72 of CISG, if prior to the date of performance of a contract, it is clear that one of the parties will "commit a fundamental breach of contract," the other party may declare the contract avoided. If time allows, the party intending to declare the contract avoided must give reasonable notice to

the other party in order to permit him to provide adequate assurance of his performance. However, such notice need not be provided if the other party has declared that he will not perform the contract.

In a recent case a German court¹ upheld an Italian shoe manufacturer's decision to avoid a contract and awarded damages against the German buyer. The German company had ordered 140 pairs of winter shoes from the Italian manufacturer. After the shoes were manufactured, the Italian seller demanded security for the sales price as the buyer had other accounts payable to the seller still outstanding. When the buyer neither paid nor provided security, the seller declared the contract avoided and resold the shoes to other retailers. The court allowed the seller to recover the difference between the contract price and the price it obtained in the substitute transactions.

¹*Oberlandesgericht Dusseldorf*, 17 U 146/93, Jan. 14, 1994 (Germany), 1 UNILEX D. 1994-1 (M. J. Bonnell, ed.)

Anticipatory Repudiation Sometimes, one of the parties to a contract repudiates the contract by advising the other party that he does not intend to perform his obligations. When one party repudiates the contract, the other party may suspend his performance. In addition, he may either await performance for a reasonable time or use the remedies for breach of contract that are discussed in Chapter 22 [2–610].

Suppose the party who repudiated the contract changes his mind. Repudiation can be withdrawn by clearly indicating that the person intends to perform his obligations. The repudiating party must do this before the other party has canceled the contract or has materially changed position, for example, by buying the goods elsewhere [2–611].

Excuse Unforeseen events may make it difficult or impossible for a person to perform his contractual obligations. The Code rules for determining when a person is excused from performing are similar to the general contract rules. General contract law uses the test of **impossibility**. In most situations, however, the Code uses the test of **commercial impracticability**.

The Code attempts to differentiate events that are unforeseeable or uncontrollable from events that were part of the risk borne by a party. If the goods required for the performance of a contract are destroyed without fault of either party prior to the time that the risk of loss passed to the buyer, the contract is voided [2–613]. Suppose Jones agrees to sell and deliver an antique table to Brown. The table is damaged when Jones's antiques store is struck by lightning and catches fire. The specific table covered by the contract was damaged without fault of either party prior to the time that the

risk of loss was to pass to Brown. Under the Code, Brown has the option of either canceling the contract or accepting the table with an allowance in the purchase price to compensate for the damaged condition [2–613].

If unforeseen conditions cause a delay or the inability to make delivery of the goods and thus make performance impracticable, the seller is excused from making delivery. However, if a seller's capacity to deliver is only partially affected, the seller must allocate production in any fair and reasonable manner among his customers. The seller has the option of including any regular customer not then under contract in his allocation scheme. When the seller allocates production, he must notify the buyers [2–615]. When a buyer receives this notice, the buyer may either terminate the contract or agree to accept the allocation [2–616].

For example, United Nuclear contracts to sell certain quantities of fuel rods for nuclear power plants to a number of electric utilities. If the federal government limits the amount of uranium that United has access to, so that United is unable to fill all of its contracts, United is excused from full performance on the grounds of commercial impracticability. However, United may allocate its production of fuel rods among its customers by reducing each customer's share by a certain percentage and giving the customers notice of the allocation. Then, each utility can decide whether to cancel the contract or accept the partial allocation of fuel rods.

In the absence of compelling circumstances, courts do not readily excuse parties from their contractual obligations, particularly where it is clear that the parties anticipated a problem and sought to provide for it in the contract.

Problems and Problem Cases

1. Baker was a buyer and distributor of popcorn. Ratzlaff was a farmer who grew popcorn. Baker and Ratzlaff entered into a written contract pursuant to which Ratzlaff agreed that in the current year he would raise 380 acres of popcorn and sell the popcorn to Baker. Baker agreed to furnish the seed popcorn and to pay \$4.75 per hundred pounds of popcorn. The popcorn was to be delivered to Baker as he ordered it, and Baker was to pay for the popcorn as it was delivered. At Baker's request, the first delivery was made on February 2 of the following

year and the second on February 4. On neither occasion did Ratzlaff ask Baker to pay or Baker offer to pay. During that week, Ratzlaff and Baker had several phone conversations about further deliveries, but there was no discussion about payments. On February 11, Ratzlaff sent written notice to Baker that he was terminating the contract because Baker had not paid for the two loads of popcorn that had been delivered. In the meantime, Ratzlaff sold his remaining 1.6 million pounds of popcorn to another buyer at \$8 per hundred pounds. Baker then sued Ratzlaff for breach of contract. Did Ratzlaff act in good faith in terminating the contract?

2. Harold Ledford agreed to purchase three used Mustang automobiles (a 1966 Mustang coupe, a 1965 fastback, and a 1966 convertible) from J. L. Cowan for \$3,000. Ledford gave Cowan a cashier's check for \$1,500 when he took possession of the coupe, with the understanding he would pay the remaining \$1,500 on the delivery of the fastback and the convertible. Cowan arranged for Charles Canterbury to deliver the remaining vehicles to Ledford. Canterbury dropped the convertible off at a lot owned by Ledford and proceeded to Ledford's residence to deliver the fastback. He refused to unload it until Ledford paid him \$1,500. Ledford refused to make the payment until he had an opportunity to inspect the convertible, which he suspected was not in the same condition that it had been in when he purchased it. Canterbury refused this request and returned both the fastback and the convertible to Cowan. Cowan then brought suit against Ledford to recover the balance of the purchase price. Was Ledford entitled to inspect the car before he paid the balance due on it?
3. Spada, an Oregon corporation, agreed to sell Belson, who operated a business in Chicago, Illinois, two carloads of potatoes at "\$4.40 per sack, FOB Oregon shipping point." Spada had the potatoes put aboard the railroad cars; however, he did not have floor racks used in the cars under the potatoes as is customary during winter months. As a result, there was no warm air circulating and the potatoes were frozen while in transit. Spada claims that his obligations ended with the delivery to the carrier and that the risk of loss was on Belson. What argument would you make for Belson?
4. James Shelton is an experienced musician who operates the University Music Center in Seattle, Washington. On Saturday, Barbara Farkas and her 22-year-old daughter, Penny, went to Shelton's store to look at violins. Penny had been studying violin in college for approximately nine months. Mrs. Farkas and Penny advised Shelton of the price range in which they were interested, and Penny told him she was relying on his expertise. He selected a violin for \$368.90, including case and sales tax. Shelton claimed that the instrument was originally priced at \$465 but that he discounted it because Mrs. Farkas was willing to take it on an "as is" basis. Mrs. Farkas and Penny alleged that Shelton represented that the violin was "the best" and "a perfect violin for you"

and that it was of high quality. Mrs. Farkas paid for it by check. On the following Monday, Penny took the violin to her college music teacher, who immediately told her that it had poor tone and a crack in the body and that it was not the right instrument for her. Mrs. Farkas telephoned Shelton and asked for a refund. He refused, saying that she had purchased and accepted the violin on an "as is" basis. Had Farkas "accepted" the violin so that it was too late for her to "reject" it?

5. In the spring of 1991 Vince Ford, a retailer, contracted with a wholesaler, Starr Fireworks, for the purchase of various types of fireworks at an agreed price of \$6,748.86. In May 1991, Starr delivered the 138 cases of fireworks in one lot to Ford's warehouse in Lusk, Wyoming. Ford did not immediately inspect the fireworks; instead, he distributed them to his retail outlets throughout Wyoming for resale to the public.

Approximately 10 days after the fireworks were distributed to the retail outlets, Ford discovered that some fireworks were unsalable because of water damage and packaging problems. However, Ford did not inspect the remainder of the fireworks from the shipment. Ford telephoned Starr's representative to report the problems. Although Ford claimed that he instructed his employees not to sell any products received from Starr, a month later one of his stores sold several cases of the fireworks that had been purchased from Starr to another fireworks retailer. The buyer reported no problem with those fireworks, and they were subsequently resold to customers without reported problems.

After several unsuccessful attempts by Starr representatives to pick up the fireworks, they did pick up 10 cases of fireworks, worth \$1,476.87, on August 3, 1991; at that time Ford signed an acknowledgment that he still owed \$5,251.99 to Starr. Ford claimed to have returned the remaining fireworks to Starr's Denver office on August 13, 1991. He said that no one was available in the office so he left the fireworks outside a side door; Starr never received those fireworks.

Starr brought suit to recover the balance due on the fireworks that Ford had acknowledged retaining. Ford claimed that he had rejected the entire shipment on the grounds they were unmerchantable and counterclaimed for damages he asserted he had sustained. Ford contended that his inspection of some of the

fireworks disclosed packages with torn wrappings, mold or mildew on some fireworks, and paper wrapping that fell apart exposing the fireworks. Ford argued that from this sampling it was reasonable to assume all the goods delivered by Starr were unmerchantable. Did Ford make an effective rejection of the entire shipment?

6. On August 20, 1983, Elmer and Martha Bosarge purchased from J & J Mobile Home Sales a furnished mobile home manufactured by North River Homes. The mobile home, described by a J & J salesman as the “Cadillac” of mobile homes, cost \$23,900. Upon moving into their new home, the Bosarges immediately discovered defect after defect. The defects included a bad water leak that caused water to run all over the trailer and into the insulation, causing the trailer’s underside to balloon downward; loose moldings; warped dishwasher door; warped bathroom door; holes in the walls; defective heating and cooling system; cabinets with chips and holes in them; furniture that fell apart; rooms that remained moldy and mildewed; a closet that leaked rainwater; and spaces between the doors and windows and their frames that allowed the elements to come in. The Bosarges had not been able to spot the defects before taking delivery because they had viewed the mobile home at night on J & J’s lot and there was no light on in the mobile home.

The Bosarges immediately and repeatedly notified North River Homes of the defects, but it failed to satisfactorily repair the home. In November 1983 the Bosarges informed North River of their decision to revoke their acceptance of the defective home. On some occasions, repairmen came but did not attempt to make repairs, saying they would come back. Other times, the repairs were inadequate. For example, while looking for the water leak, a repairman cut open the bottom of the mobile home and then taped it back together with masking tape which failed to hold and resulted in the floor bowing out. Another inadvertently punctured a septic line and did not properly repair the puncture, resulting in a permanent stench. Other repairmen simply left things off at the home, like a new dishwasher door and a counter-top, saying they did not have time to make the repairs.

In June 1984 the Bosarges provided North River with an extensive list of problems that had not been corrected. When they did not receive a satisfactory

response, they send a letter on October 4, 1984, saying they would make no further payments. North River made no further efforts to correct the problems. In March 1986 the Bosarges’ attorney wrote to North River, formally revoking acceptance of the mobile home because of its substantially impaired value, tendering the mobile home back to it, and advising North River that it could pick the home up at its earliest convenience. They then brought a lawsuit requesting return of the purchase price and seeking damages for breach of various warranties. Did the Bosarges effectively revoke their acceptance of the mobile home and were they barred from revoking acceptance because of their continued use?

7. Walters, a grower of Christmas trees, contracted to supply Traynor with “top-quality trees.” When the shipment arrived and was inspected, Traynor discovered that some of the trees were not top quality. Within 24 hours, Traynor notified Walters that he was rejecting the trees that were not top quality. Walters did not have a place of business or an agent in the town where Traynor was. Christmas was only a short time away. The trees were perishable and would decline in value to zero by Christmas Eve. Walters did not give Traynor any instructions, so Traynor sold the trees for Walters’s account. Traynor then tried to recover from Walters the expenses he incurred in caring for and selling the trees. Did the buyer act properly in rejecting the trees and reselling them for the seller?
8. Haralambos Fekkos purchased from Lykins Sales & Service a Yamar Model 165D, 16-horsepower diesel tractor and various implements. On Saturday, April 27, Fekkos gave Lykins a check for the agreed-on purchase price, less trade-in of \$6,596, and the items were delivered to his residence. The next day, while attempting to use the tractor for the first time, Fekkos discovered it was defective. The defects included a dead battery requiring jump starts, overheating while pulling either the mower or tiller, missing safety shields over the muffler and the power takeoff, and a missing water pump. On Monday, Fekkos contacted Lykins’s sales representative, who believed his claims to be true and agreed to have the tractor picked up from Fekkos’s residence; Fekkos also stopped payment on his check. Fekkos placed the tractor with the tiller attached in his front yard as

near as possible to the front door without driving it onto the landscaped area closest to the house. Fekkos left the tractor on the lawn because his driveway was broken up for renovation and his garage was inaccessible, and because the tractor would have to be jump-started by Lykins's employees when they picked it up. On Tuesday, Fekkos went back to Lykins's store to purchase an Allis-Chalmers tractor and reminded Lykins's employees that the Yammarr tractor had not been picked up and remained on his lawn. On Wednesday, May 1, at 6:00 AM, Fekkos discovered that the tractor was missing although the tiller had been unhitched and remained in the yard. Later that day, Lykins picked up the remaining implements. The theft was reported to the police. On several occasions, Fekkos was assured that Lykins's insurance would cover the stolen tractor, that it was Lykins's fault for not picking it up, and that Fekkos had nothing to worry about. However, Lykins subsequently brought suit against Fekkos to recover the purchase price of the Yammarr tractor. Was Fekkos liable for the purchase price of the tractor that had been rejected and was stolen while awaiting pickup by the seller?

9. Creusot-Loire, a French manufacturing and engineering concern, was the project engineer to construct ammonia plants in Yugoslavia and Syria. The design process engineer for the two plants—as well as a plant being constructed in Sri Lanka—specified burners manufactured by Coppus Engineering Corporation. After the burner specifications were provided to Coppus, it sent technical and service information to Creusot-Loire.

Coppus expressly warranted that the burners were capable of continuous operation using heavy fuel oil with combustion air preheated to 260 degrees Celsius. The warranty extended for one year from the start-up of the plant but not exceeding three years from the date of shipment. In January 1989, Creusot-Loire ordered the burners for the Yugoslavia plant and paid for them; in November 1989, the burners were shipped to Yugoslavia. Due to construction delays, the plant was not to become operational until the end of 1993. In 1991, however, Creusot-Loire became aware that there had been operational difficulties with the Coppus burners at the Sri Lanka and Syria plants and that efforts to modify the burners had been futile. Creusot-Loire wrote to Coppus expressing concern

that the burners purchased for the Yugoslavia plant, like those in the other plants, would prove unsatisfactory and asking for proof that the burners would meet contract specifications. When subsequent discussions failed to satisfy Creusot-Loire, it requested that Coppus take back the burners and refund the purchase price. Coppus refused. Finally, Creusot-Loire indicated that it would accept the burners only if Coppus extended its contractual guarantee to cover the delay in the start-up of the Yugoslavia plant and if Coppus posted an irrevocable letter of credit for the purchase price of the burners. When Coppus refused, Creusot-Loire brought an action for breach of contract, seeking a return of the purchase price. Coppus claimed that Creusot-Loire's request for assurance was unreasonable. How should the court rule?

10. In July 1980, Alimenta (U.S.A.), Inc., and Gibbs, Nathaniel (Canada), Ltd., each an international dealer in agricultural commodities, entered into three separate contracts in advance of the 1980 peanut harvest. Each contract called for the delivery in installments by Gibbs to Alimenta of "1980 crop U.S. runner split peanuts." When Gibbs failed to make delivery of the quantities specified in the contract, and made some deliveries later than the scheduled dates, Alimenta brought suit against Gibbs seeking damages for breach of contract. Gibbs claimed that it was excused from full performance by the recurrence of a drought in the peanut-growing areas. The 1980 peanut crop had been planted in April and May. Rainfall was adequate in April, May, and June, and the crop came up in good condition. In the 25 years preceding 1980, the nation's peanut industry had experienced a steady growth in total production, with yield per acre increasing 250 percent over that period. In addition to Alimenta, Gibbs sold 1980 crop peanuts to 75 other customers and had contracted to purchase peanuts from 15 shellers in quantities 7 percent in excess of its sales. In early July, a hot and dry spell developed and became a full-fledged drought that did not break until late September. July and August were among the hottest and driest months on record in the last 100 years. In October, Gibbs received notices from 13 of its 15 shellers stating that because of the crop shortage, they were invoking section 2-615 of the UCC and would be delivering only a portion of the peanuts they had

contracted to deliver. Gibbs expected to receive only 52 percent of the peanuts it had contracted for, and in turn notified its customers, including Alimenta, to expect reduced quantities. Alimenta ultimately received 87 percent of the contract quantity from Gibbs. Was Gibbs excused from full performance of its contract by the occurrence of the drought?

Online Research

Using the Internet to Check Out an eBay Seller

Go to the eBay Web site (www.ebay.com), select a category of goods being auctioned, and identify an item for which you might consider bidding. Assume that you would like to ascertain the experience other buyers have had dealing with that seller, including whether the seller has a reputation for (1) fairly describing the goods she puts up for auction, (2) properly preparing the goods for shipment to the winning bidder, and (3) promptly shipping the goods once payment is received. You also would like to know if other buyers have complained about this particular seller. How would you go about ascertaining this information through the eBay Web site? What information do you find concerning the seller of the item you chose?

chapter 22

REMEDIES FOR BREACH OF SALES CONTRACTS

Kathy is engaged to be married. She contracts with the Bridal Shop for a custom-designed bridal gown in size 6 with delivery to be made by the weekend before the wedding. Kathy makes a \$500 deposit against the contract price of \$2,500. If the dress is completed in conformance with the specifications and on time, then Kathy is obligated to pay the balance of the agreed-on price. But what happens if either Kathy or the Bridal Shop breaches the contract? For example:

- If Kathy breaks her engagement and tells the Bridal Shop that she is no longer interested in having the dress before the shop has completed making it, what options are open to the Bridal Shop? Can it complete the dress or should it stop work on it?
- If the Bridal Shop completes the dress but Kathy does not like it and refuses to accept it, what can the Bridal Shop do? Can it collect the balance of the contract price from Kathy, or must it first try to sell the dress to someone else?
- If the Bridal Shop advises Kathy that it will be unable to complete the dress in time for the wedding, what options are open to Kathy? If she has another dress made by someone else, or purchases a ready-made one, what, if any, damages can she collect from the Bridal Shop?
- If the Bridal Shop completes the dress but advises Kathy it plans to sell it to someone else who is willing to pay more money for it, does Kathy have any recourse?
- Would it be ethical for the Bridal Shop to sell the dress to someone else who offers more money for it?

USUALLY, BOTH PARTIES TO a contract for the sale of goods perform the obligations that they assumed in the contract. Occasionally, however, one of the parties to a contract fails to perform his obligations. When this happens, the Uniform Commercial Code (UCC or Code) provides the injured party with a variety of remedies for breach of contract. This chapter will set forth and explain the remedies available to an injured party, as well as the Code's rules that govern buyer-seller agreements as to remedies and the Code's statute of limitations. The objective of the Code remedies is to put the injured person in the same position that he would have been in if the contract had been performed. Under the Code, an injured party may not recover consequential or punitive damages unless such damages are specifically provided for in the Code or in another statute [1–106].¹

¹The numbers in brackets refer to sections of the Uniform Commercial Code.

Agreements as to Remedies

The buyer and seller may provide their own remedies in the contract, to be applied in the event that one of the parties fails to perform. They may also limit either the remedies that the law makes available or the damages that can be covered [2–719(1)]. If the parties agree on the amount of damages that will be paid to the injured party, this amount is known as **liquidated damages**. An agreement for liquidated damages is enforced if the amount is reasonable and if actual damages would be difficult to prove in the event of a breach of the contract. The amount is considered reasonable if it is not so large as to be a penalty or so small as to be unconscionable [2–718(1)].

For example, Carl Carpenter contracts to build and sell a display booth for \$5,000 to Hank Hawker for Hawker to use at the state fair. Delivery is to be made to Hawker by September 1. If the booth is not delivered

on time, Hawker will not be able to sell his wares at the fair. Carpenter and Hawker might agree that if delivery is not made by September 1, Carpenter will pay Hawker \$2,750 as liquidated damages. The actual sales that Hawker might lose without a booth would be very hard to prove, so Hawker and Carpenter can provide some certainty through the liquidated damages agreement. Carpenter then knows what he will be liable for if he does not perform his obligation. Similarly, Hawker knows what he can recover if the booth is not delivered on time. The \$2,750 amount is probably reasonable. If

the amount were \$500,000, it likely would be void as a penalty because it is way out of line with the damages that Hawker would reasonably be expected to sustain. And if the amount were too small, say \$1, it might be considered unconscionable and therefore not enforceable.

If a liquidated damages clause is not enforceable because it is a penalty or unconscionable, the injured party can recover the actual damages that he suffered. The following *Baker* case illustrates a situation where a court enforced a liquidated damages clause in a contract.

Baker v. International Record Syndicate, Inc. 812 S.W.2d 53 (Tex. Ct. App. 1991)

International Record Syndicate (IRS) hired Jeff Baker to take photographs of the musical group Timbuk-3. Baker mailed 37 “chromes” (negatives) to IRS via the business agent of Timbuk-3. When the chromes were returned to Baker, holes had been punched in 34 of them. Baker brought an action for breach of contract to recover for the damage done to the chromes.

A provision printed on Baker’s invoice to IRS stated: “[r]eimbursement for loss or damage shall be determined by a photograph’s reasonable value which shall be no less than \$1,500 per transparency.”

Enoch, Chief Judge

The Uniform Commercial Code provides:

Damages for breach by either party may be liquidated in the agreement but only at an amount which is reasonable in light of the anticipated harm caused by the breach, the difficulties of proof of loss, and the inconvenience or non-feasibility of otherwise obtaining an adequate remedy. A term fixing unreasonably large liquidated damages is void as a penalty.

Under Texas law a liquidated damages provision will be enforced when the court finds (1) the harm caused by the breach is incapable of estimation, and (2) the amount of liquidated damages is a reasonable forecast of just compensation. This might be termed the “anticipated harm” test. The party asserting that a liquidated damages clause is, in fact, a penalty provision has the burden of proof. Evidence related to the difficulty of estimation and the reasonable forecast must be viewed as of the time the contract was executed.

Baker testified that he had been paid as much as \$14,000 for a photo session, which resulted in 24 photographs and that several of these photographs had also been resold. Baker further testified that he had received as little as \$125 for a single photograph. Baker also testified that he once sold a photograph for \$500. Subsequently, he sold reproductions of the same photograph three additional times at various prices; the total income from this one photograph was \$1,500. This particular photo-

graph was taken in 1986 and was still producing income in 1990. Baker demonstrated, therefore, that an accurate demonstration of the damages from a single photograph is virtually impossible.

Timbuk-3’s potential for fame was also an important factor in the valuation of the chromes. At the time of the photo session, Timbuk-3’s potential was unknown. In view of the difficulty in determining the value of a piece of art, the broad range of values and long-term earning power of photographs, and the unknown potential for fame of the subject, \$1,500 is not an unreasonable estimate of Baker’s actual damages.

Additionally, liquidated damages must not be disproportionate to actual damages. If the liquidated damages are shown to be disproportionate to the actual damages, then the liquidated damages can be declared a penalty and recovery limited to actual damages proven. This might be called the “actual harm” test. The burden of proving this defense is upon the party seeking to invalidate the clause. The party asserting this defense is required to prove the amount of the other party’s actual damages, if any, to show that the actual loss was not an approximation of the stipulated sum.

While evidence was presented that showed the value of several of Baker’s other projects, this was not evidence of the photographs in question. The evidence clearly shows that photographs are unique items with many factors bearing on their actual value. Each of the 34 chromes may have had a different value. Proof of this loss is difficult; where damages are real but

difficult to prove, injustice will be done the injured party if the court substitutes the requirements of judicial proof for the parties' own informed agreement as to what is a reasonable measure of damages. The evidence offered to prove Baker's actual

damages lacks probative force. IRS failed to establish Baker's actual damages as to these particular photographs.

Judgment reversed in favor of Baker.

Liability for consequential damages resulting from a breach of contract (such as lost profits or damage to property) may also be limited or excluded by agreement. The limitation or exclusion is not enforced if it would be unconscionable. Any attempt to limit consequential damages for injury caused to a person by consumer goods is considered prima facie unconscionable [2-719(3)].

Suppose an automobile manufacturer makes a warranty as to the quality of an automobile that is purchased as a consumer good. It then tries to disclaim responsibility for any person injured if the car does not conform to

the warranty and to limit its liability to replacing any defective parts. The disclaimer of consequential injuries in this case would be unconscionable and therefore would not be enforced. Exclusion of or limitation on consequential damages is permitted where the loss is commercial, as long as the exclusion or limitation is not unconscionable. Where circumstances cause a limited remedy agreed to by the parties to fail in its essential purpose, the limited remedy is not enforced and the general Code remedies are available to the injured party.

The *Star-Shadow Productions* case involves the enforcement of a limitation of liability clause.

Star-Shadow Productions, Inc. v. Super 8 Sync Sound System 38 UCC Rep. 2d 1128 (R.I. Sup.Ct. 1999)

Star-Shadow Productions, Inc., and Bruce J. Haas produce and film low-budget movies. One of their projects, The Night of the Beast, was scheduled for filming from March 12 through 18, 1994, at the General Stanton Inn in Charlestown, Rhode Island. In preparation for the filming, Star-Shadow rented a Beaulieu 7008 Pro 8-millimeter camera and bought 108 rolls of Super 8 Sound high-resolution color negative film from Super 8 Sync Sound System. Unfortunately, on the first day of filming, Star-Shadow's cameraman was unable to use the Super 8 film because of loading and jamming problems. A representative of Super 8, Lisa Mattei, offered advice by phone and subsequently traveled to Charlestown with a replacement camera and Kodak Reverse film. When her troubleshooting efforts proved fruitless, she replaced the Super 8 film with Kodak Reverse film and the camera operated successfully. On March 22, 1994, Star-Shadow returned the camera and Star-Shadow's account was credited for the unused film.

Star-Shadow subsequently sued Super 8 for damages allegedly caused by the Super 8 film's inability to operate correctly. Super 8 filed a motion for summary judgment arguing that it had complied with all the terms of the contract by replacing the defective film and crediting Star-Shadow's account for the unused film. Super 8 pointed to the limitation of liability clause contained on price sheets and film boxes provided to Star-Shadow to show that Super 8 could not be subject to any additional liabilities. The limitation of liability clause's pertinent part reads: "Limitation of Liability: This product will be repaired if defective in manufacture or packing. Except for such replacement this product is sold without warranty or liability even though defect, damage, or loss is caused by negligence or other fault. . . ."

The trial court granted the motion for summary judgment. The judge found that the limitation of liability clause contained on the Super 8 film package was valid; therefore, Super 8 could not be held liable for damages beyond the value of replacement film. Star-Shadow appealed.

Per Curiam

Star-Shadow maintains that the limitation of liability clause failed its essential purpose—to adequately protect the filmmakers from damages arising from defective film. They point to the fact that the limitation of liability clause leaves them without recourse against Super 8 for the thousands of dollars of

damages caused by the defective film. We have held in an analogous situation that the purchase price of goods is "not a premium for . . . insurance," and consequently, limitation of liability clauses are not unconscionable merely because buyers are not fully protected for damages that may arise from the malfunction of their purchased goods or service. In the case of

defective film, the commercial film maker is not abandoned without protection [by limitation of liability clauses] but is free to purchase raw stock insurance.

The fact that Star-Shadow in this case has no protection other than their bargained-for remedy of replacement film does not make the limitation of liability clause unconscionable. “In an industry where the undertaking may vary from a multi-million dollar extravaganza to a low-budget instructional

film,” plaintiffs were in the better position to assess their risks and “mold the protection to the scope of [the] project” than defendant who was unaware of the breadth of plaintiffs’ undertaking. Thus, Star-Shadow received what it bargained for, and the risk of equipment failure properly lay on them, not Super 8.

Judgment for Super 8 affirmed.

Statute of Limitations The Code provides that a lawsuit for breach of a sales contract must be filed within four years after the breach occurs. The parties to a contract may shorten this period to one year, but they may not extend it for longer than four years [2–725]. Normally, a breach of warranty is considered to have occurred when the goods are delivered to the buyer. However, if the warranty covers future performance of goods (for example, a warranty on a tire for four years or 40,000 miles), then the breach occurs at the time the buyer should have discovered the defect in the product. If, for example, the buyer of the tire discovers the defect after driving 25,000 miles on the tire over a three-year period, he would have four years from that time to bring any lawsuit to remedy the breach.

Seller’s Remedies

Remedies Available to an Injured Seller A buyer may breach a contract in a number of ways. The most common are (1) by wrongfully refusing to accept goods, (2) by wrongfully returning goods, (3) by failing to pay for goods when payment is due, and (4) by indicating an unwillingness to go ahead with the contract. When a buyer breaches a contract, the seller has a number of remedies under the Code, including the right to:

- Cancel the contract [2–703(f)].
- Withhold delivery of undelivered goods [2–703(a)].
- Complete manufacture of unfinished goods and identify them as to the contract or cease manufacture and sell for scraps [2–704].
- Resell the goods covered by the contract and recover damages from the buyer [2–706].
- Recover from the buyer the profit that the seller would have made on the sale or the damages that the seller sustained [2–708].
- Recover the purchase price of goods delivered to or accepted by the buyer [2–709].

In addition, a buyer may become insolvent and thus unable to pay the seller for goods already delivered or for goods that the seller is obligated to deliver. When a seller learns of a buyer’s insolvency, the seller has a number of remedies, including the right to:

- Withhold delivery of undelivered goods [2–703(a)].
- Recover goods from a buyer upon the buyer’s insolvency [2–702].
- Stop delivery of goods that are in the possession of a carrier or other bailee before they reach the buyer [2–705].

Cancellation and Withholding of Delivery When a buyer breaches a contract, the seller has the right to cancel the contract and to hold up her own performance of the contract. The seller may then set aside any goods that were intended to fill her obligations under the contract [2–704].

If the seller is in the process of manufacturing the goods, she has two choices. She may complete manufacture of the goods, or she may stop manufacturing and sell the uncompleted goods for their scrap or salvage value. In choosing between these alternatives, the seller should select the alternative that will minimize the loss [2–704(2)]. Thus, a seller would be justified in completing the manufacture of goods that could be resold readily at the contract price. However, a seller would not be justified in completing specially manufactured goods that could not be sold to anyone other than the buyer who ordered them. The purpose of this rule is to permit the seller to follow a reasonable course of action to mitigate (minimize) the damages.

The hypothetical case at the beginning of the chapter posits a customer who contracts with the Bridal Shop for the creation of a custom-designed bridal gown in size 6 and then seeks to cancel the order before the Bridal Shop has completed it. What options are open to the Bridal Shop? Can it complete the dress and recover the full

contract price from the customer, or should it stop work on it? What facts would be important to your decision? As you reflect on these questions, you might consider the facts set out in problem case number 3 at the end of this chapter where a manufacturer of pool tables stopped work on some customized pool tables. What considerations does it suggest that the Bridal Shop might be advised to take into account in deciding whether or not to continue work on the bridal gown?

Resale of Goods If the seller sets aside goods intended for the contract or completes the manufacture of such goods, he is not obligated to try to resell the goods to someone else. However, he may resell them and recover damages. The seller must make any resale in good faith and in a commercially reasonable manner. If the seller does so, he is entitled to recover from the buyer as damages the difference between the resale price and the price the buyer agreed to pay in the contract [2-706].

If the seller resells, he may also recover incidental damages, but the seller must give the buyer credit for any expenses that the seller saved because of the buyer's breach of contract. Incidental damages include storage charges and sales commissions paid when the goods were resold [2-710]. Expenses saved might be the cost of packaging the goods and/or shipping them to the buyer.

If the buyer and seller have agreed as to the manner in which the resale is to be made, the courts will enforce the agreement unless it is found to be unconscionable [2-302]. If the parties have not entered into an agreement as to the resale of the goods, they may be resold at public or private sale, but in all events the resale must be made in good faith and in a commercially reasonable manner. The seller should make it clear that the goods he is selling are those related to the broken contract.

If the goods are resold at private sale, the seller must give the buyer reasonable notification of his intention to resell [2-706(3)]. If the resale is a public sale, such as an auction, the seller must give the buyer notice of the time and place of the sale unless the goods are perishable or threaten to decline in value rapidly. The sale must be made at a usual place or market for public sales if one is reasonably available; and if the goods are not within the view of those attending the sale, the notification of the sale must state the place where the goods are located and provide for reasonable inspection by prospective bidders. The seller may bid at a public sale [2-706(4)].

The purchaser at a public sale who buys in good faith takes free from any rights of the original buyer even

though the seller has failed to conduct the sale in compliance with the rules set out in the Code [2-706(5)]. The seller is not accountable to the buyer for any profit that the seller makes on a resale [2-706(6)].

Recovery of the Purchase Price In the normal performance of a contract, the seller delivers conforming goods (goods that meet the contract specifications) to the buyer. The buyer accepts the goods and pays for them. The seller is entitled to the purchase price of all goods accepted by the buyer. She also is entitled to the purchase price of all goods that conformed to the contract and were lost or damaged after the buyer assumed the risk for their loss [2-709].

For example, a contract calls for Frank, a farmer, to ship 1,000 dozen eggs to Sutton, a grocer, with shipment "FOB Frank's Farm." If the eggs are lost or damaged while on their way to Sutton, she is responsible for paying Frank for them. Risk of loss is discussed in Chapter 19, Formation and Terms of Sales Contracts.

In one other situation, the seller may recover the purchase or contract price from the buyer. This is where the seller has made an honest effort to resell the goods and was unsuccessful or where it is apparent that any such effort to resell would be unsuccessful. This might happen where the seller manufactured goods especially for the buyer and the goods are not usable by anyone else. Assume that Sarton's Supermarket sponsors a bowling team. Sarton's orders six green-and-red bowling shirts to be embroidered with "Sarton's Supermarket" on the back and the names of the team members on the pocket. After the shirts are completed, Sarton's wrongfully refuses to accept them. The seller will be able to recover the agreed purchase price if it cannot sell the shirts to someone else.

If the seller sues the buyer for the contract price of the goods, she must hold the goods for the buyer. Then, the seller must turn the goods over to the buyer if the buyer pays for them. However, if resale becomes possible before the buyer pays for the goods, the seller may resell them. Then, the seller must give the buyer credit for the proceeds of the resale [2-709(2)].

Damages for Rejection or Repudiation When the buyer refuses to accept goods that conform to the contract or repudiates the contract, the seller does not have to resell the goods. The seller has two other ways of determining the damages that the buyer is liable for because of the breach of contract: (1) the difference between the contract price and the market price at which the goods are currently selling and (2) the "profit" that

The Global Business Environment

Seller's Remedies in International Transactions

Under the Convention on Contracts for the International Sale of Goods (CISG), an aggrieved seller has five potential remedies when the buyer breaches the contract: (1) suspension of the seller's performance; (2) "avoidance" of the contract; (3) reclamation of the goods in the buyer's possession; (4) an action for the price; and (5) an action for damages. The last two remedies can be pursued only in a judicial proceeding.

As noted in Chapter 21 (see The Global Business Environment box entitled "Insecurity" on page 562), the seller may "suspend its performance" when it is apparent the other party to the contract will not be performing its obligations, for example, if the buyer was insolvent and unable to pay for any goods delivered to it.

Avoidance of a contract—which under the CISG essentially means canceling the contract—is a remedy most commonly utilized by buyers because the initial performance

called for in contracts typically rests with the seller—for example, to deliver specified goods. When a seller has not been paid for goods, it may "avoid" the contract and seek their return from the buyer. If the buyer has possession of the goods when the contract is avoided, he must take reasonable steps to preserve them. Where the goods are perishable, the buyer might try to sell them for the seller's account but is not required to follow a seller's instructions to resell.

Where the seller has performed its obligations, the seller has the right to require the buyer to pay the contract price unless the seller has pursued an inconsistent remedy—such as reclaiming the goods. An aggrieved seller may also pursue an action for damages based on either (1) the difference between the contract price and the resale price (where the seller resold the goods) or (2) the difference between the contract price and the market price at the time the contract was avoided. The CISG also permits a measure of damages based on lost profits. Thus, in a number of respects, the UCC and CISG offer similar remedies to sellers.

the seller lost when the buyer did not go through with the contract [2–708].

The seller may recover as damages the difference between the contract price and the market price at the time and place the goods were to be delivered to the buyer. The seller also may recover any incidental damages, but must give the buyer credit for any expenses that the seller has saved [2–708(1)]. This measure of damages most commonly is sought by a seller when the market price of the goods dropped substantially between the time the contract was made and the time the buyer repudiated the contract.

For example, on October 1, Wan Ho Manufacturing contracts with Sports Properties, Inc., to sell the company 100,000 New England Patriot bobble heads at \$6.50 each with delivery to be made in Boston on December 1. By December 1, the market for New England Patriot bobble heads has softened considerably because a competitor flooded the market with them first and the bobble heads are selling for \$3 each in Boston. If Sports Properties repudiates the contract on December 1 and refuses to accept delivery of the 100,000 bobble heads, Wan Ho is entitled to the difference between the contract price of \$6.50 and the December 1 market price in Boston of \$300,000. Thus, Wan Ho could recover \$350,000 in damages plus any incidental expenses, but

less any expenses saved by it not having to ship the bobble heads to Sports Properties (such as packaging and transportation costs).

If getting the difference between the contract price and the market price would not put the seller in as good a financial position as the seller would have been in if the contract had been performed, the seller may choose an alternative measure of damages based on the lost profit and overhead that the seller would have made if the sale had gone through. The seller can recover this lost profit and overhead plus any incidental expenses. However, the seller must give the buyer credit for any expenses saved as a result of the buyer's breach of contract [2–708(2)].

Using the bobble head example, assume that the direct labor and material costs to Wan Ho Manufacturing of making the bobble heads was \$2.75 each. Wan Ho could recover as damages from Sports Properties the profit Wan Ho lost when Sports Properties defaulted on the contract. Wan Ho would be entitled to the difference between the contract price of \$650,000 and its direct cost of \$275,000. Thus, Wan Ho could recover \$375,000 plus any incidental expenses and less any expenses saved, such as the shipping costs to Boston.

This measure of damages is illustrated in the case that follows below, *Jewish Federation of Greater Des Moines v. Cedar Forrest Products Co.*

Jewish Federation of Greater Des Moines v. Cedar Forrest Products Co. 52 UCC Rep.2d 422 (Iowa Ct. App. 2003)

Cedar Forrest Products Company (CFP) manufactures precut building packages for shelters, pavilions, gazebos, and other structures typically utilized in park, camp, and recreational facilities. The Jewish Federation of Greater Des Moines (Jewish Federation) contracted with CFP for the manufacture of a 3,500 square foot building with unique and customized features. With the signing of the Purchase and Sales Agreement, Jewish Federation sent CFP a deposit of \$53,605; shortly thereafter it prematurely sent the remaining balance of \$160,813 for a total contract price of \$214,418. After a series of redesign discussions and change orders, Jewish Federation informed CFP it was rescinding the contract and requesting return of all monies paid. CFP returned \$160,530.54, but retained \$53,887.46 as lost profits it would have made had Jewish Federation not breached the contract.

In anticipation of the building project, CFP purchased cedar paneling, insulation, floor plywood, and cedar timber. It had not begun to assemble the building when Jewish Federation breached the contract. After the breach, CFP was able to sell the purchased items to other customers for the same price as called for in the Jewish Federation contract.

Jewish Federation filed an action for the return of the remaining \$53,887.46, claiming there had been no meeting of the minds and the agreement was merely a quote based on a preliminary schematic drawing; CFP counterclaimed for breach of contract. The trial court found the agreement was a completely integrated contract which Jewish Federation had breached and determined that CFP was only entitled to retain \$13,470.13 for "incidental damages." CFP appealed.

Vogel, Presiding Judge

The primary issue on appeal is the proper measure of damages for a lost volume seller under these particular circumstances. The Illinois Uniform Commercial Code, like the Uniform Commercial Code (UCC), provides for liberal administration such that "the aggrieved party may be put in as good a position as if the other party had fully performed . . ." According to the Illinois Code,

[T]he measure of damages for non-acceptance or repudiation by the buyer is the difference between the market price at the time and place for tender and the unpaid contract price together with any incidental damages provided in this Article (Section 2-710), but less expenses saved in consequence of the buyer's breach.

Section 2-708(1). However, if this amount is

inadequate to put the seller in as good a position as performance would have done then the measure of damages is the profit (including reasonable overhead) which the seller would have made from full performance by the buyer, together with any incidental damages provided in this Article (Section 2-710), due allowance for costs reasonably incurred and due credit for payments or proceeds of resale.

Section 2-708(2).

To resolve this issue, we look to case law construing the Illinois statute or similar statutory law in other jurisdictions. In *R. E. Davis Chem. Corp. v. Diasonics, Inc.* (N.D. Ill. 1987), the court used lost profits as the measure of damages pursuant

to section 2-708(2) after the buyer repudiated. For the seller to recover lost profits, the court reasoned that the seller must establish that (1) it had the capacity to make the sale to the buyer as well as the sale to the resale buyer and (2) it would have been profitable for it to make both sales. Applying this test to the present case, the record reflects CFP was capable of manufacturing the building for Jewish Federation as well as its numerous other customers and it would have been profitable to do so.

Jewish Federation argues that CFP had not begun to assemble the purchased items into the contracted for building at the time of breach, therefore incidental damages were sufficient. However, this position is not supported by case law. Lost profits may be awarded for items *yet to be manufactured*. [Citations omitted.]

The rationale for these holdings appears to be that a lost volume seller can handle a certain number of sales during the year and when one negotiated sale is lost, the seller simply cannot recoup that anticipated profit. Instead, the seller is one sale short of normal capacity. So to put the seller in the position he would have been but for the breach, the Illinois statute provides the seller a remedy which includes the anticipated profit as well as incidental expenses and costs incurred. As a lost volume seller, CFP is entitled to its lost profits of \$53,887.46 pursuant to Section 2-708(2) which includes the incidental damages of \$13,470.17 awarded by the district court.

Judgment reversed in favor of CFP.

Seller's Remedies Where Buyer Is Insolvent

If the seller has not agreed to extend credit to the buyer for the purchase price of goods, the buyer must make payment on delivery of the goods. If the seller tenders delivery of the goods, he may withhold delivery unless the agreed payment is made. Where the seller has agreed to extend credit to the buyer for the purchase price of the goods, but discovers before delivery that the buyer is insolvent, the seller may refuse delivery unless the buyer pays cash for the goods together with the unpaid balance for all goods previously delivered under the contract [2-702(1)].

At common law, a seller had the right to rescind a sales contract induced by fraud and to recover the goods unless they had been resold to a bona fide purchaser for value. Based on this general legal principle, the Code provides that where the seller discovers that the buyer has received goods while insolvent, the seller may reclaim the goods upon demand made within 10 days after their receipt. This right granted to the seller is based on constructive deceit on the part of the buyer. Receiving goods while insolvent is equivalent to a false representation of solvency. To protect his rights, all the seller must do is to make a demand within the 10-day period; he need not actually repossess the goods.

If the buyer has misrepresented his solvency to this particular seller in writing within three months before the

delivery of the goods, the 10-day limitation on the seller's right to reclaim the goods does not apply. However, the seller's right to reclaim the goods is subject to the rights of prior purchasers in the ordinary course of the buyer's business, good faith purchasers for value, creditors with a perfected lien on the buyer's inventory [2-702(2) and (3)], and of a trustee in bankruptcy. The relative rights of creditors to their debtor's collateral are discussed in Chapter 29, Security Interests in Personal Property.

Seller's Right to Stop Delivery

If the seller discovers that the buyer is insolvent, he has the right to stop the delivery of any goods that he has shipped to the buyer, regardless of the size of the shipment. If a buyer repudiates a sales contract or fails to make a payment due before delivery, the seller has the right to stop delivery of any large shipment of goods, such as a carload, a truckload, or a planeload [2-705].

To stop delivery, the seller must notify the carrier or other bailee in time for the bailee to prevent delivery of the goods. After receiving notice to stop delivery, the carrier or other bailee owes a duty to hold the goods and deliver them as directed by the seller. The seller is liable to the carrier or other bailee for expenses incurred or damages resulting from compliance with his order to stop delivery. If a nonnegotiable document of title has been

CONCEPT REVIEW

| Problem | Seller's Remedy |
|---|--|
| Buyer Refuses to Go Ahead with Contract and Seller Has Goods | <ol style="list-style-type: none"> Seller may cancel contract, suspend performance, and set aside goods intended to fill the contract. <ol style="list-style-type: none"> If seller is in the process of manufacturing, he may complete manufacture or stop and sell for scrap, picking alternative that in his judgment at the time will minimize the seller's loss. Seller can resell goods covered by contract and recover difference between contract price and proceeds of resale. Seller may recover purchase price where resale is not possible. Seller may recover damages for breach based on difference between contract price and market price, or in some cases based on lost profits. |
| Goods Are in Buyer's Possession | <ol style="list-style-type: none"> Seller may recover purchase price. Seller may reclaim goods in possession of insolvent buyer by making a demand within 10 days after their receipt. | Goods Are in Transit | <ol style="list-style-type: none"> Seller may stop any size shipment if buyer is insolvent. Seller may stop carload, truckload, planeload, or other large shipment for reasons other than buyer's insolvency. |

issued for the goods, the carrier or other bailee does not have a duty to obey a stop-delivery order issued by any person other than the person who consigned the goods to him [2-705(3)].

Liquidated Damages If the seller has justifiably withheld delivery of the goods because of the buyer's breach, the buyer may recover any money or goods he has delivered to the seller over and above the agreed amount of liquidated damages. If there is no such agreement, the seller may not retain an amount in excess of \$500 or 20 percent of the value of the total performance for which the buyer is obligated under the contract, whichever is smaller. This right of restitution is subject to the seller's right to recover damages under other provisions of the Code and to recover the amount of value of benefits received by the buyer directly or indirectly by reason of the contract [2-718].

Buyer's Remedies

Buyer's Remedies in General A seller may breach a contract in a number of ways. The most common are (1) failing to make an agreed delivery,

(2) delivering goods that do not conform to the contract, and (3) indicating that he does not intend to fulfill the obligations under the contract.

A buyer whose seller breaks the contract is given a number of alternative remedies. These include:

- Buying other goods (covering) and recovering damages from the seller based on any additional expense that the buyer incurs in obtaining the goods [2-712].
- Recovering damages based on the difference between the contract price and the current market price of the goods [2-713].
- Recovering damages for any nonconforming goods accepted by the buyer based on the difference in value between what the buyer got and what he should have gotten [2-714].
- Obtaining specific performance of the contract where the goods are unique and cannot be obtained elsewhere [2-716].

In addition, the buyer can in some cases recover consequential damages (such as lost profits) and incidental damages (such as expenses incurred in buying substitute goods).

CYBERLAW IN ACTION

E-Commerce Aids Buyers

Electronic commerce helps solve two of the most important concerns for buyers of goods in enforcing their rights under Article 2. The first of these relates to means by which the buyer may learn—from the seller or otherwise—of a recall that affects the goods purchased. For example, sellers could notify merchant buyers that it is notifying consumer buyers that they will need to take their cars in to a dealership to have a seatbelt replaced. This early e-mail or posting on the seller's Web site can alert the merchant buyer to the need to train personnel how to handle recall questions from the buyers and also how to make the needed replacement. Buyers also may be able to determine in advance of their purchases whether the goods they plan to buy have been the subject of a recall and whether the recall was voluntary (a problem found by the seller) or required by the federal government, for example. Information about earlier recalls may be especially helpful to buyers of used goods, such as cars and trucks, to baby items, and anything where personal safety is critically important.

The second involves the buyer's duty to give the seller "notice" if the buyer needs a remedy from the seller. As noted in Chapter 21, Sections 2-602 and 2-607 require that the buyer notify the seller if the buyer wishes to reject goods the seller has tendered, or if the buyer decides to revoke acceptance of goods that the seller has promised to repair or replace and has neither repaired nor replaced the goods as promised—or where the buyer gets goods that have a latent defect. "Notice" does not have to be in writing to be effective, but it usually is preferable to have a record that the buyer gave notice to the seller and the time of the notice given. This reduces the risk that a court will find that the buyer's failure to give notice deprives the buyer of her right to a remedy (see Section 2-607(3)(a)). Electronic commerce tools, including e-mail, allow buyers to provide speedy and reliable information to sellers in cases such as these. Buyers whose e-mail systems provide confirmation that the seller recipient actually has received the message about the buyer's concerns about the goods, or who show the time and date that the intended recipient opened the e-mail, make providing notice easier and easier to document than using traditional methods of communication.

Buyer's Right to Cover If the seller fails or refuses to deliver the goods called for in the contract, the buyer can purchase substitute goods; this is known as **cover**. If the buyer does purchase substitute goods, the buyer can recover as damages from the seller the difference between the contract price and the cost of the substitute goods [2-712]. For example, Frank Farmer agrees to sell Ann's Cider Mill 1,000 bushels of apples at \$10 a bushel. Farmer then refuses to deliver the apples. Cider Mill can purchase 1,000 bushels of similar apples, and if it has to pay \$15 a bushel, it can recover the difference (\$5 a bushel) between what it paid (\$15

and the contract price (\$10). Thus, Cider Mill could recover \$5,000 from Farmer.

The buyer can also recover any incidental damages sustained, but must give the seller credit for any expenses saved. In addition, he may be able to obtain consequential damages. The buyer is not required to cover, however. If he does not cover, the other remedies under the Code are still available [2-712].

The case that follows, *KGM Harvesting Co.*, illustrates a situation where the aggrieved buyer chose to seek damages based on its cost of cover from the defaulting seller.

KGM Harvesting Co. v. Fresh Network

26 UCC Rep.2d 1028 (Cal. App. 1995)

KGM Harvesting Company, a California lettuce grower and distributor, and Fresh Network, an Ohio lettuce broker, began dealing with each other in 1989, and over the years the terms of the agreement were modified. As of May 1991, their agreement called for KGM to deliver 14 "loads" of lettuce a week at a price of 9 cents a pound. A load of lettuce consists of 40 bins, each of which weighs 1,000 to 1,200 pounds. At an average bin weight of 1,100 pounds, one load would equal 44,000 pounds, and the 14 loads called for in the contract would weigh 616,000 pounds. At 9 cents per pound, the cost would be approximately \$55,440 per week.

Fresh Network, in turn, resold all of the lettuce to another broker (Castellani Company) who sold it to Club Chef, a company that chopped and shredded it for the fast food industry (specifically, Burger King, Taco Bell, and Pizza Hut). The transactions between Fresh Network and Castellani, and in turn between Castellani and Club Chef, were on a cost-plus basis. This meant each paid its buyer its actual cost plus a small commission.

In May and June 1991, when the price of lettuce went up dramatically, KGM refused to supply Fresh Network with lettuce at the contract price of 9 cents per pound. Instead, it sold the lettuce to others at a profit between \$800,000 and \$1,100,000.

Fresh Network then went out on the open market and purchased lettuce to satisfy its obligations to Castellani Company. Castellani covered all of Fresh Network's extra expense except for \$70,000. Fresh Network then sought to recover from KGM as damages the difference between what it was forced to spend to buy replacement lettuce and the contract price of 9 cents a pound (approximately \$700,000). KGM objected on the grounds that Fresh Network had been able to pass some of the increased cost along to Castellani.

Cottle, Presiding Judge

Section 2-711 of the California Uniform Commercial Code provides a buyer with several alternative remedies for a seller's breach of contract. The buyer can "'cover' by making in good faith and without unreasonable delay any reasonable purchase of . . . goods in substitution for those due from the seller." Section 2-712(1). In that case, the buyer "may recover from the seller as damages the difference between the cost of cover and the contract price." Section 2-712(2). If the buyer is unable to cover or chooses not to cover, the measure of damages is the difference between the market price and the contract price. Section 2-713.

In the instant case, buyer "covered" in order to fulfill its own contractual obligations to the Castellani Company. Accordingly, it was awarded the damages called for in cover cases—the difference between the contract price and the cover price.

In appeals from judgments rendered pursuant to section 2-712, the dispute typically centers on whether the buyer

acted in "good faith," whether the "goods in substitution" differed substantially from the contracted for goods, whether the buyer unreasonably delayed in purchasing substitute goods in the mistaken belief the price would go down, or whether the buyer paid too much for the substitute goods.

In this case, however, none of these typical issues is in dispute. Seller does *not* contend that buyer paid too much for the substitute lettuce or that buyer was guilty of "unreasonable delay" or lack of "good faith" in its attempt to obtain substitute lettuce. Nor does seller contend that the lettuce purchased was of a higher quality or grade and therefore not a reasonable substitute.

Instead, seller takes issue with section 2-712 itself, contending that despite the unequivocal language of section 2-712, a buyer who covers should not *necessarily* recover the difference between the cover price and the contract price. Seller points out that because of buyer's "cost plus" contract with Castellani Company, buyer was eventually able to pass on the

extra expenses (except for \$70,000) occasioned by seller's breach and buyer's consequent purchase of substitute lettuce on the open market. It urges this court under these circumstances not to allow buyer to obtain a "windfall."

The basic premise of contract law is to effectuate the expectations of the parties to the agreement, to give them the "benefit of the bargain" they struck when they entered into the agreement. In this case, the damage formula of section 2-712 put buyer in the identical position performance would have: it gave buyer the contracted for 14 loads of lettuce with which to carry on its business at the contracted for price of 9 cents per pound.

Despite the obvious applicability and appropriateness of section 2-712, seller argues in this appeal that the contract-cover differential of section 2-712 is inappropriate in cases, as here, where the aggrieved buyer is ultimately able to pass on its additional costs to other parties. Seller contends that section

1-106's remedial injunction to put the aggrieved party "in as good a position as if the other party had fully performed" demands that all subsequent events impacting on *buyer's* ultimate profit or loss be taken into consideration (specifically, that buyer passed on all but \$70,000 of its loss to Castellani Company, which passed on all of its loss to Club Chef, which passed on most of its loss to its fast food customers).

No section 2-712 case has ever held that cover damages must be limited by section 1-106. The obvious reason is that the cover-contract differential puts a buyer who covers in the exact same position as performance would have done. This is precisely what is called for in section 1-106. In this respect, the cover/contract differential of section 2-712 is very different than the market/contract differential of section 2-713, which need bear no close relation to the buyer's actual loss.

Judgment affirmed for Fresh Network.

Incidental Damages Incidental damages include expenses that the buyer incurs in receiving, inspecting, transporting, and storing goods shipped by the seller that do not conform to those called for in the contract. Incidental damages also include any reasonable expenses or charges that the buyer has to pay in obtaining substitute goods [2-715(1)].

Consequential Damages In certain situations, an injured buyer is able to recover consequential damages, such as the buyer's lost profits caused by the seller's breach of contract. The buyer must be able to show that the seller knew or should have known at the time the contract was made that the buyer would suffer special damages if the seller did not perform his obligations. In case of commercial loss, the buyer must also show that he could not have prevented the damage by obtaining substitute goods [2-715(2)(a)].

Suppose Knitting Mill promises to deliver 15,000 yards of a special fabric to Dorsey by September 1. Knitting Mill knows that Dorsey wants to acquire the material to make garments suitable for the Christmas season. Knitting Mill also knows that in reliance on the contract with it, Dorsey will enter into contracts with stores to deliver the finished garments by October 1. If Knitting Mill fails to deliver the fabric or delivers the fabric after September 1, it may be liable to Dorsey for any consequential damages that she sustains if she is unable to acquire the same material elsewhere in time to fulfill her October 1 contracts.

Consequential damages can also include an injury to a person or property caused by a breach of warranty

[2-715(2)(b)]. For example, an electric saw is defective. Hanson purchases the saw, and while he is using it, the blade comes off and severely cuts his arm. The injury to Hanson is consequential damage resulting from a non-conforming or defective product.

In the hypothetical case presented at the beginning of this chapter, a customer contracts with Bridal Shop to make a custom-designed bridal gown in size 6 in time for her wedding. The case posits the Bridal Shop advising the customer that it will not be able to complete the production of the gown in time for the wedding. If the customer "covers" by buying a gown from another wedding shop, what is the measure of damages that the customer would be entitled to? Can you think of "incidental damages" or "consequential damages" that might be incurred in this situation and that might be claimed?

Damages for Nondelivery If the seller fails or refuses to deliver the goods called for by the contract, the buyer has the option of recovering damages for the nondelivery. Thus, instead of covering, the buyer can get the difference between the contract price of the goods and their market price at the time he learns of the seller's breach. In addition, the buyer may recover any incidental damages and consequential damages, but must give the seller credit for any expenses saved [2-713].

Suppose Biddle agreed on June 1 to sell and deliver 1,500 bushels of wheat to a grain elevator on September 1 for \$7 per bushel and then refused to deliver on September 1 because the market price was then \$10 per bushel. The grain elevator could recover \$4,500 damages

from Biddle, plus incidental damages that could not have been prevented by cover.

The case that follows, *Green Wood Industrial Company v. Forceman International Development Group, Inc.*,

involves an award of damages in connection with a contract to sell scrap metal to a buyer in China where the goods were never shipped even though the seller fraudulently represented they had been shipped.

Green Wood Industrial Company v. Forceman International Development Group, Inc. 64 UCC Rep.2d 378 (Ct. App. Cal. 2007)

Green Wood, a sole proprietorship owned and operated by Joseph Li in Hong Kong, is primarily in the business of buying scrap from sellers in the United States for resale to buyers in China. Richshine Metals, Inc. (Richshine), owned and operated by its president, Christine Fan, was in the business in California of selling scrap metal for export. In the summer of 2003, Green Wood purchased approximately 680 metric tons of scrap plate metal from Richshine. Green Wood sold the scrap plate to a buyer in China. Green Wood's buyer was very pleased with the material supplied by Richshine and wanted more.

In November 2003, Green Wood placed a purchase order with Richshine to acquire 2,100 metric tons of scrap plate metal and 10,650 metric tons of scrap iron for a total purchase price of \$1.89 million. Richshine was to deliver the goods directly to Green Wood's buyer at Guangxi Port in southern China by the end of November. Green Wood was to pay a \$200,000 deposit, \$340,000 cash on delivery, and the balance by letter of credit.

By the beginning of January 2004, Richshine had not shipped the goods. During this time frame the price of scrap metal was rising in the world market. Li and Green Wood's buyer were concerned that Richline might have sold the goods to another buyer at a higher price. They agreed to make some changes in the shipping terms and to wire additional money to Richshine's account. Green Wood ultimately paid Richshine \$1,074,548 in advance toward the purchase price of the goods. Green Wood's Chinese buyer funded \$862,500 of that amount.

Thereafter, Richshine provided packing lists, invoices, and bills of lading as well as certain certificates required by the Chinese government that the goods had been inspected (China Certification and Inspection Corporation or "CCIC" certificates). The certificates had been obtained by Forceman International Development Group, Inc. (Forceman), and purported to represent they had been issued by CCIC South America and indicated that the containers with the scrap had been inspected in Tijuana, Mexico. The goods allegedly were awaiting shipment to China.

Unbeknownst to Li, the packing lists provided by Richshine with respect to the purchase order were fake, the CN Link bills of lading were forgeries, and the CCIC certificates were obtained fraudulently. The goods that Richshine had purported to ship pursuant to the purchase order never existed.

When the goods did not arrive, Li mounted an investigation to track down Fan and her confederates. They were eventually found in Nevada where they had moved and were doing business under the name of Moundhouse Metals. When Li confronted Fan, telling her that if the goods did not arrive soon, Li would sue Fan, she, in essence, dared Li to do so.

When further investigation made it clear the goods had never existed, Li brought suit against Richline, Fan, and Forceman for fraud and negligence. Li sought to recover, as out-of-pocket damages, \$1,074,548 paid to Richline and Fan; \$159,000 in lost profits that Green Wood lost as a result of the nondelivery of the goods; and \$274,868 for a claim Green Wood's buyer had made against Green Wood, apparently for its lost profits, which Green Wood had agreed to pay but had not yet paid. A jury awarded Green Wood compensatory damages of \$1,508,416 plus punitive damages of \$5,000, and the defendants appealed.

Mosk, Judge

The fraud in this case related to the purchase order. The purchase order was a contract for the sale of goods subject to Article 2 of the Uniform Commercial Code. Accordingly, the damages available to Green Wood from the fraud are governed by UCC section 2-721, which provides for recovery on a basis-of-the-bargain basis. That section provides: "Remedies for material misrepresentation or fraud include

all remedies available under this section for nonfraudulent breach. Neither rescission or a claim for rescission of the contract for sale nor rejection or return of the goods shall bar or be deemed inconsistent with a claim for damage or other remedy." Section 2-721 represents an exception to the general rule in California that a plaintiff defrauded in the purchase or sale of property may recover only out-of-pocket loss.

Where, as here, a seller fails to deliver goods pursuant to a contract governed by the UCC and the buyer does not cover, the buyer's remedy is set forth in section 2-713(1). That section provides, in pertinent part, "the measure of damages for non-delivery or repudiation by the seller is the difference between the market price at the time when the buyer learned of the breach and the contract price *together with any incidental and consequential damages provided in this division (2-715), but less expenses saved in consequence of the seller's breach*" (italics added). Green Wood did not seek damages based on the difference between contract price and market price, but rather sought its out-of-pocket damages and consequential damages based on its lost profits. Pursuant to section 2-715(2)(a), a buyer of goods for resale may generally recover its lost profits as consequential damages, provided such damage "could not reasonably be prevented by cover or otherwise. . . ."

In this case, none of the defendants offered evidence that Green Wood had failed to mitigate its consequential damages. Green Wood, however, introduced substantial evidence to sustain an award of lost profits. Green Wood presented evidence of its purchase price from Richshine, which included the cost of shipping the goods to China. Li of Green Wood testified that Green Wood sold the plate scrap to its buyer for \$25 per ton more than Green Wood paid, and sold the scrap iron at \$10 per ton more than Green Wood paid. Forceman had a full and fair opportunity to test Green Wood's damage calculation through cross-examination or rebuttal. On appeal, Forceman does not identify any specific manner in which Li's calculation was erroneous, and Forceman provides no argument or authority that the amount of lost profits awarded was excessive. Accordingly, substantial evidence supports the \$159,000 award for Green Wood's lost profits.

Forceman asserts that the trial court erred in awarding Green Wood \$274,868 for a claim made against Green Wood by its Chinese buyer, or an obligation of Green Wood to that buyer, for damages suffered by that buyer resulting from Green Wood's failure to deliver the goods. We agree that as to this item, the damage award was improper. A plaintiff may not recover damages for unpaid liabilities to a third party, unless the plaintiff proves to a reasonable certainty that the liability could and would be enforced by the third party against the plaintiff or that the plaintiff otherwise could and would satisfy the obligation.

Under California law, a plaintiff—whether the plaintiff's claim sounds in contract or tort—generally cannot recover damages alleged to arise from a third-party claim against the plaintiff when caused by the defendant's misconduct. It is clear that the mere possibility, or even probability, that an event causing damage will result from a wrongful act, does not render the act actionable. Accordingly, the existence of a mere liability is not the equivalent of actual damage. This is because the *fact* of

damage is inherently uncertain in such circumstances. The facts that a third party has demanded payment by the plaintiff of a particular liability and plaintiff has admitted such liability are not, by themselves, sufficient to support an award of damages for that liability, because that third party may never attempt to force the plaintiff to satisfy the alleged obligation, and plaintiff may never pay the obligation.

California law does, however, recognize that a plaintiff in a tort action may recover for a "loss reasonably certain to occur in the future." A similar concept has been recognized by some authorities in the context of contract damages. For example, an authority states, "Indeed, in a resale situation, the buyer has been permitted to claim as consequential damages from the seller the amount of the buyer's potential liability to its customer; if the buyer establishes the probability that the buyer will be sued by the customer, it is immaterial that the buyer has not yet been sued and made to bear the loss, and recovery is measured by the probable liability of the buyer to the customer. Other authorities note that a plaintiff may recover for future losses if there is an appropriate showing that those losses will in fact be incurred in the future.

It may be that existing California authorities generally require payment of the liability in order to include the liability as damages. But even if a liability to a third party might be included as damages without actual payment, more certainty is required than just evidence of an obligation to pay a third party.

In this case, the evidence established that, at the time of trial, Green Wood has not paid any portion of its Chinese buyer's \$274,868 claim. Although there is evidence that Green Wood had, in effect, settled the claim by agreeing to pay it, Green Wood presented no evidence that any such agreement would be enforceable in China, or that the liability could and would be enforced by the buyer in the United States or elsewhere, or that the claim will otherwise be paid. There was no evidence from which the jury could conclude that it was reasonably certain that Green Wood would ever have to pay the money.

Furthermore, it appears that the Chinese buyer's claim against Green Wood was for the buyer's own lost profits. The only evidence regarding the Chinese buyer's business, however, was that the buyer is a manufacturer of some kind, not a reseller. Green Wood presented no evidence to establish the fact or amount of the Chinese buyer's lost profits other than the Chinese buyer's mere claim. This illustrates another problem with allowing damages based on a third-party claim. If a defendant is liable for any sum a plaintiff *agreed* to pay a third party, that sum could be subject to unfair manipulation.

Accordingly, the evidence is insufficient to sustain the award of \$274,868 for the Chinese buyer's claim.

Ethics in Action

Should the Buyer Get an Honest Answer?

Problem case number 7 at the end of this chapter is based on the following situation: Barr purchased from Crow's Nest Yacht Sales a 31-foot tiara pleasure yacht manufactured by S-2 Yachts. He had gone to Crow's Nest knowing the style and type yacht he wanted. He was told that the retail price was \$102,000 but that he could purchase the model it had for \$80,000. When he asked about the reduction in price, he was told that Crow's Nest had to move it because there was a change in the model and it had new ones coming in. He was assured that the yacht was new, that there was nothing

wrong with it, and there was only 20 hours on the engine. When Barr began to use the boat, he experienced tremendous difficulties with equipment malfunctions. On examination by an expert, it was determined that the yacht had earlier been sunk in salt water, resulting in significant rusting and deterioration in the engine, equipment, and fixtures. How would you assess the ethicality of the representations made by the salesperson in response to his question? In a case like this, should it be incumbent on the buyer to ask the "right" question in order to protect himself or herself, or should there be an ethical obligation on the seller to disclose voluntarily material facts that may be relevant to the buyer making an informed decision?

Damages for Defective Goods If a buyer accepts defective goods and wants to hold the seller liable, the buyer must give the seller notice of the defect within a reasonable time after the buyer discovers the defect [2-607(3)]. Where goods are defective or not as warranted and the buyer gives the required notice, he can recover damages. The buyer is entitled to recover the difference between the value of the goods received and

the value the goods would have had if they had been as warranted. He may also be entitled to incidental and consequential damages [2-714].

For example, Al's Auto Store sells Anders an automobile tire, warranting it to be four-ply construction. The tire goes flat when it is punctured by a nail, and Anders discovers that the tire is really only two-ply. If Anders gives the store prompt notice of the breach, she can keep

The Global Business Environment

Buyer's Remedies in International Transactions

Under the Convention on Contracts for the International Sale of Goods (CISG), an aggrieved buyer has four potential types of remedies against a seller who has breached the contract: (1) "avoidance" of the contract; (2) an adjustment in the price; (3) specific performance; and (4) an action for damages. The first two remedies can be pursued without involving a court, and the last two require the buyer to initiate a judicial proceeding.

As noted in Chapter 21 (see The Global Business Environment box entitled "Insecurity" on page 562), a buyer has the right to suspend its performance and/or to "avoid" a contract where the seller appears unable to perform its obligations and does not provide adequate assurances that it can and will perform. A buyer may also "avoid" the contract—which under the CISG essentially means "cancel" the contract—and refuse to accept and pay for goods that are so defective or nonconforming as to constitute a "fundamental breach" of the contract.

Aggrieved buyers who receive nonconforming goods "may reduce the price" paid to the seller. The CISG provides a formula for calculating the reduction that involves comparing the value of the goods actually delivered at the time they were delivered to the value that conforming goods would have had at the time of delivery.

The CISG gives the aggrieved buyer a right to "require performance" by the seller. This follows the civil law principle that the best relief to the buyer is not damages but rather having the seller perform as promised. Thus, the CISG does not require that the goods must be "unique"—as the UCC does—in order for the buyer to be entitled to specific performance.

While the buyer has the right to seek specific performance with the assistance of a court, the buyer also has the option of seeking damages, including consequential damages. Such damages can be based either on (1) the difference between the cost of cover and the contract price or (2) on the difference between the market price and the contract price. However, unlike the UCC, the CISG requires the buyer to use the "cover" formula for calculating damages if the buyer does cover by obtaining substitute goods.

the tire and recover from Al's the difference in value between a two-ply and a four-ply tire.

Buyer's Right to Specific Performance

Sometimes, the goods covered by a contract are unique and it is not possible for a buyer to obtain substitute goods. When this is the case, the buyer is entitled to specific performance of the contract.

Specific performance means that the buyer can require the seller to give the buyer the goods covered by the contract [2–716]. Thus, the buyer of an antique automobile such as a 1910 Ford might have a court order the seller to deliver the specified automobile to the buyer because it was one of a kind. On the other hand, the buyer of grain in a particular storage bin could not get specific performance if he could buy the same kind of grain elsewhere.

Buyer and Seller Agreements as to Remedies

As mentioned earlier in this chapter, the parties to a contract may provide remedies in addition to or as substitution for those expressly provided in the Code [2–719]. For example, the buyer's remedies may be limited by the contract to the return of the goods and the repayment of the price or to the replacement of nonconforming goods or parts. However, a court looks to see whether such a limitation was freely agreed to or whether it is unconscionable. In the latter case, the court does not enforce the limitation and the buyer has all the rights given to an injured buyer by the Code.

The *Baker* case, which follows below, involves a situation where a merchant was unsuccessful in seeking to restrict an aggrieved buyer's efforts to recover the purchase price paid for defective goods.

Baker v. Burlington Coat Factory Warehouse 34 UCC Rep.2d 1052 (N.Y. City Ct. 1998)

Catherine Baker purchased a fake fur coat from the Burlington Coat Factory Warehouse store in Scarsdale, New York, paying \$127.99 in cash. The coat began shedding profusely, rendering the coat unwearable. The shedding was so severe that Baker's allergies were exacerbated, necessitating a visit to her doctor and to the drugstore for a prescription.

She returned the coat to the store within two days and demanded that Burlington refund her \$127.99 cash payment. Burlington refused, indicating that it would give her a store credit or a new coat of equal value, but no cash refund. Baker searched the store for a fake fur of equal value and found none. She refused the store credit, repeated her demand for a cash refund, and brought a lawsuit against Burlington when it again refused to make a cash refund.

In its store, Burlington displayed several large signs which stated, in part,

WAREHOUSE POLICY

Merchandise, in New Condition, May be Exchanged Within 7 Days of Purchase for Store Credit and Must be Accompanied by a Ticket and Receipt. No Cash Refunds or Charge Credits.

On the front of Baker's sales receipt was the following language:

Holiday Purchases May be Exchanged Through January 11th, 1998, In House Store Credit Only No Cash Refunds or Charge Card Credits.

On the back of the sales receipt was the following language:

We will be Happy to Exchange Merchandise in New Condition Within 7 Days When Accompanied By Ticket and Receipt. However, Because of Our Unusually Low Prices: No Cash Refunds or Charge Card Credits Will Be Issued. In House Store Credit Only.

At the trial, Baker claimed that she had not read the language on the receipt and was unaware of Burlington's No Cash Refunds policy.

Dickerson, Judge

Under most circumstances retail stores in New York State are permitted to establish a no cash and no credit card charge refund

policy and enforce it. Retail Store refund policies are governed, in part, by New York General Business Law section 218–a, Disclosure of Refund Policies, which requires conspicuous

signs on the item or at the cash register or on signs visible from the cash register or at each store entrance, setting forth its refund policy including whether it is “in cash, or as credit or store credit only.” If the store violates GBL section 218–a, the consumer has twenty days to return “merchandise (which) has not been used or damaged.”

Baker returned the undamaged and unworn, albeit shedding, Fake Fur to Burlington Coat within two days of purchase thus coming within Burlington Coat’s “7 Days of Purchase” policy and within the twenty-day claim filing period in GBL 218–a(3). Although Baker professed ignorance of Burlington Coat’s refund policy, the Court finds that Burlington Coat’s signs and the front and back of its sales receipt reasonably inform consumers of its no cash and no credit card charge refund policy.

Notwithstanding its visibility Burlington Coat’s no cash and no credit card charge refund policy as against Baker is unenforceable. Stated simply, when a product is defective as was Baker’s common and, hardly unique, shedding Fake Fur, Burlington Coat cannot refuse to return the consumer’s payment whether made in cash or with a credit card.

UCC section 2–314 mandates that “a warranty that the goods shall be merchantable is implied in a contract of their sale if the seller is a merchant with respect to goods of that

kind . . . (2) Goods to be merchantable must be . . . fit for the ordinary purposes for which such goods are used” [UCC section 2–314]. Should there be a breach of the implied warranty of merchantability then consumers may recover all appropriate damages including the purchase price in cash [UCC section 2–714]. The Court finds that Burlington Coat sold Baker a defective and unwearable Fake Fur and breached the implied warranty of merchantability. Baker is entitled to the return of her purchase price of \$127.99 in cash and all other appropriate damages. However, Baker’s claim for the \$15.00 co-pay for visiting her doctor and the cost of allergy medicine is denied. Baker admitted having allergies, but it is not clear that the Fake Fur exacerbated those allergies.

As between the implicit cash refund policy contained in UCC sections 2–314 and 2–714, the no cash refund policy explicitly authorized in GBL section 218–a(2), the UCC provisions are paramount and preempt any contrary provisions in GBL 218–a. To hold otherwise would allow a merchant whether in good faith or otherwise, to place in commerce a defective product and merely give credit exchange upon the product’s return.

Judgment for Baker.

CONCEPT REVIEW

Buyer’s Remedies (on breach by seller)

| Problems | Buyer’s Remedy |
|---|--|
| Seller Fails to Deliver Goods or Delivers Nonconforming Goods That Buyer Rightfully Rejects or Justifiably Revokes Acceptance Of | <ol style="list-style-type: none"> 1. Buyer may cancel the contract and recover damages. 2. Buyer may “cover” by obtaining substitute goods and recover difference between contract price and cost of cover. 3. Buyer may recover damages for breach based on difference between contract price and market price. |
| Seller Delivers Nonconforming Goods That Are Accepted by Buyer | Buyer may recover damages based on difference between value of goods received and value of goods if they had been as warranted. |
| Seller Has the Goods but Refuses to Deliver Them and Buyer Wants Them | Buyer may seek specific performance if goods are unique and cannot be obtained elsewhere, or buyer may replevy (obtain from the seller) goods identified to contract if buyer cannot obtain cover. |

Problems and Problem Cases

1. Lobianco contracted with Property Protection, Inc., for the installation of a burglar alarm system. The contract provided in part:

Alarm system equipment installed by Property Protection, Inc., is guaranteed against improper function due to manufacturing defects of workmanship for a period of 12 months. The installation of the above equipment carries a 90-day warranty. The liability of Property Protection, Inc., is limited to repair or replacement of security alarm equipment and does not include loss or damage to possessions, persons, or property.

As installed, the alarm system included a standby battery source of power in the event that the regular source of power failed. During the 90-day warranty period, burglars broke into Lobianco's house and stole \$35,815 worth of jewelry. First, they destroyed the electric meter so that there was no electric source to operate the system, and then they entered the house. The batteries in the standby system were dead, and thus the standby system failed to operate. Accordingly, no outside siren was activated and a telephone call that was supposed to be triggered was not made. Lobianco brought suit, claiming damage in the amount of her stolen jewelry because of the failure of the alarm system to work properly. Did the disclaimer effectively eliminate any liability on the alarm company's part for consequential damages?

2. On March 23, 1993, Poli purchased a new 1992 Dodge Spirit manufactured by DaimlerChrysler Corporation. When he made the purchase Poli elected to obtain a seven-year, seventy-thousand-mile "powertrain" warranty from DaimlerChrysler. Over the next few years, the car required a series of repairs and replacements to the engine timing belt, which was one of the parts covered by the powertrain warranty. On December 16, 1993, after the car had been driven 16,408 miles, Poli had the timing belt replaced. More than three years later, on March 21, 1997, after the car had been driven 36,149 miles, the timing belt was repaired. Poli then had to replace the timing belt on May 16, 1997, on January 5, 1998, and on July 6, 1998. The timing belt again failed on July 31, 1998, causing the destruction of the "short block" of the engine which the dealer took six months to repair. All of the timing belt repairs and replacements were undertaken by the dealer in accordance with the seven-year, seventy-thousand-mile powertrain warranty. On December 15, 1998, Poli brought an action against

DaimlerChrysler for breach of warranty. The company moved for summary judgment on the grounds that the breach of warranty claim was barred by the four-year statute of limitations in the UCC because it was brought more than four years after the car had been purchased and that is when the breach occurred. Poli claimed that the breach of warranty claim was timely because the seven-year, seventy-thousand-mile powertrain warranty was a "guarantee of performance" which DaimlerChrysler breached by failing to properly repair the timing belt. Was Poli's breach of warranty claim barred by the four-year statute of limitations?

3. Murrey & Sons Company, Inc. (Murrey), was engaged in the business of manufacturing and selling pool tables. Erik Madsen was working on an idea to develop a pool table that, through the use of electronic devices installed in the rails of the table, would produce lighting and sound effects in a fashion similar to a pinball machine. Murrey and Madsen entered into a written contract whereby Murrey agreed to manufacture 100 of its M1 4-foot by 8-foot six-pocket coin-operated pool tables with customized rails capable of incorporating the electronic lighting and sound effects desired by Madsen. Under the agreement, Madsen would design the rails and provide the drawings to Murrey, which would manufacture them to Madsen's specifications. Madsen was to design, manufacture, and install the electronic components for the tables. Madsen agreed to pay \$550 per table or a total of \$55,000 for the 100 tables and made a \$42,500 deposit on the contract.

Murrey began the manufacture of the tables while Madsen continued to work on the design of the rails and electronics. Madsen encountered significant difficulties and notified Murrey that he would be unable to take delivery of the 100 tables. Madsen then brought suit to recover the \$42,500 he had paid Murrey.

Following Madsen's repudiation of the contract, Murrey dismantled the pool tables and used salvageable materials to manufacture other pool tables. A good portion of the material was simply used as firewood. Murrey made no attempt to market the 100 pool tables at a discount or at any other price in order to mitigate its damages. It claimed the salvage value of the materials it reused was \$7,488. There was evidence that if Murrey had completed the tables, they would have had a value of at least \$21,250 and could

have been sold for at least that much, and that the changes made in the frame to accommodate the electrical wiring would not have adversely affected the quality or marketability of the pool tables. Murrey said it had not completed manufacture because its reputation for quality might be hurt if it dealt in “seconds,” and that the changes in the frame might weaken it and subject it to potential liability. Was Murrey justified in not completing manufacture of the pool tables?

4. Precision Mirror & Glass is a manufacturer of custom-made glass products, such as shower doors, mirrors, and glass table tops. On July 9, Bobby Nelms brought Precision a pattern drawn on paper for a glass table top cover for an antique table he owned. He advised the sales representative that he wanted to cover his table with $\frac{3}{4}$ -inch glass conforming to the pattern. After some discussion, it was decided that the table top would be made with $\frac{3}{8}$ -inch glass at a cost, including sales tax, of \$684.33. Nelms left a \$100 deposit, leaving a balance of \$584.33 payable upon pickup of the table top. At that time Nelms signed a contract that set out the specifications and price and that also included a noncancellation clause indicating “ALL ORDERS ARE FINAL SALE” and “personally guaranteed . . . I waive my right to cancellation.” Precision’s practice was to allow a customer to cancel an order as long as it occurs prior to the start of production. However, once a custom item is made to a customer’s unique specifications, it rarely has any resale value. On July 11, Nelms called Precision and stated that he wanted to cancel the order because he believed that the $\frac{3}{8}$ -inch glass ordered would not be suitable for his purposes. Precision responded that the glass had already been cut and was awaiting his pickup. When Nelms failed to pick up the glass despite a demand that he do so, Precision brought suit against him to seek money damages in the amount owed on the contract. Is Precision entitled to recover the full contract price from Nelms?
5. Cohn advertised a 30-foot sailboat for sale in *The New York Times*. Fisher saw the ad, inspected the sailboat, and offered Cohn \$4,650 for the boat. Cohn accepted the offer. Fisher gave Cohn a check for \$2,535 as a deposit on the boat. He wrote on the check, “Deposit on aux sloop, D’arc Wind, full amount \$4,650.” Fisher later refused to go through with the purchase and stopped payment on the deposit check. Cohn readvertised the boat and sold it for the highest offer he received, which was \$3,000. Cohn then sued Fisher for breach of contract. He asked for damages of \$1,679.50. This represented the \$1,650 difference between the contract price and the sale price plus \$29.50 in incidental expenses in reselling the boat. Is Cohn entitled to this measure of damages?
6. McCain Foods sold on credit and delivered a quantity of frozen french fries to Flagstaff Food Service Company. Several days later, when the potatoes had not yet been paid for, McCain discovered that Flagstaff was insolvent and had just filed a petition in bankruptcy. What would you advise McCain Foods to do?
7. Barr purchased from Crow’s Nest Yacht Sales a 31-foot Tiara pleasure yacht manufactured by S-2 Yachts. He had gone to Crow’s Nest knowing the style and type yacht he wanted. He was told that the retail price was \$102,000 but that he could purchase the model it had for \$80,000. When he asked about the reduction in price he was told that Crow’s Nest had to move it because there was a change in the model and it had new ones coming in. He was assured that the yacht was new, that there was nothing wrong with it, and that it had only 20 hours on the engines. Barr installed a considerable amount of electronic equipment on the boat. When he began to use it, he experienced tremendous difficulties with equipment malfunctions. On examination by a marine expert it was determined that the yacht had earlier been sunk in salt water, resulting in significant rusting and deterioration in the engine, equipment, and fixtures. Other experts concluded that significant replacement and repair was required, that the engines would have only 25 percent of their normal expected life, and that following its sinking, the yacht would have only half of its original value. Barr then brought suit against Crow’s Nest and S-2 Yachts for breach of warranty. To what measure of damages is Barr entitled to recover for breach of warranty?
8. De La Hoya bought a used handgun for \$140 from Slim’s Gun Shop, a licensed firearms dealer. At the time, neither De La Hoya nor Slim’s knew that the gun had been stolen prior to the time Slim’s bought it. While De La Hoya was using the gun for target shooting, he was questioned by a police officer. The officer traced the serial number of the gun, determined that it had been stolen, and arrested De La Hoya. De La Hoya had to hire an attorney to defend himself against

the criminal charges. De La Hoya then brought a lawsuit against Slim's Gun Shop for breach of warranty of title. He sought to recover the purchase price of the gun plus \$8,000, the amount of his attorney's fees, as "consequential damages." Can a buyer who does not get good title to the goods he purchased recover from the seller consequential damages caused by the breach of warranty of title?

9. On February 5, 2004, Michael Taylor entered into a retail purchase order agreement with Hoffman Ford for the first new 2005 Ford GT 40 allotted and/or delivered to Hoffman Ford. The sales price was listed "MSRP Dealer Prep." MSRP is the manufacturer's suggested retail price, and dealer preparation charges are charges associated with getting the car ready for delivery and usually run between \$100 and \$500. The dealer preparation charge is about the same for all new cars. On March 4, 2004, Taylor paid, and Hoffman accepted, a \$5,000 deposit on the purchase. The Ford GT 40 is a limited edition car, a re-creation of a 1960s race car and was first being produced in 2005. There is an extra value associated with the first year of a limited edition automobile, as well as with being the original owner, and scarcity also affects market price. Hoffman Ford was allotted one 2005 Ford GT with delivery some time in September 2004. The manufacturer's suggested retail price for the car is \$156,945. The price necessary to purchase a GT 40 on the open market is substantially greater than the manufacturer's suggested retail price. At the time some cars were available for sale on the Internet at prices starting at \$250,000. The open-market price of such a car was likely to be double the manufacturer's suggested retail price. However, the Ford GT 40 was not readily available on the open market, and it was

highly unlikely that the car could be purchased from another dealer.

In November 2004, Taylor's lawyer inquired of counsel for Hoffman Ford whether Hoffman would duly perform the contract between them. Hoffman Ford's counsel replied that it stood ready, willing, and able to perform under the contract and that the price of the car, including "dealer prep" is \$300,000. Hoffman Ford normally did not charge a "dealer prep" but claimed in this case it was an "availability" surcharge. As a result of this response, Taylor filed a lawsuit against Hoffman Ford for breach of contract and seeking an injunction against transferring ownership or possession of the first 2005 GT allotted to Hoffman Ford to anyone else, as well as specific performance and damages. Subsequently, Hoffman Ford received an offer from another buyer to purchase the car. Is Taylor entitled to seek specific performance of the contract?

Online Research

Use the Internet to Check for Product Recalls

Use the Internet to locate the Web site for the U.S. Consumer Product Safety Commission (CPSC) (www.cpsc.gov). Use it to find five products that the Commission recently has either ordered recalled or for which it has entered into voluntary settlements with manufacturers to issue recall notices. Then go to the Web site for one of the manufacturers and compare the information concerning the product on the manufacturer's Web site with the information posted on the CPSC site. What, if any, differences do you discern?

PERSONAL PROPERTY AND BAILMENTS

Claudio is a skilled craftsman employed by the Goldcasters Jewelry to make handcrafted jewelry. Working after his normal working hours and using materials he paid for himself, Claudio crafts a fine ring by skillfully weaving together strands of gold wire. He presents the ring to his fiancée, Cheryl, as an engagement ring in anticipation of their forthcoming marriage. While visiting the restroom in a steak and ribs restaurant, Cheryl removes the ring so she can wash some barbecue sauce from her hands. In her haste to get back to her table, she leaves the ring on the washstand when she exits the restroom. Sandra, a part-time janitor for the restaurant, finds the ring and slips it into her purse. When Cheryl realizes she is missing the ring and returns to the restroom to look for it, neither the ring nor Sandra is still there. Later that evening Sandra sells the ring to her cousin, Gloria, who gives her \$200 for it. Several days later, Cheryl breaks her engagement to Claudio, telling him that she no longer loves him. Claudio asks Cheryl to return the ring, indicating that he only intended for her to have it if their engagement led to marriage. This situation raises a number of questions concerning rights and interests in personal property that will be discussed in this chapter. They include:

- Between Claudio and Goldcasters, who was the owner of the ring at the time Claudio created it?
- Did Claudio make an effective gift of the ring to Cheryl? Or was it a conditional gift that he could revoke when Cheryl decided to call off the marriage?
- What was Sandra's responsibility when she found the ring? Between Sandra and the restaurant, who had the better right to the ring?
- Did Gloria become the owner of the ring when she paid the \$200 to Sandra? Does Cheryl have the right to recover the ring from Gloria if she finds that Gloria has it?
- Was it ethical for Claudio to use this employer's tools and facilities for a personal project?

Nature of Property

The concept of property is crucial to the organization of society. The essential nature of a particular society is often reflected in the way it views property, including the degree to which property ownership is concentrated in the state, the extent to which it permits individual ownership of property, and the rules that govern such ownership. History is replete with wars and revolutions that arose out of conflicting claims to, or views concerning, property. Significant documents in our Anglo-American legal tradition, such as the Magna Carta and the Constitution, deal explicitly with property rights.

The word **property** is used to refer to something that is capable of being owned. It is also used to refer to a right or interest that allows a person to exercise dominion over a thing that may be owned or possessed.

When we talk about property ownership, we are speaking of a *bundle of rights* that the law recognizes and enforces. For example, ownership of a building includes the exclusive right to use, enjoy, sell, mortgage, or rent the building. If someone else tries to use the property without the owner's consent, the owner may use the courts and legal procedures to eject that person. Ownership of a patent includes the rights to produce, use, and sell the patented item, and to license others to do those things.

In the United States, private ownership of property is protected by the Constitution, which provides that the government shall deprive no person of “life, liberty or property without due process of law.” We recognize and encourage the rights of individuals to acquire, enjoy, and use property. These rights, however, are not unlimited. For example, a person cannot use property in an unreasonable manner that injures others. Also, the state has **police power** through which it can impose reasonable regulations on the use of property, tax it, and take it for public use by paying the owner compensation for it.

Property is divided into a number of categories based on its characteristics. The same piece of property may fall into more than one class. The following discussion explores the meaning of **personal property** and the numerous ways of classifying property.

Classifications of Property

Personal Property versus Real Property Personal property is defined by process of exclusion. The term *personal property* is used in contrast to *real property*. Real property is the earth’s crust and all things firmly attached to it.¹ For example, land, office buildings, and houses are considered to be real property. All other objects and rights that may be owned are personal property. Clothing, books, and stock in a corporation are examples of personal property.

Real property may be turned into personal property if it is detached from the earth. Personal property, if attached to the earth, becomes real property. For example, marble in the ground is real property. When the marble is quarried, it becomes personal property, but if it is used in constructing a building, it becomes real property again. Perennial vegetation that does not have to be seeded every year, such as trees, shrubs, and grass, is usually treated as part of the real property on which it is growing. When trees and shrubs are severed from the land, they become personal property. Crops that must be planted each year, such as corn, oats, and potatoes, are usually treated as personal property. However, if the real property on which they are growing is sold, the new owner of the real property also becomes the owner of the crops.

When personal property is attached to, or used in conjunction with, real property in such a way as to be treated as part of the real property, it is known as a **fixture**. The law concerning fixtures is discussed in the next chapter.

¹The law of real property is treated in Chapter 24.

Tangible versus Intangible Personal Property

Personal property may be either tangible or intangible. Tangible property has a physical existence. Cars, animals, and computers are examples. Property that has no physical existence is called intangible property. For example, rights under a patent, copyright, or trademark would be intangible property.²

The distinction between tangible and intangible property is important primarily for tax and estate planning purposes. Generally, tangible property is subject to tax in the state in which it is located, whereas intangible property is usually taxable in the state where its owner lives.

Public and Private Property Property is also classified as public or private, based on the ownership of the property. If the property is owned by the government or a governmental unit, it is public property. If it is owned by an individual, a group of individuals, a corporation, or some other business organization, it is private property.

Acquiring Ownership of Personal Property

Production or Purchase The most common ways of obtaining ownership of property are by producing it or purchasing it. A person owns the property that she makes unless the person has agreed to do the work for another party. In that case, the other party is the owner of the product of the work. For example, a person who creates a painting, knits a sweater, or develops a computer program is the owner unless she has been retained by someone to create the painting, knit the sweater, or develop the program. Another major way of acquiring property is by purchase. The law regarding the purchase of tangible personal property (that is, sale of goods) is discussed in Chapter 19.

The scenario set out at the start of this chapter posits that Claudio, a skilled craftsman employed by Goldcasters to make handcrafted jewelry, works after his normal working hours and uses materials he paid for himself to make a gold ring. Who should be considered to be the owner of the ring at the time Claudio created it, Claudio or Goldcasters? What are the critical factors that lead you to this conclusion?

²These important types of intangible property are discussed in Chapter 8.

Possession of Unowned Property In very early times, the most common way of obtaining ownership of personal property was simply by taking possession of unowned property. For example, the first person to take possession of a wild animal became its owner. Today, one may still acquire ownership of personal property by possessing it if the property is unowned. The two major examples of unowned property that may be acquired by possession are wild animals and abandoned property. Abandoned property will be discussed in the next section, which focuses on the rights of finders.

The first person to take possession of a wild animal normally becomes the owner.³ To acquire ownership of a wild animal by taking possession, a person must obtain enough control over it to deprive it of its freedom. If a person fatally wounds a wild animal, the person becomes the owner. Wild animals caught in a trap or fish caught in a net are usually considered to be the property of the person who set the trap or net. If a captured wild animal escapes and is caught by another person, that person generally becomes the owner. However, if that person knows that the animal is an escaped animal and that the prior owner is chasing it to recapture it, then he does not become the owner.

Rights of Finders of Lost, Mislaid, and Abandoned Property The old saying “finders keepers, losers weepers” is not a reliable way of predicting the legal rights of those who find personal property that originally belonged—or still belongs—to another. The rights of the finder will be determined according to whether the property he finds is classified as abandoned, lost, or mislaid.

1. *Abandoned property.* Property is considered to be abandoned if the owner intentionally placed the property out of his possession with the intent to relinquish ownership of it. For example, Norris takes his TV set to the city dump and leaves it there. The finder who takes possession of abandoned property with intent to claim ownership becomes the owner of the property. This means he acquires better rights to the property than anyone else in the world, including the original owner. For example, if Fox finds the TV set, puts it in his car, and takes it home, Fox becomes the owner of the TV set.

³As wildlife is increasingly protected by law, however, some wild animals cannot be owned because it is illegal to capture them (e.g., endangered species).

2. *Lost property.* Property is considered to be lost when the owner did not intend to part with possession of the property. For example, if Barber’s camera fell out of her handbag while she was walking down the street, it would be considered lost property. The person who finds lost property does not acquire ownership of it, but he acquires better rights to the lost property than anyone other than the true owner. For example, suppose Lawrence finds Barber’s camera in the grass where it fell. Jones then steals the camera from Lawrence’s bookbag. Under these facts, Barber is still the owner of the camera. She has the right to have it returned to her if she discovers where it is—or if Lawrence knows that it belongs to Barber. As the finder of lost property, however, Lawrence has a better right to the camera than anyone else except Barber. This means that Lawrence has the right to require Jones to return it to him if he finds out that Jones has it.

If the finder does not know who the true owner is or cannot easily find out, the finder must still return the property when the real owner shows up and asks for the property. If the finder of lost property knows who the owner is and refuses to return it, the finder is guilty of **conversion** and must pay the owner the fair value of the property.⁴ A finder who sells the property that he has found can pass to the purchaser only those rights that he has; he cannot pass any better title to the property than he himself has. Thus, the true owner could recover the property from the purchaser.

3. *Mislaid property.* Property is considered to be mislaid if the owner intentionally placed the property somewhere and accidentally left it there, not intending to relinquish ownership of the property. For example, Fields places her backpack on a coatrack at Campus Bookstore while shopping for textbooks. Forgetting the backpack, Fields leaves the store and goes home. The backpack would be considered mislaid rather than lost because Fields intentionally and voluntarily placed it on the coatrack. If property is classified as mislaid, the finder acquires no rights to the property. Rather, the person in possession of the real property on which the personal property was mislaid has the right to hold the property for the true owner and has better rights to the property than anyone other than the true owner. For example, if Stevens found Fields’s backpack in Campus Bookstore, Campus Bookstore would have the right to hold the mislaid property for

⁴The tort of conversion is discussed in Chapter 6.

Fields. Stevens would acquire neither possession nor ownership of the backpack.

The rationale for this rule is that it increases the chances that the property will be returned to its real owner. A person who knowingly placed the property somewhere but forgot to pick it up might well remember later where she left the property and return for it.

In the scenario set out at the start of this chapter, Cheryl visits the restroom in a steak and ribs restaurant in order to wash some barbecue sauce from her hands. She removes her engagement ring and places it on the washstand, but in her haste to get back to her table, she leaves the ring on the washstand when she exits the washroom. Sandra, a part-time janitor for the restaurant, finds the ring, slips it in her purse, and later sells the ring to her cousin, Gloria, for \$200. When Cheryl returns to the restroom to look for the ring, neither the ring nor Sandra is still there.

At the time Sandra discovers the ring, should it be considered abandoned, lost, or mislaid property? What

factors lead you to this conclusion? What should Sandra do with the ring at that point? Between Sandra and the owner of the restaurant, who has the best claim to the ring? Between the restaurant owner, Sandra, and Cheryl, who has the best claim to it? Why? If Cheryl discovers that Gloria has the ring, does she have the right to recover it from her? Why?

Some states have a statute that allows finders of property to clear their title to the property. The statutes, known as **estray statutes**, generally provide that the person must give public notice of the fact that the property has been found, perhaps by putting an ad in a local newspaper. All states have statutes of limitations that require the true owner of property to claim it or bring a legal action to recover possession of it within a certain number of years. A person who keeps possession of lost or unclaimed property for longer than that period of time will become its owner.

The *Corliss* case, which follows, discusses the relative rights of a person who finds property on land owned by someone else.

Corliss v. Wenner and Anderson

2001 Ida. App. LEXIS 79 (Ct. App. Idaho 2001)

In the fall of 1996, Jann Wenner hired Anderson Asphalt Paving to construct a driveway on his ranch. Larry Anderson, the owner of Anderson Asphalt Paving, and his employee, Gregory Corliss, were excavating soil for the driveway when they unearthed a glass jar containing paper-wrapped rolls of gold coins. Anderson and Corliss collected, cleaned, and inventoried the gold pieces dating from 1857 to 1914. The 96 coins weighed about four pounds. Initially, Anderson and Corliss agreed to split the coins among themselves, with Anderson retaining possession of all the coins. Subsequently, Anderson and Corliss argued over ownership of the coins, and Anderson fired Corliss. Anderson later gave possession of the coins to Wenner in exchange for indemnification on any claim Corliss might have against him regarding the coins.

Corliss sued Anderson and Wenner for possession of some or all of the coins. Corliss contended that the coins should be considered “treasure trove” and awarded to him pursuant to the “finders keepers” rule of treasure trove. Wenner, defending both himself and Anderson, contended that he had the better right to possession of the gold coins. The trial court held Idaho did not recognize “treasure trove” and that the coins, having been carefully concealed for safekeeping, fit within the legal classification of mislaid property, to which the right of possession goes to the landowner. Alternatively, the court ruled that the coins, like the topsoil being excavated, were a part of the property owned by Wenner and that Anderson and Corliss were merely Wenner’s employees. Corliss appealed.

Schwartzman, Chief Judge

At common law all found property is generally categorized in one of five ways. Those categories are:

ABANDONED PROPERTY—that which the owner has discarded or voluntarily forsaken with the intention of terminating his ownership, but without vesting ownership in any other person.

LOST PROPERTY—that property which the owner has involuntarily and unintentionally parted with through neglect,

carelessness, or inadvertence and does not know the whereabouts.

MISLAID PROPERTY—that which the owner has intentionally set down in a place where he can again resort to it, and then forgets where he put it.

TREASURE TROVE—a category exclusively for gold or silver in coin, plate, bullion, and sometimes its paper money equivalents, found concealed in the earth or in a house or other private place. Treasure trove carries with it the thought of antiquity, i.e., that the treasure has been concealed for so

long as to indicate that the owner is probably dead or unknown.

EMBEDDED PROPERTY—that personal property which has become a part of the natural earth, such as pottery, the sunken wreck of a steamship, or a rotted-away sack of gold-bearing quartz rock buried or partially buried in the ground.

Under these doctrines, the finder of lost or abandoned property and treasure trove acquires a right to possess the property against the entire world but the rightful owner regardless of the place of finding. The finder of mislaid property is required to turn it over to the owner of the premises who has the duty to safeguard the property for the true owner. Possession of embedded property goes to owner of the land on which the property was found.

One of the major distinctions between these various categories is that only lost property necessarily involves an element of involuntariness. The four remaining categories involve voluntary and intentional acts by the true owner in placing the property where another eventually finds it. However, treasure trove, despite not being lost or abandoned property, is treated as such in that the right to possession is recognized to be in the finder rather than the premises owner.

On appeal, Corliss argues that the district court should have interpreted the undisputed facts and circumstances surrounding the placement of the coins in the ground to indicate that the gold coins were either lost, abandoned, or treasure trove. Wenner argues that the property was properly categorized as either embedded or mislaid property.

As with most accidentally discovered buried treasure, the history of the original ownership of the coins is shrouded in mystery and obscured by time. The coins had been wrapped in paper, like coins from a bank, and buried in a glass jar, apparently for safekeeping. Based on these circumstances, the district court determined that the coins were not abandoned because the condition in which the coins were found evidenced an intent to keep them safe, not an intent to voluntarily relinquish all possessory interest in them. The district court also implicitly rejected the notion that the coins were lost, noting that the coins were secreted with care in a specific place to protect them from the elements and from other people until such time as the original owner might return for them. There is no indication that the coins came to be buried through neglect, carelessness, or inadvertence. Accordingly, the district court properly concluded, as a matter of law, that the coins were neither lost nor abandoned.

The district court then determined that the modern trend favored characterizing the coins as property either embedded in the earth or mislaid—under which the right of possession goes to the landowner—rather than treasure trove—under which the right of possession goes to the finder. Although accepted by a

number of states prior to 1950, the modern trend since then, as illustrated by decisions of the state and federal courts, is decidedly against recognizing the “finders keepers” rule of treasure trove.

We conclude that the rule of treasure trove is of dubious heritage and misunderstood application, inconsistent with our values and traditions. The danger of adopting the doctrine of treasure trove is laid out in *Morgan v. Wiser* (Tenn. 1985).

[We] find the rule with respect to treasure-trove to be out of harmony with modern notions of fair play. The common-law rule of treasure-trove invites trespassers to roam at large over the property of others with their metal detecting devices and to dig wherever such devices tell them property might be found. If the discovery happens to fit the definition of treasure-trove, the trespasser may claim it as his own. To paraphrase another court: The mind refuses consent to the proposition that one may go upon the lands of another and dig up and take away anything he discovers there which does not belong to the owner of the land.

The invitation to trespassers inherent in the rule with respect to treasure trove is repugnant to the common law rules dealing with trespassers in general. The common law made a trespass an actionable wrong without the necessity of showing any damage therefrom. Because a trespass often involved a breach of the peace and because the law was designed to keep the peace, the common law dealt severely with trespassers.

Recognizing the validity of the idea that the discouragement of trespassers contributes to the preservation of the peace in the community, we think this state should not follow the common law rule with respect to treasure trove. Rather, we adopt the rule suggested in the concurring opinion in *Schley v. Couch* . . . which we restate as follows:

Where property is found embedded in the soil under circumstances repelling the idea that it has been lost, the finder acquires no title thereto, for the presumption is that the possession of the article found is in the owner of the locus in quo.

Landownership includes control over crops on the land, buildings and appurtenances, soils, minerals buried under those soils. The average Idaho landowner would expect to have a possessory interest in any object uncovered on his or her property. And certainly the notion that a trespassing treasure hunter, or a hired handyman or employee, could or might have greater possessory rights than a landowner in objects uncovered on his or her property runs counter to the reasonable expectations of present-day landownership.

There is no reason for a special rule for gold and silver coins, bullion, or plate as opposed to other property. Insofar as personal property (money and the like) buried or secreted on

privately owned realty is concerned, the distinctions between treasure trove, lost property, and mislaid property are anachronistic and of little value. The principal point of such distinctions is the intent of the true owner which, absent some written declaration indicating such, is obscured in the mists of time and subject to a great deal of speculation.

By holding that property classed as treasure trove (gold or silver coins, bullion, plate) in other jurisdictions is classed in Idaho as personal property embedded in the soil, subject to the same limitations as mislaid property, possession will be awarded to the owner of the soil as a matter of law. Thus, we craft a simple and reasonable solution to the problem, discourage trespass, and avoid the risk of speculating about the true owner's intent

when attempting to infer such from the manner and circumstances in which an object is found. Additionally, the true owner, if any, will have the opportunity to recover the property.

We hold that the owner of the land has constructive possession of all personal property secreted in, on, or under his or her land. Accordingly, we adopt the district court's reasoning and conclusion melding the law of mislaid property with that of embedded property and conclude, as a matter of law, that the landowner is entitled to possession to the exclusion of all but the true owner, absent a contract between the landowner and finder.

Judgment for Wenner affirmed.

Legal Responsibilities of Finders Some states go further and make it a criminal offense for a person who comes into control of property that he knows or learns has been lost or mislaid to appropriate the property to his own use without first taking reasonable measures to restore the property to the owner. For example under the Georgia Code, "A person commits the offense of theft of lost or mislaid property that he knows or learns to have been lost or mislaid property when he comes into control of property that he knows or learns to have been lost or mislaid and appropriates the property to his own use without first taking reasonable measures to restore the property to the owner" (O.C.G. A. section 16-8-6).

In a recent case⁵ under that statute, an individual was convicted of the offense when she found a bank deposit bag containing checks, deposit slips, and over \$500 in cash and subsequently attempted to cash one of the checks at a local check cashing business. The deposit bag had been misplaced while the victim was transporting it from her business located in a shopping mall to a car parked outside the mall. Some of the checks contained the victim's phone number and address, and the finder admitted that she never contacted the victim to restore the property to her.

Leasing A lease of personal property is a transfer of the right to possess and use personal property belonging to another.⁶ Although the rights of one who leases personal property (a lessee) do not constitute ownership

of personal property, leasing is mentioned here because it is becoming an increasingly important way of acquiring the use of many kinds of personal property, from automobiles to farm equipment.

Articles 2 and 9 of the UCC may sometimes be applied to personal-property leases by analogy. However, rules contained in these articles are sometimes inadequate to resolve special problems presented by leasing. For this reason, a new article of the UCC dealing exclusively with leases of goods, Article 2A, was written in 1987. Forty-seven states and the District of Columbia have adopted Article 2A.

Gifts Title to personal property may be obtained by **gift**. A gift is a voluntary transfer of property to the **donee** (the person who receives a gift), for which the **donor** (the person who gives the gift) gets no consideration in return. To have a valid gift, all three of the following elements are necessary:

1. The donor must *intend* to make a gift.
2. The donor must make *delivery* of the gift.
3. The donee must *accept* the gift.

The most critical requirement is delivery. The donor must actually give up possession and control of the property either to the donee or to a third person who is to hold it for the donee. Delivery is important because it makes clear to the donor that he is voluntarily giving up ownership without getting something in exchange. A promise to make a gift is usually not enforceable;⁷ the person must actually part with the property. In some cases, the

⁵*Shannon v. The State*, 574 S.E.2d 889 (Ct. App. Ga. 2002).

⁶A lease of personal property is a form of bailment, a "bailment for hire." Bailments are discussed later in this chapter.

⁷The idea is discussed in Chapter 12.

Ethics in Action

Finders Keepers: It May Be Legal, But Is It Ethical?

You're walking along the beach, and you find a toilet kit washed ashore. It contains some sodden cosmetics and a few dollars in change, but no identification. What should you do? The ordinarily ethical person probably tosses the potions and keeps the cash, persuaded by three arguments: Whatever drifts ashore falls under the heading of "finders, keepers," whatever has no identification is difficult to return, and whatever has trivial value would cost more to advertise for the proper owner than it's worth.

The next day on the same beach you find a dinghy with a small outboard motor attached, but no name or registration number. What should you do? While the finders-keepers and anonymity tests still hold, the triviality test does not: The dinghy clearly has significant value. The ordinarily ethical person probably, at the very least, contacts nearby harbor masters to see if anyone is missing a boat, leaving a phone number in case the owner calls.

The third day, astonishingly, you find 40 shipping containers that have washed off the deck of a vessel grounded on a sandbar in plain view a mile offshore. One contains a dozen brand-new BMW motorcycles, each worth more than \$20,000. What should you do?

This third case is not hypothetical. The ship was the *Napoli*, a 62,000-ton cargo ship. On January 19, she encountered a terrific storm and was abandoned by her crew off the coast of Devon, England. As she was being towed to a nearby port, she began to list and was deliberately grounded. When the containers came loose, scores of people came from miles around, swarmed across Branscombe Beach under the eyes of helpless police, opened the containers, and made off with everything of value, including the motorcycles.

Why? They apparently saw this opportunity as somewhere between winning a lottery and finding money in a hollow tree. "It's great, isn't it?" one man told the *Guardian* newspaper, "a cross between a bomb site and a car boot [trunk] sale." Another said it was like finding "Aladdin's cave." In their

view, the stuff was there for the taking, and they were in the right place at the right time.

To call these people "looters" gives the wrong impression. These weren't professional second-story men, cat burglars, or back-alley thugs. By all accounts (and there were many in the news here last week), they were ordinary people. Two questions, then: Were their actions legal, and were they ethical?

What they did clearly fails the triviality test. As for anonymity, there's no doubt about the source of their loot, and no difficulty tracing its ownership. The finders-keepers test, however, is more complex. In fact, the police were legitimately flummoxed. English law allows salvagers to take whatever marine wreckage they find, as long as they fill out a form and take it to the Maritime and Coastguard Agency within 28 days. That entitles them to a reward if the property is claimed—and to legal ownership if, after a year, it is not. So the police felt they could do little more than hand out forms. By day's end, some of the items began showing up for sale on eBay, brazenly described as coming from the *Napoli*, suggesting that even the pretense of legality had been breached by some of these collectors.

What's being tested here, then, is not simply the law but the ethics underlying the law. Given the circumstances, would we expect a reasonably ethical person to remove objects clearly belonging to someone else, or would we want them to help restore lost property to its owners? Surely the latter. Cynics, of course, will yawp that if you don't take it, others will—a line of reasoning so thin that it also would permit you to slaughter your obnoxious neighbor if you thought others were also upset with him. Cynics also will argue that the shipper's insurance will recompense the owner for anything removed—an argument that, along with driving up insurance costs for everyone else, fails to account for one woman's loss of a collection of letters and pictures, personal and irreplaceable, that disappeared from Branscombe Beach as she was moving her home to South Africa.

So suppose we grant that, except for those who fenced their wares on eBay, the rest intended to behave legally by filing proper forms. Even so, does that make them ethical?

Source: Excerpted from the January 29, 2007, issue of *Ethics Newline* (www.glopaethics.org/newline/). A publication of the Institute for Global Ethics.

delivery may be symbolic or constructive. For example, handing over the key to a strongbox may be symbolic delivery of the property in the strongbox.

There are two kinds of gifts: gifts *inter vivos* and gifts *causa mortis*. A gift *inter vivos* is a gift between two living persons. For example, when Melissa's parents give

her a car for her 21st birthday, that is a gift *inter vivos*. A gift *causa mortis* is a gift made in contemplation of death. For example, Uncle Earl, who is about to undergo a serious heart operation, gives his watch to his nephew, Bart, and says that he wants Bart to have it if he does not survive the operation.

CONCEPT REVIEW

Rights of Finders of Personal Property

| Character of Property | Description | Rights of Finder | Rights of Original Owner |
|-----------------------|---|--|--|
| Lost | Owner unintentionally parted with possession | Rights superior to everyone except the owner | Retains ownership; has the right to the return of the property |
| Mislaid | Owner intentionally put property in a place but unintentionally left it there | None; person in possession of real property on which mislaid property was found holds it for the owner, and has rights superior to everyone except owner | Retains ownership; has the right to the return of the property |
| Abandoned | Owner intentionally placed property out of his possession with intent to relinquish ownership of it | Finder who takes possession with intent to claim ownership acquires ownership of property | None |

A gift *causa mortis* is a conditional gift and is effective unless any of the following occurs:

1. The donor recovers from the peril or sickness under fear of which the gift was made, or
2. The donor revokes or withdraws the gift before he dies, or
3. The donee dies before the donor.

If one of these events takes place, ownership of the property goes back to the donor.

Conditional Gifts Sometimes a gift is made on condition that the donee comply with certain restrictions or perform certain actions. A conditional gift is not a completed gift. It may be revoked by the donor before the donee complies with the conditions. Gifts in contem-

plation of marriage, such as engagement rings, are a primary example of a conditional gift. Such gifts are generally considered to have been made on an implied condition that marriage between the donor and donee will take place. The traditional rule applied in many states provides that if the donee breaks the engagement without legal justification or the engagement is broken by mutual consent, the donor will be able to recover the ring or other engagement gift. However, if the engagement is unjustifiably broken by the donor, the traditional rule generally bars the donor from recovering gifts made in contemplation of marriage. As illustrated by the *Lindh* case, which follows, a growing number of courts have rejected the traditional approach and its focus on fault. Some states have enacted legislation prescribing the rules applicable to the return of engagement presents.

Lindh v. Surman

742 A.2d 643 (Sup. Ct. Pa. 1999)

In August 1993, Rodger Lindh (Rodger) proposed marriage to Janis Surman (Janis). Rodger presented her with a diamond engagement ring that he had purchased for \$17,400. Janis accepted the marriage proposal and the ring. Two months later, Rodger broke the engagement and asked Janis to return the ring. She did so. Rodger and Janis later reconciled, with Rodger again proposing marriage and again presenting Janis with the engagement ring. Janis accepted the proposal and the ring. In March 1994, Rodger again broke the engagement and asked Janis to return the ring. This time, however, she refused. Rodger sued her, seeking recovery of the ring or a judgment for its value. The trial court held in Rodger's favor and awarded him damages in the amount of the ring's value. When Janis appealed, the Pennsylvania Superior Court affirmed the award of damages and held that when an engagement is broken, the engagement ring must be returned even if the donor broke the engagement. Janis appealed to the Supreme Court of Pennsylvania.

Newman, Justice

We are asked to decide whether a donee of an engagement ring must return the ring or its equivalent value when the donor breaks the engagement. We begin our analysis with the only principle on which the parties agree: that Pennsylvania law treats the giving of an engagement ring as a conditional gift. In *Pavlicic v. Vogtsberger* (Sup. Ct. Pa. 1957), the plaintiff supplied his ostensible fiancée with numerous gifts, including money for the purchase of engagement and wedding rings, with the understanding that they were given on the condition that she marry him. When the defendant left him for another man, the plaintiff sued her for recovery of these gifts. Justice Musmanno explained the conditional gift principle:

A gift given by a man to a woman on condition that she embark on the sea of matrimony with him is no different from a gift based on the condition that the donee sail on any other sea. If, after receiving the provisional gift, the donee refuses to leave the harbor—if the anchor of contractual performance sticks in the sands of irresolution and procrastination—the gift must be restored to the donor.

The parties disagree, however, over whether fault [on the part of the donor] is relevant to determining return of the ring.

Janis contends that Pennsylvania law . . . has never recognized a right of recovery in a donor who severs the engagement. She maintains that if the condition of the gift is performance of the marriage ceremony, [a rule allowing a recovery of the ring] would reward a donor who prevents the occurrence of the condition, which the donee was ready, willing, and eagerly waiting to perform. Janis's argument that . . . the donor should not be allowed to recover the ring where the donor terminates the engagement has some basis in [decisions from Pennsylvania's lower courts and in treatises]. This Court, however, has not decided the question of whether the donor is entitled to return of the ring where the donor admittedly ended the engagement.

The issue we must resolve is whether we will follow the fault-based theory argued by Janis, or the no-fault rule advocated by Rodger. Under a fault-based analysis, return of the rings depends on an assessment of who broke the engagement, which necessarily entails a determination of why that person broke the engagement. A no-fault approach, however, involves no investigation into the motives or reasons for the cessation of the engagement and requires the return of the engagement ring simply upon the nonoccurrence of the marriage.

The rule concerning the return of a ring founded on fault principles has superficial appeal because, in the most outrageous instances of unfair behavior, it appeals to our sense of equity. Where one of the formerly engaged persons has truly "wronged" the other, justice appears to dictate that the wronged individual should be allowed to keep the ring or have it returned, depending on whether the wronged person was the donor . . . or

the donee. However, the process of determining who is "wrong" and who is "right," when most modern relationships are complex circumstances, makes the fault-based approach less desirable. A thorough fault-based inquiry would not . . . end with the question of who terminated the engagement, but would also examine that person's reasons. In some instances the person who terminated the engagement may have been entirely justified in his or her actions. This kind of inquiry would invite the parties to stage the most bitter and unpleasant accusations against those whom they nearly made their spouse. A ring-return rule based on fault principles will inevitably invite acrimony and encourage parties to portray their ex-fiancées in the worst possible light. Furthermore, it is unlikely that trial courts would be presented with situations where fault was clear and easily ascertained.

The approach that has been described as the modern trend is to apply a no-fault rule to engagement ring cases. Courts that have applied this rule have borrowed from the policies of their respective legislatures that have moved away from the notion of fault in their divorce statutes. All fifty states have adopted some form of no-fault divorce. We agree with those jurisdictions that have looked toward the development of no-fault divorce law for a principle to decide engagement ring cases. In addition, the inherent weaknesses in any fault-based system lead us to adopt a no-fault approach to resolution of engagement ring disputes.

Decision of Superior Court in favor of Rodger Lindh affirmed.**Cappy, Justice, dissenting**

The majority urges adoption of the no-fault rule to relieve trial courts from having the onerous task of sifting through the debris of the broken engagement in order to ascertain who is truly at fault. Are broken engagements truly more disturbing than cases where we ask judges and juries to discern possible abuses in nursing homes, day care centers, dependency proceedings involving abused children, and criminal cases involving horrific, irrational injuries to innocent victims? The subject matter our able trial courts address on a daily basis is certainly of equal sordidness as any fact pattern they may need to address in a simple case of who broke the engagement and why.

I can envision a scenario whereby the prospective bride and her family have expended thousands of dollars in preparation for the culminating event of matrimony and she is, through no fault of her own, left standing at the altar holding the caterer's bill. To add insult to injury, the majority would also strip her of her engagement ring. Why the majority feels compelled to modernize this relatively simple and ancient legal concept is beyond the understanding of this poor man. As I see no valid reason to forego the [fault-based rule] for determining possession of the engagement ring under the simple concept of conditional gift law, I cannot endorse the modern trend advocated by the majority.

In the scenario set out at the beginning of this chapter, Claudio gave the ring to Cheryl as an engagement ring in anticipation of their forthcoming marriage. Later, Cheryl breaks off the engagement, telling Claudio that she no longer loves him. Claudio then asks Cheryl to return the ring to him.

What argument would Claudio make to support his claim that he has the legal right to have the ring returned to him? What argument might Cheryl make to support her contention that she should have the legal right to retain the ring? If Claudio and Cheryl lived in Pennsylvania, where the *Lindh v. Surman* case was decided, would Claudio be entitled to recover the ring from Cheryl? Why or why not? Would it make a difference if they lived in a state that used a fault-based approach concerning gifts given in anticipation of marriage?

Uniform Transfers to Minors Act The Uniform Transfers to Minors Act, which has been adopted in one form or another in every state, provides a fairly simple and flexible method for making gifts and other transfers of property to minors.⁸ As defined in this act, a minor is anyone under the age of 21. Under the act, an adult may transfer money, securities, real property, insurance policies, and other property. The specific ways of doing this vary according to the type of property transferred. In general, however, the transferor (the person who gives or otherwise transfers the property) delivers, pays, or assigns the property to, or registers the property with, a custodian who acts for the benefit of the minor “under the Uniform Transfers to Minors Act.” The custodian is given fairly broad discretion to use the gift for the minor’s benefit and may not use it for the custodian’s personal benefit. The custodian may be the transferor himself, another adult, or a trust company, depending again on the type of property transferred. If the donor or other transferor fully complies with the Uniform Transfers to Minors Act, the transfer is considered to be irrevocable.

Will or Inheritance Ownership of personal property may also be transferred upon the death of the former owner. The property may pass under the terms of a will if the will was validly executed. If there is no valid will, the property is transferred to the heirs of the owner according to state laws. Transfer of property at the death of the owner will be discussed in Chapter 26.

⁸This statute was formerly called, and is still called in some states, the Uniform Gift to Minors Act.

Confusion Title to personal property may be obtained by **confusion**. Confusion is the intermixing of different owners’ goods in such a way that they cannot later be separated. For example, suppose wheat belonging to several different people is mixed in a grain elevator. If the mixing was by agreement or if it resulted from an accident without negligence on anyone’s part, each person owns his proportionate share of the entire quantity of wheat. However, a different result would be reached if the wheat was wrongfully or negligently mixed. Suppose a thief steals a truckload of Grade #1 wheat worth \$8.50 a bushel from a farmer. The thief dumps the wheat into his storage bin, which contains a lower-grade wheat worth \$4.50 a bushel, with the result that the mixture is worth only \$4.50 a bushel. The farmer has first claim against the entire mixture to recover the value of the higher-grade wheat that was mixed with the lower-grade wheat. The thief, or any other person whose intentional or negligent act results in confusion of goods, must bear any loss caused by the confusion.

Accession Ownership of personal property may also be acquired by **accession**. Accession means increasing the value of property by adding materials, labor, or both. As a general rule, the owner of the original property becomes the owner of the improvements. This is particularly likely to be true if the improvement was done with the permission of the owner. For example, Hudson takes his automobile to a shop that replaces the engine with a larger engine and puts in a new four-speed transmission. Hudson is still the owner of the automobile as well as the owner of the parts added by the auto shop.

Problems may arise if materials are added or work is performed on personal property without the consent of the owner. If property is stolen from one person and improved by the thief, the original owner can get it back and does not have to reimburse the thief for the work done or the materials used in improving it. For example, a thief steals Rourke’s used car, puts a new engine in it, replaces the tires, and repairs the brakes. Rourke is entitled to get his car back from the thief and does not have to pay him for the engine, tires, and brakes.

The result is less easy to predict, however, if property is mistakenly improved in good faith by someone who believes that he owns the property. In such a case, a court must weigh the respective interests of two innocent parties: the original owner and the improver.

For example, Johnson, a stonecarver, finds a block of limestone by the side of the road. Assuming that it has been abandoned, he takes it home and carves it into a sculpture. In fact, the block was owned by Hayes. Having fallen off a flatbed truck during transportation, the block

is merely lost property, which Hayes ordinarily could recover from the finder. In a case such as this, a court could decide the case in either of two ways. The first alternative would be to give the original owner (Hayes) ownership of the improved property, but to allow the person who has improved the property in good faith (Johnson) to recover the cost of the improvements. The second alternative would be to hold that the improver, Johnson, has acquired ownership of the sculpture, but that he is required to pay the original owner the value of the property as of the time he obtained it. The greater the extent to which the improvements have increased the value of the property, the more likely it is that the court will choose the second alternative and permit the improver to acquire ownership of the improved property.

Bailments

Nature of Bailments A **bailment** is the delivery of personal property by its owner or someone holding the right to possess it (the **bailor**) to another person (the **bailee**) who accepts it and is under an express or implied agreement to return it to the bailor or to someone designated by the bailor. Only personal property can be the subject of bailments.

Although the legal terminology used to describe bailments might be unfamiliar to most people, everyone is familiar with transactions that constitute bailments. For example, Lincoln takes his car to a parking garage where the attendant gives Lincoln a claim check and then drives the car down the ramp to park it. Charles borrows his neighbor's lawn mower to cut his grass. Tara, who lives next door to Kyle, agrees to take care of Kyle's cat while Kyle goes on a vacation. These are just a few of the everyday situations that involve bailments.

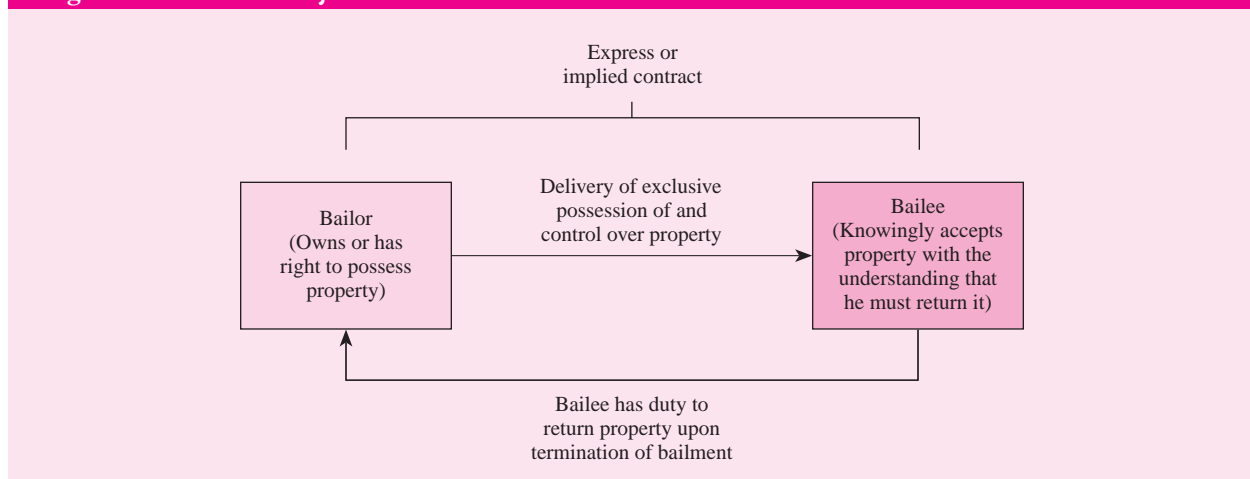

Elements of a Bailment The essential elements of a bailment are:

1. The bailor owns personal property or holds the right to possess it.
2. The bailor delivers exclusive possession of and control over the personal property to the bailee.
3. The bailee knowingly accepts the personal property with the understanding that he owes a duty to return the property, or to dispose of it, as directed by the bailor.

Creation of a Bailment A bailment is created by an express or implied contract. Whether the elements of a bailment have been fulfilled is determined by examining all the facts and circumstances of the particular situation. For example, a patron goes into a restaurant and hangs his hat and coat on an unattended rack. It is unlikely that this created a bailment, because the restaurant owner never assumed exclusive control over the hat and coat. However, if there is a checkroom and the hat and coat are checked with the attendant, a bailment will arise.

If a customer parks her car in a parking lot, keeps the keys, and may drive the car out herself whenever she wishes, a bailment has not been created. The courts treat this situation as a lease of space. Suppose, however, that she takes her car to a parking garage where an attendant, after giving her a claim check, parks the car. There is a bailment of the car because the parking garage has accepted delivery and possession of the car. However, a distinction is made between the car and packages locked in the trunk. If the parking garage was not aware of the packages, it probably would not be a bailee of them as it did not knowingly accept possession of them. The creation of a bailment is illustrated in Figure 1.

Figure 1 *Creation of a Bailment*

Types of Bailments Bailments are commonly divided into three different categories:

1. Bailments for the sole benefit of the bailor.
2. Bailments for the sole benefit of the bailee.
3. Bailments for mutual benefit.

The type of bailment involved in a case can be important in determining the liability of the bailee for loss of or damage to the property. As will be discussed later, however, some courts no longer rely on these distinctions when they determine whether the bailee is liable.

Bailments for Benefit of Bailor A bailment for the sole benefit of the bailor is one in which the bailee renders some service but does not receive a benefit in return. For example, Brown allows his neighbor, Reston, to park her car in Brown's garage while she is on vacation. Brown does not ask for any compensation. Here, Reston, the bailor, has received a benefit from the bailee, Brown, but Brown has not received a benefit in return.

Bailments for Benefit of Bailee A bailment for the sole benefit of the bailee is one in which the owner of the goods allows someone else to use them free of charge. For example, Anderson lends a lawn mower to her neighbor, Moss, so he can cut his grass.

Bailments for Mutual Benefit If both the bailee and the bailor receive benefits from the bailment, it is a bailment for mutual benefit. For example, Sutton rents china for his daughter's wedding from E-Z Party Supplies for an agreed-on price. Sutton, the bailee, benefits by being able to use the china; E-Z benefits from his payment of the rental charge. On some occasions, the benefit to the bailee is less tangible. For example, a customer checks a coat at an attended coatroom at a restaurant. Even if no charge is made for the service, it is likely to be treated as a bailment for mutual benefit because the restaurant is benefiting from the customer's patronage.

Special Bailments Certain professional bailees, such as innkeepers and common carriers, are treated somewhat differently by the law and are held to a higher level of responsibility than is the ordinary bailee. The rules applicable to common carriers and innkeepers are detailed later in this chapter.

Duties of the Bailee The bailee has two basic duties:

1. To take care of the property that has been entrusted to her.

2. To return the property at the termination of the bailment.

The following discussion examines the scope of these duties.

Duty of Bailee to Take Care of Property

The bailee is responsible for taking steps to protect the property during the time she has possession of it. If the bailee does not exercise proper care and the property is lost or damaged, the bailee is liable for negligence. The bailee would then be required to reimburse the bailor for the amount of loss or damage. If the property is lost or damaged without the fault or negligence of the bailee, however, the bailee is not liable to the bailor. The degree of care required of the bailee traditionally has depended in large part on the type of bailment involved.

1. *Bailment for the benefit of the bailor.* If the bailment is solely for the benefit of the bailor, the bailee is expected to exercise only a minimal, or slight, degree of care for the protection of the bailed property. He would be liable, then, only if he were grossly negligent in his care of the bailed property. The rationale for this rule is that if the bailee is doing the bailor a favor, it is not reasonable to expect him to be as careful as when he is deriving some benefit from keeping the goods.
2. *Bailment for mutual benefit.* When the bailment is a bailment for mutual benefit, the bailee is expected to exercise ordinary or reasonable care. This degree of care requires the bailee to use the same care a reasonable person would use to protect his own property in the relevant situation. If the bailee is a professional that holds itself out as a professional bailee, such as a warehouse, it must use the degree of care that would be used by a person in the same profession. This is likely to be more care than the ordinary person would use. In addition, a professional bailee usually has the obligation to explain any loss of or damage to property—that is, to show it was not negligent. If it cannot do so, it will be liable to the bailor.
3. *Bailment for the benefit of the bailee.* If the bailment is solely for the benefit of the bailee, the bailee is expected to exercise a high degree of care. For instance a person who lends a sailboat to a neighbor would probably expect the neighbor to be even more careful with the sailboat than the owner might be. In such a case, the bailee would be liable for damage to the property if his action reflected a relatively small degree of negligence.

A number of courts today view the type of bailment involved in a case as just one factor to be considered in determining whether the bailee should be liable for loss of or damage to bailed goods. The modern trend appears to be moving in the direction of imposing a duty of reasonable care on bailees, regardless of the type of bailment. This flexible standard of care permits courts to take into account a variety of factors such as the nature and value of the property, the provisions of the parties' agreement, the payment of consideration for the bailment, and the experience of the bailee. In addition, the bailee is required to use the property only as was agreed between the parties. For example, Jones borrows Morrow's lawn mower to mow his lawn. If Jones uses the mower to cut the weeds on a trash-filled vacant lot and the mower is damaged, he would be liable because he was exceeding the agreed purpose of the bailment—to cut his lawn.

Bailee's Duty to Return the Property

An essential element of a bailment is the duty of the bailee to return the property at the termination of the

bailment. If the bailed property is taken from the bailee by legal process, the bailee should notify the bailor and must take whatever action is necessary to protect the bailor's interest. In most instances, the bailee must return the identical property that was bailed. A person who lends a 1999 Mercury Sable to a friend expects to have that particular car returned. In some cases, the bailor does not expect the return of the identical goods. For example, a farmer who stores 1,500 bushels of Grade #1 wheat at a local grain elevator expects to get back 1,500 bushels of Grade #1 wheat when the bailment is terminated, but not the identical wheat he deposited.

The bailee must return the goods in an undamaged condition to the bailor or to someone designated by the bailor. If the goods have been damaged, destroyed, or lost, there is a rebuttable presumption of negligence on the part of the bailee. To overcome the presumption, the bailee must come forward with evidence showing that he exercised the relevant level of care.

The *Detroit Institute of Arts* case, which follows, illustrates the duty a bailee has to return the property at the termination of the bailment.

Detroit Institute of Arts v. Rose and Smith 127 F. Supp.2d 117 (U.S.D.C. D.Conn. 2001)

The Howdy Doody Show was a television program beloved by millions of children in what is now known as “the baby boom generation.” It was produced and broadcast by the National Broadcasting Company, Inc. (NBC), from 1947 to 1960. Hosted by Robert “Buffalo Bob” Smith, the show's main character was Howdy Doody, a puppet in the image of a freckled-faced boy in cowboy clothing.

Beginning in 1952, Rufus Rose served as the puppet master, puppeteer, and caretaker for many of the puppets that appeared on the show. While the show was on the air, he created, stored, and made repairs to the puppets in his workshop in Waterford, Connecticut—and was compensated accordingly. When the show ended in 1960, Rose, pursuant to an informal agreement, kept possession of the puppets at this workshop until final arrangements were made for them. Rose acknowledged that the puppets belonged to NBC.

In 1965, Rose began a series of correspondence with NBC about payment for his maintenance and storage of the puppets, including Howdy Doody, since the end of the show in 1960. In a letter to NBC, Rose proposed that (1) NBC pay him for storage and upkeep of all the puppets since the end of the show; (2) he be allowed to keep the minor puppets but with the understanding he would not use them as Howdy Doody Show characters; and (3) the main puppets from the show, including Howdy Doody, would be turned over to a museum, the Detroit Institute of Arts (DIA), that housed the recognized museum of puppetry in America. Subsequently, he signed a release acknowledging payment for past fees and indicating his agreement to send Howdy Doody to the DIA.

In 1970, Rose, in response to a request from his friend Buffalo Bob who was making personal appearances throughout the country, sent Howdy Doody to Buffalo Bob. In an accompanying letter, Rose explained to Buffalo Bob that he had agreed with NBC that the puppet would “eventually” be placed in the DIA and that it would never be used in a commercial manner—and that the original Howdy Doody was being sent to Buffalo Bob “with this mutual understanding and responsibility.” For the next 15 years, Buffalo Bob kept Howdy Doody and used him in personal appearances.

In 1992, Buffalo Bob's attorney contacted Rose's widow, NBC, and DIA, requesting that they waive the requirement that Howdy Doody be placed in the DIA. He indicated that Buffalo Bob had fallen on difficult financial times and now wished to

sell the puppet and keep the proceeds. Rose's son, Christopher, replied on behalf of his mother, stating that it was his father's intention that Buffalo Bob honor the "condition" that Howdy Doody be given to the DIA. NBC refused to release Howdy Doody to him, and the DIA declined to let him sell the puppet. Buffalo Bob then informed the DIA that he would transfer Howdy Doody to the museum "when he no longer wished to keep the puppet."

In 1998, Buffalo Bob and Christopher executed an agreement to sell the puppet and split the proceeds 50-50. They "certified" that Christopher had received the puppet from Buffalo Bob, and Christopher entered into a consignment agreement with an auction house to sell the "original Howdy Doody." A few days later Buffalo Bob died, and the DIA brought a lawsuit to prevent the Rose family from selling the puppet and also to gain possession of it. One of the questions in the lawsuit was whether the 1970 letter created a bailment to Buffalo Bob that obligated him to turn the puppet over to the DIA.

Droney, District Judge

A bailment arises when the owner or bailor "delivers personal property to another for some particular purpose with an express or implied contract to redeliver the goods when the purpose has been fulfilled, or to otherwise deal with the goods according to the bailor's directions." The bailor has a property interest in the goods bailed, while the bailee merely possesses them. The bailee's possession must be exclusive, so that he or she has sole custody and control of the property.

There are two types of bailments: those that are for the mutual benefit of the parties involved and those that are for the sole benefit of either the bailee or bailor. The latter variety, known as gratuitous bailments, typically involve no actual consideration. Instead, it is enough that the bailor suffers a detriment by giving up the present possession or custody of the property bailed on the bailee's promise that the latter will redeliver or otherwise account for it.

Bailments involve certain implied obligations, but these obligations generally are implied only in the absence of an express provision to the contrary. For example, while the law of bailment implies a general obligation to redeliver the property bailed to the owner, the parties are able to stipulate the time, place, and manner of delivery. "The general principle that the manner of a bailee's redelivery should be in accordance with the contract stipulations is too well settled to belabor." Similarly, a bailee may become liable to a third party when the bailment contract includes provisions that were incorporated for the third party's special benefit and interest.

The evidence establishes that Rufus Rose's 1970 letter to Buffalo Bob created an enforceable bailment whereby Buffalo Bob assumed a duty to turn over Howdy Doody to the DIA.

Rufus Rose delivered Howdy Doody to Buffalo Bob with an express term of the bailment that Buffalo Bob would be allowed to possess Howdy Doody "for as long as [he] personally wished to have him," but specifically conditioned Buffalo Bob's use on the same two requirements that NBC imposed upon Rufus Rose: that Howdy Doody would not be used in a commercial manner and that the puppet would "eventually be placed in the care of the Detroit Institute of Arts." These

statements indicate that the bailment was express, and that Buffalo Bob, as bailee, was bound to deal with Howdy Doody according to the instructions of Rufus Rose, the bailor.

The defendants first argue that this agreement between Rufus Rose and Buffalo Bob is unenforceable as a bailment because it lacks consideration. However, actual consideration is not required for a bailment to be enforceable. As stated above, gratuitous bailments are generally not supported by actual consideration, but are still binding on the bailee. Here, it appears that the bailment was gratuitous: it was undertaken for the sole benefit of one of the parties, in this case, the bailee, Buffalo Bob. Thus, it is enough that Rufus Rose, as bailor, gave up custody of Howdy Doody based upon Buffalo Bob's promise that he would redeliver the puppet. As a result, the bailment agreement between Rufus Rose and Buffalo Bob is enforceable without actual consideration.

The defendants maintain that the 1970 agreement between Rose and Smith was satisfied by his return of Howdy Doody to the Rose family in 1998. They also argue that the 1966–1967 agreement is satisfied by "eventually" giving the puppet to the DIA. In other words, other members of the Rose or Smith family may keep the puppet so long as one day it is turned over to the DIA. However, these interpretations of Rufus Rose's words are unsupported by the language of the bailment letter itself; it states that the puppet could only be kept by Smith "personally" and does not mention that the puppet could be passed along by Buffalo Bob after the death of Rufus Rose to anyone else, other than giving it to the DIA. Also, delaying delivery of Howdy Doody through the latter interpretation would undermine the terms of the 1966–1967 agreement between Rufus Rose and NBC: it would allow Howdy Doody to be passed indefinitely, perhaps never to be sent to the DIA.

Thus, the DIA has shown that there is no genuine issue of material fact that the DIA is entitled to possession of Howdy Doody based on the agreement between NBC and Rufus Rose from 1966–1967 and the obligations of Buffalo Bob under the Rufus Rose–Buffalo Bob agreement from 1970.

Judgment in favor of Detroit Institute of Arts.

Bailee's Liability for Misdelivery The bailee is also liable to the bailor if he misdelivers the bailed property at the termination of the bailment. The property must be returned to the bailor or to someone specified by the bailor.

The bailee is in a dilemma if a third person, claiming to have rights superior to those of the bailor, demands possession of the bailed property. If the bailee refuses to deliver the bailed property to the third-party claimant and the claimant is entitled to possession, the bailee is liable to the claimant. If the bailee delivers the bailed property to the third-party claimant and the claimant is not entitled to possession, the bailee is liable to the bailor. The circumstances may be such that the conflicting claims of the bailor and the third-party claimant can be determined only by judicial decision. In some cases, the bailee may protect himself by bringing the third-party claimant into a lawsuit along with the bailor so that all the competing claims can be adjudicated by the court before the bailee releases the property. This remedy is not always available, however.

Limits on Liability Bailees may try to limit or relieve themselves of liability for the bailed property. Some examples include the storage receipts purporting to limit liability to a fixed amount such as \$100, signs near checkrooms such as “Not responsible for loss of or damage to checked property,” and disclaimers on claim checks such as “Goods left at owner’s risk.” The standards used to determine whether such limitations and disclaimers are enforceable are discussed in Chapter 15.

Any attempt by the bailee to be relieved of liability for intentional wrongful acts is against public policy and will not be enforced. A bailee’s ability to be relieved of liability for negligence is also limited. Courts look to see whether the disclaimer or limitation of liability was communicated to the bailor at the time of the bailment. When the customer handed her coat to the checkroom attendant, did the attendant point out the “not responsible for loss or damage” sign? Did the parking lot attendant call the car owner’s attention to the disclaimer on the back of the claim check?

If not, the court may hold that the disclaimer was not communicated to the bailor and did not become part of the bailment contract. Even if the bailor was aware of the disclaimer, it still may not be enforced on the ground that it is contrary to public policy.

If the disclaimer was offered on a take-it-or-leave-it basis and was not the subject of arm’s-length bargaining, it is less likely to be enforced than if it was negotiated

and voluntarily agreed to by the parties. A bailee may be able to limit liability to a certain amount or to relieve himself of liability for certain perils. Ideally, the bailee will give the bailor a chance to declare a higher value and to pay an additional charge in order to be protected up to the declared value of the goods. Common carriers, such as railroads and trucking companies, often take this approach. Courts do not look with favor on efforts by a person to be relieved of liability for negligence. For this reason, terms limiting the liability of a bailee stand a better chance of being enforced than do terms completely relieving the bailee of liability.

An implied agreement as to the bailee’s duties may arise from a prior course of dealing between the bailor and the bailee, or from the bailor’s knowledge of the bailee’s facilities or method of doing business. The bailee may, if he wishes, assume all risks incident to the bailment and contract to return the bailed property undamaged or to pay for any damage to or loss of the property.

Right to Compensation The express or implied contract creating the bailment controls whether the bailee has the right to receive compensation for keeping the property or must pay for having the right to use it. If the bailment is made as a favor, then the bailee is not entitled to compensation even though the bailment is for the bailor’s sole benefit. If the bailment involves the rental of property, the bailee must pay the agreed rental rate. If the bailment is for the storage or repair of property, the bailee is entitled to the contract price for the storage or repair services. When no specific price was agreed on but compensation was contemplated by the parties, the bailee is entitled to the reasonable value of the services provided.

In many instances, the bailee will have a lien (a charge against property to secure the payment of a debt) on the bailed property for the reasonable value of the services. For example, Silver takes a chair to Ace Upholstery to have it recovered. When the chair has been recovered, Ace has the right to keep it until the agreed price—or, if no price was set, the reasonable value of the work—is paid. This is an example of an **artisan’s lien**, which is discussed in Chapter 29.

Bailor’s Liability for Defects in the Bailed Property When personal property is rented or loaned, the bailor makes an implied warranty that the property has no hidden defects that make it unsafe for use. If the bailment is for the bailee’s sole benefit, the bailor is liable for injuries that result from defects

in the bailed property only if the bailor knew about the defects and did not tell the bailee. For example, Price lends his car, which he knows has bad brakes, to Sloan. If Price does not tell Sloan about the bad brakes and Sloan is injured in an accident because the brakes fail, Price is liable for Sloan's injuries.

If the bailment is a bailment for mutual benefit, the bailor has a greater obligation. The bailor must use reasonable care in inspecting the property and seeing that it is safe for the purpose for which it is intended. The bailor is liable for injuries suffered by the bailee because of defects that the bailor either knew about or should have discovered through reasonable inspection. For example, Acme Rent-All, which rents trailers, does not inspect the trailers after they are returned. A wheel has come loose on a trailer that Acme rents to Hirsch. If the wheel comes off while Hirsch is using the trailer and the goods Hirsch is carrying in it are damaged, Acme is liable to Hirsch.

In addition, product liability doctrines that apply a higher standard of legal responsibility have been applied to bailors who are commercial lessors of personal property.⁹ Express or implied warranties of quality under either Article 2 or Article 2A of the UCC may apply. Liability under these warranties does not depend on whether the bailor knew about or should have discovered the defect. The only question is whether the property's condition complied with the warranty. Some courts have also imposed strict liability on the commercial lessor-bailor of defective, unreasonably dangerous goods that cause personal injury or property damage to the lessee-bailee. This liability is imposed regardless of whether the lessor was negligent.

Special Bailments

Common Carriers Bailees that are common carriers are held to a higher level of responsibility than are bailees that are private carriers. Common carriers are licensed by governmental agencies to carry the property of anyone who requests the service. Private contract carriers carry goods only for persons selected by the carrier.

Both common carriers and private contract carriers are bailees. However, the law makes the common carrier a near-absolute insurer of the goods it carries. The common carrier is responsible for virtually any loss of or

damage to the entrusted goods, unless the common carrier shows that the loss or damage was caused by one of the following:

1. An act of God.
2. An act of a public enemy.
3. An act or order of the government.
4. An act of the person who shipped the goods.
5. The nature of the goods themselves.

Therefore, the common carrier is liable if goods entrusted to it are stolen by some unknown person, but not if the goods are destroyed when the warehouse is damaged by a hurricane.

If goods are damaged because the shipper improperly packaged or crated them, the carrier is not liable. Similarly, if perishable goods are not in suitable condition to be shipped and therefore deteriorate in the course of shipment, the carrier is not liable so long as it used reasonable care in handling them.

Common carriers are usually permitted to limit their liability to a stated value unless the bailor declares a higher value for the property and pays an additional fee.

Hotelkeepers Hotelkeepers are engaged in the business of offering food and/or lodging to transient persons. They hold themselves out to serve the public and are obligated to do so. As is the common carrier, the hotelkeeper is held to a higher standard of care than that of the ordinary bailee. The hotelkeeper, however, is not a bailee in the strict sense of the word. The guest does not usually surrender the exclusive possession of his property to the hotelkeeper. Even so, the hotelkeeper is treated as the virtual insurer of the guest's property. The hotelkeeper is not liable for loss of or damage to property if she shows that it was caused by one of the following:

1. An act of God.
2. An act of a public enemy.
3. An act of a governmental authority.
4. The fault of a member of the guest's party.
5. The nature of the goods.

Most states have passed laws that limit the hotelkeeper's liability, however. Commonly, the law requires the hotel owner to post a notice advising guests that any valuables should be checked into the hotel vault. The hotelkeeper's liability is then limited, usually to a fixed amount, for valuables that are not so checked.

⁹Product liability doctrines are discussed in Chapter 20.

CYBERLAW IN ACTION

Online Tracking of Bailments

To lower package loss and increase consumer confidence, many large shipping companies such as UPS and FedEx provide an online tracking system. The tracking system is used by companies to identify and trace all packages as they move through the company's system to their destination. Often a package is assigned a tracking code or number that the customer can use to locate the package using an online mapping system. If a package is feared to be lost, Internet access to the tracking system allows customers immediate confirmation of its location en

route, or place and time of delivery. The confidence that Internet tracking systems gives consumers increases the possibility that they will become repeat customers. Furthermore, the tracking system reveals the company's internal systems of operation to the consumer. This transparency of operation creates a forcing function that encourages companies to be certain that their shipping system is in smooth working order. Also, companies can view the tracking system to determine what shipping routes their competitors are using. Finally, the online tracking system saves a company money by lowering the cost of paying for representatives to deal with customer inquiries.

CONCEPT REVIEW

Duties of Bailees and Bailors

| Type of Bailment | Duties of Bailee | Duties of Bailor |
|-------------------------------|---|---|
| Sole Benefit of Bailee | <ol style="list-style-type: none"> 1. Must use great care; liable for even slight negligence. 2. Must return goods to bailor or dispose of them at his direction. 3. Must notify bailee of all known defects and any hidden defects that are known or could be discovered on reasonable inspection. 2. May have duty to compensate bailee. |

Safe-Deposit Boxes If a person rents a safe-deposit box at a local bank and places property in the box, the box and the property are in the physical possession of the bank. However, it takes both the renter's key and the key held by the bank to open the box. In most cases, the bank does not know the nature, amount, or value of the goods in the box. Although a few courts have held that the rental of a safe-deposit box does not create a bailment, most courts have concluded that the renter of the box is a bailor and the bank is a bailee. As such, the bank is not an insurer of the contents of the box. It is obligated, however, to use due care and to come forward and explain loss of or damage to the property entrusted to it.

Involuntary Bailments Suppose a person owns a cottage on a beach. After a violent storm, a sailboat washed up on his beach. As the finder of lost or misplaced property, he may be considered the **involuntary bailee** or **constructive bailee** of the sailboat. This relationship may arise when a person finds himself in possession of someone else's property without having agreed to accept possession.

The duties of the involuntary bailee are not well defined. The involuntary bailee does not have the right to destroy or use the property. If the true owner shows up, the property must be returned to him. Under some circumstances, the involuntary bailee may be under an obligation to assume control of the property or to take some minimal steps to ascertain the owner's identity, or both.

Documents of Title

Storing or shipping goods, giving a warehouse receipt or bill of lading representing the goods, and transferring such a receipt or bill of lading as representing the goods are practices of ancient origin. The warehouseman or the common carrier is a bailee of the goods who contracts to store or transport the goods and to deliver them to the owner or to act otherwise in accordance with the lawful directions of the owner. The warehouse receipt or the bill of lading may be either negotiable or nonnegotiable. To be negotiable, a warehouse receipt, bill of lading, or other document of title must provide that the goods are to be delivered to the bearer or to the order of a named person [7-104(1)]. The primary differences between the law of negotiable instruments and the law of negotiable documents of title are based on the differences between the obligation to pay money and the obligation to deliver specific goods.

Warehouse Receipts A warehouse receipt, to be valid, need not be in any particular form, but if it does not embody within its written or printed form each of the following, the warehouseman is liable for damages caused by the omission to a person injured as a result of it: (1) the location of the warehouse where the goods are stored; (2) the date of issue; (3) the consecutive number of the receipt; (4) whether the goods are to be delivered to the bearer or to the order of a named person; (5) the rate of storage and handling charges; (6) a description of the goods or of the packages containing them; (7) the signature of the warehouseman or his agent; (8) whether the warehouseman is the owner of the goods, solely, jointly, or in common with others; and (9) a statement of the amount of the advances made and of the liabilities incurred for which the warehouseman claims a lien or security interest. Other terms may be inserted [7-202].

A warehouseman is liable to a purchaser for value in good faith of a warehouse receipt for nonreceipt or misdescription of goods. The receipt may conspicuously qualify the description by a statement such as "contents, condition, and quantity unknown" [7-203].

Because a warehouseman is a bailee of the goods, he owes to the holder of the warehouse receipt the duties of a mutual benefit bailee and must exercise reasonable care [7-204]. The warehouseman may terminate the relation by notification where, for example, the goods are about to deteriorate or where they constitute a threat to other goods in the warehouse [7-206]. Unless the warehouse receipt provides otherwise, the warehouseman must keep separate the goods covered by each receipt; however, different lots of fungible goods such as grain may be mingled [7-207].

A warehouseman has a lien against the bailor on the goods covered by his receipt for his storage and other charges incurred in handling the goods [7-209]. The Code sets out a detailed procedure for enforcing this lien [7-210].

Bills of Lading In many respects, the rights and liabilities of the parties to a negotiable bill of lading are the same as the rights and liabilities of the parties to a negotiable warehouse receipt. The contract of the issuer of a bill of lading is to transport goods, whereas the contract of the issuer of a warehouse receipt is to store goods. Like the issuer of a warehouse receipt, the issuer of a bill of lading is liable for nonreceipt or misdescription of the goods, but he may protect himself from liability where he does not know the contents of packages by marking the bill of lading "contents or condition of packages unknown" or similar language. Such terms are ineffective when the

The Global Business Environment

Liability of Carriers of Goods

When an American firm ships goods to a foreign buyer, the goods may be shipped by ground, air, or water carrier. The duties and extent of liability of these various carriers is largely determined by domestic statutes and international law.

Ground Carriers

American trucking and railroad companies are regulated by the Interstate Commerce Act. American carriers are liable for any loss or damage to the goods with few exceptions—for example, damage caused by acts of God and acts of the shipper (usually the seller of the goods), such as poorly packaging the goods. An American carrier may limit its liability by contract, provided it allows the shipper to obtain full liability by paying a higher shipping charge.

Most European trucking companies and railroads are covered by EU rules, which place liability on carriers for damages to goods they carry with few exceptions—for example, defective packaging by the shipper and circumstances beyond the carrier's control. EU rules also limit a carrier's liability unless the shipper agrees to pay for greater liability.

Air Carriers

The Warsaw Convention governs the liability of international air carriers. Most nations have ratified the Warsaw Convention in its original or amended form. Under the Convention, an air carrier is liable to the shipper for damages to goods with few exceptions, including that it was impossible for the carrier to prevent the loss or that the damage was caused by the negligence of the shipper. The Warsaw Convention limits a carrier's liability to a stated amount per pound, unless the shipper pays for greater liability.

Water Carriers

The Hague Rules govern the liability of international water carriers. The Hague Rules were amended in Vishy, Sweden, in

1968. The United States codified the Hague Rules in the Carriage of Goods by Sea Act (COGSA), but has not ratified the Visby amendments, which do not substantially change the liability of international water carriers.

The Hague–Visby Rules and the COGSA impose on international water carriers the duties to (1) furnish a seaworthy ship and (2) stow the cargo carefully to prevent it from breaking loose during storms at sea. When these duties are met, a water carrier will not usually be liable for damages to cargo. Water carriers have no liability for damages caused by circumstances beyond their control—such as poor packaging, piracy, or acts of war. Under COGSA, liability is limited to \$500 per package, unless the shipper agrees to pay a higher shipping fee. Under the Hague–Visby Rules, liability will be the value of the goods declared by the shipper. Sometimes a carrier will attempt to reduce or eliminate its liability in the shipping contract. However, COGSA does not permit a carrier to eliminate its liability for loss or damages to goods resulting from the carrier's negligence or other fault.

Under COGSA or the Hague–Visby Rules, the owner of cargo will be liable for damage his cargo does to other cargo. Also, under the ancient **maritime doctrine of general average**, when a carrier sacrifices an owner's cargo, such as throwing it overboard in order to save the ship and the other cargo, the other owners have liability to the owner whose cargo was sacrificed; liability is prorated to each owner according to the value of each owner's goods in relation to the value of the voyage (the value of the ship plus the value of the other owners' goods plus the carrier's total shipping fees).

The doctrine of general average is commonly expanded by the contract between the carrier and cargo owners in **New Jason clauses**. Typically, a New Jason clause provides that in *all* cases when goods are damaged and the carrier is not liable under COGSA, the goods owner is entitled to general average contributions from all other cargo owners. The doctrine of general average, bolstered by a New Jason clause, also requires cargo owners to pay for damages to the ship when not the result of the carrier's fault.

Ethics in Action

Is It Ethical?

Suppose that you own and operate a warehouse. A local liquor store owner occasionally uses your facilities to store shipments of wine from France until he has room for the wine in his store. You are aware that from time to time your

warehouse employees “borrow” a bottle from the crates of wine being stored in your warehouse. After a number of crates with a total of four bottles missing are delivered to the liquor store, the store owner queries you about the missing bottles and you tell him that they must have been broken in transit to your warehouse. Have you acted ethically?

goods are loaded by an issuer who is a common carrier unless the goods are concealed by packages [7–301].

Duty of Care A carrier who issues a bill of lading, or a warehouse operator who issues a warehouse receipt, must exercise the same degree of care in relation to the goods as a reasonably careful person would exercise under similar circumstances. Liability for damages not caused by the negligence of the carrier may be imposed

on him by a special law or rule of law. Under tariff rules, a common carrier may limit her liability to a shipper's declaration of value, provided that the rates are dependent on value [7–309].

In the case that follows, *Gyamfoah v. EG&G Dynatrend*, a warehouseman who was unable to return goods that had been entrusted to it for safekeeping or to account for their disappearance was held liable to the bailor for the value of the goods.

Gyamfoah v. EG&G Dynatrend (now EG&G Technical Services) 51 U.C.C. Rep. 2d 805 (E.D. Penn. 2003)

On May 7, 1999, Yaa Gyamfoah, a citizen of Ghana, arrived at JFK International Airport with two suitcases containing a number of watches she had purchased in Hong Kong. The suitcases were seized by U.S. Customs because it suspected the watches were counterfeit. Gyamfoah was given a receipt for 3,520 watches. The watches were transported to a warehouse operated by EG&G Dynatrend (EG&G), now known as EG&G Technical Services, under contract with the U.S. Department of Treasury to provide seized management services for all agencies of the department. The warehouse accepted and signed for the watches on June 2, 1999.

On October 13, U.S. Customs advised Gyamfoah's agent that the nonviolative (ones that were not counterfeit) portion of the seizure (2,940 watches) would be released upon payment of \$1,470. On November 18, a Customs agent, observed by EG&G's warehouse supervisor, separated the watches into a group of 580 "violative" watches, which were placed in a carton, and 2,940 "nonviolative" watches, which were placed back in the suitcases. The carton and the suitcases were then returned to the custody of EG&G. When the Customs agent returned on November 24 to again, under the observation of the warehouse supervisor, examine the watches, there were only 1,002 watches in the carton and suitcases; some 2,518 were missing.

Gyamfoah subsequently brought suit against the United States and EG&G. The claim against the United States was dismissed, and the case went to trial on the claim against EG&G.

O'Neil, Jr., Judge

The duties of a warehouseman that existed under New Jersey common law have now been codified in *N.J.S.A. 12A: 7-101*. EG&G is a warehouseman under the definition in the statute: "a person engaged in the business of storing goods for hire." New Jersey requires that a warehouseman exercise reasonable care when storing bailed items. The statute imposes the following liability, in a provision adopted from the Uniform Commercial Code:

A warehouseman is liable for damages for loss of or injury to the goods caused by his failure to exercise such care in regard to them as a reasonably careful man would exercise under like circumstances but unless otherwise agreed he is not liable for damages which could not have been avoided by the exercise of such care.

N.J.S.A. 12A: 7-204(1).

The warehouseman's statute has been interpreted to involve a burden-shifting scheme that reflects that common law of bailment. The bailor must present a *prima facie* case of

conversion by proving (1) delivery of the bailed goods to the bailee; (2) demand for return of the bailed goods from the bailee; and (3) failure of the bailee to return the bailed goods. Once the bailee has proved these three points, the burden shifts to the bailee to show how the bailed goods were lost. If the bailee cannot prove how the bailed goods were lost it is liable under the New Jersey statute for conversion. Although the burden of proof regarding how the goods were lost shifts to the defendant, the burden of proving conversion rests at all times on the bailor as plaintiff.

The tort of conversion that can be proved under the statute is not necessarily an intentional tort. In this instance "[a] conversion can occur even when a bailee has not stolen the merchandise but has acted negligently in permitting the loss of the merchandise from its premises." In other words, if a bailor establishes that the bailed goods had disappeared while in the care of the bailee, there is a rebuttable presumption of conversion based either on the bailee's negligent conduct in permitting third parties to steal the goods, or by the negligent or intentional conduct of the bailee's employees or agents.

As established earlier, I find that Gyamfoah showed by a preponderance of the evidence that: (1) 3,520 watches were delivered to EG&G's warehouse; (2) when Gyamfoah's agent presented the papers entitling Gyamfoah to return of the watches 2,518 watches were missing; and (3) the U.S. Customs officers who manipulated the watches did not remove the missing watches.

Therefore, Gyamfoah has established delivery to EG&G and EG&G's failure to redeliver all of the items on Gyamfoah's demand. Under New Jersey law this creates a rebuttable presumption of conversion by EG&G.

EG&G produced evidence at trial of reasonable precautions against loss. Mr. Wenzel testified that the watches were shrink-wrapped to a pallet and stored in a secured area on a high shelf that required a forklift to be reached. Paul Hehir, the EG&G district manager who oversaw operations in the New York district of the company, also testified about security. He testified that the area in which the watches were stored was armed and within a gated area that only EG&G employees could enter.

EG&G does not provide any evidence, however, regarding what happened to the missing watches. EG&G mentions the possibility that the missing watches were never delivered to the warehouse. This possibility is refuted, however, by evidence that U.S. Customs officers left the warehouse on November 18 thinking that there were 3,520 watches in storage. As I stated earlier, I find that Gyamfoah has proved by a preponderance of the evidence that there were 3,520 watches in the suitcases when the suitcases were delivered to EG&G's warehouse. There is no explanation for the disappearance of the watches

other than EG&G's negligence. In fact, when asked "so it's fair to say that sitting here today, EG&G can offer no explanation of the loss of the majority of the contents of those two suitcases?" EG&G employee Mr. Herir testified "I cannot offer any explanation, no."

EG&G has not met its burden to rebut the presumption of negligence created by plaintiff's case. Gyamfoah has met her burden of proving by a preponderance of the evidence that EG&G is liable to her under New Jersey's law of bailment, as found in Section 7-204(1) and the common law. EG&G is liable for the value of the lost watches.

Gyamfoah has proved by a preponderance of the evidence that EG&G is liable for the loss of 2,518 watches. For negligence, the measure of damages is the value of the lost goods.

The only evidence presented at trial regarding the value of the missing watches is a receipt from Andex Trading Limited. The receipt lists ten models of watches, the quantity bought by Gyamfoah, the unit price and the amount paid for the number of watches of each model bought. Because Gyamfoah has not shown which models the 2,518 missing watches were, I will calculate damages as if the least expensive 2,518 watches are missing.

The cost of the least expensive 2,518 watches is \$3,781.30. That includes 300 watches at \$0.90 each, 100 watches at \$1.40 each, 350 watches at \$1.55 each and 1,768 watches at \$1.60 each.

***Judgment in favor of Yaa Gyamfoah and against EG&G
Dynatrend in the amount of \$3,781.30.***

Negotiation of Document of Title A negotiable document of title and a negotiable instrument are negotiated in substantially the same manner. If the document of title provides for the delivery of the goods to bearer, it may be negotiated by delivery. If it provides for delivery of the goods to the order of a named person, it must be endorsed by that person and delivered. If an order document of title is endorsed in blank, it may be negotiated by delivery unless it bears a special endorsement following the blank endorsement, in which event it must be endorsed by the special endorsee and delivered [7-501].

A person taking a negotiable document of title takes as a bona fide holder if she takes in good faith and in the regular course of business. The bona fide holder of a negotiable document of title has substantially the same advantages over a holder who is not a bona fide holder or over a holder of a nonnegotiable document of title as

does a holder in due course of a negotiable instrument over a holder who is not a holder in due course or over a holder of a nonnegotiable instrument.

Rights Acquired by Negotiation A person who acquires a negotiable document of title by due negotiation acquires (1) title to the document, (2) title to the goods, (3) the right to the goods delivered to the bailee after the issuance of the document, and (4) the direct obligation of the issuer to hold or deliver the goods according to the terms of the document [7-502(1)].

Under the broad general principle that a person cannot transfer title to goods he does not own, a thief—or the owner of goods subject to a perfected security interest—cannot, by warehousing or shipping the goods on a negotiable document of title and then negotiating the document of title, transfer to the purchaser of the document of title a better title than he has [7-503].

Warranties of Transferor of Document of Title

The transferor of a negotiable document of title warrants to his immediate transferee, in addition to any warranty of goods, only that the document is genuine,

that he has no knowledge of any facts that would impair its validity or worth, and that his negotiation or transfer is rightful and fully effective with respect to the title to the document and the goods it represents [7–507].

Problems and Problem Cases

1. Leonard Charrier was an amateur archeologist. After researching colonial maps and records, he concluded that the Trudeau Plantation near Angola, Louisiana, was the possible site of an ancient village of the Tunica Indians. Charrier obtained the permission of the caretaker of the Trudeau Plantation to survey the property with a metal detector for possible burial locations. At the time, he mistakenly believed that the caretaker was the Plantation's owner. He located and, over the next three years, excavated approximately 150 burial sites containing beads, European ceramics, stoneware and glass bottles; iron kettles, vessels, and skillets; knives, muskets, gunflints, balls, and shots; crucifixes, rings, and bracelets; and native pottery. He began discussions with Harvard University to sell the collection to its Peabody Museum. While the University inventoried, cataloged, and displayed the items pursuant to a lease agreement, it was unwilling to go through with a sale unless Charrier could establish title to the artifacts. He then brought suit against the owners of the Trudeau Plantation seeking a declaratory judgment that he was the owner of the artifacts. The state of Louisiana intervened in the litigation to assert the rights of the lawful heirs of the artifacts. Charrier argued that the Indians abandoned the artifacts when they moved from the Trudeau Plantation in 1764. He contended that they were unowned property until he found them and reduced them to his possession. He compared them to wild game and fish, which are unowned until someone takes possession of them. Were the artifacts abandoned property of which Charrier could become the owner by taking possession?
2. Alex Franks was staying at a Comfort Inn in Searcy, Arkansas, while working on a highway project. He checked into the hotel on Monday, September 10. Two days later, after he had checked out and returned to his room to retrieve some laundry, he discovered \$14,200 in plain view in a drawer of the dresser in the room. It was wrapped tightly with masking tape, like a brick, with some of the money showing. Franks notified the hotel manager, who in turn notified the police. The police determined that there were two bundles of money separated by denominations and then bundled together. The bundle contained 46 one hundred dollar bills and 480 twenty dollar bills. The officer who took custody of the money testified that the money appeared to be intentionally and meticulously wrapped because all the bills faced in the same direction. Franks brought suit against the City of Searcy claiming the money. The city joined the owners of the hotel as third-party defendants and then withdrew any claim on its part to the money. Should the court hold that the money is abandoned, lost, or mislaid? Between Franks and the owner of the hotel, who has the best right to it? Why?
3. Rick Kenyon purchased a painting by a noted Western artist, Bill Gollings, valued between \$8,000 and \$15,000 for \$25 at a Salvation Army thrift store. Claude Abel filed suit against Kenyon seeking the return of the painting, which had belonged to his late aunt. Abel claimed that the Salvation Army mistakenly took the painting from his aunt's house when the box in which it was packed was mixed with items being donated to the thrift store. Abel's aunt, Billie Taylor, was a friend of the artist whose works were known for their accurate portrayal of the Old West. Sometime before his death in 1932, Gollings gave a painting to Taylor depicting a Native American on a white horse in the foreground with several other Native Americans on horses in the background traveling through a traditional Western prairie landscape. The painting remained in Taylor's possession at her home in Sheridan, Wyoming, until her death on August 31, 1999. After Taylor's death, Abel traveled from his home in Idaho to Sheridan for the funeral and to settle the estate. Abel was the sole heir of Taylor's estate, so he inherited all of her personal belongings, including the Gollings painting. Abel and his wife sorted through Taylor's belongings, selecting various items they would keep for themselves. Abel and his wife, with the help of a local moving company, packed those items into boxes marked for delivery to their home in Idaho. Items not being

retained by Abel were either packed for donation to the Salvation Army or, if they had sufficient value, were taken by an antiques dealer for auction. The scene at the house was one of some confusion as Abel tried to vacate the residence as quickly as possible while attempting to make sure all of the items went to their designated destinations. The painting was packed by Abel's wife in a box marked for delivery to Idaho. However, in the confusion and unbeknown to Abel, the box containing Gollings's painting was inadvertently picked up with the donated items by the Salvation Army. It was priced at \$25 in its thrift store and sold to Kenyon. After returning to Idaho, Abel discovered that the box containing the painting was not among those delivered by the moving company. He also learned that the painting had gone to the Salvation Army and had been sold to Kenyon. When Kenyon refused to acknowledge he had the painting, Abel brought suit seeking its return. Kenyon claimed that he was a good faith purchaser of the painting that had been given to the Salvation Army. Was Abel entitled to have the painting returned to him on the grounds that not having made a gift of the painting, he was still the owner, and that its sale by the Salvation Army was a conversion of his property?

4. Chad Clippard and Jamie Pfefferkorn dated for four or five months in late 2002. On December 23, Chad proposed marriage to Jamie and presented her with a 2.02-carat diamond engagement ring valued at approximately \$13,500. Jamie accepted the proposal and the ring. Several days later, they exchanged Christmas gifts. During the weeks following Christmas 2002, the couple experienced difficulties in their relationship. On February 8, 2003, Chad terminated the engagement. He attributed the decision not to go forward with marriage to a belief that Jamie was not the "right" person and to the influence of his brother, sisters, and parents. There were times during the engagement when it was "off" and Jamie returned the ring to Chad, but when the parties renewed the engagement he gave it back to her. When the couple finally broke up, Chad asked Jamie to return the ring, but she refused. In July 2003, Chad filed a petition in court seeking a court order to have Jamie return the ring or, in the alternative, to pay damages in the amount of \$13,500, the approximate value of the ring. Jamie took the position that she was entitled to keep the ring because the ring

constituted either (1) a Christmas gift that as an *inter vivos* gift was absolute when she received it; or (2) a conditional gift, which became absolute when Chad terminated the engagement. Chad denied that it was a Christmas gift. He claimed that it was a gift in contemplation of marriage and thus a conditional gift that had to be returned upon the termination of the engagement. Is Jamie entitled to retain the ring?

5. Faith Ballard's Corvette was substantially damaged in an accident and was being stored in her garage. Her son, Tyrone Ballard, told her that he would take the vehicle and have it restored. Instead he sold it to Lambert Auto Parts. Johnny Wetzel purchased the Corvette "hull" for \$900 from Lambert, whose regular business is selling parts. Wetzel obtained a receipt documenting the purchase of the parts. He also checked the VIN numbers through the county clerk's office to make sure the parts were not stolen. Wetzel spent approximately \$5,000 and 100 hours of labor restoring the vehicle. When completed, the restoration had a market value of \$7,950. George Martin, an employee of Lambert, testified that he purchased only a "hull" of a car—rather than a whole vehicle—from Tyrone Ballard. Martin also testified that he usually received a title when he bought a "whole" vehicle but had not received one in this case where he had purchased only part of one. Under Tennessee law, a certificate of title is not required to pass ownership of a motor vehicle, but any owner dismantling a registered vehicle is to send the certificate of title back to the state. Faith Ballard brought suit against Wetzel to recover possession of the Corvette. Wetzel contended that he was a good faith purchaser for value and had become the owner of the restored auto hull by accession. Did Wetzel become the owner of the Corvette by accession?
6. R. B. Bewley and his family drove to Kansas City to attend a week-long church convention. When they arrived at the hotel where they had reservations, they were unable to park their car and unload their luggage because of a long line of cars. They then drove to a nearby parking lot where they took a ticket, causing the gate arm to open, and drove in 15 or 20 feet. A parking attendant told them that the lot was full, that they should leave the keys with him, and that he would park the car. They told the attendant that they had reservations at the nearby hotel and that after they checked in they would come back for their luggage. Subsequently, someone broke into

the Bewley's car and stole their personal property from the car and its trunk. Was the parking lot a bailee of the property?

7. On March 27, 2001, Felice Jasphy brought three fur coats to Illana Osinsky's establishment trading as Cedar Lane Furs in Teaneck, New Jersey, for storage and cleaning. The three coats included a ranch mink coat, a Shearling, and a blush mink. In addition to storage of the three coats, Jasphy also sought cleaning of the ranch mink. In 1997, the ranch mink had been appraised for \$11,500; the Shearling for \$3,500; and the blush mink for \$3,995. Jasphy signed a written agreement, labeled "fur storage sales receipt," which included Jasphy's name and address, and the price of the storage and cleaning. On the back of the receipt, the following preprinted provision limiting Cedar Lane Furs' liability read:

This receipt is a storage contract, articles listed are accepted for storage until December 31, of dated year, subject to the terms and conditions hereof, in accepting this receipt, the depositor agrees to be bound by all its terms and conditions and acknowledges that this receipt is the entire agreement with the furrier, which cannot be changed except by endorsement herein signed by the furrier. If no value is specified, or if no separate insurance covering the garment is declared at the time of issuance of this receipt, insurance in the amount of \$1.00 will be placed on the garment.

Immediately above the location on the receipt for a customer's signature, the following was printed: "I understand and agree that Cedar Lane Furs' liability for loss or damage from any cause whatsoever, including their own negligence or that of employees and others, is limited to the declared valuation." Jasphy did not state the value of the coats or declare whether she had separate insurance coverage when the receipt was issued. There is no identifiable room provided on the receipt to specify such information. The limitation of the furrier's liability was not brought to Jasphy's attention, nor was she asked to furnish the value of her coats for storage. The following day, March 28, 2001, a fire swept through Cedar Lane Furs, causing Jasphy's furs to be completely destroyed. A hot iron, which Cedar Lane Furs' employees apparently forgot to unplug overnight, caused the fire. Jasphy subsequently learned that her furs had not been placed in the fur vault before the fire and were destroyed in the fire.

Jasphy filed a claim form with Cedar Lane Furs' insurance company but never received any reimbursement. She then brought suit against Osinsky and Cedar Lane Furs. They contended that their liability was limited by the contract provision to \$1 per garment. Should the court enforce the contractual provision limiting the furrier's liability to \$1 per garment?

8. In early 1991, William Seebold, the president of Eagle Boats, Ltd., was approached by a boating magazine, *Trailer Boats*, about doing a feature on a motorboat manufactured by Eagle Boats. The magazine feature would include a written article and photographs of the boat on Grand Lake near Ketchum, Oklahoma. Seebold expressed interest in the idea to the magazine's representative. At the time, a motorboat owned by Hoppies Village Marina was at Eagle Boat's facility in Fenton, Missouri, undergoing minor paint repairs. The motorboat was a 1991 Seebold Eagle 265 Limited Edition: a 26-foot, 4,000- to 4,500-pound, 600-horsepower supercharged motorboat capable of attaining a speed of 80 mph. It was considered to be the "Cadillac" of motorboats in its class. Seebold called Hoppies about using its motorboat for the magazine article, which would include information not only about the motorboat and Eagle Boats, but also about Hoppies Village Marina. Hoppies agreed. The arrangement was for Seebold to transport the boat to Ketchum and then return it to Hoppies' custody. After the touch-up work on the motorboat was finished, the boat was loaded onto a custom-built trailer owned by Hoppies. The trailer did not have a locking device on it—a device capable of locking the trailer to the truck. The trailer was then hooked up to an Eagle Boats truck, and Seebold drove it to Ketchum. He arrived at the Grand Lodge Inn about 9:30 PM. The demonstration for the magazine was scheduled for 6:00 AM the next morning.

Seebold parked the truck, boat, and trailer on the motel's parking lot, parallel to a fence at the end of the lot, facing away from the highway. There was one dusk-to-dawn light shining in front of the motel, and the boat was parked across the lot from this light. The parking lot was small and narrow, making it difficult for the boat and trailer to be turned around. There were other boats parked on the lot, but this was the closest to the road and also the most expensive. Behind the motel were storage units. Seebold was awakened about 4:30 the next morning with the news that the boat and trailer were missing. At the

time of the theft, the motorboat and trailer had a combined fair market value of more than \$60,000. Hoppies' insurance carrier, Institute of London Underwriters, paid Hoppies' insurance claim. Then as the subrogee of Hoppies' claim against Eagle Boats, it brought suit against Eagle and Seebold for their failure to use reasonable care of the bailed motorboat and trailer to prevent their theft. Were Eagle Boats and Seebold, as bailees, liable to Hoppies Village Marina for their failure to use reasonable care to prevent the theft of the motorboat and trailer?

9. Marvin Gooden checked into a Day's Inn in Atlanta, paying in advance for two days' lodging. The next day he temporarily left his room. He left behind, in the room, a paper bag filled with approximately \$9,000. Shortly after Gooden left, housekeeper Mary Carter entered his room to clean it. Carter found the bag of money. Because she saw no other personal effects, Carter assumed that Gooden had checked out. She therefore turned the bag of money over to her supervisor, Vivian Clark. Clark gave the bag to Dempsey Wilson, who was responsible for general supervision and maintenance of the grounds. During the three years he had worked for Day's Inn, Wilson had occasionally been given items of value to turn in at the hotel's office. In the past, he had always turned in the items. This time, however, he absconded with the bag of money. There was a safe on the Day's Inn premises. Day's Inn had posted, on the door of Gooden's room, a notice concerning the safe's availability for use by guests who had valuables with them. Gooden, who had never sought the use of the safe, brought a tort action against Day's Inn, Clark, and Carter in an effort to collect \$9,000 in damages. Day's Inn argued that it was protected against liability by the following Georgia statute: "The innkeeper may provide a safe or other place of deposit for valuable articles and, by posting a notice thereof, may require the guests of the innkeeper to place such valuable articles therein or the innkeeper shall be relieved from responsibility for such articles." Gooden contended, however, that the statute could not insulate an innkeeper from liability when the loss of a guest's valuables is occasioned by the negligent (or other tortious) conduct of the innkeeper's employees.

Should Gooden prevail against Day Inn, Clark, and Carter?

10. Griswold and Bateman Warehouse Company stored 337 cases of Chivas Regal Scotch Whiskey for Joseph H. Reinfeld, Inc., in its bonded warehouse. The warehouse receipt issued to Reinfeld limited Griswold and Bateman's liability for negligence to 250 times the monthly storage rate, a total of \$1,925. When Reinfeld sent its truck to pick up the whiskey, 40 cases were missing. Reinfeld then brought suit seeking the wholesale market value of the whiskey, \$6,417.60. Reinfeld presented evidence of the delivery of the whiskey, the demand for its return, and the failure of Griswold and Bateman to return it. Reinfeld claimed that the burden was on Griswold and Bateman to explain the disappearance of the whiskey. Griswold and Bateman admitted that it had been negligent, but sought to limit its liability to \$1,925: Is Griswold and Bateman's liability limited to \$1,925?

chapter 24

REAL PROPERTY

Joyce and John, a married couple with two young children, are in the process of buying a house. They made an offer on a single-family house in Greenwood, a new subdivision. The house has four bedrooms, one with custom-built bunk beds in it, four bathrooms, a swimming pool, and a large basement. There is a well-equipped kitchen and a large dining room with a vintage Tiffany lamp over the dining room table. The basement is perfect for Joyce, who plans to operate a small day care center in the house. Joyce and John notice that the next-door neighbors, the Fieldings, have been dumping their garden refuse in a ravine at the back of the property that they have offered to buy, but they assume that they will be able to stop that practice once they move in.

- Are the bunk beds and Tiffany lamp considered to be part of the real property that Joyce and John have offered to buy?
- If their offer is accepted, how will Joyce and John share ownership of the property? What form of ownership will they have?
- What are the steps involved in purchasing this property?
- What rights might others, such as the Fieldings, have in the property?
- What liability might John and Joyce have to others who are injured on their property?
- What controls does the legal system place on the use of property?
- Is it ethical for the Fieldings to dump their garden refuse on this property?

LAND'S SPECIAL IMPORTANCE IN the law has long been recognized. In the agrarian society of previous eras, land served as the basic measure and source of wealth. In today's society, land functions not only as a source of food, clothing, and shelter but also as an instrument of commercial and industrial development. It is not surprising, then, that a complex body of law—the law of *real property*—exists regarding the ownership, acquisition, and use of land.

This chapter discusses the scope of real property and the various legal interests in it. In addition, the chapter examines the ways in which real property is transferred and the controls society places on an owner's use of real property.

Scope of Real Property

Real property includes not only land but also things firmly attached to or embedded in land. Buildings and other permanent structures thus are considered real property. The owner of a tract of real property also owns the

air above it, the minerals below its surface, and any trees or other vegetation growing on the property.¹

Unlike readily movable personal property, real property is immovable or attached to something immovable. Distinguishing between real and personal property is important because rules of law governing real property transactions such as sale, taxation, and inheritance are frequently different from those applied to personal property transactions.

Fixtures An item of personal property may, however, be attached to or used in conjunction with real property in such a way that it ceases being personal property and instead becomes part of the real property. This type of property is called a **fixture**.

¹Ownership of air above one's property is not an unlimited interest, however. Courts have held that the flight of aircraft above property does not violate the property owner's rights, so long as it does not unduly interfere with the owner's enjoyment of her land.

Fixtures belong to the owner of the real property. One who provides or attaches fixtures to real property without a request to that effect from the owner of the real property is normally not entitled to compensation from the owner. A conveyance (transfer of ownership) of real property also transfers the fixtures associated with that property, even if the fixtures are not specifically mentioned.

People commonly install items of personal property on the real property they own or rent. Disputes may arise regarding rights to such property. Suppose that Jacobsen buys an elaborate ceiling fan and installs it in his home. When he sells the house to Orr, may Jacobsen remove the ceiling fan, or is it part of the home Orr has bought? Suppose that Luther, a commercial tenant, installs showcases and tracklights in the store she leases from Nelson. May Luther remove the showcases and the lights when her lease expires, or do the items now belong to Nelson? If the parties' contracts are silent on these matters, courts will resolve the cases by applying the law of fixtures. As later discussion will reveal, Jacobsen probably cannot remove the ceiling fan because it is likely to be considered part of the real property purchased by Orr. Luther, on the other hand, may be entitled to remove the showcases and the lights under the special rules governing trade fixtures.

Factors Indicating Whether an Item Is a Fixture

There is no mechanical formula for determining whether an item has become a fixture. Courts tend to consider these factors:

1. Attachment. One factor helping to indicate whether an item is a fixture is the degree to which the item is **attached** or **annexed** to real property. If firmly attached to real property so that it cannot be removed without damaging the property, the item is likely to be considered a fixture. An item of personal property that may be removed with little or no injury to the property is less likely to be considered a fixture.

Actual physical attachment to real property is not necessary, however. A close physical connection between an item of personal property and certain real property may enable a court to conclude that the item is **constructively annexed**. For example, heavy machinery or remote control devices for automatic garage doors may be considered fixtures even though they are not physically attached to real property.

2. Adaptation. Another factor to be considered is **adaptation**—the degree to which the item's use is necessary or beneficial to the use of the real property. Adaptation is a particularly relevant factor when the item is not physically attached to the real property or is only slightly attached. When an item would be of little value except for use with certain real property, the item is likely to be considered a fixture even if it is unattached or could easily be removed. For example, keys and custom-sized window screens and storm windows have been held to be fixtures.

3. Intent. The third factor to be considered is the **intent** of the person who installed the item. Intent is judged not by what that person subjectively intended, but by what the circumstances indicate he intended. To a great extent, intent is indicated by the annexation and adaptation factors. An owner of real property who improves it by attaching items of personal property presumably intended those items to become part of the real estate. If the owner does not want an attached item to be considered a fixture, he must specifically reserve the right to keep the item. For instance, if a seller of a house wants to keep an antique chandelier that has been installed in the house, she should either replace the chandelier before the house is shown to prospective purchasers or specify in the contract of sale that the chandelier will be excluded from the sale.

The following *Olbekson v. Huber* case illustrates the characteristics of a fixture.

Olbekson v. Huber

2002 Mont. Dist. LEXIS 2935 (Dist. Ct. Montana 2002)

In May 1994, Leo and Emelia Huber rented a house to Lois Olbekson, who was the daughter of their friends, Loren and Alice May Olbekson. Lois hoped to be able to purchase the house from the Hubers one day. The primary source of heat for the rental house was a wood furnace located in the basement. At around the time the Hubers entered into their rental agreement with Lois, they hired a local contractor to reline the brick chimney. Lois was not happy with the wood furnace. In the fall of 1995, she persuaded her parents to buy an oil furnace to replace the wood furnace in the rental house. During the process of installing the new oil furnace, the old wood furnace was removed from the rental house at the Olbeksons' direction and hauled to the landfill. Installation of the oil furnace required wiring in a thermostat and drilling a hole in the wall

to accommodate the fuel line from the outside oil tank, and the Olbeksons had to widen an existing doorway into the basement in order to accommodate the new oil furnace. The Olbeksons paid \$2,525 to have the new oil furnace installed. The Hubers acquiesced in the installation of the new furnace, but would not have done so if they had believed that they would be required to purchase it.

During the time that Lois lived in the Hubers' rental house, the Hubers spent approximately \$28,000 remodeling it, yet collected only \$175 per month in rent. Lois admitted that before the remodeling was complete, the reasonable rental value of the house was probably \$250 per month. In order to placate her husband about the rent, Emelia prepared an agreement which purported to tie the low rent to compensation for the cost of the furnace. The agreement, which Emelia and Lois signed, read as follows:

During October 1995, a fuel furnace for \$2,525.00 was installed at 317 W. Lincoln and paid for by Loren and Alice May Olbekson. To compensate for the expense of this heating device, rent on this residence will remain at \$175.00 per month thru the duration of Nov. 1st, 1995 thru Dec. 31st 1997.

Lois continued to rent the house until September 2000. Even though the written agreement provided that Lois would enjoy reduced rent only until December 31, 1997, the Hubers did not raise the rent at any time prior to the termination of the tenancy. At the end of Lois's tenancy, the Olbeksons removed the outside oil tank. Claiming the right to remove the oil furnace, they brought a claim against the Hubers for conversion of the oil furnace.

Prezeau, District Judge

The Olbeksons' claim is for conversion. A claim of conversion requires: ownership of property, a right of possession, and unauthorized dominion over the property by another resulting in damages. Whether or not the Olbeksons owned the oil furnace and had a right to possess it when Lois left premises depends upon real property law pertaining to fixtures. Montana law states that in the absence of an agreement otherwise, as between the property owner and the person who installed the fixture, the fixture belongs to the owner of the property.

70-18-101. Fixture attached by other—accession by owner. When a person affixes his property to the land of another, without an agreement permitting him to remove it, the thing affixed . . . belongs to the owner of the land unless he chooses to require the former to remove it.

There was no agreement between the parties that the Olbeksons could remove the oil furnace. Thus, if the furnace is a fixture, it belongs to the Hubers. A fixture is defined by Montana law as something that is permanently attached to real property by means of cement, plaster, nails, bolts, or screws. Ultimately, however, whether something is a fixture depends upon several factors. To determine whether an object has become a fixture or not, we consider the following factors: (1) annexation to the realty, (2) an adaptation to the use to which the realty is devoted, and (3) intent that the object become a permanent accession to the land.

Of those three, the intent of the parties has the most weight and is the controlling factor. The second two factors are particularly relevant to this case. The oil furnace was installed through a doorway that had to be enlarged to accommodate the new furnace. The furnace had to be wired to a thermostat, and

a hole had to be drilled into a wall of the house to attach the furnace to the outside oil tank. Clearly, the oil furnace was adapted to use as the rental house's primary heat source. As to the intent of the parties, the evidence is that Lois was hoping when she moved into the rental house that she might one day be in a position to purchase the house from the Hubers. Obviously, the Olbeksons would not be intending to install a temporary heat source into the house, which is born out by the fact that they not only disconnected the previous furnace, but they had it removed from the house with a backhoe and hauled away to the dump.

Even the Olbeksons admit that their alleged intention to remove the oil furnace was conditioned upon Lois not eventually purchasing the house. No reasonable person could believe that a tenant would have the right to remove the furnace from a rental house, replace it with a new furnace, and take the furnace with them years later (in this case, five years later) when the tenant vacates the premises, leaving the rental house without its primary heating system.

In addition to the definition of a fixture contained in § 70-15-103 (4), MCA, a fixture is defined as "anything affixed [to real property] for purposes of trade, manufacture, ornament, or domestic use if the removal can be effected without injury to the premises unless the thing has, by the manner in which it is affixed, become an integral part of the premises." Section 70-18-102, MCA. The oil furnace satisfies the definition on both counts; it is affixed to the house for domestic use and cannot be removed without injury to the premises, and it is affixed in such a manner that it is an integral part of the premises.

Judgment in favor of the Hubers.

Express Agreement If the parties to an express agreement have clearly stated their intent about whether a particular item is to be considered a fixture, a court will generally enforce that agreement. For example, the buyer and seller of a house might agree to permit the seller to remove a fence or shrubbery that would otherwise be considered a fixture.

Trade Fixtures An exception to the usual fixture rules is recognized when a tenant attaches personal property to leased premises for the purpose of carrying on her trade or business. Such fixtures, called **trade fixtures**, remain the tenant's personal property and may normally be removed at the termination of the lease. This trade fixtures exception encourages commerce and industry. It recognizes that the commercial tenant who affixed the item of personal property did not intend a permanent improvement of the leased premises.

The tenant's right to remove trade fixtures is subject to two limitations. First, the tenant cannot remove the fixtures if doing so would cause substantial damage to the landlord's realty. Second, the tenant must remove the

fixtures by the end of the lease if the lease is for a definite period. If the lease is for an indefinite period, the tenant usually has a reasonable time after the expiration of the lease to remove the fixtures. Trade fixtures not removed within the appropriate time become the landlord's property.

Leases may contain terms expressly addressing the parties' rights in any fixtures. A lease might give the tenant the right to attach items or make other improvements, and to remove them later. The reverse may also be true. The lease could state that any improvements made or fixtures attached will become the landlord's property at the termination of the lease. Courts generally enforce parties' agreements on fixture ownership.

Security Interests in Fixtures Special rules apply to personal property subject to a lien or security interest at the time it is attached to real property. Assume, for example, that a person buys a dishwasher on a time-payment plan from an appliance store and has it installed in his kitchen. To protect itself, the appliance store takes a security interest in the dishwasher and perfects that interest by filing a

CONCEPT REVIEW

Fixtures

Concept

A *fixture* is an item of personal property attached to or used in conjunction with real property in such a way that it is treated as being part of the real property.

Significance

A transfer of the real property will also convey the fixtures on that property.

Factors Considered in Determining Whether Property Is a Fixture

1. Attachment: Is the item physically attached or closely connected to the real property?
2. Adaptation: How necessary or beneficial is the item to the use of the real property?
3. Intent: Did the person who installed the item manifest intent for the property to become part of the real property?

Express Agreement

Express agreements clearly stating intent about whether property is a fixture are generally enforceable.

Trade Fixtures (Tenants' Fixtures)

Definition of *trade fixture*: personal property attached to leased real property by a tenant for the purpose of carrying on his trade or business.

Trade fixtures can be removed and retained by the tenant at the termination of the lease except when any of the following applies:

1. Removal would cause substantial damage to the landlord's real property.
2. The tenant fails to remove the fixtures by the end of the lease (or within a reasonable time, if the lease is for an indefinite period of time).
3. An express agreement between the landlord and tenant provides otherwise.

financing statement in the appropriate real estate records office within the period of time specified by the Uniform Commercial Code. The appliance store then is able to remove the dishwasher if the buyer defaults in his payments. The store could be liable, however, to third parties such as prior real estate mortgagees for any damage removal of the dishwasher caused to the real estate. The rules governing security interests in personal property that will become fixtures are explained more fully in Chapter 29.

Rights and Interests in Real Property

When we think of real property ownership, we normally envision one person owning all of the rights in a particular piece of land. Real property, however, involves a bundle of rights subject to ownership—sometimes by different people. This discussion examines the most common forms of present *possessory interests* (rights to exclusive possession of real property): *fee simple absolute* and *life estate*. It also explores the ways in which two or more persons may share ownership of a possessory interest. Finally, it discusses the interests and rights one may have in another person's real property, such as the right to use the property or restrict the way the owner uses it.

Estates in Land The term **estate** is used to describe the nature of a person's ownership interest in real property. Estates in land are classified as either **freehold estates** or **nonfreehold estates**. Nonfreehold (or leasehold) estates are those held by persons who lease real property. They will be discussed in the next chapter, which deals with landlord–tenant law. Freehold estates are ownership interests of uncertain duration. The most common types of freehold estates are fee simple absolute and life estates.

Fee Simple Absolute The **fee simple absolute** is what we normally think of as “full ownership” of land. One who owns real property in fee simple absolute has the right to possess and use the property for an unlimited period of time, subject only to governmental regulations or private restrictions. She also has the unconditional power to dispose of the property during her lifetime or upon her death. A person who owns land in fee simple absolute may grant many rights to others without giving up ownership. For example, she may grant a mortgage on the property to a party who has loaned her money, lease the property to a tenant, or grant rights such as those to be discussed later in this section.

Life Estate The property interest known as a **life estate** gives a person the right to possess and use property for a time measured by his or another person's lifetime. For example, if Haney has a life estate (measured by his life) in a tract of land known as Greenacre, he has the right to use Greenacre for the remainder of his life. At Haney's death, the property will revert to the person who conveyed the estate to him or will pass to some other designated person. Although a life tenant has the right to use the property, he is obligated not to commit acts that would result in permanent injury to the property.

Co-ownership of Real Property Co-ownership of real property exists when two or more persons share the same ownership interest in certain property. The co-owners do not have separate rights to any portion of the real property; each has a share in the whole property. Seven types of co-ownership are recognized in the United States.

Tenancy in Common Persons who own property under a **tenancy in common** have undivided interests in the property and equal rights to possess it. When property is transferred to two or more persons without specification of their co-ownership form, it is presumed that they acquire the property as tenants in common. The respective ownership interests of tenants in common may be, but need not be, equal. One tenant, for example, could have a two-thirds ownership interest in the property, with the other tenant having a one-third interest.

Each tenant in common has the right to possess and use the property. Individual tenants, however, cannot exclude the other tenants in common from also possessing and using the property. If the property is rented or otherwise produces income, each tenant is entitled to share in the income in proportion to her ownership share. Similarly, each tenant must pay her proportionate share of property taxes and necessary repair costs. If a tenant in sole possession of the property receives no rents or profits from the property, she is not required to pay rent to her cotenant unless her possession is adverse to or inconsistent with her cotenant's property interests.

A tenant in common may dispose of his interest in the property during life and at death. Similarly, his interest is subject to his creditors' claims. When a tenant dies, his interest passes to his heirs or, if he has made a will, to the person or persons specified in the will. Suppose Peterson and Sievers own Blackacre as tenants in common. Sievers dies, having executed a valid will in which he leaves his Blackacre interest to Johanns. In this situation, Peterson and Johanns become tenants in common.

Tenants in common may sever the cotenancy by agreeing to divide the property or, if they are unable to agree, by petitioning a court for *partition*. The court will physically divide the property if that is feasible, so that each tenant receives her proportionate share. If physical division is not feasible, the court will order that the property be sold and that the proceeds be appropriately divided.

Joint Tenancy A **joint tenancy** is created when equal interests in real property are conveyed to two or more persons by means of a document clearly specifying that they are to own the property as joint tenants. The rights of use, possession, contribution, and partition are the same for a joint tenancy as for a tenancy in common. The joint tenancy's distinguishing feature is that it gives the owners the **right of survivorship**, which means that upon the death of a joint tenant, the deceased tenant's interest automatically passes to the surviving joint tenant(s). The right of survivorship makes it easy for a person to transfer property at death without the need for a will. For example, Devaney and Osborne purchase Redacre and take title as joint tenants. At Devaney's death, his Redacre interest will pass to Osborne even if Devaney did not have a will setting forth such an intent. Moreover, even if Devaney had a will that purported to leave his Redacre interest to someone other than Osborne, the will's Redacre provision would be ineffective.

When the document of conveyance contains ambiguous language, a court may be faced with determining whether persons acquired ownership of real property as joint tenants or, instead, as tenants in common.

A joint tenant may mortgage, sell, or give away her interest in the property during her lifetime. Her interest in the property is subject to her creditors' claims. When a joint tenant transfers her interest, the joint tenancy is severed and a tenancy in common is created as to the share affected by the transaction. When a joint tenant sells her interest to a third person, the purchaser becomes a tenant in common with the remaining joint tenant(s).

Tenancy by the Entirety Approximately half of the states permit married couples to own real property under a **tenancy by the entirety**. This tenancy is essentially a joint tenancy with the added requirement that the owners be married. As does the joint tenancy, the tenancy by the entirety features the right of survivorship. Neither spouse can transfer the property by will if the other is still living. Upon the death of the husband

or wife, the property passes automatically to the surviving spouse.²

A tenancy by the entirety cannot be severed by the act of only one of the parties. Neither spouse can transfer the property unless the other also signs the deed. Thus, a creditor of one tenant cannot claim an interest in that person's share of property held in tenancy by the entirety. Divorce, however, severs a tenancy by the entirety and transforms it into a tenancy in common. Figure 1 compares the features of tenancy in common, joint tenancy, and tenancy by the entirety.

Community Property A number of western and southern states recognize the **community property** system of co-ownership of property by married couples. This type of co-ownership assumes that marriage is a partnership in which each spouse contributes to the family's property base. Property acquired during the marriage through a spouse's industry or efforts is classified as *community* property. Each spouse has an equal interest in such property regardless of who produced or earned the property. Because each spouse has an equal share in community property, neither can convey community property without the other's joining in the transaction. Various community property states permit the parties to dispose of their interests in community property at death. The details of each state's community property system vary, depending on the specific provisions of that state's statutes.

Not all property owned by a married person is community property, however. Property a spouse owned before marriage or acquired during marriage by gift or inheritance is *separate* property. Neither spouse owns a legal interest in the other's separate property. Property exchanged for separate property also remains separately owned.

Tenancy in Partnership When a partnership takes title to property in the partnership's name, the co-ownership form is called **tenancy in partnership**. This form of co-ownership is discussed in Chapter 37.

Condominium Ownership Under condominium ownership, a purchaser takes title to her individual unit and becomes a tenant in common with other unit owners in shared facilities such as hallways, elevators, swimming pools, and parking areas. The condominium owner pays property taxes on her individual unit and makes a monthly

²In states that do not recognize the tenancy by the entirety, married couples often own real property in joint tenancy, but they are not required to elect that co-ownership form.

Figure 1 Tenancy in Common, Joint Tenancy, and Tenancy by the Entirety

| | Tenancy in Common | Joint Tenancy | Tenancy by the Entirety |
|-------------------------------------|---|--|--|
| Equal Possession and Use? | Yes | Yes | Yes |
| Share Income? | Yes | Yes | Presumably |
| Contribution Requirement? | Generally | Generally | Generally |
| Free Conveyance of Interest? | Yes; transferee becomes tenant in common | Yes, but joint tenancy is severed on conveyance and reverts to tenancy in common | Both must agree; divorce severs tenancy |
| Effect of Death? | Interest transferable at death by will or inheritance | Right of survivorship; surviving joint tenant takes decedent's share | Right of survivorship; surviving spouse takes decedent's share |

payment for the maintenance of the common areas. She may generally mortgage or sell her unit without the other unit owners' approval. For federal income tax purposes, the condominium owner is treated as if she owned a single-family home, and is thus allowed to deduct her property taxes and mortgage interest expenses.

Cooperative Ownership In a cooperative, a building is owned by a corporation or group of persons. One who wants to buy an apartment in the building purchases stock in the corporation and holds his apartment under a long-term, renewable lease called a *proprietary lease*. Frequently, the cooperative owner must obtain the other owners' approval to sell or sublease his unit.

Interests in Real Property Owned by Others

In various situations, a person may hold a legally protected interest in someone else's real property. Such interests, to be discussed below, are not possessory because they do not give their holder the right to complete dominion over the land. Rather, they give him the right to use another person's property or to limit the way in which the owner uses the property.

Easements An **easement** is the right to make certain uses of another person's property (*affirmative easement*) or the right to prevent another person from making certain uses of his own property (*negative easement*). The right to run a sewer line across someone else's property would be an affirmative easement. Suppose an easement prevents Rogers from erecting, on his land, a structure that would block his neighbor McFeely's solar collector. Such an easement would be negative in nature.

If an easement qualifies as an **easement appurtenant**, it will pass with the land. This means that if the owner of the land benefited by an easement appurtenant sells or otherwise conveys the property, the new owner also acquires the right contemplated by the easement. An easement appurtenant is primarily designed to benefit a certain tract of land, rather than merely giving an individual a personal right. For example, Agnew and Nixon are next-door neighbors. They share a common driveway that runs along the borderline of their respective properties. Each has an easement in the portion of the driveway that lies on the other's property. If Agnew sells his property to Ford, Ford also obtains the easement in the driveway portion on Nixon's land. Nixon, of course, still has an easement in the driveway portion on Ford's land.

Creation of Easements Easements may be acquired in the following ways:

1. *By grant.* When an owner of property expressly provides an easement to another while retaining ownership of the property, he is said to **grant** an easement. For example, Monroe may sell or give Madison, who owns adjoining property, the right to go across Monroe's land to reach an alley behind that land.
2. *By reservation.* When one transfers ownership of her land but retains the right to use it for some specified purpose, she is said to **reserve** an easement in the land. For example, Smythe sells land to Jones but reserves the mineral rights to the property as well as an easement to enter the land to remove the minerals.
3. *By prescription.* An easement by **prescription** is created when one person uses another's land openly, continuously, and in a manner adverse to the owner's rights for a period of time specified by state statute. The necessary period of time varies from state to state. In such

a situation, the property owner presumably is on notice that someone else is acting as if she possesses rights to use the property. If the property owner does not take action during the statutory period to stop the other person from making use of his property, he may lose his right to stop that use. Suppose, for instance, that State X allows easements by prescription to be obtained through 15 years of prescriptive use. Tara, who lives in State X, uses the driveway of her next-door neighbor, Kyle. Tara does this openly, on a daily basis, and without Kyle's permission. If this use by Tara continues for the 15-year period established by statute and Kyle takes no action to stop Tara within that time span, Tara will obtain an easement by prescription. In that event, Tara will have the right to use the driveway not only while Kyle owns the property but also when Kyle sells the property to another party. Easements by prescription resemble *adverse possession*, a concept discussed later in this chapter.

4. By implication. Sometimes, easements are implied by the nature of the transaction rather than created by express agreement of the parties. Such easements, called **easements by implication**, take either of two forms: easements by prior use and easements by necessity.

An *easement by prior use* may be created when land is subdivided and a path, road, or other apparent and beneficial use exists as of the time that a portion of the land is conveyed to another person. In this situation, the new owner of the conveyed portion of the land has an easement to continue using the path, road, or other prior use running across the nonconveyed portion of the land. Assume, for example, that a private road runs through Greenacre from north to south, linking the house located on Greenacre's northern portion to the public highway that lies south of Greenacre. Douglas, the owner of Greenacre, sells the northern portion to Kimball. On these facts, Kimball has an easement by implication to continue using the private road even where it runs across the portion of Greenacre retained by Douglas. To prevent such an easement from arising, Douglas and Kimball would need to have specified in their contract of sale that the easement would not exist.

An *easement by necessity* is created when real property once held in common ownership is subdivided in such a fashion that the only reasonable way a new owner can gain access to her land is through passage over another's land that was once part of the same tract. Such an easement is based on the necessity of obtaining access to property. Assume, for instance, that Tinker, the owner of Blackacre, sells Blackacre's northern 25 acres to Evers and its

southern 25 acres to Chance. In order to have any reasonable access to her property, Chance must use a public road that runs alongside and just beyond the northern border of the land now owned by Evers; Chance must then go across Evers's property to reach hers. On these facts, Chance is entitled to an easement by necessity to cross Evers's land in order to go to and from her property.

Easements and the Statute of Frauds As interests in land, easements are potentially within the coverage of the statute of frauds. To be enforceable, an express agreement granting or reserving an easement must be evidenced by a suitable writing signed by the party to be charged.³ An express grant of an easement normally must be executed with the same formalities observed in executing the grant of a fee simple interest. However, easements not granted expressly (such as easements by prior use, necessity, or prescription) are enforceable despite the lack of a writing.

Profits A **profit** is a right to enter another person's land and remove some product or part of the land. Timber, gravel, minerals, and oil are among the products and parts frequently made the subject of profits. Generally governed by the same rules applicable to easements, profits are sometimes called *easements with a profit*.

Licenses A **license** is a temporary right to enter another's land for a specific purpose. Ordinarily, licenses are more informal than easements. Licenses may be created orally or in any other manner indicating the landowner's permission for the licensee to enter the property. Because licenses are considered to be personal rights, they are not true interests in land. The licensor normally may revoke a license at his will. Exceptions to this general rule of revocability arise when the license is coupled with an interest (such as the licensee's ownership of personal property located on the licensor's land) or when the licensee has paid money or provided something else of value either for the license or in reliance on its existence. For example, Branch pays Leif \$900 for certain trees on Leif's land. Branch is to dig up the trees and haul them to her own property for transplanting. Branch has an irrevocable license to enter Leif's land to dig up and haul away the trees.

Restrictive Covenants Within certain limitations, real estate owners may create enforceable agreements that restrict the use of real property. These private

³Chapter 16 discusses the statute of frauds and compliance with the writing requirement it imposes when it is applicable.

agreements are called **restrictive covenants**. For example, Grant owns two adjacent lots. She sells one to Lee subject to the parties' agreement that Lee will not operate any liquor-selling business on the property. This use restriction appears in the deed Grant furnishes Lee. As another illustration, a subdivision developer sells lots in the subdivision and places a provision in each lot's deed regarding the minimum size of house to be built on the property.

The validity and enforceability of such private restrictions on the use of real property depend on the purpose, nature, and scope of the restrictions. A restraint that violates a statute or other expression of public policy will not be enforced. For example, the federal Fair Housing Act (discussed later in this chapter) would make unlawful an attempt by a seller or lessor of residential property to refuse to sell or rent to certain persons because of an existing restrictive covenant that purports to disqualify those prospective buyers or renters on the basis of their race, color, religion, sex, handicap, familial status, or national origin.

Public policy generally favors the unlimited use and transfer of land. A restrictive covenant therefore is unenforceable if it effectively prevents the sale or transfer of the property. Similarly, ambiguous language in a restrictive covenant is construed in favor of the less restrictive interpretation. A restraint is enforceable, however, if it is clearly expressed and neither unduly restrictive of the use and transfer of the property nor otherwise violative of public policy. Restrictions usually held enforceable include those relating to minimum lot size, building design and size, and maintenance of an area as a residential community.

An important and frequently arising question is whether subsequent owners of property are bound by a restrictive covenant even though they were not parties to the original agreement that established the covenant. Under certain circumstances, restrictive covenants are said to “run with the land” and thus bind subsequent owners of the restricted property. For a covenant to run with the land, it must have been *binding* on the original parties to it, and those parties must have *intended that the covenant bind their successors*. The covenant must also “*touch and concern*” the restricted land. This means that the covenant must involve the use, value, or character of the land, rather than being merely a personal obligation of one of the original parties. The *Gardner* case, which follows, involves the analysis of whether a restrictive covenant runs with the land. In addition, a covenant will not bind a subsequent purchaser unless she had notice of the covenant's existence when she took her interest. This notice would commonly be provided by the recording of the deed (a subject discussed later in this chapter) or other document containing the covenant.

Restrictive covenants may be enforced by the parties to them, by persons meant to benefit from them, and—if the covenants run with the land—by successors of the original parties to them. If restrictive covenants amounting to a general building scheme are contained in a subdivision plat (recorded description of a subdivision), property owners in the subdivision may be able to enforce them against noncomplying property owners.

Gardner v. Jefferys

2005 Vt. LEXIS 86 (Vt. Sup. Ct. 2005)

In 1957, William Jefferys Jr. and his wife, Ena, the parents of William Jefferys III, purchased approximately 200 acres of farm land in Fayston, Vermont, known as the Strong Farm. Beginning in 1966, the elderly Jefferys began selling off parcels of the farm. In 1969, Sheldon and Carin Gardner purchased a 10-acre parcel of undeveloped land from the Jefferys. The deed contains a restrictive covenant providing that a specified part of the premises “shall forever be and remain open and free of all buildings and structures, except the right to construct on said open land a private swimming pool, and/or tennis court, and, the usual fences and structures appurtenant thereto and such other buildings and structures as meet the approval, in writing of the Grantors herein, their heirs and assigns.” The provision further states that rights secured therein are “to be enjoyed by the Grantors, their heirs and assigns.” In 1975, the Jefferys conveyed a five-acre parcel of land to Karin Souminen, who, in turn, sold the parcel to George and Janice Soules in 1987. The Soules built a house on the land and lived there. Their property is located above the Gardners' land. In 1979, the elderly Jefferys conveyed the remainder of their Fayston property to their son, William Jefferys III, and his wife, Susan.

In the late summer and early fall of 1999, the Gardners wrote to William and Susan Jefferys twice requesting approval to build a two-story structure within the area restricted by the covenant. The Jefferys gave the Soules a copy of the request. In June 2000, the Soules wrote the Gardners a letter stating that they were interested parties to the restrictive covenant. In September 2000, the Gardners filed a declaratory judgment action asking the court to determine the effect of the restrictive

covenant in their deed. The Soules filed a counterclaim. In May 2001, the Gardners began building a shed in the restricted area. Shortly thereafter, the superior court granted the Soules' request for a preliminary injunction stopping the construction. In the fall of 2001, the Gardners began planting white pines in the restricted area directly in the Soules' view.

In July 2003, the superior court ruled that the benefit of the restrictive covenant ran with the land and was enforceable by both the Soules and the Jefferys, and that the Gardners had violated the covenant by beginning construction of the proposed shed and by planting trees in the restricted area. Accordingly, the court enjoined the continued existence of the shed and the trees. Further, the court prohibited the Gardners from allowing plants or crops in the restricted area to exceed six feet in height. The Gardners appealed.

Per Curiam

On appeal, Sheldon Gardner first contends that the restrictive covenant does not run with the land to the benefit of the Soules because the parties intended the covenant to bind only the grantors, their heirs and assigns, and neither the Soules nor the Jefferys are heirs or assigns of the grantors. We do not find this argument persuasive. Four requirements must be met for a restrictive covenant to "run with the land" so that successor property owners may enforce its burdens and benefits: (1) the covenant must be in writing; (2) the parties to the covenant must have intended that the covenant run with the land; (3) the covenant must "touch and concern" the land; and (4) privity of estate must exist between the parties.

Gardner argues only that the second requirement is not met in this case. Intent that a restrictive covenant is to run with the land may be either express or implied, and may be shown by extraneous circumstances. In some instances, a covenant is so intimately connected with the land as to require the conclusion that the necessary intention for the running of the benefit is present absent language clearly negating that intent. For example, we have held that a covenant prohibiting placing a particular type of structure on a property is such a restriction. Indeed, unless the terms of a restrictive covenant provide otherwise, when a property benefited by a restrictive covenant is divided into separately owned parcels, "each separately owned parcel is entitled to enforce [the] . . . covenant benefitting the property." *Restatement (Third) of the Law of Property* § 5.7(2) (2000).

Here, Gardner argues that the restrictive covenant in his deed does not run with the land because it expressly benefits only the grantors and their heirs and assigns, thereby implying an intent not to allow the covenant to be enforced by successors to the land who are not heirs or assigns. Gardner further states that neither the Soules' deed nor the Jefferys' deed includes an assignment from the elderly Jefferys, and that the Jefferys are not heirs because Ena Jefferys is still alive, and they did not obtain the land through inheritance. According to Gardner, they would never have purchased the property with the restrictive covenant if they thought that an indefinite number of successors could dictate how they used their property.

We conclude that the record in this case overwhelmingly demonstrates that the parties intended the restrictive covenant

to run with the land. The testimony of several witnesses, including Ena Jefferys, unequivocally demonstrated that the covenant was intended to keep the restricted area, which had always been an open meadow, "forever" open and free of any obstructions that would diminish the view from the grantors' remaining lands located above the meadow. Moreover, the record, including evidence of negotiations surrounding the covenant and of the Gardners' subsequent conduct, demonstrates that the Gardners were aware of this intent. Notwithstanding Gardner's argument to the contrary, use of the term "assigns" rather than "successors" does not suggest that the parties intended to preclude subsequent owners of the dominant estate from enforcing the covenant. To the contrary, it is well settled that where a restrictive covenant contains words of succession, i.e., heirs and assigns, a presumption is created that the parties intended the restrictive covenant to run with the land.

Next, Gardner argues that the superior court erred by construing the restrictive covenant to prohibit him from planting trees in the restricted area, and that, by doing so, the court imposed a burden on his property greater than that imposed by the restrictive covenant. We disagree. We conclude that both the language of the covenant and evidence of the circumstances surrounding the making of the covenant support the court's determination. The word "open" refers to the land that had historically been maintained as an open field. The question, then, is what the parties meant by "open." The record demonstrates that most of the restricted area had been mowed or hayed for several decades or more when the restrictive covenant was signed. Ena Jefferys, one of the original grantors, testified that she always assumed that the phrase "open and free of all buildings and structures" meant that nothing would interfere with the view, which was "everything up there" and the reason why people bought property there. Indeed, Gardner himself acknowledged that he bought his property, at least in part, for the view, and that the word "open" in the covenant did not necessarily refer to buildings and structures. In short, there was overwhelming evidence that the intent underlying the restrictive covenant at issue here was to maintain the restricted area as an open meadow, thereby allowing unobstructed views to the south for the benefit of adjoining neighbors.

Affirmed in favor of the Jefferys and Soules.

Termination of Restrictive Covenants Restrictive covenants may be terminated in a variety of ways, including voluntary relinquishment or *waiver*. They may also be terminated *by their own terms* (such as when the covenant specifies that it is to exist for a certain length of time) or *by dramatically changed circumstances*. If Old-codger's property is subject, for instance, to a restrictive covenant allowing only residential use, the fact that all of the surrounding property has come to be used for industrial purposes may operate to terminate the covenant. When a restrictive covenant has been terminated or held invalid, the deed containing the restriction remains a valid instrument of transfer but is treated as if the restriction had been removed from the document.

Acquisition of Real Property

Title to real property may be obtained in various ways, including purchase, gift, will or inheritance, tax sale, and adverse possession. Original title to land in the United States was acquired either from the federal government or from a country that held the land prior to its acquisition by the United States. The land in the 13 original colonies had been granted by the king of England either to the colonies or to certain individuals. The states ceded the land in the Northwest Territory to the federal government, which in turn issued grants or patents of land. Original ownership of much of the land in Florida and the Southwest came by grants from Spain's rulers.

Acquisition by Purchase Selling one's real property is a basic ownership right. Unreasonable restrictions on an owner's right to sell her property are considered unenforceable because they violate public policy. Most owners of real property acquired title by purchasing the property. Each state sets the requirements for proper conveyances of real property located in that state. The various elements of selling and buying real property are discussed later in this chapter.

Acquisition by Gift Real property ownership may be acquired by gift. For a gift of real property to be valid, the donor must deliver a properly executed deed to the donee or to some third person who is to hold it for the donee. Neither the donee nor the third person needs to take actual possession of the property. The gift's essential element is delivery of the deed. Suppose that Fields executes a deed to the family farm and leaves it in his safe-deposit box for delivery to his daughter (the intended donee) when he dies. The attempted gift will not be valid, because Fields did not deliver the gift during his lifetime.

Acquisition by Will or Inheritance The owner of real property generally has the right to dispose of the property by will. The requirements for a valid will are discussed in Chapter 26. If the owner of real property dies without a valid will, the property passes to his heirs as determined under the laws of the state in which the property is located.

Acquisition by Tax Sale If taxes assessed on real property are not paid when due, they become a *lien* on the property. This lien has priority over other claims to the land. If the taxes remain unpaid, the government may sell the land at a tax sale. Although the purchaser at the tax sale acquires title to the property, a number of states have statutes giving the original owner a limited time (such as a year) within which to buy the property from the tax sale purchaser for the price paid by the purchaser, plus interest.

Acquisition by Adverse Possession

Each state has a statute of limitations that gives an owner of land a specific number of years within which to bring suit to regain possession of her land from someone who is trespassing on it. This period varies from state to state, generally ranging from 5 to 20 years. If someone wrongfully possesses land and acts as if he were the owner, the actual owner must take steps to have the possessor ejected from the land. If the owner fails to do this within the statutory period, she loses her right to eject the possessor.

Assume, for example, that Titus owns a vacant lot next to Holdeman's house. Holdeman frequently uses the vacant lot for a variety of activities and appears to be the property's only user. In addition, Holdeman regularly mows and otherwise maintains the vacant lot. He has also placed a fence around it. By continuing such actions and thus staying in possession of Titus's property for the statutory period (and by meeting each other requirement about to be discussed), Holdeman may position himself to acquire title to the land by **adverse possession**.

To acquire title by adverse possession, one must possess land in a manner that puts the true owner on notice of the owner's cause of action against the possessor. The adverse possessor's acts of possession must be (1) *open*, (2) *actual*, (3) *continuous*, (4) *exclusive*, and (5) *hostile* (or *adverse*) *to the owner's rights*. The hostility element is not a matter of subjective intent. Rather, it means that the adverse possessor's acts of possession must be inconsistent with the owner's rights. If a person is in possession of another's property under a lease, as a cotenant, or with the permission of the owner, his possession is not hostile.

In some states, the possessor of land must also pay the property taxes in order to gain title by adverse possession.

It is not necessary that the same person occupy the land for the statutory period. The periods of possession of several adverse possessors may be “tacked” together

when calculating the period of possession if each possessor claimed rights from another possessor. The possession must, however, be continuous for the requisite time.

The following *Schlichting* case applies these criteria for adverse possession.

Schlichting v. Cotter 2007 Conn. Super. LEXIS 461 (Conn. Super. Ct. 2007)

Angela Schlichting and her husband Walter acquired title to a piece of real estate in 1979. They had a cordial, neighborly relationship with their adjoining property owners, Fethon and Dorothy Nitsos. There had been no survey of the boundaries of the two properties, but it was believed that a certain section of the woods between the two houses contained the boundary line. The Schlichtings took care of an area that they believed was theirs. In 1993, Walter conveyed his interest in the Schlichtings' property to Angela. In 2005, the Nitsos conveyed their property to the Cotters. A dispute arose between Angela and the Cotters about whether Angela was encroaching on the Cotters property. The Cotters cut down trees, removed part of a stone wall, dug up the lawn, cut up the driveway, erected a fence, and otherwise disturbed part of the property that Angela claimed as hers. Angela applied for a temporary injunction against the Cotters.

Moraghan, Judge Trial Referee

Essentially, the elements of adverse possession are rather simple and uncomplicated. They are that the owners shall be ousted from possession and kept out uninterruptedly for a period of fifteen years under a claim of right by an open, visible and exclusive possession of the claimant without license or consent of the owner. At this point there seems to be little question that the “mutual agreement” non-memorialized and not marked with any type of surveying device was the product of a mutual mistake. In order to comprehend the concept of adverse possession, it might be appropriate to discuss and, to a degree, analyze the hostility of the taking.

Powell on Real Property, Sec. 91.05 et seq. In order to establish adverse possession, the possession must be openly hostile. Hostile possession can be understood as possession that is opposed and antagonistic to all other claims, and that conveys the clear message that the possessor intends to possess the land as his or her own. . . . It is not necessary that the possessor intend to take away from the true owner something which he knows belongs to another, or even that he be indifferent as to the facts of the legal title. It is the intent to possess, and not the intent to take irrespective of his right, which governs.

The word “hostile,” as employed in the law of adverse possession, is a term of art; it does not imply animosity, ill will or bad faith. Nor is the claimant required to make express declarations of adverse intent during the possessory period. “Hostile” use has been defined as use that is “inconsistent with the right of the owner, without permission asked or given, [to] use such as would entitle the owner to a cause of action against the intruder.”

The modern position of American courts is that possession of land under the mistaken belief of legal ownership usually satisfies the hostility requirements, as long as the possessor does not hold in subordination to another and has no conscious doubt as to his or her rights. A large number of adverse possession disputes involve a mistaken belief on the part of a landowner as to the true boundary line between adjoining properties.

An occupation of land by a defendant as his own under an “owner” plaintiff’s eye to what is supposed to be the dividing line between him and the “owner” plaintiff and which for many years the “owner” plaintiff permitted without any question challenging such action which flows from the mutual assent of the parties is strong presumptive evidence of the true place of the line. The very act itself has to be an assertion of his own title and thus equivalent to a denial of the title of all others and it does not matter that he was mistaken and if he had been better informed he would not have entered upon the land.

The testimony at trial and as set forth in the Nitsos’ deposition clearly shows the Schlichtings continuously used the disputed area as their own from 1979 to March of 2006 in many ways in an open and visible fashion. Open and visible possession is a use calculated to let others know that the land is owned and occupied by the claimant. The use must be notorious and unconcealed so as to give the owner or any other claimant knowledge and the full opportunity to assert his rights, if any.

With respect to the open and visible ouster of the defendants there seems to be no evidence that contradicts Mrs. Nitsos concerning the action between 1979 and 2006. Suffice it to say that the fifteen-year limitation is satisfied. Use by the plaintiff in an

open and visible possession consisted of spraying, pruning and removal of trees; planting and maintenance of pachysandra, German ferns, berry bushes, rhododendron; removal of poison ivy from the trees and the removal of sumac from the foliage in the area; utilization of gypsy moth traps and spraying; and the dumping, blowing and raking of leaves; the mowing and fertilizing and maintenance of the lawn area; the planting, cultivating and maintenance of the garden; and the paving, plowing, sealing and use of the driveway from 1979 to 2006 to the exclusion of others was open and notorious and put the Nitsos on notice that the property area was being occupied by the Schlichtings. Generally speaking, exclusive possession can and more often than not will be established by acts which at the time considering the state of the land comport with ownership, dominion and control such acts as would ordinarily be exercised by an owner in appropriating land to his own use to the exclusion of others.

Testimony unrefuted shows the Schlichtings maintained that they exclusively used up to the middle of the wooded area, and Mrs. Nitsos also testified that the Schlichtings used that area exclusively as their own. There is a pond behind these two

adjoining lots which was certainly attractive to children in terms of skating at least. The Nitsos would call the Schlichtings each time that one of their children or children's guests wanted to go skating. Permission was never denied but permission was always sought and granted. The reason for that was that the area behind the Nitsos' property tended to be swampy and muddy and the area behind the Schlichtings' property was more solid, less difficult to walk in and generally a cleaner path to the pond. The attitude of the abutting neighbor who enjoyed a friendly neighborly relationship with the Schlichtings lends strength to the recognition of the fact that they recognized the plaintiffs as the owners of the property.

The court finds by clear and convincing evidence that the plaintiff has proven her claim for adverse possession and is entitled to the property which she claims. The defendants are ordered to remove their fence, their piles of stone and to replace the ground cover and flowering bushes and shrubs and wall that they have destroyed within sixty (60) days of the date of this decision.

Judgment for Schlichting.

Transfer by Sale

Steps in a Sale The major steps normally involved in the sale of real property are:

1. Contracting with a real estate broker to locate a buyer.
2. Negotiating and signing a contract of sale.
3. Arranging for the financing of the purchase and satisfying other requirements, such as having a survey conducted or acquiring title insurance.
4. Closing the sale, which involves payment of the purchase price and transfer of the deed, as well as other matters.
5. Recording the deed.

Contracting with a Real Estate Broker

Although engaging a real estate broker is not a legal requirement for the sale of real property, it is common for one who wishes to sell his property to "list" the property with a broker. A listing contract empowers the broker to act as the seller's agent in procuring a ready, willing, and able buyer and in managing details of the property transfer. A number of states' statutes of frauds require listing contracts to be evidenced by a writing and signed by the party to be charged.

Real estate brokers are regulated by state and federal law. They owe *fiduciary duties* (duties of trust and confidence) to their clients. Chapter 35 contains additional information regarding the duties imposed on such agents.

Types of Listing Contracts Listing contracts specify such matters as the listing period's duration, the terms on which the seller will sell, and the amount and terms of the broker's commission. There are different types of listing contracts.

1. *Open listing.* Under an open listing contract, the broker receives a *nonexclusive* right to sell the property. This means that the seller and third parties (for example, other brokers) also are entitled to find a buyer for the property.

LOG ON

For a variety of articles about practical aspects of buying, selling, or owning real estate, see Nolo.com Real Estate Law Center at www.nolo.com/resource.cfm/catID/912DD28B-1329-4CEB-9E4FF25438CB52DF/213/243/217/.

The broker operating under an open listing is entitled to a commission only if he was the first to find a ready, willing, and able buyer.

2. Exclusive agency listing. Under an exclusive agency listing, the broker earns a commission if he *or any other agent* finds a ready, willing, and able buyer during the period of time specified in the contract. Thus, the broker operating under such a listing would have the right to a commission even if another broker actually procured the buyer. Under the exclusive agency listing, however, the seller has the right to sell the property himself without being obligated to pay the broker a commission.

3. Exclusive right to sell. An exclusive right to sell contract provides the broker the exclusive right to sell the property for a specified period of time and entitles her to a commission no matter who procured the buyer. Under this type of listing, a seller must pay the broker her commission even if it was the seller or some third party who found the buyer during the duration of the listing contract.

Contract of Sale The contract formation, performance, assignment, and remedies principles about which you read in earlier chapters apply to real estate sales contracts. Such contracts identify the parties and subject property, and set forth the purchase price, the type of deed the purchaser will receive, the items of personal property (if any) included in the sale, and other important aspects of the parties' transaction. Real estate sales contracts often make the closing of the sale contingent on the buyer's obtaining financing at a specified rate of interest, on the seller's procurement of a survey and title insurance, and on the property's passing a termite inspection. Because they are within the statute of frauds, real estate sales contracts must be evidenced by a suitable writing signed by the party to be charged in order to be enforceable.

Financing the Purchase The various arrangements for financing the purchase of real property—such as mortgages, land contracts, and deeds of trust—are discussed in Chapter 28.

Fair Housing Act The Fair Housing Act, enacted by Congress in 1968 and substantially revised in 1988, is designed to prevent discrimination in the housing market. Its provisions apply to real estate brokers, sellers (other than those selling their own single-family dwellings without the use of a broker), lenders, lessors, and appraisers. Originally, the act prohibited discrimination on the basis of race, color, religion, sex, and national origin. The 1988 amendments added handicap

and "familial status" to this list. The familial status category was intended to prevent discrimination in the housing market against pregnant women and families with children.⁴ "Adult" or "senior citizen" communities restricting residents' age do not violate the Fair Housing Act even though they exclude families with children, so long as the housing meets the requirements of the act's "housing for older persons" exemption.⁵

The act prohibits discrimination on the above-listed bases in a wide range of matters relating to the sale or rental of housing. These matters include refusals to sell or rent, representations that housing is not available for sale or rental when in fact it is, and discriminatory actions regarding terms, conditions, or privileges of sale or rental or regarding the provision of services and facilities involved in sale or rental.⁶ The act also prohibits discrimination in connection with brokerage services, appraisals, and financing of dwellings.

Prohibited discrimination on the basis of handicap includes refusals to permit a handicapped person to make (at his own expense) reasonable modifications to the property. It also includes refusals to make reasonable accommodations in property-related rules, policies, practices, or services when such modifications or accommodations are necessary to afford the handicapped person full enjoyment of the property. The act also outlaws the building of multifamily housing that is inaccessible to persons with handicaps.

A violation of the Fair Housing Act may result in a civil action brought by the government or the aggrieved individual. If the aggrieved individual sues and prevails, the court may issue injunctions, award actual and punitive damages, assess attorney's fees and costs, and grant other appropriate relief. Finally, the Fair Housing Act invalidates any state or municipal law requiring or permitting an action that would be a discriminatory housing practice under federal law.

⁴"Familial status" is defined as an individual or individuals under the age of 18 who is/are domiciled with a parent, some other person who has custody over him/her/them, or the designee of the parent or custodial individual. The familial status classification also applies to one who is pregnant or in the process of attempting to secure custody of a child or children under the age of 18.

⁵The Fair Housing Act defines "housing for older persons" as housing provided under any state or federal program found by the Secretary of HUD to be specifically designed to assist elderly persons, housing intended for and solely occupied by persons 62 years old or older, or housing that meets the requirements of federal regulations and is intended for occupancy by at least one person 55 years old or older.

⁶Chapter 25 discusses the Fair Housing Act's application to rentals of residential property.

CYBERLAW IN ACTION

How does the Fair Housing Act apply to Web sites that permit users to post advertisements about the sale or rental of real estate? Advertisements about property for sale or lease that are posted by individuals sometimes make statements indicating a “preference, limitation, or discrimination, or an intention to make a preference, limitations, or discrimination, on the basis of race, color, national origin, sex, religion, and familial status” that could violate the Fair Housing Act if the statements were made offline. For example, in *Chicago Lawyers’ Committee for Civil Rights under the Law, Inc. v. Craigslist, Inc.*, 519 F.3d 666 (7th Cir. 2008), the plaintiff alleged that Craigslist.com posted notices in violation of the Fair Housing Act such as “Apt. too small for families with small children,” “NO MINORITIES,” and “Christian single straight female needed.” The content of advertisements on the Web site is created by Craigslist.com users, not by Craigslist, Inc. This is a legally significant point, because a federal statute, § 230 of the Communications Decency Act, states that “No provider or user of an interactive computer service shall be treated as the publisher or speaker of any information provided by another information content provider.” This statute has been interpreted in many cases to immunize Web sites, ISPs, and other interactive computer services for liability for third-party content. In the *Craigslist* case, the Seventh Circuit held that under § 230 of the Communications Decency Act, Craigslist could not be treated as the publisher of information provided by others and, therefore, that § 230 shielded Craigslist from liability.

In *Fair Housing Council of San Fernando Valley v. Roommate.com, LLC*, 521 F.3d 1157 (9th Cir. 2008), however, the Ninth Circuit held that § 230 of the Communications Decency Act immunized Roommate for some but not all of its activities. Roommate.com operates a roommate-matching Web site. Prior to searching or posting listings, subscribers were required to disclose their sex, sexual orientation, and to indicate whether children would live with them. Subscribers also described their preferences in roommates with regard to the same three criteria and were encouraged to provide additional comments. Roommate.com would then compile information provided in the questionnaires into a profile for each user, which would be used to match subscribers with listings and which could be viewed by other subscribers. The plaintiffs alleged that these practices constituted Fair Housing Act violations. The Ninth Circuit emphasized that § 230 provides a shield for an interactive computer service for content created by third parties, but not for content developed by the interactive computer service itself. It characterized Roommate.com’s creation and required use of the questionnaires as being “entirely its own” and the profiles created and displayed from the information provided in the questionnaire as information developed by Roommate.com. Since these practices involved content developed by Roommate.com and not a third party, they were not shielded from potential Fair Housing Act liability. However, § 230 did immunize Roommate.com from liability for discriminatory content authored by subscribers in the open-ended “additional comments” section of the questionnaire.

Deeds Each state’s statutes set out the formalities necessary to accomplish a valid conveyance of land. As a general rule, a valid conveyance is brought about by the execution and delivery of a **deed**, a written instrument that transfers title from one person (the grantor) to another (the grantee). Three types of deeds are in general use in the United States: *quitclaim deeds*, *warranty deeds*, and *deeds of bargain and sale* (also called *grant deeds*). The precise rights contemplated by a deed depend on the type of deed the parties have used.

Quitclaim Deeds A **quitclaim deed** conveys whatever title the grantor has at the time he executes the deed. It does not, however, contain warranties of title. The grantor who executes a quitclaim deed does not claim to have good title—or any title, for that matter. The grantee has no action against the grantor under a quitclaim deed if the grantee does not acquire good title. Quitclaim

deeds are frequently used to cure technical defects in the chain of title to property.

Warranty Deeds A **warranty deed**, unlike a quitclaim deed, contains covenants of warranty. Besides conveying title to the property, the grantor who executes a warranty deed guarantees the title she has conveyed. There are two types of warranty deeds.

1. **General warranty deed.** Under a general warranty deed, the grantor warrants against (and agrees to defend against) all title defects and encumbrances (such as liens and easements), including those that arose before the grantor received her title.

2. **Special warranty deed.** Under a special warranty deed, the grantor warrants against (and agrees to defend against) title defects and encumbrances that arose after she acquired the property. If the property conveyed is

subject to an encumbrance such as a mortgage, a long-term lease, or an easement, the grantor frequently provides a special warranty deed that contains a provision excepting those specific encumbrances from the warranty.

Deeds of Bargain and Sale In a **deed of bargain and sale** (also known as a **grant deed**), the grantor makes no covenants. The grantor uses language such as “I grant” or “I bargain and sell” or “I convey” property. Such a deed does contain, however, the grantor’s implicit representation that he owns the land and has not previously encumbered it or conveyed it to another party.

Form and Execution of Deed Some states’ statutes suggest a form for deeds. Although the requirements for execution of deeds are not uniform, they do follow a similar pattern. As a general rule, a deed states the *name of the grantee*, contains a *recitation of consideration and a description of the property conveyed*, and is *signed by the grantor*. Most states require that the deed be notarized (acknowledged by the grantor before a notary public or other authorized officer) in order to be eligible for recording in public records.

No technical words of conveyance are necessary for a valid deed. Any language is sufficient if it indicates with reasonable certainty the grantor’s intent to transfer ownership of the property. The phrases “grant, bargain, and sell” and “convey and warrant” are commonly used. Deeds contain recitations of consideration primarily for historical reasons. The consideration recited is not necessarily the purchase price of the property. Deeds often state that the consideration for the conveyance is “one dollar and other valuable consideration.”

The property conveyed must be described in such a manner that it can be identified. This usually means that the legal description of the property must be used. Several methods of legal description are used in the United States. In urban areas, descriptions are usually by lot, block, and plat. In rural areas where the land has been surveyed by the government, property is usually described by reference to the government survey. It may also be described by a metes and bounds description that specifies the boundaries of the tract of land.

Recording Deeds Delivery of a valid deed conveys title from a grantor to a grantee. Even so, the grantee should promptly **record** the deed in order to prevent his interest from being defeated by third parties who may claim interests in the property. The grantee must pay a fee to have the deed recorded, a process that involves

depositing and indexing the deed in the files of a government office designated by state law. A recorded deed operates to provide the public at large with notice of the grantee’s property interest.

Recording Statutes Each state has a **recording statute** that establishes a system for the recording of all transactions affecting real property ownership. These statutes are not uniform in their provisions. In general, however, they provide for the recording of all deeds, mortgages, land contracts, and similar documents.

Types of Recording Statutes State recording statutes also provide for priority among competing claimants to rights in real property, in case conflicting rights or interests in property should be deeded to (or otherwise claimed by) more than one person. (Obviously, a grantor has no right to issue two different grantees separate deeds to the same property, but if this should occur, recording statutes provide rules to decide which grantee has superior title.) These priority rules apply only to grantees who have given value for their deeds or other interest-creating documents (primarily purchasers and lenders), and not to donees. A given state’s recording law will set up one of three basic types of priority systems: race statutes, notice statutes, and race-notice statutes. Figure 2 explains these priority systems. Although the examples used in Figure 2 deal with recorded and unrecorded deeds, recording statutes apply to other documents that create interests in real estate. Chapter 28 discusses the recording of mortgages, as well as the adverse security interest–related consequences a mortgagee may experience if its mortgage goes unrecorded.

Methods of Assuring Title In purchasing real property, the buyer is really acquiring the seller’s ownership interests. Because the buyer does not want to pay a large sum of money for something that proves to be of little or no value, it is important for her to obtain assurance that the seller has good title to the property. This is commonly done in one of three ways:

1. **Title opinion.** In some states, it is customary to have an attorney examine an **abstract of title**. An abstract of title is a history of what the public records show regarding the passage of title to, and other interests in, a parcel of real property. It is not a guarantee of good title. After examining the abstract, the attorney renders an opinion about whether the grantor has **marketable title**, which is title free from defects or reasonable doubt about its validity. If the grantor’s title is defective, the nature of the defects will be stated in the attorney’s title opinion.

Figure 2 Three Basic Types of Priority Systems for Recording Deeds

| | |
|-----------------------------|--|
| Race Statutes | Under a race statute—so named because the person who wins the race to the courthouse wins the property ownership “competition”—the first grantee who records a deed to a tract of land has superior title. For example, if Grantor deeds Blackacre to Kerr on March 1 and to Templin on April 1, Templin will have superior title to Blackacre if she records her deed before Kerr’s is recorded. Race statutes are relatively uncommon today. |
| Notice Statutes | Under a notice system of priority, a later grantee of property has superior title if he acquired his interest without notice of an earlier grantee’s claim to the property under an unrecorded deed. For example, Grantor deeds Greenacre to Jonson on June 1, but Jonson does not record his deed. On July 1, Marlowe purchases Greenacre without knowledge of Jonson’s competing claim. Grantor executes and delivers a deed to Marlowe. In this situation, Marlowe would have superior rights to Greenacre even if Jonson ultimately records his deed before Marlowe’s is recorded. |
| Race-Notice Statutes | The race-notice priority system combines elements of the systems just discussed. Under race-notice statutes, the grantee having priority is the one who both <i>takes his interest without notice</i> of any prior unrecorded claim and <i>records first</i> . For example, Grantor deeds Redacre to Frazier on September 1. On October 1 (at which time Frazier has not yet recorded his deed), Grantor deeds Redacre to Gill, who is then unaware of any claim by Frazier to Redacre. If Gill records his deed before Frazier’s is recorded, Gill has superior rights to Redacre. |

2. *Torrens system.* A method of title assurance available in a few states is the **Torrens system** of title registration. Under this system, one who owns land in fee simple obtains a certificate of title. When the property is sold, the grantor delivers a deed and a certificate of title to the grantee. All liens and encumbrances against the title are noted on the certificate, thus assuring the purchaser that the title is good except as to the liens and encumbrances noted on the certificate. However, some claims or encumbrances, such as those arising from adverse possession, do not appear on the records and must be discovered through an inspection of the property. In some Torrens states, encumbrances such as tax liens, short-term leases, and highway rights are valid against the purchaser even though they do not appear on the certificate.

3. *Title insurance.* Purchasing a policy of **title insurance** provides the preferred and most common means of protecting title to real property. Title insurance obligates the insurer to reimburse the insured grantee for loss if the title proves to be defective. In addition, title insurance covers litigation costs if the insured grantee must go to court in a title dispute. Lenders commonly require that a separate policy of title insurance be obtained for the lender’s protection. Title insurance may be obtained in combination with the other previously discussed methods of ensuring title.

Seller’s Responsibilities regarding the Quality of Residential Property

Buyers of real estate normally consider it important that any structures on the property be in good condition. This factor becomes especially significant if the buyer intends to use the property for residential purposes. The rule of **caveat emptor** (let the buyer beware) traditionally applied to the sale of real property unless the seller committed misrepresentation or fraud or made express warranties about the property’s condition. In addition, sellers had no duty to disclose hidden defects in the property. In recent years, however, the legal environment for sellers—especially real estate professionals such as developers and builder-vendors of residential property—has changed substantially. This section examines two important sources of liability for sellers of real property.

Implied Warranty of Habitability Historically, sellers of residential property were not regarded as making any **implied warranty** that the property was habitable or suitable for the buyer’s use. The law’s attitude toward the buyer–seller relationship in residential property sales began to shift, however, as product liability law underwent rapid change in the late 1960s. Courts

began to see that the same policies favoring the creation of implied warranties in the sale of goods applied with equal force to the sale of residential real estate.⁷ Both goods and housing are frequently mass-produced. The disparity of knowledge and bargaining power often existing between a buyer of goods and a professional seller is also likely to exist between a buyer of a house and a builder-vendor (one who builds and sells houses). Moreover, many defects in houses are not readily discoverable during a buyer's inspection. This creates the possibility of serious loss, because the purchase of a home is often the largest single investment a person ever makes.

For these reasons, courts in most states now hold that builders, builder-vendors, and developers make an implied warranty of habitability when they build or sell real property for residential purposes. An ordinary owner who sells her house—in other words, a seller who was neither the builder nor the developer of the residential property—does not make an implied warranty of habitability.

The implied warranty of habitability amounts to a guarantee that the house is free of latent (hidden) defects that would render it unsafe or unsuitable for human habitation. A breach of this warranty subjects the defendant to liability for damages, measured by either the cost of repairs or the loss in value of the house.⁸

A related issue that has led to considerable litigation is whether the implied warranty of habitability extends to subsequent purchasers of the house. For example, PDQ Development Co. builds a house and sells it to Johnson, who later sells the house to McClure. May McClure successfully sue PDQ for breach of warranty if a serious defect renders the house uninhabitable? Although some courts have rejected implied warranty actions brought by subsequent purchasers, many courts today hold that an implied warranty made by a builder-vendor or developer would extend to a subsequent purchaser.

May the implied warranty of habitability be *disclaimed* or *limited* in the contract of sale? It appears at least possible to disclaim or limit the warranty through a contract provision, subject to limitations imposed by the unconscionability doctrine, public policy concerns, and contract interpretation principles.⁹ Courts construe attempted disclaimers very strictly against the builder-vendor or developer, and often reject disclaimers that are

not specific regarding rights supposedly waived by the purchaser.

Duty to Disclose Hidden Defects

Traditional contract law provided that a seller had no duty to disclose to the buyer defects in the property being sold, even if the seller knew about the defects and the buyer could not reasonably find out about them on his own. The seller's failure to volunteer information, therefore, could not constitute misrepresentation or fraud. This traditional rule of nondisclosure was another expression of the prevailing *caveat emptor* notion. Although the nondisclosure rule was subject to certain exceptions,¹⁰ the exceptions seldom applied. Thus, there was no duty to disclose in most sales of real property.

Today, courts in many jurisdictions have substantially eroded the traditional nondisclosure rule and have placed a duty on the seller to disclose any known defect that materially affects the property's value and is not reasonably observable by the buyer. The seller's failure to disclose such defects effectively amounts to an assertion that the defects do not exist—an assertion on which a judicial finding of misrepresentation or fraud may be based.¹¹

Other Property Condition-Related Obligations of Real Property Owners and Possessors

In recent years, the law has increasingly required real property owners and possessors to take steps to further the safety of persons on the property and to make the property more accessible to disabled individuals. This section discusses two legal developments along these lines: the trend toward expansion of *premises liability* and the inclusion of property-related provisions in the *Americans with Disabilities Act*.

Expansion of Premises Liability

Premises liability is the name sometimes used for negligence cases in which property owners or possessors (such as business operators leasing commercial real estate) are held liable to persons injured while on the property. As explained in Chapter 7, property owners and possessors face liability when their *failures to exercise*

⁷See Chapter 20 for a discussion of the development of similar doctrines in the law of product liability.

⁸Measures of damages are discussed in Chapter 18.

⁹The unconscionability doctrine and public policy concerns are discussed in Chapter 15. Chapter 16 addresses contract interpretation.

¹⁰These exceptions are discussed in Chapter 13.

¹¹Misrepresentation and fraud are discussed in Chapter 13.

reasonable care to keep their property reasonably safe result in injuries to persons lawfully on the property.¹² The traditional premises liability case was one in which a property owner's or possessor's negligence led to the existence of a potentially hazardous condition on the property (e.g., a dangerously slick floor or similar physical condition at a business premises), and a person justifiably on the premises (e.g., a business customer) sustained personal injury upon encountering that unexpected condition (e.g., by slipping and falling).

Security Precautions against Foreseeable Criminal Acts Recent years have witnessed a judicial inclination to expand premises liability to cover other situations in addition to the traditional scenario. A key component of this expansion has been many courts' willingness to reconsider the once-customary holding that a property owner or possessor had no legal obligation to implement security measures to protect persons on the property from the wrongful acts of third parties lacking any connection with the owner or possessor. Today, courts frequently hold that a property owner's or possessor's duty to exercise reasonable care includes the obligation to take *reasonable security precautions* designed to protect persons lawfully on the premises from *foreseeable* wrongful (including criminal) acts by third parties.

This expansion has caused hotel, apartment building, and convenience store owners and operators to be among the defendants held liable—sometimes in very large damage amounts—to guests, tenants, and customers on whom third-party attackers inflicted severe physical injuries. In such cases, the property owners' or possessors' negligent failures to take security precautions restricting such wrongdoers' access to the premises served as at least a *substantial factor* leading to the plaintiffs' injuries.¹³ The security lapses amounting to a lack of reasonable care in a particular case may have been, for instance, failures to install deadbolt locks, provide adequate locking devices on sliding glass doors, maintain sufficient lighting, or employ security guards.

¹²Chapter 7 explains the law's traditional view that real property owners and possessors owe persons who come on the property certain duties that vary depending on those persons' invitee, licensee, or trespasser status. It also discusses courts' increasing tendency to merge the traditional invitee and licensee classifications and to hold that property owners and possessors owe invitees and licensees the duty to exercise reasonable care to keep the premises reasonably safe.

¹³See Chapter 7's discussion of the *causation* element of a negligence claim.

Determining Foreseeability The security precautions component of the reasonable care duty is triggered only when criminal activity on the premises is foreseeable. It therefore becomes important to determine whether the foreseeability standard has been met. In making this determination, courts look at such factors as whether previous crimes had occurred on or near the subject property (and if so, the nature and frequency of those crimes), whether the property owner or possessor knew or should have known of those prior occurrences, and whether the property was located in a high-crime area. The fact-specific nature of the foreseeability and reasonable care determinations makes the outcome of a given premises liability case difficult to predict in advance. Nevertheless, there is no doubt that the current premises liability climate gives property owners and possessors more reason than ever before to be concerned about security measures.

Americans with Disabilities Act In 1990, Congress enacted the broad-ranging Americans with Disabilities Act (ADA). This statute was designed to eliminate long-standing patterns of discrimination against disabled persons in matters such as employment, access to public services, and access to business establishments and similar facilities open to the public. The ADA's Title III focuses on places of *public accommodation*.¹⁴ It imposes on certain property owners and possessors the obligation to take reasonable steps to make their property accessible to disabled persons (individuals with a physical or mental impairment that substantially limits one or more major life activities).

Places of Public Accommodation Title III of the ADA classifies numerous businesses and nonbusiness enterprises as places of **public accommodation**. These include hotels, restaurants, bars, theaters, concert halls, auditoriums, stadiums, shopping centers, stores at which goods are sold or rented, service-oriented businesses (running the gamut from gas stations to law firm offices), museums, parks, schools, social services establishments (day care centers, senior citizen centers, homeless shelters, and the like), places of recreation, and various other enterprises, facilities, and establishments. Private clubs and religious organizations, however, are not treated as places of public accommodation for purposes of the statute.

¹⁴42 U.S.C. §§ 12181–12189. These sections examine only Title III of the ADA. Chapter 51 discusses the employment-related provisions set forth elsewhere in the statute.

Modifications of Property Under the ADA, the owner or operator of a place of public accommodation cannot exclude disabled persons from the premises or otherwise discriminate against them in terms of their ability to enjoy the public accommodation. Avoiding such exclusion or other discrimination may require alteration of the business or nonbusiness enterprise's practices, policies, and procedures. Moreover, using language contemplating the possible need for physical modifications of property serving as a place of public accommodation, the ADA includes within prohibited discrimination the property owner's or possessor's "failure to take such steps as may be necessary to ensure that no individual with a disability is excluded" or otherwise discriminated against in terms of access to what nondisabled persons are provided. The failure to take these steps does not violate the ADA, however, if the property owner or possessor demonstrates that implementing such steps would "fundamentally alter the nature" of the enterprise or would "result in an undue burden."

Prohibited discrimination may also include the "failure to remove architectural barriers and communication barriers that are structural in nature," if removal is "readily achievable." When the removal of such a barrier is not readily achievable, the property owner or possessor nonetheless engages in prohibited discrimination if he, she, or it does not adopt "alternative methods" to ensure access to the premises and what it has to offer (assuming that the alternative methods are themselves readily achievable). The ADA defines *readily achievable* as "easily accomplishable and able to be carried out without much difficulty or expense." The determination of whether an action is readily achievable involves consideration of factors such as the action's nature and cost, the nature of the enterprise conducted on the property, the financial resources of the affected property owner or possessor, and the effect the action would have on expenses and resources of the property owner or possessor.

New Construction Newly constructed buildings on property used as a place of public accommodation must contain physical features making the buildings *readily accessible* to disabled persons. The same is true of additions built on to previous structures. The ADA is supplemented by federal regulations setting forth property accessibility guidelines designed to lend substance and specificity to the broad legal standards stated in the statute. In addition, the federal government has issued technical assistance manuals and materials in an effort to

educate public accommodation owners and operators regarding their obligations under the ADA.

Remedies A person subjected to disability-based discrimination in any of the respects discussed above may bring a civil suit for injunctive relief. An injunction issued by a court must include "an order to alter facilities" to make the facilities "readily accessible to and usable by individuals with disabilities to the extent required" by the ADA. The court has discretion to award attorney's fees to the prevailing party. The U.S. Attorney General also has the legal authority to institute a civil action alleging a violation of Title III of the ADA. In such a case, the court may choose to grant injunctive and other appropriate equitable relief, award compensatory damages to aggrieved persons (when the Attorney General so requests), and assess civil penalties (up to \$50,000 for a first violation and up to \$100,000 for any subsequent violation) "to vindicate the public interest." When determining the amount of any such penalty, the court is to give consideration to any good faith effort by the property owner or possessor to comply with the law. The court must also consider whether the owner or possessor could reasonably have anticipated the need to accommodate disabled persons.

Land Use Control

Although a real property owner generally has the right to use his property as he desires, society has placed certain limitations on this right. This section examines the property use limitations imposed by nuisance law and by zoning and subdivision ordinances. It also discusses the ultimate land use restriction—the eminent domain power—which enables the government to deprive property owners of their land.

Nuisance Law One's enjoyment of her land depends to a great extent on the uses her neighbors make of their land. When the uses of neighboring landowners conflict, the aggrieved party sometimes institutes litigation to resolve the conflict. A property use that unreasonably interferes with another person's ability to use or enjoy her own property may lead to an action for **nuisance** against the landowner or possessor engaging in the objectionable use.

The term *nuisance* has no set definition. It is often regarded, however, as encompassing any property-related use or activity that unreasonably interferes with the rights of others. Property uses potentially constituting

nuisances include uses that are inappropriate to the neighborhood (such as using a vacant lot in a residential neighborhood as a garbage dump), bothersome to neighbors (such as keeping a pack of barking dogs in one's backyard), dangerous to others (such as storing large quantities of gasoline in 50-gallon drums in one's garage), or of questionable morality (such as operating a house of prostitution). To amount to a nuisance, a use need not be illegal. The fact that relevant zoning laws allow a given use does not mean that the use cannot be a nuisance. The use's having been in existence before complaining neighbors acquired their property does not mean that the use cannot be a nuisance, though it does lessen the likelihood that the use would be held a nuisance.

The test for determining the presence or absence of a nuisance is necessarily flexible and highly dependent on the individual case's facts. Courts balance a number of factors, such as the social importance of the parties' respective uses, the extent and duration of harm experienced by the aggrieved party, and the feasibility of abating (stopping) the nuisance.

Nuisances may be private or public. To bring a *private nuisance* action, the plaintiff must be a landowner or occupier whose enjoyment of her own land is substantially lessened by the alleged nuisance. The remedies for private nuisance include damages and injunctive relief designed to stop the offending use. A *public nuisance* occurs when a nuisance harms members of the public, who need not be injured in their use of property. For example, if a power plant creates noise and emissions posing a health hazard to pedestrians and workers in nearby buildings, a public nuisance may exist even though the nature of the harm has nothing to do with any loss of enjoyment of property. Public nuisances involve a broader class of affected parties than do private nuisances. The action to abate a public nuisance must usually be brought by the government. Remedies generally include injunctive relief and civil penalties that resemble fines. On occasion, constitutional issues may arise in public nuisance cases brought by the government. Private parties may sue for abatement of a public nuisance or for damages caused by one only when they suffered unique harm different from that experienced by the general public.

Eminent Domain The Fifth Amendment to the Constitution provides that private property shall not be taken for public use without "just compensation." Implicit in this provision is the principle that the government has the power to take property for public use if it

pays "just compensation" to the owner of the property. This power, called the power of **eminent domain**, makes it possible for the government to acquire private property for highways, water control projects, municipal and civic centers, public housing, urban renewal, and other public uses. Governmental units may delegate their eminent domain power to private corporations such as railroads and utility companies.

Although the eminent domain power is a useful tool of efficient government, there are problems inherent in its use. Determining when the power can be properly exercised presents an initial problem. When the governmental unit itself uses the property taken, as would be the case with property acquired for construction of a municipal building or a public highway, the exercise of the power is proper. The use of eminent domain is controversial, however, when the government acquires the property and transfers it to a private developer.¹⁵ In the *Kelo* case, which follows shortly, the U.S. Supreme Court grappled with this issue.

Determining *just compensation* in a given case poses a second and frequently encountered eminent domain problem. The property owner is entitled to receive the "fair market value" of his property. Critics assert, however, that this measure of compensation falls short of adequately compensating the owner for her loss, because *fair market value* does not cover such matters as the lost goodwill of a business or one's emotional attachment to his home.

A third problem sometimes encountered is determining when there has been a "taking" that triggers the government's just compensation obligation. The answer is easy when the government institutes a formal legal action to exercise the eminent domain power (often called an action to *condemn* property). In some instances, however, the government causes or permits a serious physical invasion of a landowner's property without having instituted formal condemnation proceedings. For example, the government's dam-building project results in persistent flooding of a private party's land. Courts have recognized the right of property owners in such cases to institute litigation seeking compensation from the governmental unit whose actions effectively amounted to a physical taking of their land. In these so-called **inverse condemnation** cases, the property owner sends the message that "you have taken my land; now pay for it."

¹⁵This issue is discussed further in Chapter 3, as are other issues relating to eminent domain.

Kelo v. City of New London

125 S. Ct. 2655 (U.S. Sup. Ct. 2005)

The city of New London, Connecticut, had experienced decades of economic decline. In 1990, a state agency designated the city a “distressed municipality.” In 1996, the federal government closed a U.S. naval facility in the Fort Trumbull area of the city that had employed over 1,500 people. In 1998, the city’s unemployment rate was nearly double that of the rest of the state and its population of just under 24,000 residents was at its lowest since 1920. These conditions prompted state and local officials to target New London, and particularly its Fort Trumbull area, for economic revitalization.

To this end, New London Development Corporation (NLDC), a private nonprofit entity established some years earlier to assist the city in planning economic development, was reactivated. In January 1998, the state authorized a \$5.35 million bond issue to support the NLDC’s planning activities. In February, the pharmaceutical company Pfizer Inc. announced that it would build a \$300 million research facility on a site immediately adjacent to Fort Trumbull; local planners hoped that Pfizer would draw new business to the area, thereby serving as a catalyst to the area’s rejuvenation. In May, the city council authorized the NLDC to formally submit its plans to the relevant state agencies for review. Upon obtaining state-level approval, the NLDC finalized an integrated development plan focused on 90 acres of the Fort Trumbull area, which comprises approximately 115 privately owned properties, as well as the 32 acres of land formerly occupied by the naval facility.

The development plan called for the creation of restaurants, shops, marinas for both recreational and commercial uses, a pedestrian “riverwalk,” 80 new residences, a new U.S. Coast Guard Museum, research and development office space, and parking. The NLDC intended the development plan to capitalize on the arrival of the Pfizer facility and the new commerce it was expected to attract. In addition to creating jobs, generating tax revenue, and helping to build momentum for the revitalization of downtown New London, the plan was also designed to make the city more attractive and to create leisure and recreational opportunities on the waterfront and in the park. The city council approved the plan in January 2000, and designated the NLDC as its development agent in charge of implementation. The city council also authorized the NLDC to purchase property or to acquire property by exercising eminent domain in the city’s name.

The NLDC successfully negotiated the purchase of most of the real estate in the 90-acre area, but its negotiations with nine property owners, including the petitioners Susette Kelo, Wilhelmina Dery, and Charles Dery, failed. As a result, in November 2000, the NLDC initiated condemnation proceedings. Kelo had lived in the Fort Trumbull area since 1997. She had made extensive improvements to her house, which she prizes for its water view. Wilhelmina Dery was born in her Fort Trumbull house in 1918 and had lived there her entire life. Her husband, Charles, had lived in the house since they married some 60 years ago. In all, the nine petitioners own 15 properties in Fort Trumbull. There is no allegation that any of these properties is blighted or otherwise in poor condition; rather, they were condemned only because they happen to be located in the development area.

In December 2000, the petitioners brought this action claiming, among other things, that the taking of their properties would violate the “public use” restriction in the Fifth Amendment. The trial court granted a permanent restraining order prohibiting the taking of properties in one area of Fort Trumbull, but denied the order for properties in another area. Both sides appealed to the Supreme Court of Connecticut. That court held that all of the city’s proposed takings were valid. The petitioners then appealed to the U.S. Supreme Court.

Stevens, Justice

Two polar propositions are perfectly clear. On the one hand, it has long been accepted that the sovereign may not take the property of *A* for the sole purpose of transferring it to another private party *B*, even though *A* is paid just compensation. On the other hand, it is equally clear that a State may transfer property from one private party to another if future “use by the public” is the purpose of the taking; the condemnation of land for a railroad with common-carrier duties is a familiar example. Neither of these propositions, however, determines the disposition of this case.

As for the first proposition, the City would no doubt be forbidden from taking petitioners’ land for the purpose of

conferring a private benefit on a particular private party. Nor would the City be allowed to take property under the mere pretext of a public purpose, when its actual purpose was to bestow a private benefit. The takings before us, however, would be executed pursuant to a carefully considered development plan. The trial judge and all the members of the Supreme Court of Connecticut agreed that there was no evidence of an illegitimate purpose in this case. On the other hand, this is not a case in which the City is planning to open the condemned land—at least not in its entirety—to use by the general public. Nor will the private lessees of the land in any sense be required to operate like common carriers, making their services available to all comers. But although such a projected use would be sufficient

to satisfy the public use requirement, this Court long ago rejected any literal requirement that condemned property be put into use for the general public. Indeed, while many state courts in the mid-19th century endorsed “use by the public” as the proper definition of public use, that narrow view steadily eroded over time. Not only was the “use by the public” test difficult to administer (e.g., what proportion of the public need have access to the property? at what price?), but it proved to be impractical given the diverse and always evolving needs of society. Accordingly, when this Court began applying the Fifth Amendment to the States at the close of the 19th century, it embraced the broader and more natural interpretation of public use as “public purpose.” The disposition of this case therefore turns on the question whether the City’s development plan serves a “public purpose.”

Without exception, our cases have defined that concept broadly, reflecting our long-standing policy of deference to legislative judgments in this field. Viewed as a whole, our jurisprudence has recognized that the needs of society have varied between different parts of the Nation, just as they have evolved over time in response to changed circumstances. For more than a century, our public use jurisprudence has wisely eschewed rigid formulas and intrusive scrutiny in favor of affording legislatures broad latitude in determining what public needs justify the use of the takings power.

Those who govern the City were not confronted with the need to remove blight in the Fort Trumbull area, but their determination that the area was sufficiently distressed to justify a program of economic rejuvenation is entitled to our deference. The City has carefully formulated an economic development plan that it believes will provide appreciable benefits to the community, including—but by no means limited to—new jobs and increased tax revenue. As with other exercises in urban planning and development, the City is endeavoring to coordinate a variety of commercial, residential, and recreational uses of land, with the hope that they will form a whole greater than the sum of its parts. To effectuate this plan, the City has invoked a state statute that specifically authorizes the use of eminent domain to promote economic development. Given the comprehensive character of the plan, the thorough deliberation that preceded its adoption, and the limited scope of our review, it is appropriate for us to resolve the challenges of the individual owners, not on a piecemeal basis, but rather in light of the entire plan. Because that plan unquestionably serves a public purpose, the takings challenged here satisfy the public use requirement of the Fifth Amendment.

To avoid this result, petitioners urge us to adopt a new bright-line rule that economic development does not qualify as a public use. Putting aside the unpersuasive suggestion that the City’s plan will provide only purely economic benefits, neither

precedent nor logic supports petitioners’ proposal. Promoting economic development is a traditional and long-accepted function of government. There is, moreover, no principled way of distinguishing economic development from the other public purposes that we have recognized. In our cases upholding takings that facilitated agriculture and mining, for example, we emphasized the importance of those industries to the welfare of the States in question. It would be incongruous to hold that the City’s interest in the economic benefits to be derived from the development of the Fort Trumbull area has less of a public character than any of those other interests. Clearly, there is no basis for exempting economic development from our traditionally broad understanding of public purpose.

Petitioners contend that using eminent domain for economic development impermissibly blurs the boundary between public and private takings. Again, our cases foreclose this objection. Quite simply, the government’s pursuit of a public purpose will often benefit individual private parties. It is further argued that without a bright-line rule nothing would stop a city from transferring citizen *A*’s property to citizen *B* for the sole reason that citizen *B* will put the property to a more productive use and thus pay more taxes. Such a one-to-one transfer of property, executed outside the confines of an integrated development plan, is not presented in this case. While such an unusual exercise of government power would certainly raise a suspicion that a private purpose was afoot, the hypothetical cases posited by petitioners can be confronted if and when they arise. They do not warrant the crafting of an artificial restriction on the concept of public use.

Alternatively, petitioners maintain that for takings of this kind we should require a “reasonable certainty” that the expected public benefits will actually accrue. Such a rule, however, would represent an even greater departure from our precedent. The disadvantages of a heightened form of review are especially pronounced in this type of case. Orderly implementation of a comprehensive redevelopment plan obviously requires that the legal rights of all interested parties be established before new construction can be commenced. A constitutional rule that required postponement of the judicial approval of every condemnation until the likelihood of success of the plan had been assured would unquestionably impose a significant impediment to the successful consummation of many such plans.

Just as we decline to second-guess the City’s considered judgments about the efficacy of its development plan, we also decline to second-guess the City’s determinations as to what lands it needs to acquire in order to effectuate the project. In affirming the City’s authority to take petitioners’ properties, we do not minimize the hardship that condemnations may entail, notwithstanding the payment of just compensation. We

emphasize that nothing in our opinion precludes any State from placing further restrictions on its exercise of the takings power. Indeed, many States already impose “public use” requirements that are stricter than the federal baseline. Some of these requirements have been established as a matter of state constitutional law, while others are expressed in state eminent domain statutes that carefully limit the grounds upon which takings may be exercised. As the submissions of the parties make clear,

Zoning and Subdivision Laws State legislatures commonly delegate to cities and other political subdivisions the power to impose reasonable regulations designed to promote the public health, safety, and welfare (often called the *police power*). Zoning ordinances, which regulate real property use, stem from the exercise of the police power. Normally, zoning ordinances divide a city or town into various districts and specify or limit the uses to which property in those districts may be put. They also contain requirements and restrictions regarding improvements built on the land.

Zoning ordinances frequently contain direct restrictions on land use, such as by limiting property use in a given area to single-family or high-density residential uses, or to commercial, light industry, or heavy industry uses. Other sorts of use-related provisions commonly found in zoning ordinances include restrictions on building height, limitations on the portion of a lot that can be covered by a building, and specifications of the distance buildings must be from lot lines (usually called *setback* requirements). Zoning ordinances also commonly restrict property use by establishing population density limitations. Such restrictions specify the maximum number of persons who can be housed on property in a given area and dictate the amount of living space that must be provided for each person occupying residential property. In addition, zoning ordinances often establish restrictions designed to maintain or create a certain aesthetic character in the community. Examples of this type of restriction include specifications of buildings’ architectural style, limitations on billboard and sign use, and designations of special zones for historic buildings.

Many local governments also have ordinances dealing with proposed subdivisions. These ordinances often require the subdivision developer to meet certain requirements regarding lot size, street and sidewalk layout, and sanitary facilities. They also require that the city or town approve the proposed development. Such ordinances are

the necessity and wisdom of using eminent domain to promote economic development are certainly matters of legitimate public debate. This Court’s authority, however, extends only to determining whether the City’s proposed condemnations are for a “public use” within the meaning of the Fifth Amendment to the Federal Constitution.

Affirmed in favor of the City.

designed to further general community interests and to protect prospective buyers of property in the subdivision by ensuring that the developer meets minimum standards of suitability.

Nonconforming Uses A zoning ordinance has *prospective* effect. This means that the uses and buildings already existing when the ordinance is passed (**nonconforming uses**) are permitted to continue. The ordinance may provide, however, for the gradual phasing out of nonconforming uses and buildings that do not fit the general zoning plan.

Relief from Zoning Ordinances A property owner who wishes to use his property in a manner prohibited by a zoning ordinance has more than one potential avenue of relief from the ordinance. He may, for instance, seek to have the ordinance **amended**—in other words, attempt to get the law changed—on the ground that the proposed amendment is consistent with the essence of the overall zoning plan.

A different approach would be to seek permission from the city or political subdivision to deviate from the zoning law. This permission is called a **variance**. A person seeking a variance usually claims that the ordinance works an undue hardship on her by denying her the opportunity to make reasonable use of her land. Examples of typical variance requests include a property owner’s seeking permission to make a commercial use of her property even though it is located in an area zoned for residential purposes, or permission to deviate from normal setback or building size requirements.

Attempts to obtain variances and zoning ordinance amendments frequently clash with the interests of other owners of property in the same area—owners who have a vested interest in maintaining the status quo. As a result, variance and amendment requests often produce heated battles before local zoning authorities.

Ethics in Action

The Jesus Center rented a two-story building in the City of Farmington Hills in a district zoned for single-family dwellings as well as churches and “other facilities normally incidental thereto.” In its leased property, the church held services, Bible study, and prayer meetings as well as providing for collection and distribution of food, clothing, and other essentials for needy people. In 1991, The Jesus Center began to operate a homeless shelter.

After being notified that zoning approval was needed for this use of the property, The Jesus Center sought such approval, but it was denied on the ground that the provision of shelter services was not a permissible accessible use. What are the major ethical considerations suggested by such uses of zoning ordinances and restrictive covenants? What are the major ethical considerations suggested by attempts to place homeless shelters in primarily single-family residential locations?

Challenges to the Validity of the Zoning Ordinance

A disgruntled property owner might also attack the zoning ordinance’s validity on constitutional grounds. Litigation challenging zoning ordinances has become frequent in recent years, as cities and towns have used their zoning power to achieve social control. For example, assume that a city creates special zoning requirements for adult bookstores or other uses considered moral threats to the community. Such uses of the zoning power have been challenged as unconstitutional restrictions on freedom of speech. In *City of Renton v. Playtime Theatres, Inc.*, however, the Supreme Court upheld a zoning ordinance that prohibited the operation of adult bookstores within 1,000 feet of specified uses such as residential areas and schools.¹⁶ The Court established that the First Amendment rights of operators of adult businesses would not be violated by such an ordinance so long as the city provided them a “reasonable opportunity to open and operate” their businesses within the city. The reasonable opportunity test was satisfied in *City of Renton* even though the ordinance at issue effectively restricted adult bookstores to a small area of the community in which no property was then available to buy or rent. Lower court cases reveal, however, that the fact-specific nature of the inquiry contemplated by the reasonable opportunity test means that the government is not guaranteed of passing the test in every case.

Other litigation has stemmed from ordinances by which municipalities have attempted to “zone out” resi-

dential facilities such as group homes for mentally retarded adults. In a leading case, the Supreme Court held that the Constitution’s Equal Protection Clause was violated by a zoning ordinance that required a special use permit for a group home for the mentally retarded.¹⁷ The Fair Housing Act, which forbids discrimination on the basis of handicap and familial status, has also been used as a basis for challenging decisions that zone out group homes. Such a challenge has a chance of success when the plaintiff demonstrates that the zoning board’s actions were a mere pretext for discrimination.¹⁸ Certain applications of zoning ordinances that establish single-family residential areas may also raise Fair Housing Act–based claims of handicap discrimination.

Many cities and towns have attempted to restrict single-family residential zones to living units of traditional families related by blood or marriage. In enacting ordinances along those lines, municipalities have sought to prevent the presence of groups of unrelated students, commune members, or religious cult adherents by specifically defining the term *family* in a way that excludes these groups. In *Belle Terre v. Boraas*,¹⁹ the Supreme Court upheld such an ordinance as applied to a group of unrelated students. The Court later held, however, that an ordinance defining *family* so as to prohibit a grandmother from living with her grandsons was an unconstitutional intrusion on personal freedom regarding family life.²⁰ Restrictive definitions of *family* have been held unconstitutional under state constitutions in some cases but narrowly construed by courts in other cases.

¹⁶475 U.S. 41 (U.S. Sup. Ct. 1986). A later case, *FW/PBS, Inc. v. City of Dallas*, 493 U.S. 215 (U.S. Sup. Ct. 1990), presented a different sort of restriction on adult businesses and resulted in a different outcome. There, the Court held that a comprehensive ordinance requiring licensing of adult cabarets and other adult entertainment establishments violated the First Amendment because the ordinance did not have appropriate procedural safeguards against arbitrary denials of licenses. The ordinance’s chief defect was its failure to establish a time limit within which city authorities were required to act on license applications.

¹⁷*City of Cleburne v. Cleburne Living Centers*, 473 U.S. 432 (U.S. Sup. Ct. 1985).

¹⁸See, for example, *Baxter v. City of Nashville*, 720 F. Supp. 720 (S.D. Ill. 1989), which involves a challenge by a hospice for AIDS patients to a city’s denial of a special use permit.

¹⁹416 U.S. 1 (U.S. Sup. Ct. 1974).

²⁰*Moore v. City of East Cleveland*, 431 U.S. 494 (U.S. Sup. Ct. 1977).

Land Use Regulation and Taking Another type of litigation seen with increasing frequency in recent years centers around zoning laws and other land use regulations that make the use of property less profitable.²¹ Affected property owners have challenged the application of such regulations as unconstitutional takings of property without just compensation, even though these cases do not involve the actual physical invasions present in the inverse condemnation cases discussed earlier in this chapter.

States normally have broad discretion to use their police power for the public benefit, even when that means interfering to some extent with an owner's right to develop her property as she desires. Some regulations, however, may interfere with an owner's use of his property to such an extent that they constitute a taking.

For instance, in *Nollan v. California Coastal Commission*,²² the owners of a beach-front lot (the Nollans) wished to tear down a small house on the lot and replace that structure with a larger house. The California Coastal Commission conditioned the grant of the necessary coastal development permit on the Nollans' agreeing to allow the public an easement across their property. This easement would have allowed the public to reach certain nearby public beaches more easily. The Nollans challenged the validity of the Coastal Commission's action.

Ultimately, the Supreme Court concluded that the Coastal Commission's placing the easement condition on the issuance of the permit amounted to an impermissible regulatory taking of the Nollans' property. In reaching this conclusion, the Court held that the state could not avoid paying compensation to the Nollans by choosing to do by way of the regulatory route what it would have had to pay for if it had followed the formal eminent domain route.

Regulations Denying Economically Beneficial Uses

What about a land use regulation that allows the property owner no *economically beneficial use* of his property? *Lucas v. South Carolina Coastal Commission*²³ was brought by a property owner, Lucas, who had paid nearly \$1 million for two residential beach-front lots before South Carolina enacted a coastal protection statute. This statute's effect was to bar Lucas from building any permanent habitable structures on the lots. The trial court held that the statute rendered Lucas's property "valueless" and that an unconstitutional taking had occurred, but the South

Carolina Supreme Court reversed. The U.S. Supreme Court, however, held that when a land use regulation denies "all economically beneficial use" of property, there normally has been a taking for which just compensation must be paid. The exception to this rule, according to the Court, would be when the economically productive use being prohibited by the land use regulation was already disallowed by nuisance law or other comparable property law principles. The Court therefore reversed and remanded the case for determination of whether there had been a taking under the rule crafted by the Court, or instead an instance in which the "nuisance" exception applied. On remand, the South Carolina Supreme Court concluded that a taking calling for compensation had occurred (and, necessarily, that the nuisance exception did not apply to Lucas's intended residential use).²⁴

The mere fact that a land use regulation deprives the owner of the *highest and most profitable use* of his property does not mean, however, that there has been a taking. If the regulation still allows a use that is economically beneficial in a meaningful sense—even though not the most profitable use—the *Lucas* analysis would seem to indicate that an unconstitutional taking probably did not occur. At the same time, *Lucas* offered hints that less-than-total takings (in terms of restrictions on economically beneficial uses) may sometimes trigger a right of compensation on the landowner's part. Thus, it appears that even as to land use regulations that restrict some but not all economically beneficial uses, property owners are likely to continue arguing (as they have in recent years) that the regulations go "too far" and amount to a taking.

There is no set formula for determining whether a regulation has gone too far. Courts look at the relevant facts and circumstances and weigh a variety of factors, such as the economic impact of the regulation, the degree to which the regulation interferes with the property owner's reasonable expectations, and the character of the government's invasion. The weighing of these factors occurs against the backdrop of a general presumption that state and local governments should have reasonably broad discretion to develop land use restrictions pursuant to the police power. As a result, the outcome of a case in which *regulatory taking* allegations are made is less certain than when a *physical taking* (a physical invasion of the sort addressed in the earlier discussion of inverse condemnation cases) appears to have occurred.

The following *Lingle v. Chevron U.S.A., Inc.* case clarifies the legal standard that should be used in determining if a regulation constitutes a taking.

²¹This issue is also discussed in Chapter 3.

²²483 U.S. 825 (U.S. Sup. Ct. 1987).

²³505 U.S. 1003 (U.S. Sup. Ct. 1992).

²⁴424 S.E. 2d 484 (S.C. Sup. Ct. 1992).

Lingle v. Chevron U.S.A., Inc.

544 U.S. 528 (U.S. Sup. Ct. 2005)

Chevron was the largest refiner and marketer of gasoline in Hawaii. It sold most of its products through 64 independent lessee-dealer stations. In a typical lessee-dealer arrangement, Chevron would buy or lease land from a third party, build a service station, and then lease the station to a dealer. Chevron charged the lessee-dealer a monthly rent, defined as a percentage of the dealer's margin on retail sales of gasoline and other goods.

In June 1997, the Hawaii Legislature enacted Act 257, apparently in response to concerns about the effects of market concentration on retail gasoline prices. The statute sought to protect independent dealers by imposing certain restrictions on the ownership and leasing of service stations by oil companies. Among other provisions, Act 257 limited the amount of rent that an oil company may charge a lessee-dealer to 15 percent of the dealer's gross profits from gasoline sales plus 15 percent of gross sales of products other than gasoline. Act 257 reduced by about \$207,000 per year the aggregate rent that Chevron would otherwise charge on 11 of its 64 lessee-dealer stations. On the other hand, the statute allowed Chevron to collect more rent than it would otherwise charge at its remaining 53 lessee-dealer stations, such that Chevron could increase its overall rental income from all 64 stations by nearly \$1.1 million per year. Over the past 20 years, Chevron has not fully recovered the costs of maintaining lessee-dealer stations in any state through rent alone. Rather, the company recoups its expenses through a combination of rent and product sales.

Chevron sued the Governor and Attorney General of Hawaii in their official capacities, claiming that the statute's rent cap provision, on its face, was a taking of Chevron's property in violation of the Fifth and Fourteenth Amendments. Chevron sought a declaration to this effect as well as an injunction against the application of the rent cap to its stations. Chevron moved for summary judgment on its takings claim, and Hawaii filed a cross-motion for summary judgment on all of Chevron's claims. The District Court granted summary judgment to Chevron, and Hawaii appealed. The Court of Appeals for the Ninth Circuit reversed and remanded the case. On remand, the District Court entered judgment for Chevron after a one-day bench trial. The Ninth Circuit affirmed this judgment, and Hawaii appealed.

O'Connor, Justice

The Takings Clause of the Fifth Amendment provides that private property shall not “be taken for public use, without just compensation.” As its text makes plain, the Takings Clause does not prohibit the taking of private property, but instead places a condition on the exercise of that power. In other words, it is designed not to limit the governmental interference with property rights per se, but rather to secure compensation in the event of otherwise proper interference amounting to a taking. While scholars have offered various justifications for this regime, we have emphasized its role in barring Government from forcing some people alone to bear public burdens which, in all fairness and justice, should be borne by the public as a whole.

The paradigmatic taking requiring just compensation is a direct government appropriation or physical invasion of private property. However, the Court recognized that government regulation of private property may, in some instances, be so onerous that its effect is tantamount to a direct appropriation or ouster—and that such “regulatory takings” may be compensable under the Fifth Amendment. In Justice Holmes' storied but cryptic formulation, “while property may be regulated to a certain extent, if regulation goes too far it will be recognized as a taking.” The rub, of course, has been—and remains—how to discern how far is “too far.”

Our precedents stake out two categories of regulatory action that generally will be deemed per se takings for Fifth

Amendment purposes. First, where government requires an owner to suffer a permanent physical invasion of her property—however minor—it must provide just compensation. A second categorical rule applies to regulations that completely deprive an owner of “all economically beneficial use” of her property. We held in *Lucas* [*v. South Carolina Coastal Council*] that the government must pay just compensation for such “total regulatory takings.” Outside these two relatively narrow categories, regulatory takings challenges are governed by the standards set forth in *Penn Central Transp. Co. v. New York City*. The Court in *Penn Central* identified “several factors that have particular significance.” Primary among those factors are “the economic impact of the regulation on the claimant and, particularly, the extent to which the regulation has interfered with distinct investment-backed expectations.” In addition, the “character of the governmental action”—for instance whether it amounts to a physical invasion or instead merely affects property interests through “some public program adjusting the benefits and burdens of economic life to promote the common good”—may be relevant in discerning whether a taking has occurred. The *Penn Central* factors have served as the principal guidelines for resolving regulatory takings claims that do not fall within the physical takings or *Lucas* rules.

In *Agins v. City of Tiburon*, the Court declared that “the application of a general zoning law to particular property effects a taking if the ordinance does not substantially advance

legitimate state interests or denies an owner economically viable use of his land.” Because this statement is phrased in the disjunctive, *Agins*’ “substantially advances” language has been read to announce a stand-alone regulatory takings test that is wholly independent of *Penn Central* or any other test. Indeed, the lower courts in this case struck down Hawaii’s rent control statute based solely upon their findings that it does not substantially advance a legitimate state interest. We conclude that this formula has no proper place in our takings jurisprudence. The “substantially advances” formula asks, in essence, whether a regulation of private property is effective in achieving some legitimate public purpose.

An inquiry of this nature has some logic in the context of a due process challenge, for a regulation that fails to serve any legitimate governmental objective may be so arbitrary or irrational that it runs afoul of the Due Process Clause. But such a test is not a valid method of discerning whether private property has been “taken” for purposes of the Fifth Amendment. In stark contrast to the regulatory takings tests discussed above, the “substantially advances” inquiry reveals nothing about the magnitude or character of the burden a particular regulation imposes upon private property rights. Nor does it provide any information about how any regulatory burden is distributed among property owners. In consequence, this test does not help to identify those regulations whose effects are functionally comparable to government appropriation or invasion of private property; it is tethered neither to the text of the Takings Clause nor to the basic justification for allowing regulatory actions to be challenged under the Clause.

Chevron appeals to the general principle that the Takings Clause is meant to bar Government from forcing some people alone to bear public burdens which, in all fairness and justice, should be borne by the public as a whole. But that appeal is clearly misplaced, for the reasons just indicated. A test that tells us nothing about the actual burden imposed on property rights, or how that burden is allocated, cannot tell us when justice might require that the burden be spread among taxpayers through the payment of compensation. The owner of a property subject to a regulation that effectively serves a legitimate state

interest may be just as singled out and just as burdened as the owner of a property subject to an ineffective regulation. It would make little sense to say that the second owner has suffered a taking while the first has not. Likewise, an ineffective regulation may not significantly burden property rights at all, and it may distribute any burden broadly and evenly among property owners. The notion that such a regulation nevertheless “takes” private property for public use merely by virtue of its ineffectiveness or foolishness is untenable.

Chevron’s challenge to the Hawaii statute in this case illustrates the flaws in the “substantially advances” theory. To begin with, it is unclear how significantly Hawaii’s rent cap actually burdens Chevron’s property rights. The cap would reduce Chevron’s aggregate rental income on 11 of its 64 lessee-dealer stations by about \$207,000 per year, but that Chevron nevertheless expects to receive a return on its investment in these stations that satisfies any constitutional standard. Moreover, Chevron asserted below, and the District Court found, that Chevron would recoup any reductions in its rental income by raising wholesale gasoline prices. In short, Chevron has not clearly argued—let alone established—that it has been singled out to bear any particularly severe regulatory burden. Rather, the gravamen of Chevron’s claim is simply that Hawaii’s rent cap will not actually serve the State’s legitimate interest in protecting consumers against high gasoline prices. Whatever the merits of that claim, it does not sound under the Takings Clause. Chevron plainly does not seek compensation for a taking of its property for a legitimate public use, but rather an injunction against the enforcement of a regulation that it alleges to be fundamentally arbitrary and irrational.

We conclude that the “substantially advances” formula announced in *Agins* is not a valid method of identifying regulatory takings for which the Fifth Amendment requires just compensation. Since Chevron argued only a “substantially advances” theory in support of its takings claim, it was not entitled to summary judgment on that claim.

Reversed in favor of Hawaii.

Problems and Problem Cases

1. Perrone Realty leased approximately 2,500 square feet of its 8,500 square foot building to J & P on a four-year lease with options to extend the lease to 2019. The structure was a pre-engineered steel building on cement. Although it was always intended

for commercial retail use, the building was not constructed for any particular type of business. Wiring and insulation and the construction of walls were needed. J & P undertook the finishing of the interior of the premises to serve an intended use as a delicatessen. In addition to overseeing the installation of walls, drop ceiling components, lighting, flooring,

and other necessary parts of its new business, J & P installed a hood system over the grill and stove to exhaust smoke and grease-laden vapors. The hood was stainless steel and approximately two feet high, four and one-half feet deep and twelve feet wide. It hung from eight threaded steel rods, one-half inch in diameter, which were bolted to bar joists in the rafters of the building and welded to the top of the hood. Air ducts were constructed through the back wall of the building. The system hooked up to electricity, natural gas, and water, so removal of the hood system would require the capping of electrical, plumbing, and gas conduits. The life expectancy of the hood was about 25 years. It was resalable and transferable to another business involving the cooking of food, and J & P intended it to be portable to another site. J & P had operated delicatessens or restaurants at other locations in the past and intended to do so in the future. The written rental agreement was silent on the status of the range hood. The type of business that will occupy the premises in the future is uncertain. Perrone brought an action against J & P for possession of the property. A question arose whether the range hood was personal property or a fixture. Could J & P remove the hood at the termination of its lease?

2. In 1982, Green's grandmother, Billie Harrild, offered Green a piece of the family's land. Green selected a parcel of land on a bluff, across a creek from her grandparents' house. The alleged gift was not recorded, and Green's grandparents and cousin remained the owners of record. However, according to Green's testimony, in the 10 years following her entry onto the property, all three "absolutely" recognized the land as hers. Neighbors testified that Billie consistently referred to the land as Green's property. Between 1982 and 1992, Green gradually built a house and cultivated grounds on the bluff. She worked on the property over the summers, and worked as a nurse and glassmaker in California for the rest of the year. In 1982, she planned the site of her house and cleared trees on the lot. In the summers of 1983 and 1984, she lived in a camper on the property, cleared more trees and stumps, and oversaw hand excavation for the foundation of the house. In the following summers, she gradually expanded the cultivated section of the property, planting lilac bushes and fruit trees and installing a coop for chickens and turkeys. She and a neighbor worked on building the house itself, and beginning in 1987, Green lived in the nearly complete house during the summers. In 1986, Green worked in Fairbanks the whole year and visited the property by snow machine during the winter. In 1989 she lived on the property for eight or nine months. Green left trees standing on much of the property, but cleared undergrowth and planted native plants over an area of several acres. She also cut trees from a wide area on the southern hillside in order to clear the view from the cabin. She posted "No Trespassing" signs and built benches in some areas away from the house. She put up a chain across the road entering the property, but did not fence the entire area. In 1990, the house was considerably damaged by vandalism, and Green repaired the damage when she returned to Alaska in the spring. Green arranged with her grandparents that, for the remainder of their lives, they could extract and sell small quantities of rock from the property, but she strongly opposed use of such equipment on the property. Sometime between 1988 and 1991, the Harrilds signed a contract with an extraction company, Earthmovers, allowing them to excavate rock from the family property, including the bluff. Earthmovers excavated a trench on the bluff on a day when Green was not at home. When Green returned and found the workers and equipment on the property, however, she told them that they were not allowed to excavate there. Green granted the workers permission to finish the task at hand, insisted that they arrange to repair a telephone line that they had damaged, and ordered them to leave the property. In 1988, Vezev became interested in properties in this area. Vezev approached the Harrilds about purchasing their land. In 1994, while Vezev was still in negotiations with the Harrilds, Green called him, and, according to Green, she told Vezev that the land belonged to her. In the winter of 1994–1995, Vezev purchased property that included the bluff area claimed by Green. Green brought suit, asserting that she owned the bluff area property. Will she win?
3. Aidinoff purchased land in 1979. It is adjacent to Sterling City Road but can only be reached by crossing land formerly owned by Rand. Other routes of access are impossible because of wetlands and a brook. A gravel driveway crosses the Rand land to Aidinoff's land. The person from whom Aidinoff purchased her land used the driveway for access to her land, and Aidinoff used the driveway from 1979 until 2003. She drove vehicles, walked, and brought

animals across the driveway. She also used the power coming in over utility lines serving the property. After Aidinoff had begun using the driveway, she and Rand had had a conversation about the driveway, and Rand had told her that he owned it and he had no problem with her using it but it was not “an open way for everybody to go through.” In 2003, Rand sold his property to the Lathrops. After buying the property, the Lathrops blocked the driveway and prevented Aidinoff from using it to access her property. Aidinoff claimed that she had the right to use the driveway because she had acquired an easement by prescription and an easement by necessity. Did she?

4. A declaration of restrictive covenants for the Mains Farm subdivision was recorded in 1962. Worthington purchased a residential lot in Mains Farm in 1987. A house already existed on the property. Before the purchase, Worthington obtained and read a copy of the restrictive covenants, which stated in part that all lots in Mains Farms “shall be designated as ‘Residence Lots’ and shall be used for single-family residential purposes only.” Worthington later began occupying the residence along with four adults who paid her for 24-hour protective supervision and care. These four adults, who were not related to Worthington, were unable to do their own housekeeping, prepare their own meals, or attend to their personal hygiene. In providing this supervision and care on a for-profit basis, Worthington complied with the licensing and inspection requirements established by state law, but she obtained the permit by stating that only her family would be living with her. The Mains Farm Homeowners Association, which consisted of owners of property in the subdivision, filed suit against Worthington, asserting that her use of her property violated the restrictive covenant. Will the association prevail?
5. In 1968, JEP bought a fully functioning theater in the Lake of the Ozarks. The building was designed and constructed as a live theater. It contained a raked concrete floor, 1,000 seats bolted to the floor, stage and backstage areas, a concession stand, and a ticket booth. In 1970, the building was converted to a movie theater. On April 1, 1973, JEP agreed to a 20-year lease with Jablonow-Komm Theatres. Shortly thereafter, and with the approval of JEP, Jablonow removed the old wooden seats and installed 733 fabric-covered plastic theater seats. Jablonow then transferred its interest in the lease and property to RKO Mid-America Theatres, Inc. In May 1982, JEP and RKO amended the 1973 lease, giving RKO the right to remodel the theater so that it had two screens instead of one for an increase in monthly rent. Two years later, RKO transferred its interest in the lease and property to Commonwealth Theatres of Missouri. As part of this transfer, RKO gave Commonwealth a “Bill of Sale and Assignment” that purported to transfer to Commonwealth 654 theater seats, “free and clear of all liens, encumbrances, claims, clouds, charges, equities, or imperfections of any kind or nature. . . .” In May 1985, Commonwealth transferred its interest in the lease and property to Wehrenberg. In April 1993, after the lease had expired and without JEP’s approval, Wehrenberg uprooted the theater seats from the floor, breaking sections of concrete and leaving behind only the inclined floor, pocked with 2,600 holes. Were these seats fixtures?
6. Manor Ridge is a development consisting of 118 one-family residential lots on a 50-acre tract. When the tract was developed in the late 1920s, the developer established various deed restrictions “to run with the land.” In addition to the covenant prohibiting “outbuildings,” the Manor Ridge deeds provide that (1) “no more than one house intended for not more than one family shall be built on any plot,” and (2) “no house shall be erected on any property . . . costing less than Fourteen thousand (\$14,000) dollars based on the cost of construction of January 1st 1926.” The deeds also require any residence to be set back 40 feet from the street and any detached garage to be set back 75 feet. The evident objective of this set of deed restrictions was to establish an exclusive residential community. The Lenocis bought their home in Manor Ridge in the summer of 1994. Shortly thereafter, they contracted to do extensive renovations to the home and to construct a “pool cabana” next to an existing in-ground swimming pool. The Lenocis began construction of the cabana in late March of 1995. Sneirson, who lives two houses away, observed the construction and promptly notified the municipal building department that the structure violated the restrictive covenant prohibiting “outbuildings.” The building department issued a stop work order, but later rescinded the order. The Lenocis completed construction of the cabana. It is a substantial structure that covers more than 600 square feet, and has a cathedral ceiling, bathroom, refrigerator, dryer, wet bar, and heating system. It is located only five feet from the rear boundary line

between the Lenocis' property and the property of the Steigers, close to the Steigers' swimming pool. Fifteen of the 118 properties located in Manor Ridge are occupied by ancillary structures. Ten of those structures are small sheds for the storage of pool or lawn mowing equipment, one is a dollhouse, and the other four are pool cabanas. The Lenocis' cabana is the largest in Manor Ridge; the only other one nearly as large is located on a two-and-a-half-acre lot, which is five times larger than the Lenocis' half-acre lot. Should the Lenocis be compelled to remove the cabana?

7. The Buzby Landfill was operated from 1966 to 1978. Although it was not licensed to receive liquid industrial or chemical wastes, large amounts of hazardous materials and chemicals were dumped there. Toxic wastes began to escape from the landfill because it had no liner or cap. Tests performed by a state environmental protection agency revealed ground water contamination caused by hazardous waste seepage from the landfill. The federal Environmental Protection Agency investigated the situation and recommended that the Buzby Landfill site be considered for cleanup under the federal Superfund law, but the cleanup did not take place. During the 1980s, Canetic Corp. and Canuso Management Corp. developed a housing subdivision near the closed Buzby Landfill. Some of the homes in the subdivision were within half a mile of the old landfill. Some of the homeowners filed a class action lawsuit alleging that Canetic and Canuso had substantial information about the dangers of placing a subdivision near the landfill, but they had not disclosed to buyers the fact that the subdivision was located near a hazardous waste dump. The defendants claimed that they did not have the duty to disclose conditions that happened on someone else's property. Will the defendants win?
8. Voyeur Dorm operates an Internet-based Web site that provides a 24-hour-a-day Internet transmission portraying the lives of the residents of 2312 West Farwell Drive, Tampa, Florida. Throughout its existence, Voyeur Dorm has employed 25 to 30 different women, most of whom entered into a contract that specifies, among other things, that they are "employees," on a "stage and filming location," with "no reasonable expectation of privacy," for "entertainment purposes." Subscribers to voyeurdorm.com pay a subscription fee of \$34.95 a month to watch the women employed at the premises and pay an added

fee of \$16.00 per month to "chat" with the women. At a zoning hearing, Voyeur Dorm's counsel conceded that five women live in the house, that there are cameras in the corners of all the rooms of the house, that for a fee a person can join a membership to a Web site wherein a member can view the women 24 hours a day, seven days a week, that a member, at times, can see someone disrobed, that the women receive free room and board, and that the women are paid as part of a business enterprise. From August 1998 to June 2000, Voyeur Dorm generated subscriptions and sales totaling \$3,166,551.35.

Section 27–523 of Tampa's City Code defines adult entertainment establishments as:

any premises . . . on which is offered to members of the public or any person, for a consideration, entertainment featuring or in any way including specified sexual activities . . . or entertainment featuring the displaying or depicting of specified anatomical areas . . . ; "entertainment" as used in this definition shall include, but not be limited to, books, magazines, films, newspapers, photographs, paintings, drawings, sketches or other publications or graphic media, filmed or live plays, dances or other performances either by single individuals or groups, distinguished by their display or depiction of specified anatomical areas or specified sexual activities.

The City of Tampa argues that Voyeur Dorm is an adult use business pursuant to the express and unambiguous language of section 27–523 and, as such, cannot operate in a residential neighborhood. Is the city correct?

9. In 1973, the Feests purchased real property from Renak and several co-owners. Included on the property was a building, "the shop," in which three generations of the Renak family had operated a blacksmith, wagon repair, and machine repair business. The real estate purchase agreement gave Renak the right to exclusive use and occupancy of the shop for the rest of his life. The agreement also provided:

Included in the purchase price is all tangible personalty now on the property, except the following:

....

B. Any item of personalty owned by Delmar Renak alone as distinguished from personalty which is owned by him and the other sellers in common. The statement of Delmar Renak that he owns alone any item of personalty shall be binding upon all parties to this agreement.

After the sale of the property to the Feests, Renak continued to use the shop until sometime in 2000.

Various equipment in the shop was powered by a gasoline Pierce Engine which had been installed in the shop by Renak's grandfather and father. The Pierce Engine, approximately six and one-half feet long, three and one-half feet tall, and weighing more than a ton, was attached to a brick foundation within the shop's "engine room" by four large bolts. It had been in the shop for nearly 100 years. Although large, it was detachable and, with a hoist, easily movable. In the fall of 2000, the Feests removed the Pierce Engine from the shop and stored it elsewhere on their property. The Feests had no interest in operating the business, and in fact, tore the shop down. In November 2000, Renak agreed to donate the Pierce Engine to the Racine County Historical Society and Museum. The Feests claimed ownership of the Pierce Engine and refused to permit its removal from their property. Was the Pierce Engine a fixture that belonged to the Feests?

10. Emma Yocum was married to James Yocum as of the time of her death in 1990. She and James had begun living together in March 1959. In July 1959, by way of a warranty deed that referred to them as "husband and wife," Emma and James took ownership of a home. She and James, however, were not yet married. Emma was still married to Joseph Perez, from whom she was divorced in April 1960. Emma and James were married in July 1960. When they acquired their home in 1959, James had provided the down payment. A mortgage executed by Emma and

James at that time also referred to them as husband and wife even though they were not then married. After Emma's death in 1990, her children by her marriage to Joseph Perez filed suit in an effort to have the court determine present ownership of the home Emma and James had owned during her lifetime. Had Emma and James owned the home as *tenants in common* (meaning that Emma's interest in the property would pass to her estate, in which her children were entitled to share), or instead as either *tenants by the entirety* or *joint tenants* (meaning that James would then solely own the home by virtue of the right of survivorship)?

Online Research

Researching Real Property on the Web

1. Using your favorite search engine, locate a Web site that lists real estate for sale. Find a property listing on one of these sites. Using the concepts discussed in this chapter, identify the property features on the listing that would be considered fixtures.
2. Find an example online of each of the following kinds of deeds: quitclaim deed, general warranty deed, and special warranty deed.

chapter 25

LANDLORD AND TENANT

Frank Johnson and Sonia Miller, along with several other friends, were looking to rent a house near campus for the following school year. In June, they orally agreed with a landlord on a one-year lease to begin the following August 15 with a monthly rent of \$1,250 and provided a \$1,500 security deposit. When they arrived at school in August, the current tenants were still in possession and did not move out until September 1, leaving the house a mess. The landlord told Frank and Sonia to move in and that he would clean it up later; however, he never did so despite repeated requests. They complained to the city housing department, which conducted an inspection and found numerous violations of the city's housing code. The city gave the landlord 15 days to make the necessary repairs. Before any of the repairs were made, a friend who was visiting was injured when she fell through some rotten floorboards on the porch. At the end of September, Frank, Sonia and the other tenants moved out, but the landlord refused to return their security deposit.

Among the legal issues raised by this scenario are:

- Did the oral agreement create an enforceable lease?
- Were the tenants' rights violated when they were unable to take possession on August 15?
- Does the landlord have any liability to the injured friend?
- Are the tenants entitled to cancel the lease on the grounds the house is not habitable and obtain the return of their security deposit?
- If the landlord never intended to clean up the house, was it ethical for him to tell the tenants he would do so?

LANDLORD–TENANT LAW HAS undergone dramatic change during the past four decades, owing in large part to the changing nature of the relationship between landlords and tenants. In England and in early America, farms were the usual subjects of leases. The tenant sought to lease land on which to grow crops or graze cattle. Accordingly, traditional landlord–tenant law viewed the lease as primarily a conveyance of land and paid relatively little attention to its contractual aspects.

In today's society, however, the landlord–tenant relationship is typified by the lease of property for residential or commercial purposes. A residential tenant commonly occupies only a small portion of the total property. He bargains primarily for the use of structures on the land rather than for the land itself. He is likely to have signed a landlord-provided form lease, the terms of which he may have had little or no opportunity to negotiate. In areas with a shortage of affordable housing, a residential tenant's ability to bargain for favorable lease provisions is further hampered. Because the typical landlord–tenant relationship can no longer fairly be

characterized as one in which the parties have equal knowledge and bargaining power, it is not always realistic to presume that tenants are capable of negotiating to protect their own interests.

Although it was initially slow to recognize the changing nature of the landlord–tenant relationship, the law now places greater emphasis than it once did on the contract components of the relationship. As a result, modern contract doctrines such as unconscionability, constructive conditions, the duty to mitigate damages, and implied warranties are commonly applied to leases. Such doctrines may operate to compensate for tenants' lack of bargaining power. In addition, state legislatures and city councils have enacted statutes and ordinances that increasingly regulate leased property and the landlord–tenant relationship.

This chapter's discussion of landlord–tenant law will focus on the nature of leasehold interests, the traditional rights and duties of landlords and tenants, and recent statutory and judicial developments affecting those rights and duties.

Leases and Tenancies

Nature of Leases A **lease** is a contract under which an owner of property, the **landlord** (also called the *lessor*), conveys to the **tenant** (also called the *lessee*) the exclusive right to possess property for a period of time. The property interest conveyed to the tenant is called a **leasehold estate**.

Types of Tenancies The duration of the tenant's possessory right depends upon the type of **tenancy** established by or resulting from the lease. There are four main types of tenancies.

1. Tenancy for a term. In a **tenancy for a term** (also called a *tenancy for years*), the landlord and tenant have agreed on a specific duration of the lease and have fixed the date on which the tenancy will terminate. For example, if Dudley, a college student, leases an apartment for the academic year ending May 25, 2010, a tenancy for a term will have been created. The tenant's right to possess the property ends on the date agreed upon without any further notice, unless the lease contains a provision permitting extension.

2. Periodic tenancy. A **periodic tenancy** is created when the parties agree that rent will be paid in regular successive intervals until notice to terminate is given, but do not agree on a specific lease duration. If the tenant pays rent monthly, the tenancy is from month to month; if the tenant pays yearly, as is sometimes done under agricultural leases, the tenancy is from year to year. (Periodic tenancies therefore are sometimes called *tenancies from month to month* or *tenancies from year to year*.) To terminate a periodic tenancy, either party must give advance notice to the other. The precise amount of notice required is often defined by state statutes. For example, to terminate a tenancy from month to month,

most states require that the notice be given at least one month in advance.

3. Tenancy at will. A **tenancy at will** occurs when property is leased for an indefinite period of time and either party may choose to conclude the tenancy at any time. Generally, tenancies at will involve situations in which the tenant either does not pay rent or does not pay it at regular intervals. For example, Landon allows her friend Trumbull to live in the apartment over her garage. Although this tenancy's name indicates that it is terminable "at [the] will" of either party, most states require that the landlord give reasonable advance notice to the tenant before exercising the right to terminate the tenancy.

4. Tenancy at sufferance. A **tenancy at sufferance** occurs when a tenant remains in possession of the property (holds over) after a lease has expired. In this situation, the landlord has two options: (1) treating the holdover tenant as a trespasser and bringing an action to eject him; or (2) continuing to treat him as a tenant and collecting rent from him. Until the landlord makes her election, the tenant is a tenant at sufferance. Suppose that Templeton has leased an apartment for one year from Larson. At the end of the year, Templeton holds over and does not move out. Templeton is a tenant at sufferance. Larson may have him ejected or may continue treating him as a tenant. If Larson elects the latter alternative, a new tenancy is created. The new tenancy will be either a tenancy for a term or a periodic tenancy, depending on the facts of the case and any presumptions established by state law. Thus, a tenant who holds over for even a few days runs the risk of creating a new tenancy he might not want.

Execution of a Lease As transfers of interests in land, leases may be covered by the statute of frauds. In most states, a lease for a term of more than one year from the date it is made is unenforceable unless it is evidenced by a

CYBERLAW IN ACTION

The Internet Facilitates Leasing Property

E-commerce has eased the sometimes challenging and time-consuming task of finding an apartment or rental property. Now in many cities and resort communities a person can search for a suitable rental using the Internet. There are numerous Internet portals that provide databases of available rental properties. While some are nationwide, most focus on a specific region or city. These Web sites allow prospective renters to list their particular re-

quirements such as size, location, price range, and amenities. Then the site operator provides available options to the prospective renter and may periodically update the list. Some companies even provide virtual tours of apartment or house layouts that allow the prospective renter to view the property online. In some cases, a rental application may be submitted and the rental arrangements finalized via the Internet. The Internet portal sites also commonly provide links that allow customers to turn on their gas, water, telephone, and other desired utilities over the Internet.

CONCEPT REVIEW

Types of Tenancies

| Type of Lease | Characteristics | Termination |
|------------------------------|---|--|
| Tenancy for a Term | Landlord and tenant agree on a specific duration of the lease and fix the date on which the tenancy will end. | Ends automatically on the date agreed upon; no additional notice necessary. |
| Periodic Tenancy | Landlord and tenant agree that tenant will pay rent at regular, successive intervals (e.g., month to month). | Either party may terminate by giving the amount of advance notice required by state law. |
| Tenancy at Will | Landlord and tenant agree that tenant may possess property for an indefinite amount of time, with no agreement to pay rent at regular, successive intervals. | May be terminated “at will” by either party, but state law requires advance notice. |
| Tenancy at Sufferance | Tenant remains in possession after the termination of one of the leaseholds described above, until landlord brings ejectment action against tenant or collects rent from him. | Landlord has choice of: <ol style="list-style-type: none"> 1. Treating tenant as a trespasser and bringing ejectment action against him, <li style="text-align: center;">or 2. Accepting rent from tenant, thus creating a new leasehold. |

suitable writing signed by the party to be charged. A few states, however, require leases to be evidenced by a writing only when they are for a term of more than three years.

Good business practice demands that leases be carefully drafted to make clear the parties' respective rights and obligations. Care in drafting leases is especially important in cases of long-term and commercial leases. Lease provisions normally cover such essential matters as the term of the lease, the rent to be paid, the uses the tenant may make of the property, the circumstances under which the landlord may enter the property, the parties' respective obligations regarding the condition of the property, and the responsibility (as between landlord and tenant) for making repairs. In addition, leases often contain provisions allowing a possible extension of the term of the lease and purporting to limit the parties' rights to assign the lease or sublet the property. State or local law often regulates lease terms. For example, the Uniform Residential Landlord and Tenant Act (URLTA) has been enacted in a substantial minority of states. The URLTA prohibits the inclusion of certain lease provisions, such as a clause by which the tenant supposedly agrees to pay the landlord's attorney's fees in an action to enforce the lease. In states that have not enacted the URLTA, lease

terms are likely to be regulated at least to a moderate degree by some combination of state statutes, common law principles, and local housing codes.

Rights, Duties, and Liabilities of the Landlord

Landlord's Rights The landlord is entitled to receive the *agreed rent* for the term of the lease. Upon expiration of the lease, the landlord has the right to the *return of the property in as good a condition as it was when leased*, except for normal wear and tear and any destruction caused by an act of God.

Security Deposits Landlords commonly require tenants to make security deposits or advance payments of rent. Such deposits operate to protect the landlord's right to receive rent as well as her right to reversion of the property in good condition. In recent years, many cities and states have enacted statutes or ordinances designed to prevent landlord abuse of security deposits. These laws typically limit the amount a landlord may demand and require that the security deposit be refundable, except

for portions withheld by the landlord because of the tenant's nonpayment of rent or tenant-caused property damage beyond ordinary wear and tear. Some statutes or ordinances also require the landlord to place the funds in interest-bearing accounts when the lease is for more than a minimal period of time. As a general rule, these laws require landlords to provide tenants a written accounting regarding their security deposits and any portions being withheld. Such an accounting normally must be provided within a specified period of time (30 days, for example) after the termination of the lease. The landlord's failure to comply with statutes and ordinances regarding security deposits may cause the landlord to experience adverse consequences that vary state by state.

Landlord's Duties

Fair Housing Act As explained in Chapter 24, the Fair Housing Act prohibits housing discrimination on the basis of race, color, sex, religion, national origin, handicap, and familial status.¹ The Fair Housing Act prohibits discriminatory practices in various transactions affecting housing, including the rental of dwellings.² Included within the act's prohibited instances of discrimination against a protected person are refusals to rent property to such a person; discrimination against him or her in the terms, conditions, or privileges of rental; publication of any advertisement or statement indicating any preference, limitation, or discrimination operating to the disadvantage of a protected person; and representations that a dwelling is not available for rental to such a person when, in fact, it is available.

The act also makes it a discriminatory practice for a landlord to refuse to permit a tenant with a handicap to make—at his own expense—reasonable modifications to leased property. The landlord may, however, make this permission conditional on the tenant's agreement to restore the property to its previous condition upon termination of the lease, reasonable wear and tear excepted. In addition, landlords are prohibited from refusing to make reasonable accommodations in rules, policies, practices, or services if such accommodations are necessary to afford a handicapped tenant equal opportunity to use and

¹Familial status is defined in Chapter 24.

²The act provides an exemption for certain persons who own and rent single-family houses. To qualify for this exemption, owners must not use a real estate broker or an illegal advertisement and cannot own more than three such houses at one time. It also exempts owners who rent rooms or units in dwellings in which they themselves reside, if those dwellings house no more than four families.

enjoy the leased premises. When constructing certain types of multifamily housing for first occupancy, property owners and developers risk violating the act if they fail to make the housing accessible to persons with handicaps.

Because of a perceived increase in the frequency with which landlords refused to rent to families with children, the act prohibits landlords from excluding families with children. If, however, the dwelling falls within the act's "housing for older persons" exception, this prohibition does not apply.³

Implied Warranty of Possession Landlords have certain obligations that are imposed by law whenever property is leased. One of these obligations stems from the landlord's **implied warranty of possession**. This warranty guarantees the tenant's right to possess the property for the term of the lease. Suppose that Turner rents an apartment from Long for a term to begin on September 1, 2009, and to end on August 31, 2010. When Turner attempts to move in on September 1, 2009, she finds that Carlson, the previous tenant, is still in possession of the property. In this case, Long has breached the implied warranty of possession.

Implied Warranty of Quiet Enjoyment By leasing property, the landlord also makes an **implied warranty of quiet enjoyment** (or *covenant of quiet enjoyment*). This covenant guarantees that the tenant's possession will not be interfered with as a result of the landlord's act or omission. In the absence of a contrary provision in the lease or an emergency that threatens the property, the landlord may not enter the leased property during the term of the lease. If he does, he will be liable for trespass. In some cases, courts have held that the covenant of quiet enjoyment was violated when the landlord failed to stop third parties, such as trespassers or other tenants who make excessive noise, from interfering with the tenant's enjoyment of the leased premises.

Constructive Eviction The doctrine of **constructive eviction** may aid a tenant when property becomes unsuitable for the purposes for which it was leased because of the landlord's act or omission, such as the breach of a duty to repair or the covenant of quiet enjoyment. Under this doctrine, which applies both to residential and commercial property, the tenant may terminate the lease because she has effectively been evicted as a result of the

³The "housing for older persons" exception is described in Chapter 24.

poor condition or the objectionable circumstances there. Constructive eviction gives a tenant the right to vacate the property without further rent obligation if she does so *promptly* after giving the landlord reasonable notice and an opportunity to correct the problem. Because constructive eviction requires the tenant to vacate the leased premises, it is an unattractive option, however, for tenants who cannot afford to move or do not have a suitable alternative place to live.

Landlord's Responsibility for Condition of Leased Property

The common law historically held that landlords made no implied warranties regarding the *condition* or *quality* of leased premises. As an adjunct to the landlord's right to receive the leased property in good condition at the termination of the lease, the common law imposed on the *tenant* the duty to make repairs. Even when the lease contained a landlord's express warranty or express promise to make repairs, a tenant was not entitled to withhold rent if the landlord failed to carry out his obligations. This was because a fundamental contract performance principle—that a party is not obligated to perform if the other party fails to perform—was considered inapplicable to leases. In recent years, however, changing views of the landlord-tenant relationship have resulted in dramatically increased legal responsibility on the part of landlords for the condition of leased residential property.

Implied Warranty of Habitability The legal principle that landlords made no implied warranty regarding the condition of leased property arose during an era when tenants used land primarily for agricultural purposes. Buildings existing on the property were frequently of secondary importance. They also tended to be simple structures, lacking modern conveniences such as plumbing and wiring. These buildings were fairly easily inspected and repaired by the tenant, who was generally more self-sufficient than today's typical tenant. In view of the relative simplicity of the structures, landlord and tenant were considered to have equal knowledge of the property's condition upon commencement of the lease. Thus, a rule requiring the tenant to make repairs seemed reasonable.

The position of modern residential tenants differs greatly from that of an earlier era's agricultural tenants. The modern residential tenant bargains not for the use of the ground itself but for the use of a building (or portion thereof) as a dwelling. The structures on land today are complex, frequently involving systems (such as plumbing and electrical systems) to which the tenant does not have

physical access. Besides decreasing the likelihood of perceiving defects during inspection, this complexity compounds the difficulty of making repairs—something at which today's tenant already tends to be less adept than his grandparents were. Moreover, placing a duty on tenants to negotiate for express warranties and duties to repair is no longer feasible. Residential leases are now routinely executed on standard forms provided by landlords.

For these reasons, statutes or judicial decisions in most states now impose an **implied warranty of habitability** on many landlords who lease residential property. According to the vast majority of cases, this warranty is applicable only to *residential* property, and not to property leased for commercial uses. The implied warranty of habitability's content in lease settings is basically the same as in the sale of real estate: the property must be safe and suitable for human habitation. In lease settings, however, the landlord not only must deliver a habitable dwelling at the beginning of the lease but also must *maintain* the property in a habitable condition during the term of the lease. Various statutes and judicial decisions provide that the warranty includes an obligation that the leased property comply with any applicable housing codes.

Remedies for Breach of Implied Warranty of Habitability

From a tenant's point of view, the implied warranty of habitability is superior to constructive eviction because a tenant does not have to vacate the leased premises in order to seek a remedy for breach of the warranty. The particular remedies for breach of the implied warranty of habitability differ from state to state. Some of the remedies a tenant may pursue include:

1. **Action for damages.** The breach of the implied warranty of habitability violates the lease and renders the landlord liable for damages. The damages generally are measured by the diminished value of the leasehold. The landlord's breach of the implied warranty of habitability may also be asserted by the tenant as a counterclaim and defense in the landlord's action for eviction and/or non-payment of rent.
2. **Termination of lease.** In extreme cases, the landlord's breach of the implied warranty of habitability may justify the tenant's termination of the lease. For this remedy to be appropriate, the landlord's breach must have been substantial enough to constitute a material breach.
3. **Rent abatement.** Some states permit rent abatement, a remedy under which the tenant withholds part of the rent for the period during which the landlord was in breach of the implied warranty of habitability. Where authorized

by law, this approach allows the tenant to pay a reduced rent that reflects the *actual* value of the leasehold in its defective condition. There are different ways of computing this value. State law determines the amount by which the rent will be reduced.

4. *Repair-and-deduct.* A number of states have statutes permitting the tenant to have defects repaired and to deduct the repair costs from her rent. The repairs authorized in these statutes are usually limited to essential services such as electricity and plumbing. They also require that the tenant give the landlord notice of the defect and an adequate opportunity to make the repairs himself.

Housing Codes Many cities and states have enacted housing codes that impose duties on property owners with respect to the condition of leased property. Typical of these provisions is Section 2304 of the District of Columbia Housing Code, which provides: “No person shall rent or offer to rent any habitation or the furnishing thereof unless such habitation and its furnishings are in a clean, safe and sanitary condition, in repair and free from

rodents or vermin.” Such codes commonly call for the provision and maintenance of necessary services such as heat, water, and electricity, as well as suitable bathroom and kitchen facilities. Housing codes also tend to require that specified minimum space-per-tenant standards be met; that windows, doors, floors, and screens be kept in repair; that the property be painted and free of lead paint; that keys and locks meet certain specifications; and that the landlord issue written receipts for rent payments. A landlord’s failure to comply with an applicable housing code may result in a fine or in liability for injuries resulting from the property’s disrepair. The noncompliance may also result in the landlord’s losing part or all of his claim to the agreed-upon rent. Some housing codes establish that tenants have the right to withhold rent until necessary repairs have been made and the right to move out in cases of particularly egregious violations of housing code requirements.

In the case that follows, *Brooks v. Lewin Realty III, Inc.*, the court held that a landlord could be liable for injuries to a child that were caused by the landlord’s failure to comply with the city’s housing code.

Brooks v. Lewin Realty III, Inc.

835 A.2d 616 (Md. Ct. App. 2003)

In August 1988, Shirley Parker rented a house in Baltimore City. Fresh paint was applied to the interior of the house at the beginning of the tenancy. Sharon Parker, Shirley’s daughter, moved into the house shortly after her mother rented it. On December 6, 1989, Sharon gave birth to Sean, who then also lived there. Early in 1991, when Sean was slightly more than a year old, Lewin Realty purchased the house at an auction. Before the purchase, one of the owners of Lewin Realty walked through the house accompanied by Sharon as he inspected it. At the time of the walk-through there was peeling, chipping, and flaking paint present in numerous areas of the interior of the house, including in Sean’s bedroom. After Lewin Realty purchased the house, it entered into a new lease with Shirley but did not paint its interior at that time.

In February 1992, Sean was diagnosed with an elevated blood lead level. In May 1992, the house was inspected and found to contain 56 areas of peeling, chipping, and flaking lead paint, and the Baltimore City Health Department (BCHD) issued a lead paint violation notice to Lewin Realty.

Section 702 (a) of the Baltimore City Housing Code requires that a dwelling be kept in “good repair” and “safe condition” and prohibits a landlord from leasing a dwelling that violates the Housing Code. The Housing Code further provides that maintaining a dwelling in good repair and safe condition includes keeping all interior walls, ceilings, woodwork, doors, and windows clean and free of any flaking, loose, or peeling paint. It also mandates the removal of loose and peeling paint from interior surfaces and requires that any new paint be free of lead. The Housing Code also grants the landlord the right of access to rental dwellings at reasonable times for purpose of making inspections and such repairs as are necessary to comply with the Code.

Sharon Parker brought a lawsuit on behalf of her son, alleging, among other things, negligence. The negligence claim was founded on several grounds, including (a) Lewin Realty’s violation of the Baltimore City Code; (b) Sean’s exposure to an unreasonable risk of harm from the lead-based paint while Lewin Realty knew that its dangerous properties were not known to Sean and not discoverable in the exercise of reasonable care; (c) Lewin Realty’s failure to exercise reasonable care in properly maintaining the walls, doors, and ceilings after Lewin Realty had actual and constructive knowledge of the flaking paint condition; and (d) Lewin Realty’s failure to exercise reasonable care to inspect the dwelling’s paint when a reasonable inspection would have revealed the flaking paint condition.

One of the questions in the litigation was whether the tenants were required to show that the landlord had notice of the violation in order to establish a prima facie case of negligence. Lewin Realty argued that because the tenant had control over the property and neither the common law nor any statute expressly required inspections during the tenancy, the court should not impose such a duty. Lewin Realty further argued it should not be held liable unless it had actual knowledge of the violation and that landlords who do not perform periodic inspections should not be charged with knowledge of what such inspections would reveal.

Eldridge, Justice

As the parties point out, under the common law and in the absence of a statute, a landlord ordinarily has no duty to keep rental premises in repair, or to inspect the rental premises either at the inception of the lease or during the lease term. There are, however, exceptions to this general rule.

Moreover, where there is an applicable statutory scheme designed to protect a class of persons which includes the plaintiff, another well-settled Maryland common law rule has long been applied by this Court in negligence actions. That rule states that the defendant's duty ordinarily "is prescribed by the statute" or ordinance and that the violation of the statute or ordinance is itself evidence of negligence.

Under this principle, in order to make out a *prima facie* case in a negligence action, all that a plaintiff must show is: (a) the violation of a statute or ordinance designed to protect a specific class of persons which includes the plaintiff, and (b) that the violation proximately caused the injury complained of. "Proximate cause is established by determining whether the plaintiff is within the class of persons sought to be protected, and the harm suffered is of a kind which the drafters intended the statute to prevent. . . . It is the existence of this cause and effect relationship that makes the violation of a statute *prima facie* evidence of negligence."

We stress that none of the cases we cite impose upon the plaintiff the additional burden of proving that the defendant was aware that he or she was violating the statute or ordinance. Depending upon the statute and the particular sanction involved, knowledge, and the type thereof, may or may not be pertinent in establishing whether or not there was a statutory violation. Nevertheless, once it is established that there was a statutory violation, the tort defendant's knowledge that he or she violated the statute is not part of the tort plaintiff's burden of proof. It is the violation of the statute or ordinance alone which is evidence of negligence.

This rule has been stated in the context of landlords and tenants in the *Restatement (Second) of Property, Landlord and Tenant* Section 17.6 (1977), and cited with approval by this Court in lead paint premises liability cases. Section 17.6 of the *Restatement (Second) of Property* provides (emphasis added):

A landlord is subject to liability for physical harm caused to the tenant . . . by a dangerous condition existing before or

arising after the tenant has taken possession, if he has failed to exercise reasonable care to repair the condition and the existence of the condition is in violation of:

- (1) an implied warranty of habitability; or
- (2) a duty created by statute or administrative regulation.

In the instant case, the Housing Code, Baltimore City Code imposes numerous duties and obligations upon landlords who rent residential property to tenants. The plaintiffs are obviously within a class of persons which the Housing Code was designed to protect. *Brown v. Dermer* ("Patently, by enacting Sections 702 and 703 of the Housing Code, the City Council sought to protect children from lead paint poisoning by putting landlords on notice of conditions which could enhance the risk of such injuries"). Under the established principles of Maryland tort law set forth in the previously cited cases, if the plaintiffs can establish a violation of the Housing Code which proximately caused Sean's injuries, then the plaintiffs are entitled to have count one of their complaint submitted to the trier of facts. Under the above-cited cases, the plaintiffs need not prove that Lewin Realty had notice of the Housing Code violation.

* * *

Thus, under the plain meaning of the Code's language, it is clear that the Mayor and City Council of Baltimore mandated a *continuing* duty to keep the dwelling free of flaking, loose, or peeling paint, *at all times* "while [the dwelling is] in use," in order for the landlord to remain in compliance with the Housing Code. The nature of the landlord's duty is continuous. The Housing Code does not limit the landlord's duty to keep the premises free of flaking paint to a one-time duty at the inception of the lease. The landlord must take whatever measures are necessary during the pendency of the lease to ensure the dwelling's continued compliance with the Code.

To facilitate such continuous maintenance of the leased premises, Section 909 explicitly grants a right of entry to the landlord to ensure that he or she can "make such inspections and such repairs as are necessary" to comply with the Housing Code. It states:

Every occupant of a dwelling . . . shall give the owner thereof . . . access to any part of such dwelling . . . at all reasonable times for the purpose of making such inspection

and such repairs or alterations as are necessary to effect compliance with the provisions of this Code. . . .

Although this section may not explicitly require the landlord to perform periodic inspections, it grants such right to the landlord and shows that the City anticipated that periodic inspections might be necessary to comply with the Code.

Lewin Realty urges that “during a tenancy . . . the landlord surrenders control of the property and, in doing so, surrenders the ability, at least in some respects, to prevent a violation of the housing code during the tenancy.” Lewin Realty’s principal argument is that the landlord has no ability to control the condition of the interior surfaces of the premises during the tenancy. We disagree. Contrary to Lewin Realty’s argument, Section 909 vests the landlord with sufficient control of the leased premises during the tenancy to inspect and to rectify a condition of flaking, loose, or peeling paint.

Furthermore, contrary to Lewin Realty’s statements in its brief, our holding in the instant case does not impose a strict liability regime upon landlords. Whether Lewin Realty is held liable for an injury to a child, based on lead paint poisoning, will depend on the jury’s evaluation of the reasonableness of Lewin Realty’s actions under all the circumstances.

Lewin Realty also contends that “the imposition of a duty to inspect during [the] tenancy would create a minefield of difficulties.” The respondent’s concerns that a landlord will be required to “inspect the property every day, three times a week, twice a week, twice a month, once a month . . .” are without basis. The nature of the defective condition in question—a flaking, loose, or peeling paint condition—is a slow, prolonged process which is easily detected in the course of reasonable periodic inspections. As Lewin Realty concedes, “we know that paint in a property will chip—it is just a matter of time.” It does not occur overnight.

In addition, Lewin Realty raises doubts about the ability to quantify the dangerousness of a lead paint condition: “Is one area in a far corner of a property a ‘dangerous condition’? . . . Is the presence of lead-based paint in the eighth layer of paint, covered by seven non-lead-based layers of paint, a hazardous condition when present on a windowsill as opposed to the upper far corner of a wall?” In a negligence case, such as the case at bar, the simple answer to these questions is that it will be the duty of the trier of fact to determine whether the steps taken by the landlord to ensure continued compliance with the Code, i.e., the frequency and thoroughness of inspections, and the maintenance of the interior surfaces of the dwelling, were reasonable under all the circumstances. The test is what a reasonable and prudent landlord would have done under the same circumstances.

Finally, Lewin Realty suggests that a tenant might object to the landlord’s need to inspect the premises. That concern is

allayed by the fact that the Housing Code *requires* the tenant to give the owner access to the premises “at all reasonable times for the purpose of making such inspections . . . as are necessary to effect compliance with the provisions of this Code.” Section 909.

Raker, Judge, dissenting

I respectfully dissent. The majority explicitly overrules *Richwind v. Brunson* (1994)—a case that, until today, had never had any doubt cast upon it by this Court or any other—and holds that by enacting the Baltimore City Housing Code, the City Council intended to abolish the element of notice in a common law negligence action for injuries resulting from flaking, loose or peeling paint. In the process of overruling *Richwind*, the majority also reads into the Code an ongoing, affirmative duty by landlords to inspect periodically each of their housing units for loose or flaking paint for as long as they retain ownership of the premises. I disagree with the majority’s conclusion that the ordinance does away with the traditional, common law notice requirement to the landlord as a precursor to liability for negligence.

It is helpful to understand first what the majority’s holding actually means and its implications for landlords and tenants in Baltimore. A violation of Baltimore’s Housing Code occurs when the landlord does not comply with Section 703, which mandates, in relevant part, that “all walls, ceilings, woodwork, doors and windows shall be kept clean and free of any flaking, loose or peeling paint. . . .” The majority asserts that “if the plaintiffs can establish a violation of the Housing Code which proximately caused [their] injuries, then the plaintiffs are entitled to have . . . their complaint submitted to the trier of facts.” Read together, the result of the majority’s holding is astounding: *Any* flaking, loose or peeling paint in a leased premises, combined with an injury from lead paint, automatically gives rise to a cognizable action, worthy of a jury trial. The majority admits as much in summarizing its holding:

In sum, the presence of flaking, loose, or peeling paint is a violation of the Housing Code. As earlier pointed out, certain provisions of the Housing Code were clearly enacted to prevent lead poisoning in children. Therefore, the plaintiff Sean is in the class of people intended to be protected by the Housing Code, and his injury, lead poisoning, is the kind of injury intended to be prevented by the Code. *This is all the plaintiffs must show to establish a prima facie case sounding in negligence.*

The majority’s new rule means that the landlord will be forced to defend the case in court even if the plaintiff concedes that the landlord behaved reasonably in not knowing about a

Code violation. Without any express instruction, the majority reads into the statute the dramatic institution of a wholly new regulatory scheme that essentially imposes strict liability upon landlords and makes landlords the insurers of litigants for injuries sustained by a minor plaintiff due to exposure to lead-based paint. Furthermore, the majority's new rule means that plaintiff tenants will no longer be required to notify landlords of hazards in their dwelling home, hazards that they, not the landlord, are in the best position to identify.

Americans with Disabilities Act Landlords leasing property constituting a *place of public accommodation* (primarily commercial property as opposed to private residential property) must pay heed to Title III of the Americans with Disabilities Act. Under Title III, owners and possessors of real property that is a place of public accommodation may be expected to make reasonable accommodations, including physical modifications of the property, in order to allow disabled persons to have access to the property. Chapter 24 contains a detailed discussion of Title III's provisions.

Landlord's Tort Liability

Traditional No-Liability Rule There were two major effects of the traditional rule that a landlord had no legal responsibility for the condition of the leased property. The first effect—that the uninhabitability of the premises traditionally did not give a tenant the right to withhold rent, assert a defense to nonpayment, or terminate a lease—has already been discussed. The second effect was that landlords normally could not be held liable in tort for injuries suffered by tenants on leased property. This state of affairs stemmed from the notion that the tenant had the ability and responsibility to inspect the property for defects before leasing it. By leasing the property, the tenant was presumed to take it as it was, with any existing defects. As to any defects that might arise during the term of the lease, the landlord's tort immunity was seen as justified by his lack of control over the leased property once he had surrendered it to the tenant.

Traditional Exceptions to No-Liability Rule Even before the current era's protenant legal developments, however, courts created exceptions to the no-liability rule. In the following situations, landlords have traditionally

The common law used to deal with such unfairness by providing that a landlord who had a valid excuse, such as lack of notice, for not remedying the violation would not be held liable, *see Restatement (Second) of Torts* Section 288A (2)(b) (1965) (excusing liability for violation of a legislative enactment or administrative regulation when defendant neither knows nor should know of the occasion for compliance). But under the majority's new rule, no such excuse is relevant.

owed the tenant (or an appropriate third party) a duty the breach of which could constitute a tort:

- 1. Duty to maintain common areas.** Landlords have a duty to use reasonable care to *maintain the common areas* (such as stairways, parking lots, and elevators) over which they retain control. If a tenant or a tenant's guest sustains injury as a result of the landlord's negligent maintenance of a common area, the landlord is liable.
- 2. Duty to disclose hidden defects.** Landlords have the duty to disclose hidden defects about which they know, if the defects are not reasonably discoverable by the tenant. The landlord is liable if a tenant or appropriate third party suffers injury because of a hidden danger that was known to the landlord but went undisclosed.
- 3. Duty to use reasonable care in performing repairs.** If a landlord repairs leased property, he must *exercise reasonable care in making the repairs*. The landlord may be liable for the consequences stemming from negligently performed repairs, even if he was not obligated to perform them.
- 4. Duty to maintain property leased for admission to the public.** The landlord has a duty to suitably maintain property that is leased for *admission to the public*. A theater would be an example.
- 5. Duty to maintain furnished dwellings.** The landlord who rents a *fully furnished dwelling* for a short time impliedly warrants that the premises are safe and habitable.

Except for the above circumstances, the landlord traditionally was not liable for injuries suffered by the tenant on leased property. Note that none of these exceptions would apply to one of the most common injury scenarios—when the tenant was injured by a defect in

her own apartment and the defect resulted from the landlord's failure to repair, rather than from negligently performed repairs.

Current Trends in Landlord's Tort Liability Today, there is a strong trend toward abolition of the traditional rule of landlord tort immunity. The proliferation of housing codes and the development of the implied warranty of habitability have persuaded a sizable number of courts to impose on landlords the duty to use *reasonable care* in their maintenance of the leased property. As discussed earlier, a landlord's duty to keep the property in repair may be based on an express clause in the lease, the implied warranty of habitability, or provisions of a housing code or statute. The landlord now may be liable if injury results from her negligent failure to carry out her duty to make repairs. As a general rule, a landlord will not be liable unless she had *notice* of the defect and a reasonable opportunity to make repairs.

The duty of care landlords owe tenants has been held to include the duty to take reasonable steps to protect tenants from substantial risks of harm created by other tenants. Courts have held landlords liable for tenants' injuries resulting from dangerous conditions (such as

vicious animals) maintained by other tenants when the landlord knew or had reason to know of the danger.

It is not unusual for landlords to attempt to insulate themselves from negligence liability to tenants by including an *exculpatory clause* in the standard form leases they expect tenants to sign. An exculpatory clause purports to relieve the landlord from legal responsibility that the landlord could otherwise face (on negligence or other grounds) in certain instances of premises-related injuries suffered by tenants. In recent years, a number of state legislatures and courts have frowned upon exculpatory clauses when they are included in leases of residential property. There has been an increasing judicial tendency to limit the effect of exculpatory clauses or declare them unenforceable on public policy grounds when they appear in residential leases.

In the case that follows, *Matthews v. Amberwood Associates Limited Partnership, Inc.*, the Maryland Court of Appeals, on a split vote, held that a landlord had a duty to protect a social visitor to the apartment of a tenant from a Pit Bull the tenant kept in the apartment where the landlord knew of the dog's viciousness, the presence of the dog was in violation of the lease, and where the landlord could have taken steps to abate the danger.

Matthews v. Amberwood Associates Limited Partnership, Inc. 719 A.2d 119 (Maryland Ct. App. 1998)

Shelly Morton leased an apartment building in Baltimore, Maryland, from October 9, 1993, through October 31, 1994. The apartment building was managed by Monocle Management, Ltd. and owned by Amberwood Associates Limited Partnership, Inc. The lease Morton signed contained the following provisions:

The resident agrees to comply with the following rules and regulations which shall be deemed to be part of the lease. Breach of these rules and regulations shall be deemed to be a default of the lease.

* * *

18. Not to have any pets on the premises.

Morton kept her boyfriend's dog, a Pit Bull named Rampage, in her apartment. Sometimes she kept the dog chained outside, on the grounds of the apartment complex. The dog was not normally aggressive toward persons when Morton was present, but, when she was absent, Rampage would attempt to attack people in his vicinity. Several employees of the building's management had dangerous encounters involving the dog; they considered the dog to be "vicious," and reported incidents involving the dog to the resident manager.

On February 9, 1994, Shanita Matthews and her 16-month-old son, Tevin Williams, visited Morton and Morton's 5-year-old son, Darnell, at Morton's apartment. The children were playing together in the living room, and the adults were seated at the dining room table putting together a puzzle when Morton was called away from the apartment. Shortly after Morton left the apartment, Rampage attacked Tevin. Rampage grabbed Tevin by the neck and was shaking him back and forth. Matthews was unable to free Tevin from Rampage's jaws. Matthews then called 911 and yelled for Morton to assist her.

Morton reentered the apartment and was also unable to free Tevin. She grabbed a knife, and, while Matthews held Tevin in her arms, Morton repeatedly stabbed Rampage causing the animal temporarily to release Tevin. Rampage continued to bite Tevin, however, until Morton finally was able to put the dog out of the apartment through the back door. By this time the ambulance had arrived, and Morton took Tevin from Matthews and ran with him to the ambulance. Approximately one hour after arriving at the hospital, Tevin died from his injuries.

Matthews and Tevin's father, Andre Williams, filed a wrongful death action against Monocle and Amberwood Associates. They alleged that the landlord owed a duty to social guests of a tenant who, while in the tenant's apartment, are injured or killed by a highly dangerous Pit Bull dog kept by the tenant, when the landlord knew of the dog's dangerousness, when the presence of the dog was in violation of the lease, and where the landlord could have taken steps to abate the danger.

A jury found Amberwood and Monocle liable and awarded damages including \$5,018,750 to Matthews and \$562,100 to Williams for the wrongful death of Tevin. Both sides appealed to the Maryland Court of Special Appeals, which held that, under the circumstances, Amberwood and Monocle owed no duty to social invitees of a tenant. Both parties again sought review in the Maryland Court of Appeals.

Eldridge, Judge

In order to state a cause of action in negligence, the plaintiff must show the following: (1) that the defendant was under a duty to protect the plaintiff from injury, (2) that the defendant breached that duty, (3) that the plaintiff suffered actual injury or loss, and (4) that the loss or injury proximately resulted from the defendant's breach of the duty. The question in the instant case focuses upon the first of these factors, namely, whether Amberwood and Monocle owed Matthews and Tevin a duty of abating the dangerous condition consisting of a vicious pit bull dog being in the apartment. The plaintiffs contend that Rampage constituted a known dangerous condition upon the property and that the defendants retained control over the presence of the pit bull within the leased premises through the "no pets" clause in the lease. Thus, the plaintiffs argue that the defendants had a duty of care to protect Matthews and her son from that extremely dangerous animal.

Under our cases, whether a landlord owes a duty to his or her tenants and their guests with respect to dangerous or defective conditions on the property, of which the landlord has notice, depends upon the circumstances presented. In a multi-unit facility, the landlord ordinarily has a duty to maintain the common areas in a reasonably safe condition. Our recognition of landlord liability in common areas is generally premised on the control a landlord maintains over the common areas. The duty to maintain these areas in a reasonably safe condition extends not only to the tenant but includes the members of his family, his guests, his invitees, and others on the land in the right of the tenant.

On the other hand, the duty which a landlord owes to a tenant, and the tenant's guests, within the tenant's apartment or other leased premises, is constrained by the general common law principle that where property is demised, and at the time of the demise it is not a nuisance, and becomes so *only* by the act of the tenant while in his possession, and injury happens during

such possession, the owner is not liable. But, that where the owner leases premises which are a nuisance, or must in the nature of things become so by their use, and receives rent, then, whether in or out of possession, he is liable. Thus, a landlord is not ordinarily liable to a tenant or guest of a tenant for injuries from a hazardous condition in the leased premises that comes into existence after the tenant has taken possession.

As with most general principles of law, however, this principle, that a landlord is not responsible for dangerous conditions in the leased premises, is not absolute and has exceptions. For example, where a landlord agrees to rectify a dangerous condition in the leased premises, and fails to do so, he may be liable for injuries caused by the condition. If a landlord, although not contractually obligated to do so, voluntarily undertakes to rectify a dangerous or defective condition within the leased premises, and does so negligently, the landlord is liable for resulting injuries. Defective or dangerous conditions in the leased premises which violate statutes or ordinances may also be the basis for a negligence action against the landlord.

Just last month, in *Shields v. Wagman*, this Court held that landlords of a strip shopping center may be liable for injuries sustained by a business invitee and a tenant when they were attacked by a pit bull dog owned by another tenant and kept on the leased premises. The injuries in *Shields* occurred in a common area, the parking lot of the shopping center, on two occasions when the pit bull escaped from the leased premises. Stating that "our recognition of landlord liability in common areas is generally premised on the control a landlord maintains over the common areas," this Court reversed a judgment for the landlords.

The principal rationale for the general rule that the landlord is not ordinarily liable for injuries caused by defects or dangerous conditions in the leased premises is that the landlord "has parted with control." Moreover, as illustrated by the *Shields* opinion, a common thread running through many of our cases

involving circumstances in which landlords have been held liable (i.e., common areas, pre-existing defective conditions in the leased premises, a contract under which the landlord and tenant agree that the landlord shall rectify a defective condition) is the landlord's ability to exercise a degree of control over the defective or dangerous condition and to take steps to prevent injuries arising therefrom. Moreover, the principle that the landlord may have a duty with regard to matters within his control extends beyond common areas; it may be applicable to conditions in the leased premises.

Turning to the case at bar, the landlord also retained control with respect to the extremely dangerous condition in Morton's apartment. The tenant Morton did not have exclusive control over the leased premises because the lease gave the landlord a degree of control. The landlord retained control over the presence of a dog in the leased premises by virtue of the "no pets" clause in the lease. The lease plainly stated that breach of the "no pets" clause was a "default of the lease." Such a default would enable the landlord to bring a breach of lease action to terminate the tenancy pursuant to Code *Section 8-402.1 of the Real Property Article*.

Even before bringing such an action, the landlord, when it first received notice of the dangerous incidents involving Rampage, could have informed Morton that harboring the pit bull was in violation of her lease, could have told her to get rid of the aggressive animal, and could have threatened legal action if she failed to do so. If the landlord had taken these steps, it would have been likely that Morton would have gotten rid of the pit bull, particularly because she did not own him. If she refused to get rid of the dog, the landlord could then have instituted legal action. The record in this case, however, shows that the landlord did nothing. In fact, the defendants acknowledge that the landlord "did not take steps to enforce the no pets clause."

It is true that the conduct of the tenant Morton may also have been negligent, that Morton may have breached a duty owed to Matthews and Tevin, and that the landlord may not have affirmatively approved of Morton's harboring the pit bull. Morton's conduct in keeping a vicious animal in her apartment was also a cause of Tevin's death. Nonetheless, as Judge Wilner, writing for the Court of Special Appeals in another context, stated (*Bocchini v. Gorn Management Co., (1986)*), our concern in this case should be

not so much on whether the landlord has approved the conduct of the tenant as whether he is in a position to correct or terminate it. *Where, through lease provisions or otherwise, he has that ability, the thought is that he ought not to be able to escape his obligation under a covenant of quiet enjoyment by steadfastly refusing to exercise his authority.*

* * *

The insertion in a lease of a restriction against excessive noise or other offensive conduct is precisely for the purpose of enabling the landlord to control that conduct. (Emphasis omitted and added.)

The tenant Morton was maintaining an extremely dangerous instrumentality, both in the leased premises and at times in the common areas. The landlord knew about the dangerous pit bull dog for a considerable period of time. By the terms of the lease, the landlord had retained a large measure of control over the presence of such an animal in the leased premises. Under the circumstances here, and the prior cases in this Court emphasizing the factor of a landlord's control, it is not unreasonable to impose upon the landlord a duty owed to guests who are either on the leased premises or the common areas.

In addition to the landlord's control and ability to abate the danger of a vicious pit bull in the leased premises, the foreseeability of the harm supports the imposition of a duty on the landlord. The facts here unequivocally indicate that harm to a tenant's guest by Rampage was entirely foreseeable. Numerous employees of Monocle testified that they knew of the pit bull, were afraid of the pit bull, witnessed attacks by the dog, and were unable to carry out their duties, both in the leased premises and in the common areas, because of the presence of the pit bull.

Thus, the foreseeability of harm in the present case was clear. The extreme dangerousness of this breed, as it has evolved today, is well recognized. Pit bulls as a breed are known to be extremely aggressive and have been bred as attack animals. Indeed, it has been judicially noted that pit bull dogs "bite to kill without signal," are selectively bred to have very powerful jaws, high insensitivity to pain, extreme aggressiveness, a natural tendency to refuse to terminate an attack, and a greater propensity to bite humans than other breeds. The Pit Bull's massive canine jaws can crush a victim with up to two thousand pounds (2,000) of pressure per square inch—three times that of a German Shepard or Doberman Pinscher.

We do not hold that a landlord's retention in the lease of some control over particular matters in the leased premises is, standing alone, a sufficient basis to impose a duty upon the landlord which is owed to a guest on the premises. This Court has employed a balancing test to determine whether a duty of reasonable care should be imposed in particular circumstances. Ultimately, the determination of whether a duty should be imposed is made by weighing the various policy considerations and reaching a conclusion that the plaintiff's interests are, or are not, entitled to legal protection against the conduct of the defendant. In the instant case, the various policy considerations that need to be weighed are the general understanding that a tenant is primarily in control of the leased premises and the

sanctity of a tenant's home, including her ability generally to do as she sees fit within the privacy thereof, against the public safety concerns of permitting that same tenant to harbor an extremely dangerous animal that will foreseeably endanger individuals inside and outside the walls of the leased premises, the degree of control maintained by the landlord, the landlord's knowledge of the dangerous condition, and the landlord's ability to abate the condition. We, like the majority of courts addressing this issue in other states, believe that the balance should be struck on the side of imposing a duty on the landlord which is owed to guests on the premises.

To reiterate, we do not suggest that a landlord is responsible for most negligent conditions in leased apartments including conditions covered by provisions in a lease. Under the present circumstances, however, where a landlord retained control over the matter of animals in the tenant's apartment, coupled with the knowledge of past vicious behavior by the animal, the extremely dangerous nature of pit bull dogs, and the foreseeability of harm to persons and property in the apartment complex, the jury was justified in finding that the landlord had a duty to the plaintiffs and that the duty was breached. The following principle set forth in *Prosser and Keeton on The Law of Torts*, Section 4 at 25-26 (5th ed. 1984), is applicable here:

The "apophylactic" factor of preventing future harm has been quite important in the field of torts. The courts are concerned not only with the compensation of the victim, but with admonition of the wrongdoer. When the decisions of the courts become known, and defendants realize that they may be held liable, there is of course a strong incentive to prevent the occurrence of the harm. Not infrequently one reason for imposing liability is the deliberate purpose of providing that incentive.

Judgment for Matthews affirmed.

Rodowsky, Judge, dissenting

Tragic cases may have tragic consequences when sympathy for a plaintiff interferes with a court's ability to analyze the facts and apply the law. Sympathy for the victim of a tragedy should not serve as a substitute for evidence of duty, culpability, and proximate cause. The legal issue in this case is whether a landlord should have to pay over five million dollars solely because the landlord did not make a futile attempt to evict a tenant whose dog barked and growled at maintenance men trying to enter the dog's residence when its owner was not home.

Ms. Matthews suffered a grievous loss as a result of her son playing with a pit bull in a friend's apartment where she and her son were weekly social guests. The effect of affirming this five million dollar judgment in favor of Ms. Matthews

may ultimately have severe repercussions for lessees with dogs. Landlords wishing to avoid multimillion dollar lawsuits may be forced to initiate eviction proceedings to terminate leases whenever a tenant's dog acts aggressively toward maintenance personnel who attempt to enter the tenant's dwelling when the tenants are not home, and I doubt very many dogs would not bark and growl at a stranger trying to enter a dwelling when the dog's owner is absent. The case will certainly have tragic consequences for pit bulls because the majority opinion, in effect, makes ownership of a pit bull per se negligence, and the Court seems to advocate that the entire breed should be eradicated.

Perhaps the worst tragedy is the implication that rich landlords and sympathetic victims are judged by totally different standards. Ms. Matthews knew this pit bull and its temperament far, far better than the landlord; yet, under the majority's ruling, the landlord was negligent for not safeguarding Ms. Matthews' son from the dog, and Ms. Matthews was neither contributorily negligent for not safeguarding her son nor an intervening superseding cause for allowing her son to play with the dog. On that same issue, the majority discusses at great length the widespread general knowledge that pit bulls are extremely dangerous, but apparently only the landlord, not Ms. Matthews, could be chargeable with that knowledge since her contributory negligence is held not to be an issue to be submitted to the jury. Under the majority's reasoning, the young child's injury by the dog was foreseeable by the landlord, but not by his mother. The landlord was a cause of the child's injuries because it did not make a futile attempt to evict the dog's caretaker, but Ms. Matthews could not be found to be an intervening superseding cause even though she brought her young child to the dog's home and permitted the infant's unsupervised play with the dog. It does not seem as if the rules of the law of negligence are being applied equally.

In holding that there was insufficient evidence to permit a jury to find Ms. Matthews was contributorily negligent or that her actions were an intervening superseding cause, the majority may be losing sight of its obligation to look at the facts in the light most favorable to the landlord. These facts indicate Ms. Matthews had far, far greater knowledge of Rampage and his temperament than the landlord, and if the landlord could be found negligent for not evicting the dog, how could Ms. Matthews not also be negligent for letting her infant son play throughout this two-bedroom apartment with this dog?

On the issue of superseding cause, it seems a reasonable conclusion that 16-month-old Tevin did something to enrage Rampage. On this occasion, while Ms. Matthews was working on a puzzle, the two children were playing in Darnelle's room,

the hallway, and the living room along with the dog. It is reasonable to assume Tevin unwittingly did something that injured or tormented Rampage. Rampage's hostility was only directed at young Tevin, and even after the dog was repeatedly stabbed, it continued to attack Tevin. Keeping in mind that this was the first time Rampage had bitten anyone, if the landlord was a cause of the injuries for not evicting the tenant, could not a reasonable jury find that Ms. Matthews was a superseding cause for letting a 16-month-old child play throughout the apartment with the dog?

Ms. Matthews knew Rampage better than anyone except the dog's owner. She and her child had visited with the dog on dozens and dozens of occasions, at least weekly, for the entire time her friend was caring for the dog. Even if the landlord's negligence was an issue for the jury, the jury also should have been permitted to consider whether Ms. Matthews' own conduct in failing to safeguard her infant son from the dog, which is what she claims the landlord did, as well as that her conduct in permitting this 16-month-old child's unsupervised play throughout a two-bedroom apartment with and around the dog

could be an intervening, superseding cause or contributory negligence as to her cause of action.

In the instant case, the tenant was in sole control of the premises where the injury occurred, and the tenant had the sole opportunity to protect her guests from the dog and failed to do so. Even if the landlord knew the dog had vicious tendencies, the landlord should be able to assume that when the dog was confined within the tenant's apartment that the tenant would take reasonable precautions to protect guests in her home. Moreover, there may be tenants who have a legitimate desire to keep watch dogs or guard dogs for the protection of their person or property, and this practice is not necessarily to be discouraged if the tenant keeps the dog controlled whenever it is off the tenant's premises or confined to the tenant's premises.

Thus, for the reasons set forth above, I would conclude that under the circumstances of this case there was no special duty on the part of the landlord to act affirmatively to protect Tevin or other social guests of the tenant, and therefore, the landlord may not be held liable for failing to take measures to enforce the "no pets" clause in the lease.

Ethics in Action

Disclosing Possible Hazards to Tenants

Suppose you own an older home that in the past was painted with lead-based paint. You rent it to a family with three small children. A state law forbids using lead-based

paint on residential property after the effective date of the statute, but it does not require owners of property with residues of lead-based paint to remove it. Should you disclose the presence of the lead-based paint to your tenants?

Landlord's Liability for Injuries Resulting from Others' Criminal Conduct Another aspect of the trend toward increasing landlords' legal accountability is that many courts have imposed on landlords the duty to take reasonable steps to protect tenants and others on their property from foreseeable criminal conduct.⁴ Although landlords are not insurers of the safety of persons on their property, an increasing number of courts have found them liable for injuries sustained by individuals who were criminally attacked on the landlord's

property if the attack was facilitated by the landlord's failure to comply with housing codes or maintain reasonable security. This liability has been imposed on residential and commercial landlords (such as shopping mall owners). Some courts have held that the implied warranty of habitability includes the obligation to provide reasonable security. In most states that have imposed this type of liability, however, principles of negligence or negligence per se furnish the controlling rationale.⁵

⁴Chapter 24 contains a more extensive discussion of courts' recent inclination to impose this duty on owners and possessors of property.

⁵The law of negligence is covered in detail in Chapter 7.

Rights, Duties, and Liabilities of the Tenant

Rights of the Tenant The tenant has the right to *exclusive possession* and *quiet enjoyment* of the property during the term of the lease. The landlord is not entitled to enter the leased property without the tenant's consent, unless an emergency threatens the property or the landlord is acting under an express lease provision giving her the right to enter. The tenant may use the leased premises for any lawful purpose that is reasonable and appropriate, unless the purpose for which it may be used is expressly limited in the lease. Furthermore, the tenant has both the right to receive leased residential property in a habitable condition at the beginning of the lease and the right to have the property maintained in a habitable condition for the duration of the lease.

Duty to Pay Rent The tenant, of course, has the duty to pay rent in the agreed amount and at the agreed times. If two or more persons are cotenants, their liability under the lease is *joint and several*. This means that each cotenant has complete responsibility—not just partial responsibility—for performing the tenants' duties under the lease. For example, Alberts and Baker rent an apartment from Caldwell, with both Alberts and Baker signing a one-year lease. If Alberts moves out after three months, Caldwell may hold Baker responsible for the entire rent, not just half of it. Naturally, Alberts remains liable on the lease—as well as to Baker under any rent-sharing agreement the two of them had—but Caldwell is free to proceed against Baker solely if Caldwell so chooses.

Duty Not to Commit Waste The tenant also has the duty not to commit **waste** on the property. This means that the tenant is responsible for the routine care and upkeep of the property and that he has the duty not to commit any act that would harm the property. In the past, fulfillment of this duty required that the tenant perform necessary repairs. Today, the duty to make repairs has generally been shifted to the landlord by court ruling, statute, or lease provision. The tenant now has no duty to make major repairs unless the relevant damage was caused by his own negligence. When damage exists through no fault of the tenant and the tenant therefore is not obligated to make the actual repairs, the tenant nonetheless has the duty to take reasonable interim steps

to prevent further damage from the elements. This duty would include, but not necessarily be limited to, informing the landlord of the problem. The duty would be triggered, for instance, when a window breaks or the roof leaks.

Assignment and Subleasing As with rights and duties under most other types of contracts, the rights and duties under a lease may generally be assigned and delegated to third parties. **Assignment** occurs when the landlord or the tenant transfers all of her remaining rights under the lease to another person. For example, a landlord may sell an apartment building and assign the relevant leases to the buyer, who will then become the new landlord. A tenant may assign the remainder of her lease to someone else, who then acquires whatever rights the original tenant had under the lease (including, of course, the right to exclusive possession of the leased premises).

Subleasing occurs when the tenant transfers to another person some, but not all, of his remaining right to possess the property. The relationship of tenant to sublessee then becomes one of landlord and tenant. For example, Dorfman, a college student whose 18-month lease on an apartment is to terminate on December 31, 2010, sublets his apartment to Wembley for the summer months of 2010. This is a sublease rather than an assignment, because Dorfman has not transferred all of his remaining rights under the lease.

The significance of the assignment–sublease distinction is that an assignee acquires rights and duties under the lease between the landlord and the original tenant, but a sublessee does not. An assignee steps into the shoes of the original tenant and acquires any rights she had under the lease.⁶ For example, if the lease contained an option to renew, the assignee would have the right to exercise this option. The assignee, of course, becomes personally liable to the landlord for the payment of rent.

Under both an assignment and a sublease, the original tenant remains liable to the landlord for the commitments made in the lease. If the assignee or sublessee fails to pay rent, for example, the tenant has the legal obligation to pay it. Figure 1 compares the characteristics of assignments and subleases.

Lease Provisions Limiting Assignment Leases commonly contain limitations on assignment and subleasing.

⁶Assignment is discussed in detail in Chapter 17.

Figure 1 Comparison of Assignment and Sublease

| | Sublease | Assignment |
|--|----------|------------|
| Does the tenant transfer to the third party <i>all</i> his remaining rights under the lease? | No | Yes |
| Does the tenant remain liable on the lease? | Yes | Yes |
| Does the third party (assignee or sublessee) acquire rights and duties under the tenant's lease with the landlord? | No | Yes |

This is especially true of commercial leases. Such provisions typically require the landlord's consent to any assignment or sublease, or purport to prohibit such a transfer of the tenant's interests. Provisions requiring the landlord's consent are upheld by the courts, although some courts hold that the landlord cannot withhold consent unreasonably. Total prohibitions against assignment may be enforced as well, but they are disfavored in the law. Courts usually construe them narrowly, resolving ambiguities against the landlord.

Tenant's Liability for Injuries to Third Persons The tenant is normally liable to persons who suffer harm while on the portion of the property over which the tenant has control, *if the injuries resulted from the tenant's negligence*.

Termination of the Leasehold

A leasehold typically terminates because the lease term has expired. Sometimes, however, the lease is terminated early because of a party's material breach of the lease or because of mutual agreement.

Eviction If a tenant breaches the lease (most commonly, by nonpayment of rent), the landlord may take action to **evict** the tenant. State statutes usually establish a relatively speedy eviction procedure. The landlord who desires to evict a tenant must be careful to comply with any applicable state or city regulations governing

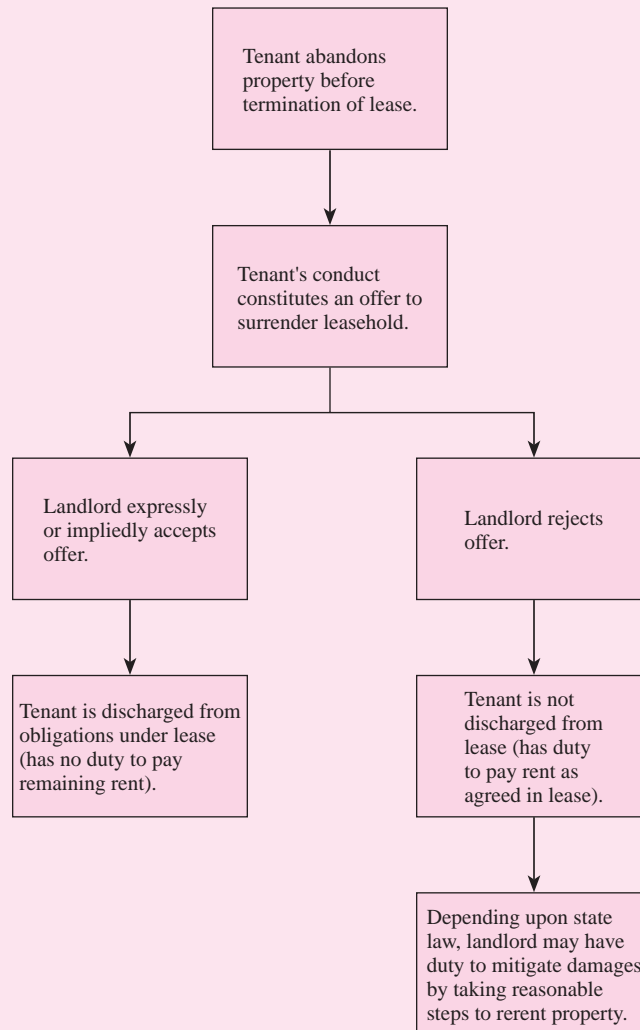

evictions. These regulations usually forbid self-help measures on the landlord's part, such as forcible entry to change locks. At common law, a landlord had a lien on the tenant's personal property. The landlord therefore could remove and hold such property as security for the rent obligation. This lien has been abolished in many states. Where the lien still exists, it is subject to constitutional limitations requiring that the tenant be given notice of the lien, as well as an opportunity to defend and protect his belongings before they can be sold to satisfy the rent obligation.

Agreement to Surrender A lease may terminate prematurely by mutual agreement between landlord and tenant to **surrender** the lease (i.e., return the property to the landlord prior to the end of the lease). A valid surrender discharges the tenant from further liability under the lease.

Abandonment Abandonment occurs when the tenant unjustifiably and permanently vacates the leased premises before the end of the lease term, and defaults in the payment of rent. If a tenant abandons the leased property, he is making an offer to surrender the leasehold. As shown in Figure 2, the landlord must make a decision at this point. If the landlord's conduct shows acceptance of the tenant's offer of surrender, the tenant is relieved of the obligation to pay rent for the remaining period of the lease. If the landlord does not accept the surrender, she may sue the tenant for the rent due until such time as she rents the property to someone else, or, if she cannot find a new tenant, for the rent due for the remainder of the term.

At common law, the landlord had no obligation to mitigate (decrease) the damages caused by the abandonment by attempting to rent the leased property to a new tenant. In fact, taking possession of the property for the purpose of trying to rent it to someone else was a risky move for the landlord—her retaking of possession might be construed as acceptance of the surrender. As the *Sylva Shops Limited Partnership v. Hibbard* case illustrates, some states still adhere to the rule that the nonbreaching landlord has no duty to mitigate damages. Many states, however, now place the duty on the landlord to attempt to mitigate damages by making a reasonable effort to rerent the property. These states also hold that the landlord's retaking of possession for the purpose of rerenting does not constitute a waiver of her right to pursue an action to collect unpaid rent.

Figure 2 Termination of a Leasehold by Abandonment

Sylva Shops Limited Partnership v. Hibbard 623 S.E.2d 785 (Ct. App. N.C. 2005)

On January 2, 2002, Loanne and Stanley Hibbard entered into a lease agreement for space at the Sylva Shopping Center in Sylva, North Carolina, owned by the Sylva Shops Limited Partnership. They signed a five-year lease for an out-parcel space that had good visibility from the road. An out-parcel space is normally more expensive than other locations in the rest of the shopping center. The lease contained the following clause:

In no event shall Landlord's termination of this Lease and/or Tenant's right to possession of the Premises abrogate Tenant's agreement to pay rent and additional charges due hereunder for the full term hereof. Following re-entry of the Demised Premises by the Landlord, Tenant shall continue to pay all such rent and additional charges as same become due under the terms of this Lease, together with all other expenses incurred by Landlord in regaining possession until

such time, if any, as Landlord relets same and the Demised Premises are occupied by such successor, *it being understood that Landlord shall have no obligations to mitigate Tenant's damages by reletting the Demised Premises.* (Emphasis added.)

The Hibbard's opened their business, the Bagel Bin and Sandwich Shop, in April 2002. Initially, the shop was quite successful, but when the summer came and the local college students left, there was a sharp decline in sales. The Hibbards were forced to close the shop on September 30, 2002, with four and a half years remaining on their lease.

Shortly after the bagel shop closed Sylva Shops began to look for a new tenant using a leasing agent. The agent placed a "For Lease" sign in the window, sent mailings to national tenants, and called other local businesses about leasing the space. She ultimately negotiated with a Mexican restaurant, but the restaurant never signed a lease for the space. Eventually, the space was rented to a sandwich restaurant. The Hibbards contended that the difficulty in releasing the space was due to an unwillingness to agree to a lower rent.

In January 2003, Sylva Shops filed a complaint against the Hibbards for unpaid rent, late fees, common area maintenance fees, insurance, and taxes in the amount of \$14,170. On August 27, Sylva Shops filed a motion for summary judgment, attaching an affidavit indicating that their damages totaled \$35,511.70 (rent, fees, and interest equaled \$44,515.40, but a payment of \$9,003.70 had been received from the bankruptcy court in connection with the bagel shop's Chapter 7 bankruptcy). A jury subsequently determined that Sylva Shops had failed to use ordinary care to mitigate the effects of the Hibbards' breach of contract, and the judge awarded judgment against the Hibbards in the amount of \$13,110. Both parties appealed.

Geer, Judge

The question for this Court is whether parties to a commercial lease may, in this state, validly contract away the landlord's duty to mitigate.

The Hibbards first argue that a clause relieving a landlord of its duty to mitigate damages is contrary to the law of this state, citing *Isbey v. Crews* (1981). In *Isbey*, this Court held: "With respect to the question of mitigation of damages, the law in North Carolina is that the non-breaching party to a lease agreement has a duty to mitigate his damages upon such breach of contract." The duty to mitigate requires that an injured plaintiff, whether his case is in tort or contract, must exercise reasonable care and diligence to avoid or lessen the consequences of the defendant's wrong.

The Hibbards assert that because this Court has held that a landlord has a duty to mitigate upon a tenant's default, a provision that relieves the landlord of this duty is contrary to the law and not allowed. The existence of a common law duty of care does not, however, absolutely preclude parties from agreeing in a contract to relieve a party of that duty. As our Supreme Court has explained in discussing clauses exculpating parties from liability for their own negligence:

While contracts exempting persons from liability for negligence are not favored by the law, and are strictly construed against those relying on thereon, nevertheless, the majority rule, to which we adhere, is that, subject to certain limitations hereinafter discussed, a person may effectively bargain against liability for harm caused by his ordinary negligence in the performance of a legal duty arising out of a contractual relation.

This principle arises out of the broad policy of the law which accords to contracting parties freedom to bind themselves as they see fit.

This Court has since held that a contract exculpating persons from liability for negligence will be enforced unless it violates a statute, is gained through inequality of bargaining power, or is contrary to a substantial public interest. If a party may—subject to the specified limitations—contract to insulate itself from liability for a failure to exercise due care, we can perceive no basis for precluding a party from contracting to relieve itself from a duty of due care to minimize its damages.

The Hibbards have not argued that the clause was obtained through an inequality of bargaining power. The lease represents an arm's-length commercial transaction with both parties using brokers or advisors to assist them in obtaining the best possible bargain. The Hibbards were not forced to lease this particular space. They picked the space because it was the best location and admitted that "nobody was holding a gun to our head" to sign the lease.

The question remains whether the mitigation clause violates the public policy of this state or is otherwise contrary to a substantial public interest. Public policy has been defined as the principle of law that holds that no citizen can lawfully do that which has a tendency to be injurious to the public or against the public good. This lease involves a private contract between businesses relating to a bagel shop. The clause does not create a risk of injury to the public or the rights of third parties.

The Hibbards argue that allowing such clauses "would cripple the small business and residential tenant." We emphasize that this opinion does not address the viability of such a clause

in a residential lease, which presents an entirely different situation. With respect to risk to the business community, we note that a number of states do not impose any duty to mitigate. In examining commercial real estate lease transactions in light of public policy considerations, we recognize that negotiations generally involve relatively equal bargaining power due to the availability of other space and the fact that neither party is compelled to make a deal. Each lessee has to determine whether the lease offered is acceptable in business terms. Through negotiations, the parties to a commercial lease often include specific provisions for almost every contingency that could arise from their agreement and exact from each other concessions in order to obtain the desired provisions. Ultimately, if the rent is too

high or the provisions unacceptable to the lessee, a prospective commercial tenant can always look for another location.

Other jurisdictions have relied on these considerations in determining that provisions relieving a landlord of duty to mitigate do not violate public policy and should be enforced based upon ordinary contract principles. [Cases omitted.] Although not controlling, we find these decisions persuasive. Accordingly, we hold that a clause in a commercial lease that relieves the landlord from its duty to mitigate damages is not against public policy and is enforceable.

Judgment vacated and remanded for entry of judgment in favor of Sylva Shops Limited Partnership for \$35,511.70.

Problems and Problem Cases

1. In October 1981, Mary Elizabeth Cook entered into an oral lease to rent a residence to Rivard Melson. Melson agreed to pay \$400 per month, in advance, as rent. In November 1987, Cook sent Melson a letter advising that the rent would be increased to \$525 per month, effective January 1, 1988, and asking whether Melson was going to pay. On December 10, 1987, Melson replied that he would not pay the increased rent. On January 2, 1988, Melson sent Cook a check for \$400 as rent for January. Cook returned the check and stated that the rent was now \$525. Melson did not vacate the premises until February 1, 1988. Cook brought a suit against Melson for \$525, allegedly the unpaid rent for the month of January. Was Melson liable for the \$525?
2. A tenant rented an apartment from the landlord pursuant to a lease that required her to surrender the premises in “as good a state and condition as reasonable use and wear and tear will permit,” and also required her to make a refundable security deposit. After the lease was executed, the landlord notified the tenants in the building that no tenant was to shampoo the wall-to-wall carpet on surrender of the lease because the landlord had retained a professional carpet cleaner to do it. The cost of the carpet cleaner’s services was to be automatically deducted from the security deposit. When the tenant left the building, a portion of her security deposit was withheld to cover carpet cleaning and she sued for a refund of the full deposit. Is the tenant entitled to a refund?
3. Pines was a student at the University of Wisconsin. In May, he and some other students asked Perssion if he had a house they could rent for the next school year. Perssion showed them a house that was in filthy condition, saying he would clean and fix it up, provide the necessary furniture, and have it in good condition by September. Pines agreed to rent the house. When Pines and the other tenants arrived in the fall, the house was still filthy and there were no student furnishings. They began to clean up the house themselves and to paint it using some paint supplied by Perssion. However, they became discouraged with their progress. They contacted an attorney who advised them to request the city building inspector to check the building. The inspector found numerous violations of the building code, including inadequate electric wiring and the kitchen sink and toilet in need of repair. The inspector gave Perssion two weeks to make the repairs. Pines and the others moved out of the house. They then sued Perssion to get their deposit returned to them along with payment for the work they had done in cleaning the house. Was there an implied warranty of habitability that was breached in the lease of the house?
4. Sheldon Solow, doing business as Solovieff Gallery Company, was the owner of a 300-unit luxury apartment building on the upper east side of Manhattan that had received awards for architectural design. Rents, which were subject to a city rent-stabilization law, ranged from \$1,064.89 per month for a 4th-floor studio apartment to \$5,379.92 per month for a two-bedroom on the 44th floor. A brochure shown to

prospective tenants before they signed a lease touted the high-quality features in the building and apartments, including the roof-top pool club, 24-hour-attended lobby, video-monitored service and garage entrances, four high-speed elevators with direct access to the attended underground garage, 46th-floor laundry with spectacular city view, and a four-pipe heating and air conditioning system in the public areas as well as individual apartments.

In 1987, approximately 80 tenants joined in a rent strike to protest against what they viewed as deteriorating conditions and services. Among their complaints were (1) malfunctioning elevators that consistently skipped floors, opened on the wrong floors, and were often out of service, causing interminable delays, lateness, and missed appointments; (2) stench of garbage stored between the package room and the garage as well as rodent and roach infestation; (3) frequently inoperative lobby air conditioning; (4) fire alarms that did not function; (5) a dirty laundry room with overflowing sinks, a collapsed ceiling, and missing floor tiles; (6) soiled carpets in the lobby and other public areas; (7) unlocked door separating the garage and the building; (8) exposed wiring in public areas; (9) several floods that made ingress and egress to the building difficult, caused floors to buckle, and seeped into mailboxes and the package room; (10) missing caulking that allowed water to seep into apartments; (11) standing water in the boiler room; and (12) graffiti on some walls. Solow brought suit against the tenants to recover rent, and the tenants sought an abatement of rent for breach of warranty of habitability.

The Real Property Law of New York creates an implied warranty of habitability in residential housing and provides, in pertinent part, that “in every written or oral lease or rental agreement for residential premises the landlord or lessor shall be deemed to covenant and warrant that the premises so leased or rented and all areas used in connection therewith, in common with other tenants or residents, are fit for human habitation and for the uses reasonably intended by the parties and that the occupants of such premises shall not be subjected to any conditions which would be dangerous, hazardous, or detrimental to their life, health or safety.” Did the conditions present in the apartment building constitute a breach of the implied warranty of habitability?

5. On June 1, 2003, James Welsch, as owner, entered into a written agreement with Michael Groat, as

tenant, for a one-year lease of a single-family residence located in Old Saybrook, Connecticut, at a monthly rent of \$1,500 due on the first day of each month. At the execution of the lease, Groat paid the June rental of \$1,500 and a security deposit of \$3,000. He made an additional payment of \$1,500 for a total of \$6,000, but ended up only occupying the premises for three months. When Groat began occupancy along with his children, he discovered leaks and water damage in the basement of the premises. In early July, Groat advised Welsch that, in addition to water damage and the presence of mold and mildew, the premises contained many other deficiencies. Groat had intended to use a basement room as a bedroom for his children, but the water damage made such use impossible.

In response to Groat’s notification of the poor condition of the premises, Welsch’s attorney referred Groat to section 12 of the lease he had signed which stated he had inspected the premises and accepted them as he found them. By letter dated August 1, 2003, Groat outlined the defects in the premises including gutters clogged, spilling over; driveway severely cracked and crumbling; side storm door falling apart, missing screen; front storm door pump broken, missing screen; faucet leaks from stem when on; oven temperature gauge off; sink drain does not work; tub drain does not work; cold water handle is stripped; water ends up on basement floor; small bedroom closet door does not clear carpet; large bedroom entry door does not close; basement is constantly wet; there are puddles when it rains and a constant wet slime along the east wall; the paneling and trim is badly rotted, obviously a long-term problem; paint is peeling from concrete walls; latex floor is bubbling and peeling from wetness; only one basement window is operational; there are significant mold and mildew issues with the entire basement, especially the finished living area. Groat moved out in August. On October 11, 2003, Welsch brought an action against Groat for breach of the lease. Groat filed a counterclaim claiming, among other things, constructive eviction. Did the conditions at the house and the landlord’s failure to make the necessary repairs in a timely fashion constitute a breach of the lease and justify termination of the lease on the grounds of constructive eviction?

6. DeEtte Junker leased an apartment from F. L. Cappaert in the Pecan Ridge Apartment Complex, which consisted of six buildings, each with 12 apartments. Junker’s apartment was upstairs, and she and the

tenants in two other apartments used a common stairway for access to their apartments. Junker slipped on the stairway and was injured. She sued Cappaert for damages on the grounds that he had been negligent in maintaining the stairway. Junker's lease contained an exculpatory clause in which Cappaert disclaimed any liability for injury due to his negligence. Did the exculpatory clause immunize the landlord against damages caused by his own negligence in maintaining a common area in leased residential property?

7. On November 25, 1997, Suzette and Howard Hemmings entered into an agreement with the Pelham Wood Limited Liability Limited Partnership (the Landlord) to lease a two-bedroom apartment at Pelham Wood, a multibuilding apartment complex consisting of 400 units in Baltimore County, Maryland. The provisions in the lease include the following:
- The Landlord has the right to enter the apartment at any time by master key or force to make repairs/alterations in the apartment or elsewhere on the property;
 - The Landlord has the responsibility for repairs to the apartment, its equipment and the appliances furnished by the Landlord;
 - The apartment will be made available such that it will not contain conditions that constitute, or if not properly corrected, would constitute a fire hazard or a serious and substantial threat to the life, health or safety of occupants;
 - The tenant agrees that the Landlord shall not be liable for an injury, damage, or loss to person or property caused by other tenants or other persons or caused by theft, vandalism, fire, water, smoke, explosion, or other causes unless the same is exclusively the omission, fault, negligence or other misconduct of the Landlord;
 - The tenant will not change the locks on the doors of the Premises or install additional locks, door knockers, chains or other fasteners without the prior written permission of the Landlord.

The Hemmings's apartment was located on the second floor, just above a ground-level apartment. A sliding glass door in the Hemmings's apartment allowed access to a rear patio balcony overlooking a wooded area. In an attempt to deter criminal activity at or around the apartment complex, the Landlord testified that it had installed exterior lighting around the property, each apartment had a regular lock as well as a dead bolt on the front door, patio apartments had a Charlie Bar (a horizontally mounted bar securing the sliding glass doors), and the ground floor apartments had an alarm system.

At approximately 1:17 AM one morning in June, an unidentified intruder entered the Hemmings's apartment through the sliding glass door, and, upon encountering Howard Hemmings, shot him twice in the abdomen. He died later that morning from the wounds. The contractor, hired by the Landlord to come in and repair the sliding glass door, noted that the whole left side of the sliding glass door frame had been mutilated and the frame around the door was twisted, mangled, and destroyed. The locking mechanism no longer worked and had to be replaced. He found the cradle in which the Charlie Bar would rest still attached to the door—but no evidence of a Charlie Bar. Others living in the same building as the Hemmings, including the tenants living immediately below their apartment, testified that there were no light fixtures at the rear of that building at that time and that it was pitch black and really dark at night. They said it improved only when the Landlord installed additional lights after the Hemmings incident. Police Department logs indicated there had been numerous tenant complaints of criminal activity in and around the complex, but the Landlord did not keep any records of criminal activity there. Suzette Hemmings filed a wrongful death action against the Landlord. Does a landlord have a duty to repair a known dangerous or defective condition under its control to prevent a foreseeable third-party attack upon a tenant within leased premises?

8. On March 1, Sharon Fitzgerald entered into an oral lease of a house owned by Parkin. The lease was on a month-to-month basis, and the rent was set at \$290 per month. Parkin also agreed to make certain repairs to the house. On July 1, Fitzgerald notified Parkin by mail of the repairs that needed to be made. These included repairs of leaky pipes, the kitchen ceiling, and the back porch. Fitzgerald also said she would withhold the rent if the repairs were not made within 30 days. On July 13, Fitzgerald had the premises inspected by a city housing inspector who found eight violations of the city code. Parkin was given notice of these violations. On July 29, Parkin served Fitzgerald with a formally correct notice to vacate the premises within 30 days. In September, he brought a lawsuit to have Fitzgerald evicted. A Minnesota statute gives a tenant a defense to an eviction action if the eviction is in retaliation for the reporting of a housing violation in good faith to city officials. Could the landlord evict the tenant from the house under these circumstances?

9. Kridel entered into a lease with Sommer, owner of the Pierre Apartments, to lease apartment 6-L for two years. Kridel, who was to be married in June, planned to move into the apartment in May. His parents and future parents-in-law had agreed to assume responsibility for the rent because Kridel was a full-time student who had no funds of his own. Shortly before Kridel was to have moved in, his engagement was broken. He wrote Sommer a letter explaining his situation and stating that he could not take the apartment. Sommer did not answer the letter. When another party inquired about renting apartment 6-L, the person in charge told her that the apartment was already rented to Kridel.

Sommer did not enter the apartment or show it to anyone until he rented apartment 6-L to someone else when there were approximately eight months left on Kridel's lease. He sued Kridel for the full rent for the period of approximately 16 months before the new tenant's lease took effect. Kridel argued that Sommer should not be able to collect rent for the first 16 months of the lease because he did not take reasonable steps to rerent the apartment. Was Sommer entitled to collect the rent he sought?

Online Research

Check Out Your Housing Code

Use the Internet to ascertain whether the city or county in which you reside has a housing code that covers the lease of residential property. If it does not, then locate the housing code of New York City. What obligations does the code place on landlords? What rights does it give to landlords? What rights does it give to tenants? What obligations, if any, does it place on tenants?

You Be the Judge

Consider completing the case "TENANT RIGHTS: When the Lessee Leaves" from the You Be the Judge Web site element after you have read this chapter. Visit our Web site at www.mhhe.com/mallor14e for more information and activities regarding this case segment.

chapter 26

ESTATES AND TRUSTS

George, an elderly widower, has no children of his own but enjoys a very close relationship with his two stepdaughters, his late wife's children by her first marriage. George's only living blood relative is his brother, from whom he has been estranged for many years. George has a substantial amount of property—his home, two cars, stocks and bonds, rental property, bank accounts, and a valuable collection of baseball cards. Though retired, George is an active volunteer for, and supporter of, several community charities and organizations. Presently, George does not have a will, but he is considering writing one.

- What will happen to George's property upon his death if he does not have a will at that time?
- What are the requirements for executing a valid will?
- What can cause a will to be invalid?
- After George's death, how would his estate be probated?
- If George decided to create a trust to benefit his stepdaughters, what is required to create a trust, and what are the legal duties of a trustee? What are the *ethical* duties of a trustee?

ONE OF THE BASIC features of the ownership of property is the right to dispose of the property during life and at death. You have already learned about the ways in which property is transferred during the owner's life. The owner's death is another major event for the transfer of property. Most people want to be able to choose who will get their property when they die. There are a variety of ways in which a person may control the ultimate disposition of his property. He may take title to the property in a form of joint ownership that gives his co-owner a right of survivorship. He may create a trust and transfer property to it to be used for the benefit of a spouse, child, elderly parent, or other beneficiary. He may execute a will in which he directs that his real and personal property be distributed to persons named in the will. If, however, a person makes no provision for the disposition of his property at his death, his property will be distributed to his heirs as defined by state law. This chapter focuses on the transfer of property at death and on the use of trusts for the transfer and management of property, both during life and at death.

The Law of Estates and Trusts

Each state has its own statutes and common law regulating the distribution of property upon death. Legal requirements and procedures may vary from state to state,

but many general principles can be stated. The **Uniform Probate Code (UPC)** is a comprehensive, uniform law that has been enacted in 16 states. It is intended to update and unify state law concerning the disposition and administration of property at death. Several relevant UPC provisions will be discussed in this chapter.

Estate Planning A person's **estate** is all of the property owned by that person. **Estate planning** is the popular name for the complicated process of planning for the transfer of a person's estate in later life and at death. Estate planning also concerns planning for the possibility of prolonged illness or disability. An attorney who is creating an estate plan will take an inventory of the client's assets, learn the client's objectives, and draft the instruments necessary to carry out the plan. This plan is normally guided by the desire to reduce the amount of tax liability and to provide for the orderly disposition of the estate.

Wills

Right of Disposition by Will The right to control the disposition of property at death has not always existed. In the English feudal system, the king owned all land. The lords and knights had only the right

to use land for their lifetime. A landholder's rights in land terminated upon his death, and no rights descended to his heirs. In 1215, the king granted the nobility the right to pass their interest in the land they held to their heirs. Later, that right was extended to all property owners. In the United States, each state has enacted statutes that establish the requirements for a valid will, including the formalities that must be met to pass property by will.

Nature of a Will A **will** is a document executed with specific legal formalities by a **testator** (person making a will) that contains his instructions about the way his property will be disposed of at his death. A will can dispose only of property belonging to the testator at the time of his death. Furthermore, wills do not control property that goes to others through other planning devices (such as life insurance policies) or by operation of law (such as by right of survivorship). For example, property held in joint tenancy or tenancy by the entirety is not controlled by a will, because the property passes automatically to the surviving cotenant by right of survivorship. In addition, life insurance proceeds are controlled by the insured's designation of beneficiaries, not by any provision of a will. (Because joint tenancy and life insurance are ways of directing the disposition of property, they are sometimes referred to as "will substitutes.")

LOG ON

For discussion of why it is important to have a will, see Peter Weaver, *10 Good Reasons Why You Should Have a Will*,

www.thirdage.com/features/money/goodwill/ and Rebecca Berlin, *Wills: Why You Need One*, www.alllaw.com/articles/wills_and_trusts/article2.asp.

Common Will Terminology Some legal terms commonly used in wills include the following:

1. Bequest. A **bequest** (also called **legacy**) is a gift of personal property or money. For example, a will might provide for a bequest of a family heirloom to the testator's daughter. Since a will can direct only property that is owned by the testator at the time of his death, a specific bequest of property that the testator has disposed of before his death is ineffective. This is called **ademption**. For example, Samuel's will states that Warren is to

receive Samuel's collection of antique guns. If the guns are destroyed before Warren's death, however, the bequest is ineffective because of ademption.

2. Devise. A **devise** is a gift of real property. For example, the testator might devise his family farm to his grandson.

3. Residuary. The **residuary** is the balance of the estate that is left after specific devises and bequests are made by the will. After providing for the disposition of specific personal and real property, a testator might provide that the residuary of his estate is to go to his spouse or be divided among his descendants.

4. Issue. A person's **issue** are his lineal descendants (children, grandchildren, great-grandchildren, and so forth). This category of persons includes adopted children.

5. Per capita. This term and the next one, *per stirpes*, are used to describe the way in which a group of persons are to share a gift. **Per capita** means that each of that group of persons will share equally. For example, Grandfather dies, leaving a will that provides that the residuary of his estate is to go to his issue or descendants *per capita*. Grandfather had two children, Mary and Bill. Mary has two children, John and James. Bill has one child, Margaret. Mary and Bill die before Grandfather (in legal terms, *predecease* him), but all three of Grandfather's grandchildren are living at the time of his death. In this case, John, James, and Margaret would each take one-third of the residuary of Grandfather's estate.

6. Per stirpes. When a gift is given to the testator's issue or descendants **per stirpes** (also called **by right of representation**), each surviving descendant divides the share that his or her parent would have taken if the parent had survived. In the preceding example, if Grandfather's will had stated that the residuary of his estate was to go to his issue or descendants *per stirpes*, Margaret would take one-half and John and James would take one-quarter each (that is, they would divide the share that would have gone to their mother).

Testamentary Capacity The capacity to make a valid will is called **testamentary capacity**. To have testamentary capacity, a person must be *of sound mind* and *of legal age*, which is 18 in most states. A person does not have to be in perfect mental health to have testamentary capacity. Because people often delay executing wills until they are weak and in ill health, the standard for mental capacity to make a will is fairly low. To be of "sound mind," a person need only be sufficiently

rational to be capable of understanding the nature and character of his property, of realizing that he is making a will, and of knowing the persons who would normally be the beneficiaries of his affection. A person could move in and out of periods of lucidity and still have testamentary capacity if he executed his will during a lucid period.

Lack of testamentary capacity is a common ground upon which wills are challenged by persons who were excluded from a will. *Fraud* and *undue influence* are also common grounds for challenging the validity of a will.¹

Execution of a Will Unless a will is executed with the formalities required by state law, it is *void*. The courts are strict in interpreting statutes concerning the execution of wills. If a will is declared void, the property of the deceased person will be distributed according to the provisions of state laws that will be discussed later.

The formalities required for a valid will differ from state to state. For that reason, an individual should consult the laws of his state before making a will. If he should move to another state after having executed a will, he should consult a lawyer in his new state to determine whether a new will needs to be executed. All states require that a will be *in writing*. State law also requires that a formal will be *witnessed*, generally by two or three *disinterested* witnesses (persons who do not stand to inherit any property under the will), and that it be *signed* by the testator or by someone else at the testator's direction. Most states also require that the testator *publish* the will—that is, declare or indicate at the time of signing that the instrument is his will. Another formality required by most states is that the testator sign the will in the presence and the sight of the witnesses and that the witnesses sign in the presence and the sight of each other. As a general rule, an **attestation clause**, which states the formalities that have been followed in the execution of the will, is written following the testator's signature. These detailed formalities are designed to prevent fraud. Section 2–502 of the UPC requires that a will must be in writing, signed by the testator (or in the testator's name by some other individual in the testator's conscious presence and by the testator's direction), and signed by at least two individuals, each of whom signed within a reasonable time after he witnessed either the signing of the will or the testator's acknowledgment of that signature or will. Also, under the UPC, any individual who is generally competent to be a witness may witness a will, and the fact that the witness is an interested party does not invalidate the will [2–505]. When a testator has made a technical error in executing a

will, however, the UPC permits the document to be treated as if it had been executed properly if it can be proven by clear and convincing evidence that the testator intended the document to constitute his will [2–503].

In some situations, a lawyer might arrange to have the execution of a will *videotaped* to provide evidence relating to the testator's capacity and the use of proper formalities. (Note that the will is executed in the normal way; the videotape merely records the execution of the will.) Some state probate codes specifically provide that videotapes of the executions of wills are admissible into evidence.

Incorporation by Reference In some situations, a testator might want his will to refer to and incorporate an existing writing. For example, the testator may have created a list of specific gifts of personal property that he wants to incorporate in the will. A writing such as this is called an **extrinsic document**—that is, a writing apart from the will. In most states, the contents of extrinsic documents can be essentially incorporated into the will when the circumstances satisfy rules that have been designed to ensure that the document is genuine and that it was intended by the testator to be incorporated in the will. This is called **incorporation by reference**. For an extrinsic document to be incorporated by reference, it must have been *in existence at the time the will was executed*. In addition, the writing and the will must refer to each other so that the extrinsic document can be identified and so that it is clear that the testator intended the extrinsic document to be incorporated in the will. Under the UPC, incorporation by reference is allowed when the extrinsic document was in existence when the will was executed, the language of the will manifests the intent to incorporate the writing, and the will describes the writing sufficiently to identify it [2–510].

Informal Wills Some states recognize certain types of wills that are not executed with these formalities. These are:

1. **Nuncupative wills.** A **nuncupative** will is an oral will. Such wills are recognized as valid in some states, but only under limited circumstances and to a limited extent. In a number of states, for example, nuncupative wills are valid only when made by soldiers in military service and sailors at sea, and even then they will be effective only to dispose of personal property that was in the actual possession of the person at the time the oral will was made. Other states place low dollar limits on the amount of property that can be passed by a nuncupative will.

¹Fraud and undue influence are discussed in detail in Chapter 13.

2. Holographic wills. **Holographic wills** are wills that are written and signed in the testator's handwriting. You will see an example of a holographic will in *Estate of Shelly*, which appears below. The fact that holographic wills are not properly witnessed makes them suspect. They are recognized in about half of the states and by section 2–502(b) of the UPC, even though they are not executed with the formalities usually required of valid wills. For a holographic will to be valid in the states that recognize them, it must evidence testamentary intent and must actually be *handwritten* by the testator. A typed holographic will would be invalid. Some states require that the holographic will be *entirely* handwritten—although the UPC requires only that the signature and material portions of the will be handwritten by the testator [2–502(b)]—and some also require that the will be dated.

Joint and Mutual Wills In some circumstances, two or more people—a married couple, for example—decide together on a plan for the disposition of their property at death. To carry out this plan, they may execute a **joint will** (a single instrument that constitutes the will of both or all of the testators and is executed by both or all) or they may execute **mutual wills** (joint or separate, individual wills that reflect the common plan of distribution).

Underlying a joint or mutual will is an agreement on a common plan. This common plan often includes an express or implied contract (a contract to make a will or not to revoke the will). One issue that sometimes arises is whether a testator who has made a joint or mutual will can later change his will. Whether joint and mutual wills are revocable depends on the language of the will, on state law, and on the timing of the revocation. For example, a testator who made a joint will with his spouse may be able to revoke his will during the life of his spouse, because the spouse still has a chance to change her own will, but he may be unable to revoke or change the will after the death of his spouse. The UPC provides that the mere fact that a joint or mutual will has been executed does *not* create the presumption of a contract not to revoke the will or wills [2–514].

Construction of Wills Even in carefully drafted wills, questions sometimes arise as to the meaning or legal effect of a term or provision. Disputes about the meaning of the will are even more likely to occur in wills drafted by the testator himself, such as holographic wills. To interpret a will, a court will examine the entire instrument in an attempt to determine the testator's intent. The following *Estate of Shelly* case provides a good example of the methods and principles courts use to interpret wills.

Estate of Shelly

2008 Pa. Super. LEXIS 1099 (Pa. Super. Ct. 2008)

Norman Shelly died on July 27, 1999. After his death, a cardboard panel of a cigarette carton that purported to be a will was submitted for probate. The cigarette carton was labeled:

FIRST AND LAST ONLY WILL
OF "DRAFT ?"
NORMAN F SHELLY

It was signed and dated by Shelly, but was not witnessed or notarized. None of the people named as beneficiaries of the estate would have been intestate heirs of Shelly. In August 1999, the Register of Wills issued letters of administration.

Between 2000 and 2006, a number of individuals who stood to inherit from Shelly if he had died intestate challenged the cigarette carton document. Some of these individuals ("the Four Heirs") filed a motion for summary judgment seeking a declaration by the orphans' court (the court that has jurisdiction of this type of case in Pennsylvania) that if the cigarette carton were held to be a will, then a partial intestacy results because not all assets of the estate were disposed of by the cigarette carton document. The beneficiaries named in the cigarette carton document ("the beneficiaries") also filed a motion for summary judgment requesting that it be declared Shelly's valid Last Will and Testament and the appeal of the heirs dismissed. The orphans' court granted the Four Heirs' motion for summary judgment and denied the beneficiaries' motion for summary judgment. The beneficiaries appealed.

Popovich, Judge

In order to determine whether a particular writing constitutes a will, no formal words are necessary, the form of the instrument

is immaterial if its substance is testamentary. A gift or bequest after death is of the very essence of a will, and determines a writing, whatever its form, to be testamentary. Therefore, our

first inquiry is whether the cigarette carton provides for a positive disposition of assets.

The beneficiaries argue that a positive disposition of assets is evidenced by the writing labeled “FIRST AND LAST ONLY WILL” and signed and dated by the decedent. Specifically, they argue that the orphans’ court erred in finding the cigarette carton did not evidence testamentary intent due to the absence of a positive disposition of assets. They contend that the term “will” is a dispositive term and the fact that the decedent signed and dated the cigarette carton resulted in a determination that it was a will written with testamentary intent. No rule regarding wills is more settled than the general rule that the testator’s intent, if it is not unlawful, must prevail. Moreover, the testator’s intention must be ascertained from the language and scheme of his will; it is not what the Court thinks he might or would have said in the existing circumstances, or even what the Court thinks he meant to say, but is what is the meaning of his words.

As found by the orphans’ court, this document did not make a disposition of property. Rather the document contained a list of items accompanied by the names of individuals. The only term that could have been construed to dispose of property is “DEVIDE,” which the orphans’ court presumed to be “divide.” The context of the placement of the word “DEVIDE” was as follows:

MONEY. DEVIDE

MICHAEL COOKS SONS

However, the decedent also placed an arrow leading from the previous section of the document which read: “FARM MACH + MACHINES AND TOOLS MICHAEL COOK SR LIVING MY AGE” into this section. The beneficiaries contend that “DEVIDE” written in this context indicated that Michael Cook, Sr., was the father of the two sons and that the decedent intended the money to be divided equally between the two sons. We disagree.

There is no indication of what money was to be divided, into what shares it was to be divided, or if it was to be divisible by three including Michael Cook, Sr., or divisible by two including only his two sons. There was no specificity as to the proposed beneficiaries or to the subject matter to be distributed. Therefore, this was not a positive disposition of property nor can a positive disposition of property be inferred from the cigarette carton. Accordingly, because the cigarette carton does not include the one essential element for the creation of a will, a disposition of property, it cannot be considered as such.

The beneficiaries’ next argument is that the writing on the cigarette carton evidenced the testamentary intent of the decedent. Specifically, the beneficiaries contend that the orphans’ court erred in determining the decedent lacked testamentary

intent due to the insertion of the term “DRAFT ?” at the top of the cigarette carton. The beneficiaries argue that because the will was otherwise valid, the insertion of the term “DRAFT ?” did not destroy the presence of testamentary intent inherent in the writing. The term “DRAFT ?” was distinguished from the other writing on the cigarette carton in that it was set inside a box and was inserted into the heading of the writing, which appeared as follows:

FIRST AND LAST ONLY WILL
OF “DRAFT ?”
NORMAN F SHELLY

Our determination focuses on whether we are faced with a document that is testamentary as a matter of law, nontestamentary as a matter of law, or ambiguous, in which case extrinsic evidence is to be considered to resolve the ambiguity. With regard to a court’s consideration of testamentary intent, we note if a testator intends to make a testamentary gift, it can be done in many ways and in many forms, and the intent, as we have often said, is the polestar. Papers—holographic and otherwise—have been sustained as wills where a testamentary disposition of property was clearly contained in a letter or a deed or a certificate of deposit or a power of attorney or an agreement or a check or a note or an assignment, and even in a letter of instructions to an attorney where it was later proved that the writer intended such letter to be a will. Moreover, if a further or additional act or writing is contemplated by an alleged testator in order to make a written document his will or codicil, the writing is nontestamentary in nature.

Black’s Law Dictionary defines the term “draft” as, inter alia, “[a]n initial or preliminary version.” The obvious connotation of the term “draft” is that it is a contemplation of a further or additional act or writing. The beneficiaries’ arguments to the contrary are unavailing. The fact that the decedent did not strike out the word “Will” but included it on the cigarette carton in addition to “DRAFT ?” was not an indication of testamentary intent but rather an indication that the decedent contemplated a final document to be created at a later time. The beneficiaries’ contention that labeling a document a “Will” is determinative of the character of the writing itself is illogical, in that, if this were the case, then any writing labeled “Will” would be a valid will despite the lack of a positive disposition of assets or testamentary intent. Simply labeling a document “Will” does not end our inquiry into the validity of the document itself. The beneficiaries’ argue that the decedent did not strike out his signature or give any other indication that he was revoking his will written on the cigarette carton. This argument is misplaced under these circumstances because the issue to be determined is whether the cigarette carton was a valid will and not whether the decedent revoked a prior valid will.

The beneficiaries contend that the definition of “draft” as set forth in the dictionary does not encompass the term “DRAFT ?” as indicated on a will. This is an unreasonable limitation on the definition of “draft” because a dictionary does not include an exhaustive list of each context in which the word may be used in the English language. Further, *Black’s Law Dictionary* defines a “drafter” as “[a] person who draws or frames a legal document, such as a will, contract, or legislative bill.”

The beneficiaries argue that the signing and dating of the cigarette carton was conclusive as to the decedent’s testamentary intent. We reiterate that there is no special form of words necessary to constitute a will, however, it must include one essential element, that is, the document must dispose of property. As noted above, the decedent’s words do not constitute a plain and clear meaning by which this Court can decipher his intention. The fact that the cigarette carton itself is labeled a “Will”

and that it was signed and dated by the decedent is of no consequence when the contents of the writing do not amount to a disposition of property.

The beneficiaries aver that if there was real doubt as to whether “DRAFT ?” destroyed testamentary intent, then extrinsic evidence should have been admitted to aid in this determination. As noted above, extrinsic evidence is only admissible when a writing by its terms clearly constitutes a testamentary disposition. Extrinsic evidence is not admissible to prove testamentary intent because this writing did not constitute a testamentary disposition by decedent. In conclusion, the cigarette carton was not a will because it lacked both a positive disposition of property and the testamentary intent of the decedent.

Judgment affirmed in favor of the Four Heirs.

Limitations on Disposition by Will A person who takes property by will takes it subject to all outstanding claims against the property. For example, if real property is subject to a mortgage or other lien, the beneficiary who takes the property gets it subject to the mortgage or lien. In addition, the rights of the testator’s creditors are superior to the rights of beneficiaries under his will. Thus, if the testator was insolvent (his debts exceeded his assets), persons named as beneficiaries do not receive any property by virtue of the will.

Under the laws of most states, the surviving spouse of the testator has statutory rights in property owned solely by the testator that cannot be defeated by a contrary will provision. This means that a husband cannot effectively disinherit his wife, and vice versa. Even if the will provides for the surviving spouse, he or she can elect to take the share of the decedent’s estate that would

be provided by state law rather than the amount specified in the will. In some states, personal property, such as furniture, passes automatically to the surviving spouse.

At common law, a widow had the right to a life estate in one-third of the lands owned by her husband during their marriage. This was known as a widow’s **dower right**. A similar right for a widower was known as **curtesy**. A number of states have changed the right by statute to give a surviving spouse a one-third interest in fee simple in the real and personal property owned by the deceased spouse at the time of his or her death. (Naturally, a testator can leave his spouse more than this if he desires.) Under UPC 2–201, the surviving spouse’s elective share varies depending on the length of the surviving spouse’s marriage to the testator—the elective share increases with the length of marriage.

Ethics in Action

Dr. Coggins died in 1963. In his last will, Dr. Coggins gave the residue of his estate to the Mercantile–Safe Deposit & Trust Company, to be held by it as trustee under the will. The trust provided for monthly payments to four income beneficiaries until the death of the last of them. The last of these annuitants was Dr. Coggins’s widow, who died in 1998. A provision of the will stated that, upon the death of the survivor of the four annuitants, the trust would terminate and the assets and all unpaid income shall be paid over “free of trust unto the Keswick Home, formerly

Home for Incurables of Baltimore City, with the request that said Home use the estate and property thus passing to it for the acquisition or construction of a new building to provide additional housing accommodations to be known as the ‘Coggins Building,’ to house white patients who need physical rehabilitation. If not acceptable to the Keswick Home, then this bequest shall go to the University of Maryland Hospital to be used for physical rehabilitation.” What are the major ethical considerations involved in determining whether this will provision should be enforced?

As a general rule, a surviving spouse is given the right to use the family home for a stated period as well as a portion of the deceased spouse's estate. In community property states, each spouse has a one-half interest in community property that cannot be defeated by a contrary will provision. (Note that the surviving spouse will obtain *full* ownership of any property owned by the testator and the surviving spouse as joint tenants or tenants by the entirety.)

Children of the testator who were born or adopted after the will was executed are called **pretermitted** children. There is a presumption that the testator intended to provide for such a child, unless there is evidence to the contrary. State law gives pretermitted children the right to a share of the testator's estate. For example, under section 2–302 of the Uniform Probate Code, a pretermitted child has the right to receive the share he would have received under the state intestacy statute unless it appears that the omission of this child was intentional, the testator gave substantially all of his estate to the child's other parent, or the testator provided for the child outside of the will.

Revocation of Wills One important feature of a will is that it is *revocable* until the moment of the testator's death. For this reason, a will confers *no present interest* in the testator's property. A person is free to revoke a prior will and, if she wishes, to make a new will. Wills can be revoked in a variety of ways. Physical destruction and mutilation done with intent to revoke a will constitute revocation, as do other acts such as crossing out the will or creating a writing that expressly cancels the will.

In addition, a will is revoked if the testator later executes a valid will that expressly revokes the earlier will. A later will that does not *expressly* revoke an earlier will operates to revoke only those portions of the earlier will that are inconsistent with the later will. Under the UPC, a later will that does not expressly revoke a prior will operates to revoke it by inconsistency if the testator intended the subsequent will to *replace* rather than *supplement* the prior will [2–507(b)]. Furthermore, the UPC presumes that the testator intended the subsequent will to replace rather than supplement the prior will if the subsequent one makes a complete disposition of her estate, but it presumes that the testator intended merely to supplement and not replace the prior will if the subsequent will disposes of only part of her estate [2–507(c), 2–507(d)]. In some states, a will is presumed to have been revoked if it cannot be located after the testator's death, although this presumption can be rebutted with contrary evidence.

Wills can also be revoked by operation of law without any act on the part of the testator signifying revocation. State statutes provide that certain changes in relationships operate as revocations of a will. In some states, marriage will operate to revoke a will that was made when the testator was single. Similarly, a divorce may revoke provisions in a will made during marriage that leave property to the divorced spouse. Under the laws of some states, the birth of a child after the execution of a will may operate as a partial revocation of the will.

Codicils A **codicil** is an amendment of a will. If a person wants to change a provision of a will without making an entirely new will, she may amend the will by executing a codicil. One may *not* amend a will by merely striking out objectionable provisions and inserting new provisions. The same formalities are required for the creation of a valid codicil as for the creation of a valid will.

Advance Directives: Planning for Disability

Advances in medical technology now permit a person to be kept alive by artificial means, even in many cases in which there is no hope of the person being able to function without life support. Many people are opposed to their lives being prolonged with no chance of recovery. In response to these concerns, almost all states have enacted statutes permitting individuals to state their choices about the medical procedures that should be administered or withheld if they should become incapacitated in the future and cannot recover. Collectively, these devices are called **advance directives**. An advance directive is a written document (such as a living will or durable power of attorney) that directs others how future health care decisions should be made in the event that the individual becomes incapacitated.

Living Wills **Living wills** are documents in which a person states in advance his intention to forgo or obtain certain life-prolonging medical procedures. Almost all states have enacted statutes recognizing living wills. These statutes also establish the elements and formalities required to create a valid living will and describe the legal effect of living wills. Currently, the law concerning living wills is primarily a matter of state law and differs from state to state. Living wills are typically included with a patient's medical records. Many states require physicians and other health care providers to follow the provisions of a valid living will. Because living wills are

Figure 1 Living Will

LIVING WILL DECLARATION*

Declaration made this ____ day of ____ (month, year). I, _____, being at least eighteen (18) years of age and of sound mind, willfully and voluntarily make known my desires that my dying shall not be artificially prolonged under the circumstances set forth below, and I declare:

If at any time my attending physician certifies in writing that: (1) I have an incurable injury, disease, or illness; (2) my death will occur within a short time; and (3) the use of life prolonging procedures would serve only to artificially prolong the dying process, I direct that such procedures be withheld or withdrawn, and that I be permitted to die naturally with only the performance or provision of any medical procedure or medication necessary to provide me with comfort care or to alleviate pain, and, if I have so indicated below, the provision of artificially supplied nutrition and hydration. (Indicate your choice by initialing or making your mark before signing this declaration):

I wish to receive artificially supplied nutrition and hydration, even if the effort to sustain life is futile or excessively burdensome to me.

I do not wish to receive artificially supplied nutrition and hydration, if the effort to sustain life is futile or excessively burdensome to me.

I intentionally make no decision concerning artificially supplied nutrition and hydration, leaving the decision to my health care representative appointed under IC 16-36-1-7 or my attorney in fact with health care powers under IC 30-5-5.

In the absence of my ability to give directions regarding the use of life prolonging procedures, it is my intention that this declaration be honored by my family and physician as the final expression of my legal right to refuse medical or surgical treatment and accept the consequences of the refusal.

I understand the full import of this declaration.

Signed: _____

City, County, and State of Residence

The declarant has been personally known to me, and I believe (him/her) to be of sound mind. I did not sign the declarant's signature above for or at the direction of the declarant. I am not a parent, spouse, or child of the declarant. I am not entitled to any part of the declarant's estate or directly financially responsible for the declarant's medical care. I am competent and at least eighteen (18) years of age.

*From Ind. Code § 16-36-4-10 (1999).

created by statute, it is important that all terms and conditions of one's state statute be followed. Figure 1 shows an example of a living will form.

Durable Power of Attorney Another technique of planning for the eventuality that one may be unable to make decisions for oneself is to execute a document that gives another person the legal authority to act on one's behalf in the case of mental or physical incapacity. This document is called a **durable power of attorney**.

A *power of attorney* is an express statement in which one person (the **principal**) gives another person (the **attorney in fact**) the authority to do an act or series of

acts on his behalf. For example, Andrews enters into a contract to sell his house to Willis, but he must be out of state on the date of the real estate closing. He gives Paulsen a power of attorney to attend the closing and execute the deed on his behalf. Ordinary powers of attorney terminate upon the principal's incapacity. By contrast, the *durable power of attorney* is not affected if the principal becomes incompetent.

A durable power of attorney permits a person to give someone else extremely broad powers to make decisions and enter transactions such as those involving real and personal property, bank accounts, and health care, and to specify that those powers will not terminate upon incapacity. The durable power of attorney is an extremely

important planning device. For example, a durable power of attorney executed by an elderly parent to an adult child at a time in which the parent is competent would permit the child to take care of matters such as investments, property, bank accounts, and hospital admission. Without the durable power of attorney, the child would be forced to apply to a court for a guardianship, which is a more expensive and often less efficient manner in which to handle personal and business affairs.

Durable Power of Attorney for Health Care

The majority of states have enacted statutes specifically providing for **durable powers of attorney for health care** (sometimes called **health care representatives**). This is a type of durable power of attorney in which the principal specifically gives the attorney in fact the authority to make certain health care decisions for him if the principal should become incompetent. Depending on state law and the instructions given by the principal to the attorney in fact, this could include decisions such as consenting or withholding consent to surgery, admitting the principal to a nursing home, and possibly withdrawing or prolonging life support. Note that the durable power of attorney becomes relevant only in the event that the principal becomes incompetent. So long as the principal is competent, he retains the ability to make his own health care decisions. This power of attorney is also revocable at the will of the principal. The precise requirements for creation of the durable power of attorney differ from state to state, but all states require a written and signed document executed with specified formalities, such as witnessing by disinterested witnesses.

Federal Law and Advance Directives

A federal statute, The Patient Self-Determination Act,² requires health care providers to take active steps to educate people about the opportunity to make advance decisions about medical care and the prolonging of life and to record the choices that they make. This statute, which became effective in 1991, requires health care providers such as hospitals, nursing homes, hospices, and home health agencies, to provide written information to adults receiving medical care about their rights concerning the ability to accept or refuse medical or surgical treatment, the health care provider's policies concerning those rights, and their right to formulate advance directives.

²42 U.S.C. section 1395cc (1990).

The act also requires the provider to document in the patient's medical record whether the patient has executed an advance directive, and it forbids discrimination against the patient based on the individual's choice regarding an advance directive. In addition, the provider is required to ensure compliance with the requirements of state law concerning advance directives and to educate its staff and the community on issues concerning advance directives.

Intestacy

If a person dies without making a will, or if he makes a will that is declared invalid, he is said to have died **intestate**. When that occurs, his property will be distributed to the persons designated as the intestate's heirs under the appropriate state's **intestacy** or **intestate succession** statute. The intestate's real property will be distributed according to the intestacy statute of the state in which the property is located. His personal property will be distributed according to the intestacy statute of the state in which he was **domiciled** at the time of his death. A domicile is a person's permanent home. A person can have only one domicile at a time. Determinations of a person's domicile turn on facts that tend to show that person's intent to make a specific state his permanent home.

Characteristics of Intestacy Statutes

The provisions of intestacy statutes are not uniform. Their purpose, however, is to distribute property in a way that reflects the *presumed intent* of the deceased—that is, to distribute it to the persons most closely related to him. In general, such statutes first provide for the distribution of most or all of a person's estate to his surviving spouse, children, or grandchildren. If no such survivors exist, the statutes typically provide for the distribution of the estate to parents, siblings, or nieces and nephews. If no relatives at this level are living, the property may be distributed to surviving grandparents, uncles, aunts, or cousins. Generally, persons with the same degree of relationship to the deceased person take equal shares. If the deceased had no surviving relatives, the property **escheats** (goes) to the state.

Figure 2 shows an example of a distribution scheme under an intestacy statute.

In the following *Estate of McDaniel v. McDaniel* case, you will see a court's determination of who should inherit from a person who died intestate.

Figure 2 Example of a Distribution Scheme under an Intestacy Statute

| Person Dying Intestate Is Survived By | Result |
|--|--|
| 1. Spouse* and child or issue of a deceased child | Spouse $\frac{1}{2}$, Child $\frac{1}{2}$ |
| 2. Spouse and parent(s) but no issue | Spouse $\frac{3}{4}$, Parent $\frac{1}{4}$ |
| 3. Spouse but no parent or issue | All of the estate to spouse |
| 4. Issue but no spouse | Estate is divided among issue |
| 5. Parent(s), brothers, sisters, and/or issue of deceased brothers and sisters but no spouse or issue | Estate is divided among parent(s), brothers, sisters, and issue of deceased brothers and sisters |
| 6. Issue of brothers and sisters but no spouse, issue, parents, brothers, and sisters | Estate is divided among issue of deceased brothers and sisters |
| 7. Grandparents, but no spouse, issue, parents, brothers, sisters, or issue of deceased brothers and sisters | All of the estate goes to grandparents |
| 8. None of the above | Estate goes to the state |

*Note, however, second and subsequent spouses who had no children by the decedent may be assigned a smaller share.

Estate of McDaniel v. McDaniel

73 Cal. Rptr. 3d 907 (Cal. Ct. App. 2008)

Troy and Marie McDaniel were married in August 2003. Their marriage was troubled, and Marie filed a petition for dissolution of the marriage in October 2004. Troy filed his response to the petition in April 2005. In May 2005, Marie and Troy each executed an “Interspousal Transfer Grant Deed,” in which they released their interest in the other party’s property. They also waived their right to appeal. On July 25, 2005, the court entered a stipulated judgment dissolving the marriage and ordering that the marital partnership be terminated and the parties be restored to the status of single persons effective October 29, 2005.

Nevertheless, Marie and Troy were apparently attempting to reconcile and end the dissolution proceedings before the marital partnership finally terminated on October 29, 2005. Both Marie and Troy attended counseling, and Marie attended Alcoholics Anonymous meetings with Troy. In April 2005, they each signed a private agreement providing that Marie would seek to vacate a restraining order against Troy, that they would attend counseling, that they would continue their marriage, and that they would keep their dissolution action open, “both knowing that we can cancel and dismiss anytime before the final date of termination.” Troy and Marie also signed, but did not date or file, a request for dismissal of the dissolution action. According to Marie, they had intended to file the request after Troy attended a hearing on a criminal matter related to their marital differences on September 29.

Troy died in a motorcycle accident on September 23; however, and the request for dismissal of the dissolution action was never filed. Troy’s mother, Marianne, filed a petition for entitlement of distribution of Troy’s estate. Her petition alleged that Troy had died intestate, that he did not have and had not had any children, and that Marianne and Troy’s father, Lyle, were entitled to have Troy’s estate distributed equally between them. Marie opposed this position, arguing that, despite the dissolution proceeding, she was still Troy’s wife at the time of his death and therefore entitled to inherit his estate.

The trial court held that Marie was not Troy’s “surviving spouse” within the meaning of the Probate Code at the time of his death, and she was not entitled to inherit from his estate. The court granted Marianne’s petition for distribution. Marie appealed.

Hull, Judge

Section 78, subdivision (d) provides that a “surviving spouse” for purposes of the Probate Code does not include “[a] person who was a party to a valid proceeding concluded by an order purporting to terminate all marital property rights.” It is apparent that the parties divided their community property, confirmed their individual share of what was formerly community

property as separate property, and waived spousal support, thus accounting for and terminating their marital property rights. It is equally apparent that, given the waiver of their right to appeal, the judgment dividing their marital property became final when entered by the court on July 25, 2005, and that the proceedings regarding their marital property were then concluded. Under the circumstances, we find that Marie was, by the time

of Troy's death, "a party to a valid proceeding concluded by an order purporting to terminate all marital property rights" within the meaning of section 78, subdivision (d).

We find support for our holding in *Estate of Lahey*. In *Lahey*, Frances and Clarence Lahey were married in 1984 and they separated in March 1995. In April 1995 Frances petitioned for a legal separation alleging that there were no community debts or assets, waiving spousal support, and requesting that the court terminate any right of spousal support for Clarence. The court entered an order to that effect in July 1995. Clarence died intestate in December 1996 and Frances claimed one-half of his estate as the surviving spouse. While recognizing that a judgment of legal separation left the bonds of marriage intact, the Court of Appeal pointed out that a surviving spouse for purposes of intestate succession is different from a husband or wife of a decedent. The question before the *Lahey* court was whether the judgment of legal separation constituted an order purporting to terminate marital property rights within the meaning of section 78, subdivision (d). The court, noting that a judgment of legal separation is a final adjudication of the parties' property rights and is conclusive as to those rights, held that it did. There is no principled basis to reach a different result here.

Marie concedes that to the extent the judgment expressly divided marital property rights and recited the parties' agreement to waive spousal support, the judgment was final as to those matters at the time it was entered. But she attempts to avoid the effect of section 78, subdivision (d) by arguing that, although the July 25 judgment may have settled property rights, it did not settle inheritance rights. She enlists the support of a number of older cases—all of which were decided before the enactment of section 78, subdivision (d)—that construe the breadth of marital settlement agreements and decide whether those

agreements were intended by the parties to determine inheritance rights. In this, Marie misses the mark. "Nothing in the language or meaning of [section 78, subdivision (d)] requires . . . an express termination of inheritance rights, for the obvious effect of the statute itself is to terminate the inheritance rights of such a spouse." *Lahey, supra*.

We agree with that reading of the statute. In whatever manner spousal inheritance rights might be determined under other circumstances, under the circumstances presented here, section 78, subdivision (d) determines such rights, denying them to a person in Marie's position because she is not deemed a surviving spouse within the meaning of the Probate Code and is therefore ineligible to inherit all or any of Troy's estate.

To the extent that Marie relies for relief on the provisions of Family Code section 2339, we must reject that argument also. That section provides that "no judgment of dissolution is final for the purpose of terminating the marriage relationship of the parties until six months have expired from the date of service of a copy of summons and petition or the date of appearance of the respondent, whichever occurs first." Both parties agree, and the judgment states, that Marie and Troy's marital status did not terminate, nor were they to be restored to the status of single persons until October 29, 2005. But Marie's reliance on Family Code section 2339 ignores the difference between her legal status as Troy's wife at the time of his death and her legal status as a "surviving spouse" at the time of his death. She was at that time legally his wife but she was not his surviving spouse.

Having been a party to a valid proceeding concluded by an order terminating all marital property rights, Marie was not Troy's surviving spouse at the time of his death and she could not share in his estate.

Affirmed in favor of Marianne.

Special Rules Under intestacy statutes, a person must have a relationship to the deceased person through blood or marriage in order to inherit any part of his property. State law includes adopted children within the definition of "children," and treats adopted children in the same way as it treats biological children. Normally adopted children inherit from their adoptive families and not from their biological families, although some state's laws may allow them to inherit from both. Half brothers and half sisters are usually treated in the same way as brothers and sisters related by whole blood. An illegitimate child may inherit from his mother, but as a general rule, illegitimate children do not inherit from their fathers

unless paternity has been either acknowledged or established in a legal proceeding.

A person must be alive at the time the decedent dies to claim a share of the decedent's estate. An exception may be made for pretermitted children or other descendants who are born *after* the decedent's death. If a person who is entitled to a share of the decedent's estate survives the decedent but dies before receiving his share, his share in the decedent's estate becomes part of his own estate.

Simultaneous Death A statute known as the Uniform Simultaneous Death Act provides that where two persons who would inherit from each other (such as

husband and wife) die under circumstances that make it difficult or impossible to determine who died first, each person's property is to be distributed as though he or she survived. This means, for example, that the husband's property will go to his relatives and the wife's property to her relatives.

Administration of Estates

When a person dies, an orderly procedure is needed to collect his property, settle his debts, and distribute any remaining property to those who will inherit it under his will or by intestate succession. This process occurs under the supervision of a probate court and is known as the **administration process** or the **probate process**. Summary (simple) procedures are sometimes available when an estate is relatively small—for example, when it has assets of less than \$7,500.

The Probate Estate The probate process operates only on the decedent's property that is considered to be part of his **probate estate**. The probate estate is that property belonging to the decedent at the time of his death other than property held in joint ownership with right of survivorship, proceeds of insurance policies payable to a trust or a third party, property held in a revocable trust during the decedent's lifetime in which a third party is the beneficiary, or retirement benefits, such as pensions, payable to a third party. Assets that pass by operation of law and assets that are transferred by other devices such as trusts or life insurance policies do not pass through probate.

Note that the decedent's probate estate and his *taxable estate* for purposes of federal estate tax are two different concepts. The taxable estate includes all property owned or controlled by the decedent at the time of his death. For example, if a person purchased a \$1 million life insurance policy made payable to his spouse or children, the policy would be included in his taxable estate, but not in his probate estate.

Determining the Existence of a Will

The first step in the probate process is to determine whether the deceased left a will. This may require a search of the deceased person's personal papers and safe-deposit box. If a will is found, it must be *proved* to be admitted to probate. This involves the testimony of the persons who witnessed the will, if they are still alive. If the witnesses are no longer alive, the signatures of the witnesses and the testator will have to be established in some other way. In many states and under UPC section 2–504,

a will may be proved by an affidavit (declaration under oath) sworn to and signed by the testator and the witnesses at the time the will was executed. This is called a **self-proving affidavit**. If a will is located and proved, it will be admitted to probate and govern many of the decisions that must be made in the administration of the estate.

Selecting a Personal Representative

Another early step in the administration of an estate is the selection of a personal representative to administer the estate. If the deceased left a will, it is likely that he designated his personal representative in the will. The personal representative under a will is also known as the **executor**. Almost anyone could serve as an executor. The testator may have chosen, for example, his spouse, a grown child, a close friend, an attorney, or the trust department of a bank.

If the decedent died intestate, or if the personal representative named in a will is unable to serve, the probate court will name a personal representative to administer the estate. In the case of an intestate estate, the personal representative is called an **administrator**. A preference is usually accorded to a surviving spouse, child, or other close relative. If no relative is available and qualified to serve, a creditor, bank, or other person may be appointed by the court.

Most states require that the personal representative *post a bond* in an amount in excess of the estimated value of the estate to ensure that her duties will be properly and faithfully performed. A person making a will often directs that his executor may serve without posting a bond, and this exemption may be accepted by the court.

Responsibilities of the Personal Representative

The personal representative has a number of important tasks in the administration of the estate. She must see that an inventory is taken of the estate's assets and that the assets are appraised. Notice must then be given to creditors or potential claimants against the estate so that they can file and prove their claims within a specified time, normally five months. As a general rule, the surviving spouse of the deceased person is entitled to be paid an allowance during the time the estate is being settled. This allowance has priority over other debts of the estate. The personal representative must see that any properly payable funeral or burial expenses are paid and that the creditors' claims are satisfied.

Both federal and state governments impose estate or inheritance taxes on estates of a certain size. The personal representative is responsible for filing estate tax

returns. The federal tax is a tax on the deceased's estate, with provisions for deducting items such as debts, expenses of administration, and charitable gifts. In addition, an amount equal to the amount left to the surviving spouse may be deducted from the gross estate before the tax is computed. State inheritance taxes are imposed on the person who receives a gift or statutory share from an estate. It is common, however, for wills to provide that the estate will pay all taxes, including inheritance taxes, so that the beneficiaries will not have to do so. The personal representative must also make provisions for filing an income tax return and for paying any income tax due for the partial year prior to the decedent's death.

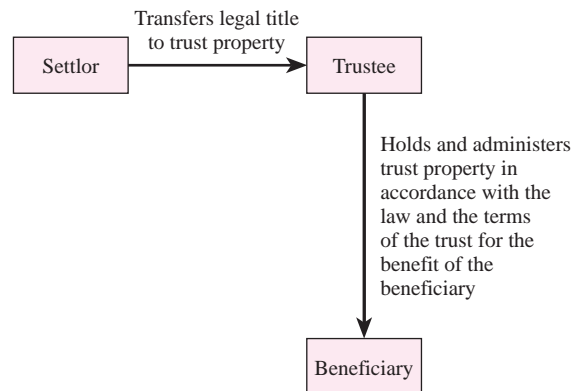

When the debts, expenses, and taxes have been taken care of, the remaining assets of the estate are distributed to the decedent's heirs (if there was no will) or to the beneficiaries of the decedent's will. Special rules apply when the estate is too small to satisfy all of the bequests made in a will or when some or all of the designated beneficiaries are no longer living.

When the personal representative has completed all of these duties, the probate court will close the estate and discharge the personal representative.

Trusts

Nature of a Trust A **trust** is a legal relationship in which a person who has legal title to property has the duty to hold it for the use or benefit of another person. The person benefited by a trust is considered to have **equitable title** to the property, because it is being maintained for his benefit. This means that he is the real owner even though the trustee has the legal title in his or her name. A trust can be created in a number of ways. An owner of property may *declare* that he is holding certain property in trust. For example, a mother might state that she is holding 100 shares of General Motors stock in trust for her daughter. A trust may also arise *by operation of law*. For example, when a lawyer representing a client injured in an automobile accident receives a settlement payment from an insurance company, the lawyer holds the settlement payment as trustee for the client. Most commonly, however, trusts are created through *express instruments* whereby an owner of property transfers title to the property to a trustee who is to hold, manage, and invest the property for the benefit of either the original owner or a third person. For example, Long transfers certain stock to First Trust Bank with instructions to pay the income to his daughter during her lifetime and to distribute the stock to her children after her death.

Figure 3 Trust

Trust Terminology A person who creates a trust is known as a **settlor** or **trustor**. The person who holds the property for the benefit of another person is called the **trustee**. The person for whose benefit the property is held in trust is the **beneficiary**. Figure 3 illustrates the relationship between these parties. A single person may occupy more than one of these positions; however, if there is only one beneficiary, he cannot be the sole trustee. The property held in trust is called the **corpus** or **res**. A distinction is made between the property in trust, which is the principal, and the income that is produced by the principal.

A trust that is established and effective during the settlor's lifetime is known as an **inter vivos trust**. A trust can also be established in a person's will. Such trusts take effect only at the death of the settlor. They are called **testamentary trusts**.

Why People Create Trusts Bennett owns a portfolio of valuable stock. Her husband has predeceased her. She has two children and an elderly father for whom she would like to provide. Why might it be advantageous to Bennett to transfer the stock to a trust for the benefit of the members of her family?

First, there may be income tax or estate tax advantages in doing so, depending on the type of trust she establishes and the provisions of that trust. For example, she can establish an irrevocable trust for her children and remove the property transferred to her trust from her estate so that it is not taxable at her death. In addition, the trust property can be used for the benefit of others and may even pass to others after the settlor's death without the necessity of having a will. Many people prefer to pass their property by trust rather than by will because

trusts afford more privacy: unlike a probated will, they do not become an item of public record. Trusts also afford greater opportunity for postgift management than do outright gifts and bequests. If Bennett wants her children to enjoy the income of the trust property during their young adulthood without distributing unfettered ownership of the property to them before she considers them able to manage it properly, she can accomplish this through a trust provision. A trust can prevent the property from being squandered or spent too quickly. Trusts can be set up so that a beneficiary's interest cannot be reached by his creditors in many situations. Such trusts, called **spendthrift trusts**, will be discussed later.

Placing property in trust can operate to increase the amount of property held for the beneficiaries if the trustee makes good investment decisions. Another important consideration is that a trust can be used to provide for the needs of disabled beneficiaries who are not capable of managing funds.

Creation of Express Trusts There are five basic requirements for the creation of a valid express trust, although special and somewhat less restrictive rules govern the establishment of charitable trusts. The requirements for forming an express trust are:

1. Capacity. The settlor must have had the **legal capacity** to convey the property to the trust. This means that the settlor must have had the capacity needed to make a valid contract if the trust is an *inter vivos* trust or the capacity to make a will if the trust is a testamentary trust. For example, a trust would fail under this requirement if at the time the trust was created, the settlor had not attained the age required by state law for the creation of valid wills and contracts (age 18 in most states).

2. Intent and formalities. The settlor must *intend* to create a trust at the present time. To impose enforceable duties on the trustee, the settlor must meet certain formalities. Under the laws of most states, for example, the trustee must accept the trust by signing the trust instrument. In the case of a trust of land, the trust must be in writing so as to meet the statute of frauds. If the trust is a testamentary trust, it must satisfy the formal requirements for wills.

3. Conveyance of specific property. The settlor must convey *specific property* to the trust. The property conveyed must be property that the settlor has the *right to convey*.

4. Proper purpose. The trust must be created for a *proper purpose*. It cannot be created for a reason that is contrary to public policy, such as the commission of a crime.

5. Identity of the beneficiaries. The *beneficiaries* of the trust must be described clearly enough so that their identities can be ascertained. Sometimes, beneficiaries may be members of a specific class, such as “my children.”

Charitable Trusts A distinction is made between private trusts and trusts created for charitable purposes. In a private trust, property is devoted to the benefit of specific persons, whereas in a charitable trust, property is devoted to a charitable organization or to some other purposes beneficial to society. While some of the rules governing private and charitable trusts are the same, a number of these rules are different. For example, when a private trust is created, the beneficiary must be known at the time or ascertainable within a certain time (established by a legal rule known as the **rule against perpetuities**). However, a charitable trust is valid even though no definitely ascertainable beneficiary is named and even though it is to continue for an indefinite or unlimited period.

Doctrine of Cy Pres A doctrine known as **cy pres** is applicable to charitable trusts when property is given in trust to be applied to a particular charitable purpose that becomes impossible, impracticable, or illegal to carry out. Under the doctrine of *cy pres*, the trust will not fail if the settlor indicated a general intention to devote the property to charitable purposes. If the settlor has not specifically provided for a substitute beneficiary, the court will direct the application of the property to some charitable purpose that falls within the settlor's general charitable intention.

Totten Trusts A **Totten trust** is a deposit of money in a bank or other financial institution in the name of the depositor *as trustee* for a named beneficiary. For example, Bliss deposits money in First Bank in trust for his daughter, Bessie. The Totten trust creates a revocable living trust. At Bliss's death, if he has not revoked this trust, the money in the account will belong to Bessie.

Powers and Duties of the Trustee In most express trusts, the settlor names a specific person to act as trustee. If the settlor does not name a trustee, the court will appoint one. Similarly, a court will replace a trustee who resigns, is incompetent, or refuses to act.

The trust codes of most states contain provisions giving trustees broad management powers over trust property. These provisions can be limited or expanded by express provisions in the trust instrument. The trustee must use a *reasonable degree of skill, judgment, and care* in the exercise of his duties unless he holds himself out as having a greater degree of skill, in which case he will be

held to a higher standard. Section 7–302 of the UPC provides that the trustee is held to the standard of a prudent person dealing with the property of another, and if he has special skills or is named trustee based on a representation of special skills, he is required to use those special skills. He *may not commingle* the property he holds in trust with his own property or with that of another trust.

A trustee owes a *duty of loyalty* (fiduciary duty) to the beneficiaries. This means that he must administer the trust for the benefit of the beneficiaries and avoid any conflict between his personal interests and the interest of the trust. For example, a trustee cannot do business with a trust that he administers without express permission in the trust agreement. He must not prefer one beneficiary's interest to another's, and he must account to the beneficiaries for all transactions. Unless the trust agreement provides otherwise, the trustee must make the trust productive. He may not delegate the performance of discretionary duties (such as the duty to select investments) to another, but he may delegate the performance of ministerial duties (such as the preparation of statements of account).

A trust may give the trustee discretion as to the amount of principal or income paid to a beneficiary. In such a case, the beneficiary cannot require the trustee to exercise his discretion in the manner desired by the beneficiary.

Allocating between Principal and Income One of the duties of the trustee is to distribute the principal and income of the trust in accordance with the terms of the trust instrument. Suppose Wheeler's will created a testamentary trust providing that his wife was to receive the income from the trust for life, and at her death, the trust property was to be distributed to his children. During the duration of the trust, the trust earns profits, such as interest or rents, and has expenses, such as taxes or repairs. How should the trustee allocate these items as between Wheeler's surviving spouse, who is an **income beneficiary**, and his children, who are **remaindermen**?

The terms of the trust and state law bind the trustee in making this determination. As a general rule, ordinary profits received from the investment of trust property are allocated to income. For example, interest on trust property or rents earned from leasing real property held in trust would be allocated to income. Ordinary expenses such as insurance premiums, the cost of ordinary maintenance and repairs of trust property, and property taxes, would be chargeable to income. The principal of the trust includes the trust property itself and any extraordinary receipts, such as proceeds or gains derived from the sale of trust property. Extraordinary expenses—for example,

the cost of long-term permanent improvements to real property or expenses relating to the sale of property—would ordinarily be charged against principal.

Liability of Trustee A trustee who breaches any of the duties of a trustee or whose conduct falls below the standard of care applicable to trustees may incur personal liability. For example, if the trustee invests unwisely and imprudently, the trustee may be personally liable to reimburse the trust estate for the shortfall. The language of the trust affects the trustee's liability and the level of care owed by the trustee. A settlor might, for example, include language lowering the trustee's duty of care or relieving the trustee of some liability that he might otherwise incur.

The trustee can also have liability to third persons who are injured by the operation of the trust. Because a trust is not in itself a legal entity that can be sued, a third party who has a claim (such as a tort claim or a claim for breach of contract) must file his claim against the trustee of the trust. The trustee's actual personal liability to a third party depends on the language of the trust and of any contracts he might enter on behalf of the trust as well as the extent to which the injury complained of by the third party was a result of the personal fault or omission of the trustee.

Spendthrift Trusts Generally, the beneficiary of a trust may voluntarily assign his rights to the principal or income of the trust to another person. In addition, any distributions to the beneficiary are subject to the claims of his creditors. Sometimes, however, trusts contain provisions known as **spendthrift clauses**, which restrict the voluntary or involuntary transfer of a beneficiary's interest. Such clauses are generally enforced, and they preclude assignees or creditors from compelling a trustee to recognize their claims to the trust. The enforceability of such clauses is subject to four exceptions, however:

1. A person cannot put his own property beyond the claims of his own creditors. Thus, a spendthrift clause is not effective in a trust when the settlor makes himself a beneficiary.
2. Divorced spouses and minor children of the beneficiary can compel payment for alimony and child support.
3. Creditors of the beneficiary who have furnished necessities can compel payment.
4. Once the trustee distributes property to a beneficiary, it can be subject to valid claims of others.

The following *Kulp* case illustrates a situation in which a court holds a spendthrift trust subject to a creditor's claims.

Kulp v. Timmons

2002 Del. Ch. LEXIS 94 (Del. Ct. of Chancery 2002)

Before 1985, Franklin Timmons and his wife, Kathryn, owned property adjacent to Pepper Creek in Sussex County, Delaware. The property included farmland, the Timmonses' residence, and a marina called the "Boatyard," where Timmons operated the family business. The above-described land was the only real property that Timmons owned, and was the only capital asset that supported the family business. Timmons's primary income was derived from the Boatyard. At the Boatyard, Timmons rented out boat slips, assessed dry dock fees, maintained and repaired boats, and performed the day-to-day operations of the marina. According to Timmons, the business operated at a loss, but there are no records to prove that. In 1977, Timmons was sued by Charles Cannon on transactions that involved the Boatyard. Cannon was awarded a \$7,700 judgment against Timmons in 1980, but Timmons never paid the judgment, claiming that he lacked sufficient funds. In 1985, Timmons and Kathryn established a Joint Irrevocable Living Trust. Timmons and Kathryn conveyed to the Trust the farm and the Boatyard, which comprised all the real property that they owned and the only significant assets that were capable of responding to a creditor judgment. Under the terms of the Trust, Timmons, Kathryn, and their son, Jimmy, were named as trustees. The Trust instrument gave trustees discretion to invade the trust principal and to sell the land for their own benefit.

Although his property was now held by the Trust, Timmons never viewed the Trust as limiting his ability to use the land for himself or to rent it to others. Timmons believed that he could continue to live on the land, operate his business on it, and use the land as his own, as he had done in the past. Two additional documents were executed in connection with the Trust instrument. The first was a partnership agreement, which created a partnership between Timmons and his son, Jimmy, for the purpose of operating the Boatyard. The Partnership Agreement identified Kathryn and Jimmy—but not Timmons—as partners. The second document was a lease that called for the payment of a monthly rent for using the Boatyard, but left the specific rental amount blank. Although it was understood that the rental amount would be inserted after Timmons secured an appraisal of the Boatyard's fair market value, no rental amount was ever inserted and no rent was ever paid. Nor, insofar as the record shows, did the Trust engage in any trust activity after it was formed. Other than filing tax returns, the Trust had no financial records for any year other than 1988, or any checking or banking account; and it received no rent or other income from Timmons's use of the land. In addition, although Kathryn was the Boatyard's bookkeeper, the Trust never took any action evidenced by a formal writing.

In 1985, six months after the Trust was created, Norman Kulp, Timmons's employee, was severely injured while working at the Boatyard when Timmons instructed him to remove a gas tank from a boat docked at the Boatyard. Timmons told Kulp that he, Timmons, had personally ventilated the tank and that Jimmy would help Kulp remove it. In fact, the tank had not been emptied and Kulp was left to perform that task alone. The tank exploded and Kulp was burned over one-third of his body. Timmons did not carry workers' compensation insurance, and he did not reimburse any of Kulp's medical expenses. Kulp filed a petition for compensation due with the Industrial Accident Board (IAB) under the Delaware Workers' Compensation Act, and the IAB ordered Timmons to post a \$150,000 bond and to pay Kulp's medical expenses and other benefits. Timmons did not comply with the IAB order, and several years of litigation ensued.

Timmons's son, Jimmy, died in October 1994, and Timmons's wife, Kathryn, died two years later. As a consequence, Timmons became the sole settlor, trustee, and lifetime beneficiary of the Trust. Kulp's IAB award still remained unpaid, which prompted the filing of a Superior Court proceeding to enforce payment of that award. In 1997, the Superior Court entered a money judgment in favor of Kulp, doubling the initial IAB award to \$194,316.74 to compensate Kulp for the delay in payment. The Superior Court concluded, however, that it did not have the power to compel Timmons to pledge, sell, or encumber the assets held by the Trust to satisfy the judgment. In response to the Court's suggestion that Kulp's remedy would lie in equity, Kulp brought this action in this Court for a determination that the Trust was invalid and that its assets were subject to execution process. Less than one month after this action was filed, Timmons conveyed all his personal property to his daughter-in-law, Beverly, and his granddaughter, Brandi. Thereafter, Beverly and Brandi conveyed a life estate in the conveyed property to Timmons. Timmons argued that as a consequence of that conveyance, and the transfer of his (and his wife's) assets to the Trust in 1985, he has no assets from which to satisfy the judgment. Kulp moved for summary judgment.

Jacobs, Vice Chancellor

As a general matter, creditors may not reach property held in a spendthrift trust to satisfy their claims against the beneficial

owner. That rule, however, is not absolute. The Court first considers whether the Trust is invalid under Delaware's spendthrift trust statute. Section 3536 (a) articulates the rights of

creditors to reach assets held in spendthrift trusts as follows: The creditors of a beneficiary of a trust shall have only such rights against such beneficiary's interest in the trust property or the income therefrom as shall not be denied to them by the terms of the instrument creating or defining the trust or by the laws of this State. *If such beneficiary has transferred property to the trust in defraud of the beneficiary's creditors the foregoing shall in no way limit the rights of such creditors with respect to the property so transferred.* Thus, the statute expressly permits a trust to be invalidated if it is shown that the transfer of the property to the trust operated as a fraud on the beneficiary's creditors. If a fraud is shown, the trust is void, and a creditor of the beneficiary may reach its assets to satisfy the creditor's judgment claim.

Delaware courts have held that the test of a fraudulent conveyance of property involves a two-step analysis: first, a determination of whether the transfer was made for less than fair consideration; and second, a determination of whether the transferor was rendered insolvent as a result of the transfer. Del. C. Section 1302, as it existed when the Trust was created in 1985, stated that a person is insolvent "when the fair salable value of his assets is less than the amount that will be required to pay his probable liability on his existing debts as they become absolute and matured." In this case, the absence of financial records and other documentation precludes the Court from determining, as an evidentiary matter, whether in fact Timmons was insolvent at the time of the asset transfer. Nor does the record evidence show whether the Boatyard was transferred to the Trust for fair consideration. All the record does show is that Timmons transferred the Boatyard to a Trust controlled by himself, his wife, and his son. Where, as here, a transfer of assets occurs between relatives, collusion is difficult to prove, and therefore "a rebuttable presumption of fraud arises." That presumption requires the party asserting the validity of the transfer to show either that he was solvent after the transfer or that fair consideration was paid. Timmons has not shown either, nor has he offered any evidence on either of those issues. What evidence there is shows an intent to defraud past and future creditors. At the time the Trust was created, Cannon's judgment was outstanding and Timmons had never paid it, even though he had the resources to do so. Moreover, the Trust served no discernable economic purpose. The Trust engaged in no recorded economic activity; no rent was paid to the Trust for the use of the Boatyard; and no formal action evidenced by a writing by the Trust was ever taken. In short, Timmons has presented no evidence that rebuts the presumption that the creation and the transfer of his (and his wife's) assets to the Trust was a fraud. I conclude therefore that the Trust is invalid and has been from the outset, and must be set aside, on the basis of the fraud exception of Section 3536 (a).

In addition to, and apart from, the statute, the Trust is void because the statute does not displace the applicable principles of common law, and because under those principles the Trust is void as well. The Delaware case law has not delineated in any comprehensive "bright line" fashion the universe of common law grounds upon which a trust can be invalidated and made subject to claims of the beneficiary's creditors. The decisions do, however, clearly reflect a basic principle: our courts will not give effect to a spendthrift trust that has no economic reality and whose only function is to enable the settlor to control and enjoy the trust property without limitations or restraints, as was done before the trust was created. Apart from cases involving fraud, that principle has found expression under at least two different doctrines. Some cases express that result in terms of public policy. In such cases, our courts have denied effect to a trust agreement provision that prohibits the beneficiary's alienation of trust income or assets, where the beneficiary is also the settlor. Where, as here, the settlor or trustee is also the beneficiary, the spendthrift trust will be invalidated, because public policy does not permit one to create a spendthrift trust with his own property for his own benefit. That is because where (as here) the trustee controls the assets and income of the trust for his own benefit, unconstrained by any fiduciary duties owed to others, the purpose of a spendthrift trust—to protect the beneficiary from his or her own improvidence—is lost. The evidence of record—undisputed by Timmons—amply supports the conclusion that at all times Timmons had—and exercised—the power to use the Trust assets as his own. The Trust instruments authorize Timmons to expend the entire corpus of the Trust at his discretion, for his own benefit and without any limitation or restriction. Timmons acknowledged that after he conveyed the property to the Trust he expected to continue to use the land as he had in the past. Timmons also admitted that he did not believe the Trust limited in any way his ability to rent the property to someone else. Further supportive of the invalidity of the Trust on public policy grounds is the fact that the Trust has no economic reality and from the outset was a sham. Most telling is the fact that the mortgage payments were made from Timmons's *personal* income (not from Trust assets), and the income from boat maintenance and repairs was reported as income to Timmons *personally*, rather than as income to the Trust. That shows that Timmons never intended for the Trust to have any economic function other than as a vehicle to avoid paying his debts. On this basis alone, the Trust is void and the Trust assets are subject to Kulp's claim as a judgment. On all of these grounds, the Trust is void under the principles of Delaware common law, and Kulp may reach the Trust's assets to satisfy his judgment claim.

Summary judgment granted in favor of Kulp.

Termination and Modification of a Trust

Normally, a settlor cannot revoke or modify a trust unless he reserves the power to do so at the time he establishes the trust. However, a trust may be modified or terminated with the consent of the settlor and all of the beneficiaries. When the settlor is dead or otherwise unable to consent, a trust can be modified or terminated by consent of all the persons with a beneficial interest, but only when this would not frustrate a material purpose of the trust. Because trusts are under the supervisory jurisdiction of a court, the court can permit a deviation from the terms of a trust when unanticipated changes in circumstances threaten accomplishment of the settlor's purpose.

Implied and Constructive Trusts Under exceptional circumstances in which the creation of a trust is necessary to effectuate a settlor's intent or avoid unjust enrichment, the law *implies* or imposes a trust even though no express trust exists or an express trust exists but has failed. One trust of this type is a **resulting trust**, which arises when there has been an incomplete

disposition of trust property. For example, if Hess transferred property to Wickes as trustee to provide for the needs of Hess's grandfather and the grandfather died before the trust funds were exhausted, Wickes will be deemed to hold the property in a resulting trust for Hess or Hess's heirs. Similarly, if Hess had transferred the property to Wickes as trustee and the trust had failed because Hess did not meet one of the requirements of a valid trust, Wickes would not be permitted to keep the trust property as his own. A resulting trust would be implied.

A **constructive trust** is a trust created by operation of law to avoid fraud, injustice, or unjust enrichment. This type of trust imposes on the constructive trustee a duty to convey property he holds to another person on the ground that the constructive trustee would be unjustly enriched if he were allowed to retain it. For example, when a person procures the transfer of property by means of fraud or duress, he becomes a constructive trustee and is under an obligation to return the property to its original owner.

Problems and Problem Cases

1. On March 23, 1994, Evelyn Foster died, leaving a house and nearly 400 acres of land in Mercer County along with personal property. She had executed a holographic will, which was offered for probate. The will stated in part:

I—Evelyn Foster—being of sound Mind and Body—do hereby declare—In the event of my death—I herby [*sic*] will the farm-house + contents to go to Judy Foster Monk—any Monies shall be divided equally—after the funeral Expenses—between Greg Foster + Judy Foster Monk—also I do herby [*sic*] request that the Farm *not be sold!* Any personal items shall be equally divided—
Sincerely—
Evelyn Foster

Foster's son claims that Foster willed only a "farm-house + contents" to his sister (Judy) and not the farmland. Is he correct?

2. Meade, a widow with no children, died on May 4, 2002. In March 2001, Meade had executed a typewritten will prepared by an attorney. After Meade's death, the executor named in the will presented it for probate. Gilliam was Meade's niece and had cared for her during the months of her last illness. Gilliam offered for probate a handwritten will that Meade had written and signed subsequent to the typewritten will. It provided:

Will

Jo and Ron Gilliam, my (niece) & her husband said they would take care of me, and not put me in a rest home. They have said if they had to they would move in my home and take care of me.

Grady Lee (brother) \$ 20.00 and my car. Jo Gilliam (niece) & (Ron) husband the rest of my house & furniture except a few items.

Cecil Lee (brother) the rest of my life ins. After burial is pd.

Bertha Mae Cox (niece) mama's old sewing machine, pink wash bowl and pitcher (Xmas dishes), to Jo red ruby ring & diamond necklas [spelling?] ear rings.

Jo Gilliam (niece) all my gold chains, lg. Diamond ring & holder.

Kimberly Dalton (niece) white luggage, sewing machine, pink iron, glasses, stone dishes, & pink crystal. Paul Revere stain-less ware, punch bowl, & lg. dimon [spelling?] ring & band.

David Lee (nephew) rocking chair, luggage, camester [spelling?] & grand ma Lee's quilt. Leslie Tinter (great niece) blue safire [spelling?] rg.

Gary Vicars (gardner) \$ 500.00.

I'll divide the rest of my clothes & jewelry. I want my house to keep in the family & don't change the way it's brick. Just keep it up.

Kathleen (Lee) Meade.

There is no dispute about the authenticity of this document. Gilliam claims that the handwritten will should be received as Meade's last will. Is this a good argument?

3. Roy and Icie Johnson established two revocable *inter vivos* trusts in 1966. The trusts provided that upon Roy's and Icie's deaths, income from the trusts was to be paid in equal shares to their two sons, James and Robert, for life. Upon the death of the survivor of the sons, the trust was to be "*divided equally between all of my grandchildren, per stirpes.*" James had two daughters, Barbara and Elizabeth. Robert had four children, David, Rosalyn, Catherine, and Elizabeth. James and Robert disclaimed their interest in the trust in 1979, and a dispute arose about how the trust should be distributed to the grandchildren. The trustee filed an action seeking instructions on how the trusts should be distributed. What should the court hold?
4. Opal Gefon died in November 2005, and a typewritten will that had been properly witnessed and executed in May 6, 2005, was submitted for probate. Johnson, a great-niece of Gefon, filed a contest of the May 6 instrument, claiming that a holographic will had been executed in October 2005. The court admitted the holographic will for probate, but confusion arose about the meaning of two provisions in the will. One provision used the words "savings and checking account" in the First Team Bank in Heber Springs to the Lost Cherokee of Arkansas and Missouri, Inc., and another referred to "the remainder of my savings and checking to the Native American Indians." At the time of Gefon's death, she had approximately \$205,000 in savings accounts at First Arkansas Bank and Trust and \$226,000 in cash in a safety deposit box at the same bank. Following a hearing, the court entered an order in which it found that Gefon intended that the \$226,000 in cash located in her safety deposit box at the time of her death was part of her "savings" so that the references to "savings and checking account" and "remainder of my savings and checking" in the will included the \$226,000 in cash. The court further found that the phrase "Native American Indians" referred to the Lost Cherokee of Arkansas and Missouri, Inc., and that the phrase, "remainder of my savings and checking" was a residual clause with respect to those funds, and that after any specific bequests were made, the remaining amounts were to be distributed to the Lost Cherokee of Arkansas and Missouri, Inc. Was this a correct ruling?
5. Crawshaw bequeathed the bulk of his estate to two residuary beneficiaries, the Salvation Army and Marymount College. Crawshaw's will provided for 15 percent of the residue to go to the Salvation Army outright and 85 percent to Marymount College in trust. The stated purpose of this trust was to provide loans to nursing and other students at Marymount. Marymount ceased operation on June 30, 1989. It sought to have the trust funds directed to Marymount Memorial Educational Trust Fund. The Salvation Army challenged this, arguing that Crawshaw did not intend to benefit students attending colleges other than Marymount. It asked that the court distribute the trust funds to the Salvation Army as the remaining beneficiary of Crawshaw's residuary estate. What should the court do?
6. Almost a century ago, Henry and Martha Kolb started a family-owned floral business in Storm Lake, Iowa. Both the business and the family grew into prominence. After their grandson, Robert, was tragically killed in a hunting accident, the Kolbs established an agreement with the City of Storm Lake to establish a flower garden in the memory of Robert. The agreement provided for the "establishment, installation and maintenance of a formal flower garden" at a specific location within the city park on the north shore of Storm Lake. The agreement made it clear that the garden was a gift to the city, and that the agreement was to "continue during the period of the trust as created in [Henry's] Will . . . providing for the continued maintenance of said formal flower garden." The trust was later supplemented for the addition of a water fountain in the garden. The Robert James Kolb Memorial Trust Fund was finally established in 1970. Henry and Martha established the trust by deeding a quarter section of farmland they owned to their sons "Robert H. Kolb and Norman J. Kolb, as Trustees for the use and benefit of the City of Storm Lake." The warranty deed stated in pertinent part:

It is the purpose of the grantors to hereby establish the Robert James Kolb Memorial Trust Fund out of the real estate above described and the proceeds derived from the sale thereof and/or the income derived therefrom, or any investments created by said trust fund. . . .

The said trust fund shall be used in connection with improvements needed for the planting and upkeep of flower beds, such as annuals and perennials of all kinds, also flowering bulbs and rose bushes as may be put upon the tract of real estate hereinafter described.

In 1973, Henry and Martha deeded another quarter section of their farmland to their sons, Robert and

Norman, as trustees, “for the use and benefit of the City of Storm Lake” to become a “part of the Robert James Kolb Memorial Trust Fund established by the grantors in the year 1970, in order that this trust and the previously established trust may be handled as a single trust.” Neither warranty deed stated when the trust terminated. The trust operated without much trouble or question for over 30 years under the direction of Robert and Norman as trustees. The reports indicated the income produced from the farmland was more than enough to pay for the trust expenses. The trust disbursements mainly consisted of farm, garden, and fountain expenses, which often equaled \$20,000–\$30,000. On one occasion, however, the trustees used surplus trust funds to help the Storm Lake School District purchase additional school property. This transaction was memorialized in a 1980 agreement between Norman and the school district.

Henry died testate in 1978 and Martha died a short time later. Despite their deaths, the garden and fountain survived for many years with the help of the city’s maintenance and funds provided by the trust. It was a cherished location in Storm Lake, and often provided an ideal spot for weddings and celebrations. In 2003, however, the existence of the garden and fountain was placed in jeopardy. At this time the city was developing plans for an economic revitalization project called “Project Awaysis,” funded with Vision Iowa grant money. The plans sought to turn the city’s park on the north shore of Storm Lake and surrounding areas into a Midwest vacation destination. Among other things, the project was to provide a new public beach, a lighthouse, a family playground, a lodge, and an indoor/outdoor water park. Most importantly, the plans called for relocating the memorial gardens and fountain within the city’s park. The project was viewed by its planners, and others, as a vital and necessary move for the city to grow and compete for jobs and residents in the future. Norman, as trustee of the Kolb trust, filed a petition for an injunction preventing the removal of the garden and fountain. The trial court ruled against Norman on the injunction and the city began the removal of the garden and fountain. After a later trial, however, the court found that the trust’s purpose had been destroyed and that it therefore became a resulting trust to benefit the Kolbs’ successors. Was this ruling correct?

7. John Henry Kirkpatrick was born Gion Rosetti to Joseph and Beatrice Rosetti in 1914. He had 10

siblings. On January 25, 1927, Edgar and Margaret Kirkpatrick adopted Gion and his brother, Leo. The Kirkpatricks changed Gion’s name to John Henry Kirkpatrick and Leo’s name to Edward Watson Kirkpatrick. The other nine birth siblings were either adopted away or remained with their birth parents. John Kirkpatrick was married briefly, divorced, and had no children. Edward Kirkpatrick married and, with his wife, raised a daughter, Karen Shippey. John and Edward Kirkpatrick’s nine biological siblings produced eight children (the cousins). John Kirkpatrick died intestate on August 4, 2000, leaving a substantial estate consisting of stocks, bonds, real estate, and personal property. Shippey and Rick Rogers were appointed co-personal representatives of John Kirkpatrick’s estate. Shippey and Rogers filed a document asking the court to determine the proper heirs for distribution of the estate. Shippey argued that she was John Kirkpatrick’s sole heir because his adoption terminated the rights of any biological relative not adopted by his adoptive family. *Wyo. Stat. Ann.* §§ 2-4-101 and 2-4-107 establish the rules of intestate succession and, specifically, those that apply to persons in an adoptive family. The pertinent parts are:

Except in cases above enumerated, the estate of any intestate shall descend and be distributed as follows:

(ii) If there are no children, nor their descendents, then to his father, mother, brothers and sisters, and to the descendents of brothers and sisters who are dead, the descendents collectively taking the share which their parents would have taken if living, in equal parts[.]

An adopted person is the child of an adopting parent *and of the natural parents for inheritance purposes only.*

An adopted person shall inherit from all other relatives of an adoptive parent as though he was the natural child of the adoptive parent and the relatives shall inherit from the adoptive person’s estate as if they were his relatives[.]

Will Karen prevail?

chapter 27

INSURANCE LAW

Hurricane Katrina struck Louisiana, Mississippi, and Alabama with overwhelming force in late August 2005. For many weeks thereafter, media coverage focused on the tragic personal consequences produced by Katrina and the tremendous devastation the storm inflicted on the Gulf Coast. Billions of dollars of property damage resulted from the hurricane and the flooding it spawned. Large numbers of homeowners simply did not have a property insurance policy. To their dismay, homeowners and commercial property owners who did have property insurance policies discovered that their particular losses may not have been covered by their policies. This was so even though damage from wind is a typical covered peril in a property insurance policy.

Coverage disputes between property owners and insurance companies began to spring up with frequency not long after the extensive damage stemming from Hurricane Katrina became apparent. Property owners filed numerous cases against their insurers in an effort to convince courts to rule that typical property insurance policies' coverage of wind damage would cover a broad range of Katrina-related losses, including those directly related to post-hurricane flooding. In general, however, the plaintiffs had little success. As you read this chapter, consider the hurricane aftermath and think about the following questions:

- If wind is a typical covered peril in property insurance policies, how is it possible that losses stemming from Hurricane Katrina might not be covered under such policies?
- Is there a typical exclusion from coverage that property insurers could credibly argue as a basis for denying coverage of certain Katrina-connected losses?
- Why might a policyholder whose home or building was flattened by the powerful storm be in a stronger position to collect under her insurance policy than, say, a New Orleans insured whose home was destroyed or rendered uninhabitable by the flooding that engulfed the city when the powerful hurricane caused the city's levee system to fail?

Think, too, about these broader questions:

- What is the nature of the relationship between an insurer and the insured? Is it collaborative, adversarial, or some of each?
- What legal obligations does an insurer owe to an insured? Do ethical obligations also attend the insurer-insured relationship?
- When a disaster of Hurricane Katrina's magnitude strikes, should the terms of an insurance policy be interpreted any differently from how they would have been interpreted in the event of more ordinary losses?
- What role do courts play in resolving insurance policy disputes?
- Should legislatures and government agencies regulate the terms of insurance policies, or should the content of policies be left to the market?

INSURANCE SERVES AS a frequent topic of discussion in various contexts in today's society. Advertisements for companies offering life, automobile, and property insurance appear daily on television and in the print media. Journalists report on issues of health insurance coverage and movements for reform. Persons engaged in business lament the excessive (from their perspective) costs of obtaining liability insurance. Insurance companies and insurance industry critics offer differing explanations for why those costs have reached their present levels.

Despite the frequency with which insurance matters receive public discussion and the perceived importance of insurance coverage, major legal aspects of insurance relationships remain unfamiliar to many persons. This chapter, therefore, examines important components of insurance law. We begin by discussing the nature of insurance relationships and exploring contract law's application to insurance policies in general. We then discuss other legal concepts and issues associated with specific types of insurance, most notably property insurance and liability insurance. The chapter concludes with an examination of an important judicial trend: allowing insurers to be held liable for compensatory and punitive damages if they refuse in bad faith to perform their policy obligations.

Nature and Benefits of Insurance Relationships

Insurance relationships arise from an agreement under which a risk of loss that one party (normally the **insured**) otherwise would have to bear is shifted to another party (the **insurer**). The ability to obtain insurance enables the insured to lessen or avoid the adverse financial effects that would be likely if certain happenings were to take place. In return for the insured's payment of necessary consideration (the **premium**), the insurer agrees to shoulder the financial consequences stemming from particular risks if those risks materialize in the form of actual events.

Each party benefits from the insurance relationship. The insured obtains a promise of coverage for losses that, if they occur, could easily exceed the amounts of the premiums paid. Along with this promise, the insured acquires the "peace of mind" that insurance companies and agents like to emphasize. By collecting premiums from many insureds over a substantial period of time, the insurer stands to profit despite its obligation to make payments covering financial losses that stem from insured-against risks. The insured-against risks, after all, are just that—risks. In some instances, events triggering the insurer's payment obligation to a particular insured

may never occur (e.g., the insured's property never sustains damage from a cause contemplated by the property insurance policy). The insurer nonetheless remains entitled to the premiums collected during the policy period. Other times, events that call the insurer's payment obligation into play in a given situation may occur infrequently (e.g., a particular insured under an automobile insurance policy has an accident only every few years) or only after many years of premium collection (e.g., an insured paid premiums on his life insurance policy for 35 years prior to his death).

Insurance Policies as Contracts

Interested Parties Regardless of the type of insurance involved, the insurance relationship is contractual. This relationship involves at least two—and frequently more than two—interested parties. As noted earlier, the insurer, in exchange for the payment of consideration (the premium), agrees to pay for losses caused by specific events (sometimes called *perils*). The insured is the person who acquires insurance on real or personal property or insurance against liability, or, in the case of life or health insurance, the person whose life or health is the focus of the policy. The person to whom the insurance proceeds are payable is the **beneficiary**. Except in the case of life insurance, the insured and the beneficiary will often be the same person. In most but not all instances, the insured will also be the policy's **owner** (the person entitled to exercise the contract rights set out in the insurance policy and in applicable law). In view of the contractual nature of the insurance relationship, insurance policies must satisfy all of the elements required for a binding contract.

Offer, Acceptance, and Consideration

The insurance industry's standard practice is to have the potential insured make an offer for an insurance contract by completing and submitting an application (provided by the insurer's agent), along with the appropriate premium, to the insurer. The insurer may then either accept or reject this offer. If the insurer accepts, the parties have an insurance contract under which the insured's initial premium payment and future premium payments furnish consideration for the insurer's promises of coverage for designated risks, and vice versa.

What constitutes acceptance of the offer set forth in the application may vary somewhat, depending on the type of insurance requested and the language of the application. As a general rule, however, acceptance occurs

when the insurer (or agent, if authorized to do so) indicates to the insured an intent to accept the application. It is important to know the precise time when acceptance occurs, because the insurer's contractual obligations to the insured do not commence until acceptance has taken place. If the insured sustains losses after the submission of the application (the making of the offer) but prior to acceptance by the insurer, those losses normally must be borne by the insured rather than the insurer.

With property insurance and sometimes other types of insurance, the application may be worded so that

insurance coverage begins when the insured signs the application. This arrangement provides temporary coverage until the insurer either accepts or rejects the offer contained in the application. The same result may also be achieved by the use of a *binder*, an agreement for temporary insurance pending the insurer's decision to accept or reject the risk. The *World Trade Center Properties* case, which follows, deals with interpretation of property insurance binders issued shortly before the September 11, 2001, plane attacks on the World Trade Center towers.

World Trade Center Properties, LLC v. Hartford Fire Insurance Co. 345 F.3d 154 (2d Cir. 2003)

Prior to the September 11, 2001, attacks that destroyed the World Trade Center (WTC) towers, 22 insurance companies had issued property insurance binders covering the WTC complex. These binders were issued to Silverstein Properties, Inc., the holder of a 99-year lease of the WTC complex under an agreement with the Port Authority of New York and New Jersey. A binder is a temporary contract of insurance that is in force until a formal insurance policy is issued by the insurer. The 22 insurers intended to issue formal insurance policies to Silverstein, but very few had done so as of 9/11. Therefore, the binders established and limited their obligations to pay Silverstein after the destruction of the WTC complex.

Property insurance binders and policies often provide that the insurer's obligation to pay is triggered when a covered "occurrence" results in damage to or destruction of the relevant real estate. Binders and policies also have policy limits, which are both the amount of insurance coverage purchased and the maximum sum that the insurer can be obligated to pay for a covered claim. The policy limits in a property insurance binder or policy typically apply on a per-occurrence basis. For example, if the policy limits are \$200,000, the insurer may become obligated to pay up to a maximum of \$200,000 for losses resulting from one occurrence and up to another \$200,000 on losses stemming from a separate occurrence.

Various ones of the 22 insurers that had issued binders regarding the WTC complex prior to 9/11 became involved in litigation with Silverstein over the amounts they were obligated to pay after the events of 9/11. Three of the insurers that were parties to the litigation—Hartford Fire Insurance Company, Royal Indemnity Company, and St. Paul Fire and Marine Insurance Company—had issued binders whose combined policy limits totaled approximately \$112 million dollars, out of a total of approximately \$3.5 billion in insurance coverage contemplated by the binders and policies issued by all 22 insurers. Another party to the litigation was Travelers Indemnity Co., which also promised millions of dollars of coverage under a binder that differed in a key respect from the Hartford, Royal, and St. Paul binders. The estimated cost of rebuilding the complex was \$5 billion or more.

In the litigation referred to above, a federal court agreed with an argument made by Hartford, Royal, and St. Paul: that their binders should be interpreted as containing the terms set forth in a form binder known as the "WilProp form," which had been circulated among many of the various insurers. The WilProp form made the insurance coverage applicable on a per-occurrence basis and contained a specific definition of occurrence. (The definition will be quoted later, in the edited version of the decision ultimately issued by a federal court of appeals.)

The court then addressed the critical issue: whether, for purposes of the binders at issue, the two plane attacks that destroyed the WTC towers on 9/11 were one occurrence or, instead, two occurrences. If, as argued by Hartford, Royal, and St. Paul, the two plane attacks were one occurrence, those three insurers would be obligated to pay Silverstein a total of \$112 million. If, as argued by Silverstein, the two plane attacks were two occurrences, the three insurers would be obligated to pay Silverstein a total of \$224 million. Although most of the remaining insurers were not parties to the case, a determination of the extent of their liabilities to Silverstein was likely to be heavily influenced by the court's decision because it seemed reasonably likely that various ones of the other insurers would be viewed as having agreed to the same form binder terms to which Hartford, Royal, and St. Paul had agreed. Thus, although the actual amount in controversy under the Hartford, Royal, and St. Paul binders ranged from a minimum of \$112 million to a maximum of \$224 million, the practical economic stakes appeared to be much higher. Ruling on a motion for partial summary judgment filed by Hartford, Royal, and St. Paul, the

district court held that in view of the WilProp form's definition of occurrence, the two plane attacks on the WTC were one occurrence for purposes of those companies' binders.

Travelers, however, had issued a binder that differed from the form binder employed by Hartford, Royal, and St. Paul. The Travelers binder called for coverage on a per-occurrence basis but did not contain a definition of occurrence. Silverstein moved for partial summary judgment, asking the court to rule that under the Travelers binder, the two plane attacks constituted two occurrences. Concluding that there were genuine issues of material fact to be resolved by a jury in regard to the plane attacks on the WTC, the district court denied Silverstein's motion.

Appealing to the U.S. Court of Appeals for the Second Circuit, Silverstein asked the appellate court to overturn the district court's grant of partial summary judgment to Hartford, Royal, and St. Paul. Silverstein also appealed the district court's denial of its (Silverstein's) motion for partial summary judgment against Travelers.

Walker, Chief Judge

This case arises out of the devastating tragedy that occurred at the World Trade Center (“WTC”) in lower Manhattan, New York, on the morning of September 11, 2001. At issue in this case is the amount of insurance that is recoverable for the total destruction of the WTC that occurred after the buildings were struck by two fuel-laden aircraft that had been hijacked by terrorists. In the spring of 2001, Silverstein Properties, Inc., was the successful bidder on a 99-year lease for the [WTC Complex] from the Port Authority of New York and New Jersey. In July 2001, Silverstein obtained primary and excess insurance coverage for the WTC complex from about two dozen insurers . . . in the total amount of approximately \$3.5 billion “per occurrence.”

The parties do not dispute that the destruction of the WTC resulted in a loss that greatly exceeded \$3.5 billion. The broad question presented in this case is whether the events of September 11, 2001, constituted one or two “occurrences.” The answer will determine whether Silverstein can recover once, up to \$3.5 billion, or twice, up to \$7 billion, under the insurance coverage. Complicating the resolution of this question is the fact that as of September 11, 2001, only one of the many insurers that bound coverage on the WTC had issued a final policy, necessitating an individualized inquiry to determine the terms of the insurance binders issued by each insurer.

[*Note:* In portions of the opinion not included here, the Second Circuit upheld two important rulings of the district court: first, that the binders of Hartford, Royal, and St. Paul should be interpreted as including the WilProp form's specific definition of *occurrence*; and second, that the obligation of Travelers should be determined according to the binder it issued prior to September 11, 2001, rather than on the basis of the insurance policy Travelers actually issued on September 14, 2001. The Second Circuit then went on to address the one occurrence versus two occurrences issue in regard to the binders of Hartford, Royal, and St. Paul and the different binder issued by Travelers.]

Of the four insurers in these appeals, Travelers was the only insurer to submit its own [binder]. Whereas the Travelers

[binder contemplated per-occurrence coverage but] did not define the term *occurrence*, the WilProp form[—used by Hartford, Royal, and St. Paul as the basis of their per-occurrence binders—]defined *occurrence*. Our conclusion that [Hartford, Royal, and St. Paul] bound coverage on the basis of the WilProp form leaves only Silverstein's claim that there are issues of fact as to whether there were one or two occurrences on September 11th under the WilProp form's definition. [T]he WilProp form contain[ed] the following definition:

Occurrence shall mean all losses or damages that are attributable directly or indirectly to one cause or to one series of similar causes. All such losses will be added together and the total amount of such losses will be treated as one occurrence irrespective of the period of time or area over which such losses occur.

Although Silverstein attempts to argue that this definition is ambiguous, [it is not]. [N]o finder of fact could reasonably fail to find that the intentional crashes into the WTC of two hijacked airplanes sixteen minutes apart as a result of a single, coordinated plan of attack was, at the least, a “series of similar causes.” Accordingly, we agree with the district court that under the WilProp definition [and the Hartford, Royal, and St. Paul binders that employed it], the events of September 11th constitute a single occurrence as a matter of law.

Silverstein's appeal from the denial of the motion for summary judgment against Travelers raises a different set of issues from those just discussed. This motion was based chiefly on [Silverstein's] argument that where an insurance policy uses the term *occurrence* without defining the term, then, as a matter of law, the term's meaning is not ambiguous and must be decided by reference to well-established New York legal precedent. Silverstein further argues that under the definition of *occurrence* established by New York law, the events of September 11th constituted two occurrences as a matter of law.

Because nothing in the documents that constitute the Travelers binder defined *occurrence*, we must decide whether the undefined term *occurrence* when used in a . . . property damage contract is ambiguous. Whether a contract is ambiguous is a question of law for a court to determine as a threshold matter.

[A]n ambiguity exists where a contract term “could suggest more than one meaning when viewed objectively by a reasonably intelligent person who has examined the context of the entire integrated agreement and who is cognizant of the customs, practices, usages and terminology as generally understood in the particular trade or business.” *Morgan Stanley Group, Inc. v. New England Insurance Co.*, 225 F.3d 270 (2d Cir. 2000).

Once a court finds that a contract is ambiguous, it may look to extrinsic evidence to determine the parties’ intended meaning. If factfinding is necessary to determine the parties’ intent, however, the matter must be submitted to the finder of fact, [a jury unless the parties have agreed to a bench trial rather than a jury trial].

Silverstein [argues] that the undefined term *occurrence* is not ambiguous because it is typical for insurance policies not to define *occurrence* and . . . that the WilProp definition is atypically broad. [This argument] is undercut by the policy forms of two other insurers [(not parties to this litigation) that] provided their own forms for coverage, each of which defined *occurrence*. In addition, in order to demonstrate the ambiguity of the undefined term *occurrence*, Travelers has proffered evidence of industry custom and usage concerning the meaning of occurrence that differs from the definition asserted by the Silverstein Parties. For example, [an insurance forms specialist] testified that she did not believe that the WilProp form definition . . . deviated from the commonly understood meaning of *occurrence*. Similarly, . . . an underwriter at Travelers testified that “it’s recognized that multiple causes of loss can be involved in a single occurrence, and it’s recognized that all loss arising out of an overriding cause or group of causes is considered a single occurrence. It’s never been a question.”

Finally, Silverstein asserts that the mere fact that the word *occurrence* was not defined in the binder is not enough to render it ambiguous. [Silverstein contends] that in the absence of a definition in the binder, a court seeking to construe the meaning of *occurrence* must first turn to well-established New York precedent. If there is a clear and uniform meaning of the term under the law, [Silverstein argues], then a court must reject a claim of ambiguity and apply that definition. This argument fails because its underlying premise—that there is a uniform meaning of *occurrence* under New York law—is erroneous.

[Silverstein] maintains that under New York law, there is but one meaning of *occurrence*, which is the direct, physical cause

of a loss and not more remote causes. [According to Silverstein,] this definition is so accepted and well settled . . . that it must be implied into the Travelers binder as a matter of law. Applying this definition to the facts of this case, it follows [according to Silverstein,] that because the destruction of the WTC was the result of two physical impacts from two separate planes, there were two occurrences as a matter of law. To support [this] argument, Silverstein [relies] on a string of [New York cases that deal mainly with liability insurance]. [Other cases—most notably property insurance cases—reveal, however, that there is no single set meaning of *occurrence* under New York law.]

[W]e are not called upon here to decide whether there was one occurrence or two [for purposes of the Travelers binder]. [Instead, we must determine] only whether the district court properly concluded that because there is no well-settled definition of the term *occurrence* under New York law, the Travelers binder was sufficiently ambiguous to preclude summary judgment and to permit the factfinder to consider extrinsic evidence of the parties’ intent. [We agree with the district court and hold that] the meaning of the undefined term *occurrence* is an open question as to which reasonable finders of fact could reach different conclusions.

District court’s grant of summary judgment for Hartford, Royal, and St. Paul affirmed; district court’s denial of Silverstein’s motion for summary judgment against Travelers affirmed; case remanded for further proceedings.

[Note: Because of the Second Circuit’s decision that the plane attacks on the WTC were one occurrence for purposes of their binders, Hartford, Royal, and St. Paul had to pay the amount of their policy limits only once. Because the Second Circuit’s decision that the Travelers binder’s undefined reference to occurrence was ambiguous, the stage was set for a later trial on the extent of the insurance obligation owed by Travelers and other insurers whose binders also did not define *occurrence*. In December 2004, a federal court jury concluded that for purposes of the Travelers binder and eight other companies’ binders that did not define *occurrence*, the plane attacks on the WTC were two occurrences, not one. Therefore, those nine companies, unlike Hartford, Royal, and St. Paul, were held liable to Silverstein for damages equaling their respective policy limits times two—a total of approximately \$2.2 billion. The affected insurers appealed to the Second Circuit, which issued a 2006 decision affirming the lower court’s decision.]

Insurer’s Delay in Acting on Application A common insurance law problem is the effect of the insurer’s delay in acting on the application. If the applicant suffers a loss after applying but before a delaying insurer formally accepts, who must bear the loss? As a general rule, the

insurer’s delay does not constitute acceptance. Some states, however, have held that an insurer’s retention of the premium for an unreasonable time constitutes acceptance and hence obligates the insurer to cover the insured’s loss.

Other states have allowed negligence suits against insurers for delaying unreasonably in acting on an application. The theory of these cases is that insurance companies have a public duty to insure qualified applicants and that an unreasonable delay prevents applicants from obtaining insurance protection from another source. A few states have enacted statutes establishing that insurers are bound to the insurance contract unless they reject the prospective insured's application within a specified period of time.

Effect of Insured's Misrepresentation

Applicants for insurance have a duty to reveal to insurers all the material (significant) facts about the nature of the risk so that the insurer may make an intelligent decision about whether to accept the risk. When an application for property, liability, or health insurance includes an insured's false statement regarding a material matter, the insured's misrepresentation, if relied on by the insurer, has the same effect produced by misrepresentation in connection with other contracts—the contract becomes voidable at the election of the insurer. This means that the insurer may avoid its obligations under the policy. The same result is possible if the insured failed, in the application, to disclose known material facts to the insurer, which issued a policy it would not have issued if the disclosures had been made. However, special rules applicable to misrepresentations in life insurance applications may sometimes limit the life insurer's ability to use the insured's misrepresentation as a way of avoiding all obligations under the policy.

Warranty/Representation Distinction It sometimes becomes important to distinguish between **warranties** and representations that the insured makes (usually in the application) to induce the insurer to issue an insurance policy. Warranties are *express terms in the insurance policy*. They are intended to operate as conditions on which the insurer's liability is based. The insured's breach of warranty terminates the insurer's duty to perform under the policy. For example, a property insurance policy on a commercial office building specifies that the insured must install and maintain a working sprinkler system in the building, but the insured never installs the sprinkler system. The sprinkler system requirement is a warranty, which the insured breached by failing to install the system. This means that the insurer may not be obligated to perform its obligations under the policy.

Traditionally, an insured's breach of warranty has been seen as terminating the insurer's duty to perform *regardless of whether the condition set forth in the breached warranty was actually material to the insurer's risk* (unlike the treatment given to the insured's misrepresentations, which do

not make the insurance policy voidable unless they pertained to a material matter). In view of the potential harshness of the traditional rule concerning the effect of a breach of warranty, some states have refused to allow insurers to escape liability on breach of warranty grounds unless the condition contemplated by the breached warranty was indeed material.

Legality The law distinguishes between unlawful wagering contracts and valid insurance contracts. A wagering contract creates a new risk that did not previously exist. Such a contract is contrary to public policy and therefore illegal. An insurance contract, however, *transfers existing risks*—a permissible, even desirable, economic activity. A major means by which insurance law separates insurance contracts from wagering contracts is the typical requirement that the party who purchases a policy of property or life insurance must possess an **insurable interest** in the property or life being insured. Specific discussion of the insurable interest requirement appears later in the chapter.

Form and Content of Insurance Contracts

Writing State law governs whether insurance contracts are within the statute of frauds and must be evidenced by a writing. Some states require specific types of insurance contracts to be in writing. Contracts for property insurance are not usually within the statute of frauds, meaning that they may be either written or oral unless they come within some general provision of the statute of frauds—for example, the “one-year” provision.¹ Even when a writing is not legally required, however, wisdom dictates that the parties reduce their agreement to written form whenever possible.

Reformation of Written Policy As one would expect, insurance companies' customary practice is to issue written policies of insurance regardless of whether the applicable statute of frauds requires a writing. An argument sometimes raised by insureds is that the written policy issued by the insurer did not accurately reflect the content of the parties' actual agreement. For instance, after the occurrence of a loss for which the insured thought there was coverage under the insurance contract, the insured learns that the loss-causing event was excluded from coverage by the terms expressly stated in the written policy. In such a situation, the insured may be

¹The usual provisions of the statute of frauds are discussed in detail in Chapter 16.

inclined to argue that the written policy should be judicially **reformed**, so as to make it conform to the parties' supposed actual agreement.

Although reformation is available in appropriate cases, courts normally presume that the written policy of insurance should be treated as the embodiment of the parties' actual agreement. Courts consider reformation an extreme remedy. Hence, they usually refuse to grant reformation unless either of two circumstances is present. The first reformation-triggering circumstance exists when the insured and the insurer, through its agent or agents, were *mutually mistaken* about a supposedly covered event or other supposed contract term (i.e., both parties believed an event was covered by, or some other term was part of, the parties' insurance agreement but the written policy indicated otherwise). The alternative route to reformation calls for proof that the insurer committed fraud as to the terms contained in the policy or otherwise engaged in inequitable conduct.

Interpretation of Insurance Contracts Modern courts realize that many persons who buy insurance do not have the training or background to fully understand the technical language often contained in insurance policies. As a result, courts interpret insurance policy provisions as they would be understood by an average person. In addition, courts construe ambiguities in an insurance contract against the insurer, the drafter of the contract (and hence the user of the ambiguous language). This rule of construction means that if a word or phrase used in an insurance policy is equally subject to two possible interpretations, one of which favors the insurer and the other of which favors the insured, the court will adopt the interpretation that favors the insured. *Auto-Owners Insurance Co. v. Harvey*, which appears later in the chapter, illustrates the application of this rule of construction to an ambiguous provision in a liability insurance policy.

A number of states purport to follow the *reasonable expectations of the insured* approach to interpretation of insurance policies. Analysis of judicial decisions reveals, however, that this approach's content and effect vary among the states ostensibly subscribing to it. Some states do little more than attach the reasonable expectations label to the familiar principles of interpretation set forth in the preceding paragraph. A few states give the reasonable expectations approach a much more significant effect by allowing courts to effectively read clauses into or out of an insurance policy, depending on whether reasonable persons in the position of the insured would have expected such clauses to be in a policy of the sort at issue. When applied in the latter manner, the reasonable expectations approach tends to resemble reformation in its effect.

Clauses Required by Law The insurance business is highly regulated by the states, which recognize the importance of the interests protected by insurance and the difference in bargaining power that often exists between insurers and their insureds. In an attempt to remedy this imbalance, many states' statutes and insurance regulations require the inclusion of certain standard clauses in insurance policies. Many states also regulate such matters as the size and style of the print used in insurance policies. Laws in a growing number of states encourage or require the use of plain, straightforward language—rather than insurance jargon and legal terms of art—whenever such language is possible to use.

Notice and Proof of Loss-Causing Event The insured (or, in the case of life insurance, the beneficiary) who seeks to obtain the benefits or protection provided by an insurance policy must notify the insurer that an event covered by the policy has occurred. In addition, the insured (or the beneficiary) must furnish reasonable proof of the loss-causing event. Property insurance policies, for instance, ordinarily require the insured to furnish a sworn statement (called a *proof of loss*) in which the covered event and the resulting damage to the insured's property are described. Under life insurance policies, the beneficiary is usually expected to provide suitable documentation of the fact that the insured person has died. Liability insurance policies call for the insured to give the insurer copies of liability claims made against the insured.

Time Limits Insurance policies commonly specify that notice and proof of loss must be given within a specified time. Policies sometimes state that compliance with these requirements is a condition of the insured's recovery and that failure to comply terminates the insurer's obligation. Other times, policies merely provide that failure to comply suspends the insurer's duty to pay until compliance occurs. Some courts require the insurer to prove it was harmed by the insured's failure to give notice before allowing the insurer to avoid liability on the ground of tardy notice.

Cancellation and Lapse When a party with the power to terminate an insurance policy (extinguish all rights under the policy) exercises that power, **cancellation** has occurred. **Lapse** occurs at the end of the term specified in a policy written for a stated duration, unless the parties take action to renew the policy for an additional period of time. Alternatively, lapse may occur as a result of the insured's failure to pay premiums or some other significant default on the part of the insured.

Performance and Breach by Insurer

The insurer performs its obligations by paying out the sums (and taking other related actions) contemplated by the policy's terms within a reasonable time after the occurrence of an event that triggers the duty to perform. If the insurer fails or refuses to pay despite the occurrence of such an event, the insured may sue the insurer for breach of contract. By proving that the insurer's denial of the insured's claim for payment constituted a breach, the insured becomes entitled to recover compensatory damages in at least the amount that the insurer would have had to pay under the policy if the insurer had not breached.

What if the insurer's breach caused the insured to incur consequential damages that, when added to the amount due under the policy, would lead to a damages claim exceeding the dollar limits set forth in the policy? Assume that XYZ Computer Sales, Inc.'s store building is covered by a property insurance policy with Secure Insurance Co., that the building is destroyed by an accidental fire (a covered peril), and that the extent of the destruction makes the full \$500,000 policy limit due from Secure to XYZ. Secure, however, denies payment because it believes—erroneously—that XYZ officials committed arson (a cause, if it had been the actual one, that would have relieved Secure from any duty to pay). Because it needs to rebuild and take other related steps to stay in business but is short on available funds as a result of Secure's denial of its claim, XYZ borrows the necessary funds from a bank. XYZ thereby incurs substantial interest costs, which are consequential damages XYZ would not have incurred if Secure had performed its obligation under the policy. Assuming that XYZ's consequential damages would have been foreseeable to Secure, most states would allow XYZ to recover the consequential damages in addition to the amount due from Secure under the policy.² This is so even though the addition of the consequential damages would cause XYZ's damages recovery to exceed the dollar limit set

²Even though the terms of the insurance policy almost certainly would state that Secure's payment obligation is limited to costs of repair or replacement or to the property's actual cash value—that is, without any coverage for consequential harms experienced by the insured—Secure cannot invoke this policy language as a defense. If Secure had performed its contract obligation, its payment obligation would have been restricted to what the policy provided in that regard. Having breached the insurance contract, however, Secure stands potentially liable for consequential damages to the full extent provided for by general contract law. For additional discussion of damages for breach of contract, see Chapter 18.

forth in the parties' insurance policy. The breaching insurer's liability may exceed the policy limits despite the insurer's good faith (though incorrect) basis for denying the claim, because a good faith but erroneous refusal to pay is nonetheless a breach of contract. If the insurer could point to the policy limits as a maximum recovery in this type of situation, it would have an all-too-convenient means of avoiding responsibility for harms that logically flowed from its breach of contract.

Many states' laws provide that if an insured successfully sues her insurer for amounts due under the policy, the insured may recover interest on those amounts (amounts that, after all, should have been paid by the insurer much sooner and without litigation). Some states also have statutes providing that insureds who successfully sue insurers are entitled to awards of attorney's fees. Punitive damages are *not* allowed, however, when the insurer's breach of contract consisted of a *good faith (though erroneous) denial* of the insured's claim. Later in this chapter, we will explore the trend toward allowing punitive damages when the insurer's breach was in *bad faith* and thus amounted to the tort of bad faith breach of contract.

Property Insurance

Owners of residential and commercial property always face the possibility that their property might be damaged or destroyed by causes beyond their control. These causes include, to name a few notable ones, fire, lightning, hail, and wind. Although property owners may not be able to prevent harm to their property, they can secure some protection against resulting financial loss by contracting for property insurance and thereby transferring certain risks of loss to the insurer. Persons holding property interests that fall short of ownership may likewise seek to benefit, as will be seen, from the risk-shifting feature of property insurance.

The Insurable Interest Requirement As noted earlier in this chapter, in order for a property insurance contract not to be considered an illegal wagering contract, the person who purchases the policy (the policy owner) must have an **insurable interest** in the property being insured. One has an insurable interest if he, she, or it possesses a legal or equitable interest in the property and that interest translates into an economic stake in the continued existence of the property and the preservation of its condition. In other words, a person has an insurable interest if he would suffer a financial loss in the event of harm to the subject property. If no insurable interest is present, the policy is void.

The Global Business Environment

A California statute, the Holocaust Victim Insurance Relief Act of 1999 (HVIRA), provided that if an insurer doing business in California sold insurance policies to persons in Europe between 1920 and 1945 (Holocaust-era policies), the insurer was to file certain information about those policies with the California insurance commissioner. The reporting requirement also applied to insurance companies that did business in California and were “related” to a company that sold Holocaust-era policies, even if the relationship arose after the policies were issued. A “related company” was defined as any “parent, subsidiary, reinsurer, successor in interest, managing general agent, or affiliate company of the insurer.”

Insurance companies subject to HVIRA were expected to provide this information: (1) the number of Holocaust-era insurance policies; (2) the holder, beneficiary, and current status of each such policy; and (3) the city of origin, domicile, or address for each policyholder listed in the policies. In addition, HVIRA required the insurers to certify whichever one of the following was accurate: (1) that the proceeds of the policies were paid; (2) that the beneficiaries or heirs could not, after diligent search, be located, and the proceeds were distributed to Holocaust survivors or charities; (3) that a court of law had certified a plan for the distribution of the proceeds; or (4) that the proceeds had not been distributed. HVIRA instructed the California insurance commissioner to store the information disclosed under the statute in a Holocaust Era Insurance Registry, which was available to the public. In addition, HVIRA required the insurance commissioner to “suspend the certificate of authority to conduct insurance business in the state of any insurer that fails to comply” with HVIRA’s reporting requirements.

Various U.S.-based, German, and Italian insurance companies filed suit in a federal district court in an effort to have HVIRA invalidated on constitutional grounds. The district court held the statute unconstitutional on various grounds, but the U.S. Court of Appeals for the Ninth Circuit reversed. Seeing no constitutional obstacle, the Ninth Circuit regarded HVIRA as legitimate, state-related legislative action that fit within the customary authority of states to regulate regarding

insurance-related matters. The U.S. Supreme Court granted the insurers’ petition for certiorari.

In *American Insurance Association v. Garamendi*, 539 U.S. 396 (2003), the Supreme Court identified Article II of the U.S. Constitution as the key constitutional provision at issue in the case. Article II reserves to the federal executive branch the power to conduct foreign policy.

Pointing to relevant history as necessary background, the Court observed that after a 1990 treaty lifted a previous moratorium on certain claims related to the Holocaust, various class action lawsuits were filed in U.S. courts against non-U.S. firms that allegedly had done business in Germany during the Nazi era. These cases drew protests from the defendant firms and from various foreign governments. Following these protests, the executive branch of the U.S. government entered into agreements with the governments of Germany, Austria, and France during 2000 and 2001. The agreements outlined a Holocaust-related claims resolution process under which the foreign governments were to create foundations that would be funded by those governments and certain foreign firms. Foundation funds would satisfy valid Holocaust-related claims. The claims to be covered by the agreements included insurance claims the resolution of which was to be eased by agreement provisions calling for the foundations to negotiate with European insurers. The agreements stated that the claims resolution process was in the foreign policy interest of the United States. In addition, the federal government agreed to use its “best efforts” to have Holocaust-related claims go through the process rather than through the courts or other mechanisms set up by state and local governments.

After taking into account the history, purposes, and content of the 2000 and 2001 agreements entered into by the executive branch and the governments of Germany, Austria, and France, the Court concluded that HVIRA posed a significant obstacle to, if not an outright conflict with, the foreign policy objectives articulated in the agreements. This meant that the federal government’s Article II foreign policy power must preempt—that is, take precedence over—HVIRA. Therefore, the Court reversed the Ninth Circuit’s decision and held HVIRA unconstitutional.

Examples of Insurable Interest The legal owner of the insured property would obviously have an insurable interest. So might other parties whose legal or equitable interests in the property do not rise to the level of an ownership interest. For example, mortgagees and other lienholders would have insurable interests in the property on which they hold liens. A nonexhaustive list of other examples would also include holders of life estates in real property, buyers under as-yet unperformed

contracts for the sale of real property, and lessees of real estate.³ In the types of situations just noted, the interested

³Chapter 28 contains a detailed discussion of security interests in real property. Chapter 29 addresses security interests in personal property. Chapter 24 contains a discussion of life estates and an examination of contracts for the sale of real property. Leases of real estate are explored in Chapter 25.

party stands to lose financially if the property is damaged or destroyed.

Timing and Extent of Insurable Interest A sensible and important corollary of the insurable interest principle is that the requisite insurable interest must exist *at the time of the loss* (i.e., at the time the subject property was damaged). If an insurable interest existed when the holder thereof purchased the property insurance but the interest was no longer present when the loss occurred, the policy owner is not entitled to payment for the loss. This would mean, for example, that a property owner who purchased property insurance would not be entitled to collect from the insurer for property damage that occurred after she had transferred ownership to someone else. Similarly, a lienholder who purchased property insurance could not collect under the policy if the loss took place after his lien had been extinguished by payment of the underlying debt or by another means.⁴

The extent of a person's insurable interest in property is limited to the value of that interest. For example, Fidelity Savings & Loan extends Williams a \$250,000 loan to purchase a home and takes a mortgage on the home as security. In order to protect this investment, Fidelity obtains a \$250,000 insurance policy on the property. Several years later, the house is destroyed by fire, a cause triggering the insurer's payment obligation. At the time of the fire, the balance due on the loan is \$220,000. Fidelity's recovery under the insurance policy is limited to \$220,000, because that amount is the full extent of its insurable interest. (An alternative way by which mortgagees protect their interest is to insist that the property owner list the mortgagee as the *loss payee* under the property owner's policy. This means that if the property is destroyed, the insurer will pay the policy proceeds to the mortgagee. Once again, however, the mortgagee's entitlement to payment under this approach would be limited to the dollar value

⁴In the life insurance context, the requisite insurable interest *must exist at the time the policy was issued* but need not exist at the time of the insured's death. Persons who stand to suffer a financial loss in the event of the insured's death have the insurable interest necessary to support the purchase of a life insurance policy on the insured. The insured and his or her spouse, parents, children, and other dependents thus possess an insurable interest in the insured's life. In addition, the business associates of the insured may also have an insurable interest in his or her life. Such persons would include the insured's employer, business partners, or shareholders in a closely held corporation with which the insured is connected. Creditors of the insured also have an insurable interest, but only to the extent of the debt owed by the insured.

of its insurable interest, with surplus proceeds going to the insured property owner.)

Covered and Excluded Perils Property insurers usually do not undertake to provide coverage for losses stemming from any and all causes of harm to property. Instead, property insurers tend to either specify certain causes (**covered perils**) as to which the insured *will* receive payment for resulting losses—meaning that there is no coverage regarding a peril not specified—or set forth a seemingly broad statement of coverage but then specify certain perils concerning which there will be *no* payment for losses (**excluded perils**). Sometimes, property insurers employ a combination of these two approaches by specifying certain covered perils and certain excluded perils. For an example, see *Shelter Mutual Insurance Co. v. Maples*, which follows shortly.

Typical Covered Perils The effects of these approaches are essentially the same, as most property insurers tend to provide coverage for the same sorts of causes of harm to property. The perils concerning which property insurance policies typically provide benefits include fire, lightning, hail, and wind. In addition, property insurance policies often cover harms to property resulting from causes such as the impact of an automobile or aircraft (e.g., an automobile or aircraft crashes into an insured building), vandalism, certain collapses of buildings, and certain accidental discharges or overflows from pipes or heating and air-conditioning systems.

Fire as a Covered Peril Historically, the importance of coverage against the peril of fire made *fire insurance* a commonly used term. Various insurance companies incorporated the term into their official firm name; the policies these companies issued came to be called *fire insurance policies* even when they covered perils in addition to fire (as policies increasingly have done in this century). As a result, judges, commentators, and persons affiliated with the insurance industry will sometimes refer to today's policies as fire insurance policies despite the usual property insurer's tendency to cover not only fire but also some combination of the other perils mentioned in the preceding paragraph. Whether the term used is *property insurance* (generally employed in this chapter) or *fire insurance*, reference is being made to the same type of policy.

Fire-related losses covered by property insurance policies are those resulting from accidental fires. An accidental fire is one other than a fire deliberately set by, or

at the direction of, the insured for the purpose of damaging the property. In other words, the insured obtains no coverage for losses stemming from the insured's act of arson. This commonsense restriction on an insurer's duty to pay for losses also applies to other harms the insured deliberately caused to his property.

For purposes of fire coverage, insurance contracts often distinguish between *friendly fires*, which are those contained in a place intended for a fire (such as fires in a woodstove or fireplace), and *hostile fires*, which burn where no fire is intended to be (such as fires caused by lightning, outside sources, or electrical shorts, or those that began as friendly fires but escaped their boundaries). Losses caused by hostile fires are covered; those stemming from friendly fires tend not to be. As a general rule, covered fire losses may extend beyond direct damage caused by the fire. Indirect damage caused by smoke and heat is usually covered, as is damage caused by firefighters in their attempts to put out the fire.

Typical Excluded Perils Although flood-related harm to property may seem similar to harm stemming from some of the weather-related causes listed earlier among the typical covered perils, it does not usually receive the same treatment. Property insurance policies frequently exclude coverage for flood damage. On this point, however, as with other questions regarding perils covered or excluded, the actual language of the policy at issue must always be consulted before a coverage issue is resolved in any given case.⁵ Other typical exclusions include earthquake damage and harm to property stemming from war or nuclear reaction, radiation, or contamination. As previously indicated, property insurance policies exclude coverage for losses caused by the insured's deliberate actions that were intended to cause harm to the property.

Additional Coverages Even as to perils for which there may not be coverage in the typical property insurance policy, the property owner may sometimes be able to purchase a specialized policy (e.g., a flood insurance policy) that does afford coverage for such perils. Other

times, even if coverage for a given peril is not provided by the terms of most standard property insurance policies, it may nonetheless be possible for the property owner to have coverage for that peril added to the policy by paying an additional premium. This is sometimes done, for example, by policy owners who desire earthquake coverage.

Personal Property Insurance Although the broad term *property insurance* is what has been employed, the discussion so far in this section has centered around policies providing coverage for harm to *real* property. Items of *personal* property are, of course, insurable as well. Property insurance policies commonly known as homeowners' policies—because the real property serving as the policy's primary subject is the insured's dwelling—cover not only harm to the dwelling but also to personal property located inside the dwelling or otherwise on the subject real property. (Sometimes, depending on the policy language, there may be coverage even when the item of personal property was not located at the designated real property when the item was damaged.) Property insurance policies covering office buildings and other commercial real estate often provide some level of personal property coverage as well. When personal property coverage is included in a policy primarily concerned with real property coverage, the perils insured against in the personal property coverage tend to be largely the same as, though not necessarily identical to, those applicable to the real property coverage.

Lessees of residential or commercial real estate may obtain insurance policies to cover their items of personal property that are on the leased premises. Such policies are highly advisable, because the apartment or office building owner's insurance policy on the real property is likely to furnish little or no coverage for the tenant's personal property.

Automobile insurance policies are in part personal property insurance policies because they provide coverage (under what are usually called the *comprehensive* and *collision* sections) for car damage resulting from such causes as fire, wind, hail, vandalism, or collision with an animal or tree. As will be seen, automobile insurance policies also contain significant features of another major type of insurance policy to be discussed later—liability insurance. Other specialized types of personal property insurance are also available. For example, many farmers purchase crop insurance in order to guard against the adverse financial effects that would result if a hailstorm or other covered peril severely damaged a season's crop.

⁵It may be that a type of peril frequently excluded in property insurance policies is in fact a covered peril under the language of the policy at issue. Alternatively, losses that at first glance appear to have resulted from an excluded peril may sometimes be characterized as having resulted, at least in part, from a covered peril. In the latter event, there may be some coverage for the losses.

Shelter Mutual Insurance Co. v. Maples

309 F.3d 1068 (8th Cir. 2002)

Shelter Mutual Insurance Co. brought a declaratory judgment action against Tommy and Bessie Maples (referred to collectively as “Maples”) in the United States District Court for the Western District of Arkansas. Shelter asked the court to declare that Shelter had no obligation to pay a claim made by Maples under a homeowner’s insurance policy issued by Shelter. The facts set forth in the following paragraph were as stipulated (i.e., as agreed to) by the parties.

While residing in Saudi Arabia, Maples contracted for the construction of a single-family retirement home in Arkansas. Maples purchased homeowner’s insurance from Shelter, whose policy, issued in November 2000, was in full effect at all times relevant to the case. The two-story residence, which had a wooden frame and a basement made of concrete, was largely complete as of November 2000. Maples, who remained in Saudi Arabia, took reasonable precautions for winter weather by leaving a key with the contractor and asking him to winterize the residence. At some unknown time, a water pipe froze and burst. As a result, between four to six inches of water stood continuously in the basement until the contractor discovered the problem in April 2001. The standing water caused only minimal structural damage to the basement, but the humidity from the standing water caused mold to form on all of the interior surfaces of the residence. As a result of the mold, the residence became uninhabitable and had to be demolished.

Maples reported the loss to Shelter, which instituted the declaratory judgment action referred to above. After the federal district court granted summary judgment in favor of Shelter, Maples appealed to the United States Court of Appeals for the Eighth Circuit.

Riley, Circuit Judge

As relevant, the insurance policy provided:

PERILS WE INSURE AGAINST—SECTION I

We cover accidental direct physical loss to property covered under Dwelling and Other Structures Coverages except for losses excluded in this section.

Under Dwelling and Other Structures Coverages, we do not cover loss caused by:

1. wear and tear; marring or scratching; deterioration; inherent vice; latent defect; mechanical breakdown; rust; mold; wet or dry rot; contamination; smog, smoke from agricultural smudging or industrial operations; settling, cracking, shrinkage, bulging or expansion of pavement, patios, foundations, walls, floors, roofs, or ceilings; birds, vermin, rodents, insects or domestic animals. If, because of any of these, water escapes from a plumbing, heating, or air conditioning system or domestic appliance, we cover loss caused by the water. We also cover the cost of tearing out and replacing any part of the covered building necessary to repair the system or appliance. We do cover loss to the system or appliance from which the water escapes.

[T]he district court concluded that Shelter was entitled to summary judgment, reasoning that the policy language clearly provided that any loss due to mold was not covered. This court reviews de novo the district court’s grant of summary judgment, as well as its interpretation of Arkansas law. Under Arkansas law, insurance policies are to be construed liberally in favor of the insured, and exclusionary language that is susceptible to more than one reasonable interpretation should be

construed in favor of the insured. The insurer bears the burden of proving as a matter of law that the insured’s claim was excluded under the policy.

Here, a covered peril, frozen pipes, caused an excluded peril, mold, which resulted in the loss. The district court concluded that the policy precluded coverage for mold damage regardless of its cause, relying on the following lead-in language from the policy:

We do not cover loss:

- (a) resulting directly or indirectly from any of the following events;
- (b) which would not have occurred in the absence of any of the following events;
- (c) which occurs regardless of the cause of any of the following events; or
- (d) if loss occurs concurrently or in any sequence with any of the events.

We disagree with the court’s reading of the policy, because we find this language leads into a list of ten specified items not including mold, while the mold-exclusion paragraph is separately numbered and follows the lead-in clause “Under Dwelling and Other Structures Coverages, we do not cover loss caused by.” Thus, the plain language of the policy does not automatically preclude coverage. Compare *Cooper v. American Family Mutual Insurance Co.*, 184 F. Supp. 2d 960, 961–63 (D. Ariz. 2002) (no coverage for mold damage from plumbing leak where lead-in clause excluded losses regardless of any other contributing cause or event), with *West v. Umialik Insurance Co.*, 8 P.3d 1135, 1137–41 (Alaska 2000)

(settling of house from broken plumbing was covered loss, where no lead-in clause precluded coverage regardless of cause).

It appears to us, then, that the determinative question is a factual one: whether the frozen pipe or the mold was the dominant and efficient cause of the loss. See 10 LEE R. RUSS & THOMAS F. SEGALLA, *COUCH ON INSURANCE* §§ 148:60, 148:61 (3d ed. 1998) (where covered and non-covered perils join to cause a loss, and the covered peril is the efficient and dominant cause, there is coverage under the policy);

11 *COUCH ON INSURANCE* § 153:96 (mold exclusions do not necessarily apply where “efficient proximate cause” of loss was a covered risk). Because the parties’ factual stipulation does not answer this question, we conclude [that] a material issue of fact remains, and [that] summary judgment was improper.

District court’s grant of summary judgment in favor of Shelter reversed; case remanded for consideration of causation issue.

Nature and Extent of Insurer’s Payment Obligation

Property insurance policies are **indemnity** contracts. This means that the insurer is obligated to reimburse the insured for his actual losses associated with a covered harm to the insured property. The insured’s recovery under the policy thus cannot exceed the extent of the loss sustained. Neither may it exceed the extent of the insured’s insurable interest or the amount of coverage that the insured purchased (the **policy limits**).⁶

Policy provisions other than the policy limits also help define the extent of the insurer’s obligation to pay. When covered real property is damaged but not destroyed, the **cost of repair** is normally the relevant measure. Many policies provide that when covered real property is destroyed, the insurer must pay the **actual cash value** (or *fair market value*) of the property. Some policies, however, establish **cost of replacement** as the payment obligation in this situation. The policies that call for payment of the actual cash value frequently give the insurer the option to pay the cost of replacement, however, if that amount would be less than the actual cash value. As to covered personal property, the controlling standard is typically the least of the following: cost of repair, cost of replacement, or actual cash value.⁷

Many property insurance policies supplement the above provisions by obligating the insurer to pay the insured’s reasonable costs of temporarily living elsewhere

if the insured property was her residence and the damage to the residence made it uninhabitable pending completion of repairs or replacement. Comparable benefits may sometimes be provided in policies covering business property. Lost profits and similar consequential losses resulting from harm to or destruction of one’s insured property, however, do not normally fall within the insurer’s payment obligation unless a specific provision obligates the insurer along those lines.⁸ Regardless of whether the damaged or destroyed property is real or personal in nature, the particular language of the policy at issue must always be consulted before a definite determination can be made concerning what is and is not within the insurer’s duty to pay.

Valued and Open Policies When insured real property is destroyed as a result of fire or another covered peril, the amount to be paid by the insurer may be further influenced by the type of policy involved. Some property insurance contracts are **valued policies**. If real property insured under a valued policy is destroyed, the insured is entitled to recover the face amount of the policy regardless of the property’s fair market value. For example, in 1985, Douglas purchased a home with a fair market value of \$90,000. Douglas also purchased a valued policy with a face amount of \$90,000 to insure the house against various risks, including fire. The home’s fair market value decreased in later years because of deterioration in the surrounding neighborhood. In 2008, when the home had a fair market value of only \$75,000, it was destroyed by fire. Douglas is entitled to \$90,000 (the

⁶Some insurers, however, provide, in exchange for a more substantial premium than would be charged for a policy without this feature, a homeowner’s policy under which the insurer could become obligated to pay *more* than the policy limits if the insured’s home was destroyed and the cost to replace it would actually exceed the policy limits.

⁷Concerning certain designated items of personal property such as furs or jewelry, policies often set forth a maximum insurer payout (such as \$1,000) that is less than the general policy limits applicable to personal property. Such a payout limitation would operate as a further restriction on the extent of the insurer’s obligation.

⁸Recall, however, that if the insurer violates its payment obligation by wrongfully failing or refusing to pay what the policy contemplates, the insurer has committed a breach of contract. As noted in this chapter’s earlier discussion of insurance policies as contracts, fundamental breach of contract principles dictate that the breaching insurer is potentially liable for consequential damages.

face amount of the valued policy) despite the reduction in the home's fair market value.

Most property insurance policies, however, are open policies. Open policies allow the insured to recover the fair market value (actual cash value) of the property at the time it was destroyed, up to the limits stated in the policy. Thus, if Douglas had had an open policy in the example presented in the previous paragraph, he would have been entitled to only \$75,000 when the home was destroyed by fire. Suppose instead that Douglas's home had increased in value, so that at the time of the fire its fair market value was \$150,000. In that event, it would not matter what type of policy (valued or open) Douglas had. Under either type of policy, his recovery would be limited to the \$90,000 face amount of the policy.

Coinsurance Clause Some property insurance policies contain a **coinsurance clause**, which may operate as a further limit on the insurer's payment obligation and the insured's right to recovery. A coinsurance clause provides that in order for the insured to be able to recover the full cost of partial losses, the insured must obtain insurance on the property in an amount equal to a specified percentage (often 80 percent) of the property's fair market value.

For example, PDQ Corporation has a fire insurance policy on its warehouse with Cooperative Mutual Insurance Group. The policy has an 80 percent coinsurance clause. The warehouse had a fair market value of \$400,000, meaning that PDQ was required to carry at least \$320,000 of insurance on the building. PDQ, however, purchased a policy with a face amount of only \$240,000. A fire partially destroyed the warehouse, causing \$200,000 worth of damage to the structure. Because of the coinsurance clause, PDQ will recover only \$150,000 from Cooperative. This figure was arrived at by taking the amount of insurance carried (\$240,000) divided by the amount of insurance required (\$320,000) times the loss (\$200,000).

The coinsurance formula for recovery for partial losses is stated as follows:

$$\frac{\text{Amount of insurance carried}}{\text{Coinsurance percent} \times \text{Fair market value}} \times \text{Loss} = \text{Recovery}$$

Remember that the coinsurance formula applies only to *partial* losses (i.e., damage to, but not complete destruction of, property). If PDQ's warehouse had been totally destroyed by the fire, the formula would not have been used. PDQ would have recovered \$240,000—the

face amount of the policy—for the total loss. If the formula had been used, it would have indicated that Cooperative owed PDQ \$300,000—more than the face amount of the policy. This result would be neither logical nor in keeping with the parties' insurance contract. Whether the loss is total or partial, the insured is not entitled to recover more than the face amount of the policy.

Pro Rata Clause With the limited exception of the valued policy (discussed above), the insured cannot recover more than the amount of the actual loss. A rule allowing the insured to recover more than the actual loss could encourage unscrupulous persons to purchase policies from more than one insurer on the same property—thus substantially overinsuring it—and then intentionally to destroy the property in a way that appeared to be a covered peril (e.g., committing arson but making the fire look accidental). In order to make certain that the insured does not obtain a recovery that exceeds the actual loss, property insurance policies commonly contain a *pro rata clause*, which applies when the insured has purchased insurance policies from more than one insurer. The effect of the pro rata clause is to apportion the loss among the insurance companies. (Applicable state law sometimes contains a rule having this same effect.)

Under the pro rata clause, the amount any particular insurer must pay the insured depends on the percentage of total insurance coverage represented by that insurer's policy. For example, Mumford purchases two insurance policies to cover his home against fire and other risks. His policy from Security Mutual Insurance Corp. has a face amount of \$50,000; his policy from Reliable Insurance Co. is for \$100,000. Mumford's home is partially destroyed by an accidental fire, with a resulting loss of \$30,000. Security Mutual must pay Mumford \$10,000, with Reliable having to pay the remaining \$20,000 of the loss.

The formula for determining each insurer's liability under a pro rata clause is stated as follows:

$$\frac{\text{Amount of insurance policy}}{\text{Total coverage by all insurers}} \times \text{Loss} = \text{Liability of insurer}$$

Thus, Security Mutual's payment amount was calculated as follows:

$$\frac{\$50,000 \text{ (Security Mutual's policy)}}{\$150,000 \text{ (Total of both policies)}} \times \$30,000 \text{ (Loss)} = \$10,000$$

Reliable's payment amount could be similarly calculated by substituting \$100,000 (Reliable's policy amount) for the \$50,000 (Security Mutual's policy amount) in the numerator of the equation. This formula may be used for both partial and total losses. However, each company's payment obligation is limited by the face amount of its policy. Thus, Security Mutual could never be liable for more than \$50,000. Similarly, Reliable's liability is limited to a maximum of \$100,000.

Right of Subrogation The insurer may be able in some instances to exercise a **right of subrogation** if it is required to pay for a loss under a property insurance contract. Under the right of subrogation, the insurer obtains all of the insured's rights to pursue legal remedies against anyone who negligently or intentionally caused the harm to the property. For example, Arnett purchased a property insurance policy on her home from Benevolent Insurance Company. Arnett's home was completely destroyed by a fire that spread to her property when her neighbor, Clifton, was burning leaves and negligently failed to control the fire. After Benevolent pays Arnett for her loss, Benevolent's right of subrogation entitles it to sue Clifton to recover the amount Benevolent paid Arnett. Arnett will be obligated to cooperate with Benevolent and furnish assistance to it in connection with the subrogation claim.

If the insured provides the liable third party a general release from liability, the insurer will be released from his payment obligation to the insured. Suppose that in the above scenario, Clifton persuaded Arnett to sign an agreement releasing him from liability for the fire. Because this action by Arnett would interfere with Benevolent's right of subrogation, Benevolent would not have to pay Arnett for the loss. A partial release of Clifton by Arnett would relieve Benevolent of responsibility to Arnett to the extent of her release.

Duration and Cancellation of Policy

Property insurance policies are usually effective for a designated period such as six months or a year. They are then extended for consecutive periods of like duration if the insured continues to pay the necessary premium and neither the insured nor the insurer elects to cancel the policy. The insured is normally entitled to cancel the policy at any time by providing the insurer written notice to that effect or by surrendering the policy to the insurer. Although property insurers usually have some right to cancel policies, terms of the policies themselves and/or governing law typically limit the grounds on which property insurers may do so. Permitted grounds for cancellation

include the insured's nonpayment of the premium and, as a general rule, the insured's misrepresentation or fraud (see this chapter's discussion of contract law's applicability to insurance policies). Policy provisions and/or applicable law typically provide that if the property insurer intends to cancel the policy, the insured must be given meaningful advance written notice (often 30 days) of this intent before cancellation takes effect.

Another cancellation basis exists by virtue of the **increase of hazard** clauses that appear in many property insurance policies. An increase of hazard clause provides that the insurer's liability will be terminated if the insured takes any action materially increasing the insurer's risk. Some increase of hazard provisions also specify certain types of behavior that will cause termination. Common examples of such behavior include keeping highly explosive material on the property and allowing the premises to remain vacant for a lengthy period of time.

Liability Insurance

As its name suggests, liability insurance provides the insured the ability to transfer liability risks to the insurer. Under policies of liability insurance, the insurer agrees, among other things, to pay sums the insured becomes legally obligated to pay to another party. This enables the insured to minimize the troublesome or even devastating financial effects that he could experience in the event of his liability to someone else.

Types of Liability Insurance Policies

Liability insurance policies come in various types. These include, but are not limited to, **personal liability policies** designed to cover a range of liabilities an individual person could face; **business liability policies** (sometimes called *comprehensive general liability policies*) meant to apply to various liabilities that sole proprietors, partnerships, and corporations might encounter in their business operations; **professional liability policies** (sometimes called *malpractice insurance policies*) that cover physicians, attorneys, accountants, and members of other professions against liabilities to clients and sometimes other persons; and **workers' compensation policies** under which insurers agree to cover employers' statutorily required obligation to pay benefits to injured workers.

Some policies combine property insurance features with liability insurance components. Automobile insurance policies, for instance, afford property insurance when they cover designated automobiles owned by the

insured against perils such as vandalism, hail, and collisions with animals, telephone poles, and the like. Other sections of automobile insurance policies provide liability insurance to the insured (the policy owner), members of her household, and sometimes other authorized drivers when their use of a covered automobile leads to an accident in which they face liability to another party. Typical homeowners' policies also combine property and liability insurance features. Besides covering the insured's home and contents against perils of the types discussed earlier in this chapter, these policies normally provide the insured coverage for a range of liabilities he may face as an individual.

Liabilities Insured Against Although the different types of liability insurance policies discussed above contain different terms setting forth the liabilities covered and not covered, liability policies commonly afford coverage against the insured's liability for negligence but not against the insured's liability stemming from deliberate wrongful acts (most intentional torts and most behavior constituting a crime). Liability policies tend to reach this common ground in the same sorts of ways property insurance policies define the scope of coverage—by listing particular liabilities that are covered and stating that an unlisted liability is not covered, by setting forth a seemingly broad statement of coverage and then specifying exclusions from coverage, or by employing a combination of the previous approaches (e.g., specifying certain covered liabilities and certain excluded liabilities).

Personal Liability and Homeowners' Policies Personal liability policies and the liability sections of homeowners' policies often state that coverage is restricted to instances of "bodily injury" and "property damage" experienced by a third party as a result of an "occurrence" for which the insured faces liability. These sorts of policies normally define *occurrence* as an "accident" resulting in bodily injury or property damage. The provisions just noted often lead to the conclusion that intentional torts and most criminal behavior, if committed or engaged in by the insured, would fall outside the coverage of the policy at issue because they are not accidents (whereas instances of the insured's negligence would be). This conclusion is underscored by typical clauses purporting to exclude coverage for bodily injury or property damage the insured intended to cause. However, as illustrated by *Auto-Owners Insurance Co. v. Harvey*, which follows shortly, ambiguity in a liability policy's occurrence provision may sometimes lead to a conclusion that the policy covers an intentional action whose particular consequences were not intended.

The occurrence, bodily injury, and property damage references in liability policies also indicate that harms stemming from, for example, breach of contract would not be covered either (no accident, no bodily injury, no property damage). In addition, personal liability policies and liability sections of homeowners' policies tend to specify that if bodily injury or property damage results from the insured's business or professional pursuits, it is not covered.

Auto-Owners Insurance Co. v. Harvey

842 N.E.2d 1279 (Ind. Sup. Ct. 2006)

Brandy Harvey, age 16, and Toby Gearheart, age 19, were at a Wabash River boat ramp one evening. When a disagreement arose, Brandy moved toward Gearheart and pushed him toward the water more than once. When she again approached Gearheart, he put his hands on her shoulders and pushed her. Brandy lost her balance and fell off the boat ramp, down a rocky embankment, and into the river, where she drowned. In a criminal proceeding concerning the incident, Gearheart pleaded guilty to involuntary manslaughter.

Acting as co-personal representatives of Brandy's estate, her parents, Jon Harvey and Misty Johnson, filed a wrongful death action against Gearheart in an Indiana trial court. They contended in their complaint that Gearheart's "negligence and recklessness" had caused Brandy's death. Harvey and Johnson also named Auto-Owners Insurance Co. as a defendant on the theory that because of the liability insurance portion of a homeowners' insurance policy issued to Gearheart's parents, Auto-Owners would be obligated to pay any judgment entered against Gearheart (who still lived in his parents' home and was therefore an insured person under the policy). The insurance policy at issue stated that Auto-Owners "will pay all sums any Insured becomes legally obligated to pay as damages because of or arising out of bodily injury or property damage caused by an occurrence to which this coverage applies." The policy also defined "occurrence" to mean "an accident that results in bodily injury or property damage and includes, as one occurrence, all continuous or repeated exposure to substantially the same generally harmful conditions." The word "accident" was not defined in the policy. In addition, an

exclusion set forth in the policy indicated that there was no coverage for “bodily injury or property damage reasonably expected or intended by the insured.”

Auto-Owners moved for summary judgment, asserting that in view of the facts and the above-quoted provisions, the policy furnished no coverage in regard to Gearheart’s actions. The trial court denied Auto-Owners’ motion, but the Court of Appeals of Indiana reversed. Harvey and Johnson appealed to the Supreme Court of Indiana.

Dickson, Justice

Auto-Owners contends that it was entitled to summary judgment on two separate grounds, which [allegedly] establish as a matter of law that there is no coverage under its policy: (1) Gearheart’s conduct does not constitute an “occurrence” as required by the policy’s insuring agreement; and (2) Gearheart’s conduct falls under the [policy’s exclusion for] intended or expected harm.

To support its contention that Brandy’s death did not result from an “occurrence” as defined in the policy, Auto-Owners first argues that it was not an “accident” because Gearheart, though insisting that he did not intend to harm Brandy, admitted that he intended to push her. Auto-Owners asserts that because Gearheart’s conduct was intentional, the incident was not an accident. It urges [in its brief] that Gearheart’s testimony regarding whether he intended harm to result from his intentional act of pushing “is not relevant as to whether there was an ‘occurrence.’” Rather, Auto-Owners urges that Brandy’s death was the natural and probable result of Gearheart’s voluntary and intentional act of pushing, and thus her death should not be considered an “accident” for insurance purposes.

Certain disparity in bargaining power, which is characteristic of the parties to insurance contracts, has led courts to develop distinct rules of construction for those contracts. If a contract is clear and unambiguous, its language is given its plain meaning. But if there is ambiguity, the contract is construed strictly against the insurer, and the language of the policy is viewed from the insured’s perspective. “An ambiguity exists where a provision is susceptible to more than one interpretation and reasonable persons would differ as to its meaning.” [Case citation omitted.]

Indiana case law has held that, “in the context of insurance coverage, an accident means an unexpected happening without an intention or design.” [Case citation omitted.] This description is consistent with the plain meaning of “accident,” as indicated by the primary definition provided in several modern dictionaries. We agree with Auto-Owners that implicit in the meaning of “accident” is the lack of intentionality.

In the present case, the policy states that Auto-Owners will pay for its insured’s legal liability for “damages because of or arising out of bodily injury or property damage caused by an occurrence.” Under the facts of this case, however, the meaning and application of this provision is unclear. The language used by Auto-Owners can reasonably be understood in two different

ways, depending on whether “occurrence” means Gearheart’s push or Brandy’s drowning. The policy language does not require that the “occurrence” or “accident” be limited to the actions of the insured. The claimed damages clearly arise out of Brandy’s death, and the coverage ambiguity thus is whether the death should be considered to have been caused by the event of Gearheart’s pushing or by the event of Brandy’s drowning. If the required “accident” refers to Gearheart’s push, then it is undisputed that it did not occur unexpectedly or unintentionally. If it applies to Brandy’s slip, fall, and drowning, however, it is not clear that the drowning was clearly unexpected and unintentional. It was obviously unexpected and unintentional from Brandy’s perspective, and possibly so from Gearheart’s point of view. We thus find the policy language ambiguous and must construe it against Auto-Owners, holding that the term “occurrence” applies to Brandy’s slip, fall, and drowning, and not to Gearheart’s push.

Auto-Owners further contends that Brandy’s death did not result from an “accident” (and thus was not an “occurrence” covered by the policy) because of Gearheart’s plea of guilty to involuntary manslaughter, which it asserts conclusively establishes that Gearheart battered Brandy by pushing her, resulting in her death. It argues [in its brief] that “intentional conduct is not accidental and thus not an occurrence for purposes of insurance coverage,” and that the intentionality of Gearheart’s conduct was conclusively established in the criminal proceedings and may not be relitigated in this case. Auto-Owners urges that by this guilty plea, Gearheart admitted that pushing Brandy posed a serious risk of injury and that he intended to batter her.

The crime of battery, which [Indiana law establishes as] the knowing or intentional touching of another person in a rude, insolent, or angry manner, is among the crimes that, if resulting in death, can constitute the crime of involuntary manslaughter. Involuntary manslaughter is distinguished from the crime of murder by whether the defendant intended to batter or kill. The intent that must be shown to prove involuntary manslaughter is the intent required by the predicate offense, which in this case was battery.

The [record in this case contains] the plea agreement and the judgment of conviction, but not the charging information, the contents of which are not reflected in the plea agreement or judgment. These documents show that Gearheart pleaded guilty to, and was convicted of and sentenced for, involuntary

manslaughter, a felony. The plea agreement also reflects that Gearheart acknowledged “that entry of a guilty plea pursuant to this Agreement constitutes an admission of the truth of all facts alleged in the charge.”

Auto-Owners asserts [in its brief] that Gearheart pleaded guilty to the charge that he “did kill another human being, to wit: Brandy Nicole Harvey, while committing or attempting to commit battery.” But the quoted language does not appear in the plea agreement, and we do not find it elsewhere in the record. [Harvey and Johnson concede in their brief] that the acceptance of Gearheart’s guilty plea constituted a judicial determination “that [Gearheart] committed a ‘knowing’ touching of Brandy in a rude, insolent or angry manner, resulting in her death, and that there was a factual basis for the plea.” They argue, however, that Gearheart’s plea judicially admitted only the unlawful touching, but nothing concerning his “motive, mental operations, intentions or purpose in pushing Brandy.”

We are not persuaded by the claim of Auto-Owners that Gearheart’s guilty plea conclusively establishes that there is no coverage under the “occurrence” clause. At most, the guilty plea shows only that Gearheart intended the battery (improper touching by pushing Brandy), and that her death resulted. But it does not establish that he intended Brandy’s slip, fall, and drowning, and thus does not preclude the assertion that her death was accidental, and thus an “occurrence.” And, as discussed above, the “occurrence” language of the Auto-Owners policy must be construed to refer not to Gearheart’s push, but to Brandy’s slip, fall, and drowning. The push was not accidental, but a genuine issue exists whether the drowning and resulting death were. We conclude that the trial court did not err in denying Auto-Owners’ motion for summary judgment as to its claim that the plaintiffs’ claims fall outside the “occurrence” requirement of its liability insurance coverage.

In addition to claiming no coverage as a matter of law due to the requirement of an “occurrence” in its insuring agreement, Auto-Owners also contends that there is no coverage because of a policy exclusion declaring that the personal liability coverage does not apply to “bodily injury or property damage reasonably expected or intended by the insured.” In contrast to the insurance policy’s insuring agreement that requires the occurrence to be accidental, this exclusion more narrowly considers whether the resulting injury or damage was intentional or reasonably expected by the insured.

Auto-Owners argues that the exclusion for intended injury or damage applies because the nature and character of Gearheart’s conduct was such that his intent to harm Brandy must be inferred as a matter of law, regardless of his subjective intent, and because of his guilty plea to involuntary manslaughter. It urges that from the physical circumstances of the boat ramp, Gearheart’s knowledge of Brandy’s proximity to its edge, and

the comparative size and strength of Gearheart and Brandy, his intent to harm her should be inferred as a matter of law, arguing [in its brief] that the chance she would be harmed was “not only reasonable, . . . it was a certainty.”

Auto-Owners does not assert that the presence or force of Gearheart’s hands on Brandy’s shoulders, standing alone, directly caused a “bodily injury” under the policy exclusion. Rather, it “contends that under the circumstances, the only reasonable conclusion or inference to be drawn . . . is that [Brandy] would fall into the Wabash River and be harmed if Gearheart pushed her.” We initially observe that, as discussed above, Gearheart’s plea to involuntary manslaughter at most shows that he intended to push Brandy, but it does not establish that he intended or expected her to fall into the river and drown. His plea therefore is not conclusive upon whether Brandy’s death was “reasonably expected or intended by the insured,” as required for the coverage exclusion to apply.

Basic summary judgment jurisprudence [also] suggests [that Gearheart’s intent to harm Brandy should not be inferred as a matter of law]. Auto-Owners acknowledges that Gearheart insists that he did not intend to harm Brandy. Gearheart testified [in his deposition] that when he pushed Brandy, he did not intend or expect for her to fall into the water or to be physically injured. In ruling on a motion for summary judgment, not only all facts but also all reasonable inferences drawn from those facts are construed in favor of the nonmoving party. The court must accept as true those facts alleged by the nonmoving party and resolve all doubts against the moving party. Application of these principles requires us to accept for summary judgment purposes Gearheart’s statements and to reject the claim that Brandy’s death was “intended” by the insured.

[In an effort to overcome] Gearheart’s statements expressly denying any intent or expectation to cause bodily injury to Brandy and explaining the circumstances of his push of Brandy, . . . Auto-Owners emphasizes evidence regarding the physical dimensions of the boat ramp, Gearheart’s knowledge of Brandy’s proximity to its edge, Gearheart’s awareness of his own size and strength as compared to Brandy, and [the fact] that Gearheart’s push of Brandy caused her to slip and fall into the river. This evidence is definitely not so overwhelming as to mandate us to conclude that Gearheart must have intended to harm Brandy. Because Auto-Owners has failed to demonstrate the absence of a genuine issue of material fact regarding Gearheart’s intent to harm Brandy, the trial court was correct to deny summary judgment on Auto-Owners’ claimed application of the coverage exclusion. [We therefore conclude that the Court of Appeals erred in reversing the trial court’s decision.]

Decision of Court of Appeals reversed, and case remanded for further proceedings.

Business Liability Policies Business liability policies also feature coverage for bodily injury and property damage stemming from the insured's actions. The relevant range of actions, of course, is broadened to include the insured's business pursuits or "conduct of business." A major focus remains on unintentional wrongful conduct (usually negligence) of the insured, with the insured's deliberate wrongful acts normally being specifically excluded from coverage. Another typical exclusion is the pollution exclusion, which deprives the insured of coverage for actions that lead to pollution of other parties' property, unless the pollution occurs suddenly and accidentally.

Business liability policies also tend to provide the insured coverage in instances where the insured would be liable for certain torts of his employees (normally under the *respondeat superior* doctrine).⁹ In addition, business liability policies sometimes afford coverage broader than instances of tortious conduct producing physical injury or property damage. Some policies, for instance, contain a clause that contemplates coverage for the insured's defamation of another person or invasion of that person's privacy (though other policies specifically exclude coverage for those same torts). Furthermore, the broad "conduct of business" language in certain policies, as well as specialized clauses (in some policies) referring to liability stemming from advertising or unfair competition, may contemplate coverage for the insured's legal wrongs that cause others to experience economic harm. In the end, the particular liabilities covered by a business liability policy cannot be determined without a close examination of the provisions in the policy at issue. It may become necessary for a court to interpret a policy provision whose meaning is unclear or scope is uncertain.

Other Liability Policies Professional liability policies also afford coverage for the insured's tortious conduct, this time in the practice of his or her profession. Negligent professional conduct producing harm to a third party (normally bodily injury in the medical malpractice setting but usually economic harm in the legal or other professional malpractice context) would be a covered liability. Wrongful professional conduct of an intentional nature typically would not be covered.

Automobile liability policies cover liability for physical injury and property damage stemming from the insured's (and certain other drivers') negligent driving. Once again, however, there is no coverage for liability arising from the insured's (or another driver's) deliberate vehicle operation acts of a wrongful nature.

Workers' compensation policies tend to approach coverage questions somewhat differently, primarily because injured employees need not prove negligence on the part of their employer in order to be entitled to benefits. Therefore, the insurer's obligation under a workers' compensation policy is phrased in terms of the liability the insured employer would face under state law.

Insurer's Obligations

Duty to Defend When another party makes a legal claim against the insured and the nature and allegations of the claim are such that the insurer would be obligated to cover the insured's liability if the claim were proven, the insurer has a **duty to defend** the insured. A commonsense precondition of this duty's being triggered is that the insured must notify the insurer that the claim has been made against her. The duty to defend means that the insurer must furnish, at its expense, an attorney to represent the insured in litigation resulting from the claim against her. If the insurer fails to perform its duty to defend in an instance where the duty arose, the insurer has breached the insurance contract. Depending on the facts, the breaching insurer would at least be liable for compensatory damages (as indicated in this chapter's earlier discussion of insurance policies as contracts)¹⁰ and potentially for punitive damages as well under the *bad faith* doctrine examined later in this chapter.

Sometimes it is quite clear that the insurer's duty to defend applies or does not apply, given the nature of the claim made against the insured. Other times, however, there may be uncertainty as to whether the claim alleged against the insured would fall within the scope of the liability insurance policy. Such uncertainty, of course, means that it is not clear whether the insurer has a duty to defend. Insurers tend to take one of two approaches

⁹The *respondeat superior* doctrine is discussed in Chapter 36. Although the insured's own intentional torts would not normally be covered, business liability policies sometimes provide that if the insured is liable on *respondeat superior* grounds for an employee's intentional tort such as battery, the insured will be covered unless the insured directed the employee to commit the intentional tort.

¹⁰The compensatory damages in such an instance would normally be the reasonable costs incurred by the insured in retaining an attorney and paying him to represent her. Of course, if the insured ended up being held liable in the third party's suit and the insurer wrongfully refused to pay the damages assessed against the insured in that case, the insured's compensatory damages claim against the breaching insurer would be increased substantially.

in an effort to resolve this uncertainty. Under the first approach, the insurer files a declaratory judgment action against the insured. In this suit, the insurer asks the court to determine whether the insurer owes obligations to the insured under the policy in connection with the particular liability claim made against the insured by the injured third party. The other option insurers often pursue when it is unclear whether the liability policy applies is to retain an attorney to represent the insured in the litigation filed by the third party—thus fulfilling any duty to defend that may be owed—but to do so under a *reservation of rights* notice. By providing the reservation of rights notice to the insured, the insurer indicates that it reserves the right, upon acquisition of additional information, to conclude (or seek a later judicial determination) that it does not have the obligation to pay any damages that may be assessed against the insured as a result of the third party's claim. The insurer's reservation of rights also serves to eliminate an argument that by proceeding to defend the insured, the insurer waived the ability to argue that any actual liability would not be covered.

Duty to Pay Sums Owed by Insured If a third party's claim against the insured falls within the liabilities covered by the policy, the insurer is obligated to pay the compensatory damages held by a judge or jury to be due and owing from the insured to the third party. In addition, the insured's obligation to pay such expenses as court costs would also be covered. These payment obligations are subject, of course, to the policy limits of the insurance contract involved. For example, if the insured is held liable for compensatory damages and court costs totaling \$150,000 but the policy limits of the relevant liability policy are \$100,000, the insurer's contractual obligation to pay sums owed by the insured is restricted to \$100,000.

Is the insurer also obligated to pay any *punitive damages* assessed against the insured as a result of a covered claim? As a general rule, the insurer will have no such obligation, either because of an insurance contract provision to that effect or because of judicial decisions holding that notions of public policy forbid arrangements by which one could transfer his punitive damages liability to an insurer. Not all courts facing this issue have so held, however, meaning that in occasional instances the insured's punitive damages liability may also be covered if the insurance policy's terms specifically contemplate such a result.

The liability insurer need not wait until litigation has been concluded to attempt to dispose of a liability claim made against the insured. Insurance policy provisions, consistent with our legal system's tendency to encourage

voluntary settlements of claims, allow insurers to negotiate settlements with third parties who have made liability claims against the insured. These settlements involve payment of an agreed sum of money to the third party, in exchange for the third party's giving up her legal right to proceed with litigation against the insured. Settlements may occur regardless of whether litigation has been formally instituted by the third party or whether the claim against the insured consists of the third party's prelitigation demand for payment by the insured. If settlements are reached—and they are reached much more often than not—the substantial costs involved in taking a case all the way to trial may be avoided. The same is also true, from the insurer's perspective, of the damages that might have been assessed against the insured if the case had been tried. Note, however, that even if the defendant (the insured) wins a suit that does proceed to trial, the costs to the insurer are still substantial even though there is no award of damages to pay. Those costs include a considerable amount for attorney's fees for the insured (the insurer's obligation regardless of the outcome of the case) as well as other substantial expenses associated with protracted litigation. Accordingly, even when the insurer thinks that the insured probably would prevail if the case went to trial, the insurer may be interested in pursuing a settlement with the third-party claimant if a reasonable amount—an amount less than what it would cost the insurer to defend the case—can be agreed upon.

Is There a Liability Insurance Crisis?

Since the mid-1980s, the necessary premiums for liability insurance policies of various types (particularly business and professional liability policies) have risen considerably. Sometimes, the premiums charged by liability insurers have become so substantial that would-be insureds have concluded that they cannot afford liability insurance and therefore must go without it despite its importance. In addition, some insurers have ceased offering certain types of liability policies and/or have become much more restrictive in their decisions about which persons or firms to insure.

Insurance companies tend to blame the above state of affairs on what they see as a tort law regime under which plaintiffs win lawsuits too frequently and recover very large damage awards too often. As a result, insurers have been among the most outspoken parties calling for tort reform, a subject discussed in earlier chapters in this book. Plaintiffs' attorneys and critics of the insurance industry blame rising liability insurance premiums on, primarily, another alleged cause: questionable investment practices and other unsound business practices

CYBERLAW IN ACTION

So-called bugs in Version 5.0 of America Online's Inc.'s Internet access software ("AOL 5.0") drew the ire of large numbers of disgruntled customers. In numerous cases that were later consolidated, these customers sued AOL. Relying on a variety of legal theories, the plaintiffs contended that AOL 5.0 was defective and that as a result, their computers crashed or they experienced other loss of use of their computers, computer systems, and computer software and data.

AOL called upon its liability insurer, St. Paul Mercury Insurance Co., to defend it against the customers' claims. St. Paul refused, contending that the claims did not fall within the coverage obligations St. Paul had assumed. AOL retained legal counsel to defend it against the customers' claims and then sued St. Paul for an alleged breach of the contract of insurance. Concluding that the claims against AOL were not covered by the policy St. Paul issued, a federal district court granted summary judgment in favor of St. Paul. AOL appealed.

In *America Online, Inc. v. St. Paul Mercury Insurance Co.*, 347 F.3d 89 (4th Cir. 2003), the U.S. Court of Appeals for the Fourth Circuit considered AOL's appeal. The court began its analysis by noting basic rules applicable to insurance policy interpretation and determinations of whether a liability insurer must defend its policyholder against third parties' claims. First, if the language of the policy is unambiguous, the court will "give the words their ordinary meaning and enforce the policy as written." Second, "if the language of the policy is subject to different interpretations, [the court] will construe it in favor of coverage." Third, the insurer's "obligation to defend arises whenever the complaint against the insured alleges facts and circumstances, some of which, if proved, would fall within the risk covered by the policy."

The St. Paul policy at issue included a coverage provision stating that St. Paul would "pay amounts [AOL] is legally required to pay as damages for covered bodily injury, property damage, or premises damage." The policy defined *property damage* as "physical damage to tangible property of others, including all resulting loss of use of that property . . . or loss of use of tangible property of others that isn't physically damaged."

In addition, the St. Paul policy excluded certain events or harms from coverage. Among these exclusions was a provision stating that St. Paul would not cover "property damage to impaired property, or to property which isn't physically damaged, that results from [AOL's] faulty or dangerous products or completed work [or from] a delay or failure in fulfilling the terms of a contract or agreement." The policy defined *impaired property* as "tangible property, other than [AOL's] products or completed work, that can be restored to use by nothing more than . . . an adjustment, repair, replacement, or

removal of [AOL's] products or completed work which forms a part of it, [or AOL's] fulfilling the terms of a contract or agreement."

Proceeding to interpret the St. Paul policy in light of the rules noted earlier, the court paid careful attention to the types of damages sought by the AOL customers. The court reasoned that claims seeking damages from AOL for harm to or loss of use of computer systems or computer software or data were not covered claims because systems, software, and data are not "tangible" since they are not "'capable of being touched [and] able to be perceived as materially existent . . . by the sense of touch'" [quoting definition of "tangible" in *Webster's New Third International Dictionary of the English Language* (1993)]. Systems, software, and data thus would not appear to be "tangible property" for purposes of St. Paul's policy. The Fourth Circuit also noted that computer systems, software, and data are customarily classified by courts as *intangible* property. In view of the St. Paul policy's *property damage* definition (quoted above) and its references to "tangible property," the court held that any harm to or loss of use of computer data, software, and systems would not be covered by the policy.

The claims brought against AOL, however, also alleged loss of use of the customers' computers. The court concluded that the computers themselves would be tangible property under the definition set forth above and that the claims alleging loss of use of computers might therefore appear, at first glance, to be covered by the policy. However, the Fourth Circuit noted, the AOL customers were not actually alleging that their computers were physically harmed. Instead, the AOL customers were contending that AOL 5.0 interfered with the proper operation of their computers and that loss of use of the computers resulted. The claimants' allegations that their computers crashed were substantively allegations of system failure rather than of physical harm to the computers themselves. The absence of a claim of physical damage to the computers meant that harm consisting of loss of use would not be covered by the portion of the *property damage* definition that referred to "physical damage to tangible property of others, including all resulting loss of use of that property."

Still potentially applicable, though again at first glance only, was the portion of the *property damage* definition that appeared to cover "loss of use of tangible property of others that isn't physically damaged." That possible avenue to coverage was blocked, according to the court, by the St. Paul policy's "impaired property" exclusion. The plaintiffs, after all, premised their claim on the notion that AOL 5.0 was defective and that as a result, their computers were rendered inoperable. The court observed that "the straightforward meaning of [the impaired property] exclusion bars coverage

for loss of use of tangible property of others that is not physically damaged by the insured's defective product." The Fourth Circuit stressed that even though AOL 5.0 allegedly "caused damage to other software, including operating systems[. . .] there has been no demonstration or claim that the physical or tangible components of any computer were damaged. In the absence of property that is physically

damaged, AOL's arguments for covering loss of use must be rejected."

Having concluded that none of the customers' claims against AOL came within the terms of the St. Paul policy, the Fourth Circuit affirmed the district court's grant of summary judgment to St. Paul and held that the insurer owed AOL no duty to defend it against those claims.

Ethics in Action

With the costs of medical treatment, hospitalization, and medications having increased dramatically in recent years, health insurance has become a critical means by which insured persons minimize the adverse financial consequences associated with illness and injury. The costs of serious illness or injury may be financially crippling unless insurance coverage exists. Often this coverage comes in the form of a group policy that is made available to employees of a certain company or to persons affiliated with a particular organization. Subject to certain exclusions and other contractual restrictions, group policies tend to cover a significant portion of the costs of obtaining health care services.

Although a very large percentage of the U.S. population has some form of health insurance, many millions of U.S. residents do not. Public policy questions regarding health insurance availability and costs have been debated extensively in political arenas during the past two decades, but sweeping legislative proposals to increase access to health coverage had not been enacted into law at the federal level as of the time this book went to press in 2008. Congress has opted for more limited measures, such as the Health Insurance Portability and Accountability Act of 1996, which allows most employees who had health insurance in connection with their employment

to change jobs without fear of losing health coverage. This statute followed the lead of the earlier COBRA statute, under which persons who end an employment status that had entitled them to group policy coverage may continue that coverage for a limited time.

Much of the debate over whether health insurance "reform" is desirable tends to have an ethical flavor. For instance, consider the questions set forth below. In doing so, you may wish to employ the ethical theories discussed in Chapter 4.

- Is there a "right," in an ethical sense, to health insurance coverage? If so, why? If not, why not?
- Do employers have an ethical obligation to make group health insurance available to their employees? If so, why? If so, does this obligation always exist, or does it exist only under certain circumstances? If employers do not have such an obligation, why don't they?
- Would Congress be acting ethically if it enacted a law requiring the vast majority of employers in the United States to make health insurance available to their employees? Be prepared to justify your position.
- Does the U.S. government have an ethical duty to furnish health coverage to all U.S. residents? Be prepared to justify your position.

supposedly engaged in by insurance companies. The parties making these assertions thus oppose tort reform efforts as being unnecessary and unwise.

Liability insurance premiums in general may not be increasing as rapidly today as they once did, but they remain substantial in amount. So long as liability insurance remains unaffordable or otherwise difficult to obtain, there is a "crisis," given the adverse financial consequences that could beset an uninsured person. This is so regardless of which of the competing explanations set forth above bears greater legitimacy.

Bad Faith Breach of Insurance Contract

Earlier in this chapter, we discussed the liability that an insurer will face if it breaches its policy obligations by means of a good faith but erroneous denial of coverage. That liability is for compensatory damages—damages designed to compensate the insured for the losses stemming from the insurer's breach—just as in breach of contract cases outside the insurance setting. Punitive

damages are not available, however, when the insurer's wrongful failure or refusal to perform stemmed from a good faith (though erroneous) coverage denial. What if the insurer's failure or refusal to perform exhibited a lack of good faith? In this section, we examine the recent judicial tendency to go beyond the conventional remedy of compensatory damages and to assess punitive damages against the insurer when the insurer's refusal to perform its policy obligations amounted to the tort of **bad faith breach of contract**.

The special nature of the insurer–insured relationship tends to involve a “we’ll take care of you” message that insurers communicate to insureds—at least at the outset of the relationship. Recognizing this, courts have displayed little tolerance in recent years for insurers’ unjustifiable refusals to take care of insureds when taking care of them is clearly called for by the relevant policy’s terms. When an insurer refuses to perform obvious policy obligations without a plausible, legitimate explanation for the refusal, the insurer risks more than being held liable for compensatory damages. If the facts and circumstances indicate that the insurer’s refusal to perform stemmed not from a reasonable argument over coverage but from an intent to “stonewall,” deny or unreasonably delay paying a meritorious claim, or otherwise create hardship for the insured, the insurer’s breach may be of the bad faith variety. Because bad faith breach is considered an independent tort of a flagrantly wrongful nature, punitive damages—in addition to compensatory damages—have been held to be appropriate. The purposes of punitive damages in this context are the same as in other types of cases that call for punitive damages: to punish the flagrant wrongdoer and to deter the wrongdoer

(as well as other potential wrongdoers) from repeating such an action.

The past 25 years have witnessed bad faith cases in which many millions of dollars in punitive damages have been assessed against insurers. The types of situations in which bad faith liability has been found have included a liability insurer’s unjustifiable refusal to defend its insured and/or pay damages awarded against the insured in litigation that clearly triggered the policy obligations. Various cases involving very large punitive damages assessments for bad faith liability have stemmed from property insurers’ refusals to pay for the insured’s destroyed property when the cause was clearly a covered peril and the insurer had no plausible rationale for denying coverage. Still other bad faith cases in which liability was held to exist have included malpractice or other liability insurers’ refusals to settle certain meritorious claims against the insured within the policy limits. Bad faith liability in these cases tends to involve a situation in which the insured is held legally liable to a plaintiff for an amount well in excess of the dollar limits of the liability policy (meaning that the insured would be personally responsible for the amount of the judgment in excess of the policy limits), after the liability insurer, without reasonable justification, refused the plaintiff’s offer to settle the case for an amount less than or equal to the policy limits. The *Vining* case, which follows, furnishes another example of behavior that triggers bad faith liability.

Whether bad faith liability exists in a given case depends, of course, on all of the relevant facts and circumstances. Although bad faith liability is not established in every case in which insureds allege it, cases raising a bad faith claim are of particular concern to insurers.

Vining v. Enterprise Financial Group, Inc.

148 F.3d 1206 (10th Cir. 1998)

Enterprise Financial Group, Inc., provided financing and credit life insurance to consumers who bought automobiles at Crown Auto World in Tulsa, Oklahoma. If purchased by a car buyer, the credit life insurance would pay off the customer’s car loan in the event of his death. In March 1992, Milford Vining (Milford) purchased a jeep at Crown Auto World. Nancy Sidler, an Enterprise employee whose office was at the dealership, sold a credit life insurance policy to Milford when he purchased the jeep.

In late May 1993, Milford suffered a heart attack and died. His surviving spouse, Billie Vining (Vining), filed a claim with Enterprise for death benefits of approximately \$10,000 under Milford’s credit life policy. Enterprise refused to pay the claim and rescinded the policy on the supposed ground that Milford had misrepresented his health history in his application for the credit life policy. After unsuccessfully contesting the rescission, Vining sued Enterprise for breach of contract and for rescinding the policy in bad faith. In defense, Enterprise maintained that it had a legitimate basis for contesting the claim and that Milford had made material misrepresentations in his application for the credit life policy.

The evidence adduced at trial showed that in 1983, Milford suffered from coronary artery disease and underwent a triple bypass operation. After the surgery and follow-up tests, Milford began taking heart maintenance medication to prevent the

occurrence of angina. From the time immediately following the 1983 surgery until the time of his death, Milford led an active life. He did not complain of chest pain or related symptoms.

In February 1992, Milford visited Dr. Michael Sullivan. This visit took place because Milford, who had recently moved, wanted to find a doctor closer to home. Milford's visit to Dr. Sullivan was not brought on by illness or physical symptoms. At the general time of this visit, Milford suffered from little, if any, angina. Dr. Sullivan continued Milford on his heart maintenance medications as a preventive measure. When Milford applied for the credit life policy in March 1992, he signed an application that contained the following statement:

I HEREBY CERTIFY THAT I AM IN GOOD HEALTH AS OF THE EFFECTIVE DATE ABOVE. I FURTHER CERTIFY THAT I DO NOT PRESENTLY HAVE, NOR HAVE I EVER HAD, NOR HAVE I BEEN TOLD I HAVE, NOR HAVE I BEEN TREATED WITHIN THE PRECEDING 12 MONTHS FOR ANY OF THE FOLLOWING: ANY HEART DISEASE, OR OTHER CARDIOVASCULAR DISEASES.

Vining presented evidence designed to show that Enterprise routinely rescinded credit life policies after insureds' deaths and that the rescission of Milford's policy fit into this pattern. The jury returned a verdict in Vining's favor, awarding her \$400,000 in compensatory damages for financial losses, emotional distress, and related harms. In addition, the jury assessed \$400,000 in punitive damages against Enterprise, which appealed to the U.S. Court of Appeals for the Tenth Circuit.

Ebel, Circuit Judge

Both parties agree that Milford did not intentionally attempt to mislead Enterprise [when he signed the insurance application containing the statement about his health], that Milford's appointment with Dr. Sullivan was his only medical visit in the 12 months preceding the policy purchase date, and that under Oklahoma Insurance Regulations, an insurance company may consider only the last 12 months of an applicant's medical history [when evaluating] an insurance application.

After Milford's death, Enterprise sought all of Milford's medical records, including Dr. Sullivan's notes. On the same day it received Dr. Sullivan's notes, Enterprise rescinded the policy. Enterprise routinely contests all claims on life insurance policies made within two years of a policy's effective date and investigates to find misrepresentations in the insurance application. [U]nder Oklahoma law, a claim made more than two years after the effective date of a life insurance policy is generally incontestable by the insurer. Debbie Cluck, Enterprise's claims examiner, denies four out of every ten claims that she reviews. Enterprise does not have a claims manual or any written guidelines specifying when a claim is payable or not, and it never informed Cluck of any applicable Oklahoma law or regulation pertaining to when a policy may be rescinded.

Cluck felt it appropriate to rescind a policy even if the agent issued the policy with full knowledge of an applicant's medical history. Cluck's beliefs comport with Enterprise company philosophy. Cluck never paid a claim if she had any reason to doubt whether a person's medical history was inconsistent with the health [statement] included on the insurance application. Cluck rescinded Milford's policy because she considered the office visit with Dr. Sullivan and the continuation of his angina medication by Dr. Sullivan [as] constitut[ing] treatment for triple bypass surgery. Cluck did not investigate whether Sidler

[the Enterprise employee who dealt with Milford] was informed of Milford's medical history, did not contact either Sidler or Vining, and did not contact Dr. Sullivan to discuss his notes before rescinding the policy.

Enterprise's training manual for its agents emphasizes that applicants only need to be between the ages of 18 and 65 to purchase insurance. The manual does not discuss the health [statement on the application] or in any way suggest that the agent is supposed to ask the customer about his health. [It does not suggest] that health is relevant [to a decision to issue] the policy. The manual also encourages agents to maximize profit by overstating the actual monthly premium that should be charged and by secretly increasing the actual amount of monthly payments the customer agrees to pay—for example, raising a payment from \$78.22 to \$78.99 because customers look more closely at dollars than cents. The manual informs agents that the life insurance policies they sell are guaranteed issue policies, which means that the coverage is in force immediately as compared to ordinary life insurance [policies, applicants for which] must be approved by the insurer before coverage takes effect.

John Myerson was Enterprise's representative to agents at automobile dealerships that sell Enterprise life insurance policies. [These agents included Sidler.] Myerson testified that he did not know what the terms used in the health [statement on the application] meant and that he did not know how Enterprise processed claims. Myerson also testified that he does not train agents to ask about doctor visits or medication. Sidler [was] never . . . trained . . . by Enterprise . . . on what constituted "good health" [for purposes of the application's health statement].

In response to numerous complaints against Enterprise for improper rescission of life insurance policies, the Oklahoma

Insurance Department conducted an investigation of Enterprise's business practices. The Department [issued a 1992 report that] criticized Enterprise for requiring applicants to sign a disclaimer stating that they had never had any health problems. The report sharply criticized Enterprise's loss ratio, the ratio of benefits paid to premiums received, as being unreasonably below accepted levels due to a large number of policy rescissions. Enterprise paid out in benefits only about 16 percent of premiums received. Oklahoma Insurance Department regulations require a 50 percent loss ratio for credit life insurance companies. Based on the report, the Oklahoma Insurance Commissioner issued an order levying a \$15,000 fine against Enterprise for various violations and mandating that Enterprise lower its premiums to produce an acceptable loss ratio level. Enterprise made no changes in light of the report's criticism. In fact, loss ratios for the two years following the report continued to remain below 18 percent. Enterprise's rescission conduct and loss ratios bear some resemblance to those of the fictional insurance company portrayed in John Grisham's novel *The Rainmaker* and in the motion picture of the same name.

Numerous witnesses testified that their decedent spouses had bought life insurance from Enterprise in circumstances similar to [those of] the Vinings. Enterprise summarily rescinded those life insurance policies after the survivors made claims on the policies. In each case, Enterprise cited evidence of an insured's health problems that existed at the time the insured signed a health disclaimer statement in the insurance application as the grounds for rescission.

Finally, John Hammond testified as an expert on the handling and management of insurance claims. Hammond expressed his opinion that Enterprise's conduct was "completely inappropriate." He stated that Enterprise investigated Vining's claim by looking for a reason to rescind the policy. Hammond added that Enterprise erred by not contacting either Sidler, the agent who sold the policy, or Vining before rescinding the policy. Hammond also criticized Enterprise for not providing claims manuals detailing credit life insurance policy eligibility requirements to its claims examiners who were charged with investigating claims on those policies.

Under Oklahoma law, an insurer has a legal duty to "deal fairly and act in good faith with its insured." *Christian v. American Home Assurance Co.* (Okla. Sup. Ct. 1977). An insured may bring a cause of action in tort for bad faith if the insurer breaches this duty. The essence of a bad faith claim centers on the unreasonableness of the insurer's conduct. An insurer does not breach the duty of good faith to pay a claim "by litigating a dispute with its insured if there is a legitimate dispute as to coverage or amount of the claim, and the insurer's position is reasonable and legitimate." *Oulds v. Principal Mutual Life Insurance Co.* (10th Cir. 1993).

Enterprise argues on appeal that because it in fact had a legitimate reason for rescinding Milford's policy based on his medical history and heart condition, Enterprise is entitled as a matter of law to a verdict in its favor on the claim of bad faith. An insurer does not act in bad faith if it had a "good faith belief, at the time its performance was requested, that it had justifiable reason for withholding payment under the policy." *Buzzard v. Farmers Insurance Co.* (Okla. Sup. Ct. 1991). An insurer may legitimately and in good faith dispute a claim based on material misrepresentations in the insured's application for insurance.

Vining does not dispute that her husband had a heart condition and that the insurance application he signed included a disclaimer . . . certifying that he was in good health and had not been treated within the preceding 12 months for heart disease or any other cardiovascular disease. As a result, Enterprise could contest liability on the basis of a misrepresentation if it had a good faith belief that the misrepresentation was intentional. Here, Enterprise reasonably could have determined that by signing the disclaimer, Milford materially misrepresented the condition of his health. However, even a "legitimate dispute as to coverage will not act as an impenetrable shield against a valid claim of bad faith" where the insured presents "sufficient evidence reasonably tending to show bad faith" or unreasonable conduct. *Timberlake Construction Co. v. U.S. Fidelity & Guaranty Co.* (10th Cir. 1995). That is, a plaintiff may bring a bad faith cause of action even though a legitimate defense to a breach of contract claim exists if the defendant did not actually rely on that defense to deny payment under the policy.

Vining demonstrated at trial a deliberate, willful pattern of abusive conduct by Enterprise in handling claims under its life insurance policies. Vining offered evidence that as a matter of course Enterprise would rescind life insurance policies issued on a guaranteed basis as soon as claims were made. Enterprise based these rescissions on the grounds that the insured had made material misrepresentations on the insurance application regardless of whether Enterprise in fact would have declined to write the policy had it known of that information at the time the policy was written. Vining presented evidence that Enterprise engaged in a systematic, bad faith scheme of canceling policies without determining whether it had good cause to do so. Such conduct constitutes bad faith regardless of whether Enterprise legitimately might have been able to contest Vining's claim based on Milford's heart condition, because the evidence showed that Enterprise, in fact, did not dispute coverage in good faith based on Milford's heart condition.

Enterprise also raises the affirmative defense of rescission. Under [an Oklahoma statute], an insurer properly may rescind an insurance policy when the application contains a misrepresentation that (1) is fraudulent; (2) is material to the insurance company's acceptance of the risk; or (3) induced the insurer to

issue the policy where it would not have done so had it known the true facts. However, Enterprise concedes that [the statute does not allow an insurer to rescind unless the insured had an intent to deceive]. Because Enterprise . . . admits that Milford did not willfully or intentionally misrepresent his health history on the application, Enterprise cannot rely on the affirmative defense of rescission.

Enterprise complains that [the district court erred in] the jury instruction [concerning what Vining needed to prove in order to establish bad faith]. Bad faith may be established by showing an unreasonable refusal to pay a claim, and the instruction set forth three alternative scenarios which are deemed to be unreasonable: (1) the insurance company “had no basis for the refusal,” (2) the insurance company did not perform a proper investigation, or (3) the insurance company did not evaluate the results of the investigation properly. As we pointed out earlier, merely because there is a reasonable basis that an insurance company could invoke to deny a claim does not necessarily

immunize the insurer from a bad faith claim if, in fact, it did not actually rely on that supposed reasonable basis and instead took action in bad faith. [T]he jury instruction correctly stated the applicable law.

Enterprise challenges the damages awarded to Vining as excessive and as lacking sufficient evidentiary support. Vining testified at trial regarding the distress she experienced as a result of Enterprise’s conduct toward her during the three years she spent fighting the insurance company over the claim. Such evidence is sufficient in a bad faith claim to support an award for emotional distress. In addition, \$400,000 for mental pain and suffering, financial losses, embarrassment, and loss of reputation in the context of bad faith insurance claims is not excessive on this record. [The award of] \$400,000 in punitive damages [was also appropriate] and need not be adjusted.

Judgment in favor of Vining affirmed.

Problems and Problem Cases

1. Eighteen-year-old Arthur Smith became intoxicated at a New Year’s Eve party. At 11:00 PM, Smith left the party and began walking home. Police officer Don Czopek saw Smith walking down the center of a road and weaving from side to side. Because Smith was interfering with traffic and placing himself at risk of physical harm, Czopek pulled his patrol car alongside Smith and attempted to talk him into getting off the road. Smith refused, became argumentative, and started shouting. Czopek parked his patrol car, got out, and approached Smith in an effort to calm him down. Smith became increasingly hostile and grabbed Czopek by the lapels of his coat. Officer Herdis Petty then arrived on the scene to assist Czopek. A struggle occurred as the two officers attempted to handcuff Smith and put him into a patrol car. Smith kicked, hit, and bit the officers during this struggle, which continued for a substantial length of time. Czopek suffered frostbite on one of his hands. Petty sustained broken ribs as a result of being kicked by Smith (plus other less serious injuries). Smith was later convicted of assault and battery. He admitted that he intentionally resisted arrest but said that he did not recall hitting or kicking anyone. Officers Czopek and Petty filed a civil suit against Smith’s parents, whose homeowners’ policy with Group Insurance Company of Michigan

(GICOM) provided liability coverage to the insureds—a status that, under the policy’s terms, included Arthur Smith—for third parties’ personal injury claims resulting from an “occurrence.” The policy defined “occurrence” as “an accident, including injurious exposure to conditions, which results . . . in bodily injury or property damage.” The policy contained an exclusion from coverage for “bodily injury or property damage which is either expected or intended from the standpoint of the insured.” GICOM filed a declaratory judgment suit in which it asked the court to declare that it had no duty to defend or indemnify Arthur Smith and his parents in connection with the litigation brought by Czopek and Petty. Was GICOM entitled to such a ruling by the court?

2. Don Davis owned a lumber mill that was subject to a \$248,000 mortgage held by Diversified Financial Systems, Inc. Early in 1995, Aaron Harber became interested in forming a partnership with Davis for ownership and operation of the mill. Harber and Davis orally agreed upon the terms of a partnership. Harber contended that these terms included a purchase by Harber of Diversified’s interest in the mortgage on the mill. Davis later informed Harber that he (Davis) would not proceed with the partnership. Nevertheless, Harber purchased Diversified’s mortgage interest in April 1995. Harber did this in reliance on the oral

partnership agreement with Davis—an agreement Harber intended to enforce despite Davis’s refusal to proceed.

During Harber’s negotiations with Davis concerning their supposed partnership and with Diversified for purchase of its mortgage interest, Harber discovered that the mill was not covered by property insurance. Harber therefore purchased a policy from Underwriters at Lloyd’s of London (Lloyd’s). The policy, whose one-year term began in late May 1995, named Harber and U.S.A. Properties, Inc., a corporation set up and wholly owned by Harber, as insureds.

In mid-June 1995, one of the buildings at the mill was destroyed by fire. Approximately two weeks later, in an effort to prompt negotiations in the dispute with Davis over whether a partnership existed or would be pursued, Harber filed suit to foreclose the Diversified mortgage. The mortgage was in default at that time. Harber and Davis soon entered into a settlement agreement that provided in part for the transfer of the mill property to Harber, in exchange for Harber’s giving up all of his claims against Davis. The agreement also conveyed, to Harber, whatever interest Davis had in insurance proceeds related to the building that had been destroyed by fire.

Harber and U.S.A. Properties submitted a claim to Lloyd’s concerning the destroyed building. After Lloyd’s denied the claim, Harber and U.S.A. Properties sued Lloyd’s for payment according to the terms of the policy. A federal district court held that the plaintiffs lacked an insurable interest and that Lloyd’s was therefore entitled to summary judgment. Harber and U.S.A. Properties appealed. Was the district court’s holding correct?

3. Property Owners Insurance Co. (POI) was the insurer and Thomas Cope was the insured under a liability policy that excluded liability except in cases of liability “with respect to the conduct of a business” owned by Cope. Cope’s business was a roofing company. While the policy was in force, Cope traveled to Montana with Edward Urbanski, a person with whom Cope did significant business. While on the trip, Cope snowmobiled with a group of persons that included Gregory Johnson, who died in a snowmobiling accident. Johnson’s estate brought a wrongful death lawsuit against Cope. After Cope notified POI of the case brought against him, POI filed a declaratory judgment action against Cope and Johnson’s estate. In the declaratory judgment action, POI sought a judicial determination that it had no obligations to Cope and

Johnson’s estate under the liability policy. POI took the position that Cope’s trip to Montana was a personal trip for recreation purposes and that it therefore was not a trip “with respect to the conduct of [Cope’s] business.” Cope maintained that even if the trip was largely recreational, it was at least incidental to his business because Urbanski, who also was on the trip, was a business associate of Cope’s. POI moved for summary judgment. Was POI entitled to summary judgment?

4. In a class action suit against Aamco Transmissions, Inc., consumers Joseph R. Tracy and Joseph P. Tracy claimed that Aamco and its network of franchisees used deceptive advertising that inaccurately described Aamco’s services and lured many consumer purchasers of transmission services into paying excessively and for unnecessary repairs. The Tracys asserted that Aamco was liable under the Pennsylvania Unfair Trade Practices and Consumer Protection Law. Aamco was the insured under a comprehensive general liability insurance policy issued by Granite State Insurance Co. This policy provided liability coverage to Aamco “for personal injury or advertising injury . . . arising out of the conduct of” Aamco’s business. The policy defined *advertising injury* as “injury arising . . . in the course of [Aamco’s] advertising activities, if such injury arises out of libel, slander, defamation, violation of right of privacy, piracy, unfair competition, or infringement of copyright, title or slogan.”

Contending that it had coverage under the “unfair competition” category of the advertising injury coverage, Aamco demanded that Granite defend and indemnify it in connection with the consumer class action case described above. When Granite declined to do so, Aamco settled the case on its own. Granite then brought a declaratory judgment action against Aamco in federal district court. Granite sought a ruling that it was not obligated to provide coverage for Aamco in the class action case brought by the Tracys. A federal district court concluded that the *unfair competition* term in the policy contemplated coverage only for common law–based claims against Aamco, not for any claims based on a state or federal statute. Because the Tracys’ class action case was based on a supposed violation of a Pennsylvania statute, the district court held that Granite’s policy did not furnish coverage to Aamco. In addition, the court held that the term *unfair competition* was not ambiguous and that Aamco could not have had a reasonable expectation

- that consumers' claims against it would be covered. Aamco appealed. Did Aamco win its appeal?
5. Sims and Dorothy Good purchased a property insurance policy on their home from Continental Insurance Co. Fire was among the covered perils. The policy contained an "increase of hazard" clause stating that Continental would not be obligated under the policy if the risk of fire was increased "by any means within the control or knowledge of the insured." After the policy took effect, a fire destroyed much of the Goods' home. While putting out the fire, firefighters discovered an illegal liquor still concealed in a false closet under the eaves of the roof. The still, encased by bricks and mortar, consisted of a 90-gallon copper vat over a butane gas burner. Firefighters also discovered 22 half-gallons of "moonshine" and many 55-gallon drums full or partially full of mash. A police detective who dismantled and examined the still's burner after the fire concluded that the still was in operation when the fire occurred. The Goods denied this, though Sims Good admitted having installed the still two years earlier, after the Continental insurance policy became effective. Continental refused to pay the Goods' claim, so the Goods sued Continental to recover proceeds under the policy. After the trial court awarded damages to the Goods, Continental appealed. Were the Goods entitled to recover damages from Continental?
 6. The Plummers owned a commercial building in which they operated two businesses. The building and its contents were insured by Indiana Insurance Company (IIC). After an explosion and fire destroyed the building, the Plummers filed a claim and proof of loss with IIC. After an investigation, IIC denied the claim due to its conclusion that the Plummers had intentionally set the fire. IIC then filed a declaratory judgment action in which it asked for a determination that it had no obligation to cover losses stemming from the fire. The Plummers counterclaimed, seeking damages for breach of contract as well as punitive damages. The jury returned a verdict in favor of the Plummers on all issues. The jury awarded the Plummers approximately \$700,000 in compensatory damages (an amount that exceeded the policy limits set forth in the insurance policy at issue), plus \$3.5 million in punitive damages. The \$700,000 compensatory damages award included not only the value of the destroyed building and its contents (what would have been due under the policy) but also \$200,000 in consequential damages allegedly incurred by the Plummers as a result of IIC's lengthy investigation of the fire and ultimate denial of the Plummers' claim. For the most part, the consequential damages represented interest costs and similar expenses incurred by the Plummers—costs and expenses they would not have incurred if IIC had paid their claim. Although the evidence IIC adduced at trial included experts' testimony that the fire had been intentionally set, the jury rejected that testimony and accepted the Plummers' contrary evidence. IIC appealed, arguing that its denial of the Plummers' claim was in good faith, that it therefore should have no liability for consequential damages and punitive damages, and that the damages awarded for breach of an insurance contract cannot exceed the policy limits set forth in the contract. Was IIC correct in these arguments?
 7. In August 1982, a hog confinement building owned by Charles Ridenour collapsed and was rendered a total loss. Some of Ridenour's hogs were killed as a further result of the collapse. Ridenour made a claim for these losses with his property insurer, Farm Bureau Insurance Company, whose Country Squire policy had been issued on Ridenour's property in July 1977 and had been renewed on a yearly basis after that. Farm Bureau denied the claim because the policy did not provide coverage for the collapse of farm buildings such as the hog confinement structure. Moreover, though the policy provided coverage for hog deaths resulting from certain designated causes, collapse of a building was not among the causes listed. Asserting that the parties' insurance contract was to have covered the peril of building collapse notwithstanding the terms of the written policy, Ridenour sued Farm Bureau. He asked the court to order reformation of the written policy so that it would conform to the parties' supposed agreement regarding coverage. At trial, Ridenour testified about a February 1982 meeting in which he, his wife, and their son discussed insurance coverage with Farm Bureau agent Tim Moomey. Ridenour testified that he wanted to be certain there was insurance coverage if the hog confinement building collapsed because he had heard about the collapse of a similar structure owned by someone else. Therefore, he asked Moomey whether the Country Squire policy then in force provided such coverage. According to Ridenour, Moomey said that it did. Ridenour's wife, Thelma, testified that she asked Moomey (during the same meeting) whether there would be coverage if the floor slats of the hog confinement building collapsed and caused hogs to

fall into the pit below the building. According to her testimony, Moomey responded affirmatively. The Ridenours' son, Tom, testified to the same effect. Mr. and Mrs. Ridenour both testified that they had not completely read the Country Squire policy and that because they did not understand the wording, they relied on Moomey to interpret the policy for them.

Moomey, who had ended his relationship with Farm Bureau by the time the case came to trial, testified that at no time did the Ridenours request that the hogs and the confinement building be insured so as to provide coverage for losses resulting from collapse of the building. Moomey knew that collapse coverage was not available from Farm Bureau for hog confinement buildings. In addition, Moomey testified that he met with Ridenour in April 1982 and conducted a "farm review" in which he discussed a coverage checklist and the Country Squire policy's declarations pages (which set forth the policy limits). This checklist, which Ridenour signed after Moomey reviewed it with him, made no reference to coverage for collapse losses. (Ridenour admitted in his testimony that he had signed the checklist after Moomey read off the listed items to him.) When Moomey was contacted by the Ridenours on the day the building collapsed, he had his secretary prepare a notice of loss report for submission to Farm Bureau. He also assigned an adjuster to inspect the property. Moomey and the adjuster discussed the fact that the Country Squire policy did not provide coverage for Ridenour's losses. Ridenour further testified that the day after the collapse occurred, Moomey told him he was sorry but that Farm Bureau's home office had said there was no coverage.

The trial court granted reformation, as Ridenour had requested. Farm Bureau appealed. Was the trial court's decision correct?

8. Robert Baer and Daren Dahlstrom had been close friends for more than 20 years. Dahlstrom, who was in the process of separating from her husband, went to visit Baer in July 1988. On various occasions, Baer had used a recreational drug known as Ecstasy. For several years after its discovery, Ecstasy was not an illegal drug. It was, however, designated by federal law as a prohibited controlled substance beginning in March 1988. Baer believed that the use of Ecstasy had certain psychological and emotional benefits, and that using it might help Dahlstrom cope with the personal problems she was experiencing at the time of her July 1988 visit. After she and Baer discussed his beliefs regarding Ecstasy, Dahlstrom told him that she wanted to use the drug. Baer and Dahlstrom went through various rituals in preparation for use of the drug and recited a prayer that "this [may] bring harm to no one and blessing to all." Baer then removed some Ecstasy from his personal supply, which he had purchased prior to March 1988. Baer dissolved approximately one-half of his usual dose in a glass of water and gave it to Dahlstrom. She drank the mixture. Within approximately 30 minutes, she was dead. Dahlstrom's survivors filed a wrongful death suit against Baer, who asserted that the claim fell within the liability coverage provided to him by State Farm Insurance Company as part of his homeowner's policy. The policy afforded coverage for third parties' claims for physical injury resulting from an "occurrence," which was defined in terms of an "accident" that caused injury. The policy also contained an exclusion from coverage for injury that was either intended or expected by the insured. State Farm filed a declaratory judgment action in which it asked for a judicial determination that in light of the above provisions in the parties' insurance contract as well as public policy considerations, it owed Baer no coverage duties regarding the suit that stemmed from Dahlstrom's death. Was State Farm entitled to the relief it sought?
9. Jeffrey Lane was employed by Memtek, Inc., at its Arby's Restaurant. He was being trained as a cook. After 11:00 one evening, Lane finished work and clocked out. He remained in the restaurant's lobby, however, because he was waiting for the manager to complete her duties. As Lane waited, friends of other restaurant employees came to a door of the restaurant. Lane and the other employees became involved in a conversation with these persons, who included John Taylor. Lane told Taylor that he could not enter the restaurant because it was closed. Taylor did not attempt to force his way into the restaurant. Instead, he "dared" Lane to come outside. Lane left the restaurant "of [his] own will" (according to Lane's deposition) for what he assumed would be a fight with Taylor. In the fight that transpired, Lane broke Taylor's nose and knocked out three of his teeth. Lane later pleaded guilty to a criminal battery charge. Taylor filed a civil suit against Lane and Memtek in an effort to collect damages stemming from the altercation with Lane. American Family Mutual Insurance Company provided liability insurance for Memtek in connection with its restaurant. The policy stated that for purposes

of American Family's duties to defend and indemnify, "the insured" included not only Memtek but also Memtek's "employees, . . . but only for acts within the scope of their employment." American Family filed a declaratory judgment action in which it asked the court to determine that it owed Lane neither a duty to defend nor a duty to indemnify in connection with the incident giving rise to Taylor's lawsuit. American Family's theory was that for purposes of that incident, Lane was not an insured within the above-quoted policy provision. Was American Family correct?

10. Earl and Vonette Crowell owned a farm in Minnesota. In 1980, they mortgaged the farm to Farm Credit Services and purchased a property insurance policy on the farm (including the farmhouse) from Delafield Farmers Mutual Insurance Co. Fire was among the perils covered by this policy, which ran from October 1985 to October 1988. When the Crowells fell behind on their mortgage payments, Farm Credit began foreclosure proceedings. Upon foreclosure, mortgagors such as the Crowells have a right of redemption for a specified time. The right of redemption allows the defaulting mortgagors to buy back their property after it has been sold to someone else in the foreclosure proceedings. In November 1987, the Crowells' right of redemption expired. Minnesota law provides, however, that farmers who lose their farms to corporate lenders are given an additional opportunity to repurchase their farms under a "right of first refusal." This right meant that Farm Credit was forbidden to sell the farm to anyone else before offering it to the Crowells at a price no higher

than the highest price offered by a third party. Farm Credit allowed the Crowells to remain on the farm while they attempted to secure financing to buy the property under their right of first refusal. In November 1987, a fire substantially damaged the farmhouse. The Crowells filed a claim for the loss with Delafield. Although Delafield paid the claim concerning the Crowells' personal effects that were located inside the farmhouse and were destroyed in the fire, it denied the claim on the farmhouse itself. Delafield took the position that because the time period for the Crowells' right of redemption had expired, they no longer had an insurable interest in the farmhouse. The Crowells therefore sued Delafield. Concluding that the Crowells had an insurable interest in the farmhouse, the trial court granted summary judgment in their favor. Was the trial court correct?

Online Research

State Regulation of Insurance

Most insurance regulation is done by the individual states. Typically, a state agency named the "Department of Insurance" (or something similar) will have significant supervisory and regulatory powers with regard to insurance companies, their business practices, and the policies they issue.

Locate the Web site of the insurance department of a state of your choice. After reviewing information and material available on that Web site, prepare a brief report summarizing the insurance department's role in addressing complaints from consumers regarding insurance company practices.

Bankruptcy

Credit

chapter 28

INTRODUCTION TO CREDIT AND SECURED TRANSACTIONS

Eric Richards decided to go into the commercial laundry and dry-cleaning business. He began by agreeing to buy the land, building, and equipment of a small dry cleaner. Richards agreed to pay the owner \$200,000 in cash and “to assume” a \$50,000 existing mortgage on the property. He next entered into a contract with a local contractor to build, within five months, a large addition to the building for \$150,000 with \$40,000 payable with the signing of the contract and the balance to be paid in periodic installments as the construction progressed. Because Richards had heard some horror stories from friends in the local Chamber of Commerce about contractors who walked away from jobs without completing them, he asked the contractor to post a security bond or provide a surety to ensure the contract would be completed in a timely manner. Richards also had some of the existing dry-cleaning equipment picked up for repair and refurbishment. When the work was completed, the repairman refused to redeliver it until Richards paid in full for the work, claiming he had a lien on the equipment until he was paid.

Among the questions that will be addressed in this chapter are:

- What legal rights and obligations accompany the “assumption” of a mortgage?
- Would Richards risk losing any of his rights to recover against the surety if he granted the contractor additional time to complete the construction?
- If the contractor does not pay subcontractors or companies who provide construction material for the job, would they be able to assert a lien against the property until they are paid?
- Would the person who repaired and refurbished the dry-cleaning equipment be able to assert a lien until Richards paid for it? Would it make a difference if the repair work had been done on-site?
- Whether it would be ethical for a person who has sold a parcel of real property on a land contract to declare a default of the contract when there is a minor default in making the payments called for in the contract and to reclaim possession of the property with the purchaser losing all the equity he might have built up in the property?

IN THE UNITED STATES, a substantial portion of business transactions involves the extension of credit. The term *credit* has many meanings. In this chapter, it will be used to mean transactions in which goods are sold, services are rendered, or money is loaned in exchange for a promise to repay the debt at some future date.

In some of these transactions, a creditor is willing to rely on the debtor’s promise to pay at a later time; in others, the creditor wants some further assurance or security that the debtor will make good on his promise to pay. This

chapter will discuss the differences between secured and unsecured credit and will detail various mechanisms that are available to the creditor who wants to obtain security. These mechanisms include obtaining liens or security interests in personal or real property, sureties, and guarantors. Security interests in real property, sureties and guarantors, and common law liens on personal property will be covered in this chapter, and the Uniform Commercial Code (UCC or Code) rules concerning security interests in personal property will be covered in Chapter 29, Security

Interests in Personal Property. The last chapter in Part 6 deals with bankruptcy law, which may come into play when a debtor is unable to fulfill his obligation to pay his debts when they are due.

Credit

Unsecured Credit Many common transactions are based on unsecured credit. For example, a person may have a charge account at a department store or a MasterCard account. If the person buys a sweater and charges it to his charge account or MasterCard account, unsecured credit has been extended to him. He has received goods in return for his promise to pay for them later. Similarly, if a person goes to a dentist to have a tooth filled and the dentist sends her a bill payable by the end of the month, services have been rendered on the basis of unsecured credit. Consumers are not the only people who use unsecured credit. Many transactions between businesspeople utilize it. For example, a retailer buys merchandise or a manufacturer buys raw materials, promising to pay for the merchandise or materials within 30 days after receipt.

The unsecured credit transaction involves a maximum of risk to the creditor—the person who extends the credit. When goods are delivered, services are rendered, or money is loaned on unsecured credit, the creditor gives up all rights in the goods, services, or money. In return, the creditor gets a promise by the debtor to pay or to perform the promised act. If the debtor does not pay or keep the promise, the creditor's options are more limited than if he had obtained security to ensure the debtor's performance. One course of action is to bring a lawsuit against the debtor and obtain a judgment. The creditor might then have the sheriff execute the judgment on any property owned by the debtor that is subject to execution. The creditor might also try to **garnish** the wages or other moneys to which the debtor is entitled. However, the debtor might be **judgment-proof**; that is, the debtor may not have any property subject to execution or may not have a steady job. Under these circumstances, execution or garnishment would be of little aid to the creditor in collecting the judgment.

A businessperson may obtain credit insurance to stabilize the credit risk of doing business on an unsecured credit basis. However, he passes the costs of the insurance to the business, or of the unsecured credit losses that the business sustains, on to the consumer. The consumer pays a higher price for goods or services purchased, or a higher interest rate on any money borrowed, from a business that has high credit losses.

Secured Credit To minimize his credit risk, a creditor may contract for security. The creditor may require the debtor to convey to the creditor a security interest or lien on the debtor's property. Suppose a person borrows \$3,000 from a credit union. The credit union might require her to put up her car as security for the loan or might ask that some other person agree to be liable if she defaults. For example, if a student who does not have a regular job goes to a bank to borrow money, the bank might ask that the student's father or mother cosign the note for the loan.

When the creditor has security for the credit he extends and the debtor defaults, the creditor can go against the security to collect the obligation. Assume that a person borrows \$18,000 from a bank to buy a new car and that the bank takes a security interest (lien) on the car. If the person fails to make his monthly payments, the bank has the right to repossess the car and have it sold so that it can recover its money. Similarly, if the borrower's father cosigned for the car loan and the borrower defaults, the bank can sue the father to collect the balance due on the loan.

Development of Security Various types of security devices have been developed as social and economic need for them has arisen. The rights and liabilities of the parties to a secured transaction depend on the nature of the security—that is, on whether (1) the security pledged is the promise of another person to pay if the debtor does not, or (2) a security interest in goods, intangibles, or real estate is conveyed as security for the payment of a debt or obligation.

If personal credit is pledged, the other person may guarantee the payment of the debt—that is, become a guarantor—or the other person may join the debtor in the debtor's promise to pay, in which case the other person would become surety for the debt.

The oldest and simplest security device was the pledge. To have a pledge valid against third persons with an interest in the goods, such as subsequent purchasers or creditors, it was necessary that the property used as security be delivered to the pledgee or a pledge holder. Upon default by the pledger, the pledgee had the right to sell the property and apply the proceeds to the payment of the debt.

Situations arose in which it was desirable to leave the property used as security in the possession of the debtor. To accomplish this objective, the debtor would give the creditor a bill of sale to the property, thus passing title to the creditor. The bill of sale would provide that if the debtor performed his promise, the bill of sale would become null and void, thus revesting title to the property in the debtor. A secret lien on the goods was created by

this device, and the early courts held that such a transaction was a fraud on third-party claimants and void as to them. An undisclosed or secret lien is unfair to creditors who might extend credit to the debtor on the strength of property that they see in the debtor's possession but that in fact is subject to the prior claim of another creditor. Statutes were enacted providing for the recording or filing of the bill of sale, which was later designated as a chattel mortgage. These statutes were not uniform in their provisions. Most of them set up formal requirements for the execution of the chattel mortgage and also stated the effect of recording or filing on the rights of third-party claimants.

To avoid the requirements for the execution and filing of the chattel mortgage, sellers of goods would sell the goods on a "conditional sales contract" under which the seller retained title to the goods until their purchase price had been paid in full. Upon default by the buyer, the seller could (a) repossess the goods or (b) pass title and recover a judgment for the unpaid balance of the purchase price. Abuses of this security device gave rise to some regulatory statutes. About one-half of the states enacted statutes providing that the conditional sales contract was void as to third parties unless it was filed or recorded.

No satisfactory device was developed whereby inventory could be used as security. The inherent difficulty is that inventory is intended to be sold and turned into cash and the creditor is interested in protecting his interest in the cash rather than in maintaining a lien on the sold goods. Field warehousing was used under the pledge, and an after-acquired property clause in a chattel mortgage on a stock of goods held for resale partially fulfilled this need. One of the devices used was the trust receipt. This short-term marketing security arrangement had its origin in the export–import trade. It was later used extensively as a means of financing retailers of consumer goods having a high unit value.

Security Interests in Personal Property Chapter 29, Security Interests in Personal Property, will discuss how a creditor can obtain a security interest in the personal property or fixtures of a debtor. It will also explain the rights to the debtor's property of the creditor, the debtor, and other creditors of the debtor. These security interests are covered by Article 9 of the Uniform Commercial Code, which sets out a comprehensive scheme for regulating security interests in personal property and fixtures. The Code abolishes the old formal distinctions between different types of security devices used to create security interests in personal property.

Security Interests in Real Property Three types of contractual security devices have been developed by which real estate may be used as security: (1) the real estate mortgage, (2) the trust deed, and (3) the land contract. In addition to these contract security devices, all of the states have enacted statutes granting the right to mechanic's liens on real estate. Security interests in real property are covered later in this chapter.

Suretyship and Guaranty

Sureties and Guarantors As a condition of making a loan, granting credit, or employing someone (particularly as a fiduciary), a creditor may demand that the debtor, contractor, or employee provide as security for his performance the liability of a third person as surety or guarantor. The purpose of the contract of suretyship or guaranty is to provide the creditor with additional protection against loss in the event of default by the debtor, contractor, or employee.

A **surety** is a person who is *liable for the payment of another person's debt or for the performance of another person's duty*. The surety joins with the person primarily liable in promising to make the payment or to perform the duty. For example, Kathleen Kelly, who is 17 years old, buys a used car on credit from Harry's Used Cars. She signs a promissory note, agreeing to pay \$200 a month on the note until the note is paid in full. Harry's has Kathleen's father cosign the note; thus, her father is a surety. Similarly, the city of Chicago hires the B&B Construction Company to build a new sewage treatment plant. The city will probably require B&B to have a surety agree to be liable for B&B's performance of its contract. There are insurance companies that, for a fee, will agree to be a surety on the contract of a company such as B&B.

The surety is *primarily liable* for the debtor's obligation, and the debtor can demand performance from the surety at the time the debt is due. The creditor does not need to establish a default by the debtor or proceed first against the debtor on his obligation.

A guaranty contract is similar to a suretyship contract in that the promisor agrees to answer for the obligation of another. However, a guarantor does not join the principal in making a promise; rather, a guarantor makes a separate promise and agrees to be liable upon the happening of a certain event. For example, a father tells a merchant, "I will guarantee payment of my daughter Rachel's debt to you if she does not pay it," or "If Rachel becomes bankrupt, I will guarantee payment of her debt to you." While a surety is *primarily liable*, a guarantor is *secondarily*

liable and can be held to his guarantee only after the principal defaults and cannot be held to his promise or payment. Generally, a guarantor's promise must be made in writing to be enforceable under the statute of frauds.

The rights and liabilities of the surety and the guarantor are substantially the same. No distinction will be made between them in this chapter except where the distinction is of basic importance. Moreover, most commercial contracts and promissory notes today that are to be signed by multiple parties provide for the parties to be "jointly and severally" liable, thus making the surety relationship the predominate one.

Creation of Principal and Surety Relation The relationship of principal and surety, or that of principal and guarantor, is created by contract. The basic rules of contract law apply in determining the existence and nature of the relationship as well as the rights and duties of the parties.

Defenses of a Surety Suppose Jeffrey's mother agrees to be a surety for Jeffrey on his purchase of a motorcycle. If the motorcycle was defectively made and Jeffrey refuses to make further payments on it, the dealer might try to collect the balance due from Jeffrey's mother. As a surety, Jeffrey's mother can use any defenses against the dealer that Jeffrey has if they go to the merits of the primary contract. Thus, if Jeffrey has a valid defense of breach of warranty against the dealer, his mother can use it as a basis for not paying the dealer.

Other defenses that go to the merits include (1) lack or failure of consideration, (2) inducement of the contract by fraud or duress, and (3) breach of contract by the other party. Certain defenses of the principal cannot be used by the surety. These defenses include lack of capacity, such as minority or insanity, and bankruptcy. Thus, if Jeffrey is only 17 years old, the fact that he is a minor cannot be used by Jeffrey's mother to defend against the dealer. This defense of Jeffrey's lack of capacity to contract does not go to the merits of the contract between Jeffrey and the dealer and cannot be used by Jeffrey's mother.

A surety contracts to be responsible for the performance of the principal's obligation. If the principal and the creditor change that obligation by agreement, the surety is relieved of responsibility unless the surety agrees to the change. This is because the surety's obligation cannot be changed without his consent.

For example, Fredericks cosigns a note for his friend Kato, which she has given to Credit Union to secure a loan. Suppose the note was originally for \$2,500 and payable in 12 months with interest at 11 percent a year.

Credit Union and Kato later agree that Kato will have 24 months to repay the note but that the interest will be 13 percent per year. Unless Fredericks consents to this change, he is discharged from his responsibility as surety. The obligation he agreed to assume was altered by the changes in the repayment period and the interest rate.

The most common kind of change affecting a surety is an extension of time to perform the contract. If the creditor merely allows the principal more time without the surety's consent, this does not relieve the surety of responsibility. The surety's consent is required only where there is an actual binding agreement between the creditor and the principal as to the extension of time.

In addition, the courts usually make a distinction between **accommodation sureties** and **compensated sureties**. An accommodation surety is a person who acts as a surety without compensation, such as a friend who cosigns a note as a favor. A compensated surety is a person, usually a professional such as a bonding company, who is paid for serving as a surety.

The courts are more protective of accommodation sureties than of compensated sureties. Accommodation sureties are relieved of liability unless they consent to an extension of time. Compensated sureties, on the other hand, must show that they will be harmed by an extension of time before they are relieved of responsibility because of a binding extension without their consent. A compensated surety must show that a change in the contract was both material and prejudicial to him if he is to be relieved of his obligation as surety.

Creditor's Duties to Surety The creditor is required to disclose any material facts about the risk involved to the surety. If he does not do so, the surety is relieved of liability. For example, a bank (creditor) knows that an employee, Arthur, has been guilty of criminal conduct in the past. If the bank applies to a bonding company to obtain a bond on Arthur, the bank must disclose this information about Arthur. Similarly, suppose the bank has an employee, Alison, covered by a bond and discovers that Alison is embezzling money. If the bank agrees to give Alison another chance but does not report her actions to the bonding company, the bonding company is relieved of responsibility for further wrongful acts by Alison.

If the debtor posts security for the performance of an obligation, the creditor must not surrender the security without the consent of the surety. If the creditor does so, the surety is relieved of liability to the extent of the value surrendered.

In the following *New Jersey Economic Development Authority* case, the court rejected a claim by sureties that the creditors had violated their duty to the sureties.

New Jersey Economic Development Authority v. Pavonia Restaurant, Inc. 725 A.2d 1133 (N.J. Super. Ct., App. Div. 1998)

In June 1992, the New Jersey Economic Development Authority (EDA) and the Banque Nationale de Paris loaned \$1,470,000 to Pavonia Restaurant, Inc. Pavonia was established to open and operate a new restaurant known as "Hudson's," to be located in a newly constructed eight-story office building in downtown Jersey City. Repayment of the loan was individually guaranteed by a number of individuals who were mostly professional and local businesspeople and, with one exception, were also stockholders in Pavonia.

To acquire the funds necessary to make the loan, the EDA issued and sold Economic Growth Bonds to investors. In order to encourage investment in the bonds, at the request of Pavonia and the guarantors, the bank issued an irrevocable letter of credit pursuant to which it agreed to repay the bondholders in the event Pavonia defaulted.

On June 1, 1992, Pavonia executed a loan agreement, a promissory note, financing statements, and a security agreement pledging its leasehold improvements and restaurant equipment as security for repayment of the loan (the loan documents). On the same date, the guarantors executed a Personal Guaranty Agreement under which they each agreed individually to guarantee repayment of the loan to EDA and the Bank.

Because of a four-month delay in the opening of the restaurant, insufficient advertising, a high-priced menu, staffing problems, and the shareholders' failure to make the necessary capital contributions, Pavonia ran into financial difficulty and the loan went into default. Consequently, as of August 19, 1994, the arrearages due from Pavonia to the EDA equaled \$24,207.71, and EDA and the Bank sought payment from the guarantors in accordance with their guarantees.

Thereafter, Pavonia and the guarantors requested EDA and the Bank to forebear enforcement of their rights under the loan agreement and guarantees. EDA and the Bank agreed, and, on October 17, 1994, the parties entered into a "Loan Forbearance Agreement." The agreement essentially provided that EDA and the Bank would not accelerate the loan balance for a period of time if Pavonia and the guarantors paid the delinquent amounts due and advanced monthly payments through December 1, 1994, totaling \$312,970.19. In the agreement Pavonia and the guarantors acknowledged that Pavonia had defaulted on the loan, that they had not cured the default, and that they had no defenses to EDA's and the Bank's claims under the loan documents or individual guarantees.

On February 1, 1995, Pavonia again defaulted, and EDA and the Bank accelerated the loan balance. In a letter dated June 22, 1995, their counsel made a demand upon the guarantors for full payment of the loan or possession of the assets Pavonia had pledged as collateral. When the guarantors failed to respond, on July 2, 1995, EDA and the Bank filed suit against Pavonia and the guarantors seeking possession of the pledged assets and judgment in the amount of the loan balance, interest, counsel fees, and costs.

EDA and the Bank moved for summary judgment. The guarantors opposed the motion and asserted defenses grounded in fraud, bad faith, and allegations that EDA and the Bank had failed to disclose material facts at the inception of the loan that materially increased their risk under the guarantees rendering them unenforceable. Specifically, guarantors alleged that from the inception of the loan, EDA and the Bank knew and failed to disclose (1) that Pavonia's assets were insufficient to secure the loan and (2) that EDA and the Bank were relying principally, if not exclusively, upon the guarantees as the source of repayment of the loan.

Eichen, Judge

The guarantors claim that EDA and the Bank placed sole reliance on their individual guarantees for repayment of the loan. The record does not support that assertion. Rather, it reflects that both EDA and the Bank and the guarantors anticipated that the revenues from the restaurant would support repayment of the loan. The information concerning the anticipated revenues, was, in fact, derived from Pavonia's accountant, Sobel & Company. Although the guarantors maintain that the loan review document concluded that "no reliance could be placed on the 'collateral or cash flow generating ability of the restaurant,'" the record clearly belies this assertion. The record discloses that

EDA and the Bank believed, based on the projections made by Pavonia's accountant, that the restaurant would generate sufficient cash flow to repay the loan. As Lloyd Cox, vice president of the Bank, indicated, the Bank never would have included the loan to Pavonia in the composite bond issue if it did not believe that Pavonia would be successful. Despite the guarantors' attempts to make it appear as though plaintiffs knew Pavonia would be unable to repay the loan and therefore insisted on the guarantees, nothing in the record supports this proposition. The guarantors have not pointed to any evidence that even suggests EDA and the Bank had information about Pavonia's ability to repay the loan which the guarantors did not have. Indeed,

everyone understood that opening a restaurant in a new location was inherently risky business. EDA and the Bank hoped that the restaurant's success would comport with the financial projections of Pavonia's accountant just as the guarantors did. The obvious fact is that the external factors impeded Pavonia's success, factors which were completely unrelated to EDA and the Bank's evaluation of the loan agreements. Although Pavonia was unsuccessful in establishing a viable restaurant business, its successor, Laico's of Journal Square, has been successful.

In sum, the guarantors have utterly failed to demonstrate what facts EDA and the Bank had, but guarantors lacked, that materially increased the risk beyond that which EDA and the Bank knew the guarantors intended to assume.

Impliedly recognizing that they could not prove their case under these theories the guarantors argue that their claims are viable under the principles of law contained in the *Restatement of Security: Suretyship* section 124 (1941) (the *Restatement*). That section provides in relevant part:

Where before [a] surety has undertaken his obligation the creditor knows facts unknown to the surety that materially increase the risk beyond that which the creditor has reason to believe the surety intends to assume, and the creditor also has reason to believe that these facts are unknown to the surety and has a reasonable opportunity to communicate them to the surety, failure of the creditor to notify the surety of such facts is a defense to the surety.

The guarantors argue that EDA and the Bank violated these principles of law by failing to disclose facts to them that materially increased their risk under the guarantees, specifically, that unbeknownst to the Guarantors, EDA and the Bank were relying on their guarantees as the primary security for repayment of the loan and failed to disclose this fact to them. They maintain they would not have undertaken the risk if they

had known the guarantees were the principal security for the loan.

Section 124 prescribed three conditions precedent to imposing a duty on a creditor to disclose facts it knows about the debtor to the surety: (1) the creditor must have reason to believe that those facts materially increase the risk beyond that which the surety intends to assume; (2) the creditor must have reason to believe that the facts are unknown to the surety; and (3) the creditor must have a reasonable opportunity to notify the surety of such facts.

However, the comments to section 124 of the *Restatement* explain that:

[this rule] does not place any burden on the creditor to investigate for the surety's benefit. It does not require the creditor to take any unusual steps to assure himself that the surety is acquainted with facts which he may assume are known to both of them.

...

Every surety by the nature of his obligation undertakes risks which are the inevitable concomitants of the transactions involved. Circumstances of the transactions vary the risks which will be regarded as normal and contemplated by the surety.

For the reasons previously stated in our rejection of the guarantors' claims of fraud and bad faith, we are satisfied that the guarantors failed to raise any factual issue applying the principles derived from the *Restatement*. Suffice it to say, EDA and the Bank were not in possession of any facts that the guarantors were not aware of; both parties hoped the restaurant would generate sufficient cash flow to repay the loan. Regrettably, it did not.

Judgment affirmed for EDA and the Bank.

Subrogation, Reimbursement, and Contribution

If the surety has to perform or pay the principal's obligation, then the surety acquires all of the rights that the creditor had against the principal. This is known as the surety's **right of subrogation**. The rights acquired could include the right to any collateral in the possession of the creditor, any judgment right the creditor had against the principal on the obligation, and the rights of a creditor in bankruptcy proceedings.

If the surety performs or pays the principal's obligation, she is entitled to recover her costs from the principal; this is known as the surety's **right to reimbursement**. For example, Amado cosigns a promissory

note for \$2,500 at the credit union for her friend Anders. Anders defaults on the note, and the credit union collects \$2,500 from Amado on her suretyship obligation. Amado then not only gets the credit union's rights against Anders under the right of subrogation, but also the right to collect \$2,500 from Anders under the right of reimbursement.

Suppose several persons (Tom, Dick, and Harry) are cosureties of their friend Sam. When Sam defaults, Tom pays the whole obligation. Tom is entitled to collect one-third from both Dick and Harry since he paid more than his prorated share. This is known as the cosurety's **right to contribution**. The relative shares of cosureties, as

well as any limitations on their liability, are normally set out in the contract of suretyship.

A surety also has what is known as a **right of exoneration**, which is the right of the surety or guarantor to require the debtor to make good on his commitment to the creditor when he (1) is able to do so and (2) does not have a valid defense against payment. The right is exercised when the creditor is pursuing the surety or guarantor to make good on their liability. The surety or guarantor then sues the debtor to force him to pay the creditor, automatically staying the creditor's action against the surety or guarantor. The surety or guarantor uses this right to prevent its having to pay the creditor (which may require liquidation of some of the surety's or guarantor's assets) and then having to sue the debtor under the right of subrogation or reimbursement.

Liens on Personal Property

Common Law Liens Under the common—or judge-made—law, artisans, innkeepers, and common carriers (such as airlines and trucking companies) were entitled to liens to secure the reasonable value of the services they performed. An artisan such as a furniture upholsterer or an auto mechanic uses his labor or materials to improve personal property that belongs to someone else. The improvement becomes part of the property and belongs to the owner of the property. Therefore, the artisan who made the improvement is given a **lien** on the property until he is paid.

For example, the upholsterer who recovers a sofa for a customer is entitled to a lien on the sofa. The innkeeper and common carrier are in business to serve the public and are required by law to do so. Under the common law, the innkeeper, to secure payment for his reasonable charges for food and lodging, was allowed to claim a lien on the property that the guest brought to the hotel or inn. Similarly, the common carrier, such as a trucking

company, was allowed to claim a lien on the goods carried for the reasonable charges for the service. The justification for such liens was that the innkeeper and common carrier were entitled to the protection of a lien because they were required by law to provide the service to anyone seeking it.

Statutory Liens While common law liens are still generally recognized today, many states have incorporated this concept into statutes. Some of the state statutes have created additional liens, while others have modified the common law liens to some extent. The statutes commonly provide a procedure for foreclosing the lien. **Foreclosure** is the method by which the rights of the property owner are cut off so that the lienholder can realize her security interest. Typically, the statutes provide for a court to authorize the sale of the personal property subject to the lien so that the creditor can obtain the money to which she is entitled.

Carriers' liens and warehousemen's liens are provided for in Article 7, Documents of Title, of the Uniform Commercial Code. They are covered in Chapter 23, Personal Property and Bailments.

Characteristics of Liens The common law lien and most of the statutory liens are known as **possessory liens**. They give the artisan or other lienholder the right to keep possession of the debtor's property until the reasonable charges for services have been paid. For the lien to come into play, possession of the goods must have been entrusted to the artisan. Suppose a person takes a chair to an upholsterer to have it repaired. The upholsterer can keep possession of the chair until the person pays the reasonable value of the repair work. However, if the upholsterer comes to the person's home to make the repair, the upholsterer would not have a lien on the chair as the person did not give up possession of it.

Ethics in Action

What Is the Ethical Thing to Do?

Suppose you own and operate a small loan business. A young man applies for a \$1,000 loan. When you run a credit check on him, you find that he has had difficulty holding a job and has a terrible credit record. You conclude that he is a poor credit risk and inform him that you are willing to make the

requested loan only if he can find someone who has a good credit rating to cosign a promissory note with him. The next day he comes by the office with a young woman who meets your criteria for a good credit rating and who indicates she is willing to cosign the note. Do you have any ethical obligation to share with the young woman the information you have about the young man's employment and credit history?

The two essential elements of the lien are (1) possession by the improver or the provider of services and (2) a debt created by the improvement or the provision of services concerning the goods. If the artisan or other lienholder gives up the goods voluntarily, he loses the lien. For example, if a person has a new engine put in his car and the mechanic gives the car back to him before he pays for the engine, the mechanic loses the lien on the car to secure the person's payment for the work and materials. However, if the person uses a spare set of keys to regain possession, or does so by fraud or another illegal act, the lien is not lost. Once the debt has been paid, the lien is terminated and the artisan or other lienholder no longer has the right to retain the

goods. If the artisan keeps the goods after the debt has been paid, or keeps the goods without the right to a lien, he is liable for conversion or unlawful detention of goods.

Another important aspect of common law liens is that the work or service must have been performed at the request of the owner of the property. If the work or service is performed without the consent of the owner, no lien is created.

In the case that follows, *In re Borden*, the court had to decide whether an artisan lost its priority claim to some farming equipment it had repaired when the owner of the equipment removed it from the artisan without permission and without paying for it.

In re Borden

361 B.R. 489 (U.S. Bankruptcy Appellate Panel for the Eighth Circuit 2007)

On June 25, 2002, Michael Borden and his wife granted the Genoa National Bank a blanket security interest on all of their personal property, including machinery and equipment then owned and thereafter acquired. The lender perfected its security interest by filing a UCC financing statement with the Nebraska Secretary of State on June 26, 2002. [These concepts are covered in the next chapter, Chapter 29, Security Interests in Personal Property.]

On separate occasions in late 2004, Borden took a cornhead and a tractor to Bellamy's, Inc., for repairs. Bellamy's performed the repairs and in February 2005 sent the Bordens a bill in the amount of \$3,811.46 for the work performed on the cornhead and in March 2005 sent a bill in the amount of \$1,281.34 for the work performed on the tractor. Borden did not have the money to pay for the repairs, and Bellamy's refused to release the tractor and cornhead to Borden without payment, so they remained in Bellamy's possession.

On April 1, Borden and his wife filed a voluntary petition for relief under Chapter 12 of the Bankruptcy Code. [Bankruptcy is discussed in Chapter 30 of this textbook.] On this date the tractor and cornhead were in Bellamy's possession. In June 2005, Borden took the tractor from Bellamy's lot without permission and used it in connection with his farming operation. Bellamy's discovered the tractor was missing and contacted Borden to inquire if he had it in his possession. Borden admitted he had taken the tractor, explained that he needed it for his farming operation, and agreed to return it to Bellamy's as soon as he was finished using it. The tractor broke down while he was using it, and he returned it to Bellamy's in the fall of 2005.

In September 2005, Borden took the cornhead from Bellamy's without permission. Bellamy's became aware that the cornhead was missing and contacted Borden. He admitted that he had taken the cornhead, explained that he needed it to harvest corn, and agreed to return it as soon as he completed harvesting the crop. Borden returned the cornhead to Bellamy's in November 2005.

In 2006, Genoa National Bank filed a motion with the bankruptcy court to determine the priority of the respective liens claimed by it and by Bellamy's. The bankruptcy court determined that no controlling authority existed in Nebraska concerning the situation of competing liens where an artisan loses possession of the personal property through action of the property owner. The bankruptcy court looked to other jurisdictions for guidance and found that other courts faced with the issue had reached conflicting results. The bankruptcy court decided that Genoa National Bank's lien had priority over the lien asserted by the artisan, Bellamy's. In reaching its decision, the bankruptcy court concluded that continuous possession is required to maintain an artisan's lien. Bellamy's appealed.

Schermer, Bankruptcy Judge

Nebraska law provides a lien to any person who repairs a vehicle, machinery, or a farm implement while in such person's possession for the reasonable or agreed charges for the work

done or materials furnished on or to such vehicle, machinery, or farm implement and authorizes the artisan to retain possession of the property until the charges are paid. Such a lien is referred to as an artisan's lien. Nebraska law also recognizes a

possessory lien as an interest, other than a security interest or an agricultural lien, which secures payment or performance of an obligation for services or materials furnished with respect to goods by a person in the ordinary course of such person's business which is created by statute or rule in favor of the person and whose effectiveness depends on the person's possession of the goods. An artisan's lien falls within this definition of possessory lien under Nebraska law. A possessory lien on goods, such as an artisan's lien, has priority over a security interest in the goods unless the possessory lien is created by a statute that expressly provides otherwise. The artisan's lien statute does not provide otherwise; accordingly, an artisan's lien has priority over a previously perfected security interest in the same goods.

In order to determine the respective rights of the Lender and the Artisan in the Equipment, we must determine if the Artisan has an artisan's lien in the Equipment under Nebraska law. If the Artisan does, its lien has priority over the Lender's security interest in the Equipment. In making this determination, we must answer the difficult question of whether the Artisan has a possessory lien where it involuntarily lost and later regained possession of the Equipment without court authority following the Debtor's bankruptcy filing. The statute is silent on this situation and no Nebraska court has addressed this situation other than the trial court below.

Courts from other jurisdictions have addressed various situations where artisans have lost possession of the personal property to which they provided services yet asserted a lien thereon either without possession or after regaining possession. Some general rules can be gleaned from the case law. First, possession is generally required for a possessory lien. If an artisan surrenders possession, the artisan no longer has a possessory lien with priority over pre-existing security interests. Some courts recognize a continuing lien as between the artisan and the owner after return of possession to the owner; however, such lien lacks priority over pre-existing security interests. Other courts relegate the lien to a state of suspended animation upon release of the goods to the owner; the artisan cannot enforce the lien while it is in a state of suspended animation. In this situation, if the artisan regains possession lawfully, the ability to enforce the artisan's lien is once again available to the artisan.

Where the artisan loses possession involuntarily, the artisan does not necessarily lose the artisan's lien. Likewise, a conditional release of goods does not necessarily defeat the artisan's lien. This result follows at least with respect to holders of prior security interests who are not impaired by the conditional release. Some courts hold that an artisan's lien lost when possession is lost is revived upon resumption of possession. Such a lien retains its priority as before the release except that the lien

is subordinate to the interests of a bona fide purchaser or a creditor who attached or levied on the property while it was in the possession of the owner.

We conclude that the Artisan did not lose its artisan's lien in the Equipment when the Debtor took the Equipment without the Artisan's knowledge or consent. Such involuntary loss of possession does not defeat the Artisan's lien. Furthermore, even if the Artisan's failure to take action to regain possession of the Equipment can be deemed consent to the Debtor's prior wrongful taking of the Equipment, such after-the-fact consent could not have been more than a conditional consent to the Debtor's temporary use of the Equipment with an agreement to return it to the Artisan. A conditional consent to a prior wrongful taking likewise does not defeat the Artisan's lien.

This result is consistent with the policy underlying the creation and priority of security interests. A lien or security interest must be perfected. The purpose of perfection is to give the world notice of the lien or security interest. Notice is generally accomplished in one of three ways: by registering the lien with an agency (usually a local government entity or a secretary of state's office), by noting the lien on the title, or by possession. Third parties can learn of any liens or security interests in any particular property by searching the records of the appropriate authority or by viewing the title. If no lien or security interest is disclosed, the third party may rely on the assumption that the property is owned free and clear of any liens if the property is in the owner's possession.

An artisan's lien does not require registration with any entity. Therefore, in order to give notice of the lien, the artisan is permitted to retain the property until receiving payment for the services provided to the property. Upon payment the lien is satisfied and the artisan releases the property. A third party interested in the property can easily learn that the property is not in the owner's possession and is then put on inquiry notice to determine why the owner does not have possession of the property. If the owner cannot produce the property, the third party has notice that another entity, including an artisan, may assert an interest in such property. A third party who continues to deal with the property owner after learning the owner lacks possession of the property does so at his or her peril.

With respect to competing holders of liens or security interests in the same property, notice of the various liens and security interests allows each interested party to know where he or she falls in the pecking order. With respect to recorded interests, the general rule is that first in time has priority. However, artisan's liens are not recorded and invariably are created after security interests have been granted. Courts and legislatures generally recognize that a party who provides labor and materials to property enhances the value of the property. Therefore,

the principles of natural justice and commercial necessity dictate that the entity who enhances the value of property should be entitled to payment for such services and may retain the property until receipt of payment therefore. Indeed, the Nebraska statute at issue in this case provides exactly that. Artisan's lien laws are to be liberally construed to accomplish their equitable purpose of aiding materialmen and laborers to obtain compensation for materials used and services bestowed upon property of another which thereby enhances the value of such property.

A lender who advances funds to acquire certain property or who loans money secured by existing property does so on the basis of the property at the time of the loan. The lender generally assumes the owner will maintain the property after the loan is made and often mandates such maintenance in the loan documentation. If the property later breaks or is in need of maintenance, the owner takes the property to an artisan for repair or maintenance. Such repair or maintenance enhances the value of the property, thus enhancing the value of the lender's collateral. The lender thus benefits from the repair.

This was the case with the Equipment. The Lender took the security interest in the Equipment long before the Artisan performed the repairs to it. Immediately prior to the repairs, the Equipment was not working properly and therefore its value was diminished. By performing the repairs, the Artisan enhanced the value of the Equipment, thus benefitting the Lender by increasing the value of its collateral. Recognizing the superiority of the Artisan's lien over the Lender's security interest is consistent with the policy underlying artisan lien law.

The bankruptcy court was troubled by the lack of certainty where an artisan is permitted to retain a lien without maintaining possession of the property. By requiring continuous possession in order to maintain an artisan's lien, the court limited uncertainty. While certainty is a valid goal in statutory interpretation, it should not come at the expense of the

purpose behind the statute. Artisan's liens are designed to be equitable in nature and to protect the rights of artisans. If the artisan voluntarily surrenders possession, the artisan loses its lien. However, if the artisan loses possession through no action of his or her own, the artisan should not be punished. This is especially true where the Lender benefitted from the repairs to its collateral and its interests in the Equipment were in no way impaired when the Debtor took the Equipment from the Artisan nor when he later returned the Equipment to the Artisan.

Conclusion

The Artisan had an artisan's lien in the Equipment on the date the Debtor filed bankruptcy which had priority over the Lender's security interest under Nebraska law. The Artisan did not lose its artisan's lien nor its priority over the Lender's security interest when the Debtor took the Equipment from the Artisan's possession postpetition without authority. **Accordingly, under these circumstances we REVERSE the bankruptcy court's order determining that the Lender's security interest in the Equipment takes priority over the Artisan's lien therein.**

Kressel, Chief Judge, dissenting

The majority has done an admirable job of reviewing the split of authority on the issue presented here, none of which admittedly is binding, and picking the line of cases which it feels provides the fair result for this case. I concede that the result reached is appealing. I think that in reaching it, the majority has departed from well-established principles of interpretation and, as a result, has essentially engaged in the legislative process.

Since I think the Nebraska statute unequivocally provides for a first priority possessory lien only until possession is lost, I would hold that the bankruptcy court correctly held that Genoa National Bank's perfected security interest has priority over Bellamy's lien and would affirm.

Foreclosure of Lien The right of a lienholder to possess goods does not automatically give the lienholder the right to sell the goods or to claim ownership if his charges are not paid. Commonly, there is a procedure provided by statute for selling property once it has been held for a certain period of time. The lienholder is required to give notice to the debtor and to advertise the proposed sale by posting or publishing notices. If there is no statutory procedure, the lienholder must first bring a lawsuit against the debtor. After obtaining a judgment for

his charges, the lienholder can have the sheriff seize the property and have it sold at a judicial sale.

Security Interests in Real Property

There are three basic contract devices for using real estate as security for an obligation: (1) the real estate mortgage, (2) the deed of trust, and (3) the land contract. In addition, the states have enacted statutes giving

mechanics, such as carpenters and plumbers, and materialmen, such as lumberyards, a right to a lien on real property into which their labor or materials have been incorporated.

Historical Developments of Mortgages

A **mortgage** is a security interest in real property or a deed to real property that is given by the owner (the **mortgagor**) as security for a debt owed to the creditor (the **mortgagee**). The real estate mortgage was used as a form of security in England as early as the middle of the 12th century, but our present-day mortgage law developed from the common law mortgage of the 15th century. The common law mortgage was a deed that conveyed the land to the mortgagee, with the title to the land to return to the mortgagor upon payment of the debt secured by the mortgage. The mortgagee was given possession of the land during the term of the mortgage. If the mortgagor defaulted on the debt, the mortgagee's title to the land became absolute. The land was forfeited as a penalty, but the forfeiture did not discharge the debt. In addition to keeping the land, the mortgagee could sue on the debt, recover a judgment, and seek to collect the debt.

The early equity courts did not favor the imposition of penalties and would relieve mortgagors from such forfeitures, provided that the mortgagor's default was minor and was due to causes beyond his control. Gradually, the courts became more lenient in permitting redemptions and allowed the mortgagor to **redeem** (reclaim his property) if he tendered performance without unreasonable delay. Finally, the courts of equity recognized the mortgagor's right to redeem as an absolute right that would

continue until the mortgagee asked the court of equity to decree that the mortgagor's right to redeem be foreclosed and cut off. Our present law regarding the foreclosure of mortgages developed from this practice.

Today, the mortgage is generally viewed as a lien on land rather than a conveyance of title to the land. There are still some states where the mortgagor goes through the process of giving the mortgagee some sort of legal title to the property. Even in these states, however, the mortgagee's title is minimal and the real ownership of the property remains in the mortgagor.

Form, Execution, and Recording Because the real estate mortgage conveys an interest in real property, it must be executed with the same formality as a deed. As a general rule, the mortgage must contain the name of the secured party, the legal description of the property, and the terms and conditions of the security interest in the property—and it must be signed by the debtor/owner of record of the property. In addition, most states require a mortgage to be notarized, that is acknowledged by the debtor/owner before a notary public or other authorized officer. Unless it is executed with the required formalities, it will not be eligible for recording in the local land records. Recordation of the mortgage does not affect its validity as between the mortgagor and the mortgagee. However, if it is not recorded, it will not be effective against subsequent purchasers of the property or creditors, including other mortgagees, who have no notice of the earlier mortgage. It is important to the mortgagee that the mortgage be recorded so that the world will be on notice of the mortgagee's interest in the property.

CYBERLAW IN ACTION

Real Estate Finance on the Internet

Recently it has become quite easy to search for financing, to compare options from multiple possible funding sources, and to apply for mortgages online when purchasing, refinancing, or remodeling a home. Many mortgage companies have developed interactive Web sites that allow their full array of services to be conducted over the Internet. Shopping for a mortgage on the Internet allows consumers to broaden their search to include companies outside of their city or region and to determine the best rates and options available to them. By using the Internet, consumers

have the ability to search for mortgage options whenever and wherever they want without the need to visit multiple possible funding sources. Also, consumers can quickly check the status of an existing account online. Mortgage companies that offer services online significantly expand their pool of potential customers to include persons across the country, rather than just those in their immediate vicinity. Conducting transactions online can reduce their cost of doing business by reducing the number of agents they need to interact with potential customers. In addition, a customer can often fill out one online informational form that the company can make multiple uses of, thus cutting down on the need for duplicate paperwork.

Rights and Liabilities The owner (mortgagor) of property subject to a mortgage can sell the interest in the property without the consent of the mortgagee. However, the sale does not affect the mortgagee's interest in the property or the mortgagee's claim against the mortgagor. In some cases, the mortgage may provide that if the property is sold, then any remaining balance becomes immediately due and payable. This is known as a "due on sale" clause.

Suppose Erica Smith owns a lot on a lake. She wants to build a cottage on the land, so she borrows \$55,000 from First National Bank. She signs a note for \$55,000 and gives the bank a \$55,000 mortgage on the land and cottage as security for her repayment of the loan. Several years later, Smith sells her land and cottage to Melinda Mason. The mortgage she gave First National might make the unpaid balance due on the mortgage payable on sale. If it does not, Smith can sell the property with the mortgage on it. If Mason defaults on making the mortgage payments, the bank can foreclose on the mortgage. If at the foreclosure sale the property does not bring enough money to cover the costs, interest, and balance due on the mortgage, First National is entitled to a deficiency judgment against Smith. However, some courts are reluctant to give deficiency judgments where real property is used as security for a debt. If on foreclosure the property sells for more than the debt, Mason is entitled to the surplus.

A purchaser of mortgaged property may buy it **subject to** the mortgage or may **assume** the mortgage. If she buys subject to the mortgage and there is a default and foreclosure, the purchaser is not personally liable for any deficiency. The property is liable for the mortgage debt and can be sold to satisfy it in case of default; in addition, the original mortgagor remains liable for its payment. If the buyer assumes the mortgage, then she becomes personally liable for the debt and for any deficiency on default and foreclosure.

The creditor (mortgagee) may assign his interest in the mortgaged property. To do this, the mortgagee must assign the mortgage as well as the debt for which the mortgage is security. In most jurisdictions, the negotiation of the note carries with it the right to the security and the holder of the note is entitled to the benefits of the mortgage.

Foreclosure Foreclosure is the process by which any rights of the mortgagor or the current property owner are cut off. Foreclosure proceedings are regulated by statute in the state in which the property is located. In many states, two or more alternative methods of

foreclosure are available to the mortgagee or his assignee. The methods in common use today are (1) strict foreclosure, (2) action and sale, and (3) power of sale.

A small number of states permit what is called **strict foreclosure**. The creditor keeps the property in satisfaction of the debt, and the owner's rights are cut off. This means that the creditor has no right to a deficiency and the debtor has no right to any surplus. Strict foreclosure is normally limited to situations where the amount of the debt exceeds the value of the property.

Foreclosure by **action and sale** is permitted in all states, and it is the only method of foreclosure permitted in some states. Although the state statutes are not uniform, they are alike in their basic requirements. In a foreclosure by action and sale, suit is brought in a court having jurisdiction. Any party having a property interest that would be cut off by the foreclosure must be made a defendant, and if any such party has a defense, he must enter his appearance and set up his defense. After the case is tried, a judgment is entered and a sale of the property ordered. The proceeds of the sale are applied to the payment of the mortgage debt, and any surplus is paid over to the mortgagor. If there is a deficiency, a deficiency judgment is, as a general rule, entered against the mortgagor and such other persons as are liable on the debt. Deficiency judgments are generally not permitted where the property sold is the residence of the debtor.

The right to foreclose under a **power of sale** must be expressly conferred on the mortgagee by the terms of the mortgage. If the procedure for the exercise of the power is set out in the mortgage, that procedure must be followed. Several states have enacted statutes that set out the procedure to be followed in the exercise of a power of sale. No court action is required. As a general rule, notice of the default and sale must be given to the mortgagor. After the statutory period, the sale may be held. The sale must be advertised, and it must be at auction. The sale must be conducted fairly, and an effort must be made to sell the property at the highest price obtainable. The proceeds of the sale are applied to the payment of costs, interest, and the principal of the debt. Any surplus must be paid to the mortgagor. If there is a deficiency and the mortgagee wishes to recover a judgment for the deficiency, she must bring suit on the debt.

Right of Redemption At common law and under existing statutes, the mortgagor or an assignee of the mortgagor has what is called an **equity of redemption** in the mortgaged real estate. This means that he has the absolute right to discharge the mortgage when due and to have title to the mortgaged property restored free

and clear of the mortgage debt. Under the statutes of all states, the mortgagor or any party having an interest in the mortgaged property that will be cut off by the foreclosure may redeem the property after default and before the mortgagee forecloses the mortgage. In several states, the mortgagor or any other party in interest is given by statute what is known as a redemption period (usually six months or one year, beginning either after the foreclosure proceedings are started or after a foreclosure sale of the mortgaged property has been made) in which to pay the mortgaged debt, costs, and interest and to redeem the property.

As a general rule, if a party in interest wishes to redeem, he must, if the redemption period runs after the foreclosure sale, pay to the purchaser at the foreclosure sale the amount that the purchaser has paid plus interest up to the time of redemption. If the redemption period runs before the sale, the party in interest must pay the amount of the debt plus the costs and interest. The person who wishes to redeem from a mortgage foreclosure sale must redeem the entire mortgage interest; he cannot redeem a partial interest by paying a proportionate amount of the debt or by paying a proportionate amount of the price bid at the foreclosure sale.

Recent Development Concerning Foreclosures As the subprime lending crisis unfolded during 2007, the number of defaults and foreclosure actions on both subprime and conventional mortgages increased significantly and the trend continued into 2008 when this book went to press. In November 2007 there were 202,000 foreclosure filings in the country, an almost 70 percent increase over the 120,000 filed the previous November. Historically, mortgage lenders were local banks that lent money to a homeowner who then paid the money back to the bank. If the loan was in

difficulty, the borrower and his local lender would work through the matter directly. Over time, local lenders began to resell or assign the loans they originated to others. And, in recent years, the practice of bundling loans together as mortgage-backed securities became commonplace.

Securitization takes the role of the lender and breaks it down into different components. The loan is sold to a third party, the issuer, that bundles the loan into a security and then sells it to investors who are entitled to a share of the cash paid by the borrowers on their mortgages. Another party—the trustee—is created to represent the interests of the investors. And, another party—the servicer—collects the payments, distributes them to the issuer, and also deals with any delinquencies on the part of borrowers.

Thus, these arrangements involving bundles of hundreds or thousands of mortgages are much more complex than the simple assignment of a single mortgage, and concomitantly the paperwork involved is much more complicated—and the documentation sometimes incomplete when there was/is pressure to get deals done.

As some of the collateralized loans fell into default and the owners of the securities—often large banks—brought foreclosure actions, judges began to scrutinize the cases to make sure that the parties bringing the foreclosure actions actually were the legal holders of the mortgage obligation and to dismiss the cases where that showing had not been made. The opinion that follows by Judge Boyko in *In re Foreclosure Cases* generated a lot of attention in the media and in the financial and legal communities when it was issued in October 2007 and served as a warning to would-be foreclosers that they needed to have their paperwork in order before they sought to put a homeowner out of his house.

In re Foreclosure Cases

2007 U.S. Dist. LEXIS 84011 (N.D. Ohio 2007)

Boyko, U.S. District Judge

On October 10, 2007, this court issued an Order requiring Plaintiff-Lenders in a number of pending foreclosure cases to file a copy of the executed Assignment demonstrating Plaintiff was the holder and owner of the Note and Mortgage *as of the date the Complaint was filed*, or the Court would order a dismissal. After considering the submissions along with all the documents filed of record, the Court dismisses the captioned cases without prejudice.

To satisfy the requirements of Article III of the United States Constitution, the plaintiff must show he has personally suffered some actual injury as a result of the illegal conduct of the defendant. In each of the (Complaints, the named Plaintiff alleges that it is the holder and owner of the) Note and Mortgage. However, the attached Note and Mortgage identify the mortgagee and promise as the original lending institution—one other than the named Plaintiff. Further the Preliminary Judicial Report attached as an exhibit to the complaint makes no reference to the

named Plaintiff in the recorded chain of title/interest. The Court's Amended General Order requires Plaintiff to submit an affidavit along with the complaint, which identifies Plaintiff either as the original mortgage holder, or as an assignee, trustee, or successor-in-interest. Once again, the affidavits submitted in all these cases recite the averment that Plaintiff is the owner of the Note and Mortgage, without any mention of an assignment or trust or successor interest. Consequently, the very filings and submissions of the Plaintiff create a conflict. In every instance, then, Plaintiff has not satisfied its burden of demonstrating standing at the time of the filing of the Complaint.

Understandably, the Court requested clarification by requiring each Plaintiff to submit a copy of the Assignment of the Note and Mortgage, executed as of the date of the Foreclosure Complaint. In the above captioned cases, **none** of the Assignments show the named Plaintiff to be the owner of the rights, title, and interest under the Mortgage at issue as of the date of the Foreclosure Complaint. The Assignments, in every instance, express a present intent to convey all rights, title and interest in the Mortgage and the accompanying Note to the Plaintiff named in the Foreclosure Complaint upon receipt of sufficient consideration on the date the Assignment was signed and notarized. Those proffered documents belie Plaintiffs' assertion they own the Note and Mortgage by means of a purchase which pre-dated the Complaint by days, months or years.

This Court is obligated to carefully scrutinize all filings and pleadings in foreclosure actions, since the unique nature of real property requires contracts and transactions concerning real property to be in writing. Ohio law holds that when a mortgage is assigned, moreover, the assignment is subject to the recording requirements. Thus, with regards to real property, before an entity assigned an interest in that property would be entitled to receive a distribution from the sale of the property, their interest therein must have been recorded in accordance with Ohio law.¹

This Court acknowledges the right of banks, holding valid mortgages, to receive timely payments. And, if they do not receive timely payments, banks have the right to properly file actions on the defaulted notes—seeking foreclosure on the property securing the notes. Yet, this Court possesses the independent obligations to preserve the judicial integrity of the federal court and to jealously guard federal jurisdiction. Neither the fluidity of the secondary mortgage market, nor monetary or economic considerations of the parties, nor the convenience of the litigants supersede those obligations.

¹Astoundingly, counsel at oral argument stated that his client, the purchaser from the original mortgagee, acquired complete legal and equitable interest in land when money changed hands, even before the purchase agreement, let alone a proper assignment, made its way into his client's possession.

Despite Plaintiffs' counsel's belief that "there appears to be some level of disagreement and/or misunderstanding amongst professionals, borrowers, attorneys and members of the judiciary," the Court does not require instruction and is not operating under any misapprehension. Plaintiff's, "Judge, you just don't understand how things work," argument reveals a condescending mindset and quasi-monopolistic system where financial institutions have traditionally controlled, and still control, the foreclosure process. Typically, the homeowner who finds himself/herself in financial straits, fails to make the required mortgage payments and faces a foreclosure suit, is not interested in testing state or federal jurisdictional requirements, either *pro se* or through counsel. Their focus is either, "how do I save my home," or "if I have to give it up, I'll simply leave and find somewhere else to live."

In the meantime, the financial institutions or successors/assignees rush to foreclose, obtain a default judgment and then sit on the deed, avoiding responsibility for maintaining the property while reaping the financial benefits of interest running on a judgment. The financial institutions know the law charges the one with title (still the homeowner) with maintaining the property.

There is no doubt every decision made by a financial institution in the foreclosure process is driven by money. And the legal work which flows from winning the financial institution's favor is highly lucrative. There is nothing improper or wrong with financial institutions or law firms making a profit—to the contrary, they should be rewarded for sound business and legal practices. However, unchallenged by underfinanced opponents, the institutions worry less about jurisdictional requirements and more about maximizing returns. Unlike the focus of financial institutions, the federal courts must act as gatekeepers, assuring that only those who meet diversity and standing requirements are allowed to pass through. Counsel for the institutions are not without legal argument to support their position, but their arguments fall woefully short of justifying their premature filings, and utterly fail to satisfy their standing and jurisdictional burdens. The institutions seem to adopt the attitude that since they have been doing this for so long, unchallenged, this practice equates with legal compliance. Finally put to the test, their weak legal arguments compel the Court to stop them at the gate.

The Court will illustrate in simple terms its decision: "Fluidity of the market"—"X" dollars, "contractual arrangements between institutions and counsel"—"X" dollars, "purchasing mortgages in bulk and securitizing"—"X" dollars, "rush to file, slow to record after judgment"—"X" dollars, "the jurisdictional integrity of United States District Court"—"Priceless."

For all the foregoing reasons, the above-captioned Foreclosure Complaints are dismissed without prejudice.

Deed of Trust States typically use either the mortgage or the **deed of trust** as the primary mechanism for holding a security interest in real property. There are three parties to a deed of trust: (1) the owner of the property who borrows the money (the debtor), (2) the trustee who holds legal title to the property put up as security, and (3) the lender who is the beneficiary of the trust. The trustee serves as a fiduciary for both the creditor and the debtor. The purpose of the deed of trust is to make it easy for the security to be liquidated. However, most states treat the deed of trust like a mortgage in giving the borrower a relatively long period of time to redeem the property, thereby defeating this rationale for the arrangement.

In a deed of trust transaction, the borrower deeds to the trustee the property that is to be put up as security. The trust agreement usually gives the trustee the right to foreclose or sell the property if the debtor fails to make a required payment on the debt. Normally, the trustee does not sell the property until the lender notifies him that the borrower is in default and demands that the property be sold. The trustee must notify the debtor that he is in default and that the land will be sold. The trustee advertises the property for sale. After the statutory period, the trustee will sell the property at a public or private sale. The proceeds are applied to the costs of the foreclosure, interest, and debt. If there is a surplus, it is paid to the borrower. If there is a deficiency, the lender has to sue the borrower on the debt and recover a judgment.

Land Contracts The **land contract** is a device for securing the balance due the seller on the purchase price of real estate. Essentially, it is an installment contract for the purchase of land. The buyer agrees to pay the purchase price over a period of time. The seller agrees to convey title to the property to the buyer when the full price is paid. Usually, the buyer takes possession of the property, pays the taxes, insures the property, and assumes the other obligations of an owner. However, the

seller keeps legal title and does not turn over the deed until the purchase price is paid.

If the buyer defaults, the seller usually has the right to declare a forfeiture and take over possession of the property. The buyer's rights to the property are cut off at that point. Most states give the buyer on a land contract a limited period of time to redeem his interest. Moreover, some states require the seller to go through a foreclosure proceeding. Generally, the procedure for declaring a forfeiture and recovering property sold on a land contract is simpler and less time-consuming than foreclosure of a mortgage. In most states, the procedure in case of default is set out by statute. If the buyer, after default, voluntarily surrenders possession to the seller, no court procedure is necessary; the seller's title will become absolute, and the buyer's equity will be cut off.

Purchases of farm property are commonly financed through the use of land contracts. As an interest in real estate, a land contract should be in writing and recorded in the local land records so as to protect the interests of both parties.

However, some courts have invoked the equitable doctrine against forfeitures and have required that the seller on a land contract must foreclose on the property in order to avoid injustice to a defaulting buyer.

Mechanic's and Materialman's Liens

Each state has a statute that permits persons who contract to furnish labor or materials to improve real estate to claim a lien on the property until they are paid. There are many differences among states as to exactly who can claim such a lien and the requirements that must be met to do so.

Rights of Subcontractors and Materialmen A general contractor is a person who has contracted with the owner to build, remodel, or improve real property. A subcontractor is a person who has

Ethics in Action

What Is the Right Thing to Do?

Suppose you have sold a farm to a young couple on a land contract that calls for them to pay off the purchase price over a 10-year period. After the couple has paid about a third of the purchase price, a serious drought damages their crop and they miss several payments, triggering your right to

declare a default and reclaim possession of the property. Are there any ethical considerations involved in your taking such an action that you are otherwise legally entitled to take? If you proceed with a forfeiture action in court, what policy considerations should the court take into account in deciding whether to grant your request?

CONCEPT REVIEW

Security Interests in Real Property

| Type of Security Instrument | Parties | Features |
|-----------------------------|---|--|
| Mortgage | <ol style="list-style-type: none"> 1. Mortgagor (property owner/debtor) 2. Mortgagee (creditor) | <ol style="list-style-type: none"> 1. Mortgagee holds a security interest (and in some states, title) in real property as security for a debt. 2. If mortgagor defaults on her obligation, mortgagee must <i>foreclose</i> on property to realize on his security interest. 3. Mortgagor has a limited time after foreclosure to <i>redeem</i> her interest. |
| Deed of Trust | <ol style="list-style-type: none"> 1. Owner/debtor 2. Lender/creditor 3. Trustee | <ol style="list-style-type: none"> 1. Trustee holds legal title to the real property put up as security. 2. If debt is satisfied, the trustee conveys property back to owner/debtor. 3. If debt is not paid as agreed, creditor notifies trustee to sell the property. 4. While intended to make foreclosure easier, most states treat it like a mortgage for purposes of foreclosure. |
| Land Contract | <ol style="list-style-type: none"> 1. Buyer 2. Seller | <ol style="list-style-type: none"> 1. Seller agrees to convey title when full price is paid. 2. Buyer usually takes possession, pays property taxes and insurance, and maintains the property. 3. If buyer defaults, seller may declare a forfeiture and retake possession (most states) after buyer has limited time to redeem; some states require foreclosure. |

contracted with the general contractor to perform a stipulated portion of the general contract. A materialman is a person who has contracted to furnish certain materials needed to perform a designated general contract.

Two distinct systems—the New York system and the Pennsylvania system—are followed by the states in allowing mechanic's liens on real estate to subcontractors and materialmen. The New York system is based on the theory of subrogation, and the subcontractors or materialmen cannot recover more than is owed to the contractor at the time they file a lien or give notice of a lien to the owner. Under the Pennsylvania system, the subcontractors or materialmen have direct liens and are entitled to liens for the value of labor and materials furnished, irrespective of the amount due from the owner to the contractor. Under the New York system, the general contractor's failure to perform his contract or his abandonment of the work has a direct effect on the lien rights of subcontractors and materialmen, whereas under the Pennsylvania system, such breach or abandonment by

the general contractor does not directly affect the lien rights of subcontractors and materialmen.

Basis for Mechanic's or Materialman's Lien Some state statutes provide that no lien shall be claimed unless the contract for the improvement is in writing and embodies a statement of the materials to be furnished and a description of the land on which the improvement is to take place and of the work to be done. Other states permit the contract to be oral, but in no state is a licensee or volunteer entitled to a lien. No lien can be claimed unless the work is done or the materials are furnished in the performance of a contract to improve specific real property. A sale of materials without reference to the improvement of specific real property does not entitle the person furnishing the materials to a lien on real property that is, in fact, improved by the use of the materials at some time after the sale.

Unless the state statute specifically includes submaterialmen, they are not entitled to a lien. For example, if a

lumber dealer contracts to furnish the lumber for the erection of a specific building and orders from a sawmill a carload of lumber that is needed to fulfill the contract, the sawmill will not be entitled to a lien on the building in which the lumber is used unless the state statute expressly provides that submaterialmen are entitled to a lien.

At times, the question has arisen as to whether materials have been furnished. Some courts have held that the materialman must prove that the material furnished was actually incorporated into the structure. Under this ruling, if material delivered on the job is diverted by the general contractor or others and not incorporated into the structure, the materialman will not be entitled to a lien. Other courts have held that the materialman is entitled to a lien if he can provide proof that the material was delivered on the job under a contract to furnish the material.

Requirements for Obtaining Lien The requirements for obtaining a mechanic's or materialman's lien must be complied with strictly. Although there is no uniformity in the statutes as to the requirements for obtaining a lien, the statutes generally require the filing of a notice of lien with a county official such as the register of deeds or the county clerk, which notice sets forth the amount claimed, the name of the owner, the names of the contractor and the claimant, and a description of the property. Frequently, the notice of lien must be verified by an affidavit of the claimant. In some states, a copy of

the notice must be served on the owner or be posted on the property.

The notice of lien must be filed within a stipulated time. The time varies from 30 to 90 days, but the favored time is 60 days after the last work performed or after the last materials furnished. Some statutes distinguish between labor claims, materialmen's claims, and claims of general contractors as to time of filing. The lien, when filed, must be foreclosed within a specified time, which generally varies from six months to two years.

Priorities and Foreclosure The provisions for priorities vary widely, but most of the statutes provide that a mechanic's lien has priority over all liens attaching after the first work is performed or after the first materials are furnished. This statutory provision creates a hidden lien on the property, in that a mechanic's lien, filed within the allotted period of time after completion of the work, attaches as of the time the first work is done or the first material is furnished, but no notice of lien need be filed during this period. And if no notice of lien is filed during this period, third persons would have no means of knowing of the existence of a lien. There are no priorities among lien claimants under the majority of the statutes.

The case that follows, *Mutual Savings Association v. Res/Com Properties, L.L.C.*, illustrates a situation where subcontractors were able to obtain a preferred position through compliance with a state lien statute.

Mutual Savings Association v. Res/Com Properties, L.L.C. 79 P.3d 184 (Ct. App. Kansas 2003)

In July 1999, George Kritos contracted with the Peridian Group to provide design and engineering services on a property known as the Whispering Meadows development in Eudora, Kansas. The work included boundary verification, topographical surveying, preparing preliminary and final site development plans, platting, storm water drainage studies, sanitary sewer design, street and storm sewer design, and water line design. The on-site work consisted of surveying, staking the boundary corners, staking of preliminary layouts for utilities and streets, plus horizontal and vertical control benchmark staking used for sewer, street, and storm water designs. Peridian's work began prior to May 22, 2000.

On May 22, 2000, Res/Com Properties, L.L.C., purchased the property from Kritos. That same day, Res/Com signed a promissory note and related mortgage in favor of Mutual Savings Association (Mutual). Mutual recorded its mortgage on May 24, 2000. Res/Com used the money it borrowed from Mutual to purchase the property from Kritos. Peridian then contracted with Res/Com to continue its design and engineering services.

On July 2, 2000, Modern Engineering Utilities Company, Inc. (Modern), began installing the sanitary sewers on the property under a subcontract with Heartland Building and Development Company, Res/Com's general contractor on the project. On July 19, Res/Com executed and delivered to Mutual a second mortgage to secure a further loan on the property; the mortgage was filed the following day, July 20, 2000. On August 30, LRM Industries, Inc. (LRM), entered into two contracts with Heartland to construct improvements on the property. LRM worked on the property from September through November 2000.

On October 26, 2000, Peridian filed its mechanic's lien. LRM filed its mechanic's lien on December 18, 2000, and Modern filed a lien on December 19, 2000. In March 2001, Mutual paid Peridian for its work, took an assignment of its lien, and filed a release of the lien. Res/Com subsequently defaulted on both of the notes it owed to Mutual. Mutual brought suit to foreclose its mortgages, and one of the issues in the litigation was the relative priority of the mechanic's liens held by LRM and Modern. LRM and Modern argued that their liens were entitled to priority by "relating back" to Peridian's preliminary staking of the property and its off-site design and engineering work.

Kansas statutes—K.S.A. section 60–1101 entitled "Liens of contractors; priority" states:

Any person furnishing labor, equipment, material, or supplies used or consumed for the improvement of real property, under a contract or with the trustee, agent or spouse of the owner, shall have a lien upon the property for the labor, equipment, material or supplies furnished, and for the cost of transporting the same. The lien shall be preferred to all other liens or encumbrances which are subsequent to the furnishing of such labor, equipment, material or supplies at the site of the property subject to the lien. When two or more such contracts are entered into applicable to the same improvement, the liens of all claimants shall be similarly preferred to the date of the earliest unsatisfied lien of any of them.

K.S.A. 2002 Supp. 60–1103 entitled "Liens of subcontractors; procedure, recording and notice, owner's liability" states in part:

(a) *Procedure.* Any supplier, subcontractor or other person furnishing labor, equipment, material or supplies, used or consumed at the site of the property subject to the lien, under an agreement with the contractor, subcontractor or owner contractor may obtain a lien for the amount due in the same manner and to the same extent as the original contractor.

Rulon, Chief Justice

Our Supreme Court in *Haz-Mat Response, Inc. v. Certified Waste Services Ltd.* (1996), noted:

Our mechanic's lien law is remedial in nature, enacted for the purpose of providing effective security to any persons furnishing labor, equipment, material, or supplies used or consumed for the improvement of real property under a contract with the owner. The theory underlying the granting of a lien against the property is that the property improved by the labor, equipment, material, or supplies should be charged with the payment of the labor, equipment, material, or supplies.

At the same time, a mechanic's lien is purely a creation of statute, and those claiming a mechanic's lien must bring themselves clearly within the provisions of the authorizing statute. The statute must be followed strictly with regard to the requirements upon which the right to lien depends. However, because the statute is remedial and designed for the benefit and protection of persons designated by the act, once a lien has been found to have attached, the law is to be liberally construed in favor of such claimant.

Subcontractors' liens attach at the time the general contractor began work or construction. Contractors' liens attach when there has been a furnishing of labor, equipment, material, or supplies used or consumed for the improvement of the property. The liens of all contractors and subcontractors are similarly preferred to the date of the earliest unsatisfied lien.

Under the facts before us, the status of Peridian as a subcontractor or contractor is immaterial. The central issue on appeal is when and if Peridian's work, done prior to Mutual's

mortgage, became lienable and attached. If Peridian's on-site surveying and staking and off-site designing and planning, done prior to Mutual's mortgage being filed, were not lienable or had not attached, LRM and Modern's liens could only relate back to when Modern began work, which was subsequent to Mutual's mortgage. The effect of such would be that Mutual would have priority.

Initially, a mechanic's lien which has attached is superior to any subsequent purchaser for value and without notice, even if no lien statement is filed until after the conveyance. The work itself constitutes notice to the world of the existence of the lien. As such, the fact Peridian's work was done prior to Res/Com actually becoming the owner of the property is not in and of itself a bar to LRM's and Modern's claims of priority. However, for LRM and Modern to prevail, Peridian's "permortgage" work must have attached to the property. Under *K.S.A. 60–1101*, "in order for a mechanic's lien for labor and materials to attach, such items must be used or consumed for the improvement of real property, and thus become part of the realty itself."

Our Supreme Court, in *Haz-Mat Response, Inc.*, clarified the test to be used in determining what types of activity were and were not lienable. After reviewing a number of prior Kansas cases as well as cases from other states dealing generally with the meaning of the phrase "improvement of real property," the *Haz-Mat* court devised seven (7) considerations for determining if an activity is considered to improve real property.

- (1) What is or is not an improvement of real property must necessarily be based upon the circumstances of each case;
- (2) improvement of the property does not require the actual

construction of a physical improvement on the real property; (3) the improvement of real property need not necessarily be visible, although in most instances it is; (4) the improvement of the real property must enhance the value of the real property, although it need not enhance the selling value of the property; (5) for labor, equipment, material, or supplies to be lienable items, they must be used or consumed and thus become part of the real property; (6) the nature of the activity performed is not necessarily a determining factor of whether there is an improvement of real property within the meaning of the statute; rather, the purpose of the activity is more directly concerned in the determination of whether there is an improvement of property which is thus lienable; and (7) the furnishing of labor, equipment, material, or supplies used or consumed for the improvement of real property may become lienable if established to be part of an overall plan to enhance the value of the property, its beauty or utility, or to adapt it for a new or further purpose, or if the furnishing of labor, equipment, material, or supplies is a necessary feature of a plan of construction of a physical improvement to the real property.

Finally, the *Haz-Mat* court adopted the *Black's Law Dictionary* definition of the phrase "improvement of real property" as it is used in *K.S.A. 60-1101*: "A valuable addition made to real property (usually real estate) or an amelioration in its condition, amounting to more than mere repairs or replacement, costing labor or capital, and intended to enhance its value, beauty or utility or to adapt it for new or further purposes."

Here, the first issue is whether Peridian's preliminary staking and surveying, done prior to Mutual's mortgage, constituted an "improvement" as used in *K.S.A. 60-1101*. Applying the considerations set out in *Haz-Mat*, we conclude Peridian's efforts were lienable. It is undisputed that the labor and capital expended in the surveying and staking work done by Peridian were actually used in the development of the property. This record is silent as to whether stakes installed by Peridian were still on the property at the time Mutual's mortgages were filed, but this is irrelevant under the *Haz-Mat* test. If they were in fact visible, this lends further support to the subcontractors' claim.

The next issue is, if Peridian's work is lienable, when did that lien attach. Once again *K.S.A. 60-1101* reads in relevant part:

The lien shall be preferred to all other liens or encumbrances which are subsequent to the *commencement of the furnishing of such labor, equipment, material or supplies at the site of the property subject to the lien*. When two or more such contracts are entered into applicable to the same improvement, the liens of all claimants shall be similarly preferred to the date of the earliest unsatisfied lien of any of them. (Emphasis added.)

K.S.A. 2002 Supp. 60-1103 reads:

(a) *Procedure*. Any supplier, subcontractor or other person *furnishing labor, equipment, material or supplies, used or consumed at the site of the property subject to the lien*, under an agreement with the contractor, subcontractor or owner contractor *may obtain a lien for the amount due in the same manner and to the same extent as the original contractor*. . . . (Emphasis added.)

The question is what is meant by *commencement of the furnishing of such labor, equipment, material, or supplies at the site of the property subject to the lien*. Here, the district court properly found that under the reasoning in *Haz-Mat*, the off-site engineering and design work done by Peridian was no doubt lienable. However, the district court went on to find that the lien did not attach until the plans drawn up by Peridian were actually "used or consumed" at the site, i.e., the lien did not attach until Modern used the plans to install the sanitary sewers. The district court further found that the preliminary surveying and/or staking done at the site by Peridian before May 22, 2000, was used for preparation of plats, designs, and other paperwork and was not sufficient to be deemed work used or consumed at the site because the work did not become "part of the real property" until the plans and drawings were actually used by Modern to begin construction. The district court appeared to draw a distinction between the staking Peridian completed and the more precise construction staking which subcontractors like Modern used in locating actual physical improvements. We disagree with such a distinction.

Once it is determined that the work performed is lienable, the plain language of *K.S.A. 60-1101* only requires that for priority purposes, the subcontractor or contractor commence the furnishing of such labor, equipment, material, or supplies *at the site* of the property subject to the lien.

It is undisputed that Peridian's work was used in the construction at the site. The question remains whether the surveying and staking Peridian did at the site was sufficient to cause its lien to attach.

In Kansas, "The theory underlying the granting of a lien against the property is that the property improved by the labor, equipment, material, or supplies should be charged with the payment of the labor, equipment, material, or supplies."

Based on the plain language of the Kansas statute, it is irrelevant at what point in the construction process that work was used or consumed. Further, it is undisputed that Peridian did staking work at the site. Again, the record is silent as to whether these stakes were still on the property when Mutual's mortgages were filed. While this may not have been as substantial as the staking required to pour footings and foundation walls, the statute makes no such distinction. Peridian's work was just as necessary in the development of the project as the work of

the dirt contractor digging the trenches for the foundation. We are convinced there is no reason to give preference to one type of subcontractor over another based on an arbitrary distinction of the relative worth of each.

...

On the date Mutual filed its first mortgage securing the note from Res/Com, Peridian was an unsatisfied lienholder. As

such, all contractors' and subcontractors' liens were perfected as of the date Peridian started work. If Mutual wanted to ensure that its mortgages had priority over all other liens, Mutual could have paid off any contractor or subcontractor with potential outstanding liens and obtained lien waivers.

Reversed and remanded for further proceedings.

The procedure followed in the foreclosure of a mechanic's lien on real estate follows closely the procedure followed in a court foreclosure of a real estate mortgage. The rights acquired by the filing of a lien and the extent of the property covered by the lien are set out in some of the mechanic's lien statutes. In general, the lien attaches only to the interest that the person has in the property that has been improved at the time the notice is filed. Some statutes provide that the lien attaches to the building and to the city lot on which the building stands, or if the improvement is to farm property, the lien attaches to a specified amount of land.

Waiver of Lien The question often arises as to the effect of an express provision in a contract for the improvement of real estate that no lien shall attach to the property for the cost of the improvement. In some states,

there is a statute requiring the recording or filing of the contract and making such a provision ineffective if the statute is not complied with. In some states, courts have held that such a provision is effective against everyone; in other states, courts have held that the provision is ineffective against everyone except the contractor; and in still other states, courts have held that such a provision is ineffective as to subcontractors, materialmen, and laborers. Whether the parties to the contract have notice of the waiver of lien provision plays an important part in several states in determining their right to a lien.

It is common practice that before a person who is having improvements made to his property makes final payment, he requires the contractor to sign an affidavit that all materialmen and subcontractors have been paid and to supply him with a release of lien signed by the subcontractors and materialmen.

Problems and Problem Cases

1. Rusty Jones, a used car dealer, applied to First Financial Federal Savings and Loan Association for a \$50,000 line of credit to purchase an inventory of used cars. First Financial refused to make the loan to Jones alone but agreed to do so if Worth Camp, an attorney and friend of Jones, would cosign the note. Camp agreed to cosign as an accommodation maker or surety. The expectation of the parties was that the loans cosigned by Camp would be repaid from the proceeds of the car inventory. The original note for \$25,000 was signed on August 2, 1994, and renewals were executed on January 25, 1995, September 11, 1995, and March 15, 1996, and the amount was eventually increased to \$50,000. In August 1995, as Camp was considering whether to sign the September renewal note, he was advised by First Financial's loan officer that the interest on the loan had not been paid. In fact, interest payments were four months delinquent.

In addition, unknown to Camp, as the \$50,000 credit limit was approached, First Financial began making side, or personal, loans to Jones totaling about \$25,000, which were also payable out of the used car inventory. Camp knew nothing of these loans and thought that Jones's used car business was making payments only on the loans he had cosigned. Jones defaulted on the \$50,000 note cosigned by Camp, and First Financial brought suit against Camp on his obligation as surety on the note. Was Camp relieved of his obligation as surety by First Financial's failure to disclose material facts to him?

2. Bayer was the general contractor on a Massachusetts state highway contract. He hired Deschenes as a subcontractor to do certain excavation work. Deschenes was to start the job by November 24, 1988, and to complete it on or before March 1, 1989. Deschenes was required to furnish a bond of \$91,000 to ensure his faithful performance of the subcontract, and he

purchased such a bond from Aetna Insurance Company. Deschenes began the work on December 1, 1988, and quit on June 22, 1989, after completing only about half of the work. Bayer had made numerous efforts to get Deschenes to do the work and then completed the job himself when Deschenes walked off the job. Bayer then brought a lawsuit against Aetna on the bond, and Aetna claimed that it was discharged by the extension of the time given to Deschenes. Should Bayer recover on the bond?

3. During May and June, John Shumate regularly parked his automobile on a vacant lot in downtown Philadelphia. At that time, no signs were posted prohibiting parking on the lot or indicating that vehicles parked there without authorization would be towed. On July 7, Shumate again left his car on the lot. When he returned two days later, the car was gone and the lot was posted with signs warning that parking was prohibited. Shumate learned that his car had been towed away by Ruffie's Towing Service and that the car was being held by Ruffie's at its place of business. Ruffie's refused to release the car until Shumate paid a towing fee of \$44.50 plus storage charges of \$4 per day. Shumate refused to pay the fee, and Ruffie's kept possession of the car. Did Ruffie's have a common law possessory lien on the car?
4. Philip and Edith Beh purchased some property from Alfred M. Gromer and his wife. Sometime earlier, the Gromers had borrowed money from City Mortgage. They had signed a note and had given City Mortgage a second deed of trust on the property. There was also a first deed of trust on the property at the time the Behs purchased it. In the contract of sale between the Behs and the Gromers, the Behs promised to "assume" the second deed of trust of approximately \$5,000 at 6 percent interest. The Behs later defaulted on the first deed of trust. Foreclosure was held on the first deed of trust, but the proceeds of the sale left nothing for City Mortgage on its second deed of trust. City Mortgage then brought a lawsuit against the Behs to collect the balance due on the second deed of trust. When the Behs "assumed" the second deed of trust, did they become personally liable for it?
5. Pope agreed to sell certain land to Pelz and retained a mortgage on the property to secure payment of the purchase price. The mortgage contained a clause providing that if Pelz defaulted, Pope had the "right to enter upon the above-described premises and sell the same at public sale" to pay the balance of the purchase price, accounting to Pelz for any surplus realized on the sale. What type of foreclosure does this provision contemplate: (1) strict foreclosure, (2) action and sale, or (3) private power of sale?
6. Betty Nelson signed a promissory note payable to Family Bank in return for a loan the bank had made to her. The note was secured by a deed of trust on a duplex owned by Nelson. When the note was signed, the duplex was rented to third parties. Nelson defaulted on the note, and Family Bank filed a complaint to foreclose the trust deed. Nelson advised the bank that she and her son were occupying the duplex as their residence. Under Orgeon law, a lender can obtain a deficiency judgment in connection with the foreclosure of a commercial deed of trust; however, a deficiency judgment is not available in connection with the foreclosure of a noncommercial (residential) deed of trust. If Family Bank went forward with foreclosure of the deed of trust, could it obtain a deficiency judgment against Nelson if the sale of the property produced less than the amount of the debt?
7. In October 1992, Verda Miller sold her 107-acre farm for \$30,000 to Donald Kimball, who was acting on behalf of his own closely held corporation, American Wonderlands. Under the agreement, Miller retained title and Kimball was given possession pending full payment of all installments of the purchase price. The contract provided that Kimball was to pay all real estate taxes. If he did not pay them, Miller could discharge them and either add the amounts to the unpaid principal or demand immediate payment of the delinquencies plus interest. Miller also had the right to declare a forfeiture of the contract and regain possession if the terms of the agreement were not met. In 1995, Miller had to pay the real estate taxes on the property in the amount of \$672.78. She demanded payment of this amount plus interest from Kimball. She also served a notice of forfeiture on him that he had 30 days to pay. Kimball paid the taxes but refused to pay interest of \$10.48. Miller made continued demands on Kimball for two months, then filed notice of forfeiture with the county recorder in August 1995. She also advised Kimball of this. Was Miller justified in declaring a forfeiture and taking back possession of the land?
8. Edwin Bull was the owner of an 80-foot fishing trawler named the *Bull Head* that had been leased for

use in dismantling a bridge over the Illinois River at Pekin, Illinois. At the termination of the lease, the *Bull Head* was towed upriver to Morris, Illinois, not operating on its own power. At Morris, a tugboat owned by Iowa Marine Repair Corporation was used to remove the *Bull Head* from the tow and to move it to the south bank of the river where it was tied up. Several months later, the *Bull Head* was moved across the river by Iowa Marine and moored at a place on the north bank where it maintained its fleeting operations. The *Bull Head* remained there for several years and greatly deteriorated. Iowa Marine sent Bull a bill for switching, fleeting, and other services. Bull refused to pay and brought suit against Iowa Marine to recover possession of the boat. In turn, Iowa Marine claimed that it had a mechanic's lien on the *Bull Head* and that the boat should be sold to satisfy the lien. Illinois law provides that

any architect, contractor, subcontractor, materialman, or other person furnishing services, labor, or material for the purpose of, or in constructing, building, altering, repairing or ornamenting a boat, barge, or watercraft shall have a lien on such boat for the value of such services, labor, or material in the same manner as in this act provided for the purpose of building, altering, repairing, or ornamenting a house or other building.

Does Iowa Marine have a valid mechanic's lien on the boat for its switching, fleeting, and storage services?

9. Bowen-Rodgers Hardware Company was engaged in the business of furnishing materials for the construction of buildings. It delivered a quantity of materials to property owned by Ronald and Carol Collins. The materials were for the use of a contractor who was building a home for the Collinses as well as several

other houses in the area. The hardware company was not paid for the materials by the contractor, and it sought to obtain a mechanic's lien against the Collinses' property. The Collinses claimed that even though the materials were delivered to their home, they were actually used to build other houses in the area. Was the Collinses' property subject to a mechanic's lien because payment had not been made for materials delivered to it?

Online Research

What Protection Does Your State Give Artisans?

Use the Internet to research your state law to determine what (a) an artisan who improves personal property or (b) a contractor or supplier of materials for the improvement of real property must do to claim a lien on the property until he is paid. What steps must the lienholder do to foreclose on his lien? If your state's laws are not accessible online, then look at the law in New York or California.

**You Be
the Judge**

Consider completing the case "DEBT COLLECTION: Overdue or Overdone?" from the You Be the Judge Web site element after you have read this chapter. Visit our Web site at www.mhhe.com/mallor14e for more information and activities regarding this case segment.

chapter 29

SECURITY INTERESTS IN PERSONAL PROPERTY

Elaine Stanley decides that she will start a card and gift shop in leased space in a shopping mall. Her personal assets are not sufficient to finance the business so she borrows some initial working capital from a bank. She purchases some display fixtures from a local supplier, making a small down payment and agreeing to pay the balance of the purchase price over the next two years. She purchases her initial inventory from several suppliers, agreeing to either pay for the goods within 60 days or to pay interest at the rate of 15 percent per year on any unpaid balance. To attract customers, she plans to offer both a layaway plan and store charge accounts. Among the questions raised by this hypothetical are:

- How can the creditors of the business, such as the bank, the supplier of the display fixtures, and the suppliers of the inventory, obtain security for the credit they have extended to Elaine?
- What steps must the creditors take to obtain maximum protection against Elaine and against her other creditors in the event she defaults on her obligations?
- What relative rights will the creditors have against each other in the event Elaine defaults on her obligations to them?
- How can Elaine protect herself when she extends credit to her customers?
- If a customer has paid Elaine a significant amount of the agreed-upon price for an item Elaine is holding for her on layaway and then defaults on paying the balance of the purchase price, would it be ethical for Elaine to retain all of the money she has received as well as the item, or should she return some of the money paid to the customer?

IN MANY CREDIT TRANSACTIONS the creditor, in order to protect his investment, takes a security interest, or lien, in personal property belonging to the debtor. The law covering security interests in personal property is set forth in Article 9 of the Uniform Commercial Code. Article 9, entitled Secured Transactions, applies to situations that consumers and businesspeople commonly face; for example, the financing of an automobile, the purchase of a refrigerator on a time-payment plan, or the financing of business inventory.

Article 9

If a creditor wants to obtain a security interest in the personal property of the debtor, he also wants to be sure that his interest is superior to the claims of other

creditors. To do so, the creditor must carefully comply with Article 9. In Part 4 of this text, Sales, we pointed out that businesspersons sometimes leave out important terms in a contract or insert vague terms to be worked out later. Such looseness is a luxury that is not permitted in secured transactions. If a debtor gets into financial difficulties and cannot meet her obligations, even a minor noncompliance with Article 9 may cause the creditor to lose his preferred claim to the personal property of the debtor. A creditor who loses his secured interest is only a general creditor if the debtor is declared bankrupt. As a general creditor in bankruptcy proceedings, he may have little chance of recovering the money owed by the debtor because of the relatively low priority of such claims. Chapter 30, Bankruptcy, covers this in detail.

In 1998, the National Conference on Uniform State Laws adopted a “Revised Article 9” that has now been adopted by all 50 states with effective dates ranging from 2001 to 2002. Because Revised Article 9 is much more complex than the old Article 9 and because Article 9 has not been adopted in exactly the same form in every state, the law must be examined very carefully to determine the procedure in a particular state for obtaining a security interest and for ascertaining the rights of the creditors and debtors. However, the general concepts are the same in each state and will be the basis of our discussion in this chapter.

Security Interests under the Code

Security Interests Basic to a discussion of secured consumer and commercial transactions is the term **security interest**. A security interest is an interest in personal property or fixtures obtained by a creditor to secure payment or performance of an obligation [1–201(37)].¹ For example, when a person borrows money from a bank to buy a new car, the bank takes a security interest in, or puts a lien on, the car until the loan is repaid. If the person defaults on the loan, the bank can repossess the car and have it sold to cover the unpaid balance. A security interest is a property interest in the collateral.

Types of Collateral Goods—tangible items such as automobiles and business computers—are commonly used as collateral for loans. Article 9 of the Uniform Commercial Code also covers security interests in a much broader grouping of personal property. The Code breaks down personal property into a number of different classifications, which are important in determining how a creditor obtains an enforceable security interest in a particular kind of collateral.

The Code classifications include:

1. *Instruments*. This includes checks, notes, drafts, and certificates of deposit [9–102(a)(47)].
2. *Documents of title*. This includes bills of lading, dock warrants, dock receipts, and warehouse receipts [9–102(a)(30)].
3. *Accounts*. This includes the rights to payment of a monetary obligation for goods sold or leased or

for services rendered that are not evidenced by instruments or chattel paper but are carried on open accounts, including lottery winnings and health care–insurance receivables. Items in the “accounts” category include such rights to payment whether or not the rights have been earned by performance [9–102(a)(2)].

4. *Chattel paper*. This includes written documents that evidence both an obligation to pay money and a security interest in specific goods [9–102(a)(11)]. A typical example of chattel paper is what is commonly known as a *conditional sales contract*. This is the type of contract that a consumer might sign when she buys a large appliance such as a refrigerator on a time-payment plan.
5. *General intangibles*. This is a catchall category that includes, among other things, patents, copyrights, software, and franchises [9–102(a)(42)].
6. *Goods*. Goods [9–102(a)(44)] are divided into several classes; the same item of collateral may fall into different classes at different times, depending on its use:
 - a. *Consumer goods*. Goods used or bought primarily for personal, family, or household use, such as automobiles, furniture, and appliances [9–102(a)(23)].
 - b. *Equipment*. Goods other than inventory, farm products, or consumer goods [9–102(a)(33)].
 - c. *Farm products*. Crops, livestock, or supplies used or produced in farming operations as long as they are still in the possession of a debtor who is engaged in farming [9–102(a)(34)].
 - d. *Inventory*. Goods held for sale or lease or to be used under contracts of service, as well as raw materials, work in process, or materials used or consumed in a business [9–102(a)(48)].
 - e. *Fixtures*. Goods that will be so affixed to real property that they are considered a part of the real property [9–102(a)(41)].
7. *Investment property*. This includes securities such as stocks, bonds, and commodity contracts [9–102(a)(49)].
8. *Deposit accounts*. This includes demand, time, savings, passbook, and similar accounts maintained with a bank [9–102(a)(29)].

It is important to note that an item such as a stove could in different situations be classified as inventory, equipment, or consumer goods. In the hands of the manufacturer or an appliance store, the stove is *inventory*. If it is being used in a restaurant, it is *equipment*. In a home, it is classified as *consumer goods*.

¹The numbers in brackets refer to sections of the Uniform Commercial Code.

Obtaining a Security Interest The goal of a creditor is to obtain a security interest in certain personal property that will be good against (1) the debtor, (2) other creditors of the debtor, and (3) a person who might purchase the property from the debtor. In case the debtor defaults on the debt, the creditor wants to have a better right to claim the property than anyone else. Obtaining an enforceable security interest is a two-step process—attachment and perfection.

Attachment of the Security Interest

Attachment A security interest is not legally enforceable against a debtor until it is attached to one or more particular items of the debtor's property. The **attachment** of the security interest takes place in a legal sense rather than in a physical sense. There are three basic requirements for a security interest to be attached to the goods of a debtor [9–203]. First is an *agreement* in which the debtor grants the creditor a security interest in particular property (collateral) in which the debtor has an interest. Second, the debtor must have *rights in the collateral*. Third, the creditor must give *value* to the debtor. The creditor must, for example, lend money or advance goods on credit to the debtor. Unless the debtor owes a debt to the creditor, there can be no security interest. The purpose of obtaining a security interest is to secure a debt.

The Security Agreement The agreement in which a debtor grants a creditor a security interest in the debtor's property must generally be authenticated by the debtor. An authenticated agreement is required in all cases except where the creditor has possession or control of the collateral [9–203]. Suppose Cole borrows \$50 from Fox and gives Fox her wristwatch as a security for the loan. The agreement whereby Cole put up her watch as collateral does not have to be authenticated by Cole to be enforceable. Because the creditor (Fox) is in possession of the collateral, an oral agreement is sufficient.

The security agreement must reasonably describe the collateral so that it can readily be identified. For example, it should list the year, make, and serial number of an automobile. The security agreement usually spells out the terms of the arrangement between the creditor and the debtor. Also, it normally contains a promise by the debtor to pay certain amounts of money in a certain way. The agreement specifies which events, such as nonpayment by the buyer, constitute a default. In addition, it may contain provisions that the creditor feels are necessary to protect his security interest. For example, the debtor may be required to keep the collateral insured, not to move it without the creditor's consent, or to periodically report sales of secured inventory goods. In the case that follows, *In re Shirel*, the court found that the information contained in a credit application did not meet the requirements for a security agreement.

In re Shirel

251 BR 157 (Bankr., W.D. Oklahoma 2000)

Kevin Shirel applied for a credit card from Sight'N Sound Appliance Centers, Inc. The credit application, which constituted the agreement between the parties, was a barely legible, seven-page, single-spaced, small-print document. Shirel signed it on the first page. The form contained a statement that Sight'N Sound would have a "security interest" in all "merchandise" purchased with the credit card. The statement was located approximately four pages into the application.

Shirel's credit was approved, and he purchased a new refrigerator using the credit card. Several months later, Shirel filed a bankruptcy petition listing the remaining credit card debt as unsecured and the refrigerator as exempt from the claims of creditors. Subsequently, Sight'N Sound objected to the claim of exemption. It contended that Shirel had improperly listed the debt as unsecured and asserted that it held a secured interest in the refrigerator.

Bohanon, Bankruptcy Judge

The central issue here is whether the language included in the credit application is sufficient to grant a security interest under the Oklahoma Uniform Commercial Code. Neither the Oklahoma Supreme Court, nor the Court of Appeals for this Circuit, has indicated what precise language is required to create a security interest in goods purchased with a credit card.

Therefore, I will evaluate the plain language of the Uniform Commercial Code and determine whether or not this credit card application is a security agreement.

This statute defines a security interest as "an agreement which creates or provides for a security interest." Section 9–105(h). The formal requirements are set forth in section 9–203. The

relevant provision states that, “a security agreement is not enforceable against the debtor or third parties . . . unless . . . the debtor has signed a security agreement which contains a description of the collateral.”

Section 9–110 of the UCC clarifies how the word “description” should be interpreted. It states that, “for the purposes of this Article any description of personal property . . . sufficient whether or not it is specific if it reasonably identifies what is described.” While the UCC encourages courts to interpret “description” liberally so as to avoid requiring a precise detailed description such as a serial number, the agreement must at a minimum “do the job assigned.” That job is to sufficiently describe the collateral so that a third party would reasonably identify the items which are subject to the security interest.

The credit application here states that the card issuer, “will have a purchase money security interest in all merchandise purchased on [the] account until such merchandise is paid in full.” The description “all merchandise” is vague, broad, and fails to sufficiently identify a refrigerator.

It is understandable for a creditor to desire one catchall-phrase which creates a security agreement in every possible situation. However, in doing so, it may not ignore one of the primary reasons for creating a security interest which is to give

notice to a third party. This can only be achieved by describing what property is subject to the security interest.

Oklahoma courts have held that the following were sufficient descriptions for section 9–110 purposes: “laundry equipment” when referring to a washing machine; “all machinery,” and “paving equipment” to describe a wheel loader; and the words “pickup truck” were sufficient even though the borrower owned two pickup trucks. A reasonable party would understand those descriptions alone, with no need to inquire further. One could be reasonably certain, based on those descriptions, of what collateral is secured. This is not so with the description “all merchandise.” This description could conceivably cover any type of item.

In conclusion, no reasonable party would understand that a security interest was created by merely looking to the description itself. This court can only conclude that the word “merchandise” does not sufficiently describe the collateral at issue here. Accordingly, it is determined that Sight’N Sound does not have a security interest in the refrigerator.

Judgment against Sight’N Sound.

Note: Although this case was decided under the 1972 version of Article 9, the same result would be expected under Revised Article 9, which places more emphasis on the nature of the description.

CYBERLAW IN ACTION

Revised Article 9 Is E-Commerce Friendly

The revision to Article 9 that became effective in most states on July 1, 2001, is friendlier to e-commerce than the version it replaced. It no longer requires that the debtor “sign” a “security agreement” to create an enforceable interest in the collateral that supports the loan or performance obligation. Instead, it allows an “authenticated record”—one produced by the consumer online—to substitute for the signed “writing” of the earlier versions of Article 9 and the earlier state laws that Article 9 replaced. This is very advantageous for the buyer who wants to finance, for example, the purchase of an expensive computer or camera without using a credit card to pay for the purchase. The buyer will be able to complete the purchase transaction using an Internet seller of the type of merchandise desired and also finalize the secured transaction at the same time and using the same Internet-based system provided on

the seller’s Web site. If the seller is providing financing, in a “purchase-money” transaction, the seller can obtain an enforceable sales contract and an enforceable security agreement, and get the goods heading toward the consumer from the seller’s warehouse without delay. The seller in many states also will be able to file an “authenticated record” in substitution for a paper “financing statement” and can complete the filing (and perhaps even pay the filing fee) using e-commerce applications.

Like the “click-through” method of forming a contract described in Chapter 9, click-through secured transactions give the buyer and seller the time- and money-saving advantages of other online transactions. They have similar risks to those present in the pure sales portion of the transaction—of unscrupulous persons trying to take advantage of either the buyer or seller, or both. But the speed and convenience are likely to outweigh the risks for many consumers and many sellers as well.

Purchase Money Security Interests. When the seller of goods retains a security interest in goods until they are paid for, or when money is loaned for the purpose of acquiring certain goods and the lender takes a security interest in those goods, the security interest that is created and attached to the goods is known as a **purchase money security interest (PMSI)**. Creditors who hold PMSIs are considered important creditors because they help the economy by financing the purchase of property and are given certain advantages vis-à-vis other creditors. These advantages are discussed later in this chapter in the sections concerning Perfection of Security Interests and Priorities.

Future Advances A security agreement may stipulate that it covers advances of credit to be made at some time in the future [9–204(3)]. Such later extensions of credit are known as **future advances**. Future advances would be involved where, for example, a bank grants a business a line of credit for \$100,000 but initially advances only \$20,000. When the business draws further against its line of credit, it has received a future advance and the bank is considered to have given additional “value” at that time. The security interest that the creditor obtained earlier also covers these later advances of money.

After-Acquired Property A security agreement may be drafted to grant a creditor a security interest in the **after-acquired property** of the debtor. After-acquired property is property that the debtor does not currently own or have rights in but that he may acquire in the future. However, the security interest does not attach until the debtor actually obtains some rights to the new property [9–203(b)(2)].² For example, Dan’s Diner borrows \$25,000 from the bank and gives it a security interest in all of its present restaurant equipment as well as all of the restaurant equipment that it may “hereafter acquire.” If Dan’s owns only a stove at the time, then the bank has a security interest only in the stove. However, if a month later Dan’s buys a refrigerator, the bank’s security interest would “attach” to the refrigerator when Dan’s acquires some rights to it.

A security interest in after-acquired property may not have priority over certain other creditors if the debtor acquires his new property subject to what is known as a *purchase money security interest*. When the seller of

goods retains a security interest in goods until they are paid for, or when money is loaned for the purpose of acquiring certain goods and the lender takes a security interest in those goods, the security interest is a purchase money security interest. Later in this chapter, the section entitled Priority Rules discusses the rights of the holder of a purchase money security interest versus the rights of another creditor who filed earlier on after-acquired property of the debtor.

Proceeds The creditor is commonly interested in having his security interest cover not only the collateral described in the agreement but also the **proceeds** on the disposal of the collateral by the debtor. For example, if a bank lends money to Dealer to enable Dealer to finance its inventory of new automobiles and the bank takes a security interest in the inventory, the bank wants its interest to continue in any cash proceeds obtained by Dealer when the automobiles are sold to customers. Under the 1998 amendments to Article 9, these proceeds are automatically covered as of the time the security interest attaches to the collateral [9–203(f)].

Perfecting the Security Interest

Perfection While attachment of a security interest to collateral owned by the debtor gives the creditor rights vis-à-vis the debtor, a creditor is also concerned about making sure that she has a better right to the collateral than any other creditor if the debtor defaults. In addition, a creditor may be concerned about protecting her interest in the collateral if the debtor sells it to someone else. The creditor gets protection against other creditors or purchasers of the collateral by perfecting her security interest. Perfection is not effective without an attachment of the security interest [9–308(a)].

Under the Code, there are three main ways of perfecting a security interest:

1. By filing a public notice of the security interest.
2. By the creditor’s taking possession or control of the collateral.
3. In certain transactions, by mere attachment of the security interest; this is known as automatic perfection.

Perfection by Public Filing The most common way of perfecting a security interest is to file a **financing statement** in the appropriate public office. The financing statement serves as constructive notice to

²The Code imposes an additional requirement as to security interests in after-acquired consumer goods. Security interests do not attach to consumer goods other than “accessions” unless the consumer acquires them within 10 days after the secured party gave value [9–203(b)].

CONCEPT REVIEW

Attachment

A security interest is not legally enforceable against a debtor until it is attached to one or more particular items of the debtor's property; the attachment takes place in a legal, rather than physical, sense.

There are three requirements for a security interest to attach to the goods of the debtor:

1. There must be an *agreement* in which the debtor grants the creditor a security interest in the debtor's property.
2. The debtor must have *rights in the collateral*.
3. The creditor must give value to the debtor, for example, by lending him money or advancing goods on credit.

Future Advances. A security may provide for the advance of credit to a debtor at some time in the future. At the time the debtor actually draws on the future extension of credit, the creditor is considered to have given additional value for purposes of attachment of a security interest.

After-Acquired Property. A security agreement may be drafted to grant a creditor a security interest in property that the debtor does not currently own but which she may acquire at some time in the future. However, the security interest does not attach until the debtor actually obtains some rights in the new property.

Proceeds. Proceeds on the sale or other disposition of collateral to which a security interest has been attached are automatically covered as of the time the security interest attaches to the collateral.

the world that the creditor claims an interest in collateral that belongs to a certain named debtor. The financing statement usually consists of a multicopy form that is available from the office of the secretary of state (see Figure 1). However, the security agreement can be filed as the financing statement if it contains the required information and has been signed by the debtor.

To be sufficient, the financing statement must (1) contain the names of the debtor; (2) give the name of the secured party; and (3) contain a statement indicating or describing the collateral covered by the financing statement. If the financing statement covers goods that are to become fixtures, a description of the real estate must be included.

Each state specifies by statute where the financing statement has to be filed. In all states, a financing statement that covers fixtures must be filed in the office where a mortgage on real estate would be filed [9–501]. To obtain maximum security, the secured party acquiring a security interest in property that is a fixture or is to become a fixture should double file—that is, file the security interest as a fixture and as a nonfixture.

In regard to collateral other than fixtures, most states require only central filing, usually in the office of the secretary of state. However, if you are a creditor taking a security interest, it is important to check the law in your

state to determine where to file the financing statement [9–501].

A financing statement is effective for a period of five years from the date of filing, and it lapses then unless a continuation statement has been filed before that time. An exception is made for real estate mortgages that are effective as fixture filings—they are effective until the mortgage is released or terminates [9–515].

A **continuation statement** may be filed within six months before the five-year expiration date. The continuation statement must be signed by the secured party, identify the original statement by file number, and state that the original statement is still effective. Successive continuation statements may be filed [9–403(3)].

When a consumer debtor completely fulfills all debts and obligations secured by a financing statement, she is entitled to a **termination statement** signed by the secured party or an assignee of record [9–513].

Possession by Secured Party as Public Notice

Public filing of a security interest is intended to put any interested members of the public on notice of the security interest. A potential creditor of the debtor, or a potential buyer of the collateral, can check the records to see whether anyone else claims an interest in the debtor's collateral. The same objective can be reached if the debtor

gives up possession of the collateral to the creditor or to a third person who holds the collateral for the creditor. If a debtor does not have possession of collateral that he claims to own, then a potential creditor or debtor is on notice that someone else may claim an interest in it. Thus, a security interest is perfected by change of possession of collateral from the debtor to the creditor/secured party or his agent [9–313(a)]. For example, Simpson borrows \$150 from a pawnbroker and leaves his guitar as collateral for the loan. The pawnbroker's security interest in the guitar is perfected by virtue of her possession of the guitar.

Change of possession is not a common or convenient way for perfecting most security interests in consumer goods. It is more practicable for perfecting security interests in commercial collateral. In fact, it is the only way to perfect a security interest in money [9–312(b)].

Possession of collateral by the creditor is often the best way to perfect a security interest in chattel paper and negotiable documents of title. Possession is also a possible way of perfecting a security interest in inventory. This is sometimes achieved through a **field warehousing arrangement**. For example, a finance company makes a large loan to a peanut warehouse to enable it to buy peanuts from local farmers. The finance company takes a security interest in the inventory of peanuts. It sets up a field warehousing arrangement under which a representative of the finance company takes physical control over the peanuts. This representative might actually fence off the peanut storage area and control access to it. When the peanut warehouse wants to sell part of the inventory to a food processor, it must make a payment to the finance company. Then the finance company's representative will allow the peanut warehouse to take some of the peanuts out of the fenced-off area and deliver them to the processor. In this way the finance company controls the collateral in which it has a security interest until the loan is repaid.

Possession by the creditor is usually not a practicable way of perfecting a security interest in equipment or farm products. In the case of equipment, the debtor needs to use it in the business. For example, if a creditor kept possession of a stove that was sold on credit to a restaurant, it would defeat the purpose for which the restaurant was buying the stove, that is, to use it in its business.

The person to whom the collateral is delivered holds it as bailee, and he owes the duties of a bailee to the parties in interest [9–207].

Control A secured party can provide a similar form of public notice by controlling the collateral [9–314].

Control is the only perfection method if the collateral is a deposit account [9–312(b)(1)]. A secured party obtains control by one of three means: (1) the secured party is the bank with which the deposit account is maintained; (2) the debtor, secured party, and the bank have agreed that the bank will comply with the secured party's instructions regarding funds in the account; or (3) the secured party becomes the bank's customer for the deposit account.

Perfection by Attachment/Automatic Perfection Perfection by mere attachment of the security interest, sometimes known as automatic perfection, is the only form of perfection that occurs without the giving of public notice. It occurs automatically when all the requirements of attachment are complete. This form of perfection is limited to certain classes of collateral; in addition, it may be only a temporary perfection in some situations.

A creditor who sells goods to a consumer on credit, or who lends money to enable a consumer to buy goods, can obtain limited perfection of a security interest merely by attaching the security interest to the goods. A creditor under these circumstances has what is called a **purchase money security interest in consumer goods**. For example, an appliance store sells a television set to Margaret Morse on a conditional sales contract, or time-payment plan. The store does not have to file its purchase money security interest in the set. The security interest is considered perfected just by virtue of its attachment to the set in the hands of the consumer.

Perfection by attachment is not effective if the consumer goods are motor vehicles for which the state issues certificates of title and has only limited effectiveness if the goods are fixtures [9–303]. A later section of this chapter discusses the special rules covering these kinds of collateral.

There are also major limitations to the perfection by attachment principle. As discussed later in the Priority section of this chapter, relying on attachment for perfection does not, in some instances, provide as much protection to the creditor as does public filing.

One potential concern for a creditor is that the use of the collateral will change from that anticipated when the security interest was obtained. It is important that the creditor properly perfect the security interest initially so that it will not be adversely affected by a subsequent change in use and will continue to have the benefit of its initial perfection.

Automatic perfection by attachment of the security interest is illustrated in the following case, *Meskeil v. Bertone*.

In this case, the bank that provided funds for the purchase of a boat obtained a purchase money security interest that was automatically perfected; however, because

the bank did not file the security interest, when the original purchaser sold it to another consumer who intended to use it for household purposes and had no knowledge of the bank's purchase money security interest, the subsequent purchaser took free of the bank's security interest.

Meskeil v. Bertone

55 UCC Rep.2d 179 (Super. Ct. Mass. 2004)

On September 28, 2001, John Meskeil borrowed \$31,601.75 from Key Bank to finance his purchase of a 66-foot Chapparral boat. That same day, he executed a "Note, Security Agreement, and Disclosure Statement" in connection with the loan. The security agreement lists the boat as collateral for the loan. The terms of the note prohibited Meskeil from transferring ownership or possession of the boat by sale, lease, or other means without first obtaining Key Bank's written permission. In addition, the note terms defined default as including breach of any significant term or condition. In the event of a default, Key Bank was entitled to repossess the boat and to require Meskeil to repay the entire loan balance. The bank did not file a financing statement documenting its security interest.

In late 2002, Meskeil advertised the boat for sale in the Boston Globe. Kimberly Friedman contacted Meskeil in response to the advertisement and indicated that her husband, Dale Friedman of Sea Dog Yacht Sales, would be willing to procure a buyer for a commission of 10 percent of the purchase price. Meskeil towed his boat to Sea Dog's yard where a "For Sale" sign was placed on it with an asking price of \$49,000.

In the spring of 2003, John Bertone made an offer to purchase the boat for \$44,000, which was accepted by Meskeil. Bertone tendered a refundable deposit check to Sea Dog in the amount of \$4,400; signed a purchase and sales agreement that stated the obligation of the seller to deliver the yacht free and clear of any liens, mortgages, or applicable bills; and agreed that the broker could deduct the applicable funds from the proceeds of the mortgage. Bertone tendered a check for \$39,695, payable to the Sea Dog, and other checks payable to the Commonwealth of Massachusetts to cover the boat sales tax, title, and registration. On July 12, 2003, Bertone took possession of the boat.

On July 18, Meskeil approved a final accounting that listed the sales price, Friedman's commission, the payoff of the amount owed to Key Bank, and the amount due to Meskeil. Meskeil received a check in the amount of \$7,084.69 from Friedman. In August, Friedman absconded with the remaining sales proceeds without having satisfied the lien held by Key Bank; he subsequently was indicted for embezzlement.

Key Bank filed a complaint against Meskeil and Bertone. The claim against Meskeil was based on breach of contract and contended that as a result of the breach of the sales agreement by the sale to Bertone, the full amount owing on the note was due and payable. The bank asserted an equitable claim against Bertone, alleging that it was the rightful owner of the boat and seeking its repossession.

Cratsley, Justice

Article 9 guides the resolution of the competing ownership claims presented in these two cases. A sweeping revision of Article 9 became effective in Massachusetts on July 1, 2001, but many historical secured transactions principles remain relevant to the resolution of this dispute.

The Bank's Security Interest in the Boat

The Bank seeks replevin of the boat from the Bertones, claiming that under Article 9 it is the rightful possessor of the boat. By placing the boat for sale without the Bank's express written permission, Meskeil breached the security agreement and the promissory note. Consequently, the Bank was entitled to

immediate possession of the collateral, unless the Bertones took free of the Bank's security interest in the boat.

The security agreement and note executed by Meskeil and the Bank gave the Bank a security interest in the boat. A security interest is "effective according to its terms between the parties, against purchasers of the collateral and against creditors" unless the secured party is required to file a financing statement in order to perfect the interest. The secured party must file a financing statement to perfect the security interest in all cases except, among others, that of a purchase money security interest (PMSI). Therefore, the Bank was required to file a financing statement to perfect its interest in the boat unless the interest constituted a PMSI. Article 9 defines a PMSI as

follows: “a security interest in goods is a [PMSI] . . . to the extent that the goods are purchase-money collateral with respect to that security interest.” Purchase-money collateral are goods used to secure an “obligation of an obligor incurred as all or part of the purchase price of the collateral.”

Meskeil borrowed funds from the Bank to finance the sale of the boat and, in turn, granted the Bank a security interest in the boat to secure the purchase price. Therefore, the Bank’s security interest in the boat constituted a PMSI and the Bank was not required to file a financing statement to perfect its security interest in the collateral.

A PMSI is automatically perfected upon attachment. The Bank’s security interest attached when the following events occurred: (1) Meskeil signed the security agreement describing the boat as collateral, (2) the Bank gave Meskeil value in the form of a loan, and (3) Meskeil used the loan funds to obtain rights in the boat. The Bank’s interest is therefore enforceable according to its terms between the parties, any purchasers of the collateral, and any creditors, subject to the buyer of consumer goods exception set forth in § 9–320(b). The Bank’s interest in the boat takes priority over the Bertones’ interest, unless the Bertones demonstrate that they meet the requirements of the buyer of consumer goods exception as described below.

Buyer of Consumer Goods

The buyer of consumer goods exception in revised Article 9 mirrors the historical notion of buyer in ordinary course. The aim of both provisions may be summarized as follows: “one who buys consumer goods *from another consumer* for his own personal use without knowledge of a perfected security interest takes the goods free of such interest unless the secured party has previously filed.” Under § 9–320(b), “a buyer of goods from a person who used or bought the goods for use primarily for personal, family, or household purposes takes free of a security interest, even if perfected, if the buyer buys: (1) without knowledge of the security interest; (2) for value; (3) primarily for the buyer’s personal, family, or household purposes; and (4) before the filing of a financing statement covering the goods.”

To invoke the protection of § 9–320(b), both the buyer and seller of the goods must be consumers. To hold § 9–320(b) applicable, this Court must decide whether Meskeil’s sale of the boat through his selling agents, Friedman and Sea Dog, constitutes a consumer-to-consumer sale. Agency principles guide this analysis. In a contractual context, any negotiation undertaken on behalf of the principal is deemed to be the act of the principal himself. Indeed, “whatever one does by another, he does so by himself so far as concerns legal responsibility.” In this case, title never passed from Meskeil to Friedman or Sea Dog. The agency relationship was disclosed to the Bertones,

and they were aware that they were purchasing the boat from the owner, a consumer. Although negotiated by Meskeil’s agent, the Final P&S and Bill of Sale evidenced an agreement between the Bertones and Meskeil for the sale of consumer goods. I am therefore persuaded by a preponderance of the evidence that the transaction in question falls within the buyer of consumer goods exception in § 9–320(b).

Knowledge, Good Faith, and Title

To defeat the Bank’s PMSI on the basis of the buyer of consumer goods exception, the Bertones must also meet additional criteria. The Bank and Meskeil argue that the Bertones cannot claim the protection of § 9–320(b) because (1) they had notice of Key Bank’s lien, and (2) they did not approach the transaction in good faith. The Bank and Meskeil further argue that the Bertones are not the rightful possessors of the boat because they did not obtain title as required by the state statutory scheme.

The Bank’s lien is clearly marked on the state title. The Bank and Meskeil argue that the Bertones were on notice of the Bank’s lien because they did not receive the state Certificate of Title at closing. The Article 9 provision regarding buyer of consumer goods, however, concerns knowledge, not notice. Whereas notice places a duty of inquiry on the party, “knowledge,” as defined in § 1–201(25), requires that the party have “actual knowledge” of the fact. Based on all of the facts previously developed about the transaction in question, and finding John Bertone’s trial testimony credible, I am persuaded by a preponderance of the evidence that the Bertones did not have actual knowledge of the Bank’s security interest in the boat.

Similar to their arguments on knowledge, the Bank and Meskeil contend that the Bertones are not good-faith purchasers because they did not receive title when they tendered payment to Friedman at closing. The Bank and Meskeil assert that by taking possession of the boat without title, the Bertones acted at their peril and were on notice that further inquiry into the state of title was necessary. Consequently, the Bank and Meskeil argue, the Bertones’ failure to further inquire into the state of title at that time evidences the Bertones’ lack of good faith. The definition of good faith, however, does not place the buyer on a duty of inquiry. Good faith means “honesty in fact in the conduct of the transaction concerned.” § 1–201(19).

The preponderance of the trial evidence demonstrates that on July 11, 2003, the Bertones had a genuine belief that they were purchasing the boat in a legitimate transaction free of liens. At all times during the transaction, the Bertones negotiated with Friedman, not Meskeil. They had previously tendered a deposit to Friedman without incident. The Bill of Sale stated that all liens and encumbrances on the boat had been revealed. Moreover, both the initial P&S and the Final P&S

conspicuously and unambiguously stated that the boat would be sold free of liens, or that any outstanding liens would be satisfied by the sale proceeds. Lastly, Sea Dog's employee, Thurman, represented to John Bertone that the Bill of Sale was the most important aspect of the transaction, and that title and registration were ancillary to the sale. The Bertones obtained a Bill of Sale that they used to document the boat through the Coast Guard pursuant to the federal vessel documentation regime.

Under Massachusetts law, a boat owner may choose to register the vessel within the state system or to document the vessel with the United States Coast Guard. The Bertones reasonably pursued federal documentation because, as John Bertone testified, he believed the federal approach afforded greater protection of their property. All of this evidence supports my conclusion that the Bertones acted honestly and in good faith with respect to the closing on July 11, 2004.

The Bank and Meskell also argue that the state boat title statute nullifies transactions involving titled motorboats where, as here, the owner does not deliver title to the transferee. Indeed, the boat title statute not only requires buyers of registered vessels to obtain a certificate of title, but also requires sellers of such vessels to provide a certificate of title upon transfer or sale. Here, a sale occurred even though Meskell did not furnish the Bertones with the state title. Article 2 of the Code notes the Code's "departure from the title or property concept for deciding sales controversies." The Code provisions with respect to passing of title note that "title passes to the

buyer at the time and place at which the seller completes his performance with reference to the physical delivery of the goods, . . . even though a document of title is to be delivered at a different time or place," unless the parties contract otherwise. The Bertones tendered the full contract price and took possession of the boat, thereby completing delivery.

The boat title statute does not displace or supersede § 9-320(b) but imposes additional requirements upon boat owners and dealers regarding the title and registration of vessels. The statute does not vitiate the transfer of ownership that occurred when the Bertones, without knowledge and in good faith, furnished consideration for the boat according to the parties' agreement.

Because the Bertones purchased the boat for value from another consumer, intended to use the boat for household purposes, and did not have knowledge of the Bank's security interest, their ownership rights are superior to those of the Bank. Article 9 imposes the burden on the party most able to insulate itself from risk. Here, the Bank had the option of filing a financing statement to ensure its priority in this factual situation, even though it was not required to file to perfect its PMSI. The Bank chose not to avail itself of the additional protection afforded by filing a financing statement. In addition, Meskell enlisted Friedman as his agent to represent him in the boat sale and accepted the benefits of that transaction. Therefore, Meskell bears the loss resulting from Friedman's apparent malfeasance.

Motor Vehicles If state law requires a certificate of title for motor vehicles, then a creditor who takes a security interest in a motor vehicle (other than a creditor holding a security interest in inventory held for sale by a person in the business of selling goods of that kind) must have the security interest noted on the title [9-302]. Suppose a credit union lends Carlson money to buy a new car in a state that requires certificates of title for cars. The credit union cannot rely on filing or on attachment of its security interest in the car to perfect that interest; rather, it must have its security interest noted on the certificate of title.

This requirement protects the would-be buyer of the car or another creditor who might extend credit based on Carlson's ownership of the car. By checking the certificate of title to Carlson's car, a potential buyer or creditor would learn about the credit union's security interest in the car. If no security interest is noted on the certificate of title, the buyer can buy—or the creditor

can extend credit—with confidence that there are no undisclosed security interests that would be effective against him.

Fixtures The Code also provides special rules for perfecting security interests in consumer goods that become fixtures by virtue of their attachment to or use with real property. A creditor with a security interest in consumer goods (including consumer goods that will become fixtures) obtains perfection merely by attachment of her security interest to a consumer good. However, as discussed in the Priority section of this chapter, a creditor who relies on attachment for perfection will not, in some instances, prevail against other creditors who hold an interest in the real estate to which the consumer good is attached unless a special financing statement known as a fixture filing is filed with the real estate records to perfect the security interest [9-102(40); 9-334].

CONCEPT REVIEW

Perfection

Perfection is the mechanism by which a creditor who has attached his security interest to collateral obtains protection for his interest in the collateral against other creditors or against purchasers of the collateral from the debtor. As will be seen in the section on Priorities, the amount of protection obtained by perfection can vary depending on the nature of any competing security interests, whether and how the security interests were perfected, and the nature of the buyer.

The primary ways of perfecting a security interest are:

1. Perfection by public filing of a financing statement with the appropriate government office.
 - To be sufficient a financing statement must:
 - a. Contain the name(s) of the debtor.
 - b. Provide the name of the secured party.
 - c. Contain a statement describing the collateral covered by the financing statement.
 - d. If the financing statement covers goods that are to become fixtures, a description of the real estate must be included.
 - Filing a financing statement can be used to perfect a security interest in most kinds of collateral except for (1) money, (2) noninventory motor vehicles where the security interest must be noted on the title, and (3) letters of credit.
 - Filing a financing statement is the only way to perfect a security interest in accounts receivable and general intangibles.
2. Perfection by the secured party taking possession of the collateral.
 - Possession works for most kinds of collateral except for accounts receivable and general intangibles.
 - Possession is the only way to perfect a security interest in money.
3. Perfection by the secured party taking control of the security.
 - Taking control works for security interests in securities (such as stocks), letter of credit rights, and electronic chattel paper.
 - Taking control is the only way for letter of credit rights.
 - There are two ways for a creditor to take control of a security entitlement:
 - a. The security intermediary lists the creditor/secured party as a beneficial owner of the security.
 - b. The security intermediary agrees to act on the instructions of the creditor/secured party.
4. Attachment of the security interest/automatic perfection.
 - This method of perfection, whereby the security interest is perfected automatically when it attaches to the collateral, is available only for purchase money security interests in consumer goods (other than motor vehicles for which the state issues titles).
5. Notation of the security interest on Certificate of Title of Motor Vehicles.
 - This method is only appropriate for motor vehicles for which the state issues titles.

Priority Rules

Importance of Determining Priority

Because several creditors may claim a security interest in the same collateral of a debtor, the Code establishes a

set of rules for determining which of the conflicting security interests has priority. Determining which creditor has priority or the best claim takes on particular importance in bankruptcy situations, where, unless a creditor has a perfected secured interest in collateral that

fully protects the obligation owed to him, the creditor may realize nothing or only a few cents on every dollar owed to him.

General Priority Rules The basic rule established by the Code is that when more than one security interest in the same collateral has been filed (or otherwise perfected), the first security interest to be filed (or perfected) has priority over any that is filed (or perfected) later [9–322(a)(1)]. If only one security interest has been perfected, for example, by filing, then that security interest has priority. However, if none of the conflicting security interests has been perfected, then the first security interest to be *attached* to the collateral has priority [9–322(a)(3)].

Thus, if Bank A filed a financing statement covering a retailer’s inventory on February 1, 2009, and Bank B filed a financing statement on March 1, 2009, covering that same inventory, Bank A would have priority over Bank B. This is true even though Bank B might have made its loan and attached its security interest to the inventory prior to the time that Bank A did so. However, if Bank A neglected to perfect its security interest by filing and Bank B did perfect, then Bank B would prevail, as it has the only perfected security interest in the inventory.

If both creditors neglected to perfect their security interest, then the first security interest that attached would have priority [9–322(a)(3)]. For example, if Loan Company Y has a security agreement covering a dealer’s equipment dated June 1, 2009, and advances money to the dealer on that date, whereas Bank Z does not obtain a security agreement covering that equipment or advance money to the dealer until July 1, 2009, then Loan Company Y has priority over Bank Z. In connection with the last situation, it is important to note that unperfected secured creditors do not enjoy a preferred position in bankruptcy proceedings, thus giving additional importance to filing or otherwise perfecting a security interest.

Purchase Money Security Interest in Inventory There are several very important exceptions to the general priority rules. First, a **perfected purchase money security interest in inventory** has priority over a conflicting security interest in the same inventory *if* all four of these requirements are met: (1) the purchase money security interest is perfected at the time the debtor receives possession of the inventory, (2) the purchase money secured party gives notification in writing to the prior secured creditor before the debtor receives the inventory, (3) the holder of the competing security interest received notification within five years before the debtor receives the inventory, and (4) the notification states that the person expects to acquire a purchase money security interest in inventory of the debtor and describes the inventory [9–324(b)].

Assume that Bank A takes and perfects a security interest in “all present and after-acquired inventory” of a debtor. Then the debtor acquires some additional inventory from a wholesaler, which retains a security interest in the inventory until the debtor pays for it. The wholesaler perfects this security interest. The wholesaler has a *purchase money security interest* in inventory goods and will have priority over the prior secured creditor (Bank A) if the wholesaler has perfected the security interest by the time the collateral reaches the debtor and if the wholesaler sends notice of its purchase money security interest to Bank A before the wholesaler ships the goods. Thus, to protect itself, the wholesaler must check the public records to see whether any of the debtor’s creditors are claiming an interest in the debtor’s inventory. When it discovers that some are claiming an interest, it should file its own security interest and give notice of that security interest to the existing creditors [9–324(b) and (c)].

As the following *General Electric Capital Commercial Automotive Finance* case illustrates, the subsequent seller of inventory can obtain a priority position if it files a financing statement and notifies the prior secured party in a timely fashion.

General Electric Capital Commercial Automotive Finance, Inc. v. Spartan Motors, Inc.

675 N.Y.S. 2d 626 (New York Sup. Ct., App. Div. 1998)

On September 28, 1983, a predecessor of General Electric Capital Commercial Automotive Finance (GECC) entered into an “Inventory Security Agreement” with Spartan Motors, in connection with its “floor plan” financing of the dealership’s inventory. By assignment of that agreement, GECC acquired a blanket lien (otherwise known as a “dragnet” lien) on Spartan’s inventory to secure a debt in excess of \$1,000,000. “Inventory” was defined in the agreement as “[a]ll inventory, of whatever kind or nature, wherever located, now owned or hereafter acquired, and all returns, reposessions, exchanges, substitutions,

replacements, attachments, parts, accessories and accessions thereto and thereof, and all other goods used or intended to be used in conjunction therewith, and all proceeds thereof (whether in the form of cash, instruments, chattel paper, general intangibles, accounts or otherwise).” This security agreement was duly filed in the office of the Dutchess County Clerk and with Secretary of State for New York State.

On July 19, 1991, Spartan signed a new Wholesale Security Agreement with General Motors Acceptance Corporation (GMAC), in which the latter agreed to finance or “floor-plan” Spartan’s inventory. According to its terms, Spartan agreed, inter alia, as follows:

In the course of our business, we acquire new and used cars, trucks and chassis (“Vehicles”) from manufacturers or distributors. We desire you to finance the acquisition of such vehicles and to pay the manufacturers or distributors therefore.

We agree upon demand to pay to GMAC the amount it advances or is obligated to advance to the manufacturer or distributor for each vehicle with interest at the rate per annum designated by GMAC from time to time and then in force under the GMAC Wholesale Plan.

We also agree that to secure collectively the payment by us of the amounts of all advances and obligations to advance made by GMAC to the manufacturer, distributor or other sellers, and the interest due thereon, GMAC is hereby granted a security interest in the vehicles and the proceeds of sale thereof (“Collateral”) as more fully described herein.

The collateral subject to this Wholesale Security Agreement is new vehicles held for sale or lease and used vehicles acquired from manufacturers or distributors and held for sale or lease.

We understand that we may sell and lease the vehicles at retail in the ordinary course of business. We further agree that as each vehicle is sold, or leased, we will faithfully and promptly remit to you the amount you advanced or have become obligated to advance on our behalf to the manufacturer, distributor or seller.

GMAC’S Security Agreement was duly filed. In addition, by certified letter dated July 17, 1991, GMAC officially notified GECC of its competing security interest in Spartan’s inventory, as follows:

This is to notify you that General Motors Acceptance Corporation holds or expects to acquire purchase money security interests in inventory collateral which will from time to time hereafter be delivered to Spartan Motors Ltd. of Poughkeepsie, New York, and in the proceeds thereof.

Such inventory collateral consists, or will consist, of the types of collateral described in a financing statement, a true copy of which is annexed hereto and made a part hereof.

On May 7, 1992, Spartan paid \$121,500 of its own money to European Auto Wholesalers, Ltd., to acquire a 1992 600 SEL Mercedes-Benz. Six days later, on May 13, 1992, GMAC reimbursed Spartan and the vehicle was placed on GMAC’s floor plan.

On July 7, 1992, Spartan paid \$120,000 of its own money to the same seller to acquire a second 1992 600 SEL Mercedes. Two days later, on July 9, 1992, GMAC reimbursed Spartan for that amount and placed the second vehicle on its floor plan. The two vehicles remained unsold in Spartan’s showroom.

A few months later, on or about October 2, 1992, GECC commenced an action against Spartan, seeking \$1,180,999.98, representing money then due to GECC under its agreement with Spartan. Claims were also made against the principals of Spartan, upon their guarantees, as well as against GMAC and Mercedes-Benz of North America, Inc. (MBNA), to determine lien priority in the collateral.

After commencement of the litigation, Spartan filed a bankruptcy petition and ceased doing business. GECC, GMAC, and MBNA took possession of and liquidated their respective collateral pursuant to a prior agreement between the parties. Among the assets appropriated and sold by GMAC were two Mercedes-Benz automobiles, which were auctioned for \$194,500. GECC settled its claims against all of the defendants except GMAC, which it accused of converting the two Mercedes-Benz vehicles in violation of GECC’s earlier security interest.

The trial court granted GECC’s motion for summary judgment, finding persuasive GECC’s argument that a literal reading of GMAC’s security agreement with Spartan, in conjunction with the wording of Uniform Commercial Code section 9–107(b), required a holding that GMAC had a purchase-money secured interest only to the extent that it paid funds directly to “manufacturers, distributors and sellers” of Spartan’s inventory in advance of the transfer of the merchandise to the car dealership. The court reasoned that because “[n]owhere in the contracts of adhesion signed by Spartan with GMAC is there an obligation by GMAC to reimburse Spartan for funds used to purchase automobiles,” GECC’s previously perfected security interest in all of Spartan’s inventory should prevail. GMAC appealed.

Friedman, Judge

A perfected purchase-money security interest provides an exception to the general first-in-time, first-in-right rule of conflicting security interest. Thus, a perfected purchase money security interest in inventory has priority over a conflicting prior security interest in the same inventory (see, UCC 9-312 (3)). However, the purported purchase-money security interest must fit within the Uniform Commercial Code definition to qualify for the exception.

Uniform Commercial Code section 9-107 defines a “purchase money security interest” as a security interest:

- (a) taken or retained by the seller of the collateral to secure all or part of its price; or
- (b) taken by a person who by making advances or incurring an obligation gives value to enable the debtor to acquire rights in or the use of collateral if such value is in fact so used.

The issue here is therefore whether GMAC’s payment as reimbursement to Spartan after it had acquired the two Mercedes-Benz vehicles on two different occasions qualifies as an “advance” or “obligation” that enabled Spartan to purchase the cars, such that GMAC acquired a purchase-money security interest in the vehicles. The arguments *against* finding a purchase-money security interest under these circumstances are basically twofold: Firstly, of the few courts to construe Uniform Commercial Code section 9-107 (b), many have been reluctant to decide that a purchase-money security interest has been created where, as here, title to and possession of the merchandise have passed to the debtor before the loan is advanced. Secondly, the literal wording of the agreement between GMAC and Spartan appears to accord GMAC purchase-money secured status only when the finance company paid Spartan’s “manufacturer, distributor or other seller” directly. As the Supreme Court noted, nothing in GMAC’s contract with Spartan appears to contemplate any obligation on the part of the financier to “reimburse” the auto dealership for funds that the latter had already expended to purchase merchandise. These two interrelated arguments will be discussed *seriatim*.

(1) Whether after-advanced funds may qualify for purchase-money security status under Uniform Commercial Code section 9-107(b).

Research indicates that there is no judicial authority in New York construing the application of UCC 9-107(b) to a creditor’s subsequent reimbursement of a debtor for an antecedent purchase of collateral.

One factor that courts have considered is simple temporal proximity—that is, whether the value is given by the creditor “more or less contemporaneously with the debtor’s acquisition of the property.”

The authorities are agreed that the critical inquiry, as in all contract matters, is into the intention of the parties. In determining whether a security interest exists, the intent of the parties controls, and that intent may best be determined by examining the language used and considering the conditions and circumstances confronting the parties when the contract was made. In assessing the relationship of the transactions, the test should be whether the availability of the loan was a factor in negotiating the sale, and/or whether the lender was committed at the time of the sale to advance the amount required to pay for the items purchased.

Applying these principles to the matter before us: (1) The record establishes that GMAC’s reimbursements to Spartan following its two Mercedes-Benz purchases were only six and two days apart, respectively. (2) GECC does not dispute GMAC’s contention that a postpurchase reimbursement arrangement was common in the trade, as well as routine in Spartan’s course of dealing with GMAC and its other financiers, depending upon the circumstances of the purchase. For example, GMAC employee Philip Canterino, who handled GMAC’s account with Spartan, has averred without contradiction by GECC that although it was customary for GMAC to prepay a car manufacturer before it delivered new vehicles to Spartan’s showroom, in a case of the sort at issue here—where the vehicles were difficult to obtain from the manufacturer but were readily available from a distributor—it was not uncommon for GMAC to reimburse Spartan after the cars had been delivered to Spartan’s showroom, upon Spartan’s presentation of proof of clear title. In the language of Uniform Commercial Code UCC 9-107(b): GMAC was committed to give value to enable the car dealership to acquire rights in the collateral. The value so extended was intended to and in fact did enable Spartan to acquire the two Mercedes-Benzes, as GECC does not seriously suggest that without GMAC’s backing Spartan could have afforded to purchase the expensive vehicles. Accordingly, the literal requirements of Uniform Commercial Code section 9-107 (b) are satisfied, notwithstanding the inverted purchase-loan. Because GMAC’s loans were “closely allied” with Spartan’s inventory acquisitions, GMAC enjoys a purchase-money security interest in the contested merchandise.

(2) Whether GMAC’s lien is circumscribed by the precise language of its agreement with Spartan.

It is well established that the terms of a written security agreement may be amplified by “other circumstances including course of dealing or usage of trade or course of performance” (UCC 1-201 (3)). Here, GECC does not deny that, although the written terms of GMAC’s contract with Spartan appeared to contemplate a single method of inventory financing (i.e., GMAC’s payment to Spartan’s sellers in advance of

the purchase transaction), in fact it was not at all unusual for the parties to pursue the same end by somewhat different means (i.e., GMAC's posttransaction reimbursement to Spartan for its inventory purchases), as GMAC employee Canterino repeatedly explained.

Generally, the express terms of an agreement and a differing course of performance, course of dealing, and/or usage of trade "shall be construed whenever reasonable as consistent with each other" (UCC 1-215 (4); 2-208 (2)). Only when a consistent construction would be "unreasonable" must express terms control over course of performance, and course of performance prevail over course of dealing and usage of trade. GMAC's election on some occasions to fund Spartan's floor planning by reimbursing the car dealership for its purchases can hardly be considered inconsistent with its decision on other occasions to accomplish the same goal by following the strict wording of the contract and prepaying the supplier directly. Rather, it is only reasonable to consider these two methods of financing to be entirely compatible with one another. Here, GMAC's security agreement and its timely notice to GECC adequately specified the precise nature of the vehicular inventory to which its lien attached, such that GECC should have been alerted to GMAC's claim to the two Mercedes-Benzes; and, as discussed above, it

is clear that GMAC and Spartan intended these vehicles to be covered by their financing agreement.

Accordingly, the Supreme Court erred when it found that, having financed the two vehicles at issue here by way of reimbursements—"the very opposite of an advance"—GMAC did not acquire a purchase-money security interest pursuant to Uniform Commercial Code 9-107(b). Rather, since GMAC has established—and GECC does not deny—that GMAC was "obligated" to give value to enable Spartan to acquire rights in the two Mercedes-Benzes, and the purchase and loan transactions were only days apart, it is clear that Spartan's purchase and GMAC's subsequent reimbursement were sufficiently "closely allied" to give GMAC a purchase-money security interest in the subject vehicles. Under these circumstances, we conclude, upon searching the records, that GMAC is entitled to retain the proceeds of the sale of the two contested vehicles and to summary judgment against GECC.

Judgment in favor of GECC reversed and summary judgment granted in favor of GMAC.

Note: Although this case was decided under the 1972 version of Article 9, the same result would be expected under Revised Article 9.

Purchase Money Security Interest in Noninventory Collateral The second exception to the general priority rule is that a purchase money security interest in collateral other than inventory has priority over a conflicting security interest in the same collateral if the purchase money security interest is perfected at the time the debtor receives the collateral or within 20 days afterward [9-324(a)].

Assume that Bank B takes and perfects a security interest in all the present and after-acquired equipment belonging to a debtor. Then, a supplier sells some equipment to the debtor, reserving a security interest in the

equipment until it is paid for. If the supplier perfects the purchase money security interest by filing at the time the debtor obtains the collateral or within 20 days thereafter, it has priority over Bank B. This is because its purchase money security interest in noninventory collateral prevails over a prior perfected security interest if the purchase money security interest is perfected at the time the debtor takes possession or within 20 days afterward.

In the following case, *In re McAllister*, the court applied the rule concerning the priority of purchase money security interests in collateral other than inventory over a prior perfected conflicting security interest.

In re McAllister

267 B.R. 614 (U.S.B.C. N.D. Iowa 2001)

In May 1985, Michael and Pamela McAllister executed a security agreement in favor of First Southeast Bank, granting it a security interest in all equipment owned and thereafter acquired. The bank filed a Financing Statement with the Iowa Secretary of State on May 28, 1985, and filed proper Continuation Statements thereafter that kept the perfection current.

On January 16, 1998, the McAllisters and Ag Services of America entered into an Agricultural Security Agreement for the production of crops. In addition to granting Ag Services a security interest in the crops, the McAllisters also granted Ag Services a security interest in "All of Debtors' equipment and motorized vehicles, whether or not required to be licensed or

registered, whether now owned or hereafter acquired, including, but not limited to, machinery and tools, together with all accessories, parts, accessions and repairs or hereafter attached and affixed thereto.”

The Ag Services security agreement with the McAllisters contained a future advances clause. Ag Services perfected its security interest by filing a Financing Statement on January 23, 1998.

Ag Services advanced funds to the McAllisters that enabled them to acquire an auger in November 1999 and a planter and trailer in January 2000. The current value of the auger is \$2,500 and the value of the planter and trailer is \$3,500. Subsequently, the McAllisters filed a petition in bankruptcy. One of the issues in the bankruptcy proceeding was whether Ag Services’ lien on the auger, planter, and trailer was a perfected purchase money security interest that had priority over the earlier filed and perfected security interest of the bank.

Kilburg, Chief Judge

This dispute focuses on the conflicting rights of secured creditors First Southeast Bank and Ag Services. Article 9 of the Uniform Commercial Code governs the attachment and perfection of security interests in goods. *Iowa Code sec. 9-203(1)* provides that “a security interest is not enforceable against the debtor or third parties with respect to the collateral and does not attach unless: (1) the collateral is in the possession of the secured party pursuant to agreement, or the debtor has signed a security agreement which contains a description of the collateral . . . ; (2) value has been given; and (3) the debtor has rights in the collateral.”

A security interest is perfected when it has attached and a financing statement has been filed or the security interest is otherwise perfected. *Section 9-303(1), 9-302(1)*. “If such steps are taken before the security interest attaches, it is perfected at the time when it attaches.” § 9-303(1). The term “attached” is used to describe the point at which property becomes subject to a security interest. § 9-303 comment.

Where the funds are delivered by the lender for the specific purpose of purchasing equipment that is described in a prior, perfected financing statement between the parties, that security interest is a purchase money security interest when and to the extent the funds are so used. § 9-107 (b); section 9-204 comment 2. Ag Services’ earlier-filed financing statement perfects the subsequent security agreements. The filed financing statement gives notice to other creditors that Ag Services may claim a security interest in Debtors’ equipment.

Article 9 is a notice filing system. When a conflict exists between secured creditors, the general rule provides that between creditors who perfected their security interests in the

same collateral by filing a financing statement, the first in time to file their security interest has priority. § 9-312 (5). Section 9-312 governs the priority of security interests in the same collateral. In this case both parties have perfected their security interests by filing financing statements. It is undisputed that, unless Ag Services has a purchase money security interest, the Bank is entitled to priority under this section.

The paramount exception to the first-to-file rule is the superpriority arising from a purchase money security interest (PMSI). By definition, a security interest is a “purchase money security interest” to the extent that it is “taken by a person who by making advances or incurring an obligation gives value to enable the debtor to acquire rights in or the use of collateral if such value is in fact so used. § 9-107(b). The Iowa Supreme Court simply describes a PMSI as “a secured loan for the price of new collateral.”

Debtors claim that Ag Services has a PMSI and, therefore, § 9-312(4) controls the priority of the conflicting security interests. Section 9-312(4) provides that a purchase money security interest in collateral has priority if it was perfected at the time the debtor receives possession of the collateral or within 20 days thereafter. § 9-107(b). Debtors must establish Ag Services’ superpriority status.

The court ordered an evidentiary hearing to determine the extent of the PMSI held by Ag Services.

Note: While Iowa has adopted Revised Article effective July 1, 2001, the court applied the prior version of the Article (and the section references are to that version) because the matters in controversy occurred prior to the effective date of the new Article 9. However, the same result would be expected under the new version of Article 9.

Rationale for Protecting Purchase Money Security Interests

The preference given to purchase money security interests, provided that their holders comply with the statutory procedure in a timely manner, serves several ends. First, it prevents a single creditor from closing off all other sources of credit to

a particular debtor and thus possibly preventing the debtor from obtaining additional inventory or equipment needed to maintain his business. Second, the preference makes it possible for a supplier to have first claim on inventory or equipment until it is paid for, at which time it may become subject to the after-acquired property clause

of another creditor's security agreement. By requiring that the first perfected creditor be given notice of a purchase money security interest at the time the new inventory comes into the debtor's inventory, the Code serves to alert the first creditor to the fact that some of the inventory on which it may be relying for security is subject to a prior secured interest until the inventory is paid for.

Buyers in the Ordinary Course of Business

A third exception to the general priority rule is that a **buyer in the ordinary course of business** (other than a person buying farm products from a person engaged in farming operations) takes free from a security interest created by his seller even though the security interest is perfected and even though the buyer knows of its existence [9-320(a)]. For example, a bank loans money to a dealership to finance that dealership's inventory of new automobiles and takes a security interest in the inventory, which it perfects by filing. Then, the dealership sells an automobile out of inventory to a customer. The customer takes the automobile free of the bank's security interest even though the dealership may be in default on its loan agreement and even if the customer knows about the bank's interest. As long as the customer is a buyer in the ordinary course of business, she is protected. The reasons for this rule are that a bank really expects to be paid from the proceeds of the dealership's automobile sales and that the rule is necessary to the smooth conduct of commerce. Customers would be very reluctant to buy goods if they could not be sure they were getting clear title to them from the merchants from whom they buy.

Artisan's and Mechanic's Liens The Code also provides that certain liens arising by operation of law (such as an artisan's lien) have priority over a perfected security interest in the collateral [9-333]. For example, Marshall takes her automobile, on which a credit union has a perfected security interest, to Frank's Garage to have it repaired. Under common or statutory law, Frank's may have a lien on the car to secure payment for the repair work; such a lien permits Frank's to keep the car until it receives payment. If Marshall defaults on her loan to the credit union, refuses to pay Frank's for the repair work, and the car is sold to satisfy the liens, Frank's is entitled to its share of the proceeds before the credit union gets anything.

Liens on Consumer Goods Perfected by Attachment/Automatic Perfection

A retailer of consumer goods who relies on attachment of a security interest to perfect it prevails over other

creditors of the debtor-buyer. However, the retailer does not prevail over someone who buys the collateral from the debtor if the buyer (1) has no knowledge of the security interest; (2) gives value for the goods; and (3) buys the goods for his personal, family, or household use [9-320(b)]. The retailer does not have priority over such a **bona fide purchaser** unless it filed its security interest.

For example, an appliance store sells a television set to Arthur for \$750 on a conditional sales contract, reserving a security interest in the set until Arthur has paid for it. The store does not file a financing statement, but relies on attachment for perfection. Arthur later borrows money from a credit union and gives it a security interest in the television set. When Arthur defaults on his loans and the credit union tries to claim the set, the appliance store has a better claim to the set than does the credit union. The credit union then has the rights of an unsecured creditor against Arthur. The first to attach has priority if neither security interest is perfected [9-322(a)(2)].

Now, suppose Arthur sells the television set for \$500 to his neighbor Andrews. Andrews is not aware that Arthur still owes money on the set to the appliance store. Andrews buys it to use in her home. If Arthur defaults on his obligation to the store, it cannot recover the television set from Andrews. To be protected against such a purchaser from its debtor, the appliance store must file a financing statement rather than relying on attachment for perfection [9-320(b)].

Fixtures A separate set of problems is raised when the collateral is goods that become fixtures by being so related to particular real estate that an interest in them arises under real estate law. Determining the priorities among a secured party with an interest in the fixtures, subsequent purchasers of the real estate, and those persons who have a secured interest such as a mortgage on the real property, can involve both real estate law and the Code. The general rule is that the interest of an encumbrancer of real estate (such as a mortgagor) or the interest of the owner of real estate (other than the debtor) has priority over a security interest in fixtures [9-334(c)]. However, a perfected security interest in fixtures has priority over the conflicting interest of an encumbrancer or owner of the real property if (1) the debtor has an interest of record in the real property or is in possession of it, (2) the security interest is a purchase money security interest, (3) the interest of the encumbrancer arose before the goods became fixtures, and (4) the fixtures' security interest is perfected by a "fixtures filing" either before the goods became fixtures or within 20 days after the goods became fixtures [9-334(d)].

For example, Restaurant Supply sells Arnie's Diner a new stove on a conditional sales contract, reserving a security interest until Arnie's pays for it. The stove is to be installed in a restaurant where Arnie's is in possession under a 10-year lease. Restaurant Supply can ensure that its purchase money security interest in the stove will have priority over a conflicting claim to the stove by the owner of the restaurant and anyone holding a mortgage on the restaurant if Restaurant Supply (1) enters into a security agreement with Arnie's prior to the time the stove is delivered to him and (2) perfects its security interest by fixture filing before the stove is hooked up by a plumber or within 20 days of that time. The case below, *Yeadon Fabric Domes, Inc. v. Maine Sports Complex, LLC*, illustrates this principle.

The Code contains several other rules concerning the relative priority of a security interest in fixtures [9-334(e)-(h)]. For example, the secured party whose interest in fixtures is perfected will have priority where (1) the fixtures are removable factory or office machines or readily removable replacements of domestic appliances that are consumer goods and (2) the security interest is perfected *prior* to the time the goods become fixtures. Suppose Harriet's dishwasher breaks and she contracts with an appliance store to buy a new one on a time-payment plan. The mortgage on Harriet's house provides that it covers the real property along with all kitchen appliances or their replacements. The appliance store's security interest will have priority on the dishwasher over the interest of the mortgage if the appliance store perfects its security interest prior to the time the new dishwasher is installed in Harriet's home

[9-334(e)(2)]. Perfection in consumer goods can, of course, be obtained merely by attaching the security interest through the signing of a valid security agreement.

Note that a creditor holding a security interest in consumer goods that become fixtures who relies on attachment for perfection prevails over other creditors with an interest in the real property *only* where the consumer goods are "readily removable replacements for domestic appliances."

Suppose a hardware store takes a security interest in some storm windows. Because the storm windows are likely to become fixtures through their use with the homeowner's home, the hardware store cannot rely merely on attachment to protect its security interest. It should file a financing statement to protect that security interest against other creditors of the homeowner with an interest in his home. This rule helps protect a person interested in buying the real property or a person considering lending money based on the real property. By checking the real estate records, the potential buyer or creditor would learn of the hardware store's security interest in the storm windows.

Once a secured party has filed his security interest as a fixture filing, he has priority over purchasers or encumbrances whose interests are filed after that of the secured party [9-334(e)(1)].

Where the secured party has priority over all owners and encumbrancers of the real estate, he generally has the right on default to remove the collateral from the real estate. However, he must make reimbursement for the cost of any physical injury caused to the property by the removal.

Yeadon Fabric Domes, Inc. v. Maine Sports Complex, LLC 60 UCC Rep.2d 367 (Sup. Jud. Ct. Maine 2006)

In 2001, the Maine Sports Complex entered into a series of business transactions to build a sports complex in Hampden, Maine. It purchased real estate and gave a mortgage to the seller, H.O. Bouchard, Inc. It engaged Kiser & Kiser Company to provide engineering services for construction of the complex and Harriman Brothers to provide groundwork for the sports complex. Subsequently, both Kiser and Harriman filed mechanic's liens on the property in 2002. Maine Sports Complex entered into a contract to purchase an inflatable fabric dome from Yeadon Fabric Domes, along with the materials and equipment to erect and operate the dome. It also obtained a loan from Bangor Savings Bank, giving the bank a mortgage.

Maine Sports Complex defaulted on its obligations to each of these entities, and litigation resulted as they attempted to realize on the security for their competing claims. Yeadon had filed a financing statement for the dome and equipment with the Secretary of State on July 22, 2002. It brought an action seeking the right to enter the property and to recover the dome. The court dismissed the action after concluding that the dome was a fixture and not personal property. Subsequently, on February 27, 2004, Yeadon recorded a financing statement in the Penobscot County Registry of Deeds.

Yeadon filed a collection action against Maine Sports Complex which was consolidated with other collection actions that had been filed by Harrison and Kiser to enforce their lien claims. The court found that Kiser began its work for Maine Sports

Complex on December 3, 2001, and that Harriman began its work on December 7, 2001. The court put Yeadon last in the order of priority. Yeadon appealed, contending that its security interest should have priority.

Calkins, Justice

The issue in this case is whether the court erred in determining the order of priority afforded to Harriman's and Kiser's mechanic's liens and to Yeadon's security interest in the dome.

Maine's version of the U.C.C. sets out requirements concerning security interests and how to perfect them. Generally speaking, a financing statement must be filed to perfect a security interest. A security interest is perfected by filing unless certain exceptions apply, none of which are applicable here. A security interest in fixtures may be perfected by filing the financing statement in either of two places: in the registry of deeds for the county where the related real property is located, or in the Secretary of State's office. The relevant portions of *section 9-501(1)* provide:

[T]he office in which to file a financing statement to perfect the security interest . . . is:

(a) The registry of deeds for the county in which the related real property is located, if:

.....
(ii) The financing statement is recorded as a fixture filing and the collateral is goods that are or are to become fixtures; or

(b) The office of the Secretary of State, in all other cases, including a case in which the collateral is goods that are or are to become fixtures and the financing statement is not filed as a fixture filing.

Thus, for goods that are, or are to become, fixtures, the secured party who wishes to perfect a security interest should file the financing statement in the county registry of deeds if the filing is to be a fixture filing, or with the Secretary of State.

A fixture filing is defined as "the filing of a financing statement covering goods that are or are to become fixtures and satisfying *section 9-502, subsections (1) and (2)*." *Section 9-502* lists the information that a financing statement must contain to qualify as a fixture filing.

The provision in Maine's version of the U.C.C. dealing with the priority of security interests in fixtures is § 9-334. The general rule is that "a security interest in fixtures is subordinate to a conflicting interest of an encumbrancer or owner of the related real property other than the debtor." An encumbrance is defined as "a right, other than an ownership interest, in real property." The term "includes mortgages and other liens on real property."

There are exceptions to the general rule and several alternatives by which a security interest in fixtures has priority over conflicting interests. The alternatives that are most likely to fit the factual situation of this case are found in § 9-334(4) and

(5). The first of these alternatives is in *section 9-334(4)*, which gives a perfected security interest in fixtures priority when the debtor has an interest of record in, or is in possession of, the real property; the security interest in fixtures is a purchase-money security interest; the encumbrancer's interest arose before the goods became fixtures; and the security interest was perfected by a fixture filing before or within twenty days of the time the goods became fixtures. Another alternative is *section 9-334(5)(a)*, which states that a perfected security interest in fixtures has priority if:

- (a) The debtor has an interest of record in the real property or is in possession of the real property and the security interest:
 - (i) Is perfected by a fixture filing before the interest of the encumbrancer or owner is of record; and
 - (ii) Has priority over any conflicting interest of a predecessor in title of the encumbrancer or owner. . . .

Application of the Statutes to the Facts

Yeadon filed a financing statement covering the dome and equipment with the Secretary of State on July 22, 2002, and with the registry of deeds on February 27, 2004. The court determined that the dome with its equipment is a fixture. The claims of Kiser and Harriman are pursuant to the mechanic's lien statute. Kiser began work on December 3, 2001, filed its lien on November 18, 2002, and filed its enforcement action on February 10, 2003. Harriman began work on December 7, 2001, filed its lien on August 27, 2002, and filed the enforcement action on October 17, 2002.

The issue is whether the District Court correctly placed Yeadon's priority after Harriman and Kiser. The determination of the correct priority requires an interpretation and application of the statutes. Yeadon perfected its security interest when it filed a financing statement with the Secretary of State on July 22, 2002. This filing did not qualify as a fixture filing, but § 9-501(1)(b) provides that a security interest in goods that are, or are to become, fixtures can be perfected by filing with the Secretary of State. There is no requirement that a fixture filing be made in order to perfect a security interest in fixtures. Yeadon's later filing with the registry of deeds on February 27, 2004, qualified as a fixture filing.

The significance of a fixture filing, as compared to a filing with the Secretary of State, is shown in § 9-334. A fixture filing is necessary for a security interest in fixtures to obtain priority pursuant to *sections 9-334(4) and (5)(a)*. In order for Yeadon to obtain priority over Harriman and Kiser pursuant to *section 9-334(4)*, which is one of the exceptions to the general

rule that security interests in fixtures are subordinate, Yeadon's security interest had to be perfected by a fixture filing before the dome became a fixture or within twenty days thereafter. The record is not clear as to when the dome became a fixture, but it had obviously become a fixture before July 21, 2003, the date of the forcible entry and detainer hearing. As Yeadon's fixture filing was not made until February 2004, it was not made within twenty days of the time the dome became a fixture. Thus, *section 9-334(4)* is of no help to Yeadon.

To obtain priority over Harriman and Kiser pursuant to *section 9-334(5)(a)*, Yeadon's security interest had to be perfected by a fixture filing before the Harriman or Kiser interests became of record. Because Yeadon's fixture filing was not made until 2004 and both Harriman's and Kiser's title 10 liens were of record in 2002, Yeadon does not have priority over Harriman and Kiser pursuant to *section 9-334(5)(a)*.

Judgment affirmed.

Default and Foreclosure

Default The Code does not define what constitutes default. Usually the creditor and debtor state in their agreement what events constitute a default by the buyer, subject to the Code requirement that the parties act in "good faith" in doing so. If the debtor defaults, the secured creditor has several options:

1. Forget the collateral, and sue the debtor on his note or promise to pay.
2. Repossess the collateral, and use strict foreclosure—in some cases—to keep the collateral in satisfaction of the remaining debt.
3. Repossess and sell the collateral, and then, depending on the circumstances, either sue for any deficiency or return the surplus to the debtor.

Right to Possession The agreement between the creditor and the debtor may authorize the creditor to repossess the collateral in case of default. If the debtor does default, the creditor is entitled under the Code to possession of the collateral. If through self-help the creditor can obtain possession peaceably, he may do so. However, if the collateral is in the possession of the debtor and cannot be obtained without disturbing the peace, then the creditor must take court action to repossess the collateral [9-609]. See the *Giles v. First Virginia Credit Services* case, which follows shortly, for a discussion of what constitutes repossession without breach of the peace.

If the collateral is intangible, such as accounts, chattel paper, instruments, or documents, *and performance has been rendered to the debtor*, the secured party may give notice and have payments made or performance rendered to her [9-607].

Sale of the Collateral The secured party may dispose of the collateral by sale or lease or in any manner calculated to produce the greatest benefit to all parties concerned. However, the method of disposal must be commercially reasonable [9-610; 9-627]. Notice of the time and place of a public sale must be given to the debtor, as must notice of a private sale. If the creditor decides to sell the collateral at a public sale such as an auction, then the creditor must give the debtor accurate advance notice of the time and place of the public sale. Similarly, if the creditor proposes to make a private sale of the collateral, notice must be given to the debtor. This gives the debtor a chance to object to the proposed private sale if she considers it not to be commercially reasonable or to otherwise protect her interests [9-613].

Until the collateral is actually disposed of by the creditor, the buyer has the right to *redeem* it. This means that if the buyer tenders fulfillment of all obligations secured by the collateral as well as of the expenses incurred by the secured party in retaking, holding, and preparing the collateral for disposition, she can recover the collateral from the creditor [9-623].

Consumer Goods If the creditor has a security interest in consumer goods and the debtor has paid 60 percent or more of the purchase price or debt (and has not agreed in writing to a strict foreclosure), the creditor must sell the repossessed collateral. If less than 60 percent of the purchase price or debt related to consumer goods has been paid, and as to any other security interest, the creditor may propose to the debtor that the seller keep the collateral in satisfaction of the debt. The consumer-debtor has 20 days to object in writing. If the consumer objects, the creditor must sell the collateral. Otherwise, the creditor may keep the collateral in satisfaction of the debt [9-620].

Distribution of Proceeds The Code sets out the order in which any proceeds are to be distributed after the sale of collateral by the creditor. First, any expenses of repossessing, storing, and selling the collateral, including reasonable attorney's fees, are paid. Second, the proceeds are used to satisfy the debt of the creditor who conducts the sale. Third, any junior interests or liens are paid. Finally, if any proceeds remain, the debtor is

entitled to them. If the proceeds are not sufficient to satisfy the debt, then the creditor is usually entitled to a **deficiency judgment**. This means that the debtor remains personally liable for any debt remaining after the sale of the collateral [9–615(d)(2)].

For example, suppose a loan company lends Christy \$5,000 to purchase a car and takes a security interest. After making several payments and reducing the debt to

CONCEPT REVIEW

Priority Rules

Priority between Two or More Secured Creditors Claiming an Interest in the Same Collateral

General rule. The *first creditor to file or to perfect* his security interests has priority over other creditors who filed or perfected later. If no secured creditor has perfected, then the *first security interest to attach* has priority.

Exceptions to the general rule. These secured creditors have higher priorities:

- A *purchase money security interest (PMSI) in inventory* has priority over a conflicting security interest if the PMSI in inventory is perfected and written notice is given to the conflicting secured creditor no later than when the collateral is delivered to the debtor.
- A *PMSI in noninventory collateral* has priority over a conflicting security interest if the PMSI in noninventory collateral is perfected not later than 20 days after the collateral is delivered to the debtor.
- A *PMSI in fixtures* has priority over a security interest in the real property to which the fixtures are affixed if the PMSI in fixtures is perfected not later than 20 days after the time the goods are attached to the real property.
- A *security interest in fixtures that are removable equipment or readily removable replacements of domestic appliance consumer goods* has priority over a security interest in the real property if the security interest in such fixtures is perfected prior to the time the fixtures are attached to the real property.
- A *security interest in securities perfected by possession or control* has priority over a security interest in the securities perfected by filing.
- *Artisan's liens*—and other possessory liens arising by operation of law—generally have priority over other security interests.

Between Secured Creditors and a Buyer of the Collateral from the Debtor

General rule. Buyer has priority over an unperfected security interest that is unknown to the buyer.

Exceptions to the general rule. These buyers have higher priorities:

- A *buyer in the ordinary course of business (BITOCOB) of his seller* has priority over any security interest created by his seller.
- A *bona fide purchaser of consumer goods for value* has priority over an unfiled, unknown *PMSI in consumer goods*.
- A *bona fide purchaser of a negotiable instrument* has a priority over a secured interest in the negotiable instrument perfected other than by possession if the bona fide purchaser takes possession of the negotiable instrument.

\$4,800, Christy defaults. The loan company pays \$50 to have the car repossessed and then has it sold at an auction, where it brings \$4,500, thus incurring a sales commission of 10 percent (\$450) and attorney's fees of \$150. The repossession charges, sales commission, and attorney's fees, totaling \$650, are paid first from the \$4,500 proceeds. The remaining \$3,850 is applied to the \$4,800 debt, leaving a balance due of \$950. Christy remains liable to the loan company for the \$950 unless Christy challenges the amount of the deficiency claimed [9-626(a)].

Liability of Creditor A creditor who holds a security interest in collateral must be careful to comply with the provisions of Article 9 of the Code. A creditor acting improperly in repossessing collateral or in its foreclosure and sale is liable to the parties injured. Thus, a creditor can be liable to a debtor if she acts improperly in repossessing or selling collateral [9-625; 9-627].

In the case that follows, *Giles v. First Virginia Credit Services, Inc.*, the court rejected a claim for wrongful repossession of an automobile.

Giles v. First Virginia Credit Services, Inc. 46 UCC Rep. 2d 913 (N.C. Ct. App. 2002)

On January 18, 1997, Joann Giles entered into an installment sale contract for the purchase of an automobile. The contract was assigned to First Virginia, which obtained a senior perfected purchase money security interest in the automobile. The terms of the contract required Joann Giles to make 60 regular monthly payments to First Virginia. The contract stated that Joann Giles's failure to make any payment due under the contract within 10 days after its due date would be a default. The contract contained an additional provision agreed to by Joann Giles that stated:

If I am in default, you may consider all my remaining payments to be due and payable, without giving me notice. I agree that your rights of possession will be greater than mine. I will deliver the property to you at your request, or you may use lawful means to take it yourself without notice or other legal action. . . . If you excuse one default by me, that will not excuse later defaults.

During the early morning hours of June 27, 1999, Professional Auto Recovery, at the request of First Virginia, repossessed the locked automobile from Giles's front driveway. At the time Giles was in arrears for payments due on May 2, 1999, and June 2, 1999. Giles's neighbor, Glenn Mosteller, testified that he was awakened around 4:00 AM by the running of a loud diesel truck engine on the road outside his house. When he went to the window to look, he saw a large rollback diesel with a little pickup on the bed behind it. He saw a man jump out of the truck and run up the driveway to Giles's house. Then the car came flying out of the driveway and started screeching down the street. About the same time, the rollback truck also took off at a high rate of speed making a loud diesel noise. The neighbor then called Giles and told her someone was stealing her car. Giles's husband came out of the house and hollered back and forth with the neighbor. Then the neighbor jumped in his truck and contacted the police. Eventually three police cars came to the scene, producing a great commotion in the neighborhood. The Gileses testified that neither of them saw the car being repossessed and were only awakened by the neighbor after it was gone. During the actual repossession there was no contact between Professional Auto Recovery and the Gileses or their neighbor.

Giles brought suit against First Virginia and Professional Auto Recovery for wrongful repossession of an automobile, alleging among other things, that she had mailed a payment on the account just prior to the repossession, which First Virginia had accepted and applied to their account after the repossession, and that the removal of the automobile constituted breach of the peace in violation of UCC section 9-503.

McGee, Judge

Our courts have long recognized the right of secured parties to repossess collateral from a defaulting debtor without resort to judicial process, so long as the repossession is effected peaceably. Our General Assembly codified procedures for self-help repossessions, including this common law restriction, in the North Carolina Uniform Commercial Code (UCC). N.C. Gen.

Stat. § 9-503 (1999), in effect at the time of the repossession in this case, reads in part,

Unless otherwise agreed a secured party has on default the right to take possession of the collateral. In taking possession a secured party may proceed without judicial process if this can be done without breach of the peace or may proceed by action.

The General Assembly did not define breach of the peace but instead left this task to our courts, and although a number of our appellate decisions have considered this self-help right of secured parties, none have clarified what actions constitute a breach of the peace.

Section 9–503, at issue in this appeal, has been replaced by section 9–609 (Effective July 1, 2001), which states that a secured party, after default, may take possession of the collateral without judicial process, if the secured party proceeds without breach of the peace. In Number 3 of the Official Comment to the new statutory provision, our General Assembly continued to state that, “like former Section 9–503, this section does not define or explain the conduct that will constitute a breach of the peace, leaving that matter for continuing development by the courts.” The General Assembly clearly may further define and/or limit the time, place and conditions under which a repossession is permitted, but it has not yet done so.

In a case addressing the issue of whether prior notice of repossession is required under section 9–503, our Supreme Court stated that repossession can be accomplished under the statute without prior notice so long as the repossession is peaceable. Without specifically defining breach of the peace, our Supreme Court explained that “of course, if there is confrontation at the time of the attempted repossession, the secured party must cease the attempted repossession and proceed by court action in order to avoid a ‘breach of the peace.’” This indicates, as argued by First Virginia, that confrontation is at least an element of a breach of the peace analysis.

In a criminal case, our Supreme Court defined breach of the peace as “a disturbance of public order and tranquility by act or conduct not merely amounting to unlawfulness but tending also to create public tumult and incite others to break the peace.”

We must also consider the nature and purpose of Chapter 25 of the North Carolina General Statutes, the UCC, which is to be “liberally construed and applied to promote its underlying purposes and policies.” Section 1–102 (1999). Its stated purposes are:

- (a) to simplify, clarify and modernize the law governing commercial transactions;
- (b) to permit the continued expansion of commercial practices through custom, usage and agreement of the parties;
- (c) to make uniform the law among the various jurisdictions.

In carrying out the policy of uniformity with other jurisdictions, we consider their treatment of the term of breach of the peace. While cases from other jurisdictions are not binding on our courts, they provide insight into how this term has been analyzed by other courts and therefore are instructive.

The courts in many states have examined whether a breach of the peace in the context of the UCC has occurred. Courts

have found a breach of the peace when actions by a creditor incite violence or are likely to incite violence. Other courts have expanded the phrase “breach of the peace” beyond the criminal law context to include occurrences where a debtor or his family protest the repossession. Some courts, however, have determined that a mere oral protest is not sufficient to constitute a breach of the peace. Removal of collateral from a private driveway, without more, however, has been found not to constitute a breach of the peace. Additionally, noise alone has been determined to not rise to the level of a breach of the peace.

Many courts have used a balancing test to determine if a repossession was undertaken at a reasonable time and in a reasonable manner, and to balance the interests of debtors and creditors. Five relevant factors considered in this balancing test are: “(1) where the repossession took place, (2) the debtor’s express or constructive consent, (3) the reactions of third parties, (4) the type of premises entered, and (5) the creditor’s use of deception.” The Gileses argue that the “guiding star” in determining whether a breach of the peace occurred should be whether or not the public peace was preserved during the repossession. The Gileses contend “the elements as to what constitutes a breach of the peace should be liberally construed” and urge our Court to adopt a subjective standard considering the totality of the circumstances as to whether a breach of the peace occurred.

The Gileses claim that adopting a subjective standard for section 9–503 cases will protect unwitting consumers from the “widespread use of no notice repossessions, clandestine and after midnight repossessions” and will protect “our State’s commitment to law and order and opposition to vigilante policies, opposition to violence and acts from which violence could reasonably flow.” If a lender is not held to such a high subjective standard, the Gileses contend that self-help repossessions should be disallowed altogether.

First Virginia, in contrast, argues that a breach of the peace did not occur in this case, as a matter of law, because there was no confrontation between the parties. Therefore, because the facts in this case are undisputed concerning the events during the actual repossession of the automobile, the trial court did not err in its partial grant of summary judgment.

First Virginia disputes the Gileses’ contention that a determination of whether a breach of the peace occurred should be a wholly subjective standard, because if such a standard is adopted, every determination of whether a breach of the peace occurred would hereafter be a jury question and “would run directly contrary to the fundamental purpose of the Uniform Commercial Code, which is to provide some degree of certainty to the parties engaging in various commercial transactions.” Further, First Virginia argues that applying a subjective standard to a breach of the peace analysis could be detrimental to borrowers, with lenders likely increasing the price of credit

to borrowers to cover the costs of having to resort to the courts in every instance to recover their collateral upon default. The standard advocated by the Gileses would “eviscerate” the self-help rights granted to lenders by the General Assembly, leaving lenders “with no safe choice except to simply abandon their ‘self help’ rights altogether, since every repossession case could [result] in the time and expense of a jury trial on the issue of ‘breach of the peace.’ ” Finally, First Virginia argues that a subjective standard would be detrimental to the judicial system as a whole because “with a case-by-case, wholly subjective standard . . . the number of lawsuits being filed over property repossessions could increase dramatically.”

Based upon our review of our appellate courts’ treatment of breach of the peace in pre-UCC and UCC cases, as well as in other areas of the law, the purposes and policies of the UCC, and the treatment other jurisdictions have given the phrase, we find that a breach of the peace, when used in the context of section 9–503, is broader than the criminal law definition. A confrontation is not always required, but we do not agree with the Gileses that every repossession should be analyzed subjectively, thus bringing every repossession into the purview of the jury so as to eviscerate the self-help rights duly given to creditors by the General Assembly. Rather, a breach of the peace analysis should be based upon the reasonableness of the time and manner of the repossession. We therefore adopt a balancing test using the five factors discussed above to determine whether a breach of the peace occurs when there is no confrontation.

In applying these factors to the undisputed evidence in the case before us, we affirm the trial court’s determination that there was no breach of the peace, as a matter of law. Professional Auto Recovery went onto the Giles’s driveway in the early morning hours, when presumably no one would be outside, thus decreasing the possibility of confrontation. Professional Auto Recovery did not enter into the Giles’s home or any enclosed area. Consent to repossession was expressly given in the contract with First Virginia signed by Joann Giles. Although a third party, Mr. Mosteller, was awakened by the noise of Professional Auto Recovery’s truck, Mr. Mosteller did not speak with anyone from Professional Auto Recovery, nor did he go outside until Professional Auto Recovery had departed with the Giles’s automobile. Further, neither of the Gileses were awakened by the noise of the truck, and there was no confrontation between either of them with any representative of Professional Auto Recovery. By the time Mr. Mosteller and plaintiffs went outside, the automobile was gone. Finally, there is no evidence, nor did the Gileses allege, that First Virginia or Professional Auto Recovery employed any type of deception when repossessing the automobile.

There is no factual dispute as to what happened during the repossession in this case, and the trial court did not err in granting summary judgment to First Virginia on this issue.

Partial summary judgment for First Virginia affirmed.

Ethics in Action

What Is the Ethical Thing to Do?

Suppose you own an appliance business in a working-class neighborhood that makes most of its sales on credit. What considerations would you take into account in determining whether and when to foreclose or repossess items on which customers have fallen behind in making their payments?

Should you be swayed by the personal circumstances of your debtors or look only to protecting your financial interests? For example, would you consider the value of the item to the debtor—such as whether it is a necessity for her life, such as a refrigerator, or a luxury? Would you consider the reason the person had fallen behind—that is, whether she had been ill or recently lost her job?

Problems and Problem Cases

1. Symons, a full-time insurance salesperson, bought a set of drums and cymbals from Grinnel Brothers. A security agreement was executed between them but was never filed. Symons purchased the drums to supplement his income by playing with a band. He had done this before, and his income from his two jobs

was about equal. He also played several other instruments. Symons became bankrupt, and the trustee tried to acquire the drums and cymbals as part of his bankruptcy estate. Grinnel’s claimed that the drums and cymbals were consumer goods and thus it had a perfected security interest merely by attachment of the security interest. Were the drums and cymbals consumer goods?

2. Richard Silch purchased a camcorder at Sears Roebuck by charging it to his Sears charge account. Printed on the face of the sales ticket made at that time was the following:

This credit purchase is subject to the terms of my Sears Charge Agreement which is incorporated herein by reference and identified by the above account number. I grant Sears a security interest or lien in this merchandise, unless prohibited by law, until paid in full.

Silch's signature appeared immediately below that language on the sales ticket. The ticket also contained the brand name of the camcorder and a stock number.

Silch subsequently filed a Chapter 7 bankruptcy proceeding and was eventually discharged. Sears filed a petition to recover the camcorder from Silch, contending that it had a valid and enforceable security interest in the camcorder. Silch, in turn, contended that the sales ticket did not constitute a valid and enforceable security agreement. Does the sales ticket constitute a valid security agreement?

3. On June 10, 1994, 4-R Management, by and through its officers, Chris and Lucretia Ryan, executed a promissory note to the First Bank of Eva. The Ryans signed the note both personally and as officers of 4-R Management. The Ryans also executed a security agreement dated June 10, 1994, pledging one "book coin collection" and various other items, including a tractor, bush hog, farm products, and cattle, as security for the note. The promissory note incorporated by reference this separate security agreement. The coin collection was the property of 4-R Management, and the bank took possession of the coins on June 10. In subsequent renewal notes, 4-R Management, in its corporate capacity, expressly granted the bank a security interest in the coin collection.
- On November 8, 1995, 4-R Management filed a voluntary petition for relief under the Bankruptcy Code. Subsequently, the bankruptcy trustee sought to recover for the bankruptcy estate the coin collection being held by the bank as security. The question of whether the bank or the bankruptcy trustee had the better right to the coin collection turned on whether the bank had a perfected security interest in the collection. When the bank has possession of collateral pursuant to a security agreement but has not filed a financing statement on the public record, does the bank hold a perfected security interest in the collateral?
4. Nicolosi bought a diamond ring on credit from Rike-Kumber as an engagement present for his fiancé. He signed a purchase money security agreement giving Rike-Kumber a security interest in the ring until it was paid for. Rike-Kumber did not file a financing statement covering its security interest. Nicolosi filed for bankruptcy. The bankruptcy trustee claimed that the diamond ring was part of the bankruptcy estate because Rike-Kumber did not perfect its security interest. Rike-Kumber claimed that it had a perfected security interest in the ring. Did Rike-Kumber have to file a financing statement to perfect its security interest in the diamond ring?
5. On October 28, 1983, Steve Gresham, doing business as Midway Cycle Sales, entered into a Wholesale Financing Agreement with ITT Commercial Finance Corporation. The agreement was to finance the purchase of new motorcycles from Suzuki Motor Corporation. ITT filed a financing statement with the Indiana secretary of state on December 16, 1983. The description of the collateral in which ITT asserted a security interest included "all inventory . . . replacements and proceeds." On January 9, 1984, Union Bank filed a financing statement with the Indiana secretary of state claiming it was engaged in "floor planning of new motorcycles" for Midway Cycle Sales. In August 1984, ITT began paying Suzuki invoices for Gresham. In July 1985, ITT sent a letter to Union Bank notifying it that it expected to acquire purchase money security interests in the inventory of Stephan Gresham d/b/a Midway Cycle Sales. In early 1986, Union Bank began loaning money to Gresham under its floor planning agreement with him. Actually, Gresham was "double floor planning"—that is, he was taking invoices for motorcycles that had been paid for by ITT to the Union Bank and claiming that he had paid for the motorcycles but had decided to floor plan them. When Union Bank advanced money to him, he used the money to make payments on the loans to ITT. He made no payments to Union Bank and did not pay off all of his loan to ITT. Midway Cycle Sales went bankrupt when Union Bank repossessed 22 new Suzuki motorcycles. ITT brought suit against Union Bank, claiming it had paid for the motorcycles and had a perfected security interest in the motorcycles that had priority over Union Bank's security interest in them. Did ITT's security interest have priority over Union Bank's security interest?

6. On November 18, Firestone & Company made a loan to Edmund Carroll, doing business as Kozy Kitchen. To secure the loan, a security agreement was executed, which listed the items of property included, and concluded as follows: “together with all property and articles now, and which may hereafter be, used or mixed with, added or attached to, and/or substituted for any of the described property.” A financing statement that included all the items listed in the security agreement was filed with the town clerk on November 18 and with the secretary of state on November 22. On November 25, National Cash Register Company delivered a cash register to Carroll on a conditional sales contract. National Cash Register filed a financing statement on the cash register with the town clerk on December 20 and with the secretary of state on December 21. Carroll defaulted in his payments to both Firestone and National Cash Register. Firestone repossessed all of Carroll’s fixtures and equipment covered by its security agreement, including the cash register, and then sold the cash register. National Cash Register claimed that it was the title owner of the cash register and brought suit against Firestone for conversion. Did Firestone or National Cash Register have the better right to the cash register?
7. On February 19, 1988, DBC Capital Fund, Inc., entered into an agreement with the owner of Devers Auto Sales under which it loaned money to Devers and DBC obtained a security interest in the automotive inventory maintained by Devers. This security interest was perfected by filing with the secretary of state on February 25, 1988. On March 24, 1989, Cheryl Snodgrass purchased a 1984 Oldsmobile from Devers for \$5,000 in cash. The automobile was taken from the inventory covered by DBC’s security interest, although Snodgrass was not made aware of the financing agreement between Devers and DBC. When Snodgrass took possession of the Oldsmobile, Devers told her that the certificate of title would be mailed to her. In the meantime, she was issued a temporary registration. On April 28, 1989, Snodgrass was informed by letter that DBC had physical possession of the title and that DBC considered itself to have a valid lien on the automobile. In a later telephone conversation, DBC’s attorney informed Snodgrass that DBC would not release the certificate of title until she paid DBC \$4,200. On April 25, 1989, the temporary registration issued to Snodgrass by Devers had expired. Because she was not in possession of the certificate of title, she was unable to obtain proper licensing for the car and, therefore, could not use it. In an effort to obtain the certificate of title, Snodgrass brought suit against DBC. Does Snodgrass have a better right than DBC to the certificate of title?
8. Inkas Coffee Distribution Realty and Equipment LLC (Inkas) purchased a 2001 Ford F250 for \$36,340 which was to be paid in 60 months. The retail installment agreement signed by Inkas was assigned to Charter One Auto Finance. Charter One Auto Finance was granted a security interest in the motor vehicle on September 20, 2000, and the security interest was noted on the title to the vehicle. On May 10, 2001, Inkas delivered the vehicle to Connecticut International Parking, LLC, which was in the business of storing motor vehicles at its open-air parking lot in East Granby, Connecticut. Pursuant to an oral agreement, Connecticut International agreed to store the automobile at the rate of \$9.25 per day and to care for it by regularly starting and moving the car on a monthly basis so that its engine, mechanical system, and tires would remain in operating condition. Between May 10, 2001, and May 16, 2004, Inkas incurred \$9,851 in storage fees. Inkas defaulted on its obligations under the installment agreement by not making payments due from July 4, 2001, until March 2005. On April 16, Charter, claiming that it had rights in the motor vehicle, demanded that Connecticut International deliver it to Charter. Connecticut International offered to do so upon proof of Charter’s rights, but demanded that it be paid for the storage charges owed to it. Charter refused, and brought suit to recover the car. Inkas filed for bankruptcy in 2001. While that action was dismissed, both Charter and Connecticut International concluded that Inkas was not in a position to pay either of them. By virtue of its prior perfected security interest in the motor vehicle, does Charter have the right to recover the vehicle without first reimbursing Connecticut International for its storage fees?
9. In August, Norma Wade purchased a Ford Thunderbird automobile and gave Ford Motor Credit a security interest in it to secure her payment of the \$7,000 balance of the purchase price. When Wade fell behind on her monthly payments, Ford engaged the Kansas Recovery Bureau to repossess the car. On the following February 10, an employee of the Recovery Bureau located the car in Wade’s driveway, unlocked the door,

got in, and started it. He then noticed a discrepancy between the serial number of the car and the number listed in his papers. He shut off the engine, got out, and locked the car. When Wade appeared at the door of her house, he advised her that he had been sent by Ford to repossess the car but would not do so until he had straightened out the serial number. She said that she had been making payments, that he was not going to take the car, and that she had a gun, which she would use. He suggested that Wade contact Ford to straighten out the problem. She called Ford and advised its representative that if she caught anybody on her property again trying to take her car, she would use her gun to “leave him laying right where I saw him.” Wade made several more payments, but Ford again contracted to have the car repossessed. At 2:00 AM on March 5, the employee of the Kansas Recovery Bureau successfully took the car from Wade’s driveway. She said that she heard a car burning rubber, looked out of her window, and saw that her car was missing. There was no confrontation between Wade and the employee since he had safely left the area before she discovered that the car had been taken. Wade then brought lawsuit against Ford claiming that the car had been wrongfully repossessed. She sought actual and punitive damages, plus attorney’s fees. Should Ford be held liable for wrongful repossession?

10. Gibson, a collector of rare old Indian jewelry, took two of his pieces to Hagberg, a pawnbroker. The two pieces, a silver belt and a silver necklace, were worth \$500 each. Hagberg loaned only \$45 on the belt and \$50 on the necklace. Gibson defaulted on both loans, and immediately and without notice, the necklace was sold for \$240. A short time later, the belt was sold for \$80. At the time of their sale, Gibson owed interest on the loans of \$22. Gibson sued Hagberg to recover damages for improperly disposing of the collateral. Is Gibson entitled to damages because of Hagberg’s actions in disposing of the collateral?

Online Research

Using the Internet to Search for Preexisting Security Interests

The company you work for wants to save money by using the Internet to search for Article 9 filings against persons it may sell goods to on credit. It knows that some states have all of the filings in computer databases and that some also allow searches from the Internet. Your employer asks you to search the Arizona statewide system and tell him whether you can find everything you need concerning possible Article 9 filings against a prospective customer whose business name is John J. [for Joseph] Smith.

chapter 30

BANKRUPTCY

Bob and Sue Brown are a young couple with two small children. Within the past three years they stretched themselves financially in the course of acquiring and furnishing their first home and starting their family. Recently, Bob was laid off from his job managing computer technology operations for a telecom company. Then, Sue was injured in an automobile accident and has been unable to continue substitute teaching. Bob's unemployment benefits are insufficient to provide for the ordinary family expenses, much less meet the heavy financial obligations the family has taken on. The bank has filed a notice of intent to foreclose the mortgage on their home, and other creditors have sent letters threatening to repossess their car and furnishings. A friend has suggested that Bob and Sue consult with an attorney who specializes in bankruptcy matters who may be able to get them some relief from their creditors and gain a new start financially.

This situation raises a number of questions that will be addressed in this chapter. They include:

- If the Browns file a petition in bankruptcy, what assets would they be able to retain as exempt from the claims of their creditors?
- Which of their debts could be discharged in a bankruptcy proceeding?
- What advantages and disadvantages would the Browns have if they filed under Chapter 7 (liquidations) as opposed to filing under Chapter 13 (consumer debt adjustments)?
- Under the 2005 amendments to the Bankruptcy Code, are they eligible to file for Chapter 7 liquidation or must they file under Chapter 13, which will require them to continue to make payments on their debts?

WHEN AN INDIVIDUAL, a partnership, or a corporation is unable to pay its debts to creditors, problems can arise. Some creditors may demand security for past debts or start court actions on their claims in an effort to protect themselves. Such actions may adversely affect other creditors by depriving them of their fair share of the debtor's assets. Also, quick depletion of the debtor's assets may effectively prevent the debtor who needs additional time to pay off his debts from having an opportunity to do so.

At the same time, creditors need to be protected against the actions a debtor in financial difficulty might be tempted to take to their detriment. For example, the debtor might run off with his remaining assets or might use them to pay certain favored creditors, leaving nothing for the other creditors. Finally, a means is needed by which a debtor can get a fresh start financially and not continue to be saddled with debts beyond his ability to pay. This chapter focuses on the body of law and procedure

that has developed to deal with the competing interests when a debtor is unable to pay his debts in a timely manner.

The Bankruptcy Code

The Bankruptcy Code is a federal law that provides an organized procedure under the supervision of a federal court for dealing with insolvent debtors. Debtors are considered insolvent if they are unable or fail to pay their debts as they become due. The power of Congress to enact bankruptcy legislation is provided in the Constitution. Through the years, there have been many amendments to the Bankruptcy Code. Congress completely revised the code in 1978 and then passed significant amendments to it in 1984, 1986, and 1994. On April 20, 2005, President Bush signed the "Bankruptcy Abuse, Prevention and Consumer Protection Act of 2005," the most substantial revision of the bankruptcy law since

the 1978 Bankruptcy Code was adopted. With a few exceptions, the revisions are effective for cases filed after October 17, 2005.

The Bankruptcy Code has several major purposes. One is to ensure that the debtor's property is fairly distributed to the creditors and that some creditors do not obtain unfair advantage over the others. At the same time, the code protects all of the creditors against actions by the debtor that would unreasonably diminish the debtor's assets to which they are entitled. The code also provides the honest debtor with a measure of protection against the demands for payment by his creditors. Under some circumstances, the debtor is given additional time to pay the creditors, freeing him of those pressures creditors might otherwise exert. If the debtor makes a full and honest accounting of his assets and liabilities and deals fairly with his creditors, the debtor may have most—if not all—of the debts discharged so as to have a fresh start.

At one time, **bankruptcy** carried a strong stigma for the debtors who became involved in it. Today, this is less true. It is still desirable that a person conduct her financial affairs in a responsible manner. However, there is a greater understanding that such events as accidents, natural disasters, illness, divorce, and severe economic dislocations are often beyond the ability of individuals to control and may lead to financial difficulty and bankruptcy.

Bankruptcy Proceedings The Bankruptcy Code covers a number of bankruptcy proceedings. In this chapter, our focus will be on:

1. Straight bankruptcy (liquidations).
2. Reorganizations.
3. Family farms and commercial fishing operations.
4. Consumer debt adjustments.

The Bankruptcy Code also contains provisions regarding municipal bankruptcies, which are not covered in this chapter.

Liquidations A liquidation proceeding, traditionally called **straight bankruptcy**, is brought under Chapter 7 of the Bankruptcy Code. Individuals, as well as businesses, may file under Chapter 11. The debtor must disclose all of the property she owns and surrender this bankruptcy estate to the **bankruptcy trustee**. The trustee separates out certain property that the debtor is permitted to keep and then administers, liquidates, and distributes the remainder of the bankrupt debtor's estate.

There is a mechanism for determining the relative rights of the creditors, for recovering any preferential payments made to creditors, and for disallowing any preferential liens obtained by creditors. If the bankrupt person has been honest in her business transactions and in the bankruptcy proceedings, she is usually given a **discharge** (relieved) of her debts.

Reorganizations Chapter 11 of the Bankruptcy Code provides a proceeding whereby a debtor can work out a plan to solve its financial problems under the supervision of a federal court. A reorganization plan is essentially a contract between a debtor and its creditors. The proceeding is intended for debtors, particularly businesses, whose financial problems may be solvable if they are given some time and guidance and if they are relieved of some pressure from creditors.

Family Farms Historically, farmers have been accorded special attention in the Bankruptcy Code. Chapter 12 of the Bankruptcy Code provides a special proceeding whereby a debtor involved in a family farming operation or a family-owned commercial fishing operation can develop a plan to work out his financial difficulties. Generally, the debtor remains in possession of the farm or fishing operations and continues to operate it while the plan is developed and implemented.

Consumer Debt Adjustments Under Chapter 13 of the Bankruptcy Code, individuals with regular incomes who are in financial difficulty can develop plans under court supervision to satisfy their creditors. Chapter 13 permits compositions (reductions) of debts and/or extensions of time to pay debts out of the debtor's future earnings.

The Bankruptcy Courts Bankruptcy cases and proceedings are filed in federal district courts. The district courts have the authority to refer the cases and proceedings to bankruptcy judges, who are considered to be units of the district court. If a dispute falls within what is known as a **core proceeding**, the bankruptcy judge can hear and determine the controversy. Core proceedings include a broad list of matters related to the administration of a bankruptcy estate. However, if a dispute is not a core proceeding but rather involves a state law claim, then the bankruptcy judge can only hear the case and prepare draft findings and conclusions for review by the district court judge.

Certain proceedings affecting interstate commerce have to be heard by the district court judge if any party

requests that this be done. Moreover, even the district courts are precluded from deciding certain state law claims that could not normally be brought in federal court, even if those claims are related to the bankruptcy matter. Bankruptcy judges are appointed by the president for terms of 14 years.

Chapter 7: Liquidation Proceedings

Petitions All bankruptcy proceedings, including liquidation proceedings, are begun by the filing of a petition. The petition may be either a **voluntary petition** filed by the debtor or an **involuntary petition** filed by a creditor or creditors of the debtor. A voluntary petition in bankruptcy may be filed by an individual, a partnership, or a corporation. However, municipal, railroad, insurance, and banking corporations and savings or building and loan associations are not permitted to file for straight bankruptcy proceedings. A person filing a voluntary petition need not be insolvent—that is, her debts need not be greater than her assets. However, the person must be able to allege that she has debts. The primary purpose for filing a voluntary petition is to obtain a discharge from some or all of the debts.

The 2005 revisions establish a new “means test” for consumer debtors to be eligible for relief under Chapter 7. The purpose of the test is to ensure that individuals who will have income in the future that might be used to pay off at least a portion of their debts must pursue relief under Chapter 13 as opposed to pursuing relief and a discharge of liabilities through the liquidation provisions of Chapter 7. In general, debtors who earn more than the median income in their state and who can repay at least \$6,575 of their debt over five years are required to use Chapter 13. This means test is discussed in detail later in this section under the subsection entitled “Substantial Abuse.”

Involuntary Petitions An involuntary petition is a petition filed by creditors of a debtor. By filing it, they seek to have the debtor declared bankrupt and his assets distributed to the creditors. Involuntary petitions may be filed against many debtors. However, involuntary petitions in straight bankruptcy cannot be filed against (1) farmers; (2) ranchers; (3) nonprofit organizations; (4) municipal, railroad, insurance, and banking corporations; (5) credit unions; and (6) savings or building and loan associations.

If a debtor has 12 or more creditors, an involuntary petition to declare him bankrupt must be signed by at least 3 creditors. If there are fewer than 12 creditors, then an involuntary petition can be filed by a single creditor. The creditor or creditors must have valid claims against the debtor exceeding the value of any security they hold by \$13,475 or more. To be forced into involuntary bankruptcy, the debtor must be generally not paying his debts as they become due—or have had a custodian for his property appointed within the previous 120 days.

If an involuntary petition is filed against a debtor engaged in business, the debtor may be permitted to continue to operate the business. However, the court may appoint an **interim trustee** if this is necessary to preserve the bankruptcy estate or to prevent loss of the estate. A creditor who suspects that a debtor may dismantle her business or dispose of its assets at less than fair value may apply to the court for protection.

Requirement for Credit Counseling and Debtor Education Under the 2005 revisions, individuals are ineligible for relief under any chapter of the Code unless within 180 days preceding their bankruptcy filing they received individual or group credit counseling from an approved nonprofit budget and credit counseling agency or obtain an exemption from the requirement. The required briefing, which may take place by telephone or on the Internet, must “outline” the opportunities for credit counseling and assist the debtor in performing a budget analysis. The debtor is required to file a certificate from the credit counseling agency that describes the services that were provided to the debtor and also to file any debt repayment plan developed by the agency. Because individuals who have not received the required briefing are not eligible for relief under the Bankruptcy Code, it is difficult for a creditor to force an individual debtor into bankruptcy by filing an involuntary petition against the debtor.

Attorney Certification The 2005 act increases the legal responsibilities for an attorney who signs a bankruptcy petition. The attorney’s signature constitutes a certification that the attorney, after inquiry, has no knowledge that the information contained in the schedules filed by the debtor is incorrect. In addition, the attorney’s signature on a petition, motion, or other written pleading constitutes a certification that the attorney, after inquiry, has determined that the pleading is well grounded in fact and is either warranted by existing law or is based on a good faith argument for extending existing law. In cases where the trustee files a motion to dismiss a case for substantial

abuse, the court may order the debtor's attorney to reimburse the trustee for the reasonable costs, including attorney fees, for prosecuting the motion and may also order the attorney to pay a civil penalty to the trustee or the United States Trustee.

These provisions have raised concerns that bankruptcy practice will be less attractive to bankruptcy attorneys that handle a large volume of cases because the provisions will increase their costs and risks—and they operate on relatively thin margins.

Automatic Stay Provisions The filing of a bankruptcy petition operates as an **automatic stay**, holding in abeyance various forms of creditor action against a debtor or her property. These actions include (1) beginning or continuing judicial proceedings against the debtor; (2) actions to obtain possession of the debtor's property; (3) actions to create, perfect, or enforce a lien against the debtor's property; and (4) setoff of indebtedness owed to the debtor before commencement of the bankruptcy proceeding. A court may give a creditor relief from the stay if the creditor can show that the stay does not give her "adequate protection" and jeopardizes her interest in certain property. The relief to the creditor might take the form of periodic cash payments or the granting of a replacement lien or an additional lien on property.

Concerned that debtors were taking advantage of the automatic stay provisions to the substantial detriment of some creditors, such as creditors whose claims were secured by an interest in a single real estate asset, in 1994 Congress provided specific relief from the automatic stay for such creditors. Debtors must either file a plan of reorganization that has a reasonable chance of being confirmed within a reasonable time or must be making monthly payments to each such secured creditor that are in an amount equal to interest at a current fair market rate on the value of the creditor's interest in the real estate.

The automatic stay provisions are not applicable to actions to establish paternity, to establish or modify orders for domestic support obligations, for the collection of domestic support obligations from property that is not the property of the bankruptcy estate, or to withhold, suspend, or restrict a driver's license or professional, occupational, or recreational license.

In 2005, Congress added two additional exceptions from the automatic stay provisions for the benefit of landlords seeking to evict tenants. First, any eviction proceedings in which the landlord obtained a judgment of possession prior to the filing of the bankruptcy petition can be continued. Second, in cases where the landlord's claim for eviction is based on the use of illegal substances

on the property or "endangerment" of the property, the eviction proceedings are exempt from the stay even if they are initiated after the bankruptcy proceeding was filed so long as the endangerment or illegal use occurred within 30 days before the filing. Debtors are able to keep the stay in effect by filing certifications that certain non-bankruptcy laws allow the lease to remain in effect and that they have cured any defaults within 30 days of the bankruptcy filing.

The 2005 revisions also include a number of provisions dealing with serial filings for bankruptcy that are designed to keep debtors from abusing the automatic stay provisions to the detriment of creditors.

Order of Relief Once a bankruptcy petition has been filed, the first step is a court determination that relief should be ordered. If a voluntary petition is filed by the debtor, or if the debtor does not contest an involuntary petition, this step is automatic. If the debtor contests an involuntary petition, then a trial is held on the question of whether the court should order relief. The court orders relief only (1) if the debtor is generally not paying his debts as they become due, or (2) if within 120 days of the filing of the petition a custodian was appointed or took possession of the debtor's property. The court also appoints an interim trustee pending election of a trustee by the creditors.

Meeting of Creditors and Election of Trustee The bankrupt person is required to file a list of her assets, liabilities, and creditors and a statement of her financial affairs. The 2005 revisions impose a number of new production requirements on debtors. Now, individual debtors must file, along with their schedules of assets and liabilities:

- A certificate that they have received and/or have read the notice from the Clerk of the Bankruptcy Court that they must receive credit counseling to be eligible for relief under the Bankruptcy Code;
- Copies of all payment advices and other evidence of payments they have received from any employer within 60 days before the filing of the petition;
- A statement of the amount of monthly net income, itemized to show how the amount is calculated; and
- A statement showing any anticipated increase in income or expenditures over the 12-month period following the date of filing the petition.

Should an individual debtor in a voluntary Chapter 7 case or in a Chapter 13 case fail to file the required information within 45 days of the filing of the petition, the case is to be automatically dismissed. A court, upon

finding that an extension is justified, can extend the time period to file for up to an additional 45 days.

Individual debtors also must provide copies of their most recent tax returns to the trustee and to creditors making a timely request; failure to do so can result in dismissal of the case. Debtors also must, at the request of the judge or a party in interest, file at the same time they file with the IRS copies of federal tax returns due while the bankruptcy case is pending and also file copies of tax returns (including any amended returns) for tax years that ended within the three years before the bankruptcy petition was filed.

Once the court receives the bankruptcy filing and the required schedules and certifications, the U.S. Trustee calls a meeting of the creditors. At the meeting, the U.S. Trustee is required to examine the debtor to make sure she is aware of (1) the potential consequences of seeking a discharge in bankruptcy, including the effects on credit history; (2) the debtor's ability to file a petition under other chapters (such as 11, 12, or 13) of the Bankruptcy Code; (3) the effect of receiving a discharge of debts; and (4) the effect of reaffirming a debt (discussed later in this chapter).

The creditors also elect a **trustee** who, if approved by the judge, takes over administration of the bankrupt's estate. The **trustee** represents the creditors in handling the estate. At the meeting, the creditors have a chance to ask the debtor questions about her assets, liabilities, and financial difficulties. These questions commonly focus on whether the debtor has concealed or improperly disposed of assets.

Duties of the Trustee The trustee takes possession of the debtor's property and has it appraised. The debtor must also turn over her records to the trustee. For a time, the trustee may operate the debtor's business. The trustee sets aside the items of property that a debtor is permitted to keep under state exemption statutes or federal law.

The 2005 act places restrictions on the authority of the trustee to sell personally identifiable information about individuals to persons who are not affiliated with the debtor. Congress was concerned about situations where individuals had provided information to persons and entities on the understanding and commitment that the information would remain in confidence with the recipient. These data files often are a valuable asset of a debtor involved in bankruptcy proceedings, but Congress concluded it was not reasonable to allow that information to be sold to a third party that was not in their contemplation when the individuals provided the information to the debtor under a promise of confidentiality.

The trustee examines the claims filed by various creditors and objects to those that are improper in any way. The trustee separates the unsecured property from the secured and otherwise exempt property. He also sells the bankrupt's nonexempt property as soon as possible, consistent with the best interest of the creditors.

The trustee is required to keep an accurate account of all the property and money he receives and to promptly deposit moneys into the estate's accounts. The trustee files a final report with the court, with notice to all creditors who then may file objections to the report.

Health Care Businesses The 2005 revisions reflect Congress's concern with what happens if a petition for bankruptcy is filed by a health care business and contain a number of provisions concerning that possibility. First, the trustee is instructed to use his reasonable best efforts to transfer patients in a health care business that is in the process of being closed to an appropriate health care business in the vicinity of the one being closed that offers similar services and maintains a reasonable quality of care. Second, the actual, necessary costs of closing a health care business are considered administrative expenses entitled to priority. Third, the automatic stay provisions do not apply to actions by the Secretary of Health and Human Services to exclude the debtor from participating in Medicare and other federal health care programs. Finally, the act sets out requirements for the disposal of patient records where there are insufficient funds to continue to store them as required by law. The requirements include giving notice to the affected patients and specifying the manner of disposal for unclaimed records.

Liquidation of Financial Firms The Bankruptcy Code contains special provisions for the liquidation of stockbrokers, commodity brokers, and clearing banks that are designed to protect the interests of customers of the entities who have assets on deposit with the bankrupt debtor. These responsibilities are overseen by the trustee.

The Bankruptcy Estate The commencement of a Chapter 7 bankruptcy case by the filing of a voluntary or involuntary petition creates a bankruptcy estate. The estate is composed of all of the debtor's legal and equitable interests in property, including certain community property. Certain property is exempted (see "Exemptions" section below). The estate also includes:

1. Profits, royalties, rents and revenue, along with the proceeds from the debtor's estate, received during the Chapter 7 proceeding.

2. Property received by the debtor in any of the following ways within 180 days of the filing of the Chapter 7 petition: (a) by bequest or inheritance; (b) as a settlement with a divorced spouse or as a result of a divorce decree; or (c) as proceeds of a life insurance policy.
3. Property recovered by the bankruptcy trustee because (a) creditor of the debtor received a voidable preferential transfer or (b) the debtor made a fraudulent transfer of her assets to another person. Preferential and fraudulent transfers are discussed later in this chapter.

Exemptions Even in a liquidation proceeding, the bankrupt is generally not required to give up all of his property; he is permitted to **exempt** certain items of property. Under the Bankruptcy Code, the debtor may choose to keep certain items or property either exempted by state law, or exempt under federal law unless state law specifically forbids use of the federal exemptions. However, any such property concealed or fraudulently transferred by the debtor may not be retained.

The 2005 revisions specify that the state or local law governing the debtor's exemptions is the law of the place where the debtor was domiciled for 730 days before filing. If the debtor did not maintain a domicile in a single state for that period, then the law governing the exemptions is the law of the place of the debtor's domicile for the majority of the 180-day period preceding the filing of the petition that is between two and two and one-half years before the filing. For example, on January 1, 2007, Alex Smith was living in Florida. In March 2007 he moved to Georgia and in November 2007 he moved again and took up residence in Alabama. On July 1, 2009, Smith filed a petition in bankruptcy. Because Smith had not lived in Alabama for the 2 years (730 days) before he filed, he would not be able to claim the

exemptions that Alabama provides. Rather, he would be entitled to claim the exemptions provided by Georgia where he lived for the majority of the 180 days between January 1, 2007 and July 1, 2007.

The debtor must elect to use *either* the set of exemptions provided by the state or the set provided by the federal bankruptcy law; she may not pick and choose between them. A husband and wife involved in bankruptcy proceedings must both elect either the federal or the state exemptions; where they cannot agree, the federal exemptions are deemed elected.

The **exemptions** permit the bankrupt person to retain a minimum amount of the assets considered necessary to life and to his ability to continue to earn a living. They are part of the fresh start philosophy that is one of the purposes of the Bankruptcy Code. The general effect of the federal exemptions is to make at least a minimum exemption available to debtors in all states. States that wish to be more generous to debtors can provide more liberal exemptions.

The specific items that are exempt under state statutes vary from state to state. Some states provide fairly liberal exemptions and are considered "debtors' havens." For example, in Florida none of the equity in the debtor's homestead can be used to pay off unsecured creditors, thus allowing even relatively well-off individuals to shield significant assets from creditors. Items that are commonly made exempt from sale to pay debts owed creditors include the family Bible; tools or books of the trade; life insurance policies; health aids, such as wheelchairs and hearing aids; personal and household goods; and jewelry, furniture, and motor vehicles worth up to a certain amount.

The case that follows, *In re Kyllogen*, illustrates a claim by a debtor for an exemption under a state statute.

In re Kyllogen

264 B.R.17 (U.S.D.C. D.Minn. 2001)

Patricia Kyllogen owns a five-acre lot with a home and pole barn located on it; the property has an estimated value of \$350,000 and is subject to a \$90,000 mortgage. She purchased the property from her parents in 1974 and built the home after she married in 1980. The couple has two daughters. She and her husband David also own an adjacent unimproved lot of approximately five acres located behind the lot with their home. The second lot, which is valued at \$45,000, was purchased in 1988. Both lots are heavily wooded with mature oak trees and used to be part of Patricia Kyllogen's parents' family farm.

Much of the surrounding area that once had constituted the family farm has been subdivided into residential parcels of at least two and a half acres or more; many of the parcels contain large, expensive, and upscale homes. Three or four nearby properties are occupied by individuals who have full-time outside jobs but who also grow farm crops, primarily hay, on a part-time basis.

In 1996 Kyllogen and her husband cleared one-tenth of an acre of land on the front lot and planted ginseng seeds. Ginseng is a small herbal plant harvested for its roots. The longer the root grows before it is harvested, the more valuable it is,

and the earliest one can harvest ginseng root is about five to seven years after it is planted. The ginseng is planted under the shade of mature hardwood trees, and, once an area is cleared and the ginseng planted, it requires relatively little care except for periodic weeding. *Kyllogen* was employed full-time at a Burlington Coat Factory; her husband did not have a regular full-time job, although he described himself as a ginseng farmer. In five years of operation (1996–2000), the ginseng “farm” had no income and approximately \$28,000 in tax deductible losses.

Kyllogen filed a petition in bankruptcy. She claimed her home and the two contiguous five-acre parcels as “exempt” assets of the bankruptcy estate. The Bankruptcy Trustee objected to the claimed exemption, asserting that *Kyllogen* was entitled to exempt a homestead of no more than one-half of an acre of land in area with a value of no more than \$200,000.

Dreher, Bankruptcy Judge

A debtor may exempt from her bankruptcy estate certain property which is exempt under applicable state law on the petition filing date.

Section 510.01 of the Minnesota Statutes specifically provides:

The house owned and occupied by a debtor as the debtor’s dwelling place, together with the land upon which it is situated to the amount hereinafter limited and defined, shall constitute the homestead of such debtor and debtor’s family, and be exempt from seizure or sale under legal process on account of any debt . . . charged thereon in writing, except such as are incurred for work or materials furnished in the construction, repair, or improvement of such homestead, or for services performed by laborers or servants.

Section 510.02, in turn, defines the area limits of the homestead:

The homestead may include any quantity of land not exceeding 160 acres, and not included in the laid out or platted portion of any city. If the homestead is within the laid out or platted portion of a city, its area must not exceed one-half of an acre. The value of the homestead exemption, whether the exemption is claimed jointly or individually, may not exceed \$200,000, or, if the homestead is used primarily for agricultural purposes, \$500,000, exclusive of the limitations set forth in section 510.05.

Generally speaking, exemption laws work in tandem with debt discharge to effectuate a debtor’s fresh start. The intent of the homestead exemption is to secure a debtor’s home against uncertainties and misfortunes of life and to preserve the home as a dwelling place for the debtor and his or her family. However, the area limitations and other requirements ensure that the debtor does not unfairly retain assets.

* * *

This case is unlike others in which the debtors are clearly family farmers who live and work on the land and use it for agricultural purposes. *Cf. In re Becker* (finding debtors who had farmed for three-plus decades a 58-acre parcel which contained a barn and several outbuildings were entitled to larger homestead exemption). While Debtor testified that she and her

family always wanted to farm, nothing in this record shows that they have farmed or are farming. Debtor and, to a lesser extent, her spouse have always been principally employed off the “farm.” Moreover, what little “farming” they have engaged in—a fish farm in Wisconsin, one year’s worth of failed mushrooms, and upstart wood-cultivated ginseng operations—is not farming in the traditional sense, was and is small-scale, and undertaken even as they maintained outside employment. These farming operations have never provided support for Debtor and her family but instead have merely given them healthy tax write-offs year after year.

Ginseng “farming,” which can be done on small plots of wooded property, can be conducted with little or no land. In five years, Debtor and her spouse have planted less than one-half of an acre of land and never expect to harvest more than one-tenth of an acre of crop per year. Debtor and her spouse do not, and never will in their lifetime, need such expansive acreage for their operations even if they stay with wood-cultivated ginseng. What they do can be termed “farming,” but it is clearly not agricultural as that term is traditionally understood and is not the sort of “farm” the homestead exemption statute was designed to protect.

Debtor and her spouse fervently testified that they are ginseng farmers, but in actuality, they are a couple who own a very large house on a very large lot, which is virtually surrounded by other very large houses on very large lots, or in a few instances, some smaller houses on sizeable vacant lots, in the country. Debtor has a full-time day job and spends her evenings and weekends pulling weeds and tending small plots of ginseng, akin to a city resident who maintains a backyard vegetable garden. Her spouse likewise has historically had a full-time day job, usually as an electrical contractor, with his various “farming” operations being secondary or on the side. Debtor and her spouse are not farming their parcels in any true sense, and there is nothing inherently agricultural about what they are doing. In short, ginseng “farming” is their hobby. Therefore, given the conclusively urban use and nature of Debtor’s two contiguous parcels, Debtor is only entitled to a homestead exemption of one-half of an acre up to \$200,000.

Judgment affirmed in favor of Bankruptcy Trustee.

Limits on State Homestead Exemptions Concerns that very generous homestead exemptions in a number of states were leading to abuses by debtors who transferred assets into large homes in those states and then filed for bankruptcy led Congress in 2005 to place some limits on state homestead exemptions. These limits include:

- The value of the debtor's homestead for purposes of a state homestead exemption is reduced to the extent that it reflects an increase in value on account of the disposition of nonexempt property by the debtor during the 10 years prior to the filing with the intent to hinder, delay, or defraud creditors.
- Any value in excess of \$136,875—irrespective of the debtors intent—that is added to the value of a homestead during the 1,215 days (about 3 years, 4 months) preceding the bankruptcy filing may not be included in a state homestead exemption unless it was transferred from another homestead in the same state or the homestead is the principal residence of a family farmer.
- An absolute \$136,875 homestead cap applies if either (a) the bankruptcy court determines that the debtor has been convicted of a felony demonstrating that the filing of the case was an abuse of the provisions of the Bankruptcy Code or (b) the debtor owes a debt arising from a violation of federal or state securities laws, fiduciary fraud, racketeering, or crimes or intentional torts that caused serious injury or death in the preceding five years. In certain cases, a discharge of a debtor under Chapters 7, 11, or 13 may be delayed where the debtor is subject to a proceeding that might lead to a limitation of a homestead exemption.

Federal Exemptions Twelve categories of property are exempt under the federal exemptions, which the debtor may elect in lieu of the state exemptions. The federal exemptions include:

1. The debtor's interest (not to exceed \$20,200 in value) in real or personal property that the debtor or a dependent of the debtor uses as a residence.
2. The debtor's interest (not to exceed \$3,225 in value) in one motor vehicle.
3. The debtor's interest (not to exceed \$525 in value for any particular item) up to a total of \$10,775 in household furnishings, household goods, wearing apparel, appliances, books, animals, crops, or musical instruments that are held primarily for the personal, family, or household use of the debtor or a dependent of the debtor.
4. The debtor's aggregate interest (not to exceed \$1,350 in value) in jewelry held primarily for the personal,

family, or household use of the debtor or a dependent of the debtor.

5. \$1,075 in value of any other property of the debtor's choosing, plus up to \$10,125 of any unused homestead exemption.
6. The debtor's aggregate interest (not to exceed \$2,025 in value) in any implements, professional books, or tools of the trade.
7. Life insurance contracts.
8. Interest up to \$10,775 in specified kinds of dividends or interest in certain kinds of life insurance policies.
9. Professionally prescribed health aids.
10. Social Security, disability, alimony, and other benefits reasonably necessary for the support of the debtor or his dependents.
11. The debtor's right to receive certain insurance and liability payments.
12. Retirement funds that are in a fund or account that is exempt from taxation under the Internal Revenue Code. For certain individual retirement accounts, the aggregate amount exempted is limited to \$1 million. Also protected are some contributions to certain education and college savings accounts made more than one year prior to bankruptcy.

The term **value** means "fair market value as of the date of the filing of the petition." In determining the debtor's interest in property, the amount of any liens against the property must be deducted.

Avoidance of Liens The debtor is also permitted to **void** certain liens against exempt properties that impair her exemptions. Liens that can be voided on this basis are judicial liens or nonpossessory, nonpurchase money security interests in (1) household furnishings, household goods, wearing apparel, appliances, books, animals, crops, musical instruments, or jewelry that are held primarily for the personal, family, or household use of the debtor or a dependent of the debtor; (2) implements, professional books, or tools of the trade of the debtor or a dependent of the debtor; and (3) professionally prescribed health aids for the debtor or a dependent of the debtor.

Debtors are also permitted to **redeem** exempt personal property from secured creditors by paying them the full value of the collateral at the time the property is redeemed. Then, the creditor is an unsecured creditor as to any remaining debt owed by the debtor. Under the 2005 revisions, the value of personal property securing a claim

of an individual debtor in a Chapter 7 proceeding is based on the cost to the debtor of replacing the property—without deduction for costs of sale or marketing—and if the property was acquired for personal, family, or household purposes, the replacement cost will be the retail price for property of similar age and condition. The debtor is not permitted to retain collateral without redemption or reaffirmation of the debt (discussed later in this chapter) by just continuing to make the payments on the secured debt.

Under the 2005 revisions, the “household goods” as to which a nonpossessory, nonpurchase—money security interest can be avoided have been limited. The new definition limits electronic equipment to one radio, one television, one VCR, and one computer with related equipment. Specifically excluded are works of art other than those created by the debtor or family member, jewelry worth more than \$550 (except wedding rings), and motor vehicles (including lawn tractors, motorized vehicles such as ORVs (off-road vehicles), watercraft, and aircraft.

Preferential Payments A major purpose of the Bankruptcy Code is to ensure equal treatment for the creditors of an insolvent debtor. The code also seeks to prevent an insolvent debtor from distributing her assets to a few favored creditors to the detriment of the other creditors. Thus, the trustee has the right to recover for the benefit of the estate **preferential payments** above a certain threshold that are made by the bankrupt debtor in advance of the bankruptcy. In the case of an individual debtor whose debts are primarily consumer debts, the trustee is not entitled to avoid preferences unless the aggregate value of the property is \$600 or more. In the case of a corporate debtor, a transfer by a debtor of less than \$5,475 in the aggregate is not subject to avoidance. A preferential payment is a payment made by an insolvent debtor within 90 days before the filing of the bankruptcy petition that enables a creditor to obtain a greater percentage of a preexisting debt than other similar creditors of the debtor. It is irrelevant whether the creditor knew that the debtor was insolvent. A debtor is presumed to have been insolvent on and during the 90 days immediately preceding the filing of a petition.

For example, Fredericks has \$1,000 in cash and no other assets. He owes \$650 to his friend Roberts, \$1,500 to a credit union, and \$2,000 to a finance company. If Fredericks pays \$650 to Roberts and then files for bankruptcy, he has made a preferential payment to Roberts. Roberts has had his debt paid in full, whereas only \$350 is left to satisfy the \$3,500 owed to the credit union and finance company. They stand to recover only 10 cents on

each dollar that Fredericks owes them. The trustee has the right to get the \$650 back from Roberts.

If the favored creditor is an insider—a relative of an individual debtor or an officer, director, or related party of a company—who had reasonable cause to believe the debtor was insolvent at the time the transfer was made, then a preferential payment made to that creditor up to one year prior to the filing of the petition can be recovered by the trustee.

The 1994 amendments to the Bankruptcy Code provided that the trustee may not recover as preferential payments any bona fide payments of debts to a spouse, former spouse, or child of the debtor for alimony, maintenance, or support pursuant to a separation agreement, divorce decree, or other court order.

Preferential Liens **Preferential liens** are treated in a similar manner. A creditor might try to obtain an advantage over other creditors by obtaining a lien on the debtor’s property to secure an existing debt. The creditor might seek to get the debtor’s consent to a lien or to obtain a lien by legal process. Such liens are considered *preferential* and are invalid if they are obtained on property of an insolvent debtor within 90 days before the filing of a bankruptcy petition and if their purpose is to secure a preexisting debt. A preferential lien obtained by an insider up to one year prior to the filing of the bankruptcy petition can be avoided.

Transactions in the Ordinary Course of Business The Bankruptcy Code provides several exceptions to the trustee’s avoiding power that are designed to allow a debtor and his creditors to engage in ordinary business transactions. The exceptions include (1) transfers that are intended by the debtor and creditor to be a contemporaneous exchange for new value or (2) the creation of a security interest in new property where new value was given by the secured party to enable the debtor to obtain the property and where the new value was in fact used by the debtor to obtain the property and perfected within 20 days after the debtor took possession of the collateral.

For example, George Grocer is insolvent. He is permitted to purchase and pay cash for new inventory, such as produce or meat, without the payment being considered preferential. His assets have not been reduced. He has simply traded money for goods to be sold in his business. Similarly, he could buy a new display counter and give the seller a security interest in the counter until he has paid for it. This would not be considered a preferential lien. The seller of the counter has not gained an

Ethics in Action

Should the Homestead Exemption Be Limited?

As of June 2002, six states, including Florida and Texas, provide an unlimited household exemption that allows bankrupt debtors to shield unlimited amounts of equity in a residential estate. The unlimited exemption has come under increased scrutiny in recent years as a number of public figures as well as noted wrongdoers have taken advantage of the unlimited exemption to shield significant amounts of wealth from creditors. For example, a prominent actor who was declared bankrupt in 1996 was allowed to keep a \$2.5 million estate located in Hobe Sound, Florida, and a corporate executive convicted of securities fraud kept his Tampa, Florida, mansion from the claims of his creditors in bankruptcy, including federal regulators seeking to collect civil fines. When the Enron and WorldCom corporate scandals broke in 2001 and 2002, the media called attention to a \$15 million mansion under construction in Boca Raton, Florida, for the former CFO of WorldCom and to a \$7 million penthouse owned by the former CEO of Enron as well as to the fact that the liberal exemption laws in Florida and Texas might be utilized by them to protect a significant amount of their wealth against claims from creditors and regulators.

As noted above, in the 2005 act, Congress took some steps to limit the ability of debtors to shift assets into an expensive home in a state with an unlimited household exemption shortly before filing for bankruptcy and also to limit the exemption for

debtors convicted of violations of the federal securities laws. While the act was pending in the conference committee, a group of about 80 law professors who teach bankruptcy and commercial law wrote to the committee urging that it adopt a hard cap on the homestead exemption contained in the Senate version of the bill. They pointed out the fundamental unfairness created when residents of one state can protect in a supposedly “uniform” federal bankruptcy proceeding an asset worth millions while residents in other states face sharp limitations on what they can protect. As an example, they noted that a wealthy investor in Texas could keep an unencumbered home worth \$10 million while a factory worker in Virginia puts at risk anything over \$10,000 in equity.

The law professors described various ways that the formulation the conference committee had adopted could be gamed. They also asserted that the provisions to limit the homestead exemption for those who violate securities laws, who commit fraud while in a fiduciary capacity, or who commit certain felonies or intentional torts were too tightly drawn and would create a “playground of loopholes for wealthy individuals and clever lawyers.” They noted, for example, that the provisions “would not cap the homestead exemption for someone who finds a dozen ways to bilk the elderly out of their money, someone who takes advantage of first-time home buyers, or someone who deceives people trying to set up college funds for their children.”

Should Congress adopt a uniform cap on the homestead exemption?

unfair advantage over other creditors, and Grocer’s assets have not been reduced by the transaction. The unfair advantage comes where an existing creditor tries to take a lien or obtain a payment of more than his share of the debtor’s assets. Then, the creditor has obtained a preference over other creditors, which is what the trustee is allowed to avoid.

The Bankruptcy Code also provides an exception for transfers made in payment of a debt incurred in the ordinary course of the business or financial affairs of the debtor and the transferee (a) made in the ordinary course of business or (b) made according to ordinary business terms. Thus, for example, a consumer could pay her monthly utility bills in a timely fashion without the creditor/utility being vulnerable to having the transfer of funds avoided by a trustee. The purpose of this exception is to leave undisturbed normal financial relations, and it is consistent with the general policy of the preference section of the code to discourage *unusual action* by either a debtor or her creditors when the debtor is moving toward bankruptcy.

Exceptions to the trustee’s avoidance power are also made for certain statutory liens, certain other perfected security interests, and cases filed by individual debtors whose debts are primarily consumer debts and the aggregate value of all property affected by the transfer is less than \$600, and cases filed by a debtor where debts are not primarily consumer debts and the aggregate value of all property affected by the transfer is less than \$5,000.

Fraudulent Transfers If a debtor transfers property or incurs an obligation with *intent to hinder, delay, or defraud creditors*, the transfer is *voidable* by the trustee. Transfers of property for less than reasonable value are similarly voidable. Suppose Kasper is in financial difficulty. She “sells” her \$15,000 car to her mother for \$100 so that her creditors cannot claim it. Kasper did not receive fair consideration for this transfer. The transfer could be declared void by a trustee if it was made within two years before the filing of a bankruptcy petition against Kasper.

Some states provide longer periods of time; for example, New York allows trustees to avoid fraudulent transfers made in a six-year period before the bankruptcy filing.

Avoidance of Certain “Retention Bonuses” The 2005 revisions also explicitly authorize the trustee to avoid two types of transfers as fraudulent. First, he may avoid transfers to or for the benefit of an insider under an employment contract and not in the ordinary course of business. Specifically addressed are “retention bonuses” which Congress believed had been abused in some recent high-profile corporate bankruptcies. Retention bonuses can be paid to insiders only where they are made in response to bona fide outside offers, the individual’s services are essential to the survival of the business, and the amount of the bonus is not more than 10 times the mean of similar bonuses paid to nonmanagement employees during the year.

Avoidance of Transfers to Certain Asset Protection Trusts The second type of transfer that the trustee was explicitly authorized to avoid as fraudulent is transfers to a self-settled trust made within 10 years of the filing by

a debtor where the debtor is a beneficiary and the transfer was made with actual intent to hinder or delay. There is a particular focus on transfers made in anticipation of any money judgment, settlement, civil penalty, equitable order, or criminal fine which the debtor believed would be incurred through any violation of federal or state securities laws or fraud, deceit or manipulation in a fiduciary capacity, or in connection with the purchase or sale of securities registered under the federal securities acts.

The provisions of law concerning **fraudulent transfers** are designed to prevent a debtor from concealing or disposing of his property in fraud of creditors. Such transfers may also subject the debtor to criminal penalties and prevent discharge of the debtor’s unpaid liabilities.¹

In the *Manhattan Investment Fund, Ltd.* case that follows, the court held that the trustee could recover margin payments transferred to a brokerage firm as transfers presumed to have been made with actual intent to hinder, delay, or defraud other creditors.

¹Bulk sales of a debtor’s materials, supplies, merchandise, or other inventory of the business in bulk and not in the ordinary course of business have the potential to defraud creditors.

In re Manhattan Investment Fund Ltd. 359 B.R. 510 (U.S.B.C., S.D. N.Y. 2007)

Michael Berger created the Manhattan Investment Fund through his wholly owned company, Manhattan Capital Management, Inc., and used the Fund as his vehicle to conduct a massive Ponzi scheme. On January, 14, 2000, following an investigation into the Fund’s trading activities, the Securities and Exchange Commission (SEC), filed a complaint alleging securities fraud against the Fund, MCM, and Berger. The SEC obtained an asset freeze and the appointment of Helen Gredd as Receiver for the Fund. On March 7, 2000 (the “Petition Date”), the Receiver caused the Fund to file a voluntary petition for relief under Chapter 11 of the Bankruptcy Code, and on April 4, 2000, the Receiver was appointed Trustee of the Fund under Chapter 11.

On April 24, 2000, the Trustee commenced an adversary proceeding against Bear Stearns. In her complaint, the Trustee sought to avoid, pursuant to section 548(a)(1)(A) of the Bankruptcy Code, transfers that were made to Bear Stearns in connection with the Fund’s short selling activities during the last 10 months of its operation. Count I of the complaint sought to avoid \$141.1 million in margin payments which Berger transferred to Bear Stearns from the Fund’s account with the Bank of Bermuda.

In the year prior to the Petition Date, the Fund made 18 separate transfers totaling \$141.4 million from its account at Bank of Bermuda to an account maintained by Bear Stearns at Citibank. Those monies were then transferred to the Fund’s Bear Stearns account. The monies in the Fund’s Bear Stearns account were used by the Fund to engage in securities trading. The Bear Stearns account was subject to a Professional Account Agreement between Berger and Bear Stearns which provided, in relevant part, that (1) Bear Stearns had the right to set the level of maintenance margin; (2) Bear Stearns had a security interest in all monies held in the account; (3) Bear Stearns had sole discretion to prevent the Fund from withdrawing any money credited to its account as long as any short positions remained open; and (4) Bear Stearns had sole discretion to use any and all monies credited to the Fund’s account to liquidate the Fund’s open short positions with or without the Fund’s consent. The agreement and the account itself were governed by SEC Rule 15c3-3 which expressly precluded Bear Stearns from using the funds in the account for any purpose other than those outlined in the agreement.

Lifland, U.S. Bankruptcy Judge

The Bankruptcy Code bestows broad powers upon a trustee to avoid certain transfers of property made by the debtor before the filing of the bankruptcy petition. In this way, the transferred property is returned to the estate for the benefit of all persons who have presented valid claims. Specifically, *section 548 of the Bankruptcy Code* provides for the avoidance of any transfer of an interest in property made by the debtor in the year prior to the filing of its bankruptcy petition as a fraudulent conveyance provided that the transfer was made with an actual fraudulent intent or with the badges of fraud constituting constructive fraud of the debtor's creditors. A fraudulent conveyance avoided under *section 548* is recoverable by the trustee under *section 550(a)* which provides, in relevant part, "the trustee may recover, . . . the property transferred, or, if the court so orders, the value of such property, from (1) the *initial transferee* of such transfer or the entity for whose benefit such transfer was made . . ." (emphasis added).

However, *section 546(e) of the Bankruptcy Code*, commonly known as the "stockbroker defense," prevents the trustee from avoiding margin payments made to a stockbroker except where there is actual fraud. Legislative history reveals that Congress was concerned about the volatile nature of the commodities and securities markets, and decided that certain protections were necessary to prevent the insolvency of one commodity or security firm from spreading to other firms and possibly threatening the collapse of the affected market. *Section 548(a)(1)(A)*, referred to as the "actual fraud" provision, requires that in order to avoid a transfer, it must be made with actual intent to hinder, delay, or defraud any entity to which the debtor was or became, on or after the date that such transfer was made or such obligation was incurred or indebted.

The eighteen transfers at issue in this matter were deposited by the Fund in its account at Bear Stearns to allow it to continue short selling activities within the year prior to the Petition Date. To engage in short sales, federal securities regulations required the Fund to maintain its margin account with Bear Stearns at a specified level. Bear Stearns, in turn, could, and did, make those requirements more stringent based on the level of risk at which it perceived the Fund's trading to be. The transfers were made in order to open new short positions or to comply with the requirements of its margin account in order to continue trading. As such, the transfers fit squarely within the definition of a margin payment as defined in *the Bankruptcy Code*.

The Trustee argues that the transfers are within the exception to *section 546(e) of the Bankruptcy Code* because the transfers were made in furtherance of a "Ponzi" scheme. A "Ponzi" or "Pyramid" scheme is a fraudulent investment scheme in which money contributed by later investors is used to

pay artificially high dividends to the original investors, creating an illusion of profitability, thus attracting new investors.

Actual intent to hinder, delay or defraud may be established as a matter of law in cases in which the debtor runs a Ponzi scheme or a similar illegitimate enterprise, because transfers made in the course of a Ponzi operation could have been made for no purpose other than to hinder, delay or defraud creditors. Thus, courts nationwide have recognized that establishing the existence of a Ponzi scheme is sufficient to prove a debtor's actual intent to defraud. Moreover, acts taken in furtherance of the Ponzi scheme, such as paying brokers commissions, are also fraudulent. Every payment made by the debtor to keep the scheme on-going was made with the actual intent to hinder, delay or defraud creditors, primarily the new investors.

Bear Stearns argues that there was no fraud. However, this Court, along with the District Court has already determined that issue. In ruling on Bear Stearns' motion to dismiss, this Court explained that, "[w]hen a debtor operating a Ponzi scheme makes a payment with the knowledge that future creditors will not be paid, that payment is presumed to have been made with actual intent to hinder, delay or defraud other creditors—regardless of whether payments were made to early investors, or whether the debtor was engaged in a strictly classic Ponzi scheme." In light of Berger's guilty plea and conviction coupled with the fact that the margin payments were made in connection with a massive Ponzi scheme, this Court finds sufficient evidence of actual fraudulent intent in connection with the Transfers. Similarly, the District Court found that "[t]his action arises out of a Ponzi scheme engineered by Michael Berger, the Fund's manager, who sought to cover losses from ill-advised short sales of technology stocks with deposits made by new investors. The results were disastrous; the Fund hemorrhaged hundreds of millions of dollars [in 1998, Berger collected nearly \$200 million in investment principal, lost more than \$197 million in trading while claiming gains of more than \$33 million] and Mr. Berger was criminally prosecuted, pleading guilty to securities fraud. Accordingly, the issue is whether or not the payments may be recovered from Bear Stearns as an initial transferee under *section 550(a)(1)*."

Bear Stearns argues that it is a "mere conduit" and not an initial transferee. The Bankruptcy Code does not define the term "transferee" and as such the "mere conduit" defense has arisen as a defense to liability in avoidance actions. In order to be an initial transferee courts require something more than being the "first hands" to touch the asset, but rather that the entity have the requisite possession and control over the transferred asset.

Under the terms of the Fund's Agreement with Bear Stearns, Bear Stearns had a security interest in any monies transferred; held the monies transferred as collateral for short sales; had the

right to and did prohibit the Fund from withdrawing any of the monies transferred as long as any short position remained open; and had the right to and did use the monies transferred to purchase covering securities, with or without the Fund's consent. Thus, Bear Stearns had the ability to exercise control and use the transfers to protect its own economic well-being and thus, is not a mere conduit with respect to those transfers.

Bear Stearns asserts that even should it be found to be an initial transferee within the meaning of *section 550(a) of the Bankruptcy Code*, that if Bear Stearns accepted the transfers from the Fund in good faith under *548(c)*, without knowledge of the fraud, then the Trustee will not be permitted to recover these monies. The Trustee contends that Bear Stearns' knowledge of the Fund's questionable activity put it on notice of the Ponzi scheme more than a year before the Fund was shut down and investigated by the SEC. She contends that Bear Stearns had the opportunity to discover the Ponzi scheme and therefore was on constructive notice of the Fund's continued fraud.

Section 548(c) provides, in relevant part, that to the extent that a transfer is voidable, a transferee that takes for value and in good faith may retain any interest transferred to the extent

that such transferee gave value to the debtor in exchange for such transfer or obligation. Under *section 548(c)*, the transferee of a fraudulent transfer must prove his good faith in order to sustain his defense.

It is clear from the record that Bear Stearns was on inquiry notice of Berger's fraud from December 1998 and throughout the following year. Based upon the information it had, Bear Stearns was required to do more than simply ask the wrongdoer if he was doing wrong. Diligence requires consulting easily obtainable sources of information that would bear on the truth of any explanation received from the potential wrongdoer. The simple steps Bear Stearns finally performed one year later [it asked to see the Fund's financial statements, saw that it was the only broker the Fund had and that the moneys shown as present at Bears Stearns were substantially more than was actually there—and then notified the SEC], demonstrate that Bear Stearns failed to act diligently in a timely manner and accordingly, Bear Stearns cannot satisfy its burden of showing that it acted with the diligence required to establish good faith under *section 548(c) of the Bankruptcy Code*.

Trustee's motion for summary judgment granted.

Claims If creditors wish to participate in the estate of a bankrupt debtor, they must file a **proof of claim** in the estate within a certain time, usually 90 days after the first meeting of creditors. Only unsecured creditors are required to file proofs of claims. However, a secured creditor whose secured claim exceeds the value of the collateral is an unsecured creditor to the extent of the deficiency. That creditor must file a proof of claim to support the recovery of the deficiency.

Allowable Claims The fact that a proof of claim is filed does not ensure that a creditor can participate in the distribution of the assets of the bankruptcy estate. The claim must also be allowed. If the trustee has a valid defense to the claim, he can use the defense to disallow or reduce it. For example, if the claim is based on goods sold to the debtor and the seller breached a warranty, the trustee can assert the breach as a defense. All of the defenses available to the bankrupt person are available to the trustee.

Under the 2005 revisions, the court is authorized to reduce claims based on unsecured consumer debt by 20 percent on motion by the debtor and a showing that the creditor refused to negotiate a reasonable alternative repayment schedule proposed on behalf of the debtor by an

approved nonprofit budget and credit counseling agency. The offer had to have been made at least 60 days before filing of the petition and to have provided for the payment of at least 60 percent of the debt over a period not to exceed the original period of the loan or a reasonable extension of the time.

Secured Claims The trustee must also determine whether a creditor has a lien or secured interest to secure an allowable claim. If the debtor's property is subject to a secured claim of a creditor, that creditor has first claim to it. The property is available to satisfy claims of other creditors only to the extent that its value exceeds the amount of the debt secured.

Priority Claims The Bankruptcy Code declares certain claims to have **priority** over other claims. The 10 classes of **priority** claims are:

1. Domestic support obligations of the debtor, including claims for debts to a spouse, former spouse, or child for alimony to, maintenance for, or support of such spouse or child in connection with a separation agreement, divorce decree, or other court order (but not if assigned to someone else other than a governmental unit). Expenses of a trustee in administering

assets that might otherwise be used to pay the support obligations have priority before the support obligations themselves. And, support obligations owed directly to, or recoverable by, spouses and children have priority over support obligations that have been assigned to or are owed directly to a governmental unit.

2. Expenses and fees incurred in administering the bankruptcy estate.
3. Unsecured claims in involuntary cases that arise in the ordinary course of the debtor's business after the filing of the petition but before the appointment of a trustee or the order of relief.
4. Unsecured claims of up to \$10,950 per individual (including vacation, severance, and sick pay) for employee's wages earned within 180 days before the petition was filed or the debtor's business ceased.
5. Contributions to employee benefit plans up to \$10,950 per person (moreover, the claim for wages plus pension contribution is limited to \$10,950 per person).
6. Unsecured claims (a) for grain or the proceeds of grain against a debtor who owns or operates a grain storage facility or (b) up to \$5,400 by a U.S. fisherman against a debtor who operates a fish produce storage or processing facility and who has acquired fish or fish produce from the fisherman.
7. Claims of up to \$2,245 each by individuals for deposits made in connection with the purchase, lease, or rental of property or the purchase of goods or services for personal use that were not delivered or provided.
8. Certain taxes owed to governmental units.
9. Allowed unsecured claims based on a commitment by the debtor to a federal depository institution regulatory agency (such as the FDIC).
10. Allowed claims for liability for death or personal injury resulting from operation of a motor vehicle where the operator was unlawfully intoxicated from alcohol, drugs, or other substances.

The 2005 act adds as a category of administrative expenses (see priority 2 above) "the value of any goods received by a debtor within 20 days before the petition date in which the goods have been sold to the debtor in the ordinary course of the debtor's business" The expectation is that a very significant percentage of claims arising from goods sold and received will qualify as administrative expenses. The 2005 revisions also extend the right of

vendors to reclaim goods shipped before the petition. Any goods sold in the ordinary course of business and received by a debtor while insolvent may be reclaimed by the seller provided that the seller demands reclamation in writing not later than 45 days after the receipt of the goods or, if the debtor filed its petition during the 45 days, then not later than 20 days after the commencement of the bankruptcy case.

Distribution of the Debtor's Estate The priority claims are paid *after* secured creditors realize on their collateral but *before* other unsecured creditors are paid. Payments are made to the 10 priority classes, in order, to the extent there are funds available. Each class must be paid in full before the next class is entitled to receive anything. To the extent there are insufficient funds to satisfy all the creditors within a class, each class member receives a pro rata share of his claim.

Unsecured creditors include (1) those creditors who had not taken any collateral to secure the debt owed to them; (2) secured creditors to the extent their debt was not satisfied by the collateral they held; and (3) priority claimholders to the extent their claims exceed the limits set for priority claims.

Unsecured creditors, to the extent any funds are available for them, share in proportion to their claims. Unsecured creditors frequently receive little or nothing on their claims. Secured claims, trustee's fees, and other priority claims often consume a large part of the bankruptcy estate.

Special rules are set out in the Bankruptcy Code for distribution of the property of a bankrupt stockbroker or commodities broker.

Discharge in Bankruptcy

Discharge A bankrupt person who has not been guilty of certain dishonest acts and has fulfilled his duties as a bankrupt is entitled to a **discharge in bankruptcy**. A discharge relieves the bankrupt person of further responsibility for dischargeable debts and gives him a fresh start. A corporation or a partnership is not eligible for a discharge in bankruptcy. A bankrupt person may file a written waiver of his right to a discharge. An individual may not be granted a discharge if she obtained one within the previous eight years.

Objections to Discharge After the bankrupt has paid all of the required fees, the court gives creditors and others a chance to file objections to the discharge of

CONCEPT REVIEW

Distribution of Debtor's Estate (Chapter 7)

Secured creditors proceed directly against the collateral. If debt is fully satisfied, they have no further interest; if debt is only partially satisfied, they are treated as general creditors for the balance.

↓

Debtor's Estate Is Liquidated and Distributed

↓

Priority Creditors (10 classes)

1. Domestic support obligations of the debtor and expenses of administration of assets used to pay support obligations.
2. Costs and expenses of administration.
3. If involuntary proceeding, expenses incurred in the ordinary course of business after petition filed but before appointment of trustee.
4. Claims for wages, salaries, and commissions earned within 180 days of petition; limited to \$10,950 per person.
5. Contributions to employee benefit plans arising out of services performed within 180 days of petition; limit of \$10,950 (including claims for wages, salaries, and commissions) per person.
6. Unsecured claims (a) for grain or the proceeds of grain against a debtor who owns or operates a grain storage facility or (b) up to \$5,400 by a United States fisherman against a debtor who operates a fish produce or processing facility and who has acquired fish or fish produce from the fisherman.
7. Claims of individuals, up to \$2,425 per person, for deposits made on consumer goods or services that were not received.
8. Government claims for certain taxes.
9. Allowed unsecured claims based on a commitment by the debtor to a federal depository institution regulatory agency.
10. Allowed claims for liability for death or personal injury resulting from operation of a motor vehicle where the operator was intoxicated.
 - A. Distribution is made to 10 classes of priority claims in order.
 - B. Each class must be fully paid before next class receives anything.
 - C. If funds not sufficient to satisfy everyone in a class, then each member of the class receives same proportion of claim.

↓

General Creditors

1. General unsecured creditors.
2. Secured creditors for the portion of their debt that was not satisfied by collateral.
3. Priority creditors for amounts beyond priority limits.

If funds are not sufficient to satisfy all general creditors, then each receives the same proportion of their claims.

↓

Debtor

Debtor receives any remaining funds.

the bankrupt. Objections may be filed by the trustee, a creditor, or the U.S. attorney. If objections are filed, the court holds a hearing to listen to them. At the hearing, the court must determine whether the bankrupt person has committed any act that is a bar to discharge. If the bankrupt has not committed such an act, the court grants the discharge. If the bankrupt has committed an act that is a bar to discharge, the discharge is denied. The discharge is also denied if the bankrupt fails to appear at the hearing on objections or if he refused earlier to submit to the questioning of the creditors.

Acts That Bar Discharge Discharges in bankruptcy are intended for honest debtors. Therefore, the following acts bar a debtor from being discharged: (1) the unjustified falsifying, concealing, or destroying of records; (2) making false statements, presenting false claims, or withholding recorded information relating to the debtor's property or financial affairs; (3) transferring, removing, or concealing property in order to hinder, delay, or defraud creditors; (4) failing to account satisfactorily for any loss or deficiency of assets; and (5) failing to obey court orders or to answer questions approved by the court.

Nondischargeable Debts Certain debts are not affected by the discharge of a bankrupt debtor. The Bankruptcy Code provides that a discharge in bankruptcy releases a debtor from all provable debts except for certain specified debts. These include, among others, debts that:

1. Are due as a tax or fine to the United States or any state or local unit of government.
2. Result from liabilities for obtaining money by false pretenses or false representations.
3. Were incurred by the debtor's purchase of more than \$500 in luxury goods or services on credit from a single creditor within 90 days of filing a petition (presumed to be nondischargeable).
4. Are cash advances in excess of \$750 obtained by use of a credit card or a revolving line of credit at a credit union and obtained within 70 days of filing a bankruptcy petition (presumed to be nondischargeable).
5. Were not scheduled in time for proof and allowance because the creditor holding the debt did not have notification of the proceeding even though the debtor was aware that he owed money to that creditor.
6. Were created by the debtor's larceny or embezzlement or by the debtor's fraud while acting in a fiduciary capacity.
7. Were for a domestic support obligation (unless excepting it from discharge would impose an undue hardship on the debtor's dependents).
8. Are due for willful or malicious injury to a person or his property.
9. Are educational loans.
10. Are judgments arising out of a debtor's operation of a motor vehicle while legally intoxicated.
11. Are debts incurred to pay a tax to the United States that would not be dischargeable.
12. Are property settlements arising from divorce or separation proceedings *other than* support provisions that are priority claims.

All of these nondischargeable debts are provable debts. The creditor who owns these claims can participate in the distribution of the bankrupt's estate. However, the creditor has an additional advantage: His right to recover the unpaid balance is not cut off by the bankrupt's discharge. All other provable debts are dischargeable; that is, the right to recover them is cut off by the bankrupt's discharge.

In the case that follows, *In re Gerhardt*, the court denied the request of a debtor that his student loans be discharged because their repayment would constitute an undue hardship to him.

In re Gerhardt

348 F.3d 89 (5th Cir. 2003)

Jonathon Gerhardt was a professional cellist who had obtained over \$77,000 in government-insured student loans to finance his education at the University of Southern California, the Eastman School of Music, the University of Rochester, and the New England Conservatory of Music. He was 43 years old, healthy, and had no dependants. He subsequently defaulted on each loan owed to the United States government, having paid a total of only \$755 on those loans. In 1999, Gerhardt filed for Chapter 7 bankruptcy and subsequently sought discharge of his student loans.

At the time he filed for bankruptcy, Gerhardt was earning \$1,680.47 per month as the principal cellist for the Louisiana Philharmonic Orchestra (LPO), including a small amount of supplemental income earned as a cello teacher for Tulane

University. His monthly expenses, which included a health club membership and Internet access, averaged \$1,829.39. During the LPO off-season, Gerhardt collected unemployment.

The bankruptcy court discharged the student loans as causing undue hardship. On appeal, the district court reversed, holding that it would not be an undue hardship for Gerhardt to repay his loans. Gerhardt appealed that decision to the U.S. Circuit Court of Appeals.

Jones, Circuit Judge

This circuit has not explicitly articulated the appropriate test with which to evaluate the undue hardship determination. The Second Circuit in *Brunner v. New York State Higher Educational Service Corp.* (2nd Cir. 1987) crafted the most widely adopted test. To justify discharging the debtor's student loans, the *Brunner* test requires a three-part showing:

(1) that the debtor cannot maintain, based on current income and expenses, a "minimal" standard of living for himself and his dependents if forced to repay the loans; (2) that additional circumstances exist indicating this state of affairs is likely to persist for a significant portion of the repayment period of the student loans; and (3) that the debtor has made good faith efforts to pay the loans.

Because the Second Circuit presented a workable approach to evaluating the "undue hardship" determination, this court expressly adopts the *Brunner* test for purposes of evaluating a section claims of "undue hardship".

Under the first prong of the *Brunner* test, the bankruptcy court determined that Gerhardt could not maintain a minimal standard of living if forced to repay his student loans. Evidence was produced at trial that Gerhardt earned \$1,680.47 as the principal cellist for the Louisiana Philharmonic Orchestra (LPO), including a small amount of supplemental income earned as a cello teacher for Tulane University. His monthly expenses, which included a health club membership and Internet access, averaged \$1,829.39. The bankruptcy court's factual findings are not clearly erroneous. Consequently, we agree with the bankruptcy court conclusion of law that flows from these factual findings. Given that Gerhardt's monthly expenses exceed his monthly income, he has no ability at the present time to maintain a minimal standard of living if forced to repay his loans.

The second prong of the *Brunner* test asks if "additional circumstances exist that this state of affairs is likely to persist for

a significant period." "Additional circumstances" encompass "circumstances that impacted on the debtor's future earning potential but which were either not present when the debtor applied for the loans or have since been exacerbated." The second aspect of the test is meant to be a demanding requirement. Thus, proving that the debtor is currently in financial straights is not enough. Instead, the debtor must specifically prove "a total incapacity in the future to pay his debts for reasons not within his control."

Under the second prong of the test, the district court concluded that Gerhardt had not established persistent hardship entitling him to discharge his student loans. Gerhardt holds a masters degree in music from the New England Conservatory of Music. He is about 43 years old, healthy, well-educated, and has no dependants, yet has repaid only \$755 of his over \$77,000 debt. During the LPO's off-season, Gerhardt has collected unemployment, but he has somehow managed to attend the Colorado Music Festival. Although trial testimony tended to show that Gerhardt would likely not obtain a position at a higher-paying orchestra, he could obtain additional steady employment in a number of different arenas. For instance, he could attempt to teach full-time, obtain night-school teaching, or even work as a music store clerk. Thus, no reasons out of Gerhardt's control perpetuate his inability to repay his student loans.

In addition, nothing in the Bankruptcy Code suggests that a debtor may choose to work only in the field in which he was trained, obtain a low-paying job, and then claim that it would be an undue hardship to repay his student loans. Under the facts presented by Gerhardt, it is difficult to imagine a professional orchestra musician who would not qualify for an undue hardship discharge. Accordingly, Gerhardt has failed to demonstrate the type of exceptional circumstances that are necessary to meet his burden under the second prong of *Brunner*.

Judgment denying the discharge on the grounds of undue hardship affirmed.

Reaffirmation Agreements Sometimes, creditors put pressure on debtors to reaffirm, or to agree to pay, debts that have been discharged in bankruptcy. When the 1978 amendments to the Bankruptcy Code were under consideration, some individuals urged Congress to

prohibit such agreements. They argued that reaffirmation agreements were inconsistent with the fresh start philosophy of the Bankruptcy Code. Congress did not agree to a total prohibition; instead, it set up a rather elaborate procedure for a creditor to go through to get a

debt reaffirmed. Essentially, the agreement must be made *before* the discharge is granted and the debtor must receive certain specified disclosures at or before the time he signs the reaffirmation agreement. These disclosures include the “amount reaffirmed,” the annual percentage rate of interest, the total of fees and costs accrued to date, that the agreement may be rescinded at any time prior to discharge or within 60 days after filing with the court, and a clear and conspicuous statement advising the debtor that the reaffirmation agreement is not required by the bankruptcy law or any other law.

The agreement must be filed with the court—and if the debtor is represented by an attorney, the agreement must be accompanied by a certification from the debtor’s attorney that (1) it represents a voluntary agreement by the debtor, (2) that it does not impose an undue hardship on the debtor or any dependent of the debtor, and (3) the debtor was fully advised about the legal consequences of signing the agreement. Where the debtor is not represented by an attorney during the negotiation of the reaffirmation agreement, it is not effective unless approved by the court.

Until 60 days after a reaffirmation agreement is filed with the court, there is a presumption that the agreement will work an undue hardship on the debtor if the debtor’s income less the monthly expenses as shown on the schedule she filed is less than the scheduled payments on the reaffirmed debt. The debtor has the opportunity to rebut the presumption, but where the debtor does not do so, the court may disapprove the reaffirmation agreement.

Dismissal for Substantial Abuse In 1984, Congress, concerned that too many individuals with an ability to pay their debts over time pursuant to a Chapter 13 plan were filing petitions to obtain Chapter 7 discharges of liability, authorized the Bankruptcy Courts to dismiss cases that they determined were a **substantial abuse** of the bankruptcy process. The courts used this power to dismiss cases where it determined the debtor had acted in bad faith or had the present or future ability to pay a significant portion of her current debts. In the 2005 amendments Congress reduced the standard for dismissal from “substantial abuse” to just “abuse.”

Means Testing In the 2005 act, Congress amended the Bankruptcy Code to provide for the dismissal of Chapter

7 cases—or with the debtor’s consent their conversion to Chapter 13 cases—on a finding of abuse by an individual debtor with primarily consumer debts. The abuse can be established in two ways: (1) through an un rebutted finding of abuse based on a new “means test” that is included in the Code; or (2) on general grounds of abuse, including bad faith, determined under the totality of the circumstances.

The **means test** is designed to determine the debtor’s ability to repay general unsecured claims. It has three elements: (1) a definition of “current monthly income”—which is the total income a debtor is presumed to have available; (2) a list of allowed deductions from the current monthly income for the purpose of supporting the debtor and his family and for repayment of higher priority debts; and (3) defined “trigger points” at which the income remaining after the allowed deductions would trigger the presumption of abuse. For example, if the debtor’s current monthly income after the defined deductions is more than \$166.66, the presumption of abuse arises irrespective of the amount of debt; and, if the debtor has at least \$100 per month of current monthly income after the allowed deductions (which would amount to \$6,000 over five years), then abuse is presumed if that income would be sufficient to pay at least 25 percent of the debtor’s unsecured debts over 5 years. To rebut the presumption of abuse, the debtor must show “special circumstances” that would decrease the income or increase expected expenses so as to bring the debtor’s income below the trigger points.

Debtors have to file a statement of their calculations under the means test as part of their schedule of current income and expenditures. If the presumption of abuse arises, then the court has to notify the creditors of this situation. While any party in interest generally has the right to bring a motion seeking dismissal of a Chapter 7 case for abuse, only the U.S. Trustee or bankruptcy administrator can bring the motion if the debtor’s income is below the median income in the state. Moreover, the means test presumption is inapplicable to debtors whose income is below that state median and also to certain disabled veterans.

In the case that follows, *In re Siegenberg*, the court dismissed a Chapter 7 case on the grounds it was filed in bad faith.

In re Siegenberg

2007 LEXIS 2538 (U.S.B.C., C.D. Cal. 2007)

Commencing in 2000, when she was hired by Mariah Carey, a prominent entertainer, Nicole Siegenberg worked as a costumer in the entertainment business. Her duties were to buy clothes for and costume her employer. In 2004, she lost her job with Carey and began looking for other similar employment in the entertainment industry. In order to do that she had to build

a portfolio which required purchases of clothing stock totaling \$9,273 in 2004. Siegenberg's statement of financial affairs indicates that she earned \$10,000 in 2004.

Since 2004, Siegenberg was employed only sporadically on temporary jobs such as television pilots. When employed, she earned about \$2,000 per week. Unfortunately, since 2004 she was usually unemployed. Thus, in 2005 she earned \$12,648, and in 2006 she earned \$35,253.

Siegenberg lived with her parents in her parents' condominium in Pacific Palisades. During the 2004 to 2006 period she incurred debts to, among other things, assist her parents with a property they had bought as an investment to provide income when her father was unable to continue his job; to assist a boyfriend who was a realtor with expenses on properties he was seeking to market; travel with her boyfriend and her mother to South Africa to visit her sick grandmother; assist her mother with medical expenses; and provide living expenses for herself. Some of the expenses were reimbursed to her, while others were not.

Siegenberg filed a Chapter 7 bankruptcy on November 29, 2006. Siegenberg owed \$82,597.12 in unsecured debt and \$27,664 in secured debt on her car and her boyfriend's car (a 2001 BMW and a 1999 Cadillac Escalade, respectively). The United States Trustee (UST) filed a motion to dismiss Siegenberg's Chapter 7 petition as filed in bad faith and sought a one-year bar against refiling.

Donovan, U.S. Bankruptcy Judge

In considering whether a Chapter 7 case should be dismissed because granting relief would be an abuse of the provisions of Chapter 7, courts may consider (a) whether the debtor filed the petition in bad faith; or (b) whether the totality of the circumstances of the debtor's financial situation demonstrates abuse.

A. Dismissal for Bad Faith under 707(b)(3)(A)

Section 707(b)(3) was added to the Bankruptcy Code by the Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (BAPCPA). Since BAPCPA, the Ninth Circuit has not established a standard for determining a finding of "bad faith" in Chapter 7 cases under § 707(b)(3)(A). However, a few bankruptcy courts have addressed the issue. The court in *In re Mitchell*, a Chapter 7 case, used a nine-part test borrowing both from the Ninth Circuit's pre-BAPCPA "substantial abuse" test and from Chapter 11 and 13 bad faith cases. The court in *Mitchell* considered the following nine factors in determining whether "the debtor's intention in filing bankruptcy is inconsistent with the Chapter 7 goals of providing a 'fresh start' to debtors and maximizing return to creditors" and whether the case should thus be dismissed under § 707(b)(3)(A):

1. Whether the Chapter 7 debtor has a likelihood of sufficient future income to fund a Chapter 11, 12, or 13 plan which would pay a substantial portion of the unsecured claims;
2. Whether debtor's petition was filed as a consequence of illness, disability, unemployment, or other calamity;
3. Whether debtor obtained cash advances and consumer goods on credit exceeding his or her ability to repay;
4. Whether debtor's proposed family budget is excessive or extravagant;
5. Whether debtor's statement of income and expenses misrepresents debtor's financial condition;
6. Whether debtor made eve of bankruptcy purchases;

7. Whether debtor has a history of bankruptcy petition filings and dismissals;
8. Whether debtor has invoked the automatic stay for improper purposes, such as to delay or defeat state court litigation;
9. Whether egregious behavior is present.

1. Likelihood that the Chapter 7 debtor will have sufficient future income to fund a Chapter 11 or 13 plan. Siegenberg does not currently have income to fund a Chapter 11 or 13 plan. According to the pleadings, such future income is not foreseeable. This fact supports Siegenberg's position.

2. Consequence of illness, disability, unemployment or other calamity. Siegenberg claims, in part, that the bankruptcy petition was filed as a consequence of the disability of her father. His disability and surgery in April 2006 caused financial panic in her family, in response to which her parents bought a house in the hope of remodeling it and selling it quickly at a profit. Siegenberg contributed \$35,000 to remodel that investment property under an agreement that promised her 50% of the profit. However, her parents sold the home at a loss and Siegenberg received no money in return for her investment.

Siegenberg did not experience an illness, disability, new unemployment, or other calamity. On the contrary, she provides evidence of only modest improvement in her employment status for the year 2006, not enough to match her greater expenditures. There was no change in her health status after 2004.

Further Siegenberg incurred thousands of dollars of new credit card debt on plane tickets, a car for her boyfriend, hotel stays, and other consumer items that are not convincingly attributable to any reasonably, potentially revenue-producing activities during May 2006, the month after her father's surgery and the month during which her parents purchased a house as an investment property, the alleged period of financial distress.

3. Obtaining cash advances and consumer goods on credit exceeding Siegenberg's ability to repay. Much of the argument between the two parties revolves around the question

of consumer spending. The UST argues that Siegenberg purchased luxury consumer items on credit beyond her ability to repay at the expense of her creditors. Siegenberg urges in response that various expenditures were either for business purposes or were repaid.

Siegenberg asserts that she spent approximately \$35,000 on her parent's residential investment; she repaid pre-bankruptcy almost two-thirds of the cost of the plane tickets to South Africa (\$5,500); her parents wrote a check that she forwarded to her credit card company to repay \$12,500 for the credit card charges for her mother's surgery; her expenditures on clothing were (a) a legitimate business expense and (b) some of the clothing was returned for credit; and she traveled to Mexico for the purpose of attaining a job.

On the other hand, Siegenberg provides no detail to explain \$42,775 in cash advances she received on her credit card accounts between May 2005 and October 2006. She does not provide evidence of contractor payments she claims to have made that exceeded \$19,607. She does not provide corroborating detailed evidence that during the period covered by the UST's motion she used the clothing she bought for demonstrable business purposes. Regarding her Mexican expenditures, it appears that she incurred credit card debt of more than \$6,000 before July 2006, but only about \$2,000 between July and October 2006, the period during which she claims she was interviewing for employment in Mexico. The pre-July Mexican expenditures appear to be for consumer items such as plane tickets, hotels, and restaurants for the personal pleasure of Siegenberg and her boyfriend, and Siegenberg offers no convincing evidence to persuade me otherwise.

Similarly, Siegenberg does not persuasively explain the reasonable business purpose of about \$5,500 in car-related credit card debt creating expenditures (including \$2,500 on her boyfriend's Cadillac down payment), as well as \$2,129 on restaurants, and about \$900 on hotels in Southern California, among other consumer items.

The sum of Siegenberg's justified business or personal expenditures, including contractor expenses, reimbursed tickets to South Africa, her mother's surgery, returned clothing, and spending to pursue employment in Mexico is about \$59,000. On the other hand, the sum of her unexplained and unjustified cash advances, and other credit card debt for Mexican travel spending prior to her Mexican job interviews, on cars, Southern California hotels, and unexplained clothing expenditures is about \$58,000. Further, if only the \$19,607 in contractor charges are included in her explained expenditures, instead of her uncorroborated claim that she incurred \$35,000 for such contractor charges, then her adequately explained expenditures are about \$44,000 while her unexplained expenditures would appear to be about \$73,000.

Whatever Siegenberg's business-oriented goals, her very substantial credit card charges for consumer goods and cash advances were incurred without any reasonable or foreseeable ability to repay them. I conclude, on balance, that such charges, under the circumstances, are evidence of Siegenberg's bad faith.

4. Excessive or extravagant proposed family budget. Siegenberg's budget appears to be excessive. In Schedules I and J, she claims average monthly income of \$2,466.58 and average monthly expenditures of \$5,368.60, including \$1,824 to support her parents and \$560.43 for car payments, as well as \$652 in regular business operating expenses. In light of the thousands of dollars Siegenberg charged on her credit cards monthly during 2006, as well as minimal credit card payments she was required to make, the gap between her monthly income and budget appears excessive and is suggestive of a lack of good faith on her part.

5. Statement of income and expenses misrepresenting financial condition. The UST has not alleged any misrepresentation in Siegenberg's statement of financial condition.

6. Eve of bankruptcy purchases. Siegenberg claims that in fact she made an eve of bankruptcy payment rather than purchases, \$12,500 toward her mother's surgery, militating in favor of a finding of good faith.

On the other hand, according to her Schedule F, Siegenberg opened at least three of her 11 credit cards in 2006, one in January and two in July. She owes \$7,670 on the one opened in January, \$10,925 on one opened in July, and \$6,522 on the other opened in July. Thus, in under four months of use, Siegenberg became indebted for \$17,447 on two cards that she opened within five months of filing. Also, she charged at least \$6,759 in September and October 2006, within about two months of her bankruptcy petition. These are instances of eve of bankruptcy purchases that suggest a lack of good faith under the circumstances, regardless of alleged business purpose, given the wide gaps between her earnings and her new credit card debt.

7. Bankruptcy history. Siegenberg does not have a history of bankruptcy petition filing and dismissals.

8. Improper purpose for automatic stay: state litigation. There is no evidence that Siegenberg has invoked the automatic stay for an improper purpose, such as to defeat state court litigation.

9. Egregious behavior. Siegenberg argues that rather than exhibiting egregious behavior, the facts illustrate bad financial luck. She points to the fact that she has had a hard time finding a job in the entertainment industry, though she has spent a lot of money trying; her family's real estate investment flopped; and the interviews for a job selling Mexican time shares turned out to be a waste of time. In the end, she claims that despite her

honest efforts to improve her income, she has been unlucky and, thus, is unable to pay off her debts.

Even assuming all of what Siegenberg says is true, those factors do not justify the spending detailed above. In light of her low rate of income over a three-year period preceding bankruptcy, her sizeable consumer-oriented expenditures and unexplained cash advance debt appear to be egregious under the circumstances, rather than legitimate startup business expenses.

Thus, analysis pursuant to five of nine *Mitchell* factors, factors 2, 3, 4, 6, and 9 supports a finding of a lack of good faith.

B. Dismissal under 707(b)(3)(B): Totality of the Circumstances

Additionally, dismissal would appear to be appropriate under § 707(b)(3)(B), considering the “totality of the circumstances” presented by the evidence. Bankruptcy courts that have addressed § 707(b)(3) since the enactment of BAPCPA have found that the “totality of the circumstances” tests that were applicable under the former § 707(b) remain applicable under BAPCPA. BAPCPA made changes, however, making it easier for the UST to prove a case for abuse because (a) there is no longer a presumption in favor of granting relief to a debtor, and (b) the standard for dismissal is reduced from “substantial abuse” to mere “abuse.” The *In re Price* “totality of the circumstances” test includes the following six factors:

1. Whether there is a likelihood of future income to fund debtor’s Chapter 11, 12, or 13 plan;
2. Whether the petition was filed as a consequence of illness, disability, unemployment, or other calamity;
3. Whether the schedules suggest debtor obtained cash advances and consumer goods without the ability to repay;
4. Whether debtor’s proposed family budget is excessive or extravagant;
5. Whether debtor’s papers misrepresent his or her financial condition; and
6. Whether debtor engaged in eve of bankruptcy purchases.

Here, *Price* factors 2, 3, 4, and 6 are unfavorable to Siegenberg, indicating a lack of good faith and supporting a conclusion of abuse under § 707(b)(3)(B).

1. Future income to fund a Chapter 11 or 13 plan. The UST has failed to establish that Siegenberg has a foreseeable likelihood of future income to fund a Chapter 11 or 13.

2. Consequence of illness, disability, unemployment, or calamity. This factor is unfavorable to Siegenberg because she does not present evidence that she herself experienced a grave illness, change in employment status, disability, or any other calamity that might explain the excess of her debt over her income.

3. Cash advances and consumer goods without ability to repay. As discussed above, Siegenberg incurred substantial credit card debt that might be considered business related or which may have been incurred in the attempt to improve her financial situation. However, a large portion of her credit card debt was incurred to acquire consumer goods and services and cash advances whose business purposes remain unexplained. Thus, on balance, this factor weighs against her.

4. Excessive or extravagant family budget. As discussed above, Siegenberg’s monthly income is less than half of her monthly spending, which includes \$560.43 on cars payments and \$1,824 in support of her parents. Considering her high rate of debt accumulation, her budget is excessive and suggestive of a lack of good faith.

5. Misrepresentation of financial condition. The UST has not alleged any misrepresentation in Siegenberg’s papers as to her financial condition.

6. Eve of bankruptcy purchases. As discussed above, Siegenberg opened two credit cards in July of 2006. During the four months in which those cards were in use she charged \$17,447 on those two cards alone. Further, Siegenberg purchased at least \$6,759 on various cards in September and October 2006. These facts are suggestive of a lack of good faith in her bankruptcy filing.

C. Dismissal with a One-Year Bar against Refiling

A bankruptcy court may, for cause, dismiss a bankruptcy case with a bar against later discharge of debt. A finding of bad faith based on egregious behavior can justify dismissal with prejudice. The bankruptcy court should consider the following factors when considering barring later discharge for bad faith:

1. Whether debtor misrepresented facts in her petition, unfairly manipulated the bankruptcy code, or otherwise filed in an inequitable manner;
2. Debtor’s filing history;
3. Whether debtor only intended to defeat state court litigation;
4. Whether egregious behavior is present.

Here, while egregious behavior is present, the other three factors are not. There are no allegations of misrepresentation; Siegenberg has no bankruptcy history; and there has been no mention of state court litigation. Under the egregious circumstances outlined, it would appear to be appropriate to bar Siegenberg from refiling a bankruptcy petition for at least one year, as the UST has requested.

Conclusion

Siegenberg has used her credit cards in various efforts to extricate herself and her family from financial difficulties. She also

used her credit cards for tens of thousands of dollars in personal expenditures, the purchase of consumer goods and services, and to obtain unexplained cash advances. The record contains significant evidence of these ostensibly excessive expenditures and contains only patchy, incomplete, and

unconvincing evidence that most of these expenditures were made to further Siegenberg's business efforts. **I believe it is appropriate to grant the UST's motion to dismiss Siegenberg's Chapter 7 petition, and to impose a one-year bar on future bankruptcy filings by or against Siegenberg.**

Chapter 11: Reorganizations

Reorganization Proceeding Sometimes, creditors benefit more from the continuation of a bankrupt debtor's business than from the liquidation of the debtor's property. Chapter 11 of the Bankruptcy Code provides a proceeding whereby, under the supervision of the Bankruptcy Court, the debtor's financial affairs can be reorganized rather than liquidated. Chapter 11 proceedings are available to individuals and to virtually all business enterprises, including individual proprietorships, partnerships, and corporations (except banks, savings and loan associations, insurance companies, commodities brokers, and stockbrokers). Chapter 11 cases for individuals look much like the Chapter 13 cases which are discussed later in this chapter but the amount of debt is usually much larger and it commonly is predominantly nonconsumer debt. The 2005 act created a special subclass of "small business debtors" debtors with less than \$2 million in debts and provides special rules for them, including expedited decision making.

Petitions for reorganization proceedings can be filed voluntarily by the debtor or involuntarily by its creditors. Once a petition for a reorganization proceeding is filed and relief is ordered, the court usually appoints (1) a committee of creditors holding unsecured claims, and (2) a committee of equity security holders (shareholders). Normally, the debtor becomes the "Debtor in Possession" and the responsibility for running the debtor's business. It is also usually responsible for developing a plan for handling the various claims of creditors and the various interests of persons such as shareholders.

The reorganization plan is essentially a contract between a debtor and its creditors. This contract may involve recapitalizing a debtor corporation and/or giving creditors some equity, or shares, in the corporation in exchange for part or all of the debt owed to them. The plan must (1) divide the creditors into classes; (2) set forth how each creditor will be satisfied; (3) state which claims, or classes of claims, are impaired or adversely affected by the plan; and (4) provide the same treatment to each creditor in a particular class, unless the creditors in that class consent to different treatment.

For example, when Kmart's Chapter 11 reorganization plan was accepted by its creditors and approved by the bankruptcy court in 2003, the plan called for its banks who held secured claims to receive about 40 cents on each dollar they were owed and for the holders of unsecured claims to receive new stock valued at 14.4 percent of their claim.

The Bankruptcy Code provides for an initial 120-day period after the petition is filed during which only the debtor can file a reorganization plan, and a 180-day period within which only the debtor may solicit acceptances of the plan from creditors. The bankruptcy court, in its discretion, may extend these periods. The 2005 act limits the debtor's exclusive plan proposal period to 18 months and the exclusive solicitation period to 20 months. After the initial time periods pass, creditors are free to propose plans and seek acceptance of them by other creditors. In some cases, debtors develop what is known as a **prepackaged plan** whereby the debtor solicits acceptances of the plan prior to filing for bankruptcy. The 2005 act contains a number of provisions designed to facilitate the use of such plans.

A reorganization plan must be confirmed by the court before it becomes effective. Plans can be confirmed either through the voluntary agreement of creditors or alternatively through what is known as a "cram down" whereby the court forces dissenting creditors whose claims would be impaired by a proposed plan to accept the plan when the court can find that it is fair and equitable to the class of creditors whose claims are impaired. If the plan is confirmed, the debtor is responsible for carrying it out.

However, until a plan is confirmed, the bankruptcy court has no authority to distribute any portion of the bankruptcy assets to unsecured creditors.

Confirmation through Acceptance by Creditors A court must confirm a plan if the following requirements, among others, are met:

1. Each class of creditors or interests has either accepted the plan or such class is not impaired under the plan.
2. Each impaired class of claimants has either unilaterally accepted the plan or will receive or retain

under the plan property of a value not less than the holders of the claims would receive or retain if the debtor was liquidated under Chapter 7.

3. All secured creditors have either accepted the plan or their class of creditors is not impaired under the plan.
4. If any class of claims is impaired, then at least one class of impaired claims must have voted to accept the plan. A plan is deemed accepted by a class of creditors if more than one-half the number of creditors who vote to accept the plan represent at least two-thirds of the dollar amount of allowed claims in the class.
5. The plan must be feasible. The court must be able to conclude that confirmation of the plan is not likely to be followed by the liquidation or the need for further financial reorganization of the debtor or any successor to the debtor unless the reorganization is proposed in the plan.

In addition, where the debtor is an individual, the amount of property to be distributed under the plan must not be less than the projected disposable income of the individual to be received during the period for which payments are to be made or five years, whichever is longer. Also, the debtor must have paid all domestic support obligations that became payable after the filing of the petition.

In the case below, *In re Made In Detroit*, the court was unable to conclude that a proposed plan was feasible and declined to confirm it.

Confirmation of a Plan by a Cram Down Where a class of creditors whose claims or interests are impaired does not accept the proposed plan, then the plan has not

been accepted but the court may still confirm the plan under a “cram down” if it concludes that the plan is fair and equitable to the impaired class. A plan is considered to be fair and equitable to an impaired class of *secured creditors* if the reorganization plan (1) allows the class to retain its liens securing the claims (even where the property is transferred to a third person) and each holder of a claim in the class receives deferred cash payments totaling at least the allowed amount of claim, of value of at least the value of the holder’s interest in the bankruptcy estate’s interest in the property; *or* (2) provides for the sale of any property subject to liens securing such claims free and clear of such liens with the liens to attach to the proceeds of the sale; *or* (3) provides for the realization by the holders of the “indubitable equivalent” of such claims.

A plan is considered to be fair and equitable to a *class of impaired claimants with unsecured claims* if the plan (1) provides that each holder of a claim will receive or retain on account of the claim property of a value equal to the allowed amount of such claim *or* (2) the holder of any claim that is junior to the claims of such class will not receive or retain any property on account of the junior claim or interest.

A plan is considered to be fair and equitable to a *class of interests* (such as equity holders) if (1) the plan provides that each holder of an interest in the class receives or retains property of a value equal to the greatest of the amount of any fixed liquidation preference to which the holder is entitled, any fixed redemption price to which the holder is entitled, or the value of such interest; *or* (2) the holder of any interest that is junior to the interests of such class will not receive any property on account of such junior claim.

In re Made In Detroit, Inc.

299 B.R. 170 U.S.B.C. (E.D. Mich. 2003)

In 1997, Made In Detroit, Inc., purchased approximately 410 acres of property for the purpose of development. The property is located on the Detroit River in Gibraltar and Trenton, Michigan, and is Made In Detroit’s only significant asset. For the next five years, Made In Detroit attempted to develop the property. Due to problems obtaining permits, and because Made In Detroit was not generating income, it became delinquent to secured creditors. In 2002, the primary secured creditor, Standard Federal, commenced a foreclosure action against Made In Detroit. As a result, on October 23, 2002, Made In Detroit filed for bankruptcy protection under Chapter 11 of the Bankruptcy Code.

On July 15, 2003, Made In Detroit filed its Third Amended Combined Plan and Disclosure Statement (the “Debtor’s Plan”). The Debtor’s Plan provided that it would be funded with a \$9 million loan from Kennedy Funding and that the Kennedy loan is contingent on certain conditions precedent, including the payment of a nonfundable \$270,000 commitment fee and an appraisal of the property that indicated it would have a “quick sale” value of at least \$15 million. The Kennedy commitment also provided a condition of its part; namely, that it intended to bring participants into the transaction and if it was unable to do so, it would only be obligated to refund the commitment fee less compensation for its time and expenses. The Debtor’s Plan provided that once the \$9 million loan was obtained, the secured creditors and administrative claimants would be paid in full, the unsecured creditors would receive an initial distribution of \$750,000 (with the balance of the claims to be paid from the sale of lots), and equity shareholders would retain their interest.

The Official Committee of Unsecured Creditors (the "Committee") and the Wayne County Treasurer filed objections to confirmation of the Debtor's Plan. In addition, on July 9, 2003, the Committee filed its own plan of reorganization. The Committee's Plan provided that it would be financed by an "as is" immediate cash sale of the property to the Trust for Public Land for \$4 million. Under the Plan, the Trust for Public Land would pay \$4.8 million to the Debtor's Estate to settle all claims with respect to the real property and would receive title to the property free of all liens, claims, and other encumbrances. Under the terms of the Committee's Plan, the secured creditors would be paid in full, the unsecured creditors would receive a pro rata payment (after payment of the administrative claims and higher classes of claims), and the equity shareholders would not receive any distribution nor would they retain any property interest.

Made In Detroit objected to the Committees Plan, and the Bankruptcy Court held a hearing on confirmation of both the Debtor's and the Committee's Plans.

Mclvor, Bankruptcy Judge

Debtor's Plan fails to meet the requirement that a plan must be feasible. Feasibility is a mandatory requirement for confirmation. Section 1129(a)(11) of the Bankruptcy Code provides that a plan can be confirmed only if "confirmation of the plan is not likely to be followed by the liquidation, or the need for further organization, of the debtor or any successor to the debtor under the plan, unless such liquidation or reorganization is proposed in the plan."

Section 1129(a)(11) prevents confirmation of visionary schemes which promise creditors more than the debtor can possibly attain after confirmation. A plan that is submitted on a conditional basis is not considered feasible, and thus confirmation of such a plan must be denied.

The plan does not need to guarantee success, but it must present reasonable assurance of success. To provide such reasonable assurance, a plan must provide a realistic and workable framework for reorganization. The plan cannot be based on "visionary promises"; it must be doable.

Sincerity, honesty and willingness are not sufficient to make the plan feasible, and neither are visionary promises. The test is whether the things which are to be done after confirmation can be done as a practical matter under the facts.

In re Hoffman (Bankr. D.N.D. 1985).

In *Hoffman*, the debtor's plan proposed to pay creditors within two years from the sale of real property. However, there was no potential purchaser and the plan did not set forth the terms of the proposed sale. The court found that the plan was not feasible because the proposed sale of the real estate was not "sufficiently concrete to assure either consummation within the two-years, or that even if sold within the two-year period the price obtained would be sufficient" to pay the secured creditor.

Similarly, in *In re Walker* (E.D. Va. 1994), the court also found a plan based on funding through a speculative sale of real estate was not feasible. There, the district court reversed the bankruptcy court's confirmation of a plan because the plan was not feasible. The plan proposed to pay creditors from the sale of

two parcels of real estate. However, the plan did not provide any time frame within which the properties would be sold, did not set forth the terms of the proposed sale, and did not set forth a plan for the liquidation of other properties if the proceeds from the sale of the two identified properties was insufficient to pay creditors. Based on these deficiencies, the court held that the proposed plan was not feasible.

Likewise, in *In re Thurmon* (Bankr. M.D. Fla. 1988), the court found that a plan conditioned on a sale of property which in turn was conditioned on financing was not feasible. In *Thurmon*, the plan proposed that funding would be obtained through a lease-purchase agreement. The lease-purchase agreement provided that a buyer would lease property from the debtor and would then purchase 147 acres from the debtor. The closing of the land sale was conditioned on the buyer's ability to obtain financing on favorable terms. The buyer had not yet applied for the financing but testified that he would do so within 30 days. The court found that the plan was not feasible because it was not reasonably likely that the money to fund the plan would come from the buyer.

While Debtor in this case is sincere, honest, and willing, the Debtor's Plan of Reorganization is not realistic, as it does not provide a reasonable assurance of success. The Plan is based on "wishful thinking" and "visionary promises." As a practical matter, the Debtor's Plan is not sufficiently concrete as to be feasible because it is contingent on exit financing from Kennedy and there is no reasonable assurance that the Kennedy loan will ever close or that the property will be appraised at a value high enough to provide a \$9 million loan. Like in *Hoffman*, *Walker*, and *Thurmon*, it is not reasonably likely that Debtor's Plan will be funded. The conditions precedent to Kennedy's funding of the loan were not satisfied as of the date of the confirmation hearing. Further, the evidence did not show that the satisfaction of such conditions was reasonably likely in the foreseeable future.

The \$270,000 loan commitment fee was never put into an escrow account or paid to Kennedy Funding. Even if Debtor had paid the commitment fee, there still were substantial obstacles to closing on the proposed Kennedy loan. First and

foremost, in order for Kennedy to fund the required \$9 million loan, it would need to value the property on an “as is” quick sale basis at \$15 million. The evidence did not provide any reasonable assurance that the property would be valued at this amount; in fact, the evidence showed that the property, if sold “as is,” was only worth approximately \$4.2 million.

The best evidence of the value of the property, what a reasonable buyer would pay a reasonable seller for the property, is the Trust for Public Land’s offer to purchase the property “as is” for \$4.8 million. Additional evidence that the “as is” value of the property is well below the \$15 million value needed to obtain the Kennedy financing was provided by a current appraisal prepared by Integra Realty Resources.

The Integra appraisal report, dated on September 5, 2003, indicates that the “as is” market value of the property, if marketed from nine to twelve months, was \$5,260,000. The report also stated the “disposition value” of the property, if only marketed for three to six months, was \$4,210,000. The “as is”

quick sale value as defined in the Kennedy commitment letter was based on a marketing period of “90 to 120 days,” i.e., three to six months. Thus, for Kennedy to fund the \$9 million loan proposed in Debtor’s Plan, the “disposition value” of the property would have to be at least, \$15 million. The appraiser who prepared the Integra report, Kenneth Blondell, testified at the confirmation hearing. Blondell is a certified MAI appraiser, and he was qualified as an expert. The Integra report and Blondell’s testimony provided a credible expert opinion that the disposition value of the property is only \$4.2 million.

In summary, the Debtor failed to show at confirmation that it had exit financing to fund its plan. The proposed financing had so many contingencies that Debtor’s Plan was conditional at best. Thus, the Debtor’s Plan is not feasible under 1129(a)(11), and the Court must deny confirmation of Debtor’s Plan.

The Court denied confirmation of Debtor’s Plan.

Use of Chapter 11 During the 1980s, attempts by a number of corporations to seek refuge in Chapter 11 as a means of escaping problems they were facing received considerable public attention. Some of the most visible cases involved efforts to obtain some protection against massive product liability claims and judgments for damages for breach of contract and to escape from collective bargaining agreements. Thus, for example, Johns-Manville Corporation filed under Chapter 11 because of the claims against it arising out of its production and sale of asbestos years earlier, while A. H. Robins Company was concerned about a surfeit of claims arising out of its sale of the Dalkon Shield, an intrauterine birth control device. And, in 1987, Texaco, Inc., faced with a \$10.3 billion judgment in favor of Pennzoil in a breach of contract action, filed a petition for reorganizational relief under Chapter 11. Companies such as LTV and Allegheny Industries sought changes in retirement and pension plans, and other companies such as Eastern Airlines sought refuge in Chapter 11 while embroiled in labor disputes.

In the 1990s, a number of companies that were the subject of highly leveraged buyouts (LBOs) financed with so-called junk bonds, including a number of retailers, resorted to Chapter 11 to seek restructuring and relief from their creditors. Similarly, companies such as Pan Am and TWA that were hurt by economic slowdown and increase in fuel prices filed Chapter 11

petitions. In 2001, Enron and Kmart filed for reorganization under Chapter 11 as did WorldCom and USAirways in 2002.

In recent years, Chapter 11 has been the subject of significant criticism and calls for its revision. Critics point out that many of the Chapter 11 cases are permitted to drag on for years, thus depleting the assets of the debtor through payments to trustees and lawyers involved in administration and diminishing the assets available to creditors. For example, *The Wall Street Journal* noted in a July 11, 2003, article, “The Chapter 11 restructuring of Enron, whose controversial collapse became a symbol of corporate malfeasance, has dragged on for 19 months, generating more than 11,000 court filings and nearly \$500 million in professional fees.” This took the case to the point where the company was about to file its proposed reorganization plan and seek acceptance from creditors and approval by the bankruptcy court.

In the 2005 act, Congress responded to some of these concerns by establishing tighter time frames and placing some limits or restrictions on the availability of extensions of time. Examples include the limitations on the time period in which the debtor has the exclusive right to develop a reorganization plan and special rules forcing debtors to make decisions as to whether to assume or reject unexpired leases of nonresidential property such as space in shopping centers and office buildings.

Ethics in Action

Using Bankruptcy to Manage Product Liability or to Change Labor Contracts

As noted above, in recent years a number of corporations have resorted to Chapter 11 to deal with their exposure to product liability claims or to seek changes in labor contracts. Is it ethical for a company like A. H. Robins Company that is faced with significant liability for birth-control devices it made and

sold, or for a company like Johns-Manville that faces multi-million claims from individuals who were exposed to asbestos it made to seek the protection accorded by the bankruptcy laws? Similarly, is it ethical for a company that believes it is hampered by a labor contract under which it incurs higher costs than some of its competitors to try to use a Chapter 11 proceeding to get out of the labor contract?

Special Rules for Nonresidential Real Property Lessors Under the pre-2005 act, courts were allowed to grant, and often granted, repeated extensions of the 60-day period that debtors in Chapter 11 proceedings have to either assume or reject unexpired leases of nonresidential real property. Under the 2005 revisions, debtors must assume or reject unexpired leases of nonresidential real property by the earlier of 120 days from the date the petition is filed or the date a plan is confirmed. Failure to do so in a timely way results in the lease being deemed rejected. Courts are permitted to extend the time for an additional 90 days on a showing of good cause, but any further extensions can be granted only if the lessor consents in writing. These provisions help protect landlords who have leased property to individuals or entities that subsequently filed for bankruptcy protection. They require the bankrupt to decide relatively quickly whether they will go forward with the lease and fulfill their obligation or whether they will surrender the property to the landlord so he can secure a new paying tenant.

Collective Bargaining Agreements Collective bargaining contracts pose special problems. Prior to the 1984 amendments, there was concern that some companies would use Chapter 11 reorganizations as a vehicle to avoid executed collective bargaining agreements. The concern was heightened by the Supreme Court's 1984 decision in *NLRB v. Bildisco and Bildisco*. In that case, the Supreme Court held that a reorganizing debtor did not have to engage in collective bargaining before modifying or rejecting portions of a collective bargaining agreement and that such unilateral alterations by a debtor did not violate the National Labor Relations Act.

Congress then acted to try to prevent the misuse of bankruptcy proceedings for collective bargaining purposes. The act's 1984 amendments adopt a rigorous multistep process that must be complied with in determining

whether a labor contract can be rejected or modified as part of a reorganization. Among other things that must be done before a debtor or trustee can seek to avoid a collective bargaining agreement are the submission of a proposal to the employees' representative that details the "necessary" modifications to the collective bargaining agreement and ensures that "all creditors, the debtor and all affected parties are fairly treated." Then, before the bankruptcy court can authorize a rejection of the original collective bargaining agreement, it must review the proposal and find that (1) the employees' representative refused to accept it without good cause, and (2) the balance of equities clearly favors the rejection of the original collective bargaining agreement.

Chapter 12: Family Farmers and Fishermen

Relief for Family Farmers and Fishermen Historically, farmers have been accorded special treatment in the Bankruptcy Code. In the 1978 act, as in earlier versions, small farmers were exempted from involuntary proceedings. Thus, a small farmer who filed a voluntary Chapter 11 or 13 petition could not have the proceeding converted into a Chapter 7 liquidation over his objection so long as he complied with the act's requirements in a timely fashion. Additional protection was also accorded through the provision allowing states to opt out of the federal exemption scheme and to provide their own exemptions. A number of states used this flexibility to provide generous exemptions for farmers so they would be able to keep their tools and implements.

Despite these provisions, the serious stress on the agricultural sector in the mid-1980s led Congress in 1986 to further amend the Bankruptcy Code by adding a new Chapter 12 targeted to the financial problems of the family farm. During the 1970s and 1980s, farmland

prices appreciated and many farmers borrowed heavily to expand their productive capacity, creating a large debt load in the agricultural sector. When land values subsequently dropped and excess production in the world kept farm product prices low, many farmers faced extreme financial difficulty. In the 2005 act, Chapter 12 proceedings were made available to family fishermen.

Chapter 12 is modeled after Chapter 13, which is discussed next. It is available only for family farmers and fishermen with regular income. To qualify, a farmer and spouse must have not less than 80 percent of their total noncontingent, liquidated debts arising out of their farming operations. The aggregate debt must be less than \$3,544,525 and at least 50 percent of an individual's or couple's income during the year preceding the filing of the petition must have come from the farming operation and at least 80 percent of the assets must be related to the farming operation. A corporation or partnership can also qualify, provided that more than 50 percent of the stock or equity is held by one family or its relatives and they conduct the farming operation. Again, 80 percent of the

debt must arise from the farming operation; the aggregate debt ceiling is \$3,544,525.

In the case of a family fisherman, the debtor and spouse engaged in a commercial fishing operation are eligible for relief under Chapter 12 if their aggregate debts do not exceed \$1,642,500 and not less than 80 percent of their aggregate noncontingent liquidated debts (excluding a debt for their principal residence) arise out of the commercial fishing operation. Again, a corporation or partnership can qualify so long as at least 50 percent is held by the family and relatives that conduct the fishing operation, its aggregate debts do not exceed \$1,642,500, and at least 80 percent of the aggregate noncontingent liquidated debts arise out of a commercial fishing operation.

The debtor is usually permitted to remain in possession to operate the farm or fishing vessel. Although the debtor in possession has many of the rights of a Chapter 11 trustee, a trustee is appointed under Chapter 12 and the debtor is subject to his supervision. The trustee is permitted to sell unnecessary assets, including farmland

The Global Business Environment

Transnational Insolvency Proceedings

As the volume of international trade and the number of multinational corporations have grown, there has been a concomitant increase in transnational insolvency cases. When a company engaged in international business transactions becomes insolvent, commonly some kind of insolvency proceeding will be initiated in each country where the company does business. Different laws and different national interests can produce a challenging—if not difficult—situation for creditors of the insolvent enterprise. Where and how should the creditor go about protecting its interests? Should it seek to have its claim allowed in any one—or more—of the various proceedings? What rights will it be accorded in those proceedings, particularly the foreign forums?

Historically, two different approaches have been used to deal with transnational insolvencies. The first uses the principle of “territoriality” where each country takes control of the enterprise's assets within that country and administers them according to the law of that country, giving little attention to what may be happening in other forums or to foreign interests. A second approach, often referred to as “universalism,” seeks a cooperative or coordinated approach to transnational insolvency. This might be achieved through the identification of a single forum or proceeding where all assets of a company would be administered and all claims and interests addressed.

Another variant of this approach is to identify a primary proceeding that has the lead in conjunction with a number of coordinated ancillary proceedings in other countries.

In an effort to encourage cooperation among countries and to try to harmonize the competing and conflicting schemes, the United Nations Commission on International Trade Law has adopted a Model Law on Cross-Border Insolvency. On a regional level, the European Union has adopted a “Convention on Insolvency Proceedings” to coordinate and harmonize such proceedings in EU countries. And the American Law Institute has a Transnational Insolvency Project to develop principles of cooperation in transnational insolvency cases among the members (United States, Canada, and Mexico) of the North American Free Trade Agreement (NAFTA).

The 2005 Bankruptcy Act creates a new chapter of the Bankruptcy Code to deal with cross-border cases. The new sections incorporate the Model Code of Cross-Border Insolvency. The new chapter expands the scope of U.S. bankruptcy law and provides an explicit statutory mechanism for dealing with cross-border insolvency and for the U.S. courts, trustees, and debtors to cooperate with their foreign counterparts. It provides a framework for common cross-border situations such as providing access for foreign creditors to domestic cases and for the coordination of simultaneous domestic and foreign proceedings for the same debtor so that the relief afforded in different jurisdictions is consistent.

and farming or fishing equipment, without the consent of secured creditors and before a plan is approved. However, the secured creditor's interest attaches to the proceeds of the sale.

The debtor is required to file a plan within 90 days of the filing of the Chapter 12 petition—although the bankruptcy court has the discretion to extend the time. A hearing is held on the proposed plan, and it can be confirmed over the objection of creditors. The debtor may release to any secured party the collateral that secures the claim to obtain confirmation without the acceptance by that creditor.

Unsecured creditors are required to receive at least liquidation value under the Chapter 12 plan. If an unsecured creditor or the trustee objects to the plan, the court may still confirm the plan despite the objection so long as it calls for full payment of the unsecured creditor's claim or it provides that the debtor's disposable income for the duration of the plan is applied to making payments on it. A debtor who fulfills his plan, or is excused from full performance because of subsequent hardship, is entitled to a discharge.

Chapter 13: Consumer Debt Adjustments

Relief for Individuals Chapter 13 of the Bankruptcy Code, entitled Adjustments of Debts for Individuals, gives individuals who want to avoid the stigma of a Chapter 7 bankruptcy an opportunity to pay their debts in installments under the protection of a federal court. Under Chapter 13, the debtor has this opportunity free of such problems as garnishments and attachments of her property by creditors. Only individuals with regular incomes (including sole proprietors of businesses) who owe individually (or with their spouse) liquidated, unsecured debts of less than \$336,900 and secured debts of less than \$1,010,650 are eligible to file under Chapter 13.

Procedure Chapter 13 proceedings are initiated only by the voluntary petition of a debtor filed in the Bankruptcy Court. Creditors of the debtor may not file an involuntary petition for a Chapter 13 proceeding. Commonly, the debtor files at the same time a list of his creditors as well as a list of his assets, liabilities, and executory contracts. The court then appoints a trustee.

Following the filing of the petition, the trustee calls a meeting of creditors, at which time proofs of claims are received and allowed or disallowed. The debtor is examined, and she submits a plan of payment. If the court is satisfied that the plan is proposed in good faith, meets

the legal requirements, and is in the interest of the creditors, the court approves the plan.

If the debtor's income is above the state median income for a family of the size of his family, then the plan must provide for payments over a period of five years unless all claims will be fully paid in a shorter period. In the case of a debtor whose income is less than the median income of the applicable state, the plan may not provide for payments over a period that is longer than three years unless the court, for cause, approves a longer period, which in no case can be more than five years.

The plan must provide that all of the debtor's disposable income during the applicable commitment period will be applied to make payments to unsecured creditors under the plan. Unsecured creditors must receive at least what they would receive under Chapter 7. All priority claims must be paid in full.

No plan may be approved if the trustee or an unsecured creditor objects, unless the plan provides for the objecting creditor to be paid the present value of what he is owed or provides for the debtor to commit all of his projected disposable income for the applicable period to pay his creditors.

In the case below, *In re Burt*, the court agreed with an objection raised by a creditor to confirmation of a proposed Chapter 13 plan that would cram down the creditor's secured interest.

Under the 1984 amendments, a Chapter 13 debtor must begin making the installment payments proposed in her plan within 30 days after the plan is filed. The interim payments must continue to be made until the plan is confirmed or denied. If the plan is denied, the money, less any administrative expenses, is returned to the debtor by the trustee. The interim payments give the trustee an opportunity to observe the debtor's performance and thus to be in a better position to make a recommendation about whether the plan should be approved.

Once approved, a plan may be subsequently modified on petition of a debtor or a creditor where there is a material change in the debtor's circumstances.

Suppose Curtis Brown has a monthly take-home pay of \$1,000 and a few assets. He owes \$1,500 to the credit union, borrowed for the purchase of furniture; he is supposed to repay the credit union \$75 per month. He owes \$1,800 to the finance company on the purchase of a used car; he is supposed to repay the company \$90 a month. He has also run up charges of \$1,200 on a MasterCard account, primarily for emergency repairs to his car; he must pay \$60 per month to MasterCard. His rent is \$350 per month, and food and other living expenses run him another \$425 per month. Curtis was laid off from his job for a month and fell behind on his payments to his

creditors. He then filed a Chapter 13 petition. In his plan, he might, for example, offer to repay the credit union \$50 a month, the finance company \$60 a month, and Master-

Card \$40 a month—with the payments spread over three years rather than the shorter time for which they are currently scheduled.

In re Burt

378 B.R. 352 (U.S.B.C., D. Utah 2007)

On December 31, 2005, Darin Burt purchased a 2006 Ford F-150, a pickup truck for his personal use, from LaPoint Automotive LLC. LaPoint financed the transaction through a Utah Simple Interest Retail Installment Contract. Under the contract, LaPoint retained a purchase money security interest (PMSI) in the truck. LaPoint later assigned its interest in the truck to Ford Motor Credit, which perfected its security interest by notation on the truck's title as required by the Utah Motor Vehicle Act.

The contract indicated that the cash price of the truck was \$32,630 and the total amount financed was \$45,628.14. The difference between the two amounts included charges of \$2,425 for a service contract, \$500 for gap insurance, \$298 for document preparation fee, \$1,149.46 for tax and license fees, and \$11,021.68 to pay off the obligation owed on a trade-in vehicle (2004 Ford F-150). The negative equity rolled into the transaction, therefore, was the \$11,021.68 payoff less the Burt's down payment of \$1,800 and the manufacturer's rebate of \$3,000, yielding a net negative equity of \$6,221. Because of the Burt's marginal credit, he was required to trade-in his 2004 Ford F-150 in order to qualify for financing on the new vehicle. The dealer would not have financed the purchase had Burt not agreed to all the terms of the contract, including the refinancing of negative equity.

On July 13, 2007, Burt filed a petition under Chapter 13. On August 30, 2007, Ford Motor Credit filed a proof of secured claim for its security interest in the truck in the amount of \$42,941.64. Burt filed his Chapter 13 plan on July 25, 2007, which proposed to bifurcate Ford Motor Credit's claim into a secured portion in the amount of \$28,000 and an unsecured portion in the amount of the negative equity paid off by the financing transaction. Ford Motor Credit objected to confirmation of the debtor's plan, arguing that its entire claim qualified for treatment as a secured claim and could not be bifurcated.

Thurman, U.S. Bankruptcy Judge

In order to obtain confirmation of a Chapter 13 plan, the debtor must comply with provisions of 11 U.S.C. § 1325(a). Prior to the enactment of the Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (BAPCPA), sections 506(a)(1) and 1325(a)(5)(B) allowed a Chapter 13 debtor to bifurcate an under-secured creditor's claim into secured and unsecured portions, with the result that a creditor's claim was allowed as secured only to the extent of the value of the collateral securing its debt. The portion of the creditor's claim allowed as secured would be paid in full with interest, whereas the unsecured portion of the claim would be paid pro-rata with all other general unsecured claims. This process of bifurcation is often referred to as "cram-down." BAPCPA, however, amended § 1325 to give special protection to creditors who finance automobile transactions that occur within 910 days prior to the debtors' filing for Chapter 13 relief.

Under BAPCPA, Congress added the "hanging paragraph" after § 1325(a)(9), which prevents the bifurcation of certain secured claims. It is commonly referred to as the "hanging paragraph" because it follows the numbered subsections of § 1325(a) but has no numerical designation of its own. Specifically, the hanging paragraph states:

For purposes of paragraph (5), section 506 shall not apply to a claim described in that paragraph if the creditor has a pur-

chase money security interest securing the debt that is the subject of the claim, the debt was incurred within the 910-day [sic] preceding the date of the filing of the petition, and the collateral for that debt consists of a motor vehicle (as defined in section 30102 of title 49) acquired for the personal use of the debtor, or if collateral for that debt consists of any other thing of value, if the debt was incurred during the 1-year period preceding that filing.

Thus, in order to avoid a cram-down, four conditions must be satisfied: (1) the creditor has a purchase money security interest (PMSI); (2) the debt was incurred within 910 days preceding the filing of the petition; (3) the collateral for the debt is a motor vehicle; and (4) the motor vehicle was acquired for the personal use of the debtor. If these requirements are satisfied, "then the creditor's claim is deemed fully secured" and cannot be bifurcated. The parties do not dispute that the collateral in this case was a motor vehicle, purchased within 910 days of the debtor's petition, or that it was acquired for personal use. The only requirement that is in dispute is whether Ford Motor Credit's debt is secured by a purchase money security interest. To determine this issue, the Court must first decide whether the negative equity from the trade-in vehicle that was rolled into the financing for the Truck as well as the other costs associated with the purchase constitute a purchase money security interest as defined under Utah law.

In order to address the effect of the hanging paragraph, the Court must first determine the extent to which Ford Motor Credit's security interest is a purchase money security interest. The term "purchase money security interest," as used in the hanging paragraph, is not defined in the Bankruptcy Code. Therefore, courts uniformly refer to state law, and specifically to the state's version of the Uniform Commercial Code (UCC), to determine whether a creditor holds a purchase money security interest. The applicable statute in Utah is the *Utah Code Annotated §9a-103(2)*, which provides that "[a] security interest in goods is a purchase-money security interest . . . to the extent that the goods are a purchase-money collateral with respect to that security interest. . . ." "Purchase-money collateral" is defined as "goods . . . that secures a purchase-money obligation incurred with respect to that collateral," and "purchase-money obligation" is defined as "an obligation of an obligor incurred as all or part of the price of the collateral or for value given to enable the debtor to acquire rights in or the use of the collateral if the value is in fact so used."

Whether a PMSI exists in this case, then, "turns on whether the negative equity on the debtor's trade-in vehicle constitutes 'part of the price of the collateral,' *i.e.* part of the price of the new vehicle, or whether it constitutes 'value given to enable the debtor to acquire rights in or the use of the collateral. . . .'" Although §9a-103 does not define the terms "price" or "value given," Comment 3 to §9a-103 states that "the 'price' of collateral or the 'value given to enable' includes obligations for expenses incurred in connection with acquiring rights in the collateral, sales, taxes, duties, finance charges, interest freight charges, costs of storage in transit, demurrage, administrative charges, expenses of collection and enforcement, attorney's fees, and other similar obligations."

The Court believes that this list is not exhaustive and the expenses identified in Comment 3 are merely examples or additional components of the "price of the collateral" or of "value given" by the debtor. Therefore, this Court cannot see how the refinancing of negative equity and the other transaction costs incurred in connection with the purchase of the debtor's new truck could not qualify as an "expense" within the meaning of Comment 3.

The debtor and the dealer in this case agreed that as part of the purchase of the truck and pursuant to the retail installment contract, the dealer would advance funds to payoff the lien on the debtor's trade-in vehicle and to cover tax, license and document preparation fees. Essentially, this was a package deal. Ford Motor Credit later stepped into the purchase-money lender shoes of the dealer. The Court concludes that the agreement and the dealings between the debtor and the dealer/creditor demonstrate that the costs of satisfying these outstanding obligations of the debtor were clearly incurred in connection with the purchase of the new vehicle.

Additionally, Comment 3 states that "[t]he concept of 'purchase money security interest' requires a close nexus between the acquisition of the collateral and the secured obligation." The Court finds that in the present case, there is a very close connection between the negative equity and the financing of the Debtor's new vehicle. As noted earlier, the financing transaction was a package deal where the negative equity in the trade-in was paid off by the dealer as part of its retail installment sale of the new vehicle and the related obligation was included in the Contract with the Debtor. All of the amounts financed in the contract, except the gap insurance and service contract, were directly connected to the Debtor's purchase of the new vehicle. In fact, the evidence before this Court shows that Ford Motor Credit would not have financed the total purchase price had the Debtor not agreed to all of the terms of the Contract including the negative equity and the add-on transaction costs. The Court, therefore, concludes that because of this close nexus between the negative equity and the financing of the Debtor's new vehicle, the entire transaction qualifies as a purchase money security interest.

Accordingly, Ford Motor Credit's entire claim including that portion of the claim attributable to the payoff of negative equity on the Debtor's trade-in vehicle and the other transaction costs, should be allowed as a fully secured claim that must be paid in full through the Debtor's Chapter 13 plan.

[Author's note—there is a split of authority concerning the issue in this case and at least one other court reached a different conclusion, allowing the claim to be bifurcated. See, *In re Mitchell*, 64 UCC Rep.2d 483 (U.S.B.C., M.D. Tenn. 2007).]

Discharge As soon as practicable after the completion by the debtor of all payments under the plan, the court is required to grant the debtor a discharge of all debts provided for by the plan (or specifically disallowed) except:

- Debts covered by a waiver of discharge executed by the debtor and approved by the court;
- Debts that are for taxes required to be collected or paid and for which the debtor is liable;
- Certain debts that are not dischargeable under Chapter 7 such as those that result from liabilities for obtaining

CONCEPT REVIEW

Comparison of Major Forms of Bankruptcy Proceedings

| Purpose | Chapter 7 Liquidation | Chapter 11 Reorganization | Chapter 12 Adjustments of Debts | Chapter 13 Adjustments of Debts |
|---------------------------------|---|---|---|--|
| Eligible Debtors | Individuals, and partnerships, and corporations <i>except</i> municipal corporations, railroads, insurance companies, banks, and savings and loan associations. Farmers and ranchers are eligible only if they petition voluntarily. | Generally, same as Chapter 7 except a railroad may be a debtor, and a stockbroker and commodity broker may not be a debtor under Chapter 11. | Family farmer with regular income, at least 50 percent of which comes from farming, and less than \$3,544,525 in debts, at least 80 percent of which is farm related. Family fishermen with regular income whose aggregate debts do not exceed \$1,642,500 and at least 80 percent of which arose out of the fishing operation. | Individual with regular income with liquidated unsecured debts less than \$336,900 and secured debts of less than \$1,010,650. |
| Initiation of Proceeding | Petition by debtor (voluntary). Petition by creditors (involuntary). | Petition by debtor (voluntary). Petition by creditors (involuntary). | Petition by debtor. | Petition by debtor. |
| Basic Procedure | <ol style="list-style-type: none"> 1. Appointment of trustee. 2. Debtor retains exempt property. 3. Nonexempt property is sold and proceeds distributed based on priority of claims. 4. Dischargeable debts are terminated. | <ol style="list-style-type: none"> 1. Appointment of committees of creditors and equity security holders. 2. Debtor submits reorganization plan. 3. If plan is approved and implemented, debts are discharged. | <ol style="list-style-type: none"> 1. Trustee is appointed but debtor usually remains in possession. 2. Debtor submits a plan in which unsecured creditors must receive at least liquidation value. 3. If plan is approved and fulfilled, debtor is entitled to a discharge. | <ol style="list-style-type: none"> 1. Trustee is appointed but debtor usually remains in possession. 2. Debtor submits a plan in which unsecured creditors must receive at least liquidation value. 3. If plan is approved and fulfilled, debts covered by plan are discharged. |
| Advantages | After liquidation and distribution of assets, most or all debts may be discharged and debtor gets a fresh start. | Debtor remains in business and debts are liquidated through implementation of approved reorganization plan. | Debtor generally remains in possession and has opportunity to work out of financial difficulty over period of time (usually three years) through implementation of approved plan. | Debtor has opportunity to work out of financial difficulty over period of time (usually three–five years) through implementation of approved plan. |

- money by false pretenses or false representations (see page 784 for a more complete list)
- Debts for restitution or a criminal fine included in a sentence on the debtor's conviction of a crime; or
- For restitution or damages awarded in a civil action against the debtor as a result of willful or malicious injury by the debtor that caused personal injury to an individual or the death of an individual.

A debtor who is subject to a judicial or administrative order, or, by statute, to pay a domestic support obligation, must, in addition to making the payments pursuant to his plan, certify that all amounts under the order or statute have been paid up to the date of certification in order to be entitled to a discharge.

As is the situation under Chapter 7, the court is also prohibited from granting a discharge where there is reason to believe there is a pending proceeding in which the debtor may be found guilty of a violation of the federal securities laws or is liable for a debt based on the violation of those laws.

Repeat Bankruptcies The 2005 act prohibits a court from granting a discharge of the debts provided for in the plan (or disallowed) if the debtor received a discharge in a case filed under Chapter 7, 11, or 12 of the Bankruptcy Code in the four-year period preceding the date of the

order for relief under Chapter 13—or in a case filed under Chapter 13 during the two-year period preceding the date of the order of relief in the current case.

Advantages of Chapter 13 A debtor may choose to file under Chapter 13 to avoid the stigma of bankruptcy or to retain more of his property than is exempt from bankruptcy under state or federal law. Nonexempt property would have to be surrendered to the trustee in a Chapter 7 liquidation proceeding. Chapter 13 can provide some financial discipline to a debtor as well as an opportunity to get his financial affairs back in good shape. It also gives him relief from the pressures of individual creditors so long as he makes the payments called for by the plan. The debtor's creditors may benefit by recovering a greater percentage of the debt owed to them than would be obtainable in straight bankruptcy.

Problems and Problem Cases

1. Gilbert and Kimberly Barnes filed a voluntary Chapter 7 petition in the U.S. Bankruptcy Court for the District of Maryland. Subsequently they moved to avoid a non-purchase money lien held by ITT Financial Services on their exempt "household goods." Among the goods that the Barneses were claiming as "household goods" were a videocassette recorder (VCR), a 12-gauge pump shotgun, a 20-gauge shotgun, a 30-06 rifle, and a 22 pistol. ITT contended that the VCR and the firearms were not household goods that they could exempt. Under Maryland law, household goods are items of personal property necessary for the day-to-day existence of people in the context of their homes. Should the court consider the VCR and firearms to be "household goods"?
2. In 1991 Joseph and Toni Trujillo bought a house in Las Vegas, Nevada. Subsequently, Joseph borrowed \$20,000 of his wife's savings to invest in business ventures. On November 15, 1993, the Trujillos defaulted in payment on a promissory note to Richard Hart and then entered into a stipulated agreement with him that was entered as a judgment on August 8, 1994. In May of 1994, purportedly as security to his wife for the \$20,000 loan, Joseph transferred the title to his Cadillac automobile to his son, Gilbert. Joseph instructed Gilbert to hold the title in trust until the loan was repaid. Later the Trujillos transferred to Gilbert the titles of two more vehicles, a

Pontiac and a Volkswagen, purportedly to obtain a group insurance rate. No consideration was given for the transfer of any of the vehicles, and the Trujillos retained possession and control of all three vehicles.

On August 22, 1994, the Trujillos deeded, by a quit claim deed, their house to their daughter, Valerie Aquino. The transfer was purportedly done to obtain a loan with Aquino's credit because Joseph's outstanding debts prevented him from obtaining credit in his own name. No consideration was given to the Trujillos for the transfer of the house, and the Trujillos retained both possession and control of the house. On May 16, 1995, within a year of transferring the vehicles and deeding the house, the Trujillos filed a petition for relief under Chapter 7 of the Bankruptcy Code. The Bankruptcy Trustee, Tom Grimmett, filed a complaint for fraudulent conveyance, requested denial of discharge against the Trujillos, and sought recovery of the fraudulently conveyed property from Gilbert and Aquino. Were the transfers of the vehicles and the house fraudulent transfers that could be recovered by the trustee?

3. David Hott was a college graduate with a degree in business administration who was employed as an insurance agent. He and his wife graduated from college in 1996. At the time he graduated, Hott had outstanding student loans of \$14,500 for which he was given a grace period before he had to repay them. Hott became unemployed. Bills began to accumulate, and a number of his outstanding bills were near the

credit limits on his accounts. About that time, he received a promotional brochure by mail from Signal Consumer Discount Company, offering the opportunity to borrow several thousand dollars. The Hotts decided it appeared to be an attractive vehicle for them to use to consolidate their debts. Hott went to the Signal office and filled out a credit application. He did not list the student loan as a current debt. He later claimed that someone in the office told him he didn't have to list it if he owned an automobile, but there was significant doubt about the credibility of this claim. Had he listed it, he would not have met the debt-income ratio required by Signal, and it would not have made the loan. As it was, Signal agreed to make the loan on the condition Hott pay off a car debt in order to reduce his debt-income ratio and Hott agreed to do so. On March 30, 1997, Signal loaned the Hotts \$3,458.01. On June 24, 1998, the Hotts filed for bankruptcy. Signal objected to discharge of the balance remaining on its loan on the ground it had been obtained through the use of a materially false financial statement. Was discharge of the debt barred on the ground it had been obtained through the use of a materially false financial statement?

4. In January 1990 Dr. Anthony Byrd, a dentist, applied to the Bank of Mississippi for an unsecured loan in the amount of \$20,000. Prior to this time the bank had no relationship with Dr. Byrd. The bank requested and received from Dr. Byrd a 1988 individual income tax return along with a statement of his financial condition prepared by his accountant. The bank also obtained a credit report. After considering all the information, the bank granted the loan. The promissory note was renewed on a number of occasions, beginning in July 1990. On each occasion the bank requested, and was provided, a current financial statement.

The financial statement dated June 30, 1989, showed Dr. Byrd having a net worth of approximately \$649,000. Listed in the financial statements was an asset consisting of 60 acres of real property with a value of \$30,000. In fact Dr. Byrd did not own the property, nor did he ever pay the property taxes on it. He later explained that he had listed it because he believed that it had passed to him on his father-in-law's death. The property was farmed by his brother-in-law. The statement also listed as an asset a residence in Covington County, Mississippi, with an appraised value of \$49,800. At the time the financial statement was submitted, the property had been sold to his brother on a conditional sale contract with a purchase

price of \$39,000; it also was encumbered with a deed of trust securing a \$39,000 note to the Bank of Simpson County. However, neither the conditional sales contract nor the note and deed of trust was mentioned in the financial statement. Dr. Byrd later explained that this was an "oversight." The initial credit report obtained by the bank did not mention either of these elements, so the bank had no reason to disbelieve the assertion in the statement provided by Dr. Byrd.

The initial financial statement also listed as an asset a note receivable for \$103,000 from Southern Outdoors, Inc., a company which the statement noted was 92 percent owned by Dr. Byrd. A subsequent statement listed the note receivable as \$184,000. The last statement he submitted omitted this loan; Dr. Byrd indicated that he had been told by his accountant that it should be considered as a capital contribution to Southern Outdoors rather than as an account receivable.

Dr. Byrd filed for bankruptcy under Chapter 7. The Bank of Mississippi commenced an adversary proceeding to have its claim arising out of the \$20,000 promissory note declared nondischargeable on the grounds that it had been obtained on the basis of a materially false statement in writing concerning the debtor's financial statement which the bank had relied on in granting the loan. Should the Bankruptcy Court declare the debt owed by Dr. Byrd to the Bank of Mississippi to be nondischargeable on the grounds it had been obtained on the basis of a materially false financial statement?

5. Brian Scholz was involved in an automobile collision with a person insured by The Travelers Insurance Company. At the time, Scholz was cited for, and pled no contest to, a criminal charge of driving under the influence of alcohol arising out of the accident. The Travelers paid its insured \$4,303.68 and was subrogated to the rights of its insured against Scholz. Subsequently, The Travelers filed a civil action against Scholz to recover the amount it had paid, and a default judgment was entered against Scholz. Eleven months later, Scholz sought relief from the bankruptcy court by filing a voluntary petition under Chapter 7. One of the questions in the bankruptcy proceeding was whether the debt owing to The Travelers was nondischargeable. Is the debt dischargeable?
6. Bryant filed a Chapter 7 petition on January 7, 1984. On March 8, she filed an application to reaffirm an indebtedness owed to General Motors Acceptance Corporation (GMAC) on her 1980 Cadillac automobile.

Bryant was not married, and she supported two teenage daughters. She was not currently employed, and she collected \$771 a month in unemployment benefits and \$150 a month in rental income from her mother. Her monthly house payments were \$259. The present value of the Cadillac was \$9,175; she owed \$7,956.37 on it, and her monthly payments were \$345.93. Bryant indicated that she wanted to keep the vehicle because it was reliable. GMAC admitted that Bryant had been, and continued to be, current in her payments. GMAC said that the car was in no danger of being repossessed but that, absent reaffirmation, it might decide to repossess it. Under the law at the time, permission of the court was required for a reaffirmation agreement. Should the court grant Bryant's petition to reaffirm her indebtedness to GMAC?

7. During their 12 years of marriage, Roger and Georgianne Huckfeldt accumulated over \$250,000 in debts while Roger completed college, medical school, and six years of residency in surgery and while Georgianne completed college and law school. These debts included \$166,000 in student loans to Huckfeldt and \$47,000 jointly borrowed from Georgianne's parents. The Huckfeldts divorced on March 26, 1992. The divorce decree ordered Roger to pay his student loans, one-half of the debt to Georgianne's parents, and other enumerated debts totaling some \$241,000. The decree also ordered Roger to hold Georgianne harmless for these debts but otherwise denied Georgianne's request for maintenance.

On June 4, 1992, six months before Roger would complete his residency, he filed a voluntary Chapter 7 petition, listing assets of \$1,250 and liabilities of \$546,857. After filing the petition, Roger accepted a fellowship at Oregon Health Sciences University, a one- or two-year position paying \$45,000 per year, substantially less than the income he could likely earn during the pendency of his Chapter 7 proceeding. Following Roger's petition, creditors of the debts assigned to him in the divorce decree began pursuing Georgianne for repayment. She filed for bankruptcy protection in March 1993.

In September 1992, Georgianne and her parents filed a motion to dismiss Roger's Chapter 7 petition on the ground that it was filed in bad faith. They alleged that Roger had threatened to file for bankruptcy during the divorce proceeding and had commenced the bankruptcy proceeding in defiance of the divorce decree for the purpose of shifting responsibility for assigned debts to Georgianne. They also alleged that

Roger had deliberately taken steps to reduce his annual income to avoid payment of his debts through the Chapter 7 liquidation.

After a hearing the bankruptcy court granted the motion to dismiss the proceeding on the grounds it was filed in bad faith, finding, among other things, that Roger could be earning \$110,000 to \$120,000 after expenses. The district court affirmed the decision, and Roger appealed to the court of appeals. Should Roger's Chapter 7 petition be dismissed on the grounds it was filed in bad faith?

8. The A. H. Robins Company is a publicly held company that filed a voluntary petition for relief under Chapter 11 of the Bankruptcy Code. Robins sought refuge in Chapter 11 because of a multitude of civil actions filed against it by women who alleged they were injured by use of the Dalkon Shield intrauterine device that it manufactured and sold as a birth control device. Approximately 325,000 notices of claim against Robins were received by the Bankruptcy Court.

In 1985, the court appointed the Official Committee of Security Holders to represent the interest of Robins' public shareholders. In April 1987, Robins filed a proposed plan of reorganization but no action was taken on the proposed plan because of a merger proposal submitted by Rorer Group, Inc. Under this plan, Dalkon Shield claimants would be compensated out of a \$1.75 billion fund, all other creditors would be paid in full, and the Robins stockholders would receive stock of the merged corporation. However, it being a time of other critical activity in the bankruptcy proceeding, no revised plan incorporating the merger proposal had been filed or approved.

Earlier, in August 1986, the court had appointed Ralph Mabey as an examiner to evaluate and suggest proposed elements of a plan of reorganization. On Mabey's suggestion, a proposed order was put before the district court supervising the proceeding that would require Robins to establish a \$15 million emergency treatment fund "for the purpose of assisting in providing tubal reconstructive surgery or in-vitro fertilization to eligible Dalkon Shield claimants." The purpose of the emergency fund was to assist those claimants who asserted that they had become infertile as a consequence of their use of the product. A program was proposed for administering the fund and for making the medical decisions required.

On May 21, 1987, the district court ordered that the emergency treatment fund be created. This action

was challenged by the committee representing the equity security holders. Was the court justified in ordering the distribution of some of the bankrupt's assets on an emergency basis before a reorganization plan was approved?

9. Royal Composing Room, Inc., is an advertising typography company, and one of the last unionized shops in an industry that was subjected to considerable stress as computer technology replaced the Linotype machine. Royal was a party to a collective bargaining agreement with Typographical Union No. 6. Royal was a profitable company until 1982, when its gross revenues declined by \$2 million; over the next four years, it sustained operating losses. Confronted with these difficulties, in 1983 Royal began to cut expenses by sharply cutting the compensation of its principal executives, freezing the salaries of salespeople and middle management foremen, eliminating company automobiles, and moving to a smaller location to save rent. At the start of 1986, Royal lost its largest customer, Doyle Dane Bernbach, Inc., and sought to convince the union, which theretofore had not made any sacrifices or concessions, to forgo a 3 percent wage increase agreed to earlier. When the union refused, Royal filed a petition for reorganization under Chapter 11 and sought to reject its collective bargaining agreement. Under section 1113(b) of the Bankruptcy Code, before it could reject the collective bargaining agreement, Royal was required to make a proposal to the union "which provides for those necessary modifications in the employees' benefits and protections that are necessary to permit the reorganization of the debtor and assures that all creditors, the debtor and all of the affected parties are treated fairly and equally." Royal held a meeting with officials of the union and offered a proposal that included a reduction of benefits, changes in work rules, the elimination of the scheduled wage increase, and the elimination of the union's right to arbitration as the way to change the contract. The union rejected the proposal and did not negotiate. Should the bankruptcy court approve the rejection of the collective bargaining agreement?
10. Paul Kelly was a graduate student at the University of Nebraska and had been working on his Ph.D. since 1991. He expected to complete it in 1999. He was also working as a clerk in a liquor store approximately 32 hours per week and earned \$5.85 per hour. His monthly expenses were \$743.00, and his monthly take-home pay was \$761.00. Kelly borrowed money

through student loans to enable him to pay tuition, fees, books, and other school-related expenses and expected to continue to do so until he finished his Ph.D.

On July 26, 1994, the U.S. District Court in Minnesota entered a judgment in the amount of \$30,000 against Kelly and in favor of Capitol Indemnity Corporation. The judgment was based on a misappropriation of funds by Kelly from a bank insured by Capitol. The court's order provided that the judgment was not dischargeable in bankruptcy.

Kelly filed a Chapter 13 petition. In his Chapter 13 plan, Kelly proposed to pay a total of \$7,080.00 by paying off \$118.00 per month, \$100.00 of which would come from student loans. In the proceeding, Kelly testified that, among other things, he was currently qualified to teach at the college or university level and could earn about \$20,000 but he preferred to work part-time as a clerk while he completed graduate school. Capitol objected to the proposed plan on the grounds it was not proposed in good faith. Capitol contended that Kelly should not be allowed to languish in graduate school, remain underemployed, and obtain the benefit of a Chapter 13 discharge. Capitol asserted that Kelly was attempting to discharge a debt that was nondischargeable under Chapter 7, proposed to make payments primarily from his student loans, and would be paying a dividend to unsecured creditors of only 8½ percent. These factors, Capitol contended, demonstrated that the plan had not been proposed in good faith and that it should not be confirmed. Should confirmation of Kelly's plan be denied on the grounds it was not proposed in good faith?

Commercial Paper

chapter 3 I

NEGOTIABLE INSTRUMENTS

Chances are that you are using a variety of negotiable instruments in your everyday life, perhaps without realizing the special qualities that have led to their widespread use in commerce and the rules that govern them. If you have a job, your employer probably pays you by check, and you likely have a checking account that you use to make purchases and pay your bills. If you have accumulated some savings, you may have invested them in a certificate of deposit at a bank. And, if you have borrowed money, you very likely were asked to sign a promissory note acknowledging the debt and committing to repay it on specified terms. This chapter introduces the law of negotiable instruments, including:

- The special qualities and benefits of negotiable instruments.
- The basic types of commercial paper and their defining characteristics.
- The formal requirements that must be met for instruments such as checks, notes, and certificates of deposit to qualify as negotiable instruments.
- What happens if you write or receive a check in which there is a conflict between the amount set forth in figures and the amount set out in words.
- Whether it was ethical for the purchaser of two engines to deliberately place two different amounts on a check (one figure using a check-writing machine and the other by writing numerals in handwriting) that was sent in payment for the engines.

AS COMMERCE AND TRADE developed, people moved beyond exclusive reliance on barter to the use of money and then to the use of substitutes for money. The term *commercial paper* encompasses substitutes in common usage today such as checks, promissory notes, and certificates of deposit.

History discloses that every civilization that engaged to an appreciable extent in commerce used some form of commercial paper. Probably the oldest commercial paper used in the carrying on of trade is the promissory note. Archaeologists found a promissory note made payable to bearer that dated from about 2100 B.C. The merchants of Europe used commercial paper—which, under the law merchant, was negotiable—in the 13th and 14th centuries. Commercial paper does not appear to have been used in England until about A.D. 1600.

This chapter and the three following chapters outline and discuss the body of law that governs commercial paper. Of particular interest are those kinds of commercial paper having the attribute of *negotiability*—that is,

they can generally be transferred from party to party and accepted as a substitute for money. This chapter discusses the nature and benefits of negotiable instruments and then outlines the requirements an instrument must meet to qualify as a negotiable instrument. Subsequent chapters discuss transfer and negotiation of instruments, the rights and liabilities of parties to negotiable instruments, and the special rules applicable to checks.

Nature of Negotiable Instruments

When a person buys a television set and gives the merchant a check drawn on his checking account, that person uses a form of negotiable commercial paper. Similarly, a person who goes to a bank or a credit union to borrow money might sign a promissory note agreeing to pay the money back in 90 days. Again, the bank and borrower use a form of negotiable commercial paper.

Commercial paper is basically a *contract for the payment of money*. It may serve as a substitute for money payable immediately, such as a check. Or, it can be used as a means of extending credit. When a television set is bought by giving the merchant a check, the check is a substitute for money. If a credit union loans a borrower money now in exchange for the borrower's promise to repay it later, the promissory note signed by the borrower is a means of extending credit.

Uniform Commercial Code The law of commercial paper is covered in Article 3 (Negotiable Instruments) and Article 4 (Bank Deposits and Collections) of the Uniform Commercial Code. Other negotiable documents, such as investment securities and documents of title, are treated in other articles of the Code. The original Code Articles 3 and 4, adopted initially in the 1960s, generally followed the basic, centuries-old rules governing the use of commercial paper; but at the same time they adopted modern terminology and coordinated, clarified, and simplified the law. However, business practices continued to evolve and new technological developments have changed the way that banks process checks. Accordingly, in 1990 a Revised Article 3, along with related amendments to Articles 1 and 4, were developed and have now been adopted by all states except New York. However, the reader should keep in mind that instruments may be interpreted under the version of the Code that was in effect when the instruments were issued.

Negotiable Instruments The two basic types of negotiable instruments are *promises to pay money* and *orders to pay money*. Promissory notes and certificates of deposit issued by banks are promises to pay someone money. Checks and drafts are orders to another person to pay money to a third person. A check, which is a type of draft, is an order directed to a certain kind of person, namely a bank, to pay money from a person's account to a third person.

Negotiability Negotiable instruments are a special kind of commercial paper that can pass readily through our financial system and is accepted in place of money. This gives negotiable instruments many advantages.

For example, Searle, the owner of a clothing store in New York, contracts with Amado, a swimsuit manufacturer in Los Angeles, for \$10,000 worth of swimsuits. If negotiable instruments did not exist, Searle would have to send or carry \$10,000 across the country, which would be both inconvenient and risky. If someone stole the money along the way, Searle would lose the \$10,000

unless he could locate the thief. By using a check in which Searle orders his bank to pay \$10,000 from his account to Amado, or to someone designated by Amado, Searle makes the payment in a far more convenient manner. He sends only a single piece of paper to Amado. If the check is properly prepared and sent, sending the check is less risky than sending money. Even if someone steals the check along the way, Searle's bank may not pay it to anyone but Amado or someone authorized by Amado. And, because the check gives Amado the right either to collect the \$10,000 or to transfer the right to collect it to someone else, the check is a practical substitute for cash to Amado as well as to Searle.

In this chapter and in the three following chapters, we discuss the requirements necessary for a contract for the payment of money to qualify as a negotiable instrument. We also explain the features that not only distinguish a negotiable instrument from a simple contract but also led to the widespread use of negotiable instruments as a substitute for money.

Kinds of Negotiable Instruments

Promissory Notes The promissory note is the simplest form of commercial paper; it is simply a promise to pay money. A **promissory note** is a two-party instrument in which one person (known as the **maker**) makes an unconditional promise in writing to pay another person (the **payee**), a person specified by that person, or the bearer of the instrument, a fixed amount of money, with or without interest, either on demand or at a specified, future time [3–104].¹

The promissory note, shown in Figures 1 and 2, is a credit instrument; it is used in a wide variety of transactions in which credit is extended. For example, if a person purchases an automobile using money borrowed from a bank, the bank has the person sign a promissory note for the unpaid balance of the purchase price. Similarly, if a person borrows money to purchase a house, the lender who makes the loan and takes a mortgage on the house has the person sign a promissory note for the amount due on the loan. The note probably states that it is secured by a mortgage. The terms of payment on the note should correspond with the terms of the sales contract for the purchase of the house.

¹The numbers in brackets refer to the sections of the 1990 Revised Article 3 (and the conforming amendments to Articles 1 and 4) of the Uniform Commercial Code.

Certificates of Deposit The certificate of deposit given by a bank or a savings and loan association when a deposit of money is made is a type of note, namely a note of a bank. A **certificate of deposit** is an instrument containing (1) an acknowledgment by a bank that it has received a deposit of money and (2) a promise by the bank to repay the sum of money [3–104(j)].

Most banks no longer issue certificates of deposit (CD) in paper form. Rather, the bank maintains an electronic deposit and provides the customer with a statement indicating the amount of principal held on a CD basis and the terms of the CD, such as the maturity and interest rate. In these instances, the certificate of deposit is not in negotiable instrument form.

Drafts A **draft** is a form of commercial paper that involves an *order* to pay money rather than a promise to pay money [3–104(e)]. The most common example of a draft is a check. A draft has three parties to it: one person (known as the **drawer**) orders a second person (the **drawee**) to pay a certain sum of money to a third person (the **payee**), to a person specified by that person, or to bearer.

Drafts other than checks are used in a variety of commercial transactions. If Brown owes Ames money, Ames may draw a draft for the amount of the debt, naming Brown as drawee and herself or her bank as payee, and send the draft to Brown’s bank for payment. Alternatively, Ames might send a draft providing for payment on a certain day in the future to Brown for “acceptance.” Brown could “accept” the draft by signing his name to it, thereby obligating himself to pay the amount specified in the draft on that day in the future to Ames or to someone specified by Ames. Automobile dealers selling to each other, or selling cars at auctions, commonly use drafts, as do sellers and buyers of livestock.

In freight shipments in which the terms are “cash on delivery,” the seller commonly ships the goods to the buyer on an “order bill of lading” consigned to himself at the place of delivery. The seller then indorses the bill of lading and attaches a draft naming the buyer as drawee. He then sends the bill of lading and the draft through banking channels to the buyer’s bank. A bank in the buyer’s locale presents the draft to the buyer’s bank for payment, and when the former bank receives payment, delivers the bill of lading to the buyer. Through this commercial transaction, the buyer gets the goods and the seller gets his money.

When credit is extended, the same procedure is followed, but the seller uses a time draft—a draft payable at some future time (see Figure 3). In such a transaction, the buyer “accepts” the draft (instead of paying it) and obligates herself to pay the amount of the draft when due. In these cases, the *drawee* (now called the **acceptor**) should date her signature so that the date at which payment is due is clear to all [3–409(c)].

As a consumer, you are most likely to encounter drafts when your insurance company pays a claim—you’ll see that often it is denoted as a “DRAFT” and indicates that it is payable through a particular bank. This notation means that the bank will pay the draft to you only after it has checked with the insurance company (the drawer) and the insurance company authorizes the bank to pay the instrument.

Checks A **check** is a *draft payable on demand* and drawn on a bank (i.e., a bank is the drawee or person to whom the order to pay is addressed). Checks are the most widely used form of commercial paper. The issuer of a check orders the bank at which she maintains an account to pay a specified person, or someone designated by that person, a fixed amount of money from the
