 Payee 30 months from today, I promise to pay to the order of (The National Bank of Washington) Seventy-Eight Hundred Seventy Five and no/100 _____ dollars (\$ 7,875.00).

Responsibility
 Although this note may be signed below by more than one person, I understand that we are each as individuals responsible for paying back the full amount.

Breakdown of Loan
 This is what I will pay:

| | |
|-------------------------------------|-----------------------|
| Amount of loan | 1. \$ <u>6,800.00</u> |
| Credit Life Insurance (optional) | 2. \$ <u>100.00</u> |
| Other (describe) | 3. \$ <u>-0-</u> |
| Amount Financed (Add 1 and 2 and 3) | 4. \$ <u>6,900</u> |
| FINANCE CHARGE | 5. \$ <u>975.00</u> |
| Total of Payments (Add 4 and 5) | \$ <u>7,875.00</u> |
| ANNUAL PERCENTAGE RATE | <u>10.5%</u> |

Repayment
 This is how I will repay:
 I will repay the amount of this note in 30 equal uninterrupted monthly installments of \$ 262.50 each on the 1st day of December, 2010 and ending on May 1, 2013

Prepayment
 I have the right to prepay the whole outstanding amount of this note at any time. If I do, or if this loan is refinanced—that is, replaced by a new note—you will refund the unearned finance charge, figured by the rule of 78—a commonly used formula for figuring rebates on installment loans.

Late Charge
 Any installment not paid within ten days of its due date shall be subject to a late charge of 5% of the payment, not to exceed \$5.00 for any such late installment.

Security
 To protect the National Bank of Washington, I give what is known as a security interest in my auto and/or other: (Describe) Ford Thunderbird
 # Serial # 115117-12-
 See the security agreement.

Credit Life Insurance
 Credit life insurance is not required to obtain this loan. The bank need not provide it and I do not need to buy it unless I sign immediately below. The cost of credit life insurance is \$ 100.00 for the term of the loan.

Signed: A. J. Smith
 Date: November 21, 2010

Default
 If for any reason I fail to make any payment on time, I shall be in default. The bank can then demand immediate payment of the entire remaining unpaid balance of this loan, without giving anyone further notice. If I have not paid the full amount of the loan when the final payment is due, the bank will charge me interest on the unpaid balance at six percent (6%) per year.

Right of Offset
 If this loan becomes past due, the bank will have the right to pay this loan from any deposit or security I have at this bank without telling me ahead of time. Even if the bank gives me an extension of time to pay this loan, I still must repay the entire loan.

Collection Fees
 If this note is placed with an attorney for collection, then I agree to pay an attorney's fee of fifteen percent (15%) of the unpaid balance. This fee will be added to the unpaid balance of the loan.

Co-borrowers
 If I am signing this note as a co-borrower, I agree to be equally responsible with the borrower for this loan. The bank does not have to notify me that this note has not been paid. The bank can change the terms of payment and release any security without notifying or releasing me from responsibility for this loan.

Copy Received
 I received a completely filled in copy of this note. If I have signed for Credit Life Insurance, I received a copy of the Credit Life Insurance certificate.

account. For example, Elizabeth Brown has a checking account at the National Bank of Washington. She goes to Sears Roebuck and agrees to buy a washing machine priced at \$459.95. If she writes a check to pay for it, she is the drawer of the check, the National Bank of Washington is the drawee, and Sears is the payee. By

writing the check, Elizabeth is ordering her bank to pay \$459.95 from her account to Sears or to Sears's order—that is, to whomever Sears asks the bank to pay the money (see Figure 4).

An instrument may qualify as a “check” and be governed by Article 3 even though it is described on its face

E-Checks

In addition to checks, electronic funds transfers through the use of ATMs or in retail stores, and telephone-initiated checks, larger retailers such as grocers and department stores use e-commerce instead of traditional paper checks. This process, called “check conversion,” starts with the buyer giving the seller a paper check. The seller uses special equipment to gather information from the paper check; this information includes the buyer’s bank

account number, the “routing number” that identifies the buyer’s bank, and the check’s serial number. Then, the seller hands the paper check back to the buyer and completes the transaction by naming itself as the payee of the transaction and by coding in the amount of the purchase. Check conversion is one of the fastest-growing means of taking payments from consumer buyers and saves the seller time and money it otherwise would spend collecting the paper check from the buyer’s bank. The legal rules concerning e-checks are discussed in Chapter 34—Checks and Electronic Transfers.

by another term, such as “money order.” The Code definition of a “check” includes a “cashier’s check” and a “teller’s check.” A **cashier’s check** is a draft on which the drawer and drawee are the same bank (or branches of the same bank); a **teller’s check** is a draft drawn by a bank (as drawer) on another bank or payable at or through a bank [3–104(g) and (h)]. For example, a check drawn by a credit union on its account at a federally insured bank would be a teller’s check.

Benefits of Negotiable Instruments

Rights of an Assignee of a Contract As we noted in Chapter 17, Rights of Third Parties, the assignee of a contract can obtain no greater rights than the assignor had at the time of the assignment. For example, Browning Construction Company agrees to build an in-ground swimming pool pursuant to plans provided by Geraldo Garcia. At the time the contract is signed by the two parties on March 1, Garcia makes a down payment of \$5,000 and agrees to pay the balance of \$20,000 when Browning Construction completes the pool. If on April 1, Browning Construction assigns its rights under the contract to First Bank—including the right to collect the money from Garcia—then First Bank will obtain whatever rights Browning Construction has at the time First Bank seeks to collect the balance due on the contract. If Browning Construction has completed its work consistent with the plans, then First Bank is entitled to be paid the \$20,000. However, if the work has not been completed, or was not done consistent with the plans, then Garcia may have a valid defense or reason to avoid paying the full \$20,000.

Taking an assignment of a contract involves assuming certain risks. The assignee (First Bank) may not be aware of the nature and extent of any defenses that the party liable on the contract (Garcia) might have against the assignor (Browning Construction). An assignee who does not know what rights he is getting, or which risks he is assuming, may be reluctant to take an assignment of the contract.

Rights of a Holder of a Negotiable Instrument The object of a negotiable instrument is to have it accepted readily as a substitute for money. In order to accept it readily, a person must be able to take it free of many of the risks assumed by the assignee of a regular contract. Under the law of negotiable instruments, this is possible if two conditions are met: (1) the contract for the payment of money must meet the formal

requirements to qualify as a negotiable instrument; and (2) the person who acquires the instrument must qualify as a holder in due course. Basically, a *holder in due course* is a person who has good title to the instrument, paid value for it, acquired it in good faith, and had no notice of certain claims or defenses against payment. In addition, the instrument cannot bear facial irregularities (evidence of forgery or alteration or questions concerning its authenticity).

The next section of this chapter discusses the formal requirements for a negotiable instrument. Chapter 32, Negotiation and Holder in Due Course, outlines the requirements that a person must meet to qualify as a holder in due course.

A holder in due course of a negotiable instrument takes the instrument free of all defenses and claims to the instrument except those that concern its validity. For example, a holder in due course of a note given in payment for goods may enforce the obligation in spite of the buyer’s claim that the seller breached a warranty. However, if the maker of a note wrote it under duress, such as a threat of force, or was a minor, then even a holder in due course is subject to the defenses of duress or infancy to the extent other law (1) would nullify the obligation for duress or (2) would permit infancy as a defense to a simple contract. The person who holds the note could not obtain the payment from the maker but would have to recover from the person from whom he got the note.

The Federal Trade Commission (FTC) has adopted a regulation that alters the rights of a holder in due course in consumer purchase transactions. This regulation allows a consumer who gives a negotiable instrument to use additional defenses (breach of warranty or fraudulent inducement) against payment of the instrument against even a holder in due course. Similarly, some states have enacted the Uniform Consumer Credit Code (UCCC), which produces a similar result. Chapter 32, Negotiation and Holder in Due Course, discusses the rights of a holder in due course, as well as the FTC rule.

Formal Requirements for Negotiability

Basic Requirements An instrument such as a check or a note must meet certain formal requirements to be a negotiable instrument. If the instrument does not meet these requirements, it is nonnegotiable; that is, it is treated as a simple contract and not as a negotiable instrument. A primary purpose for these formal requirements is to ensure the willingness of prospective

purchasers of the instrument, particularly financial institutions such as banks, to accept it as a substitute for money.

For an instrument to be negotiable, it must:

1. Be in writing.
2. Be signed by the issuer (the *maker* in the case of a person undertaking to pay or the *drawer* in the case of a person giving an order or instruction to pay).
3. Contain an unconditional promise or order to pay a fixed amount of money, with or without interest or other charges described in the promise or order.
4. Be payable to order or to bearer.
5. Be payable on demand or at a definite time.
6. Not state any other undertaking or instruction by the person promising or ordering to do any act in addition to the payment of money (however, it may contain (a) an undertaking or promise relative to collateral to secure payment, (b) an authorization for confession of judgment, or (c) a waiver of benefit of any law intended for the advantage or protection of an obligor) [3–103; 3–104].

In addition, an instrument that otherwise qualifies as a check can be negotiable even if it is not explicitly payable to order or to bearer [3–104(c)]. As explained later, this means that a check that reads “pay John Doe” could be negotiable even though the normal form for a check is “pay to the order of _____.”

A promise or order other than a check is not a negotiable instrument if at the time it is issued or first comes into the possession of a holder it contains a conspicuous statement that the promise or order is not negotiable or is not an instrument governed by Article 3 [3–104(d)]. For example, if a promissory note contained the legend “NONNEGOTIABLE,” it would not qualify as a negotiable instrument even if it otherwise met the formal requirements for one.

Importance of Form Whether or not an instrument satisfies these formal requirements is important only for the purpose of determining whether an instrument is negotiable or nonnegotiable. Negotiability should not be confused with validity or collectibility. If an instrument is negotiable, the law of negotiable instruments in the Code controls in determining the rights and liabilities of the parties to the instrument. If an instrument is nonnegotiable, the general rules of contract law control. The purpose of determining negotiability is to ascertain whether a possessor of the instrument can become a holder in due course.

An instrument that meets all of the formal requirements is a negotiable instrument even though it is void, voidable, unenforceable, or uncollectible for other reasons. Negotiability is a matter of form and nothing else. Suppose a person gives an instrument in payment of a gambling debt in a state that has a statute declaring that any instrument or promise given in payment of a gambling debt is void. The instrument is a negotiable instrument if it is negotiable in form even though it is absolutely void. Also, an instrument that is negotiable in form is a negotiable instrument even though it is issued by a minor. The instrument is voidable at the option of the minor if state law makes infancy a defense to a simple contract, but it is negotiable.

In Writing

To be negotiable, an instrument must be in writing. An instrument that is handwritten, typed, or printed is considered to be in writing [1–201(46)]. The writing does not have to be on any particular material; all that is required is that the instrument be in writing. A person could create a negotiable instrument in pencil on a piece of wrapping paper. It would be poor business practice to do so, but the instrument would meet the statutory requirement that it be in writing.

Signed

To qualify as a negotiable instrument, an instrument in the form of a note must be signed by the person undertaking to pay (the maker) and an instrument in the form of a draft must be signed by the person giving the instruction to pay (the drawer) [3–103]. An instrument has been signed if the maker or drawer has put a name or other symbol on it with the intention of validating it [3–401(b)]. Normally, the maker or drawer signs an instrument by writing his name on it; however, this is not required. A person or company may authorize an agent to sign instruments for it. A typed or rubber-stamped signature is sufficient if it was put on the instrument to validate it. A person who cannot write her name might make an X or some other symbol and have it witnessed by someone else.

In the *Interbank of New York* case, which follows, the court considered whether preauthorized checks containing the notation “verbally authorized by your depositor” met the requirement that an instrument must be “signed,” among other things, in order to qualify as a negotiable instrument.

Interbank of New York v. Fleet Bank 45 UCC Rep.2d 167 (New York Civ. Ct. 2001)

Interbank of New York brought an action against Fleet Bank to recover on four drafts in the total sum of \$3,361.25 paid out by Interbank from the account of its customer Dimittrous Tasoulis. Two of the drafts were issued by and made payable to Sprint PCS, and two were issued by and made payable to Atlantic Mobile, Inc. The drafts are known commonly in the banking industry as preauthorized drafts or “telechecks.” The drafts are created when a consumer has agreed to pay for goods or services by allowing a vendor to prepare and issue a preauthorized check drawn on the consumer’s account at the consumer’s designated financial institution. The consumer provides the vendor with the necessary account number and bank at which it is maintained, and the vendor then issues a check drawn on the consumer’s account.

In this case, Sprint and Atlantic Mobile issued drafts on the account of Tasoulis to pay for telephone services. The drafts contained the typed notation “verbally authorized by your depositor.” Bell and Atlantic Mobile deposited the drafts in their respective accounts at Fleet, and the drafts were ultimately paid by Interbank.

Thereafter, Tasoulis advised Interbank that he had never authorized Atlantic Mobile or Sprint to issue the drafts and executed affidavits to that effect as to each draft. Interbank then sued Fleet Bank to recover the amount of the drafts.

Fleet took the position that the preauthorized checks should be treated like any other check and that in accordance with the UCC a depository bank such as Fleet could not be held liable for accepting a check on which the signature of the drawer is forged, unless it knew the signature was forged (this will be discussed in Chapter 33, Liability). Interbank took the position that a preauthorized check cannot be treated as an ordinary check and is not a negotiable instrument.

Edmead, Judge

Section 3–104(a) of the UCC provides that for a writing to be a negotiable instrument it must be signed by the maker or drawer. Interbank argues that since the subject drafts are not signed by the maker, but merely contain the notation “verbally authorized by your depositor,” the drafts do not constitute negotiable instruments.

UCC section 1–201(3) provides that “signed” includes any symbol executed or adopted by a party with a present intention to authenticate a writing. UCC section 3–401(2) provides that a signature is made by any word or mark used in lieu of a written signature.

In accordance with these sections of the UCC, if a drawer or maker intended the notation “verbally authorized by your depositor” to authenticate the checks and intended that the notation take the place of a written signature, then the check would be a negotiable instrument.

Clearly, if Tasoulis had authorized Atlantic Mobile to issue the check with the notation “verbally authorized by your depositor,” in place of his written signature, the check would qualify

as a negotiable instrument. The only infirmity in the subject drafts is that Tasoulis did not authorize their issuance. Thus, the notation “verbally authorized by your depositor,” which could constitute a signature under the UCC, is unauthorized.

The unauthorized use of a stamped printed signature constitutes a forgery. So too here the notation “verbally authorized by your depositor,” which can constitute a signature under the UCC, when unauthorized, constitutes a forged signature. Accordingly, the preauthorized checks should be treated as any other check that contains a forged signature. These preauthorized checks constitute negotiable instruments.

Summary judgment granted to Fleet.

Note: The case did not address the issue of whether Atlantic Mobile and Sprint would be liable to Interbank if they did not have the proper authorization from Tasoulis. It should also be noted that this case was decided under the pre-1990 version of Articles 3 and 4 as New York has not adopted the 1990 Revision of Articles 3 and 4. However, the same result would be expected if it had adopted the Revised Articles.

Unconditional Promise or Order

Requirement of a Promise or Order If an instrument is promissory in nature, such as a note or a certificate of deposit, it must contain an unconditional promise to pay or it cannot be negotiable. Merely acknowl-

edging a debt is not sufficient [3–103(9)]. For example, the statement “I owe you \$100” does not constitute a promise to pay. An IOU in this form is not a negotiable instrument.

If an instrument is an order to pay, such as a check or a draft, it must contain an unconditional order. A simple request to pay as a favor is not sufficient; however, a politely phrased demand, such as “please pay,” can meet the

CYBERLAW IN ACTION

E-Payments Compared to “Negotiable Instruments”

Article 3 has numerous requirements for the appearance and content of promises to pay (notes) and orders to pay (drafts/checks) if they are to qualify as negotiable instruments and be readily transferable. Two of these requirements contemplate paper-based transactions—the requirement that promises to pay and orders to pay be “in writing” (see 3–103) and be “signed” (see 3–104). For this reason, at present, it would be difficult to “electrify” negotiable instruments successfully.

In contrast, e-payments—more commonly substitutes for traditional “check” payments—are neither in writing or “signed” by affixing a signature in ink to a sheet of paper. Instead, the transaction is documented electronically—such as by sending an e-mail message or fax to a bank to direct them to pay a third-party seller of goods or services (such as the purchase of an online information product).

The buyer and seller using e-payments have many of the same concerns as buyers and sellers using traditional payments methods: they want to be certain that they are dealing with each other honestly and that it will not be easier for the seller to double-charge the buyer’s account or to get away with taking payment but not delivering the goods or services that the buyer seeks from the transaction; and they want to guard against unscrupulous persons hacking into their records and stealing from either the buyer or seller. Because of legal uncertainty about which body of law—federal consumer protection laws designed to govern credit-card payments or “electronic funds transfers” or state-created laws such as Articles 3 and 4 of the Uniform Commercial Code—will govern the transaction, the majority of consumers have continued to use traditional, paper-based payments methods and credit cards that they understand better than newer e-payments methods of payment. For e-commerce to reach its fullest potential, more consumers will have to become comfortable with e-payments methods, in addition to better-known checks and credit cards.

requirement. Checks commonly use the language “Pay to the order of.” This satisfies the requirement that the check contain an order to pay. The order is the word “pay,” not the word “order.” The word “order” has another function—that of designating the instrument as payable “to order” or “to bearer” for purposes of negotiability.

Promise or Order Must Be Unconditional An instrument is not negotiable unless the promise or order is unconditional. For example, a note that provides, “I promise to pay to the order of Karl Adams \$100 if he replaces the roof on my garage,” is not negotiable because it is payable on a condition.

To be negotiable, an instrument must be written so that a person can tell from reading the instrument alone what the obligations of the parties are. If a note contains the statement “Payment is subject to the terms of a mortgage dated November 20, 2010,” it is not negotiable. To determine the rights of the parties on the note, one would have to examine another document—the mortgage.

However, a reference to another document for a statement of rights with respect to collateral, prepayment, or acceleration does not destroy the negotiability of a note [3–106(b)]. For example, a note could contain this statement: “This note is secured by a mortgage dated August 30, 2010” without affecting its negotiability. In this case, the mortgage does not affect rights and duties of

the parties to the note. It would not be necessary to examine the mortgage document to determine the rights of the parties to the note; the parties need only examine the note.

The negotiability of an instrument is not affected by a statement of the consideration for which the instrument was given or by a statement of the transaction that gave rise to the instrument. For example, a negotiable instrument may state that it was given in payment of last month’s rent or that it was given in payment of the purchase price of goods. The statement does not affect the negotiability of the instrument.

A check may reference the account to be debited without making the check conditional and thus nonnegotiable. For example, a check could contain the notation, “payroll account” or “petty cash.” Similarly, the account number that appears on personal checks does not make the instrument payable only out of a specific fund. Under original Article 3, a check (other than a governmental check) that stated that it was payable only out of a specific fund or account was treated as a conditional order and thus was not negotiable. Revised Article 3 changed this rule so that limiting payment to a particular fund or source does not make the promise or order conditional [3–106(b)].

Revised Article 3 also addresses the negotiability of traveler’s checks that commonly require, as a condition to payment, a countersignature of a person whose

specimen signature appears on the draft. Under the revision, the condition does not prevent the instrument from meeting the “unconditional promise or order” requirement [3–106(c)]. However, if the person whose specimen signature appears on the instrument fails to countersign it, the failure to sign becomes a defense to the obligation of the issuer to pay. This concept will be discussed in the following chapter.

A conditional *indorsement* does not destroy the negotiability of an otherwise negotiable instrument. The Code determines negotiability at *issuance*, so that indorsements do not affect the underlying negotiability of the instrument. We discuss conditional indorsements in Chapter 32, Negotiation and Holder in Due Course.

Fixed Amount of Money

Fixed Amount The promise or order in an instrument must be to pay a fixed amount of money, with or without interest or other charges described in the promise or order. The requirement of a “fixed amount” applies only to principal; the amount of any interest payable is that described in the instrument. Interest may be stated in an instrument as a fixed or variable amount of money or it may be expressed as a fixed or variable rate or rates. If a variable rate of interest is prescribed, the amount of interest is calculated by reference to the formula or index referenced in the instrument. For example, a note might provide for interest at “three percent (3.00%) over JPMorgan Chase Prime Rate to be adjusted monthly.” If the description of interest in the instrument does not allow the amount of interest to be ascertained, then interest is payable at the judgment rate in effect at the place of payment at the time interest first accrues [3–112]. The judgment rate is the rate of interest courts impose on losing parties until they pay the winning parties.

Under the original version of Article 3, a promise or order had to be to pay a “sum certain.” Generally, to meet this requirement, a person had to be able to compute from the information in the instrument the amount required to discharge—or pay off—the instrument at any given time. Among other things, this caused problems when applied to variable rate instruments that came into common commercial usage in the United States after the original Article 3 was drafted. Some state courts held that instruments providing for variable interest rates ascertainable through reference to indexes outside the instrument were not negotiable; other courts sought to interpret the Code to accommodate this new commercial practice. As noted above, the negotiability of instruments

that provide for variable interest rates has now been resolved in Revised Article 3.

Payable in Money The amount specified in the instrument must be payable in money. *Money* is a medium of exchange authorized or adopted by a domestic or foreign government and includes a monetary unit of account established by an intergovernmental organization or by agreement between two or more nations [1–201(24)]. Unless the instrument otherwise provides, an instrument that states the amount payable in foreign money may be paid in the foreign money or in an equivalent dollar amount [3–107]. If the person obligated to pay off an instrument can do something other than pay money, the instrument is not negotiable. For example, if a note reads, “I promise to pay to the order of Sarah Smith, at my option, \$40 or five bushels of apples, John Jones,” the note is not negotiable.

Payable on Demand or at a Definite Time

To be negotiable, the promise or order must be payable either on demand or at a specified time in the future. The reason for this requirement is that the time when the instrument is payable can be determined with some certainty. An instrument that is payable on the happening of some uncertain event is not negotiable. Thus, a note payable “when my son graduates from college” is not negotiable, even though the son does graduate subsequently.

Payable on Demand A promise or order is “payable on demand” if (1) it states that it is payable on “demand” or “sight” (or otherwise at the will of the holder of the instrument) or (2) does not state any time for payment [3–108(a)]. For example, if the maker forgets to state when a note is payable, it is payable immediately at the request of the holder of the note.

An instrument may be antedated or postdated, and normally an instrument payable on demand is not payable before the date of the instrument [3–113(a)]. However, revised Article 3 makes an important exception for checks: a payor bank (a bank that is the drawee of a draft) may pay a postdated check before the stated date *unless* the drawer has notified the bank of postdating pursuant to a procedure set out in the Code [3–113(a); 4–401(c)] that is similar to the process involved in stopping payment on a check. (See Chapter 34.)

Payable at a Definite Time A promise or order is “payable at a definite time” if it is payable at a

fixed date or dates or at a time or times readily ascertainable at the time the promise or order is issued [3–108(b)]. Thus, a note dated March 25, 2010, might be made payable at a fixed time after a stated date, such as “30 days after date.”

Under the Code, an instrument that names a fixed date or time for payment—without losing its negotiable character—also may contain a clause permitting the time for payment to be accelerated at the option of the maker. Similarly, an instrument may allow an extension of time at the option of the holder or allow a maker or acceptor to extend payment to a further definite time. Or, the due date of a note might be triggered by the happening of an event, such as the filing of a petition in bankruptcy against the maker. The Code permits these clauses so long as one can determine the time for payment with certainty [3–108].

A promise or order also is “payable at a definite time” if it is payable on elapse of a definite period of time after “sight” or “acceptance.” A draft payable at a specified time—such as “15 days after sight”—is, in effect, payable at a fixed time after the draft is presented to the drawee for acceptance.

If an instrument is undated, its “date” is the date it is issued by the maker or drawer [3–113(b)].

Payable to Order or Bearer

Except for checks, to be negotiable an instrument must be “payable to order or to bearer.” A note that provides, “I promise to pay to the order of Sarah Smith” or “I promise to pay to Sarah Smith or bearer” is negotiable. However, one that provides “I promise to pay to Sarah Smith” is not. The words “to the order of” or “to bearer” show that the drawer of a draft, or the maker of a note, intends to issue a negotiable instrument. The drawer or maker is not restricting payment of the instrument to just Sarah Smith but is willing to pay someone else designated by Sarah Smith. This is the essence of negotiability.

In the original version of Article 3, an order in the form of a check also had to be “payable to order or bearer” to qualify as a negotiable instrument. However, the drafters of Revised Article 3 created an exception for instruments that otherwise meet the requirements for a negotiable instrument as well as the definition of a check [3–104(c)]. Under the revised article, a check that reads “Pay John Doe” could qualify as a negotiable instrument. As a result, the Code treats checks, which are payment instruments, as negotiable instruments whether or not they contain the words “to the order of.” The drafters explained that most checks are preprinted with these words

but that occasionally the drawer may strike out the words before issuing the check and that a few check forms have been in use that do not contain these words. In these instances, the drafters preferred not to limit the rights of holders of such checks who may pay money or give credit for a check without being aware that it is not in the conventional form for a negotiable instrument.

A promise or order is considered to be payable “to order” if it is payable (1) to the order of an identified person or (2) to an identified person or that person’s order [3–109(b)]. Examples would include: “Pay to the order of Sandy Smith” and “Pay to Sandy Smith or order.” The most common forms of a promise or order being payable to bearer use the words “pay to bearer,” “pay to the order of bearer,” “pay to cash,” or “pay to the order of cash” [3–109(a)]. A check sent with the payee line blank is payable to bearer. However, it is also considered an incomplete instrument, the rules concerning which will be discussed in the following two chapters.

The original payee of a draft or a note can transfer the right to receive payment to someone else. By making the instrument payable “to the order of” or “to bearer,” the drawer or maker is giving the payee the chance to negotiate the instrument to another person and to cut off certain defenses that the drawer or maker may have against payment of the instrument.

An instrument that is payable to the order of a specific person is known as “order paper.” Order paper can be negotiated or transferred only by indorsement. An instrument payable “to bearer” or “to cash” is known as “bearer paper”; it can be negotiated or transferred by delivery of possession without indorsement [3–201(b)]. The rules governing negotiation of instruments will be detailed in the next chapter.

An instrument can be made payable to two or more payees. For example, a check could be drawn payable “to the order of John Jones and Henry Smith.” Then, both Jones and Smith have to be involved in negotiating it or enforcing its payment. An instrument also can be made payable to alternative persons—for example, “to the order of Susan Clark or Betsy Brown.” In this case, either Clark or Brown could negotiate it or enforce its payment [3–110(d)].

A number of recent cases have addressed the question of whether checks should be interpreted as being payable jointly, or whether they are payable in the alternative. Some of those cases have addressed the use of the virgule (/) punctuation mark to separate the names of the payees. One recent case involved a check made payable to “International Livestock/Purina Mills.” The court reasoned that a virgule is used to separate alternatives and

concluded that the check required only the indorsement of either International Livestock or Purina Mills. The following case, *Pelican National Bank*, involves a check where the payees were listed in a stacked formation with-

out any grammatical connector or punctuation. The court concluded that the check was ambiguous and applied the default rule that treated the document as if it was payable in the alternative.

Pelican National Bank v. Provident Bank of Maryland 849 A.2d 475 (Maryland Ct. App. 2004)

Hartford Mutual Insurance Company issued a check drawn on Allfirst Bank in the amount of \$60,150.00 to payees as follows:

Andrew Michael Bogdan, Jr., Crystal Bogdan
Oceanmark Bank FSB
Goodman-Gable-Gould Company

The check was in payment of a casualty claim made by Bodgan on an insurance policy issued by Hartford Mutual on commercial property owned by Bodgan and his wife and on which Oceanmark Bank (Pelican National Bank's predecessor) held a mortgage. Thus, the payees on the check were the property owners, the mortgage holder, and the insurance agent who adjusted the casualty claim. In addition to the payees, the front of the check listed in small print the insurance policy number, claim identification number, the "loss date," and a small notation that read "MEMO Fire—building."

The check, indorsed only by the Bodgans and the adjuster, was presented for payment to Provident Bank, which cashed it. Michael Bodgan deposited the proceeds to a commercial account he held at Provident Bank. When Oceanmark Bank was unable to obtain reimbursement from Provident Bank for negotiating the check without Oceanmark Bank's indorsement, it brought suit against Provident Bank for conversion of the check by paying it without having obtained a required indorsement.

The trial court held that the check was ambiguous as to whether it was payable jointly and thus negotiable only with the indorsement of all of the payees. Accordingly, the court held that it could be negotiated with the indorsement of any of the named payees. Oceanmark Bank appealed.

Bell, Chief Judge

The issue in this case is whether a check made payable to multiple payees, listed in stacked formation on its face, without any grammatical connector or punctuation, is ambiguous as to whether it is negotiable only jointly, thus, requiring the indorsement of all of the named payees, or alternatively, requiring the indorsement of any one of the named payees.

Enacted as part of the 1996 revision to the Maryland Uniform Commercial Code, Section 3-110(d) enunciates the rules for determining, objectively, the intent of a drawer with respect to an instrument made payable to multiple payees. Therefore, we must first examine Section 3-110(d) to determine whether the stacked payee format in this case is an ambiguous multiple payee designation as contemplated by the Maryland Legislature when it enacted the statute. Section 3-110(d) provides:

(d) If an instrument is payable to two or more persons alternatively, it is payable to any of them and may be negotiated, discharged, or enforced by any or all of them in possession of the instrument. If an instrument is payable to two or more persons not alternatively, it is payable to all of them and may be negotiated, discharged, or enforced only by all of

them. If an instrument payable to two or more persons is ambiguous as to whether it is payable to the persons alternatively, the instrument is payable to the persons alternatively.

The Official Comment to that section provides further guidance regarding how to treat a check with multiple payees:

An instrument payable to X or Y is governed by the first sentence of subsection (d). An instrument payable to X and Y is governed by the second sentence of subsection (d). If an instrument is payable to X or Y, either is the payee and if either is in possession that person is the holder and the person entitled to enforce the instrument. . . . If an instrument is payable to X and Y, neither X nor Y acting alone is the person to whom the instrument is payable. . . . The instrument is "payable to an identified person." The "identified person" is X and Y acting jointly.

* * *

The third sentence of subsection (d) is directed to cases in which it is not clear whether an instrument is payable to multiple payees alternatively. In the case of ambiguity, persons dealing with the instrument should be able to rely on the indorsement of a single payee. For example, an instrument

payable to X and/or Y is treated like an instrument payable to X or Y.

Thus, Section 3–110(d), confirmed by the explanation in the Official Comment, clearly and unambiguously enunciates the default rule, that, unless checks payable to multiple payees are specifically and clearly made payable jointly or in the alternative, they are ambiguous with respect to how they are to be paid and, therefore, are payable alternatively. Indeed, that is precisely what the last sentence of the section states.

Applying Section 3–110(d) and this default rule to the facts of this case produces a clear result. The subject check was drawn to the order of three payees, listed in stacked format,

with no grammatical connector, punctuation or symbol indicating their relationship or how the check was intended to be paid. Therefore, the check was neither clearly payable in the alternative, the payees not being connected by “or” or its equivalent, nor clearly payable jointly, the payees not being joined by “and” or its equivalent. It was, consequently, we hold, “ambiguous as to whether it is payable to the persons alternatively.” Accordingly, we further hold, it was proper for Provident Bank to have negotiated the check without the indorsement of Oceanmark. The indorsement of any one of the payees was sufficient.

Judgment for Provident Bank affirmed.

Special Terms

Additional Terms Generally, if an instrument is to qualify as a negotiable instrument, the person promising or ordering payment may not state undertakings or instructions in addition to the payment of money [3–104(a)(3)]. However, the instrument may include clauses concerning (1) giving, maintaining, or protecting collateral to secure payment; (2) an authorization to confess judgment or to realize on or dispose of collateral; and (3) waiving the benefit of any law intended for the protection or benefit of any person obligated on the instrument.

Thus, a term authorizing the confession of judgment on an instrument when it is due does not affect the negotiability of the instrument. A confession of judgment clause authorizes the creditor to go into court if the debtor defaults and, with the debtor’s acquiescence, to have a judgment entered against the debtor. However, some states prohibit confessions of judgment.

Banks and other businesses often use forms of commercial paper that meet their particular needs. These

forms may include certain other terms that do not affect the negotiability of an instrument. For example, a note may designate a place of payment without affecting the instrument’s negotiability. Where the instrument does not specify a place of payment, the Code sets out rules for ascertaining where payment is to be made [3–111].

Ambiguous Terms Occasionally, a person may write or receive a check on which the amount written in figures differs from the amount written in words. Or a note may have conflicting terms or an ambiguous term. Where a conflict or an ambiguous term exists, there are general rules of interpretation that are applied to resolve the conflict or ambiguity: Typewritten terms prevail over printed terms, handwritten terms prevail over printed and typewritten terms, and where words and numbers conflict, the words control the numbers [3–114].

The following *Galatia Community State Bank v. Kindy* case involves a check on which there was a difference between the numbers on the check placed there by a check-writing machine and the number written by hand.

Galatia Community State Bank v. Kindy

307 Ark. 467 (Ark. Sup. Ct. 1991)

Galatia Community State Bank honored a check it took for collection for \$5,550, which was the amount imprinted by a check-writing machine in the center underlined section of the check commonly used for stating the amount in words. The imprint looked like this:

Registered
No. 497345 **5550 DOL'S 00 CTS

*The impression made by the check-writing machine could be felt on the front and back of the check, and “**5550 DOL'S 00 CTS” was imprinted in red ink. In the box on the right-hand side of the check commonly used for numbers, “6,550.00”*

appeared in handwriting. The check was in partial payment of the purchase price of two engines that Eugene Kindy was buying from the payee on the check, Tony Hicks. Kindy postdated the check by a month and deliberately placed two different amounts on the check because he thought the bank would check with him before paying it. Kindy wanted to be sure that the engines had been delivered to Canada before he paid the \$6,550 balance of the purchase price.

After the check was deposited in the Galatia Bank and Hicks was given \$5,550, an employee of the bank altered the “6” by hand to read “5.” Because Kindy had stopped payment on the check, the drawee bank refused to pay it to Galatia Bank. Galatia Bank then brought suit against Kindy as the drawer of the check. One of the issues in the lawsuit was how the check should be constructed. The trial court found that the rules on construction provided in the Code were not helpful because they were contradictory. The trial court held in favor of Kindy, and Galatia Bank appealed.

Newbern, Justice

The trial court reviewed Code section 3–118(b) and (c) (1987) which has since been superseded by section 3–114 (1991) but which was in effect at the time in question in this case. The statute provided in relevant part:

3–118. Ambiguous terms and rules of construction. The following rules apply to every instrument:

* * *

(b) Handwritten terms control typewritten and printed terms, and typewritten control printed.

(c) Words control figures except that if the words are ambiguous figures control.

The frustration expressed by the trial court with respect to section 3–118 which stated the applicable rules of construction for negotiable instruments is understandable.

The \$5550.00 amount imprinted by the check-writing machine upon the line customarily used for words is expressed in figures and not in words. One question is whether imprinted numbers located where words are customarily placed on a check control figures placed where figures are customarily placed. Another question is whether handwritten figures control printing.

We find both questions satisfactorily answered in *St. Paul Fire & Marine Ins. Co. v. Bank of Salem*. In that case, there was a conflict between an amount imprinted by a check-imprinting machine and numbers expressed in typewritten figures. The court recognized the imprinted amount was not expressed in words but held “the purposes of the UCC are best served by considering an amount imprinted by a check-writing machine as ‘words’ for the purpose of resolving an ambiguity between an amount and an amount entered upon the line usually used to express the amount in figures.” The court quoted from a pre-UCC case, *United States Fidelity and Guaranty Co. v. First National Bank of South Carolina* (1964), as follows:

A prime purpose, as we see it, of making a sum payable when expressed in words controlling over the sum payable expressed in figures is the very fact that words are much

more difficult to alter. The perforated imprinting by a check-writing machine, while fully expressing the sum payable in figures, is even more difficult to successfully alter than a sum payable in written words.

Because a check-imprinting machine’s purpose is to protect against alterations, the amount shown on the imprint should control whether the number is in words or figures.

Turning to the question of whether typewriting controls printing, the court in *United States Fidelity and Guaranty Co.* stated:

As the section makes clear, in the event of an ambiguity between printed terms and typewritten terms, the latter would control. We do not consider the impression made by the check imprinter to be “printed terms” under this section.

A conflict between the two amounts on a check would be resolved by section 3–118 which states that words control figures. Arguably, the amount imprinted by the check-writing machine upon the line customarily expressing the amount in words, is expressed in figures. . . . We think, however, that the purposes of the UCC are best served by considering an amount imprinted by a check-writing machine as “words” for the purpose of resolving an ambiguity between that amount and an amount entered upon the line usually used to express the amount in figures.

Although the court did not say specifically that it regarded the portion written by the check-writing machine as the equivalent of handwriting, that is the clear effect of the decision.

In *United States v. Hibernia National Bank*, a typed numerical amount was located in the place customarily used for words. The amount conflicted with the amount located in the place customarily used for figures. The court found the typed amount controlling despite the fact it was not expressed in words.

Judgment for Kindy reversed on other grounds.

Note: Although, as the court notes, this case was decided under the original version of Article 3, the dilemma posed, and the conclusion reached by the court on the construction of the check, would likely be the same under Revised Article 3.

CONCEPT REVIEW

Requirements for Negotiability

| Requirement | Basic Rules |
|---|--|
| Must Be in Writing | 1. The instrument may be handwritten, typed, or printed. |
| Must Be Signed by the Maker or Drawer | 1. Person issuing the instrument must sign with intent of validating his or her obligation. 2. Person issuing may affix the signature in a variety of ways—for example, by word, mark, or rubber stamp. 3. Agent or authorized representative may supply the “signature.” |
| Must Contain a Promise or Order to Pay | 1. Promise must be more than acknowledgment of a debt. 2. Order requirement is met if the drawer issues an instruction to “pay.” |
| Promise or Order Must Be Unconditional | 1. Entire obligation must be found in the instrument itself and not in another document or documents. 2. Payment cannot be conditioned on the occurrence of an event. |
| Must Call for Payment of a Fixed Amount of Money | 1. Must be able to ascertain the principal from the face of the instrument. 2. May contain a clause providing for payment of interest or other charges such as collection or attorney’s fees. |
| Must Be Payable in Money | 1. Obligation must be payable in a medium of exchange authorized or adopted by a government or by an international organization or agreement between two or more nations. 2. Maker or drawer cannot have the option to pay in something other than money. |
| Must Be Payable on Demand or at a Definite Time | 1. Requirement is met if instrument says it is payable on demand or, if no time for payment is stated, it is payable on demand. 2. Requirement is met if it is payable on a stated date, at a fixed time after a stated date, or a fixed time “after sight.” 3. Instrument may contain an acceleration clause or a clause allowing maker or holder to extend the payment date. |
| Generally Must Be Payable to Bearer or to Order | 1. Bearer requirement is met if instrument is payable “to bearer” or “to cash.” 2. Order requirement is met if instrument is payable “to the order of” a specified person or persons. 3. Exception from requirement is made for instruments meeting both the definition of a check and all the other requirements for a negotiable instrument. |
| May Not State Any Other Undertaking or Instruction by the Person Promising or Ordering Payment to Do Any Act in Addition to the Payment of Money | 1. However, it may contain (a) an undertaking or power to give, maintain, or protect collateral to secure payment, (b) an authorization or power to the holder to confess judgment or realize on or dispose of collateral, or (c) a waiver of the benefit of any law intended for the advantage or protection of an obligor on the instrument. |

Problems and Problem Cases

1. Is the following instrument a note, a check, or a draft? Why? If it is not a check, how would you have to change it to make it a check?

To: Arthur Adams January 1, 2010
TEN DAYS AFTER DATE PAY TO THE ORDER OF:

Bernie Brown
THE SUM OF: Ten thousand and no/100 DOLLARS
SIGNED: Carl Clark

2. Frank agrees to build a garage for Sarah for \$15,000. Sarah offers either to sign a contract showing her obligation to pay Frank \$15,000 or to sign a negotiable promissory note for \$15,000 payable to the order of

Frank. Would you advise Frank to ask for the contract or the promissory note? Explain.

3. Wiley, Tate & Irby, buyers and sellers of used cars, sold several autos to Houston Auto Sales. Houston wrote out the order for payment on the outside of several envelopes. He signed them and they were drawn on his bank, Peoples Bank & Trust Co., to be paid on the demand of Wiley, Tate & Irby. Can the envelopes qualify as negotiable instruments?
4. A handwritten note provided as follows:
 - I, Robert Harrison, owe Peter Jacob \$25,000 (twenty-five thousand dollars) as of 3/27/10 for the following:
 - (1) \$15,000 for Caterpillar loader
 - (2) \$5,000 for a loan
 - (3) \$5,000 for a tag-a-long trailer.

Would this instrument qualify as a negotiable instrument?

5. Holly Hill Acres, Ltd., executed a promissory note and mortgage and delivered them to Rogers. The note contained the following stipulation:

This note with interest is secured by a mortgage on real estate of even herewith, made by the maker hereof in favor of the said payee, and shall be construed and enforced according to the laws of the State of Florida. The terms of said mortgage are by this reference made a part hereof.

Is the note a negotiable instrument?

6. Strickland ordered a swimming pool from Kafko Manufacturing and gave it a check for the purchase price that included the following words in the space following the word *memo*: “for pool kit to be delivered.” Is the check negotiable?
7. Holliday made out a promissory note to Anderson, leaving the date of payment of the note blank. Anderson filled in the words “on demand” in the blank without Holliday’s knowledge. Does this alter the rights or obligations of the parties?
8. Darryl Young presented five photocopied checks to the Lynnwood Check-X-Change on five different days between June 13 and June 21. Lynnwood cashed the first four checks presented. The fifth check, which was presented on a Saturday, was drawn on a different account from the first four checks and was payable on the following Monday. Lynnwood’s practice was to

cash checks on Saturday that are dated the following Monday. Young was convicted of five counts of forgery. On appeal, Young argued that the postdated check was not a legal instrument for purposes of the forgery statute. The crime of forgery requires an instrument that, if genuine, may have legal effect or be the foundation of legal liability. Young argued that the postdated check did not meet this requirement “because the time for payment had not arrived and thus the check could not have created any legal liability on the part of any person at that time.” If a check is postdated, can it qualify as a negotiable instrument and create legal liability?

9. Emmett McDonald, acting as the personal representative of the estate of Marion Cahill, wrote a check payable to himself, individually, on the estate checking account in the Commercial Bank & Trust Company. The instrument contained an obvious variance between the numbers and the written words that indicated the amount of the check. It said: “Pay to the order of Emmett E. McDonald \$10075.00 Ten hundred seventy five . . . Dollars.” The bank paid the \$10,075 sum stated by the numerals to McDonald, who absconded with the funds. Yates, the successor representative, sued the bank on behalf of the estate to recover the \$9,000 difference between that amount and the \$1,075 that was written out. Did the bank pay the correct amount on the check?

Online Research

Accessing Information from Your Bank

Use the Internet to locate the Web site for the bank or financial institution where you maintain a checking account. From the Web site ascertain the following information: (1) what is the monthly fee (if any) for maintaining the type of checking account you maintain? (2) does the institution charge a fee for each check you use or if you exceed a certain number of transactions per month? (3) what rate of interest does the institution pay on a \$10,000, five-year certificate of deposit (CD)? and (4) what rate of interest does the institution charge on secured personal loans such as a loan for the purchase of a new car?

chapter 32

NEGOTIATION AND HOLDER IN DUE COURSE

Rachel Allen purchases a used Honda from Friendly Fred’s Used Cars, paying \$1,500 down and signing a promissory note in which she promises to pay \$2,000 to Fred or to his order 12 months from the date of the note with interest at 8.5 percent. Fred assures Rachel that the car is in good condition and has never been involved in an accident. Fred indorses (signs) his name on the back of the promissory note and discounts (assigns) the note to Factors, Inc. Subsequently, Rachel discovers that, contrary to Fred’s assurance, the Honda had in fact been involved in an accident that caused a front-end alignment problem. When Factors notifies her of the assignment to it of the note and asks for payment on the due date, Rachel wants to assert a defense of failure of consideration or breach of contract (warranty) against full payment of the note.

Among the legal issues raised in this scenario are:

- When Fred transferred the promissory note to Factors after signing his name to the back of it, what rights did Factors obtain?
- Will Rachel be able to assert a defense of failure of consideration or breach of contract against full payment of the note to Factors?
- If the promissory note contained the clause required by the Federal Trade Commission in consumer notes or installment sales contracts, would it change Rachel’s rights?

THE PRECEDING CHAPTER DISCUSSED the nature and benefits of negotiable instruments. It also outlined the requirements an instrument must meet to qualify as a negotiable instrument and thus possess the qualities that allow it to be accepted as a substitute for money.

This chapter focuses on negotiation—the process by which rights to a negotiable instrument pass from one person to another. Commonly, this involves an indorsement and transfer of the instrument. This chapter also develops the requirements that a transferee of a negotiable instrument must meet to qualify as a holder in due course and thus attain special rights under negotiable instruments law. These rights, which put a holder in due course in an enhanced position compared to an assignee of a contract, are discussed in some detail.

In this chapter, you also will consider whether it would be ethical to incur a gambling debt, to issue a check or other negotiable instrument in satisfaction of the debt, and then assert the defense of illegality against payment of the instrument.

Negotiation

Nature of Negotiation Under Revised Article 3, **negotiation** is the transfer of possession (whether voluntary or involuntary) of a negotiable instrument by a person (other than the issuer) to another person who becomes its *holder* [3–201]. A person is a **holder** if she is in possession of an instrument (1) that is payable to bearer or (2) made payable to an identified person and she is that identified person [1–201(20)].¹

For example, when an employer gives an employee, Susan Adams, a paycheck payable “to the order of Susan Adams,” she is the holder of the check because she is in possession of an instrument payable to an identified person (Susan Adams) and she is that person. When she indorses (writes her name) on the back of the check and

¹The numbers in brackets refer to sections of the Uniform Commercial Code (UCC), which is reproduced in the appendix.

exchanges it for cash and merchandise at Ace Grocery, she has negotiated the check to the grocery store and the store is now the holder because it is in possession by transfer of a check and unless she specifies the grocery store by name, the check now is payable to bearer. Similarly, if Susan Adams indorsed the check “Pay to the Order of Ace Grocery, Susan Adams” and transferred it to the grocery store, it would be a holder through the negotiation of the order check to it. The grocery store would be in possession of an instrument payable to an identified person (Ace Grocery) and is the person identified in the check.

In certain circumstances, Revised Article 3 allows a person to become a holder by negotiation even though the transfer of possession is involuntary. For example, if a negotiable instrument is payable to bearer and is stolen by Tom Thief or found by Fred Finder, Thief or Finder becomes the holder when he obtains possession. The involuntary transfer of possession of a bearer instrument results in a negotiation to Thief or Finder.

Formal Requirements for Negotiation

The formal requirements for negotiation are very simple. If an instrument is payable to the order of a specific payee, it is called **order paper** and it can be negotiated by transfer of possession of the instrument after indorsement by the person specified [3–201(b)].

For example, if Rachel’s father gives her a check payable “to the order of Rachel Stern,” then Rachel can negotiate the check by indorsing her name on the back of the check and giving it to the person to whom she wants to transfer it. Note that the check is order paper, not because the word *order* appears on the check but rather because it named a specific payee, Rachel Stern.

If an instrument is payable “to bearer” or “to cash,” it is called **bearer paper** and negotiating it is even simpler. An instrument payable to bearer may be negotiated by transfer of possession alone [3–201(b)]. Thus, if someone gives you a check that is made payable “to the order of cash,” you can negotiate it simply by giving it to the person to whom you wish to transfer it. No indorsement is necessary to negotiate an instrument payable to bearer. However, the person who takes the instrument may ask for an indorsement for her protection. By indorsing the check, you agree to be liable for its payment to that person if it is not paid by the drawee bank when it is presented for payment. This liability will be discussed in Chapter 33, Liability of Parties.

Nature of Indorsement An indorsement is made by adding the signature of the holder of the instru-

ment to the instrument, usually on the back of it, either alone or with other words. **Indorsement** is defined to mean “a signature (other than that of a maker, drawer or acceptor) that alone or accompanied by other words, is made on an instrument for purpose of (i) negotiating the instrument, (ii) restricting payment of the instrument, or (iii) incurring indorser’s liability on the instrument” [3–204(a)]. The negotiation and restriction of payment aspects of indorsements will be discussed below; indorser’s liability will be covered in the next chapter.

The signature constituting an indorsement can be supplied or written either by the holder or by someone who is authorized to sign on behalf of the holder. For example, a check payable to “H&H Meat Market” might be indorsed “H&H Meat Market by Jane Frank, President,” if Jane is authorized to do this on behalf of the market.

Wrong or Misspelled Name When indorsing an instrument, the holder should spell his name in the same way as it appears on the instrument. If the holder’s name is misspelled or wrong, then legally the indorsement can be made either in his name or in the name that is on the instrument. However, any person who pays the instrument or otherwise gives value for it may require the indorser to sign both names [3–204(d)].

Suppose Joan Ash is issued a check payable to the order of “Joanne Ashe.” She may indorse the check as either “Joan Ash” or “Joanne Ashe.” However, if she takes the check to a bank to cash, the bank may require her to sign both “Joanne Ashe” and “Joan Ash.”

Checks Deposited without Indorsement Occasionally, when a customer deposits a check to her account with a bank, she may forget to indorse the check. It is common practice for depositary banks to receive unindorsed checks under what are known as “lock-box” arrangements with customers who receive a high volume of checks. Normally, a check payable to the order of an identified person would require the indorsement of that person in order for a negotiation to the depositary bank to take place and for it to become a holder. Under the original Article 3, the depositary bank, in most cases, had the right to supply the customer’s indorsement. Instead of actually signing the customer’s name to the check as the indorsement, the bank might just stamp on it that it was deposited by the customer or credited to her account. Banks did not have the right to put the customer’s indorsement on a check that the customer has deposited if the check specifically required the payee’s signature. Insurance and government checks commonly require the payee’s signature.

The revision to Article 3 and the conforming amendments to Articles 1 and 4 address the situation where a check is deposited in a depository bank without indorsement differently. The depository bank becomes a holder of an item delivered to it for collection, whether or not it is indorsed by the customer, if the customer at the time of delivery qualified as a holder [4–205]. Concomitantly, the depository bank warrants to other collecting banks, the payor bank (drawee), and the drawer that it paid the amount of the item to the customer or deposited the amount to the customer’s account.

Transfer of Order Instrument Except for the special provisions concerning depository banks, if an order instrument is transferred without indorsement, the instrument has not been negotiated and the transferee cannot qualify as a holder. For example, Sue Brown gives a check payable “to the order of Susan

Brown” to a drugstore in payment for some cosmetics. Until Sue indorses the check, she has not “negotiated” it and the druggist could not qualify as a “holder” of the check.

Transfer of an instrument, whether or not the transfer is a negotiation, vests in the transferee, such as the drugstore, any right of Sue, the transferor, to enforce the instrument. However, the transferee cannot obtain the rights of a holder in due course (discussed later in this chapter) if he is engaged in any fraud or illegality affecting the instrument. Unless otherwise agreed, if an instrument is transferred for value but without a required indorsement, the transferee has the right to obtain the unqualified indorsement of the transferor; however, the “negotiation” takes place only when the transferor applies her indorsement [3–203(c)].

The *Town of Freeport* case, which follows, illustrates these principles.

Town of Freeport v. Ring

727 A.2d 901 (Maine Sup. Jud. Ct. 1999)

Thornton Ring was the owner of real property located on Main Street in Freeport, Maine. In August 1994, the Town sent Ring a letter noting that his 1993–1994 real estate taxes were unpaid and notified him of the Town’s intent to file a lien on the property if payment was not received within 30 days. The taxes remained unpaid and a tax lien was filed on the property. On January 26, 1996, because a portion of the taxes still remained unpaid, the Town sent a Notice of Impending Foreclosure of the Tax Lien Certificate to Ring by certified mail, advising him that the tax lien would be deemed to be foreclosed on February 27, 1996. Ring subsequently was in default for his 1994–1995 taxes and similar notices were sent.

In January 1997, Ring delivered to the Town a check in the amount of \$11,347.09. The check was issued by Advest, Inc., and made payable to the order of Thornton D. Ring. The back of the check was inscribed as follows:

Payable to Town of Freeport
Property Taxes
2 Main St[.]

The check was accompanied by a letter, signed by Ring and dated January 20, 1997, which reads, “I have paid \$11,347.09 of real estate taxes and request the appropriate action to redeem the corresponding property.” On February 3, 1997, Ring received a letter from the Town which explained that the Town was returning the check because the 1994 tax lien on the property had matured in 1996.

The Town filed suit seeking a declaratory judgment that it had good title to the Main Street property. One of the issues was whether the delivery of the check by Ring constituted payment of his outstanding taxes.

Clifford, Justice

With respect to a check that is made payable to the order of a specific person, negotiation occurs, and the person receiving the check becomes a holder of a negotiable instrument, if possession of the check is transferred and the check is indorsed by the transferor. An indorsement is a signature of someone other than the maker, or some other designation identifying the indorser, that is made on an instrument for the purpose of negotiating the instrument. *Kelly v. Central Bank & Trust Co.* (writing on back of check which reads “For deposit only” to an account

other than the payee’s and without payee’s signature is not an effective indorsement). If negotiation occurs and the holder qualifies as a holder in due course, the holder can demand payment of the instrument subject only to real defenses.

The check Ring sent to the Town was issued by Advest, Inc., payable to the order of Thornton D. Ring. Because it was payable to Ring’s order, the check could only be negotiated by Ring through indorsement and transfer of possession. Ring’s signature, however, does not appear on the back of the check. The words that do appear on the back of the check—“Payable

to Town of Freeport[/]Property Taxes[/]2 Main St[.]”—do not identify Ring. The words only indicate to whom the instrument should have been payable had the check been properly indorsed. Thus, the writing is an incomplete attempt to create a special indorsement. A special indorsement is an indorsement that identifies a person to whom the indorser is making the check payable.

The statement included within the letter accompanying the check does not serve as a valid indorsement either. In determining whether an instrument is properly indorsed, any papers affixed to the instrument are considered part of the instrument. See section 3–204(1). This language specifically references only “affixed” documents. Courts interpreting this language have concluded that a signature on a separate, unattached piece of paper is not an indorsement of the instrument. Ring does not dispute that there is no evidence on record to suggest that the letter was physically attached to the check.

Relying on sections 3–203(3) and 3–203(2), Ring also contends that even in the absence of an indorsement, the check should have been accepted as payment of his outstanding taxes because the Town (1) had a statutory right to demand an indorsement of the check, or (2) was entitled to enforce the instrument without the indorsement. Section 3–203(3) provides that “if an instrument is transferred for value and the transferee does not become a holder because of

lack of indorsement by the transferor, the transferee has a specifically enforceable right to the unqualified indorsement of the transferor. . . .” Section 3–203(2) provides “Transfer of an instrument, whether or not the transfer is a negotiation, vests in the transferee any right of the transferor to enforce the instrument.”

Even if the Town could demand an indorsement pursuant to section 3–203(3), negotiation does not occur until the indorsement is made. See section 3–203(3). Thus, at the time the check was received, the Town had a right to demand an indorsement, but could not go to the bank to demand payment of the check. Pursuant to section 3–203(2), the bank also had the right to enforce the instrument as the transferee of an instrument from a holder. That right, however, could be enforced only through a judicial proceeding. Such contingent rights to receive payment are not sufficient to redeem property subject to a municipal tax lien. Checks are meant to be the functional equivalent of cash when they are properly issued and negotiated. If the Town has to institute a judicial proceeding to receive the cash equivalent of the check, the check has not served its purpose. The unindorsed check presented to the Town is not the type of payment the redemption option of the tax lien statute contemplates.

Judgment for Town affirmed.

Indorsements

Effects of an Indorsement There are three functions to an indorsement. First, an indorsement is necessary in order for the negotiation of an instrument that is payable to the order of a specified person. Thus, if a check is payable “to the order of James Lee,” James must indorse the check before it can be negotiated. Second, the form of the indorsement that the indorser uses also affects future attempts to negotiate the instrument. For example, if James indorses it “Pay to the order of Sarah Hill,” Sarah must indorse it before it can be negotiated further.

Third, an indorsement generally makes a person liable on the instrument. By indorsing an instrument, a person incurs an obligation to pay the instrument if the person primarily liable on it (for example, the maker of a note) does not pay it. We discuss the contractual liability of indorsers in Chapter 33. In this chapter, we discuss the effect of an indorsement on further negotiation of an instrument.

Kinds of Indorsements There are three basic kinds of indorsements: (1) special, (2) blank, and (3) restrictive. In addition, an indorsement may be “qualified.”

Special Indorsement A **special indorsement** contains the signature of the indorser along with words indicating to whom, or to whose order, the instrument is payable. For example, if a check is drawn “Pay to the Order of Marcia Morse” and Marcia indorses it “Pay to the Order of Sam Smith, Marcia Morse,” or “Pay to Sam Smith, Marcia Morse,” it has been indorsed with a special indorsement. An instrument that is indorsed with a special indorsement remains “order paper.” It can be negotiated only with the indorsement of the person specified [3–205(a)]. In this example, Sam Smith must indorse the check before he can negotiate it to someone else.

Blank Indorsement If an indorser merely signs his name and does not specify to whom the instrument is payable, he has indorsed the instrument **in blank**. For example, if a check drawn “Pay to the Order of Natalie

Owens” is indorsed “Natalie Owens” by Natalie, Natalie has indorsed it in blank. An instrument indorsed in blank is payable to the bearer (person in possession of it) and from that act is “bearer paper.” As such, the bearer negotiates it by transfer alone and no further indorsement is necessary for negotiation [3–205(b)].

If Natalie indorsed the check in blank and gave it to Kevin Foley, Kevin would have the right to convert the blank indorsement into a special indorsement [3–205(c)]. He could do this by writing the words “Pay to the Order of Kevin Foley” above Natalie’s indorsement. Then Kevin would have to indorse the check before it could be further negotiated.

If Kevin took the check indorsed in blank to a bank and presented it for payment or for collection, the bank normally would ask him to indorse the check. It asks not because it needs his indorsement for the check to be negotiated to it; the check indorsed in blank can be negotiated merely by delivering it to the bank cashier. Rather, the bank asks for his indorsement because it wants to make him liable on the check if it is not paid when the bank sends it to the drawee bank for payment. Chapter 33, Liability of Parties, discusses the liability of indorsers.

Restrictive Indorsement A **restrictive indorsement** is one that specifies the purpose of the indorsement or specifies the use to be made of the instrument. Among the more common restrictive indorsements are:

1. Indorsements for deposit. For example, “For Deposit Only” or “For Deposit to My Account at First National Bank.”
2. Indorsements for collection, which are commonly put on by banks involved in the collection process. For example, “Pay any bank, banker, or trust company” or “For collection only.”
3. Indorsements indicating that the indorsement is for the benefit of someone other than the person to whom

it is payable. For example, “Pay to Arthur Attorney in Trust for Mark Minor.”

Generally, the person who takes an instrument with a restrictive indorsement must pay or apply any money or other value he gives for the instrument consistently with the indorsement. In the case of a check indorsed “for deposit” or “for collection,” any person other than a bank who purchases the check is considered to have **converted** the check unless (1) the indorser received the amount paid for it or (2) the bank applied the amount of the check consistently with the indorsement (e.g., deposited it to the indorser’s account). Similarly, a depository bank (a bank that takes an item for collection) or payor bank (the drawee bank) that takes an instrument for deposit or for immediate payment over the counter that has been indorsed “for deposit” or “for collection” will be liable for conversion unless the indorser received the amount paid for the instrument or the proceeds or the bank applied the amount consistently with the indorsement [3–206(c)].²

By way of illustration, assume that Robert Franks has indorsed his paycheck “For Deposit to My Account No. 4068933 at First Bank.” While on his way to the bank he loses the check, and Fred Finder finds it. If Finder tries to cash the check at a check-cashing service, the service must ensure that any value it gives for the check either is deposited to Franks’s account at First Bank or is received by Franks. If it gives the money to Finder, it will be liable to Franks for converting his check. This principle is illustrated in *Lehigh Presbytery*, which involves a bank that failed to apply value given for checks consistently with restrictive indorsements on the checks.

²Otherwise, a payor bank as well as an intermediary bank may disregard the indorsement and is not liable if the proceeds of the instrument are not received by the indorser or applied consistently with the indorsement [3–206(c)(4)].

Lehigh Presbytery v. Merchants Bancorp, Inc. 17 UCC Rep. 2d 163 (Penn. Super. Ct. 1991)

Mary Ann Hunsberger was hired by the Lehigh Presbytery as a secretary/bookkeeper. In this capacity, she was responsible for opening the Presbytery’s mail, affixing a rubber-stamp indorsement to checks received by the Presbytery, and depositing the checks into the Presbytery’s account at Merchants Bancorp, Inc. Over a period of more than five years, Hunsberger deposited into her own account 153 of these checks. Each check was indorsed: “For Deposit Only To The Credit of Presbytery of Lehigh, Ernest Hutcheson, Treas.” The bank credited the checks to Hunsberger’s account, despite the rubber stamp restrictive indorsement, because it relied solely on the account number handwritten on the deposit slips submitted by Hunsberger with the checks at the time of deposit. Hunsberger obtained the deposit slips in the lobby of the bank, wrote the proper account title, “Lehigh Presbytery;” but inserted her own account number rather than the account number of her employer.

When *Lehigh Presbytery* discovered the diversionary scheme, it sued the bank to recover the funds credited to Hunsberger's account. The primary issue in the case was whether the bank was bound to follow the restrictive indorsements on the 153 checks that it instead had deposited to the personal account of Hunsberger. The trial court ruled in favor of the bank and *Lehigh Presbytery* appealed.

McEwen, Judge

UCC Section 3–205 provides:

An indorsement is restrictive which either:

...

(3) includes the words “for collection,” “for deposit,” “pay any bank,” or like terms signifying a purpose of deposit or collection; or

...

It is undisputed that the indorsement stamped on each check by Ms. Hunsberger is a restrictive indorsement within the meaning of section 3–205.

Section 3–206 of the UCC addresses the effect of such an indorsement and provides, in pertinent part:

(c) Conditional or specified purpose indorsement.—Except for an intermediary bank, any transferee under an indorsement which is conditional or includes the words “for collection,” “for deposit,” “Pay any bank,” or like terms (section 3–205(1) and (3) (relating to restrictive indorsements) must

pay or apply any value given by him for or on the security of the instrument consistently with the indorsement and to the extent he does he becomes a holder for value.

Thus, the UCC mandates application of the value of the checks consistently with the indorsement, that is, for deposit to *Lehigh Presbytery's* account.

Courts considering the significance of a restrictive indorsement have consistently concluded that the UCC imposes an unwaivable obligation upon the bank to follow the indorsement. New York State's highest court has held that “[t]he presence of a restriction imposes upon the depository bank an obligation not to accept that item other than in accord with the restriction. By disregarding the restriction, it not only subjects itself to liability for any losses resulting from its actions, but it also passes up what may be the best opportunity to prevent the fraud.”

Judgment reversed in favor of Lehigh Presbytery.

Note: Although this case was decided under the original version of Article 3, the same result would be expected under Revised Article 3.

Some indorsements indicate payment to the indorsee as an agent, trustee, or fiduciary. A person who takes an instrument containing such an indorsement from the indorsee may pay the proceeds to the indorsee without regard to whether the indorsee violates a fiduciary duty to the indorser *unless* he is on *notice* of any breach of fiduciary duty that the indorser may be committing [3–206(d)]. A person would have such notice if he took the instrument in any transaction that benefited the indorsee personally [3–307]. Suppose a person takes a check indorsed to “Arthur Attorney in Trust for Mark Minor.” The money given for the check should be put in Mark Minor's trust account. A person would not be justified in taking the check in exchange for a television set that he knew Attorney was acquiring for his own—rather than Minor's—use.

There are two other kinds of indorsements that the original Article 3 treated as restrictive indorsements but that the revised Article 3 no longer considers as restrictive indorsements. They are:

1. Indorsements purporting to prohibit further negotiation. For example, “Pay to Carl Clark Only.”

2. Conditional indorsements, which indicate that they are effective only if the payee satisfies a certain condition. For example, “Pay to Bernard Builder Only if He Completes Construction on My House by November 1, 2010.”

Under Revised Article 3, any indorsement that purports to limit payment to a particular person, or to prohibit further transfer or negotiation of the instrument, is not effective to prevent further transfer or negotiation [3–206(a)]. Thus, if a note is indorsed “Pay to Carl Clark Only” and given to Clark, he may negotiate the note to subsequent holders who may ignore the restriction on the indorsement.

Indorsements that state a condition to the right of the indorsee to receive payment do not affect the right of the indorsee to enforce the instrument. Any person who pays the instrument or takes it for value or for collection may disregard the condition. Moreover, the rights and liabilities of the person are not affected by whether the condition has been fulfilled [3–206(b)].

Qualified Indorsement A **qualified indorsement** is one where the indorser disclaims her liability to make the

The Global Business Environment

Convention on International Bills of Exchange and International Promissory Notes

In 1988 the Convention on International Bills of Exchange and International Promissory Notes was adopted by the United Nations. The Convention is applicable to drafts and notes but not to checks. Under the Convention, a bill of exchange is an order to pay money while a promissory note is a promise to pay money. To be covered, they must have the attributes of negotiability. They also must be international in nature in that at least two of the places where their operations occur—such as the address of the drawer or promissory, the address of the payee, or the place of payment—must be in different countries. The Convention also requires that the parties must affirmatively elect to be covered by the Convention by placing a specified legend on the instrument.

In drafting the Convention, the drafters had to try to accommodate or harmonize differences between civil and common law countries concerning negotiable instruments. A major difference between the two systems is how they deal with forged indorsements. Under the common law and UCC Articles 3 and 4, a forged indorsement is not effective to negotiate an instrument to the indorsee while under the civil law it is. Under the civil law, the indorsee takes title to the instrument and acquires the rights of a holder, and payment to the indorsee discharges makers and drawers. As discussed in this and the following chapter, under the UCC, an indorsee taking an instrument with a forged indorsement does not gain these rights and a maker or drawer is not discharged by making payment to that indorsee. The resolution of these differences in the Convention is too complex to discuss in this textbook.

instrument good if the maker or drawer defaults on it. Words such as “Without Recourse” are used to qualify an indorsement. They can be used with either a blank indorsement or a special indorsement and thus make it a qualified blank indorsement or a qualified special indorsement. The use of a qualified indorsement does not change the negotiable nature of the instrument. Its effect is to eliminate the contractual liability of the particular indorser. Chapter 33, Liability of Parties, will discuss this liability in detail.

Rescission of Indorsement Negotiation is effective to transfer an instrument even if the negotiation is (1) made by a minor, a corporation exceeding its powers, or any other person without contractual capacity; (2) obtained by fraud, duress, or mistake of any kind; (3) made in breach of duty; or (4) part of an illegal transaction. A negotiation made under the preceding circumstances is subject to **rescission** before the instrument has been negotiated to a transferee who can qualify as a holder in due course or a person paying the instrument in good faith and without knowledge of the factual basis for rescission or other remedy [3–202]. The situation in such instances is analogous to a sale of goods where the sale has been induced by fraud or misrepresentation. In such a case, the seller may rescind the sale and recover the goods, provided that the seller acts before the goods are resold to a bona fide purchaser for value.

Holder in Due Course

A person who qualifies as a holder in due course of a negotiable instrument gets special rights. Normally, the transferee of an instrument—like the assignee of a contract—gets only those rights in the instrument that are held by the person from whom he got the instrument. But a holder in due course can get better rights. A holder in due course takes a negotiable instrument free of all **personal defenses, claims to the instrument, and claims in recoupment** either of the obligor or of a third party. A holder in due course does not take free of the **real defenses**, which go to the validity of the instrument or of claims that develop after he becomes a holder. We develop the differences between “personal” and “real defenses” in more detail later in this chapter and also explain claims to the instrument and claims in recoupment. The following example illustrates the advantage that a holder in due course of a negotiable instrument may have.

Assume that Carl Carpenter contracts with Helen Hawkins to build her a garage for \$18,500, payable on October 1 when he expects to complete the garage. Assume further that Carpenter assigns his right to the \$18,500 to First National Bank in order to obtain money for materials. If the bank tries to collect the money from Hawkins on October 1 but Carpenter has not finished building the garage, then Hawkins may assert the fact that the garage is

CONCEPT REVIEW

Indorsements (Assume a check is payable “To The Order of Mark Smith.”)

| Type | Example | Consequences |
|--------------------|---|--|
| Blank | Mark Smith | <ol style="list-style-type: none"> 1. Satisfies the indorsement requirement for the negotiation of order paper. 2. The instrument becomes bearer paper and can be negotiated by delivery alone. 3. The indorser becomes obligated on the instrument. (See Chapter 33, Liability of Parties.) |
| Special | Pay to the Order of Joan Brown, Mark Smith | <ol style="list-style-type: none"> 1. Satisfies the indorsement requirement for the negotiation of order paper. 2. The instrument remains order paper and Joan Brown’s indorsement is required for further negotiation. 3. The indorser becomes obligated on the instrument. (See Chapter 33.) |
| Restrictive | For deposit only to my account in First American Bank, Mark Smith | <ol style="list-style-type: none"> 1. Satisfies the indorsement requirement for the negotiation of order paper. 2. The person who pays value for the instrument is obligated to pay it consistent with the indorsement (i.e., to pay it into Mark Smith’s account at First American Bank). 3. The indorser becomes obligated on the instrument. (See Chapter 33.) |
| Qualified | Mark Smith (without recourse) | <ol style="list-style-type: none"> 1. Satisfies the indorsement requirement for negotiation of order paper. 2. Eliminates the indorser’s obligation. (See Chapter 33.) |

not complete as a defense to paying the bank. As assignee of a simple contract, the bank has only those rights that its assignor, Carpenter, has and is subject to all claims and defenses that Hawkins has against Carpenter.

Now assume that instead of simply signing a contract with Hawkins, Carpenter had Homeowner give him a negotiable promissory note in the amount of \$18,500 payable to the order of Carpenter on October 1 and that Carpenter then negotiated the note to the bank. If the bank is able to qualify as a holder in due course, it may collect the \$18,500 from Hawkins on October 1 even though she might have a personal defense against payment of the note because Carpenter had not completed the work on the garage. Hawkins cannot assert that personal defense against a holder in due course. She would have to pay the note to the bank and then independently seek to recover from Carpenter for breach of their agreement. The bank’s improved position is due to its status as a holder in due course of a negotiable instrument. If the instrument in question was not negotiable, or if the bank could not qualify as a holder in due course, then it would be in the same position as the assignee of a simple contract and would be subject to Homeowner’s personal defense.

We turn now to a discussion of the requirements that must be met for the possessor of a negotiable instrument to qualify as a holder in due course.

General Requirements In order to become a **holder in due course**, a person who takes a negotiable instrument must be a *holder*, and take the instrument:

1. For *value*.
2. In *good faith*.
3. *Without notice* that is *overdue* or has been *dishonored* or that there is any uncured default with respect to payment of another instrument issued as part of the same series.
4. *Without notice that the instrument contains an unauthorized signature or has been altered*.
5. *Without notice of any claim of a property or possessory interest in it*.
6. *Without notice that any party has any defense against it or claim in recoupment to it* (3–302[a][2]).

In addition, revised Article 3 requires “that the instrument when issued or negotiated to the holder does not bear such *apparent evidence of forgery or alteration* or is not otherwise so *irregular or incomplete* as to call into question its authenticity” [3–302(a)(1)].

If a person who takes a negotiable instrument does not meet these requirements, he is not a holder in due course. Then the person is in the same position as an assignee of a contract.

Holder To be a **holder** of a negotiable instrument, a person must have possession of an instrument that is either payable to “bearer” or that is payable to him. For example, if Teresa Gonzales is given a check by her grandmother that is made payable “to the order of Teresa Gonzales,” Teresa is a holder of the check because it is made out to her. If Teresa indorses the check “Pay to the order of Ames Hardware, Teresa Gonzales” and gives it to Ames Hardware in payment for some merchandise, then Ames Hardware is the holder of the check. Ames Hardware is a holder because it is in possession of a check that is indorsed to its order. If Ames Hardware indorses the check “Ames Hardware” and deposits it in its account at First National Bank, the bank becomes the holder. The bank is in possession of an instrument that is indorsed in blank and thus is payable to bearer.

It is important that all indorsements on the instrument at the time it is payable to the order of someone are *authorized indorsements*. With limited exceptions (discussed later), a forged indorsement is not an effective

indorsement and prevents a person from becoming a holder.

To be a holder, a person must have a complete chain of authorized indorsements. Suppose the Internal Revenue Service mails to Robert Washington an income tax refund check payable to him. Tom Turner steals the check from Washington’s mailbox, signs (indorses) “Robert Washington” on the back of the check, and cashes it at a shoe store. The shoe store is not a holder of the check because its transferor, Turner, was not a holder and because it needs Washington’s signature to have a good chain of authorized indorsements. Robert Washington has to indorse the check in order for there to be a valid chain of indorsements. Turner’s signature is not effective for this purpose because Washington did not authorize him to sign Washington’s name to the check [1–201(20); 3–403(a); 3–416(a)(2)].

The *Golden Years Nursing Home* case illustrates that a party in possession of a check indorsed in blank is a holder of the instrument.

Golden Years Nursing Home, Inc. v. Gabbard 682 N.E. 2d 731 (Ohio Ct. App. 1996)

From 1972 until 1991, Nancy Gabbard, the office manager for the Golden Years Nursing Home, received at the nursing home Social Security checks drawn on the United States Treasury and made payable either to individual patients or to “Golden Years Nursing Home for [an individual patient].” From 1986 until 1991, Gabbard engaged in an embezzling scheme whereby she would have certain patients indorse their own checks in blank; that is, each patient would sign his own name on the back of the check placing no restrictions on the manner in which the check could subsequently be negotiated. Gabbard would then cash the checks and either keep the cash or deposit the funds into her personal bank account.

In 1992, after Gabbard’s scheme was discovered, Golden Years brought suit against Gabbard and also against the Star Bank Corporation where the checks had been cashed. The patients had in other documents assigned their interests in the checks to Golden Years, and the claim against the bank alleged that it had converted Golden Years’ property by cashing checks with forged indorsements. One of the issues in the lawsuit was whether the checks had been properly negotiated to Star Bank. The trial court granted summary judgment to Golden Years, finding that the bank was not a holder in due course because the checks contained “forged indorsements.” Star Bank appealed.

Per Curiam

The Star Bank argues that the genuine indorsement of the individual payee designated on face of an instrument cannot constitute an unauthorized signature or a forged indorsement. Under the circumstances presented in this case, we agree.

Under the Ohio Uniform Commercial Code, the term “unauthorized signature” “includes both a forgery and a signature made by an agent exceeding his actual or apparent authority,” i.e., it occurs in the context of an agency relationship. Golden Years does not argue that the patients forged their own signatures as that term is commonly understood. Rather, it contends that the signatures constitute unauthorized indorsements

and, thus, were also forged indorsements because “for purposes of a [section 3–419] conversion action, a forged indorsement and an unauthorized indorsement are synonymous.” In addition, Golden Years does not argue that the patients were agents of the nursing home who signed the checks without actual or apparent authority. Rather, Golden Years contends that because the patients had assigned their beneficial interest in the checks to Golden Years, any signature other than Golden Years’ corporate stamp was “unauthorized.”

We note that Golden Years use of the term “unauthorized signature” does not fall within the scope of the UCC definition of that term, i.e., “made without actual, implied or apparent

authority.” More important, assuming that the patients had assigned their interest in the checks to Golden Years, any separate agreement between the patient-payees and Golden Years would not affect the negotiability of patients’ checks bearing the patients’ genuine indorsements.

UCC section 3–119(2) provides that a “separate agreement does not affect the negotiability of an instrument.” Negotiability “is always to be determined by what appears on the face of the instrument alone. . . .” A separate writing may affect the terms of an instrument but the Official Comment makes clear that the inquiry is controlled by what *the instrument itself* states or reflects, not, what the collateral agreement says.

If an instrument is payable to order it is negotiated by delivery with any necessary indorsement. (UCC 3–202). “However, once a payee indorses the check in blank, it becomes bearer paper which can be ‘negotiated by delivery alone’” (UCC 3–204). “Negotiation is the transfer of an instrument in such form that the transferee becomes a holder” (UCC 3–202). Thus, in this case, Gabbard became a holder of the checks when the checks, indorsed in blank by the patient-payees, were delivered to her. When Star Bank accepted the checks that were

indorsed with the genuine signatures of the payees, the checks bore no indication that they had been assigned to Golden Years. Star Bank cashed the checks in good faith without notice of any defenses and thus became a holder in due course.

This analysis does not change even if Gabbard presented the checks to the payees for their indorsement with the intent to embezzle the funds eventually:

Assuming that the stolen bearer instrument does not bear a restrictive indorsement, the thief will himself be a holder and whether or not he is a holder, he can constitute his transferee a holder simply by transfer. If his transferee then cashes the check and so gives value in good faith and without notice of any defense, that transferee will be a holder in due course under 3–302, free of all claims to the instrument on the part of any person and free of all defenses to it.

Judgment for Star Bank.

Note: Ohio’s adoption of Revised Articles 3 and 4 was not effective until Aug. 19, 1994, after the events that gave rise to this action. However, the same result would be expected under Revised Articles 3 and 4.

Value To qualify as a holder in due course of a negotiable instrument, a person must give **value** for it. Value is not identical to simple consideration. Under the provisions of the Revised Article 3, a holder takes for value if (1) the agreed-upon promise of performance has been performed—for example, if the instrument was given in exchange for a promise to deliver a refrigerator and the refrigerator has been delivered; (2) he acquires a security interest in, or a lien on, the instrument; (3) he takes the instrument in payment of, or as security for, an antecedent claim; (4) he gives a negotiable instrument for it; or (5) he makes an irrevocable commitment to a third person [3–303]. Thus, a person who gets a check as a gift or merely makes an executory promise in return for a check has not given value for it and cannot qualify as a holder in due course.

A bank or any person who discounts an instrument in the *regular course of trade* has given value for it. In this context the discount essentially is a means for increasing the return or the rate of interest on the instrument. Likewise, if a loan is made and an instrument is pledged as security for the repayment of the loan, the secured party has given value for the instrument to the amount of the loan. If Axe, who owes Bell a past-due debt, indorses and delivers to Bell, in payment of the debt or as security for its repayment, an instrument issued to Axe, Bell has

given value for the instrument. If a bank allows a customer to draw against a check deposited for collection, it has given value to the extent of the credit drawn against.

If the promise of performance that is the consideration for an instrument has been partially performed, the holder may assert rights as a holder in due course of the instrument only to the fraction of the amount payable under the instrument equal to the partial performance divided by the value of the promised performance [3–302(d)]. For example, Arthur Wells agrees to purchase a note payable to the order of Helda Parks. The note is for the sum of \$5,000. Wells pays Parks \$1,000 on the negotiation of the note to him and agrees to pay the balance of \$4,000 in 10 days. Initially, Wells is a holder in due course for one-fifth of the amount of the note. If he later pays the \$4,000 due he may become a holder in due course for the full amount.

Good Faith To qualify as a holder in due course of a negotiable instrument, a person must take it in **good faith**, which means that the person obtained it honestly and in the observance of reasonable commercial standards of fair dealing [3–103(a)(4)]. If a person obtains a check by trickery or with knowledge that it has been stolen, the person has not obtained the check in good faith and cannot be a holder in due course. A person who pays

too little for an instrument, perhaps because she suspects that something may be wrong with the way it was obtained, may have trouble meeting the good faith test. Suppose a finance company works closely with a door-to-door sales company that engages in shoddy practices. If the finance company buys the consumers' notes from the sales company, it will not be able to meet the good faith test and qualify as a holder in due course of the notes.

Overdue or Dishonored In order to qualify as a holder in due course, a person must take a negotiable instrument before he has notice that it either is **overdue** or has been **dishonored**. The reason for this is that one should perform obligations when they are due. If a negotiable instrument is not paid when it is due, the Code considers the person taking it to be on notice that there may be defenses to the payment of it.

Overdue Instruments If a negotiable instrument is payable on demand, it is overdue (1) the day after demand for payment has been made in a proper manner and form; (2) 90 days after its date if it is a check; and (3) if it is an instrument other than a check, when it has been outstanding for an unreasonably long period of time in light of the nature of the instrument and trade practice [3-304(a)]. Thus, a check becomes **stale** after 90 days. For other kinds of instruments, one must consider trade practices and the facts of the particular case. In a farming community, the normal period for loans to farmers may be six months. A demand note might be outstanding for six or seven months before it is considered overdue. On the other hand, a demand note issued in an industrial city where the normal period of such loans is 30 to 60 days would be considered overdue in a much shorter period of time.

If a negotiable instrument due on a certain date is not paid by that date, normally then it will be overdue at the beginning of the next day after the due date. For example, if a promissory note dated January 1 is payable "30 days after date," it is due on January 31. If it is not paid by January 31, it is overdue beginning on February 1.

As to instruments payable at a definite time, Revised Article 3 sets out the following rules: (1) if the principal is not payable in installments and the due date has not been accelerated, the instrument is overdue on the day after the due date; (2) if the principal is due in installments and a due date has not been accelerated, the instrument is overdue upon default for nonpayment of an installment and remains overdue until the default is cured; (3) if a due date for the principal has been accelerated, the instrument is overdue on the day after the accelerated due date; and (4) unless the due date of the principal has been accelerated, an instrument does not

become overdue if there is a default in payment of interest but no default in payment of principal [3-304(b)].

Dishonored Instruments To be a holder in due course, a person not only must take a negotiable instrument before he has notice that it is overdue but also must take it before it has been dishonored. A negotiable instrument has been *dishonored* when the holder has *presented* it for payment (or acceptance) and payment (or acceptance) has been refused.

For example, Susan writes a check on her account at First National Bank that is payable "to the order of Sven Sorensen." Sven takes the check to First National Bank to cash it but the bank refuses to pay it because Susan has insufficient funds in her account to cover it. The check has been dishonored. If Sven then takes Susan's check to Harry's Hardware and uses it to pay for some paint, Harry's cannot be a holder in due course of the check if it is on notice that the check has been dishonored. Harry's would have such notice if First National had stamped the check "Payment Refused NSF" (not sufficient funds).

Similarly, suppose Carol Carson signs a 30-day note payable to Ace Appliance for \$500 and gives it to Ace as payment for a stereo set. When Ace asks Carol for payment, she refuses to pay because the stereo does not work properly. If Ace negotiates the note to First National Bank, First National cannot be a holder in due course if it knows about Carol's refusal to pay.

Notice of Unauthorized Signature or Alteration A holder who has notice that an instrument contains an unauthorized signature or has been altered cannot qualify as a holder in due course of the instrument. For example, Frank makes out a check in the amount of \$5 payable to George Grocer and gives it to his daughter, Jane, to take to the grocery store to purchase some groceries. The groceries Frank wants cost \$20 and Jane changes the check to read \$25, giving it to Grocer in exchange for the groceries and \$5 in cash. Grocer cannot qualify as a holder in due course if he sees Jane make the alteration to the check or otherwise is on notice of it. [See 3-302(a)(1).]

Notice of Claims If a person taking a negotiable instrument is *on notice of an adverse claim* to the instrument by someone else (for example, that a third person is the rightful owner of the instrument) or that someone earlier sought to rescind a prior negotiation of the instrument, the current holder cannot qualify as a holder in due course. For example, a U.S. Treasury check is payable to Susan Samuels. Samuels loses the check and it is found by Robert Burns. Burns takes the check to a hardware

store, signs “Susan Samuels” on the back of the check in the view of a clerk, and seeks to use it in payment of merchandise. The hardware store cannot be a holder in due course because it is on notice of a potential claim to the instrument by Susan Samuels.

Notice of Breach of Fiduciary Duty One situation in which the Code considers a person to be on notice of a claim is if she is taking a negotiable instrument from a fiduciary, such as a trustee. If a negotiable instrument is payable to a person as a trustee or an attorney for someone, then any attempt by that person to negotiate it for his own behalf or for his use (or benefit) or to deposit it in an account other than that of the fiduciary puts the person on notice that the beneficiary of the trust may have a claim [3–307].

For example, a check is drawn “Pay to the order of Arthur Adams, Trustee for Mary Minor.” Adams takes the check to Credit Union, indorses his name to it, and uses it to pay off the balance on a loan Adams had from Credit Union. Credit Union cannot be a holder in due course because it should know that the negotiation of the check is in violation of the fiduciary duty Adams owes to Mary Minor. Ace should know this because Adams is negotiating the check for his own benefit, not Mary’s.

Notice of Defenses and Claims in Recoupment To qualify as a holder in due course, a person must also acquire a negotiable instrument without notice that any party to it has any **defenses** or **claims in recoupment**. Potential defenses include infancy, duress, fraud, and failure of consideration. Thus, if a person knows that a signature on the instrument was obtained by fraud, misrepresentation, or duress, the person cannot be a holder in due course.

A *claim in recoupment* is a claim of the person obligated on the instrument against the original payee of the instrument. The claim must arise from the transaction that gave rise to the instrument. An example of a claim in recoupment would be as follows: Buyer purchases a used automobile from Dealer for \$8,000, giving the dealer a note for \$8,000 payable in one year. Because the automobile is not as warranted, Buyer has a breach of warranty claim that could be asserted against Dealer as counter-

claim or “claim in recoupment” to offset the amount owing on the note.

Irregular and Incomplete Instruments

A person cannot be a holder in due course of a negotiable instrument if, when she takes it, the instrument is irregular or some important or material term is blank. If the negotiable instrument contains a facial irregularity, such as an obvious alteration in the amount, then it is considered to be **irregular paper**. If you take an irregular instrument, you are considered to be on notice of any possible defenses to it. For example, Kevin writes a check for “one dollar” payable to Karen. Karen inserts the word “hundred” in the amount, changes the figure “\$1” to “\$100,” and gives the check to a druggist in exchange for a purchase of goods. If the alterations in the amount should be obvious to the druggist, perhaps because there are erasures, different handwritings, or different inks, then the druggist cannot be a holder in due course. She would have taken irregular paper and would be on notice that there might be defenses to it. These defenses include Kevin’s defense that he is liable for only \$1 because that is the amount for which he made the check.

Similarly, if someone receives a check that has been signed but the space where the amount of the check is to be written is blank, then the person cannot be a holder in due course of that check. The fact that a material term is blank means that the instrument is **incomplete** and should put the person on notice that the drawer may have a defense to payment of it. To be material, the omitted term must be one that affects the legal obligation of the parties to the negotiable instrument. Material terms include the amount of the instrument and the name of the payee. If a negotiable instrument is unauthorizedly completed after the obligor signed it but before a person acquires it, the person can qualify as a holder in due course if she had no notice about the unauthorized completion. A person has notice if she knows or should know of the unauthorized completion.

In the case that follows, *Firststar Bank, N.A. v. First Service Title Agency, Inc.*, the court concluded that a bank could not qualify as a holder in due course of three instruments because it took them with obvious irregularities that called their authenticity into question.

Firststar Bank, N.A. v. First Service Title Agency, Inc. 54 UCC Rep.2d 701 (Ct. App. Ohio 2004)

On January 22, 2002, as a result of a real estate transaction, First Service Title Agency issued three checks drawn on its account with Key Bank. The first check was for \$850 and was payable to the order of “Richard G. Knostman, Atty. and Mark F. Foster, Atty. and Resa Kermani & Badri Kermani.” The second check was for \$36,295.80 and was made payable to “JD Properties and Resa Kermani & Badri Kermani.” The third check was for \$4,010 and payable to “Knab Mortgage.”

First Service Title subsequently learned that the underlying real estate transaction had been fraudulent. Consequently, on January 23, 2002, it put stop payment orders on all three checks and refunded the monies it had received in the transaction. First Service Title notified the parties and the payees of the stop payment orders.

On the same day that First Service Title Agency placed the stop payment orders on the checks, Randall Davis, who had various accounts at Firststar Bank, presented all three checks to Firststar Bank. Firststar Bank paid the checks to Davis even though Davis was not a party to any of the checks, the checks contained multiple indorsements that appeared to be in the same handwriting, and they all were marked “for deposit only.”

Key Bank subsequently returned the checks to Firststar Bank with the notation “Payment stopped.” Firststar Bank then filed suit against First Services Title Agency and Davis. One of the issues in the suit against First Services Title Agency was whether Firststar Bank was a holder in due course of the three checks.

Per Curiam

A holder becomes a holder in due course if the holder takes the instrument (1) for value; (2) in good faith; (3) and without notice of any claims or defenses otherwise available to the person obligated on the instrument or of various defects in the instrument. A person has notice of a fact when (1) the person has actual knowledge of it; (2) the person has received a notice or notification of it; or (3) from all the facts and circumstances known to the person at the time in question, the person has reason to know that it exists. Additionally, an instrument when issued or negotiated to the holder, cannot bear any evidence of forgery or

alteration that is so apparent or cannot otherwise be so irregular or incomplete as to call into question its authenticity.

The trial court held that Firststar was not a holder in due course because “it failed to exercise ordinary care having knowledge that the checks were forged or otherwise deficient.” The checks in question bore evidence of forgery and were so irregular on their face as to call into question their authenticity and to give notice to a reasonably prudent person exercising ordinary care of defects in the checks.

Judgment affirmed in favor of First Service Title Agency, Inc.

Shelter Rule The transferee of an instrument—whether or not the transfer is a negotiation—obtains those rights that the transferor had, including (1) the transferor’s right to enforce the instrument and (2) any right as a holder in due course [3–203(b)]. This means that any person who can trace his title to an instrument back to a holder in due course receives rights like those of a holder in due course even if he cannot meet the requirements himself. This is known as the **shelter rule** in Article 3. For example, Archer makes a note payable to Bryant. Bryant negotiates the note to Carlyle, who qualifies as a holder in due course. Carlyle then negotiates the note to Darby, who cannot qualify as a holder in due course because she knows the note is overdue. Because Darby can trace her title back to a holder in due course (Carlyle), Darby has rights like a holder in due course when she seeks payment of the note from Archer.

There is, however, a limitation on the shelter rule. A transferee who has himself been a party to any fraud or illegality affecting the instrument cannot improve his position by taking, directly or indirectly, from a later holder in due course [3–203(b)]. For example, Archer, through fraudulent representations, induced Bryant to execute a negotiable note payable to Archer and then negotiated the

instrument to Carlyle, who took as a holder in due course. If Archer thereafter took the note for value from Carlyle, Archer could not acquire Carlyle’s rights as a holder in due course. Archer was a party to the fraud that induced the note, and, accordingly, cannot improve his position by negotiating the instrument and then reacquiring it.

Rights of a Holder in Due Course

Claims and Defenses Generally Revised Article 3 establishes four categories of claims and defenses. They are:

1. *Real defenses*—which go to the validity of the instrument.
2. *Personal defenses*—which generally arise out of the transaction that gave rise to the instrument.
3. *Claims to an instrument*—which generally concern property or possessory rights in an instrument or its proceeds.
4. *Claims in recoupment*—which also arise out of the transaction that gave rise to the instrument.

CONCEPT REVIEW

Requirements for a Holder in Due Course

| Requirement | Rule |
|---|---|
| 1. Must be a <i>holder</i> . | A holder is a person in possession of an instrument payable to bearer or payable to an identified person and he is that person. |
| 2. Must take <i>for value</i> . | A holder has given value: <ol style="list-style-type: none"> To the extent the agreed-on consideration has been paid or performed. To the extent a security interest or lien has been obtained in the negotiable instrument. By taking the negotiable instrument in payment of—or as security for—an antecedent claim. By giving a negotiable instrument for it. By making an irrevocable commitment to a third person. |
| 3. Must take in <i>good faith</i> . | Good faith means honesty in fact and the observance of reasonable commercial standards of fair dealing. |
| 4. Must take <i>without notice</i> that the instrument is <i>overdue</i> . | An instrument payable on demand is overdue the day after demand for payment has been duly made. A check is overdue 90 days after its date. If it is an instrument other than a check and payable on demand, then it is overdue when it has been outstanding for an unreasonably long period of time in light of nature of the instrument and trade practice. If it is an instrument due on a certain date, then it is overdue at the beginning of the next day after the due date. |
| 5. Must take <i>without notice</i> that the instrument has been <i>dishonored</i> . | An instrument has been dishonored when the holder has presented it for payment (or acceptance) and payment (or acceptance) has been refused. |
| 6. Must take <i>without notice</i> of any <i>uncured default</i> with respect to payment of another instrument issued as part of the same series. | If there is a series of notes, holder must take without notice that there is an uncured default as to any other notes in the series. |
| 7. Must take <i>without notice</i> that the instrument contains an <i>unauthorized signature</i> or has been <i>altered</i> . | Notice of unauthorized signature or alteration—that is, a change in a material term—prevents holder from obtaining HDC status. |
| 8. Must take <i>without notice</i> of any <i>claim of a property</i> or possessory <i>interest</i> in it. | Claims of property or possessory interest include: <ol style="list-style-type: none"> Claim by someone that she is the rightful owner of the instrument. Person seeking to rescind a prior negotiation of the instrument. Claim by a beneficiary that a fiduciary negotiated the instrument for his own benefit. |
| 9. Must take <i>without notice</i> that any party has a <i>defense</i> against it. | Defenses include real defenses that go to the validity of the instrument and personal defenses that commonly are defenses to a simple contract. |
| 10. Must take <i>without notice</i> of a <i>claim in recoupment</i> to it. | A claim in recoupment is a claim of the obligor on the instrument against the original payee that arises from the transaction that gave rise to the instrument. |
| 11. The instrument must not bear <i>apparent evidence of forgery or alteration</i> or be <i>irregular or incomplete</i> . | The instrument must not contain obvious reasons to question its authenticity. |

These defenses and claims are discussed in some detail below.

Importance of Being a Holder in Due Course In the preceding chapter, we explained that one advantage of negotiable instruments over other kinds of contracts is that they are accepted as substitutes for money. People are willing to accept them as substitutes for money because, generally, they can take them free of claims or defenses to payment between the original parties to the instrument. On the other hand, a person who takes an assignment of a simple contract gets only the same rights as the person had who assigned the contract.

There are two qualifications to the ability of a person who acquires a negotiable instrument to be free of claims or defenses between the original parties. First, the person in possession of a negotiable instrument must be a *person entitled to enforce the instrument* as well as a *holder in due course* (or must be a holder who has the rights of a holder in due course through the shelter rule). If the person is neither, then she is subject to all claims or defenses to payment that any party to it has. Second, the only claims or defenses that the holder in due course has to worry about are so-called real defenses—those that affect the validity of the instrument—or claims that arose after she became a holder. For example, if the maker or drawer did not have legal capacity because she was a minor, the maker or drawer has a real defense. The holder in due course does not have to worry about other defenses and claims that do not go to the validity of the instrument—the so-called personal defenses.

Real Defenses There are some claims and defenses to payment of an instrument that go to the validity of the instrument. These claims and defenses are known as **real defenses**. They can be used as reasons against payment of a negotiable instrument to any holder, including a holder in due course (or a person who has the rights of a holder in due course). Real defenses include:

1. *Minority or infancy* that under state law makes the instrument void or voidable. For example, if Mark Miller, age 17, signs a promissory note as maker, he can use his lack of capacity to contract as a defense against paying it even to a holder in due course.

2. *Incapacity* that under state law makes the instrument void. For example, if a person has been declared mentally incompetent by a court, then the person has a real defense if state law declares all contracts entered into by the person after the adjudication of incompetency to be void.
3. *Duress* that voids or nullifies the obligation of a party liable to pay the instrument. For example, if Harold points a gun at his grandmother and forces her to execute a promissory note, the grandmother can use duress as a defense against paying it even to a holder in due course.
4. *Illegality* that under state law renders the obligation void. For example, in some states, checks and notes given in payment of gambling debts are void.
5. *Fraud in the essence (or fraud in the factum)*. This occurs where a person signs a negotiable instrument without knowing or having a reasonable opportunity to know that it is a negotiable instrument or of its essential terms. For example, Amy Jones is an illiterate person who lives alone. She signs a document that is actually a promissory note but is told that it is a grant of permission for a television set to be left in her house on a trial basis. Amy has a real defense against payment of the note even to a holder in due course. Fraud in the essence is distinguished from fraud in the inducement, discussed below, which is only a personal defense.
6. *Discharge in bankruptcy*. For example, if the maker of a promissory note has had the debt discharged in a bankruptcy proceeding, she no longer is liable on it and has a real defense against payment [3–305(a)(1)].

Real defenses can be asserted even against a holder in due course of a negotiable instrument because it is more desirable to protect people who have signed negotiable instruments in these situations than it is to protect persons who have taken negotiable instruments in the ordinary course of business.

In the case that follows, *General Credit Corp. v. New York Linen*, the court held that a holder in due course of a check was not subject to the personal defense of failure of consideration that the drawer of the check had against the payee of the check.

General Credit Corp. v. New York Linen Co., Inc. 46 UCC Rep.2d 1055 (New York Civ. Ct., Kings County 2002)

On February 25, 2001, New York Linen Co., a party rental company, agreed to purchase approximately 550 chairs from Elite Products, a company owned by Meir Schmeltzer. A deposit was given for the chairs and upon their delivery, a final check dated February 27, 2001, was issued for \$13,300. After a final count of the chairs was made, New York Linen discovered that

the delivery was not complete. New York Linen then contacted its bank and asked that the bank stop payment of the check. A second check, dated February 28, 2001, for \$11,275, was drafted and delivered to New York Linen the next day. This check reflected the adjusted amount due for the chairs that had actually been delivered.

Unbeknownst to New York Linen, the original check for \$13,300 was sold by Meir Schmeltzer to General Credit Corp., a company in the business of purchasing instruments from payees in exchange for immediate cash. When New York Linen's bank refused to pay the check to General Credit because of the stop-payment order that had been placed on it, General Credit Corp. brought suit against New York Linen to collect on the check.

Baily-Schiffman, Judge

Pursuant to UCC section 3–302 [pre-1990 version inasmuch as New York has not yet adopted Revised Article 3] General Credit is a holder in due course since it took the instrument for value and claims to have all the rights of a holder in due course. General Credit seeks to force New York Linen to pay on the check.

Pursuant to Article 3 of the Uniform Commercial Code, a holder in due course has significant rights vis-à-vis the negotiable instrument being held. A holder of an instrument becomes the holder in due course if the instrument is taken for value, in good faith, and without notice of defect or defense (UCC section 3–302). An indorsed check, as in this case, is a negotiable instrument as defined in this section of the UCC. In this case, pursuant to the applicable sections of Article 3 (sections 3–303 and 3–304), General Credit was a good faith purchaser without notice. As a holder in due course, General Credit is protected by section 3–305, taking the check free of all defenses and claims, except those enumerated by the section. Thus, any defense New York Linen had which related to its

purchase of the chairs was not a defense against General Credit.

New York Linen contends that it would not have drafted a second check if it had known that Elite had already been paid by General Credit. While to the casual observer, the potential double payment by New York Linen may seem an unfair result, it is specifically mandated by the Uniform Commercial Code. New York Linen has offered no legal defense to General Credit's claim as a holder in due course pursuant to Article 3 of the UCC. By tradition the defenses from which a holder in due course takes free are called "personal defenses" and they include failure for lack of consideration, which is New York Linen's defense in this case.

Summary judgment granted in favor of General Credit on its claim against New York Linen.

Note: While this case was decided under the pre-1990 version of Article 3 because New York is the one state that has not yet adopted Revised Article 3, the same result would result from application of Revised Article 3 to the facts of this case.

In addition to the real defenses discussed above, there are several other reasons why a person otherwise liable to pay an instrument would have a defense against payment that would be effective even against a holder in due course. They include:

1. *Forgery.* For example, if a maker's signature has been put on the instrument without his authorization and without his negligence, the maker has a defense against payment of the note.
2. *Alteration of a completed instrument.* This is a partial defense against a holder in due course (or a person having the rights of a holder in due course) and a complete defense against a nonholder in due course. A holder in due course can enforce an altered instrument against the maker or drawer according to its original tenor (terms).
3. *Discharge.* If a person takes an instrument with knowledge that the obligation of any party obligated on the instrument has been discharged, the person takes subject to the discharge even if the person is a holder in due course.

Personal Defenses Personal defenses are legal reasons for avoiding or reducing liability of a person who is liable on a negotiable instrument. Generally, personal defenses arise out of the transaction in which the negotiable instrument was issued and are based on negotiable instruments law or contract law. A holder in due course of a negotiable instrument (or one who can claim the rights of one) is not subject to any personal defenses or claims that may exist between the original parties to the instrument. Personal defenses include:

1. *Lack or failure of consideration.* For example, a promissory note for \$100 was given to someone without intent to make a gift and without receiving anything in return [3–303(b)].
2. *Breach of contract, including breach of warranty.* For example, a check was given in payment for repairs to an automobile but the repair work was defective.
3. *Fraud in the inducement of any underlying contract.* For example, an art dealer sells a lithograph to Cheryl,

telling her that it is a Picasso, and takes Cheryl's check for \$500 in payment. The art dealer knows that the lithograph is not a genuine Picasso but a forgery. Cheryl has been induced to make the purchase and to give her check by the art dealer's fraudulent representation. Because of this fraud, Cheryl has a personal defense against having to honor her check to the art dealer.

4. Incapacity to the extent that state law makes the obligation voidable, as opposed to void. For example, where state law makes the contract of a person of limited mental capacity but who has not been adjudicated incompetent voidable, the person has a personal defense to payment.

5. Illegality that makes a contract voidable, as opposed to void. For example, where the payee of a check given for certain professional services was required to have a license from the state but did not have one.

6. Duress, to the extent it is not so severe as to make the obligation void but rather only voidable. For example, if the instrument was signed under a threat to prosecute the maker's son if it was not signed, the maker might have a personal defense.

7. Unauthorized completion or alteration of the instrument. For example, the instrument was completed in an unauthorized manner, or was altered after it left the maker's or drawer's possession.

8. Nonissuance of the instrument, conditional issuance, and issuance for a special purpose. For example, the person in possession of the instrument obtained it by theft or by finding it, rather than through an intentional delivery of the instrument to him [3-105(b)].

9. Failure to countersign a traveler's check [3-106(c)].

10. Modification of the obligation by a separate agreement [3-117].

11. Payment that violates a restrictive indorsement [3-206(f)].

12. Breach of warranty when a draft is accepted (discussed in following chapter) [3-417(b)].

The following example illustrates the limited extent to which a maker or drawer can use personal defenses as a reason for not paying a negotiable instrument he signed. Suppose Tucker Trucking bought a used truck from Honest Harry's and gave Harry a 60-day promissory note for \$32,750 in payment for the truck. Honest Harry's "guaranteed" the truck to be in "good working condition," but in fact the truck had a cracked engine block. If Harry tries to collect the \$32,750 from Tucker Trucking, Tucker Trucking could claim breach of warranty as a reason for not paying Harry the full \$32,750 because Harry is not a holder in due course. However, if Harry negotiated the note to First National Bank and the bank was a holder in due course, the situation would be changed. If the bank tried to collect the \$32,750 from Tucker Trucking, Tucker Trucking would have to pay the bank. Tucker Trucking cannot use its defense or claim of breach of warranty as a reason for not paying the bank, which qualified as a holder in due course. It is a personal defense. Tucker Trucking must pay the bank the \$32,750 and then pursue its breach of warranty claim against Harry.

The rule that a holder in due course takes a negotiable instrument free of any personal defenses or claims to it has been modified to some extent, particularly in relation to certain instruments given by consumers. These modifications will be discussed in the next section of this chapter.

Claims to the Instrument For purposes of Revised Article 3, the term *claims* to an instrument can include:

1. A claim to ownership of the instrument by one who asserts that he is the owner and was wrongfully deprived of possession.
2. A claim of a lien on the instrument.
3. A claim for rescission of an indorsement.

A holder in due course takes free of claims that arose before he became a holder but is subject to those arising

Ethics in Action

Asserting the Defense of Illegality against Payment of a Gambling Debt

Assume that in the course of a vacation you drop by the casino in the hotel where you were staying. You decide to play a few hands of blackjack. After winning your first few hands, you then go on a sustained losing streak. Believing your luck is about to change, you keep going until you have lost \$10,000,

much more than you intended or could readily afford. At the end of the evening, you write the casino a check. Later in the hotel bar, you tell your sad tale to a fellow drinker who is a local lawyer and who informs you that a state law makes gambling obligations void. Would it be ethical for you to stop payment on the check and then assert the defense of illegality against the holder of the check?

when or after she becomes a holder in due course. For example, if a holder impairs the collateral given for an obligation, he may be creating a defense for an obligor.

Claims in Recoupment A *claim in recoupment* is not actually a defense to an instrument but rather an *offset to liability*. For example, Ann Adams purchases a new automobile from Dealership, giving it a note for the balance of the purchase price beyond her down payment. After accepting delivery, she discovers a breach of warranty that the dealer fails to remedy. If Dealer has sold the note to a bank that subsequently seeks payment on the note from Adams, she has a claim in recoupment for breach of warranty. If the bank is a holder in due course, the claim in recoupment cannot be asserted against it. However, if the bank is not a holder in due course, then Adams can assert the claim in recoupment to reduce the amount owing on the instrument at the time the action is brought against her on the note. Her claim could serve only to reduce the amount owing and not as a basis for a net recovery from the bank. However, if Dealer was the person bringing an action to collect the note, Adams could assert the breach of warranty claim as a counterclaim and potentially might recover from Dealer any difference between the claim and the damages due for breach of warranty.

The obligor may assert a claim up to the amount of the instrument if the holder is the original payee but cannot assert claims in recoupment against a holder in due course. In addition, the obligor may assert a claim against a transferee who does not qualify as a holder in due course, but only to reduce the amount owing on the instrument at the time it brought the claim in recoupment.

Changes in the Holder in Due Course Rule for Consumer Credit Transactions

Consumer Disadvantages The rule that a holder in due course of a negotiable instrument is not subject to personal defenses between the original parties to it makes negotiable instruments a readily accepted substitute for money. This rule can also result in serious disadvantages to consumers. Consumers sometimes buy goods or services on credit and give the seller a negotiable instrument such as a promissory note. They often do this without knowing the consequences of their signing a negotiable instrument. If the goods or services are defective or not delivered, the consumer would like to withhold payment of the note until the seller corrects the problem or makes the delivery. Where the note is still

held by the seller, the consumer can do this because any defenses of breach of warranty or nonperformance are good against the seller.

However, the seller may have negotiated the note at a discount to a third party such as a bank. If the bank qualifies as a holder in due course, the consumer must pay the note in full to the bank. The consumer's personal defenses are not valid against a holder in due course. The consumer must pay the holder in due course and then try to get her money back from the seller. This may be difficult if the seller cannot be found or will not accept responsibility. The consumer would be in a much stronger position if she could just withhold payment, even against the bank, until the goods or services are delivered or the performance is corrected.

State Consumer Protection Legislation

Some state legislatures and courts have limited the holder in due course rule, particularly as it affects consumers. State legislation limiting the doctrine typically amended state laws dealing with consumer credit transactions. For example, some state laws prohibit a seller from taking a negotiable instrument other than a check from a consumer in payment for consumer goods and services. Other states require promissory notes given by consumers in payment for goods and services to carry the words *consumer paper*. Holders of instruments with the legend "consumer paper" are not eligible to be holders in due course³ [3-106(d)].

Federal Trade Commission Regulation

The Federal Trade Commission (FTC) has promulgated a regulation designed to protect consumers against operation of the holder in due course rule. The FTC rule applies to persons who sell to consumers on credit and have the consumer sign a note or an installment sale contract or arrange third-party financing of the purchase. The seller must ensure that the note or the contract contains the following clause:

NOTICE: ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF THE GOODS OR SERVICES OBTAINED PURSUANT HERETO OR

³Revised Article 3 expressly deals with these state variations in section 3-106(d) and Official Comments 3 to 3-106 and Comments 3 to 3-305. Section 3-106(d) permits instruments containing legends or statements required by statutory or administrative law that preserve the obligator's right to assert claims or defenses against subsequent holders as within Article 3 except that no holder can be a holder in due course.

CONCEPT REVIEW

Claims and Defenses against Payment of Negotiable Instruments

| Claim or Defense | Examples |
|---|---|
| <p>Real Defense Valid against all holders, including holders in due course and holders who have the rights of holders in due course.</p> | <ol style="list-style-type: none"> 1. Minority that under state law makes the contract void or voidable. 2. Other lack of capacity that makes the contract void. 3. Duress that makes the contract void. 4. Illegality that makes the contract void. 5. Fraud in the essence (fraud in the factum). 6. Discharge in bankruptcy. |
| <p>Personal Defense Valid against plain holders of instruments—but not against holders in due course or holders who have the rights of in due course holders through the shelter rule.</p> | <ol style="list-style-type: none"> 1. Lack or failure of consideration. 2. Breach of contract (including breach of warranty). 3. Fraud in the inducement. 4. Lack of capacity that makes the contract voidable (except minority). 5. Illegality that makes the contract voidable. 6. Duress that makes the contract voidable. 7. Unauthorized completion of an incomplete instrument, or material alteration of the instrument. 8. Nonissuance of the instrument. 9. Failure to countersign a traveler's check. 10. Modification of the obligation by a separate agreement. 11. Payment that violates a restrictive indorsement. 12. Breach of warranty when a draft is accepted. |

WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER BY THE DEBTOR SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

The effect of the notice is to make a potential holder of the note or contract subject to all claims and defenses of the consumer. This is illustrated in *Music Acceptance Corp.*, which follows.

In the hypothetical case set out at the start of this chapter, Rachel buys a used car and gives the seller a negotiable promissory note in which she promises to pay the balance in 12 months. The seller then negotiates the promissory note to a third party. When Rachel discovers that, contrary to the seller's assurances, the car had previously been involved in an accident, Rachel would like to assert a defense of failure of consideration or breach of contract (warranty) against payment. You know that normally, if the person to whom the note was assigned can qualify as a holder in due course, then the maker of a note will not be

able to assert those particular defenses against payment because they are considered to be "personal defenses," and a holder in due course of an instrument takes the instrument free of such defenses against payment. However, the introductory hypothetical goes on to pose the question of whether it would make a difference if the promissory note contained the clause required by the Federal Trade Commission in consumer notes. You are now in a position to know that it would make a difference in Rachel's rights and that she would be able to assert such defenses against payment of the note to the current holder, even if he could qualify as holder in due course. If the note or contract does not include the clause required by the FTC rule, the consumer does not gain any rights that he would not otherwise have under state law, and a subsequent holder may qualify as a holder in due course. However, the FTC does have the right to seek a fine of as much as \$10,000 against the seller who failed to include the clause.

Music Acceptance Corp. v. Lofing

39 Cal. Rptr. 159 (Cal. Ct. App. 1995)

Dan Lofing purchased a Steinway grand piano from Sherman Clay & Co., Steinway & Sons' Sacramento dealer, and received financing through Sherman Clay's finance company, Music Acceptance Corporation (MAC). The consumer note for \$19,650.94 prepared by MAC and signed by Lofing included the following in boldface type:

NOTICE

ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF GOODS OR SERVICES OBTAINED PURSUANT HEREIN OR WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

Lofing received a warranty from Steinway that provided the company "will promptly repair or replace without charge any part of this piano which is found to have a defect in material or workmanship within five years" from the date of sale.

Lofing became disenchanted with the piano after experiencing a variety of problems with it. There was a significant deterioration in the action and tonal quality of the piano which the Sherman Clay piano technician was unable to remedy despite lengthy and repeated efforts. A Steinway representative who was called in to inspect the piano concluded that it was in "terrible condition" and expressed surprise that it had ever left the factory. He concluded that the piano would have to be completely rebuilt at the factory.

Because the piano was impossible to play and was ruining his technique, Lofing stopped making payments on the piano. To mitigate his damages, Lofing sold the piano for \$7,000 and purchased a Kawai piano from another dealer. He brought suit against Sherman Clay, Steinway, and MAC for, among other things, breach of warranty. One of the issues in the litigation was whether the Notice in the note allowed him to assert the breach of warranty as a grounds for not continuing to pay off the note to MAC.

Sparks, Associate Justice

The FTC adopted a rule which makes it an unfair or deceptive act or practice for a seller to take or receive a consumer credit application which does not contain the following provision in large boldface type:

NOTICE

ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF GOODS OR SERVICES OBTAINED PURSUANT HEREIN OR WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

This notice is identical to that included in Lofing's sales contract.

The FTC enacted this rule because it believed it was "an unfair practice for a seller to employ procedures in the course of arranging the financing of a consumer deal which separate[d] the buyer's duty to pay for goods or services from the seller's reciprocal duty to perform as promised." The FTC explained: "Our primary concern . . . has been the distribution or allocation of costs occasioned by seller misconduct in credit sale transactions. These costs arise from breaches of contract,

breaches of warranty, misrepresentation, and even fraud. The current commercial system which enables sellers and creditors to divorce a consumer's obligation to pay for goods and services from the seller's obligation to perform as promised, allocates all of these costs to the consumer/buyer."

In its "Guidelines on Trade Regulation Rule Concerning Preservation of Consumers' Claims and Defenses," the FTC explained further:

[The] dramatic increase in consumer credit over the past thirty years has caused certain problems. Evolving doctrines and principles of contract law have not kept pace with changing social needs. One such legal doctrine which has worked to deprive consumers of the protection needed in credit sales is the so-called "holder in due course doctrine." Under this doctrine, the obligation to pay for goods or services is not conditioned upon the seller's corresponding duty to keep his promises.

Typically, the circumstances are as follows: A consumer relying in good faith on what the seller has represented to be a product's characteristics, service warranty, etc., makes a purchase on credit terms. The consumer then finds the product unsatisfactory; it fails to measure up to the claims made on its behalf by the seller, or the seller refuses to provide promised maintenance. The consumer, therefore, seeks relief from his debt obligations only to find that no relief is possible. His debt obligation, he is told, is not to the seller

but to a third party whose claim to payment is legally unrelated to any promise made about the product.

The seller may, prior to the sale, have arranged to have the debt instrument held by someone other than himself; he may have sold the debt instrument at a discount after the purchase.

From the consumer's point of view, the timing and means by which the transfer was effected are irrelevant. He has been left without ready recourse. He must pay the full amount of his obligation. He has a product that yields less than its promised value. And he has been robbed of the only realistic leverage he possessed that might have forced the seller to provide satisfaction—his power to withhold payment.

As one court noted, before this rule was adopted “[t]he reciprocal duties of the buyer and seller which were mutually dependent under ordinary contract law became independent of one another. Thus, the buyer’s duty to pay the creditor was not excused upon the seller’s failure to perform. In abrogating the holder in due course rule in consumer credit transactions, the FTC preserved the consumer’s claims and defenses against the creditor-assignee. The FTC rule was therefore designed to reallocate the cost of seller misconduct to the creditor. The commission felt the creditor was in a better position to absorb the loss or recover the cost from the guilty party—the seller.”

MAC contends the FTC rule is inapplicable here. MAC cites comments in the FTC guidelines discussing possible limitations on the rule. Specifically, the FTC points out that

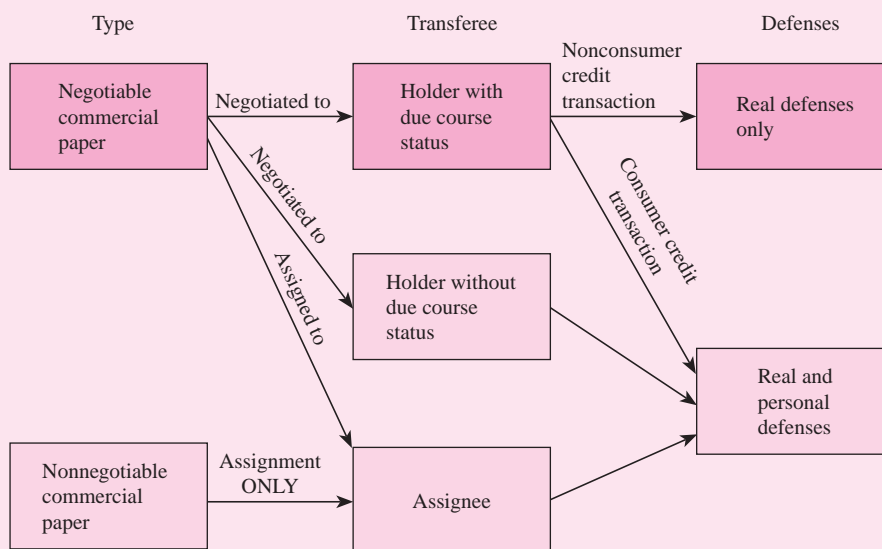

because the regulation’s definition of “Financing a Sale” expressly refers to the Truth-in-Lending Act, it “thus incorporate[s] the limitations contained in these laws. As a result, even with respect to transactions involving a sale of consumer goods or services, a purchase involving an expenditure of more than \$25,000 is not affected by the Rule.” MAC argues that since the cash price of the piano, including sales tax, was \$25,650.94, the transaction is exempt from these requirements.

MAC’s argument is unavailing as it is based on the guideline’s unfortunate use of the phrase “expenditure of more than \$25,000.” As Lofing points out, the exemption referred to in the Truth-in-Lending Act does not speak of expenditures of more than \$25,000, but of transactions in which the “total amount financed exceeds \$25,000.” Here, because Lofing traded in his piano, the total amount financed was \$19,650.94, well below the exemption level.

More importantly, it is irrelevant whether the FTC rule applies. Even if such a notice was not required to be given, the fact remains that it was: Lofing’s contract included the precise language mandated by the FTC rule. Put simply, Lofing is in the same position whether we apply the FTC rule or the language of his particular contract. The jury’s finding that Sherman Clay breached its warranties mandates that the judgment in favor of MAC and against Lofing be reversed.

Judgment in favor of Lofing.

Problems and Problem Cases

- From 1999 through 2003 Christina Cidoni, individually and as president of Spectrum Settlement Group, Inc., maintained bank accounts at the Bay Shore branch of NSBC Bank USA (NSBC). On August 30, 2003, Cidoni appeared at a real estate closing for the purchase and sale of residential property as an independent title closer. At the closing, a check drawn on the Fleet Bank Boston account of Laura Hamel, the attorney handling the closing, and payable to “ABN Amro Mortgage” was issued in the amount of \$207,530.14. The check was intended to satisfy the existing mortgage of the sellers of the residential property. One of Spectrum’s responsibilities was to see that the check was delivered to a representative of ABN Amro Mortgage. Instead, Cidoni indorsed the check on the back “for deposit” and deposited it into Spectrum’s account at NSBC. Was the check negotiated to the bank?
- A bank cashed the checks of its customer, Dental Supply, Inc., presented to the bank by an employee of Dental Supply named Wilson. The checks were indorsed in blank with a rubber stamp of Dental Supply, Inc. Wilson had been stealing the checks by taking cash rather than depositing them to Dental Supply, Inc.’s account. What could Dental Supply have done to avoid this situation?
- Reliable Janitorial Service, Inc., maintained a bank account with AmSouth Bank. Rosa Pennington was employed by Reliable as a bookkeeper/office manager. She deposited checks made payable to Reliable but did not have authority to write checks on Reliable’s account. Beginning in January, Pennington obtained counter deposit slips from AmSouth. She wrote on the deposit slips that the depositor was “Reliable Janitorial Services, Inc.,” but in the space for the account number, Pennington wrote the account number for her own personal account with AmSouth. She stamped the checks that were made payable to “Reliable Janitorial Service, Inc.” with the indorsement “For Deposit Only, Reliable Carpet Cleaning, Inc.” Over an 11-month period, Pennington was able to deposit 169 checks so indorsed. AmSouth credited the deposits to Pennington, not Reliable. Pennington spent all the funds that she diverted to her account. When Reliable discovered the fraud, it brought suit against AmSouth for conversion and sought to have its account credited with the improperly paid checks. Was AmSouth Bank liable to Reliable for the value of

the restrictively indorsed checks that it paid inconsistently with the indorsement?

- Reggie Bluiett worked at the Silver Slipper Gambling Hall and Saloon. She received her weekly paycheck made out to her from the Silver Slipper. She indorsed the check in blank and left it on her dresser at home. Fred Watkins broke into Bluiett’s house and stole the check. Watkins took the check to the local auto store, where he bought two tires at a cost of \$71.21. He obtained the balance of the check in cash. Could the auto store qualify as a holder in due course?
- While cleaning out his self-storage locker in Largo, Florida, in late January 2001, Kim Griffith found a certificate of deposit issued by Mellon Bank, N.A., of Pittsburgh, Pennsylvania, on July 3, 1975, for the amount of \$530,000. The certificate was entitled “Negotiable Certificate of Deposit, No. I-48346” and stated as follows:

This certifies that there has been deposited with this Bank the sum of FIVE HUNDRED AND THIRTY THOUSAND AND 00/100 * * DOLLARS \$530,000* which will be paid to bearer on August 4, 1975 with interest at the rate of 5.75% per annum on presentation of this certificate at any office of this Bank in Pennsylvania. This deposit is not subject to check, draft, or any form of withdrawal prior to the above maturity date.

Griffith and his wife found the certificate in one of several books stored in their storage locker as he and his wife were shaking out all of the books in the locker. Griffith purchased the books in the locker from some unnamed person and was unable to recall how much he had paid for them. On its face, the certificate of deposit had not been marked paid. On August 15, 2002, Griffith presented the certificate for payment in person at a Mellon Bank office in Pennsylvania. Mellon refused to honor the certificate of deposit, and Griffith brought suit against Mellon seeking payment of the certificate, seeking to recover \$2.5 million dollars in principal and interest. Among the issues in the case were whether Griffith was a holder in due course or a person entitled to enforce the instrument.

Pennsylvania law provides that:

After the lapse of twenty years, all debts . . . not within the orbit of the Statue of Limitations are presumed to have been paid. . . . Until the passage of twenty years it is the burden of the debtor to prove payment; after the passage of twenty years, it is the burden of the creditor to prove non-payment and for the satisfaction of such

burden the evidence must be clear and convincing and must consist of proof other than the specialty itself.

Griffith presented evidence that the certificate had not been marked paid and it was the policy of Mellon Bank to mark certificates paid or to destroy them when they are redeemed. Was Griffith a holder in due course or a person otherwise entitled to enforce the certificate of deposit?

6. Charles Alcombrack was appointed guardian for his son, Chad Alcombrack, who was seven years old and the beneficiary of his grandfather's life insurance policy. The insurance company issued a check for \$30,588.39 made payable to "Charles Alcombrack, Guardian of the Estate of Chad Stephen Alcombrack, a Minor." The attorney for the son's estate directed the father to take the check, along with the letters of guardianship issued to the father, to the bank and open up a guardianship savings and checking account. Instead, the father took the check, without the letters of guardianship, to the Olympic Bank and opened a personal checking and a personal savings account. Despite the fact that the check was payable to the father in his guardianship capacity, the bank allowed the father to place the entire amount in his newly opened personal accounts. The father used all but \$320.60 of the trust money for his personal benefit. A new guardian, J. David Smith, was appointed for Chad. Smith brought suit against the Olympic Bank, on Chad's behalf, to recover the amount of the check. Was the bank a holder in due course of the check?
7. On December 11, 1990, two American Express money orders in the amounts of \$550 and \$650, respectively, which were payable to Stacey Anne Dillabough, were presented to Chuckie Enterprise, Inc. (Chuckie's), a check-cashing operation in Philadelphia. The money orders were duly indorsed, and photo identifications were provided by the payee, whereupon Chuckie's paid the face amounts minus a 2 percent fee. Dillabough was a previous customer of Chuckie's and was recognized as such by the president of Chuckie's, Charles Giunta, who handled the transaction. The two money orders had been stolen from the premises of an American Express agent. When stolen, the money orders were signed with the preprinted signature of the chairman of American Express but were blank as to payee, date, sender, and amount. When presented to Chuckie's, however, they had been completed by persons unknown. Dillabough's role is not clear from the case. She could have been an accomplice of the thief, the thief, or even someone who bought it from the thief, but the court does not say, and it is not critical to the issue here.

The money orders were passed through the usual banking channels and were presented for payment at United Bank of Grand Junction, Colorado. American Express, having noted on its "fraud log" that the money orders were stolen, returned the money orders marked "Reported Lost or Stolen Do Not Redeposit." American Express refused to pay the amounts of the money orders.

Triffin, a commercial discounter, purchased the dishonored money orders for cash from Chuckie's and took an assignment of all of Chuckie's rights, claims, and interests in the money orders. Triffin brought suit against Dillabough and American Express, demanding payment of the stolen money orders. Judgment was entered against Dillabough by default. Where blank money orders were stolen and completed without authorization prior to their negotiation, can the transferee enforce the instruments as completed if he qualifies as a holder in due course?

8. Panlick, the owner of an apartment building, entered into a written contract with Bucci, a paving contractor, whereby Bucci was to install asphalt paving on the parking lot of the building. When Bucci finished the job, Panlick gave Bucci a check for \$6,500 and a promissory note for \$7,593 with interest at 10 percent due six months from its date. When the note came due, Panlick refused to pay it. Bucci brought suit to collect the note, and Panlick claimed that there had been a failure of consideration because the asphalt was defectively installed. Can Panlick assert this defense against Bucci?
9. Ralph Herrmann wrote a check for \$10,000 payable to Ormsby House, a hotel-casino in Carson City, Nevada, and exchanged it for three counterchecks he had written earlier that evening to acquire gaming chips. Ormsby House was unable to collect the proceeds from the check because Herrmann had insufficient funds in his account. The debt evidenced by the check was assigned to Sea Air Support, Inc., d/b/a Automated Accounts Associates, for collection. Sea Air was also unsuccessful in its attempts to collect and filed a lawsuit against Herrmann to recover on the dishonored check. Nevada law then provided that all

instruments drawn for the purpose of reimbursing or repaying any money knowingly lent or advanced for gaming are “utterly void, frustrate, and of none effect.” Is Herrmann still liable to Sea Air?

10. Pedro and Paula de la Fuente were visited by a representative of Aluminum Industries, Inc., who was seeking to sell them aluminum siding for their home. They agreed to purchase the siding and signed a number of documents, including a retail installment contract and a promissory note for \$9,137.24. The contract granted Aluminum Industries, Inc., a first lien on the de la Fuentes’ residence; this was in violation of the Texas Civil Code, which prohibited such provisions. The promissory note contained a notice in bold type as required by the Federal Trade Commission. It read in part:

NOTICE: ANY HOLDER OF THIS CONSUMER CREDIT CONTACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF GOODS OR SERVICES OBTAINED PURSUANT HERETO WITH THE PROCEEDS THEREOF.

Aluminum Industries assigned the promissory note and first lien to Home Savings Association. Aluminum Industries subsequently went out of business. Home Savings brought suit against the de la Fuentes to collect the balance due on the note. Home Savings contended that it was a holder in due course and that the de la Fuentes could not assert any defense against it that they had against Aluminum Industries. Can an assignee of a consumer promissory note that includes the notice required by the FTC qualify as a holder in due course?

Does Your State Void Instruments Given for Gambling Debts?

Use the Internet to locate the statutes for your state. Ascertain whether in your state checks and notes given in satisfaction of gambling debts are void.

chapter 33

LIABILITY OF PARTIES

When you sign a promissory note, you expect that you will be liable for paying the note on the day it is due. Similarly, when you sign a check and mail it off to pay a bill, you expect that it will be paid by your bank out of your checking account and that if there are not sufficient funds in the account to cover it, you will have to make it good out of other funds you have. The liability of the maker of a note and of the drawer of a check is commonly understood.

However, there are other ways a person can become liable on a negotiable instrument. Moreover, some of the usual liability rules are modified when a party is negligent in issuing or paying a negotiable instrument—or otherwise contributes to a potential loss.

The issues that will be discussed in this chapter include:

- Suppose you indorse a check that is payable to your order and “cash” it at a check-cashing service. What liability have you assumed by indorsing and transferring the check?
- Suppose you make out a check in such a way that someone is able to raise (change) the amount of the check from \$1 to \$1,000 and then obtain payment of the check from the drawee bank. Will your bank be entitled to charge your account for \$1,000 or can you limit the charge to \$1, the original amount of the check?
- Suppose one of your employees who has responsibility for writing checks makes some of them payable to people you normally do business with and then keeps the checks, indorses the checks in the name of the named payee, and obtains payment of the checks for her own purposes. Are you entitled to have your account recredited for the amount of the checks on the grounds they were paid over a forged indorsement?
- Whether, in some circumstances, it is ethical to use a qualified indorsement to avoid the contractual liability of an indorser.

THUS FAR IN PART 7, Commercial Paper, the focus has been on the nature of, and requirements for, negotiable instruments as well as the rights that an owner of an instrument can obtain and how to obtain them. Another important aspect to negotiable instruments concerns how a person becomes liable on a negotiable instrument and the nature of the liability incurred.

Liability in General

Liability on negotiable instruments flows from signatures on the instruments as well as actions taken concerning them. It can arise from the fact that a person has signed a negotiable instrument or has authorized someone else to sign it. The liability depends on the capacity in which the person signs the instrument. Liability also

arises from (1) transfer or presentment of an instrument; (2) negligence relating to the issuance, alteration, or indorsement of the instrument; (3) improper payment; or (4) conversion of an instrument.

Contractual Liability

When a person signs a negotiable instrument, whether as maker, drawer, indorser, or in some other capacity, she generally becomes contractually liable on the instrument. As mentioned above, this contractual liability depends on the capacity in which the person signed the instrument. The terms of the contract of the parties to a negotiable instrument are not set out in the text of the instrument. Rather, Article 3 of the Uniform Commercial Code supplies the terms, which are as

much a part of the instrument as they would be as part of its text.

Primary and Secondary Liability A party to a negotiable instrument may be either *primarily liable* or *secondarily liable* for payment of it. A person who is primarily liable has agreed to pay the negotiable instrument. For example, the maker of a promissory note is the person who is primarily liable on the note.

A person who is secondarily liable is like a guarantor on a contract; Article 3 requires a secondary party to pay the negotiable instrument only if a person who is primarily liable defaults on that obligation. Chapter 28, Introduction to Credit and Secured Transactions, discusses guarantors of contracts.

Secondary liability is a contingent liability. To trigger it, the instrument must be properly *presented* for payment or acceptance, the instrument must be *dishonored* (that is, the payment or acceptance must be refused or not obtained within the prescribed time), and *notice of the dishonor* must be given to the person secondarily liable. The notice may be given in any reasonable manner, such as orally, in writing, or by e-mail, and must be given to any party other than a bank (which has a very limited time to provide the notice) within 30 days following the day of the dishonor.

Obligation of a Maker The **maker** of a promissory note is primarily liable for payment of it. The maker makes an unconditional promise to pay a fixed amount of money and is responsible for making good on that promise. The obligation of the maker is to pay the negotiable instrument according to its terms at the time he issues it or, if it is not issued, then according to its terms at the time it first came into possession of a holder [3–412].¹ If the material terms of the note are not complete when the maker signs it, then the maker's obligation is to pay the note as it is completed, provided that the terms filled in are as authorized. If the instrument is incomplete when the maker signs it and it is completed in an unauthorized manner, then the maker's liability will depend on whether the person seeking to enforce the instrument can qualify as a holder in due course.

The obligation of the maker is owed to (1) a *person entitled to enforce the instrument* or (2) any indorser who paid the instrument pursuant to her indorser's liability (discussed below). A person entitled to enforce an

instrument includes (1) the holder of the instrument; (2) a nonholder in possession of the instrument who has the rights of a holder; and (3) a person not in possession of the instrument who has the right to enforce the instrument under section 3–309, which deals with lost, destroyed, or stolen instruments.

Revised Article 3 provides that the *drawer of a cashier's check* has the same obligation as the maker or issuer of a note. Thus, it treats the bank drawer of a draft drawn on a bank the same as a note for purposes of the issuer's liability rather than treating the issuer as a drawer of a draft [3–412].

Obligation of a Drawee or an Acceptor

The **acceptor** of a draft is obligated to pay the draft according to the terms at the time of its acceptance. As was discussed in Chapter 31, acceptance is the drawee's signed engagement to honor the draft as presented—and is commonly indicated by the signature of the acceptor on the instrument itself. The acceptor's obligation extends to (1) a person entitled to enforce the draft, (2) the drawer, and (3) an indorser who paid the instrument pursuant to her indorser's liability [3–413].

If the certification of a check or other acceptance of a draft states the amount certified or accepted, the obligation of the acceptor is that amount. If the certification or acceptance does not state an amount, if the amount of the instrument is subsequently raised and then the instrument is negotiated to a holder in due course, the obligation of the acceptor is the amount of the instrument at the time a holder in due course takes it [3–413(b)].

At the time a payee receives possession of a check or other draft, the payee gets the drawer's contract to pay the instrument if the drawee—bank or buyer of goods—does not pay. (This liability is discussed in the next section of this chapter.) *Issuance* of the check or draft, however, does not obligate the *drawee* to pay it. Like other Article 3 contracts discussed in this chapter, the drawee does not have liability on the instrument until it *signs* the instrument.

The drawer or a holder of the check may ask the drawee bank to accept or certify the check. The drawee bank certifies the check by signing its name to the check and, with that act, accepts liability as acceptor. The drawee bank debits, or takes the money out of, the drawer's account and holds the money to pay the check. If the drawee bank certifies the check, it becomes primarily, or absolutely, liable for paying the check as it reads at the time of its acceptance [3–413], and its acceptance discharges the drawer and indorsers who indorsed before the acceptance. Similarly, when a trade draft is presented

¹The numbers in brackets refer to sections of the Uniform Commercial Code (UCC), which is reproduced in the appendix.

for acceptance or payment, and the named drawee accepts it, then the drawee accepts the obligation set forth in the instrument and the drawer and earlier indorsers are discharged.

A drawee has no liability on a check or other draft unless it certifies or accepts the check or draft—that is, agrees to be liable on it. However, a drawee bank that refuses to pay a check when it is presented for payment

may be liable to the drawer for wrongfully refusing payment, assuming the drawer had sufficient funds in his checking account to cover it. The next chapter discusses this liability of a drawee bank.

The principle that a drawee has no liability on an instrument to a holder unless it has certified or accepted the instrument is illustrated in the following case, *Harrington v. MacNab*.

Harrington v. MacNab

45 UCC Rep.2d 698 (U.S.D.C.D. Maryland 2001)

Harrington, an experienced attorney, conducted a settlement on a piece of property in Cambridge, Maryland, being purchased by a couple named MacNab. They showed up for the settlement without certified funds, but rather with a personal check drawn on their Merrill Lynch cash management account for \$150,128.70. Instead of refusing to go forward with the settlement, Harrington phoned the Merrill Lynch office in Delaware where the MacNabs had their account. He was told by a Ms. Ruark of Merrill Lynch, in response to his inquiry, that there were sufficient funds in the MacNabs' account to cover the check and that she would put a hold on the account in the amount of the check. When asked to confirm this in writing, Ms. Ruark sent a fax to Harrington that read as follows: "This letter is to verify that the funds are available in the Merrill Lynch account. There is a pend on the funds for the check that was given to you."

Harrington interpreted "pend" to mean that a hold would be placed on the MacNabs' account to cover the check in question. Merrill Lynch later claimed it meant that the funds deposited to cover that check were not themselves yet cleared. In fact, the MacNabs' account did not contain sufficient cleared funds to cover the check, which bounced. Subsequent promises by the MacNabs to make the check good came to naught. Harrington obtained a judgment against the MacNabs, but it was never satisfied in full. Harrington then brought suit against Merrill Lynch for negligent misrepresentation.

Smalkin, District Judge

There are no reported cases in Maryland in which a payee on a check has recovered against the drawee (or one, like Merrill Lynch, in the position of a drawee) for a negligent statement that there were sufficient (cleared) funds in the drawee's account to cover a check and/or that a hold would correspondingly be placed on the account. This court is of the opinion that the Court of Appeals of Maryland would not recognize a cause of action on these facts.

Here, there is no contractual privity or its equivalent between Mr. Harrington and Merrill Lynch which was in a position equivalent to that of the drawee on the MacNabs' check (a check is a species of draft, see section 3-104[f]), nor can any argument be made that Mr. Harrington was a third-party beneficiary of the MacNab cash management account agreement any more than the Baltimore Gas and Electric Company is, by virtue of the fact I draw it a check to cover my utility bill, the third party beneficiary of my checking-account contract with my bank.

To hold that such a relationship existed in this case would lead to the result that any payee on a check who makes inquiry is in the equivalent of contractual privity with the drawee, a proposition that would place substantial and potential unlimited liability on drawees for uncertified checks in contravention

of the basic policies underlying the checking system in the United States as codified in the Uniform Commercial Code. For example, the UCC section 3-408 specifically provides that a drawee is not liable as an assignee of the drawer on a check. Even more to the point, a drawee has no contract liability on a check to a payee unless and until it has accepted the check, viz, certified it. See UCC sections 3-408 and 3-409. Acceptance requires the formality of the drawee's signature on the check. See UCC section 3-409(a).

To recognize a cause of action under the circumstances of this case essentially would create a tort remedy allowing suit to be brought for oral certification of checks, in clear violation of the policies of the Uniform Commercial Code and hundreds of years of commercial law.

Furthermore . . . it can hardly be claimed that reliance by an experienced real estate attorney on the statements in this case in lieu of adhering to the sound practice of requiring the buyer to pay with an accepted draft (certified check) or bank draft is justifiable. Indeed, the reason for the practice of requiring certified or bank checks is that in the eyes of the UCC, such instruments are the equivalent of cash as far as satisfying the underlying obligation. See UCC section 3-310(a).

Summary judgment granted for Merrill Lynch.

Ethics in Action

Would Qualifying an Indorsement Be Ethical?

Suppose you have taken a promissory note for \$3,500 payable in 12 months with interest at 10 percent as payment for some carpentry work you did for a friend. You have some reason to

believe the maker of the note is in financial difficulty and may not be able to pay the note when it is due. You discuss with an elderly neighbor the possibility of her buying the note from you as an investment, and she agrees to buy it from you for \$3,000. Would it be ethical for you to indorse the note with a qualified indorsement (“without recourse”)?

Obligation of a Drawer The **drawer’s** obligation is that if the drawee dishonors an unaccepted check (or draft), the drawer will pay the check (or draft) according to its terms at the time he issued it or, if it was not issued, according to its terms at the time it first came into possession of a holder. If the draft was not complete when issued but was completed as authorized, then the obligation is to pay it as completed. If any completion is not authorized, then the obligation will depend on whether the person seeking to enforce the instrument can qualify as a holder in due course. A person entitled to enforce the draft or an indorser who paid the draft pursuant to his indorser’s liability may enforce the drawer’s obligation [3–414(b)].

For example, Janis draws a check on her account at First National Bank payable to the order of Colbert. If First National does not pay the check when Colbert presents it for payment, then Janis is liable to Colbert on the basis of her drawer’s obligation.

If a draft is accepted by a bank—for example, if the drawee bank certifies a check—the drawer is discharged of her drawer’s obligation. If someone other than a bank accepts a draft, then the obligation of the drawer to pay the draft, if the draft is dishonored, is the same as an indorser (discussed next) [3–414(c) and (d)].

Obligation of an Indorser A person who indorses a negotiable instrument usually is secondarily liable. An indorser is liable upon the *dishonor* by the maker (of a note), drawer (of an unaccepted draft) or the drawee (of an accepted draft), and the indorser’s *receipt of notice of the dishonor*. Unless the indorser qualifies or otherwise disclaims liability, the **indorser’s** obligation on dishonor of the instrument is to pay the amount due on the instrument according to its terms at the time he indorsed it or if he indorsed it when incomplete, then according to its terms when completed, provided that it is completed as authorized. The **indorser** owes the obligation to a person entitled to enforce the instrument or to any subsequent indorser who had to pay it [3–415].

The indorser can avoid this liability only by qualifying his indorsement, such as “without recourse,” on the instrument when he indorses it [3–415(b)].

Indorsers are liable to each other in the chronological order in which they indorse, from the last indorser back to the first. For example, Mark Maker gives a promissory note to Paul Payee. Payee indorses it and negotiates it to Fred First, who indorses it and negotiates it to Shirley Second. If Maker does not pay the note when Second takes it to him for payment, then Second can require First to pay it to her. First is secondarily liable on the basis of his indorsement. First, in turn, can require Payee to pay him because Payee also became secondarily liable when he indorsed it. Then, Payee is left to try to collect the note from Maker. Second also could have skipped over First and proceeded directly against Payee on his indorsement. First has no liability to Payee, however, because First indorsed after Payee indorsed the note.

If a bank accepts a draft (for example, by certifying a check) after an indorsement is made, the acceptance discharges the liability of the indorser [3–415(d)]. If notice of dishonor is required and proper notice is not given to the indorser, she is discharged of liability [3–415(c)]. And, where no one presents a check or gives it to a depository bank for collection within 30 days after the date of an indorsement, the indorser’s liability is discharged [3–415(e)].

Obligation of an Accommodation Party

An **accommodation party** is a person who signs a negotiable instrument for the purpose of lending her credit to another party to the instrument but is not a direct beneficiary of the value given for the instrument. For example, a bank might be reluctant to lend money to—and take a note from—Payee because of his shaky financial condition. However, the bank may be willing to lend money to Payee if he signs the note and has a relative or a friend also sign the note as an accommodation maker.

The obligation of an accommodation party depends on the capacity in which the party signs the instrument [3–419]. If Maker has his brother Sam sign a note as an

CYBERLAW IN ACTION

With the advent of high-resolution scanners, sophisticated desktop publishing programs, and laser printers that print in color, forgery of negotiable instruments has become increasingly easier and more common with significant financial risks for those who may unwittingly accept such instruments in payment for goods and services and/or pass them along to others.

The April 26, 2005, edition of *The New York Times* carried a story headlined “A Common Currency for Online Fraud: Forgers of U.S. Postal Money Orders Grow in Numbers and Skill.” The story begins:

Fake checks have been the stock in trade of online fraud artists for years. Now authorities are noting a surge in schemes involving sophisticated counterfeiting of a different form of payment: United States postal money orders. And the fleecing of victims often begins in an e-mail in box.

After noting a very significant increase in counterfeit postal money orders that have been intercepted by federal law enforcement officials, the article details how the scams, often involving international forgers, work. Historically, postal money orders have been considered very difficult to forge, and sellers of goods view them as the same as cash and preferable to personal checks. In the recent scams, online buyers send money orders in payment for goods which are then shipped. By the time the seller becomes aware that the postal money order was counterfeit, the buyer has the goods and the seller has no way of getting the money or the goods back from the erstwhile buyer. Sometimes the purchases are of expensive items like computers. In another variant of the scam, the buyer sends a postal money order for much more than the cost of the item—and requests that the seller send the item and remit cash for the difference between the cost of the item and the amount of the money order. Thus the “buyer”

gains both cash and merchandise in exchange for a worthless piece of paper.

In addition to the scrutiny from law enforcement officials that may come from being in possession of counterfeit postal money orders, or from trying to pass—or actually passing—them on to others, the person who takes and passes along a counterfeit order may well incur some of the liability discussed in this chapter. For example, Ralph has taken a postal money order in payment for a computer he sold and then shipped to a purchaser in Nigeria. When he deposits the postal money order in his account at his bank—or takes it to the post office to seek payment of it—he will be asked to indorse his name on the back of the order. You may recall from Chapter 31, Negotiable Instruments, that money orders are commonly in a form that meets the requirements for being a negotiable instrument. When the bank—or the post office—discovers that the postal money order given to them by Ralph is a forgery, they will go back against him to recoup the money they credited to his account or paid to him. They can do so on the basis of his contractual liability as an indorser. By indorsing the instrument, he obligated himself to make the instrument good if it was dishonored. Ralph, in turn, is left with what may be a fairly worthless right to recoup the money from the person in Nigeria who sent him the counterfeit instrument.

As bank and other officials are alerted to counterfeiting of particularly kinds of negotiable instruments, we can expect that the scam artists will change their targets or increase the sophistication of their forgeries so as to more readily pass without detection. Legitimate negotiable instruments offer lots of advantages to those who use them. But in a world where things may not be what they appear to be, it can be important to your financial well-being to know the person you are taking an instrument from and be confident that if it turns out that there is something wrong with it, you will be able to recoup what you paid or gave for it.

accommodation maker, then Sam has the same contractual liability as a maker. Sam is primarily liable on the note. The bank may ask Sam to pay the note before asking Maker to pay. However, if Sam pays the note to the bank, he has the right to recover his payment from Maker, the person on whose behalf he signed.

Similarly, if a person signs a check as an accommodation indorser, his contractual liability is that of an indorser. If the accommodation indorser has to make good on that liability, he can collect in turn from the person on whose behalf he signed.

Signing an Instrument No person is contractually liable on a negotiable instrument unless she or her

authorized agent has signed it and the signature is binding on the represented person. A signature can be any name, word, or mark used in place of a written signature [3–401]. As discussed earlier, the capacity in which a person signs an instrument determines his liability on the instrument.

Signature by an Authorized Agent An authorized agent can sign a negotiable instrument. If Sandra Smith authorized her attorney to sign checks as her agent, then she is liable on any checks properly signed by the attorney as her agent. All negotiable instruments signed by corporations have to be signed by an agent of the corporation who is authorized to sign negotiable instruments.

If a person purporting to act as a representative signs an instrument by signing either the name of the represented person or the name of the signer, that signature binds the represented person to the same extent she would be bound if the signature were on a simple contract. If the represented person has authorized the signature of the representative, it is the “authorized signature of the represented person” and the represented person is liable on the instrument, whether or not identified in the instrument. This brings the Code in line with the general principle of agency law that binds an undisclosed principal on a simple contract. For example, if Principal authorizes Agent to borrow money on Principal’s behalf and Agent signs her name to a note without disclosing that the signature was on behalf of Principal, Agent is liable on the note. In addition, if the person entitled to enforce the note can show that Principal authorized Agent to sign on his behalf, then Principal is liable on the note as well.

When a representative signs an authorized signature to an instrument, then the representative is not bound provided the signature shows “unambiguously” that the signature was made on behalf of the represented person who is named in the instrument [3–402(b)(1)]. For example, if a note is signed “XYZ, Inc. by Flanigan, Treasurer,” Flanigan is not liable on the instrument in his own right but XYZ, Inc., is liable.

If an authorized representative signs his name as the representative of a drawer of a check without noting his representative status but the check is payable from an account of the represented person who is identified on the check, the signer is not liable on the check as long as his signature was authorized [3–402(c)]. The rationale for this provision is that because most checks today identify the person on whose account the check is drawn, no one is deceived into thinking that the person signing the check is meant to be liable.

Except for the check situation noted above, a representative is personally liable to a holder in due course that took the instrument without notice that the representative was not intended to be liable if (1) the form of the signature does not show unambiguously that the signature was made in a representative capacity or (2) the instrument does not identify the represented person. As to persons other than a holder in due course without notice of the representative nature of the signature, the representative is liable *unless* she can prove that the original parties did not intend her to be liable on the instrument [3–402(b)(2)].

Thus, if an agent or a representative signs a negotiable instrument on behalf of someone else, the agent should indicate clearly that he is signing as the representative of

someone else. For example, Kim Darby, the president of Swimwear, Inc., is authorized to sign negotiable instruments for the company. If Swimwear borrows money from the bank and the bank asks her to sign a 90-day promissory note, Darby should sign it either “Swimwear, Inc., by Kim Darby, President” or “Kim Darby, President, for Swimwear, Inc.” If Kim Darby signed the promissory note merely “Kim Darby,” she could be personally liable on the note. Similarly, if Clara Carson authorizes Arthur Anderson, an attorney, to sign checks for her, Anderson should make sure either that the checks identify Clara Carson as the account involved or should sign them “Clara Carson by Arthur Anderson, Agent.” Otherwise, he risks being personally liable on them.

Unauthorized Signature If someone signs a person’s name to a negotiable instrument without that person’s authorization or approval, the signature does not bind the person whose name appears. However, the signature is effective as the signature of the unauthorized signer in favor of any person who in good faith pays the instrument or takes it for value [3–403(a)]. For example, if Tom Thorne steals Ben Brown’s checkbook and signs Brown’s name to a check, Brown is not liable on the check because Brown had not authorized Thorne to sign Brown’s name. Thorne can be liable on the check, however, because he did sign it, even though he did not sign it in his own name. Thorne’s forgery of Brown’s signature operates as Thorne’s signature. Thus, if Thorne cashed the check at the bank, Thorne would be liable to it or if he negotiated it to a store for value, he would be liable to the store to make it good.

Even though a signature is not “authorized” when it is put on an instrument initially, it can be ratified later by the person represented [3–403(a)]. It also should be noted that if more than one person must sign to constitute the authorized signature of an organization, the signature of the organization is unauthorized if one of the required signatures is lacking [3–403(b)]. Corporate and other accounts sometimes require multiple signatures as a matter of maintaining sound financial control.

Contractual Liability in Operation

To bring the contractual liability of the various parties to a negotiable instrument into play, generally it is necessary that the instrument be *presented for payment*. In addition, to hold the parties that are secondarily liable on the instrument to their contractual liability, generally it is necessary that the instrument be *presented for payment* and *dishonored*.

Presentment of a Note The maker of a note is primarily liable to pay it when it is due. Normally, the holder takes the note to the maker at the time it is due and asks the maker to pay it. Sometimes, the note may provide for payment to be made at a bank or the maker sends the payment to the holder at the due date. The party to whom the holder presents the instrument, without dishonoring the instrument, may (1) require the exhibition of the instrument, (2) ask for reasonable identification of the person making presentment, (3) ask for evidence of his authority to make it if he is making it for another person, or (4) return the instrument for lack of any necessary indorsement, (5) ask that a receipt be signed for any payment made, and (6) surrender the instrument if full payment is made [3-501].

Dishonor of a note occurs if the maker does not pay the amount due when (1) it is presented in the case of (a) a demand note or (b) a note payable at or through a bank on a definite date that is presented on or after that date, or (2) if it is not paid on the date payable in the case of a note payable on a definite date but not payable at or through a bank [3-502]. If the maker or payor dishonors the note, the holder can seek payment from any persons who indorsed the note before the holder took it. The basis for going after the indorsers is that they are secondarily liable. To hold the indorsers to their contractual obligation, the holder must give them notice of the dishonor. The notice can be either written or oral [3-503].

For example, Susan Strong borrows \$1,000 from Jack Jones and gives him a promissory note for \$1,000 at 9 percent annual interest payable in 90 days. Jones indorses the note “Pay to the order of Ralph Smith” and negotiates the note to Ralph Smith. At the end of the 90 days, Smith takes the note to Strong and presents it for payment. If Strong pays Smith the \$1,000 and accrued interest, she can have Smith mark it “paid” and give it back to her. If Strong does not pay the note to Smith when he presents it for payment, then she has dishonored the note. Smith should give notice of the dishonor to Jones and advise him that he intends to hold Jones secondarily liable on his indorsement. Smith may collect payment of the note from Jones. Jones, after making the note good to Smith, can try to collect the note from Strong on the ground that she defaulted on the contract she made as maker of the note. Of course, Smith also could sue Strong directly on the basis of her maker’s obligation.

Presentment of a Check or a Draft The holder should present a check or draft to the drawee. The presentment can be either for payment or for acceptance

(certification) of the check or draft. Under Revised Article 3, the presentment may be made by any commercially reasonable means, including a written, oral, or electronic communication [3-501]. The drawee is not obligated on a check or draft unless it accepts (certifies) it [3-408]. An acceptance of a draft is the drawee’s signed commitment to honor the draft as presented. The acceptance must be written on the draft, and it may consist of the drawee’s signature alone [3-409].

A drawer who writes a check issues an order to the drawee to pay a certain amount out of the drawer’s account to the payee (or to someone authorized by the payee). This order is not an assignment of the funds in the drawer’s account [3-408]. The drawee bank does not have an obligation to the payee to pay the check unless it certifies the check. However, the drawee bank usually does have a separate contractual obligation (apart from Article 3) to the drawer to pay any properly payable checks for which funds are available in the drawer’s account.

For example, Janet Payne has \$850 in a checking account at First National Bank and writes a check for \$100 drawn on First National and payable to Ralph Smith. The writing of the check is the issuance of an order by Payne to First National to pay \$100 from her account to Smith or to whomever Smith requests it to be paid. First National owes no obligation to Smith to pay the \$100 unless it has certified the check. However, if Smith presents the check for payment and First National refuses to pay it even though there are sufficient funds in Payne’s account, then First National is liable to Payne for breaching its contractual obligation to her to pay items properly payable from existing funds in her account. Chapter 34, Checks and Electronic Transfers, discusses the liability of a bank for wrongful dishonor of checks in more detail.

If the drawee bank does not pay or certify a check when it is properly presented for payment or acceptance (certification), the drawee bank has dishonored the check [3-502]. Similarly, if a draft is not paid on the date it is due (or accepted by the drawee on the due date for acceptance), it has been dishonored. The holder of the draft or check then can proceed against either the drawer or any indorsers on their liability. To do so, the holder must give them notice of the dishonor [3-503]. Notice of dishonor, like presentment, can be by any commercially reasonable means, including oral, written, or electronic communication. Under certain circumstances, set out in section 3-504, presentment or notice of dishonor may be excused.

Suppose Matthews draws a check for \$200 on her account at a bank payable to the order of Williams.

CONCEPT REVIEW

Contract Liability Based on Signature on a Negotiable Instrument

| Concept | Contractual Liability |
|--|--|
| Primary and Secondary Liability | <p>Every party (other than an indorser who qualifies his/her indorsement) who <i>signs a negotiable instrument</i> is either primarily or secondarily liable for payment of the instrument when it comes due.</p> <ol style="list-style-type: none"> 1. <i>Primary liability</i>—Makers and acceptors (a drawee that promises to pay the instrument when it is presented for payment at a later time) are primarily liable. 2. <i>Secondary liability</i>—Drawers and indorsers are secondarily liable. Parties who are secondarily liable on an instrument promise to pay the instrument only if the following events occur: <ol style="list-style-type: none"> a. The instrument is properly presented for payment. b. The instrument is dishonored. c. Timely notice of the dishonor is given to the party who is secondarily liable. |
| Accommodation Parties | <p>An accommodation party is one who signs an instrument for the purpose of lending his credit to another party to the instrument but is not a direct beneficiary of the value given for the instrument. The obligation of the accommodation party depends on the capacity in which the party signs the instrument. Thus, an accommodation maker has the same obligation as a maker and is primarily liable while an accommodation indorser is secondarily liable on the instrument.</p> |
| Signature by Agent | <p>An authorized agent can sign an instrument on behalf of the principal and create liability for the principal on the instrument.</p> <ol style="list-style-type: none"> 1. If the represented person authorized the signature, then the represented person is liable on the instrument whether or not identified in the instrument. 2. If the agent signs an authorized signature to an instrument, the agent is not personally bound on the instrument provided the signature shows unambiguously that the signature was made on behalf of the represented person. 3. If the agent does not identify the represented party in the instrument, then the agent is liable as well unless the instrument is a check drawn on an account for which the agent is an authorized signature. |
| Unauthorized Signature | <p>An unauthorized signature operates as the signature of the unauthorized signer in favor of a person who in good faith pays the instrument or takes it for value—but it is wholly inoperative as the signature of the person whose name is signed unless:</p> <ol style="list-style-type: none"> 1. The person whose name is signed ratifies (affirms) the signature. 2. The person whose signature is signed is precluded from denying it. |

Williams indorses the check “Pay to the order of Clark, Williams” and negotiates it to Clark. When Clark takes the check to the bank, it refuses to pay the check because there are insufficient funds in Matthews’s account to cover the check. The check has been presented and dishonored. Clark has two options: He can proceed against Williams on Williams’s secondary liability as an indorser (because by putting an unqualified indorsement on the check, Williams is obligated to make the check good if it was not honored by the drawee). Or, he can proceed against Matthews on Matthews’s obligation as drawer

because in drawing the check, Matthews must pay any person entitled to enforce the check if it is dishonored. Because Clark dealt with Williams, Clark is probably more likely to return the check to Williams for payment. Williams then has to go against Matthews on Matthews’s liability as drawer.

Time of Presentment If an instrument is payable at a definite time, the holder should present it for payment on the due date. In the case of a demand instrument, the nature of the instrument, trade or bank usage,

and the facts of the particular case determine a reasonable time for presentment for acceptance or payment. In a farming community, for example, a reasonable time to present a promissory note that is payable on demand may be six months or within a short time after the crops are ready for sale, because the holder commonly expects payment from the proceeds of the crops.

Warranty Liability

Whether or not a person signs a negotiable instrument, a person who transfers such an instrument or presents it for payment or acceptance may incur liability on the basis of certain implied warranties. These warranties are (1) **transfer warranties**, which persons who transfer negotiable instruments make to their transferees; and (2) **presentment warranties**, which persons who present negotiable instruments for payment or acceptance (certification) make to those who pay or accept the instruments.

Transfer Warranties A person who transfers a negotiable instrument to someone else and for consideration makes five warranties to his immediate transferee. If the transfer is by indorsement, the transferor makes these warranties to all subsequent transferees. The five transfer warranties are:

1. The warrantor is a person entitled to enforce the instrument. (In essence the transferor warrants that there are no unauthorized or missing indorsements that prevent the transferor from making the transferee a holder or a person entitled to enforce the instrument.)
2. All signatures on the instrument are authentic or authorized.
3. The instrument has not been altered.
4. The instrument is not subject to a defense or a claim in recoupment that any party can assert against the warrantor.
5. The warrantor has no knowledge of any insolvency proceedings commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer [3–416(a)]. Note that this is not a warranty against difficulty in collection or insolvency—the warranty stops with the warrantor’s knowledge.

Revised Article 3 provides that in the event of a breach of a transfer warranty, a beneficiary of the transfer warranties who took the instrument in good faith may recover from the warrantor an amount equal to the loss suffered as a result of the breach. However, the damages recoverable may not be more than the amount of the instrument plus expenses and loss of interest incurred as a result of the breach [3–416(b)].

Transferors of instruments other than checks may disclaim the transfer warranties. Unless the warrantor receives notice of a claim for breach of warranty within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the delay in giving notice of the claim may discharge the warrantor’s liability to the extent of any loss the warrantor suffers from the delay, such as the opportunity to proceed against the transferor [3–416(c)].

Although contractual liability often furnishes a sufficient basis for suing a transferor when the party primarily obligated does not pay, warranties are still important. First, they apply even when the transferor did not indorse. Second, unlike contractual liability, they do not depend on presentment, dishonor, and notice, but may be utilized before presentment has been made or after the time for giving notice has expired. Third, a holder may find it easier to return the instrument to a transferor on the ground of breach of warranty than to prove her status as a holder in due course against a maker or drawer.

In the case that follows, *Bank One, N.A. v. Streeter*, the court found that an individual who deposited checks to his account on which the payee’s name had been altered breached transfer warranties and was not a person entitled to enforce the instruments.

Bank One, N.A. v. Streeter

58 UCC Rep.2d 1 (U.S.D.C. N.D. Ind. 2005)

On August 20, 2003, Dennis Streeter deposited a check drawn by Economy Gas Company in the amount of \$117,469.80 into his Bank One account. On August 22, 2003, Streeter deposited a check drawn by Newspaper Services of America in the amount of \$137,374.08 into his Bank One account. Also, on August 22, 2003, Streeter deposited a money order issued by Kroger in the amount of \$100,447.05 into his Bank One account. Bank One credited Streeter’s account for the three checks. At this time, Bank One did not believe that the checks had been altered. However, after the deposits were made, Bank One received notice from the banks on which the three checks had been drawn that the checks had been altered.

When Economy Gas Company originally issued its check, the payee was "B.P. Products." The name of the payee was altered to "Dennis Streeter." This alteration was made without Economy Gas's knowledge or consent. When Newspaper Services of America originally issued its check, the payee was "N.Y. Times Co." The payee was changed to "Dennis Streeter," and the alteration was made without the knowledge or consent of Newspaper Services of America. When Kroger issued its money order, the initial payee was "SlimFast Foods Co." The payee was altered to "Dennis Streeter," and made without Kroger's knowledge.

Bank One brought suit against Streeter to recover the funds it had credited to his account. The bank asserted that the transfer warranties as set forth in Indiana's Uniform Commercial Code dictate that Streeter is liable to Bank One for its damages stemming from the altered checks. In response, Streeter argued that he had not breached any warranty because he was the person entitled to enforce the instruments and that there was no evidence that the checks were altered by him or that he had any knowledge of any alterations. Bank One moved for summary judgment on the issue of whether Streeter was liable to it for breach of the transfer warranties that (1) he was a person entitled to enforce the instrument and (2) the instrument had not been altered.

Lozano, Judge

Altered checks are governed by Indiana's Uniform Commercial Code ("UCC") Article 3, entitled "Negotiable Instruments," and Article 4, entitled "Bank Deposits and Collections." *Section 3-416(a)* states that "[a] person who transfers an instrument for consideration warrants to the transferee . . . that: (1) the warrantor is a person entitled to enforce the instrument . . . (3) the instrument has not been altered. . . ." Similarly, *section 4-207(a)* provides "[a] customer . . . that transfers an item and receives a settlement or other consideration warrants to the transferee . . . that: (1) the warrantor is a person entitled to enforce the item . . . (3) the item has not been altered. . . ." Both statutes provide "the warranties stated in subsection (a) cannot be disclaimed with respect to checks."

The undisputed evidence shows that Streeter issued these transfer warranties to Bank One when he transferred the Economy Gas check, the Newspaper Services check, and the Kroger money order to Bank One for consideration. Streeter does not deny the general applicability of these warranties, and the Court finds that they apply to this case.

Bank One argues that Streeter breached the warranty of no material alteration. "Alteration" is defined as "an unauthorized change in an instrument that purports to modify in any respect the obligation of a party." §3-407(a)(1).

Initially, Streeter argues that Bank One presented insufficient evidence that the instruments had been altered by Streeter, or that Streeter had any knowledge of any alteration. He contends that the affiants of the affidavits submitted by Bank One did not have personal knowledge of the payee of the check.

Bank One replies that each affidavit submitted by Bank One was signed by an authorized representative of the company that issued the check. After reviewing the affidavits at issue, the Court agrees with Bank One that each affidavit was submitted by an authorized representative of the company that issued the check in question. Moreover, the affidavits establish that the checks were altered by someone without permission from

the drawers. Because each individual has attested, in a sworn affidavit, that the respective checks were altered without authorization, this Court refuses to grant Streeter's request to strike.

Streeter also states that at most he was negligent in detecting any alterations in the checks, and that both Bank One and Streeter were not in a position to determine that the checks were altered. Essentially, Streeter argues that because he did not alter the checks himself or have knowledge of the alterations, he could not breach the transfer warranties. Bank One correctly points out that there is no requirement that the party transferring the instrument either alter it or have knowledge of the alteration in order for the transfer warranty to be breached. Since there is no knowledge or notice requirement with respect to the material alteration warranties, the question of whether or not a party breached these warranties is simply a question of whether or not the checks were materially altered. The parties do not dispute the materiality requirement, and it is clear that an alteration adding an alternative payee is a material alteration as the term is used in the UCC.

It is clear that Streeter breached the transfer warranty of material alteration. He issued a non-disclaimable warranty to Bank One that the checks had not been altered. Because there is unrefuted evidence that the checks were in fact altered by someone without authority from the drawers (whether that person was Streeter or someone else is immaterial), Streeter breached the warranty as a matter of law.

Bank One also argues that Streeter was not entitled to enforce the checks because he was not the proper payee of the instruments. Bank One contends that without endorsements of the intended payees, Streeter could not obtain good title to the checks. Bank One argues that because the checks were altered without the endorsements of the intended payees, Streeter was not entitled to enforce the checks, and Streeter breached the warranty that he was entitled to enforce the instrument.

In response, Streeter baldly contends that he was the person entitled to enforce the instruments because the checks were

delivered to him as partial payment on his contract. Aside from Streeter's affidavit, he cites to nothing in the record or any other authority to support this assertion. Nor does Streeter present any case law or authority for the proposition that if he did not alter the checks himself, he cannot be held liable for breach of warranty.

Streeter does not dispute that Bank One accepted the checks in good faith. *Section 3-416(b)* establishes that:

A person to whom the [transfer warranties] are made and who took the instrument in good faith may recover from the warrantor as damages for breach of warranty an

amount equal to the loss suffered as a result of the breach, but not more than the amount of the instrument plus expenses and loss of interest incurred as a result of the breach.

Consequently, because it is undisputed that the checks were altered and Streeter was not entitled to enforce the checks, the Court finds that Streeter breached the warranty of entitlement to enforce the checks.

Summary judgment granted to Bank One on the issue of liability.

Presentment Warranties Persons who present negotiable instruments for payment or drafts for acceptance also make warranties, but their warranties differ from those transferors make. If an unaccepted draft (such as a check) is presented to the drawee for payment or acceptance and the drawee pays or accepts the draft, then the person obtaining payment or acceptance warrants to the drawee making payment or accepting the draft in good faith that:

1. The warrantor is, or was, at the time the warrantor transferred the draft, a person entitled to enforce the draft or authorized to obtain payment or acceptance of the draft on behalf of a person entitled to enforce the draft.
2. The draft has not been altered.
3. The warrantor has no knowledge that the signature of the drawer of the draft has not been authorized [3-417(a)].

These warranties also are made by any prior transferor of the instrument at the time the person transfers the instrument; the warranties run to the drawee who makes payment or accepts the draft in good faith. Such a drawee would include a drawee bank paying a check presented to it for payment directly or through the bank collection process.

The effect of the third presentment warranty is to leave with the drawee the risk that the drawer's signature is unauthorized, unless the person presenting the draft for payment, or a prior transferor, had knowledge of any lack of authorization.

A drawee who makes payment may recover as damages for any breach of a presentment warranty an amount equal to the amount paid by the drawee less the amount the drawee received or is entitled to receive from the

drawer because of the payment. In addition, the drawee is entitled to compensation for expenses and loss of interest resulting from the breach [3-417(b)]. The drawee's right to recover damages for breach of warranty is not affected by any failure on the part of the drawee to exercise ordinary care in making payment.

If a drawee asserts a claim for breach of a presentment warranty based on an unauthorized indorsement of the draft or an alteration of the draft, the warrantor may defend by showing that the indorsement is effective under the *impostor* or *fictional payee* rules (discussed later in this chapter) or that the drawer's negligence precludes him from asserting against the drawee the unauthorized indorsement or alteration (also discussed below) [3-417(c)].

If (1) a *dishonored draft* is presented for payment to the drawer or an indorser or (2) any other instrument (such as a note) is presented for payment to a party obligated to pay the instrument and the presenter receives payment, the presenter makes the following presentment warranty:

The person obtaining payment is a person entitled to enforce the instrument or authorized to obtain payment on behalf of a person entitled to enforce the instrument [3-417(d)].

On breach of this warranty, the person making the payment may recover from the warrantor an amount equal to the amount paid plus expenses and loss of interest resulting from the breach.

With respect to checks, the party presenting the check for payment cannot disclaim the presentment warranties [3-417(e)]. Unless the payor or drawee provides notice of a claim for breach of a presentment warranty to the warrantor within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the

CONCEPT REVIEW

Transfer Warranties

The five transfer warranties made by a person who transfers a negotiable instrument to someone else for consideration are:

1. The warrantor is entitled to enforce the instrument.
2. All signatures on the instrument are authentic or authorized.
3. The instrument has not been altered.
4. The instrument is not subject to a defense or a claim in recoupment that any party can assert against the warrantor.
5. The warrantor has no knowledge of any insolvency proceedings commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer.

| Who | What Warranties | To Whom |
|--------------------------------|------------------------------------|--|
| Nonindorsing Transferor | Makes all five transfer warranties | To his immediate transferee only |
| Indorsing Transferor | Makes all five transfer warranties | To his immediate transferee and all subsequent transferees |

warrantor is discharged to the extent of any loss caused by the delay in giving notice of the claim of breach.

Payment or Acceptance by Mistake A long-standing general rule of negotiable instruments law is that payment or acceptance is final in favor of a holder in due course or payee who changes his position in reliance on the payment or acceptance. Revised Article 3 retains this concept by making payment final in favor of a person who took the instrument in good faith and for value.

However, payment is not final—and may be recovered from—a person who does not meet these criteria where the drawee acted on the mistaken belief that (1) payment of a draft or check has not been stopped, and (2) the signature of the purported drawer of the draft was authorized [3–418(a)]. In some jurisdictions, the drawee’s mistaken belief that the account held available funds also could serve as a basis for recovery of the payment [3–418(b)].

As a result, this means that if the drawee bank mistakenly paid a check over a stop-payment order, paid a check with a forged or unauthorized drawer’s signature on it, or paid despite the lack of sufficient funds in the drawer’s account to cover the check, the bank cannot recover if it paid the check to a presenter who had taken the instrument in good faith and for value. In that case, the drawee bank would have to pursue someone else, such as the forger or unauthorized signer, or seller

whose goods proved to be defective. On the other hand, if the presenter had not taken in good faith or for value, the bank could, in these enumerated instances, recover from the presenter the payment it made by mistake.

Operation of Warranties Following are three scenarios that show how the transfer and presentment warranties shift the liability back to a wrongdoer or to the person who dealt immediately with a wrongdoer and thus was in the best position to avert the wrongdoing.

Scenario 1 Arthur makes a promissory note for \$2,000 payable to the order of Betts. Carlson steals the note from Betts, indorses her (Betts’s) name on the back, and gives it to Davidson in exchange for a television set. Davidson negotiates the note for value to Earle, who presents the note to Arthur for payment. Assume that Arthur refuses to pay the note because Betts has advised him that it has been stolen and that he is the person entitled to enforce the instrument. Earle then can proceed to recover the face amount of the note from Davidson on the grounds that as a transferor Davidson has warranted that he is a person entitled to enforce the note and that all signatures were authentic. Davidson, in turn, can proceed against Carlson on the same basis—if he can find Carlson. If he cannot, then Davidson must bear the loss caused by Carlson’s wrongdoing. Davidson was in the best position to ascertain whether Carlson was the owner of the note and

CONCEPT REVIEW

Presentment Warranties

If an unaccepted draft (such as a check) is presented for payment or acceptance and the drawee pays or accepts the draft, then the person obtaining payment or acceptance and prior transferors warrant to the drawee:

1. The warrantor is a person entitled to enforce payment or authorized to obtain payment or acceptance on behalf of a person entitled to enforce the draft.
2. The draft has not been altered.
3. The warrantor has no knowledge that the signature of the drawer of the draft has not been authorized.

If (a) a dishonored draft is presented for payment to the drawer or indorser or (b) any other instrument (such as a note) is presented for payment to a party obligated to pay the instrument and the presenter receives payment, the presenter (as well as a prior transferor of the instrument) makes the following warranty to the person making payment in good faith:

The person obtaining payment is a person entitled to enforce the instrument or authorized to obtain payment on behalf of a person entitled to enforce the instrument.

whether the indorsement in the name of Betts was genuine. Of course, even though Arthur does not have to pay the note to Earle, Arthur remains liable for his underlying obligation to Betts.

Scenario 2 Anderson draws a check for \$10 on her checking account at First Bank payable to the order of Brown. Brown cleverly raises the check to \$110, indorses it, and negotiates it to Carroll. Carroll then presents the check for payment to First Bank, which pays her \$110 and charges Anderson's account for \$110. Anderson then asks the bank to recredit her account for the altered check, and it does so. The bank can proceed against Carroll for breach of the presentment warranty that the instrument had not been altered, which she made to the bank when she presented the check for payment. Carroll in turn can proceed against Brown for breach of her transfer warranty that the check had not been altered—if she can find her. Unless she was negligent in drawing the check, Article 3 limits Anderson's liability to \$10 because her obligation is to pay the amount in the instrument at the time she issued it.

Scenario 3 Bates steals Albers's checkbook and forges Albers's signature to a check for \$100 payable to "cash," which he uses to buy \$100 worth of groceries from a grocer. The grocer presents the check to Albers's bank. The bank pays the amount of the check to the grocer and charges Albers's account. Albers then demands that the

bank recredit his account. The bank can recover against the grocer only if the grocer knew that Albers's signature had been forged. Otherwise, the bank must look for Bates. The bank had the responsibility to recognize the true signature of its drawer, Albers, and not to pay the check that contained an unauthorized signature. The bank may be able to resist recrediting Albers's account if it can show he was negligent. The next section of this chapter discusses negligence.

Other Liability Rules

Normally, a bank may not charge against (debit from) the drawer's account a check that has a forged payee's indorsement. Similarly, a maker does not have to pay a note to the person who currently possesses the note if the payee's signature has been forged. If a check or note has been altered—for example, by raising the amount—the drawer or maker usually is liable only for the instrument in the amount for which he originally issued it. However, there are a number of exceptions to these usual rules. These exceptions, as well as liability based on conversion of an instrument, are discussed below.

Negligence A person can be so negligent in writing or signing a negotiable instrument that she in effect invites an alteration or an unauthorized signature on it. If a person has been negligent, Article 3 precludes her from using the alteration or lack of authorization as a reason

for not paying a person that in good faith pays the instrument or takes it for value [3–406]. For example, Mary Maker makes out a note for \$10 in such a way that someone could alter it to read \$10,000. Someone alters the note and negotiates it to Katherine Smith, who can qualify as a holder in due course. Smith can collect \$10,000 from Maker. Maker’s negligence precludes her from claiming alteration as a defense to paying it. Maker then has to find the person who “raised” her note and try to collect the \$9,990 from him.

Where the person asserting the preclusion failed to exercise ordinary care in taking or paying the instrument and that failure substantially contributed to the loss, Article 3 allocates the loss between the two parties based on their comparative negligence [3–406(b)]. Thus, if a drawer was so negligent in drafting a check that he made it possible for the check to be altered and the bank that paid the check, in the exercise of ordinary care, should have noticed the alteration, then any loss occasioned by the fact that the person who made the alteration could not be found would be split between the drawer and the bank based on their comparative fault.

Impostor Rule Article 3 establishes special rules for negotiable instruments made payable to impostors and fictitious persons. An impostor is a person who poses as someone else and convinces a drawer to make a check payable to the person being impersonated—or to an organization the person purports to be authorized to represent. When this happens, the Code makes any indorsement “substantially similar” to that of the named payee effective [3–404(a)]. Where the impostor has impersonated a person authorized to act for a payee, such as claiming to be Jack Jones, the president of Jones Enterprises, the impostor has the power to negotiate a check drawn payable to Jones Enterprises.

An example of a situation involving the impostor rule would be the following: Arthur steals Paulsen’s automobile and finds the certificate of title in the automobile. Then, representing himself as Paulsen, he sells the automobile to Berger Used Car Company. The car dealership draws its check payable to Paulsen for the agreed purchase price of the automobile and delivers the check to Arthur. Any person can negotiate the check by indorsing it in the name of Paulsen.

The rationale for the impostor rule is to put the responsibility for determining the true identity of the payee on the drawer or maker of a negotiable instrument. The drawer is in a better position to do this than some later holder of the check who may be entirely innocent. The impostor rule allows that later holder to have good

title to the check by making the payee’s signature valid although it is not the signature of the person with whom the drawer or maker thought he was dealing. It forces the drawer or maker to find the wrongdoer who tricked him into signing the negotiable instrument or to bear the loss himself.

Fictitious Payee Rule A fictitious payee commonly arises in one of the two following situations: (1) a dishonest employee makes a check payable to a “fictitious payee”—someone who does not exist, or (2) the dishonest employee makes the check payable to a real person who does business with the employer—but the employee does not intend to send the check to that person. If the employee has the authority to sign checks, he may sign the check himself. Where the employee does not have the authority to sign checks for the employer, the dishonest employee gives the check with the fictitious payee to the employer for signature and represents to the employer that the employer owes money to the person named as the payee. The dishonest employee then takes the check, indorses it in the name of the payee, presents it for payment, and pockets the money. The employee may be in a position to cover up the wrongdoing by intercepting the canceled checks or juggling the company’s books.

The Code allows any indorsement in the name of the fictitious payee to be effective as the payee’s indorsement in favor of any person that pays the instrument in good faith or takes it for value or for collection [3–404(b) and (c)]. For example, Anderson, an accountant in charge of accounts payable at Moore Corporation, prepares a false invoice naming Parks, Inc., a supplier of Moore Corporation, as having supplied Moore Corporation with goods, and draws a check payable to Parks, Inc., for the amount of the invoice. Anderson then presents the check to Temple, treasurer of Moore Corporation, together with other checks with invoices attached. Temple signs all of these checks and returns them to Anderson for mailing. Anderson then withdraws the check payable to Parks, Inc. Anyone, including Anderson, can negotiate the check by indorsing it in the name of Parks, Inc.

The rationale for the fictitious payee rule is similar to that for the impostor rule. If someone has a dishonest employee or agent who is responsible for the forgery of some checks, the employer of the wrongdoer should bear the immediate loss of those checks rather than some other innocent party. In turn, the employer must locate the unfaithful employee or agent and try to recover from him.

Comparative Negligence Rule concerning Impostors and Fictitious Payees

Revised Article 3 also establishes a comparative negligence rule if (1) the person, in a situation covered by the impostor or fictitious payee rule, pays the instrument or takes it for value or collection without exercising ordinary care in paying or taking the instrument, and (2) that failure substantially contributes to the loss resulting from payment of the instrument. In these instances, the person bearing the loss may recover an allocable share of the loss from the person who did not exercise ordinary care [3-404(d)].

Fraudulent Indorsements by Employees

Revised Article 3 specifically addresses employer responsibility for fraudulent indorsements by employees and adopts the principle that the risk of loss for such indorsements by employees who are entrusted with responsibilities for instruments (primarily checks) should fall on the employer rather than on the bank that takes the check or pays it [3-405]. As to any person who in good faith pays an instrument or takes it for value, a fraudulent indorsement by a responsible employee is effective as the indorsement of the payee if it is made in the name of the payee or in a substantially similar name [3-405(b)]. If the person taking or paying the instrument failed to exercise ordinary care and that failure substantially contributed to loss resulting from the fraud, the comparative negligence doctrine guides the allocation of the loss.

A fraudulent indorsement includes a forged indorsement purporting to be that of the employer on an instrument payable to the employer; it also includes a forged indorsement purporting to be that of the payee of an instrument on which the employer is drawer or maker [3-405(a)(2)]. “Responsibility” with respect to instruments means the authority to (1) sign or indorse instruments on behalf of the employer, (2) process instruments received by the employer, (3) prepare or process instruments for issue in the name of the employer, (4) control the disposition of instruments to be issued in the name of the employer, or (5) otherwise act with respect to instruments in a responsible capacity. “Responsibility” does not cover those who simply have access to instruments as they are stored or transported, or that are in incoming or outgoing mail [3-405(a)(3)].

In the case that follows, *Victory Clothing Co., Inc. v. Wachovia Bank, N.A.*, the court applied comparative negligence principles to split the loss between a company whose employee forged checks and a depository bank that allowed the forger to deposit the checks to her own personal account in violation of its own rules. As you read the case and note the reasons the court gave for assigning 30 percent of the risk to the employer, you might ask yourself whether the answer would be different today when many banks no longer return copies of canceled checks—or even photocopies of them—regularly to the customer. You might also ask, what steps would you take to prevent something like this from happening without your being aware of the fact an employee was forging checks on the company’s account.

Victory Clothing Co., Inc. v. Wachovia Bank, N.A. 59 UCC Rep.2d 376 (Ct. Common Pleas Penn. 2006)

Victory Clothing Company maintained a corporate checking account at Hudson Bank. Jeannette Lunny was employed by Victory as its office manager and bookkeeper for approximately 24 years until she resigned in May 2003. From August 2001 through May 2003, Lunny deposited approximately 200 checks drawn on Victory’s corporate account totaling \$188,273 into her personal checking account at Wachovia Bank.

Lunny’s scheme involved double forgeries. She prepared checks in the company’s computer system and made them payable to known vendors of Victory (e.g., Adidas) to whom no money was actually owed. The checks were for dollar amounts that were consistent with the legitimate checks to those vendors. She then would forge the signature of Victory’s owner, Mark Rosenfeld, as drawer on the front of the check, and then forge the indorsement of the unintended payee (Victory’s various vendors) on the reverse of the check. After forging the indorsement of the payee, Lunny either indorsed the check with her name followed by her account number, or referenced her account number following the forged indorsement. She then deposited the checks into her personal account at Wachovia Bank.

At the time of the fraud by Lunny, Wachovia’s policies and regulations regarding the acceptance of checks for deposit provided that “checks payable to a non-personal payee can be deposited ONLY into a non-personal account with the same name.”

Rosenfeld reviewed the bank statements from Hudson Bank on a monthly basis. However, among other observable irregularities, he failed to detect that Lunny had forged his signature on approximately 200 checks. Nor did he have a procedure to match checks to invoices.

Victory brought suit against Wachovia pursuant to the Pennsylvania Commercial Code claiming that Wachovia should be liable to it for the entire amount of the losses it sustained by virtue of Lunny's forgery scheme. Victory contended that Wachovia had failed to exercise ordinary care in taking the instruments that were payable to various businesses and allowing them to be deposited into Lunny's personal account. It asserted that this was commercially unreasonable, contrary to Wachovia's own internal rules and regulations, and exhibited a lack of ordinary care, substantially contributing to the loss resulting from the fraud. Under section 3-405 of the Code, in such circumstances, the person bearing the loss can recover from the person failing to exercise ordinary care to the extent the failure to exercise ordinary care contributed to the loss.

Wachovia, in turn, argued that because Lunny made the fraudulent checks payable to actual vendors of Victory with the intention that the vendors not get paid, Victory's action against it should be barred by the fictitious payee rule set out in section 3-404. Because section 3-404 contains a comparative negligence provision, the court also needed to decide whether it should be applied in this case.

Abrahamson, Judge

In 1990, new revisions to Articles 3 and 4 of the UCC were implemented (the "revisions"). The new revisions made a major change in the area of double forgeries. Before the revisions, the case law was uniform in treating a double forgery case as a forged drawer's signature case, with the loss falling on the drawee bank. The revisions, however, changed this rule by shifting to a comparative fault approach. Under the revised version of the UCC, the loss in double forgery cases is allocated between the depository and drawee banks based on the extent that each contributed to the loss. "By adopting a comparative fault approach, classification of the double forgery as either a forged signature or forged indorsement case is no longer necessarily determinative." Thus, under the revised Code, a depository bank may not necessarily escape liability in double forgery situations, as they did under the prior law.

Specifically, revised § 3-405 of the UCC, entitled "Employer's Responsibility for Fraudulent Indorsement by Employee," introduced the concept of comparative fault as between the employer of the dishonest employee/embezzler and the bank(s). This is the section under which Victory sued Wachovia. Section 3-405(b) states, in relevant part:

If the person paying the instrument or taking it for value or for collection fails to exercise ordinary care in paying or taking the instrument and that failure substantially contributes to loss resulting from the fraud, the person bearing the loss may recover from the person failing to exercise ordinary care to the extent the failure to exercise ordinary care contributed to the loss.

The Fictitious Payee Rule

Lunny made the fraudulent checks payable to actual vendors of Victory with the intention that the vendors not get paid. Wachovia therefore argues that Victory's action against it should

be barred by the fictitious payee rule under § 3-404. Section 3-404 states, in relevant part:

§ 3-404. Impostors; fictitious payees

(b) FICTITIOUS PAYEE.—If a person whose intent determines to whom an instrument is payable (section 3-110(a) or (b)) does not intend the person identified as payee to have any interest in the instrument or the person identified as payee of an instrument is a fictitious person, the following rules apply until the instrument is negotiated by special indorsement:

- (1.) Any person in possession of the instrument is its holder.
- (2.) An indorsement by any person in the name of the payee stated in the instrument is effective as the indorsement of the payee in favor of a person who, in good faith, pays the instrument or takes it for value or for collection.

The fictitious payee rule applies when a dishonest employee writes checks to a company's actual vendors, but intends that the vendors never receive the money; instead, the employee forges the names of the payees and deposits the checks at another bank. Under section 3-404(b) of the UCC, the indorsement is deemed to be "effective" since the employee did not intend for the payees to receive payment. The theory under the rule is that since the indorsement is "effective," the drawee bank was justified in debiting the company's account. Therefore, the loss should fall on the company whose employee committed the fraud.

Revised UCC § 3-404 changed the prior law by introducing a comparative fault principle. Subsection (d) of 3-404 provides that if the person taking the checks fails to exercise ordinary care, "the person bearing the loss may recover from the person failing to exercise ordinary care to the extent the failure to exercise ordinary care contributed to the loss." Therefore, "although the fictitious payee rule makes the indorsement 'effective,' the corporate drawer can shift the loss to any negligent bank, to the

extent that the bank's negligence substantially contributed to the loss." Under the revised Code, the drawer now has the right to sue the depository bank directly based on the bank's negligence. Under the Old Code, the fictitious payee rule was a "jackpot" defense for depository banks because most courts held that the depository bank's own negligence was irrelevant. However, under revised UCC §§ 3-404 and 3-405, the fictitious payee defense triggers principles of comparative fault, so a depository bank's own negligence may be considered by the trier of fact. Therefore, based on the foregoing reasons, the fictitious payee defense does not help Wachovia in this case.

Allocation of Liability

As stated, comparative negligence applies in this case because of the revisions in the Code. In determining the liability of the parties, the Court has considered, *inter alia*, the following factors:

- At the time of the fraud by Lunny, Wachovia's policies and regulations regarding the acceptance of checks for deposit provided that "checks payable to a non-personal payee can be deposited ONLY into a non-personal account with the same name."
- Approximately two hundred (200) checks drawn on Victory's corporate account were deposited into Lunny's personal account at Wachovia.
- The first twenty-three (23) fraudulent checks were made payable to entities that were not readily distinguishable as businesses, such as "Sean John." The check dated December 17, 2001, was the first fraudulent check made payable to a payee that was clearly a business, specifically "Beverly Hills Shoes, Inc."
- Lunny had been a bookkeeper for Victory from approximately 1982 until she resigned in May 2003. Rosenfeld never had any problems with Lunny's bookkeeping before she resigned.
- Lunny exercised primary control over Victory's bank accounts.
- Between 2001 and 2003, the checks that were generated to make payments to Victory's vendors were all computerized checks generated by Lunny. No other Victory employee, other than Lunny, knew how to generate the computerized checks, including Rosenfeld.
- The fraudulent checks were made payable to known vendors of Victory in amounts that were consistent with previous legitimate checks to those vendors.
- After forging the indorsement of the payee, Lunny either indorsed the check with her name followed by her account number, or referenced her account number following the forged indorsement. All of the checks that were misappropriated had the same exact account number, which was shown on the back side of the checks.
- About ten (10) out of approximately three hundred (300) checks each month were forged by Lunny and deposited into her personal account.
- Rosenfeld reviewed his bank statements from Hudson Bank on a monthly basis. Rosenfeld received copies of Victory's cancelled checks from Hudson Bank on a monthly basis. However, the copies of the cancelled checks were not in their normal size; instead, they were smaller, with six checks (front and back side) on each page.
- The forged indorsements were written out in longhand, i.e., Lunny's own handwriting, rather than a corporate stamped signature.
- Victory did not match its invoices for each check at the end of each month.
- An outside accounting firm performed quarterly reviews of Victory's bookkeeping records, and then met with Rosenfeld. This review was not designed to pick up fraud or misappropriation.

Based on the foregoing, the Court finds that Victory and Wachovia are comparatively negligent. With regard to Wachovia's negligence, it is clear that Wachovia was negligent in violating its own rules in repeatedly depositing corporate checks into Lunny's personal account at Wachovia. Standard commercial bank procedures dictate that a check made payable to a business be accepted only into a business checking account with the same title as the business. Had a single teller at Wachovia followed Wachovia's rules, the fraud would have been detected as early as December 17, 2001, when the first fraudulently created non-personal payee check was presented for deposit into Lunny's personal checking account. Instead, Wachovia permitted another one hundred and seventy-six (176) checks to be deposited into Lunny's account after December 17, 2001. The Court finds that Wachovia failed to exercise ordinary care, and that failure substantially contributed to Victory's loss resulting from the fraud. Therefore, the Court concludes that Wachovia is seventy (70) percent liable for Victory's loss.

Victory, on the other hand, was also negligent in its supervision of Lunny, and for not discovering the fraud for almost a two-year period. Rosenfeld received copies of the cancelled checks, albeit smaller in size, on a monthly basis from Hudson Bank. The copies of the checks displayed both the front and back of the checks. Rosenfeld was negligent in not recognizing his own forged signature on the front of the checks, as well as not spotting his own bookkeeper's name and/or account number on the back of the checks (which appeared far too many times and on various "payees" checks to be seen as regular by a non-negligent business owner).

Further, there were inadequate checks and balances in Victory's record keeping process. For example, Victory could have ensured that it had an adequate segregation of duties, meaning

that more than one person would be involved in any control activity. Here, Lunny exercised primary control over Victory's bank accounts. Another Victory employee, or Rosenfeld himself, could have reviewed Lunny's work. In addition, Victory could have increased the amount of authorization that was needed to perform certain transactions. For example, any check that was over a threshold monetary amount would have to be authorized by more than one individual. This would ensure an additional control on checks that were larger in amounts. Furthermore, Victory did not match its invoices for each check at the end of each month. When any check was created by Victory's computer system, the value of the check was

automatically assigned to a general ledger account before the check could be printed. The values in the general ledger account could have been reconciled at the end of each month with the actual checks and invoices. This would not have been overly burdensome or costly because Victory already had the computer system that could do this in place. Based on the foregoing, the Court concludes that Victory is also thirty (30) percent liable for the loss.

For all the foregoing reasons, the Court finds that Wachovia is 70 percent liable and Victory is 30 percent liable for the \$188,273.00 loss. Therefore, Victory Clothing Company, Inc. is awarded \$131,791.10.

Conversion Conversion of an instrument is an unauthorized assumption and exercise of ownership over it. A negotiable instrument can be converted in a number of ways. For example, it might be presented for payment or acceptance, and the person to whom it is presented might refuse to pay or accept and refuse to return it. An instrument also is converted if a person pays an instrument to a person not entitled to payment—for example, if it contains a forged indorsement.

Revised Article 3 modifies and then expands the previous treatment of conversion and provides that the law applicable to conversion of personal property applies to instruments. It also specifically provides that conversion occurs if (1) an instrument lacks an indorsement necessary for negotiation; and (2) it is (a) purchased, (b) taken for collection, or (c) paid by a drawee to a person not entitled to payment. An action for conversion may not be brought by (1) the maker, drawer, or acceptor of the instrument; or (2) a payee or an indorsee who did not receive delivery of the instrument either directly or through delivery to an agent or copayee [3–420].

Thus, if a bank pays a check that contains a forged indorsement, the bank has converted the check by wrongfully paying it. The bank then becomes liable for the face amount of the check to the person whose indorsement was forged [3–420]. For example, Arthur Able draws a check for \$500 on his account at First Bank, payable to the order of Bernard Barker. Carol Collins steals the check, forges Barker's indorsement on it, and cashes it at First Bank. First Bank has converted Barker's property, because it had no right to pay the check without Barker's valid indorsement. First Bank must pay Barker \$500 and then it can try to locate Collins to get the \$500 back from her.

As is true under the original version of Article 3, if a check contains a restrictive indorsement (such as “for

deposit” or “for collection”) that shows a purpose of having the check collected for the benefit of a particular account, then any person who purchases the check or any depositary bank or payor bank that takes it for immediate payment converts the check unless the indorser receives the proceeds or the bank applies them consistent with the indorsement [3–206].

Discharge of Negotiable Instruments

Discharge of Liability The obligation of a party to pay an instrument is discharged (1) if he meets the requirements set out in Revised Article 3 or (2) by any act or agreement that would discharge an obligation to pay money on a simple contract. Discharge of an obligation is not effective against a person who has the rights of a holder in due course of the instrument and took the instrument without notice of the discharge [3–601].

The most common ways that an obligor is discharged from his liability are:

1. Payment of the instrument.
2. Cancellation of the instrument.
3. Alteration of the instrument.
4. Modification of the principal's obligation that causes loss to a surety or impairs the collateral.
5. Unexcused delay in presentment or notice of dishonor with respect to a check (discussed earlier in this chapter).
6. Acceptance of a draft [3–414(c) or (d); 3–415(d)]; as noted earlier in the chapter, a drawer is discharged of liability of a draft that is accepted by a bank (e.g., if a

check is certified by a bank) because at that point the holder is looking to the bank to make the instrument good.

Discharge by Payment Generally, payment in full discharges liability on an instrument to the extent payment is (1) by or on behalf of a party obligated to pay the instrument and (2) to a person entitled to enforce the instrument. For example, Arthur makes a note of \$1,000 payable to the order of Bryan. Bryan indorses the note “Pay to the order of my account no. 16154 at First Bank, Bryan.” Bryan then gives the note to his employee, Clark, to take to the bank. Clark takes the note to Arthur, who pays Clark the \$1,000. Clark then runs off with the money. Arthur is not discharged of his primary liability on the note because he did not make his payment consistent with the restrictive indorsement. To be discharged, Arthur has to pay the \$1,000 into Bryan’s account at First Bank.

To the extent of payment, the obligation of a party to pay the instrument is discharged even though payment is made with knowledge of a claim to the instrument by some other person. However, the obligation is not discharged if: (1) there is a claim enforceable against the person making payment and payment is made with knowledge of the fact that payment is prohibited by an injunction or similar legal process; or (2) in the case of an instrument other than a cashier’s, certified, or teller’s check, the person making the payment had accepted from the person making the claim indemnity against loss for refusing to make payment to the person entitled to enforce payment. The obligation also is not discharged if he knows the instrument is a stolen instrument and pays someone he knows is in wrongful possession of the instrument [3–602].

Discharge by Cancellation A person entitled to enforce a negotiable instrument may discharge the liability of the parties to the instrument by canceling or renouncing it. If the holder mutilates or destroys a negotiable instrument with the intent that it no longer evidences an obligation to pay money, the holder has canceled it [3–604]. For example, a grandfather lends \$5,000 to his grandson for college expenses. The grandson gives his grandfather a promissory note for \$5,000. If the grandfather later tears up the note with the intent that the grandson no longer owes him \$5,000, the grandfather has canceled the note.

An accidental destruction or mutilation of a negotiable instrument is not a cancellation and does not

discharge the parties to it. If an instrument is lost, mutilated accidentally, or destroyed, the person entitled to enforce it still can enforce the instrument. In such a case, the person must prove that the instrument existed and that she was its holder when it was lost, mutilated, or destroyed.

Altered Instruments; Discharge by Alteration A person paying a fraudulently altered instrument, or taking it for value, in good faith and without notice of the alteration, may enforce the instrument (1) according to its original terms or (2) in the case of an incomplete instrument later completed in an unauthorized manner, according to its terms as completed [3–407(c)]. An alteration occurs if there is (1) an unauthorized change that modifies the obligation of a party to the instrument or (2) an unauthorized addition of words or numbers or other change to an incomplete instrument that changes the obligation of any party [3–407]. A change that does not affect the obligation of one of the parties, such as dotting an *i* or correcting the grammar, is not considered to be an alteration.

Two examples illustrate the situations in which Revised Article 3 allows fraudulently altered instruments to be enforced. First, assume the amount due on a note is fraudulently raised from \$10 to \$10,000. The contract of the maker has been changed: the maker promised to pay \$10, but after the change has been made, he would be promising to pay much more. If the note is negotiated to or paid by a person who was without notice of the alteration, that person can enforce the note against the maker only according to its original terms. It would pursue the alterer or the person taking from the alterer for the balance on a presentment or transfer warranty [3–417; 3–416]. If the maker’s negligence substantially contributed to the alteration, then the maker would be responsible for as much as the entire \$10,000 [3–407(c); 3–406].

Second, assume Swanson draws a check payable to Frank’s Nursery, leaving the amount blank. He gives it to his gardener with instructions to purchase some fertilizer at Frank’s and to fill in the purchase price of the fertilizer when it is known. The gardener fills in the check for \$100 and gives it to Frank’s in exchange for the fertilizer (\$17.25) and the difference in cash (\$82.75). The gardener then leaves town with the cash. If Frank’s had no knowledge of the unauthorized completion, it could enforce the check for \$100 against Swanson. A similar situation is illustrated in *American Federal Bank, FSB v. Parker*.

American Federal Bank, FSB v. Parker

392 SE.2d 798 (S.C. Ct. App. 1990)

Thomas Kirkman was involved in the horse business and was a friend of John Roundtree, a loan officer for American Federal Bank. Kirkman and Roundtree conceived a business arrangement in which Kirkman would locate buyers for horses and the buyers could seek financing from American Federal. Roundtree gave Kirkman blank promissory notes and security agreements from American Federal. Kirkman was to locate the potential purchaser, take care of the paperwork, and bring the documents to the bank for approval of the purchaser's loan.

Kirkman entered into a purchase agreement with Gene Parker, a horse dealer, to copurchase for \$35,000 a horse named Wills Hightime that Kirkman represented he owned. Parker signed the American Federal promissory note in blank and also executed in blank a security agreement that authorized the bank to disburse the funds to the seller of the collateral. Kirkman told Parker he would cosign the note and fill in the details of the transaction with the bank. While Kirkman did not cosign the note, he did complete it for \$85,000 as opposed to \$35,000. Kirkman took the note with Parker's signature to Roundtree at American Federal and received two checks from the bank payable to him in the amounts of \$35,000 and \$50,000. Kirkman took the \$35,000 and gave it to the real owner of the horse. Parker then received the horse.

Parker began making payments to the bank and called on Kirkman to assist in making the payments pursuant to their agreement. However, Kirkman skipped town, taking the additional \$50,000 with him. Parker repaid the \$35,000 but refused to pay any more. He argued that he agreed to borrow only \$35,000 and the other \$50,000 was unauthorized by him. American Federal Bank filed suit to recover the balance due on the note. The trial court held in favor of the bank and Parker appealed.

Cureton, Judge

Parker executed a promissory note in blank. Under the Uniform Commercial Code, the maker of a note agrees to pay the instrument according to its tenor at the time of engagement “or as completed pursuant to section 3–115 on incomplete instruments.” Under section 3–115(2) if the completion of an instrument is unauthorized the rules as to material alteration apply. Under section 3–407(1)(b) the completion of an incomplete instrument otherwise than as authorized is considered an alteration. However, under section 3–407(3) a subsequent holder in due course may enforce an incomplete instrument as completed. Official comment 4 indicates that where blanks are filled or an incomplete instrument is otherwise completed, the loss is placed upon the party who left the instrument incomplete and the holder is permitted to enforce it according to its completed form.

We agree with the trial court that the bank was entitled to the directed verdicts. The responsibility for the situation rests with Parker. He and Kirkman negotiated their deal. Parker signed a blank promissory note. He relied upon Kirkman to cosign the note and fill it in for \$35,000. Parker's negligence substantially contributed to the material alteration as a matter of law.

Parker argues that it was not reasonable commercial practice for American Federal to give Kirkman possession of blank promissory notes. After the fact, Parker argues the bank should have contacted him or checked to be sure everything was correct before disbursing the proceeds of the loan to Kirkman. There is no evidence in the record to establish the bank had any reason to inquire into the facial validity of the note. The note was complete when presented to the bank and there were no obvious alterations on it.

The record establishes American Federal took the note in good faith and without notice of any defense to it by Parker. American Federal gave value for the note when it disbursed the funds to Kirkman. As a holder in due course, American Federal may enforce the note against Parker as completed. Sections 3–302; 3–407(3).

Judgment for American Federal affirmed.

Note: Although this case was decided under the original version of Article 3, the same result would be reached under Revised Article 3 so long as the court found Kirkman's completion (alteration) to be fraudulent.

In any other case, a fraudulent alteration **discharges** any party whose obligation is affected by the alteration *unless* (1) the party assents or (2) is precluded from asserting the alteration (e.g., because of the party's negligence). Assume that Anderson signs a promissory note

for \$100 payable to Bond. Bond indorses the note “Pay to the order of Connolly, Bond” and negotiates it to Connolly. Connolly changes the \$100 to read \$100,000. Connolly's change is unauthorized and fraudulent. As a result, Anderson is discharged from her liability as

maker of the note and Bond is discharged from her liability as indorser. Neither of them has to pay Connolly. The obligations of both Anderson and Bond were changed because the amount for which they are liable was altered.

No other alteration—that is, one that is not fraudulent—discharges any party and a holder may enforce the instrument according to its *original* terms. Thus, there would be no discharge if a blank is filled in the honest belief that it is authorized or if a change is made, without any fraudulent intent, to give the maker on a note the benefit of a lower interest rate.

Discharge of Indorsers and Accommodation Parties

If a person entitled to enforce an instrument agrees, with or without consideration, to a material modification of the obligation of a party to the instrument, including an extension of the due date, then any accommodation party or indorser who has a right of recourse against the person whose obligation is modified is discharged *to the extent the modification causes a loss to the indorser or accommodation party*. Similarly, if collateral secures the obligation of a party to an

instrument and a person entitled to enforce the instrument impairs the value of the collateral, the obligation of the indorser or accommodation party having the right of recourse against the obligor is discharged to the extent of the impairment. These discharges are not effective unless the person agreeing to the modification or causing the impairment knows of the accommodation or has notice of it. Also, no discharge occurs if the obligor assented to the event or conduct, or if the obligor has waived the discharge [3–605].

For example, Frank goes to Credit Union to borrow \$4,000 to purchase a used automobile. The credit union has Frank sign a promissory note and takes a security interest in the automobile (i.e., takes it as collateral for the loan). It also asks Frank's brother, Bob, to sign the note as an accommodation maker. Subsequently, Frank tells the credit union he wants to sell the automobile and it releases its security interest. Because release of the collateral adversely affects Bob's obligation as accommodation maker, he is discharged from his obligation as accommodation maker in the amount of the value of the automobile.

Problems and Problem Cases

1. Terance Fitzgerald drew a check for \$4,000 payable to New Look Auto Trim and Upholstery and delivered it to Yvonne Goss and Benii Arrazza, the owners of New Look. Goss and Arrazza each indorsed the check in blank and deposited it in Goss's personal account at the Cincinnati Central Credit Union. When the Credit Union presented the check to Fitzgerald's bank, the check was dishonored for insufficient funds. The credit union then demanded that Goss and Arrazza honor the check. Are Goss and Arrazza obligated to make the check good to the credit union?
2. Janota's signature appeared on a note under the name of a corporation acknowledging a \$1,000 debt. No other wording appeared other than Janota's name and the corporate name. The holder of the note sues Janota on the note. What will Janota argue and what will be the result?
3. In 1997, Maryellen Peterson was a part-time employee of Textiles Specialties & Chemicals doing business as CS Industries. On April 17, 1997, Peterson signed a check in the amount of \$13,789.80 on the account of CS Industries and payable to Holtrachem, Inc. The check was imprinted with name of CS Industries. However, Peterson signed only her name and did not indicate she was signing in her representative capacity behalf of CS industries. The drawee bank returned the check to Holtrachem due to insufficient funds in CS Industries' account. Holtrachem filed suit against Peterson, seeking to hold her liable in her personal capacity as the drawer of the check. Is an individual who signs a check drawn on a corporate account without indicating she is signing in representative capacity personally liable on the instrument?
4. In November 2005, Michele Fehl, an administrative assistant recently hired by AFT Trucking stole eight company checks from the company's offices. She made out the checks to herself in various amounts. Fehl was not authorized to sign checks on behalf of the company. Over the next three weeks, Fehl presented the checks at Money Stop, a check-cashing service, which gave her cash for the checks. Subsequently, the checks were dishonored by AFT Trucking. It fired Fehl, who was arrested and criminally prosecuted. Money Stop brought suit against AFT Trucking to recover the funds it had disbursed. AFT Trucking asserted that Money Stop's only recourse was against Fehl, the person who had signed the checks. Is Money Stop entitled to recover from AFT Trucking?
5. First National Bank certified Smith's check in the amount of \$29. After certification, Smith altered the

check so that it read \$2,900. He presented the check to a merchant in payment for goods. The merchant then submitted the check to the bank for payment. The bank refused, saying it had certified the instrument for only \$29. Can the merchant recover the \$2,900 from the bank?

6. A check was drawn on First National Bank and made payable to Howard. It came into the possession of Carson, who forged Howard's indorsement and cashed it at Merchant's Bank. Merchant's Bank then indorsed it and collected payment from First National. Assuming that Carson is nowhere to be found, who bears the loss caused by Carson's forgery?
7. From May through August 1992, Adrenetti Collins, an employee of the Professional Golfers Association (PGA), forged and negotiated 18 PGA checks totaling \$22,699.81. The PGA brought action against Whitney National Bank of New Orleans, which paid the checks, to recover the monies paid out of the PGA account. The bank contended that PGA should be precluded from recovering because its negligence substantially contributed to the forgeries.

Collins was hired as a temporary employee sometime in February or March 1992 by Robert Brown, the executive director of the Gulf States Section of the PGA, and then was hired as a full-time employee in May. Brown had known Collins when he hired her but was not aware that in 1982 she had been convicted of the theft of \$5,445.07 from a previous employer, which she obtained by forging and negotiating 20 company checks. She also had a 1985 conviction for issuing worthless checks.

Brown had the primary responsibility in the office for signing checks, paying bills, and handling the bank accounts. The checks came in lots of 2,000, were made to be tractor-fed through a printer, and were prenumbered. They were kept in a box under the printer in Brown's office. Collins had access to the office. Brown wrote approximately 150 to 200 checks a month using a computer program, Quicken, to write and record the checks. Occasionally, there were alignment problems with the printer and checks were not printed correctly and had to be destroyed. Brown did not account for checks that he destroyed during the alignment process, but simply overrode the computer program and printed whatever check number was next in line.

Collins apparently took the first group of checks numbered 6365–6370 from Brown's office in late April, and Brown did not take note of them when he

wrote check number 6371 on May 1. The computer had no record of them—and Brown overrode the computer and went on to print the next check in line. The first of the forged checks was cashed on May 4. Collins intercepted both the May and June 1992 bank statements sent by Whitney to Brown. She prepared forged statements leaving out the numbers of those checks she had stolen. The forged statements were crude replicas of the usual Whitney statements. However, when Brown received them, he simply reconciled them; they contained canceled checks, but not the ones Collins had forged and negotiated. Brown did not receive any statements for July and August. On August 31, 1992, Collins asked for a leave of absence. On September 18, 1992, Brown received an overdraft notice from Whitney; this was the first inkling he had that something was wrong. He asked for copies of the July and August statements, discovered the unauthorized use, and notified Whitney.

The forgeries would have been very difficult for the bank to detect. Brown's signature on the account signature card consisted of a semi-legible letter or two and a long loop. The signature on the forged checks contained a very similar semi-legible letter or two followed by a long loop. Whitney's practice was to verify checks in the amount of \$5,000 and over; one check fell into this category. The evidence established that Whitney had followed reasonable commercial standards in the banking industry in paying the checks. Was the PGA precluded from recovering the amount of the forged checks from Whitney National Bank because its negligence substantially contributed to the forgery?

8. C & M Contractors is a construction and general contracting company in Gardendale, Alabama, that performs work at job sites throughout the southeastern United States. Mary Bivens was employed by C & N and performed general administrative duties for it.

Each Wednesday morning, the foreman at each job site telephoned Bivens and gave her the names of the employees working on the job site and the number of hours they had worked. Bivens then conveyed this information to Automatic Data Processing (ADP), whose offices are in Atlanta, Georgia. ADP prepared payroll checks based on the information given by Bivens and sent the checks to the offices of C & N in Gardendale for authorized signatures. Bivens was not an authorized signatory. After the checks were signed, Bivens sent the checks to the job site foreman for delivery to the employees.

In 1991, Bivens began conveying false information to ADP about employees and hours worked. On

the basis of this false information, ADP prepared payroll checks payable to persons who were actual employees but had not worked the hours Bivens had indicated. After obtaining authorized signatures from C & N, Bivens intercepted the checks, forged the indorsement of the payees, and either cashed the checks at Community Bancshares or deposited them into her account at Community Bancshares, often presenting numerous checks at one time. Bivens continued this practice for almost a year, forging over 100 checks, until Jimmy Nation, vice president of C & N, discovered the embezzlement after noticing payroll checks payable to employees who had not recently performed services for the corporation. Bivens subsequently admitted to forging the indorsements.

C & N brought suit against Community Bancshares for conversion when it cashed or accepted for deposit the numerous payroll checks containing forged payee indorsements. Was Community Bancshares, as the depository bank, liable to the drawer, C & N, for conversion because it accepted the checks containing forged payee indorsements?

9. Stockton's housekeeper stole some of his checks, forged his name as drawer, and cashed them at Gristedes Supermarket where Stockton maintained check-cashing privileges. The checks were presented to Stockton's bank and honored by it. Over the course of 18 months, the scheme netted the housekeeper in excess of \$147,000 on approximately 285 forged checks. Stockton brought suit against Gristedes Supermarket for conversion, seeking to recover

the value of the checks it accepted and for which it obtained payment from the drawee bank. Was Gristedes Supermarket liable to Stockton for conversion for accepting and obtaining payment of the stolen and forged checks?

10. Charles Peterson, a farmer and rancher, was indebted to Crown Financial Corporation on a \$4,450,000 promissory note that was due on December 29, 1992. Shortly before the note was due, Crown sent Peterson a statement of interest due on the note (\$499,658.85). Peterson paid the interest and executed a new note in the amount of \$4,450,000 that was to mature in December 1995. The old note was then marked "canceled" and returned to Peterson. In 1995, Crown billed Peterson for \$363,800 in interest that had been due on the first note but apparently not included in the statement. Peterson claimed that the interest had been forgiven and that he was not obligated to pay it. Was Peterson still obligated to pay interest on the note that had been returned to him marked "canceled"?

The FTC's Holder in Due Course Rule

Use the Internet to locate the site for the Federal Trade Commission. Review the FTC's presentation of the holder in due course rule, and note when someone taking a negotiable instrument from a consumer needs to be concerned with its implications.

chapter 34

CHECKS AND ELECTRONIC TRANSFERS

Susan Williams opened a checking account at the First National Bank. She made an initial deposit of \$1,800, signed a signature card that indicated to the bank that she was the authorized signator on the account, and was given a supply of blank checks. She also received an ATM card that, when used along with an assigned PIN (personal identification number), allowed her to make deposits to her account as well as to obtain cash from it. Each month the bank sent her a statement reflecting the activity in the account during the previous month along with the canceled checks. Several months after she opened the account, the bank erroneously refused to pay a check she had written to a clothing store even though she had sufficient funds in her account. As a result, the store filed a complaint with the local prosecutor indicating she had written a “bad check.” On one occasion, Susan called the bank to stop payment on a check she had written to cover repairs to her automobile because while driving the car home, she discovered the requested repair had not been made. However, the bank paid the check later that day despite the stop-payment order she had given the bank. Another time, Susan’s wallet fell out of her purse while she was shopping at a mall. She received a call the next morning indicating the wallet had been found and she retrieved it at that time. However, when she received her next monthly statement from the bank, she discovered that someone had apparently used her ATM card to withdraw \$200 from her account on the day her wallet had been lost. Susan’s experience raises a number of legal issues that will be covered in this chapter, including:

- What rights does Susan have against the bank for refusing to pay the check to the clothing store despite the fact she had sufficient funds on deposit to cover it?
- What rights does Susan have against the bank for failing to honor the stop-payment order she placed on the check she had written to the repair shop?
- What rights does Susan have against the bank because of the unauthorized use of her ATM card? What must she do to preserve those rights?
- If a repair shop refuses to release your automobile unless you pay it more than the repair shop had advised you it would charge you for the the work, would it be ethical to give the repair shop a check for the larger amount knowing you intend to immediately go to your bank and stop payment on it?

FOR MOST PEOPLE, a checking account provides the majority of their contact with negotiable instruments. This chapter focuses on the relationship between the drawer with a checking account and the drawer’s bank, known as the drawee bank.

The Drawer–Drawee Relationship

There are two sources that govern the relationship between the depositor and the drawee bank: the deposit

agreement and Articles 3 and 4 of the Code. Article 4, which governs Bank Deposits and Collections, allows the depositor and drawee bank (which Article 4 calls the “payor bank”) to vary Article 4’s provisions with a few important exceptions. The deposit agreement cannot disclaim the bank’s responsibility for its own lack of good faith or failure to exercise ordinary care or limit the measure of damages for the lack or failure; however, the parties may determine by agreement the standards by which to measure the bank’s responsibility so long as the standards are not manifestly unreasonable [4–103].

The deposit agreement establishes many important relationships between the depositor and drawee/payor bank. The first of these is their relationship as creditor and debtor, respectively, so that when a person deposits money in an account at the bank, the law no longer considers him the owner of the money. Instead, he is a creditor of the bank to the extent of his deposits and the bank becomes his debtor. Also, when the depositor deposits a check to a checking account, the bank also becomes his agent for collection of the check. The bank as the person’s agent owes a duty to him to follow his reasonable instructions concerning payment of checks and other items from his account and a duty of ordinary care in collecting checks and other items deposited to the account.

Bank’s Duty to Pay When a bank receives a properly drawn and payable check on a person’s account and there are sufficient funds to cover the check, the bank is under a duty to pay it. If the person has sufficient

funds in the account and the bank refuses to pay, or dishonors, the check, the bank is liable for the actual damages proximately caused by its wrongful dishonor as well as consequential damages [4–402]. Actual damages may include charges imposed by retailers for returned checks as well as damages for arrest or prosecution of the customer. Consequential damages include injury to the depositor’s credit rating that results from the dishonor.

For example, Donald Dodson writes a check for \$1,500 to Ames Auto Sales in payment for a used car. At the time that Ames Auto presents the check for payment at Dodson’s bank, First National Bank, Dodson has \$1,800 in his account. However, a teller mistakenly refuses to pay the check and stamps it NSF (not sufficient funds). Ames Auto then goes to the local prosecutor and signs a complaint against Dodson for writing a bad check. As a result, Dodson is arrested. Dodson can recover from First National the damages that he sustained because the bank wrongfully dishonored his check, including the damages involved in his arrest, such as his attorney’s fees.

Bank’s Right to Charge to Customer’s Account The drawee bank has the right to charge any properly payable check to the account of the customer or drawer. The bank has this right even though payment of the check creates an overdraft in the account [4–401]. If an account is overdrawn, the customer owes the bank the amount of the overdraft and the bank may take that amount out of the next deposit that the customer

CYBERLAW IN ACTION

Account Aggregation

“Account aggregation” is a financial management tool offered by banks and by third-party, Internet-based companies. Consumers who want to use this tool will allow a bank or third party to gather information from many accounts (checking, savings, pension funds, certificates of deposit, securities firms, and insurance companies) by giving the account aggregator key information such as the account numbers and passwords for the consumer’s various accounts. The aggregator then gathers information from the Web sites of the different financial services firms (insurance companies, banks, investment planners, securities brokers, etc.) and makes it possible for the consumer to view all of this information on

one screen, and in some cases to transfer funds between accounts.

Some consumer advocates argue that “account aggregation”—also known as “screen scraping”—is more risky for consumers than accessing each financial service provider’s Web site separately. They worry that the possibility of hacking into such an information-heavy account increases the chance that a criminal could wipe out the entire holdings of one consumer or a group of consumers. Consumers like “account aggregation” because it gives them all of their financial accounts essentially on one “page” on their computer screens. Other consumers like it because “account aggregation” allows them to move funds between their various accounts quickly from their computers without waiting to speak to each specific financial services provider to complete transactions.

makes or from another account that the depositor maintains with the bank. Alternatively, the bank might seek to collect the amount directly from the customer. If there is more than one customer who can draw from an account, only that customer—or those customers—who sign the item or who benefit from the proceeds of an overdraft are liable for the overdraft.

Stale Checks The bank does not owe a duty to its customer to pay any checks out of the account that are more than six months old. Such checks are called **stale checks**. However, the bank acting in good faith may pay a check that is more than six months old and charge it to the drawer-depositor's account [4–404].

Altered and Incomplete Items If the bank in good faith pays a check drawn by the drawer-depositor but subsequently altered, it may charge the customer's account with the amount of the check as originally drawn. Also, if an incomplete check of a customer gets into circulation, is completed, and is presented to the drawee bank for payment, and the bank pays the check, the bank can charge the amount as completed to the customer's account even though it knows that the check has been completed, unless it has notice that the completion was improper [4–401(d)]. The respective rights, obligations, and liabilities of drawee banks and their drawer-customers concerning forged and altered checks are discussed in more detail later in this chapter.

Limitations on Bank's Right or Duty Article 4 recognizes that the bank's right or duty to pay a check or to charge the depositor's account for the check (including exercising its right to set off an amount due to it by the depositor) may be terminated, suspended, or modified by the depositor's order to stop payment (which is discussed in the next section of this chapter). In addition, it may be stopped by events external to the relationship between the depositor and the bank. These external events include the filing of a bankruptcy petition by the depositor or by the depositor's creditors, and the garnishment of the account by a creditor of the depositor. The bank must receive the stop-payment order from its depositor or the notice of the bankruptcy filing or garnishment before the bank has certified the check, paid it in cash, settled with another bank for the amount of the item without a right to revoke the settlement, or otherwise become accountable for the amount of the check under Article 4, or the cut-off hour on the banking day after the check is received if the bank established a cut-off hour [4–303]. These restrictions on

the bank's right or duty to pay are discussed in later sections of this chapter.

Postdated Checks Under original Articles 3 and 4, a postdated check was not properly payable by the drawee bank until the date on the check. The recent amendments to Article 4 change this. Under the revision, an otherwise properly payable postdated check that is presented for payment before the date on the check may be paid and charged to the customer's account *unless* the customer has given notice of it to the bank. The customer must give notice of the postdating in a way that describes the check with reasonable certainty. It is effective for the same time periods as Article 4 provides for stop-payment orders (discussed below). The customer must give notice to the bank at such time and in such a manner as to give the bank an opportunity to act on it before the bank takes any action with respect to paying the check. If the bank charges the customer's account for a postdated check before the date stated in the notice given to the bank, the bank is liable for damages for any loss that results. Such damages might include those associated with the dishonor of subsequent items [3–113(a); 4–401(c)].

There are a variety of reasons why a person might want to postdate a check. For example, a person might have a mortgage payment due on the first of the month at a bank located in another state. To make sure that the check arrives on time, the customer may send the payment by mail several days before the due date. However, if the person is depending on a deposit of her next monthly paycheck on the first of the month to cover the mortgage payment, she might postdate the check to the first of the following month. Under the original version of Articles 3 and 4, the bank could not properly pay the check until the first of the month. However, under the revisions it could be properly paid by the bank before that date if presented earlier. To avoid the risk that the bank would dishonor the check for insufficient funds if presented before the first, the customer should notify the drawee bank in a manner similar to that required for stop payment of checks.

Stop-Payment Order A stop-payment order is a request made by a customer of a drawee bank instructing it not to pay or certify a specified check. As the drawer's agent in the payment of checks, the drawee bank must follow the reasonable orders of the drawer-customer about payments made on the drawer's behalf. Any person authorized to draw a check may stop payment of it. Thus, any person authorized to sign a check on the account may stop payment even if she did not sign the check in question [4–403(a)].

To be effective, a payor bank must receive the stop-payment order in time to give the bank a reasonable opportunity to act on the order. This means that the bank must receive the stop-payment order before it has paid or certified the check. In addition, the stop-payment order must come soon enough to give the bank time to instruct its tellers and other employees that they should not pay or certify the check [4-403(a)]. The stop-payment order also must describe the check with "reasonable certainty" so as to provide the bank's employees the ability to recognize it as the check corresponding to the stop-payment order.

The customer may give a stop-payment order orally to the bank, but it is valid for only 14 days unless the customer confirms it in writing during that time. A written stop-payment order is valid for six months and the customer can extend it for an additional six months by giving the bank instructions in writing to continue the order [4-403(b)]. (See Figure 1.)

Sometimes the information given the bank by the customer concerning the check on which payment is to be stopped is incorrect. For example, there may be an error in the payee's name, the amount of the check, or the number of the check. The question then arises whether the customer has accorded the bank a reasonable opportunity to act on his request. A common issue is whether the stop-payment order must have the dollar amount correct to the penny. Banks often take the position that the stop-payment order must be correct to the penny because they program and rely on computers to focus on the customer's account number and the amount of the check in question to avoid paying an item subject to a stop-payment order. The

amendments to Article 4 do not resolve this question. In the Official Comments, the drafters indicate that "in describing an item, the customer, in the absence of a contrary agreement, must meet the standard of what information allows the bank under the technology then existing to identify the check with reasonable certainty." In the Stop-Payment Order in Figure 1, the bank takes a more lenient approach than some: it asks for the range of number or low and high dollar of the check the customer does not want the bank to pay.

Bank's Liability for Payment after Stop-Payment Order

While a stop-payment order is in effect, the drawee bank is liable to the drawer of a check that it pays for any loss that the drawer suffers by reason of such payment. However, the drawer-customer has the burden of establishing the fact and amount of the loss. To show a loss, the drawer must establish that the drawee bank paid a person against whom the drawer had a valid defense to payment. To the extent that the drawer has such a defense, he has suffered a loss due to the drawee's failure to honor the stop-payment order.

For example, Brown buys what is represented to be a new car from Foster Ford and gives Foster Ford his check for \$16,280 drawn on First Bank. Brown then discovers that the car is in fact a used demonstrator model and calls First Bank, ordering it to stop payment on the check. If Foster Ford presents the check for payment the following day and First Bank pays the check despite the stop-payment order, Brown can require the bank to recredit his account. (The depositor-drawer bases her claim to recredit on the

Account address: 18050 SMITH RD.

BANK ONE is hereby requested to refuse payment on the herein described check if presented for payment. In requesting BANK ONE to stop payment on this item, the undersigned agrees to hold BANK ONE harmless for all costs and expenses incurred by BANK ONE on account of refusing payment thereof and further agrees not to hold BANK ONE liable if, through inadvertent payment contrary to this request, other items drawn by the undersigned are returned for insufficient funds. The undersigned also agrees to assume the burden of establishing the fact and amount of any loss resulting from payment of this item contrary to this request.

As consideration for this service, the undersigned hereby authorizes an additional charge of \$ to be included in the regular service charge of this account.

This request is effective for six months. No renewal hereof shall be valid, unless in writing and delivered to BANK ONE.

BANK ONE is an affiliate of BANC ONE Corporation, Columbus, Ohio.

Authorized signature

fact that the bank did not follow her final instruction—the instruction not to pay the check.) Brown had a valid defense of misrepresentation that she could have asserted against Foster Ford if it had sued her on the check. Foster Ford would have been required to sue on the check or on Brown's contractual obligation to pay for the car.

Assume, instead, that Foster Ford negotiated the check to Smith and that Smith qualified as a holder in due course. Then, if the bank paid the check to Smith over the stop-payment order, Brown would not be able to have her account recredited, because Brown would not be able to show that she sustained any loss. If the bank had refused to pay the check, so that Smith came against Brown on her drawer's liability, Brown could not use her personal defense of misrepresentation of the prior use of the car as a reason for not paying Smith. Brown's only recourse would be to pursue Foster Ford on her misrepresentation claim.

The bank may ask the customer to sign a form in which the bank tries to disclaim or limit its liability for the stop-payment order, or, as in Figure 1, for damages if it fails to obey the stop-payment order. As explained at the beginning of this chapter, the bank cannot disclaim its responsibility for its failure to act in good faith or to exercise ordinary care in paying a check over a stop-payment order [4–103].

If a bank pays a check after it has received a stop-payment order and has to reimburse its customer for the improperly paid check, it acquires all the rights of its customer against the person to whom it originally made payment, including rights arising from the transaction on

which the check was based [4–407]. In the previous example involving Brown and Foster Ford, assume that Brown was able to have her account recredited because First Bank had paid the check to Foster Ford over her stop-payment order. Then, the bank would have any rights that Brown had against Foster Ford for the misrepresentation.

If a person stops payment on a check and the bank honors the stop-payment order, the person may still be liable to the holder of the check. Suppose Peters writes a check for \$450 to Ace Auto Repair in payment for repairs to her automobile. While driving the car home, she concludes that the car was not repaired properly. She calls her bank and stops payment on the check. Ace Auto negotiated the check to Sam's Auto Parts, which took the check as a holder in due course. When Sam's takes the check to Peters's bank, the bank refuses to pay because of the stop-payment order. Sam's then comes after Peters on her drawer's liability. All Peters has is a personal defense against payment, which is not good against a holder in due course. So, Peters must pay Sam's the \$450 and pursue her claim separately against Ace. If Ace were still the holder of the check, however, the situation would be different. Peters could use her personal defense concerning the faulty work against Ace to reduce or possibly to cancel her obligation to pay the check.

In the following case, *Seigel v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, the drawer was not entitled to have his account recredited for checks paid over a stop-payment order because he was unable to show he had suffered any loss.

Seigel v. Merrill Lynch, Pierce, Fenner & Smith, Inc. 745 A.2d 301 (D.C. Ct. App. 2000)

Walter Seigel, a Maryland resident, traveled to Atlantic City, New Jersey, to gamble. While there, Seigel wrote a number of checks to various casinos and, in exchange, received gambling chips with which to wager. The checks were drawn on Seigel's cash management account at Merrill, Lynch, Pierce, Fenner & Smith, which was established through its District of Columbia offices. There were sufficient funds in the accounts to cover all the checks.

Seigel eventually gambled away all the chips he had received for the checks. Upon returning to Maryland, Seigel discussed the outstanding checks with Merrill Lynch, informing his broker of the gambling nature of the transactions and his desire to avoid realizing the apparent losses. Merrill Lynch informed Seigel that it was possible to escape paying the checks by placing a stop-payment order and liquidating his cash management account. He took the advice and instructed Merrill Lynch to close his account, liquidate the assets, and to not honor any checks drawn on the account. Merrill Lynch agreed and confirmed Seigel's instructions.

Many of the checks were subsequently dishonored. However, Merrill Lynch accidentally paid several of the checks totaling \$143,000, despite the stop-payment order and account closure. Merrill Lynch then debited Seigel's margin account to cover the payments.

Seigel brought suit in the District of Columbia against Merrill Lynch for paying the checks over his stop-payment order. He argued that the District of Columbia Code precluded enforcement of the checks as void gambling debts, or in the alternative that New Jersey law prohibited the enforcement of the check. Therefore, he contended, Merrill Lynch had no rights by way of subrogation as a defense to payment over the stop-payment order. Merrill Lynch denied the applicability of the DC statute or any New Jersey law and contended that it stood in the shoes of the casinos to whom valid and enforceable checks had been given.

Steadman, Associate Judge

We begin with an examination of the statutory scheme relating to stop-payment orders, because we believe these provisions are determinative of this appeal. The relevant sections are found in the Uniform Commercial Code as enacted in the District of Columbia, and in particular §§ 4-403 and 4-407.

The basic right of the depositor to stop payment on any item drawn on the depositor's account is set forth in section 4-403(a). However, liability on the bank for payment over a stop-payment order is far from automatic. On the contrary, section 4-403(c) provides: "The burden of establishing the fact and amount of loss resulting from the payment of an item contrary to a stop-payment order or order to close an account is on the customer."

The provision, which places the burden on the customer to show actual loss, is reinforced by the extensive rights of subrogation given to the payor bank by section 4-407. Under that section, as to the drawer or maker (that is, the depositor), the bank is subrogated both to the rights of "any holder in due course on the item" and to the rights of "the payee or any other holder of the item against the drawer or maker either on the item or under the transaction out of which the item arose." As a leading authority on the Uniform Commercial Code has noted, this section "contemplates that the bank will use its subrogation rights primarily to defend against a suit by the customer to recover payment." 2 WHITE & SUMMERS, UNIFORM COMMERCIAL CODE § 21-6, at 396 n.11 (4th ed. 1995).

As applied to the facts here, then, Seigel is required to bear the burden of establishing that he in fact suffered a loss as a result of the payment of the checks. In assessing whether any such loss was actually incurred, Merrill Lynch must be treated as the subrogee of any rights of the casino payees against Seigel. As a payee of a dishonored check, the casino would have a prima facie right to recover its amount from Seigel as drawer, § 3-414(b), and the burden would be on Seigel to establish any defense he might assert on the instrument. § 3-308(b). Seigel asserts two such defenses: duress and illegality. We turn to an examination of those defenses.

Seigel first argues that the casinos would have no right to enforce the checks even under New Jersey law because he is a compulsive gambler. He contends that enforcement of checks by a casino against a compulsive gambler would run counter to New Jersey's Casino Control Act, or against the common law, and therefore the checks are invalid. N.J.S.A. § 5:12-1 *et seq*

(1998). Nothing in the New Jersey Casino Control Act, however, specifically prohibits the cashing and redemption of checks made by "compulsive gamblers."

With regard to Seigel's common law argument, it appears to be true that intoxication, duress, and unconscionability may, in certain circumstances, be valid defenses to the enforcement of gambling contracts in New Jersey. However, compulsive gambling, in and of itself, is not a defense to a contract action in New Jersey. Rather, the facts of a particular transaction may reveal "some overreaching or imposition resulting from a bargaining disparity between the parties, or such patent unfairness in the contract that no reasonable person not acting under compulsion or out of necessity would accept its terms." The question, therefore, is whether Seigel has set forth adequate facts to raise a genuine issue regarding the enforceability of the checks in light of his alleged compulsion and duress flowing from that disorder.

The entirety of Seigel's duress argument emanates from a single sentence in his affidavit: "For years I have had [a] gambling problem." If not ambiguous, the statement is conclusory. Unlike the gambler in *Lomonaco v. Sands Hotel Casino*, Seigel fails to produce any evidence in the record, specific or otherwise, regarding his problem and its relation to any unconscionable duress in the transactions at issue. In *Lomonaco*, the gambler described an abusive and bizarre "marathon gambling session" that included unsolicited credit increases from the casino, the existence of an alleged psychological disorder, and the gambler's concomitant use of pain killers, during which he lost \$285,000 in little over two days. The record—even when viewed in the light most favorable to Seigel on whom the burden of proof rests—simply does not present a genuine disputed issue of fact as to whether the contracts evidenced by the checks were made under duress, and therefore unenforceable. We therefore conclude that Seigel's assertion that the checks would be unenforceable in New Jersey fails.

Seigel also invokes the fact that these checks were given in order to obtain chips with which to gamble, and cites us in particular to D.C. Code § 16-1701(a) (1997 Repl.). Modeled after the English "Statute of Anne," 9 Anne, 14, § 1 (1710), that section provides that:

A thing in action, judgment, mortgage, or other security or conveyance made and executed by a person in which any part of the consideration is for money or other valuable things won by playing at any game whatsoever, or by betting

on the sides or hands of persons who play, or for the reimbursement or payment of any money knowingly lent or advanced for the purpose, or lent or advanced at the time and place of the play or bet, to a person so playing or betting or who, during the play, so plays or bets, is void.

In substance, Seigel claims that this statute would serve as a defense if the casinos were to seek to enforce the checks in the first instance in a District of Columbia court, and therefore this same statute requires that he be entitled to affirmatively recover from Merrill Lynch the amount of the checks in a District of Columbia court, regardless of the checks' enforceability elsewhere.

We may assume for present purposes that this statute would prevent direct enforcement of the checks in the District of Columbia, a somewhat dubious proposition in itself given the validity of the checks where made. But that is not this case. Rather, the question is whether under the relevant provisions of the Uniform Commercial Code, Seigel has met his burden of proof to establish actual loss. We think he has not.

As already indicated, even if payment had been stopped, the casinos could have enforced the checks in New Jersey, where the transaction was entered into. Merrill Lynch therefore, under the Code scheme, conceptually has the same right. Furthermore, even if there were a problem in asserting jurisdiction over Seigel in New Jersey, Maryland would have provided an appropriate forum for enforcing the checks. The highest Maryland court has squarely held that because there is no longer a strong public policy against gambling per se, but only against illegal gambling, the doctrine of *lex loci contractus* prevails in full, and that therefore Maryland courts will enforce gambling debts if legally incurred in a foreign jurisdiction. Accordingly, the casinos, and hence derivatively Merrill Lynch, could enforce the checks directly against Seigel in the state of his residence—Maryland.

We conclude that Seigel failed to establish that he ultimately suffered any actual loss as a result of the payment of the checks by Merrill Lynch.

Judgment for Merrill Lynch affirmed.

Ethics in Action

What Is the Ethical Thing to Do?

Suppose you take your car to a body shop to have it repainted. When you go to pick it up, you are not happy with the quality of the work, but the body shop refuses to release the car to you unless you pay in full for the work. You

give the shop a check in the amount requested, and on your way home you stop at your bank and request that the bank stop payment on the check you have just written, an action you decided to take when you were writing the check. Have you acted ethically?

Certified Check Normally, a drawee bank is not obligated to certify a check. When a drawee bank does certify a check, it substitutes its undertaking (promise) to pay the check for the drawer's undertaking and becomes obligated to pay the check. At the time the bank certifies a check, the bank usually debits the customer's account for the amount of the certified check and shifts the money to a special account at the bank. It also adds its signature to the check to show that it has accepted primary liability for paying it. The bank's signature is an essential part of the certification: the bank's signature must appear on the check [3-409]. If the holder of a check chooses to have it certified, rather than seeking to have it paid at that time, the holder has made a conscious decision to look to the certifying bank for payment and no longer may rely on the drawer

or the indorsers to pay it. See Figure 2 for an example of a certified check.

If the drawee bank certifies a check, then the drawer and any persons who previously indorsed the check are discharged of their liability on the check [3-414(c); 3-415(d)].

Cashier's Check A cashier's check differs from a certified check. A check on which a bank is both the drawer and the drawee is a cashier's check. The bank is primarily liable on the cashier's check. See Figure 3 for an example of a cashier's check. A teller's check is similar to a cashier's check. It is a check on which one bank is the drawer and another bank is the drawee. An example of a teller's check is a check drawn by a credit union on its account at a bank.

Figure 2 Certified Check

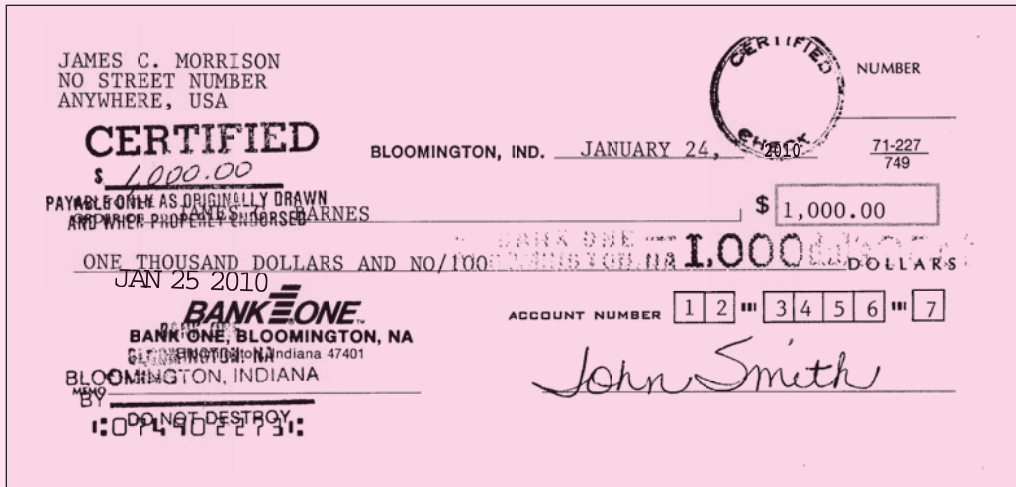

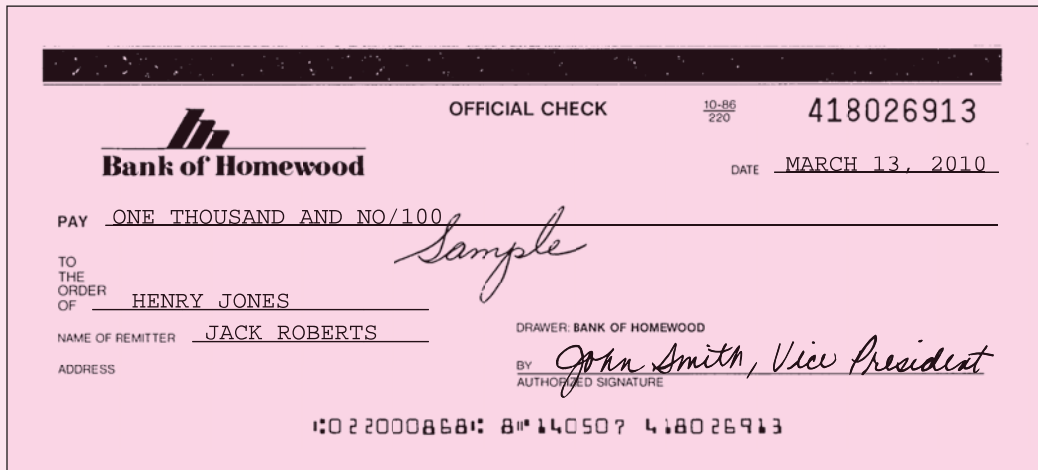

Figure 3 Cashier's Check

Death or Incompetence of Customer

Under the general principles of agency law, the death or incompetence of the principal terminates the agent's authority to act for the principal. However, slightly different rules apply to the authority of a bank to pay checks out of the account of a deceased or incompetent person. The bank has the right to pay the checks of an incompetent person until it has notice that a court has determined that the person is incompetent. Once the bank learns of this fact, it loses its

authority to pay that person's checks—because the depositor is not competent to issue instructions to pay.

Similarly, a bank has the right to pay the checks of a deceased customer until it has notice of the customer's death. Even if a bank knows of a customer's death, for a period of 10 days after the customer's death it can pay checks written by the customer prior to his death. However, the deceased person's heirs or other persons claiming an interest in the account can order the bank to stop payment [4-405].

Forged and Altered Checks

Bank's Right to Charge Account A check that bears a forged signature of the drawer or payee is generally not properly payable from the customer's account because the bank is not following the instructions of the depositor precisely as he gave them. The bank is expected to be familiar with the authorized signature of its depositor. If it pays such a check, Article 4 will treat the transaction as one in which the bank paid out its own funds, rather than the depositor's funds.

Similarly, a check that was altered after the drawer made it out—for example, by increasing the amount of the check—is generally not properly payable from the customer's account. However, as noted earlier, if the drawer is negligent and contributes to the forgery or alteration, he may be barred from claiming it as the reason that a particular check should not be charged to his account.

For example, Barton makes a check for \$1 in a way that makes it possible for someone to easily alter it to read \$101, and it is so altered. If the drawee bank pays the check to a holder in good faith, it can charge the \$101 to Barton's account if Barton's negligence contributed to the alteration. Similarly, if a company uses a mechanical check writer to write checks, it must use reasonable care to see that unauthorized persons do not have access to blank checks and to the check writer.

If the alteration is obvious, the bank should note that fact and refuse to pay the check when it is presented for payment. Occasionally, the alteration is so skillful that the bank cannot detect it. In that case, the bank is allowed to charge to the account the amount for which the check originally was written.

The bank has a duty to exercise "ordinary care" in the processing of negotiable instruments; it must observe the reasonable commercial standards prevailing among other banks in the area in which it does business. In the case of banks that take checks for collection or payment using automated means, it is important to note that reasonable commercial standards do not require the bank to examine every item *if* the failure to examine does not violate the bank's prescribed procedures and those procedures do not vary unreasonably from general banking practice or are not disapproved by the Code [3-107(a)(7); 4-103(c)]. For example, the bank's practice may be to examine those checks for more than \$1,000 and a sample of smaller checks. Thus, if it did not examine a particular check in the amount of \$250 for evidence of alteration or forgery, its action would be commercially reasonable so long as (1) it followed its own protocol, (2) that protocol

was not a great variance from general banking usage, and (3) the procedure followed was not specifically disallowed in the Code.

In a case where both a bank and its customer fail to use ordinary care, a comparative negligence standard is used [4-406(e)].

Customer's Duty to Report Forgeries and Alterations

A bank must send a monthly (or quarterly) statement listing the transactions in an account, and it commonly returns the canceled checks to the customer. Revised Article 3 recognizes the modern bank practice of truncating (or retaining) checks and permits the bank to supply only a statement showing the item number, amount, and date of payment [4-406(a)]. When the bank does not return the paid items to the customer, the bank must either retain the items or maintain the capacity to furnish legible copies of the items for seven years after their receipt. The customer may request an item and the bank has a reasonable time to provide either the item or a legible copy of it [4-406(b)].

If the bank sends or makes available a statement of account or items, the customer must exercise reasonable promptness to examine the statement or items to determine whether payment was not authorized because of an alteration of any item or because a signature of the customer was not authorized. If, based on the statement or items provided, the customer should discover the unauthorized payment, the customer must notify the bank of the relevant facts promptly [4-406(c)].

Multiple Forgeries or Alterations Revised Article 3 provides a special rule to govern the situation in which the same wrongdoer makes a series of unauthorized drawer's signatures or alterations. The customer generally cannot hold the bank responsible for paying, in good faith, any such checks after the statement of account or item that contained the first unauthorized customer's signature or an alteration was available to the customer for a reasonable period, not exceeding 30 calendar days. This rule holds if (1) the customer did not notify the bank of the unauthorized signature or alteration, and (2) the bank proves it suffered a loss because of the customer's failure to examine his statement and notify the bank [4-406(d)]. Unless the customer has notified the bank about the forgeries or alterations that he should have discovered by reviewing the statement or item, the customer generally bears responsibility for any subsequent forgeries or alterations by the same wrongdoer.

Suppose that Allen employs Farnum as an accountant and that over a period of three months, Farnum forges Allen's signature to 10 checks and cashes them. One of the forged checks is included in the checks returned to Allen at the end of the first month. Within 30 calendar days after the return of these checks, Farnum forges two more checks and cashes them. Allen does not examine the returned checks until three months after the checks that included the first forged check were returned to her. The bank would be responsible for the first forged check and for the two checks forged and cashed within the 30-day period after it sent the first statement and the canceled checks (unless the bank proves that it suffered a loss because of the customer's failure to examine the checks and notify it more promptly). It would not be liable for the seven

forged checks cashed after the expiration of the 30-day period.

Regardless of which party may have been negligent, a customer must discover and report to the bank any unauthorized customer's signature or any alteration within one year from the time after the statement or items are made available to him. If the customer does not do so, he cannot require the bank to recredit his account for such items. [4-406(f)].

In the case that follows, *Union Planters Bank, N.A. v. Rogers*, the court concluded that the bank's customer had not discovered and reported to the bank in a timely fashion a series of multiple forgeries on checks drawn against her account and thus was precluded from seeking to have her account recredited for the unauthorized items.

Union Planters Bank, N.A. v. Rogers 57 UCC Rep.2d 236 (Sup. Ct. Miss. 2005)

Neal and Helen Rogers maintained four checking accounts with the Union Planters Bank in Greenville, Mississippi. Each of the four accounts had originally been opened at other banks that later merged with Union Planters. The Rogers were both in their 80s when the events set out here took place. After Neal became bedridden, Helen hired Jackie Reese to help her take care of Neal and to do chores and errands.

In September 2000, Reese began writing checks on the Rogers' four accounts and forged Helen's name on the signature line. Some of the checks were made out to "cash," some to "Helen K. Rogers," and some to "Jackie Reese." Between September 2000 and August 2001, there were 168 checks totaling \$58,398.00 written by Reese against the four accounts.

Neal died in late May 2001. Shortly thereafter, the Rogers' son, Neal, Jr., began helping Helen with financial matters. Together they discovered that many bank statements were missing and that there was not as much money in the accounts as they had thought. In June 2001, they contacted Union Planters and asked for copies of the missing bank statements. In September 2001, Helen was advised by Union Planters to contact the police due to the forgeries made on her account. Subsequently, criminal charges were brought against Reese. In the meantime, Helen filed suit against Union Planters seeking to have her account recredited for the checks charged to the account on which her signature as drawer had been forged.

Waller, Presiding Justice

The relationship between Rogers and Union Planters is governed by Article 4 of the Uniform Commercial Code. *Section 4-406(a) & (c)* provide that a bank customer has a duty to discover and report "unauthorized signatures"; i.e., forgeries. *Section 4-406 of the UCC* reflects an underlying policy decision that furthers the UCC's "objective of promoting certainty and predictability in commercial transactions." The UCC facilitates financial transactions, benefitting both consumers and financial institutions, by allocating responsibility among the parties according to whomever is best able to prevent a loss. Because the customer is more familiar with his own signature, and should know whether or not he authorized a particular withdrawal or check, he can prevent further unauthorized activity better than a financial

institution which may process thousands of transactions in a single day. *Section 4-406* acknowledges that the customer is best situated to detect unauthorized transactions on his own account by placing the burden on the customer to exercise reasonable care to discover and report such transactions. The customer's duty to exercise this care is triggered when the bank satisfies its burden to provide sufficient information to the customer. As a result, if the bank provides sufficient information, the customer bears the loss when he fails to detect and notify the bank about unauthorized transactions.

Miss. Code Ann. § 4-406(a) & (c) provide as follows:

- (a) A bank that sends or makes available to a customer a statement of account showing payment of items for the account shall either return or make available to the customer

the items paid or provide information in the statement of account sufficient to allow the customer reasonable to identify the items paid. The statement of account provides sufficient information if the items is described by item number, amount, and date of payment.

* * *

(c) If a bank sends or makes available a statement of account or items pursuant to subsection (a), the customer must exercise reasonable promptness in examining the statement or the items to determine whether any payment was not authorized because of . . . a purported signature by or on behalf of the customer was not authorized. If, based on the statement or items provided, the customer should reasonably have discovered the unauthorized payment, the customer must promptly notify the bank of the relevant facts.

A. Union Planters' Duty to Provide Information under § 4-406(a)

The court admitted into evidence copies of all Union Planters statements sent to Rogers during the relevant time period. Enclosed with the bank statements were either the cancelled checks themselves or copies of the checks relating to the period of time of each statement. The evidence shows that all bank statements and cancelled checks were sent, via United States Mail, postage prepaid, to all customers at their "designated address" each month. Rogers introduced no evidence to the contrary. We therefore find that the bank fulfilled its duty of making the statements available to Rogers and that the remaining provisions of §4-406 are applicable to the case at bar.

In defense of her failure to inspect the bank statements, Rogers claims that she never received the bank statements and cancelled checks. Even if this allegation is true, it does not excuse Rogers from failing to fulfill her duties under § 75-4-406(a) & (c) because the statute clearly states a bank discharges its duty in providing the necessary information to a customer when it "sends . . . to a customer a statement of account showing payment of items." The word "receive" is absent. The customer's duty to inspect and report does not arise when the statement is received, as Rogers claims; the customer's duty to inspect and report arises when the bank sends the statement to the customer's address. A reasonable person who has not received a monthly statement from the bank would promptly ask the bank for a copy of the statement. Here, Rogers claims that she did not receive numerous statements. We find that she failed to act reasonably when she failed to take any action to replace the missing statements.

B. Rogers' Duty to Report the Forgeries under § 75-4-406(d)

A customer who has not promptly notified a bank of an irregularity may be precluded from bringing certain claims against the bank:

(d) If the bank proves that the customer failed, with respect to an item, to comply with the duties imposed on the customer by subsection (c), the customer is precluded from asserting against the bank:

(1) The customer's unauthorized signature . . . on the item, if the bank also proves that it suffered a loss by reason of the failure; . . .

§ 4-406(d)(1).

Also, when there is a series of forgeries, §4-406(d)(2) places additional duties on the customer:

(2) The customer's unauthorized signature . . . by the same wrongdoer on any other item paid in good faith by the bank if the payment was made before the bank received notice from the customer of the unauthorized signature . . . and after the customer had been afforded a reasonable period of time, not exceeding thirty (30) days, in which to examine the item or statement of account and notify the bank.

A bank may shorten the customer's thirty-day period for notifying the bank of a series of forgeries, and here, Union Planters shortened the thirty-day period to fifteen days. The statute states that a customer must report a series of forgeries within "a reasonable period of time, *not exceeding* thirty (30) days, . . ." "The 30-day period is an outside limit only. However 30 days is presumed to be reasonable and the bank bears the burden of proving otherwise."

Although there is no mention of a specific date, Rogers testified that she and her son began looking for the statements in late May or early June of 2001, after her husband had died. Her son felt that it was prudent to consolidate some of the five bank accounts. When they discovered that statements were missing, they notified Union Planters in June of 2001 to replace the statements. At this time, no mention of possible forgery was made, even though Neal, Jr., thought that "something was wrong." In fact, Neal, Jr., had felt that something was wrong as far back as December of 2000, but failed to do anything. Neal, Jr., testified that neither he nor his mother knew that Reese had been forging checks until September of 2001. Courts in Louisiana and Texas have held that, under similar circumstances, a customer's claims against a bank for paying forged checks are without merit.

Rogers is therefore precluded from making claims against Union Planters because (1) under § 4-406(a), Union Planters provided the statements to Rogers, and (2) under § 75-4-406(d)(2), Rogers failed to notify Union Planters of the forgeries within 15 and/or 30 days of the date she should have reasonably discovered the forgeries.

Judgment in favor of Union Planters Bank.

CONCEPT REVIEW

Liability for Multiple Forgeries or Alterations by the Same Person

Date First Statement Disclosing
an Altered or Forged Check
Is Available to Customer

Customer is not liable for forged/altered checks paid during this period unless bank suffers a loss from customer's unreasonable delay in notifying bank of forgery or alteration.

Date 30 Days Later

Customer is liable for forged or altered checks paid during this period unless customer gives bank notice of forgery or alteration within a reasonable time after date the first statement containing a forged or altered check was available to customer.

Date Customer Gives Notice
of Alteration or Forgery

Customer is not liable for forged or altered checks paid during this period.

Check Collection and Funds Availability

Historically, the process of collecting a check that has been deposited or presented for payment has been a fairly complicated and time-consuming one. While the process is simplified if the check happens to be presented for payment at the drawee bank on which it is written, commonly checks are presented at other banks, often in other locations from the drawee bank where the drawer's account is maintained. The historical process is explained below.

Because the bank where a check has been deposited for collection needs some time to make sure that the item is valid and will be paid, banks typically put a "hold" on the depositor's ability to access some or all of the funds represented by the instrument until it "clears" through the system. The current rules established by the Federal Reserve to govern funds availability are discussed in the section following the check collection process.

In the past few years, developments in electronic technology allow payments to be processed much more rapidly and efficiently than the old paper-based systems and are rapidly changing the way that goods and services are paid for and that money is transferred from one entity to another. In 2004, Congress enacted a federal law, known as "Check 21," that is designed to allow banks to handle more checks electronically and provides a federal overlay to some of the law that has previously been state-based in the form of Articles 3 and 4

of the Uniform Commercial Code. Check 21, along with various electronic substitutes for checks, will be covered later in this chapter.

Check Collection As Chapter 31, Negotiable Instruments, describes, checks and other drafts collected through the banking system usually have at least three parties—the drawer, the drawee bank, and the payee. If the payee deposits the check at the same bank as the drawee bank, the latter will take a series of steps necessary to reflect the deposit as a credit to the payee's account and to decide whether to pay the check from the drawer's account. In connection with its handling of the deposit for the payee's benefit, it will make one ledger entry showing the deposit as a credit to the payee's account. In connection with its decision to pay, the bank's employees and computers will perform several steps commonly referred to as the process of posting. These steps need not be taken in any particular order, but they customarily include determining whether there are sufficient funds to pay, debiting the drawer's account for the amount of the check, and placing the check into a folder for later return to the drawer (to satisfy its obligations under the "bank statement" rule) [4-406]. Banks in those states that have not enacted the 1990 amendments to Article 4 will also compare the drawer's signature on the check with that on the deposit agreement as part of this process.

If the payee deposits the check at a bank other than the drawee bank, the depositary bank, acting as the agent

of the payee, will make the ledger entry showing the deposit as a credit to the payee's account. The next step of the collection process depends on where the depository bank is located. If the drawee and depository banks are in the same town or county, the depository bank will indorse the check and deliver (present) it to the drawee bank for payment. It may deliver it by courier or through a local association of banks known as a "clearing house" [4-104(1)(d)]. Under Article 4, the drawee-payor bank must settle for the check before midnight of the banking day of its receipt of the check, which means that it must give the depository bank funds or a credit equal to the amount of the check. Once it settles for the check, the drawee-payor bank has until midnight of the banking day after the banking day of receipt to pay the check or to return the check or send notice of dishonor. This deadline for the drawee-payor bank's action on the check is known as the bank's "midnight deadline" [4-104(1)(h)]. The drawee-payor bank's failure to settle by midnight of the banking day of receipt, or its failure to pay or return the check, or send notice of dishonor, results in the drawee-payor bank's becoming "accountable" for the amount of the check, which means it must pay the amount of the check [4-302(a)].

If the drawee and depository banks are located in different counties, or in different states, the depository bank will use an additional commercial bank, and one or more of the regional Federal Reserve Banks, in the collection of the check. In these cases, the depository bank will send the check on to the drawee-payor bank through these "collecting banks." Each bank in the sequence must use ordinary care in presenting the check or sending it for presentment, and in sending notice of dishonor or returning the check after learning that the check has not been paid [4-202(a)]. The depository and collecting banks have until their respective midnight deadlines—or, in some cases, a further reasonable time—to take the action required of them in the sequence of collection steps.

If the drawee-payor bank dishonors the check prior to its midnight deadline or shortly after the midnight deadline under circumstances specified in "Regulation CC" of the Federal Reserve Board (described in the next section of this chapter), it will send the check back to the depository bank. Until September 1, 1988, the drawee-payor bank customarily sent the dishonored check back to the collecting bank from which it received the check, and the collecting bank sent it back to the bank from which it had received it, and through any other bank that handled the check in the "forward collection" process until the check again reached the

depository bank. The provisions of Article 4 still describe this sequence as the "return collection" process, although Regulation CC imposes new responsibilities on the payor bank and on any other "returning bank." Each bank in the return sequence adjusts its accounts to reflect the return and has until its midnight deadline to send the check back to the bank from which it originally had received the check. After September 1, 1988, the drawee-payor bank may return the check directly to the depository bank—skipping all of the collecting banks and the delay represented by the midnight deadlines that each bank otherwise would have had.

Direct return also increases the likelihood that the depository bank will know whether the check has been dishonored by the day on which Regulation CC requires the depository bank to allow the payee to write checks or otherwise make withdrawals against the deposit. The next section of this chapter discusses the "funds availability" aspect of Regulation CC in more detail.

On receipt of the dishonored check, the depository bank will return the check or otherwise notify its depositor (the payee) of the dishonor and will debit or charge back her account for the check it did not collect. The depository bank may charge back the deposit even if it previously had allowed the payee-depositor to withdraw against the credit given for the deposit.

When the depositor receives the notice of dishonor and returned check it will take one of several steps, depending on whether it received the check directly from the drawer or took it by indorsement from another person. If the depositor was not the original payee of the check, it usually will prefer to return the check—giving notice of dishonor unless already given by the drawee bank or another collecting bank—to the person who negotiated the check to her, the prior indorser. Recall that an indorser is obligated to pay the check following dishonor and notice of dishonor [3-415].

If the depositor received the check directly from the drawer, for example as payee, the depositor normally will demand payment from the drawer. Recall that the drawer is obligated to pay the check upon dishonor [3-414]; alternatively, the payee may seek to enforce the underlying obligation for which the drawer originally issued the check, such as the purchase of groceries or an automobile.

The case that follows, *Valley Bank of Ronan v. Hughes*, involves the question of a bank's right to charge back a depositor's account for the amount of checks he had received and deposited in the course of being the victim of a scam.

Valley Bank of Ronan v. Hughes 61 UCC Rep.2d 277 (Sup. Ct. Montana 2006)

Lured by the promise of quick wealth, Charles Hughes was conned by a “Nigerian scam.” The swindlers promised Hughes a \$3 million to \$4.5 million commission for his aid in procuring agricultural equipment for import into Africa and then proceeded to bilk him for hundreds of thousands of dollars in advanced fees. Some of the funds that Hughes advanced were wired via the services of Valley Bank of Ronan, resulting in a dispute over which party should bear the loss from the flimflam.

On Friday, March 22, 2002, Hughes received four checks from one of the con-artists and deposited them into accounts Hughes held at Valley Bank. Two of them were “official” checks, and the other two were personal checks. One official check, for \$1 million, was drawn on Colonial Bank. The other official check, for \$500,000, was drawn on Firststar. The personal checks were for \$62,000—drawn on the account of Maximilian H. Miltzclaff—and for \$70,000—drawn on a Capital One credit card account held by Sarah Briscoe and Mary Bullard.

Prior to depositing the checks, Hughes requested that Nancy Smith, a cashier and officer of Valley Bank, verify the validity of the official checks. In his deposition, Hughes described his conversation with Smith:

Well, my question was, how long do you have to hold money to have—how long do you have to hold these checks before they’re sufficient funds; I think the bank calls them collected funds. And she said, these are official checks, Chuck. These two big ones are official checks. You will be transferring these? And I said I will be transferring a large sum. We’ll have to determine next week what it will be. And she says, official checks, same as cash. You can do whatever you want to do.

Smith also assured Hughes that official checks were “just like” cashier’s checks. Milanna Shear, another bank employee, told Hughes to believe whatever Smith said regarding the validity of the checks. According to the deposition testimony of Hughes’s wife, Barbara, Hughes had told her that “everybody at the bank assured him that the checks would be good.”

On Tuesday, March 26, 2002, Hughes delivered a written request to Valley Bank to wire \$800,000 to Ali dh. Abbas, an accountholder at the Housing Bank for Trade and Finance in Amman, Jordan. Valley Bank executed the transfer no later than 1:51 PM on the same day. The transfer proceeded through two intermediary banks, Wells Fargo, near Denver, Colorado, and Citibank in New York, before being sent to Amman. Upon receipt in Amman, the funds were promptly withdrawn, never to be seen again.

At about 2:00 PM—approximately 10 minutes after initiation of the transfer—Valley Bank and Hughes learned that one of the personal checks was being returned marked “nonsufficient funds.” Hughes immediately requested the wire to be stopped. No later than 3:26 PM, Valley Bank requested that Wells Fargo reverse the wire transfer. The record is unclear about what happened during the interim between Hughes’s request for cancellation and Valley Bank’s attempts to comply with the request. The efforts of the several banks involved in the transfer to reverse the transaction were unsuccessful, and the later discovery that the two official checks were counterfeit resulted in Hughes’s account being overdrawn by \$800,000.

Valley Bank subsequently exercised its right to charge back the account and collect the \$800,000 from Hughes. Allen Buhr, Valley Bank’s president, met with Hughes on March 29, 2002, to discuss Hughes’s liability and suggested at that time that Hughes could be involved in a criminal prosecution for fraud. On April 11, 2002, Hughes deposited \$607,838, which he had withdrawn from his retirement account, into the Valley Bank account. Also, on April 30, 2002, Hughes executed a promissory note to Valley Bank on behalf of his trust in the amount of \$400,000, secured by mortgaged property. Of the \$400,000 in proceeds generated by the secured note, \$202,751.21 was used to pay off a previous loan against the mortgaged property, and the balance, \$197,248.79, was applied to satisfy the charge-back liability in Hughes’s account. Hughes was under the impression, given by Buhr, that the bank needed the note and loan agreement because it expected to be the subject of a government audit in the near future, and though Hughes thought that a new agreement might be reached after resolution of the “fraud situation,” he understood that the loan may not be forgiven. The trust subsequently made the first interest payment on the note on August 1, 2002, though it was one month late. The trust made no other payments on the note, and Valley Bank sent a notice of default and acceleration on October 15, 2002. Hughes requested that the bank forebear foreclosure until the end of the year, and the bank complied.

However, when Hughes failed to make any more payments on the note, Valley Bank initiated an action for judicial foreclosure. Hughes asserted counterclaims of negligence, negligent misrepresentation, constructive fraud, unjust enrichment,

breach of contract, breach of the implied covenant of good faith and fair dealing, promissory estoppel, and intentional infliction of emotional distress (which was later abandoned). The district court granted Valley Bank summary judgment on its claims regarding the promissory note. Hughes appealed.

Rice, Justice

A short introduction to the check settlement process will give context to our following legal analysis. When a customer deposits a check at a bank, the bank will sometimes (but not always) credit the customer's account immediately with the face amount of the check and permit the customer to draw on the deposited funds. This practice is known in Uniform Commercial Code parlance as "provisional settlement" because the bank has not yet presented the check to the drawee bank and received payment from the check maker's account (which would constitute "final settlement"). The depository bank, however, may "charge back" the depositor's account in the event the check is subsequently dishonored by the drawee bank. Thus, the UCC encourages the provisional settlement process by protecting a depository bank from fraudulent or otherwise unenforceable check deposits. With this overview of the check settlement process in mind, we turn now to the specifics of the case before us.

Hughes argues that the District Court erroneously concluded that the UCC preempts Hughes' equitable and common law claims. Hughes asserts that preemption does not occur because "[t]here *are* no regulations or UCC provisions which expressly regulate . . . promises and representations that bank personnel make to their customers." Further, Hughes contends that the "practical effect of the District Court's interpretation affords banks absolute immunity for negligence, fraud, misrepresentation and other acts which are not expressly addressed in the UCC. . . ."

The District Court rested its conclusion on its interpretation of § 1-103, MCA, which reads as follows:

Unless displaced by the particular provisions of this code, the principles of law and equity, including the law merchant and the law relative to capacity to contract, principal and agent, estoppel, fraud, misrepresentation, duress, coercion, mistake, bankruptcy, or other validating or invalidating cause shall supplement its provisions.

We disagree with the District Court's interpretation of § 1-103. A bank receiving checks from depositors must use "ordinary care"—as that term is defined and used in the UCC—in settling those checks. See §§ 4-103(3), 4-103(5), and 4-212, MCA. Section 3-102(1)(g) defines "ordinary care" as follows:

"Ordinary care" in the case of a person engaged in business means observance of reasonable commercial

standards, prevailing in the area in which that person is located, with respect to the business in which that person is engaged. In the case of a bank that takes an instrument for processing for collection or payment by automated means, reasonable commercial standards do not require the bank to examine the instrument if the failure to examine does not violate the bank's prescribed procedures and the bank's procedures do not vary unreasonably from general banking usage not disapproved by this chapter or chapter 4.

In its order, the District Court examined the meaning of "ordinary care" but did not distinguish the term's application to the two different actions at issue here: the settlement of the deposited checks and the alleged representations about the check settlement process. The second sentence of the definition of ordinary care specifically states that, subject to certain exceptions, a bank does not have a duty to examine instruments, in this case, checks. Pursuant to § 1-103 and UCC § 1-103, *cm.* 2, such specificity preempts any common law concepts that might otherwise supplement the UCC. Thus, to the extent that Hughes' common law claims relate to Valley Bank's processing of the checks, they are preempted by the UCC.

Indeed, Hughes presents a claim directed toward the UCC-defined standard of ordinary care with respect to check processing. Hughes asserts that, by failing to comply with its own policies and the applicable federal regulations, Valley Bank inappropriately charged back his account after the dishonor of the deposited checks. However, § 4-212(4) states, "[t]he right to charge back is not affected by . . . failure by any bank to exercise ordinary care with respect to the item but any bank so failing remains liable." Official Comment 5 to § 4-212(4) expounds on this point, stating that "charge-back is permitted *even where non-payment results from the depository bank's own negligence.*" (Emphasis added.) Accordingly, in evaluating the propriety of Valley Bank's actions with regard to check processing, it is irrelevant whether Valley Bank exercised ordinary care in exercising its charge back rights, and the claims are preempted.

Note: The court went on to hold that Hughes could assert common law claims of negligence against the bank as to the communications the bank made to him about the process on which he claimed to have relied. Thus, while the bank had an absolute right to charge back the fraudulent checks to Hughes's account and he had the obligation to repay the bank, it nonetheless was possible for Hughes to obtain a judgment against the bank to compensate him for the charge-back debt.

CYBERLAW IN ACTION

Banks Honor Bogus Checks and Scam Victims Pay

Trying to sell his 1968 Mustang online, John Schaefer received what appeared to be a firm offer from an overseas classic-car dealer. The buyer sent Schaefer a check for \$14,000 even though Schaefer was asking only \$8,000. The buyer said the extra money was to cover shipping and directed Schaefer to wire him the difference.

"It seemed kind of funny, and I had some hesitation," said Schaefer, who deposited the check in his bank's ATM over the weekend. On Monday, he asked a teller to see if the check was good. She left her perch, went to the backroom and returned assuring him "there was no problem," Schaefer recalled.

On Wednesday, "still not feeling quite right," Schaefer asked the same teller to make sure the check was good. That time, the teller told him the check had been cleared and he was "all set." Schaefer withdrew \$5,000 and wired the money to the buyer.

Four days later, as he reviewed his account online, he discovered the check was not good. Even worse, the bank was demanding that he repay the \$5,000.

"Had I made the deposit and not tried to make sure it was legitimate, I *should* have full obligation to make good on it," said Schaefer, 34, a facilities manager in Brattleboro, Vermont. "But I checked with the bank twice, and now I find out they have no accountability."

Schaefer is one of thousands of consumers who have been victimized by an increasingly common check scam that relies on the vagaries of the banking system to take advantage of unsuspecting consumers. Federal rules require banks to release funds from a consumer's deposit quickly, usually within one to five business days, depending on the kind of check. However, it can take weeks before a bank discovers a check is fraudulent.

So when a teller says "the check has cleared," the teller is "usually thinking in terms of bank rules, that the hold time is over, and the consumer now has access to the funds," said Susan Grant, director of the National Fraud Information Center. But the average consumer thinks that phrase means "the check is not fraudulent," Grant added. When that happens, it is depositors who are responsible for the money, she said. As the American Bankers Association explains in a "Fraud Alert!" statement insert it distributes to banks to send to customers: The consumer is the one dealing directly with the person who sent the money and therefore is "in the best position to determine how risky the transaction is."

To facilitate the flow of funds behind the 40 billion checks processed each year, banks are required to release funds within a few days, said Nessa Feddis, senior federal counsel

for American Bankers Association. If tellers start asking a lot of questions or start holding checks until they are determined to be good, banks "might be perceived as trying to circumvent the rules entitling people to withdraw funds," Feddis added. And if the banks are wrong, it will only be a matter of time before they are hauled before Congress and "accused of trying to hold on to people's funds," she said.

That provides no comfort to those who have gotten caught in scams. "I want security more than fast check-cashing and money flying all over the place," said Toni Gaston, a New Jersey administrative assistant who was the victim of an Internet work-at-home scam earlier this year.

In February, about a year after Gaston had posted her résumé on a job-search Web site, she received an e-mail about a part-time opportunity: to work as a courier for money for an international charity that builds homes for people in disaster areas. Her assignment was to deposit local donations into her own bank account, wait for the checks to clear and then wire the money to another address. She was told she would be paid 7 percent of every donation check, with a guarantee of \$500 the first week on the job.

Gaston received a \$4,500 cashier's check on Saturday, February 26, and immediately deposited it in her Bank of America account. The teller told her it would take three days for the check to clear. On Wednesday, Gaston reviewed her account online and saw the funds were in her account. "I assumed, since it was a cashier's check, that Bank of America had actually gotten money from the other bank and put it into my account," she said.

On Thursday, Gaston withdrew \$2,000 and wired it to a Ukrainian address. That's not unusual since most of these scams direct money outside the United States, often to Canada or Nigeria. The next day, Gaston followed instructions from another e-mail directing her to wire \$1,900 to a different Ukrainian address.

"I couldn't believe I could make this much from this little bit of work," Gaston said. It was only a few days later that Gaston's euphoria wore off, when she caught a snippet of a TV news story about a person who had been scammed by an identical work-at-home scheme. "My face turned completely green," said Gaston, who called the bank immediately. Bank officials told her there was nothing the bank could do and warned her that she would have to repay the \$3,900 when the counterfeit cashier's check was finally returned to the bank.

It took another month before that happened. By that time, Gaston had surfed the Internet and learned there were hundreds of other victims around the country. She was furious. "The banks know this is going on. They know people are compromising the bank system, so why don't they upgrade their security, train their tellers to spot the counterfeit checks?"

According to Gaston: "A bank vice president told me that the bank cashes so many checks a day it doesn't have time to do that. I thought my money was safe. . . . I should have stashed it in a mattress."

Bank of America spokeswoman Diane Wagner said privacy rules prohibit talking about Gaston's case. However, in general terms, she said, "We advise customers to know with whom they're doing business. We also tell them they should never agree to wire back funds to a person they're not familiar with."

Wagner and other bank officials around the country all note that both the deposit receipt and the initial agreement customers sign when setting up an account make it clear that if any deposit item is returned, for any reason, the customer is responsible. Bank of America's deposit receipt, for example, says: "All items are credited subject to verification, collection, and conditions of the Rules and Regulations of this Bank and as otherwise provided by law."

For most consumers, that language is clearly not enough, said Shawn Mosch, who launched a "Scam Victims United" Web site after she and her husband fell victim to a counterfeit check scam when they tried to sell a 1961 Buick online. Begun in 2003, Scam Victims United now has 2,616 members registered to its message board of 4,000 postings.

"There ought to be a law that says banks can't release the money until the check is guaranteed to have cleared—or the customer is willing to sign a release realizing it is his/her responsibility if the check turns out bad," Mosch said. "Had there been something like that for me when I was a victim, I would have said, 'Oh wait, you mean we're not guaranteed here?' . . . We didn't trust the guy we were selling the car to, but we trusted our bank to tell us the truth. . . . I specifically asked the teller, 'I want to make sure if I do anything with this check it won't come back and bite me,' and the same teller assured me three times there was no problem."

Bank officials say it is not possible to warn each and every consumer about potential scams. "Everybody is in a hurry, so if we made such a disclosure with each transaction about every responsibility the depositor has, we'd be there all day,"

the ABA's Feddis said. Besides, Feddis added, the proportion of fraudulent checks is very small, fewer than 100,000 out of the 40 billion checks processed annually. But the numbers are growing. According to the suspicious-activity reports banks file with the federal government, the number of fraudulent and counterfeit checks totaled 88,986 in 2005. That's more than triple the 28,670 reported in 2000. Between 2004 and 2005 alone, the number of reports of fraudulent and counterfeit checks grew by 45 percent.

Driving this increase is the Internet, which has made it easy for scammers to reach an ever-widening circle of susceptible consumers. "Because you're on the Internet in the comfort of your home, you may not realize the dark alleys you're dealing with," said John Hambrick, the FBI's unit chief at the Internet Crime Complaint Center.

Banks say they are trying to be more proactive, alerting their customers to those dark fraud-filled alleys through statement inserts and posters. "Banks could do a better job," added Grant of the National Fraud Information Center. Among other things, she said, they could improve technology to catch fraudulent checks faster and be more upfront with customers about the risks.

"For example, when a customer says, 'Has this check cleared?' it's an opportunity to say the hold period is over and now you can have access to the money, but that doesn't mean the check or money order is good. If it bounces, you will still be responsible." Even so, Grant added, consumers need to be vigilant, too. "And there's one sure way consumers can avoid a scam: Anytime anyone asks you to wire them money, that's all you need to know."

Schaefer learned that lesson the expensive way with his Mustang. He eventually sold it "to a gentlemen in Massachusetts," he said, adding, "He paid cash."

Funds Availability When a bank takes a check for deposit to a customer's account, it typically places a hold on the funds represented by the deposited check because it runs a number of risks in allowing a customer to withdraw deposits that it has not collected from the drawee bank. The risks that the check may be returned include (1) there may be insufficient funds in the drawer's account or the account may have been closed; (2) the check may contain a forged drawer's or indorser's signature, or there may have been a material alteration of the check; (3) the possibility that the drawer is kiting

checks or playing two accounts off against each other; or (4) a stop-payment order may have been placed against the check. These are real concerns to a depository bank, and it has a significant interest in protecting itself against these possibilities.

Until recently, the risks run by a depository bank were complicated by a very slow process used by drawee-payor banks in returning a dishonored check or notifying the bank of the dishonor. Moreover, depository banks did not get direct notice from drawee-payor banks when they paid checks. Accordingly, banks often restricted the

depositor's use of the deposit by placing relatively long holds on checks deposited with them for collection; these sometimes ran 15 to 20 days for items drawn on other than local banks.

The extensive use of holds, and a growing public sentiment that they were excessive and often unfair, led to the passage by Congress in 1987 of the Expedited Funds Availability Act. In the act, Congress set out mandatory schedules limiting check holds and specifying when funds are to be made available to customers by depository institutions. The act also delegated to the Federal Reserve Board the authority to speed up the check-processing system. The regulations adopted by the Board to speed up check processing supersede the provisions of Article 4 of the UCC (Bank Deposits and Collections) in a number of respects but will not be covered in this text.

The key elements of the mandatory funds availability schedules, which are set out in Federal Reserve Board Regulation CC, are:

1. Local checks (those drawn on banks in the same Federal Reserve check region as the depository bank) must be made available for the depositor to draw against by the second business day following deposit.
2. Nonlocal checks (those drawn on banks located in the United States but outside the Federal Reserve check-processing region in which the depository bank is located) must be made available by the fifth business day following deposit.
3. Certain items must be made available by the next day after the day of deposit. These include:
 - a. Cash deposits where the deposit is made in person to an employee of the depository bank (i.e., not at an ATM).
 - b. Electronic payments.
 - c. Checks drawn on the U.S. Treasury.
 - d. U.S. Postal Service money orders.
 - e. Checks drawn on a Federal Reserve Bank or Federal Home Loan Bank.
 - f. Checks drawn by a state or a unit of local government (under certain conditions).
 - g. Cashier's, certified, or teller's checks.
 - h. Checks drawn on the depository bank.
 - i. The lesser of \$100 or the aggregate deposit on any one banking day.
4. If the next-day items are not deposited in person with an employee of the depository institution but rather are deposited in an ATM machine or by mail, then the deposit does not have to be made available for withdrawal until the second business day after deposit.
5. Generally, the depository bank must begin accruing interest to a depositor's interest-bearing account from the day it receives credit for cash and check deposits to an interest-bearing account.

There are six major exceptions to the mandatory availability schedules set out above that are designed to safeguard depository banks against higher risk situations. The exceptions are:

 1. *New account exception.* The depository bank may suspend the availability rules for new accounts and can limit the next-day and second-day availability to the first \$5,000 deposited.
 2. *Large deposit exception.* The hold periods can be extended to the extent the aggregate deposit on any banking day exceeds \$5,000.
 3. *Redeposited check exception.* The hold period can be extended where a check has been returned one or more times.
 4. *Repeated overdraft exception.* A longer hold period may be required for deposits to accounts that have been overdrawn repeatedly.
 5. *Reasonable cause exception.* The scheduled availability may be extended where the bank has reasonable cause to believe the check is uncollectible.
 6. *Emergency conditions exception.* The scheduled availability may be extended under certain emergency conditions such as a communications interruption or a computer failure.

Banks are required to disclose their funds availability policy to all of their customers; they may provide different policies to different classes or categories of customers.

Check 21 The Check Clearing for the 21st Century Act, commonly known as "Check 21," a federal law that is designed to enable banks to handle more checks electronically, became effective on October 28, 2004. As detailed in the previous section, for many years banks had to physically move checks from the bank where they are deposited to the drawee bank that pays them—a time-consuming, inefficient, and costly process. And, for many years, banks then returned the canceled checks to their customers along with their monthly account statement. In recent years, however, many banks have stopped providing canceled checks to their customers; you may have noticed this change in the way your own checking

account was handled by your bank. Instead, they provide images of the checks with multiple pictures of canceled checks appearing on pages of a paper or electronic bank statement. If the drawee bank keeps the original checks, this is called “check truncation.” Credit unions and an increasing number of commercial banks have been truncating checks for quite a while. Check 21 allows “check truncation” to happen at an earlier stage of the check collection process—as early as the payee if the bank the payee uses as a depository bank will let the payee keep the checks.

For many years, banks have had the capacity to capture information from the MICR lines of checks and to transmit that information electronically to collecting banks as well as the drawee bank if the banks later in the collection chain had electronic capabilities. But, in order for a bank to send only the electronic image forward (as opposed to the paper check drawn by the drawer of the check), each bank had to have an “electronic presentment agreement” with the other banks in the collection chain. If one bank in the chain of collection or the drawee bank did not have electronic processing ability, then the use of electronic processing was ended. One bank could hold up the use of electronic innovations simply by refusing to take electronic items.

Check 21 authorizes banks to transform information they receive in electronic form back into a paper copy of the check. It grants legal status to paper copies that meet specific standards and so qualify as “substitute checks,” that is, the equivalent as against all persons and for all purposes of the paper check drawn by the drawer. As a result, if a bank with electronic capacity encountered a drawee bank that did not have electronic capacity, the first bank could use its electronic information file to create a substitute check (assuming it met the standards) and to present that substitute check for payment. Similarly, if all the banks in a check collection chain used electronic presentment processing, but the payee or drawer needed a paper copy of the check to prove it had paid an obligation, its bank could create and deliver a substitute check to the payee or drawer. In both cases, the resulting substitute check is legally the same as the original check if it accurately represents the information on the original check and includes the following statement: “This is a legal copy of your check. You can use it the same way you would use the original check.” The substitute check must also have been handled by a bank.

Banks are not required to keep your original check for any specific period of time. Existing state law requires that banks retain a legible copy of checks for seven years, but does not require that the copies returned to customers

with statements be legible. Check 21 does not add any new retention requirements. Under the new law, original checks are more likely to be destroyed. If you request your original check from your bank, your bank may provide you with the original check, a substitute check, or a copy of the check.

Articles 3 and 4 of the Uniform Commercial Code continue to provide protection against erroneous and unauthorized checks. In addition, Check 21 contains a number of new protections for customers. For example, Check 21 contains a special refund procedure, called expedited recredit, for a customer who suffers a loss because of a substitute check.

Because checks are now transmitted electronically from one bank to another, customers must make sure they have funds in their account to cover them and no longer anticipate a “float” based on the time it would take the check to be physically transmitted back to the drawee bank. Consumer groups warn consumers to be aware that there is an increased risk that a check will bounce if funds are not in the account when the check is written. At the same time, customers may not get access to the funds from checks that they deposit to their account any sooner because Check 21 does not shorten the check hold times set out in the Federal Funds Availability Act.

Electronic Transfers

Over the past three decades, many new mechanisms have emerged for transferring money electronically without the need for paper money or the use of paper-based negotiable instruments such as checks. Concomitantly, financial institutions, merchants, and providers of service are encouraging customers to use these mechanisms in order to expedite the movement of money in a more cost-effective manner, to the benefit of all parties involved in financial transactions. The electronic funds transfer systems (EFTs) utilized by consumers include (1) automated teller machines; (2) point-of-sale terminals, which allow consumers to use their EFT cards like checks to transfer money from their checking account to the merchant; (3) preauthorized payments, such as automatic deposit of paychecks and government benefits, or the payment of mortgage, credit card, and utility bills; and (4) telephone transfers between accounts or authorization to pay specific bills. And, for large business and financial institutions, wire transfers of funds are commonly used to move large sums of money very quickly across the country or around the world.

As these mechanisms have emerged and are increasingly supplanting the traditional methods for transferring

money, they have required new legal constructs to deal with the issues and problems they present that do not fit well in existing legal regimes such as Articles 3 (Negotiable Instruments) and 4 (Bank Deposits and Collections) of the Uniform Commercial Code. The Electronic Funds Transfer Act (EFTA) now addresses many of the issues that arise out of consumer use of EFTs while Article 4A (Funds Transfers) of the Uniform Commercial Code deals with the funds transfers that are outside of the overage of the EFTA.

Electronic Funds Transfer Act The consumer who used electronic funds transfer systems (EFTs), the so-called cash machines or electronic tellers, in the early years often experienced problems in identifying and resolving mechanical errors resulting from malfunctioning EFTs. In response to these problems, Congress passed the Electronic Funds Transfer Act in 1978 to provide “a basic framework, establishing the rights, liabilities, and responsibilities of participants in electronic funds transfer systems” and especially to provide “individual consumer rights.”

Similar to the Truth in Lending Act and the Fair Credit Billing Act (FCBA) discussed in Chapter 48, the EFT Act requires disclosure of the terms and conditions of electronic funds transfers at the time the consumer contracts for the EFT service. Among the nine disclosures

required are the following: the consumer’s liability for unauthorized electronic funds transfers (those resulting from loss or theft), the nature of the EFT services under the consumer’s account, any pertinent dollar or frequency limitations, any charges for the right to make EFTs, the consumer’s right to stop payment of a preauthorized transfer, the financial institution’s liability to the consumer for failure to make or stop payments, and the consumer’s right to receive documentation of transfers both at the point or time of transfer and periodically. The act also requires 21 days’ notice prior to the effective date of any change in the terms or conditions of the consumer’s account that pertains to the required disclosures.

The EFT Act does differ from the Fair Credit Billing Act in a number of important respects. For example, under the EFT Act, the operators of EFT systems have a maximum of 10 working days to investigate errors or provisionally recredit the consumer’s account, whereas issuers of credit cards have a maximum of 60 days under the FCBA. The liability of the consumer also is different if an EFT card is lost or stolen than it is if a credit card is lost or stolen.

The *Kruser* case illustrates the application of the EFT Act’s provisions that require a customer to provide timely notification of any unauthorized use of his card in order to limit his liability for the unauthorized use of the card.

Kruser v. Bank of America NT & SA

281 Cal.Rptr. 463 (Cal. Ct. App. 1991)

Lawrence and Georgene Kruser maintained a joint checking account with the Bank of America. The bank issued each of them a “Versatel” card and separate personal identification numbers that would allow access to funds in their account from automatic teller machines. The Krusers also received with their cards a “Disclosure Booklet” that provided to the Krusers a summary of consumer liability, the bank’s business hours, and the address and telephone number by which they could notify the bank in the event they believed an unauthorized transfer had been made.

The Krusers believed Mr. Kruser’s card had been destroyed in September 1986. The December 1986 account statement mailed to the Krusers by the bank reflected a \$20 unauthorized withdrawal of funds by someone using Mr. Kruser’s card at an automatic teller machine. The Krusers reported this unauthorized transaction to the bank when they discovered it in August or September 1987.

Mrs. Kruser underwent surgery in late 1986 or early 1987 and remained hospitalized for 11 days. She then spent a period of six or seven months recuperating at home. During this time, she reviewed the statements the Krusers received from the bank.

In September 1987, the Krusers received bank statements for July and August 1987 that reflected 47 unauthorized withdrawals totaling \$9,020 made from an automatic teller machine, again by someone using Mr. Kruser’s card. They notified the bank of these withdrawals within a few days of receiving the statements. The bank refused to credit the Kruser’s account with the amount of the unauthorized withdrawals. The Krusers sued the bank claiming damages for the unauthorized withdrawals from their account. The trial court ruled in favor of the bank on the grounds that the Krusers had failed to comply with the note and reporting requirements of the Electronic Funds Transfer Act (EFTA). The Krusers appealed.

Stone, Associate Justice

The ultimate issue we address is whether, as a matter of law, the unauthorized \$20 withdrawal which appeared on the December 1986 statement barred the Krusers from recovery for the losses incurred in July and August 1987. Resolution of the issue requires the interpretation of the EFTA and section 205.6 of Regulation E, one of the regulations prescribed by the Board of Governors of the Federal Reserve System in order to carry out the EFTA.

Section 205.6 of Regulation E mirrors [the EFTA] and in particular provides:

(b) Limitations on the amount of liability. The amount of a consumer's liability for an unauthorized electronic fund transfer or a series of related unauthorized transfers shall not exceed \$50 or the amount of unauthorized transfers that occur before notice to the financial institution . . . whichever is less, unless one of the following exceptions apply:

. . .

(2) If the consumer fails to report within 60 days of transmittal of the periodic statement any unauthorized electronic fund transfer that appears on the statement, the consumer's liability shall not exceed the sum of (i) The lesser of \$50 or the amount of unauthorized electronic fund transfers that appear on the periodic statement during the 60-day period and (ii) The amount of unauthorized electronic fund transfers that occur after the close of the 60 days and before notice to the financial institution and that the financial institution establishes would not have occurred but for the failure of the consumer to notify the financial institution within that time.

. . .

(4) If a delay in notifying the financial statements was due to extenuating circumstances, such as extended travel or hospitalization, the time periods specified above shall be extended to a reasonable time.

The trial court concluded the Bank was entitled to judgment as a matter of law because the unauthorized withdrawals of July and August 1987 occurred more than 60 days after the Krusers received a statement which reflected an unauthorized transfer in December 1986. The court relied upon section 205.6(b)(2) of Regulation E.

The Krusers contend the December withdrawal of \$20 was so isolated in time and minimal in an amount that it cannot be

considered in connection with the July and August withdrawals. They assert the court's interpretation of section 205.6(b)(2) of Regulation E would have absurd results which would be inconsistent with the primary objective of the EFTA—to protect the consumer. They argue that if a consumer receives a bank statement which reflects an unauthorized minimal electronic transfer and fails to report the transaction to the bank within 60 days of transmission of the bank statement, unauthorized transfers many years later, perhaps totaling thousands of dollars, would remain the responsibility of the consumer.

The result the Krusers fear is avoided by the requirement that the bank establish the subsequent unauthorized transfers could have been prevented had the consumer notified the bank of the first unauthorized transfer. Here, although the unauthorized transfer of \$20 occurred approximately seven months before the unauthorized transfers totaling \$9,020, it is undisputed that all transfers were made by using Mr. Kruser's card which the Krusers believed had been destroyed prior to December 1986. According to the declaration of Yvonne Maloon, the Bank's Versatel risk manager, the Bank could have and would have canceled Mr. Kruser's card had it been timely notified of the December unauthorized transfer. In that event Mr. Kruser's card could not have been used to accomplish the unauthorized transactions in July and August.

In the alternative, the Krusers contend the facts establish that Mrs. Kruser, who was solely responsible for reconciling the bank statements, was severely ill and was also caring for a terminally ill relative when the December withdrawal occurred. Therefore they claim they were entitled to an extension of time within which to notify the bank.

The evidence the Krusers rely upon indicates in late 1986 or early 1987 Mrs. Kruser underwent surgery and remained in the hospital for 11 days. She left her house infrequently during the first six or seven months of 1987 during which she was recuperating. Mrs. Kruser admits, however, she received and reviewed bank statements during her recuperation. Therefore, we need not consider whether Mrs. Kruser's illness created circumstances which might have excused her failure to notice the unauthorized withdrawal pursuant to the applicable sections. She in fact did review the statements in question.

Judgment for Bank of America affirmed.

Wire Transfers While consumers increasingly are using various methods to transfer funds electronically, for some time electronic transfer has been an important part of the banking system and the commercial sector.

The Federal Reserve operates a domestic wire transfer system known as *Fedwire*. International wire transfers can be made through the New York Clearinghouse Interbank Payments System (CHIPS). The volume of

CYBERLAW IN ACTION

E-Checks

Chapter 31—Negotiable Instruments—notes that the process known as “check conversion” is utilized by a number of large retailers. The process begins with the buyer giving the seller a paper check. The seller uses special equipment to gather information from the paper check; this information includes the buyer’s bank account number, the bank routing number, and the serial number of the check. The retailer then names itself as the payee, codes in the amount of the purchase, and forwards it for

collection through an automated clearing house (ACH) transaction instead of the collection route for paper checks.

The Federal Reserve Board recently decided that the Electronic Funds Transfer Act (EFTA) and Regulation E would govern “check conversion” transactions. The EFTA will govern even if the consumer gives a blank and unsigned check to the merchant. The act also governs if the merchant uses a paper check as a “source document” (source of critical account- and bank-related information) and then uses an electronic fund transfer rather than the ACH transfer mentioned above in the section entitled “Check Collection.”

payments over these two systems exceeds one trillion dollars per day.

Electronic funds transfers between business and financial institutions—generally referred to as *wholesale wire transfers*—are covered by Article 4A (Funds Transfers) of the Uniform Commercial Code. Article 4A explicitly excludes consumer payments that are covered by the Electronic Funds Transfer Act (EFTA), which includes the payments made through automated clearing houses.

In the Prefatory Note to Article 4A, the National Commissioners on Uniform State Laws note that the typical transfer covered by the Article is not a complex transaction and provide the following example, which also illustrates the terminology used in wire transfers:

X, a debtor, wants to pay an obligation owed to Y. Instead of delivering to Y a negotiable instrument such as a check or other writing such as a credit card slip that enables Y to obtain payment from a bank, X transmits an instruction to X’s bank to credit a sum of money to the bank account of Y. In most cases X’s bank and Y’s bank are different banks. X’s bank may carry out X’s bank by instructing Y’s bank to credit Y’s account by the amount that X has requested. The instruction that X issues to its bank is a “payment order.” X is the “sender” of the payment order and X’s bank is the “receiving bank” with respect to X’s order. Y is the “beneficiary” of X’s order. When X’s bank issues an instruction to Y’s bank to carry out X’s payment order, X’s bank “executes” X’s order. With respect to that order, X’s bank is the sender, Y’s bank is the receiving bank, and Y is the beneficiary. The entire series of transactions is known as the “funds transfer.” With respect to the funds transfer, X is the “originator,” X’s bank is the “originator’s bank,” Y is the “beneficiary” and Y’s bank is the “beneficiary’s bank.” In more complex transactions there are one or more additional banks known as “intermediary banks” between X’s bank and Y’s bank.

Funds transfers have a number of advantages for those who utilize them, typically sophisticated business or financial organizations. They allow significant sums of money to move at high speed so that transactions can be completed in a very short period of time and are an effective substitute for payments made by the delivery of paper instruments. And, the cost of the transfers is very low compared to the amount of money being transferred. At the same time, the risk of loss can be very large if something goes wrong in the transaction. Among the possibilities are (1) a bank fails to execute the payment order of a customer; (2) a bank is late in executing a payment order; (3) a bank makes an error in executing the payment order, either as to the amount to be paid or the identity of the person to be paid. A major policy issue in the drafting of Article 4A was the allocation of risk to the various parties in light of the price structure in the industry.

For example, if a receiving bank executes a payment order by paying more than the order calls for, or makes a duplicative payment, the bank is entitled to the amount of the payment order but is left to recover any excess or duplicative payment from the beneficiary under the law governing mistake and restitution. Where banks carry out a funds transfer but are late in executing it, the banks are obligated to pay interest to either the originator or the beneficiary of the funds transfer for the period of delay caused by the improper execution. For other types of improper execution or failure to execute payment orders, banks can be liable to the originator or sender for their expenses in the transaction along with incidental expenses and interest losses due to improper execution or failure to execute; however, consequential damages are recoverable only to the extent provided in an express written agreement of the receiving bank and are not otherwise recoverable.

The Global Business Environment

International Electronic Funds Transfers

The Model Law on International Credit Transfers, adopted in 1992 by the United Nations Commission on International Trade Law, is the major international legal document

concerning electronic funds transfers. The Model Law covers basically the same kind of transactions as Article 4A does, but it does require the funds transferred to have an international component and is not identical in its treatment of certain issues.

Problems and Problem Cases

1. James Drumm and Debra Brading were dating and lived together on and off for several years. Drumm was providing financial support to Brading. Brading had written numerous checks on Drumm's checking account and had access to his corporate credit cards. However, she was not an authorized signator on either his checking or savings accounts. After one particularly ugly fight between the two on July 3, 2000, Brading went to the National City Bank and withdrew \$314,000 from Drumm's individual savings account. She did so by approaching a teller, giving her Drumm's account number and electronic personal identification number (PIN), and providing the teller with a driver's license bearing the name Debra Brading along with a Racquet Club membership identifying her as Debra Drumm. She was also wearing a \$20,000 diamond ring, which appeared to be an engagement ring. On the basis of these facts, a teller allowed the transaction. Drumm brought suit against National City Bank for breach of contract for allowing an unauthorized transfer of funds from his account. Is National City Bank liable to Drumm?
2. Louise Kalbe drew a check in the amount of \$7,260 payable to the "order of cash" on her account at the Pulaski State Bank. The check was lost or stolen, but Kalbe did not report this to the bank, nor did she attempt to stop payment on it. When the check was received by the Pulaski State Bank, Kalbe had only about \$700 in her checking account. However, the bank paid the check, creating an overdraft in her account of \$6,542.12. The bank then sued Kalbe to recover the amount of the overdraft. Kalbe asserted that the check was not properly payable from her account. Was the bank legally entitled to pay a check that exceeded the balance in the drawer's account and to recover the overdraft from the drawer?
3. RPM Pizza, Inc., a Domino's Pizza franchisee, maintained a checking account at Bank One-Cambridge.

On May 29, 1992, RPM erroneously issued a \$96,000 check drawn on its account at the bank and payable to a computer broker, Systems Marketing. After mailing the check, RPM realized its error, and on June 2, 1992, RPM placed a stop-payment order on the check. As stated in its account agreement with Bank One (and in the UCC as adopted in Ohio), written stop-payment orders are effective for six months. The stop-payment order expired on December 6, 1992, and RPM failed to renew it.

On December 22, 1992, Systems Marketing deposited the check in its account at the Bank of Tampa, Florida. When the Bank of Tampa received the check, it was more than six months old and was therefore "stale" according to standard banking procedures. The Bank of Tampa credited the check to Systems Marketing's account and sent it forward to Bank One-Cambridge, which charged it against RPM's checking account.

RPM brought suit against Bank One, claiming that the bank had not exercised ordinary care or acted in good faith in paying the stale check. The bank established that it routinely paid stale checks and that its internal operating procedures simply required it to perform a signature authorization on checks of more than \$50,000, which it did in this case. Did the bank violate the duty it owed to its customer, RPM, when it paid a check that was more than six months old?

4. Dr. Sherrill purchased a Buick Skylark from Frank Morris Buick. He gave the auto dealer a check for \$4,960.61 drawn on his account at First Alabama Bank. The check was dated "2/6/1976," was payable "to the order of Frank Morris Buick," and was not numbered. After buying the Skylark, Sherrill became concerned about whether he had gotten valid title to it. The day after he gave the dealer the check, he called in an oral stop-payment order on it. He later confirmed the stop-payment order in writing. In the stop-payment order, Sherrill stated that the check was not numbered, was payable to "Walter Morris Buick,"

- was dated “6/3/76,” and was in the amount of \$4,960.61. The bank paid the check when it was presented for payment. Sherrill then claimed that the bank should recredit his account for \$4,960.61 because it paid the check over a valid stop-payment order. Did the stop-payment order describe the check accurately enough to constitute a valid stop-payment order?
5. Brenda Jones, who did business as Country Kitchen, purchased some cookware from an itinerant salesman, giving him a check in the amount of \$200 for the purchase price. The salesman cashed the check at the First National Bank before noon on May 22, the day of the sale. Jones later became concerned about the lack of documentation from the salesman, thinking that the cookware might be stolen, and placed a stop-payment order with her bank, the State Bank of Conway Springs, at 3:30 that afternoon. State Bank refused to honor the check when it was presented for payment through banking channels. First National Bank, claiming to be a holder in due course, then brought suit against Jones to recover the \$200 value of the check. Is the drawer of a check on which a stop-payment order was placed and honored by the bank liable to pay the check to a holder in due course?
 6. John Doe had a checking account at Highland National Bank in New York. Two days after John Doe died in Florida, but before Highland National knew of his death, John’s sister appeared at the bank. She had a check signed by John Doe but with the amount and name of the payee left blank. She told the bank that her brother wanted to close his account. She asked how much was in the account, filled the check in for that amount, and made the check payable to herself. The bank checked her identification and verified the signature of John Doe. Then it paid the check to the sister. The executor of John Doe’s estate sued Highland National Bank to recover the amount of money that was in John’s account on the day he died. The executor claimed that the bank had no authority to pay checks from John Doe’s account after his death. May a bank pay checks drawn on the account of a deceased customer?
 7. In December, Whalley Company hired Nancy Cherauka as its bookkeeper. Her duties included preparing checks, taking deposits to the bank, and reconciling the monthly checking account statements. She was not authorized to sign or cash checks. Between the following January 24 and May 31, Cherauka forged 49 checks on the Whalley account at National City Bank. Each month, National City Bank sent Whalley a statement and the canceled checks (including the forgeries) it had paid the previous month. The president of Whalley looked at the statement to see the balance in the account, but he did not look at the individual checks. Then he gave the statement and checks to the bookkeeper. The January 24 forged check was sent to Whalley on February 3. In June, Whalley discovered that Cherauka was forging checks and fired her. It then brought a lawsuit against National City Bank to force it to recredit Whalley’s account with the total amount of the 49 checks. Whalley claimed that the checks were not properly payable from the account. Is National City required to recredit Whalley’s account?
 8. Lor-Mar/Toto, Inc., maintained a business checking account at the First Constitution Bank. The corporate banking resolution between Lor-Mar and the bank provided that checks drawn on the checking account could be honored upon one authorized signature of the four named officers stated in the resolution, including Loretta A. Van Middlesworth and Louis J. Toto, Jr., its president and vice president respectively. On May 28, 1997, Lor-Mar notified the bank that the signatures of Van Middlesworth and Toto would be “stamped” on Lor-Mar’s checks and provided the bank with samples of its stamped facsimile signatures. Thus, from May 1997 forward, the bank was authorized by Lor-Mar to honor checks bearing a stamped facsimile of either Van Middlesworth or Toto.

Beginning in June 2002 a series of five allegedly unauthorized checks totaling \$24,350.00 were drawn against the Lor-Mar account. All five checks bore what appeared to be the stamped facsimile signature of Van Middlesworth as provided to the bank on May 28, 1997, and another signature which is illegible. However, the unauthorized checks were a different stock and color than Lor-Mar’s regular checks, which were light yellow in color and the type routinely purchased from banks. On the front, under the preprinted check number, they contained a numerical bank designation of “55-715/21201.” The back of the authentic checks contained a repetitive pattern and the words “ORIGINAL DOCUMENT” with a security message stating: “IMPORTANT: The back of this document has been printed with a patented security process in order to deter check fraud. If you do not clearly see the words ‘Original Document’ and the Security

Weave pattern, or the word VOID appears to the right of this message, do not cash.” Sample checks provided by the company contained the facsimile signature of Toto and the actual signature of another corporate signatory, Maureen E. Zaleck.

In comparison, the challenged checks were computer-generated and laser-printed on light blue paper and contained no bank designation number under the preprinted check number. Their purported security features are different from the legitimate checks; they contain the words “ORIGINAL DOCUMENT” in large letters once on the back with a boxed designation:

THIS DOCUMENT INCLUDES THE FOLLOWING VALUGUARD SECURITY FEATURES; EXCEEDING FSA GUIDELINES:

- INVISIBLE FLUORESCENT FIBERS
- TWO SOLVENT STAINS
- BROWNSTAIN
- UV DULL

ATTEMPTS TO COPY OR CHEMICALLY ALTER THIS DOCUMENT WILL ACTIVATE VALUGUARD SECURITY FEATURES.

Significantly, the unauthorized checks contained repeated duplicate numbers from legitimate checks that had already been issued by Lor-Mar. The five checks were debited to Lor-Mar’s account from June 24 to July 1, 2002, and appeared on Lor-Mar’s statements covering the periods May 31, 2002, through June 28, 2002, and June 28, 2002, through July 31, 2002. Upon receiving the statements, Lor-Mar discovered and reported the unauthorized checks to the bank in July 2002. For each of the five checks, Toto executed an “Affidavit For Forged or Lost Check/Money Order” to the bank attesting that he never signed his name on the check, authorized any person to indorse his name, the indorsement of his name that appears on the check is a forgery, and he never received any of the funds the check represented. Lor-Mar brought suit seeking to have its account recredited for the amount of the unauthorized checks. Is Lor-Mar entitled to have its account recredited for the amount of the unauthorized checks on the grounds the checks were not properly payable from the account?

9. On August 16, Frederick Ognibene went to the ATM area at a Citibank branch and activated one of the machines with his Citibank card, provided his personal identification code, and withdrew \$20. When he

approached the machine a person was using the customer service telephone located between two ATM machines and appeared to be telling customer service that one of the machines was malfunctioning. As Ognibene was making his withdrawal, the person said into the telephone, “I’ll see if his card works in my machine.” He then asked Ognibene if he could use his card to see if the other machine was working. Ognibene handed his card to him and saw him insert it into the adjoining machine at least two times while saying into the telephone, “Yes, it seems to be working.” When Ognibene received his Citibank statement, it showed that two withdrawals of \$200 each from his account were made at 5:42 PM and 5:43 PM, respectively, on August 16. His own \$20 withdrawal was made at 5:41 PM. At the time, Ognibene was unaware that any withdrawals from his account were being made from the adjoining machine. Ognibene sought to have his account recredited for \$400, claiming that the withdrawals had been unauthorized. Citibank had been aware for some time of a scam being perpetrated against its customers by persons who observed the customer inserting his personal identification number into an ATM and then obtained access to the customer’s ATM card in the same manner as Ognibene’s card was obtained. After learning about the scam, Citibank posted signs in ATM areas containing a red circle approximately 2½ inches in diameter in which was written “Do Not Let Your Citicard Be Used For Any Transaction But Your Own.” Was Citibank required under the Electronic Fund Transfer Act to recredit Ognibene’s account on the grounds that the withdrawal of the \$400 was unauthorized?

Online Research

How Does Your Bank Handle Stop-Payment Orders?

Use the Internet to locate the Web site for the bank or other financial institution where you maintain a checking account. Ascertain from the Web site what the bank’s policy is concerning stopping payment on checks, including (1) the means by which the bank will accept a stop-payment order, (2) the information it requires, (3) the charge it imposes for entering a stop-payment order, and (4) any qualifications or limitations it makes to its responsibility to follow your instruction to stop payment.

The Agency Relationship

chapter 36

Third-Party Relations of the
Principal and the Agent

Agency Law

chapter 35

THE AGENCY RELATIONSHIP

Upon graduating from college, Rita Morales was hired as a software consultant by IPQ Company, a large computer manufacturing and services company. Rita negotiated a high salary and even a nice signing bonus, yet after a few years of work she found that her spending often outstripped her earnings and savings. As her credit card bills piled up, Rita started her own consulting firm. Initially, Rita provided software consulting for her clients only on nights and weekends after she had finished her IPQ work for the day. As her business grew, she began seeing clients during normal weekday working hours and calling them from her office at IPQ. To find new clients, Rita downloaded IPQ's client information from IPQ's database. She contacted over 200 IPQ clients and asked them to switch from IPQ to Rita's business. Over two dozen IPQ clients switched to Rita.

- Do you see any potential problems with Rita's actions?
- What legally and practically can IPQ do to prevent Rita from taking its clients?
- What would an ethical employee in Rita's position do if her income did not meet her expenses?

OFTEN, BUSINESSES ARE LEGALLY bound by the actions of their employees or other representatives. For example, corporations frequently are liable on contracts their employees make or for torts their employees commit. We take such liability for granted, but why should we? A corporation is an artificial legal person distinct from the officers, employees, and other representatives who contract on its behalf and who may commit torts while on the job. Similarly, a sole proprietor is distinct from the people she may employ. How can these and other business actors be bound on contracts they did not make or for torts they did not commit? The reason is the law of **agency**.

Agency is a two-party relationship in which one party (the **agent**) is authorized to act on behalf of, and under the control of, the other party (the **principal**). Examples include a Toyota dealership hiring a salesman to sell cars, Google employing a software engineer to write computer code, and you engaging a real estate agent to sell your home. Agency law's most important social function has been to stimulate commercial activity. It does so by enabling businesses to increase the number of transactions they can complete within a given time. Without agency, for instance, a sole proprietor's ability to engage in trade would be limited by the need to make

each of her purchase or sale contracts in person. As artificial persons, moreover, corporations can act only through their agents.

Agency law divides into two rough categories. The first involves legal relations between the principal and the agent. These include the rules governing formation of an agency, the duties the principal and the agent owe each other, and the ways an agency can be terminated. These topics are the main concern of this chapter. Chapter 36 discusses the principal's and the agent's relations with third parties. In that chapter, our main concerns are the principal's and the agent's liability on contracts the agent makes and for torts the agent commits.

Much of the law of agency, which is largely state law in the United States, has been codified or adopted by the state legislatures or their courts in the form of the *Restatement (Second) of Agency*, a project of the American Law Institute (ALI). The *Restatement (Third) of Agency* was adopted by the ALI in 2006, and in the next several years, we expect states gradually to adopt this new *Restatement*, which is not appreciably different from the *Restatement (Second)*. The material in Chapters 35 and 36 mostly covers the common features of the two versions, with differences, such as new terminology, noted as necessary.

Creation of an Agency

Formation Agency is the fiduciary relationship that arises when one person (a principal) manifests assent to another person (an agent) that the agent will act on the principal's behalf and be subject to the principal's control. Agency is a fiduciary relationship because the principal entrusts the agent with power to make contracts for the principal and to possess and use the principal's property. As a fiduciary, the agent must use the entrusted power and property in the best interest of the principal.

As the term *manifested* suggests, the test for an agency's existence is *objective*. If the parties' behavior and the surrounding facts and circumstances indicate an agreement that one person is to act for the benefit and under the control of another, the relationship exists. The *MDM* case, which appears after this section, applies the *Restatement (Third)* definition of agency. That case shows that an agent is a fiduciary of the principal and not vice versa.

If the facts establish an agency, neither party need know about the agency's existence or subjectively desire that it exist. In fact, an agency may be present even when the parties expressly say that they do not intend to create it, or intend to create some other legal relationship instead.

Often, parties create an agency by a written contract. But an agency contract may be oral unless state law provides otherwise. Some states, for example, require

written evidence of contracts to pay an agent a commission for the sale of real estate. More important, the agency relation need not be contractual at all. Thus, consideration required to form a contract is not necessary to form an agency.

Capacity A principal or agent who lacks the necessary mental capacity when the agency is formed ordinarily can release himself from the agency at his option. Examples include those who are minors or are mentally incapacitated when the agency is created. Of course, incapacity may occur during the agency relationship also. Terminations of an agency due to subsequent lack of capacity are discussed later in this chapter.

Corporations can and must appoint agents. In a partnership, each partner normally acts as the agent of the partnership in transacting partnership business, and a partnership can appoint nonpartner agents as well. In addition, corporations, partnerships, and other business organizations themselves can act as agents for other business organizations as well as individuals.

Nondelegable Obligations Certain duties or acts must be performed personally and cannot be delegated to an agent. Examples include making statements under oath, voting in public elections, and signing a will. The same is true for service contracts in which the principal's personal performance is crucial, for example, certain contracts by lawyers, doctors, athletes, and entertainers.

MDM Group Associates, Inc. v. CX Reinsurance Company Ltd. 165 P.3d 882 (Colo. Ct. App. 2007)

MDM Group is an insurance broker. Joseph McNasby, its president, developed an insurance program for insuring ski resorts against the risk that the number of "paid skier days" during a ski season would fall below a specified minimum. CX Reinsurance Co. and others agreed to underwrite insurance policies covering the risk for a year, starting with the 1997–1998 ski season, and issued policies to a number of ski resorts in exchange for premium payments. For the first two years, the policies generated premiums of about \$550,000 and \$476,000, from which MDM received a commission of 12.5 percent. No claims were submitted under the policies during the first and second seasons.

Before the 1999–2000 ski season, several underwriters declined to renew their involvement. However, CX issued policies for that year, which, because more ski resorts purchased the coverage, generated total premiums of approximately \$3 million. MDM received commissions totaling approximately \$378,000. Unfortunately, the 1999–2000 ski season was not a good one for the insured resorts. There was little snowfall in the United States until well after the Christmas and New Year's ski holidays, and vacation travel was reduced because of concerns related to the millennium change. All the insured resorts, including Vail and Mammoth, submitted claims. CX negotiated, mediated, and litigated the claims, ultimately paying in excess of \$23 million to settle them. As was its right, CX declined to renew the insurance policies after their one-year term expired in May 2000.

MDM initiated this action against CX asserting several grounds for liability, including a breach of fiduciary duty claim. MDM contended that CX, as the principal in an agency relationship with MDM, owed it a fiduciary duty and breached its

duty by handling the ski resorts' claims improperly and in bad faith, thereby causing the resorts not to renew their policies and causing MDM to lose renewal commissions. The jury found for MDM and awarded it \$6,750,783 in damages. CX appealed to a Colorado appeals court.

Casebolt, Judge

CX contends that MDM's breach of fiduciary duty claim must fail because a principal cannot owe a fiduciary duty to an agent as a matter of law.

A fiduciary duty arises among parties through a relationship of trust, confidence, and reliance. Certain types of relationships give rise to general fiduciary duties as a matter of law, such as attorney-client, principal-agent, and trustee-beneficiary. However, fiduciary duties are owed by only one of the parties in these relationships.

A fiduciary duty arises when one party has a high degree of control over the property or subject matter of another, or when the benefiting party places a high level of trust and confidence in the fiduciary to look out for the beneficiary's best interest.

In the principal-agent context, it is the *agent* who owes a fiduciary duty to the principal as a matter of law. "An agent has a fiduciary duty to act loyally for the principal's benefit in all

matters connected with the agency relationship." *Restatement (Third) of Agency*, § 8.01 (2006).

A principal does owe *some* duties to an agent. *See Restatement (Third) of Agency*, §§ 8.13–8.15. However, the "obligations that a principal owes an agent, specified in §§ 8.13–8.15, are not fiduciary." *Restatement (Third) of Agency*, § 1.01 comment e (emphasis supplied).

The jury was wrongly instructed that there was a fiduciary duty as a matter of law if it found that an agency relationship existed. As a matter of law, a principal is not a fiduciary of an agent. The principal is not "entrusted to act for the benefit of or in the interest of another." It is the principal who entrusts business to the agent to act for the principal's benefit. Any duties owed by a principal to an agent are not fiduciary. *Restatement (Third) of Agency*, § 1.01 comment e.

Judgment reversed in favor of CX.

Agency Concepts, Definitions, and Types

Agency law includes various concepts, definitions, and distinctions. These matters often determine the rights, duties, and liabilities of the principal, the agent, and third parties. In addition, they sometimes are important outside agency law. Because these basic topics are crucial in many different situations, we outline them together here.

Authority Although agency law lets people multiply their dealings by employing agents, a principal is not always liable for his agent's acts. Normally, an agent can bind his principal on a contract or other matter only when the agent has **authority** to do so. Authority is an agent's ability to affect his principal's legal relations. It comes in two main forms: **actual authority** and **apparent authority**. Each is based on the principal's manifested consent that the agent may act for and bind the principal. For actual authority this consent must be communicated to the *agent*, while for apparent authority it must be communicated to the *third party*.

Actual authority comes in two forms: **express authority** and **implied authority**. *Express authority* is created by the principal's *actual words* (whether written

or oral). Thus, an agent has express authority to bind her principal on a contract or other matter only when the principal has made a fairly precise statement to that effect.

However, it is often impractical for a principal to specify the agent's authority fully and exactly. To avoid unnecessarily restricting an agent's ability to represent her principal, agency law also gives agents *implied authority* to bind their principals. An agent generally has implied authority to do whatever it is reasonable to assume that the principal wanted him to do. Relevant factors include the principal's express statements, the nature of the agency, the acts reasonably necessary to carry on the agency business, and the acts customarily done when conducting that business.

Sometimes an agent who lacks actual authority may still *appear* to have such authority, and third parties may reasonably rely on this appearance of authority. To protect third parties in such situations, agency law lets agents bind the principal on the basis of their apparent authority. *Apparent authority* arises when the *principal's* behavior causes a third party to believe reasonably that the agent is authorized to act in a certain way.

Apparent authority depends on what the *principal* communicates to the third party—either directly or through the agent. A principal might clothe an agent with

apparent authority by making direct statements to the third party, telling an agent to do so, or allowing an agent to behave in a way that creates an appearance of authority. The principal's communications to the agent are irrelevant unless they become known to the third party or affect the agent's behavior. Also, agents cannot give themselves apparent authority, and apparent authority does not exist where an agent creates an appearance of authority without the principal's consent. Finally, the third party must *reasonably* believe in the agent's authority. Trade customs and business practices can help courts determine whether such a belief is reasonable.

Authority is important in a number of agency contexts. Chapter 36 examines its most important agency application—determining a principal's liability on contracts made by his agent.

General and Special Agents Although it may be falling out of favor with courts, the blurred distinction between general agents and special agents still has some importance. A **general agent** is continuously employed to conduct a series of transactions, while a **special agent** is employed to conduct a single transaction or a small, simple group of transactions. Thus, a continuously employed general manager of a McDonald's restaurant, a construction project supervisor for homebuilder Pulte, or a buyer of women's clothing for Macy's normally is a general agent. A person employed to buy or sell a few objects on a one-shot basis usually is a special agent. General agents often serve for longer periods, perform more acts, and deal with more parties than do special agents.

Gratuitous Agents An agent who receives no compensation for his services is called a **gratuitous agent**. Gratuitous agents have the same power to bind their principals as do paid agents with the same authority. However, the fact that an agent is gratuitous sometimes lowers the duties principal and agent owe each other and also may increase the parties' ability to terminate the agency without incurring liability.

Subagents A **subagent** basically is an agent of an agent. More precisely, a subagent is a person appointed by an agent to perform tasks that the agent has undertaken to perform for his principal. For example, if you retain accounting firm PricewaterhouseCoopers as your agent, the accountant actually handling your affairs is PWC's agent and your subagent. For a subagency to exist, an agent must have the authority to make the

subagent *his agent* for conducting the principal's business. Sometimes, however, a party appointed by an agent is not a subagent because the appointing agent only had authority to appoint agents *for the principal*. For instance, sales agents appointed by a corporation's sales manager are agents of the corporation, not agents of the sales manager.

When an agent appoints a true subagent, the agent becomes a principal with respect to the subagent, his agent. Thus, the legal relations between agent and subagent closely parallel the legal relations between principal and agent. But a subagent is also the *original principal's* agent. Here, though, the normal rules governing principals and agents do not always apply. We occasionally refer to such situations in the pages ahead.

Employees and Independent Contractors Many legal questions depend on whether an agent or some other party who contracts with the principal is classed as an **employee** (or servant) or as an **independent contractor**. No sharp line separates employees from independent contractors; the following *Eisenberg* case lists the factors considered in making such determinations. The most important of these factors is the principal's *right to control the manner and means* of the agent's performance or work. Employees typically are subject to such control. Independent contractors, on the other hand, generally contract with the principal to produce a result, and determine for themselves how that result will be accomplished.

Although many employees perform physical labor or are paid on an hourly basis, corporate officers who do no physical work and receive salaries usually are employees as well. Professionals such as brokers, accountants, and attorneys often are independent contractors of their clients, although they are employees of the brokerage, accounting, or law firms that pay their salaries. Consider the difference between a corporation represented by an attorney engaged in her own practice (an independent contractor) and a corporation that maintains a staff of salaried in-house counsel (employees). Finally, franchisees, like a KFC restaurant, usually are independent contractors of their franchisors, like YUM! Brands.

As Chapter 36 makes clear, the employee-independent contractor distinction often is crucial in determining the principal's liability for an agent's torts. The distinction also helps define the coverage of some employment laws discussed in Chapter 51. Unemployment compensation, the Fair Labor Standards Act (the subject of *Eisenberg*), and workers' compensation are clear examples.

Eisenberg v. Advance Relocation & Storage, Inc. 237 F.3d 111 (2d. Cir. 2000)

In July 1998, Julianne Eisenberg discussed with Peter White and Mike Ewing working for Advance Relocation & Storage, Inc., a Danbury, Connecticut warehouse. White was involved in Advance’s hiring process, and Ewing was the warehouse manager. The men discussed with Eisenberg the possibility of her working on a “permanent full-time” basis at Advance. They did not inquire into any special skills that Eisenberg may have had, and they did not ask about her prior work experiences. Instead, Eisenberg believed, the men were interested in her working at the warehouse because White knew that she was strong, having played football with her, and that she had been doing carpentry work for many years.

Eisenberg started work at Advance, where she and her co-workers were responsible for loading and unloading furniture from trucks at the warehouse and at residences. They were paid on an hourly basis, and were required to punch in and out. Eisenberg and her co-workers were occasionally sent home early if there was little to do, and they were sometimes asked to work on the weekend.

At the warehouse, Ewing gave Eisenberg orders, and if he was not going to be at the warehouse on a particular day, he told her on the prior day where to go and what to do. At job sites, an Advance representative told the crew what objects each crew member, including Eisenberg, was to move.

Eisenberg claimed that during much of the time that she worked at Advance, she was sexually harassed. She asserts that on September 16, 1998, she complained about this alleged sexual harassment to Joan Isaacson, the Advance office manager. Eisenberg also alleges that she told Isaacson that she had seen several Advance employees using cocaine in the warehouse.

The warehouse was closed by management the next day. Eisenberg then met again with Isaacson, at which point Isaacson allegedly told her that she would receive a job when the warehouse reopened and would be contacted and told when to return to work. However, Isaacson then told Eisenberg that she would not be called back to work at Advance if, based on her allegations of sexual harassment, she sought legal counsel or filed a complaint. Undeterred, Eisenberg hired an attorney and initiated an action against Advance on the grounds that she was sexually harassed in violation of the Civil Rights Act of 1964 (Title VII) and the New York Human Rights Law (NYHRL). After doing so, Eisenberg claimed that she was not called back to work at Advance by Isaacson or anyone else. Eisenberg alleged that she was subjected to a hostile work environment at Advance, that her termination from the firm was discriminatory, and that Advance retaliated against her for complaining about the violation of her right to be free of sexual harassment—all in violation of Title VII and the NYHRL.

The district court granted Advance’s motion for summary judgment on the grounds that Eisenberg was not an Advance employee, and thus could not invoke the protections of Title VII or the NYHRL. Eisenberg appealed to the Court of Appeals, arguing that she was an Advance employee.

Cabranes, Circuit Judge

Title VII and the NYHRL cover “employees,” not independent contractors. For the purposes of these statutes, a decision on whether a worker is an “employee”—or whether he or she is merely an independent contractor—requires the application of the common law of agency. In turn, whether a hired person is an employee under the common law of agency depends largely on the thirteen factors articulated by the Supreme Court in *Community for Creative Non-Violence v. Reid*, 490 U.S. 730 (1989). These so-called “*Reid* factors,” which are culled from the federal common law of agency, are as follows:

[1] the hiring party’s right to control the manner and means by which the product is accomplished . . . ; [2] the skill required; [3] the source of the instrumentalities and tools; [4] the location of the work; [5] the duration of the relationship between the parties; [6] whether the hiring party has the right to assign additional projects to the hired party; [7] the extent of the hired party’s discretion over when and how

long to work; [8] the method of payment; [9] the hired party’s role in hiring and paying assistants; [10] whether the work is part of the regular business of the hiring party; [11] whether the hiring party is in business; [12] the provision of employee benefits; and [13] the tax treatment of the hired party.

Though no single factor is dispositive, the “greatest emphasis” should be placed on the first factor—that is, on the extent to which the hiring party controls the “manner and means” by which the worker completes his or her assigned tasks. The first factor is entitled to this added weight because, under the common law of agency, an employer–employee relationship exists if the purported employer controls or has the right to control both the result to be accomplished and the “manner and means” by which the purported employee brings about that result.

Turning to the individual *Reid* factors, it is plain that the fifth, seventh, and ninth factors must be disregarded. As to the fifth factor, it is not disputed that Eisenberg worked at Advance for

only 28–35 days. A relatively short tenure such as Eisenberg’s ordinarily implies that a worker is an independent contractor. Here, however, the brevity of Eisenberg’s stint at Advance does not suggest much of anything—her job lasted only 28–35 days because of the closing of the warehouse, not because of the nature of her work or her relationship to Advance. As to the seventh factor, the District Court found that Eisenberg had “some” control over her schedule, but not full control over it. Because this ambivalent finding does not seem to cut in any particular direction, we disregard it. Finally, the ninth factor is irrelevant to this case: Eisenberg hired no one to assist her with her work at Advance, and Advance hired no assistants for Eisenberg.

The remaining factors are the dispositive ones. As noted above, Eisenberg did not receive benefits such as medical insurance or vacation days, and Advance treated her as an independent contractor for tax purposes, giving her a “1099” tax form rather than a “W-2” form, and not deducting or withholding taxes from her wages. These factors favor characterizing Eisenberg as an independent contractor.

The remaining factors, however, suggest that Eisenberg was an Advance employee. As to the first factor, Advance exercised a great deal of control over the “manner and means” by which Eisenberg accomplished her assigned tasks. As we noted above, at the warehouse White gave Eisenberg “orders” on a daily basis; if he was not going to be at the warehouse on a particular day, he told her on the prior day “where . . . to go and what . . . to do.” Moreover, at job sites, an Advance representative—White, Ewing, or someone else—would direct the crew as to what objects each crew member, including Eisenberg was to move.

As to the second factor, Eisenberg’s job at Advance—loading and unloading trucks—was not one that required relatively specialized skills. Other courts have held that the level of skill associated with being an architect, computer programmer, graphic artist, photographer, or treasurer suggests that workers who perform these jobs are independent contractors. In terms of the level of skill that it required, Eisenberg’s moving work was not

analogous to any of these jobs. Indeed, in this case White and Ewing all but offered Eisenberg a job without first asking her about moving-related work that she had done in the past, or about relevant skills that she might have developed over the years. That White seemed to view Eisenberg as qualified for the job solely on the basis of her football and carpentry abilities only emphasizes the point: While simple moving of the sort Eisenberg performed certainly requires skills—strength, for example, and agility—it does not demand *specialized* skills of the sort typically acquired through experience and/or education.

As to the third and fourth factors, the District Court found that “Advance supplied all of the [necessary] instrumentalities,” including “trucks and other supplies,” and that “the majority of plaintiff’s work took place at Advance’s warehouse or on Advance’s trucks.” Each of these findings suggests that Eisenberg was an Advance employee.

As to the sixth factor, the District Court found that Eisenberg “was not hired for a specific move or project.” Instead, the District Court found that Eisenberg “was assigned to numerous moves or projects,” and was required “to perform work on Advance’s trucks and in its warehouse, on whatever moves or projects Advance undertook while she was there.” This finding bolsters the conclusion that Eisenberg was an employee.

As to the eighth factor, the District Court found that Eisenberg was paid on an hourly basis. Compensation primarily or exclusively on the basis of time worked (rather than on the basis of projects completed) suggests that a worker is an employee. As to the ninth and tenth factors, the District Court found that Advance is “in the business of moving and storage” so that Eisenberg’s work was “in the regular business of Advance,” and that, “obviously, Advance is a business.” Each of these findings favors characterizing Eisenberg as an employee.

Therefore, we conclude that Eisenberg was an “employee” within the meaning of Title VII and the NYHRL.

Judgment reversed in favor of Eisenberg.

Duties of Agent to Principal

Agency law establishes certain **fiduciary duties** that the agent owes the principal. These duties supplement the duties created by an agency contract. They exist because agency is a relationship of trust and confidence. The principal’s many remedies for an agent’s breach of her fiduciary duties include termination of the agency and recovery of damages from the agent.

A gratuitous agent usually has the same fiduciary duties as a paid agent, but need not perform as promised.

She normally can terminate the agency without incurring liability. However, a gratuitous agent *is* liable for failing to perform as promised when her promise causes the principal to rely upon her to undertake certain acts, and the principal suffers losses because he refrained from performing those acts himself.

A subagent owes the agent (his principal) all the duties agents owe their principals. A subagent who knows of the original principal’s existence also owes that principal all the duties agents owe their principals, except for duties arising solely from the original principal’s

contract with the agent. Finally, the agent who appointed the subagent generally is liable to the original principal when the principal is harmed by the subagent's conduct.

Agent's Duty of Loyalty Because agency is a relationship of trust and confidence, an agent has a **duty of loyalty** to his principal. Thus, an agent must subordinate his personal concerns by (1) avoiding conflicts of interest with the principal, and (2) not disclosing confidential information received from the principal.

Conflicts of Interest An agent whose interests conflict with the principal's interests may be unable to represent his principal effectively. Therefore, an agent may not *acquire a material benefit* from a third party in connection with an agency transaction. When conducting the principal's business, an agent may **not deal with himself**. For example, an agent authorized to sell property cannot sell that property to himself. Many courts extend the rule to include transactions with the agent's relatives or business associates or with business organizations in which the agent has an interest. However, an agent may engage in self-dealing transactions if the principal consents. For this consent to be effective, the agent must disclose all relevant facts to the principal before dealing with the principal on his own behalf.

Unless the principal agrees otherwise, an agent also may **not compete with the principal** regarding the agency business so long as he remains an agent. Thus, an agent employed to purchase specific property may not buy it himself if the principal desires it. Furthermore, an agent ordinarily may not solicit customers for a planned competing business while still employed by the principal.

Finally, an agent who is authorized to make a certain transaction may **not act on behalf of the other party** to the transaction unless the principal knowingly consents. Thus, one ordinarily may **not act as agent for both parties**

to a transaction without first disclosing the double role to, and obtaining the consent of, both principals. Here, the agent must disclose to each principal all the factors reasonably affecting that principal's decision. Occasionally, though, an agent who acts merely as a middleman may serve both parties to a transaction without notifying either. For instance, an agent may simultaneously be employed as a "finder" by a firm seeking suitable businesses to acquire and a firm looking for prospective buyers, so long as neither principal expects the agent to advise it or negotiate for it.

An agent will not breach her duty of loyalty, however, if she acts in good faith, discloses to the principal all material facts regarding her conflict of interest, and deals fairly with the principal.

Confidentiality Unless otherwise agreed, an agent may not **use or disclose confidential information** acquired through the agency. Confidential information is the principal's information *entrusted* by the principal to the agent for purposes of the agent carrying out her duties. Confidential information includes facts that are valuable to the principal because they are not widely known or that would harm the principal's business if they became widely known. Examples include the principal's business plans, financial condition, contract bids, technological discoveries, manufacturing methods, customer files, and other trade secrets.

In the absence of an agreement to the contrary, after the agency ends almost all fiduciary duties terminate. For example, an agent may compete with her principal after termination of the agency. As the following *ABKCO* case illustrates, however, the duty not to use or disclose confidential information continues after the agency ends. The former agent may, however, utilize general knowledge and skills acquired during the agency.

ABKCO Music Inc. v. Harrisongs Music, Ltd.

722 F.2d 988 (2d Cir. 1983)

In 1963, a song called "He's So Fine" was a huge hit in the United States and Great Britain. In February 1971, Bright Tunes Music Corporation, the copyright holder of "He's So Fine," sued ex-Beatle George Harrison and Harrisongs, Music, Ltd. in federal district court. Bright Tunes claimed that the Harrison composition "My Sweet Lord" infringed its copyright to "He's So Fine." At this time, Harrison's business affairs were handled by ABKCO Music, Inc., and Allen B. Klein, its president. Shortly after the suit began, Klein unsuccessfully tried to settle it by having ABKCO purchase Bright Tunes.

Shortly thereafter, Bright Tunes went into receivership, and it did not resume the suit until 1973. At this time, coincidentally, ABKCO's management contract with Harrison expired. In late 1975 and early 1976, however, Klein continued his efforts to have ABKCO purchase Bright Tunes. As part of these efforts, he gave Bright Tunes three schedules summarizing Harrison's royalty income from "My Sweet Lord," information he possessed because of his previous service to Harrison.

Throughout the 1973–76 period, Harrison’s attorneys had been trying to settle the copyright infringement suit with Bright Tunes. Because Klein’s activities not only gave Bright Tunes information about the economic potential of its suit but also gave it an economic alternative to settling with Harrison, Klein may have impeded Harrison’s efforts to settle.

When the copyright infringement suit finally came to trial in 1976, the court found that Harrison had infringed Bright Tunes’ copyright. The issue of damages was scheduled for trial at a later date, and this trial was delayed for some time. In 1978, ABKCO purchased the “He’s So Fine” copyright and all rights to the infringement suit from Bright Tunes. This made ABKCO the plaintiff in the 1979 trial for damages on the infringement suit. At trial, Harrison counterclaimed for damages resulting from Klein’s and ABKCO’s alleged breaches of the duty of loyalty. Finding a breach of duty, the district judge issued a complex order reducing ABKCO’s recovery. ABKCO appealed.

Pierce, Circuit Judge

The relationship between Harrison and ABKCO prior to termination of the management agreement in 1973 was that of principal and agent. An agent has a duty not to use confidential knowledge acquired in his employment in competition with his principal. This duty exists as well after the employment as during its continuance. On the other hand, use of information based on general business knowledge is not covered by the rule, and the former agent is permitted to compete with his former principal in reliance on such publicly available information. The principal issue before us, then, is whether Klein (hence, ABKCO) improperly used confidential information, gained as Harrison’s former agent, in negotiating for the purchase of Bright Tunes’ stock in 1975–76.

One aspect of this inquiry concerns the nature of the schedules of “My Sweet Lord” earnings which Klein furnished to Bright Tunes in connection with the 1975–76 negotiations. It appears that at least some of [this] information was confidential. The evidence is not at all convincing that the information was publicly available.

Another aspect of the breach of duty issue concerns the timing and nature of Klein’s entry into the negotiation picture and the manner in which he became a plaintiff in this action. We find this case analogous to those where an employee, with the use of information acquired through his former employment, completes for his own benefit a transaction originally undertaken on the former employer’s behalf. Klein had commenced a purchase transaction with Bright Tunes in 1971 on behalf of Harrison, which he pursued on his own account after termination of his fiduciary relationship with Harrison. Klein pursued the later discussions armed with the intimate knowledge not only of Harrison’s business affairs, but also of the value of this lawsuit. Taking all of these circumstances together, we agree that Klein’s conduct during the period 1975–78 did not meet the standard required of him as a former fiduciary.

Judgment in favor of Harrison affirmed.

Agent’s Duty to Obey Instructions Because an agent acts under the principal’s control and for the principal’s benefit, she has a duty to obey the principal’s reasonable instructions for carrying out the agency business.

There are exceptions to the duty to obey instructions. A gratuitous agent need not obey his principal’s order to continue to act as an agent. Also, agents generally have no duty to obey orders to behave illegally or unethically. Thus, a sales agent need not follow directions to misrepresent the quality of the principal’s goods, and professionals such as attorneys and accountants are not obligated to obey directions that conflict with the ethical rules of their professions.

Usually a principal’s instructions are clear and can be easily followed. Sometimes, however, the instructions are ambiguous. For example, an instruction may have

terms an agent does not understand. Or perhaps a cell phone conversation may be garbled due to poor signal strength. When a principal’s instructions are unclear, the agent has a duty to communicate with the principal to clarify the instructions.

Agent’s Duty to Act with Care and Skill

A paid agent must **act with the care, competence, and diligence** normally exercised by agents in similar circumstances. A gratuitous agent need only exercise the care and skill required of nonagents who perform similar gratuitous undertakings. Paid agents who represent that they possess a higher than customary level of skill may be held to a correspondingly higher standard of performance. Similarly, an agent’s duty may change if the principal and the agent agree that the agent must possess and exercise greater or lesser than customary care and skill.

Ethics in Action

Corporations give special attention to rooting out conflicts of interests that result from kickbacks, bribes, and gifts to the corporations' employees. To ensure independence of auditors, auditing firms commonly have rules banning their audit staff from receiving anything of value from clients. In other contexts, most corporations permit their employees to receive items or services of nominal value only. Most firms have detailed rules, such as the following from Google's code of ethics:

Gifts, Entertainment, and Payments

Accepting gifts or entertainment from a Google customer, supplier, partner or competitor can easily create the appearance of a conflict of interest, especially if the value of the gift or entertainment is significant. Don't accept significant gifts, entertainment or any other business courtesy (including discounts or benefits that are not made available to all Googlers) from any of our customers, suppliers, partners or competitors if the gift would likely be perceived as influencing your business decisions or otherwise creating a conflict of interest. It's just not how we want to do business.

That said, we understand that not all gifts and entertainment represent conflicts of interest: Inexpensive "token" non-cash gifts, infrequent and moderate business meals and entertainment, and infrequent invitations to local sporting events and celebratory meals can be acceptable aspects of many Google business relationships, provided that they aren't excessive and don't create the appearance of impropriety. Accepting an invitation to a cocktail party thrown by an advertising partner, for instance, might be considered not only an acceptable business activity, but a necessary one for an AdWords sales employee. Similarly, accepting a company T-shirt or coffee mug isn't likely to change your assessment of a potential business relationship. However, accepting tickets to something like the Olympics, Super Bowl or World Cup, especially if travel and lodging are included, can create at least the appearance of a conflict of interest. You should get the approval of your manager and Ethics & Compliance for significant gifts and entertainment like that.

Gifts from customers, suppliers, partners or competitors of cash or cash equivalents (e.g., gift certificates or prepaid gift cards) should never be accepted.

Agent's Duty to Notify the Principal An agent must promptly communicate to the principal matters within the agent's knowledge that are relevant and material to the agency business and that he knows or should know are of concern to the principal. The basis for the duty to notify is the principal's interest in being informed of matters that are important to the agency business.

However, there is no duty to notify when the agent receives privileged or confidential information. For example, a consultant may acquire confidential information from a client and thus be obligated not to disclose it to a second client. If the consultant cannot properly represent the second client without revealing this information, he should refuse to represent that client.

Agent's Duties to Account An agent's duties of loyalty and care require that she give the principal any money or property received in the course of the agency business. This includes profits resulting from the agent's breach of the duty of loyalty, or other duties. It also includes incidental benefits received through the agency business. Examples include bribes, kickbacks, and gifts

from parties with whom the agent deals on the principal's behalf. However, the principal and the agent may agree that the agent can retain certain benefits received during the agency. Courts may imply such an agreement when it is customary for agents to retain tips or accept entertainment while doing the principal's business.

Another type of **duty to account** concerns agents whose business involves collections, receipts, or expenditures. Such agents must keep accurate records and accounts of all transactions and disclose these to the principal once the principal makes a reasonable demand for them. Also, an agent who obtains or holds property for the principal usually may not commingle that property with her own property. For example, an agent ordinarily cannot deposit the principal's funds in her own name or in her own bank account.

Ordinarily, if a principal suffers no monetary damages from the agent's breach of duty, it is not entitled to any recovery from the agent, although termination of the agency may be justified. The following *Sanders* case shows how Madison Square Garden tried to circumvent the damage requirement by using the faithless servant doctrine.

Sanders v. Madison Square Garden L.P. 2007 U.S. Dist. LEXIS 48126 (S.D.N.Y. 2007)

Anuche Browne Sanders was vice president of marketing for the New York Knickerbockers, an NBA basketball team owned by Madison Square Garden (MSG). She was responsible for all aspects of the Knicks' marketing and media efforts, and she had access to confidential MSG financial and business proprietary material. When she was hired, Browne Sanders signed a copy of MSG's Confidentiality, Code of Business Conduct and Proprietary Property Agreement, which provided that during her employment, she may not engage in activities or have personal or financial interests that may impair, or appear to impair, her independence or judgment or otherwise conflict with her responsibilities to MSG. She also signed MSG's Employee Code of Conduct, which stated that "public trust and confidence are the greatest assets held by MSG."

In 2002, Browne Sanders was promoted to senior vice president, marketing and business operations, and her responsibilities expanded to include, among other things, oversight of the marketing and business operations budget. Browne Sanders remained in that position until she was fired in January 2006. Her total compensation for just over five years of employment with the Knicks exceeded \$1,100,000. Shortly after being fired, Browne Sanders sued MSG and Knicks head coach and president, Isiah Thomas, among others, alleging that she was discriminated against on the basis of her sex and terminated in retaliation for her sexual harassment complaint against MSG and Thomas.

MSG obtained copies of Browne Sanders's federal, New York, and New Jersey tax returns for 2000–2005. The 2001–2004 returns included Schedule C deductions for the expenses of a "direct marketing" business, totaling approximately \$73,000, seeming to indicate that she had conducted her own business on the side while working for the Knicks or that she had illegally deducted personal expenses as business expenses on her tax returns. Browne Sanders denied that she operated her own direct marketing business while working for the Knicks and claimed that the Schedule C deductions were due to accountant error and not a deliberate attempt to commit tax fraud. She filed amended tax returns for 2003 and 2004 that removed the Schedule C deductions. She did not amend the 2000 and 2001 tax returns on the advice of her current accountant, who informed her that there is a three-year statute of limitations for amending tax returns.

MSG counterclaimed against Browne Sanders for breach of fiduciary duty, claiming that she had breached her duty either by operating an outside business or by committing tax fraud while employed at MSG. MSG argued that under the faithless servant doctrine, it may recover all compensation paid to Browne Sanders while she was committing tax fraud or secretly operating an unauthorized direct marketing business while employed by MSG. MSG sought to amend its answer to Browne Sanders's complaint to include the faithless servant claim.

Lynch, District Judge

The faithless servant doctrine provides that an agent is obligated to be loyal to his employer and is prohibited from acting in any manner inconsistent with his agency or trust and is at all times bound to exercise the utmost good faith and loyalty in the performance of his duties. To show a violation of the faithless servant doctrine, an employer must show (1) that the employee's disloyal activity was related to the performance of his duties, and (2) that the disloyalty permeated the employee's service in its most material and substantial part.

Thus, the faithless servant doctrine, like the traditional fiduciary duty standard, is limited to matters relevant to affairs entrusted to the employee. However, unlike a traditional breach of fiduciary duty claim, which requires a showing of actual damages, to prove a violation of the faithless servant doctrine, an employer is not required to show that it suffered provable damage as a result of the breach of fidelity by the agent.

Here, MSG claims that Browne Sanders's tax returns show that she was either operating an outside business or that she committed tax fraud while employed at MSG. However, neither

operating an outside business nor unethical conduct unrelated to employment violates the faithless servant doctrine unless such business or behavior adversely affects the employee's job performance. MSG neither claims nor has provided any evidence that Browne Sanders's alleged misconduct hurt her job performance.

Under MSG's interpretation of the faithless servant doctrine, an employee breaches her duty of loyalty any time she engages in conduct that is not condoned by her employer or that violates her employer's ethical standards, regardless of whether the employee's conduct was related to her job performance. However, the purpose of the doctrine is not to dissolve the well-established boundaries of an employee's fiduciary duty, but to provide a remedy for an employer if an employee breaches that duty and it is difficult to prove that harm resulted from the breach or the employee realizes no profit through the breach. *Restatement (Third) of Agency*, § 8.01 (2006). While employers may contractually obligate employees to act in an ethical manner, and condition continued employment on compliance with that requirement, an employee's alleged violation

of that requirement does not result in a violation of the faithless servant doctrine unless the employee's unethical conduct materially and substantially infringed on her job performance. A faithless servant doctrine read as broadly as urged by MSG would allow an employer to sue an employee if the employee engaged in any conduct that fell short of the employer's ethical standards, no matter how disconnected to the employer's business the employee's misconduct might have been, simply because the employee's private misbehavior might reflect poorly on her employer.

MSG conspicuously fails to identify any way in which it suffered any such damage. As noted, it does not identify any way in which her alleged derelictions affected Browne Sanders's performance of her duties. Nevertheless, having ac-

cepted the fruits of Browne Sanders's labor for five years, MSG argues that it is entitled to obtain those fruits for free by forcing the forfeiture of all of Browne Sanders's pay for her entire period of employment. The remedies of the faithless servant doctrine are drastic, and appropriately so where the doctrine applies. An employee who works to undermine or covertly compete with her employer cannot be permitted to retain the benefits of an agency relationship she has betrayed. An employee who violates an incidental work rule, however, or who cheats the government out of taxes due, may have to respond in damages for breach of contract, but need not forfeit her entire salary.

MSG's motion to amend its answer denied.

Duties of Principal to Agent

If an agency is formed by a written contract, the contract normally states the duties the principal owes the agent. In addition, the law implies certain duties from the existence of an agency relationship, however formed. The most important of these duties are the principal's obligations to **compensate** the agent, to **reimburse** the agent for money spent in the principal's service, and to **indemnify** the agent for losses suffered in conducting the principal's business. These duties generally can be eliminated or modified by agreement between the parties.

Duty to Compensate Agent If the agency contract states the compensation the agent is to receive, it usually controls questions about the agent's pay. In other cases, the relationship of the parties and the sur-

rounding circumstances determine whether and in what amount the agent is to be compensated. Where compensation is due but its amount is not expressly stated, the amount is the market price or the customary price for the agent's services or, if neither is available, their reasonable value.

Sometimes an agent's compensation depends on the accomplishment of a specific result. For instance, an investment banker may be retained on a contingent fee basis to find a buyer for its client's product line and be compensated with a percentage of the purchase price. In such cases, the agent is not entitled to compensation unless he achieves the result within the time stated or, if no time is stated, within a reasonable time. This is true no matter how much effort or money the agent expends. However, the principal must cooperate with the agent in achieving the result and must not do anything to frustrate

The Global Business Environment

While all modern nations regulate the relationship of agents and principals, associations of professional agents often reinforce or augment these legal duties with codes of ethics. For the real estate industry, you can find codes of ethics in 23 countries at the Web site of the International Consortium of Real Estate Associations, www.worldproperties.com.

Excerpts from the Code of Ethics of the Italian Federation of Real Estate Agents are below. Note how the listed rules relate to the agent's fiduciary duties we have studied.

- The Professional Real Estate Agent must know the real estate market and its development as well as the laws and regulations that govern his own activity.
- The Real Estate Agent must gather for any of his assignments all useful information in order to accomplish his task.
- The Real Estate Agent must not intermingle his own assets with the money received by a third party.
- The Real Estate Agent entrusted with the task of managing property must agree with the Client in advance on the amount of the compensation to be given to him and may not accept any amount of money from a third party at any time.
- The Real Estate Agent must examine the assignment entrusted to him and inform the Client of all the difficulties of the transaction.

the agent's efforts. Otherwise, the agent is entitled to compensation despite the failure to perform as specified.

A principal generally is not required to pay for undertakings that she did not request, services to which she did not consent, and tasks that typically are undertaken without pay. Also, a principal usually need not compensate an agent who has materially breached the agency contract or has committed a serious breach of a fiduciary duty, as the *Sanders* case on page 905 pointed out. Of course, there is no duty to compensate a gratuitous agent.

An agent's duties to a subagent are the same as a principal's duties to an agent. If there is no agreement to the contrary, however, the original principal has no contractual liability to a subagent. For example, such a principal normally is not obligated to compensate a subagent. But a principal must reimburse and indemnify subagents as he would agents.

Duties of Reimbursement and Indemnity

If an agent makes expressly or impliedly authorized expenditures while acting on the principal's behalf, the agent normally is entitled to **reimbursement** for those expenditures. Unless otherwise agreed, for example, an agent requested to make overnight trips as part of his agency duties can recover reasonable transportation and hotel expenses.

A principal's duty of reimbursement overlaps with her duty of **indemnity**. Agency law implies a promise by the principal to indemnify an agent for losses that result from the agent's authorized activities. These include authorized payments made on the principal's behalf and payments on contracts on which the agent was authorized to become liable. A principal may also have to indemnify an agent if the agent's authorized acts constitute a breach of contract or a tort for which the agent is required to pay damages to a third party.

So long as the principal did not benefit from such behavior, however, he is *not* required to indemnify an agent for losses resulting (1) from unauthorized acts, or (2) solely from the agent's negligence or other fault. Even where the principal directed the agent to commit a tortious act, moreover, there is no duty to indemnify if the agent knew the act was tortious. But the principal must indemnify the agent for tort damages resulting from authorized conduct that the agent did not believe was tortious. For example, if a principal directs his agent to repossess goods located on another's property and the agent, believing her acts legal, becomes liable for conversion or trespass, the principal must indemnify the agent for the damages the agent pays.

Termination of an Agency

An agency can terminate in many ways that fall under two general headings: (1) termination by act of the parties, and (2) termination by operation of law.

Termination by Act of the Parties Termination by act of the principal and/or agent occurs:

1. *At a time or upon the happening of an event stated in the agreement.* If no such time or event is stated, the agency terminates after a reasonable time.
2. *When a specified result has been accomplished, if the agency was created to accomplish a specified result.* For example, if an agency's only objective is to sell certain property, the agency terminates when the property is sold.
3. *By mutual agreement of the principal and the agent, at any time.*
4. *At the option of either party.* This is called **revocation** when done by the principal and **renunciation** when done by the agent. Revocation or renunciation occurs when either party manifests to the other that he does not wish the agency to continue. This includes conduct inconsistent with the agency's continuance. For example, an agent may learn that his principal has hired another agent to perform the same job.

A party can revoke or renounce even if doing so violates the agency agreement. Although either party has the *power* to terminate in such cases, there is no *right* to do so. This means that where one party terminates in violation of the agreement, she need not perform any further, but she may be liable for damages to the other party. A gratuitous agency normally is terminable by either party without liability. Also, the terminating party is not liable when the revocation or renunciation is justified by the other party's serious breach of a fiduciary duty.

Termination by Operation of Law Termination by operation of law usually involves situations where it is reasonable to believe that the principal would not wish the agent to act further, or where accomplishment of the agency objectives has become impossible or illegal. Although courts may recognize exceptions in certain cases, an agency relationship usually is terminated by:

1. *The death of an individual principal.* Under the *Restatement (Third) of Agency*, this termination is effective only when the agent has notice of the principal's death.

2. *The death of an individual agent.*

3. *The principal's permanent loss of capacity.* This is a permanent loss of capacity occurring after creation of the agency—most often, due to the principal's insanity. The principal's permanent incapacity ends the agency even without notice to the agent. The *Trepanier* case, which follows, presents one approach to a related problem: the principal's temporary incapacity.

4. *The agent's loss of capacity to perform the agency business.* The scope of this basis for termination is unclear. As Chapter 36 states, an agent who becomes insane or otherwise incapacitated after the agency is formed still can bind his principal to contracts with third parties. Thus, it probably makes little sense to treat the agency as terminated in such cases. As a result, termination under this heading may be limited to such situations as the loss of a license needed to perform agency duties.

5. *The cessation of existence or suspension of power of an agent or principal that is not an individual, such as the dissolution of a corporation or partnership.*

6. Under the *Restatement (Third) of Agency*, upon the occurrence of circumstances from which the agent should reasonably conclude that the principal no longer would want the agent to take action for the principal.

7. *Changes in the value of the agency property or subject matter* (e.g., a significant decline in the value of land to be sold by an agent).

8. *Changes in business conditions* (e.g., a much lower supply and a much increased price for goods to be purchased by an agent).

9. *The loss or destruction of the agency property or subject matter or the termination of the principal's interest therein* (e.g., when a house to be sold by a real estate broker burns down or is taken by a mortgage holder to satisfy a debt owed by the principal).

10. *Changes in the law that make the agency business illegal* (e.g., when drugs to be sold by an agent are banned by the government).

11. *The principal's bankruptcy*—as to transactions the agent should realize the principal no longer desires. For example, consider the likely effect of the principal's bankruptcy on an agency to purchase antiques for the principal's home versus its likely effect on an agency to purchase necessities of life for the principal.

12. *The agent's bankruptcy*—where the agent's financial condition affects his ability to serve the principal. This

could occur when an agent is employed to purchase goods on his own credit for the principal.

13. *Impossibility of performance by the agent.* This covers various events, some of which fall within the categories just stated. The *Restatement's* definition of impossibility, for example, includes (a) destruction of the agency subject matter, (b) termination of the principal's interest in the agency subject matter (as, for example, by the principal's bankruptcy), and (c) changes in the law or in other circumstances that make it impossible for the agent to accomplish the agency's aims.

14. *A serious breach of the agent's duty of loyalty.*

15. *The outbreak of war*—when this leads the agent to the reasonable belief that his services are no longer desired. An example might be the outbreak of war between the principal's country and the agent's country.

Termination of Agency Powers Given as Security

An agency power given as security for a duty owed by the principal, sometimes called an **agency coupled with an interest**, is an exception to some of the termination rules just discussed. Here, the agent has an interest in the subject matter of the agency that is distinct from the principal's interest and that is not exercised for the principal's benefit. This interest exists to benefit the agent or a third person by securing performance of an obligation owed by the principal. A common example is a **power of sale**, a secured loan agreement authorizing a lender (the agent) to sell property used as security if the borrower (the principal) defaults. For instance, suppose that Allen lends Peters \$500,000 and Peters gives Allen a lien or security interest on Peters's land to secure the loan. The agreement might authorize Allen to act as Peters's "agent" to sell the land if Peters fails to repay the loan.

Because the power given the "agent" in such cases is not for the principal's benefit, it sometimes is said that an agency coupled with an interest is not truly an agency. In any event, courts distinguish it from genuine agency relations in which the agent is compensated from the profits or proceeds of property held for the principal's benefit. For example, if an agent is promised a commission for selling the principal's property, the relationship is not an agency coupled with an interest. Here, the power exercised by the agent (selling the principal's property) benefits the principal.

Why is the agency coupled with an interest important? The main reason is that it is not terminated by (1) the principal's revocation, (2) the principal's or the

agent's loss of capacity, (3) the agent's death, and (4) (usually) the principal's death. However, unless an agency coupled with an interest is held for the benefit of

a third party, the agent can voluntarily surrender it. Of course, an agency coupled with an interest terminates when the principal performs her obligation.

Trepanier v. Bankers Life & Casualty Co.

706 A.2d 943 (Vt. Sup. Ct. 1997)

On March 2, 1993, Bankers Life & Casualty Co. proposed in a letter addressed to Gaston Trepanier that he accept a lump sum settlement of \$20,000 in exchange for release from a disability income policy that paid him a \$400-a-month benefit. The letter stated that should Mr. Trepanier decide "to accept our offer," he could "jot a note at the bottom of this letter and return it." According to Mrs. Clemence Trepanier, she discussed the idea with her husband, who decided to accept the offer and directed her to write a note on the bottom of the March letter as directed. She did so on April 6, and placed the letter in an envelope, intending to send it the following day. On April 7, Mr. Trepanier was hospitalized and the letter was not mailed. Mr. Trepanier fell into a coma on April 8. On April 12, Mrs. Trepanier tried to accept the offer by mailing the letter to Bankers Life. On April 14, Mr. Trepanier died. Bankers Life subsequently revoked its offer and issued a final disability payment.

Clemence Trepanier then filed a breach-of-contract action against Bankers Life on behalf of her husband's estate, alleging that a valid contract had been formed when she accepted the \$20,000 offer on her husband's behalf. Mrs. Trepanier moved for partial summary judgment on the issue of whether a binding contract had been formed. In response, Bankers Life filed a cross-motion for summary judgment, arguing that Clemence Trepanier's authority to act as agent for her husband terminated when he lapsed into a coma on April 8, four days before she mailed the acceptance. The trial court denied Clemence's motion and entered a summary judgment in favor of Bankers Life. Clemence appealed, eventually to the Supreme Court of Vermont.

By the Court

The sole issue on appeal is whether Mrs. Trepanier's agency terminated when Mr. Trepanier lapsed into a coma on April 8. The general rule is that an agency terminates with the death or permanent incapacity of the principal. Mrs. Trepanier argues that her power of agency was coupled with an interest, an exception to the general rule which allows the agency to survive the death or permanent incapacity of the principal. We need not decide whether Mrs. Trepanier's agency fits within this exception, however, for an individual in a comatose state is generally not considered to be permanently incapacitated under general agency principles. The rule has been stated as follows: "A comatose person is mentally incompetent while his coma continues and . . . when an agent under a power of attorney acts during the mental incapacity of a principal who has not been adjudicated incompetent and for whom no court-appointed committee or conservator has been designated, the act is at most voidable,

and not void." This rule is predicated on the view that comatose individuals are only temporarily incapacitated, as they may recover, and acts by individuals temporarily incapacitated are at most voidable. With respect to such voidable contracts, the power to affirm or disaffirm rests solely with the principal or an authorized representative, which can include the estate of the principal. The contract here was not voided by Mr. Trepanier, and there is no claim or evidence that he would have done so prior to his death.

We hold, therefore, that the trial court erred in concluding as a matter of law that Mrs. Trepanier's agency terminated when Mr. Trepanier lapsed into a coma, and in entering summary judgment on this basis.

Summary judgment in favor of Bankers Life reversed; case remanded to the trial court.

Effect of Termination on Agent's Authority Sometimes former agents continue to act on their ex-principals' behalf even though the agency has ended. Once an agency terminates by any of the means just described, the agent's *express* and *implied* authority end as well. Nonetheless, such "ex-agents" may retain *apparent authority* to bind their former principals.

Third parties who are unaware of the termination may reasonably believe that an ex-agent still has authority. To protect third parties who rely on such a reasonable appearance of authority, an agent's *apparent authority* often persists after termination. Thus, a former agent may be able to bind the principal under his apparent authority even though the agency has ended. But apparent

authority ends where the termination was caused by (1) the principal's death, (2) the principal's loss of capacity, or (3) impossibility. Note from the previous discussion that certain other bases for termination may also end the agent's apparent authority because they fit within the broad category of impossibility.

Notice to Third Parties Apparent authority also ends when the third party receives appropriate notice of the termination. In general, any facts known to the third party that reasonably indicate the agency's termination constitute suitable notice. Some bases for termination by operation of law (e.g., changed business conditions) may provide such notice.

To protect themselves against unwanted liability, however, prudent principals may want to notify third parties themselves. The required type of notification varies with the third party in question.

1. For third parties who have previously dealt with the agent or who have begun to deal with the agent, **actual notification** is necessary. This can be accomplished by (1) a direct personal statement to the third party; or (2) a writing delivered to the third party personally, to his place of business, or to some other place reasonably believed to be appropriate.

2. For all other parties, **constructive notification** suffices. Usually, these other parties are aware of the agency but did no business with the agent. Constructive notification normally can be accomplished by advertising the agency's termination in a newspaper of general circulation in the place where the agency business regularly was carried on. If no suitable publication exists, notification by other means reasonably likely to inform third parties—for example, posting a notice in public places or at a Web site—may be enough.

You can check out a career in the agency industry at the William Morris Agency Web site. WMA is the oldest and largest talent and literary agency in the world. Its business includes securing concert gigs for musicians and speaking engagements for authors. WMA clients include actor Tommy Lee Jones, director Spike Lee, musician Alicia Keys, and comedienne Margaret Cho.

Problems and Problem Cases

1. When Del-Mar Development Corp. failed to pay real estate taxes on an office building it owned, the building was seized by tax authorities and sold to pay the taxes. The purchaser was Euclid Plaza Associates, LLC. The sale was not valid, however, until approved by a court. After the sale and before the court's approval of the sale, Del-Mar agreed to a three-year lease of the building with African American Law Firm LLC (AALF), which immediately began paying rent of \$1,500 per month to Del-Mar. After the court approved the sale, Euclid claimed it was not bound by the lease made by Del-Mar with AALF. Euclid wanted to evict AALF unless it paid \$2,033 in monthly rent. Was Del-Mar acting as Euclid's agent within Del-Mar's actual and apparent authority when Del-Mar leased the building to AALF?
2. Karsten was hired as an outside sales agent by Ling Company, a manufacturer of golf equipment and accessories. Karsten's duties required him to visit golf pro shops at golf courses and other golf equipment

and accessory retailers. It was common for an outside sales agent in Karsten's position to have the power to make contracts to sell any item in his employer's line of products. However, Ling Company instructed Karsten that he could not contract to sell any Ling golf shoes without first getting permission from Ling's vice president of sales, Perez. Ling imposed this limit on Karsten's authority, because Ling was temporarily having problems getting shipments of golf shoes from its supplier in China. Neither Ling nor Karsten, however, had informed pro shops or retailers of the limitation on Karsten's authority. Nonetheless, Karsten, anxious to make a big sale, made a contract to sell 700 pairs of Ling golf shoes to Pro Golf Company. Was Ling bound to this contract with Pro Golf Company?

3. Circle C Investments operated two nightclubs featuring topless dancers. The secretary of labor sued to compel Circle C to comply with the minimum-wage and maximum-hours provisions of the Fair Labor Standards Act, which applies only to employees, not independent contractors. Circle C required the

dancers to comply with weekly work schedules, to charge at least \$10 for table dances and \$20 for couch dances, and to mingle with customers when not dancing. Circle C enforced the rules by fining infringing dancers. Dancers supplied their own costumes and padlocks for personal lockers. One dancer spent \$600 per month on costumes, but another spent only \$40 per month. A dancer's initiative, hustle, and costume contributed significantly to her tips. Circle C was responsible for advertising the club, choosing its location, and business hours, creating club aesthetics, and establishing a food and beverage menu, all of which attracted customers to the club. Dancers did not need long training or highly developed skills to dance at the club. Most dancers had a short-term relationship with Circle C. Were the dancers employees or independent contractors for purposes of the Fair Labor Standards Act?

4. Merrill Lynch, the investment firm, hired Elliot Jarvin as Director of Wealth Management Services. His duties included managing a team of 10 wealth managers who advised Merrill Lynch clients regarding their investment portfolios. When Jarvin joined Merrill Lynch, he brought with him 15 very wealthy clients to whom he provided investment services on behalf of Merrill Lynch. Unknown to Merrill Lynch, Jarvin had five additional clients, the five wealthiest of his clients. Jarvin continued to advise these clients on his own, retaining for himself all fees he charged for services provided to the five clients. In addition, to help him service the five personal clients, two members of his Merrill Lynch wealth management team frequently met with Jarvin's five personal clients to create investments plans for them. Has Jarvin breached a fiduciary duty owed to Merrill Lynch?
5. In July 1987, Marsha Levin bought her daughter a round-trip plane ticket from New York City to Paris from Kasmir World Travel, Inc. Upon arriving in Paris, Mrs. Levin's daughter was denied entry and was placed on the next return flight to the United States because she did not have a visa. The apparent reason for the visa requirement was the French government's effort to deal with terrorist activities directed at Americans abroad. Neither Mrs. Levin nor her daughter was aware of the requirement; indeed, a few years earlier Mrs. Levin had traveled to France without being required to present a visa. Did Kasmir breach its duty to notify the Levins about matters relevant to the agency business?
6. When Perry Olsen died, his children placed his ranch in Vail, Colorado, for sale. Perry's children retained Vail Associates Real Estate, a real estate broker, to sell the land for them. Vail Associates introduced the children to Magnus Lindholm, who wanted to buy Perry's ranch along with adjacent land owned by Perry's children. The children eventually decided to sell only Perry's ranch and not the children's land. Their asking price for Perry's ranch was \$400 per acre. Before committing to buying Perry's ranch (because he needed more land), Lindholm asked Vail Associates to introduce him to Del Rickstrew, whose land also abutted Perry's ranch. Rickstrew refused to negotiate the sale through a real estate agent, so Lindholm negotiated directly with Rickstrew. Vail Associates did, however, introduce Rickstrew to Lindholm and provide a model contract to Lindholm. A month later, Lindholm agreed to buy Rickstrew's land for \$6,000 per acre, subject to his buying Perry's ranch also. Vail Associates was not aware that Lindholm and Rickstrew had a contract or that the price was \$6,000 per acre. Two months later, with Vail Associates' assistance, the children sold Perry's ranch to Lindholm for \$400 per acre. Vail Associates received a commission from the sale. When the children discovered later that Rickstrew received 15 times as much for his acreage as did they for Perry's ranch, they sued Vail Associates for failing to disclose material information, that is, that Lindholm was negotiating with Rickstrew. Did Vail Associates breach a fiduciary duty?
7. When Nitrogen Media was acquired by General Electric's NBC Universal unit, Nitrogen's Vice President of Finance, Babs Grogan, was terminated as a Nitrogen employee, but hired by NBCU as an outside consultant. The term of Grogan's contract was three months, and her engagement with NBCU required her to assess business opportunities presented to NBCU, such as the financial value of newly created television shows. Grogan represented to NBCU that she had an MBA degree in finance and six years of experience in financial analysis. In fact, Grogan had falsified her academic record and possessed only an undergraduate degree in political science. In addition, she had no experience as a financial analyst, having delegated such work to co-workers for the past six years, although she took credit for their work. When NBCU asked Grogan to value the new TV show *Car Shop*, she delegated the task in part to

a new MBA graduate, Roger Harvey, who was recently hired by NBCU and had virtually no on-the-job experience. As a result, Grogan and Harvey failed to perform a reasonable investigation into the facts regarding the TV show's value and to use appropriate valuations tools. Did Grogan and Harvey breach their fiduciary duty?

8. Lawrence is a clothing buyer for Federal Department Stores, a general merchandise retailer. Over the past five years, Lawrence has bought 75 percent of Federal's inventory of men's and women's denim pants from Worldwide Jeans Co. and 15 percent from Oskash Corp. Wanting to increase its sales of denim pants to Federal, Oskash contacts Lawrence and offers to sell 40,000 pairs of jeans to Federal for \$320,000 and to make a contribution of \$5,000 to the college education fund that Lawrence has established for his children. Should Lawrence accept this offer from Oskash?
9. Marjorie and Randall Bender owned a ranch they wished to sell, so they hired Johnson Realty as the listing agent. Johnson Realty found a buyer of the ranch, who relied on a brochure describing the ranch and its historic crop yields. The Benders authorized the production and distribution of the brochure by Johnson Realty. The buyer later sued Johnson Realty and the Benders on the grounds that the crop yields in the brochure were inflated. Although Johnson Realty and the Benders won that case, Johnson Realty suffered the expense of legal fees and other legal costs amounting to \$45,000. On what grounds did Johnson Realty attempt to recover those costs from the Benders?
10. Brenda Smith was injured by a falling ceiling in a building owned by the Cynfax Corporation. She retained Floyd Goldsman as her attorney, and Goldsman

sued Cynfax on her behalf. On February 4, Cynfax's insurer, the Cumberland Mutual Fire Insurance Company, made Smith a \$7,000 settlement offer through Goldsman. Goldsman immediately tried to inform Smith of the offer, but learned that she had died two days earlier on February 2. Later, Goldsman accepted Cumberland's offer to Smith. Did he have authority to do so? In answering this question, consider whether we have an agency coupled with an interest here, and why it would matter if we did.

Investment Advisers' Fiduciary Duty

Conflicts of interest are a concern in the securities industry when securities brokers and investments advisers create investment plans and recommend securities purchases to their customers. Search the Internet for the Web site of the North American Securities Administrators Association. Find the Investment Adviser Guide. Scroll down and read the Fiduciary Duty section. Note how these duties reflect the fiduciary duties you studied in this chapter.

You Be the Judge

Consider completing the case "AGENCY: Duped by Duplication" from the You Be the Judge Web site element after you have read this chapter. Visit our Web site at www.mhhe.com/mallor14e for more information and activities regarding this case segment.

chapter 36

THIRD-PARTY RELATIONS OF THE PRINCIPAL AND THE AGENT

You are vice president of acquisitions for a medium-sized consumer food products company, Bon Vivant Foods, Inc. The company's board of directors has given you authority to negotiate acquisitions of consumer food brands on behalf of Bon Vivant. The board has told you in written and oral instructions that you have the power to acquire any consumer products brand if the acquisition price is not greater than \$30,000,000, which is the authority typically held by most vice presidents of acquisitions for businesses like yours. The board's written instructions also indicate, however, that you have no authority to purchase or negotiate the purchase of a cola drink brand. Others in your position in the consumer food industry typically have authority to purchase a cola drink brand for their companies. The board also tells you that the company wants to buy the Eddie's ice cream brand from its owner, Eddie Ghahraman, at a price not greater than \$28,000,000. The board is fearful, however, that if Eddie knows the company wants to buy the Eddie's ice cream brand, he will demand a higher price. The board tells you, therefore, not to disclose to Eddie that you are buying for Bon Vivant, and instead to make it appear that you are buying for your own company. They suggest you make up a name for this fictitious company. You decide to use the name LHIW, Inc.

Assess the risks to you and Bon Vivant. Consider the following questions:

- If you make a contract in the name of Bon Vivant to buy a snack-cracker brand for \$15,000,000, will Bon Vivant be bound on that contract?
- If you make a contract in the name of Bon Vivant to buy a cola brand for \$13,500,000, will Bon Vivant be bound on that contract?
- If you make a contract in the name of Bon Vivant to buy an organic canned soup brand for \$40,000,000, will Bon Vivant be bound on that contract? Will Bon Vivant be bound on that contract if you present the contract to the board, the board decides to accept the contract, and then the board later rejects the contract as too costly?
- Suppose you make a contract for Bon Vivant to purchase the Eddie's ice cream brand for \$26,200,000. The contract is signed by Eddie. You sign LHIW's name and also your own name as agent for LHIW. Who is liable on that contract?

BY LETTING PRINCIPALS CONTRACT through their agents and thereby multiply their dealings, agency law stimulates business activity. For this process to succeed, there must be rules for determining when the principal and the agent are liable on the agent's contracts. Principals need to predict and control their liability on agreements their agents make. Also, third parties need

assurance that such agreements really bind the principal. Furthermore, both agents and third parties have an interest in knowing when an agent is bound on these contracts. The first half of this chapter discusses the principal's and the agent's contract liability.

While acting on the principal's behalf, agents sometimes harm third parties. Normally, this makes the agent

liable to the injured party in tort. Sometimes, moreover, a principal is liable for his agent's torts. Because tort judgments can be expensive, the rules for determining the principal's and the agent's tort liability are of great concern to principals, their agents, and third parties. Thus, we examine these subjects in this chapter's second half.

The law in this chapter, as in Chapter 35, reflects the rules of the *Restatement (Second) of Agency* and the *Restatement (Third) of Agency*. Adopted in 2006, the *Restatement (Third)* will soon be the dominant law of agency in the United States. The two versions of the *Restatement* are largely similar. When they differ, the rule of the *Restatement (Third)* will usually be the only rule discussed in this chapter.

Contract Liability of the Principal

A principal normally is liable on a contract made by his agent if the agent had **express, implied, or apparent authority** to make the contract. Yet even when the agent lacks authority to contract, a principal may bind herself by later **ratifying** a contract made by an unauthorized agent.

Express Authority **Express authority** is created by a principal's *words* to his agent, whether written or spoken, and by the principal's other conduct. Thus, an agent has express authority to bind her principal to a contract if the principal clearly told the agent that she could make that contract on the principal's behalf. Express authority is part of an agent's **actual authority**. For example, suppose that Microsoft instructs its agent Gates to contract to sell a Windows XT software license for \$400 or more. If Gates contracts to sell the software license to Dell for \$425, Microsoft is liable to Dell on the basis of Gates's express authority. However, Gates would not have express authority to sell the software license for \$375 or to sell a different software license.

Implied Authority Often it is difficult for a principal to specify his agent's authority completely and precisely. Thus, agents can also bind their principals on the basis of the agent's **implied authority**. An agent generally has implied authority to do whatever it is reasonable to assume that his principal wanted him to do, in light of the principal's manifestations to the agent and the principal's objectives of the agency. Relevant factors include the principal's express statements, the nature of the agency, the acts reasonably necessary to carry on the agency business, the acts customarily done when

conducting that business, and the relations between principal and agent.

Implied authority usually derives from a grant of express authority by the principal and is part of an agent's actual authority. On occasion, however, implied authority may exist even though there is no relevant grant of express authority. Courts generally derive implied authority from the nature of the agency business, the relations between principal and agent, customs in the trade, and other facts and circumstances. There may be implied authority to make a certain contract if the agent has made similar past contracts with the principal's knowledge and without his objection or if the agent's position usually gives an agent the power to make a certain contract.

No matter what its source, an agent's implied authority cannot contradict the principal's express statements. Thus, there is no implied authority to contract when a principal has limited her agent's authority by express statement or clear implication and the contract would conflict with that limitation. But as we will see, apparent authority may still exist in such cases.

Examples of Implied Authority Courts have created general rules or presumptions for determining the implied authority of certain agents in certain situations. For example:

1. An agent hired to *manage a business* normally has implied authority to make contracts that are reasonably necessary for conducting the business or that are customary in the business. These include contracts for obtaining equipment and supplies, making repairs, employing employees, and selling goods or services. However, a manager ordinarily has no power to borrow money or issue negotiable instruments in the principal's name unless the principal is a banking or financial concern regularly performing such activities.
2. An agent given *full control over real property* has implied authority to contract for repairs and insurance and may rent the property if this is customary. But such an agent may not sell the property or allow any third-party liens or other interests to be taken on it.
3. Agents appointed to *sell the principal's goods* may have implied authority to make customary warranties on those goods. In states that still recognize the distinction, a general agent described in Chapter 35 is more likely to have such authority than a special agent.

Apparent Authority **Apparent authority** arises when the principal's behavior causes a third party to form a reasonable belief that the agent is authorized to

The Global Business Environment

Electronic Agents

In the Internet Age, evolving business practices show an increasing use of software programs known as electronic agents in e-commerce transactions. A common definition of an electronic agent is a computer program or an electronic or other automated means used to initiate an action or to respond to electronic messages without review by an individual.

In the legal context, an electronic agent can be an automated means for making or performing contracts. In automated transactions, an individual does not deal with another individual, but one or both parties are represented by electronic agents. You have probably dealt with an electronic agent if you have ordered books, CDs, airline tickets, and other goods and services from an Internet site like Amazon.com.

The legal relationship between the principal and the automated agent is not fully equivalent to common law agency, but takes into account that the electronic agent is not a human actor. Nonetheless, parties who employ or deal with electronic agents are ordinarily bound by the results of their operations.

Most modern countries have laws that indicate when a person can be bound by the action of its electronic agent. In the United States, the Uniform Computer Information Transactions Act (2002) recognizes the ability of electronic agents to bind their principals, even if no individual is aware of or reviews the agent's operation or the results of the operation. Under the Philippines' Electronic Commerce Act, a contract may not be denied legal validity solely because it was created using an electronic agent, provided the electronic agent is under the control of or its actions attributable to the person sought to be bound. India's Electronic Commerce Act states that a contract may be formed between an individual and an electronic agent if the individual has reason to know she is dealing with an electronic agent. In Canada, the Uniform Electronic Commerce Act permits contracts to be formed by electronic agents, but if an individual deals with an electronic agent and makes an error, the individual will not be bound on the contract if the electronic agent provided no opportunity to correct the error and the individual immediately notifies the other party of the error.

act in a certain way. In other words, apparent authority is based on (1) *manifestations by the principal* to the third party (2) that cause the *third party* to *believe reasonably* that the agent has such authority. Background factors such as trade customs and established business practices often determine whether it is reasonable for the third party to believe that the agent has authority. In other words, apparent authority exists because it *appears* that the agent may act for the principal, based on what the principal has manifested to the third party.

Principals can give their agents apparent authority through the statements they make, or tell their agents to make, *to third parties* and through the actions they knowingly allow their agents to take *with third parties*. Thus, a principal might create apparent authority by telling a third party that the agent has certain authority or by directing the agent to do the same. A principal might also create apparent authority by appointing his agent to a position that customarily involves the authority to make certain contracts. For instance, if Exxon makes Alba its gasoline sales agent, and if that position customarily involves the power to sell gasoline, Alba would have apparent authority to sell gasoline. Here, Exxon's behavior in appointing Alba to the position of gasoline sales agent, as reasonably interpreted in light of business customs, gives Alba apparent authority. However, because agents cannot give themselves apparent authority, there would

be no such authority if, without Exxon's knowledge or permission, Alba falsely told third parties that he had been promoted to gasoline sales agent.

Apparent authority protects third parties who reasonably rely on the principal's manifestations that the agent has authority. It assumes special importance in cases where the principal has told the agent not to make certain contracts that the agent ordinarily would have actual authority to make, but the third party knows nothing about this limitation and has no reason to know about it. Suppose that Prince employs Arthur as general sales agent for its tennis racquet manufacturing business. Certain warranties customarily accompany the racquets Prince sells, and agents like Arthur ordinarily are empowered to give these warranties. But Prince tells Arthur not to make any such warranties to buyers, thus cutting off Arthur's express and implied authority. Despite Prince's orders, however, Arthur makes the usual warranties in a sale to Modell, who is familiar with customs in the trade. If Modell did not know about the limitation on Arthur's authority, Prince is bound by Arthur's warranties.

The following *Opp* case discusses whether an agent has express, implied, or apparent authority. Although decided under the *Restatement (Second) of Agency*, the case would have been resolved the same under the *Restatement (Third) of Agency*.

Opp v. Wheaton Van Lines, Inc.

231 F.3d 1060 (7th Cir. 2000)

Shelley Opp lived in California with her husband, Richard Opp, until they sought a divorce in August 1996. In June 1997, Ms. Opp contacted Soraghan Moving and Storage, an agent of Wheaton Van Lines, to move her personal property from California to Illinois. Ms. Opp told Soraghan she wanted to insure her property for its full value of \$10,000. Soraghan faxed to Ms. Opp an “Estimate/Order for Service” form which stated that Ms. Opp intended to declare that the value of the goods shipped was \$10,000. Ms. Opp signed the form. According to Soraghan, it explained to Ms. Opp that she or her representative must advise the mover at the time the shipment was picked up whether Ms. Opp would like full replacement coverage of \$10,000. According to Ms. Opp, she was never informed that the person releasing her property in California would have to sign anything, declare any value for her property, or do anything other than give the movers access to her belongings. The estimate form also provided a location where Ms. Opp could designate someone as her “true and lawful representative,” but she made no such designation.

On the day of the move, the movers in California called Ms. Opp in Illinois to tell her they would be late arriving at the California home due to a flat tire. Ms. Opp then phoned Mr. Opp at his office and asked him to go to the house, open the door, and let the movers in. Ms. Opp also told Soraghan that “someone” would be at the California home to give the movers access to her property. Mr. Opp met the movers at the house, and he signed the bill of lading on a line that indicated that he was Ms. Opp’s authorized agent, and he allegedly agreed to limit the carriers’ liability for her property at 60 cents per pound. Mr. Opp also signed an inventory of the property that indicated that he was its “owner or authorized agent.”

On July 8, 1997, the truck carrying Ms. Opp’s belongings was struck by a train, damaging most of her property. Ms. Opp inspected her damaged property and estimated its full replacement value to be over \$10,000. Soraghan claimed that its liability was limited by the bill of lading to \$2,625. Ms. Opp sued Soraghan and Wheaton to recover \$10,000 for property damage. The carriers moved for summary judgment, which the district court granted, finding that Mr. Opp had the actual and apparent authority to sign the bill of lading as Ms. Opp’s agent. Ms. Opp appealed.

Manion, Circuit Judge

An agent’s authority may be either actual or apparent, and actual authority may be express or implied. Only the words or conduct of the alleged principal, not the alleged agent, establish the actual or apparent authority of an agent. We first note that Mr. Opp never received the express authority to represent Ms. Opp and to limit the carriers’ liability. An agent has express authority when the principal explicitly grants the agent the authority to perform a particular act. There is no evidence that Ms. Opp explicitly granted authority to Mr. Opp to bind her to an agreement that limited the carriers’ liability for her goods. Ms. Opp never requested or intended Mr. Opp to do anything other than to open the door and allow the movers to remove her property.

We next determine whether Mr. Opp had the implied authority to limit the carriers’ liability. An agent has implied authority for the performance or transaction of anything reasonably necessary to effective execution of his express authority. *Restatement (Second) of Agency* § 35. Thus we must determine whether it was reasonably necessary for Mr. Opp to sign the bill of lading in order to execute his express authority to open the door to give the movers access to Ms. Opp’s property.

The carriers argue that because Ms. Opp allegedly knew that the bill of lading had to be signed when her property was picked up, but she arranged for Mr. Opp to be the only person present in California for the move, Ms. Opp’s request for

Mr. Opp to tender the goods to the movers also included the necessary authority for him to sign the bill of lading. But as noted above, Ms. Opp only told Mr. Opp to open the door. She made no request for him to sign anything, or to make any agreement as to the carriers’ liability. Ms. Opp also testified that she was never informed that the person releasing her property in California would have to sign a bill of lading and declare a value for her property. Moreover, it is unclear whether Mr. Opp ever inferred from Ms. Opp’s request that he was also authorized to limit the carriers’ liability, or whether he merely thought that he was signing forms to confirm that Ms. Opp’s goods were taken from the home. Thus we conclude that there is insufficient evidence to support a grant of summary judgment for the carriers on this issue.

We must then consider whether Mr. Opp had the apparent authority to sign the bill of lading and limit the carriers’ liability. Under the doctrine of apparent authority, a principal will be bound not only by the authority that it actually gives to another, but also by the authority that it appears to give. Apparent authority arises when a principal creates, by its words or conduct, the reasonable impression in a third party that the agent has the authority to perform a certain act on its behalf. Thus we must determine whether the evidence demonstrates that Ms. Opp’s words or conduct created a reasonable impression in the carriers that Mr. Opp had the authority to sign the bill of lading and limit their liability.

The carriers argue that they reasonably believed that Mr. Opp had the authority to sign the bill of lading because Ms. Opp allegedly knew that a bill of lading had to be signed when her goods were picked up, and she had also arranged for Mr. Opp to be the only person present at the California home to tender the goods. But material facts in the record also justify a reasonable inference that Mr. Opp did not have the apparent authority to limit the carriers' liability. It is undisputed that Ms. Opp told Soraghan that she wanted the full replacement value of \$10,000 on her goods, which is reflected on the Estimate/Order for Service form. Ms. Opp never designated a "lawful representative" on the space provided on the estimate form, and thus Soraghan's own form lacked any indication that Mr. Opp was her agent. And when the movers were delayed by a flat tire on their moving truck, they called to notify Ms. Opp in Illinois, not Mr. Opp in California. Additionally, Ms. Opp

testified that the carriers never informed her that the person releasing her property in California would have to sign anything, declare any value for her property, or do anything other than to give the movers access to her belongings, which indicates that the carriers could not reasonably conclude that she knew that the bill of lading had to be signed in California, and that Mr. Opp had that authority. And there is no evidence in the record that the carriers had any knowledge that Ms. Opp ever discussed the valuation of her property with Mr. Opp. We conclude, therefore, that summary judgment is precluded because the record provides sufficient evidence to enable a reasonable jury to find that Mr. Opp lacked the apparent authority to limit the carriers' liability.

Judgment reversed in favor of Ms. Opp. Remanded to the district court.

Agent's Notification and Knowledge

Sometimes the general agency rules regarding *notification* and *knowledge* affect a principal's contract liability. If a third party gives proper notification to an agent with actual or apparent authority to receive it, the principal is bound as if the notification had been given directly to him. Similarly, notification to a third party by an agent with the necessary authority is considered notification by the principal.

In certain circumstances, an agent's knowledge of facts is *imputed* to the principal. This means that the principal's rights and liabilities are what they would have been if the principal had known what the agent knew. Generally, an agent's knowledge is imputed to a principal when it is relevant to activities that the agent is authorized to undertake, or when the agent is under a duty to disclose the knowledge to the principal. Suppose that Ames, acting on behalf of Sony, contracts with Target. Ames knows that Target is completely mistaken about a matter material to the contract to purchase TVs. Even though Sony knew nothing about Target's unilateral mistake, Target probably can avoid its contract with Sony.

Ratification Ratification is a process whereby a principal binds himself to an unauthorized act done by an agent, or by a person purporting to act as an agent. Usually, the act in question is a contract. Ratification relates back to the time when the contract was made. It binds the principal as if the agent had possessed authority at that time.

Conduct Amounting to Ratification Ratification can be express or implied. An *express ratification* occurs when the principal communicates an intent to ratify by words, whether written or oral. *Implied ratification* arises when the principal's behavior evidences an intent to ratify. Examples include the principal's part performance of a contract made by an agent, or the principal's acceptance of benefits under such a contract. Sometimes even a principal's silence, acquiescence, or failure to repudiate the transaction may constitute ratification. This can occur when the principal would be expected to object if he did not consent to the contract, the principal's silence leads the third party to believe that he does consent, and the principal is aware of all relevant facts.

Additional Requirements Even if a principal's words or behavior indicate an intent to ratify, other requirements must be met before ratification occurs. These requirements have been variously stated; the following list is typical.

1. The act ratified must be one that was *valid* at the time it was performed. For example, an agent's illegal contract cannot be made binding by the principal's subsequent ratification. However, a contract that was voidable when made due to the principal's incapacity may be ratified by a principal who has later attained or regained capacity.
2. The principal must have been *in existence* at the time the agent acted. However, as discussed in Chapter 42, corporations may bind themselves to their promoters' *preincorporation* contracts by *adopting* such contracts.

3. When the contract or other act occurred, the agent must have indicated to the third party that she was acting for a principal and not for herself. The agent need not, however, have disclosed the principal's identity.
4. The principal must be *legally competent* at the time of ratification. For instance, an insane principal cannot ratify.
5. As the following *Work Connection* case makes clear, the principal must have *knowledge of all material facts* regarding the prior act or contract at the time it is ratified. Here, an agent's knowledge is not imputed to the principal.
6. The principal must ratify the *entire* act or contract. He cannot ratify the beneficial parts of a contract and reject those that are detrimental.
7. In ratifying, the principal must use the *same formalities* required to give the agent authority to execute the

transaction. As Chapter 35 stated, few formalities normally are needed to give an agent authority. But when the original agency contract requires a writing, ratification likewise must be written.

Note that a principal's ratification is binding even if not communicated to the third party. Also, once a principal has ratified a contract, the principal may not revoke the ratification.

Intervening Events Certain events occurring after an agent's contract but before the principal's ratification may cut off the principal's power to ratify. These include (1) the third party's *withdrawal* from the contract; (2) the third party's *death or loss of capacity*; (3) the principal's *failure to ratify within a reasonable time* (assuming that the principal's silence did not already work a ratification); and (4) *changed circumstances* (especially where the change places a greater burden on the third party than he assumed when the contract was made).

The Work Connection, Inc. v. Universal Forest Products, Inc. 2002 Minn. App. LEXIS 659 (Minn. Ct. App. 2002)

The Work Connection, Inc. (Connection) is a temporary employment agency that provides workers to customers for a fee. In February 1995, Doyle Olson, a sales representative for Connection, contacted Universal Forest Products, Inc. (Universal). Olson spoke with Ken Von Bank, Universal's production manager who had direct supervisory authority over temporary workers. Universal hired some of Connection's employees, including Wayne DeLage, to construct fence panels at its Shakopee plant.

Olson gave to Universal work verification forms that were used as employee timecards. Universal filled out and signed the forms, which contained the worker's name, date, and hours worked. Submission of a completed, signed form was required for an employee to be paid, and Connection processed the forms through its payroll department. The work verification forms contained the following language:

CUSTOMER AGREES TO THE TERMS AND CONDITIONS SET FORTH ON THE REVERSE SIDE HEREOF AND CERTIFIES THAT THE LISTED EMPLOYEES HAVE SATISFACTORILY PERFORMED SERVICES FOR THE HOURS SHOWN ABOVE.

The back of the verification form stated the following:

CONDITIONS OF UNDERTAKING

* * * *

3. CUSTOMER agrees to indemnify, hold harmless and defend THE WORK CONNECTION against claims, damages, or penalties under the following circumstances:

* * * *

(b) From any claims for bodily injury (including death), or loss of, and loss of use of, or damage to, property arising out of the use of or operation of CUSTOMER'S owned, nonowned, or leased vehicles, machinery or equipment by

THE WORK CONNECTION employees.

The parties never discussed the language on the back of the work verification form. The parties' oral agreement did not include a term that required Universal to provide workers' compensation insurance for Connection's employees. Nonetheless, Von Bank signed the verification forms for Universal from March 1995 through July 1995, when the office manager, Yvonne

Kohout, took over signing duties. At some point, Universal ran out of original work verification forms. Kohout simply photocopied the front side of the form and, thereafter, submitted forms that were blank on the back.

In August 1995, DeLage severed three of his fingers while operating a radial arm saw. DeLage received \$75,000 in workers' compensation benefits from Connection. Connection then asked Universal to indemnify it pursuant to the language on the back of the verification form. Universal refused to pay, and Connection sued Universal for breach of contract. The trial court granted Universal's motion for a directed verdict. Connection appealed.

The Minnesota Court of Appeals held that Von Bank and Kohout had no actual or apparent authority to bind Universal to the indemnification clause. The court then considered whether Universal had ratified the indemnification clause by accepting the benefits of the employment contract for DeLage's labors.

Halbrooks, Judge

Connection contends that Universal agreed to be liable for workers' compensation costs based on a theory of ratification. Ratification occurs when a principal retains the benefits of an agent's unauthorized act. Once the principal has received the benefit, it is estopped from disclaiming liability based on the fact that the act was unauthorized. Connection contends that because Universal received the benefit of the temporary worker's labor, it also accepted the associated burden of the indemnification clause on the back of the verification form.

This argument is not viable. Ratification does not occur if the principal is ignorant of material facts surrounding the transaction. Ratification by a party of another's unauthorized acts

occurs where the party with full knowledge of all material facts confirms, approves, or sanctions the other's acts. Where a principal accepts and retains the benefits of an unauthorized act of an agent with full knowledge of all the facts he thereby ratifies the act.

Here Universal lacked knowledge of a material fact: that the original timecards that Kohout signed contained language committing Universal to indemnify Connection for a workers' compensation claim. Given that Universal lacked full information regarding Kohout's actions, it did not ratify her conduct.

Judgment for Universal affirmed.

Contracts Made by Subagents The rules governing a principal's liability for her agent's contracts generally apply to contracts made by her subagents. If an agent has authorized his subagent to make a certain contract and this authorization is within the authority granted the agent by his principal, the principal is bound to the subagent's contract.

Also, a subagent contracting within the authority conferred by her principal (the agent) binds the *agent* in an appropriate case. In addition, both the principal and the agent probably can ratify the contracts of subagents.

Follow the "Contract Principles" link to view the "Principles of European Contract Law." Chapter 3 covers agent's authority.

Contract Liability of the Agent

When are *agents* liable on contracts they make on their principals' behalf? For the most part, this question depends on a different set of variables than those determining the principal's liability. The most important of these variables is the *nature of the principal*. Thus, this section first examines the liability of agents who contract for several different kinds of principals. Then it discusses two ways that an agent can be bound after contracting for any type of principal.

The Nature of the Principal

Disclosed Principal A principal is **disclosed** if a third party knows or has reason to know (1) that the agent is acting for a principal, and (2) the principal's identity. Unless he agrees otherwise, an agent who represents a disclosed principal is *not liable* on authorized contracts made for such a principal. Suppose that Adkins, a sales agent for Google, calls on Toyota and presents a business card clearly identifying her as Google's agent. If Adkins contracts to sell Google's advertising space to Toyota with authority to do so, Adkins is not bound because Google is a disclosed principal. This rule usually is consistent with the third party's intention to contract only with the principal.

Unidentified Principal A principal is **unidentified** or **partially disclosed** if the third party (1) knows or has reason to know that the agent is acting for a principal, but (2) lacks knowledge or reason to know the principal's *identity*. This can occur when an agent simply neglects to disclose his principal's identity. Also, a principal may tell her agent to keep her identity secret to preserve her bargaining position, such as when a national retailer tries to buy land on which to build a large store.

Among the factors affecting anyone's decision to contract are the integrity, reliability, and creditworthiness of the other party to the contract. When the principal is unidentified or partially disclosed, the third party ordinarily cannot judge these matters. As a result, he usually depends on the agent's reliability to some degree. For this reason, and to give the third party additional protection, an agent is liable on contracts made for an unidentified or partially disclosed principal unless the agent and the third party agree otherwise.

Undisclosed Principal A principal is **undisclosed** when the third party lacks knowledge or reason to know both the principal's existence *and* the principal's identity. This can occur when a principal judges that he will get a better deal if his existence and identity remain secret, or when the agent neglects to make adequate disclosure.

A third party who deals with an agent for an undisclosed principal obviously cannot assess the principal's reliability, integrity, and creditworthiness. Indeed, here the third party reasonably believes that the *agent* is the other party to the contract. Thus, the third party may hold an agent liable on contracts made for an undisclosed principal.

The undisclosed principal is also a party to the contract. The third party may not usually refuse to perform the contract merely because the principal was undisclosed, unless the contract excluded the possibility of an undisclosed principal.

Nonexistent Principal Unless there is an agreement to the contrary, an agent who purports to act for a **legally nonexistent** principal, such as an unincorporated association, is personally liable when the agent knows or has reason to know the principal does not exist. This is true even when the third party knows that the principal is nonexistent. See Chapter 42 for a more detailed discussion of the liability of those who transact on behalf of nonexistent corporations.

In the *Treadwell* case that follows, the court found that an agent acted for an unidentified principal when he disclosed he was transacting for a corporation, but gave the wrong corporate name to the third party with whom he transacted.

Treadwell v. J.D. Construction Co.

938 A.2d 794 (Me. Sup. Jud. Ct. 2007)

In the early 1990s, Jesse Derr created a corporation, JCDER, Inc., to operate his construction business. At some point, Derr began referring to the corporation as J.D. Construction Co., Inc., but no corporation by that name was ever created. JCDER, Inc., remained the official name for purposes of organization and filing with Maine's Secretary of State. Derr never filed with the Secretary of State a statement of intention to do business under the assumed name J.D. Construction Co., Inc.

In 2003, when Leah and William Treadwell decided to build a home, they were referred to Derr. The Treadwells brought their home plans to Derr's office to get a quote and left them with an employee, Jane Veinot. They did not meet with Derr, but received a quote from him in the mail. Soon after, the Treadwells signed a contract with J.D. Construction, with work to start in May 2003. Derr signed the contract, and his signature appeared on the contract as follows:

J.D. Construction Co., Inc.
By: Jesse Derr

The name JCDER, Inc., was nowhere in the contract, and the Treadwells were unaware of the existence of JCDER, Inc., when they signed the agreement. None of the documents the Treadwells received from J.D. Construction indicated that the company's real name was JCDER, Inc.

Mr. Treadwell testified that he spoke with Derr twice at the worksite, just as they were breaking ground. The Treadwells, who visited the site almost daily, never saw Derr again, even though they tried many times to contact him. They spoke to Veinot often, but she would tell them that Derr was at another construction site. Derr had hired subcontractors to do the work on the Treadwells' property. Around Thanksgiving 2003, the Treadwells visited the site and found that Derr had abandoned the job with the house unfinished because the company was not making any money on the job. The Treadwells had paid Derr approximately \$91,000 before construction halted.

The Treadwells found many problems with the structure, including twisted studs and other lumber that had to be replaced. The Treadwells hired new contractors to fix and finish the project, for which they paid a significant sum.

To recover the additional costs, the Treadwells sued J.D. Construction Co., JCDER, Inc., and Derr for breach of contract and other grounds. The trial court awarded the Treadwells damages against J.D. Construction Co., Inc., and JCDER, Inc., but found that Derr was not personally liable for the damages. The Treadwells appealed to the Supreme Judicial Court of Maine, asking that Derr also be held liable.

Alexander, Judge

The Treadwells argue that the trial court should have awarded damages against Derr individually since he signed the contract for a non-existent corporation. In the alternative, they contend that the trial court should have pierced the corporate veil and held Derr responsible because he failed to disclose the existence of JCDER, Inc.

The question presented to us is whether, as a matter of law, an individual who signs a contract, purporting to act on behalf of a corporate entity that he knows does not exist, becomes personally liable for damages arising from failure to properly perform under that contract.

An agent who makes a contract for an undisclosed principal or a partially disclosed principal will be liable as a party to the contract. In order for an agent to avoid personal liability on a contract negotiated in his principal's behalf, he must disclose not only that he is an agent but also the identity of the principal. The term "partially disclosed" principal is synonymous with "unidentified" principal. *Restatement (Third) of Agency*, § 1.04 comment b (2006). "A principal is unidentified if, when an agent and a third party interact, the third party has notice that the agent is acting for a principal but does not have notice of the principal's identity." *Restatement (Third) of Agency*, § 1.04(2)(c) (2006). To avoid liability for the agent, the third party must have *actual* knowledge of the identity of the principal, and does not have a duty to investigate.

In *Maine Farmers Exch. v. McGillicuddy*, 697 A.2d 1266 (Me. 1996), the son of a potato seller signed a contract with a distributor for a certain grade potato. The father/seller furnished the potatoes, which turned out to be the wrong grade. In an action by the distributor against the father and son, the trial court found them to be jointly and severally liable. They appealed the finding of joint and several liability, arguing that the distributor should have been aware that the son was acting as an agent for his father. We affirmed that finding because the son did not disclose that he was an agent for his father, and the distributor believed he was buying potatoes from the son.

In the present case, Derr organized a corporation called JCDER, Inc., which he used to operate his construction business. Both Derr and JCDER, Inc., acted under the assumed name J.D. Construction Co., Inc., Derr signed the contract on behalf of J.D. Construction, hired the subcontractors, and was purported to be the contact-person for the project, although he was not available to the Treadwells. Derr's use of an assumed trade name was not sufficient to disclose his agency relationship with JCDER, Inc. JCDER, Inc., was therefore an unidentified or partially disclosed principal. As a matter of law, Derr is personally liable for performance of contracts entered into as agent for the non-existent J.D. Construction, Co., Inc., or the undisclosed principal JCDER, Inc.

Judgment reversed in favor of the Treadwells.

Liability of Agent by Agreement An agent may bind herself to contracts she makes for a principal by *expressly agreeing* to be liable. This is true regardless of the principal's nature. An agent may expressly bind herself by (1) making the contract in her own name rather than in the principal's name, (2) joining the principal as an obligor on the contract, or (3) acting as surety or guarantor for the principal.

Problems of contract interpretation can arise when it is claimed that an agent has expressly promised to be bound. The two most important factors affecting the agent's liability are the wording of the contract and the way the agent has signed it. An agent who wishes to

avoid liability should make no express promises in her own name and should try to ensure that the agreement obligates only the principal. In addition, the agent should use a signature form that clearly identifies the principal and indicates the agent's representative capacity—for example, "Parker, by Adkins," or "Adkins, for Parker." Simply adding the word "agent" when signing her name ("Adkins, Agent") or signing without any indication of her status ("Adkins") could subject the agent to liability. Sometimes, the body of the contract suggests one result and the signature form another. In such contexts, oral evidence or other extrinsic evidence of the parties' understanding may help resolve the uncertainty.

Implied Warranty of Authority An agent also may be liable to a third party if he contracts for a legally existing and competent principal while lacking authority to do so. Here, the principal is not bound on the contract. Yet it is arguably unfair to leave the third party without any recovery. Thus, an agent normally is bound on the theory that he made an implied warranty of his authority to contract. This liability exists regardless of whether the agent is otherwise bound to the third party.

To illustrate, suppose that Allen is a salesman for Prine, a seller of furs. Allen has actual authority to receive offers for the sale of Prine's furs but not to make sale contracts, which must be approved by Prine himself. Prine has long followed this practice, and it is customary in the markets where his agents work. Representing himself as Prine's agent but saying nothing about his authority, Allen contracts to sell Prine's furs to Thatcher on Prine's behalf. Thatcher, who should have known better, honestly believes that Allen has authority to contract to

sell Prine's furs. Prine is not liable on Allen's contract because Allen lacked actual or apparent authority to bind him. But Allen is liable to Thatcher for breaching his implied warranty of authority.

However, an agent is *not* liable for making an unauthorized contract if any of the following applies:

1. The third party *actually knows* that the agent lacks authority. Note from the previous example, however, that the agent still is liable where the third party merely had *reason to know* that authority was lacking.
2. The principal subsequently *ratifies* the contract. Here, the principal is bound, and there is no reason to bind the agent.
3. The agent adequately *notifies* the third party that he does not warrant his authority to contract.

In the following *Interbank Funding* case, the court found the president of a dissolved corporation liable for breaching the agent's implied warranty of authority.

In re *Interbank Funding Corp. v. Chadmoore Wireless Group Inc.* 2007 Bankr. LEXIS 3422 (Bank. Ct. S.D.N.Y. 2007)

Chadmoore Wireless Group was a Colorado corporation that sold substantially all of its assets to another company in early 2002. It was dissolved under Colorado law on February 23, 2002. Following Chadmoore's dissolution, there were only three remaining members on its board of directors. Robert Moore was president, CEO, and a director of the Chadmoore Board.

Purporting to act on behalf of Chadmoore, Moore signed the "Chadmoore Put," by which Chadmoore guaranteed the payment of the purchase price for the sale of US Mills, Inc., to Sunset Brands, Inc. The value of the Chadmoore Put was \$2,500,000. One beneficiary of the Chadmoore Put was Fund LLC. The Chadmoore Put included a representation that Chadmoore had "full power, right and authority" to execute, deliver, and perform under the Chadmoore Put; that the execution, delivery, and performance by Chadmoore under the Chadmoore Put was "duly and validly authorized by all necessary actions on the part of Chadmoore" and would not conflict with Chadmoore's corporate formation documents or any applicable law; and that no further approvals, consents, or other actions by Chadmoore or any other person or entity were required. The Chadmoore Put included a representation that Moore was authorized to execute and deliver the Chadmoore Put, that Moore had obtained all required approvals, and that the Chadmoore Put was a binding obligation on Chadmoore.

Moore signed the Chadmoore Put on Chadmoore's behalf without approval of Chadmoore's board of directors. When Moore executed the Chadmoore Put, he inserted by hand the term "President" on the title line of the Chadmoore Put. Moore admits that he signed the Chadmoore Put intending that it would not be enforceable against Chadmoore. Moore concedes that he signed the Chadmoore Put to protect his friend, Todd Sanders, who allegedly led Moore to believe he would have serious financial difficulty and possibly be subject to physical harm if Moore did not sign the Chadmoore Put.

After the Chadmoore Put matured in November 2006, Fund LLC demanded that Chadmoore perform. Chadmoore refused to honor the Chadmoore Put and claimed that the two directors other than Moore had no prior knowledge of the Chadmoore Put. Fund LLC moved for summary judgment, asking the bankruptcy court to award it damages on the grounds that Moore breached an agent's implied warranty of authority.

Lifland, Judge

An action may lie in breach of implied warranty of authority when an agent executes an agreement purportedly on behalf of

a principal; without authority from the principal; and damages result. The *Restatement of Agency* provides,

A person who purports to make a contract, representation, or conveyance to or with a third party on behalf of another person, lacking power to bind that person, gives an implied warranty of authority to the third party and is subject to liability to the third party for damages for loss caused by breach of that warranty, including loss of the benefit expected from performance by the principal.

Restatement (Third) of Agency, § 6.10 (2006). New York courts recognize that a purported agent who signs a contract on behalf of his principal makes an implied warranty of authority to the other party to the contract.

Moore acknowledged that he signed the Chadmoore Put as President of Chadmoore and that he knew he did not have authority from the Board of Directors of Chadmoore at the time he executed the Chadmoore Put. In fact, Moore indicated that he signed the Chadmoore Put intending that it would never be enforceable. Yet he did sign the Chadmoore Put, and all of its accompanying representations and warranties.

Moore cites cases holding that an agent can only be held liable for contracts signed without authority to the extent the

contract would have been enforceable against the principal but for the lack of authority of the agent. However, New York courts have specifically ruled that in the case of agents executing contracts on behalf of dissolved corporations, those agents are personally liable for the contracts. Fund LLC's motion for summary judgment on implied warranty of authority is granted. There are simply no facts asserted by Moore that would lead to a different result. Moore does not deny that he signed the Chadmoore Put as President of Chadmoore without actually having authority to do so. Moore does not deny that as a result of his signing the Chadmoore Put, Chadmoore defaulted on its obligation on the Chadmoore Put.

The damages resulting from Moore's breach of the implied warranty of authority include the third-party financial accommodations owed under the Chadmoore Put and all injury resulting from his want of power, including the costs of an unsuccessful action against the alleged principal.

Summary judgment granted in favor of Fund LLC.

Figure 1 Liability of Principal and Agent: The Major Possibilities

| Principal | Agent's Authority | | |
|---|--|--|--|
| | Actual | Apparent | None |
| Disclosed | P liable on the contract; A not liable on the contract unless agrees to be liable | P liable on the contract; A not liable on the contract unless agrees to be liable | P not liable on the contract; A usually liable for breach of the implied warranty of authority |
| Unidentified (Partially Disclosed) | P liable on the contract; A liable on the contract | P liable on the contract; A liable on the contract | P not liable on the contract; A liable on the contract or for breach of the implied warranty of authority |
| Undisclosed | P liable on the contract; A liable on the contract | Impossible | P not liable on the contract; A liable on the contract |

Tort Liability of the Principal

Besides contracting on the principal's behalf, an agent may also commit torts while acting for the principal. A principal's liability for an agent's torts may be found on any one or more of four bases.

Respondeat Superior Liability Under the doctrine of *respondeat superior* (let the master answer), a principal who is an **employer** is liable for torts committed by agents (1) who are **employees** and (2) who commit

the tort while acting within the **scope of their employment**. *Respondeat superior* makes the principal liable both for an employee's negligence and for her intentional torts. Chapter 35 outlined the main factors courts consider when determining whether an agent is an employee. The most important of these factors is a principal's right to control the manner and means of an agent's performance of work.

Respondeat superior is a rule of *imputed* or *vicarious* liability because it bases an employer's liability on her relationship with the employee rather than her own fault.

This imputation of liability reflects the following beliefs: (1) that the economic burdens of employee torts can best be borne by employers; (2) that employers often can protect themselves against such burdens by self-insuring or purchasing insurance; and (3) that the resulting costs frequently can be passed on to consumers, thus “socializing” the economic risk posed by employee torts. *Respondeat superior* also motivates employers to ensure that their employees avoid tortious behavior. Because they typically control the physical details of the work, employers are fairly well positioned to do so.

Scope of Employment *Respondeat superior*’s scope-of-employment requirement has been stated in many ways and is notoriously ambiguous. Some courts considering this question asked whether the employee was on a “frolic” of his own, or merely made a “detour” from his assigned activity. According to the *Restatement*, an employee’s conduct is within the scope of his employment if it meets each of the following four tests:

1. It was of the *kind* that the employee was employed to perform. To meet this test, an employee’s conduct need only be of the same general nature as work expressly authorized or be incidental to its performance.
2. It occurred substantially within the authorized *time* period. This is simply the employee’s assigned time of work. Beyond this, there is an extra period of time during which the employment may continue. For instance, a security guard whose regular quitting time is 5:00 probably meets the time test if he unjustifiably injures an intruder at 5:15. Doing the same thing three hours later, however, would probably put the guard outside the scope of employment.
3. It occurred substantially within the *location* authorized by the employer. This includes locations not

unreasonably distant from the authorized location. For example, a salesperson told to limit her activities to New York City probably would satisfy the location requirement while pursuing the employer’s business in New Rochelle just north of the city limits but not while pursuing the same business in Philadelphia. Generally, the smaller the authorized area of activity, the smaller the departure from that area needed to put the employee outside the scope of employment. For example, consider the different physical distance limitations that should apply to a factory worker assigned to a single building and a traveling salesperson assigned to a five-state territory.

4. It was motivated *at least in part* by the *purpose* of serving the employer. This test is met when the employee’s conduct was motivated *to any appreciable extent* by the desire to serve the employer. Thus, an employee’s tort may be within the scope of employment even if the motives for committing it were partly personal. For example, suppose that a delivery employee is behind schedule and for that reason has an accident while speeding to make a delivery in his employer’s truck. The employee would be within the scope of employment even if another reason for his speeding was to finish work quickly so he could watch his daughter’s soccer game.

Direct Liability A principal’s **direct liability** for an agent’s torts differs considerably from *respondeat superior* liability. Here, the principal himself is at fault, and there is no need to impute liability to him. Also, no scope-of-employment requirement exists in direct liability cases, and the agent need not be an employee. Of course, a principal might incur both direct liability and *respondeat superior* liability in cases where due to the principal’s fault, an employee commits a tort within the scope of her employment.

Ethics in Action

Principal’s Liability for Agent’s Torts

We have covered the reasons the law makes employers liable for the torts of employees under *respondeat superior*, including the ability of employers to bear the burden or to socialize the cost of paying for damages caused by an employee’s tort.

- Do you think those are good reasons to make someone liable for the actions of another person? What kind of behavior is the rule of *respondeat superior* likely to foster? Does the rule encourage employers to train and supervise their employees better?
- Do you think *respondeat superior* makes employers liable for too many acts of their employees? Does the rule discourage some businesses from using employees? Does any discouragement affect both prospective employers and prospective employees?
- Do you think the law should make employers liable for all the torts of their employees?
- Do you think it is right for an employer to pay for all damages caused to others by the tort of an employee? When forming your answers, consider the ethical theories we covered in Chapter 4.

A principal is directly liable for an agent's tortious conduct if the agent acts within her actual authority or the principal ratifies the agent's conduct. Usually this means the principal directs the agent's conduct and intends that it occur. In such cases, the *agent's* behavior might be intentional, reckless, or negligent. For instance if Lawn Mower Company directs its agent Agnew to sell defective lawn mowers to Landscape Company, Lawn Mower Company is directly liable to Landscape Company. Likewise, Procenture Consulting Company would be liable for harm to clients caused by its ordering its consulting employees to complete an engagement in an unreasonable, substandard manner.

The typical direct liability case, however, involves harm caused by the principal's negligence regarding the agent. Examples of direct liability for negligence include (1) giving the agent improper or unclear instructions;

LOG ON

www.toolkit.com

The CCH Business Owners Toolkit is a font of information on managing the liability of employers for the acts of employees. One article, "Negligent Hiring or Supervision," gives advice on how an employer may avoid vicarious and direct liability for the torts of employees.

(2) failing to make and enforce appropriate regulations to govern the agent's conduct; (3) hiring an unsuitable agent; (4) failing to discharge an unsuitable agent; (5) furnishing an agent with improper tools, instruments, or materials; and (6) carelessly supervising an agent. Today, suits for negligent hiring are common.

The next case, *Millan*, covers both direct liability and *respondeat superior*.

Millan v. Dean Witter Reynolds, Inc.

90 S.W. 3d 760 (Tex. Ct. App 2002)

Maria Millan opened two brokerage accounts at Dean Witter Reynolds, Inc. One was for herself and the other for her as trustee for her son James. The broker for both accounts was her other son Miguel, an employee of Dean Witter. Over the course of the next three years, Miguel systematically looted his mother's account, ultimately stealing from her more than \$287,000. He managed to do this by forging her signature on an account application form and opening an additional account in her name. This account had check-writing privileges and a credit card attached to it that Miguel used liberally. Dean Witter did not verify Millan's signature, as its policy required, when the bogus account was opened.

Miguel took his mother's periodic deposits, usually consisting of several thousand dollars, deposited these checks into this fictitious account, and wrote himself checks from the account, usually made out to "cash." Miguel covered his tracks by opening a post office box, filing a false change of address form on which he forged his mother's signature, and creating false account statements purporting to be from Dean Witter. In one instance, Miguel forged a check he stole from his mother's checkbook and made it payable to "cash" in the amount of \$35,000. Disregarding Dean Witter written policy, a Dean Witter supervisor did not verify the check despite the high amount, the payment to "cash," and the concerns of a Dean Witter employee who first handled the check.

Millan sued her son and Dean Witter for unauthorized transactions, negligence, and gross negligence. The trial court directed a verdict for Dean Witter on the issues of vicarious liability. The jury was given the issue regarding Dean Witter's direct liability to Millan, and it found Dean Witter negligent and liable for 15 percent of her damages. Millan was found responsible for 85 percent of her damages on the grounds that she should have discovered the fraud earlier than she did. Millan appealed the trial court's decision to a Texas court of appeals. The court of appeals upheld the jury verdict that Dean Witter was only 15 percent responsible for Millan's damages under direct liability. The court then considered the vicarious liability issue using the doctrine of respondeat superior.

Angelini, Justice

Under the doctrine of *respondeat superior*, an employer is vicariously liable for the negligence of an agent or employee acting within the scope of his or her agency or employment. To determine whether an employee's acts are within the scope of his or her employment, we ask whether the employee's actions fall within the scope of the employee's general authority, are in furtherance of the employer's business, and are for the accom-

plishment of the object for which the employee was hired. In cases involving serious criminal activity, an employer is not liable for intentional and malicious acts that are unforeseeable considering the employee's duties. Our inquiry, therefore, must first focus on the scope of Miguel's general authority.

Miguel, in the course and scope of his employment for Dean Witter opened a brokerage account for his mother. It was within Miguel's general authority to open such accounts for

clients, receive deposits to these accounts, and purchase and sell securities as directed by clients. Miguel's activities, however, went far beyond these general brokerage duties. Miguel greatly exceeded the scope of his authority when, through a litany of deceitful acts, he stole money from his mother. Those acts include stealing checks from his mother's bathroom drawer, writing checks on his mother's account, depositing his mother's checks into his own account, forging his mother's signature on numerous occasions, stealing statements from his mother's mailbox, creating and sending bogus statements to his

mother, and opening a post office box so he could receive his mother's actual statements. These acts were not related to Miguel's duties and were not within his general scope of authority as a broker for Dean Witter.

We hold there was no evidence that Miguel acted within the scope of his authority as a broker at Dean Witter. Accordingly, there is no evidence to support the submission of the issue of Dean Witter's vicarious liability for fraud to the jury.

Judgment in favor of Dean Witter affirmed.

Liability for Torts of Independent Contractors

A principal ordinarily is *not* liable for torts committed by **independent contractors**. As compared with employees, independent contractors are more likely to have the size and resources to insure against tort liability and to pass on the resulting costs themselves. Sometimes, therefore, the risk still can be socialized if only the independent contractor is held responsible. Because the principal does not control the manner in which an independent contractor's work is performed, moreover, he has less ability to prevent a contractor's torts than an employer has to prevent an employee's torts. Thus, imposing liability on principals for the torts of independent contractors may do little to eliminate the contractor's torts.

However, the rule that principals are not liable for torts committed by independent contractors has exceptions. For example:

1. A principal can be *directly* liable for tortious behavior connected with the retention of an independent contractor. One example is the hiring of a dangerously incompetent independent contractor.
2. A principal is liable for harm resulting from the independent contractor's failure to perform a *nondelegable duty*. A nondelegable duty is a duty whose proper performance is so important that a principal cannot avoid liability by contracting it away. Examples include a carrier's duty to transport its passengers safely, a municipality's duty to keep its streets in repair, a railroad's duty to maintain safe crossings, and a landlord's duties to make repairs and to use care in doing so. Thus, a landlord who retains an independent contractor to repair the stairs in an apartment building is liable for injuries caused by the contractor's failure to repair the stairs properly.
3. A principal is liable for an independent contractor's negligent failure to take the special precautions needed

to conduct certain *highly dangerous* or *inherently dangerous* activities. Examples of such activities include excavations in publicly traveled areas, the clearing of land by fire, the construction of a dam, and the demolition of a building. For example, a contractor engaged in demolishing a building presumably has duties to warn pedestrians and to keep them at a safe distance. If injury results from the independent contractor's failure to meet these duties, the principal is liable.

Liability for Agent's Misrepresentations

Special rules apply when a third party sues a principal for **misrepresentations** made by her agent. In most cases where the principal is liable under these rules, the third party can elect to recover in tort, or to rescind the transaction.

A principal is *directly* liable for misrepresentations made by her agent during authorized transactions if she *intended* that the agent make the misrepresentations. In some states, a principal also may be directly liable if she *negligently* allows the agent to make misrepresentations. Even where a principal is not directly at fault, she may be liable for an agent's misrepresentations if the agent had *actual or apparent authority to make true statements on the subject*. Suppose that an agent authorized to sell farmland falsely states that a stream on the land has never flooded the property when in fact it does so almost every year, and that this statement induces a third party to buy the land. The principal is directly liable if she intended that the agent make this false statement. Even if the principal is personally blameless, she is liable if the agent had actual or apparent authority to make true statements about the stream.

After contemplating their potential liability under the rules just discussed, both honest and dishonest principals may try to escape liability for an agent's misrepresentations by including an **exculpatory clause** in contracts the

CONCEPT REVIEW

An Outline of the Principal's Tort Liability

| | |
|---|---|
| Respondeat Superior | <ol style="list-style-type: none"> 1. Agent must be an employee, <i>and</i> 2. Employee must act within scope of employment while committing the tort |
| Direct Liability | <ol style="list-style-type: none"> 1. Principal intends and directs agent's intentional tort, recklessness, or negligence, <i>or</i> 2. Principal is negligent regarding hiring or training of agent |
| Torts of Independent Contractors | <ol style="list-style-type: none"> 1. Principal generally is <i>not</i> liable 2. Exceptions exist for direct liability, highly dangerous activities, and nondelegable duties |
| Misrepresentation | <ol style="list-style-type: none"> 1. Direct liability 2. Vicarious liability when agent has authority to make true statements on the subject of the misrepresentation 3. An exculpatory clause may eliminate the principal's tort liability, but the third party still can rescind the contract |

agent makes with third parties. Such clauses typically state that the agent has authority only to make the representations contained in the contract and that only those representations bind the principal. Exculpatory clauses do not protect a principal who intends or expects that an agent will make false statements. Otherwise, though, they insulate the principal from *tort* liability if the agent misrepresents a material fact. But the third party still may rescind the transaction, because it would be unjust to let the principal benefit from the transaction while disclaiming responsibility for it.

Tort Liability of the Agent

Agents are usually liable for their own torts. Normally, they are not absolved from tort liability just because they acted at the principal's command. However, there are exceptions to this generalization.

1. An agent can escape liability if she is *exercising a privilege of the principal*. Suppose that Tingle grants Parkham a right-of-way to transport his farm products over a private road crossing Tingle's land. Parkham's agent Adams would not be liable in trespass for driving across Tingle's land to transport farm products if she did so at Parkham's command. However, an agent must not exceed the scope of the privilege and must act for the purpose for which the privilege was given. Thus, Adams would not be protected if she took her Jeep on a midnight joyride across Tingle's land. Also, the privilege given the agent must be delegable in the first place. If Tingle had given the easement to Parkham exclusively,

Adams would not be privileged to drive across Tingle's land.

2. A principal who is *privileged to take certain actions in defense of his person or property* may often authorize an agent to do the same. In such cases, the agent escapes liability if the principal could have done so. For example, a WalMart warehouse guard may use force to protect the property in WalMart's warehouse.

3. An agent who makes *misrepresentations* while conducting the principal's business is not liable in tort unless he either *knew or had reason to know* their falsity. Suppose Parker authorizes Arnold to sell his house, falsely telling Arnold that the house is fully insulated. Arnold does not know that the statement is false and could not discover its falsity through a reasonable inspection. If Arnold tells Thomas that the house is fully insulated and Thomas relies on this statement in purchasing the house, Parker is directly liable to Thomas, but Arnold is not liable.

4. An agent is not liable for injuries to third persons caused by *defective tools or instrumentalities* furnished by the principal unless the agent had actual knowledge or reason to know of the defect.

Tort Suits against Principal and Agent

Sometimes both principal and agent are liable for an agent's torts. Here, the parties are *jointly and severally* liable. This means that a third party may join the principal

and the agent in one suit and get a judgment against each, or may sue either or both individually and get a judgment against either or both. However, once a third party actually collects in full from either the principal or the agent, no further recovery is possible.

In some cases, therefore, either the principal or the agent has to satisfy the judgment alone despite the other party's liability. Here, the other party sometimes is required to *indemnify* the party who has satisfied the judgment. As discussed in Chapter 35, for example, sometimes a principal is required to indemnify an agent for tort liability the agent incurs. On the other hand, some torts committed by agents may involve a breach of duty to their principal, and the principal may be able to recover from an agent on this basis.

Agents and College Athletes

The National Collegiate Athletic Association (NCAA) is the largest organization regulating competition in intercollegiate athletics. One of the NCAA's objectives is to protect the amateur standing of college athletics. The NCAA Web site has links to state statutes that regulate contacts between agents and college athletes. Click on "Academics & Athletics"; then click "Eligibility and Recruiting." You will see a link for "Agents." Click on your state to find your state's laws. Note that if an agent causes a college athlete to lose his eligibility to participate in college athletics, the agent may have tort liability to the college and face criminal penalties as well.

Problems and Problem Cases

- Jonas Bravario hires Suzanne Hermano, a securities broker, to manage his \$700,000 portfolio of securities. When Bravario managed his own investments, his investment strategy was to own a large number of different companies, with no one company representing more than 5 percent of his total investments. Bravario also purchased all his investments for cash and did not borrow money to finance the purchase of any investment. Hermano is aware of Bravario's historical investment strategy, which Bravario informed Hermano that he wanted to continue in the future. Nonetheless, Hermano opts to purchase 1 million shares of Enron Corporation for \$70,000. To finance the purchase, Hermano sells \$40,000 of Bravario's current investments and borrows \$30,000 from Wells Fargo Bank in the name of Bravario. The interest rate on the loan is 10 percent. When Bravario discovers the purchase and the loan, he attempts to repudiate both contracts. Is Bravario liable on the Enron purchase and loan contracts?
- Kamitra Smith was a catering specialist for TLC Catering, a food service business. TLC's catering specialists were authorized to make catering contracts with customers and to serve food in compliance with those contracts. On behalf of TLC, Smith made a contract with Miller Clandon & Associates, a law firm, to cater a holiday party in Miller Clandon's office. Smith signed a contract that was drafted by Miller Clandon. The contract provided that TLC would be liable for all damages suffered by Miller Clandon and its staff in connection with TLC's performance of the contract. Smith and three other TLC employees catered the Miller Clandon party for TLC. One of Miller Clandon's staff attorneys slipped on coffee spilled by a TLC employee during the catered party. The attorney sued TLC, arguing that TLC was bound by the contact signed by Smith. Did Smith have express, implied, or apparent authority to sign the contact that imposed liability on TLC?
- Harry Tighe opened an investment securities account with Legg Mason Wood Walker, Inc. Legg Mason could make no investments for Tighe's account without Tighe's authorization. When Tighe received his first monthly statement from Legg Mason, he saw that his broker had made an unauthorized \$220,000 purchase of limited partnership units. Tighe called the broker and objected to the purchase. Later, the broker persuaded Tighe to hold the units to see how well the investment performed. Tighe decided to hold onto the units only because the broker told him that they were not readily marketable. In fact, the units were readily marketable. For more than two years, Tighe continued to invest in his Legg Mason account through the broker. He finally complained to a Legg Mason compliance officer, but even then did not revoke the purchase of the limited partnership units. Has Tighe ratified the broker's unauthorized purchase of the units?
- Sally Leiner was the sole shareholder, director, and president of Ecco Bella, Inc., a New Jersey corporation. On various occasions, African Bio-Botanica, Inc., sold Leiner and/or Ecco Bella merchandise. African gave little thought to the party with whom it

was dealing. Initially, its records listed Sally Leiner as the customer; later, this was changed to Ecco Bella, but without any indication that Ecco Bella was a corporation. The checks with which Leiner paid for her orders and her firm's stationery bore the name Ecco Bella, but likewise did not indicate that the firm was a corporation.

Eventually, Leiner did not pay for a shipment from African, and African sued her personally for damages in a New Jersey trial court. Leiner's defense was that only the corporation, and not herself personally, was liable. Is Leiner correct?

5. A sales representative of Wired Music, Inc., sold Frank Pierson, president of the Great River Steamboat Company, a five-year Muzak Program Service for a riverboat and restaurant owned by Great River. Pierson signed a form contract drafted by Wired Music in the following manner:

By /s/ Frank C. Pierson, Pres.

Title

The Great River Steamboat Co.
~~Port of St. Louis Investment, Inc.~~
For the Corporation

In signing, Pierson crossed out "Port of St. Louis Investments, Inc.," which had been incorrectly listed as the name of the corporation, and inserted the proper name. The contract included the following clause arguably making Pierson a surety or guarantor for Great River: "The individual signing this agreement for the subscriber guarantees that all of the above provisions shall be complied with."

Great River made approximately four payments under the contract and then ceased to pay. Wired Music brought an action for contract damages against Pierson personally. Is Pierson liable?

6. Jerome Cohen was a youth counselor for Mellon Community Center (MCC). Needing paper supplies for a project he had planned for the youths he was counseling, Cohen went to a local Staples supplies store and selected \$150 of paper goods. He paid for the goods with his personal credit card. He did not tell Staples that he was buying the paper goods for MCC. Cohen asked MCC to reimburse him for the cost of the paper goods, but it refused on the grounds that Cohen should have asked for permission in advance. Cohen then refused to pay the credit card bill for the paper purchase. He argued that since he bought the goods for MCC, only MCC was liable on the contract to buy the goods. Was Cohen right?

7. James Thurn and Deryl Hines incorporated their feedlot business as Hines & Thurn Feedlot, Inc., a corporation. The corporation made three livestock purchases from Zumbrota Livestock Auction Market totaling over \$540,000. Zumbrota sent invoices addressed to "Thurn-Hines Lvstk" or "Thurn Hines Livst." The corporation paid for the livestock with three checks. Printed on each check was "Thurn-Hines Livestock, Hines-Thurn Feedlot, Inc., Box 555, Edgewood, IA 52042." The checks were signed by Jean Offerman, a corporation employee, but did not indicate the capacity in which Offerman signed. When the corporation stopped payment on the checks, Zumbrota sued Thurn and Hines individually for the amount of the livestock purchases, claiming that Thurn and Hines were agents for an undisclosed principal. Zumbrota's vice president argued that he knew the business only as "Thurn & Hines." Were Thurn and Hines liable to Zumbrota?

8. Mark Bradshaw, an agent for National Foundation Life Insurance Co. (NFLIC), tried to sell a health insurance policy to Bobby Reed. Bradshaw told Reed that his health insurance coverage would begin upon signing some forms and paying the first premium. On January 7, Reed signed but did not read the forms, which included language stating that Reed understood that Bradshaw could not change any NFLIC policy or make any policy effective, that the policy would not be effective until actually issued by NFLIC, and that it could take up to two weeks for Reed's application to be processed and the policy issued. NFLIC received Reed's application, including his payment for the first premium, on January 12. On January 19, NFLIC called Reed's home and was informed he had a heart attack on January 15. NFLIC declined to issue the policy to Reed. On what grounds did Reed sue Bradshaw? Was Reed's suit against Bradshaw successful?

9. Redford had been a backhoe operator for five years. Although he had worked for other sign companies, he had spent 90 percent of his time during the past three years working for Tube Art Display, Inc. Redford generally dug holes exactly as directed by the sign company employing him. He did, however, pay his own business taxes, and he did not participate in any of the fringe benefits available to Tube Art employees.

Tube Art obtained a permit to install a sign in the parking lot of a combination commercial and apartment building. Telling Redford how to proceed, Tube Art's service manager laid out the exact location of a

4 × 4 foot square on the asphalt surface with yellow paint and directed that the hole be 6 feet deep. After Redford began the job, he negligently struck a small natural gas pipeline with the backhoe. He examined the pipe, and, finding no indication of a leak or break, concluded that the line was not in use and left the worksite. Later, an explosion and fire occurred in the building serviced by the line. As a result, a business owned by Massey was destroyed. Massey sued Tube Art for Redford's negligence under the doctrine of *respondeat superior*. Will Massey recover?

10. LaVar Johnson was a retail representative for the Wheaton Company, a processor of consumer packaged goods like cereals and canned goods. Johnson's job was to visit grocery stores in his territory to ensure that each store gave adequate shelf space to all Wheaton products sold by the store. Wheaton told Johnson that maintaining good relations with the general manager and assistant manager of each store was essential. It was important, Wheaton told him, to accommodate the managers to ensure that Wheaton got the shelf space it wanted in each store.

While visiting a store in Springfield, Illinois, Johnson chatted for a few minutes with the manager, who got a phone call that his wife was in an auto accident while on her way to pick up the manager at the store. While the wife was not seriously injured, Johnson offered to take the manager to the scene of the accident, and the manager accepted. On the way to the accident scene, Johnson negligently ran a red light, resulting in his car being struck by another car. The grocery store manager received a broken leg, arm, and pelvis. Is Wheaton liable for the manager's injuries under the doctrine of *respondeat superior*?

11. Gary McCoy ordered a pizza from a Papa John's restaurant. The restaurant was owned by RWT, Inc., a franchisee of Papa John's International, Inc. RWT did business as Papa John's Pizza. Wendell Burke, an employee of RWT, Inc., delivered the pizza and obtained payment from McCoy at his place of business. Burke lingered for almost two hours after being paid, asking McCoy for a job and viewing a hunting videotape. When Burke returned to the Papa John's restaurant, to avoid criticism for being late he concocted the story that McCoy held him against his will. The police arrested McCoy for false

imprisonment, which charges were eventually dropped. McCoy sued Burke, RWT, and Papa John's International for malicious prosecution based on Burke's false statements. Does the doctrine of *respondeat superior* impose liability on the franchisor, Papa John's International, in this case?

12. Tammy Bauer hires consulting firm Accent Pointe LLP to find a buyer for the formula and trade name of her pest repellent, NO BUGGZ. Bauer tells Accent Pointe to tell prospective buyers that NO BUGGZ is organic and has no health risks to humans. Bauer knows that NO BUGGZ has serious negative health effects on humans even when used as directed. Consequently, Accent Pointe tells Scotts Company that NO BUGGZ has no serious negative health risks to humans when used as directed. The written purchase contract that Scotts signs with Bauer does not represent that NO BUGGZ has no health risks to humans; the contract contains an exculpatory clause stating that Bauer is not bound by Accent Pointe's representations, unless they also appear in the written contract. Two years after Scotts buys NO BUGGZ, Scotts is subjected to consumer lawsuits claiming that NO BUGGZ is causing health problems for its users. Is Bauer liable to Scotts for misrepresentation?

Online Research

Workplace Violence Research Institute

The Workplace Violence Research Institute is a provider of workplace violence prevention programs. In part a response to employers' risk exposure due to violent employees, the Institute has resources that help an employer identify potentially dangerous employees.

- Find the Workplace Violence Research Institute Web site.
- Find the article by Steve Kaufer, "Corporate Liability: Sharing the Blame for Workplace Violence." Create a list of steps that an employer should take to protect its employees from violent fellow workers and thereby reduce the employer's risk of liability for the violent acts of employees.

INTRODUCTION TO FORMS OF BUSINESS AND FORMATION OF PARTNERSHIPS

After working for a large company for 10 years, you decide to give expression to your entrepreneurial urges and start a business. Your business plan is to help small firms that are struggling with finding ways to make new information technologies affordable and effective for their business. You envision that your business will need a capital infusion of \$500,000 for the first year, during which you project the business will have a net loss of \$200,000, which reflects in part your salary of \$80,000. Beginning with the second year, you believe that the business will generate enough cash flow to finance internally all its normal capital expenditures. You expect second-year losses to be \$100,000. Beginning with the third year, the business will be profitable.

You have \$120,000 of savings that you are willing to invest in the business. You hope to obtain the remaining \$380,000 of initial capital from investors. While you are willing to give a portion of the equity of the business to the investors, you want to control the business, including day-to-day operations. It is especially important that the other investors not be able to expel you from the business or its management.

- What business forms are best for your business?
- How will you modify the default rules of some business forms to make those forms work best for you?

IN THIS CHAPTER, YOU begin your study of business organizations. Early in this chapter, you will preview the basic characteristics of the most important forms of business and learn how to select an appropriate form for a business venture. Following that introduction, you will begin your in-depth study of partnerships, learning their characteristics and the formalities for their creation.

Choosing a Form of Business

One of the most important decisions made by a person beginning a business is choosing a **form of business**. This decision is important because the business owner's liability and control of the business vary greatly among the many forms of business. In addition, some business forms offer significant tax advantages to their owners.

Although other forms of business exist, usually a person starting a business will wish to organize the business

as a sole proprietorship, partnership, limited liability partnership, limited partnership, limited liability limited partnership, corporation, or limited liability company.

Sole Proprietorship A **sole proprietorship** has only one owner. The sole proprietorship is merely an extension of its only owner, the **sole proprietor**.

As the only owner, the sole proprietor has the right to make all the management decisions of the business. In addition, all the profits of the business are his. A sole proprietor assumes great liability: He is personally liable for all the obligations of the business. All the debts of the business, including debts on contracts signed only in the name of the business, are his debts. If the assets of the business are insufficient to pay the claims of its creditors, the creditors may require the sole proprietor to pay the claims using his individual, nonbusiness assets such as money from his bank account and the proceeds from

the sale of his house. A sole proprietor may lose everything if his business becomes insolvent. Hence, the sole proprietorship is a risky form of business for its owner.

Despite this risk, there are two reasons why a person may organize a business as a sole proprietorship. First, the sole proprietorship is formed very easily and inexpensively. No formalities are necessary. Second, few people consider the business form decision. They merely begin their businesses. Thus, by default, a person going into business by herself automatically creates a sole proprietorship when she fails to choose another business form. These two reasons explain why the sole proprietorship is the most common form of business in the United States.

Because the sole proprietorship is merely an extension of its owner, it has no life apart from its owner. Therefore, while the business of a sole proprietorship may be freely sold to someone else, legally the sole proprietorship as a form of business cannot be transferred to another person. The buyer of the business must create his own form of business to continue the business.

A sole proprietorship is not a legal entity. It cannot sue or be sued. Instead, creditors must sue the owner. The sole proprietor—in his own name—must sue those who harm the business.

A sole proprietor may hire employees for the business, but they are employees of the sole proprietor. Under the law of agency, the sole proprietor is responsible for her employees' authorized contracts and for the torts they commit in the course of their employment. Also, a sole proprietorship is not a tax-paying entity for federal income tax purposes. All of the income of a sole proprietorship is income to its owner and must be reported on the sole proprietor's individual federal income tax return. Likewise, any business losses are deductible without limit on the sole proprietor's individual tax return. This loss-deduction advantage explains why some wealthier taxpayers use the sole proprietorship for selected business investments—when losses are expected in the early years of the business, yet the risk of liability is low. Such an investor may form a sole proprietorship and hire a professional manager to operate the business.

Many sole proprietorships have trade names. For example, Caryl Stanley may operate her bagel shop under the name Caryl's Bagel Shop. Caryl would be required to file the trade name under a state statute requiring the registration of fictitious business names. If she were sued by a creditor, the creditor would address his complaint to "Caryl Stanley, doing business as Caryl's Bagel Shop."

Partnership A **partnership** has two or more owners, called **partners**. The partners have the right to make

all the management decisions for the business. In addition, all the profits of the business are shared equally by the partners.

The partners assume personal liability for all the obligations of the business. All the debts of the business are the debts of all the partners. Likewise, partners are liable for the torts committed in the course of business by their partners or by partnership employees. If the assets of the business are insufficient to pay the claims of its creditors, the creditors may require one or more of the partners to pay the claims using their individual, nonbusiness assets. Thus, a partner may have to pay more than his share of partnership liabilities.

Like the sole proprietorship, the partnership is not a tax-paying entity for federal income tax purposes. All of the income of the partnership is income to its partners and must be reported on the individual partner's federal income tax return whether or not it is distributed to the partners. Likewise, any business losses are deductible without limit on the partner's individual tax return.

The partnership has a life apart from its owners. When a partner dies or otherwise leaves the business, the partnership usually continues. A partner's ownership interest in a partnership is not freely transferable: A purchaser of the partner's interest is not a partner of the partnership, unless the other partners agree to admit the purchaser as a partner.

Why would persons organize a business as a partnership? Formation of a partnership requires no formalities and may be formed by default. A partnership is created automatically when two or more persons own a business together without selecting another form. Also, each partner's right to manage the business and the deductibility of partnership losses on individual tax returns are attractive features.

Limited Liability Partnership A limited liability partnership is a partnership whose partners have elected limited liability status. Reacting to the large personal liability sometimes imposed on accountants and lawyers for the professional malpractice of their partners, Texas enacted in 1991 the first statute permitting the formation of **limited liability partnerships (LLPs)**. An LLP is identical to a partnership except that an LLP partner has no liability for most LLP obligations; however, an LLP partner retains unlimited liability for his *own* wrongful acts, such as his malpractice liability to a client.

LLP partners may elect to have the LLP taxed like a partnership or a corporation. If an LLP is taxed like a corporation, it pays federal income tax on its income, but

the partners pay federal income tax only on the compensation paid and the partnership profits distributed to the partners.

The formation of an LLP requires filing a form with the secretary of state; some states require LLPs to maintain adequate professional insurance or have a high net worth.

The LLP is an especially good form of business for professionals such as consultants and auditors, allowing them management flexibility while insulating them mostly from personal liability. The LLP is the preferred form of business for professionals.

Limited Partnership A **limited partnership** has one or more general partners and one or more limited partners. General partners have rights and liabilities similar to partners in a partnership. They manage the business of the limited partnership and have unlimited liability for the obligations of the limited partnership. Typically, however, the only general partner is a corporation, thereby protecting the human managers from unlimited liability.

Limited partners usually have no liability for the obligations of the limited partnership once they have paid their capital contributions to the limited partnership. Limited partners have no right to manage the business, but if they do manage, they nonetheless retain their limited liability.

Like an LLP, a limited partnership may elect to be taxed either as a partnership or as a corporation. If a limited partnership is taxed like a partnership, general partners report their shares of the limited partnership's income and losses on their individual federal income tax returns. For general partners, losses of the business are deductible without limit. A limited partner must pay federal income tax on his share of the profits of the business, but he may deduct his share of losses only to the extent of his investment in the business. As a passive investor, a limited partner may use the losses only to offset income from other passive investments.

If a limited partnership is taxed like a corporation, the limited partnership pays federal income tax on its net income. The partners pay federal income tax only on compensation paid and profits distributed to them.

A limited partnership may have a life apart from its owners. When a limited partner dies or otherwise leaves the business, the limited partnership is not dissolved. When a general partner dies or withdraws, however, the limited partnership may be dissolved if there is no remaining general partner. A general or limited partner's rights may not be wholly transferred to another person unless the other partners agree to admit the new person as a partner.

Unlike a sole proprietorship or partnership—but like an LLP—a limited partnership may be created only by complying with a state statute permitting limited partnerships. Thus, no limited partnership may be created by default.

There are three main reasons why persons organize a business as a limited partnership. First, by using a corporate general partner, no human will have unlimited liability for the debts of the business. Second, if the limited partnership is taxed like a partnership, losses of the business are deductible on the owners' federal income tax returns. Third, investors may contribute capital to the business yet avoid unlimited liability and the obligation to manage the business. Thus, the limited partnership has the ability to attract large amounts of capital, much more than the sole proprietorship, which has only one owner, or the partnership, whose partners' fear of unlimited liability restricts the size of the business. Hence, for a business needing millions of dollars of capital, wanting only a few owners to manage the business, and expecting to lose money in its early years, the limited partnership is a particularly good form of business.

Limited Liability Limited Partnership A **limited liability limited partnership (LLLP)** is a limited partnership whose partners have elected limited liability status for all the partners. An LLLP is created by making a filing with the secretary of state. The LLLP is designed to give the same limited liability advantages to general partners in a limited partnership as have been granted to partners who manage an LLP or a limited liability company (LLC). The LLC is explained below.

The LLLP is identical to a limited partnership in its management and the rights and duties of its partners. However, by electing LLLP status, both the limited partners and the general partners in a limited partnership will have no liability for most obligations of the LLLP. Nonetheless, a general partner will have unlimited liability for any torts he commits while acting for the LLLP.

Corporation A **corporation** is owned by shareholders who elect a board of directors to manage the business. The board of directors often selects officers to run the day-to-day affairs of the business. Consequently, ownership and management of a corporation may be completely separate: No shareholder has the right to manage, and no officer or director needs to be a shareholder.

Shareholders have limited liability for the obligations of the corporation, even if a shareholder is elected as a director or selected as an officer. Directors and officers have no liability for the contracts they or the corporation's

employees sign only in the name of the corporation. While managers have liability for their own misconduct, they have no liability for corporate torts committed by other corporate managers or employees. Therefore, shareholders, officers, and directors have limited liability for the obligations of the business.

The usual corporation is a tax-paying entity for federal income tax purposes. The corporation pays taxes on its profits. Shareholders do not report their shares of corporation profits on their individual federal income tax returns. Instead, only when the corporation distributes its profits to the shareholders in the form of dividends or the shareholders sell their investments at a profit do the shareholders report income on their individual returns. This creates a double-tax possibility, as profits are taxed once at the corporation level and again at the shareholder level when dividends are paid.

Also, shareholders do not deduct corporate losses on their individual returns. They may, however, deduct their investment losses after they have sold their shares of the corporation.

There is one important exception to these corporate tax rules. The shareholders may elect to have the corporation and its shareholders taxed under Subchapter S of the Internal Revenue Code. By electing **S Corporation** status, the corporation and its shareholders are taxed nearly entirely like a partnership: Income and losses of the business are reported on the shareholders' individual federal income tax returns. A corporation electing S Corporation status may have no more than 100 shareholders, have only one class of shares, and be owned only by individuals and trusts.

A corporation has a life separate from its owners and its managers. When a shareholder or manager dies or otherwise leaves the business, the corporation is not dissolved. A shareholder may sell his shares of the corporation to other persons without limitation unless there is a contrary agreement. The purchaser becomes a shareholder with all the rights of the selling shareholder.

There are several reasons why persons organize a business as a corporation. First, no human has unlimited liability for the debts of the business. As a result, businesses in the riskiest industries—such as manufacturing—incorporate. Second, because investors may contribute capital to the business, avoid unlimited liability, escape the obligation to manage the business, and easily liquidate their investments by selling their shares, the corporation has the ability to attract large amounts of capital, even more than the limited partnership, or LLLP, whose partnership interests are not as freely transferable. Thus, the corporation has the capacity to raise the largest amount of capital.

The S Corporation has an additional advantage: Losses of the business are deductible on individual federal income tax returns. However, because the S Corporation is limited to 100 shareholders, its ability to raise capital is severely limited. Also, while legally permitted to sell their shares, S Corporation shareholders may be unable to find investors willing to buy their shares or may be restricted from selling their shares pursuant to an agreement between the shareholders.

Professional Corporation All states permit professionals such as accountants, physicians, and dentists to incorporate their professional practices. The **professional corporation** is identical to a business corporation in most respects. It is formed only by a filing with the secretary of state, and it is managed by a board of directors, unless a statute permits it to be managed like a partnership. The rigid management structure makes the professional corporation inappropriate for some smaller professional practices.

While professional shareholders have no personal liability for the obligations of the professional corporation, such as a building lease, they retain unlimited liability to their clients for their professional malpractice. A professional will have no personal liability, however, for the malpractice of a fellow shareholder or associate.

Typically, only professionals holding the same type of license to practice a profession may be shareholders of a professional corporation. For example, only physicians licensed to practice medicine may be shareholders of a professional corporation that practices medicine.

Professional corporation shareholders may elect for the corporation to be taxed like a corporation, or they may elect S Corporation tax treatment.

Fewer and fewer professionals incorporate each year. All of the liability and taxation advantages of the professional corporation have been assumed by the LLP. In addition, most professionals like the flexible management structure of the LLP better.

Limited Liability Company A **limited liability company** (LLC) is a business form intended to combine the nontax advantages of corporations with the favorable tax treatment of partnerships. An LLC is owned by members, who may manage the LLC themselves or elect the manager or managers who will operate the business. Members have limited liability for the obligations of the LLC.

All states except California permit professionals to organize as LLCs. Professionals in a professional LLC have unlimited liability, however, for their own malpractice. Like an LLP or LLLP, members of an LLC

may elect to have the LLC taxed like a partnership or a corporation.

There is limited free transferability of the LLC members' ownership interests. Transfer of a membership interest entitles the transferee to receive only the member's distributions from the LLC, unless all members or the LLC agreement permits the transferee to become a member. The death, retirement, or bankruptcy of any member usually does not dissolve or cause the liquidation of the LLC.

What are the advantages of the LLC? The LLC has the limited liability advantage and, if manager-managed, the management advantage of the corporation. The LLC and its members may elect to receive federal tax treatment similar to the S Corporation and its shareholders,

yet the LLC has no limit on the number or type of owners, as does an S Corporation.

See Figure 1 for a summary of the general characteristics of business forms.

LOG ON

www.sba.gov/smallbusinessplanner/index.html

The Small Business Association has valuable resources for anyone starting a business. Under "Start Your Business" you will find a link to "Choose a Structure." Listed under "Forms of Ownership" is a section describing some forms of business and listing the tax forms necessary to those business forms.

The Global Business Environment

Globally, businesses have a wide choice of business forms, and many of them are forms shared by many countries. For example, the partnership is recognized not only in the United States but also in Australia, Canada, Cyprus, England, India, Israel, Russia, South Africa, Turkey, Zimbabwe, and many other nations. In the Chinese province of Hong Kong, the sole proprietorship, partnership, limited partnership, and company are the typical business forms. Limited liability partnerships and limited liability limited partnerships do not exist in Hong Kong as yet, or much of the world for that matter. Limited liability companies in Hong Kong are like American corporations.

German law recognizes the public stock corporation (*AG* or *Aktiengesellschaft*). Its shares are freely transferable like

those of American corporations, so it may have an unlimited number of shareholders. More common is the limited liability company (*GmbH* or *Gesellschaft mit beschränkter Haftung*), first created in 1892. It permits the owners to restrict the transfer of its shares. The majority of German subsidiaries of foreign corporations are *GmbHs* rather than *AGs*. Owners of *AGs* and *GmbHs* have liability limited to their capital contributions. The German general commercial partnership (*OHG* or *offene Handelgesellschaft*) and the limited commercial partnership (*KG* or *Kommanditgesellschaft*) are essentially the same as the general and limited partnerships in the United States.

To find examples of forms of business in 60 countries, go to www.wikipedia.org/wiki/types_of_companies.

Ethics in Action

Two people who carefully consider which American business form to use for their business can achieve nearly any combination of attributes. For example, by choosing LLP status, they can limit their personal liability, totally control the business, and deduct business losses on their individual federal income tax returns. They can do the same with an LLC or S Corporation. They will have no liability for the contracts of the business, even though they make all business decisions and make all contracts for the business. When the business becomes profitable, they can elect to have the business form taxed like a

corporation, and if the corporate tax rate is lower than their individual tax rate, they will derive tax savings by retaining earnings in the business.

- Is it ethical for a business owner who controls the business to escape liability for the business's contracts and torts by hiding behind the veil of the business organization?
- Would you ever choose to use the partnership form when the LLP form is available?
- Is it ethical for a business owner to select a business form and elect a tax treatment that minimizes her tax liability?

Figure 1 *General Characteristics of Forms of Business*

| | Sole Proprietorship | Partnership | Limited Liability Partnership | Limited Partnership | Limited Liability Partnership | Corporation | S Corporation | Limited Liability Company |
|--|--|--|--|---|---|--|---|--|
| Formation | When one person owns a business without forming a corporation or LLC | By agreement of owners <i>or</i> by default when two or more owners conduct business together without creating another business form | By agreement of owners; must comply with limited liability partnership statute | By agreement of owners; must comply with limited partnership statute | By agreement of owners; must comply with limited liability partnership statute | By agreement of owners; must comply with corporation statute | By agreement of owners; must comply with corporation statute; must elect S Corporation status under Internal Revenue Code | By agreement of owners; must comply with limited liability company statute |

| Transferability of Owners' Interest | None | Limited | Limited | Limited, unless agreed otherwise | Limited, unless agreed otherwise | Freely transferable, although shareholders may agree otherwise | Freely transferable, although shareholders usually agree otherwise | Limited, unless agreed otherwise |
| Federal Income Taxation | Only sole proprietor taxed | Only partners taxed | Usually only partners taxed; may elect to be taxed like a corporation | Usually only partners taxed; may elect to be taxed like a corporation | Usually only partners taxed; may elect to be taxed like a corporation | Corporation taxed; shareholders taxed on dividends (double tax) | Only shareholders taxed | Usually only members taxed; may elect to be taxed like a corporation |

Partnerships

The basic concept of partnership is as ancient as the history of collective human activity. Partnerships were known in ancient Babylonia, ancient Greece, and the Roman Empire. Hammurabi's Code of 2300 B.C. regulated partnerships. The definition of a partnership in the 6th-century Justinian Code of the Roman Empire does not differ materially from that in our laws today. The partnership was likewise known in Asian countries, including China. During the Middle Ages, much trade between nations was carried on by partnerships.

By the close of the 17th century, the partnership was recognized in the English common law. When the United States became an independent nation and adopted the English common law in 1776, the English law of partnerships became a part of American law. In the early part of the 19th century, the partnership became the most important form of association in the United States.

Today, the American common law of partnership has been largely replaced by statutory law. Every state has a

statute on partnership law. The Revised Uniform Partnership Act (RUPA) of 1994, with the 1997 amendments, is a model partnership statute that is the product of the National Conference of Commissioners on Uniform State Laws, a group of practicing lawyers, judges, and law professors. The aims of the RUPA are to codify partnership law in one document, to make that law more nearly consistent with itself, and to attain uniformity throughout the country.

In recent years, the RUPA has supplanted the Uniform Partnership Act (UPA) of 1914 as the dominant source of partnership law in the United States. As of October 2008, 36 states plus the District of Columbia, Puerto Rico, and the Virgin Islands have adopted the RUPA. The RUPA is the framework of your study of partnerships and limited liability partnerships. (See Figure 2.)

Creation of Partnership

No formalities are necessary to create a partnership. Two or more persons may become partners in accordance

Figure 2 *Principal Characteristics of Partnerships under the RUPA*

1. A partnership may be created with no formalities. Two or more people merely need to agree to own and conduct a business together in order to create a partnership.
2. Partners have unlimited liability for the obligations of the business.
3. Each partner, merely by being an owner of the business, has a right to manage the business of the partnership. He is an agent of the partnership and may make the partnership liable for contracts, torts, and crimes. Because partners are liable for all obligations of the partnership, in effect each partner is an agent of the other partners. Each partner may hire agents, and every partner is liable for the agents' authorized contracts and for torts that the agents commit in the course of their employments.
4. A partnership is not an employer of the partners, for most purposes. As a result, for example, a partner who leaves a partnership is not entitled to unemployment benefits.
5. Partners are fiduciaries of the partnership. They must act in the best interests of the partnership, not in their individual best interests.
6. The profits or losses of the business are shared by the partners, who report their shares of the profits or losses on their individual federal income tax returns, because the partnership does not pay federal income taxes. Nonetheless, a partnership does keep its own financial records and must file an information return with the Internal Revenue Service.*
7. A partnership may own property in its own name.
8. A partnership may sue or be sued in its own name. The partners may also be sued on a partnership obligation.
9. A partner may sue her partners during the operation of the partnership.
10. A partner's ownership interest in a partnership is not freely transferable. A purchaser of a partner's interest does not become a partner, but is entitled to receive only the partner's share of the partnership's profits.
11. Generally, a partnership has a life apart from its owners. If a partner dies, the partnership usually continues.

*The federal income tax return filed by a partnership, Schedule K-1, is merely an information return in which the partnership indicates its gross income and deductions and the names and addresses of its partners (IRC Sec. 6031). The information return allows the Internal Revenue Service to determine whether the partners accurately report partnership income on their individual returns.

with a written partnership agreement (articles of partnership), they may agree orally to be partners, or they may become partners merely by arranging their affairs as if they were partners. If partners conduct business under a trade name, they must file the name with the secretary of state in compliance with state statutes requiring the registration of fictitious business names.

When people decide to become partners, they should employ a lawyer to prepare a written partnership agreement. Although a partnership agreement is not required to form a partnership, it is highly desirable for the same reasons that written contracts are generally preferred. In addition, the statute of frauds requires a writing for a partnership having a term of a year or more.

More importantly, when partners do not define their relationship as partners, the default rules of the RUPA determine the rights of the partners vis-à-vis each other. While the RUPA rules are sensible and meet the needs of many partners, they may not meet the specific interests of other partners. Thus, having a written partnership agreement will allow the partners to define their rights and duties appropriately for them.

When there is no written partnership agreement, a dispute may arise over whether persons who are associated in some enterprise are partners. For example, someone may assert that she is a partner and, therefore, claim a share of the value of a successful enterprise. More frequently, an unpaid creditor may seek to hold a person liable for a debt incurred by another person in the same enterprise. To determine whether there is a partnership in the absence of an express agreement, the courts use the definition of partnership in the RUPA.

RUPA Definition of Partnership The RUPA defines a partnership as an “association of two or more persons to carry on as co-owners a business for profit.” If the definition is satisfied, then the courts will treat those involved as partners. A relationship may meet the RUPA definition of partnership even when a person does not believe he is a partner, and occasionally, even if the parties agree that they are not partners.

Association of Two or More Persons As an association, a partnership is a *voluntary and consensual relationship*. It cannot be imposed on a person; a person must agree expressly or impliedly to have a person associate with her. For example, a partner cannot force her partners to accept her daughter into the partnership.

No person can be a partner with herself—a partnership must have *at least two partners*. A person may be a partner with her spouse.

Nearly everyone or everything may be a partner. An individual, trust, partnership, limited partnership, corporation, or other association may be a partner.

Carrying On a Business Any trade, occupation, or profession may qualify as a business. Carrying on a business usually requires a series of transactions conducted over a period of time. For example, a group of farmers that buys supplies in quantity to get lower prices is not carrying on a business but only part of one. If the group buys harvesting equipment with which it intends to harvest crops for others for a fee for many years, it is carrying on a business.

Co-ownership Partners must *co-own the business* in which they associate. There is no requirement that the capital contributions or the assets of the business be co-owned.

Also, by itself, co-ownership of assets does not establish a partnership. For example, two persons who own a building as joint tenants are not necessarily partners. To be partners, they must co-own a business.

The two most important factors in establishing co-ownership of the business are the sharing of profits and the sharing of management of the business. The RUPA declares that a person’s **sharing the profits** of a business is presumptive evidence that she is a partner in the business. This means that persons sharing profits are partners, unless other evidence exists to disprove they are partners. The rationale for this rule is that a person ordinarily would not be sharing the profits of a business unless she were a co-owner. This rule brings under partnership law many persons who fail to realize that they are partners. For example, two college students who purchase college basketball tickets, resell them, and split the profits are partners.

Sharing the gross revenues of a business does not create a presumption of partnership. The profits, not the gross receipts, must be shared. For example, a broker who receives a commission on a sale of land is not a partner of the seller of that land.

Although sharing profits usually is presumptive proof of a partnership, the RUPA provides that no presumption of partnership is made when a share of profits is received in payment

1. of a debt,
2. of wages to an employee or services to an independent contractor,
3. of rent,

4. of an annuity or other retirement or health benefit to a beneficiary or representative of a deceased partner,
5. interest on a loan, or
6. for the sale of the goodwill of a business or other property.

These exceptions reflect the normal expectations of the parties that no partnership exists in such situations.

Sharing management of a business is additional evidence tending to prove the existence of a partnership. However, by itself, participation in management is not conclusive proof of the existence of a partnership. For example, a creditor may be granted considerable control in a business, such as a veto power over partnership decisions and the right of consultation, without becoming a partner. Also, a sole proprietor may hire someone to manage his business, yet the manager will not be a partner of the sole proprietor.

However, when the parties claim that they share profits for one of the six reasons above, the sharing of management may overcome the presumption that they are not partners. When the parties arrange their affairs in a manner that otherwise establishes an objective intent to create a partnership, the courts find that a partnership exists. For example, when a nonmanagerial employee initially shares profits as a form of employment compensation, the employee is not a partner of his employer. But when the employer and employee modify their relationship by having the employee exercise the managerial control of a partner and fail to reaffirm that the manager is merely an employee, a partnership may exist.

Creditors occupy a special position. Many cases have permitted creditors to share profits and to exercise considerable control over a business without becoming partners. Creditor control is often justified on the grounds that it is merely reasonable protection for the creditor's risk.

For Profit The owners of an enterprise must *intend to make a profit* to create a partnership. If the enterprise suffers losses, yet the owners intend to make a profit, a partnership may result. When an endeavor is carried on by several people for charitable or other nonprofit objectives, it is not a partnership. For example, Alex and Geri operate a restaurant booth at a county fair each year to raise money for a Boy Scout troop. Their relationship is not a partnership but merely an association. (Nonetheless, like partners, they may be individually liable for the debts of the enterprise.)

Intent Frequently, courts say that there must be intent to form a partnership. This rule is more correctly stated as follows: *The parties must intend to create a relationship that the law recognizes as a partnership.* A partnership may exist even if the parties entered it inadvertently, without considering whether they had created a partnership. A written agreement to the effect that the parties do not intend to form a partnership is not conclusive if their actions provide evidence of their intent to form a relationship that meets the RUPA partnership test.

There are several important consequences of being a partner. See Figure 3 for a summary of the most important consequences.

The *Southex* case, which follows the next section, considers whether two businesses are partners.

Creation of Joint Ventures Courts frequently distinguish **joint ventures** from partnerships. A joint venture may be found when a court is reluctant to call an arrangement a partnership because the purpose of the arrangement is not to establish an ongoing business involving many transactions; instead, it is limited to a single project. For example, an agreement to buy, develop, and

Figure 3 Important Consequences of Being a Partner

1. You share ownership of the business. For example, you want to bring an employee into your business, which is worth \$250,000. If you and the employee conduct your affairs like partners, your employee will become your partner and own half of your business.
2. You share the profits of the business.
3. You share management of the business. Your partner must be allowed to participate in management decisions.
4. Your partner is an agent of the partnership. You are liable for your partner's torts and contracts made in the ordinary course of business.
5. You owe fiduciary duties to your partnership and your partner, such as the duties not to compete with the business, not to self-deal, and not to disclose confidential matters.
6. You have unlimited personal liability for all the obligations of the partnership.

resell for profit a particular piece of real estate is likely to be viewed as a joint venture rather than a partnership. In all other respects, joint ventures are created just as partnerships are created. The joint venturers may have a formal written agreement. In its absence, a court applies the RUPA definition of partnership—modified so as not to require the carrying on of a business—to determine whether a joint venture has been created.

The legal implications of the distinction between a partnership and a joint venture are not entirely clear.

Generally, partnership law applies to joint ventures. For example, all of the participants in a joint venture are personally liable for its debts, and joint venturers owe each other the fiduciary duties imposed on partners. Joint ventures are treated as partnerships for federal income tax purposes. The most significant difference between joint venturers and partners is that joint venturers are usually held to have *less implied and apparent authority* to make contracts for the joint venture than partners, because of the limited scope of the enterprise.

Southex Exhibitions, Inc. v. Rhode Island Builders Association, Inc. 279 F.3d 94 (1st Cir. 2002)

The Rhode Island Builder's Association, Inc. (RIBA), is an association of home construction companies. In 1974, RIBA's executive director, Ross Dagata, made an agreement with Sherman Exposition Management, Inc. (SEM), a professional show owner and producer, regarding future productions of the RIBA home shows at the Providence Civic Center. The preamble in the 1974 Agreement announced that "RIBA wishes to participate in such shows as sponsors and partners." The term of the 1974 Agreement was five years, renewable by mutual agreement.

RIBA also agreed to sponsor and endorse only shows produced by SEM, to persuade RIBA members to exhibit at those shows, and to permit SEM to use RIBA's name for promotional purposes. In turn, SEM promised to obtain all necessary leases, licenses, permits and insurance, to indemnify RIBA for show-related losses, to grant RIBA the right to accept or reject any exhibitor, to audit show income, and to advance all the capital required to finance the shows. Net show profits were to be shared: 55 percent to SEM; 45 percent to RIBA.

The 1974 Agreement provided that all show dates and admission prices, as well as the Rhode Island bank at which show-related business would be transacted, required agreement by both parties. If the Civic Center became unavailable for reasons beyond SEM's control, SEM was to be excused from its production duties, provided that SEM promoted no other home show in Rhode Island. RIBA retained the right to conduct a home show at another venue, after notice to SEM.

When the 1974 Agreement was being negotiated, SEM and RIBA had conversations relating to the meaning of the term "partners" in the agreement. Manual Sherman, SEM's president, informed RIBA's Ross Dagata that he "wanted no ownership of the show" because he was uncertain about the financial prospects for home shows in the Rhode Island market. Sherman advised Dagata: "After the first year, if I'm not happy, we can't produce the show properly or make any money, we'll give you back the show." Although SEM owned other home shows which it produced outside Rhode Island, Sherman consistently described himself simply as the "producer" of the RIBA shows.

In 1994, Southex Exhibitions, Inc., acquired SEM's interest under the 1974 Agreement. By 1998, Southex determined that in order to maintain its financial stake in the RIBA home shows, the 1974 Agreement either needed to be renegotiated or allowed to expire according to its terms in 1999. RIBA in turn expressed dissatisfaction with Southex's performance, and eventually entered into a management contract with another producer, Yoffee Exposition Services, Inc.

Southex sued RIBA to enjoin the RIBA 2000 home show on the grounds that the 1974 Agreement established a partnership between RIBA and Southex's predecessor, SEM. Southex argued that RIBA breached its fiduciary duties to Southex by its dissolution of their partnership and its subsequent appointment of another producer. The federal district court denied Southex's request for a preliminary injunction and found that the 1974 Agreement did not create a partnership. Southex appealed.

Cyr, Senior Circuit Judge

Under Rhode Island law, a partnership is an association of two or more persons to carry on as co-owners a business for profit. The receipt by a person of a share of the profits of a business is prima facie evidence that he or she is a partner in the business.

Southex insists that the 1974 Agreement contains ample indicia that a partnership was formed, including: (1) a 55–45 percent sharing of profits; (2) mutual control over designated business operations, such as show dates, admission prices, choice of exhibitors, and "partnership" bank accounts; and (3) the respective contributions of valuable property to the partnership

by the partners. In our view, the evidence indicating a nonpartner relationship cannot be dismissed as insubstantial.

First, the 1974 Agreement is simply entitled “Agreement,” rather than “Partnership Agreement.” Second, rather than an agreement for an indefinite duration, it prescribed a fixed (albeit renewable) term. Third, rather than undertake to share operating costs with RIBA, SEM not only agreed to advance all monies required to produce the shows, but to indemnify RIBA for all show-related losses as well. State law normally presumes that partners share equally or at least proportionately in partnership losses. Although partners may agree to override such statutory “default” provisions, there is no evidence that SEM and RIBA meant to do so, notwithstanding an intent to form a partnership.

Similarly, although RIBA involved itself in some management decisions, SEM was responsible for the lion’s share. Partners normally share equal rights in management. Furthermore, Southex not only entered into contracts but conducted business with third parties, in its own name, rather than in the name of the putative partnership. As a matter of fact, their mutual association was never given a name. It is noteworthy as well that Southex never filed either a federal or state partnership tax return.

Similarly, the evidence as to whether either SEM or RIBA contributed any corporate property with the intent that it become jointly-owned partnership property is highly speculative, particularly since their mutual endeavor simply involved a periodic event, i.e., an annual home show, which neither generated, nor necessitated, ownership interests in significant tangible properties, aside from cash receipts. Unlike tangible real and personal property, whose ownership is more readily established, the intangible intellectual property involved here, such as clientele lists, goodwill, and business expertise, did not so

readily lend itself to evidentiary establishment. As a consequence, in the present circumstances the requisite mutual intent to convert intangible intellectual properties into partnership assets may well depend much more importantly upon a clear contractual expression of mutual intention to form a partnership.

Finally, even assuming that the 1974 Agreement, as a whole, is ambiguous, (i) Manual Sherman testified that he regarded SEM as simply the producer of the annual RIBA shows; and (ii) Dagata testified that SEM specifically disclaimed any ownership interest in the home shows in 1974.

Southex urges that the 1974 Agreement necessitated a finding of partnership formation, in that it unambiguously describes the contracting parties as “partners.” The labels the parties assign to their intended legal relationship, while probative of partnership formation, are not necessarily dispositive as a matter of law, particularly in the presence of countervailing evidence—e.g., the provision in the 1974 Agreement indemnifying RIBA for all show-related losses—which would tend to refute the partnership characterization. Although the manner in which the parties themselves characterize the relationship is probative, the question ultimately is objective intent.

Although the courts should refrain from resorting to extrinsic evidence where a contract is utterly unambiguous, the lone reference to “partners” in the 1974 Agreement’s prefatory clause is so inconclusive as to carry minimal interpretive weight, especially since it arguably conflicted with other contract provisions. Had the parties intended otherwise, it would seem entirely reasonable to expect the 1974 Agreement to have been entitled “Partnership Agreement,” rather than simply “Agreement.”

Judgment for RIBA affirmed.

Creation of Mining Partnerships Although similar to an ordinary partnership or a joint venture, a mining partnership is recognized as a distinct relationship in a number of states. Persons who cooperate in the working of either a mine or an oil or gas well are treated as mining partners if there is (1) joint ownership of a mineral interest, (2) joint operation of the property, and (3) sharing of profits and losses. Joint operation requires more than merely financing the development of a mineral interest, but it does not require active physical participation in operations; it may be proved by furnishing labor, supplies, services, or advice. The delegation of sole operating responsibility to one of the participants does not bar treatment as a mining partnership.

Creation of Limited Liability Partnerships Unlike an ordinary partnership, a limited

liability partnership (LLP) may not be created merely by partners conducting a business together. The partners must expressly agree to create an LLP by complying with a limited liability partnership statute. The formation of an LLP requires filing a form with the secretary of state, paying an annual fee, and adding the words “Registered Limited Liability Partnership,” “Limited Liability Partnership,” or the acronym “RLLP” or “LLP” to the partnership’s name. Some states also require an LLP to maintain a minimum level of professional liability insurance or net worth.

Purported Partners

Two persons may not be partners, yet in the eyes of a third person they may **appear** to be partners. If the third person deals with one of the apparent partners, he may

be harmed and seek to recover damages from both of the apparent partners. The question, then, is whether the third person may collect damages from both of the apparent partners, even though they are not partners in fact.

For example, Thomas thinks that Wilson, a wealthy person, is a partner of Porter, a poor person. Thomas decides to do business with Porter on the grounds that if Porter does not perform as agreed, he can recover damages from Wilson. If Thomas is wrong and Wilson is not Porter's partner, Thomas ordinarily has no recourse against Wilson. RUPA Section 308(e) states that "persons who are not partners as to each other are not liable as partners to other persons." However, if Thomas can prove that Wilson misled him to believe that Wilson and Porter were partners, he may sue Wilson for damages suffered when Porter failed to perform as agreed. This is an application of the doctrine of **purported partners**.

The liability of a purported partner is based on substantial, detrimental reliance on the appearance of partnership. A person will be a purported partner and have liability when the three elements of RUPA Section 308(a) are met:

1. A person purports to be or consents to being represented as a partner of another person or partnership.
2. A third party relies on the representation.
3. The third party transacts with the actual or purported partnership.

The third party may hold liable the persons who purported to be partners or consented to being represented as the partner of the actual or purported partnership.

Purporting to Be a Partner A person may purport to be a partner by referring to himself as another person's partner. Or he might appear frequently in the office of a purported partner and confer with him. Perhaps he and another person share office space, have one door to an office with both of their names on it, have one telephone number, and share a receptionist who answers the phone giving the names of both persons.

More difficult is determining when a person *consents* to being represented as another's partner. Mere knowledge that one is being held out as a partner is not consent. But a person's silence in response to a statement that the person is another's partner is consent.

For example, suppose Chavez tells Eaton that Gold is a partner in Birt's new restaurant. In fact, Gold is not Birt's partner. Later, Gold learns of the conversation between Chavez and Eaton. Gold does not have to seek out Chavez and Eaton to tell them that he is not Birt's partner

in order to avoid being held liable as a partner for Birt's business debts. Had Chavez made the statement to Eaton in Gold's presence, however, Gold must deny the partnership relation or he will be held liable for Eaton's subsequent reliance on Gold's silence.

Note also that if a person makes a public representation that she is a partner of another, the purported partner is liable to any third person who relies on the representation, even if the purported partner is not aware of the reliance.

Reliance Resulting in a Transaction with the Partnership

A purported partner is liable only to those persons who rely on the representation and enter into a transaction with the actual or purported partnership. This means that purported partnership is determined on a case-by-case basis. The third party must in fact rely on the appearance of partnership. For example, when Trump transacts with Doby based on Crabb's representation that Doby and Crabb are partners, Trump is able to hold both Doby and Crabb liable. If however, Trump had dealt with Doby believing Doby was in business by herself and later discovers that Crabb had purported to be Doby's partner, only Doby would be liable to Trump, because there was no reliance on Crabb's purporting to be Doby's partner when Trump transacted with Doby.

Effect of Purported Partnership

Once persons are proved to be purported partners, a person who purported to be the others' partner or who consented to being represented as the others' partner is liable as though he were a partner of those persons. He is liable on contracts entered into by third parties on their belief that he was a partner. He is liable for torts committed during the course of relationships entered by third parties who believed he was a partner. In addition, a partnership that represents that a person is a partner endows the purported partner with the apparent authority to make contracts for the partnership.

Although two persons are purported partners to a person who knows of the representation and who relies on it, the purported partners are not partners in fact and do not share the profits, management, or value of the business of the purported partnership. Purported partnership is merely a device to allow creditors to sue persons who mislead the creditors into believing that a partnership exists. It does not create an actual partnership.

In the following *Palmer* case, the court found that there was a factual dispute whether the two lawyers were purported partners under the RUPA.

Palmer v. Claydon

1999 Conn. Super. LEXIS 2661 (Conn. Super. Ct. 1999)

Linda Palmer sued John Claydon, an attorney, for legal malpractice in connection with legal services he provided her in several land transactions. Palmer also sued George Lawler. Lawler was not a partner of Claydon, did not provide any services to Palmer, and did not participate in Claydon's services provided to Palmer. Palmer alleged, however, that Lawler was liable for Claydon's malpractice because he was a purported partner of Claydon. Lawler asked the court to grant him summary judgment.

Hodgson, Justice

Lawler asserts as a first ground that he was not a law partner of Claydon and did not hold himself out to be. He states that he and Claydon were never partners but that they shared space and expenses. He states that he and Claydon “never shared clients, nor employed each other to represent our clients” and did not commingle their funds received from the practice of law nor share profits or losses from the practice of law.

Palmer asserts that the two attorneys held themselves out to be a partnership by identifying their practice as “Claydon & Lawler” on a sign at their law office and on their stationery and in their telephone directory listing. She further avers that Claydon introduced Lawler to her as his law partner; and that Lawler, in a telephone conversation with her, identified himself as Claydon's law partner. The plaintiff further avers in her affidavit that she relied on the status of the entity as a partnership:

I relied upon Attorney Claydon's and Attorney Lawler's representations that they did business as a law partnership. I believed that I would have the benefits of working with a partnership, including adequate resources and legal coverage for the real estate transactions.

Lawler states that “the only way in which Palmer can hold Lawler liable in this action is if she can prevail that there was a partnership between Lawler and Claydon.” The court does not agree with this statement. While Palmer does not allege that there was an actual partnership, she alleges that Claydon and Lawler held themselves out as partners and that she relied on that representation.

Pursuant to Conn. Gen. Stat. 34–329(a), a party who purports, by words or conduct, to be a partner or consents to being represented by another as a partner in a partnership is liable to persons who rely on the representation in entering “into a transaction with the actual or purported partnership” either to the same extent as a partner for partnership liability or “jointly and severally” with any other person consenting to the representation that a partnership existed, depending on the situation.

The affidavits submitted plainly establish that there are disputed issues of material fact concerning (a) whether defendant Lawler held himself out as a participant in a partnership or allowed that impression to be created by defendant Claydon and (b) whether Palmer relied on the representation that a partnership existed. The existence of these disputed issues of material fact precludes summary judgment on the first ground raised by Lawler.

Lawler has failed to establish entitlement to summary judgment on this ground; however, he asserts a separate and distinct ground based on Palmer's release of Claydon. Lawler claims that even if he is assumed to have held himself out as a partner of Claydon, the release and withdrawal of Palmer's claims against Claydon serves to release him from liability.

In the absence of any express provision in the Act limiting the effect of releases of purported partners, the common law principles apply. The release of Claydon, about which there is no genuine dispute of material fact, as a matter of law releases Lawler from the vicarious liability imposed on him by Conn. Gen. Stat. 34–329(a).

Motion for summary judgment granted to Lawler.

Ethics in Action

Consider the ethical basis of the doctrine of purported partnership.

- Why does Kant's categorical imperative, which we studied in Chapter 4, suggest the rule of purported partnership is the right one?

- What steps will you take to avoid being a purported partner when you carry on business with an associate who is not your partner? Are those not only legal, but also ethical acts? Is there any distinction between law and ethics in this context?

Partnership Capital

When a partnership or limited liability partnership is formed, partners contribute cash or other property to the partnership. The partners' contribution is called **partnership capital**. To supplement beginning capital, other property may be contributed to the partnership as needed, such as by the partners permitting the partnership to retain some of its profits. Partnership capital is the equity of the business.

Loans made by partners to a partnership are not partnership capital but instead are liabilities of the business. Partners who make loans to a partnership are both owners and creditors.

Partnership Property

A partnership or limited liability partnership may own all or only a part of the property it uses. For example, it may own the business and perhaps a small amount of working capital in the form of cash or a checking account, yet own no other assets. All other tangible and intangible property used by the partnership may be individually or jointly owned by one or more of the partners or rented by the partnership from third parties. A determination of what is partnership property becomes essential when the partnership is dissolved and the assets are being distributed and when third persons claim that partnership property has been sold to them.

The RUPA provides that all property actually acquired by a partnership by transfer or otherwise is partnership property and, therefore, belongs to the partnership as an entity rather than to the partners. The RUPA has several rules that help determine when property is acquired by a partnership.

Property belongs to the partnership if the property is transferred (1) to the partnership in its name, (2) to any partner acting as a partner by a transfer document that names the partnership, or (3) to any partner by a transfer document indicating the partner's status as a partner or that a partnership exists. In addition, property acquired with partnership funds is presumed to be partnership property.

The presumption is very strong that property purchased with partnership funds and used in the partnership belongs to the partnership. On the other hand, property used by the partnership is presumed to belong to an individual partner when the property is purchased by a partner with her own funds and in her own name

with no indication in the transfer document of the partner's status as a partner or the existence of a partnership. However, in both situations, other factors such as an agreement among the partners may rebut the RUPA presumption of ownership.

The intent of the partners controls whether the partnership or an individual partner owns the property. It is best to have a written record of the partners' intent as to ownership of all property used by the partnership, such as a partnership agreement and partnership accounting records.

Examples A tax accountant discovers that a partnership is using a building to which a partner, Jacob Smith, holds title. The partnership pays rent monthly to Smith, but the partnership pays for all maintenance and repairs on the building. The accountant wants to know whether the partnership or Smith should be paying real property taxes on the building. Smith is the owner and should be paying taxes on it because his partners' intent to allow Smith to retain ownership is evidenced by the partnership's paying rent to Smith.

Changing the facts, suppose the partnership pays no rent to Smith, the partnership maintains and repairs the building, and the partnership pays real property taxes on the building, but the title is in Smith's name. Who owns the building? The property belongs to the partnership, because all the objective criteria of ownership point toward partnership ownership, especially the payment of taxes. Therefore, when the partnership is liquidated, the building will be sold along with other partnership assets, and the proceeds of its sale will be distributed to partnership creditors and to all of the partners.

Need for Partnership Agreement It would be best for the partnership agreement to remove all ambiguity regarding ownership of property used by a partnership. For example, if the partnership is using a partner's building and the partners want the owning partner to retain ownership, it would be best to have a lease agreement between themselves and the partner stating that the partner owns the building, the monthly rent, and who is responsible for property taxes, maintenance, and improvements to the building.

In the following case, *Brevig*, the court held that property listed on a partnership's tax returns was nonetheless property of a partner, not the partnership.

McCormick v. Brevig

96 P. 3d 697 (Mont. Sup. Ct. 2004)

Joan Brevig McCormick and Clark Brevig were sister and brother. Clark had been a partner with his father, Charles, until Charles's death in 1982. At that time, Joan became a partner with her brother in the Brevig Ranch, and eventually they were 50–50 partners.

Disagreements concerning management of the ranch caused Clark and Joan's relationship to deteriorate. By the early 1990s, cooperation between Clark and Joan had essentially ceased, and they began looking for ways to dissolve the partnership. In 1995, Joan brought suit against Clark and the partnership, alleging that Clark had converted partnership assets to his own personal use. The source of the dispute was cattle purchased by their mother, Helen.

In 1990, Helen Brevig purchased 10 head of Charolais cattle to live on the ranch. The following year, Helen transferred ownership of the cattle to Clark and his two sons. Thereafter, these cattle were listed and treated as partnership property for all tax purposes, and proceeds from the sale of the cattle's offspring were placed into a partnership account. At the time of Helen's lawsuit against Clark, all the Charolais cattle residing on the ranch were offspring of those cattle originally purchased by Helen in 1990.

At the district court trial, Clark argued that the Charolais cattle should be regarded as separate property due to the fact that his mother, who was not a partner, had given the cattle to Clark and his two sons, neither of whom were partners. The district court concluded, however, that since Clark had signed tax returns indicating that the cattle were partnership property, and had placed proceeds from the sale of calves into partnership accounts, the cattle should be treated as partnership assets.

Clark appealed, arguing that the mere inclusion of the cattle in the partnership tax returns is legally insufficient to transfer title of the cattle to the partnership.

Rice, Justice

Section 35–10–203, Montana Code, pertains to partnership property and provides as follows:

- (1) Property transferred to or otherwise acquired by a partnership is property of the partnership and not of the partners individually.
- (2) Property is partnership property if acquired in the name of:
 - (a) the partnership; or
 - (b) one or more partners with an indication in the instrument transferring title to the property of the person's capacity as a partner or of the existence of a partnership but without an indication of the name of the partnership.
- (3) Property is acquired in the name of the partnership by a transfer to:
 - (a) the partnership in its name; or
 - (b) one or more partners in their capacity as partners in the partnership if the name of the partnership is indicated in the instrument transferring title to the property.
- (4) Property is presumed to be partnership property if purchased with partnership assets even if not acquired in the name of the partnership or of one or more partners with an indication in the instrument transferring title to the property of the person's capacity as a partner or of the existence of a partnership.
- (5) *Property acquired in the name of one or more of the partners without an indication in the instrument transferring title to the property of the person's capacity as a partner or of the existence of a partnership and without use*

of partnership assets is presumed to be separate property even if used for partnership purposes.

(Emphasis added.) As reflected in the statute, property purchased with partnership assets, or transferred in the partnership's name, or to one or more of the partners in their capacity as partners of the partnership, is presumed to be partnership property. On the other hand, property acquired in the name of a partner without an indication that the property is being transferred to that person in his or her capacity as a partner of the partnership is presumed to be separate property, even if used for partnership purposes.

In the present case, the district court included the cattle as partnership assets in its accounting because they were listed on the partnership tax returns. However, nothing in the record suggests that the Charolais cattle were purchased with partnership assets or transferred to Clark and his two sons in their capacity as partners of the partnership. Nor has there been any assignment of the cattle to the partnership. Therefore, despite the fact that the cattle were included in the partnership tax returns, and proceeds from the sale of the cattle's offspring placed in partnership accounts, the cattle are to be presumed separate property.

As Joan correctly points out, this presumption is a rebuttable one. Nonetheless, Joan did not introduce any evidence to overcome the presumption but, rather, has relied upon the District Court's findings that money from the sale of calves had been placed into partnership accounts, and that the cattle had been listed on partnership tax returns. However, we have previously considered and rejected arguments that a third party

acquires an interest in cattle simply by feeding, watering, and pasturing them.

Here proceeds from the sale of calves had been deposited in partnership accounts and used for partnership purposes. Joan has not demonstrated any equitable interest in the cattle by virtue of the partnership's care and feeding of the cattle, nor has she provided any authority which would compel the conclusion that

ownership of the cattle passed to the partnership. Because the presumption established by § 35–10–203(5), MCA, has not been overcome by evidence to the contrary, we conclude the District Court erred in categorizing the Charolais cattle as partnership assets, and reverse the court's determination in that regard.

Judgment reversed in favor of Clark Brevig.

Partner's Partnership Interest

As an owner of a partnership or LLP, a partner has an ownership interest in the partnership. A partner's ownership interest is called a **partnership interest**, which embodies all a partner's rights in a partnership:

1. The partner's transferable interest.
2. The partner's management and other rights.

The first right is discussed in this section. Partners' management and other rights are discussed in Chapter 38, Operation of Partnerships and Related Forms.

Note that a partner has no individual ownership rights in partnership property. The RUPA gives ownership of partnership property to the partnership only. Partners do, however, have the right to *use* partnership property for partnership purposes.

Partner's Transferable Interest Like a shareholder owning stock in a corporation, a partner owns his partnership interest. The only part of the partnership interest, however, that may be transferred to another person is the partner's **transferable interest**: the partner's share of profits and losses and his right to receive partnership distributions. The transferable interest may be transferred or sold to any other person. It may also be used as collateral to secure a partner's debt.

Transfer The sale or transfer of a partner's transferable interest is a voluntary act of the partner. It entitles the buyer or transferee to receive the partner's distributions from the partnership, such as a share of profits. Although the transferee is the owner of the transferable interest, the transferee does not become a partner of the partnership. The transferee has no right to inspect the partnership's books and records or to manage the partnership. The transferee's only other right is to ask a court to dissolve and wind up the partnership, but only if the partnership is at will (i.e., has no term or objective). If the partnership

dissolves and is wound up, the transferee will obtain the partner's claim against the partnership's assets.

By itself a partner's transfer of his transferable interest does not dissociate the partner from the partnership or effect a dissolution; the transferring partner remains a partner and may continue to manage the partnership.

The nontransferring partners may vote to expel the transferring partner from the partnership by their unanimous agreement (unless the partner merely granted a lien in the transferable interest to the partner's creditor), even if the term or objective of the partnership has not yet been met.

Charging Order A partner's personal creditor with a judgment against the partner may ask a court to issue a **charging order**—that is, an order charging all or part of the partner's transferable partnership interest with payment of the unsatisfied amount of the judgment. Unlike a transfer, a charging order is obtained without the partner's consent. As with a transfer, however, the partner remains a partner and may manage the partnership. The charging-order creditor is a lien creditor and is entitled to receive only the partner's share of the partnership distributions. If the distributions are insufficient to pay the debt, the creditor may ask the court to order foreclosure and to sell the partner's interest to satisfy the charging order.

Neither the issuance of a charging order nor the purchase of a transferable interest at a foreclosure sale dissociates the transferring partner from the partnership. But the purchaser of a transferable interest at the foreclosure sale becomes a transferee and therefore may ask a court to dissolve and wind up a partnership at will. The other partners may eliminate this potential threat to the continuation of the partnership by **redeeming the charging order**. To redeem a charging order, the other partners must pay the creditor the amount due on the judgment against the partner. If the other partners so choose, however, they may expel the partner suffering

the charging order by their unanimous agreement, even if the term or objective of the partnership has not been met.

Effect of Partnership Agreement The partners may believe that a partner's transferring her transferable partnership interest or suffering a charging order threatens the partnership. For example, they may believe that a partner may be less motivated to work for the partnership if the partner has transferred her partnership interest to a personal creditor, because she will not receive distributions from the partnership.

Consequently, the partners may restrict the transfer of a partner's transferable interest or impose negative consequences on a partner who transfers her transferable interest or suffers a charging order. For example, the partnership agreement may require a partner to offer to sell her partnership interest to the partnership prior to transferring it to any other person. Or the partnership agreement may effect a dissociation of any partner who suffers

a charging order and fails to redeem the charging order within 30 days.

Note that any transfer restriction must not unreasonably limit the ability of a partner to transfer her property interest. For example, a transfer restriction that bans the transfer of a partner's interest would be unreasonable and therefore unenforceable against a partner. In addition, a transfer restriction will not be enforceable against a transferee who does not have notice of the restriction.

Joint Venturers and Mining Partners Transfers of interests in joint ventures are treated in the same way as transfers of partnership interests. However, a mining partner's interest is *freely transferable*. The transferee becomes a partner with all the rights of ownership and management, and the transferor loses all of his partnership rights. The other mining partners cannot object to the transfer, and their consent to a transfer is not required.

Problems and Problem Cases

1. One of your clients, a motion picture producer, has asked your firm to invest \$2 million in her latest motion picture production, a movie based on the life of 1960s singing star Janis Joplin. In return for the contribution, your firm will receive a 10 percent interest in the limited partnership that will produce and own the movie. The movie is expected to be in preproduction for four years as rights to the subject matter, script, actors, and director are obtained. Production is expected to take three months, and postproduction editing and promotion will last another six months, after which the movie will be released into theaters domestically. Three months after its theater release, the movie will be released on pay-per-view and premium television channels like HBO. Six months after the theatrical release, the movie will be sold on DVD. As a consequence, the production company is not expected to make a profit for at least five years. Your client wants to form the production company as a limited partnership. Do you believe that the limited partnership is the right business form? What business form may be better? How would you set up that business form to make sure your firm's interests are best protected?
2. You and nine of your wealthy friends decide to purchase a local minor league baseball team. The purchase price is \$15 million, 60 percent of which you contribute to the business as capital. Your nine friends will contribute the remaining \$6 million. All 10 of you agree that you will be the sole general manager of the business, making all business and baseball decisions, except as you delegate them to employees of the business, such as a team manager or vice president of baseball operations. Due to the way you will account for the purchase of the team and player salaries, you expect the business not to make a profit until year four. You expect that all 10 of you will remain owners of the business for at least 10 years, at which time you expect to sell the team at a profit. Which business form do you believe is best for this business?
3. Rick Yurko frequently purchased lottery tickets from Phyllis Huisel at the coffee shop she operated. In February 1990, Yurko bought 100 scratch-off lottery tickets, which revealed instant winners when a film covering was scratched off. Yurko asked Phyllis, Judy Fitchie, and Frances Vincent to help him scratch off the tickets. Yurko stated that if they helped him, they would be his partners and share in any winnings. Judy uncovered a ticket that gave its owner a chance to be on television and win \$100,000. The owner had to complete a form on the back of the ticket and submit it for a drawing. Six tickets would be drawn for the TV appearance. Judy and Yurko urged Phyllis to fill out the ticket, but she did not want to appear on TV, so Yurko said he would.

After a discussion, Frances, Judy, Phyllis, and Yurko agreed that Yurko would represent them on TV. Yurko then printed on the back of the ticket “F. J. P. Rick Yurko.” F.J.P. stood for the first initials of Frances, Judy, and Phyllis. As Yurko completed the tickets, he told Phyllis that he was going to put all their initials and his name on the ticket and that they would be partners no matter what they might win.

You can predict what happened next. The ticket was drawn for the TV show, and Yurko appeared on the show and won the \$100,000 prize. He did not share the winnings with the three women. Were the three women able to share the winnings by proving they were partners with Yurko?

4. In August 2003, Tammy Duncan began working as a waitress at Bynum’s Diner, which was owned by her mother, Hazel Bynum, and stepfather, Eddie Bynum. Tammy, Hazel, and Eddie signed an agreement stating the following:

As of September 6th, 2003, I, Eddie Bynum, lease Bynum’s Diner to Hazel Bynum and Tammy Duncan for \$800 a month. I am completely out of it for 6 months, at which time they (Hazel Bynum and Tammy) have the option of renewing this contract for another 6 months. They are responsible for all repairs, taxes and expenses for Bynum’s Diner.

Tammy began doing paperwork and bookkeeping for the diner in addition to occasionally waiting tables and performing other duties. Tammy and Hazel’s intention in their agreement was to make Tammy a co-manager and not a co-owner of the business. Tammy understood that she would take over her stepfather’s duties as manager. She received wages for the performance of her duties. Although Tammy had no agreement to share in the diner’s profits, Hazel believed that she and Tammy were to split half of any profit. Hazel’s intent, however, was not to transfer ownership of the business to Tammy before Hazel retired, whenever that might be. On October 30, 2003, Tammy was injured when she slipped off a ladder and fell onto both knees. The diner’s insurer, Cypress Insurance Company, paid Tammy temporary total disability benefits beginning in November 2003. On April 2, 2004, however, Cypress notified Tammy that it would refuse to pay her disability claim on the grounds that she was not an employee of the diner, but a co-owner. Under the diner’s insurance policy with Cypress, if Duncan were an owner of the diner, she would not have been entitled to

workers’ compensation benefits, because she did not notify Cypress that she elected to be included under the policy’s coverage as a partner. Was Tammy a partner in the diner?

5. Ritesh Amani and Omur Ganesh purchased and operated two coin-operated car wash businesses, a self-storage warehouse facility, and two coin-operated laundromats. Amani contributed \$250,000 to the business venture, and Ganesh contributed \$50,000. Ganesh conducted the day-to-day management of the venture, including maintaining the facilities and collecting the coins from the car washes and laundromats. Before changing prices or signage for the businesses, however, Ganesh obtained Amani’s approval. Amani and Ganesh agreed that each would pay 50 percent of the expenses of the business, such as electricity, water, detergent, telephone, heat, and parts for repairs, with each paying his half by personal check. They also agreed to split 50–50 the cash receipts generated by the business. After two years, Amani and Ganesh had disagreements, and Ganesh chose to leave the business. At the time, the business’s net worth was \$740,000. Amani argued he owned the business and that Ganesh was only an employee. Ganesh argued that he was Amani’s partner and was entitled to 50 percent of the value of the business. Were Amani and Ganesh partners? Was Ganesh entitled to 50 percent of the value of the business?
6. John Williams was an assistant manager of a restaurant operated by Pizzaville, Inc. He was promoted to manager and later designated a managing partner with business cards describing him so. Williams’s compensation was a salary of \$270 per week plus 70 percent of the restaurant’s gross sales less the cost of food purchases and employees’ wages. Pizzaville fired Williams. Williams sued Pizzaville to receive a portion of the value of the restaurant business on the ground that he was a partner with Pizzaville. Was Williams a partner?
7. The parents of Michael Milano sought medical care from The Freed Group, including Dr. Jay Freed, Dr. Mitchell Kleinberg, and Dr. Stephanie Citerman. The three doctors were not, however, partners in fact. For several months after his birth, Michael was examined by all three doctors. His parents received a bill from the Freed group in which all three names were prominently displayed. When Dr. Freed and Dr. Kleinberg examined Michael, they misdiagnosed a serious

medical condition. On behalf of Michael, his parents sued all three doctors, including Dr. Citerman, even though she had not committed malpractice herself. Was Dr. Citerman held liable to Michael?

8. Karlsen Carmody and Estelle Reboloff were partners in a retail furniture store. Carmody contributed \$150,000 cash to the business, and Reboloff contributed \$100,000. Carmody purchased a delivery truck for the business using \$50,000 of partnership funds. The truck's certificate of title listed Carmody as the owner of the truck. The partnership used the truck for two years, during which time the partnership paid all property taxes and maintenance expenses on the truck. When the business became unprofitable, Carmody and Reboloff dissolved the partnership and sold its assets. Carmody argued that he owned the truck, and refused to share the proceeds of its sale with Reboloff. Was the truck a partnership asset?
9. Steve Holmes and his son Mike were partners in a construction business. Steve also owned a ranch, which he contributed to the partnership, even though Steve was still listed as the owner of record. Steve learned of a low-interest loan available for the purchase of property from a parent. Solely to obtain the benefits of the low-interest loan, Steve deeded the ranch to Mike. No money exchanged hands, however, and Mike never paid Steve or the partnership for the ranch. The transfer was not treated as a sale on Steve's or Mike's books, Mike did not claim ranch income as his own, and there were no changes in ranch operation. When Steve and Mike had disagreements, Steve asked a court to dissolve the partnership and to distribute its assets. Was the ranch an asset of the partnership or Mike?
10. Demas Yan and Dong Fu made an agreement to build condominiums on Yan's land in the Chinatown section of San Francisco. Their agreement provided that Yan would own 75 percent and Fu 25 percent of the property. Yan was responsible for the initial \$300,000 construction cost, and Fu the remainder. They agreed to share the proceeds of the sale or rental of the condominiums according to the ownership percentage. Fu, however, had sole power to decide whether to sell or to rent the property. Afterward, Fu assigned his interest under the agreement to Wei Suen. Thereafter, the condominiums were sold for a combined price of \$2.3 million. Was Suen entitled to a share of the condominium sale proceeds?

chapter 38

OPERATION OF PARTNERSHIPS AND RELATED FORMS

After many years working with a large consulting partnership, you and several of your business associates and friends decide to form your own consulting business as a limited liability partnership. You and five of your close friends have 20 to 25 years' experience in the consulting field. Each of you plans to contribute capital of \$400,000 to the business. Each of you has a strong national reputation and expects to attract most of the firm's clients, at least in the first few years. You six partners will manage only a few of the firm's consulting engagements, but you six will bring to the firm clients generating \$40,000,000 of annual revenue for the firm. Each of you also has experience managing consulting businesses, including expertise in personnel, financial, and marketing matters.

In addition, 15 other partners with 10 to 15 years' experience will join the new firm. Each of these 15 partners will contribute capital of \$200,000. They are expected to bring few clients to the firm at this time, but they are expected to service the firm's clients and to bring in new clients as their reputations and skills expand and as the six older partners retire. Chiefly, these 15 partners will take charge of consulting engagements. They will directly supervise the firm's 50 associate consultants. The associate consultants will not be partners when the partnership is formed, but some expect to be offered partnership status within 5 to 10 years.

- Why are those default rules inappropriate for this partnership?
- Write the compensation section of the partnership agreement. Accommodate the interests of all partners.

TWO RELATIONSHIPS ARE IMPORTANT during the operation of a partnership or limited liability partnership (LLP) business: (1) the relation of the partners to each other and the partnership; and (2) the relation of the partners to third parties who are affected by the business of the partnership. In the examination of the first relationship, partners owe duties to each other and the partnership and they share the management and profits of the partnership. As for the second relation, partners have the ability to make the partnership liable to third parties for contracts and torts.

Duties of Partners to the Partnership and Each Other

The relation between partners and the partnership is a fiduciary relation of the highest order. It is one of mutual trust, confidence, and honesty. Therefore, under the Revised Uniform Partnership Act (RUPA) partners owe to the partnership and each other the highest degree of *loyalty*. In addition, partners must act consistently with

the obligation of *good faith and fair dealing*. The duties partners owe each other are the same in ordinary partnerships and in limited liability partnerships.

Having Interest Adverse to Partnership Unless there is a contrary agreement, a partner's sole compensation from partnership affairs is a share of partnership profits. Therefore, a partner may not deal with the partnership when the partner has an interest adverse to the partnership or acts on behalf of another person with any adverse interest. For example, a partner may not profit personally by receiving an undisclosed kickback from a partnership supplier. In addition, a partner may not profit secretly when she makes a contract with her partnership, such as selling a building she owns to her partnership without disclosing her ownership and her profit to her partners.

When a partner receives a secret profit, she has a conflict of interests, and there is a risk that she may prefer her own interests over those of the partnership. Therefore, the law permits a partner to profit personally from partnership transactions only if she deals in good faith, makes a full disclosure of all material facts affecting the transaction, and obtains approval from her partners. The remedy for a breach of this duty not to make a secret profit is a return of the profit that she made in the transaction with the partnership.

Competing against the Partnership A partner may not compete against his partnership unless he obtains consent from the other partners. For example, a partner of a retail clothing store may not open a clothing store nearby. However, he may open a grocery store and not breach his fiduciary duty. The partnership has the remedy of recovering the profits of the partner's competing venture.

Partnership agreements often define what conduct constitutes competing with the partnership. For example, a partnership agreement of a large auditing firm may state that no partner may provide auditing services except on behalf of the partnership. It may also state that a partner may provide other accounting services not offered by the partnership after disclosure to and approval by the partnership's managing partners.

Duty to Serve The duty to serve requires a partner to undertake his share of responsibility for running the day-to-day operations of the partnership business. The basis of this duty is the expectation that all partners will work. Sometimes, this duty is termed the duty to devote full time to the partnership.

Partners may agree to relieve a partner of the duty to serve. So-called *silent partners* merely contribute capital to the partnership. Silent partners do not have the duty to serve, but they have the same liability for partnership debts as any other partner.

The remedies for breach of the duty to serve include assessing the partner for the cost of hiring a person to do his work and paying the other partners additional compensation.

Duty of Care In transacting partnership business, each partner owes a **duty of care**. A partner is not liable to her partnership for losses resulting from honest errors in judgment, but a partner is liable for losses resulting from her gross negligence, reckless conduct, intentional misconduct, or knowing violation of the law. A partner also has an obligation of good faith and fair dealing when acting for the partnership. Collectively, these duties mean that a partner must make an **investigation** before making a decision so that she has an adequate basis for making the decision. The decision she makes must be one she has **grounds to believe is in the best interests of the partnership**.

In the partnership agreement, the partners may reduce or increase the duty of care owed to the partnership. They may not, however, eliminate the duty of care. It is common for partnership agreements to excuse partners from liability if they act in good faith and with the honest belief that their actions are in the best interests of the partnership. Such a provision is designed to encourage honest partners to take reasonable business risks without fearing liability.

Duty to Act within Actual Authority A partner has the duty not to exceed the authority granted him by the partnership agreement or, if there is no agreement, the authority normally held by partners in his position. He is responsible to the partnership for losses resulting from unauthorized transactions negotiated in the name of the partnership. For example, suppose partners agree that no partner shall purchase supplies from Jasper Supply Company, which is unaware of the limitation on the partners' authority. When one partner purchases supplies from Jasper and the partnership suffers a loss because the supplies are of low quality, the wrongdoing partner must bear the loss caused by her breach of the partnership agreement.

Duty to Account Partners have a duty to account for their use or disposal of partnership funds and partnership property, as well as their receipt of any property,

benefit, or profit, without the consent of the other partners. Partnership property should be used for partnership purposes, not for a partner's personal use. In addition, a partner may not misappropriate a business opportunity in which the partnership had an interest or expectancy.

For example, when a partner of a firm that leases residential property to college students allows his daughter to live in a partnership-owned apartment, the partner must collect rent for the partnership from his daughter or risk breaching the duty to account.

Each partner owes a duty to keep a reasonable record of all business transacted by him for the partnership and to make such records available to the person keeping the partnership books. The books must be kept at the partnership's chief executive office. Every partner must at all times have access to them and may inspect and copy them.

Closely related to the duty to account is the right of a partner to be **indemnified** for payments made from personal funds and for personal liabilities incurred during the ordinary conduct of the business. For example, a partner uses her own truck to pick up some partnership supplies, which she pays for with her personal check. The partner is entitled to be reimbursed for the cost of the supplies and for her cost of picking up the supplies, including fuel.

Other Duties A partner must maintain the **confidentiality** of partnership information such as a trade secret or a customer list. This means a partner should not disclose to third parties confidential information of the partnership unless disclosure benefits the partnership.

On the other hand, each partner owes a duty to disclose to the other partners all information that is material to the partnership business. She also owes a duty to inform the partners of notices she has received that affect the rights of the partnership. For example, Gordon Gekko, a partner of a stock brokerage firm, learns that National Motors Corporation is projecting a loss for the current year. The projection reduces the value of National stock, which the firm has been recommending that its customers buy. Gekko has a duty to disclose the projection to his partners to allow them to advise customers of the brokerage.

In *Spector v. Konover*, a case you'll read after the next section, the court found a managing partner liable for misusing partnership funds, self-dealing, and failing to disclose material information.

Joint Ventures and Mining Partnerships The fiduciary duties of partners also exist in joint ventures and mining partnerships, although there

are a few special rules regarding their enforcement. For example, a joint venturer may seek an accounting in a court to settle claims between the joint venturers, or he may sue his joint venturers to recover joint property or to be indemnified for expenditures that he has made on behalf of the joint venture. A mining partner's remedy against his partners is an accounting; however, a mining partner has a lien against his partners' shares in the mining partnership for his expenditures on behalf of the mining partnership. The lien can be enforced against purchasers of his partners' shares.

Compensation of Partners

A partner's compensation for working for a partnership or limited liability partnership is a share of the profits of the business. The RUPA continues the UPA rule that a partner is not entitled to a salary or wages, even if he spends a disproportionate amount of time conducting the business of the partnership.

Profits and Losses Unless there is an agreement to the contrary, partners share partnership profits equally, according to the number of partners, and not according to their capital contributions or the amount of time that each devotes to the partnership. For example, a partnership has two partners, Juarez, who contributes \$85,000 of capital to the partnership and does 35 percent of the work, and Easton, who contributes \$15,000 and does 65 percent of the work. If they have made no agreement how to share profits, when the partnership makes a \$50,000 profit in the first year, each partner is credited with \$25,000, half of the profits.

Although the default RUPA rule allocates profits equally to partners, the partners do not necessarily *receive* profits earned by the partnership or LLP. Profits are *allocated* to each partner's capital account as profits are recognized by the business. Profits are *distributed* to partners in an amount and at a time determined by a majority of the partners. Consequently, in a partnership or LLP that is taxed like a partnership for federal income tax purposes, a partner may have taxable income despite not receiving a distribution from the partnership.

Losses When the partnership agreement is silent on how to share losses, losses are shared in the same proportion that profits are shared. The basis of this rule is the presumption that partners want to share benefits and detriments in the same proportions. Nonetheless, the presumption does not work in reverse. If a partnership

The Global Business Environment

Partner's Relations and Fiduciary Duties

All modern societies share a common set of values that are reflected not only generally in their laws but also specifically in partnership law. Thus, there is substantial agreement from nation to nation in the duties partners owe each other under partnership law. In India and the United Kingdom, for example, partners' duties are nearly identical in name and substance to those in American law. Likewise in Canada, basic values of loyalty, good faith, honesty, and avoidance of conflicts of interest are fundamental to a partner's duties.

In other societies, there are mostly similarities but also a few differences. For example, among the Inuit and other aboriginal groups in Canada, the culture requires partners to "celebrate one another." In his book, *Hunters in the Barrens: The Naskapi on the Edge of the White Man's World*, Georg Henriken notes that in a joint venture, while the Naskapi partners watch one another, examine contracts and bank statements, and even sue one another, they should respect and recognize their respective contributions.

agreement specifies how losses are shared but does not specify how profits are shared, profits are shared equally by the partners, not as losses are shared.

Examples For example, when there is no agreement regarding how profits or losses are shared, profits are shared equally, and because losses are shared like profits, losses are shared equally as well. When two partners agree to share profits 70–30 and make no agreement on losses, both profits and losses are shared 70–30.

However, when two partners make no agreement how to share profits but agree to share losses 60–40, losses are shared in that proportion but profits are shared equally.

Partners may agree to split profits on one basis and losses on another basis for many reasons, including their making different capital and personal service contributions or a partner's having higher outside income than the other partners, which better enables him to use a partnership loss as a tax deduction.

Effect of Agreement on Creditors' Rights Each partner has unlimited personal liability to partnership creditors. Loss-sharing agreements between partners do not bind partnership creditors unless the creditors agree to be bound. For example, two partners agree to share losses 60–40, the same proportion in which they contributed capital to the partnership. After the partnership assets have been distributed to the creditors, \$50,000 is still owed to them. The creditors may collect the entire \$50,000 from the partner who agreed to assume only 60 percent of the losses. That partner may, however, collect \$20,000—40 percent of the amount—from the other partner.

Compensation in Large Partnerships In a large accounting or other partnership that has thousands of partners, the partnership agreement often has a detailed section on the amount of partners' compensation and when it is paid. Usually, each partner is entitled to a monthly draw or salary. The amount of each partner's draw may be established yearly by the partnership's compensation committee or be determined by a rigid formula that takes into account a partner's capital contribution to the partnership, years of service as a partner, level of partner (such as managing partner, senior partner, or junior partner), area of practice (such as consulting, auditing, or tax), and other factors.

In addition, the compensation article will state how partners share profits and when profits are distributed to partners. While partners in a small partnership usually share profits according to each partner's capital contribution, in a large partnership the calculation may be very complex, including also the partner's area of practice, level of partner, and revenue received from a partner's clients. Usually, the profits are distributed four times a year, in January, April, June, and September, coinciding with the quarterly payment dates for estimated federal and state income taxes. In addition, the compensation articles will provide for partners' expense accounts, vacations and leaves, and other fringe benefits, such as health insurance.

In the following case, involving all-too-common overreaching and misconduct in a partnership with active and passive partners, the court found that the managing partner was not entitled to receive special compensation for managing the business, absent agreement of the other partners. The court also found that the managing partner breached several fiduciary duties, including by refusing to distribute a higher amount of partnership profits.

Spector v. Konover

747 A.2d 39 (Conn. Ct. App. 2000)

Martin Spector, Abner Rosenberg, Marvin Patron, and Simon Konover agreed to build a shopping plaza in Seymour, Connecticut. There was no written partnership agreement. The four orally formed Tri Town Realty Co., a partnership in which each partner received a 25 percent interest. Spector and Rosenberg contributed a land lease, while Patron and Konover were charged with building, operating, and managing the shopping plaza.

Konover and Patron initially managed the shopping plaza themselves, charging the partnership for any out-of-pocket expenses they incurred. Over time, as Konover and Patron amassed 20 or 30 shopping centers, they formed K and P Management Company. K and P Management hired managers and leasing agents to manage all of Konover and Patron's properties and charged management fees and leasing commissions to all of their properties, including Tri Town. Eventually, K and P Management was replaced by the Konover Management Corporation, which managed the Tri Town plaza for the last 10 years of the partnership.

Konover's duties in managing Tri Town included the preparation and distribution of monthly reports to each of the partners. In the early 1980s, Spector believed that Konover's reports did not adequately explain the finances of the partnership. Konover also determined the amount of money that was to be distributed to the partners as profit, and Spector felt that the amount being distributed was too low.

In June 1985, Spector requested an increase in the distributions. In September 1985, Konover increased the distributions from \$500 per month to \$1,200 per month. In February 1989, Spector again requested an increase in the distribution of profits and an explanation of various expenses appearing on the monthly report. Spector did not receive a response from Konover, and, in May 1989, Spector demanded that the partnership be terminated. Konover did not respond.

In April 1990, Konover stopped making profit distributions to Spector. In 1994, Spector hired a certified public accountant to review the financial records of the partnership. The accountant's review revealed that Konover did not maintain any account dedicated solely to the Tri Town partnership. Rather, the Tri Town partnership funds were commingled with funds from several other Konover entities, and all the funds were commingled in one account called the K and R Associates Trust Fund (K and R). The accountant further discovered that not only were the funds commingled in one account, but also the Tri Town funds were used by other properties owned by Konover. Even though Tri Town funds supposedly were kept in the K and R checking account, the balance of the entire K and R checking account actually was far less than the amount purported to be in the Tri Town partnership account. Additionally, interest earned on Tri Town funds was not credited to Tri Town's account.

Konover admitted to diverting funds between his various entities. He and several of his employees said that by sharing the funds in the K and R account, Konover could use one property's funds to cover expenses incurred by another property. For instance, if one property needed repairs but did not have enough cash to pay for the repairs, Konover would use cash from another property to pay for those repairs. It was, therefore, advantageous for him to commingle the funds of different Konover entities so that one property's funds could be used to cover an overdraft of another entity.

Spector sued Konover seeking damages stemming from Konover's alleged breaches of his fiduciary duties in managing the Tri Town partnership. The trial court found that Konover proved that he dealt with Spector fairly and breached no fiduciary duty. Spector appealed to the Appellate Court of Connecticut.

Foti, Judge

Konover's practice of diverting Tri Town funds to other entities and retaining interest earned on Tri Town partnership funds constitutes a breach of fiduciary duty. It is a thoroughly well-settled equitable rule that any one acting in a fiduciary relation shall not be permitted to make use of that relation to benefit his own personal interest. This rule is strict in its requirements and in its operation. It extends to all transactions where the individual's personal interests may be brought into conflict with his acts in the fiduciary capacity, and it works independently of the question whether there was fraud or whether there was good intention.

Konover's misuse of partnership property is a clear case of self-dealing and a violation of his fiduciary duty to Spector. As

managing partner, Konover held a unique position of responsibility within the partnership. Spector trusted Konover to act in the best interest of the partnership. Instead, he used partnership funds to finance other entities owned by Konover and retained interest generated by Tri Town funds. This misuse of partnership funds for Konover's personal financial gain clearly constitutes a breach of fiduciary duty.

Spector also claims that Konover's commingling scheme affected his decisions regarding the disbursement of profits to the Tri Town partners. We agree with Spector and conclude that Konover's failure to make greater distributions of profits was a breach of his fiduciary duty. His proffered reason for withholding disbursements was that he wanted to create a large cash

reserve to cover any expenses that might have arisen from the bankruptcy of one of Tri Town's largest tenants, Ames. According to the facts presented at trial, however, Konover did not actually maintain a reserve account dedicated to potential expenses related to Ames' bankruptcy. Rather, he continued the practice of diverting Tri Town funds to cover the expenses of other Konover properties. It is clear that his decision to withhold the disbursement of profits was, at least in part, motivated by his desire to use Tri Town funds to finance other Konover entities. This, too, was a breach of his fiduciary duty.

Spector also claims that Konover breached his fiduciary duty by billing the Tri Town partnership for management fees, leasing commissions, payroll maintenance fees, and undisclosed overhead charges included in Tri Town's insurance premiums. We agree. One of the factors to consider in determining whether a particular transaction is fair is whether the principal had competent and independent advice before completing that transaction. Implicit in this factor is the idea that the principal must consent to the transaction. With regard to the management fees and leasing commissions that Konover charged the partnership, the court found that there never were any meetings or partnership votes giving them the right to receive such compensation. In the absence of any agreement to the contrary,

Konover and his management company were not entitled to any compensation, other than reimbursement for out-of-pocket expenses, for managing Tri Town. General Statutes § 34-335(c) provides that a partner is to be reimbursed for out-of-pocket partnership expenses. General Statutes § 34-335(h) provides in relevant part that "[a] partner is not entitled to remuneration for services performed for the partnership. . . ."

Even after Spector complained to Konover about the management fees, Konover began charging the partnership an additional "payroll maintenance fee." These new fees were clearly not authorized by Spector. Additionally, the insurance premiums charged to Tri Town included undisclosed overhead costs that were paid to another Konover entity. Thus, Konover did not make a free and frank disclosure of all the relevant information.

Konover, without the formal consent of his partners, compensated himself for managing Tri Town. He also added hidden charges to the insurance premiums charged to Tri Town. These acts of self-dealing were in breach of his fiduciary duty. Thus, we conclude that the trial court's finding that Konover proved fair dealing by clear and convincing evidence was clearly erroneous.

Judgment reversed in favor of Spector.

Management Powers of Partners

Individual Authority of Partners In a partnership or limited liability partnership, every partner is a general manager of the business and may make contracts that bind the partnership. This power is expressed in the RUPA, which states that a partnership is bound by the act of every partner for apparently carrying on in the ordinary course the business of the partnership or business of the kind carried on by the partnership. Such authority to make contracts derives from the nature of the business. It permits a partner to bind the partnership and his partners for acts within the ordinary course of business. The scope of this **implied authority** is determined with reference to what is usual business for partnerships of the same general type.

Implied authority of a partner may not contradict a partner's **express authority**, which is created by agreement of the partners. An agreement among the partners can expand, restrict, or even completely eliminate the implied authority of a partner. For example, the partners in an online publishing business may agree that one

partner shall have the authority to purchase a magazine business for the partnership and that another partner shall not have the authority to sell advertising space. The partners may agree also that all partners must consent to borrow money for the partnership. The partners' implied authority to be general managers is modified in accordance with these express agreements.

Express authority may be stated orally or in writing, or it may be obtained by acquiescence. Regardless of the method of agreement, all of the partners must agree to the modification of implied authority. Partners may give everyone notice of a partner's authority or limitation on a partner's authority by filing a **Statement of Partnership Authority** or **Statement of Denial** with the secretary of state or the real estate recording office. Together, a partner's express and implied authority constitute her **actual authority**.

Apparent Authority Apparent authority exists because it reasonably appears to a third party that a partner has authority to do an act. Often, the implied authority and apparent authority of a partner are coincident. However, when a partner's implied authority is restricted or eliminated, the partnership risks the possibility that **apparent**

authority to do a denied act will remain. To prevent apparent authority from continuing when there is a limitation of a partner's actual authority, third persons with whom the partner deals must have knowledge of the limitation of his actual authority or have received notification of the limitation, such as receiving an e-mail or fax or otherwise having the limitation brought to their attention. Filing a Statement of Partnership Authority or Statement of Denial may help notify third parties of a partner's limited authority. Just as a principal must notify third persons of limitations of an agent's authority, so must a partnership notify its customers, suppliers, and others of express limitations of the actual authority of partners.

Suppose that Carroll, Melton, and Ramirez are partners and that they agree that Carroll will be the only purchasing agent for the partnership. This agreement must be communicated to third parties selling goods to the partnership, or Melton and Ramirez will have apparent authority to bind the partnership on purchase contracts. Melton and Ramirez do not have express authority to purchase goods, because they have agreed to such a restriction on their authority. They do not have implied authority to purchase, because implied authority may not contradict express authority.

Ratification A partnership may ratify the unauthorized acts of partners. Essentially, **ratification** occurs when the partners accept an act of a partner who had no actual or apparent authority to do the act when it was done.

For example, suppose Cabrillo and Boeglin are partners in an accounting firm. They agree that only Cabrillo has authority to make contracts to perform audits of clients, an agreement known by Mantron Company. Nonetheless, Boeglin and Mantron contract for the partnership to audit Mantron's financial statements. At this point, the partnership is not liable on the contract, because Boeglin has no express, implied, or apparent authority to make the contract. But suppose Boeglin takes the contract to Cabrillo, who reads it and says, "OK, we'll do this audit." Cabrillo, as the partner with express authority to make audit contracts, has ratified the contract and thereby bound the partnership to the contract.

Special Transactions The validity of some partner's actions is affected by special partnership rules that reflect a concern for protecting important property and the credit standing of partners. This concern is especially evident in the rules for conveying the partnership's real property and for borrowing money in the name of the partnership.

Power to Convey Partnership Real Property To bind the partnership, an individual partner's conveyance of a partnership's real property must be expressly, impliedly, or apparently authorized or be ratified by the partnership. For example, the partners may expressly agree that a partner may sell the partnership's real property.

The more difficult determination is whether a partner has *implied* and *apparent* authority to convey real property. A partner has implied and apparent authority to sell real property if a partnership sells real property in the usual course of the partnership business. Such would be the case with the partner of a real estate investment partnership that buys and sells land as its regular business. By contrast, a partner has no implied or apparent authority to sell the building in which the partnership's retail business is conducted. Here, unanimous agreement of the partners is required, since the sale of the building may affect the ability of the firm to continue. In addition, a partner has no implied or apparent authority to sell land held for investment not in the usual course of business. A sale of such land would be authorized only if the partners concurred.

When title to partnership real property is recorded in the name of the partners and not the partnership, those partners in whose name title is recorded have apparent authority to convey title to a bona fide purchaser unaware of the partnership's interest in the real property. However, purchasers are deemed to have knowledge of a limitation on a partner's authority to convey real property that is contained in a Statement of Partnership Authority or Statement of Denial that is filed in the real estate recording office.

Borrowing Money Partnership law restricts the ability of a partner to borrow money in the name of a partnership. Essentially, a partner must possess express, implied, or apparent authority to borrow. Express authority presents few problems. Finding implied and apparent authority to borrow is more difficult.

Although the RUPA does not explicitly recognize the distinction, a number of courts have distinguished between trading and nontrading partnerships for purposes of determining whether a partner has implied or apparent authority to borrow money on behalf of the partnership. A **trading partnership** has an inventory; that is, its regular business is buying and selling merchandise, such as retailing, wholesaling, importing, or exporting. For example, a toy store and a clothing store are trading partnerships. Since there is a time lag between the date they pay for their inventory and the date they sell inventory to their customers, these firms ordinarily need to borrow to avoid cash flow problems. Therefore, a partner of a

trading partnership has implied and apparent authority to borrow money for the partnership.

A **nontrading partnership** has no substantial inventory and is usually engaged in providing services—for example, accounting services or real estate brokerage. Such partnerships have no normal borrowing needs. Therefore, a partner of a nontrading partnership has no implied or apparent authority to borrow money for the partnership.

The distinction between trading and nontrading partnerships is not always clear. Businesses such as general contracting, manufacturing, and dairy farming, although not exclusively devoted to buying and selling inventory, have been held to be trading partnerships. The rationale for their inclusion in this category is that borrowing is necessary in the ordinary course of business to augment their working capital.

This suggests why the distinction between trading partnerships and nontrading partnerships is useless or misleading. There is no necessary connection between borrowing money and buying and selling. The more important inquiry should be whether a partner's borrowing is in the ordinary course of business. When borrowing is in the ordinary course of business, a partner has implied and apparent authority to borrow money. If borrowing is not in the ordinary course of business, then no individual partner has implied or apparent authority to borrow money.

If a court finds that a partner has authority to borrow money, the partnership is liable for his borrowings on behalf of the partnership. There is a limit, however, to a partner's capacity to borrow. A partner may have authority to borrow, yet borrow beyond the ordinary needs of the business. A partnership will not be liable for any loan whose amount exceeds the ordinary needs of the business, unless otherwise agreed by the partners.

The power to borrow money on the firm's credit will ordinarily carry with it the power to grant the lender a lien or security interest in firm assets to secure the repayment of the borrowed money. Security interests are a normal part of business loan transactions.

Issuing Negotiable Instruments A partner who has the authority to borrow money also has authority to issue negotiable instruments such as promissory notes for that purpose. When a partnership has a checking account and a partner's name appears on the signature card filed with the bank, the partner has express authority to draw checks. A partner whose name is not on the signature card filed with the bank has apparent authority to issue checks, but only in respect to a third person who has no knowledge or notification of the limitation on the partner's authority.

Negotiating Instruments A partnership receives many negotiable instruments during the course of its business. For example, an accounting firm's clients often pay fees by check. Even though borrowing money and issuing negotiable instruments may be beyond a partner's implied and apparent authority, a partner usually has implied and apparent authority to transfer or negotiate instruments on behalf of the partnership.

For example, when a partnership has a bank account, a partner has implied and apparent authority to indorse and deposit in the account checks drawn payable to the partnership. As a general rule, a partner also has implied and apparent authority to indorse and cash checks drawn payable to the order of the partnership. Likewise, partners have implied authority to indorse drafts and notes payable to the order of the partnership and to sell them at a discount.

Admissions and Notice A partnership is bound by admissions or representations made by a partner concerning partnership affairs that are within her express, implied, or apparent authority. Likewise, notice to a partner is considered to be received by the partnership. Also, a partner's knowledge of material information relating to partnership affairs is **imputed** to the partnership. These rules reflect the reality that a partnership speaks, sees, and hears through its partners.

Disagreement among Partners: Ordinary Course of Business Usually, partners will discuss management decisions among themselves before taking action, even when doing so is not required by a partnership agreement and even when a partner has the implied authority to take the action by herself. When partners discuss a prospective action, they will usually vote on what action to take. Under the default RUPA rules, each partner has one vote, regardless of the relative sizes of their partnership interests or their shares of the profits. On matters in the ordinary course of business, the vote of a majority of the partners controls ordinary business decisions and, thereby, limits the actual authority of the partners. Nonetheless, the apparent authority of the partners to bind the partnership on contracts in the ordinary course of business is unaffected by the majority vote of partners, unless the limitation on the partners' actual authority is communicated to third parties.

When Unanimous Partners' Agreement Required Some partnership actions are so important that one partner should not be able to do them by himself. To make clear that no single partner has

implied or apparent authority to do certain acts, in the absence of a contrary agreement, the UPA requires unanimity for several actions. The RUPA, however, deletes such a list. Instead, the RUPA requires that any partnership act not in the ordinary course of business be approved by all partners, absent a contrary agreement of the partners.

For example, a decision to build a new executive office complex must be approved by all partners. Similarly, the decision of a small accounting partnership in Sacramento to open a second office in San Jose would require unanimity. When other actions, such as submitting a partnership claim to arbitration, are in the ordinary course of business, any partner has authority to do the actions.

Joint Ventures and Mining Partnerships

Most of the authority rules of partnerships apply to joint ventures and mining partnerships. These business organizations are in essence partnerships with limited purposes. Therefore, their members have less implied and apparent authority than do partners. Joint venturers have considerable apparent authority if third persons are unaware of the limited scope of the joint venture. A mining partner has no implied authority to borrow money or issue negotiable instruments. As with partners, joint venturers and mining partners may by agreement expand or restrict each other's agency powers.

Effect of Partnership Agreement

The partners may modify the rules of management by their unanimous agreement. They may agree that a partner will relinquish his management right, thus removing the partner's express and implied authority to manage the partnership. They may grant sole authority to manage the business to one or more partners. Such removals or delegations of management powers will not, however, eliminate a partner's apparent authority to bind the partnership for his acts within the usual course of business unless a third party has knowledge or notification of the limitation.

A partnership agreement may create classes of partners, some of which will have the power to veto certain actions. Some classes of partners may be given greater voting rights. Unequal voting rights are often found in very large partnerships, such as an accounting firm with hundreds or thousands of partners.

For example, in a large accounting partnership, the partnership agreement will have a management section. This section usually begins with a restatement of the RUPA fiduciary duties that partners owe to the partnership, with exceptions or revisions, such as changes in the duty of care. The section also lists the duties of the partnership to the partners, such as the duty to indemnify.

Regarding the authority of partners, the management articles may give a managing partner or a managing partners' committee control over much of the firm's day-to-day management, such as the hiring, firing, and promotion of employees, investing the firm's excess cash, and drawing and indorsing partnership checks. The managing partners or a compensation committee may be given power to determine the partners' draws or salaries. Individual partners may have most of their management powers taken away but may be granted the power to hire a personal assistant or to make expenditures within limits from an expense account, such as buying a laptop computer. Other matters may require approval of all the partners (such as selling the partnership's real property and moving the partnership's place of business), a supermajority of partners (such as 75 percent approval to bind the partnership to a bank loan), a majority of partners (such as installing new carpeting), or the partners in a particular area of practice (such as requiring approval of a majority of consulting partners for a consulting engagement over \$1,000,000).

In small partnerships of 10 or fewer partners, the partnership agreement often requires unanimous partners' agreement for many actions, such as hiring employees and making large contracts. In small partnerships, these and other actions have a greater impact on each partner. This impact is evident in the next case, *NBN Broadcasting*, in which a partnership agreement that was designed to prevent and resolve conflicts between the two partners eventually caused serious disagreements. The partners wanted to be equal essentially, but a deadlock provision allowed one partner to dominate, eventually causing a breakdown of the partners' relationship. It illustrates the necessity for careful drafting of partnership agreements, including anticipating that a part of the agreement may cause an undesired result.

NBN Broadcasting, Inc. v. Sheridan Broadcasting Networks, Inc. 105 F.3d 72 (2d Cir. 1997)

NBN Broadcasting, Inc., and Sheridan Broadcasting Networks, Inc., operated competing radio networks. In 1991, NBN and Sheridan agreed to form American Urban Radio Network (AURN), a Pennsylvania partnership that combined NBN's and Sheridan's networks. Sheridan owned 51 percent of the partnership; NBN owned 49 percent. They agreed to maintain NBN's offices in New York and Sheridan's offices in Pittsburgh to allow direct oversight and input by AURN's cochairmen and

co-CEOs, Sydney Small (chairman of NBN) and Ronald R. Davenport (chairman of Sheridan). NBN and Sheridan wanted equal rights in management of the partnership. The partners' equal right to manage AURN was modified by the partnership agreement in sections 5.2 and 5.3. Section 5.2 created a five-member Management Committee comprising two members selected by NBN and two by Sheridan; a seat on the Management Committee was to be vacant and would be filled only when the Management Committee was deadlocked. Section 5.2 also provided:

The Management Committee shall be responsible for the following functions of the partnership and contractual arrangements relating thereto:

- (i) Sales and marketing;
- (ii) Promotions and public relations;
- (iii) Affiliate relations and compensation;
- (iv) Network programming;
- (v) Personnel administration; and
- (vi) Budgeting, accounting, and finance.

Section 5.3 provides:

(a) In the event that three of the four members of the Management Committee are unable to reach agreement on any issue or issues relating to items (i) through (v) above and remain so unable for a period of thirty days, then Ronald R. Davenport, Chairman of Sheridan, shall have the right to fill the vacant seat on the Management Committee for the purpose of reaching an agreement, and only until an agreement is reached, on such issue or issues.

Section 5.3 did not authorize appointment of a fifth member of the Management Committee when there was a deadlock regarding budgeting, accounting, or finance or any matter other than those listed in Section 5.2(i) through (v). As to budgeting, accounting, and finance and matters not listed in Section 5.2(i) through (v), NBN and Sheridan were equal partners, and all decisions on such matters required their agreement.

At a Management Committee meeting on September 14, 1995, Davenport proposed that AURN open an expensive new office in Washington, D.C., hire Skip Finley as chief operating officer, and employ Richard Boland. When NBN's representatives opposed opening the new office and hiring Finley and Boland, Davenport scheduled a meeting solely to appoint a fifth member to break the deadlock. On September 15, NBN asked a Pennsylvania state trial court to grant a preliminary injunction and a permanent injunction against Sheridan's opening a new AURN office in Washington and hiring Finley and Boland, on the grounds that the proposals related to budgeting, accounting, and finance and were, therefore, not subject to the deadlock voting provision. On October 13, the state trial court denied NBN's motion for a preliminary injunction. The state trial court held that Sheridan had the right to invoke the deadlock provision to "make additions to personnel" by hiring Finley and Boland. The trial court did not rule on NBN's request for a permanent injunction.

At an October 16 Management Committee meeting, Davenport appointed a fifth member of the committee. By a 3–2 vote, the Management Committee voted to hire Finley and Boland, with NBN's representatives opposing. At that meeting, Davenport also proposed to relocate AURN's New York offices from NBN's office space in New York to other office space in the New York area; to transfer to Pittsburgh from New York AURN's traffic, billing, and collection functions; and to require Finley to make cuts in AURN's New York-based marketing and research personnel. NBN's representatives opposed the proposals, and Davenport scheduled a meeting on November 28 to break the deadlock.

Sensing that the Pennsylvania state trial court would dismiss its request for a permanent injunction and hoping to litigate the issues at a later time, NBN sought to withdraw its motion for a permanent injunction. On November 28, 1995, while the state trial court judge was considering NBN's request to withdraw its lawsuit, a meeting of AURN's Management Committee was held. Davenport again invoked the deadlock provision and appointed his son as fifth member of the Management Committee. By a 3–2 vote, the Management Committee agreed to relocate AURN's New York offices from NBN's office space, to transfer AURN functions to Pittsburgh from New York, and to authorize Finley to make cuts in AURN's New York-based marketing and research personnel. Davenport also proposed to promote Finley to chief executive officer and Boland to vice president of administration. NBN Chairman Small objected, and Davenport scheduled another meeting to break the deadlock.

On November 29 and 30, the state trial court, wanting to put "a final end to this unnecessary litigation," ordered the discontinuance of NBN's lawsuit with prejudice, meaning that NBN could appeal the ruling to an appellate court but would not be permitted to have another trial court litigate the same issues. NBN chose not to appeal the decision of the Pennsylvania state trial court.

After the November 28 meeting, Sheridan located new office space for AURN in New York and entered a new lease with a minimum annual liability of \$900,000, yet Sheridan never revealed the location of the space to NBN or sought NBN approval of the relocation or new lease. On January 18, 1996, at the next Management Committee meeting, Davenport again appointed his son as the fifth member. By a 3–2 vote, with NBN’s representatives opposing, the Management Committee appointed Finley as CEO and Boland as vice president of administration.

On January 31, 1996, NBN filed a federal lawsuit seeking an injunction against Sheridan’s alleged violations of the equal management rights of the partners by hiring Finley and Boland, interfering with AURN’s personnel and customer relations, and relocating AURN’s New York offices. Sheridan asked the federal district court to dismiss the suit on the grounds of *res judicata*; that is, Sheridan argued that NBN was raising legal issues that the Pennsylvania state trial court had already considered or that NBN should have brought to the Pennsylvania trial court. Thus, Sheridan argued, because the Pennsylvania trial court had already dismissed NBN’s request for an injunction with prejudice, the federal district court should not reconsider these issues. The federal district court agreed with Sheridan and dismissed NBN’s lawsuit. NBN appealed to the federal court of appeal.

Pollack, Judge

A discontinuance with prejudice is deemed a final adjudication on the merits for *res judicata* purposes on the claims asserted or which could have been asserted in the suit. Any issue concerning the relocation of the New York Office could not have been raised in the State Court suit commenced on September 15, 1995, or until the voting deadlock thereon on November 28, 1995. The NBN claim on the relocation of the New York Office was a claim based on new conduct that could have only arisen long after the filing of NBN’s State Court suit. Since a plaintiff has no obligation to expand its suit in order to add a claim that it could not have asserted at the time the suit was commenced, a later suit based on subsequent conduct is not barred by *res judicata*.

The *res judicata* effect is limited to those claims that had arisen at the time that NBN brought the State Court action.

They did not include the relocation of the New York Office, which had not yet even been brought to an initial vote. There was no submission to the State Court of NBN’s equal right to decide whether the New York Office should be moved from its existing location as part of NBN’s premises.

The doctrine of *res judicata* embraces all claims of NBN, excluding those claims relating to the relocation of the New York Office, which were passed on by the Management Committee prior to the filing of NBN’s State Court action; the claims asserted therein and the dismissal thereof on the grounds of *res judicata* is affirmed.

Judgment for Sheridan affirmed in part; judgment in part reversed in favor of NBN. Remanded to the district court.

LOG ON

Model Partnership Agreements
www.mhhe.com/mallor14e

Go to your textbook’s Web site above to find a model partnership agreement. Note that the agreement repeats the fiduciary duties we studied. A well-drafted partnership agreement will expand that section to make clear what each duty covers, such as stating what activities constitute competition with the partnership. In England and India, partnership agreements are called partnership deeds. See an example at www.thebharat.com/legal/agreements/partnershipdeed.html.

There are several commercial Web sites that sell model partnership agreements. One is FindLegalForms.com. See a list of partnership agreements for sale at www.findlegalforms.com/forms/partnership.

Liability for Torts and Crimes

Torts The standards and principles of agency law’s *respondeat superior* are applied in determining the liability of the partnership and of the other partners for the torts of a partner and other partnership employees. See Chapter 36. In addition, the partnership and the other partners are liable jointly and severally for the torts of a partner committed within the ordinary course of partnership business or within the authority of that partner. Finally, when a partner commits a breach of trust, the partnership and all of the partners are liable. For example, all of the partners in a stock brokerage firm are liable for a partner’s embezzlement of a customer’s securities and funds.

Ethics in Action

You and your friends consider forming a consulting partnership. If you form the business as a partnership, each partner has personal liability for all the contacts and torts of the partnership. If you form the business as an LLP, in general you and the other partners have no liability for partnership obligations beyond the assets of the LLP, that is, beyond each partner's equity interest in the business.

- As your form of business, will you choose the partnership or LLP?

- Is it ethical to be an LLP partner and to have liability limited to your equity interest in the LLP? Would a profit maximizer find it ethical to form an LLP? Would a utilitarian or rights theorist find it ethical?
- Suppose that a bank knows the business is an LLP, lends money to the LLP, but does not obtain the LLP partners' individual promises to repay the loan. Is it ethical that the LLP partners are not liable to the bank on the loan if the LLP's assets are insufficient to repay the loan?

Intentional Torts While a partnership and its partners are usually liable for a partner's negligence, they usually have no liability for a partner's intentional torts. The reason for this rule is that intentional torts are not usually within the ordinary scope of business or within the ordinary authority of a partner.

A few intentional torts impose liability on a partnership and its partners. For example, a partner who repossesses consumer goods from debtors of the partnership may trespass on consumer property or batter a consumer. Such activities have been held to be in the ordinary course of business. Also, a partner who authorizes a partner to commit an intentional tort is liable for such torts.

Partners' Remedies When a partnership and the other partners are held liable for a partner's tort, they may recover the amount of their vicarious liability from the wrongdoing partner, but only if the partner fails to comply with the fiduciary duty of care. For example, in the *Moren* case, which follows the next section, although a partner caused the harm for which the partnership was liable, she was not grossly negligent or reckless in causing the harm. Therefore, it was appropriate to deny the partnership a recovery against the partner and to require the partnership to assume ultimate liability to the victim.

Tort Liability and Limited Liability Partnerships State legislatures created the limited liability partnership (LLP) as a means of reducing the personal liability of professional partners, such as accountants. Consequently, an innocent partner of an LLP has no liability for the professional malpractice of his partners. LLP statutes grant partners broad protection, eliminating an innocent partner's liability for errors, omissions, negligence, incompetence, or malfeasance of his partners or employees.

Under the RUPA, the protection afforded LLP partners is even broader. LLP partners have no liability for other debts of the business, such as a supplier's bill, lease obligations, and bank loans.

That is the limit of protection, however. The LLP itself is liable for the tort of a wrongdoing partner or employee under the doctrine of *respondeat superior*. In addition, a wrongdoing partner is liable for his own malpractice or negligence. Also, the partner supervising the work of the wrongdoing partner may have unlimited liability for the wrongdoing partner's tort. Thus, the LLP's assets, the wrongdoing partner's personal assets, and the supervising partner's personal assets are at risk.

Crimes When a partner commits a crime in the course and scope of transacting partnership business, rarely are his partners criminally liable. But when the partners have participated in the criminal act or authorized its commission, they are liable. They may also be liable when they know of a partner's criminal tendencies yet place him in a position in which he may commit a crime.

Until recent times, a partnership could not be held liable for a crime in most states because it was not viewed as a legal entity. However, modern criminal codes usually define a partnership as a "person" that may commit a crime when a partner, acting within the scope of his authority, engages in a criminal act.

Lawsuits by and against Partnerships and Partners

Under the RUPA, a partnership may sue in its own name. Since suing someone is usually an ordinary business decision, ordinarily any partner has authority to initiate a lawsuit.

The RUPA also permits a partnership to be sued in its own name. Partners may also be sued individually on partnership obligations. Partners are jointly and severally liable for partnership obligations, whether based in contract or tort. This means that in addition to suing the partnership, a creditor may sue all of the partners (jointly) or sue fewer than all the partners (severally). If a creditor sues the partnership and all of the partners, the judgment may be satisfied from the assets of the partnership and, if partnership assets are exhausted, from the assets of the partners. If the partnership and fewer than all the partners are sued severally, the judgment may be satisfied only from the assets of the partnership and the assets of the partners sued. Again, partners cannot be required to pay until partnership assets have been exhausted.

When fewer than all the partners are sued and made to pay a partnership obligation, the partners paying may seek **indemnification** and **contribution** from the other partners for their shares of the liability.

Limited Liability Partnerships For LLP partners, only the LLP is liable on a contractual obligation, and only the LLP may be sued on such a claim. For tort obligations, the LLP is liable as well as the partner who committed the tort. LLP partners who had no role in the commission of the tort have no liability.

The following case, *Moren v. JAX Restaurant*, found a partnership liable to a partner's child who was injured as a result of the parent-partner's negligence.

Moren v. JAX Restaurant

679 N.W.2d 165 (Minn. Sup. Ct. 2004)

Nicole Moren and her sister Amy Benedetti were partners in the JAX Restaurant in Foley, Minnesota. One afternoon in October 2000, Nicole completed her day shift at JAX and left to pick up her two-year-old son, Remington, from day care. She returned to the restaurant with Remington after learning that Amy needed help. Nicole called her husband, Martin, who told her that he would pick Remington up in about 20 minutes. Because Nicole did not want Remington running around the restaurant, she brought him into the kitchen with her, set him on top of the counter, and began rolling out pizza dough using the dough-pressing machine. As she was making pizzas, Remington reached his hand into the dough press. His hand was crushed, and he sustained permanent injuries.

On behalf of his son, Martin sued the partnership for damages, alleging that it negligently caused Remington's injuries. The partnership then brought a legal action against Nicole, claiming that if it was obligated to compensate Remington, the partnership was entitled to indemnity or contribution from Nicole for her negligence in allowing Remington to be on the counter where he could be injured by the pizza press.

The district court issued a summary judgment for Nicole on the grounds that she had no obligation to indemnify JAX Restaurant so long as the injury occurred while she was engaged in ordinary business conduct. The district court also rejected JAX Partnership's argument that its obligation to compensate Remington was reduced by the negligence of Nicole as a mother. JAX Partnership appealed to the Minnesota Supreme Court.

Crippen, Judge

Under Minnesota's Revised Uniform Partnership Act of 1994, a partnership is an entity distinct from its partners, and as such, a partnership may sue and be sued in the name of the partnership. Minn. Stat. § 323A.3–07; RUPA § 307. “A partnership is liable for loss or injury caused to a person . . . as a result of a wrongful act or omission, or other actionable conduct, of a partner acting in the ordinary course of business of the partnership or with authority of the partnership.” Minn. Stat. § 323A.3–05(a); RUPA § 305(a). Accordingly, a “partnership shall . . . indemnify a partner for liabilities incurred by the partner in the ordinary course of the business of the partnership. . . .” Minn. Stat. § 323A.4–01(c); RUPA § 401(c). Stated conversely, an “act of a partner which is not apparently for carrying on in the ordinary course the partnership business or business of the kind carried

on by the partnership binds the partnership only if the act was authorized by the other partners.” Minn. Stat. § 323A.3–01(2) (2002); RUPA § 301(2). Thus, under the plain language of the RUPA, a partner has a right to indemnity from the partnership, but the partnership's claim of indemnity from a partner is not authorized or required.

The district court correctly concluded that Nicole Moren's conduct was in the ordinary course of business of the partnership and, as a result, indemnity by the partner to the partnership was inappropriate. It is undisputed that one of the cooks scheduled to work that evening did not come in, and that Moren's partner asked her to help in the kitchen. It also is undisputed that Moren was making pizzas for the partnership when her son was injured. Because her conduct at the time of the injury was in the ordinary course of business of the partnership, under the

RUPA, her conduct bound the partnership and it owes indemnity to her for her negligence.

JAX Partnership heavily relies on one foreign case for the proposition that a partnership is entitled to a contribution or indemnity from a partner who is negligent. See *Flynn v. Reaves*, 135 Ga. App. 651, 218 S.E.2d.661 (Ga. Ct. App. 1975). In *Flynn*, the Georgia Court of Appeals held that “where a partner is sued individually by a plaintiff injured by the partner’s sole negligence, the partner cannot seek contribution from his co-partners even though the negligent act occurred in the course of the partnership business.” But this case is inapplicable because the Georgia court applied common law partnership and agency principles and makes no mention of the RUPA, which is the law in Minnesota.

JAX Partnership also claims that because Nicole Moren’s action of bringing Remington into the kitchen was partly motivated by personal reasons, her conduct was outside the ordinary course of business. There is no Minnesota authority regarding

this issue. But there are two cases from outside of Minnesota that address the issue in a persuasive fashion. *Grotelueschen v. Am. Family Ins. Co.*, 171 Wis. 2d 437, 492 N.W.2d 131, 137 (Wis. 1992) (An “act can further part personal and part business purposes and still occur in the ordinary course of the partnership.”); *Wolfe v. Harms*, 413 S.W.2d 204, 215 (Mo. 1967) (“Even if the predominant motive of the partner was to benefit himself or third persons, such does not prevent the concurrent business purpose from being within the scope of the partnership.”). Adopting this rationale, we conclude that the conduct of Nicole Moren was no less in the ordinary course of business because it also served personal purposes. It is undisputed that Moren was acting for the benefit of the partnership by making pizzas when her son was injured, and even though she was simultaneously acting in her role as a mother, her conduct remained in the ordinary course of the partnership business.

Judgment for Nicole Moren affirmed.

Problems and Problem Cases

1. Kyle Jauretz and Galina Marvano formed JM Solutions, a partnership that managed events for business clients. Jauretz had been an event manager for several years, and he insisted before the partnership was formed that Marvano agree that Jauretz could keep several clients to himself and not share the revenue or profits from those clients with Marvano. One such client was Bay Shores LLC, a golf community for which Jauretz had managed an annual golf tournament. When Jauretz was working for Bay Shores LLC, his personal client, he needed additional staff to manage the event. Jauretz directed two JM Solutions employees to work full-time on the Bay Shores event, which they did for three weeks. JM Solutions continued to pay the employees’ wages while they worked on the Bay Shores event. Jauretz also used JM Solutions assets, including stakes and ropes, in the course of managing the Bay Shores event. He did not pay JM Solutions for the use of the stakes and ropes. Has Jauretz breached a fiduciary duty to JM Solutions?
2. Larry Rose, Paul G. Veale Sr., Paul G. Veale Jr., Gary Gibson, and James Parker offered professional accounting services as partners under the firm name of Paul G. Veale and Co. Their written partnership

agreement expressed the general duties of the partners, but it recognized that Veale Sr. and Rose had outside investments and a number of other business commitments. All of the partners were allowed to pursue other business activities so long as the activities did not conflict with the partnership practice of public accounting or materially interfere with the partners’ duties to the partnership. While a partner, Larry Rose performed accounting services for Right Away Foods and Ed Payne. He was paid personally by those clients. Rose was an officer and shareholder of Right Away. In addition, Rose used the partnership’s employees and computers to service those clients. Has Rose breached a fiduciary duty owed to his partners?

3. Dennis Ranzau and William Brosseau formed a partnership to purchase the Casa T, a house in Acapulco. Their intent was to use the Casa T as a vacation home for a few weeks each year, to lease it for the remainder of each year, and to share the rental income after expenses. Ranzau soon became concerned that Brosseau was not accounting for the expenses and income of the Casa T. Brosseau refused Ranzau’s requests to provide receipts for expenses Brosseau claimed to have incurred on the house. Brosseau also let his friend have “total run of the house” over Ranzau’s objection. On another occasion, Ranzau’s

wife and her friends were locked out of the house by an agent of Brosseau and had to make other accommodation arrangements. Has Brosseau breached his fiduciary duty to Ranzau?

4. Brothers Harold and Ray Warren formed a partnership to operate a funeral home. A year later, they created a second partnership, The Warren Yard and Tree Service. Although their partnership agreements were oral only, they adopted a system by which each partner drew from the two partnerships' funds a reasonable compensation for his actual services rendered to the two businesses. After a few years, Harold—a licensed embalmer and funeral director—spent an increasing amount of time in the funeral home, performing all the lab and specialized mortuary services. Ray—licensed only as a funeral director—devoted most his time to the tree services partnership, spending only a few hours each week assisting with funerals. Consequently during the term of the partnership, Harold drew large sums of compensation from the funeral home partnership and only about \$400 from the tree service partnership. Ray drew his primary compensation from the tree service partnership and smaller compensation from the funeral home partnership. Because the funeral home was the more profitable business, Harold's total compensation exceeded Ray's by a considerable amount. Ray sued Harold claiming he was entitled to the same compensation as Harold over the entire lives of the partnerships. Was Ray successful?
5. Nicolas Marsch and Ronald Williams formed a partnership, Horizon Properties, to develop a golf course and luxury home sites in Rancho Santa Fe, California. The partnership was a disaster. When the partnership ended, its assets were \$27 million less than the claims against the partnership. Williams demanded that Marsch pay half of the \$27 million loss by contributing \$13,500,000 to the partnership. Marsch objected on the grounds that section 2.02 of their partnership agreement stated: "Additional capital contributions to the Partnership shall only be by prior mutual agreement of the Partners." Also section 2.03 stated: "No Partner may make any voluntary contribution of capital to the Partnership without the prior consent of the other Partner." Is Marsch liable for half of the \$27 million partnership loss?
6. Eric Wilmot and Renee Harneau form WH & Associates Properties LLP, a limited liability partnership in Rochester, Minnesota, to purchase and

manage commercial and residential real estate in the Rochester area. WH & Associates owns five residential apartment buildings, the largest of which has 32 units on two floors and has a value of \$3 million. WH & Associates also owns seven strip shopping centers, of which the biggest has 12 stores and a value of \$6 million. The total value of all the apartment buildings and shopping centers owned by WH & Associates is \$31 million. Most of the residential buildings and shopping centers have been purchased partly with loans for which the properties are collateral.

To escape the harsh Minnesota winters, Wilmot wants to move his home to Jacksonville, Florida. He also wants to move WH Associates' management office to Jacksonville. In addition, he has identified a mall in Jacksonville that he wants to buy for the LLP. The mall has 32 stores, and the asking price is \$29 million. To purchase the mall, Wilmot wants to borrow \$27 million. Does Wilmot have the authority to move WH Associates' office, to purchase the mall, and to borrow money to fund the purchase?

7. Jake Coombs, Yemi Ogarra, and Wade Stram formed a financial services consulting partnership. The partnership's ordinary business was to provide investment advice to businesses with assets between \$500,000 and \$40,000,000. The partnership operated from a small building that was owned by the partnership, even though title was held in the name of Yemi Ogarra, who had transferred the building to the partnership as her capital contribution. Because the partnership quickly became profitable, the partners chose to retain some of the earnings of the business and to invest it in commercial real estate in the community. Such investments, however, were not part of the partnership's regular business, which remained financial consulting. Title to investment property purchased by the partnership was held in the partnership's name. After a few years, the partners had a falling out. Ogarra wanted the partnership to move its offices to a bigger, more impressive building. She also believed that the commercial real estate market was in a bubble and that the partnership should sell some of its investment property. Without obtaining approval from her partners, Ogarra sold the building in which the partnership did its business to CFC Financial LLC. Because the building was titled only in Ogarra's name, CFC believed that she was the only person with an interest in the building.

Ogarra also sold to CFC a commercial shopping mall that had been held by the partnership for investment. Title in the mall had been recorded in the partnership's name. Coombs and Stram sued to void the sales of the building and mall to CFC on the grounds that Ogarra had no authority to sell the properties. Were they right?

8. Roberto Frietas and Herman Graham formed an IT consulting business, which they organized as a limited liability partnership, Accent Pointe LLP. For the most part, each LLP client was assigned either to Frietas or Graham, but not both. On behalf of the LLP, Graham did an IT audit for Bemus, Inc., which required Graham to ensure that Bemus's IT controls complied with section 404 of the Sarbanes–Oxley Act. Graham failed to check whether the client had an off-site backup system for critical records like accounts receivable information, an omission that resulted in Bemus's failure to comply with section 404. As a result, when Bemus's system crashed internally, Bemus was unable to verify some of its receivables, resulting in a loss of \$500,000. Bemus sued Graham, Accent Pointe LLP, and Frietas to recover its damages. Who is liable to Bemus?
9. Upon his release from prison, Michael Clott, convicted of securities fraud and racketeering, retained a law firm partnership, Ross & Hardies, to provide Clott's company, Capital Financial Group, Inc., a legal framework to do financial, securities, and banking business in Maryland. Steven Kersner was the Ross & Hardies partner primarily assigned to Clott's account. Clott created the 7.5% Program, a mortgage program designed to provide lines of credit to minority homeowners. The 7.5% Program was a fraud by which Clott stole money that was borrowed by the homeowners participating in the program. Kersner helped perpetuate the fraud by assuring homeowners that the program was legitimate, aiding Clott in transferring borrowed funds to bank accounts, opening empty accounts in the name of homeowners to deceive them that lines of credit had been opened for them, preparing false statements to make it appear that the homeowners were no longer liable on the mortgages, telling lenders with questions to contact Kersner instead of homeowners, and forging and altering checks. Did Kersner's actions make his partnership liable to homeowners under the Racketeering Influenced Corrupt Organization Act?

10. Florence and Michael Acri were married and also partners in the Acri Café, which they jointly managed. For the first 15 years of their marriage, Michael had been in and out of sanatoria for the treatment of mental disorders. Although he had beaten Florence when they had marital problems, he had not attacked anyone else. Michael and Florence separated, and Michael assumed full control and management of the café. A few months after the Acris' separation, Stephen Vrabel and a friend went into the Acri Café. Without provocation, Michael shot and killed Vrabel's companion and seriously injured Vrabel while they were seated and drinking at the café's bar. Was Florence liable for Vrabel's injuries?

Complex Partnership Agreements

The NBN case on page 959 is an example of a complex partnership agreement that attempts to anticipate all future issues that partners may face. Often, but not always, these complex agreements are between two or more businesses. There are many other interesting examples you can find online at www.onecle.com. Under "Business Contracts from SEC Filings," find the link for "Partnership Agreements" and click on it. You will find partnership agreements involving Time Warner, Trump Hotels, and many others. You will also see an Accenture partnership agreement between its human partners.

Examine these agreements. Note to whom management is entrusted and how management succession is planned. Determine the manner in which profits and other compensation are paid to the partners and the timing of payments. Note the statement of fiduciary duties, especially in the Accenture partnership agreement.

You Be the Judge

chapter 39

PARTNERS' DISSOCIATION AND PARTNERSHIPS' DISSOLUTION AND WINDING UP

You are planning the formation of a 50-partner venture capital limited liability partnership. Knowing the attributes, weaknesses, and faults of humans, you expect that some partners will die, become ill, and act irresponsibly during the term of the partnership. You know that some partners will want to leave the partnership for good reasons and some for bad reasons. You know that when a partner leaves the partnership, the leaving partner will want to be paid the value of her partnership interest. You also know it is human nature for partners to disagree about the value of a partnership interest. You are also concerned about how the partnership will fund its repurchase of the leaving partner's interest without causing severe liquidity problems for the firm. You know that some of the firm's clients have strong business and personal attachments to one or more firm partners; therefore, when those partners leave the partnership, the firm may lose the business of those partners' clients. Finally, you know that the firm will need to add new partners from time to time to ensure the firm's survival.

- What are the default rules that apply when partners leave and enter a partnership?
- Why may the default rules be unacceptable to you?
- Write the sections of your partnership agreement regarding partners' leaving and entering the partnership.

THIS CHAPTER IS ABOUT the death of partnerships. Four terms are important in this connection: dissociation, dissolution, winding up, and termination. Dissociation of a partner is a change in the relation of the partners, as when a partner dies or retires from the firm. Dissolution of a partnership is the commencement of the winding up process. Winding up is the orderly liquidation of the partnership assets and the distribution of the proceeds to those having claims against the partnership. Termination, the end of the partnership's existence, automatically follows winding up. A partner in a limited liability partnership dissociates from the LLP and the LLP is dissolved, wound up, and terminated in the same manner as an ordinary partnership.

Dissociation

Dissociation is defined in the Revised Uniform Partnership Act (RUPA) as a change in the relation of the partners caused by any partner's ceasing to be associated in

the carrying on of the business. A dissociation may be caused by a partner's retirement, death, expulsion, or bankruptcy filing, among other things. Whatever the cause of dissociation, however, it is characterized by a partner's **ceasing to take part in the carrying on of the partnership's business.**

Dissociation is the starting place for the dissolution, winding up (liquidation), and termination of a partnership. Although dissolution and winding up do not always follow dissociation, they often do. Winding up usually has a severe effect on a business: It usually ends the business, because the assets of the business are sold and the proceeds of the sale are distributed to creditors and partners.

A partner has the *power* to dissociate from the partnership *at any time*, such as by withdrawing from the partnership. A partner does not, however, always have the *right* to dissociate.

When a partner's dissociation does not violate the partnership agreement and otherwise is nonwrongful,

the partner has the right to dissociate from the partnership: Such a dissociation is **nonwrongful**. When a partner's dissociation violates the partnership agreement or otherwise is wrongful, the partner has the power—but not the right—to dissociate from the partnership: Such a dissociation is **wrongful**. The consequences that follow a nonwrongful dissociation may differ from those that follow a wrongful dissociation.

Nonwrongful Dissociation A dissociation is nonwrongful when the dissociation does not violate the partnership agreement and is not otherwise wrongful. The following events are nonwrongful dissociations:

1. Death of a partner.
2. Withdrawal of a partner at any time from a partnership at will. A partnership at will is a partnership whose partnership agreement does not specify any term or undertaking to be accomplished.
3. In a partnership for a term or completion of an undertaking, withdrawal of a partner within 90 days after another partner's death, adjudicated incapacity, appointment of a custodian over his property, or wrongful dissociation. This dissociation is deemed nonwrongful to protect a partner who may think her interests are impaired by the premature departure of an important partner.
4. Withdrawal of a partner in accordance with the partnership agreement. For example, a partnership agreement allows the partners to retire at age 55. A partner who retires at age 60 has dissociated from the partnership nonwrongfully.
5. Automatic dissociation by the occurrence of an event agreed to in the partnership agreement. For example, a partnership may require a partner to retire at age 70.
6. Expulsion of a partner in accordance with the partnership agreement. For example, the removal of a partner who has been convicted of a crime causes a dissociation from the partnership if the partnership agreement allows removal on such grounds.
7. Expulsion of a partner who has transferred his transferable partnership interest or suffered a charging order against his transferable interest. Under the RUPA, such an expulsion must be approved by all the other partners, absent a contrary partnership agreement.
8. Expulsion of a partner with whom it is unlawful for the partnership to carry on its business. Under the RUPA, this expulsion must be approved by all the other partners, absent a contrary agreement.

9. A partner's assigning his assets for the benefit of creditors or consenting to the appointment of a custodian over his assets.

10. Appointment of a guardian over a partner or a judicial determination that a partner is incapable of performing as a partner. For example, a court rules that a partner who has suffered a stroke and has permanent brain damage is unable to continue as a partner of a consulting partnership.

In addition, there are a few special rules for nonwrongful dissociations of nonhuman partners, such as corporations.

Consequences of Nonwrongful Dissociation A partner who nonwrongfully dissociates from the partnership is entitled to be paid the value of her partnership interest. The partner or her representative has no power, however, to dissolve the partnership and to force winding up, unless it is a partnership at will, that is, a partnership with no term. If the partnership is not at will, the partnership will continue. If dissociation was caused by a partner's retirement in compliance with the partnership agreement, a partnership for a term may be dissolved only by all remaining partners agreeing to the dissolution. Dissociation caused by a partner's death, however, permits as few as 50 percent of the partners to dissolve a partnership for a term. See the Concept Review at the end of this chapter for a comprehensive summary of the consequences of dissociation due to death or retirement.

Wrongful Dissociation A partner wrongfully dissociates from a partnership when she dissociates in violation of the partnership agreement or in any other wrongful way. The following are wrongful dissociations:

1. Withdrawal of a partner that breaches an express provision in the partnership agreement.
2. Withdrawal of a partner before the end of the partnership's term or completion of its undertaking, unless the partner withdraws within 90 days after another partner's death, adjudicated incapacity, appointment of a custodian over his property, or wrongful dissociation.
3. A partner's filing a bankruptcy petition or being a debtor in bankruptcy.
4. Expulsion of a partner by a court at the request of the partnership or another partner. The grounds for judicial dissociation are when
 - a. A partner's wrongful conduct adversely and materially affects the partnership business,

- b. A partner willfully and persistently breaches the partnership agreement or her fiduciary duties, or
- c. A partner's conduct makes it not reasonably practicable to conduct partnership business with the partner.

For example, a partner may persistently and substantially use partnership property for his own benefit. Or three partners may refuse to allow two other partners to manage the partnership's business. The harmed partners may seek judicial dissociation. For the expelled, wrongdoing partners, the dissociation is wrongful.

In addition, there are a few wrongful dissociations that apply only to nonhuman partners, such as a corporation.

Consequences of Wrongful Dissociation A partner who wrongfully dissociates from a partnership has no right to demand that the partnership be dissolved and its business wound up. That means the remaining partners may continue the partnership and its business. If at least 50 percent of the remaining partners so choose, however, the partnership will be wound up.

Should the other partners choose to wind up the business, the wrongfully dissociated partner has no right to perform the winding up. Nonetheless, a wrongfully dissociated partner is entitled to his share of the value of his partnership interest, minus the damages he caused the partnership. Damages may include the cost of obtaining new financing and the harm to the partnership goodwill caused by the loss of a valuable partner. Moreover, the wrongfully dissociated partner is not entitled to receive the buyout price until the term of the partnership has expired.

Acts Not Causing Dissociation Many events that you think may cause a dissociation in fact do not. For example, a partner's transfer of his transferable partnership interest, by itself, does not cause a dissociation from the partnership, and neither does a creditor's obtaining a charging order. Also, the addition of a partner to a partnership is not a dissociation, because no one ceases to be associated in the business.

Mere disagreements, even irreconcilable differences, between partners are expectable, and therefore by themselves are not grounds for dissociation. If the disagreements threaten the economic viability of the partnership, however, a court may order a dissolution, as will be discussed below.

Effect of Partnership Agreement The dissociations listed in the RUPA are merely default rules. The partners may limit or expand the definition of dissociation and those dissociations that are wrongful,

and they may change the effects of nonwrongful and wrongful dissociations. For example, the partners may require dissociation if a partner transfers his transferable partnership interest, if a partner does not redeem a charging order within 15 days of the order, or if a partner fails to make a capital contribution required by the partnership agreement. The partnership agreement may also reduce the number of partners that must approve the expulsion of a partner, such as a two-thirds vote, and expand the grounds for expulsion. If one partner is very powerful, the partnership agreement might allow that partner to dissociate at any time without penalty.

Dissolution and Winding Up the Partnership Business

When a partner dissociates from a partnership, the next step may be dissolution and **winding up** of the partnership's business. This involves the orderly liquidation—or sale—of the assets of the business. Liquidation may be accomplished asset by asset; that is, each asset may be sold separately. It may also be accomplished by a sale of the business as a whole. Or it may be accomplished by a means somewhere between these two extremes.

Winding up does not always require the sale of the assets or the business. When a partnership has valuable assets, the partners may wish to receive the assets rather than the proceeds from their sale. Such *distributions-in-kind* are rarely permitted.

During winding up, the partners continue as fiduciaries to each other, especially in negotiating sales or making distributions of partnership assets to members of the partnership. Nonetheless, there is a termination of the fiduciary duties unrelated to winding up. For example, a partner who is not winding up the business may compete with his partnership during winding up.

Events Causing Dissolution and Winding Up Recognizing that a partnership business is worth more as a going concern, the RUPA contemplates that the partnership business will usually continue after a partner's dissociation. Many dissociations, such as one caused by a partner's death or retirement, will *not* automatically result in the dissolution and winding up of a partnership.

Nonetheless, the RUPA provides that a partnership will be dissolved and wound up in the following situations:

1. When the partnership's term has expired.
2. When the partnership has completed the undertaking for which it was created.

3. When all the partners agree to wind up the business.
4. When an event occurs that the partnership agreement states will cause a winding up of the partnership.
5. For a partnership at will, when any partner expressly withdraws from the partnership, other than a partner who is deceased, was expelled, is a debtor in bankruptcy, assigned his assets for the benefit of creditors, had a custodian appointed over his assets, or was automatically dissociated by the occurrence of an event agreed to in the partnership agreement.
6. For a partnership for a term or completion of an undertaking, when at least half the remaining partners vote to dissolve and wind up the partnership within 90 days after a partner dies, wrongfully dissociates, assigns his property for the benefit of his creditors, or consents to the appointment of a custodian over his property.
7. When the business of the partnership is unlawful.
8. Upon the request by a partner, when a court determines that the economic purpose of the partnership is likely to be unreasonably frustrated, a partner's conduct makes it not reasonably practicable to carry on the business with that partner, or it is not reasonably practicable to conform with the partnership agreement.
9. Upon the request of a transferee of a partner's transferable interest in a partnership at will or a partnership whose term or undertaking has been completed, when a court determines that it is equitable to wind up the partnership business.

Effect of Partnership Agreement The above causes of winding up are the RUPA's default rules, which except for the last three may be changed by the partnership agreement. For example, the partnership agreement may provide that at any time two-thirds of the partners may cause a winding up or that upon the death or retirement of a partner no partner has the right to force a winding up. Partners will frequently want to limit the events that cause dissolution and winding up, because they believe the business will be worth more as a going concern than by being liquidated.

In addition, if dissolution has occurred, the partners may agree to avoid winding up and to continue the business. To avoid winding up after dissolution has occurred, under the RUPA all the partners who have not wrongfully dissociated must consent to continuing the business. That means that any partner who has not wrongfully dissociated may force winding up if dissolution has occurred. That RUPA rule gives great power to one partner who wants to wind up the business when all other partners want to continue the business. Many partnership agreements, therefore, prohibit a single partner from forcing not only dissolution but also winding up of the partnership's business.

In the following *Schwartz* case, we return to a recurrent theme: the importance of carefully drafting partnership agreements to make sure that the partners' intent is clearly expressed. In this case, the court interpreted the partnership agreement to allow two partners to expel a third partner from the partnership without cause.

Schwartz v. Family Dental Group, P.C. 943 A.2d 1122 (Conn. App. Ct. 2008)

In 1996, Steven Schwartz, Ken Epstein, and Peter Munk entered into a partnership agreement. All were dentists by profession. Under the partnership agreement, they formed Family Dental Group—Clinton Associates in Bridgeport, Connecticut. Their partnership agreement provided the following: The partnership was to continue until the year 2051, unless the partners agreed to an early dissolution. The partners wanted the partnership to survive their deaths. The partners were to devote full professional time and attention to the partnership during the first five years of its inception. The two practicing partners, Schwartz and Munk, were to receive 35 percent of their collections from patients. Additionally, any profit beyond expenses would be put into a profit pool of which the first 20 percent would be divided equally between all three partners and the remaining, if any, would be divided equally between Schwartz and Munk.

In 1997, Schwartz reduced his workload, decreasing his hours on Wednesdays and Thursdays, and eliminating Fridays. Munk, however, maintained a consistent, full-time work schedule. When Munk became aware of Schwartz's schedule change, he became upset and ceased communicating with Schwartz. Munk was dissatisfied with Schwartz's management style and the way he conducted his practice. Schwartz also refused to accept HMOs, take emergencies, and work on Saturdays. In addition, Munk was unhappy with Schwartz's appearance, the condition of his work space, and the amount of vacation time he took. He expressed his dissatisfaction to Epstein through letters he wrote to him over the course of several years; however, he did not approach Schwartz directly. Despite Munk's unhappiness, Schwartz was able to function normally in the office and interact appropriately with the remaining staff.

Munk was also dissatisfied with both his compensation and Schwartz's refusal to expand the partnership's dental facilities. Munk wanted to change the agreement to alter his compensation or alternatively terminate Schwartz as a partner. Schwartz did not accept either proposal and insisted that the parties submit to mediation pursuant to the agreement. The mediation resulted in an award of a management fee for Munk in the amount of two-thirds of 1 percent of the gross revenue.

In 2002, Epstein and Munk offered to buy out Schwartz's interest in the practice, or alternatively, to keep him as a partner while eliminating his management responsibilities and his share of the profits. Schwartz rejected the offer. On February 26, 2003, at a special meeting of the partners, Ken Epstein and Munk voted to terminate Schwartz from the practice "without cause" and provided him with 90 days notice pursuant to §12(a)(i) in the partnership agreement.

Section 12 of the partnership agreement is entitled "Other withdrawal from practice." Section 12(a)(i) states:

In the event that any Partner's association with the Partnership is terminated for any reason other than death or total disability, either party shall give the other not less than ninety (90) days written notice of such termination and the Partnership shall have the first option to retire the interest of the departing Partner by paying the departing Partner deferred compensation at the Formula Amount.

As a result of the termination, Schwartz sued Munk and Epstein seeking restoration of his partnership status. The trial court found that the partnership's termination date of December 31, 2051, implied that a reduction in workload was contemplated. The court rejected Munk and Epstein's argument that §12(a)(i) of the agreement provides for termination without cause, as long as a 90-day notice is provided. Instead, the court found the provision unenforceable on the ground that "no reasonable, educated person would sign an agreement whereby they could be stripped of their equitable interest in a business without a reasonable basis. Simply put, it is something a reasonably prudent person would not do." The trial court also found that §12(a)(i) of the agreement does not clearly state a majority of the partners can terminate another partner without any reasonable basis. The court concluded that Munk and Epstein did not provide a reasonable basis for Schwartz's termination. Munk and Epstein appealed to the Court of Appeals of Connecticut.

McLachlan, Judge

Munk and Epstein first claim that the court improperly concluded that §12(a)(i) of the parties' partnership agreement is unenforceable.

There is a strong public policy in Connecticut favoring freedom of contract. It is established well beyond the need for citation that parties are free to contract for whatever terms on which they may agree. This freedom includes the right to contract for the assumption of known or unknown hazards and risks that may arise as a consequence of the execution of the contract. Accordingly, in private disputes, a court must enforce the contract as drafted by the parties and may not relieve a contracting party from anticipated or actual difficulties undertaken pursuant to the contract, unless the contract is voidable on grounds such as mistake, fraud or unconscionability. If a contract violates public policy, this would be a ground not to enforce the contract. A contract, or in this instance, a partnership agreement, however, does not violate public policy just because the contract was made unwisely. Moreover, our Supreme Court has opined: "A provision of a partnership agreement does not violate public policy simply because it is susceptible of an application that is advantageous to one partner and disadvantageous to another." *Konover Development Corp. v. Zeller*, 228 Conn. 206, 231, 635 A.2d 798 (1994).

In the present case, it is clear that the provision in §12(a)(i) does not violate public policy and is enforceable. This provision was entered into by sophisticated and highly educated professionals.

Moreover, this provision, which Munk and Epstein argue is an involuntary termination clause, does not favor one partner over another because the majority of the parties voted to terminate Schwartz's association with the partnership. If the circumstances were different, Schwartz would have been able to rely on the same provision to terminate one of the other partners. Thus, this provision is not against public policy just because in the present case it was a disadvantage to Schwartz.

Munk and Epstein next claim that the court improperly concluded that §12(a)(i) of the parties' partnership agreement does not provide that a majority of the partners can terminate another partner without cause. Munk and Epstein maintain that, as the provision is written, the language refers to "termination resulting from any possible circumstance, excluding death or total disability, except as otherwise modified by another provision in the agreement." In opposition, Schwartz argues that this provision is not a termination without cause provision; rather, it provides only the right of any partner to withdraw from the practice and voluntarily terminate his association in the event that a partner moved or relocated or for some other reason decided to terminate his association with the partnership. We disagree with Schwartz's assertion.

A contract must be construed to effectuate the intent of the parties, which is determined from the language used interpreted in the light of the situation of the parties and the circumstances connected with the transaction. The intent of the parties is to be ascertained by a fair and reasonable construction of the

written words and the language used must be accorded its common, natural, and ordinary meaning and usage where it can be sensibly applied to the subject matter of the contract.

Munk and Epstein assert that the language in §12(a)(i) is clear and unambiguous and permits the partners to terminate another partner without cause. Under §12(a)(i), “[i]n the event that any Partner’s association with the Partnership is terminated for any reason other than death or total disability, *either party shall give the other not less than ninety (90) days written notice. . . .*” (Emphasis added.) Munk and Epstein argue that if the parties intended that §12(a)(i) would refer only to voluntary termination, they could have stated such intent. Munk and Epstein also refer to §9(a), which provides that “[a]ll decisions concerning the conduct of the Partnership business shall be made by a majority of the Partnership shares, except as otherwise expressly agreed to by the Partners.”

The language of §12(a)(i), specifically, that *either party shall give the other ninety days notice*, clearly indicates that this provision does not simply apply to voluntary withdrawal. The term used in the provision, “either party,” evidences the intent of the parties that this provision be a termination without cause provision. Furthermore, §12(a)(i) coupled with §9(a) permits the very action taken by Munk and Epstein: the majority of shares acting to terminate a partner without cause. Most significantly, Schwartz himself testified that §12(a)(i) permitted termination for reasons other than death, disability and termination for cause. Thus, we conclude that the provision is enforceable and that it permits the termination of Schwartz’s association with the partnership in the manner taken by Munk and Epstein. Accordingly, we disagree with the conclusion of the trial court.

Judgment reversed in favor of Munk and Epstein.

Joint Ventures and Mining Partnerships

The partnership rules of dissociation and dissolution apply to joint ventures. Mining partnerships are difficult to dissolve, because of the free transferability of mining partnership interests. The death of a mining partner does not effect a dissolution. In addition, a mining partner may sell his interest to another person and dissociate from the carrying on of the mining partnership business without causing a dissolution.

Performing Winding Up For the well-planned partnership, the partnership agreement will indicate who may perform the process of winding up for the partnership, what is the power of the persons performing winding up, and what their compensation is for performing the service.

In the absence of a partnership agreement, the RUPA provides that any partner who has not wrongfully dissociated from the partnership may perform the winding up. A winding-up partner is entitled to reasonable compensation for her winding-up services, in addition to her usual share of profits.

Partner’s Authority during Winding Up

Express and Implied Authority During winding up, a partner has the express authority to act as the partners have agreed. The implied authority of a winding up partner is the power to do those acts *appropriate for winding up* the partnership business. That is, he has the power to bind the partnership in any transaction necessary to the liquidation of the assets. He may collect money due, sue

to enforce partnership rights, prepare assets for sale, sell partnership assets, pay partnership creditors, and do whatever else is appropriate to wind up the business. He may maintain and preserve assets or enhance them for sale, for example, by painting a building or by paying a debt to prevent foreclosure on partnership land. A winding-up partner may temporarily continue the business when the effect is to preserve the value of the partnership.

Performing Executory Contracts The implied authority of a winding up partner includes the power to perform executory contracts (made before dissolution but not yet performed). A partner may not enter into *new* contracts unless the contracts aid the liquidation of the partnership’s assets. For example, a partner may fulfill a contract to deliver wind turbines if the contract was made before dissolution. She may not make a new contract to deliver wind turbines unless doing so disposes of wind turbines that the partnership owns or has contracted to purchase.

Borrowing Money Usually, the implied authority of a winding up partner includes no power to borrow money in the name of the partnership. Nonetheless, when a partner can preserve the assets of the partnership or enhance them for sale by borrowing money, he has implied authority to engage in new borrowing. For example, a partnership may have a valuable machine repossessed and sold far below its value at a foreclosure sale unless it can refinance a loan. A partner may borrow the money needed to refinance the loan, thereby preserving the

asset. A partner may also borrow money to perform executory contracts.

Apparent Authority Winding-up partners have apparent authority to conduct business as they did before dissolution, when notice of dissolution is not given to those persons who knew of the partnership prior to its dissolution. For example, a construction partnership dissolves and begins winding up but does not notify anyone of its dissolution. After dissolution, a partner makes a contract with a customer to remodel the customer's building. The partner would have no implied authority to make the contract, because the contract is new business and does not help liquidate assets. Nonetheless, the contract may be within the partner's apparent authority, because to persons unaware of the dissolution, it appears that a partner may continue to make contracts that have been in the ordinary course of business.

To eliminate the apparent authority of a winding-up partner to conduct business in the ordinary way, the partnership must ensure that one of the following occurs:

1. A third party knows or has reason to know that the partnership has been dissolved.
2. A third party has received notification of the dissolution by delivery of a communication to the third party's place of business. For example, an e-mail message is sent to a creditor of the partnership.
3. The dissolution has come to the attention of the third party. For example, a partnership creditor was told of the dissolution by another creditor.
4. A partner has filed a Statement of Dissolution with the secretary of state, which limits the partners' authority during winding up. A third party is deemed to have

notice of a limitation on a partner's authority 90 days after the filing of a Statement of Dissolution.

To be safe, a dissolved partnership should eliminate its partners' apparent authority to conduct business in the ordinary way by directly informing parties with whom it has previously conducted business, such as by e-mail, fax, or a phone call. The partnership should be able to identify such parties from its records. As for parties that may know about the partnership but with whom the partnership has not done business, the partnership should post notice of the dissolution at its place of business and in newspapers of general circulation in its area, increasing the chance that third parties will know of the dissolution. Also, the partnership should file a Statement of Dissolution: 90 days after its filing, no one should be able to rely on the apparent authority of a partner to conduct any business that is not appropriate to winding up. The partnership agreement of a well-planned partnership will require the partnership to take these steps when dissolution occurs.

Disputes among Winding-Up Partners When more than one partner has the right to wind up the partnership, the partners may disagree concerning which steps should be taken during winding up. For decisions in the ordinary course of winding up, the decision of a majority of the partners controls. When the decision is an extraordinary one, such as continuing the business for an extended period of time, unanimous partner approval is required.

In the following case, *Paciaroni v. Crane*, the court found that the business of the partnership to train and race a horse should continue during winding up. The drafters of the RUPA expressly noted that this case is a model for continuing a business during winding up.

Paciaroni v. Crane

408 A.2d 946 (Del. Ct. Ch. 1979)

Black Ace, a harness racehorse of exceptional speed, was the fourth best pacer in the United States in 1979. He was owned by a partnership: Richard Paciaroni owned 50 percent; James Cassidy, 25 percent; and James Crane, 25 percent. Crane, a professional trainer, was in charge of the daily supervision of Black Ace, including training. It was understood that all of the partners would be consulted on the races in which Black Ace would be entered, the selection of drivers, and other major decisions; however, the recommendations of Crane were always followed by the other partners because of his superior knowledge of harness racing.

In 1979, Black Ace won \$96,969 through mid-August. Seven other races remained in 1979, including the prestigious Little Brown Jug and the Messenger at Roosevelt Raceway. The purse for these races was \$600,000.

A disagreement among the partners arose when Black Ace developed a ringbone condition and Crane followed the advice of a veterinarian not selected by Paciaroni and Cassidy. The ringbone condition disappeared, but later Black Ace became uncontrollable by his driver, and in a subsequent race he fell and failed to finish the race. Soon thereafter, Paciaroni and

Cassidy sent a telegram to Crane dissolving the partnership and directing him to deliver Black Ace to another trainer they had selected. Crane refused to relinquish control of Black Ace, so Paciaroni and Cassidy sued him in August 1979, asking the court to appoint a receiver who would race Black Ace in the remaining 1979 stakes races and then sell the horse. Crane objected to allowing anyone other than himself to enter the horse in races. Before the trial court issued the following decision, Black Ace had entered three additional races and won \$40,000.

Brown, Vice Chancellor

It is generally accepted that once dissolution occurs, the partnership continues only to the extent necessary to close out affairs and complete transactions begun but not then finished. It is not generally contemplated that new business will be generated or that new contractual commitments will be made. This, in principle, would work against permitting Black Ace to participate in the remaining few races for which he is eligible.

However, in Delaware, there have been exceptions to this. Where, because of the nature of the partnership business, a better price upon final liquidation is likely to be obtained by the temporary continuation of the business, it is permissible, during the winding up process, to have the business continue to the degree necessary to preserve or enhance its value upon liquidation, provided that such continuation is done in good faith with the intent to bring affairs to a conclusion as soon as reasonably possible. And one way to accomplish this is through an application to the Court for a winding up, which carries with it the power of the Court to appoint a receiver for that purpose.

The business purpose of the partnership was to own and race Black Ace for profit. The horse was bred to race. He has the ability to be competitive with the top pacers in the country. He is currently "racing fit" according to the evidence. He has at best only seven more races to go over a period of the next six weeks, after which time there are established horse sales at which he can be disposed of to the highest bidder. The purse for these remaining stake races is substantial. The fact that he could possibly sustain a disabling injury during this six-week period appears to be no greater than it was when the season commenced. Admittedly, an injury could occur at any time. But this is a fact of racing life which all owners and trainers are forced to accept. And the remaining stake races are races in which all three partners originally intended that he would compete, if able.

Under these circumstances, I conclude that the winding up of the partnership affairs should include the right to race Black Ace in some or all of the remaining 1979 stakes races for which he is now eligible. The final question, then, is who shall be in charge of racing him.

On this point, I rule in favor of Paciaroni and Cassidy. They may, on behalf of the partnership, continue to race the horse through their new trainer, subject, however, to the conditions hereafter set forth. Crane does have a monetary interest in the partnership assets that must be protected if Paciaroni and Cassidy are to be permitted to test the whims of providence in the name of the partnership during the next six weeks. Accordingly, I make the following ruling:

1. Paciaroni and Cassidy shall first post security in the sum of \$100,000 so as to secure to Crane his share of the value of Black Ace.
2. If Paciaroni and Cassidy are unable or unwilling to meet this condition, then they shall forgo the right to act as liquidating partners. In that event, each party, within seven days, shall submit to the Court the names of two persons who they believe to be qualified, and who they know to be willing, to act as receiver for the winding up of partnership affairs.
3. In the event that no suitable person can be found to act as receiver, or in the event that the Court should deem it unwise to appoint any person from the names so submitted, then the Court reserves the power to terminate any further racing by Black Ace and to require that he simply be maintained and cared for until such time as he can be sold as a part of the final liquidation of the partnership.

Judgment for Paciaroni and Cassidy.

Distribution of Dissolved Partnership's Assets After the partnership's assets have been sold during winding up, the proceeds are distributed to those persons who have claims against the partnership. Not only creditors but also partners have claims against the proceeds. As you might expect, the claims

of creditors must be satisfied first, yet a partner who is also a creditor of the partnership is entitled to the same priority as other creditors of the partnership. Thus a partner who has loaned money to the partnership is paid when other creditors of the partnership are paid.

After the claims of creditors have been paid, the remaining proceeds from the sale of partnership assets will be distributed to the partners according to the net amounts in their capital accounts. Over the life of a partnership, a partner's capital account is credited (increased) for any capital contributions the partner has made to the partnership plus the partner's share of partnership profits, including profits from the sale of partnership assets during winding up. The partner's capital account is charged (decreased) for the partner's share of partnership losses, including losses from the sale of partnership assets during winding up, and any distributions made to the partners, such as a distribution of profits or a return of capital. The net amount in the partner's account is distributed to the partner.

If the net amount in a partner's capital account is negative, the partner is obligated to contribute to the partnership an amount equal to the excess of charges over credits in the partner's account. Some partners may have a positive capital account balance and other partners may have a negative capital account balance. This means that during winding up, some partners may be required to contribute to enable the partnership to pay the claim of another partner.

In many partnerships that have been unprofitable, all the partners will have negative capital accounts. This means that the partnership assets have been exhausted and yet some of the partnership creditors have not been paid their claims. If partnership creditors cannot be paid from the partnership assets, the creditors may proceed against the partners, including a partner who may have already received a portion of partnership assets on account of her being a creditor also.

Since partners have liability for all the obligations of a partnership, if one partner fails to contribute the amount equal to her negative capital account balance, the other partners are obligated to contribute to the partnership in the proportions in which they share the losses of the partnership. The partner who fails to contribute as required is liable, however, to the partners who pay the defaulting partner's contribution.

The RUPA eliminates the old UPA's concept of marshaling of assets. While partnership creditors still have a priority over a partner's creditors with regard to partnership assets, partnership and partners' creditors share pro rata in the assets of individual partners.

Asset Distributions in a Limited Liability Partnership The asset distribution rules are modified for a limited liability partnership, because in an

LLP most partners have no liability for partnership obligations beyond the partnership's assets. If the LLP has been profitable, each partner will receive the net amount in her capital account. If creditors' claims exceed the LLP's assets, however, an LLP partner is not ordinarily required to contribute an amount equal to the negative balance in her account, and the creditors may not sue the partner to force the partner to pay the debt. This result is necessary to protect the limited liability of innocent partners who did not commit a wrong against the creditors.

If, however, a partner has committed malpractice or another wrong for which LLP statutes do not provide protection from liability, that wrongdoing partner must contribute to the LLP an amount equal to her share of the unpaid liability. Creditors may sue such a partner when the LLP fails to pay the liability. If more than one partner has liability, they must contribute to the LLP in proportion in which they share liability. If one is unable to pay, the other liable partners must contribute the shortfall. The partners who are not liable for the obligation cannot be forced to pay the debt.

Termination After the assets of a partnership have been distributed, **termination** of the partnership occurs automatically.

When the Business Is Continued

Dissolution and winding up need not follow a partner's dissociation from a partnership. The partners may choose not to seek dissolution and winding up, or the partnership agreement may provide that the business may be continued by the remaining partners.

When there is no winding up and the business is continued, the claims of creditors against the partnership and the partners may be affected, because old partners are no longer with the business and new partners may enter the business.

Successor's Liability for Predecessor's Obligations When the business of a partnership is continued after dissociation, creditors of the partnership are creditors of the person or partnership continuing the business. In addition, the original partners remain liable for obligations incurred prior to dissociation unless there is agreement with the creditors to the contrary. Thus, partners may not usually escape liability by forming a new partnership or a corporation to carry on the business of the partnership.

Dissociated Partner's Liability for Obligations Incurred While a Partner

Dissociated partners remain liable to partnership creditors for partnership liabilities incurred while they were partners; however, a dissociated partner's liability may be eliminated by the process of **novation**. Novation occurs when the following two conditions are met:

1. The continuing partners release a dissociated partner from liability on a partnership debt, and
2. A partnership creditor releases the dissociated partner from liability on the same obligation.

Continuing partners are required to indemnify dissociated partners from liability on partnership obligations. To complete the requirements for novation, a dissociated partner must also secure his release by the partnership's creditors. A creditor's agreement to release an outgoing partner from liability may be express, but usually it is implied. *Implied* novation may be proved by a creditor's knowledge of a partner's withdrawal and his continued extension of credit to the partnership. In addition, a *material modification* in the nature or time of payment of an obligation operates as a novation for an outgoing partner, when the creditor has knowledge of the partner's dissociation.

When former partners release a dissociated partner from liability but creditors do not, there is not a novation. As a result, creditors may enforce a partnership liability against a dissociated partner. However, the outgoing

partner may recover from his former partners who have indemnified him from liability.

Dissociated Partner's Liability for Obligations Incurred after Leaving the Partnership

Ordinarily, a dissociated partner has no liability for partnership obligations incurred after he leaves the partnership. Nonetheless, a third party may believe that a dissociated partner is still a partner of the continuing partnership and transact with the partnership while holding that belief. In such a context, a dissociated partner could be liable to the third party even though the dissociated partner will not benefit from the transaction between the partnership and the third party.

The RUPA makes a dissociated partner liable as a partner to a party that entered into a transaction with the continuing partnership, unless:

1. The other party did not reasonably believe the dissociated partner was still a partner.
2. The other party knew or should have known or has received notification of the partner's dissociation.
3. The transaction was entered into more than 90 days after the filing of a Statement of Dissociation with the secretary of state, or
4. The transaction was entered into more than two years after the partner has dissociated.

Moreover, although a dissociated partner's right to manage the partnership has terminated upon his dissociation,

The Global Business Environment

Dissolutions around the Globe

For most nations, partnership law on dissolutions is more like the old Uniform Partnership Act than the RUPA, which was drafted to create better default rules when partners leave a partnership. In countries other than the United States, dissolution is defined much like dissociation is defined under the RUPA, a change in the partners' relation. Unlike dissociation in the United States, dissolution in those countries (and in American states that still follow the UPA) often results in the end of the partnership and its business, absent a contrary agreement of the partners. Well-planned partnerships, however, have partnership agreements that in many situations provide for continuation of the partnership and its business by the remaining partners, despite dissolution.

In India, dissolution may be caused by a court, by agreement of the partners, automatically by operation of law, upon the happening of certain contingencies, and by notice. An

Indian court may dissolve a partnership due to a partner's insanity, permanent incapacity, conduct that prejudicially affects carrying on the business of the firm, willful or persistent breach of the partnership agreement, and transfer of his partnership interest, or if the partnership cannot be carried on except as a loss. Partners in an Indian partnership may dissolve the partnership by their unanimous agreement. An Indian partnership dissolves automatically if its term ends or undertaking is accomplished, if a partner dies or is insolvent, or if the partnership's business is illegal. Finally, a partnership at will in India may be dissolved by action of any partner.

In Austria, a partnership is dissolved by expiration of the period for which it was entered into, by resolution of the partners, by institution of bankruptcy proceedings against the partnership assets or the assets of a partner, by death of a partner, by notice of termination by a partner, and by judicial decision.

unless one of the above can be proved the dissociated partner retains his apparent authority to bind the partnership on matters in the ordinary course of business.

This means that when dissociation occurs, a partnership should take steps similar to those it took to reduce the apparent authority of a winding-up partner: that is, the partnership should directly inform parties with whom it has previously conducted business, such as by e-mail, fax, or a phone call, that the partner has dissociated. It should also post notice of the dissociation at its place of business and in newspapers of general circulation in its area. Finally, the partnership should cause the filing of a Statement of Dissociation, limiting the authority of the dissociated partner and notifying the public that the partner is no longer a partner. Taking these steps will reduce the risk that the dissociated partner will be liable for future obligations of the partnership, and it will

help eliminate the apparent authority of the dissociated partner to act on behalf of the partnership. The partnership agreement of a well-planned partnership will require that these steps be taken by the partnership immediately upon the dissociation of a partner.

Effect of LLP Status In an LLP, a dissociated partner has less risk of continuing liability for contracts and torts occurring before or after the partner leaves the LLP, since the partner's liability is limited to the LLP's assets. However, a buyout payment made to a dissociated LLP partner may not impair the ability of the LLP to pay its creditors. If so, the dissociated partner will be required to return some or all of the buyout payment to creditors.

In the following case, *In re Labrum & Doak*, the court considered both the UPA and RUPA rules regarding liability of dissociated partners.

In re Labrum & Doak, LLP

237 B.R. 275 (Bank. Ct. E. Pa. 1999)

Labrum & Doak, LLP, was a law partnership that began in 1904 in Pennsylvania. In 1997, its partners dissolved the partnership. The partnership entered reorganization under Chapter 11 of the federal Bankruptcy Code in January 1998. A reorganization plan was confirmed in December 1998, which authorized the reorganization administrator to bring a deficiency proceeding against the partners of Labrum & Doak, seeking to hold individual partners liable on obligations of the partnership.

John Seehousen, Jonathan Herbst, and James Hilly were former partners of Labrum & Doak. Seehousen withdrew from the partnership in 1992, Herbst resigned from the partnership in early 1996, and James Hilly resigned in late 1995. They argued that because of their dissociations from Labrum & Doak, they were not liable for partnership obligations—in particular, liability for the malpractice of other partners—that were incurred after their resignations. The bankruptcy court was asked to rule on the matter.

Scholl, Justice

A very difficult issue is presented in ascertaining whether withdrawing former partners of the Debtor partnership are liable for all of the Debtor's deficiency, even those obligations which arose after their withdrawal. The determination of this issue requires interpretation of several principles of general partnership law.

We note that Pennsylvania Uniform Partnership Act (PAUPA) does not address the effect of dissociation on future liabilities. PAUPA was modeled after the Uniform Partnership Act of 1914. The UPA also does not address the effects of dissociation. At the most, the UPA, section 36, suggests that dissolution does not have any effect on the existing liability of any given partner. Accordingly, under these strictures, Seehousen, Herbst, and Hilly would be liable for the deficiencies incurred regardless of the fact that some of the deficiency claims at issue arose after their dissociation from the Debtor partnership.

The reasoning behind this conclusion is as follows. A partner may be discharged from any existing liability upon dissolu-

tion by an agreement to that effect between himself, the partnership creditor, and the person or partnership continuing the business. UPA section 36(2). None of the partners submitted into evidence, nor testified of the existence of, any such agreement. As a result, we can only conclude that no such agreement existed, and that therefore Seehousen, Herbst, and Hilly are liable for all of the deficiencies at hand.

Conscious of these consequences, the drafters of the Revised Uniform Partnership Act (RUPA) tried to clarify the effects of dissociation of partners from a partnership. For this reason, RUPA section 703, which corresponds somewhat to the UPA, section 36, provides as follows:

SECTION 703. DISSOCIATED PARTNER'S LIABILITY TO OTHER PERSONS.

(a) A partner's dissociation does not of itself discharge the partner's liability for a partnership obligation incurred before dissociation. A dissociated partner is not liable for a partnership obligation incurred after dissociation, except as otherwise provided in subsection (b).

(b) A partner who dissociates without resulting in a dissolution and winding up of the partnership business is liable as a partner to the other party in a transaction entered into by the partnership, or a surviving partnership under Article 9, within two years after the partner's dissociation, only if at the time of entering into the transaction the other party:

- (1) reasonably believed that the dissociated partner was then a partner;
- (2) did not have notice of the partner's dissociation; and,
- (3) is not deemed to have had knowledge under Section 303(e) or notice under Section 704 (c).

However, as of this date, RUPA has been only adopted in nineteen jurisdictions. Pennsylvania is not one of them. Moreover, assuming *arguendo* that RUPA did indeed apply in this jurisdiction, we would be forced to arrive at the same conclusion. Section 703(b) of RUPA simply states that a dissociated partner is not liable for partnership obligations incurred after dissociation, only if at the time the partnership enters into a given trans-

action with a third party, the party in question had notice of the dissociation. See RUPA, section 703(b)(2).

Although Pennsylvania case law is scarce on these issues, it is important to note that dated, but viable and therefore controlling, Pennsylvania cases arrived at similar conclusions when facing analogous problems.

In the instant factual setting the Defendant Partners presented no evidence of their having provided any notice of their dissociation from the Debtor to any of the Debtor's creditors. Moreover, no evidence was submitted to support the conclusion that any of these parties were discharged from any liability by an agreement to that effect between themselves, the partnership creditors, and/or the Debtor. Accordingly, they remain liable for all of the deficiencies at issue, even those which arose after they withdrew as partners from the Debtor.

Judgment for the bankruptcy reorganization administrator.

Buyout of Dissociated Partners When the partnership is continued, the partnership is required to purchase the dissociated partner's partnership interest. In well-planned partnerships, the purchase price and timing of the buyout will be included in the partnership agreement. For example, the partnership agreement may require the payment of an amount equal to the current value of the partnership multiplied by the partner's proportionate share of profits or capital. The partnership agreement may specify how to value the partnership, such as average annual profits plus partners' salaries for the last three years multiplied by seven. Many professional partnerships, however, pay a dissociated partner only his capital contribution plus his share of undistributed profits. The agreement may also permit deductions against the value of the partnership interest if the dissociated partner acted wrongly.

The agreement will state when the buyout is effected; for example, it may require the payment in a lump sum 30 days after dissociation, or it may allow the partnership to pay the amount in monthly installments over the course of three years.

In the absence of a partnership agreement, the RUPA spells out the amount and timing of the buyout of the dissociated partner's interest. The buyout price is the greater of the amount that would have been in the dissociated partner's capital account had the partnership liquidated all its assets on the dissociation date *or* the amount in the capital account had it sold the entire business as a going concern on that date. If the partner has wrongfully

dissociated from the partnership, the buyout price is reduced by any damages caused by the wrongfully dissociated partner, such as the reduction in the goodwill of the business caused by the loss of a valuable partner.

When the dissociated partner has not wrongfully dissociated and there is no partnership agreement on the issue, the RUPA requires the partnership to pay the dissociated partner in cash within 120 days after he has demanded payment in writing. The buyout amount must include interest from the date of dissociation. If the dissociated partner and the partnership cannot agree on the buyout price, the partnership must, within 120 days of the written demand for payment, pay in cash to the partner the partnership's estimate of the buyout price, plus interest. The partner may challenge the sufficiency of the buyout price tendered by the partnership by asking a court to determine the buyout price.

If a partner has wrongfully dissociated, the partnership may wait to buy out the partner until the end of the partnership's term, unless the partner shows that the partnership will suffer no undue hardship by paying earlier. The buyout price must include interest from the date of the dissociation.

In the following *Warnick* case between a son and his parents, we see again the risks of relying on the RUPA to resolve partnership issues. The case shows that the RUPA's less than unambiguous provision for valuing a partner's interest should be replaced in the partnership agreement by a concrete valuation method that covers every aspect of valuation the partners want to consider.

Warnick v. Warnick

133 P. 3d 997 (Wyo. S. Ct. 2006)

In 1978, Wilbur and Dee Warnick and their son Randall Warnick formed Warnick Ranches general partnership to operate a ranch in Sheridan County, Wyoming. The initial capital contributions of the partners totaled \$60,000, paid 36 percent by Wilbur, 30 percent by Dee, and 34 percent by Randall. The partners over the years each contributed additional funds to the operation of the ranch and received cash distributions from the partnership. After 1983, Randall contributed very little new money. Almost all of the additional funds to pay off the mortgage on the ranch came from Wilbur and Dee Warnick. Wilbur also left in the partnership account two \$12,000 cash distributions that were otherwise payable to him. The net cash contributions of the partners through 1999, considering the initial contributions, payments to or on behalf of the partnership, draws not taken, and distributions from the partnership were:

Wilbur \$170,112.60 (51%)

Dee \$138,834.63 (41%)

Randall \$25,406.28 (8%)

After a dispute among the partners arose in 1999, Randall's lawyer sent a letter to Warnick Ranches stating:

I have been asked to contact you regarding [Randall's] desire either to sell his interest in the ranch to a third party or the partnership or to liquidate the partnership under Paragraph 12 of the partnership agreement. It would appear that it would be in the best interests of all to agree amicably to a selling price of his interest either to a third party or to the partnership as provided in the partnership agreement.

Warnick Ranches responded, treating the letter as Randall's intent to dissociate from the partnership. The partnership's response included an offer for Randall's interest, as provided under Wyo. Stat. Ann. § 17-21-701(e) and (g) [RUPA section 701(f) and (g)] in the case of a dissociating partner. Randall in turn exercised his right under § 17-21-701(j) [RUPA section 701(i)] to reject the offer and bring a lawsuit against the partnership to determine his interest in the partnership, including a buyout price if he was dissociated from the partnership.

A Wyoming district court found that dissociation of Randall as a partner was the appropriate remedy and awarded to Randall the amount of his cash contributions, plus 34 percent of the partnership assets' increase in value above all partners' cash contributions. As a result of that calculation, \$230,819, or 25.24 percent, of the undisputed value of the partnership was awarded to Randall, without provision of interest for any partner in the calculation.

Warnick Ranch disputed the valuation and appealed to the Wyoming Supreme Court, which remanded the case to the district court, ordering it to take into account advances made by each partner to the partnership. Back in the district court again, Warnick Ranches asserted that for purposes of calculating the buyout price, the value of ranch assets should be less than the amount reflected in its appraisal. Specifically, it requested that the district court deduct \$50,000 for real estate commissions and expenses of sale, including those associated with selling livestock and equipment. The district court rejected the deduction, ruling that possible costs associated with selling the assets of the partnership are too speculative.

The district court determined the amount to be paid to Randall by first valuing the partnership assets and deducting advances made to the partnership by each partner to arrive at a net value of the partnership of \$133,901.68. Randall's percentage of ownership (34 percent) was then applied to the net value, to arrive at his proportionate share of the partnership of \$45,526.57. Adding this amount to the amount of Randall's loan to the partnership, \$70,256.56, the district court determined a buyout price of \$115,783.13. Warnick Ranches appealed once more to the Wyoming Supreme Court.

Burke, Justice

The statute at issue is part of the Wyoming Revised Uniform Partnership Act (RUPA), Wyo. Stat. Ann. §§ 17-21-101 *et seq.* (2003). The district court was charged with calculating the amount owed to Randall Warnick pursuant to the applicable provisions of RUPA, Wyo. Stat. Ann. § 17-21-603(a) (2003) and Wyo. Stat. Ann. § 17-21-701. That amount, or the buyout price, is the amount that would have been paid to the dissociating partner following a settlement of partnership accounts upon

the winding up of the partnership, if, on the date of dissociation, the assets of the partnership were sold at a price equal to the greater of the liquidation value or the value based on a sale of the business as a going concern without the dissociating partner. Wyo. Stat. Ann. § 17-21-701(b).

“[P]artnership assets must first be applied to discharge partnership liabilities to creditors, including partners who are creditors.” Wyo. Stat. Ann. § 17-21-808(b) [RUPA section 807(a)]. The interplay between RUPA § 701(b) and § 808(b) requires

that obligations to known creditors must be deducted before a partner distribution can be determined. Stated another way, in computing the buyout price, the amount the dissociating partner receives is reduced by his or her share of partnership liabilities.

Warnick Ranches claims that the district court erred in the first step of its calculation of the buyout price by overvaluing the ranch assets. The asserted error is the district court's failure to deduct estimated sales expenses of \$50,000 from the value of the partnership assets. A common understanding of liquidation is the act or process of converting assets into cash. Warnick Ranches appears to assume that the liquidation value of the ranch is the amount of cash that would remain following a sale. This assumption is not supported by the pertinent statutory language and the circumstances of this case.

Critical to our determination in this case is the recognition that the assets of this partnership were not, in fact, liquidated. Instead, the record reflects that the assets were retained by Warnick Ranches. Randall Warnick's dissociation from the partnership did not require the winding up of the partnership. The partnership's ranching operations had continued following Randall Warnick's departure. There was no evidence of any actual, intended, or pending sale before the district court at the time of dissociation, and, therefore, asset liquidation was only hypothetical. Accordingly, the deduction urged by Warnick Ranches is for *hypothetical* costs. Because of the hypothetical nature of the urged \$50,000 deduction, we find that the district court's calculation was not erroneous.

If, in applying Wyo. Stat. Ann. § 17-21-701(b), we were to interpret the term "liquidation value" in isolation, we might envision an amount representing the net proceeds resulting from a distress sale. However, that interpretation is precluded by the language contained in the statute. The full text of Wyo. Stat. Ann. § 17-21-701(b) provides:

The buyout price of a dissociated partner's interest is the amount that would have been distributable to the dissociating partner under W.S. 17-21-808(b) if, on the date of dissociation, the assets of the partnership were sold at a price equal to the greater of the liquidation value or the value based on a sale of the entire business as a going concern without the dissociated partner and the partnership were wound up as of that date. In either case, the sale price of the partnership assets shall be determined on the basis of the amount that would be paid by a willing buyer to a willing seller, neither being under any compulsion to buy or sell, and with knowledge of all relevant facts. Interest shall be paid from the date of dissociation to the date of payment.

Wyo. Stat. Ann. § 17-21-701(b) differs somewhat from the Uniform Laws version of the same provision, which does not include the second to last sentence. Revised Uniform Partnership Act § 701.

Liquidation value is one of two identified methods for valuing the partnership assets. Application of the two methods to the same partnership may yield two distinct values. The liquidation value looks to the value of the partnership's assets less its liabilities and determines each partner's appropriate share. When valuing a going concern, however, the market value of the partnership interest itself is what is at stake, rather than the percentage of net assets it represents.

Significantly, the buyout price under Wyo. Stat. Ann. § 17-21-701(b) involves use of the *greater* value resulting from the alternate valuation methods. Warnick Ranches' argument seems to assume that the district court's calculation incorporated the liquidation value of the partnership assets. We see room for disagreement based upon the record. The district court did not specify which valuation method was selected, and it was therefore possible that the value used in the buyout price calculation represented the going concern value of the ranch. Warnick Ranches makes no argument that costs of sale should also be deducted from the going concern value because, under its rationale, the \$50,000 deduction is required only as part and parcel of liquidation value. Were we to conclude that the district court used a figure which represented the going concern value, our analysis could end here without further discussion of hypothetical costs of sale.

However, even if the district court valued the partnership assets using liquidation value, the deduction for costs associated with a hypothetical sale would not be warranted. Contrary to the interpretation asserted by Warnick Ranches, liquidation value is not the amount of the seller's residual cash following a sale. We find that the meaning of liquidation value in the statute is best understood by comparing it to the other method provided. When contrasted with "going concern value" it is clear that "liquidation value" simply means the sale of the separate assets rather than the value of the business as a whole.

Additionally, under either valuation method, Wyo. Stat. Ann. § 17-21-701(b) directs that the sale price be determined "on the basis of the amount that would be paid by a willing buyer to a willing seller, neither being under any compulsion to buy or sell, and with knowledge of all relevant facts." The legislature chose to supplement the Uniform Laws version of this provision by adding this sentence, lending added significance to this language. This "willing buyer" and "willing seller" language does not present a novel legal concept, as it sets forth precisely what has long been the legal definition or test of "fair market value." *Black's Law Dictionary* 1587 (8th ed. 2004). This language is similar to that found in commentary to RUPA, § 701(b).

Warnick Ranches does not provide any analysis concerning the fair market value language contained in Wyo. Stat. Ann. § 17-21-701(b) and does not explain how it can be reconciled

with its urged meaning of liquidation value as involving a deduction for costs of sale. That reconciliation may be difficult. Simply stated, a deduction from fair market value yields an amount which is, by definition, less than fair market value.

Considering the language of RUPA § 701(b) as a whole, we conclude that “liquidation value” does not have the meaning that Warnick Ranches desires, i.e., the amount a seller would “net” upon liquidation. Rather, “liquidation value” represents the sale price of the assets based upon fair market value. Where it is con-

templated that a business will continue, it is not appropriate to assume an immediate liquidation with its attendant transactional costs and taxes. We therefore hold that, under Wyo. Stat. Ann. § 17-21-701(b), purely hypothetical costs of sale are not a required deduction in valuing partnership assets. We find no error in the district court rejecting the \$50,000 deduction urged by Warnick Ranches in calculating the buyout price.

Judgment for Randall Warnick affirmed.

Partners Joining an Existing Partnership

Frequently, a partnership will admit new partners. For example, many of you hope to be admitted to a well-established consulting or accounting partnership after you graduate and have practiced for several years. The terms under which a new partner is admitted to a partnership are usually clearly stated in the partnership agreement and in the partner’s admission agreement. The terms usually include the procedure for admission as well as the new partner’s capital contribution, compensation including salary and share of profits, and power to manage the business. In the absence of a partnership agreement, the RUPA sets the rules for the partner’s admission and rights and duties upon admission. For example, a new partner is admitted to a partnership only if all partners consent.

Liability of New Partners An important question is what level of liability a new partner should

have for obligations of the new partnership. It makes sense for a new partner to be fully liable for all partnership obligations incurred *after* he becomes a partner, for he clearly benefits from the partnership during that time. This is the RUPA rule.

What should be his liability for partnership obligations incurred *before* he became a partner? The RUPA states that a new partner has no liability for partnership obligations incurred before he became a partner. However, many

LOG ON

www.nccusl.org

At the Web site for the National Conference of Commissioners on Uniform State Laws, you can find the complete text and comments of the RUPA. You can find the complex default rules regarding dissociation, dissolution, and buyouts of partners in Articles 6, 7, and 8. Pay particular attention to sections 601, 701, 801, and 802. Knowing the content of these sections will help you draft the partnership agreement dealing with a partner leaving the partnership.

Ethics in Action

The default rules of the RUPA provide that any partner who leaves the partnership is entitled to the value of her partnership interest. The default valuation method uses the greater of the partnership’s liquidation or going concern value. If a partner wrongfully dissociates, however, damages are deducted from the partner’s interest and the partner need not be paid until the partnership ends.

- Why would partners want a partnership agreement that sets out a different valuation method than the default rule?
- What risk is taken by relying on the default rule? Among other things, under the default rule a court will value a part-

nership interest when partners cannot agree on the valuation. Why would partners not want a court to value a partnership interest?

- Using profit maximization analysis, is it ethical to delay payment to a wrongfully dissociating partner for the value of her partnership interest until the partnership terminates? Does utilitarian analysis change your answer? What are the costs and benefits of delaying payment?
- When do you propose your partnership should pay a partner who dissociates due to death, disability, retirement at an expected age, and unexpected dissociations? What ethical arguments would you make to justify the rules you propose?

CONCEPT REVIEW

Consequences of Partner's Death or Retirement under the RUPA's Default Rules

Death of Partner

- A.** Is a nonwrongful dissociation
- B.** Does not by itself effect a dissolution
- C.** Rights of estate of deceased partner
 - 1.** Receive the amount in the deceased partner's capital account at the time of death, valuing the partnership or its assets at the greater of
 - a.** liquidation value or
 - b.** going concern value.
 - 2.** Payment must be made not later than 120 days after a written demand by the estate
- D.** Rights of other partners
 - 1.** In a partnership at will: any partner may dissociate at any time and effect a dissolution
 - 2.** In a partnership for a term
 - a.** Any partner may dissociate within 90 days of death:
 - 1)** that dissociation will not dissolve the partnership
 - 2)** that dissociated partner must be paid the amount in her capital account (see calculation in C.1 above) within 120 days after a written demand by the partner
 - b.** By a vote of at least 50 percent of partners within 90 days of death, the partnership may be dissolved and its business wound up

Retirement (Withdrawal) of Partner

- A.** Is a dissociation
 - 1.** Is a nonwrongful dissociation if the partnership is at will
 - 2.** Is a wrongful dissociation if the partnership is for a term, the term has not expired, and the partnership agreement does not permit the partner's withdrawal
- B.** Automatically effects a dissolution if the partnership is at will
- C.** Rights of dissociated partner
 - 1.** If nonwrongful dissociation, dissociated partner
 - a.** may wind up the business, if a partnership at will, or
 - b.** receives the amount in the dissociated partner's capital account (see calculation in C.1 above) within 120 days after a written demand
 - 2.** If wrongful dissociation, dissociated partner
 - a.** may not dissolve the partnership and
 - b.** receives the amount in the dissociated partner's capital account (see calculation in C.1 above) less damages, at the end of the partnership's term, unless no undue hardship to partnership by paying earlier
- D.** Rights of other partners
 - 1.** In a partnership at will, any partner may dissociate at any time and effect a dissolution
 - 2.** In a partnership for a term if the retirement is a wrongful dissociation,
 - a.** any partner may dissociate within 90 days of the retirement and be paid the amount in her capital account (see calculation in C.1 above) within 120 days after a written demand by the partner;
 - b.** by a vote of at least 50 percent of partners within 90 days of the retirement, the partnership may be dissolved and its business wound up
 - 3.** In a partnership for a term if the retirement is a nonwrongful dissociation, the remaining partners have no rights created by the retirement

partnership agreements modify this rule by requiring a partner to assume liability for all the obligations of the business as a condition of being admitted to the partnership.

Effect of LLP Statutes If a new partner enters an LLP, however, the RUPA provides that the partner has no lia-

bility for the obligations of the LLP beyond his capital contribution, whether incurred before or after his admission, unless the new partner has committed malpractice or other wrong for which he is personally responsible. LLP partnership agreements should not change this rule.

Problems and Problem Cases

1. Horizon/CMS Healthcare Corp., a large provider of both nursing home facilities and management for nursing homes, expanded into the Kissimmee, Florida, market by entering several 20-year partnerships with Southern Oaks Health Care, Inc. Within a few years, Horizon claimed that the partners had irreconcilable differences regarding how profits were to be determined and divided, resulting in the partners incapacity to operate in business together. Horizon asked a court to dissolve the partnership on these grounds. Did the court grant Horizon's request? Has Horizon wrongly dissociated by seeking judicial dissolution on these grounds?
2. Byron Bennett and Louis Gagliardi were partners in a law practice. Gagliardi received 60 percent of partnership profits and Bennett received 40 percent. When Gagliardi died, Bennett continued to practice law at the partnership location in Philadelphia, Pennsylvania. While winding up partnership cases, Bennett commingled all of the revenue generated from partnership case files with his own personal funds. In addition, he spent all but approximately \$2,000 of the partnership's revenue for personal and other nonpartnership purposes. Bennett expended 563.5 hours and incurred costs of \$2,938 in winding up the partnership cases. Bennett paid \$750 to a CPA for preparation of the partnership's 1993 tax return. He spent 73.5 hours and paid \$618.87 to produce the accountings of the partnerships affairs. Did Bennett do anything wrong? Was Bennett entitled to compensation for his time and reimbursement of expenses for winding up the affairs of the partnership?
3. In 1968, Hal Bolinger and his son Bud Bolinger created a partnership that operated a ranch. The partnership agreement set a value of \$48,000 for the partnership and stated that the value controlled in the event of a sale or dissolution of the partnership. The terms also stated that each year the partners would update the value, which will serve for the following year as the value of the partnership. In the event of Hal's or Bud's death, the agreement gave the surviving partner the right to purchase the deceased partner's interest at the value established in the agreement. Despite this agreement, Hal and Bud never updated the valuation of the partnership. In 1995, Bud died and was survived by his children. The partnership dissolved, but Hal continued the business. Bud's estate sought the value of his partnership interest. The fair value of the partnership was over \$400,000, far above the 1968 valuation of \$48,000 that was never updated. To determine the value of Bud's partnership interest, did the court use the 1968 valuation or did it determine the fair value of the partnership?
4. Pietra Korda and Anna Kim were partners in an IT consulting business, K2 Solutions. They operated the business in a building owned by the partnership. The partnership purchased the building with the proceeds of a loan from Commerce Bank of Brunswick, which held a mortgage in the building. When Korda dissociated from the partnership, Kim paid Korda the value of her partnership interest, and Korda gave up all her claims against the partnership and its assets. Korda filed a Statement of Dissociation with the secretary of state, and she gave notice by a letter to Commerce Bank that she had left the partnership. Commerce Bank did not respond to the letter. Kim dissolved the partnership, filing a Statement of Dissolution, and continued the business under the name K-One Solutions LLC. For two years, Kim made monthly payments to Commerce Bank on the mortgage, paying with checks drawn on K-One Solutions' checking account at Commerce Bank. When Kim defaulted on the mortgage obligation, Commerce Bank sued K2 Solutions, Kim, and Korda. Was Korda liable on the mortgage obligation to Commerce Bank?
5. Robert Weiss was a partner in the Hillman Group, which operated a hotel in Tampa, Florida. Weiss was the manager of the hotel and received 50 percent of

its profits. The hotel became unprofitable because of Weiss's mismanagement. The partners were asked to make an additional capital contribution to the partnership, but Weiss failed to contribute as required by the partnership agreement. Pursuant to the partnership agreement, Weiss was expelled from the partnership. The partners continuing the partnership agreed to relieve Weiss from liability on the partnership's obligations. Did the partners' agreement relieve Weiss from liability to partnership creditors on obligations incurred prior to his expulsion?

6. Bertrand Barnes was one of three partners of NMB Associates, LLP, a limited liability partnership in the consulting and investment banking industries. When Barnes retired from the LLP, he sought to be released from liability on the \$5,438,000 of outstanding bank loans the LLP had incurred during his tenure at NMB. Neither the partners nor the LLP nor the banks have agreed to release Barnes from liability on the loans. What is the extent of Barnes's liability on the bank loans? Would his liability be different if NMB were a partnership and not an LLP?
7. Marc Senatré and Jacob Lewellen were partners in a business, Tavern Associates, which operated a bar in Des Moines, Iowa. The bar was located in a building that Tavern Associates leased from Graham Financial Corp. The term of the lease was five years. After two years, Senatré and Lewellen found a different building in a better location, and they moved the bar to the new location. They also reorganized the business as a limited liability company, named Tavern Associates II LLC. They transferred all the assets of Tavern Associates to Tavern Associates II. When Graham Financial sued Senatré, Lewellen, and Tavern Associates II for breaching the lease on the original building, Senatré and Lewellen argued that only Tavern Associates was liable on that lease. Were they right?
8. Joe Creel owned a NASCAR collectibles business named Joe's Racing Collectibles. In 1994, Creel brought Arnold Lilly and Roy Altizer into the business, which they reformed as a partnership named Joe's Racing. Creel contributed as capital to the partnership inventory and supplies of the old business, valued at \$15,000. Lilly and Altizer each contributed \$6,666 in cash to the partnership, and each paid \$3,333 to Creel for his rights in the existing business. The partners agreed to share profits and losses with 52 percent going to Creel and 24 percent each

to Lilly and Altizer. Less than a year later, Creel died and his wife sought to receive the value of his interest in the partnership. An accountant valued the partnership at \$44,589.44. The partnership's creditors were the accountant for \$875, Mrs. Creel \$495, Lilly \$2,187, and Altizer \$900. What was the value of the Creel's partnership interest?

9. Simon Weinberg and his brother were the only partners in Times Square Stationers LLP. The partners signed a 20-year lease with Tisch Leasing. After 12 years, Simon retired from the business and was replaced as a partner by his son, Seth. A year later, the business defaulted on its lease with Tisch Leasing. What is Seth's liability on the lease with Tisch? Would your answer change if the business were an ordinary partnership, not an LLP?
10. Herbert Lemon, Greg Clarkson, Adrienne Boysen, and five other marketing professionals decide to create a marketing consulting partnership. They expect the business will add partners from time to time, and they also know that it is likely one of the original partners will retire before the partnership is dissolved. They want to ensure that no partner entering the partnership is liable for obligations of the business that were incurred prior to the partner's entering the partnership. They also want to ensure that no partner leaving the partnership is liable for any obligation of the partnership that was incurred after she leaves. What should they do?

Online Research

Complex Partnership Agreements Redux

This research task continues the task you started at the end of Chapter 38. Return to the Web site www.onecle.com. Find the link for "Partnership Agreements" and click on it. Also click on the link "All Partnership Agreements by Industry." As before, you will find many partnership agreements involving companies like Intel, Micron Technologies, and stamps.com.

Examine these agreements. Note how they resolve the issues regarding partners leaving and entering a partnership. Compare the lists of grounds for dissociation and dissolution in the agreements with those in the RUPA. Note the dissociations that are wrongful. Read the provisions regarding the valuation of a partner's interest. Do you find that the partners' agreed upon valuations methods are less ambiguous than the RUPA's valuation method?

chapter 40

LIMITED LIABILITY COMPANIES, LIMITED PARTNERSHIPS, AND LIMITED LIABILITY LIMITED PARTNERSHIPS

You are planning two business ventures. The first venture is a business that will own self-service businesses, such as laundromats, car washes, and warehouse storage. Due to start-up costs and accelerated write-offs of expenses and assets, you expect the business to generate losses in the first year or two, after which it should earn a yearly return on equity of over 20 percent. You prefer to own this business entirely yourself, yet you want to hire someone with experience in the business to do most of the day-to-day operations of the business. While you prefer that person not be an owner of the business, you may be willing to grant a small amount of ownership or a share of profits to her.

The other business venture will purchase and develop 320 acres of land on the outskirts of your city. You plan to construct several commercial buildings on the site and to lease the building space to several tenants. The venture will generate losses during the first four or five years of construction prior to full occupancy of the buildings. You want the business to be owned by members of your family. You want to be the only manager of the business; other family members will be passive owners only. You hope that this business will generate enough income to provide a moderate level of income to every member of your family in perpetuity.

- Why is the limited liability company an especially good business form for the first venture?
- Why should you choose the limited liability limited partnership for the family-owned commercial development?

STATE LEGISLATURES AND THE Internal Revenue Service have cooperated to permit the creation of three business forms that offer taxation advantages similar to the sole proprietorship and the partnership, yet have simple default rules that promote management of the business by fewer than all the owners and extend limited liability to some or all of the owners. These forms are the limited liability company (LLC), limited partnership, and limited liability limited partnership (LLLP).

Limited Liability Companies

The limited liability company (LLC) is the product of attempts by state legislators to create a new business organization that combines the nontax advantages of the corporation and the favorable tax status of the partnership. Wyoming, in 1977, passed the first LLC statute. Every state and the District of Columbia have adopted an LLC statute. The National Commissioners on Uniform

State Laws has adopted the **Revised Uniform Limited Liability Company Act of 2006 (RULLCA)**. The RULLCA provides default rules that govern an LLC in the absence of a contrary agreement of its owners. The RULLCA treats LLCs and their owners similarly to the way the Revised Uniform Partnership Act (RUPA) treats limited liability partnerships (LLPs) and their partners, with exceptions noted in this chapter. In general, the RULLCA has fewer rules than the RUPA, leaving more decisions to its members.

LOG ON

www.nccusl.org

You can find the Revised Uniform Limited Liability Company Act of 2006 at the Web site for the National Conference of Commissioners on Uniform State Laws.

The popularity of the LLC has grown dramatically since 2000. It is the preferred form for businesses with few owners, including high-profile sports firms such as Yankee Global Enterprises LLC. Many families use LLCs for estate planning purposes. Major corporations also form some of their subsidiaries as LLCs.

Tax Treatment of LLCs An LLC may elect to be taxed like a partnership or a corporation for federal income tax purposes. LLC members usually elect for the LLC to be recognized as a partnership for federal income tax purposes. As a result, the LLC pays no federal income tax. Instead, all income and losses of the LLC are reported by the LLC's owners on their individual income tax returns. Sometimes, the LLC is a tax shelter for wealthy investors, allowing such investors to reduce their taxable income by deducting LLC losses on their federal income tax returns to the extent they are *at risk*, that is, their capital contributions to the LLC. Moreover, passive investors in an LLC, like limited partners in a limited partnership, may use their shares of LLC losses to offset only income from other *passive* investments.

Formation of LLCs To create an LLC, one or more persons must file a **certificate of organization** with the secretary of state. The certificate must include the name of the LLC, and the name and address of its registered agent. The name of the LLC must include the words "limited liability company," "limited company," or an abbreviation such as "LLC" or "L.L.C.," indicating that the liability of its owners is limited.

The owners of an LLC are called **members**. An individual, partnership, corporation, and even another LLC may be a member of an LLC.

Although not required, an LLC will typically have an **operating agreement**, which is an agreement of the members. The operating agreement will usually state whether the LLC is member-managed or manager-managed. It also will cover how members share profits, manage the LLC, and withdraw from the LLC, among other things. Well-planned LLCs have detailed operating agreements that cover all aspects of the LLC's operation and members' relations, often restating much of what is contained in the RULLCA but with changes to suit the members' needs.

Once formed, an LLC has a perpetual existence and is an entity separate from its members. It may sue and be sued in its own name. It can buy, hold, and sell property. It can make contracts and incur liabilities.

LOG ON

www.medlawplus.com/legalforms/instruct/sample-llc.pdf

It is easy to find model and even actual LLC operating agreements on the Web. The link above is typical. You can find others by typing "LLC operating agreement" in a search engine. There are also Web sites that charge for downloads of LLC operating agreements. One such site is www.uslegalforms.com.

Members' Rights and Liabilities

Limited Liability An LLC member has no individual liability on LLC contracts, unless she also signs LLC contracts in her personal capacity. Therefore, a member's liability is usually limited to her capital contributions to the LLC. She is, however, liable for torts she commits while acting for the LLC.

In addition, a member must make capital contributions to the LLC as she has agreed. This includes the initial capital she agreed to contribute and additional calls for capital that can be made on members according to the operating agreement.

Management Rights Under the RULLCA, an LLC may choose to be member-managed or manager-managed. If it fails to make that choice in its operating agreement, the LLC is member-managed. Each member in a **member-managed LLC** shares equal rights in the management of the business merely by being a member of the LLC.

Figure 1 *Principal Characteristics of LLCs under the RULLCA of 2006*

1. An LLC may be created only *in accordance with a statute*.
2. An LLC is owned by *members*. Members usually have *liability limited to their capital contributions* to the business.
3. LLC members *share equally in the profits* of the business, unless members agree otherwise.
4. An LLC may be *member-managed or manager-managed*. If it is member-managed, each member has an equal right to manage the business.
5. A member who manages the LLC owes *fiduciary duties* to the LLC and its members.
6. A member's ownership interest in an LLC is *not freely transferable*. A transferee of a member's distributional interest receives only the member's share of LLC distributions.
7. The death or other withdrawal of a member *does not usually dissolve an LLC*.
8. Members of an LLC may choose to have the LLC *taxed as a partnership or as a corporation*.

Each member is an agent of the LLC with implied authority to carry on its ordinary business. If a member-managed LLC has limited the implied authority of one of its members, that member will retain apparent authority to transact for the LLC with a third party who did not know and had no notice that the member's authority was restricted.

The LLC operating agreement may modify the default rules of the RULLCA by granting more power to some members, such as creating a class of members whose approval is required for certain contracts. The agreement could also provide that members share power in relation to their capital contributions.

Managers in a **manager-managed LLC** may be elected and removed *at any time* by a vote of a majority of LLC members. The powers of a manager to act for the LLC are similar to the power of members in a member-managed LLC. Each manager in a manager-managed LLC shares equal rights in the management of the business as an agent of the LLC with implied authority to carry on the LLC's ordinary business. If a manager-managed LLC has limited the implied authority of one of its managers, that manager retains apparent authority to transact for the LLC with a third party who did not know and had no notice that the manager's authority was restricted.

Under the RULLCA, most matters in an LLC may be conducted by individual managing members or managers, or by a vote of a majority of managing members or managers. This facilitates the conduct of ordinary business. Some matters, however, require the consent of all members, including amendment of the operating agreement, admission of new members, the redemption of a

member's interest, and the sale of substantially all the LLC's assets.

In addition to being contractually liable for the acts of its members or managers acting within their express, implied, or apparent authority, the LLC is also liable for the torts and other wrongful acts of managing members and other managers acting within their authority. The LLC is not ordinarily liable for the wrongful acts of members not designated as managers in a manager-managed LLC.

Duties Each member in a member-managed LLC and each manager in a manager-managed LLC is a fiduciary of the LLC and its members. The managing member or manager must account for LLC property and funds and not compete with the LLC. They owe a duty to act with the care that a person in a like position would reasonably exercise and with a reasonable belief that the act is in the best interest of the LLC. Managers must comply with the business judgment rule, a rule we cover in detail in our treatment of corporation law in Chapter 43. This duty of care can be increased or it can be decreased within limits set by the RULLCA.

Nonmanaging members of a manager-managed LLC owe no fiduciary duties to the LLC. Nonetheless, whether or not they are managers, all members owe a duty of good faith and fair dealing when exercising their rights as members. This means all members must act honestly and treat each other fairly.

In the following *Katris* case, the court held that while managers of an LLC owe fiduciary duties, a nonmanaging member of an LLC had no fiduciary duty, even when the LLC's manager delegated considerable power to him.

Katris v. Carroll

842 N.E. 2d 221 (Ill. Ct. App. 2005)

In the 1990s, Stephen Doherty wrote for Lester Szlendak a software program called Viper. On February 14, 1997, Doherty and Szlendak, along with Peter Katris and William Hamburg (both employees of Ernst & Company), formed Viper Execution Systems L.L.C. to exploit the software. Each member held a 25 percent interest in the LLC. Szlendak and Doherty assigned all their rights in Viper to the LLC. The operating agreement provided that the “business and affairs of the LLC shall be managed by its managers” and that the members agreed to elect Katris and Hamburg as the “sole managers” of the LLC. The operating agreement also listed the powers of the managers and the rights and obligations of the members. None of the rights and obligations of the members provided the members with any managerial authority. The operating agreement also stated it could “not be amended except by the affirmative vote of members holding a majority of the participating percentages.”

Also on February 14, 1997, Katris and Hamburg, as managers of the LLC, adopted resolutions naming Hamburg as chief executive officer, Katris as chief financial officer, Szlendak as director of marketing, and Doherty as director of technical services. The written consent to the resolution contained signature lines for Hamburg and Katris, who were identified as “all of the managers” of the LLC.

Prior to and at the time of the LLC’s formation, Doherty worked as an independent contractor for Hamburg and Patrick Carroll (also an Ernst employee). In late 1997, Ernst hired Doherty to work for Carroll. Working for Carroll and Ernst, Doherty helped to adapt a software program, Worldwide Options Web (WWOW).

By 2002, Katris came to believe that WWOW was functionally similar to Viper. He sued Doherty, Carroll, and Ernst arguing that Doherty usurped a corporate opportunity of the LLC by working in secret with Carroll to develop competing software for Ernst. He further contended that Carroll and Ernst colluded with Doherty in the breach of Doherty’s fiduciary duties to the LLC. Doherty subsequently settled the case with Katris, leaving only Carroll and Ernst as defendants.

Carroll and Ernst filed a motion for summary judgment asserting that Katris’s collusion claim failed because Doherty, as a nonmanaging member of the manager-managed LLC, did not owe Katris or the LLC a fiduciary duty under the Illinois Limited Liability Company Act; thus, Carroll and Ernst could not collude with Doherty to breach a fiduciary duty under that statute. Katris argued that the 1997 resolution of the managers amended the operating agreement to name Doherty as named Director of Technology and gave Doherty “sole management responsibility for developing, writing, revising and implementing the Viper software.” Katris contended, therefore, that pursuant to the Illinois LLC Act, Doherty was subject to the standards of conduct imposed on managers by the act. The Illinois trial court disagreed with Katris, granting Carroll and Ernst’s motion for summary judgment. Katris appealed to the Appellate Court of Illinois.

McNulty, Justice

Summary judgment is appropriate where the pleadings, depositions, affidavits, admissions, and exhibits on file, when viewed in the light most favorable to the nonmoving party, show that there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law.

Katris’ claim against Carroll and Ernst depended upon a finding that Doherty owed Katris and the LLC a fiduciary duty. We look to the applicable provisions of the Illinois Limited Liability Company Act in determining the fiduciary duties owed by the managers and members of the LLC. The parties here agree that section 15-3(g) of the Act (805 ILCS 180/15-3(g)) applies to determine Doherty’s fiduciary duties.

Katris acknowledges that theirs was a manager-managed LLC and that, pursuant to the Act, a member of a manager-managed LLC “who is not also a manager owes no duties to the company or to the other members solely by reason of being a member.” 805 ILCS 180/15-3(g)(1). Katris thus concedes that Doherty did not owe any fiduciary duties solely by reason of being a member of the LLC.

Katris contends, however, that Doherty owed fiduciary duties to the LLC pursuant to section 15-3(g)(3) of the Act. Section 15-3(g)(3) provides:

[A] member who pursuant to the operating agreement exercises some or all of the authority of a manager in the management and conduct of the company’s business is held to the standards of conduct in subsections (b), (c), (d), and (e) of this Section to the extent that the member exercises the managerial authority vested in a manager by this Act[.]” 805 ILCS 180/15-3(g)(3).

Looking at the plain language of section 15-3(g)(3) of the Act, Doherty was subject to fiduciary duties if he exercised some or all of the authority of a manager pursuant to the LLC’s operating agreement. 805 ILCS 180/15-3(g)(3). Looking to that operating agreement, it specifically provides that the business and affairs of the LLC “shall be managed by its managers,” provides for the election of Katris and Hamburg as the “sole managers” of the LLC, and sets forth the powers of the managers of the LLC. Although the operating agreement also sets forth the rights and obligations of the members, these

provisions do not provide for any managerial authority. Accordingly, Doherty did not exercise any managerial authority pursuant to the LLC's operating agreement.

Katris contends, however, that the managers amended the operating agreement by passing the February 14, 1997 written consent wherein they elected Doherty "Director of Technology." He contends that Doherty's designation as "Director of Technology" elevated him to a position beyond that of a mere member of the LLC and was sufficient to impart on him some managerial authority. This argument fails for two reasons.

First, Katris has provided no authority for his contention that the written consent constituted an amendment to the operating agreement. Pursuant to its own terms, an amendment to the operating agreement required the "affirmative vote of members holding a majority of the participating percentages." Katris and Hamburg were the sole participants to the February 14, 1997, written consent and held only a combined 50% interest in the LLC. They thus could not amend the operating agreement without an additional vote. Accordingly, the facts do not support Katris' contention that the written consent constituted an amendment to the operating agreement.

Second, even if the written consent were viewed as part of the operating agreement, it did not change and, indeed, it reaffirmed the terms of the operating agreement. Katris and Hamburg executed the written consent in their capacities as the managers of the LLC. In it, they specifically resolved to adopt

the operating agreement the four members had executed that day as the operating agreement of the LLC. In the signature lines to the written consent, Katris and Hamburg designated themselves as "all of the managers" of the LLC. In light of these facts, something more than the managers' designation of Doherty as "Director of Technology" was required to change the terms of the operating agreement and grant Doherty managerial authority pursuant to it.

We find Katris' contentions inapposite under section 15-3(g)(3) of the Act. By its terms, that section applies where the nonmanager member exercises some or all of the authority of a manager *pursuant to the operating agreement*. To look beyond the operating agreement to Katris' affidavit would be to ignore the plain meaning of the statute and to render the express words used therein superfluous or meaningless. This we cannot do.

The undisputed facts of this case show that Doherty was a member of a manager-managed LLC and exercised no managerial authority pursuant to the LLC's operating agreement. Accordingly, the undisputed facts show that Doherty owed no fiduciary duties to Katris or the LLC pursuant to the Act. Katris's collusion claim against Carroll and Ernst fails as a matter of law.

Summary Judgment for Carroll and Ernst & Company affirmed.

Member's Distributions A member's most important right in an LLC is to receive distributions (usually profits) from the LLC. The RULLCA provides that members share profits and other distributions equally, regardless of differences in their capital contributions. No member, however, is entitled to a distribution of profits prior to the dissolution of the LLC, unless the LLC decides to make an interim distribution. The LLC members will usually state in the LLC operating agreement how and when profits are distributed. For example, the operating agreement may simply state that managing members are entitled to salaries and that all members share profits after salaries in proportion to their capital contributions to the LLC. At the other extreme, the LLC operating agreement may have complex rules determining how profits are allocated, including factors such as hours a member works for the LLC, the revenue from clients acquired for the LLC by a member, and a member's capital contribution.

Member's Ownership Interest An LLC member's ownership interest in an LLC is the personal property of

the member. However, unlike a corporation in which a shareholder may freely transfer her shares and all her rights to another person, a member has limited ability to sell or transfer her rights in the LLC. Under the RULLCA, a member may transfer her **transferable interest** in the LLC to another person; however, the transferee is not a member of the LLC. The transferee's most important right is to receive the transferring member's right to distributions from the partnership; that is, a share of profits and the value of the member's interest when the LLC is liquidated. A transferee has no right to manage the business and has only a limited right to information about the LLC's accounts.

The LLC operating agreement may provide that a transferee of a member's transferable interest becomes an LLC member. If so, the transferee has the rights, powers, and liabilities of the transferring member, which may include the right to manage the LLC, the right to access LLC records, and the duty to make additional capital contributions.

A personal creditor of a member may obtain from a court a charging order that charges the member's

transferable interest with the payment of the debt owed to the creditor. The creditor with a charging order receives, therefore, the member's share of distributions for the life of the charging order. The creditor does not own the transferable interest, but instead only has a lien or security interest against it. To own the transferable interest and acquire all the rights of a transferee, the creditor must foreclose against the interest and purchase it at a foreclosure sale.

Members' Dissociations and LLC Dissolution Under the RULLCA, members dissociate from an LLC in ways similar to those by which a partner dissociates from a partnership or LLP under the RUPA. Dissolution of an LLC is also similar to that of a partnership or LLP. Therefore, generally, when an LLC member dies or otherwise withdraws from the LLC, the LLC's business will continue, preserving its going concern value.

Member Dissociations A member's dissociation is a change in the relationship among the dissociated member, the LLC, and the other members caused by a member's ceasing to be associated in the carrying on of the business. Under the RULLCA, a partner has the power to dissociate by withdrawing from the LLC at any time. Dissociations are also caused by a member's death, having a guardian appointed over her affairs, being adjudged legally incompetent by a court, being a debtor in bankruptcy, or being expelled by the other members. The other members may expel a member if it is unlawful to carry on business with her, she has suffered a charging order against her transferable interest, or she has transferred all her transferable interest in the LLC. At the request of the LLC or a member, a court may also expel a member because she has harmed the LLC's business, breached the LLC operating agreement, or engaged in conduct that makes it not practicable to carry on business with her. Judicial expulsion would be appropriate when a member persistently breaches the duty of good faith or competes against the LLC. There are also other causes of dissociation for nonhuman members.

A member's dissociation may be wrongful or non-wrongful. Wrongful dissociations breach the LLC operating agreement. Under the RULLCA, a member has wrongfully dissociated by withdrawing before an LLC's term expires, being a debtor in bankruptcy, or being expelled by a court. When dissolution is wrongful, the dissociating member is liable to the LLC for damages

caused by the dissociation, such as the loss of business due to the member's withdrawal.

When a member dissociates, his right to manage the business terminates, as do his duties to the LLC, for the most part. He may, however, have apparent authority to transact for the LLC, unless notice of his dissociation is given to third parties. This apparent authority can be eliminated by giving personal notice to LLC creditors that a member has dissociated or by filing a Statement of Dissociation with the secretary of state.

Dissociation also terminates a member's status as a member. A dissociated member is treated as a transferee of a member's transferable interest.

Payment to a Dissociated Member Under the RULLCA, the dissociated member has no right after her dissociation to force the LLC to dissolve and to liquidate its assets. The RULLCA leaves such decisions to the operating agreement. In addition, a dissociated member is not entitled to receive the value of her LLC interest until the LLC dissolves, unless the members agree otherwise. The RULLCA expects members to resolve buyout issues in the operating agreement.

There is one exception. If the LLC is *at will* and is not dissolved, the LLC must purchase his interest at fair value within 120 days after the member's dissociation. If the LLC *has a term*, however, and is not dissolved, the LLC may continue its business and pay the dissociated member the value of his interest within 120 days after the end of the LLC's term.

LLC Dissolution When an LLC is dissolved, ordinarily it must be wound up. Since a business usually is worth more as a going concern, the RULLCA has few events that automatically cause dissolution of an LLC. For example, death and withdrawal of members do not by themselves cause dissolution of an LLC. Instead, the RULLCA mostly lets members decide the causes of dissolution.

The few grounds for dissolution in the RULLCA include an event making it unlawful for the LLC business to continue, judicial dissolution at the request of a member or transferee of a member's transferable interest, and administrative dissolution by the secretary of state. A member or dissociated member may ask for a judicial dissolution if, for example, the LLC cannot practicably carry on its business, the LLC is being managed illegally or oppressively, or the LLC failed to purchase a dissociated member's transferable interest on the date required. The RULLCA allows the members to state in the operating agreement the events that will dissolve the LLC. The

operating agreement may also allow the members to dissolve the LLC by their vote, which may be any percentage of members that the members choose.

When an LLC dissolves, any member who has not wrongly dissociated may wind up the business. Winding-up members should liquidate the assets, yet they may preserve the LLC's assets or business as a going concern for a reasonable time in order to optimize the proceeds from the liquidation.

The LLC is bound by the reasonable acts of its members during winding up, and may be liable for actions that continue the business and are inconsistent with winding up, unless the LLC gives third parties notice of dissolution. Notice can be given in a reasonable manner, such as by e-mail, letter, or phone call, and by filing a Notice of Dissociation with the secretary of state, which is effective against all parties 90 days after filing.

Distribution of Dissolved LLC's Assets After all the LLC assets have been sold, the proceeds will be distributed first to LLC creditors, including members who are creditors. If there are excess proceeds, members' contributions are returned next. Any remaining proceeds are distributed in proportion to how they share profits.

If the LLC's assets are insufficient to pay all creditors' claims, ordinarily creditors have no recourse, because the LLC's members have liability limited to the assets of the LLC. If an LLC member has not paid in all the capital she was required to pay, however, creditors may sue the member to force the member to contribute the additional capital.

Effect of Operating Agreement The default dissociation and dissolution rules of the RULLCA may be unacceptable to members of an LLC. Therefore, a well-drafted

operating agreement will cover this area completely, defining the grounds for dissociation, such as death, withdrawal, and disability of a member. The agreement should also state when a member may be expelled by the other members and a court. The RULLCA gives the members much flexibility to arrange their affairs the way they want.

The operating agreement may state the amount and timing of payments to a dissociated member for the value of her ownership interest. For example, the operating agreement may provide for a lump-sum payment within 90 days after a member dies, becomes disabled, or withdraws at age 55 or later. If a member withdraws before age 55, the agreement may provide for payment in quarterly installments over a five-year period.

The agreement may also state when dissolution and winding up occur. For example, the agreement may provide that no member has the power to seek dissolution at any time. Instead, the agreement may permit a vote of 75 percent of the members to commence winding up if any member dies or withdraws before the time permitted in the LLC operating agreement. It may require unanimous approval by the members in all other contexts. The agreement should also stipulate which members will have the right to participate in winding up.

The LLC operating agreement may also modify how proceeds are distributed to members during winding up after creditors are paid. For example, the agreement may state that all proceeds beyond creditors' claims are distributed equally to members, regardless of their capital contributions.

The following case considers both the effects of a member's dissociation and the management rights of a member in an LLC. It contains a good example of an LLC operating agreement that details the management powers of a managing member.

In re Garrison-Ashburn, LC

253 B.R. 700 (E. D. Va. 2000)

Cralle Comer and Stephen Chapman formed two manager-managed limited liability companies, Garrison-Ashburn, L. C. and Garrison-Woods, L. C. Comer and Chapman each owned a 50 percent membership interest in each LLC. While Chapman was the initial operating manager, Comer later replaced him as operating manager.

In 1999, Chapman filed a voluntary petition in bankruptcy under Chapter 11 of the United States Bankruptcy Code. In the course of the bankruptcy proceeding, Comer wished to sell a parcel of land owned by Garrison-Woods. Chapman argued that Garrison-Woods could not sell the land without his consent on the grounds that the LLC's operating agreement required all deeds and sales contracts be executed by both members. He refused to sign the contract of sale or the deed. Comer argued that as operating manager he was fully authorized to execute the contract. The bankruptcy court ruled in favor of Comer, and Chapman moved for the court to reconsider its judgment.

Mayer, Judge

The court is satisfied that Comer can bind Garrison-Woods and consummate the contract without Chapman's consent or participation.

The heart of Chapman's argument is Article IV, Section 6 of the Operating Agreement which addresses the powers of the Operating Manager. This section states in part:

Operating Manager. The Operating Manager shall be the chief executive officer of the Company and shall have the general charge of the business and affairs of the Company, subject, however, to the right of the Members to confer specified powers on officers and subject generally to the direction of Members. . . . The Operating Manager shall also have the sole and complete control of the management and operation of the affairs and business of the Company. Without limiting the foregoing, the Operating Manager shall have full and complete authority in his sole and exclusive discretion to execute on behalf of the company, any listing agreement, contract or other paper.

Article IV, Section 11 of the Operating Agreement states in part:

Signature Authority. Without limiting the foregoing, the signatures of both the Operating Manager and the Assistant Operating Manager shall be required for, and they shall have full and complete authority in their sole and exclusive discretion to:

- a. Execute on behalf of the Company, any bond or deed, execute or endorse promissory notes and renew the same from time to time;
- b. Draw upon any bank or banks or any corporations, associations, or individuals for any sum or sums of money that may be to the credit of the Company, or which the Company may be entitled to receive;
- c. Make all necessary deeds and conveyances thereof of Company real and/or personal property, wheresoever located, with all necessary covenants, warranties, and assurances, and to sign, seal, and acknowledge and deliver the same;

Chapman argues that pursuant to Article IV, Section 11, he along with Comer must also sign such a contract for it to be legally binding. This argument is contrary to the plain meaning of the Operating Agreement. The Operating Agreement plainly vests in the Operating Manager "the sole and complete control of the management and operation of the affairs and business of the Company" and the "full and complete authority . . . to execute on behalf of the Company" any contract. Operating Agreement, Article IV, Section 6. The Operating Manager controls the business affairs of the company pursuant to Section 6. This

includes the ability to sell the principal property of the company thereby realizing the company's objective. Section 11 by its express terms does not limit this authority. Moreover, it does not require both members to execute a deed, as suggested in the Motion, but rather two officers, the Operating Manager and the Assistant Operating Manager. At best, if Chapman is the Assistant Operating Manager, Section 11 requires the deed that would be necessary to consummate the contract be signed by Comer as Operating Manager and Chapman as Assistant Operating Manager.

Chapman fails to consider the effect of the filing of his voluntary petition in bankruptcy on his rights in the limited liability company. The Code of Virginia provides that a member is "dissociated" from a limited liability company upon the occurrence of certain events, one of which is filing a petition in bankruptcy.

Dissociation of a member does not dissolve the company. The company continues in existence. The effect on a member of becoming dissociated from a limited liability company is to divest the member of all rights as a member to participate in the management or operation of the company. The only rights remaining are the dissociated member's economic rights, his membership interest. That is to say, the dissociated member is expelled from the company, but does not forfeit the value of his ownership interest.

The question presented by Chapman is whether Garrison-Woods can lawfully execute and consummate a contract for the sale of its real estate. Under present Virginia law, when Chapman filed his voluntary petition, he ceased to be a member and had no further voice or vote in the management of Garrison-Woods. Comer, as the sole remaining member, has the unilateral power to remove Chapman as Assistant Operating Manager at any time and elect a new Assistant Operating Manager. The new Assistant Operating Manager need not be a member of the company. In any event, Comer could elect himself the new Assistant Operating Manager. Article IV, Section 1 of the Operating Agreement provides that any two or more offices may be held by the same person. The restriction Chapman raises in his motion to reconsider would not prevent Garrison-Woods from executing the sales contract for its parcel or from consummating the sale. The legal authority, and the intention, to execute the contract and consummate it are both present. The contract approved by the court can be fully consummated.

Chapman's motion to reconsider is denied. Judgment for Comer.

The Global Business Environment

The limited liability company is known in many countries throughout the world. However, LLCs formed under the laws of other nations are a bit different from American LLCs.

In Germany, which claims to be the first nation to permit them, in 1892, LLCs are known as *Gesellschaft mit beschränkter Haftung* (GmbH). Other countries soon followed Germany's lead, including Portugal (1917), Brazil (1919), Chile (1923), Turkey (1926), Uruguay (1933), Mexico (1934), and Belgium (1935). In France, the *societes de responsabilite limitee* is more popular than the more traditional stock corporation.

In these countries, LLC law confers limited liability on the members, requires use of the word *limited* in the entity's name, permits members to control admission of new members to the entity, and allows the entity to be dissolved by death of a member, unless otherwise expressly stated in the articles of association. Most countries provide for management of LLCs by one or more managing directors. Many countries also limit the number of members in an LLC, making the LLC an entity inappropriate for a publicly held company. Some experts refer to these LLCs as private limited companies, which more accurately describes what they are: corporations with a limited number of owners.

Limited Partnerships and Limited Liability Limited Partnerships

The partnership form—with managerial control and unlimited liability for all partners—is not acceptable for all business arrangements. Often, business managers want an infusion of capital into a business yet are reluctant to surrender managerial control to those contributing capital. Investors wish to contribute capital to a business and share in its profits yet limit their liability to the amount of their investment and be relieved of the obligation to manage the business.

As you have already seen in this chapter and the other partnership chapters, an LLC may have an operating agreement and a limited liability partnership (LLP) may have a partnership agreement that accomplishes these objectives by limiting the management right to fewer than all of the LLC's members or LLP's partners. The **limited partnership**, however, has a basic, default structure that serves these needs. The limited partnership has two classes of owners: **general partners**, who contribute capital to the business, manage it, share in its profits, and possess unlimited liability for its obligations; and **limited partners**, who contribute capital and share profits, but possess no management powers and have liability limited to their investments in the business.

A variant of the limited partnership is the **limited liability limited partnership (LLLP)**. An LLLP is a limited partnership that has elected limited liability status for all its partners, including general partners. Except for the liability of general partners, limited partnerships and LLLPs are identical. For that reason, every well-planned limited partnership should eliminate the unlimited liability

of its human managers by having a corporate general partner or electing LLLP status, when available. Today, every state recognizes limited partnerships and many recognize LLLPs as well.

The Uniform Limited Partnership Acts

In 2001 the National Conference of Commissioners on Uniform State Laws drafted a new Uniform Limited Partnership Act (ULPA) to replace the Revised Uniform Partnership Act of 1976 and its 1985 amendments. The ULPA of 2001 is the first comprehensive statement of American limited partnership law. As shown in Figure 2, many characteristics of a limited partnership under the ULPA are similar to those of a partnership or LLP under the Revised Uniform Partnership Act. While the ULPA copies much of the law of the RUPA, only the ULPA applies to limited partnerships.

Although most states at this time have enacted the RULPA, we will study the ULPA of 2001, which will soon be the dominant limited partnership law in the United States. As of October 2008, 17 states have adopted or introduced the ULPA. The ULPA governs both limited partnerships and LLLPs. Under the ULPA, limited partnerships and LLLPs are identical except for the liability of general partners. Therefore, when this chapter addresses limited partnership law (other than the rules regarding the liability of general partners), the law applies to LLLPs as well.

Use of Limited Partnerships and LLLPs

The limited partnership (or LLLP) form is used primarily in tax shelter ventures and activities such as real estate investment, oil and gas drilling, and professional sports. When the limited partnership elects to be taxed as a partnership, it operates as a tax shelter by allowing

Figure 2 Principal Characteristics of Limited Partnerships and LLLPs

1. A limited partnership or LLLP may be *created only in accordance with a statute*.
2. A limited partnership or LLLP has two types of partners: *general partners* and *limited partners*. It must have one or more of each type.
3. All partners, limited and general, *share the profits* of the business *in relation to their capital contributions*.
4. Each limited partner has *liability limited to his capital contribution* to the business. Each general partner of a limited partnership has *unlimited liability* for the obligations of the business. A general partner in an LLLP, however, has *liability limited to his capital contribution*.
5. Each general partner has a *right to manage* the business, and she is an agent of the limited partnership or LLLP. A limited partner has *no right to manage* the business or to act as its agent, but he does have the right to vote on fundamental matters. A limited partner may manage the business, yet retain limited liability for partnership obligations.
6. General partners, as agents, are *fiduciaries* of the business. Limited partners are not fiduciaries.
7. A partner's rights in a limited partnership or LLLP *are not freely transferable*. A transferee of a general or limited partnership interest is not a partner, but is entitled only to the transferring partner's share of capital and profits, absent a contrary agreement.
8. The death or other withdrawal of a partner does not usually dissolve a limited partnership or LLLP, unless there is no surviving general partner.
9. Usually, a limited partnership or LLLP is taxed like a partnership. However, a limited partnership or LLLP may elect to be taxed like a corporation.

partners to reduce their personal federal income tax liability by deducting limited partnership losses on their individual income tax returns. General partners, however, receive a greater tax shelter advantage than do limited partners. Losses of the business allocated to a general partner offset his income from any other sources. Losses of the business allocated to limited partners may be used to offset only income from other *passive* investments and only to the extent limited partners are *at risk*, that is, to the extent of their capital contributions to the limited partnership. If a limited partner has sold her limited partnership interest or the limited partnership has terminated, her loss offsets any income. Limited partnerships are also used by family businesses for estate planning purposes. The *Moser* case after the next section concerns a family limited partnership. Regardless of the use, the ULPA presumes that its partners want a highly centralized, strongly entrenched management (general partners) and passive investors with little control and little right to exit the limited partnership (limited partners).

Creation of Limited Partnerships and LLLPs

A limited partnership (or LLLP) may be created only by complying with the applicable state statute. Yet the statutory requirements of the ULPA are minimal. A **certificate of limited partnership** must be executed and submitted to the secretary of state. The certificate must be signed by all general partners. A limited partnership begins its existence at the time the certificate is filed by the office of the secretary of state. The limited partnership may ask the secretary of state to issue a Certificate of Existence, which is conclusive proof the limited partnership exists.

The ULPA requires that the limited partnership certificate submitted by the limited partnership include its address, its registered agent for service of process, its general partners' names and addresses, and whether it is a limited partnership or an LLLP. The name of a limited partnership must include the words *limited partnership* or the letters *L.P.* or *LP*. The name of a limited liability limited partnership must contain the words *limited liability limited partnership* or the letters *L.L.L.P.* or *LLLP*. The name of a limited partnership or LLLP may include the name of any partner, general or limited.

It is expected that many limited partnerships (or LLLPs) will have unlimited duration. Therefore, the

LOG ON

www.nccusl.org

You can find the Uniform Limited Partnership Act of 2001 at the Web site for the National Conference of Commissioners on Uniform State Laws.

ULPA provides for the perpetual life of a limited partnership (or LLLP). The limited partnership certificate or limited partnership agreement, however, may place a limit on the limited partnership's duration.

The certificate is not required to address many other matters that are essential to the limited partnership, such as the limited partners' names, the partners' capital contributions, the partners' shares of profits and other distributions, or the acts that cause a dissolution of the limited partnership. A well-planned limited partnership will usually include those and other matters in the certificate or in a separate **limited partnership agreement**.

Any *person* may be a general or limited partner. Persons include a natural person, partnership, LLC, trust, estate, association, or corporation. Hence, as commonly occurs, a corporation may be the sole general partner of a limited partnership.

Creation of LLLPs A well-planned limited partnership should shield all its partners from liability by electing LLLP status, when available. This election is simple, requiring no special filing. LLLP status is elected by making a statement in the limited partnership certificate submitted to the secretary of state that the business is an LLLP.

Defective Compliance with Limited Partnership Statute The ULPA requires at least *substantial compliance* with the previously listed requirements to create a limited partnership. If the persons attempting to create a limited partnership do not substantially comply with the ULPA, a limited partnership does not exist; therefore, a limited partner may lose her limited liability and have unlimited liability for limited partnership obligations. A general partner in an LLLP will have unlimited liability if the LLLP was formed defectively.

A lack of substantial compliance might result from failing to file a certificate of limited partnership or from

filing a defective certificate. A defective certificate might, for example, misstate the name of the limited partnership or erroneously identify the business form as a limited partnership when an LLLP was intended.

Limited Partners Infrequently, a person will believe that she is a limited partner but discover later that she has been designated a general partner or that the general partners have not filed a certificate of limited partnership. In such circumstances and others, she may be liable as a general partner unless she in good faith believes she is a limited partner and upon discovering she is not a limited partner she either:

1. Causes a proper certificate of limited partnership (or an amendment thereto) to be filed with the secretary of state, or
2. Withdraws from future equity participation in the firm by filing a certificate declaring such withdrawal with the secretary of state.

However, such a person remains liable as a general partner to third parties who previously believed in good faith that the person was a general partner.

General Partners The ULPA of 2001 has no provision protecting general partners who erroneously believe an LLLP has been formed. Consequently, a general partner in a limited partnership who believes wrongly that an LLLP has been created has unlimited liability for the obligations of the limited partnership.

In the following *Moser v. Moser* case, a husband and wife tried to use a family limited partnership to reduce taxes. Although they properly formed the limited partnership, they failed to comply with tax law and otherwise to keep the limited partnership's assets separate from themselves. Consequently, the court ruled that the husband and wife had not made a gift of the limited partnership's property to their children.

Moser v. Moser

2007 Ohio 4109 (Ohio Ct. App. 2007)

Terrance and Barbara Moser were married on October 11, 1980. Over the next 16 years, they had two children, Shannon and Joshua, and accumulated assets in excess of \$2 million. On December 31, 1996, Terrance and Barbara signed a document creating the Moser Family Limited Partnership. A family limited partnership is an estate planning device designed to minimize tax liabilities. The Moser Family Limited Partnership was set up with Terrance, as trustee of a revocable trust holding his assets, as general partner; Barbara, as trustee of a revocable trust holding her assets, as a limited partner; Shannon and Joshua as limited partners, with Barbara as their custodian. Typically, a family partnership is funded with assets having a high potential for appreciation. Parents will then give to their children a certain number of units or a percentage interest in the limited partnership, without tax liability, taking advantage of the gift tax exclusion. At the time the Moser Family Limited

Partnership was created, the annual gift tax exclusion was \$10,000. In order to function properly as an estate planning device, the gifts of partnership interest to the children had to be completed, irrevocable gifts. In this way, wealth could be transferred to children during the parents' lifetime, thus avoiding estate taxes, while the parents would be able to maintain a certain amount of control of the wealth, by virtue of the general partner's control of the partnership. After its creation, the Moser Family Limited Partnership, in conjunction with Moser Construction and other business entities previously owned and operated by the Mosers, successfully oversaw several land development ventures.

Unfortunately, Terrance and Barbara had marital problems. On January 17, 2003, Barbara filed for divorce. In addition to naming Terrance as a defendant, she also named the Moser Family Limited Partnership as an additional defendant, arguing that its assets were part of the marital estate and that she should receive a portion of the limited partnership's assets. The trial court agreed with Barbara. The court determined the total value of the marital estate to be \$3,778,764, of which \$1,507,663 represented the net value of the Moser Family Limited Partnership. Terrance appealed the decision to an Ohio appellate court.

Grendell, Judge

Terrance raises two arguments. The first is that the trial court erred by invalidating the gifts of partnership interest to the Moser children. The second is that the trial court erred by treating partnership assets as marital property.

As any initial assets of the Partnership were marital, Terrance and Barbara were deemed to be equal partners, *i.e.*, fifty percent owners of the partnership shares. The trial court found that transfers of interest in the Moser Family Limited Partnership to the Moser children did not occur on December 31, 1996, and January 1, 1997, as purported in the federal gift tax returns. Leslie D. Smeach is a certified public accountant who did work for Terrance. Smeach testified that the valuation of the partnership units allegedly given to the Moser children on December 31, 1996, and January 1, 1997, did not occur until April 1997. Prior to this valuation, it would have been impossible to determine the number of partnership units that could be given in accordance with the gift tax exclusion.

The trial court also found that Terrance operated the Moser Family Limited Partnership and its subsidiary companies as his own personal assets. The court noted the free transfer of funds between business entities that were part of, or associated with, the Moser Family Limited Partnership. For example, although the tax returns indicated the Moser Family Limited Partnership possessed a 50% interest in Rootstown Storage Partnership, Terrance continued to list Rootstown Storage as an asset on his personal financial statements. In April 2000, Terrance received a personal distribution of \$55,000 from Rootstown Storage.

The trial court determined that Terrance and Barbara had not made valid, *inter vivos* gifts of their interests in the Moser Family Limited Partnership to the Moser children. In Barbara's case, the court relied upon her testimony that she did not intend to relinquish ownership interest in the Partnership until her death.

In Terrance's case, the court found the intent to make such a gift in the Memoranda of Gifts signed by Terrance on December 31, 1997. However, the court also found that there was no delivery of the Memorandum of Gift letters to the Moser children or to Barbara as their custodian. The court also concluded that Terrance had not relinquished control over his ownership interest in the Partnership in a manner consistent with the intent to make a gift.

There was considerable testimony from various witnesses at the hearings which likened Terrance's powers under the Moser Family Limited Partnership to those of "a benevolent dictator." There was also evidence at the hearings that Terrance exercised this power freely. When the marital residence was inadvertently transferred into the Partnership, Terrance transferred it out. Terrance used Partnership funds to meet the expenses of other businesses owned by him. As noted above, there was considerable "cash flow" between entities existing both within and without the Partnership.

Accordingly, the trial court had jurisdiction over the Moser Family Limited Partnership and its partners and could exercise that jurisdiction to order Terrance to assign specific partnership properties so as to effectuate a fair and equitable division of property.

Judgment for Barbara Moser affirmed.

Rights and Liabilities of Partners in Limited Partnerships or LLLPs

The partners of a limited partnership (or LLLP) have many rights and liabilities. Some are common to both general and limited partners, while others are not shared.

Rights and Liabilities Shared by General and Limited Partners

Capital Contributions A partner may contribute any property or other benefit to the limited partnership. This includes cash, tangible or intangible property, services rendered, a promissory note, or a promise to contribute cash, property, or services. A partner is obligated to contribute

as he promised. This obligation may be enforced by the limited partnership or by any of its creditors.

Share of Profits and Losses Under the ULPA, profits and losses are shared on the basis of the value of each partner's capital contribution unless there is a written agreement to the contrary. For example, if 2 general partners contribute \$100,000 each and 20 limited partners contribute \$2,000,000 each, and the profit is \$40,200,000, each general partner's share of the profits is \$100,000 and each limited partner's share is \$2,000,000.

Because most limited partnerships are tax shelters, partnership agreements often provide for limited partners to take all the losses of the business, up to the limit of their capital contributions.

Voting Rights The ULPA of 2001 requires few actions to be approved by all the partners. Only amendment of the limited partnership agreement, amendment of the limited partnership certificate, and sale or other transfer of substantially all the limited partnership's assets outside the ordinary course of business require approval of all the partners. In a well-planned limited partnership, the limited partnership agreement may require that certain transactions be approved by general partners, by limited partners, or by all the partners. The agreement may give each general partner more votes than it grants limited partners, or vice versa.

The ULPA makes it clear that limited partners have no inherent right to vote on any matter as a class. They may receive such a right only by agreement of the partners.

Admission of New Partners Under the ULPA, the default rule is that no new partner may be admitted unless each partner has consented to the admission. The limited partnership agreement may provide for other admission procedures. For example, the general partners may be given the power to admit new limited partners without the consent of existing limited partners. Usually, this power is given to general partners to facilitate the ability of the limited partnership to raise capital, but the power should be restricted to prevent any significant dilution of the ownership interests of existing limited partners.

The limited partnership agreement may also provide for the election of new general partners, such as when a general partner dies or retires. Instead of requiring approval of all partners, the agreement may provide that a majority of the partners may elect a replacement general partner. Another option is to give to limited partners the power to replace a general partner. Another alternative is to grant such power to the partners owning a majority

of the limited partnership, measured by their capital contributions.

In general, the ULPA does not grant partners much power to expel other partners from the partnership. When we discuss partners' dissociations later in the chapter, we will examine the few grounds for expulsion.

Partner's Transferable Interest Each partner in a limited partnership owns a transferable interest in the limited partnership. It is his personal property. He may sell or transfer it to others, such as his personal creditors. Or his personal creditor may obtain a charging order against it. Generally, a buyer or transferee—or a creditor with a charging order—is entitled to receive only the partner's share of distributions. The ULPA treats charging orders like ordinary partnership law does.

When the limited partnership agreement so provides or all the partners consent, a buyer or transferee of a partner's transferable interest may become a partner. The new partner then assumes all the rights and liabilities of a partner, except for liabilities unknown to her at the time she became a partner.

A partner's transfer of his transferable interest has no effect on his status as a partner, absent a contrary agreement. The partner has not dissociated and the limited partnership has not dissolved merely as a result of the transfer. However, the limited partnership agreement may create consequences, such as expulsion of the transferring partner.

Power and Right to Withdraw Partners have the power to withdraw from the limited partnership at any time. The expectation, however, is that a limited partnership will have perpetual duration. Consequently, the ULPA gives the partners no right to withdraw, absent a contrary provision in the limited partnership agreement.

One result, therefore, under the ULPA, is that a withdrawing partner has no right to receive the value of her partnership interest. This means that a partner who withdraws from a limited partnership will not receive a return of her investment, unless the limited partnership agreement provides for a buyout of the withdrawing partner or the limited partnership dissolves and liquidates.

Other Rights of General Partners A general partner of a limited partnership or an LLLP has the same right to manage and the same agency powers as a partner in an ordinary partnership. He has the express authority to act as the partners have agreed he should and the implied authority to do what is in the ordinary course of business. In addition, he may have apparent authority to bind the partnership to contracts when his implied

authority is limited yet no notice of the limitation has been given to third parties.

A general partner has no right to compensation beyond his share of the profits, absent an agreement to the contrary. Since most limited partnerships are tax shelters that are designed to lose money during their early years of operation, most limited partnership agreements provide for the payment of salaries to general partners.

Other Liabilities of General Partners

Liability A general partner in a limited partnership has unlimited liability to the creditors of the limited partnership. In an LLLP, however, a general partner's liability is limited to his capital contribution to the business.

Even so, in an LLLP a general partner may not escape liability for torts he commits in the course of the LLLP's business. Suppose a general partner drives a car on LLLP business and negligently injures a pedestrian. Not only may the LLLP be liable, but also the general partner will have personal liability to the pedestrian. Yet the LLLP form does protect the general partner from most torts of the business. For example, the general partner in an LLLP will not have personal liability for the torts of her fellow general partners or employees.

Fiduciary Duties Any general partner, whether in a limited partnership or an LLLP, is in a position of trust when she manages the business and therefore owes fiduciary duties to the limited partnership and the other partners. The general partner must account for limited partnership property, not compete against the partnership, and not self-deal with the partnership.

In addition, a general partner owes a duty of care when transacting for the partnership. The ULPA provides considerable protection for general partners under the duty of care, imposing liability to the limited partnership only if she engages in grossly negligent or reckless conduct, intentional misconduct, or knowing violations of the law. The limited partnership agreement may increase the general partners' duty of care, although that is not typical. The ULPA permits the partners to reduce the general partners' duty of care, if not unreasonable, but gives no clue to what is reasonable or unreasonable. The *Lach* case, which appears near the end of this chapter, found general partners breached their fiduciary duty by attempting to circumvent a limited partner's right to approve new general partners.

Other Rights of Limited Partners Limited partners have the right to be informed about partnership affairs. The ULPA obligates the general partners to

provide financial information and tax returns to the limited partners on demand. In addition, a limited partner may inspect and copy a list of the partners, information concerning contributions by partners, the certificate of limited partnership, tax returns, and partnership agreements.

Other Liabilities of Limited Partners

Liability Once a limited partner has contributed all of his promised capital contribution, generally he has no further liability for partnership losses or obligations.

Under the RULPA of 1976, a limited partner who participates in the control of the business may be liable to creditors of the limited partnership. Under the RULPA, a limited partner who participates in control is liable only to those persons who transact with the limited partnership reasonably believing, based on the limited partner's conduct, that the limited partner is a general partner.

The ULPA of 2001 eliminates this liability risk. The ULPA extends to limited partners the same protection given to owners who manage LLCs and LLPs: liability limited to their capital contributions, regardless whether they manage the business.

Duties No limited partner owes fiduciary duties to the limited partnership or his partners solely by being a limited partner. That means, for example, a limited partner in an oil and gas limited partnership may also invest as a limited partner in other oil and gas limited partnerships. However, all limited partners owe a duty to act in good faith and to deal fairly with the limited partnership. For example, a limited partner who lends money to the partnership is expected to disclose his interest and to transact fairly with the limited partnership. In addition, a limited partner who is an agent of the limited partnership owes the fiduciary duties imposed by agency law. For example, a limited partner who is a leasing agent for a limited partnership that owns apartment buildings owes the duty to account for rental income and a duty of skill and care.

Partner Who Is Both a General Partner and a Limited Partner

Although unusual, a person may be both a general partner and a limited partner in a limited partnership or LLLP. A general partner may wish to be a limited partner to increase his share of limited partnership profits. A partner who is both a general and limited partner has the duties of a general partner when acting as a general partner and the duties of a limited partner when acting as a limited partner.

A general partner's liability in a limited partnership is not reduced merely because he is also a limited partner,

but a limited partner who becomes a general partner would lose his limited liability. In an LLLP, liability is unaffected by whether a partner is both a general and limited partner, as the liability is the same for both types of partners in an LLLP.

Note, however, that ULPA section 102(11) indicates that the *only* limited partner and *only* general partner may *not* be the same person.

Partners' Dissociations and Limited Partnership Dissolution

The ULPA of 2001 greatly changed the law regarding dissolutions of limited partnerships and LLLPs. The ULPA adopts much of the terminology and framework of partnership law in the RUPA. Reflecting the intent that limited partnerships and LLLPs are for long-term businesses, the ULPA makes it harder for a limited partnership to dissolve and provides few rights for partners who dissociate from the limited partnership before the partners expect.

Partners' Dissociations Because the roles of limited partners and general partners are different in a limited partnership or LLLP, the ULPA's default rules for dissociations by a limited partner are in part different from the default rules for dissociations by a general partner.

Limited Partner Dissociations A limited partner will dissociate upon the limited partner's death, withdrawal, or expulsion from the partnership.

A limited partner may be expelled by the other partners or by a court. The other partners may expel a limited partner if she has transferred all of her transferable interest or suffered a charging order against her partnership interest. She can also be expelled if it is illegal to conduct business with the limited partner, such as a securities investment firm limited partner who has been convicted of securities fraud. The other partners' vote to expel must be unanimous.

At the request of the limited partnership, a court may also expel a limited partner if she has engaged in wrongful conduct that negatively affects the business or if she has willfully and persistently breached the partnership agreement or the limited partner's duty of good faith and fair dealing.

The ULPA also defines dissociations for nonhuman limited partners, such as corporations, LLCs, and trusts.

For example, the other partners may expel an LLC that has been dissolved and is winding up its business.

A dissociated limited partner is not a limited partner, has no rights as a limited partner, and is treated as a mere transferee of the dissociated limited partner's transferable interest. That means the dissociated limited partner has no right to vote or exercise any other partners' powers, but does have the right to receive distributions (profits) from the limited partnership and has the right to receive the liquidation value of her transferable interest at the termination of the limited partnership.

General Partner Dissociations The ULPA treats general partners' dissociations the same as the RUPA treats partners' dissociations in a partnership. A general partner's death, withdrawal, or expulsion causes dissociation, just as with limited partners. In addition, a general partner dissociates if he becomes mentally or physically unable to care for himself (such as when a court appoints a guardian over his affairs) or he is unable to perform as a general partner (as determined by a court). A general partner also dissociates if he is a debtor in bankruptcy, assigns his assets for the benefit of creditors, or has a custodian appointed over his property. In addition, a general partner may be expelled by a vote of all the other partners or by a court for the same grounds that limited partners may be expelled. The ULPA also provides for dissociation of nonhuman general partners, such as the termination of a corporation that is a general partner.

Like a dissociated limited partner, a dissociated general partner is treated as a transferee of the dissociated general partner's transferable interest. He will receive the liquidation value of the partnership interest at the termination of the partnership.

While a general partner always has the power to dissociate, his dissociation may be wrongful. A general partner wrongfully dissociates by leaving the partnership before it terminates, violating the limited partnership agreement, being a debtor in bankruptcy, or being expelled by a court. A general partner who has wrongfully dissociated is liable to the limited partnership and other partners for damages caused by his dissociation.

Authority and Liability of Dissociated General Partners Dissociation ends a general partner's right to manage the limited partnership. The dissociated general partner is released from most of his fiduciary duties. For example, the duty not to compete would no longer apply, so the dissociated general partner could set up a competing business. The duty of confidentiality, however, exists after dissociation to protect the limited partnership's trade secrets and other proprietary information.

While a general partner's express and implied authority to act for the limited partnership terminates upon his dissociation, he may retain apparent authority to transact for the limited partnership. Moreover, his liability for partnership obligations does not terminate merely due to his dissociation. Therefore, the dissociated general partner and the limited partnership must take steps to notify creditors and other parties of the dissociation to protect the limited partnership and the dissociated general partner from liability.

The best way is for the limited partnership to give notice of the dissociation, such as by e-mail or phone calls. To give notice of a dissociation that is effective against everyone, the ULPA permits the filing of a Notice of Dissociation, which is effective 90 days after filing. In addition, two years after the dissociation, the apparent authority of a dissociated general partner automatically ends.

A dissociated general partner will remain liable on a limited partnership obligation incurred while he was a partner unless the creditor agrees to release him from liability. The dissociated general partner will not be liable for limited partnership obligations incurred after he dissociated, if notice has been given of his association or more than two years have passed since his dissociation.

In an LLLP, however, there is no need for the dissociated general partner to be released from liability by existing creditors or to give notice of the dissolution, because a general partner in an LLLP has liability limited to his contribution to the LLLP.

Effect of Limited Partnership Agreement The partners may agree to modify the default dissociation rules in the ULPA. For example, the partners may agree that no limited partner may withdraw from the limited partnership. While such a provision will not prevent dissociation upon a limited partner's death, it would otherwise require a limited partner to remain with the limited partnership until its term ends. The partnership agreement may also state the events that cause dissociation, such as a general partner becoming a manager of a competing business. The partners may also provide grounds to expel a partner, such as when a partner fails to contribute additional capital as required by the partnership agreement. The agreement may also reduce the percentage of partners required to expel a partner, such as requiring only 80 percent approval or giving expulsion power to general partners.

While a limited partner's power to withdraw may be eliminated, the limited partnership agreement may not restrict a general partner's right to withdraw. The grounds

for this distinction is that a general partner should be able to withdraw from his duties to manage the limited partnership, while the limited partner as a passive investor has no such need to be relieved of that burden.

It may be unacceptable to the partners in a limited partnership that the dissociated partners do not receive the value of their partnership interests until the partnership terminates. Therefore, the limited partnership agreement may provide for the buyout of a partner's interest. A well-written buyout agreement should state the events that trigger a buyout, the valuation method, and when and how the dissociated partner will be paid (for example, in a lump sum 120 days after dissociation or in quarterly installments for five years). To protect creditors, the ULPA prohibits any payment to a dissociated partner if the limited partnership is insolvent.

To protect the limited partnership's competitive position, the partners' agreement may also limit a dissociated general partner's ability to compete against the partnership. For example, a noncompete agreement may prohibit a dissociated general partner from competing for five years in the geographic area served by the limited partnership.

Limited Partnership Dissolutions Recognizing that a limited partnership is usually worth more as a going concern, the ULPA provides that a limited partnership (or LLLP) is not dissolved, its business is not wound up, and it does not terminate merely because a partner has dissociated from the limited partnership. The ULPA provides that a limited partnership is dissolved and its business wound up only if all general partners and limited partners owning a majority of the claims to limited partner distributions (such as profits) vote for dissolution, if a general partner dissociates and partners owning a majority of the claims to partners' distributions vote for dissolution, if the last general or limited partner dissociates and is not replaced within 90 days, or if a court dissolves the limited partnership because it is not reasonably practicable to carry on the business of the limited partnership. Administrative dissolution by the secretary of state is also possible if the limited partnership fails to pay fees and taxes due to the secretary of state or fails to deliver an annual report to the secretary.

When a limited partnership dissolves, winding up of its business follows automatically. The general partners have the power to wind up the business. Dissociated general partners have no right to wind up.

If there is no remaining general partner, the limited partners may appoint a general partner to conduct the winding up. The limited partnership is bound by the acts

of a general partner that are appropriate to winding up, such as selling assets of the business and completing contracts. No new business should be conducted by the winding-up general partners.

After dissolution, a general partner has no express or implied authority to continue the business, except as necessary to liquidation. The general partners may have apparent authority to continue business in the usual way, however, and therefore bind the limited partnership. To avoid liability for the act of a general partner outside the scope of winding up, the limited partnership should give notice of its dissolution to all parties. One way to give notice is by filing a certificate of dissolution, which is effective against everyone after 90 days.

Distribution of Assets After the general partners have liquidated the assets of the limited partnership, the proceeds are distributed to those having claims against the limited partnership. First paid are creditors, which may include partners who, for example, have sold goods or made loans to the limited partnership.

If the proceeds from the sale of limited partnership assets exceed creditors' claims, the remainder is paid to the partners in the same proportions that they share distributions. This modifies the RULPA rule that repaid partners' capital contributions prior to distributing the remainder according to how partners share distributions. The ULPA rule may result in a wealth transfer from partners who have disproportionately larger contributions than their shares of distributions to partners who have disproportionately larger shares of distributions in relation to their capital contributions. If this is unacceptable, the partners may modify the ULPA rule in the limited partnership agreement, such as by requiring a return of capital contributions before distributing the remaining proceeds in the manner that partners share profits.

If a limited partnership's assets are insufficient to pay a creditor's claim, the persons who were general

partners when the obligation was incurred must contribute cash to allow the limited partnership to pay the obligation. The general partners contribute in the same proportions that they shared distributions (considering only distributions to general partners) when the obligation was incurred.

In an LLLP, general partners are not required to contribute additional cash when the LLLP's assets are insufficient to pay creditors' claims because the liability of general partners in an LLLP is limited to their capital contributions.

Mergers and Conversions

The ULPA and the RULLCA permit limited partnerships and LLCs to merge with other businesses, including other limited partnerships, LLCs, and corporations. All partners of a limited partnership and all members of an LLC must consent to the plan of **merger**.

In addition, those statutes also permit a limited partnership or an LLC to convert easily into another business form. For example, some limited partnerships will want to become LLCs in order to enjoy all the limited liability advantages of the LLC. By executing a plan of **conversion** to an LLC, the partners can change the form of business without the more expensive and time-consuming process of forming a new business to take over the old business and then dissolving the old one. All the owners need to do is adopt a plan of conversion to which all partners consent.

In the following *Lach* case, the court held that the general partners were not required to comply with the requirements for conversion, because a new LLC was formed and the limited partnership dissolved. However, the court found that the general partners breached their fiduciary duty by transferring the assets of the limited partnership to the LLC without the consent of a limited partner.

Lach v. Man O'War, LLC

256 S.W. 3d 563 (Ky. S. Ct. 2008)

In 1986, Shirley Lach and her then husband, Lynwood Wiseman, formed Man O'War Limited Partnership for the purpose of leasing real property and developing and operating shopping centers. Robert Miller became a general partner along with Wiseman. Lach was one of eight limited partners. The partners' ownership percentages were Miller, 1 percent, Wiseman, 32 percent, Lach, 27 percent, Jonathan Miller, 9 percent, Harry B. Miller, 12 percent, Harvey Morgan, 1 percent, Penny Miller, 3 percent, Jeffery Mullens, 1 percent, Jennifer Miller, 9 percent, and Sophie Wiseman, 5 percent. Wiseman, Lach, and Robert Miller also formed M.O.W. Place, Ltd., to lease a shopping center from the joint venture. In 1988, Wiseman and Lach were divorced, but continued in business together.

In the spring of 2002, Robert Miller became ill with cancer. With his approaching death, he met with Lach concerning the shopping center. Miller asked Lach to agree to naming Wiseman, Jeffery Mullens (brother-in-law of Robert Miller), and Jonathan Miller (son of Robert Miller), as the new general partners of the Partnership. Under the original Partnership agreement, new general partners could not be added without the consent of all the partners. Robert Miller also asked Lach to agree that when Wiseman died, the two remaining general partners will select a new general partner. Lach objected because it would allow the Miller family, which owned less than Lach's individual interest, to manage and control the shopping center. The Millers' would have two of the three general partners while Wiseman, who was then of advancing age, was alive. Upon his death, Jonathan Miller and Jeffery Mullens would then select the third general partner. Lach proposed substituting her daughter, Sherri McVay, an attorney, as a general partner in place of Jeffery Mullens. Her proposal was rejected.

Miller and Wiseman then sought to restructure the business form of the partnership to eliminate the need for Lach's consent to the proposed management change. They formed a new business entity, Man O'War Limited Liability Company. When operational, the LLC would be manager-managed and controlled only by a majority vote of the owners. The initial managers were to be Wiseman, Jonathan Miller, and Jeffery Mullens.

After forming the LLC, Robert Miller and Wiseman dissolved the Partnership, distributing its assets (the ownership of the LLC) to the partners in identical proportions to their previous ownership of the Partnership, that is—with one catch. Unless a partner signed the documents validating the restructuring, that partner would have no voting rights in the LLC. All the partners except Lach signed the agreement, leaving only Lach without any voting rights.

Lach then sued the LLC and Wiseman, among others. She asked the court to set aside the transfer of Partnership assets to the LLC on the grounds that the transfer and the Partnership's subsequent termination was a violation of KRS 362.490 and a breach by the general partners of their fiduciary duty to the Partnership and Lach. The trial court found for the LLC and Wiseman, granting them summary judgment. The Kentucky appellate court affirmed the trial court's decision. Lach appealed to the Supreme Court of Kentucky.

Scott, Justice

Lach argues that the restructuring of the Partnership business form was invalid without her consent for two reasons: (1) the restructuring was a conversion in violation of KRS 275.370, and (2) the restructuring made it impossible for the Partnership to carry on its business in violation of KRS 362.490.

KRS 275.370 provides, in pertinent part:

- (1) A partnership or limited partnership may be converted to a limited liability company pursuant to this section.
- (2) The terms and conditions of a conversion of a partnership or limited partnership to a limited liability company shall, in the case of a partnership, be approved by all the partners or by a number or percentage specified for conversion in the partnership agreement or, in the case of a limited partnership, by all the partners, notwithstanding any provision to the contrary in the limited partnership agreement.

While conceding that the statute, in this instance, requires the approval of all the limited partners before a limited partnership can be converted into a limited liability company, the LLC and Wiseman argue that the transformation constituted a "reorganization," not a "conversion" as envisioned under KRS 275.370(1). They illustrate their distinction of the word "conversion," by pointing out that the statute envisions a limited partnership *redesignating itself* as a limited liability company, whereas, in this instance, the limited liability company was

created separately and existed concurrently with the Partnership (albeit without any assets). Thus, the fact that the LLC acquired all the assets of the Partnership and the Partnership then dissolved is simply immaterial.

KRS 275.375(1) acknowledges that "[a] partnership or limited partnership that has been converted pursuant to this chapter shall be for all purposes the same entity that existed before the conversion." KRS 275.375(2) recognizes that the property "shall remain vested in the converted [business entity] . . . [and] [a]ll obligations of the converting . . . limited partnership shall continue as obligations of the converted [business entity]." (Emphasis added.) All of which seem to confirm the LLC and Wiseman's argument that a "conversion" involves only one entity changing its legal form pursuant to statutory authorization, rather than through interaction between *two* entities.

Looking at subsequent statutes for what light they cast on the question, we note that the Kentucky Legislature adopted the *new* Kentucky Uniform Limited Partnership Act in 2006. KRS 362.2-102, et. seq. This Act was adopted, with some changes, from the Uniform Limited Partnership Act (2001). The Act specifically provides "[i]n applying and construing this uniform act, consideration shall be given to the need to promote uniformity of the law with respect to its subject matter among states that enact it." KRS 362.2-1201.

When the need for uniformity is acknowledged, courts may consider the "Official Comments" to a Uniform Act, even where they have not been officially adopted. Looking at the

Official Comments to §1102 of the Uniform Limited Partnership Act, which, with changes, corresponds to KRS 362.2-1102, the Comment acknowledges, “[i]n contrast to a merger, which involves at least two entities, a conversion involves only one. The converting and converted organizations are the same entity.” Unif. Limited Partnership Act §1102–1105, GA U.L.A. 107 (2006).

Having thus considered the statutory scheme, its particular language, the subsequent statute and Official Comments, we answer the question that was presented to us—that the restructuring of the business form of the Partnership, to that of the LLC, in this instance, was not a conversion under, or subject to, KRS 275.370, for reasons that a conversion deals only with one entity. We have not been asked, nor have we considered, whether the restructuring of the Partnership into the LLC constituted a merger, pursuant to KRS 362.531.

Under Kentucky law, partners owe the utmost good faith to each and every other partner. The scope of the fiduciary duty has been variously defined as one requiring utter good faith or honesty, loyalty or obedience, as well as candor, due care, and fair dealing. Indeed, it has often been said, there is no relation of trust or confidence known to law that requires of the parties a higher degree of good faith than that of a partnership. Thus, the doing of an act proscribed by law is a breach of that duty.

KRS 362.490 provides, in pertinent part:

A general partner shall have all the rights and powers and be subject to all the restrictions and liabilities of a partner in a partnership without limited partners, except that without the written consent or ratification of the specific act by all the limited partners, a general partner or all the general partners have no authority to

* * *

(2) do any act which would make it impossible to carry on the ordinary business of the partnership.

The LCC and Wiseman argue that Miller and Wiseman had the authority to perform all the acts constituting the restructuring without Lach’s consent because they did not make it impossible to carry on the business of the partnership. They assert, *it was the only act which made it possible* to carry on the business of the partnership; suggesting that Lach would, by virtue of her right of rejection, have destroyed the partnership’s business, something she hadn’t done for the previous sixteen years. Moreover, the fact that a limited partner with significant ownership interests in a limited partnership would object to a transaction which would deprive her of her say in who might be able to successfully manage her business interest as a general partner, in return for a minority voting, or for that fact, a non-voting interest, in a limited liability company controlled by a majority

vote, is not evidence that such limited partner has an interest in destroying the business, including the value of her interest therein.

They further argue that under the certificate of partnership and partnership agreement, the general partners had the absolute right to “(1) terminate the partnership, (2) execute documents agreements, contracts, leases, etc., on behalf of the partnership, and (3) to manage the partnership business in all aspects, which should include, but should not be limited to . . . take such other action, execute and deliver such other documents, and perform such other acts as the general partners may deem necessary, appropriate, or incidental to carrying out the business and affairs of the partnership.” In this regard, they seek to distinguish *Mist Properties, Inc. v. Fitzsimmons Realty Co.*, 228 N.Y.S.2d 406 (Sup. Ct. 1962), in which the court approved the general partner’s transfer of title to property owned by the limited partnership as against the claim of the receiver, because the limited partnership agreement allowed the general partners to do so.

Mist Properties, Inc., however, had a partnership agreement that gave the general partners the specific power to sell all of the partnership’s property, subject to written approval of sixty-five percent of the limited partners. “There clearly appears to have been no violation of the statute since the conveyance was not without the written consent of the limited partners but was specifically contemplated and provided for by the agreement.” *Id.* at 410. As the court recognized therein, the agreement the partners had made with themselves through their partnership agreement controlled. “There is no intervening public policy which prevents persons dealing at arm’s length from entering into an agreement such as set forth above. It has been repeatedly held that where a limited partnership agreement has been entered into the partners cannot, *inter se*, set up that their rights are not governed thereby. . . .” *Id.* at 410.

Simply put, we find that the general partners’ rights under the partnership agreement to (1) terminate the partnership at any time upon agreement of the general partners, and (2) to act upon behalf of the Partnership in matters that are “necessary, appropriate, or incidental to carry out its business,” can be not construed to allow them the power to transform the partnership into a limited liability company, in order to favor a majority of the partners in their selection, or substitution, of the general partners/managers of the business, without the approval of all the limited partners.

We therefore conclude that the transfer of the partnership assets to the LLC was in violation of KRS 362.490 and thus a breach of the general partners’ fiduciary duty to the non-consenting limited partner.

Judgment reversed in favor of Lach.

The Global Business Environment

Limited Partnerships in Other Countries

All modern commercial countries permit the creation of limited partnerships, but almost none allow the creation of LLLPs. England and its former colonies, including the United States, Canada, Singapore, and Australia, use the term *limited partnership*. In Italy, the limited partnership form is named *Societa in accomandita semplice* (S.a.s.); in Latin American

countries, the *Sociedad en comandita*; in Austria the *Kommanditgesellschaft* (Kg).

These business forms are mostly identical to American limited partnerships, having general partners who manage the business and possess unlimited liability and limited partners who may not manage and are granted limited liability. Most countries also permit the partners to restrict the transfer of a partner's interest and usually provide for the continuation of the business despite the death of a limited partner.

Ethics in Action

You now know the characteristics and default rules of LLCs, limited partnerships, and LLLPs. If you are a profit maximizer, which one of these forms would you find less desirable than the others? The answer is that the limited partnership is less desirable, because a limited partnership, LLLP, and LLC may have the same tax and management benefits, yet only the LLLP and LLC extend limited liability to all the owners. General partners in a limited partnership have unlimited liability for the limited partnership's obligations. Therefore, you reduce your risk and increase your return relative to risk by choosing the LLLP or LLC.

If you believe in utilitarianism, rights theory, or justice theory, does the distinction between limited partnerships and LLLPs and LLCs make sense to you? Why grant limited liability only to owners who know enough to create an LLLP or LLC? Is the business of an LLLP or LLC more important to society than the business of a limited partnership merely because the managers in a limited partnership have failed to acquire limited liability status? Is it fair for the law to protect someone better than others merely because she is more knowledgeable about the law?

Problems and Problem Cases

1. Eric Stratum and Terese Brown formed ESTB, L.L.C., a member-managed limited liability company created for the purpose of owning and leasing a residential apartment building. The term of the LLC was 25 years. Their operating agreement provided that each owned 50 percent of the LLC. Stratum contributed \$120,000 cash as his contribution to the business. Brown contributed \$10,000 cash at the time of the LLC's creation, with the expectation that she would contribute to the LLC with services to be performed in the future. The agreement, however, listed Brown's capital contribution as \$10,000 and did not stipulate by how much it should be increased as Brown continued to manage the business. Although Brown was expected to be the primary manager of the business, nothing in the operating agreement gave more power to Brown or removed power from Stratum. For the first two years, Brown did

most of the day-to-day management of the LLC. She and Stratum agreed on other actions, including replacing carpeting in apartments and reroofing the building. After two years, Brown claimed she was entitled to a larger share of the LLC's profits. Is she?

Suppose that Stratum responded by appointing his son to manage the LLC along with Brown. May Brown object to Stratum's son managing the LLC?

Suppose the relationship between Stratum and Brown has so deteriorated that she withdraws from the LLC. She demands to receive the value of her interest in the LLC. The LLC has a current value of \$500,000. How much must Brown receive? When?

Suppose after she leaves the LLC, Brown purchases a residential apartment building that competes against the LLC. May Stratum prevent Brown from competing with the LLC?

2. Bonnie Strickland and her husband Jake formed the Strickland Family Limited Liability Company as part of their estate plan. They transferred 83 percent

of the equity shares of the LLC to their daughter Suzy Strickland Harbison. The Stricklands retained a 17 percent interest in the LLC and acted as co-managers of the LLC for the next two years. When Jake died, Bonnie became the only manager of the LLC. In 2002, Bonnie conveyed three parcels of real property belonging to the LLC to her son David Strickland. David was not a member of the LLC. Bonnie transferred the parcels of real property for an amount Suzy believed was less than fair market value. Suzy sued Bonnie, claiming that Strickland had breached her fiduciary duty to the LLC under the Alabama Limited Liability Company Act and that she had violated the terms of the operating agreement when she failed to make managerial decisions based on the best interests of the LLC and the equity owners. Bonnie defended by referring to the LLC's operating agreement, which clearly stated that the LLC was not formed for profit purposes:

The managers do not, in any way guarantee a profit for the Equity Owners from the operations of the Company. Decisions with respect to the conduct, dissolution and winding up of the business of the company shall be made in the sole discretion of the Equity Owners and such other matters as the Managers consider relevant. There shall be no obligation on the part of the Managers to maximize financial gain or to make any or all of the Company Property productive.

Has Bonnie breached her fiduciary duty?

3. In 1994, Steven Mossbrook, Sandra Mossbrook, and Michael Lieberman created Wyoming.com LLC. Lieberman contributed initial capital of \$20,000 consisting of services rendered and to be rendered. He was given a 40 percent ownership interest in the LLC. The Mossbrooks contributed \$30,000 and received a 60 percent ownership interest. In 1995, two new members were added to the LLC, each contributing \$25,000 and receiving a 2.5 percent ownership interest. Lieberman's ownership interest and his stated capital contribution remained the same.

In 1998, Lieberman was terminated as vice president of Wyoming.com by the other members of Wyoming. Two weeks later, Lieberman withdrew from the LLC and demanded the immediate return of his share of the current value of the company, which he estimated at \$400,000. The other members accepted Lieberman's withdrawal, chose to continue the LLC's business, and approved the return of Lieberman's \$20,000 capital contribution, which

Lieberman refused to accept. Is Lieberman entitled to the fair market value of his ownership interest?

4. Nabil Gamez was a member of Rock Angus LLC, a member-managed LLC that bred and sold beef cattle. Gamez was the most active of the member-managers, negotiating contracts with breeders, feedlots, and banks on behalf of the LLC. One contract obligated Rock Angus LLC to purchase two Angus bulls for \$624,000 from Shirlynn Farms, Inc. The contract was signed by Gamez as general manager acting on behalf of Rock Angus. Rock Angus defaulted on the contract with Shirlynn Farms, which sued Rock Angus LLC and Gamez. Was Gamez personally liable on the contract with Shirlynn Farms?
5. Tim Everest and Quinn Rider formed an LLC for the purpose of investing and managing commercial real estate properties. Everest drafted articles of organization for the LLC and gave the articles to Rider, who read them briefly. Rider told Everest "Everything looks OK to me," and signed the agreement. Everest submitted the LLC articles to the secretary of state, who filed the articles. After the LLC was formed, Everest operated the LLC as if he were the primary manager, excluding Rider from most of the day-to-day investment and management decisions of the LLC. When Rider protested, Everest showed him the LLC's articles of organization, which clearly stated that the LLC was manager-managed, with Everest listed as the sole manager. Rider argued that as a member of the LLC, he had the inherent right to manage the LLC. Was Rider correct?
6. Harlan Nesbitt was a member of Oak Creek Golf LLC, a limited liability company that owned and operated a golf course. Nesbitt wanted to dissociate from the LLC, but neither the LLC nor any other LLC member was willing to purchase his LLC interest. Nesbitt gave his LLC interest to his daughter, Eliza Portraro, and he notified the LLC that he was withdrawing from the LLC. Portraro sought to assert rights as a member of the LLC, including voting on matters submitted to LLC members, demanding a share of LLC profits, and inspecting the financial records of the LLC. The LLC operating agreement was silent on whether a transferee of a member's interest had those rights. Did Portraro have those rights?
7. Judith Carpenter was an experienced businesswoman and served on the board of directors of a bank. In 1984, Carpenter invested in Briargate

Homes, a business that owned several condominiums. She believed that Briargate was a limited partnership and that she was a limited partner. In fact, Briargate was a partnership and she was a general partner. No attempt had been made to comply with the North Carolina limited partnership statute. By 1987, Carpenter had possession of documents stating that Briargate was a partnership and she a partner. As an owner of condominiums, the partnership was liable to the condominium association for assessments for maintenance, repairs, and replacement of common areas in the complex. In 1988, the partnership failed to pay \$85,000 in assessments. The partnership and its partners were sued by the condominium association. May Carpenter escape liability on the assessment because she thought she was a limited partner?

8. Virginia Partners, Ltd., a limited partnership organized in Florida, was in the business of drilling oil wells. When Virginia Partners injected acid into an oil well in Kentucky, a bystander, Robert Day, was injured by acid that sprayed on him from a ruptured hose. Virginia Partners had failed to register as a foreign limited partnership in Kentucky. Are the limited partners of Virginia Partners liable to Day for his injuries?
9. Brookside Realty, Ltd., was a limited partnership. In the limited partnership certificate filed with the secretary of state, four of its limited partners agreed to make capital contributions and be liable for future assessments in amounts ranging between \$36,000 and \$145,000. Brookside failed to pay for material Builders Steel sold to Brookside. Because the limited partners had not paid all the assessments required by the limited partnership certificate, Builders Steel claimed that it was entitled to require the limited partners to pay those assessments to the extent of the debt to Builders Steel. Did the court agree?
10. Blinder, Robinson & Co., as limited partner, and Combat Promotions, Inc., as general partner, created Combat Associates to promote an eight-round exhibition match between Muhammad Ali and Lyle Alzado, the pro football player. Combat Associates promised to pay Alzado \$100,000 for his participation in the match.

Combat Promotions was owned entirely by Alzado, his accountant, and his professional agent. Alzado was also vice president of Combat Promotions. Blinder, Robinson used its Denver office as a ticket outlet for the match, gave two parties to promote the match, and provided a meeting room for Combat Associates' meetings. Meyer Blinder, president of Blinder, Robinson, personally appeared on a TV talk show and gave TV interviews to promote the match.

Few tickets were sold, and the match was a financial debacle. Alzado received no payments for participating in the match. Alzado sued Blinder, Robinson claiming that since it acted like a general partner it had the liability of a general partner. The case was decided under the law of the RULPA. Was Blinder, Robinson liable to Alzado? Would Blinder, Robinson be liable to Alzado under the ULPA of 2001?

11. Virginia Mattson decides to form a limited partnership with herself as the sole general partner and with 10 friends and associates as the limited partners. She chooses the limited partnership form, because its default rules clearly grant sole management rights to her, the only general partner. Mattson is concerned, however, about having personal liability on contracts she signs on behalf of the limited partnership. What should she do to limit her personal liability for the obligations of the business to the amount of her capital contribution?

HISTORY AND NATURE OF CORPORATIONS

You and three friends create an online retailer, which is incorporated in California under the name Gifts&Awards.com, Inc. The Web site will sell awards, clocks, desk sets, and other merchandise that businesses want as gifts for their clients and as promotional items for their employees. Physically, Gifts&Awards.com, Inc. will be located exclusively in San Jose, California. All its shareholders, employees, and assets will be in California. As an online retailer, however, Gifts&Awards.com's merchandise will be available to anyone anywhere in the world. Businesses worldwide will place orders through the Web site, which will be filled by the Gifts&Awards.com's staff. Gifts&Awards.com will ship about 20 percent of the merchandise ordered from a warehouse it leases in California. The other 80 percent will be shipped directly from the manufacturers or importers of the items. For that 80 percent, Gifts&Awards.com will take orders from customers and direct the orders to the appropriate manufacturers or importers, some of which will be in California but most of which will be dispersed throughout the United States.

You estimate that Gifts&Awards.com will have \$4,000,000 in annual sales, \$60,000 of which is to customers resident in Arizona. The goods will be delivered to customers by UPS, a third-party carrier whose fee will be added to the price of the goods. Some of the goods will be shipped from Gifts&Awards.com's warehouse in California, and some from manufacturers in other states, including Arizona. Consider the following questions regarding the State of Arizona's regulation of Gifts&Awards.com, Inc., a California corporation:

- May the State of Arizona require Gifts&Awards.com, Inc., to obtain a certificate of authority to do business in Arizona and collect a fee from Gifts&Awards.com for the privilege of doing business in the state?
- May the State of Arizona impose its state income tax on a portion of Gifts&Awards.com's worldwide income?
- May the State of Arizona require Gifts&Awards.com to collect the Arizona sales tax on sales to Arizona residents?
- If Gifts&Awards.com sells defective awards to a customer in Arizona, may the customer sue Gifts&Awards.com in an Arizona trial court? Will your answer affect Gifts&Awards.com policy on customers' returns and refunds?

THE MODERN CORPORATION HAS facilitated the rapid economic development of the last 200 years by permitting businesses to attain economies of scale. Businesses organized as corporations can attain such economies because they have a greater capacity to raise capital than do other business forms. This capital-raising advantage is ensured by corporation law, which allows persons to invest their money in a corporation

and become owners without imposing unlimited liability or management responsibilities on themselves. Many people are willing to invest their savings in a large, risky business if they have limited liability and no management responsibilities. Far fewer are willing to invest in a partnership or other business form in which owners have unlimited liability and management duties.

History of Corporations

Although modern corporation law emerged only in the last 200 years, ancestors of the modern corporation existed in the times of Hammurabi, ancient Greece, and the Roman Empire. As early as 1248 in France, privileges of incorporation were given to mercantile ventures to encourage investment for the benefit of society. In England, the corporate form was used extensively before the 16th century.

The famous British trading companies—such as the Massachusetts Bay Company—were the forerunners of the modern corporation. The British government gave these companies monopolies in trade and granted them powers to govern in the areas they colonized. They were permitted to operate as corporations because of the benefits they would confer on the British empire, such as the development of natural resources. Although these trading companies were among the few corporations of the time whose owners were granted limited liability, they sought corporate status primarily because the government granted them monopolies and governmental powers.

American Corporation Law Beginning in 1776, corporation law in the United States evolved independently of English corporation law. Early American corporations received **special charters** from state legislatures. These charters were granted one at a time by special action of the legislatures; few special charters were granted.

In the late 18th century, general incorporation statutes emerged in the United States. Initially, these statutes permitted incorporation only for limited purposes beneficial to the public, such as operating toll bridges and water systems. Incorporation was still viewed as a privilege, and many restrictions were placed on corporations: incorporation was permitted for only short periods of time; maximum limits on capitalization were low; ownership of real and personal property was often restricted.

During the last 150 years, such restrictive provisions have disappeared in most states. Today, modern incorporation statutes are mostly enabling, granting the persons who control a corporation great flexibility in establishing, financing, and operating it.

See Figure 1 for a statement of the characteristics of corporations.

Figure 1 Principal Characteristics of Corporations

1. *Creation.* A corporation may be created only by *permission of a government*.
2. *Legal status.* A corporation is a legal person and a legal entity independent of its owners (*shareholders*) and its managers (officers and the *board of directors*). Its life is unaffected by the retirement or death of its shareholders, officers, and directors. A corporation is a person under the Constitution of the United States.
3. *Powers.* A corporation may *acquire, hold, and convey property* in its own name. A corporation may *sue and be sued* in its own name. Harm to a corporation is not harm to the shareholders; therefore, with few exceptions, a shareholder may not sue to enforce a claim of the corporation.
4. *Management.* Shareholders elect a board of directors, which manages the corporation. The board of directors may delegate management duties to officers. A shareholder has *no right or duty to manage* the business of a corporation, unless he is elected to the board of directors or is appointed an officer. The directors and officers need not be shareholders.
5. *Owners' liability.* The shareholders have *limited liability*. With few exceptions, they are not liable for the debts of a corporation after they have paid their promised capital contributions to the corporation.
6. *Transferability of owner's interest.* Generally, the ownership interest in a corporation is *freely transferable*. A shareholder may sell her shares to whomever she wants whenever she wants. The purchaser becomes a shareholder with the same rights that the seller had.
7. *Taxation.* Usually, a corporation pays *federal income taxes* on its income. Shareholders have personal income from the corporation only when the corporation makes a distribution of its income to them. For example, a shareholder would have personal income from the corporation when the corporation pays him a dividend. This creates a *double-taxation* possibility: The corporation pays income tax on its profits, and when the corporation distributes the after-tax profits as dividends, the shareholders pay tax on the dividends.

Classifications of Corporations

Corporations may be divided into three classes: (1) corporations **for profit**, (2) corporations **not for profit**, and (3) **government-owned** corporations. State and federal corporation statutes establish procedures for the incorporation of each of these classes and for their operation. In addition, a large body of common law applies to all corporations.

Most business corporations are **for-profit corporations**. For-profit corporations issue stock to their shareholders, who invest in the corporation with the expectation that they will earn a profit on their investment. That profit may take the form of dividends paid by the corporation or increased market value of their shares.

Nearly all for-profit corporations are incorporated under the **general incorporation law** of a state. All of the states require professionals who wish to incorporate, such as physicians, dentists, lawyers, and accountants, to incorporate under **professional corporation acts**. In addition, for-profit corporations that especially affect the public interest, such as banks, insurance companies, and savings and loan associations, are usually required to incorporate under special statutes.

For-profit corporations range from huge international organizations such as General Motors Corporation to small, one-owner businesses. GM is an example of a **publicly held corporation** because its shares are generally available to public investors. The publicly held corporation tends to be managed by professional managers who own small percentages of the corporation. Nearly all the shareholders of the typical publicly held corporation are merely investors who are not concerned in the management of the corporation.

Corporations with very few shareholders whose shares are not available to the general public are called **close corporations**. In the typical close corporation, the controlling shareholders are the only managers of the business.

Usually, close corporations and publicly held corporations are subject to the same rules under state corporation law. Many states, however, allow close corporations greater latitude in the operation of their internal affairs than is granted to public corporations. For example, the shareholders of a close corporation may be permitted to dispense with the board of directors and manage the close corporation as if it were a partnership.

A Subchapter S corporation, or **S corporation**, is a special type of close corporation. It is treated nearly like a partnership for federal income tax purposes. Its

shareholders report the earnings or losses of the business on their individual federal income tax returns. This means that an S corporation's profits are taxed only once—at the shareholder level, eliminating the double-taxation penalty of incorporation. All shareholders must consent to an S corporation election. The Internal Revenue Code requires an S corporation to have only one class of shares and 100 or fewer shareholders. Shareholders may be only individuals or trusts.

Not-for-profit corporations do not issue stock and do not expect to make a profit. Instead, they provide services to their members under a plan that eliminates any profit motive. These corporations have **members** rather than shareholders, and none of the surplus revenue from their operations may be distributed to their members. Since they generally pay no income tax, nonprofit corporations can reinvest a larger share of their incomes in the business than can for-profit corporations. Examples of nonprofit corporations are charities, churches, fraternal organizations, community arts councils, cooperative grocery stores, and cooperative farmers' feed and supplies stores.

Some corporations are owned by governments and perform governmental and business functions. A municipality (city) is one type of **government-owned corporation**. Other types are created to furnish more specific services—for example, school corporations and water companies. Others—such as the Tennessee Valley Authority and the Federal Deposit Insurance Corporation—operate much like for-profit corporations except that at least some of their directors are appointed by governmental officials, and some or all of their financing frequently comes from government. The TVA and the FDIC are chartered by Congress, but government-owned corporations may also be authorized by states. Government-operated businesses seek corporate status to free themselves from governmental operating procedures, which are more cumbersome than business operating procedures.

Regulation of For-Profit Corporations

To become a corporation, a business must **incorporate** by complying with an incorporation statute. Incorporation is a fairly simple process usually requiring little more than paying a fee and filing a document with a designated government official—usually the secretary of state of the state of incorporation. Incorporation of for-profit businesses has been entrusted primarily to the governments of the 50 states.

The Global Business Environment

Corporations around the Globe

The corporate form of business is recognized throughout the world, and, regardless of the country, the form has essentially the same characteristics: limited liability for its owners, free transferability of shares, and separation of management from ownership. In Italy, the name is

Societa per azioni. In Zimbabwe and England, corporations are called limited companies. In Germany, the term is *Aktiengesellschaft* (AG). In Brazil, the name is *sociedade anonima*. You can learn a lot about Canadian corporations at www.corporationscanada.ic.gc.ca. This site has links to federal, provincial, and territorial Web sites that facilitate the incorporation process.

State Incorporation Statutes State incorporation statutes set out the basic rules regarding the relationship between the corporation, its shareholders, and its managers. For example, an incorporation statute sets the requirements for a business to incorporate, the procedures for shareholders' election of directors, and the duties directors and officers owe to the corporation. Although a corporation may do business in several states, usually the relationship between the corporation, its shareholders, and its managers is regulated only by the state of incorporation.

The American Bar Association's Committee on Corporate Laws has prepared a *model* statute for adoption by state legislatures. The purpose of the model statute is to improve the rationality of corporation law. It is called the **Model Business Corporation Act (MBCA)**. It was last revised in 2002.

The revised MBCA is the basis of corporation law in most states. Your study of statutory corporation law in this book concentrates on the revised MBCA. Delaware and several major commercial and industrial states such as New York and California do not follow the MBCA. Therefore, selected provisions of the Delaware and other acts will be addressed.

Several states have special provisions or statutes that are applicable only to close corporations. The ABA's Committee on Corporate Laws has adopted the *Statutory Close Corporation Supplement to the Model Business Corporation Act*. The Supplement is designed to provide a rational, statutory solution to the special problems facing close corporations.

State Common Law of Corporations

Although nearly all of corporation law is statutory law, including the courts' interpretation of the statutes, there is a substantial body of common law of corporations (judge-made law). Most of this common law deals with creditor and shareholder rights. For example, the law of piercing the corporate veil, which you will study later in this chapter, is common law protecting creditors of corporations.

Regulation of Nonprofit Corporations

Nonprofit corporations are regulated primarily by the states. Nonprofit corporations may be created only by complying with a nonprofit incorporation statute. Incorporation under state law requires delivering articles of incorporation to the secretary of state. The existence of a nonprofit corporation begins when the secretary of state files the articles. Most states have statutes based on the revised **Model Nonprofit Corporation Act (MNCA)**. Because of constitutional protection of freedom of religion, many states have special statutes regulating nonprofit religious organizations.

The law applied to nonprofit corporations is substantially similar to for-profit corporation law. At various points in the corporations chapters of this book, you will study the law of nonprofit corporations and examine how this form of business and its laws differ from the for-profit corporation and its laws. The Model Nonprofit Corporation Act will be the basis of your study of nonprofit corporation law.

Regulation of Foreign and Alien Corporations

A corporation may be incorporated in one state yet do business in many other states in which it is not incorporated. The corporation's contacts with other persons in

You can view the MBCA at the Web site of the American Bar Association.

those states may permit the states to regulate the corporation's transactions with their citizens, to subject the corporation to suits in their courts, or to tax the corporation. The circumstances under which states may impose their laws on a business incorporated in another state is determined by the law of foreign corporations.

A corporation is a **domestic corporation** in the state that has granted its charter; it is a **foreign corporation** in all the other states in which it does business. For example, a corporation organized in Delaware and doing business in Florida is domestic in Delaware and foreign in Florida. Note that a corporation domiciled in one country is an **alien corporation** in other countries in which it does business. Many of the rules that apply to foreign corporations apply as well to alien corporations.

Generally, a state may impose its laws on a foreign corporation if such imposition does not violate the Constitution of the United States, notably the Due Process Clause of the Fourteenth Amendment and the Commerce Clause. The law discussed here also applies to foreign partnerships, LLPs, LLCs, limited partnerships, and LLLPs, forms of business discussed in Chapters 37–40.

Due Process Clause The Due Process Clause requires that a foreign corporation have sufficient contacts with a state before a state may exercise jurisdiction over the corporation. The leading case in this area is the *International Shoe* case.¹ In that case, the Supreme Court ruled that a foreign corporation must have “certain minimum contacts” with the state such that asserting jurisdiction over the corporation does not offend “traditional notions of fair play and substantial justice.” The Supreme Court justified its holding with a **benefit theory**: When a foreign corporation avails itself of the protection of a state's laws, it should suffer any reasonable burden that the state imposes as a consequence of such benefit. In other words, a foreign corporation should be required to pay for the benefits that it receives from the state.

Commerce Clause Under the Commerce Clause, the power to regulate interstate commerce is given to the federal government. The states have no power to exclude or to discriminate against foreign corporations that are engaged solely in *interstate* commerce. Nevertheless, a state may require a foreign corporation doing interstate business in the state to comply with its laws if the application of these laws does not unduly burden interstate commerce. When a foreign corporation

enters interstate commerce to do *intrastate* business in a state, the state may regulate the corporation's activities, provided again that the regulation does not unduly burden interstate commerce.

A state law regulating the activities of a foreign corporation does not unduly burden interstate commerce if (1) the law serves a legitimate state interest, (2) the state has chosen the least burdensome means of promoting that interest, and (3) that legitimate state interest outweighs the statute's burden on interstate commerce. Because conducting intrastate business increases a corporation's contact with a state, it is easier to prove that the state has a legitimate interest and that there is no undue burden on interstate commerce when the state regulates a corporation that is conducting intrastate business.

Doing Business To aid their determination of whether a state may constitutionally impose its laws on a foreign corporation, courts have traditionally used the concept of **doing business**. Courts have generally held that a foreign corporation is subject to the laws of a state when it is doing business in the state. The activities that constitute doing business differ, however, depending on the purpose of the determination. There are four such purposes: (1) to determine whether a corporation is subject to a lawsuit in a state's courts, (2) to determine whether the corporation's activities are subject to taxation, (3) to determine whether the corporation must qualify to carry on its activities in the state, and (4) to determine whether the state may regulate the internal affairs of the corporation.

Subjecting Foreign Corporations to Suit The Supreme Court of the United States has held that a foreign corporation may be brought into a state's court in connection with its activities within the state, provided that the state does not violate the corporation's due process rights under the Fourteenth Amendment of the Constitution and its rights under the Commerce Clause.

The *International Shoe* minimum contacts test must be met. Subjecting the corporation to suit cannot offend “traditional notions of fair play and substantial justice.” A court must weigh the corporation's contacts within the state against the inconvenience to the corporation of requiring it to defend a suit within the state. The burden on the corporation must be reasonable in relation to the benefit that it receives from conducting activities in the state.

Under the minimum contacts test, even an isolated event may be sufficient to confer jurisdiction on a state's courts. For example, driving a truck from Arizona through New Mexico toward a final destination in

¹*International Shoe Co. v. State of Washington*, 326 U.S. 310 (1945).

Florida provides sufficient contacts with New Mexico to permit a suit in New Mexico's courts against the foreign corporation for its driver's negligently causing an accident within New Mexico.

Most of the states have passed **long-arm statutes** to permit their courts to exercise jurisdiction under the decision of the *International Shoe* case. These statutes frequently specify several kinds of corporate activities that make foreign corporations subject to suit within the state, such as the commission of a tort, the making of a con-

tract, or the ownership of property. Most of the long-arm statutes grant jurisdiction over causes of action growing out of any transaction within the state. Later in this chapter, the court in *Ryan v. Cerullo* looks at Connecticut's long-arm statute.

In the following Global Business Environment box, the court considers whether a Liechtenstein corporation may be sued in a New Hampshire court. The law that applies to foreign corporations also applies to alien corporations.

The Global Business Environment

Jet Wine & Spirits, Inc. v. Bacardi & Co., Ltd., 298 F.3d 1 (1st Cir. 2002)

Bacardi & Co., a Liechtenstein corporation, was sued in a New Hampshire court by a New Hampshire liquor distributor, Jet Wine & Spirits, Inc. Bacardi & Co. (BACO) has its primary place of business in the Bahamas and is wholly owned by Bacardi International Limited, which is almost wholly owned by Bacardi Limited, a Bermuda corporation with its primary place of business in Bermuda. Bacardi Limited also wholly owns Bacardi U.S.A. (BUSA), a Delaware corporation with its primary place of business in Florida.

BACO owns several brands of Dewar's Scotch and Bombay Gin, which it acquired from Diageo, which had a relationship with Jet Wine & Spirits. Jet Wine had previously distributed Dewar's in several New England states, including New Hampshire, under a contract it had with subsidiaries of the companies that merged to form Diageo, including Schieffelin. BACO assumed Schieffelin's contract with Jet Wine when it acquired the Dewar's brand from Diageo.

BACO does no business directly in New Hampshire, except possibly through its Web site. From November 1998 to September 1999, www.bacardi.com sold some Bacardi promotional items (clothing and keychains, not alcohol), including two sales to New Hampshire addresses for a total of \$30.75. This money went to National Corporate Services Unlimited, an unrelated company that buys merchandise from BUSA and sells it over the Web site. BACO owns one trademark, "Havana Club," that is registered in New Hampshire.

Acting under authority given it by BACO, BUSA terminated Jet Wine as distributor. Jet Wine then sued a number of members of the Bacardi corporate family, including BACO, under breach of contract and the tort of interfering with a contractual relation. BACO argued it had nothing to do with New Hampshire and moved to dismiss for lack of personal jurisdiction. The District Court granted BACO's motion, and Jet Wine appealed.

Lynch, Judge Jet Wine bears the burden of establishing personal jurisdiction. To do that, it must show that BACO has had "certain minimum contacts" with New Hampshire "such

that maintenance of the suit does not offend traditional notions of fair play and substantial justice." *Int'l Shoe Co. v. Washington*, 326 U.S. 310, 316 (1945).

The most important contact that Jet Wine alleges between BACO and New Hampshire is BACO's alleged assumption of Schieffelin's obligations under the Dewar's contract when BACO and Diageo signed the Dewar's Agreement. The primary fact produced is the provision in the Dewar's Agreement by which BACO assumed "all liabilities and obligations that arise out of or relate to the Transferred Assets (including under any Contract) [or] the Dewar's Business." Jet Wine argues that its contract with Schieffelin creates an obligation that arises out of, and relates to, the Dewar's Business, defined as "the marketing, sales and distribution of Scotch whisky" under the trade names here at issue. We agree that is a quite plausible interpretation, sufficient for a prima facie showing of jurisdiction.

The second significant contact that Jet Wine alleges between BACO and New Hampshire is BUSA's termination of Jet Wine as the distributor of Dewar's in New Hampshire and BUSA's subsequent use of another distributor for Dewar's in New Hampshire. Jet Wine claims that the district court should have imputed these actions to BACO for jurisdictional purposes because BUSA acted as BACO's agent.

Jet Wine has argued that BUSA was BACO's agent for the purpose of distributing Dewar's in New Hampshire, because [a June 16 letter from BACO to BUSA] identifies BUSA as BACO's "exclusive brand agent and distributor" and authorizes BUSA "to take all legal steps necessary to effectuate the sale of our products in the United States of America." The existence of the letter satisfies Jet Wine's burden to support its allegation that BUSA acted as BACO's agent in terminating Jet Wine as the Dewar's distributor for New Hampshire.

We must consider whether Jet Wine's claims against BACO arise out of or are related to BACO's contacts with New Hampshire. For the contract claim, the answer is a straightforward yes. Jet Wine's action against BACO for breach of contract arises out of BACO's alleged assumption of Jet Wine's contract with Schieffelin. That assumption was a contact with the state of New Hampshire that relates intimately to Jet Wine's claim.

Jet Wine must also demonstrate that BACO purposefully availed itself of the privilege of doing business in New Hampshire. There must be some voluntary action that BACO has taken that should have put it fairly on notice that it might one day be called to defend itself in a New Hampshire court. If BACO assumed the various obligations of Diageo to its distributors in the Dewar's Agreement, including Schieffelin's to Jet Wine, that was a voluntary act from which BACO should have known that it was rendering itself liable to suit in many places throughout the world. From the schedules attached to the Agreement, it knew that one of those places was New Hampshire.

We acknowledge that there is some burden on BACO if it must appear in New Hampshire's courts. New Hampshire is far removed from Liechtenstein, where BACO is incorporated, and also far from the Bahamas, BACO's primary place

of business. BACO is, however, an international corporation that does business in the United States, including through its purported agent, BUSA. It cannot wholly expect to escape the reach of United States courts.

We add a final note addressing an argument made by BACO. BACO says that because the agreements between Schieffelin and Jet Wine contain clauses consenting to the jurisdiction of the federal district courts within New York as the fora for resolving disputes, it is unreasonable to subject BACO to the jurisdiction of New Hampshire. Contractual language consenting to the jurisdiction of one forum, however, is not the same as language specifying one forum and excluding all others.

Judgment reversed in favor of Jet Wine. Remanded to the district court.

Taxation A state may tax a foreign corporation if such taxation does not violate the Due Process Clause or the Commerce Clause. Generally, a state's imposition of a tax must serve a legitimate state interest and be reasonable in relation to a foreign corporation's contacts with the state. For example, a North Carolina corporation's property located in Pennsylvania is subject to property tax in Pennsylvania. The corporation enjoys Pennsylvania's protection of private property. It may be required to pay its share of the cost of such protection.

Greater contacts are needed to subject a corporation to state income and sales taxation in a state than are needed to subject it to property taxation. A state tax does not violate the commerce clause when the tax (1) is applied to an activity with a substantial connection with the taxing state, (2) is fairly apportioned, (3) does not discriminate against interstate commerce, and (4) is fairly related to the services provided by the state.²

For example, New Jersey has been permitted to tax a portion of the entire net income of a corporation for the privilege of doing business, employing or owning capital or property, or maintaining an office in New Jersey when the portion of entire net income taxed is determined by an average of three ratios: in-state property to total property, in-state to total receipts, and in-state to total wages, salaries, and other employee compensation.³ However, Pennsylvania could not assess a flat tax on the operation of all trucks on Pennsylvania highways. The flat tax

imposed a disproportionate burden on interstate trucks as compared with intrastate trucks because interstate trucks traveled fewer miles per year on Pennsylvania highways.⁴ Nonetheless, the Supreme Court upheld a \$100 fee levied by the state of Michigan on all trucks, whether or not owned by in-state or out-of-state companies, that made point-to-point hauls between Michigan cities, on the grounds that the fee taxed purely local activity and did not tax an interstate truck's entry into Michigan or transactions spanning multiple states.⁵ Regarding sales and use taxes, the *Quill* case allows a state to tax an interstate sale by a foreign corporation to an in-state consumer if the seller has a physical presence in the state, such as a retail outlet.⁶

State taxation of interstate Internet transactions has become a potential source for state revenue. However, in 1998 the federal Congress placed a moratorium on new Internet access taxes. That moratorium has been extended to 2014. The states and Congress are currently debating whether states should be allowed to tax interstate Internet sales. Some states have been very aggressive in finding *Quill*-approved presences that allow them to tax Internet sales.

Qualifying to Do Business A state may require that foreign corporations **qualify** to conduct **intrastate** business in the state, that is, conducting business transaction *within* the state. The level of doing

The Global Business Environment

Offshore Tax Havens

In recent years, a few large American companies have reincorporated in Caribbean countries that offer favorable tax treatment compared to American law. For example, consulting firm Accenture incorporated in Bermuda in 2001, as did Ingersoll-Rand. Tyco in 1997 and Fruit of the Loom in 1999 also incorporated in Bermuda. The Cayman Islands are another popular tax haven.

Offshore reincorporation is a response to U.S. federal income tax law, which taxes all of an American corporation's income, regardless where it is earned. Bermuda, by contrast, does not tax corporate profits. Instead, a Bermuda corporation doing business in many countries—as is typical for the multinational corporations organized there—pays income tax in each country only on the amount of income earned there.

Fewer than 30 of the thousands of publicly traded American corporations have reincorporated in the Caribbean. Yet in three-fourths of the mergers between U.S. and foreign firms from 1998 to 2000, the resulting companies chose to incorporate in the foreign country because of American tax law. Proponents point to these and other examples of corporate flight as proof that American tax law must be revised to assess income taxes based on where profits are earned, not merely where the company is incorporated.

Opponents brand fleeing businesses as corporate traitors. Already, efforts are under way to restrict or prohibit offshore reincorporation or to punish firms that reincorporate offshore. One proposal would ban offshore companies from receiving lucrative federal government contracts. The 10 biggest companies that have relocated to Bermuda did over one billion dollars of federal contract business in 2002. Consulting firm Accenture alone had over \$600 million of federal contracts.

business that constitutes intrastate business for qualification purposes has been difficult to define. To help clarify the confusion in this area, the MBCA lists several activities that do *not* require qualification. For example, soliciting—by mail or through employees—orders that require acceptance outside the state is not doing intrastate business requiring qualification. That exception, for example, allows Amazon.com to make Internet sales in many states outside its home state of Washington without needing to qualify in those states. In addition, selling through independent contractors or owning real or personal property does not require qualification.

Also classified as not doing business for qualification purposes is conducting an **isolated transaction** that is completed within 30 days and is not one in the course of repeated transactions of a like nature. This isolated transaction safe harbor allows a tree grower to bring Christmas trees into a state in order to sell them to one retailer. However, a Christmas tree retailer who comes into a state for 29 days before Christmas and sells to consumers from a street corner is required to qualify. Although both merchants have consummated their transactions within 30 days, the grower has engaged in only one transaction, but the retailer has engaged in a series of transactions.

Maintaining an office to conduct intrastate business, selling personal property not in interstate commerce, entering into contracts relating to local business or sales, or owning or using real estate for general corporate purposes does constitute doing intrastate business. Passive ownership of real estate for investment, however, is not doing intrastate business.

Maintaining a stock of goods within a state from which to fill orders, even if the orders are taken or accepted outside the state, is doing intrastate business requiring qualification. Performing service activities such as machinery repair and construction work may be doing intrastate business.

Qualification Requirements If required to qualify to do intrastate business in a state, a foreign corporation must apply for a **certificate of authority** from the secretary of state, pay an application fee, maintain a registered office and a registered agent in the state, file an annual report with the secretary of state, and pay an annual fee.

Doing intrastate business without qualifying usually subjects a foreign corporation to a fine, in some states as much as \$10,000. The MBCA disables the corporation to use the state's courts to bring a lawsuit until it obtains a certificate of authority. The corporation may defend itself in the state's courts, however, even if it has no certificate of authority.

LOG ON

Go to
www.usregisteredagents.com

Several online businesses have been created to relieve corporations of the burden of qualifying to do business and maintaining a registered agent in each state in which it does business. US Registered Agents is one such business. Can you find the cost of hiring US Registered Agents to be a corporation's registered agent?

In the following case, *Ryan v. Cerullo*, the court found that a New York professional accounting corporation was not required to qualify to do business in Connecticut despite providing tax services to a Con-

necticut resident. Consequently, the New York corporation was not properly subject to a lawsuit in a Connecticut court.

Ryan v. Cerullo

918 A.2d 867 (Conn. S. Ct. 2007)

Thomas Ryan, a resident of Westport, Connecticut, was an investment banker in New York City. He also had an apartment in New York City. John Cerullo was a resident of New York. His accounting firm, Cerullo & Company, was a New York corporation with its principal office in Tarrytown, New York, and a satellite office in New York City.

Ryan retained Cerullo and his firm to prepare Ryan's 1998 and 1999 federal, Connecticut, and New York personal income tax returns. The New York tax returns Cerullo prepared for Ryan claimed that Ryan was a nonresident of New York. Because Ryan had an apartment in New York, the State of New York ruled that Ryan was not a nonresident and, therefore, assessed him an additional \$149,654 in taxes, penalties, and interest.

To recover the penalties assessed by the New York tax department, Ryan sued Cerullo and his firm in a Connecticut court, alleging breach of contract and malpractice. Cerullo and his firm moved to dismiss Ryan's legal action, claiming that Connecticut lacked personal jurisdiction over them because they had insufficient contact with the State of Connecticut. Cerullo argued that all meetings between Ryan and Cerullo took place in New York, the tax services provided by Cerullo and his firm for Ryan included communications exclusively with New York tax department personnel, and the vast majority of the Cerullo's revenues were derived from persons residing or doing business in New York.

Ryan pointed out that Cerullo & Company had not obtained a certificate of authority to conduct intrastate business in Connecticut. Therefore, Ryan claimed that Connecticut's courts had jurisdiction over Cerullo & Company under Connecticut General Statutes § 33-929(e). General Statutes § 33-929(e) provides:

Every foreign corporation which transacts business in this state in violation of section 33-920 shall be subject to suit in this state upon any cause of action arising out of such business. . . .

General Statutes § 33-920 provides:

(a) A foreign corporation, other than an insurance, surety or indemnity company, may not transact business in this state until it obtains a certificate of authority from the Secretary of the State. . . .

(b) The following activities, among others, do not constitute transacting business within the meaning of subsection (a) of this section: (1) Maintaining, defending or settling any proceeding; (2) holding meetings of the board of directors or shareholders or carrying on other activities concerning internal corporate affairs; (3) maintaining bank accounts; (4) maintaining offices or agencies for the transfer, exchange and registration of the corporation's own securities or maintaining trustees or depositaries with respect to those securities; (5) selling through independent contractors; (6) soliciting or obtaining orders, whether by mail or through employees or agents or otherwise, if the orders require acceptance outside this state before they become contracts; (7) creating or acquiring indebtedness, mortgages and security interests in real or personal property; (8) securing or collecting debts or enforcing mortgages and security interests in property securing the debts; (9) owning, without more, real or personal property; (10) conducting an isolated transaction that is completed within thirty days and that is not one in the course of repeated transactions of a like nature; (11) transacting business in interstate commerce.

The trial court concluded that it lacked personal jurisdiction over Cerullo and Cerullo & Company under the applicable long-arm statutes on the grounds that the case involved preparation of New York state income tax returns by a New York firm for an individual who worked in New York. Ryan appealed to the Supreme Court of Connecticut. The Supreme Court first concluded that the trial court had no grounds for personal jurisdiction over Cerullo. The court then considered whether there were grounds for jurisdiction over Cerullo & Company.

Palmer, Judge

Cerullo and his firm derived only minimal income from Connecticut residents, did not solicit business in Connecticut and

did not promote themselves as a national accounting firm. With respect to the professional accounting services that Ryan retained Cerullo and his firm to provide, they performed those

services exclusively in New York, met with Ryan exclusively in New York, and corresponded exclusively with New York tax officials. Moreover, Ryan had retained them to prepare federal and state tax returns on income earned in New York. Although it is true, of course, that Ryan resides in Connecticut and that Cerullo prepared Ryan's Connecticut income tax returns, we agree with the trial court that those facts alone are insufficient to warrant a determination that the professional services rendered by Cerullo constituted the transacting of business in this state.

We next turn to Ryan's contention that the trial court incorrectly concluded that it lacks jurisdiction over Cerullo & Company under the corporate long-arm statute, namely, § 33-929(e), which vests our courts with jurisdiction over any foreign corporation that transacts business in this state without first having obtained a certificate of authority from the secretary of the state in accordance with § 33-920(a) when the cause of action arises out of such business. Our analysis under § 33-929(e) is twofold. We first must determine whether Cerullo & Company transacted business in this state without authorization to do so as required by § 33-920(a), and, if so, we then must determine whether Ryan's claim against Cerullo & Company arose out of such business.

We disagree with both prongs of Ryan's argument. With respect to his claim that Cerullo & Company transacted business

in this state, this court previously has observed that the phrase "transacts any business" in General Statutes § 52-59b has a broader meaning than the phrases "transact business" or "transacts business" in the corporate long-arm statutes. In the absence of any claim or showing by Ryan that Cerullo & Company has a different, more substantial relationship to this state than Cerullo, and because we already have concluded that the trial court properly determined that it lacks personal jurisdiction over Cerullo under § 52-59b, it follows, a fortiori, that Cerullo & Company did not transact business in this state within the meaning of § 33-929(e).

Even if we assume, arguendo, that Cerullo & Company did transact business in this state within the meaning of § 33-929(e), Ryan cannot satisfy the second requirement of § 33-929(e), namely, that his claim against Cerullo arose out of that business. It is abundantly clear that Ryan's cause of action arises out of the allegedly negligent preparation of his New York income tax returns, not from the preparation of his Connecticut income tax returns. Indeed, Ryan's cause of action has no connection with or relationship to the preparation of his Connecticut income tax returns. Ryan, therefore, has failed to demonstrate that his claim arises out of any business that Cerullo & Company conducted in this state, as required by § 33-929(e).

Judgment affirmed for Cerullo & Company.

Regulation of a Corporation's Internal Affairs Regulation of the internal affairs of a corporation—that is, the relation between the corporation and its directors, officers, and shareholders—is usually exercised only by the state of incorporation. Nonetheless, a foreign corporation may conduct most of its business in a state other than the one in which it is incorporated. Such a corporation is called a **pseudo-foreign corporation** in the state in which it conducts most of its business.

A few states subject pseudo-foreign corporations to extensive regulation of their internal affairs, regulation similar to that imposed on their domestic corporations. California's statute requires corporations that have more than 50 percent of their business and ownership in California to elect directors by cumulative voting, to hold annual directors' elections, and to comply with California's dividend payment restrictions. Foreign corporations raise many constitutional objections to the California statute, including violations of the Commerce Clause and the Due Process Clause.

Regulation of Foreign Nonprofit Corporations

The Model Nonprofit Corporation Act and other laws impose the same requirements and penalties on nonprofit corporations as are imposed on for-profit corporations. For example, the MNCA requires a foreign nonprofit corporation to qualify to do intrastate business in a state. The failure to qualify prevents the foreign nonprofit corporation from using the state's courts to bring lawsuits and subjects it to fines for each day it transacts intrastate business without a certificate of authority.

Piercing the Corporate Veil

A corporation is a legal entity separate from its shareholders. Corporation law erects an imaginary wall between a corporation and its shareholders that protects shareholders from liability for a corporation's actions. Once shareholders have made their promised capital

contributions to the corporation, they have no further financial liability. This means that contracts of a corporation are not contracts of its shareholders, and debts of a corporation are not debts of its shareholders.

Nonetheless, in order *to promote justice and to prevent inequity*, courts will sometimes ignore the separateness of a corporation and its shareholders by **piercing the corporate veil**. The primary consequence of piercing the corporate veil is that a corporation's shareholders may lose their limited liability.

Two requirements must exist for a court to pierce the corporate veil: (1) **domination** of a corporation by its shareholders; and (2) use of that domination for an **improper purpose**.

As an entity separate from its shareholders, a corporation should act for itself, not for its shareholders. If a shareholder causes a corporation to act to the personal benefit of the shareholder, *domination*—the first requirement for piercing the corporate veil—is proved. For example, a majority shareholder's directing a corporation to pay the shareholder's personal expenses is domination. Domination is also proved if the controlling shareholders cause the corporation to fail to observe corporate formalities (such as failing to hold shareholder and director meetings or to maintain separate accounting records). Some courts say that shareholder domination makes the corporation the *alter ego* (other self) of the shareholders. Other courts say that domination makes the corporation an *instrumentality* of the shareholders.

To prove domination, it is not sufficient, or even necessary, to show that there is only one shareholder. Many one-shareholder corporations will never have their veils pierced. However, nearly all corporations whose veils are pierced are close corporations, since domination is more easily accomplished in a close corporation than in a publicly held one.

In addition to domination, there must be an *improper use* of the corporation. The improper use may be any of three types: defrauding creditors, circumventing a statute, or evading an existing obligation.

Defrauding Creditors Shareholders must organize a corporation with sufficient capital to meet the initial capital needs of the business. Inadequate capitalization, called **thin capitalization**, is proved when capitalization is very small in relation to the nature of the business of the corporation and the risks the business necessarily entails.

Thin capitalization defrauds creditors of a corporation. An example of thin capitalization is forming a business

with a high debt-to-equity ratio, such as a \$10 million-asset business with only \$1,000 of equity capital, with the shareholders sometimes contributing the remainder of the needed capital as secured creditors. By doing so, the shareholders elevate a portion of their bankruptcy repayment priority to a level above that of general creditors, thereby reducing the shareholders' risk. The high debt-to-equity ratio harms nonshareholder-creditors by failing to provide an equity cushion sufficient to protect their claims. In such a situation, either the shareholders will be liable for the corporation's debts or the shareholders' loans to the corporation will be subordinated to the claims of other creditors. As a result, the nonshareholder-creditors are repaid all of their claims prior to the shareholder-creditors receiving payment from the corporation.

Transfers of corporate assets to shareholders for less than fair market value (called **looting**) also defraud creditors. For example, shareholder-managers loot a corporation by paying themselves excessively high salaries or by having the corporation pay their personal credit card bills. When such payments leave insufficient assets in the corporation to pay creditors' claims, a court will hold the shareholders liable to the creditors.

Frequently, the same shareholders may own two corporations that transact with each other. The shareholders may cause one corporation to loot the other. When such looting occurs between corporations of common ownership, courts pierce the veils of these corporations. This makes each corporation liable to the creditors of the other corporation. For example, a shareholder-manager operates two corporations from the same office. Corporation 1 transfers inventory to Corporation 2, but it receives less than fair market value for the inventory. Also, both corporations employ the same workers, but all of the wages are paid by Corporation 1. In such a situation, the veils of the corporations will be pierced, allowing the creditors of Corporation 1 to satisfy their claims against the assets of Corporation 2.

Looting may occur also when one corporation (called the **parent corporation**) owns at least a majority of the shares of another corporation (called the **subsidiary corporation**). Ordinarily, the parent is liable for its own obligations and the subsidiary is liable for its own obligations, but the parent is not liable for its subsidiary's debts and the subsidiary is not liable for the parent's debts. Nonetheless, because a parent corporation is able to elect the directors of its subsidiary and therefore can control the management of the subsidiary, the parent may cause its subsidiary to transact with the parent in a manner that benefits the parent but harms the subsidiary.

For example, a parent corporation may direct its subsidiary to sell its assets to the parent for less than fair value. Because the subsidiary has given more assets to the parent than it has received from the parent, creditors of the subsidiary have been defrauded. Consequently, a court will pierce the veil between the parent and its subsidiary and hold the parent liable to the creditors of the subsidiary.

To prevent the piercing of veils between them, affiliated corporations must not commingle their assets. Each corporation must have its own books of accounts. Transactions between affiliated corporations must be recorded on the books of both corporations, and such transactions must be executed at fair value.

Circumventing a Statute A corporation should not engage in a course of conduct that is prohibited by a statute. For example, a city ordinance may prohibit retail businesses from being open on consecutive Sundays. To avoid the statute, a retail corporation forms a subsidiary owned entirely by the retail corporation; on alternate weeks, it leases its building and inventory to the subsidiary. A court will pierce the veil because the purpose of creating the subsidiary corporation is to circumvent the statutory prohibition. Consequently, both the parent and the subsidiary will be liable for violating the statute.

Evading an Existing Obligation Sometimes, a corporation will attempt to escape liability on a contract by reincorporating or by forming a subsidiary corporation. The new corporation will claim that it is not bound by

the contract, even though it is doing the same business as was done by the old corporation. In such a situation, courts pierce the corporate veil and hold the new corporation liable on the contract.

For example, to avoid an onerous labor union contract, a corporation creates a wholly owned subsidiary and sells its entire business to the subsidiary. The subsidiary will claim that it is not a party to the labor contract and may hire nonunion labor. A court will pierce the veil between the two corporations because the subsidiary was created only to avoid the union contract.

Nonprofit Corporations Like a for-profit corporation, a nonprofit corporation is an entity separate and distinct from its members. A member is not personally liable for a nonprofit corporation's acts or liabilities merely by being a member. However, a court may pierce the veil of a nonprofit corporation if it is used to defraud creditors, circumvent a statute, or evade an existing obligation, the same grounds on which a for-profit corporation's veil may be pierced.

For a summary of the law of piercing the corporate veil, see Figure 2. Note that the law of veil piercing also applies to other business forms we studied in Chapters 37–40, including LLCs and LLPs.

In the next case, the Maryland Court of Appeals refused to pierce the corporate veil when the corporation was not used to defraud the creditor and the shareholder was not its alter ego. The court also held that the New Jersey corporation's failure to register to do business in Maryland did not impose personal liability on the foreign corporation's sole shareholder.

Hildreth v. Tidewater Equipment Co.

838 A.2d 1204 (Md. Ct. App. 2003)

John Hildreth was the sole shareholder, director, and officer of a New Jersey corporation, HCE, Inc., also referred to as HCE-NJ. Engaged in the construction business, in late 1996 or early 1997, HCE-NJ began to do business in Maryland, opening an office in Columbia. However, Hildreth did not register HCE-NJ in Maryland, as required by Maryland Code, sections 7–202, 7–202.1, or 7–203 of the Corporations and Associations Article. Those sections require that foreign corporations register with the Maryland Department of Assessments and Taxation before doing any intrastate business in Maryland. Registration requires that the corporation have a resident agent in Maryland.

In February 1998, HCE-NJ rented a 20-ton capacity crane from Tidewater Equipment Company, Inc., for one or two days and paid the rental charge as agreed. In September 1998, HCE-NJ and Tidewater commenced negotiations for the long-term rental of a crane that HCE-NJ intended to use in connection with a construction project in Alexandria, Virginia.

Hildreth made clear he was acting for HCE, Inc., but neither said nor was asked where that company was incorporated. He informed Frank Kolbe, a Tidewater representative, that the company had an office in Columbia, Maryland. Kolbe visited both the Columbia office and a job site. He testified that the company “didn’t appear to be a fly-by-night operation,” but had “a nice office suite” and “numerous employees.” The job site was also substantial, with “a huge warehouse,” a rail siding, and “hundreds of metal building panels.” Kolbe assumed that HCE-NJ was a Maryland corporation because it had an office in Columbia.

Tidewater and HCE-NJ signed a series of daily contracts. Hildreth did not sign the contracts, which were signed on behalf of HCE-NJ by some other employee. The charges for September, October, and November 1998, were paid in January and February 1999. When payments were not received thereafter, Tidewater repossessed the equipment. At the time, Tidewater was owed \$47,246 for the months of December, January, February, and March, and for a few days in April.

Tidewater sued Hildreth on the grounds Hildreth was personally liable for the debts incurred by HCE-NJ. The court entered judgment against Hildreth for the entire corporate debt. Hildreth appealed to the Court of Special Appeals, arguing that officers and directors of a foreign corporation are not personally liable for corporate debts solely because the corporation fails to qualify to do business in Maryland and that Tidewater knew that it was dealing with a corporation.

On appeal, the intermediate appellate court pointed out that the only thing that was not disclosed to Tidewater was the fact that HCE-NJ was a foreign corporation that had not registered to do business in Maryland. Tidewater knew that it was dealing with a corporation engaged in the construction business; it knew the actual name of the corporation and that it had offices not just in Maryland but in New Jersey and New York as well.

The Court of Special Appeals also concluded that, as a general rule, officers and directors of a valid foreign corporation are not personally liable on corporate debts merely because the corporation fails to register to do business in the forum state, but held that the court could impose such liability “when justice requires.” Although acknowledging that the traditional factors justifying veil piercing were not present, the court determined that the case presented a situation in which the corporate form must be disregarded to “enforce a paramount equity.” After the court affirmed Hildreth’s liability to Tidewater, Hildreth asked the Maryland Court of Appeals to review the decision.

Wilner, Judge

The only issue before us is whether there was a basis for piercing the corporate veil of HCE-NJ and imposing personal liability for the corporate obligation on Hildreth.

As the Court of Special Appeals recognized, there was no allegation here of fraud on the part of either Hildreth or HCE-NJ; nor was there any evidence or finding of fraud. Personal liability rested solely upon the notion of “paramount equity,” which, in that court’s view, arose from a combination of the following circumstances:

- (1) Hildreth was the sole shareholder of HCE-NJ;
- (2) Hildreth was “personally involved” in the business transaction with Tidewater, which the court viewed as “Hildreth’s dirty hands”;
- (3) * * *
- (4) Contracts made by unregistered foreign corporations, though valid, nonetheless constitute “illegal business transactions on the part of the unregistered foreign corporation, for which that corporation and its agents, officers, directors, and shareholders may be penalized,” which the court characterized as “the public policy against illegal business transactions;”
- (5) Maryland law precludes unregistered corporations doing business in Maryland from seeking relief in Maryland courts, which the court regarded as “the public policy against unregistered corporations using Maryland courts to protect their illegal business transactions.”

Although we have not heretofore given any generic definition of “paramount equity” in this context, it is abundantly clear from our actual holdings in cases where attempts were made to pierce a corporate veil—to hold stockholders personally liable for corporate obligations—that those circumstances, individually or in combination, do not suffice.

In a number of cases, we made favorable reference to the synthesis supplied in the 1953 edition of Herbert Brune’s work, *Maryland Corporation Law and Practice*, § 371, as to when a corporate entity will be disregarded:

First. Where the corporation is used as a mere shield for the perpetration of a fraud, the courts will disregard the fiction of separate corporate entity.

Second. The courts may consider a corporation as unencumbered by the fiction of corporate entity and deal with substance rather than form as though the corporation did not exist, in order to prevent evasion of legal obligations.

Third. Where the stockholders themselves, or a parent corporation owning the stock of a subsidiary corporation, fail to observe the corporate entity, operating the business or dealing with the corporation’s property as if it were their own, the courts will also disregard the corporate entity for the protection of third persons.

(Emphasis added).

There is nothing in this record that could possibly justify the first of these circumstances. As already noted, there is no

claim, no evidence, and no finding that Hildreth used HCE-NJ as “a mere shield for the perpetration of a fraud.”

The third circumstance embodies what is sometimes called the “alter ego” doctrine. Fletcher observes that the “alter ego” doctrine has been applied “where the corporate entity has been used as a subterfuge and to observe it would work an injustice,” the rationale being that “if the shareholders or the corporations themselves disregard the proper formalities of a corporation, then the law will do likewise as necessary to protect individual and corporate creditors.” William Meade Fletcher, *1 Fletcher Cyclopaedia of the Law of Private Corporations*, § 41.10 at 574–76 (1999 Rev. Vol.). Courts will apply the doctrine when the plaintiff shows (1) “complete domination, not only of the finances, but of policy and business practice in respect to the transaction so that the corporate entity as to this transaction had at the time no separate mind, will or existence of its own,” (2) that “such control [was] used by the defendant to commit fraud or wrong, to perpetrate the violation of the statutory or other positive legal duty, or dishonest and unjust act in contravention of the plaintiff’s legal rights,” and (3) that such “control and breach of duty proximately caused the injury or unjust loss.” *Id.* at 583–86. Because piercing the corporate veil is founded on equity, “where no fraud is shown, the plaintiff must show that an inequitable result, involving fundamental unfairness, will result from a failure to disregard the corporate form.” *Id.* at 605.

Although there appears to be no universal rule as to the specific criteria that courts will consider in determining whether to apply the doctrine, Fletcher observes that some of the factors commonly considered, when dealing with a single corporation, are (1) whether the corporation is inadequately capitalized, fails to observe corporate formalities, fails to issue stock or pay dividends, or operates without a profit; (2) whether there is commingling of corporate and personal assets; (3) whether there are nonfunctioning officers or directors; (4) whether the corporation is insolvent at the time of the transaction; and (5) the absence of corporate records.

There is no support in this record for basing personal liability on the “alter ego” doctrine. There is no evidence that Hildreth exercised such complete domination over HCE-NJ to warrant a conclusion that the corporation had no separate mind, will, or existence of its own. There is no evidence that HCE-NJ was undercapitalized, that corporate formalities were not observed, that the corporation operated without a profit, that there were non-functioning officers or directors, that the company was insolvent when it entered into the arrangement with Tidewater, that there were no or inadequate corporate records.

What the record does show is that HCE-NJ was a valid, subsisting corporation which, until it suffered a reversal of

fortunes, had substantial assets and business prospects. The relevant contracts, with the general contractor and with Tidewater, were in its name, and, indeed, the contracts with Tidewater were signed on its behalf not by Hildreth but by another employee. Although the conclusion is certainly warranted that Hildreth deliberately permitted HCE-NJ to operate in Maryland without benefit of registration, there is no evidence that that conduct in any way influenced Tidewater to enter into the contractual arrangement from which this debt arose. Tidewater knew that it was dealing with a corporation, and it had satisfied itself that the corporation had substantial contracts and assets, that it had two business locations in the state, that it had numerous employees, and that it was not a “one man show.” Kolbe’s assumption that HCE-NJ was a Maryland corporation did not come from anything Hildreth said. Indeed, much of the information apparently relied upon by Kolbe in agreeing to the contract came from another HCE-NJ employee, not Hildreth.

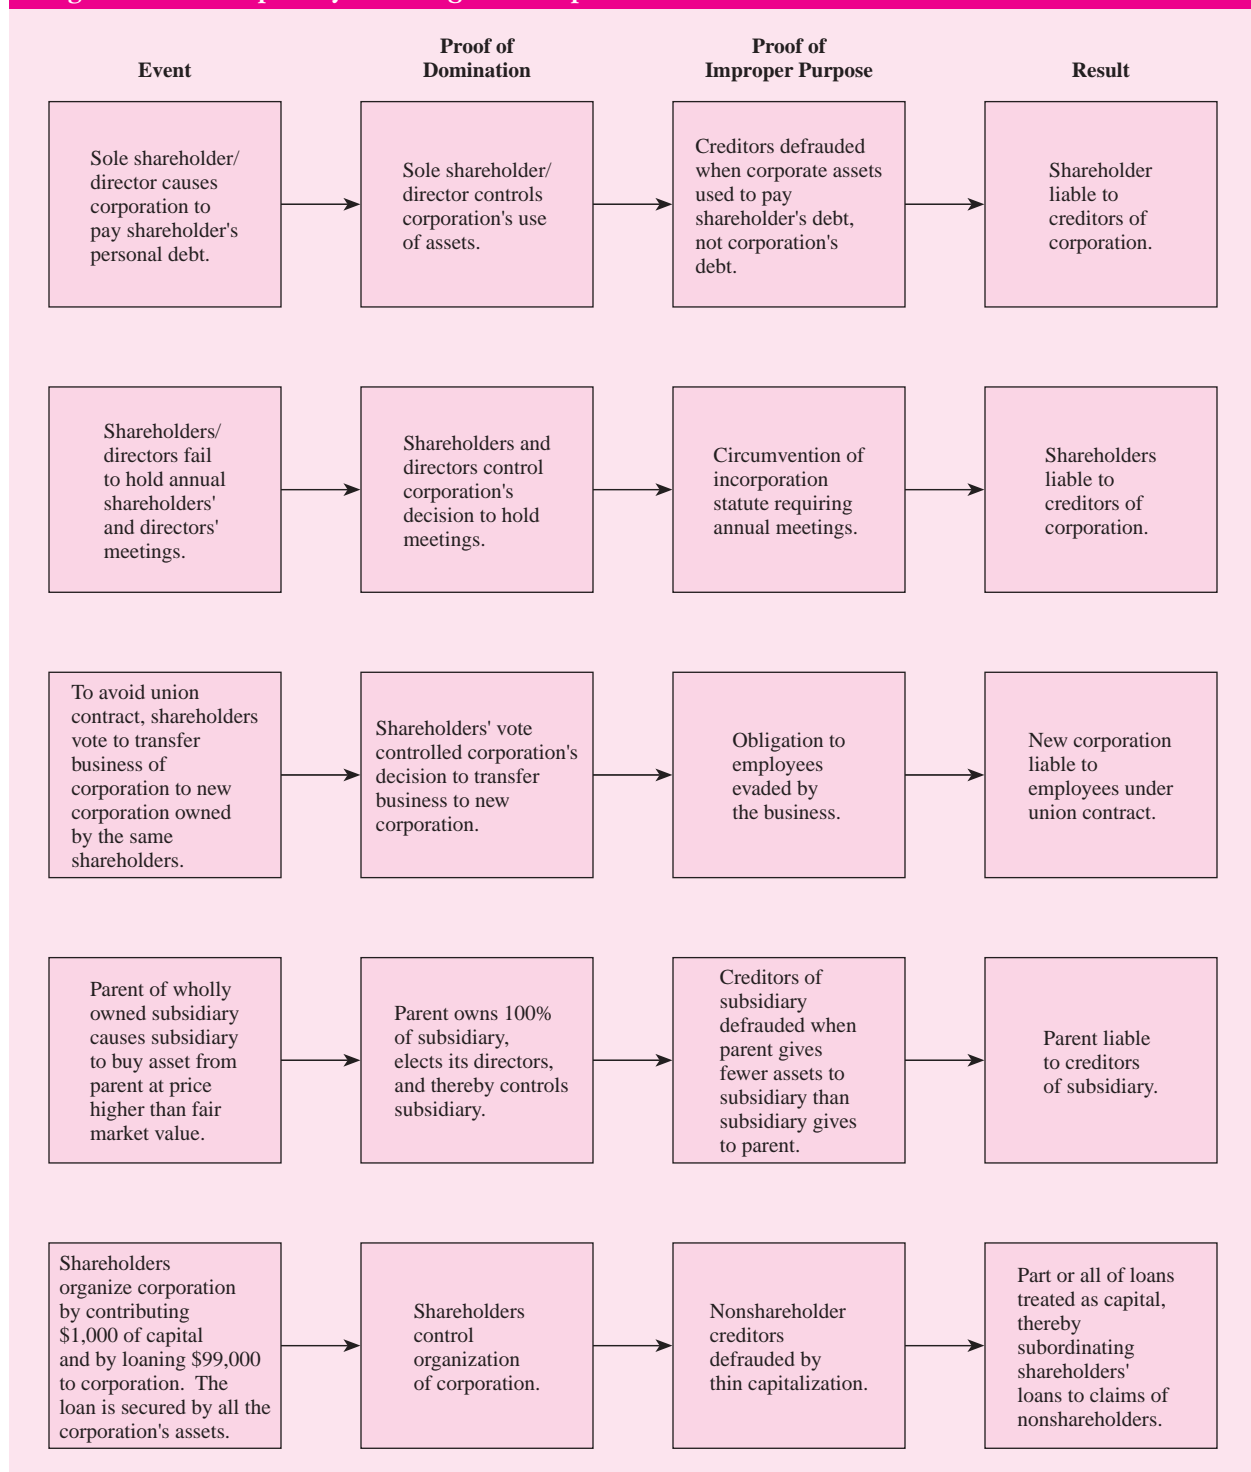

In sustaining liability on Hildreth’s part, the Court of Special Appeals seemed to be applying the second in Brune’s trilogy of circumstances, disregarding the corporate existence “in order to prevent the evasion of legal obligations.” That, in turn, appears to rest on Hildreth’s failure to register the corporation. Tidewater sees that set of circumstances as an independent basis for “paramount equity,” urging that “paramount equity” need not rest solely on the “alter ego” doctrine.

Hildreth’s conduct may have subjected him to a \$1,000 fine pursuant to § 7–302(b) of the Corporations and Associations Article; it would have served as well to preclude the corporation from filing suit in Maryland, *see* § 7–301. Section 7–305 makes clear, however, that the failure of a foreign corporation to comply with the registration requirements “does not affect the validity of any contract to which the corporation is a party,” and there is nothing in the registration statutes that permits a court to invade the corporate entity simply because of a failure to register.

We do not regard Brune’s second proposition as a separate basis for piercing a corporate veil. It is, at best, subsumed, along with the “alter ego” doctrine, in the notion of paramount equity, and has no application in this case. The record here reveals nothing more than the fact that a valid, subsisting corporation entered into a commercial contract and later became unable to satisfy its obligation under that contract. That is unfortunate, but it is not a basis for making someone else liable for the corporate debt.

Judgment reversed in favor of Hildreth.

Figure 2 *Examples of Piercing the Corporate Veil*

Ethics in Action

Large multinational corporations and smaller closely held corporations use multiple corporations (and sometimes LLCs and limited partnerships) to manage their tax, contract, and tort liability. As we will learn in Chapter 42, American corporations set up subsidiaries in Delaware to take advantage of its low taxes. Also, if a corporation wants to engage in a risky new venture in a country with a volatile

political climate, the corporation will almost always conduct the business in a wholly owned subsidiary.

Even in the absence of an abnormal risk, many corporations create a structure like the following, in which parts of the corporation's business, such as finance, sales, and manufacturing, are placed in separate corporations, each wholly owned by the parent corporation:

The parent company is a holding company that owns all the shares of the subsidiaries. Commonly, it also provides management services to the subsidiaries; in such cases, usually many employees working for the subsidiaries are actually employees of the parent, because the employees often work for more than one subsidiary. Employees are assigned by the parent holding company, which receives a management fee from the subsidiaries and allocates employees to the subsidiaries as needed. The holding company will also be the capital-raising arm of the business because its cost of capital is usually lower than the individual subsidiaries' costs of capital due to diversification of risk.

As far as corporation law is concerned, this parent–subsidiary structure allows the business to isolate liability. Thus, if one subsidiary is unable to pay its obligations and its assets lost, the assets of the other subsidiaries are preserved.

- Is it ethical for a business to set up such a parent–subsidiary structure? Would a profit maximizer be likely to set up such a structure?
- If a subsidiary becomes insolvent and is unable to pay its debts, would its creditors appreciate that neither the parent nor the other subsidiaries are liable to the creditors? Is it important that a creditor chose to do business with the subsidiary and could have examined its financial position before extending credit to the subsidiary?
- Would a tort victim who was injured by a product sold by the sales subsidiary appreciate that only its assets are available to pay his tort claim? Is it important that the victim is ignorant of corporation law and is not aware that the parent and subsidiaries are separate corporations? Does a tort victim have the same ability as a contract creditor to check out the corporate structure of the business before being injured by the product? Would a believer in justice theory see a difference between a contract creditor and a tort victim?

Problems and Problem Cases

1. You and four of your closest friends have decided to start a business that will purchase from banks and other financial institutions high-risk, subprime mortgage loans that are in default. You believe that you will be able to purchase the loans for no more than 40 percent of their face value. The plan is that the

business will buy the loans by paying half the purchase amount in cash and the other half by issuing promissory notes due in six months to two years. You expect to turn a profit by restructuring the loans with the debtors, foreclosing against the real property securing the loans, or aggregating the loans and reselling them. You and your four friends are willing to invest \$2 million each in the business. Needing an

additional \$10 million to start the venture, you and your four friends agree to allow 10 other investors to contribute equity of \$1 million each to the business. Only you and the four friends will be the managers of the business. The five of you want to share equally all decisions regarding the acquisition, management, and sale of the loans. You want the other 10 investors to be passive investors only with no say in the management of the business. However, the 10 other investors, who are contributing half the equity of the business, are concerned about protecting their investments. You have proposed that the business be formed as a limited liability company (LLC), but some of your friends believe that the corporation or the limited partnership is a better form. One friend says that the advantages of the corporation make it a superior business form. List the usual advantages of the corporate form of business. Explain why the usual advantages of the corporation are not likely to be fully available in this context.

2. Sculptchair, Inc., a Florida corporation, owned a patent to chair covers. It signed a contract with Century Arts, Ltd., a Canadian corporation, giving Century Arts exclusive rights under the patent to manufacture and sell chair covers. Century Arts was owned entirely by Mary Bien and Phyllis Rich. Almost immediately, Century Arts failed to make payments under the contract to Sculptchair, which terminated the contract. Century Arts went out of business. Bien and Rich formed a new Canadian corporation, Chair Décor, Inc., which carried on the business of Century Arts. Soon after, Sculptchair sued Chair Décor in a Florida court on the grounds that it was infringing Sculptchair's patent. Chair Décor argued that it could not be sued in a Florida court. Was Chair Décor right?
3. Dayton Furniture Fashions, Inc. (DFF), is incorporated in Ohio and operates three retail furniture stores in Dayton, Ohio. DFF advertises its stores on radio stations and in newspapers in Richmond, Indiana, a city near the Indiana border with Ohio. In response to DFF's advertisements, Greta Hammond, a resident of Richmond, drives to a DFF store in Dayton and purchases a sofa bed for \$956. DFF agrees to deliver the sofa bed to Hammond's home in Richmond in three days. DFF's employees deliver the sofa bed to Hammond as promised, driving a delivery truck owned by DFF from its warehouse in

Huber Heights, Ohio. A few days later, when Hammond attempts to use the sofa bed for the first time, she discovers the sofa bed is defective and is not usable. When DFF refuses to replace the sofa bed, Hammond sues DFF in an Indiana state court. Does the Indiana court have jurisdiction over DFF?

4. A Hawaiian statute imposed a 20 percent wholesale excise tax on liquor sold in Hawaii. To encourage the development of Hawaiian liquor, the statute exempted from taxation Okolehao, a brandy distilled from the root of the ti plant, a native Hawaiian shrub. Bacchus Imports, a liquor wholesaler, claimed that the excise tax violated the Commerce Clause. Was Bacchus correct?
5. Mead Corporation, an Ohio corporation in the business of producing and selling paper, packaging, and school and office supplies, also owned Lexis/Nexis, the electronic research service. Either as a separate subsidiary or as a division of Mead, Lexis was subject to Mead's oversight, but Mead did not manage its day-to-day affairs. Mead was headquartered in Ohio, while a separate management team ran Lexis out of its headquarters in Illinois. The two businesses maintained separate manufacturing, sales, and distribution facilities, as well as separate accounting, legal, human resources, credit and collections, purchasing, and marketing departments. Mead's involvement was generally limited to approving Lexis's annual business plan and any significant corporate transactions that Lexis wished to undertake. Mead managed Lexis's free cash, which was swept nightly from Lexis's bank accounts into an account maintained by Mead. The cash was reinvested in Lexis's business, but Mead decided how to invest it. Neither business was required to purchase goods or services from the other. Lexis, for example, was not required to purchase its paper supply from Mead and in fact purchased most of its paper from other suppliers. Neither received any discount on goods or services purchased from the other, and neither was a significant customer of the other.

In 1994, Mead sold Lexis for \$1.5 billion, realizing a capital gain of over \$1 billion. Mead did not report any of this gain as business income on its 1994 Illinois tax return, taking the position that it was non-business income and should be allocated entirely to Mead's domestic state, Ohio. Did the Supreme Court of the United States agree with Mead?

6. B & D Shrimp, Inc., a Delaware corporation, made a contract in Texas to sell a commercial shrimp boat to Donald Gosch and Jesse Bach. Gosch and Bach paid \$5,000 down and received immediate possession of the boat in Texas, where they would shrimp in the coastal waters. The contract stated that Gosch and Bach would get title to the boat after transferring a cabin cruiser to Shrimp, Inc., and paying 15 percent of the cash proceeds from the boat's daily shrimp catches for the next calendar year. When Gosch and Bach defaulted on the contract, Shrimp, Inc., sued Gosch and won the case. Shrimp, Inc., however, had not obtained a certificate of authority to do business in Texas. Twenty days after the judgment was entered, Gosch contested the judgment on the grounds that Shrimp, Inc., by failing to qualify to do business, could not use Texas's courts to obtain a judgment against Gosch. Shrimp, Inc., decided at that time, therefore, to obtain a certificate of authority. Is the judgment for Shrimp, Inc., against Gosch valid?
7. The National Collegiate Athletic Association (NCAA) is a corporation organized in the State of Indiana. The NCAA conducts several championship events throughout the United States. The 2011 Men's Basketball Final Four will be held at Reliant Stadium in Houston, Texas. The NCAA has contracted to lease Reliant Stadium for two weeks up to and including the championship. The NCAA has also leased over 200 hotel rooms in Houston. To plan and conduct the championship event in Houston, over 20 NCAA employees will visit Houston over a two-year period, some of them spending over 75 days in Texas. Should the NCAA qualify to do business in Texas?
8. Eric Dahlbeck incorporated Viking Construction, Inc., with an initial capital of \$3,000. Dahlbeck also made a \$7,000 loan to Viking. Viking had as assets 65 lots of land held for development. The lots cost \$430,000. Viking became unable to pay its creditors, who sought to pierce the corporate veil and hold Dahlbeck liable. Were the creditors successful?
9. New York law required that every taxicab company carry \$10,000 of accident liability insurance for each cab in its fleet. The purpose of the law was to ensure that passengers and pedestrians injured by cabs operated by these companies would be adequately compensated for their injuries. Carlton organized 10 corporations, each owning and operating two taxicabs in New York City. Each of these corporations carried \$20,000 of liability insurance. Carlton was the principal shareholder of each corporation. The vehicles, the only freely transferable assets of these corporations, were collateral for claims of secured creditors. The 10 corporations were operated more or less as a unit with respect to supplies, repairs, and employees. Walkovszky was severely injured when he was run down by one of the taxicabs. He sued Carlton personally, alleging that the multiple corporate structure amounted to fraud upon those who might be injured by the taxicabs. Should the court pierce the corporate veil to reach Carlton individually?
10. REIS, Inc., owns, constructs, and manages 25 shopping malls throughout the United States and Canada. REIS is concerned that the failure of any one mall will be a substantial financial loss that will cause the entire business to fail. What parent-subsidary structure do you recommend REIS, Inc., create to solve the liability risks of operating 25 malls? What roles will the parent corporation undertake after the subsidiary structure has been established? List the dos or don'ts that will help prevent a piercing of the veils between the subsidiaries and between the parent company and its subsidiaries.
11. Castleberry, Branscum, and Byboth each owned one-third of the shares of a furniture-moving business, Texan Transfer, Inc. Branscum formed Elite Moving Company, a business that competed with Texan Transfer. Castleberry objected and sued to claim part ownership of Elite Moving. Branscum threatened Castleberry that he would not receive any return on his investment in Texan Transfer unless he abandoned his claim of ownership of Elite Moving. Consequently, Castleberry sold his shares back to Texan Transfer for a \$42,000 promissory note. Gradually, Elite Moving took over more and more of the business of Texan Transfer. Texan Transfer allowed Elite Moving to use its employees and trucks. Elite Moving advertised for business, while Texan Transfer did not. Elite Moving prospered, while Texan Transfer's business declined. As a result, Castleberry was paid only \$1,000 of the \$42,000 promissory note. Did Castleberry have any grounds to hold Branscum liable for the unpaid portion of the note?
12. Rachel Romano owns 90 percent of the stock of RRC, Inc. Romano is the president and CEO and the only voting member of the board of directors. Her husband and daughter each own 5 percent of the

shares of RRC, and each is also an officer and non-voting director. When Romano receives payments from RRC's clients, she deposits the payments in her personal checking and savings accounts. She also pays all RRC's creditors with checks written on her personal account. She also pays all her personal expenses from the personal checking account into which she deposits RRC funds. For three years, Romano has not held a shareholders meeting or a meeting of the board of directors. Is Romano risking being held liable for the obligations of RRC?

Online Research

Your State's or Country's Corporation Law

Find a Web site that posts the corporation law of your state or country. All state governments have online access to their statutes, and a few countries do as well. When you find the statute, determine what a foreign or alien corporation must do in your state or country to qualify to do business.

chapter 42

ORGANIZATION AND FINANCIAL STRUCTURE OF CORPORATIONS

A client has sought your assistance before incorporating a business that will buy and sell fine art. The client will enter the business with three other associates, all about 35 years old. They plan to own equal shares of the business and to manage it together. The business has not yet been incorporated.

- Your client and her associates identify five valuable paintings they want to purchase. To reduce their personal liability on the contracts to purchase the paintings, what do you recommend they do prior to signing the purchase contracts?
- Your client states that she wants to incorporate the business because a corporation's shares are freely transferable, making it easy for shareholders to liquidate their investments. You know better. Explain to your client why free transferability of the shares as a legal matter is a problem for her and her associates. Also explain to your client why free transferability of the shares as a practical matter does not exist. What should your client do to address the share transferability issues? Sketch the contents of a buy-sell agreement that addresses all the transferability issues.

A PERSON DESIRING TO incorporate a business must comply with the applicable state or federal corporation law. Failing to comply can create various problems. For example, a person may make a contract on behalf of the corporation before it is incorporated. Is the corporation liable on this contract? Is the person who made the contract on behalf of the prospective corporation liable on the contract? Do the people who thought that they were shareholders of a corporation have limited liability, or do they have unlimited liability as partners of a partnership?

Promoters and Preincorporation Transactions

A **promoter** of a corporation incorporates a business, organizes its initial management, and raises its initial capital. Typically, a promoter creates or discovers a business or an idea to be developed, finds people who are willing to invest in the business, negotiates the contracts necessary for the initial operation of the proposed venture, incorporates the business, and helps management start the operation of the business. Consequently, a promoter may engage in many acts prior to the incorporation of the

business. As a result, the promoter may have liability on the contracts he negotiates on behalf of the prospective corporation. In addition, the corporation may *not* be liable on the contracts the promoter makes on its behalf.

Corporation's Liability on Preincorporation Contracts A nonexistent corporation has no liability on contracts made by a promoter prior to its incorporation. This is because the corporation does not exist.

Even when the corporation comes into existence, it does not automatically become liable on a preincorporation contract made by a promoter on its behalf. It cannot be held liable as a principal whose agent made the contracts because the promoter was not its agent and the corporation was not in existence when the contracts were made.

The only way a corporation may become bound on a promoter's preincorporation contracts is by the corporation's **adoption** of the promoter's contracts. Adoption is similar to the agency concept of ratification, which is covered in Chapter 36. For a corporation to adopt a promoter's contract, the corporation must accept the contract with knowledge of all its material facts.

Acceptance may be express or implied. The corporation's knowing receipt of the benefits of the contract is sufficient for acceptance. For example, a promoter makes a preincorporation contract with a genetic engineer, requiring the engineer to work for a prospective corporation for 10 years. After incorporation, the promoter presents the contract to the board of directors. Although the board takes no formal action to accept the contract, the board allows the engineer to work for the corporation for one year as the contract provides and pays him the salary required by the contract. The board's actions constitute an acceptance of the contract, binding the corporation to the contract for its 10-year term. The *SmithStearn* case is another example of a corporation adopting a preincorporation contract.

Promoter's Liability on Preincorporation Contracts A promoter and her copromoters are jointly and severally liable on preincorporation contracts the promoter negotiates in the name of the nonexistent corporation. This liability exists even when the promoters' names do not appear on the contract. Promoters are also jointly and severally liable for torts committed by their copromoters prior to incorporation.

A promoter retains liability on a preincorporation contract until **novation** occurs. For novation to occur, the corporation and the third party must agree to release the promoter from liability and to substitute the corporation for the promoter as the party liable on the contract. Usually, novation will occur by express or implied agreement of all the parties.

If the corporation is not formed, a promoter remains liable on a preincorporation contract unless the third party releases the promoter from liability. In addition, the mere formation of the corporation does not release a promoter from liability. A promoter remains liable on a preincorporation contract even after the corporation's adoption of the contract, since adoption does not automatically release the promoter. The corporation cannot by itself relieve the promoter of liability to the third party; the third party must also agree, expressly or impliedly, to release the promoter from liability.

A few courts have held that a promoter is not liable on preincorporation contracts if the third party *knew of the*

nonexistence of the corporation yet insisted that the promoter sign the contract on behalf of the nonexistent corporation. Other courts have found that the promoter is not liable if the third party clearly stated that he would *look only to the prospective corporation* for performance.

Recently, courts have held that the Model Business Corporation Act (MBCA) permits a promoter to escape liability for preincorporation contracts when the promoter has made some effort to incorporate the business and believes the corporation is in existence. The MBCA rule is discussed below in the section titled Defective Attempts to Incorporate.

Obtaining a Binding Preincorporation Contract While it may be desirable for the promoter to escape liability on a preincorporation contract, there is one disadvantage: Only when the promoter is liable on the preincorporation contract is the other party liable on the contract. This means that when the promoter is not liable on the contract, the other party to the contract may rescind the contract at any time prior to adoption by the corporation. Once the corporation has adopted the contract, the corporation and the third party are liable on it, and the contract cannot be rescinded without the consent of both parties.

To maintain the enforceability of a preincorporation contract prior to adoption, a promoter may want to be liable on a preincorporation contract at least until the corporation comes into existence and adopts the contract. To limit his liability, however, the promoter may wish to have his liability cease automatically upon adoption. The promoter should ensure that the contract has an **automatic novation clause**. For example, a preincorporation contract may read that "the promoter's liability on this contract shall terminate upon the corporation's adoption of this contract."

Instead of using automatic novation clauses, today most well-advised promoters incorporate the business prior to making any contracts for the corporation. That is, the well-advised promoter makes *no* preincorporation contracts. Instead, she makes contracts only for existing corporations. As a result, only the corporation and the third party—and not the promoter—have liability on the contract.

SmithStearn Yachts, Inc. v. Gyrographic Communications, Inc. 2006 Conn. Super. LEXIS 1927 (Ct. Super. Ct. 2006)

SmithStearn Yachts, Inc., a Delaware corporation providing luxury yachting services in Connecticut, agreed to a contract with Gyrographic Communications, Inc., a California company, by which Gyrographic would provide advertising, marketing, and promotional services to SmithStearn. When SmithStearn sued Gyrographic for breaching the contract, Gyrographic

countered that SmithStearn was not a party to the contract, because the contract was purportedly made with a limited liability corporation, SmithStearn Yachts, LLC, not the corporation that was suing Gyrographic.

Rodriguez, Judge

Leathern Stearn, the purported promoter and president of SmithStearn Yachts, Inc., executed the agreement with Gyrographic on behalf of SmithStearn, LLC, an entity that never came into existence. Rather, the plaintiff, SmithStearn Yachts, Inc. was formed. SmithStearn Yachts, Inc. contends that it has standing to bring this action because it assumed and ratified, both explicitly and implicitly, the agreement that was made on its behalf, prior to its formation.

Generally, a corporation is not bound by contracts entered into on its behalf prior to its existence. A corporation can, however, acquire rights and subject itself to duties with respect to preincorporation matters. A contract made in the name of an inchoate corporation can be enforced after the corporation is organized on the principle of ratification. Ratification is defined as the affirmance by a person of a prior act which did not bind him but which was done or professedly done on his account. Ratification requires acceptance of the results of the act with an intent to ratify, and with full knowledge of all the material circumstances.

A corporation may after its organization become liable on preliminary contracts made by its promoters by expressly

adopting such contracts or by receiving the benefits from them. Although SmithStearn Yachts, Inc. was formed after the execution of the agreement, it received the benefit of the services pursuant to the agreement. Gyrographic worked toward developing letterheads, business cards, and other marketing material for SmithStearn Yachts, Inc. SmithStearn Yachts, Inc. made payments to Gyrographic, which SmithStearn Yachts, Inc. then recorded in its books. Thus, SmithStearn Yachts, Inc. received the benefits of the agreement and also fulfilled the obligations under it, thereby ratifying the agreement.

Furthermore, ratification, adoption, or acceptance of a preincorporation contract by a promoter need not be expressed, but may be implied from acts or acquiescence on the part of the corporation or its authorized agents. Thus, a corporation's act of suing on a preincorporation contract is in itself an adoption of the contract. SmithStearn Yachts, Inc. implicitly ratified the agreement when it brought this action. By suing under the agreement, SmithStearn Yachts, Inc. is also assuming the liabilities under it, thereby enforcing and adopting the agreement.

Judgment for SmithStearn Yachts, Inc.

Preincorporation Share Subscriptions

Promoters sometimes use **preincorporation share subscriptions** to ensure that the corporation will have adequate capital when it begins its business. Under the terms of a share subscription, a prospective shareholder offers to buy a specific number of the corporation's shares at a stated price. Under the Model Business Corporation Act (MBCA), a prospective shareholder may not revoke a preincorporation subscription for a six-month period, in the absence of a contrary provision in the subscription. Generally, corporate acceptance of preincorporation subscriptions occurs by action of the board of directors after incorporation.

Promoters have no liability on preincorporation share subscriptions. They have a duty, however, to make a good faith effort to bring the corporation into existence. When a corporation fails to accept a preincorporation subscription or becomes insolvent, the promoter is not liable to the disappointed subscriber, in the absence of fraud or other wrongdoing by the promoter.

Today, most promoters incorporate the business and obtain promises to buy shares from prospective shareholders. These promises, which may take the form of

postincorporation subscriptions, are discussed later in this chapter.

Relation of Promoter and Prospective Corporation

A promoter of a nonexistent corporation is not an agent of the prospective corporation. A promoter is not an agent of prospective investors in the business because they did not appoint him and they have no power to control him.

Although not an agent of the proposed corporation or its investors, a promoter owes a **fiduciary duty** to the corporation and to its prospective investors. A promoter owes such parties a duty of full disclosure and honesty. For example, a promoter breaches this duty when he diverts money received from prospective shareholders to pay his expenses, unless the shareholders agree to such payment. The fiduciary duty also prevents a promoter from diverting a business opportunity from the corporation and giving it to himself instead. In addition, the promoter may not purchase shares of the corporation at a price lower than that paid by the public shareholders.

A promoter may not profit personally by transacting secretly with the corporation in his personal capacity.

The promoter's failure to disclose his interest in the transaction and the material facts permits the corporation to rescind the transaction or to recover the promoter's secret profit. On the other hand, the promoter's full disclosure of his interest and the material facts of the transaction to an independent board of directors that approves the transaction prevents the corporation from recovering the promoter's profit. Note, however, that when a promoter is a director, approval of the transaction by the board of directors may not be sufficient; the transaction may need to be intrinsically fair to the corporation.

Liability of Corporation to Promoter

Valuable as the services of a promoter may be to a prospective corporation and to society, a corporation is generally not required to compensate a promoter for her promotional services, or even her expenses, unless the corporation has agreed expressly to compensate the promoter. The justification for this rule is that the promoter is self-appointed and acts for a corporation that is not in existence.

Nonetheless, a corporation may choose to reimburse the promoter for her reasonable expenses and to pay her the value of her services to the corporation. Corporations often compensate their promoters with shares. The MBCA permits the issuance of shares for a promoter's reincorporation services.

To ensure that she is compensated for her services, a promoter may tie herself to a person or property that the corporation needs to succeed. For example, a promoter may purchase the invention that the corporation was formed to exploit. Another way to ensure compensation is by the promoter's dominating the board of directors during the early months of its life. By doing so, the promoter may direct the corporation to compensate her, but only if the compensation is reasonable and, therefore, fair to the corporation.

Incorporation

Anyone seeking to incorporate a business must decide where to do so. If the business of a proposed corporation is to be primarily *intrastate*, it is usually cheaper to incorporate in the state where the corporation's business is to be conducted. For the business that is primarily *interstate*, however, the business may benefit by incorporating in a state different from the state in which it has its principal place of business. Because few businesses qualify to incorporate under federal law, that option is rarely exercised.

Incorporation fees and taxes, annual fees, and other fees such as those on the transfer of shares or the dissolution

of the corporation vary considerably from state to state. Delaware has been a popular state in which to incorporate because its fees and taxes tend to be low. It also has judges experienced in resolving corporate disputes.

Promoters frequently choose to incorporate in a state whose corporation statute and court decisions grant managers broad management discretion. For example, it is easier to pay a large dividend and to effect a merger in Delaware than in many other states.

Steps in Incorporation There are only a few requirements for incorporation. It is a fairly simple process and can be accomplished inexpensively in most cases. The steps prescribed by the incorporation statutes of the different states vary, but they generally include the following, which appear in the MBCA:

1. Preparation of articles of incorporation.
2. Signing and authenticating the articles by one or more incorporators.
3. Filing the articles with the secretary of state, accompanied by the payment of specified fees.
4. Receipt of a copy of the articles of incorporation stamped "Filed" by the secretary of state, accompanied by a fee receipt. (Some states retain the old MBCA rule requiring receipt of a certificate of incorporation issued by the secretary of state.)
5. Holding an organization meeting for the purpose of adopting bylaws, electing officers, and transacting other business.

Articles of Incorporation The basic governing document of the corporation is the **articles of incorporation** (sometimes called the charter). The articles are similar to a constitution. They state many of the rights and responsibilities of the corporation, its management, and its shareholders. Figure 1 lists the contents of the articles.

The corporation must have a name that is distinguishable from the name of any other corporation incorporated or qualified to do business in the state. The name must include the word *corporation*, *incorporated*, *company*, or *limited*, or the abbreviation *corp.*, *inc.*, *co.*, or *ltd.*

The MBCA does not require the inclusion of a statement of purpose in the articles. When a purpose is stated, it is sufficient to state, alone or together with specific purposes, that the corporation may engage in "any lawful activity."

The MBCA permits a corporation to have perpetual existence. If desired, the articles of incorporation may provide for a shorter duration.

Figure 1 Contents of Articles of Incorporation (pursuant to MBCA)

The following *must* be in the articles:

1. The name of the corporation.
2. The number of shares that the corporation has authority to issue.
3. The address of the initial registered office of the corporation and the name of its registered agent.
4. The name and address of each incorporator.

The following *may* be included in the articles:

1. The names and addresses of the individuals who are to serve as the initial directors.
2. The purpose of the corporation.
3. The duration of the corporation.
4. The par value of shares of the corporation.
5. Additional provisions not inconsistent with law for managing the corporation, regulating the internal affairs of the corporation, and establishing the powers of the corporation and its directors and shareholders.

Most of the state corporation statutes require the articles to recite the initial capitalization of the business. Usually, the statutes require that there be a minimum amount of initial capital, such as \$1,000. Since such a small amount of capital is rarely enough to protect creditors adequately, the MBCA dispenses with the need to recite a minimum amount of capital. Instead, the thin capitalization rule we studied in Chapter 41 protects creditors.

The articles may contain additional provisions not inconsistent with law for managing the corporation, regulating the internal affairs of the corporation, and establishing the powers of the corporation and its directors and shareholders. For example, these additional provisions may contain the procedures for electing directors, the

quorum requirements for shareholders' and directors' meetings, and the dividend rights of shareholders.

The MBCA specifies that one or more persons, including corporations, partnerships, and unincorporated associations, may serve as the **incorporators**. Incorporators have no function beyond lending their names and signatures to the process of bringing the corporation into existence. No special liability attaches to a person merely because she serves as an incorporator.

Filing Articles of Incorporation The articles of incorporation must be delivered to the office of the secretary of state, and a filing fee must be paid. The office of the secretary of state reviews the articles of incorporation that are delivered to it. If the articles contain everything

Ethics in Action

Domestic Tax Havens

In the last 20 years, some American companies have reincorporated all or part of their businesses in states that offer favorable tax treatment. For example, Limited Brands Inc., the owner of the Limited, Bath & Body Works, and Victoria's Secret chains, has incorporated seven subsidiaries in Delaware. The primary function of the subsidiaries is to own the chains' trademarks. The subsidiaries charge the retail chains high fees to use the trademarks. This parent–subsidiary structure allows the business to transfer hundreds of millions of dollars each year from retail outlets in high-tax states like New York into Delaware subsidiaries

that pay no state tax. Delaware is the most used domestic tax haven, but Nevada and Florida also provide favorable tax treatment for corporations.

- Is it ethical and socially responsible for an American corporation to incorporate its business wholly or in part in states that have low tax rates? Would a profit maximizer incorporate where tax rates are lowest? Would a believer in rights theory?
- If you were a state legislator in a state with high income taxes that is losing incorporations to Delaware, what legislation would you introduce? Would your answer depend on whether you were a utilitarian or a believer in justice theory?

that is required, the secretary of state stamps the articles “Filed” and returns a copy of the stamped articles to the corporation along with a receipt for payment of incorporation fees. Some states require a duplicate filing of the articles with an office—usually the county recorder’s office—in the county in which the corporation has its principal place of business.

The existence of the corporation begins when the articles are filed by the secretary of state. Filing of the articles by the secretary of state is conclusive proof of the existence of the corporation.

Because the articles of incorporation embody the basic contract between a corporation and its shareholders, shareholders must approve most changes in the articles. For example, when the articles are amended to increase the number of authorized shares, shareholder approval is required.

The Organization Meeting After the articles of incorporation have been filed by the secretary of state, an organization meeting is held. Usually, it is the first formal meeting of the directors. Frequently, only bylaws are adopted and officers elected. The function of the bylaws is to supplement the articles of incorporation by defining more precisely the powers, rights, and responsibilities of the corporation, its managers, and its shareholders and by stating other rules under which the corporation and its activities will be governed. Its common contents are listed in Figure 2.

The MBCA gives the incorporators or the initial directors the power to adopt the initial bylaws. The board

of directors holds the power to repeal and to amend the bylaws, unless the articles reserve this power to the shareholders. Under the MBCA, the shareholders, as the ultimate owners of the corporation, always retain the power to amend the bylaws, even if the directors also have such power. To be valid, bylaws must be consistent with the law and with the articles of incorporation.

If the organization meeting is the first meeting of the board of directors, the board may adopt a corporate seal for use on corporate documents, approve the form of share certificates, accept share subscriptions, authorize the issuance of shares, adopt preincorporation contracts, authorize reimbursement for promoters’ expenses, and fix the salaries of officers.

Filing Annual Report To retain its status as a corporation in good standing, a corporation must file an annual report with the secretary of state of the state of incorporation and pay an annual franchise fee or tax. The amount of annual franchise tax varies greatly from state to state. While the annual report includes very little information and repeats information already filed in the articles of incorporation, failure to file an annual report or pay the annual fee or tax may result in a dissolution of the corporation and an imposition of monetary penalties.

Close Corporation Elections Close corporations face problems that normally do not affect publicly held corporations. In recognition of these problems, 20 states and the District of Columbia have statutes that attend to the special needs of close corporations. For example, some corporation statutes allow a close corporation to be managed by its shareholders.

To take advantage of these close corporation statutes, most statutes require that a corporation make an *election* to be treated as a close corporation. The Statutory Close Corporation Supplement to the MBCA permits a corporation with *fewer than 50 shareholders* to elect to become a close corporation. The Close Corporation Supplement requires the articles of incorporation to state that the corporation is a statutory close corporation.

There is no penalty for a corporation’s failure to make a close corporation election. The only consequence of a failure to meet the requirements is that the close corporation statutory provisions are inapplicable. Instead, statutory corporation law will treat the corporation as it treats any other general corporation.

Note, however, that even when a corporation fails to meet the statutory requirements for treatment as a close corporation, a court may decide to apply special *common law* rules applicable only to close corporations.

Figure 2 Contents of the Bylaws

1. The authority of the officers and the directors, specifying what they may or may not do.
2. The time and place at which the annual shareholders’ meetings will be held.
3. The procedure for calling special meetings of shareholders.
4. The procedures for shareholders’ and directors’ meetings, including whether more than a majority is required for approval of specified actions.
5. Provisions for special committees of the board, defining their membership and the scope of their activities.
6. The procedures for the maintenance of share records.
7. The machinery for the transfer of shares.
8. The procedures and standards for the declaration and payment of dividends.

The Company Corporation is one of many Internet businesses providing incorporation assistance to new businesses. While incorporation services do not facilitate the drafting of articles and bylaws meeting the special needs of a corporation and its shareholders, at least they reduce the cost and burden of incorporating.

Defective Attempts to Incorporate

When business managers attempt to incorporate a business, sometimes they fail to comply with all the conditions for incorporation. For example, the incorporators may not have filed articles of incorporation or the directors may not have held an organization meeting. These are examples of **defective attempts to incorporate**.

One possible consequence of defective incorporation is to make the managers and the purported shareholders *personally liable* for the obligations of the defectively formed corporation. For example, an employee of an insolvent corporation drives the corporation's truck over a pedestrian. If the pedestrian proves that the corporation was defectively formed, he may be able to recover damages for his injuries from the managers and the shareholders.

A second possible consequence of defective incorporation is that a party to a contract involving the purported corporation may claim nonexistence of the corporation in order to avoid a contract made in the name of the corporation. For example, a person makes an ill-advised contract with a corporation. If the person proves that the corporation was defectively formed, he may escape liability on the contract because he made a contract with a nonexistent person, the defectively formed corporation. As an alternative, the defectively formed corporation may escape liability on the contract on the grounds that its nonexistence makes it impossible for it to have liability.

The courts have tried to determine when these two consequences should arise by making a distinction between de jure corporations, de facto corporations, corporations by estoppel, and corporations so defectively formed that they are treated as being nonexistent.

De Jure Corporation A de jure corporation is formed when the promoters substantially comply with each of the **mandatory conditions precedent** to the incorporation of the business. *Mandatory* provisions are distinguished from *directory* provisions by statutory language

and the purpose of the provision. Mandatory provisions are those that the corporation statute states “shall” or “must” be done or those that are necessary to protect the public interest. Directory provisions are those that “may” be done and that are unnecessary to protect the public interest.

For example, statutes provide that the incorporators shall file the articles of incorporation with the secretary of state. This is a mandatory provision, not only because of the use of the word *shall* but also because of the importance of a filing to protect the public interest by informing the public that a business has shareholders with limited liability. Other mandatory provisions include conducting an organization meeting. Directory provisions include minor matters such as the inclusion of the incorporators' addresses in the articles of incorporation.

If a corporation has complied with each mandatory provision, it is a de jure corporation and is treated as a corporation for all purposes. The validity of a de jure corporation cannot be attacked, except in a few states in which the state, in a *quo warranto* proceeding, may attack the corporation for noncompliance with a condition subsequent to incorporation, such as a failure to file an annual report with the secretary of state.

De Facto Corporation A de facto corporation exists when the incorporators fail in some material respect to comply with all of the mandatory provisions of the incorporation statute yet comply with most mandatory provisions. There are three requirements for a de facto corporation:

1. There is a valid statute under which the corporation could be organized.
2. The promoters or managers make an honest attempt to organize under the statute. This requires substantial compliance with the mandatory provisions taken as a whole.
3. The promoters or managers exercise corporate powers. That is, they act as if they were acting for a corporation.

Generally, failing to file the articles of incorporation with the secretary of state will prevent the creation of a de facto corporation. However, a de facto corporation will exist despite the lack of an organization meeting or the failure to make a duplicate filing of the articles with a county recorder.

A de facto corporation is treated as a corporation against either an attack by a third party or an attempt of the business itself to deny that it is a corporation. The state, however, may attack the claimed corporate status of the business in a *quo warranto* action.

Corporation by Estoppel When people hold themselves out as representing a corporation or believe themselves to be dealing with a corporation, a court will estop those people from denying the existence of a corporation. This is called **corporation by estoppel**. For example, a manager states that a business has been incorporated and induces a third person to contract with the purported corporation. The manager will not be permitted to use a failure to incorporate as a defense to the contract because he has misled others to believe reasonably that a corporation exists.

Under the doctrine of estoppel, each contract must be considered individually to determine whether either party to the contract is estopped from denying the corporation's existence.

Liability for Defective Incorporation If people attempt to organize a corporation but their efforts are so defective that not even a corporation by estoppel is found to exist, the courts have generally held such persons to be partners with unlimited liability for the contracts and torts of the business. However, most courts impose the unlimited *contractual* liability of a partner only on those who are *actively engaged in the management* of the business or who are responsible for the defects in its organization. *Tort* liability, however, is generally imposed on everyone—the managers and the purported shareholders of the defectively formed corporation.

Modern Approaches to the Defective Incorporation Problem As you can see, the law of defective incorporation is confusing. It becomes even more confusing when you consider that many of the defective incorporation cases look like promoter liability cases, and vice versa. A court may have difficulty deciding whether to apply the law of promoter liability or the law of defective incorporation to preincorporation contracts. It is not surprising, therefore, that modern corpo-

ration statutes have attempted to eliminate this confusion by adopting simple rules for determining the existence of a corporation and the liability of its promoters, managers, and shareholders.

The MBCA states that incorporation occurs when the articles are filed by the secretary of state. The **filing** of the articles is **conclusive proof** of the existence of the corporation, except in a proceeding brought by the state. Consequently, the incorporators may omit even a mandatory provision, yet create a corporation, provided that the secretary of state has filed the articles of incorporation. Conversely, courts have held that a failure to obtain a filing of the articles is conclusive proof of the nonexistence of the corporation, on the grounds that the MBCA eliminates the concepts of de facto corporation and corporation by estoppel.

Liability for Defective Incorporation under the MBCA The MBCA imposes joint and several liability on those persons who purport to act on behalf of a corporation and know that there has been no incorporation. Thus, managers and shareholders who both (1) *participate* in the operational decisions of the business and (2) *know* that the corporation does not exist are liable for the purported corporation's contracts and torts.

The MBCA releases from liability shareholders and others who either (1) take no part in the management of the defectively formed corporation *or* (2) mistakenly believe that the corporation is in existence. Consequently, *passive* shareholders have no liability for the obligations of a defectively formed corporation even when they know that the corporation has not been formed. Likewise, managers of a defectively formed corporation have no liability when they believe that the corporation exists.

The following case found two owners of a business liable as partners when they failed to comply with Tennessee's corporation statute.

Christmas Lumber Co., Inc. v. Valiga

99 S.W.3d 585 (Tenn. Ct. App. 2002)

Robert Waddell decided to go into the home construction business. He entered into a contract with Robert Valiga on September 12, 1988. When he entered into the contract with Valiga, Waddell signed the contract on behalf of R. H. Waddell Construction, Inc. At the time the contract was entered into with Valiga, Waddell had no knowledge that the corporation's articles of incorporation had not been filed. Although Waddell had signed the articles of incorporation as the incorporator on August 19, 1988, the articles were not filed by the Secretary of State's office until December 9, 1988, and by the Registrar's Office in Knox County until January 12, 1989.

On September 12, 1988, the same day Waddell entered into the contract with Valiga, John Graves opened an account at Christmas Lumber Company in order to obtain building materials for the Valiga house. Graves opened the account in

Waddell's name, and where the account information stated "type of customer," Graves marked "individual." Graves signed the document on behalf of Waddell.

In a letter from Valiga to Waddell dated November 9, 1988, Valiga made several requests about the construction of the house. In a letter dated the next day, Valiga terminated Waddell's services. Sensing potential litigation, Waddell and Graves on November 11, 1988, entered into a Joint Venture Agreement. The only parties to the Agreement were Waddell and Graves. R. H. Waddell Construction, Inc., was not a party to the agreement. Pursuant to the terms of the Agreement, Waddell and Graves divided funds received from Heritage Federal Credit Union for construction of the Valiga home.

After Waddell patched things up with Valiga, he returned to work on the project from November until February of the next year. On February 11, 1989, Waddell received a letter from Valiga expressing his shock regarding the cost of the construction job. Three days later, Waddell quit as Valiga's contractor.

On January 10, 1990, Christmas Lumber Company filed a lawsuit against Valiga, Waddell, and others seeking to enforce a materialmen's lien for building materials purchased by Waddell to be used on the house being built for Valiga. On December 2, 1992, Valiga filed a separate lawsuit against Waddell and Graves claiming there was no corporation chartered by the State of Tennessee named R. H. Waddell Construction, Inc., when the contract was entered into on September 12, 1988.

After the two lawsuits were consolidated, the trial court found that Waddell and Graves were liable as partners on the construction contract signed in the name of R. H. Waddell Construction, Inc., and awarded Valiga damages of \$80,045.79. Waddell and Graves appealed to the Tennessee Court of Appeals. The court considered Waddell's argument that he did not know that the corporation was not formed at the time the construction contract was signed.

Swiney, Judge

Waddell relies on Tenn. Code Ann. § 48-12-104, which provides as follows:

48-12-104. Liability for preincorporation transactions.

All persons purporting to act as or on behalf of a corporation, knowing there was no incorporation under chapters 11–27 of this title, are jointly and severally liable for all liabilities created while so acting except for any liability to any person who knew or reasonably should have known that there was no incorporation.

Waddell argues he signed the necessary paperwork to have his business incorporated and was unaware of the delay in filing the charter with the Secretary of State's office. He claims, therefore, he did not "know" there was no incorporation.

Pursuant to Tenn. Code Ann. § 48-12-103, absent a delayed effective date, the "corporate existence begins when the charter is filed by the secretary of state."

Waddell apparently signed the charter on August 19, 1988. On September 12, 1988, the contract was signed between Valiga and R. H. Waddell Construction, Inc. Two months later,

on November 11, 1988, Waddell and Graves entered into the Joint Venture Agreement. On December 9, 1988, the charter was filed with the Secretary of State's office. Waddell's claim he did not "know" the corporate charter had not been filed with the Secretary of State is belied by the fact he and Graves essentially memorialized their relationship in writing with the Joint Venture Agreement which was signed after Waddell claims he "thought" there was a corporation and before the corporation actually was formed. Waddell's assertion is made further suspect by his deposition testimony that he and Graves were "partners."

Based on the roles occupied by Waddell and Graves during the construction of Valiga's house, coupled with: (1) the terms of Joint Venture Agreement; (2) Waddell's deposition testimony he and Graves were "partners;" (3) Graves' testimony that he spent a significant amount of time at the work site; and (4) Waddell and Graves dividing the contractor's fee, we conclude the evidence does not preponderate against the Trial Court's findings leading to its conclusion that Waddell and Graves were partners.

Judgment for Valiga affirmed.

Incorporation of Nonprofit Corporations

Nonprofit corporations are incorporated in substantially the same manner as for-profit corporations. One or more persons serve as incorporators and deliver articles of

incorporation to the secretary of state for filing. A nonprofit corporation's articles must include the name and address of the corporation and state its registered agent. Unlike a for-profit corporation, a nonprofit corporation must state that it is either a public benefit corporation, a mutual benefit corporation, or a religious corporation. A

public benefit corporation is incorporated primarily for the benefit of the public—for example, a community arts council that promotes the arts. A mutual benefit corporation is designed to benefit its members—for example, a golf country club. An example of a religious corporation is a church.

A nonprofit corporation's articles must also state whether it will have members. While it is typical for nonprofit corporations to have members, the Model Nonprofit Corporation Act (MNCA) does not require a nonprofit corporation to have members. An example of a nonprofit corporation having no members is a public benefit corporation established to promote business development in a city, whose directors are appointed by the city's mayor.

A nonprofit corporation's articles may include the purpose of the corporation, its initial directors, and any matter regarding the rights and duties of the corporation and its directors and members. Each incorporator and director named in the articles must sign the articles.

A nonprofit corporation's existence begins when the secretary of state files the articles. After incorporation, the initial directors or incorporators hold an organization meeting to adopt bylaws and conduct other business.

Liability for Preincorporation Transactions

Nonprofit corporation status normally protects the members and managers from personal liability. However, when a nonprofit corporation is not formed or is defectively formed, promoters and others who transact for the nonexistent nonprofit corporation have the same liability as promoters and others who transact for a nonexistent for-profit corporation. The MNCA states the same rule as the MBCA: Persons who act on behalf of a corporation knowing there is no corporation are jointly and severally liable for all liabilities created while so acting.

Similarly, promoters have no authority to make contracts for a nonexistent nonprofit corporation. The corporation becomes liable on preincorporation contracts when its board of directors adopts the contracts.

Financing For-Profit Corporations

Any business needs money to operate and to grow. One advantage of incorporation is the large number of sources of funds that are available to businesses that incorporate. One such source is the sale of corporate **securities**, including shares, debentures, bonds, and long-term notes payable.

In addition to obtaining funds from the sale of securities, a corporation may be financed by other sources. A bank may lend money to the corporation in exchange for the corporation's short-term promissory notes, called commercial paper. Earnings provide a source of funds once the corporation is operating profitably. In addition, the corporation may use normal short-term financing, such as accounts receivable financing and inventory financing, that is, borrowing from banks or other financial institutions and using the corporation's receivables or inventory as collateral.

In this section, you will study only one source of corporate funds—a corporation's sale of securities. A corporate security may be either (1) a share in the corporation or (2) an obligation of the corporation. These two kinds of securities are called equity securities and debt securities.

Equity Securities Every business corporation issues equity securities, which are commonly called stock or **shares**. The issuance of shares creates an ownership relationship: the holders of the shares—called stockholders or **shareholders**—are the owners of the corporation.

Modern statutes permit corporations to issue several classes of shares and to determine the rights of the various classes. Subject to minimum guarantees contained in the state business corporation law, the shareholders' rights are a matter of contract and appear in the articles of incorporation, in the bylaws, in a shareholder agreement, and on the share certificates.

Common Shares Common shares (or common stock) are a type of equity security. Ordinarily, the owners of common shares—called **common shareholders**—have the exclusive right to elect the directors, who manage the corporation.

The common shareholders often occupy a position inferior to that of other investors, notably creditors and preferred shareholders. The claims of common shareholders are subordinate to the claims of creditors and other classes of shareholders when liabilities and dividends are paid and when assets are distributed upon liquidation.

In return for this subordination, however, the common shareholders have an exclusive claim to the corporate earnings and assets that exceed the claims of creditors and other shareholders. Therefore, the common shareholders bear the major risks of the corporate venture, yet stand to profit the most if it is successful.

Preferred Shares Shares that have preferences with regard to assets or dividends over other classes of shares are

called preferred shares (or preferred stock). **Preferred shareholders** are customarily given liquidation and dividend preferences over common shareholders. A corporation may have several classes of preferred shares. In such a situation, one class of preferred shares may be given preferences over another class of preferred shares. Under the MBCA, the preferences of preferred shareholders must be set out in the articles of incorporation.

The **liquidation preference** of preferred shares is usually a stated dollar amount. During a liquidation, this amount must be paid to each preferred shareholder before any common shareholder or other shareholder subordinated to the preferred class may receive his share of the corporation's assets.

Dividend preferences may vary greatly. For example, the dividends may be cumulative or noncumulative. Dividends on **cumulative** preferred shares, if not paid in any year, accumulate until paid. The entire accumulation must be paid before any dividends may be paid to common shareholders. Dividends on **noncumulative** preferred shares do not accumulate if unpaid. For such shares, only the current year's dividends must be paid to preferred shareholders prior to the payment of dividends to common shareholders.

Participating preferred shares have priority up to a stated amount or percentage of the dividends to be paid by the corporation. Then, the preferred shareholders participate with the common shareholders in additional dividends paid.

Some close corporations attempt to create preferred shares with a **mandatory dividend** right. These mandatory dividend provisions have generally been held illegal as unduly restricting the powers of the board of directors. Today, a few courts and some special close corporation statutes permit mandatory dividends for shareholders of close corporations.

A **redemption** or **call** provision in the articles allows a corporation at its option to repurchase preferred shareholders' shares at a price stated in the articles, despite the shareholders' unwillingness to sell. Some statutes permit the articles to give the shareholders the right to force the corporation to redeem preferred shares.

Preferred shares may be **convertible** into another class of shares, usually common shares. A **conversion** right allows a preferred shareholder to exchange her preferred shares for another class of shares, usually common shares. The conversion rate or price is stated in the articles.

Preferred shares have **voting rights** unless the articles provide otherwise. Usually, most voting rights are taken from preferred shares, except for important matters

such as voting for a merger or a change in preferred shareholders' dividend rights. Rarely are preferred shareholders given the right to vote for directors, except in the event of a corporation's default in the payment of dividends.

Authorized, Issued, and Outstanding Shares

Authorized shares are shares that a corporation is permitted to issue by its articles of incorporation. A corporation may not issue more shares than are authorized. **Issued** shares are shares that have been sold to shareholders. **Outstanding** shares are shares that are currently held by shareholders. The distinctions between these terms are important. For example, a corporation pays cash, property, and share dividends only on outstanding shares. Only outstanding shares may be voted at a shareholders' meeting.

Canceled Shares Sometimes, a corporation will purchase its own shares. A corporation may cancel repurchased shares. Canceled shares do not exist: They are neither authorized, issued, nor outstanding. Since canceled shares do not exist, they cannot be reissued.

Shares Restored to Unissued Status Repurchased shares may be restored to unissued status instead of being canceled. If this is done, the shares are merely authorized and they may be reissued at a later time.

Treasury Shares If repurchased shares are neither canceled nor restored to unissued status, they are called **treasury shares**. Such shares are authorized and issued, but not outstanding. They may be sold by the corporation at a later time. The corporation may not vote them at shareholders' meetings, and it may not pay a cash or property dividend on them.

The MBCA abolishes the concept of treasury shares. It provides that repurchased shares are restored to unissued status and may be reissued, unless the articles of incorporation require cancellation.

Options, Warrants, and Rights

Equity securities include options to purchase common shares and preferred shares. The MBCA expressly permits the board of directors to issue **options** for the purchase of the corporation's shares. Options permit their holders to purchase a specific number of shares at a specified price during a specified time period, usually beginning months or years after the option is issued. Share options are often issued to top level managers as an incentive to increase the profitability of the corporation. An increase

in profitability should increase the market value of the corporation's shares, resulting in increased compensation to the employees who own and exercise share options.

Warrants are options evidenced by certificates. They are sometimes part of a package of securities sold as a unit. For example, they may be sold along with notes, bonds, or even shares. Underwriters may receive warrants as part of their compensation for aiding a corporation in selling its shares to the public.

Rights are short-term certificated options that are usually transferable. Rights are used to give present security holders an option to subscribe to a proportional quantity of the same or a different security of the corporation. They are most often issued in connection with a **preemptive right** requirement, which obligates a corporation to offer each existing shareholder the opportunity to buy the corporation's newly issued shares in the same proportion as the shareholder's current ownership of the corporation's shares.

Debt Securities Corporations have inherent power to borrow money necessary for their operations by issuing debt securities. Debt securities create a debtor–creditor relationship between the corporation and the security holder. With the typical debt security, the corporation is obligated to pay interest periodically and to pay the amount of the debt (the principal) on the maturity date. Debt securities include debentures, bonds, and promissory notes.

Debentures are long-term, unsecured debt securities. Typically, a debenture has a term of 10 to 30 years. Debentures usually have indentures. An **indenture** is a contract that states the rights of the debenture holders. For example, an indenture defines what acts constitute default by the corporation and what rights the debenture holders have upon default. It may place restrictions on the corporation's right to issue other debt securities.

Bonds are long-term, secured debt securities that usually have indentures. They are identical to debentures except that bonds are secured by collateral. The collateral for bonds may be real property such as a building, or personal property such as a commercial airplane. If the debt is not paid, the bondholders may force the sale of the collateral and take the proceeds of the sale.

Generally, **notes** have a shorter duration than debentures or bonds. They seldom have terms exceeding five years. Notes may be secured or unsecured.

It is not uncommon for notes or debentures to be **convertible** into other securities, usually preferred or common shares. The right to convert belongs to the holder of the convertible note or debenture. This conversion right

permits an investor to receive interest as a debt holder and, after conversion, to share in the increased value of the corporation as a shareholder.

Consideration for Shares

The board of directors has the power to issue shares on behalf of the corporation. The board must decide at what *price* and for what *type of consideration* it will issue the shares. Corporation statutes restrict the discretion of the board in accepting specified kinds of consideration and in determining the value of the shares it issues.

Quality of Consideration for Shares

Not all kinds of consideration in contract law are acceptable as legal consideration for shares in corporation law. To protect creditors and other shareholders, the statutes require legal consideration to have *real value*. Modern statutes, however, place few limits on the type of consideration that may be received for shares. The MBCA permits shares to be issued in return for any tangible or intangible *property* or *benefit to the corporation*, including cash, promissory notes, services performed for the corporation, contracts for services *to be performed* for the corporation, and securities of the corporation or another corporation. The rationale for the MBCA rule is a recognition that future services and promises of future services have value that is as real as that of tangible property. Consequently, for example, a corporation may issue common shares to its president in exchange for the president's commitment to work for the corporation for three years or in exchange for bonds of the corporation or debentures issued by another corporation. In addition, the MBCA permits corporations to issue shares to their promoters in consideration for their promoters' preincorporation services. This rule acknowledges that a corporation benefits from a promoter's preincorporation services.

Several states' constitutions place stricter limits on permissible consideration for shares. They provide that shares may be issued only for money paid to the corporation, labor done for the corporation, or property actually received by the corporation. Such a rule prohibits a corporation from issuing its shares for a promise to pay money or a promise to provide services to the corporation in the future.

Quantity of Consideration for Shares

The board is required to issue shares for an adequate dollar amount of consideration. Whether shares have been issued for an adequate amount of consideration depends in part on the *par value* of the shares. The more

important concern, however, is whether the shares have been issued for *fair value*.

Par Value Par value is an arbitrary dollar amount that may be assigned to the shares by the articles of incorporation. Par value does not reflect the fair market value of the shares, but par value is the minimum amount of consideration for which the shares may be issued.

Shares issued for less than par value are called **discount shares**. The board of directors is liable to the corporation for issuing shares for less than par value. A shareholder who purchases shares from the corporation for less than par value is liable to the corporation for the difference between the par value and the amount she paid.

Fair Value It is not always enough, however, for the board to issue shares for their par value. Many times, shares are worth more than their par value. In addition, many shares today do not have a par value. In fact, the MBCA purports to eliminate the concept of par value as it affects the issuance of shares. In all cases, the board must exercise care to ensure that the corporation receives the *fair value* of the shares it issues. If there are no par value problems, the board's judgment as to the amount of consideration that is received for the shares is *conclusive* when the board acts in good faith, exercises the care of ordinarily prudent directors, and acts in the best interests of the corporation.

Disputes may arise concerning the value of property that the corporation receives for its shares. The board's

valuation of the consideration is conclusive if it acts in good faith with the care of prudent directors and in a manner it reasonably believes to be in the best interests of the corporation. When the board impermissibly overvalues the consideration for shares, the shareholder receives **watered shares**. Both the board and the shareholder are liable to the corporation when there is a watered shares problem.

When a shareholder pays less than the amount of consideration determined by the board of directors, the corporation or its creditors may sue the shareholder to recover the deficit. When a shareholder has paid the proper amount of consideration, the shares are said to be *fully paid and nonassessable*.

Accounting for Consideration Received The consideration received by a corporation for its equity securities appears in the equity or capital accounts in the shareholders' equity section of the corporation's balance sheet. The **stated capital** account records the product of the number of shares outstanding multiplied by the par value of each share. When the shares are sold for more than par value, the excess or surplus consideration received by the corporation is **capital surplus**.

Under the MBCA, the terms *stated capital* and *capital surplus* have been eliminated. All consideration received for shares is lumped under one accounting entry for that class of shares, such as common equity.

Resales of Shares The par value of shares is important *only when the shares are issued* by the corporation. Since

The Global Business Environment

Corporation Law Worldwide: Proper Consideration for Shares

There is substantial similarity in corporation laws from country to country. Even in many countries where corporation law is different from American law, there are legislative attempts to modernize the law by making it more nearly consistent with U.S. law. One example is Israel, whose Knesset has adopted a corporation law in line with Western law, especially American law.

Examining the requirements to incorporate and the limits on consideration for shares, there are some differences globally, but generally not much more than one sees from state to state in the United States. For example, although the MBCA permits corporate shares to be issued for any benefit to the corporation, the laws of many countries retain the historic

American rule (which is still law in many states) that certain types of benefits are improper consideration. For example, the corporate law of the Dominion of Melchizedek (which comprises a slice of Antarctica and five Pacific islands) states that consideration for the issuance of shares shall consist of money or other property, tangible or intangible, or labor or services actually received by or performed for the corporation or for its benefit or in its formation or reorganization. Its law prohibits the issuance of shares for future payments or future services.

Chinese law is bit more restrictive, allowing shareholders to make their investments only in cash, in kind, in industrial property rights, in nonpatented technology, or land use rights. The Kingdom of Bhutan is more limiting, however, forbidding share issuances for consideration other than cash, unless shareholders approve.

treasury shares are issued but not outstanding, the corporation does not issue treasury shares when it resells them. Therefore, the board may sell treasury shares for less than par, provided that it sells the shares for an amount equal to their fair value.

Because par value and fair value are designed to ensure only that the corporation receives adequate consideration for its shares, a shareholder may buy shares from another shareholder for less than par value or fair value and incur no liability. However, if the purchasing shareholder *knows* that the selling shareholder bought the shares from the corporation for less than par value, the purchasing shareholder is liable to the corporation for the difference between the par value and the amount paid by the selling shareholder.

Share Subscriptions

Under the terms of a **share subscription**, a prospective shareholder promises to buy a specific number of shares of a corporation at a stated price. If the subscription is accepted by the corporation and the subscriber has paid for the shares, the subscriber is a shareholder of the corporation, even if the shares have not been issued. Under the MBCA, subscriptions need not be in writing to be enforceable. Usually, however, subscriptions are written.

Promoters use written share subscriptions in the course of selling shares of a proposed corporation to ensure that equity capital will be provided once the corporation comes into existence. These are called **preincorporation subscriptions**, which were covered in this chapter's discussion of promoters. Preincorporation subscriptions are not contracts binding on the corporation and the shareholders until the corporation comes into existence and its board of directors accepts the share subscriptions.

Close corporations may use share subscriptions when they seek to sell additional shares after incorporation. These are examples of **postincorporation subscriptions**, subscription agreements made *after* incorporation. A postincorporation subscription is a contract between the corporation and the subscriber at the time the subscription agreement is made.

A subscription may provide for payment of the price of the shares on a specified day, in installments, or upon the demand of the board of directors. The board may not discriminate when it demands payment: It must demand payment from all the subscribers of a class of shares or from none of them.

A share certificate may not be issued to a share subscriber until the price of the shares has been fully paid. If the subscriber fails to pay as agreed, the corporation may sue the subscriber for the amount owed.

Issuance of Shares

Uniform Commercial Code (UCC) Article 8 regulates the issuance of securities. Under Article 8, a corporation has a duty to issue only the number of shares authorized by its articles. Overissued shares are void.

When a person is entitled to overissued shares, the corporation may not issue the shares. However, the person has two remedies. The corporation must obtain identical shares and deliver or register them to the person entitled to issuance or the corporation must reimburse the person for the value paid for the shares plus interest.

The directors may incur liability, including criminal liability, for an overissuance of shares. To prevent overissuance through error in the issuance or transfer of their shares, corporations often employ a bank or a trust company as a registrar.

A share certificate is evidence that a person has been issued shares, owns the shares, and is a shareholder. The certificate states the corporation's name, the shareholder's name, and the number and class of shares. A person can be a shareholder without receiving a share certificate, such as a holder of a share subscription.

Under the MBCA, a corporation is not required to issue share certificates. If a corporation does not issue share certificates, it must register the security in the name of its owner or his agent, usually a stockbroker. Today, most shareholders of public companies never receive certificates, especially those who have brokerage accounts at online brokers like E*TRADE.

Transfer of Shares

Because share certificates are evidence of the ownership of shares, their transfer is evidence of the transfer of the ownership of shares. The MBCA and UCC Article 8 cover the registration and transfer of shares, both certificated and uncertificated.

Shares are issued in *registered* form; that is, they are registered with the corporation in the name of a specific person. The indorsement of a share certificate on its back by its registered owner and the delivery of the certificate to another person transfers ownership of the shares to the other person. The transfer of a share certificate without naming a transferee creates a *street certificate*. The transfer

of a street certificate may be made by delivery without indorsement. Any holder of a street certificate is presumed to be the owner of the shares it represents. Therefore, a transferee should ask the corporation to reregister the shares in his name.

Ownership of uncertificated securities is transferred by a corporation's registering the security in the new owner's name.

Under the UCC, a corporation owes a duty to register the transfer of any registered shares presented to it for registration, provided that the shares have been properly indorsed, or in the case of uncertificated shares, the corporation has received an **instruction** notifying it of the transfer of ownership. If the corporation refuses to make the transfer, it is liable to the transferee for either conversion or specific performance.

When an owner of shares claims that his registration or certificate has been lost, destroyed, or stolen, the corporation must register new shares to the owner if the corporation has not received notice that the shares have been acquired by a bona fide purchaser, the owner files with the corporation a sufficient indemnity bond, and the owner meets any other reasonable requirements of the corporation. A **bona fide purchaser** is a purchaser of the shares for value in good faith with no notice of any adverse claim against the shares.

If, after the issuance of the new certificated shares or registration of new uncertificated shares, a bona fide purchaser of the original shares presents them for registration, the corporation must register the transfer, unless overissuance would result. In addition, the corporation may recover the new certificated shares from the original owner or revoke the new registration.

Restrictions on Transferability of Shares Historically, a shareholder has been free to sell her shares to whomever she wants whenever she wants. Such free transferability is important to shareholders in a publicly held corporation. Because shares in a publicly held corporation are freely transferable, shareholders know that they can easily liquidate their investment by selling their shares, often on a stock exchange.

In close corporations, however, free transferability as a legal matter is a threat to the balance of power among shareholders. For example, if one of three shareholders owning a third of a corporation sells his shares to one of the other shareholders, the buying shareholder will own two-thirds of the corporation and may be able to dominate the third shareholder. In addition, as a

practical matter, free transferability of close corporation shares is illusory, as few people other than existing shareholders are willing to purchase shares in a close corporation.

Consequently, many close corporations restrict the transfer of shares to ensure those in control of a corporation will continue in control. Share transfer restrictions can also be used to guarantee a market for the shares when a shareholder dies or retires from the corporation.

The courts have been reluctant to allow restrictions on the free transferability of shares, even if the shareholder agreed to a restriction on the transfer of her shares. Gradually, the courts and the legislatures have recognized that there are good reasons to permit the use of some restrictions on the transfer of shares. Today, modern corporation statutes allow most transfer restrictions, especially for close corporations.

Types of Restrictions on Transfer There are four categories of transfer restrictions: (1) rights of first refusal and option agreements, (2) buy-and-sell agreements, (3) consent restraints, and (4) provisions disqualifying purchasers.

A **right of first refusal** grants to the corporation or the other shareholders the right to match the offer that a selling shareholder receives for her shares. An **option agreement** grants the corporation or the other shareholders an option to buy the selling shareholder's shares at a price determined by the agreement. An option agreement will usually state a formula used to calculate the price of the shares.

A **buy-and-sell agreement** compels a shareholder to sell his shares to the corporation or to the other shareholders at the price stated in the agreement. It also obligates the corporation or the other shareholders to buy the selling shareholder's shares at that price. The price of the shares is usually determined by a stated formula.

A **consent restraint** requires a selling shareholder to obtain the consent of the corporation or the other shareholders before she may sell her shares. A **provision disqualifying purchasers** may be used in rare situations to exclude unwanted persons from the corporation. For example, a transfer restriction may prohibit the shareholders from selling to a competitor of the business.

Uses of Transfer Restrictions A corporation and its shareholders may use transfer restrictions to maintain the balance of shareholder power in the corporation. For example, four persons may own 25 shares each in a corporation. No single person can control such a corporation. If

one of the four can buy 26 additional shares from the other shareholders, he will acquire control. The shareholders may therefore agree that each shareholder is entitled or required to buy an equal amount of any shares sold by any selling shareholder. The right of first refusal, option agreement, or buy-and-sell agreement may serve this purpose.

A buy-and-sell agreement is the preferred transfer restriction for nearly every context in well-planned close corporations, because certainty is obtained by both sides being obligated, one required to buy and the other to sell. For example, a buy-and-sell agreement may be used to guarantee a shareholder a market for his shares. In a close corporation, there may be no ready market for the shares of the corporation. To ensure that a shareholder can obtain the value of her investment when she leaves the corporation, the shareholders or the corporation may be required to buy a shareholder's shares upon the occurrence of a specific event, such as death, disability, or retirement.

A buy-and-sell agreement may also be used to determine who should be required to sell and who should be required to buy shares when there is a severe disagreement between shareholders that threatens the profitability of the corporation. It could also be worded to require majority shareholders to buy the shares of minority shareholders when a lucrative merger offer for the corporation is rejected by the majority but favored by the minority. The agreement could, but rarely does, set the buyout price as the price offered in the merger.

If minority shareholders are afraid of being frozen in a close corporation that will never go public and give shareholders a chance to sell their shares on the market and get a return on investment, a buy-and-sell agreement could require the corporation to repurchase the minority's shares if the corporation has not gone public after a specified number of years.

In a close corporation, the shareholders may want only themselves or other approved persons as shareholders. A buy-and-sell agreement or right of first refusal may be used to prevent unwanted persons from becoming shareholders.

A provision disqualifying purchasers may be used in limited situations only, such as when the purchaser is a competitor of the business or has a criminal background.

A consent restraint is used to preserve a close corporation or Subchapter S taxation election. Close corporation statutes and Subchapter S of the Internal Revenue Code limit the number of shareholders that a close corporation or S corporation may have. A transfer restriction may

prohibit the shareholders from selling shares if, as a result of the sale, there would be too many shareholders to preserve a close corporation or S corporation election. A consent restraint is also used to preserve an exemption from registration of a securities offering. Under the Securities Act of 1933 and the state securities acts, an offering of securities is exempt from registration if the offering is to a limited number of qualified investors, usually 35 financially sophisticated investors. A transfer restriction may require a selling shareholder to obtain permission from the corporation's legal counsel, which permission will be granted upon proof that the shareholder's sale of the shares does not cause the corporation to lose its registration exemption.

Legality of Transfer Restrictions Corporation statutes permit the use of option agreements, rights of first refusal, and buy-and-sell agreements with virtually no restrictions. The MBCA authorizes transfer restrictions for any reasonable purpose. The reasonableness of a restraint is judged in light of the character and needs of the corporation.

Consent restraints and provisions disqualifying purchasers may be used if they are not *manifestly unreasonable*. The MBCA makes per se reasonable any consent restraint that maintains a corporation's status when that status is dependent on the number or identity of shareholders, as with close corporation or S corporation status. The MBCA also makes per se reasonable any restriction that preserves registration exemptions under the Securities Act of 1933 and state securities laws.

Enforceability To be enforceable against a shareholder, a transfer restriction must be contained in the articles of incorporation, the bylaws, an agreement among the shareholders, or an agreement between the corporation and the shareholders. In addition, the shareholder must either agree to the restriction or purchase the shares with notice of the restriction. Under the MBCA, a purchaser of the shares has notice of a restriction if it is noted conspicuously on the face or the back of a share certificate or a written statement provided to shareholders if no certificates were issued. A purchaser also has notice if he knows of the restriction when he buys the shares or otherwise has been notified.

In the next case, *Coyle v. Schwartz*, the court enforced a buy-sell agreement in which the shareholders were to agree from time to time on the price to be paid for the shares. It is a good example of a poorly drafted buy-sell agreement that failed to attain the objectives of all the shareholders.

Coyle v. Schwartz

2004 Ky. App. LEXIS 75 (Ky. Ct. App. 2004)

American Scale Corporation, a closely held Kentucky corporation with its principal place of business in Louisville, Kentucky, was incorporated in February 1985 to engage in the sale and repair of industrial and commercial scales. Daniel Coyle was president and Steven Schwartz was vice president. They were the sole shareholders. At the time of incorporation, Coyle and Schwartz each received 200 shares of stock in exchange for their capital contributions of \$10,000.

In early March 1986 Schwartz had an automobile accident in which his passenger was seriously injured. Schwartz's passenger filed suit against American Scale, since it had provided insurance coverage on Schwartz's vehicle. Coyle became concerned that Schwartz's activities would expose American Scale to further liability. He was particularly displeased with Schwartz's actions in transporting an underage female, who was purportedly Schwartz's girlfriend, in a vehicle insured by American Scale.

As a result, Coyle informed Schwartz that he no longer desired to be in a 50–50 shareholder with him. Coyle told Schwartz that unless Schwartz agreed to transfer 1 percent of his shares to Coyle, thereby permitting Coyle to assume majority control of American Scale, Coyle would either seek dissolution of American Scale, or withdraw and begin operating a business in competition with American Scale. On March 21, 1986, Coyle and Schwartz executed a share-transfer agreement wherein Schwartz transferred 1 percent of his American Scale shares to Coyle. The agreement specifically stated that Coyle would thereafter own a 51 percent interest in American Scale, leaving Schwartz as owner of the remaining 49 percent of American Scale's shares.

About two years later, on August 25, 1988, Coyle and Schwartz made a buy-sell agreement that they titled, "Stockholders' Cross-Purchase Agreement." The agreement provided for the repurchase of a shareholder's stock in the event of death, disability, or voluntary withdrawal of that shareholder. Specifically, the agreement stated that if Coyle or Schwartz died, or otherwise attempted to dispose of his shares, the other shareholder would have the right to purchase those shares. In addition, the agreement gave the majority shareholder an option to purchase all of the minority shareholder's stock at any time upon a 60-day written notice.

The agreement provided a stock-valuation method for determining a per share price in the event either of the provisions was triggered:

Unless altered as herein provided, for the purpose of determining the purchase price to be paid for the stock of a Stockholder, the fair market value of each share of stock shall be, as of August 25, 1988, \$250.

The Stockholders shall redetermine the value of the stock within 60 days following the end of each fiscal year. If the Stockholders fail to make the required annual redetermination of value for a particular year, the last previously recorded value shall control.

Over the course of the next 12 years, neither Coyle nor Schwartz attempted to reevaluate the price of American Scale's shares as provided in the agreement. Hence, the initial buyout price of \$250 per share was never changed.

In a letter dated November 20, 2000, Coyle informed Schwartz that he was exercising his option as majority shareholder to purchase Schwartz's stock for \$250 per share. Schwartz refused to tender his shares to Coyle and filed suit against Coyle seeking to invalidate the buyout agreement. Schwartz argued that the shareholders had abandoned the agreement by not changing the buyout price for 12 years. Schwartz also argued that the buyout price was so low as to constitute a penalty. In response to Coyle's motion for summary judgment, the trial court ruled that the shareholders had not abandoned the agreement. However, the court agreed with Schwartz that forcing him to sell all of his stock at the price of \$250 per share was a penalty and, therefore, unenforceable. The trial court ordered a current valuation of the stock be undertaken before Schwartz could be compelled to transfer his shares. Coyle appealed to the Kentucky Court of Appeals.

Johnson, Judge

In his appeal, Coyle argues that the trial court erred by finding that the stock-valuation provision was unenforceable as a penalty.

While Coyle and Schwartz never reevaluated the stock, this fact alone does not render the provision unenforceable. Schwartz, as owner of 49% of American Scale's outstanding shares, had the right under the corporation's bylaws to call for a special meeting to reevaluate the listed price of American

Scale's shares. Schwartz has admitted in his deposition testimony that he never made such a request. Hence, by sitting on his rights for over 12 years, Schwartz took the risk that Coyle would exercise the majority-purchase option at a time when the actual value of American Scale's shares was in excess of the \$250 price originally listed in the stock-valuation provision. Schwartz is not entitled to have the courts rewrite the parties' agreement simply because he believes he is receiving the short

end of the bargain. Accordingly, we reverse the trial court's finding that the stock-valuation provision listing a price of \$250 per share was unenforceable.

The terms of the stock-valuation provision listed an original price of \$250 per share. The provision further stated that the fair market value shall be \$250 "unless altered as herein provided" via the "mutual agreement" revaluation method. Since the parties failed to reevaluate the price of American Scale's shares, \$250 is the "last recorded value" with respect to the price of the corporation's shares. Therefore, the majority-purchase option and the stock-valuation provision entitle Coyle to purchase all of Schwartz's stock at a price of \$250 per share.

Finally, we address Schwartz's claim in his cross-appeal that the trial court erred by finding that Schwartz and Coyle did not abandon the stock-valuation provision of the cross-purchase agreement. Specifically, Schwartz argues that by completely ignoring the cross-purchase agreement's requirement that both shareholders "shall re-determine the value of the stock within 60 days following the end of each fiscal year" and record the same, as well as their intention to revalue their shares in American Scale, Schwartz and Coyle unequivocally acted in a manner inconsistent with the existence of the cross-purchase agreement.

We disagree and hold that the trial court did not err by finding that Coyle and Schwartz did not abandon their rights under the stock-valuation provision. A contract may be rescinded or discharged by acts or conduct of the parties inconsistent with the continued existence of the contract, and mutual assent to abandon a contract may be inferred from the attendant circumstances and conduct of the parties. While as a general rule a contract will be treated as abandoned or rescinded where the acts and conduct of one party inconsistent with its existence are acquiesced in by the other party, to be sufficient the acts and conduct must be positive and unequivocal.

In the instant case, while Coyle and Schwartz never revaluated American Scale's stock in the years following the execution of the cross-purchase agreement, this fact, standing alone, does not constitute "positive and unequivocal" acts which could lead to a finding of abandonment. The stock-valuation provision itself provided a default price for the stock in the event the parties failed to reevaluate the shares. Therefore, Coyle and Schwartz contemplated that they might not always conduct a revaluation. Accordingly, the failure of Coyle and Schwartz to conduct an annual revaluation of American Scale's shares did not constitute an abandonment of the stock-valuation provision.

Judgment reversed in favor of Coyle.

Statutory Solution to Close Corporation Share Transfer Problems Although transfer restrictions are important to close corporations, many close corporation shareholders fail to address the share transferability problem. Therefore, a few states provide statutory resolution of the close corporation transferability problem. In these states, statutes offer solutions to the transferability problem that are similar to the solutions that the shareholders would have provided had they thought about the problem. Not all transferability problems are settled by the Close Corporation Supplement, however. For example, there is no statutory buy-and-sell provision.

Financing Nonprofit Corporations

Nonprofit corporations are financed differently from for-profit corporations. This is especially true of a public benefit corporation such as a public television station, which obtains annual financing from government sources, private foundations, members, and public contributors. A religious corporation such as a church receives weekly offerings from its congregation and may occasionally conduct capital drives to obtain additional funding from its members. A mutual benefit corporation, such as a fraternal or social organization like an Elks Club or golf country club, obtains initial funding from its original members to build facilities and assesses its members annually and monthly to pay operating expenses. In addition, nonprofit corporations have the power to obtain debt financing, such as borrowing from a bank or issuing notes and debentures.

A nonprofit corporation may admit members whether or not they pay consideration for their memberships. There is no statutory limit on the number of members a

Check out a model share transfer restriction at the Web site for this textbook. Note that the buy-sell agreement has four essential components: the events triggering a buyout, the persons obligated to buy and shareholders required to sell, the buyout price, and the timing of the payments to the selling shareholder.

nonprofit corporation may admit, although the articles may place a limit on the number of members. Social clubs typically limit the number of members. Members must be admitted in compliance with procedures stated in the articles or the bylaws.

Generally, memberships in a nonpublic corporation are not freely transferable. No member of a public benefit

corporation or religious corporation may transfer her membership or any rights she possesses as a member. A member of a mutual benefit corporation may transfer her membership and rights only if the articles or bylaws permit. When transfer rights are permitted, restrictions on transfer are valid only if approved by the members, including the affected member.

Problems and Problem Cases

1. You and three of your friends have entered negotiations with Toyota Motor Sales USA to acquire a Lexus automobile dealership. You plan to operate the dealership as a corporation, to be named Community Lexus, Inc. You and your three friends have not yet formed the corporation. You will be the president and CEO of the corporation. Among the many agreements that will be signed are a contract to purchase automobiles from Toyota, joint advertising agreements with Toyota, and loan contracts with Genesee National Bank. What should you do before you sign any of these contracts on behalf of Community Lexus, Inc.?
2. Roy Rose signed articles of incorporation for R&F Capital Corporation in December 1989, but Flaherty, who had been entrusted by Rose to create R&F, failed to file the articles until February 9, 1990. On January 12, 1990, purporting to act on behalf of R&F as its chairman, Rose signed a contract to lease a warehouse owned by Dennis Sivers. When R&F breached the lease, Sivers claimed that Rose was liable on the lease because he should have known on the basis of his vast experience as a businessman that R&F was not incorporated. Rose and another R&F director testified that they both believed R&F had been incorporated in December 1989, and Rose said he would not have invested in R&F or signed a document on its behalf if he had known that R&F was not incorporated. Was Rose found liable on the lease?
3. Garry Fox met with Coopers & Lybrand to request a tax opinion and other accounting services. Fox told Coopers that he was acting on behalf of a corporation that he was in the process of forming, to be named G. Fox and Partners, Inc. Coopers knew that the corporation was not in existence. Fox and Coopers had no agreement regarding Fox's personal liability for payment of the fee for the services. G. Fox and Partners, Inc., was incorporated, and a few weeks later Coopers completed its work. The corporation did not pay for the work, so Coopers sued Fox. Is Fox liable to Coopers?
4. George Richert agreed to retain Crye-Leike Realtors, Inc., as his sole and exclusive real estate agent to find a building for Richert's business. The agency contract was signed by Richert and by Colman Borosky for Crye-Leike. All parties understood that Richert would soon form a corporation that would be the actual party to lease the building found by Crye-Leike. A month later, Richert formed WDM, Inc. Richert was president and CEO. WDM never formally adopted the agency contract with Crye-Leike. However, Crye-Leike contacted various landlords for WDM, showed several properties to WDM, and prepared an offer to lease space on behalf of WDM. All these efforts were done with Richert's full knowledge. When WDM hired another real estate agent, Crye-Leike sued for breach of the exclusive agency contract. WDM claimed that it was not a party to the contract between Richert and Crye-Leike. Was WDM correct?
5. Two colleagues decide to incorporate their Internet social networking business. They want complete control of the business, yet they need additional capital to expand the business. The two colleagues enter negotiations with eight friends willing to provide capital to the corporation. The friends agree that they will not be allowed to elect directors, but they want to make sure that they will receive a return on their investments by receiving payments from the corporation quarterly or semiannually. What securities with what rights should the corporation create to achieve the objectives of the friends and colleagues? For each security you create, sketch the rights of the holders.
6. Eastern Oklahoma Television Corporation was incorporated to operate KTEN, a television station. To

assist the station's start-up, Bill Hoover, an owner and operator of a radio station, pledged his radio station as collateral for KTEN's obligations, personally guaranteed the new corporation's obligations for the purchase of equipment, designed the television studio, planned operations, and hired and trained personnel. Hoover also became a director of the corporation. By action of the board of directors, the corporation issued some of the common shares to Hoover in consideration for his experience in broadcasting, his standing with the Federal Communications Commission, and his personal guarantee of the station's debt. Has Hoover paid a proper type of consideration for the shares?

7. Miranda Juarez is hired as the CEO of Spanata Corporation. Spanata's board of directors issues to Juarez 100,000 common shares of Spanata as part of her compensation package. Jaurez receives the shares in return for her giving a contractual promise to be Spanata's CEO for five years and her issuing to Spanata a promissory note in which Jaurez promises to pay \$500,000 in five years. Has the board of directors issued the shares for a proper type of consideration?
8. Bruce Bowman received 1,500 shares of Ling and Company Class A common shares. The shares were the subject of an option agreement contained in the articles of incorporation requiring Bowman to offer the shares to the corporation before selling them to any other person. On the front of Bowman's share certificate, in small print, it was stated that transfer of the shares was subject to the provisions of the articles, that a copy of the articles could be obtained from Ling or from the secretary of state, and that the back of the share certificate stated which sections of the articles contained the content of the option agreement. On the back of the share certificate, in small print, the reference to the restriction was again made, and specific reference was given to Article 4 of the articles of incorporation, in which the restriction was contained. Bowman borrowed money from Trinity Savings and Loan. When Bowman defaulted on the loan, Trinity attempted to sell the shares, but Ling objected, invoking the option agreement. Is the option agreement enforceable against Trinity?
9. Stufft Farms, Inc., was a Montana corporation that owned and operated a family farm. The only shareholders were five family members. The bylaws included a share-transfer restriction stating that no shareholder had the right to sell her shares without first offering the shares to the corporation and shareholders at book value. Neil Johnson offered to purchase all of Stufft Farm's shares. His offer was contingent upon all of the shares being tendered to him. When four shareholders accepted Johnson's offer, the fifth shareholder, David Stufft, who did not accept the offer, argued that he had the right to buy the shares of the tendering four shareholders at book value. Was he correct?
10. Rhiann Legath, Cortney Renoir, and Bornett McGann create a corporation to develop satellite software. Each will contribute \$160,000 initial capital to the business. They want to be equal owners and share equal management of the corporation. They do not expect the business to go public at any time, but they would not be averse to selling the business at a huge profit to a large textile company after five years. They are concerned that they will not receive a return on their investment because there will be no market for their shares. What agreement do they use to ensure that they may obtain a return on their investment through capital appreciation of their shares? Sketch the contents of that agreement. How do you suggest the agreement determine the value of the shares?

Pricing Incorporation

Type "incorporate" in your Internet search engine and you will obtain a list of companies that assist persons who wish to incorporate a business. Most incorporation Web sites quote their fees for assisting incorporation and also fees assessed by the state of incorporation. Find which Web site offers the most services at the best price.

Note that some Web sites sell corporate kits. A corporate kit is a notebook with sample bylaws, organization meeting minutes, stock certificates, and a stock transfer ledger. Corporate kits usually include a corporate seal, which is used to emboss the corporation's name on official documents. Banks and other institutions may require that all documents signed by a corporation bear the corporate seal.

chapter 43

MANAGEMENT OF CORPORATIONS

Clestra Corporation is a manufacturer of consumer products ranging from canned and packaged foods like spaghetti sauce and popcorn to over-the-counter health aids like toothpaste and mouthwash. Its annual worldwide revenues are just under \$6 billion. Clestra brands are not among the top two in the industry in any of its product lines, each brand ranking from fourth to sixth in annual sales in countries in which it markets its products. Clestra's CEO has been discussing the company's future with its consultant, KRNP Consulting LLP. KRNP has suggested that Clestra consider acquiring Ballmax, Inc., a consumer products company with two billion dollars annual sales. Ballmax's brands are complementary to Clestra's brands, and while smaller than Clestra, Ballmax has a distribution system that will give Clestra access to markets in which Clestra is not currently a significant seller.

Clestra's CEO also wants to improve consumer recognition of the Clestra brand. She suggests that Clestra acquire naming rights to a stadium being built for a baseball team in northern Virginia, the Virginia Hatchets. The CEO thinks that Clestra has the inside track to acquire naming rights because the family of one of Clestra's board members owns the baseball team that will own and operate the stadium.

- What legal standard will determine whether Clestra's board of directors has acted properly when approving Clestra's acquisition of Ballmax, Inc.? What role may KRNP Consulting take in helping Clestra's board of directors meet its duties under that legal standard?
- What legal standard will judge whether Clestra's board of directors has acted properly when acquiring naming rights to the Virginia Hatchets' stadium? What role may KRNP Consulting take in helping Clestra's board of directors meet its duties under that legal standard?
- Suppose Clestra's CEO is concerned that Clestra may be a target for a takeover by one of the larger consumer goods companies. If Clestra wants to remain an independent company, what should Clestra's board of directors do now to increase the chances that it may fend off a hostile takeover? What legal standard will judge whether Clestra's board has acted properly in adopting defenses against a hostile takeover? What should Clestra's board do now to increase the likelihood that the board will comply with that legal standard when it opposes a hostile takeover?

ALTHOUGH SHAREHOLDERS OWN a corporation, they traditionally have possessed no right to manage the business of the corporation. Instead, shareholders elect individuals to a *board of directors*, to which management is entrusted. Often, the board delegates much of its management responsibilities to *officers*.

This chapter explains the legal aspects of the board's and officers' management of the corporation. Their management of the corporation must be consistent with the objectives and powers of the corporation, and they owe

duties to the corporation to manage it prudently and in the best interests of the corporation and the shareholders as a whole.

Corporate Objectives

The traditional objective of the business corporation has been to *enhance corporate profits and shareholder gain*. According to this objective, the managers of a corporation must seek the accomplishment of the profit objective

Ethics in Action

Corporate Constituency Statutes

About two-thirds of the states have enacted corporate constituency stakeholder laws that permit directors to weigh the interests of constituencies other than shareholders. Only Connecticut and Arizona require the consideration of other constituencies. The other states permit, but do not require, directors to consider interests other than those of shareholders.

- Would you recommend that board members consider the interests of stakeholders other than shareholders when making a corporate decision?
- Which ethical theories that we studied in Chapter 4 permit directors to consider the interests of constituencies other than shareholders?
- Under profit maximization, what is the significance of nonshareholders' interests? Can a corporation maximize its profits without considering the interests of persons other than shareholders?

to the exclusion of all inconsistent goals. Interests other than profit maximization may be considered, provided that they do not hinder the ultimate profit objective.

Nonetheless, some courts have permitted corporations to take *socially responsible actions* that are *beyond the profit maximization requirement*. In addition, every state recognizes corporate powers that are not economically inspired. For example, corporations may make contributions to colleges, political campaigns, child abuse prevention centers, literary associations, and employee benefit plans, regardless of economic benefit to the corporations. Also, every state expressly recognizes the right of shareholders to choose freely the extent to which profit maximization captures all of their interests and all of their sense of responsibility.

Most states have enacted **corporate constituency statutes**, which broaden the legal objectives of corporations. Such statutes permit or require directors to take into account the interests of constituencies other than shareholders, including employees, suppliers, and customers. These statutes direct the board to act in the best interests of the corporation, not just the interests of the shareholders, and to maximize corporate profits *over the long term*. The new laws promote the view that a corporation is a collection of interests working together for the purpose of producing goods and services at a profit, and that the goal of corporate profit maximization over the long term is not necessarily the same as the goal of stock price maximization over the short term.

Corporate Powers

The actions of management are limited not only by the objectives of business corporations but also by the *powers* granted to business corporations. Such limitations may appear in the state statute, the articles of incorporation, and the bylaws.

The primary source of a corporation's powers is the corporation statute of the state in which it is incorporated. Some state corporation statutes expressly specify the powers of corporations. These powers include making gifts for charitable and educational purposes, lending money to corporate officers and directors, and purchasing and disposing of the corporation's shares. Other state corporation statutes limit the powers of corporations, such as prohibiting the acquisition of agricultural land by corporations.

Modern statutes attempt to authorize corporations to engage in any activity. The Model Business Corporation Act (MBCA) states that a corporation has the power to *do anything that an individual may do*.

Purpose Clauses in Articles of Incorporation Most corporations state their purposes in the articles of incorporation. The purpose is usually phrased in broad terms, even if the corporation has been formed with only one type of business in mind. Most corporations have purpose clauses stating that they may engage in any lawful business.

Under the MBCA, the inclusion of a purpose clause in the articles is optional. Any corporation incorporated under the MBCA has the purpose of engaging in any lawful business, unless the articles state a narrower purpose.

The Ultra Vires Doctrine Historically, an act of a corporation beyond its powers was a nullity, as it was *ultra vires*, which is Latin for "beyond the powers." Therefore, any act not permitted by the corporation statute or by the corporation's articles of incorporation was void due to lack of capacity.

This lack of capacity or power of the corporation was a defense to a contract assertable either by the corporation or by the other party that dealt with the corporation.

Often, *ultra vires* was merely a convenient justification for reneging on an agreement that was no longer considered desirable. This misuse of the doctrine has led to its near abandonment.

Today, the *ultra vires* doctrine is of small importance for two reasons. First, nearly all corporations have broad purpose clauses, thereby preventing any *ultra vires* problem. Second, the MBCA and most other statutes do not permit a corporation or the other party to an agreement to avoid an obligation on the ground that the corporate action is *ultra vires*.

Under the MBCA, *ultra vires* may be asserted by only three types of persons: (1) by a shareholder seeking to enjoin a corporation from executing a proposed action that is *ultra vires*; (2) by the corporation suing its management for damages caused by exceeding the corporation's powers; and (3) by the state's attorney general, who may have the power to enjoin an *ultra vires* act or to dissolve a corporation that exceeds its powers.

Powers of Nonprofit Corporations

Nonprofit corporations, like for-profit corporations, have the power to transact business granted by the incorporation statute, the articles, and the bylaws. The Model Nonprofit Corporation Act (MNCA), like the MBCA, grants nonprofit corporations the power to engage in any lawful activity and to do anything an individual may do. Thus, a nonprofit corporation may sue and be sued, purchase, hold, and sell real property, lend and borrow money, and make charitable and other donations, among its many powers.

Commonly, a nonprofit corporation's articles will limit its powers pursuant to a purpose clause. For example, a nonprofit corporation established to operate a junior baseball league may limit its powers to that business and matters reasonably connected to it. When a nonprofit corporation limits its powers, a risk arises that the corporation may commit an *ultra vires* act. The MNCA adopts the same rules for *ultra vires* contracts as does the MBCA: Generally, neither the corporation nor the other party may use *ultra vires* as a defense to a contract.

The Board of Directors

Traditionally, the **board of directors** has had the authority and the duty to manage the corporation. Yet in a large publicly held corporation, it is impossible for the board to manage the corporation on a day-to-day basis, because

many of the directors are high-level executives in other corporations and devote most of their time to their other business interests. Therefore, the MBCA permits a corporation to be managed *under the direction of* the board of directors. Consequently, the board of directors delegates major responsibility for management to committees of the board such as an executive committee, to individual board members such as the chairman of the board, and to the officers of the corporation, especially the chief executive officer (CEO). In theory, the board supervises the actions of its committees, the chairman, and the officers to ensure that the board's policies are being carried out and that the delegates are managing the corporation prudently.

Board Authority under Corporation Statutes

A corporation's board of directors has the authority to do almost everything within the powers of the corporation. The board's authority includes not only the general power to manage or direct the corporation in the ordinary course of its business but also the power to issue shares of stock and to set the price of shares. Among its other powers, the board may repurchase shares, declare dividends, adopt and amend bylaws, elect and remove officers, and fill vacancies on the board.

Some corporate actions require *board initiative* and shareholder approval. That is, board approval is necessary to *propose such actions to the shareholders*, who then must approve the action. Board initiative is required for important changes in the corporation, such as amendment of the articles of incorporation, merger of the corporation, the sale of all or substantially all of the corporation's assets, and voluntary dissolution.

Committees of the Board Most publicly held corporations have committees of the board of directors. These committees, which have fewer members than the board has, can more efficiently handle management decisions and exercise board powers than can a large board. Only directors may serve on board committees.

Although many board powers may be delegated to committees of the board, some decisions are so important that corporation statutes require their *approval by the board as a whole*. Under the MBCA, the powers that may not be delegated concern important corporate actions such as declaring dividends, filling vacancies on the board or its committees, adopting and amending bylaws, approving issuances of shares, and approving repurchases of the corporation's shares.

The most common board committee is the **executive committee**. It is usually given authority to act for the

board on most matters when the board is not in session. Generally, it consists of the inside directors and perhaps one or two outside directors who can attend a meeting on short notice. An inside director is an officer of the corporation who devotes substantially full time to the corporation. Outside directors have no such affiliation with the corporation.

Audit committees are directly responsible for the appointment, compensation, and oversight of independent public accountants. They supervise the public accountants' audit of the corporate financial records. The Sarbanes–Oxley Act requires that all publicly held firms have audit committees comprising independent directors. That act was a response to allegations of unethical and criminal conduct by corporate CEOs and auditors at firms like Enron, WorldCom, and Arthur Andersen in the 1990s and early 2000s. Rules of the New York Stock Exchange (NYSE) and the National Association of Securities Dealers (NASD), which apply to firms listed on the NYSE or NASDAQ, require that independent directors approve audit committee nominations.

Nominating committees choose management's slate of directors that is to be submitted to shareholders at the annual election of directors. Nominating committees also often plan generally for management succession. Nominating committees wholly or largely comprise outside directors.

Compensation committees review and approve the salaries, bonuses, stock options, and other benefits of high-level corporate executives. Although compensation committees usually comprise directors who have no affiliation with the executives or directors whose compensation is being approved, compensation committees may also set the compensation of their members. Directors of a typical corporation receive annual compensation between \$30,000 to \$60,000.

In the early 2000s, the public and Congress criticized board approvals of large compensation packages to CEOs and other top level officers, including stock options and bonus plans that sometimes allowed individual officers to earn more than \$100 million in a single year. Hoping that board independence would rein in such compensation, in 2003 the Securities and Exchange Commission (SEC) approved NYSE and NASD rules that require independent directors to approve executive compensation.

A **shareholder litigation committee** is given the task of determining whether a corporation should sue someone who has allegedly harmed the corporation. Usually, this committee of disinterested directors is formed when a shareholder asks the board of directors to cause the cor-

poration to sue some or all of the directors for mismanaging the corporation.

Powers, Rights, and Liabilities of Directors as Individuals

A director is not an agent of the corporation *merely* by being a director. The directors may manage the corporation only when they act as a board, unless the board of directors grants agency powers to the directors individually.

A director has the *right to inspect* corporate books and records that contain corporate information essential to the director's performance of her duties. The director's right of inspection is denied when the director has an interest adverse to the corporation, as in the case of a director who plans to sell a corporation's trade secrets to a competitor.

Normally, a director does not have any personal liability for the contracts and torts of the corporation.

Election of Directors Generally, any individual may serve as a director of a corporation. A director need not even be a shareholder. Nonetheless, a corporation is permitted to specify qualifications for directors in the articles of incorporation.

A corporation must have the number of directors required by the state corporation law. The MBCA and several state corporation statutes require a minimum of one director, recognizing that in close corporations with a single shareholder-manager, additional board members are superfluous. Several statutes, including the New York statute, require at least three directors, unless there are fewer than three shareholders, in which case the corporation may have no fewer directors than it has shareholders.

A corporation may have more than the minimum number of directors required by the corporation statute. The articles of incorporation or bylaws will state the number of directors of the corporation. Most large publicly held corporations have boards with more than 10 members.

Directors are elected by the shareholders at the annual shareholder meeting. Usually, each shareholder is permitted to vote for as many nominees as there are directors to be elected. The shareholder may cast as many votes for each nominee as he has shares. The top votegetters among the nominees are elected as directors. This voting process, called **straight voting**, permits a holder of more than 50 percent of the shares of a corporation to dominate the corporation by electing a board of directors that will manage the corporation as he wants it to be managed.

To avoid domination by a large shareholder, some corporations allow class voting or cumulative voting.

Class voting may give certain classes of shareholders the right to elect a specified number of directors. **Cumulative voting** permits shareholders to multiply the number of their shares by the number of directors to be elected and to cast the resulting total of votes for one or more directors. As a result, cumulative voting may permit minority shareholders to obtain representation on the board of directors.

Directors usually hold office for only one year, but they may have longer terms. The MBCA permits **staggered terms** for directors. A corporation having a board of nine or more members may establish either two or three approximately equal classes of directors, with only one class of directors coming up for election at each annual shareholders' meeting. If there are two classes of directors, the directors serve two-year terms; if there are three classes, they serve three-year terms.

The original purpose of staggered terms was to permit continuity of management. Staggered terms also frustrate the ability of minority shareholders to use cumulative voting to elect their representatives to the board of directors.

The Proxy Solicitation Process Most individual investors purchase corporate shares in the public market to increase their wealth, not to elect or to influence the directors of corporations. Nearly all institutional investors—such as pension funds, mutual funds, and bank trust departments—have the same profit motive. Generally, they are passive investors with little interest in exercising their shareholder right to elect directors by attending shareholder meetings.

Once public ownership of the corporation's shares exceeds 50 percent, the corporation cannot conduct any business at its shareholder meetings unless some of the shares of these passive investors are voted. This is because the corporation will have a shareholder quorum requirement, which usually requires that 50 percent or more of the shares be voted for a shareholder vote to be valid. Since passive investors rarely attend shareholder meetings, the management of the corporation must solicit **proxies** if it wishes to have a valid shareholder vote. Shareholders who will not attend a shareholder meeting must be asked to appoint someone else to vote their shares for them. This is done by furnishing each such shareholder with a proxy form to sign. The proxy designates a person who may vote the shares for the shareholder.

Management Solicitation of Proxies To ensure its perpetuation in office and the approval of other matters submitted for a shareholder vote, the corporation's man-

agement solicits proxies from shareholders for directors' elections and other important matters on which shareholders vote, such as mergers. The management designates an officer, a director, or some other person to vote the proxies received. The person who is designated to vote for the shareholder is also called a proxy. Typically, the chief executive officer (CEO) of the corporation, the president, or the chairman of the board of directors names the person who serves as the proxy.

Usually, the proxies are merely signed and returned by the public shareholders, including the institutional shareholders. Passive investors follow the **Wall Street rule**: Either support management or sell the shares. As a result, management almost always receives enough votes from its proxy solicitation to ensure the reelection of directors and the approval of other matters submitted to the shareholders, even when other parties solicit proxies in opposition to management.

Management's solicitation of proxies may produce a result quite different from the theory of corporate management that directors serve as representatives of the shareholders. The CEO usually nominates directors of his choice, and they are almost always elected. The directors appoint officers chosen by the CEO. The CEO's nominees for director are not unduly critical of his programs or of his methods for carrying them out. This is particularly true if a large proportion of the directors are officers of the company and thus are more likely to be dominated by the CEO. In such situations, the board of directors may not function effectively as a representative of the shareholders in supervising and evaluating the CEO and the other officers of the corporation. The board members and the other officers are subordinates of the CEO, even though the CEO is not a major shareholder of the corporation.

Proposals for improving corporate governance in public-issue corporations seek to develop a board that is capable of functioning independently of the CEO by changing the composition or operation of the board of directors. Some corporate governance critics propose that a federal agency such as the SEC appoint one or more directors to serve as watchdogs of the public interest. Other critics would require that shareholders elect at least a majority of directors without prior ties to the corporation, thus excluding shareholders, suppliers, and customers from the board.

Other proposals recommend changing the method by which directors are nominated for election. One proposal would encourage shareholders to make nominations for directors. Supporters of this proposal argue that in addition to reducing the influence of the CEO, it would also

broaden the range of backgrounds represented on the board. The SEC recommends that publicly held corporations establish a nominating committee composed of outside directors. Many publicly held corporations have nomination committees.

Due to pressure from the public and Congress after the corporate scandals of the 1990s and early 2000s, the SEC, in 2003, approved NYSE and NASD corporate governance rules that make corporate boards more nearly independent of the CEO in structure, if not in action. One rule requires boards to comprise mostly independent directors. Equally important, the independent directors must meet from time to time by themselves in executive session independent of the CEO. In addition, institutional investors—including mutual funds and hedge funds—are taking increasingly active roles in director elections

For a complete treatment of the corporate social responsibility debate, including proposals to improve corporate governance, see Chapter 4.

In the following case, *Grimes v. Donald*, the court considered whether a board of directors abdicated its duty to direct the corporation by delegating unlimited power to the CEO.

Grimes v. Donald

673 A.2d 1207 (Del. Sup. Ct. 1996)

James Donald was the chief executive officer of DSC Communications, a Delaware corporation headquartered in Plano, Texas. In 1990, DSC's board of directors entered an employment agreement with Donald that ran until his 75th birthday. The employment agreement provided that Donald "shall be responsible for the general management of the affairs of the company and report to the Board." Donald's employment could be terminated by death, disability, for cause, and without cause. The agreement provided, however, that Donald could declare a "Constructive Termination Without Cause" by DSC, if there was "unreasonable interference, in the good faith judgment of Donald, by the Board or a substantial stockholder of DSC, in Donald's carrying out of his duties and responsibilities." When there was termination without cause, the employment agreement provided that Donald was entitled to payment of his annual base salary (\$650,000) for the remainder of the contract, his annual incentive award (\$300,000), and other benefits. The total amount of payments and benefits for the term of the contract was about \$20,000,000.

C. L. Grimes, a DSC shareholder, sued Donald on behalf of the corporation asking the court to invalidate the employment agreement between Donald and DSC on the grounds that the agreement illegally delegated the duties and responsibilities of DSC's board of directors to Donald. The Delaware Chancery Court dismissed the case, and Grimes appealed to the Supreme Court of Delaware.

Veasey, Chief Justice

Grimes claims that the potentially severe financial penalties which DSC would incur in the event that the Board attempts to interfere in Donald's management will inhibit and deter the Board from exercising its duties. We disagree.

Grimes has pleaded, at most, that Donald would be entitled to \$20 million in the event of a Constructive Termination. In light of the financial size of DSC, this amount would not constitute a *de facto* abdication.

Directors may not delegate duties which lie at the heart of the management of the corporation. A court cannot give legal sanction to agreements which have the effect of removing from directors in a very substantial way their duty to use their own best judgment on management matters. The Donald agreement

does not formally preclude the DSC board from exercising its statutory powers and fulfilling its fiduciary duty.

With certain exceptions, an informed decision to delegate a task is as much an exercise of business judgment as any other. Likewise, business decisions are not an abdication of directorial authority merely because they limit a board's freedom of future action. A board which has decided to manufacture bricks has less freedom to decide to make bottles. In a world of scarcity, a decision to do one thing will commit a board to a certain course of action and make it costly and difficult to change course and do another. This is an inevitable fact of life and is not an abdication of directorial duty.

If the market for senior management, in the business judgment of the board, demands significant severance packages,

boards will inevitably limit their future range of action by entering into employment agreements. Large severance payments will deter boards, to some extent, from dismissing senior officers. If an independent and informed board, acting in good faith, determines that the services of a particular individual warrant large amounts of money, whether in the form of current salary or severance provisions, the board has made a business judgment. That judgment normally will receive the protection of the business judgment rule unless the facts show that such amounts, compared with services to be received in exchange,

constitute waste or could not otherwise be the product of a valid exercise of business judgment.

The Board of DSC retains the ultimate freedom to direct the strategy and affairs of DSC. If Donald disagrees with the Board, DSC may or may not be required to pay a substantial amount of money in order to pursue its chosen course of action. So far, we have only a rather unusual contract, but not a case of abdication.

Judgment for Donald affirmed.

The Global Business Environment

Corporate Governance in Germany

Corporate governance varies somewhat from country to country. In Germany, for example, the *Aktiengesellschaft* (AG) has a **management board** and a **supervisory board**. The AG's management board represents and manages the company. Its members are not directly answerable to shareholders, but are appointed by the AG's supervisory board. All members of the management board manage the company together. However, the articles may provide that the company may be represented by two members of the management board.

The members of the AG's supervisory board are like the outside directors of an American company. They are elected by the AG's shareholders and, if German co-determination

rules apply, by the employees. The supervisory board is charged with protecting the interests of the company, which may not coincide with those of the shareholders. To enable the supervisory board to carry out its oversight function, the management board is required to report regularly on the current status of the company's business and corporate planning. However, the supervisory board has no say in the day-to-day management of the company.

The Shop Constitution Act (*Betriebsverfassungsgesetz*) covers AGs with more than 500 employees. It provides that one-third of supervisory board members be employee representatives. Under the Co-determination Act (*Mitbestimmungsgesetz*), the supervisory boards of AGs with more than 2,000 employees must have equal numbers of shareholder and employee representatives.

Vacancies on the Board The MBCA permits the directors to fill vacancies on the board. A majority vote of the remaining directors is sufficient to select persons to serve out unexpired terms, even though the remaining directors are less than a quorum.

Removal of Directors Modern corporation statutes permit shareholders to remove directors *with or without cause*. The rationale for the modern rule is that the shareholders should have the power to judge the fitness of directors at any time.

However, most corporations have provisions in their articles authorizing the shareholders to remove directors *only for cause*. Cause for removal would include mismanagement or conflicts of interest. Before removal for cause, the director must be given notice and an opportunity for a hearing.

A director elected by a class of shareholders may be removed only by that class of shareholders, thereby protecting the voting rights of the class. A director elected by cumulative voting may not be removed if the votes cast against her removal would have been sufficient to elect her to the board, thereby protecting the voting rights of minority shareholders.

Directors' Meetings

For the directors to act, a *quorum* of the directors must be present. The quorum requirement ensures that the decision of the board will represent the views of a substantial portion of the directors. A quorum is usually a *majority* of the number of directors.

Each director has *one vote*. If a quorum is present, a vote of a majority of the directors present is an act of the

board, unless the articles or the bylaws require the vote of a greater number of directors. Such *supermajority voting provisions* are common in close corporations but not in publicly held corporations. The use of supermajority voting provisions by close corporations is covered later in this chapter.

Directors are entitled to reasonable notice of all *special meetings*, but not of regularly scheduled meetings. The MBCA does not require the notice for a special meeting to state the purpose of the meeting. A director's attendance at a meeting waives any required notice, unless at the beginning of the meeting the director objects to the lack of notice.

Traditionally, directors could act only when they were properly convened as a board. They could not vote by proxy or informally, as by telephone. This rule was based on a belief in the value of consultation and collective judgment.

Today, the corporation laws of a majority of the states and the MBCA specifically permit action by the directors without a meeting if all of the directors consent in writing to the action taken. Such authorization is useful for dealing with routine matters or for formally approving an action based on an earlier policy decision made after full discussion.

The MBCA also permits a board to meet by telephone, television, or Internet hookup. This section permits a meeting of directors who may otherwise be unable to convene. The only requirement is that the directors be able to hear one another simultaneously.

Officers of the Corporation

The board of directors has the authority to appoint the officers of the corporation. Many corporation statutes provide that the officers of a corporation shall be the *president*, one or more *vice presidents*, a *secretary*, and a *treasurer*. Usually, any two or more offices may be held by the same person, except for the offices of president and secretary.

The MBCA requires only that there be an officer performing the duties normally granted to a corporate secretary. Under the MBCA, one person may hold several offices, including the offices of president and secretary.

The officers are agents of the corporation. As agents, officers have *express authority* conferred on them by the bylaws or the board of directors. In addition, officers have *implied authority* to do the things that are reasonably necessary to accomplish their express duties. Also, officers have *apparent authority* when the corporation

leads third parties to believe reasonably that the officers have authority to act for the corporation. Like any principal, the corporation may *ratify* the unauthorized acts of its officers. This may be done expressly by a resolution of the board of directors or impliedly by the board's acceptance of the benefits of the officer's acts.

The most perplexing issue with regard to the authority of officers is whether an officer has *inherent authority* merely by virtue of the title of his office. Courts have held that certain official titles confer authority on officers, but such powers are much more restricted than you might expect.

Traditionally, a *president* possesses no power to bind the corporation by virtue of the office. Instead, she serves merely as the presiding officer at shareholder meetings and directors' meetings. A president with an additional title such as *general manager* or *chief executive officer* has broad implied authority to make contracts and to do other acts in the ordinary business of the corporation.

A *vice president* has no authority by virtue of that office. An executive who is vice president of a specified department, however, such as a vice president of marketing, will have the authority to transact the normal corporate business falling within the function of the department.

The *secretary* usually keeps the minutes of directors' and shareholder meetings, maintains other corporate records, retains custody of the corporate seal, and certifies corporate records as being authentic. Although the secretary has no authority to make contracts for the corporation by virtue of that office, the corporation is bound by documents certified by the secretary.

The *treasurer* has custody of the corporation's funds. He is the proper officer to receive payments to the corporation and to disburse corporate funds for authorized purposes. The treasurer binds the corporation by his receipts, checks, and indorsements, but he does not by virtue of that office alone have authority to borrow money, to issue negotiable instruments, or to make other contracts on behalf of the corporation.

Like any agent, a corporate officer ordinarily has *no liability on contracts* that he makes on behalf of his principal, the corporation, if he signs for the corporation and not in his personal capacity.

Officers serve the corporation at the pleasure of the board of directors, which may remove an officer at any time with or without cause. An officer who has been removed without cause has no recourse against the corporation, unless the removal violates an employment contract between the officer and the corporation.

Managing Close Corporations

Many of the management formalities that you have studied in this chapter are appropriate for publicly held corporations yet inappropriate for close corporations. For example, each close corporation shareholder may want to be *involved in management* of the corporation. If a close corporation shareholder is not involved in management, he may want to protect his interest by placing *restrictions on the managerial discretion* of those who do manage the corporation.

Modern close corporation statutes permit close corporations to dispense with most, if not all, management formalities. The Statutory Close Corporation Supplement to the MBCA permits a close corporation to *dispense with a board of directors* and to be *managed by the shareholders*. The California General Corporation Law permits the close corporation to be managed *as if it were a partnership*.

LOG ON

www.sos.ca.gov/business/corp/pdf/articles/corp_artsclose.pdf

This Web site for California's secretary of state will show you how to create a close corporation in California.

When a close corporation chooses to have a traditional board of directors, a minority shareholder may be dominated by the shareholders who control the board of directors. To protect minority shareholders, close corporations may impose **supermajority voting** requirements for board actions and **restrictions on the managerial discretion** of the board of directors.

Any corporation may require that board action be possible only with the approval of more than a majority of the directors, such as three-fourths or unanimous approval. A supermajority vote is often required to terminate the employment contract of an employee-shareholder, to reduce the level of dividends, and to change the corporation's line of business. Supermajority votes are rarely required for ordinary business matters, such as deciding with which suppliers the corporation should deal.

Traditionally, shareholders could not restrict the managerial discretion of directors. This rule recognized the traditional roles of the board as manager and of the shareholders as passive owners. Modern close corporation statutes permit shareholders to intrude into the sanctity of the boardroom. The Statutory Close Corporation Supplement grants the shareholders *unlimited* power to

restrict the discretion of the board of directors. For example, the shareholders may agree that the directors may not terminate or reduce the salaries of employee-shareholders and must pay a mandatory dividend, if earned. And, as was stated above, close corporation statutes even permit the shareholders to dispense with a board of directors altogether and to manage the close corporation as if it were a partnership.

Of course, any article or bylaw protecting the rights of minority shareholders should not be changeable, unless the minority shareholders consent.

Managing Nonprofit Corporations

A nonprofit corporation is managed under the direction of a board of directors. The board of directors must have at least three directors. All corporate powers are exercised by or under the authority of the board of directors. Any person may serve as a director; however, the Model Nonprofit Corporation Act has an optional provision stating that no more than 49 percent of directors of a public service corporation may be financially interested in the business of the public service corporation. An interested person is, for example, the musical director of a city's symphony orchestra who receives a salary from the nonprofit corporation operating the orchestra.

If a nonprofit corporation has members, typically the members elect the directors. However, the articles may provide for the directors to be appointed or elected by other persons. Directors serve for one year, unless the articles or bylaws provide otherwise. Directors who are elected may not serve terms longer than five years, but appointed directors may serve longer terms.

Directors may be elected by straight or cumulative voting and by class voting. Members may elect directors in person or by proxy. Directors may be removed at any time with or without cause by the members or other persons who elected or appointed the directors. When a director engages in fraudulent or dishonest conduct or breaches a fiduciary duty, members holding at least 10 percent of the voting power may petition a court to remove the wrongdoing director. Generally, a vacancy may be filled by the members or the board of directors; however, if a removed director was elected by a class of members or appointed by another person, only the class or person electing or appointing the director may fill the vacancy.

The board is permitted to set directors' compensation. Typically, directors of public benefit corporations and

religious corporations are volunteers and receive no compensation.

Directors of a nonprofit corporation usually act at a meeting at which all directors may simultaneously hear each other, such as a meeting in person or by telephone conference call. The board may also act without a meeting if all directors consent in writing to the action. The board has the power to do most actions that are within the powers of the corporation, although some actions, such as mergers and amendments of the articles, require member action also. Ordinarily, an individual director has no authority to transact for a nonprofit corporation.

The board of directors of a nonprofit corporation may delegate some of its authority to committees of the board and to officers. A nonprofit corporation is not required to have officers, except for an officer performing the duties of corporate secretary. If a corporation chooses to have more officers, one person may hold more than one office. The board may remove an officer at any time with or without cause.

Officers have the authority granted them by the bylaws or by board resolution. However, a nonprofit corporation is bound by a contract signed by both the presiding officer of the board and the president, when the other party had no knowledge that the signing officers had no authority. The corporation is also bound to a contract signed by either the presiding officer or the president which is also signed by either a vice president, the secretary, the treasurer, or the executive director.

Directors' and Officers' Duties to the Corporation

Directors and officers are in positions of trust; they are entrusted with property belonging to the corporation and with power to act for the corporation. Therefore, directors and officers owe **fiduciary duties** to the corporation. They are the duties to act within the authority of the position and within the objectives and powers of the corporation, to act with due care in conducting the affairs of the corporation, and to act with loyalty to the corporation.

Acting within Authority An officer or director has a duty to **act within the authority** conferred on her by the articles of incorporation, the bylaws, and the board of directors. The directors and officers must act within the scope of the powers of the corporation. An officer or a director may be liable to the corporation if it is damaged by an act exceeding that person's or the corporation's authority.

Duty of Care Directors and officers are liable for losses to the corporation resulting from their lack of *care or diligence*. The MBCA expressly states the standard of care that must be exercised by directors and officers. MBCA section 8.30 states:

- (a) Each member of the board of directors . . . shall act:
 - (1) in good faith, and
 - (2) in a manner the director reasonably believes to be in the best interests of the corporation.
- (b) The members of the board of directors or a committee of the board, when becoming informed in connection with their decision-making function or devoting attention to their oversight function, shall discharge their duties with the care that a person in a like position would reasonably believe appropriate under similar circumstances.

The MBCA section 8.42 imposes almost the same duty on corporate officers:

- (a) An officer . . . shall act:
 - (1) in good faith;
 - (2) with the care that a person in a like position would reasonably exercise under similar circumstances; and
 - (3) in a manner the officer reasonably believes to be in the best interests of the corporation.

Managers need merely meet the standard of the **ordinarily prudent person in the same circumstances**, a standard focusing on the basic manager attributes of common sense, practical wisdom, and informed judgment. The duty of care does not hold directors and officers to the standard of a prudent businessperson, a person of some undefined level of business skill. A director or officer's performance is evaluated at the time of the decision, thereby preventing the application of hindsight in judging her performance.

The MBCA duty of care test requires that a director or officer make a **reasonable investigation** and **honestly believe** that her decision is in the **best interests of the corporation**. For example, the board of directors decides to purchase an existing manufacturing business for \$15 million without inquiring into the value of the business or examining its past financial performance. Although the directors may believe that they made a prudent decision, they have no reasonable basis for that belief. Therefore, if the plant is worth only \$5 million, the directors will be liable to the corporation for its damages—\$10 million—for breaching the duty of care.

The Business Judgment Rule The directors' and officers' duty of care is sometimes expressed as the **business judgment rule**: Absent bad faith, fraud, or breach of fiduciary duty, the judgment of the board of directors is

conclusive. When directors and officers have complied with the business judgment rule, they are protected from liability to the corporation for their harmful decisions. The business judgment rule precludes the courts from substituting their business judgment for that of the corporation's managers. The business judgment rule recognizes that the directors and officers—not the shareholders and the courts—are best able to make business judgments and should not ordinarily be vulnerable to second-guessing. Shareholders and the courts are ill equipped to make better business decisions than those made by the officers and directors of a corporation, who have more business experience and are more familiar with the needs, strengths, and limitations of the corporation.

Three requirements must be met for the business judgment rule to protect managers from liability:

1. The managers must make an **informed decision**. They must take the steps necessary to become informed about the relevant facts by making a **reasonable investigation** before making a decision.
2. The managers may have **no conflicts of interest**. The managers may not benefit personally—other than as shareholders—when they transact on behalf of the corporation.
3. The managers must have a **rational basis** for believing that the decision is in the best interests of the corporation. The rational basis element requires only that the managers' decision have a *logical connection to the facts* revealed by a reasonable investigation or that the decision *not be manifestly unreasonable*. Some courts have held that the managers' wrongdoing must amount to *gross negligence* for the directors to lose the protection of the business judgment rule.

If the business judgment rule does not apply because one or more of its elements are missing, a court may *substitute its judgment* for that of the managers.

Nonetheless, courts rarely refuse to apply the business judgment rule. As a result, the rule has been criticized frequently as providing too much protection for the managers of corporations. In one famous case, the court applied the business judgment rule to protect a 1965 decision made by the board of directors of the Chicago Cubs not to install lights and not to hold night baseball games at Wrigley Field.¹ Yet the business judgment rule is so flexible that it protected the decision of the Cubs' board of directors to install lights in 1988.

The *Trans Union* case² is one of the few cases that has held directors liable for failing to comply with the business judgment rule. The Supreme Court of Delaware found that the business judgment rule was not satisfied by the board's approval of an acquisition of the corporation for \$55 per share. The board approved the acquisition after only two hours' consideration. The board received no documentation to support the adequacy of the \$55 price. Instead, it relied entirely on a 20-minute *oral* report of the chairman of the board. No written summary of the acquisition was presented to the board. The directors failed to obtain an investment banker's report, prepared after careful consideration, that the acquisition price was fair.

In addition, the court held that the mere fact that the acquisition price exceeded the market price by \$17 per share did not legitimize the board's decision. The board had frequently made statements prior to the acquisition that the market had undervalued the shares, yet the board took no steps to determine the intrinsic value of the shares. Consequently, the court found that at a minimum, the directors had been grossly negligent.

Complying with the Business Judgment Rule

While the *Trans Union* case created some fear among directors that they could easily be held liable for making a decision that harms the corporation, nothing could be further from the truth. The *Trans Union* case and the business judgment rule provide a blueprint for how directors, with the assistance of investment bankers and other consultants, can avoid liability. First, to make an informed decision, the board must perform a reasonable investigation or reasonably rely on someone who has made a reasonable investigation, such as consultants, corporate officers, and employees. For example, few boards have the financial skills to value a product line that the corporation wants to sell, yet investment bankers are skilled at valuations. Therefore, a board will make an informed decision when an investment banker makes a reasonable investigation, informs the board of its finding in a written report delivered to the board several days prior to the board meeting, makes a presentation at the board meeting, and takes questions from the board, provided the board makes its decision after giving sufficient time and care to its deliberation of the facts.

Second, the business judgment rule will not apply unless the board has no conflicts of interest. By compiling a list of questions and quizzing the board members, consultants can help the board determine whether any

¹*Shlensky v. Wrigley*, 237 N.E.2d 776 (Ill. Ct. App. 1968).

²*Smith v. Van Gorkom*, 488 A.2d 858 (Del. Sup. Ct. 1985).

member has a financial or other improper interest in the matter before the board.

Third, for the board to have a rational basis to believe that the decision is in the best interests of the corporation, the decision must fit with the firm's corporate strategy and the facts revealed by a reasonable investigation. Investment bankers and consultants can help, first by defining the corporation's strategy and second by demonstrating the fit between the course of action, the facts, and the corporate strategy.

Changes in the Duty of Care Despite the low risk of liability, many state legislatures have changed the wording

of the duty of care, typically imposing liability only for willful or wanton misconduct or for gross negligence. Some states allow corporations to reduce the duty of care in their articles of incorporation. For example, the MBCA allows corporations to reduce or eliminate directors' liability for monetary damages, unless a director has received an improper financial benefit or intended to violate the law or harm the corporation.

In the following case involving Disney's hiring and firing of Michael Ovitz, the Delaware court applied the business judgment rule. This case has a good explanation of the diligence directors should exercise in acquiring information before making a decision.

Brehm v. Eisner

906 A. 2d 27 (Del. S. Ct. 2006)

From the mid-1980s to the mid-1990s, The Walt Disney Company enjoyed remarkable success under the guidance of Chairman and CEO Michael Eisner and President and Chief Operating Officer Frank Wells. In 1994, Wells died in a helicopter crash, prematurely forcing the company to consider his replacement. Eisner promoted the candidacy of his long-time friend, Michael Ovitz. Ovitz was the head of Creative Artists Agency (CAA), which he and four others had founded in 1974. By 1995, CAA had grown to be the premier Hollywood talent agency. CAA had 550 employees and an impressive roster of about 1,400 of Hollywood's top actors, directors, writers, and musicians, clients that generated \$150 million in annual revenues for CAA. Ovitz drew an annual income of \$20 million from CAA. He was regarded as one of the most powerful figures in Hollywood.

To leave CAA and join Disney as its president, Ovitz insisted on an employment agreement that would provide him downside risk protection if he was terminated by Disney or if he was interfered with in his performance of his duties as president. After protracted negotiations, Ovitz accepted an employment package that would provide him \$23.6 million per year for the first five years of the deal, plus bonuses and stock options. The agreement guaranteed that the stock options would appreciate at least \$50 million in five years or Disney would make up the difference. The Ovitz employment agreement (OEA) also provided that if Disney fired Ovitz for any reason other than gross negligence or malfeasance, Ovitz would be entitled to a Non-Fault Termination payment (NFT), which consisted of his remaining salary, \$7.5 million a year for any unaccrued bonuses, the immediate vesting of some stock options, and a \$10 million cash out payment for other stock options. While there was some opposition to the employment agreement among directors and upper management at Disney, Ovitz was hired in October 1995 largely due to Eisner's insistence.

At the end of 1995, Eisner's attitude with respect to Ovitz was positive. Eisner wrote, "1996 is going to be a great year—We are going to be a great team—We every day are working better together—Time will be on our side—We will be strong, smart, and unstoppable!!!" Eisner also wrote that Ovitz performed well during 1995, notwithstanding the difficulties Ovitz was experiencing assimilating to Disney's culture.

Unfortunately, such optimism did not last long. In January 1996, a corporate retreat was held at Walt Disney World in Orlando. At that retreat, Ovitz failed to integrate himself in the group of executives by declining to participate in group activities, insisting on a limousine when the other executives—including Eisner—were taking a bus, and making inappropriate demands of the park employees. In short, Ovitz was a little elitist for the egalitarian Disney and a poor fit with his fellow executives.

By the summer of 1996, Eisner had spoken with several directors about Ovitz's failure to adapt to the company's culture. In the fall of 1996, directors began discussing that the disconnect between Ovitz and Disney was likely irreparable, and that Ovitz would have to be terminated. In December 1996, Ovitz was officially terminated by action of Eisner alone. Eisner concluded that Ovitz was terminated without cause, requiring Disney to make the costly NFT payment.

Shareholders of Disney brought a derivative action on behalf of Disney against Eisner and other Disney directors. The shareholders alleged breaches of fiduciary duty in the hiring and firing of Ovitz. Eisner and the other directors defended on the grounds that they had complied with the business judgment rule. Because Disney was incorporated in Delaware, the case was brought in the Delaware Court of Chancery. The chancery court found that Eisner and the other directors had complied with the business judgment rule. The Disney shareholders appealed to the Delaware Supreme Court.

Jacobs, Justice

The shareholders' claims are subdivisible into two groups: (A) claims arising out of the approval of the OEA and of Ovitz's election as President; and (B) claims arising out of the NFT severance payment to Ovitz upon his termination.

A. Claims Arising from the Approval of the OEA and Ovitz's Election as President

The shareholders' core argument in the trial court was that the Disney directors' approval of the OEA and election of Ovitz as President were not entitled to business judgment rule protection, because those actions were either grossly negligent or not performed in good faith. The Court of Chancery rejected these arguments, and held that the shareholders had failed to prove that the Disney defendants had breached any fiduciary duty.

The shareholders advance five contentions to support their claim that the Chancellor reversibly erred by concluding that the shareholders had failed to establish a violation of the Disney defendants' duty of care. The shareholders claim that the Chancellor erred by: (1) treating as distinct questions whether the shareholders had established by a preponderance of the evidence either gross negligence or a lack of good faith; (2) ruling that the board was not required to approve the OEA; (3) determining whether the board had breached its duty of care on a director-by-director basis rather than collectively; (4) concluding that the compensation committee members did not breach their duty of care in approving the NFT provisions of the OEA; and (5) holding that the remaining members of the board (*i.e.*, the directors who were not members of the compensation committee) had not breached their duty of care in electing Ovitz as Disney's President.

Our law presumes that in making a business decision the directors of a corporation acted on an informed basis, in good faith, and in the honest belief that the action taken was in the best interests of the company. Those presumptions can be rebutted if the shareholder shows that the directors breached their fiduciary duty of care or of loyalty or acted in bad faith. If that is shown, the burden then shifts to the director defendants to demonstrate that the challenged act or transaction was entirely fair to the corporation and its shareholders.

Because no duty of loyalty claim was asserted against the Disney defendants, the only way to rebut the business judgment rule presumptions would be to show that the Disney defendants had either breached their duty of care or had not acted in good faith. The Chancellor determined that the shareholders had failed to prove either. [The Delaware Supreme Court affirmed the Chancellor's finding.]

The shareholders next challenge the Court of Chancery's determination that the full Disney board was not required to

consider and approve the OEA, because the Company's governing instruments allocated that decision to the compensation committee. This challenge also cannot survive scrutiny.

Under the Company's governing documents the board of directors was responsible for selecting the corporation's officers, but under the compensation committee charter, the committee was responsible for establishing and approving the salaries, together with benefits and stock options, of the Company's CEO and President. The compensation committee also had the charter-imposed duty to "approve employment contracts, or contracts at will" for "all corporate officers who are members of the Board of Directors regardless of salary." That is exactly what occurred here. The full board ultimately selected Ovitz as President, and the compensation committee considered and ultimately approved the OEA, which embodied the terms of Ovitz's employment, including his compensation.

The Delaware General Corporation Law (DGCL) expressly empowers a board of directors to appoint committees and to delegate to them a broad range of responsibilities, which may include setting executive compensation. Nothing in the DGCL mandates that the entire board must make those decisions. At Disney, the responsibility to consider and approve executive compensation was allocated to the compensation committee, as distinguished from the full board. The Chancellor's ruling—that executive compensation was to be fixed by the compensation committee—is legally correct.

In the Court of Chancery the shareholders argued that the board had failed to exercise due care, using a director-by-director, rather than a collective analysis. In this Court, however, the shareholders argue that the Chancellor erred in following that very approach. An about-face, the shareholders now claim that in determining whether the board breached its duty of care, the Chancellor was legally required to evaluate the actions of the old board collectively.

We reject this argument, without reaching its merits, for two separate reasons. To begin with, the argument is precluded by Rule 8 of this Court, which provides that arguments not fairly presented to the trial court will not be considered by this Court. The argument also fails because nowhere do shareholders identify how this supposed error caused them any prejudice. The Chancellor viewed the conduct of each director individually, and found that no director had breached his or her fiduciary duty of care (as members of the full board) in electing Ovitz as President or (as members of the compensation committee) in determining Ovitz's compensation. If, as shareholders now argue, a due care analysis of the board's conduct must be made collectively, it is incumbent upon them to show how such a collective analysis would yield a different result. The shareholders' failure to do that dooms their argument on this basis as well.

The shareholders next challenge the Chancellor's determination that although the compensation committee's decision-making process fell far short of corporate governance "best practices," the committee members breached no duty of care in considering and approving the NFT terms of the OEA. That conclusion is reversible error, the shareholders claim, because the record establishes that the compensation committee members did not properly inform themselves of the material facts and, hence, were grossly negligent in approving the NFT provisions of the OEA.

The overall thrust of that claim is that the compensation committee approved the OEA with NFT provisions that could potentially result in an enormous payout, without informing themselves of what the full magnitude of that payout could be. The Court of Chancery found that the compensation committee members were adequately informed.

In our view, a helpful approach is to compare what actually happened here to what would have occurred had the committee followed a "best practices" (or "best case") scenario, from a process standpoint. In a "best case" scenario, all committee members would have received, before or at the committee's first meeting on September 26, 1995, a spreadsheet or similar document prepared by (or with the assistance of) a compensation expert (in this case, Graef Crystal). Making different, alternative assumptions, the spreadsheet would disclose the amounts that Ovitz could receive under the OEA in each circumstance that might foreseeably arise. One variable in that matrix of possibilities would be the cost to Disney of a non-fault termination for each of the five years of the initial term of the OEA. The contents of the spreadsheet would be explained to the committee members, either by the expert who prepared it or by a fellow committee member similarly knowledgeable about the subject. That spreadsheet, which ultimately would become an exhibit to the minutes of the compensation committee meeting, would form the basis of the committee's deliberations and decision.

Had that scenario been followed, there would be no dispute (and no basis for litigation) over what information was furnished to the committee members or when it was furnished. Regrettably, the committee's informational and decision-making process used here was not so tidy. That is one reason why the Chancellor found that although the committee's process did not fall below the level required for a proper exercise of due care, it did fall short of what best practices would have counseled.

The Disney compensation committee met twice: on September 26 and October 16, 1995. The minutes of the September 26 meeting reflect that the committee approved the terms of the OEA (at that time embodied in the form of a letter agreement), except for the option grants, which were not approved until

October 16—after the Disney stock incentive plan had been amended to provide for those options. At the September 26 meeting, the compensation committee considered a "term sheet" which, in summarizing the material terms of the OEA, relevantly disclosed that in the event of a non-fault termination, Ovitz would receive: (i) the present value of his salary (\$1 million per year) for the balance of the contract term, (ii) the present value of his annual bonus payments (computed at \$7.5 million) for the balance of the contract term, (iii) a \$10 million termination fee, and (iv) the acceleration of his options for 3 million shares, which would become immediately exercisable at market price.

Thus, the compensation committee knew that in the event of an NFT, Ovitz's severance payment alone could be in the range of \$40 million cash, plus the value of the accelerated options. Because the actual payout to Ovitz was approximately \$130 million, of which roughly \$38.5 million was cash, the value of the options at the time of the NFT payout would have been about \$91.5 million. Thus, the issue may be framed as whether the compensation committee members knew, at the time they approved the OEA, that the value of the option component of the severance package could reach the \$92 million order of magnitude if they terminated Ovitz without cause after one year. The evidentiary record shows that the committee members were so informed.

On this question the documentation is far less than what best practices would have dictated. There is no exhibit to the minutes that discloses, in a single document, the estimated value of the accelerated options in the event of an NFT termination after one year. The information imparted to the committee members on that subject is, however, supported by other evidence, most notably the trial testimony of various witnesses about spreadsheets that were prepared for the compensation committee meetings.

The compensation committee members derived their information about the potential magnitude of an NFT payout from two sources. The first was the value of the "benchmark" options previously granted to Eisner and Wells and the valuations by Raymond Watson [a Disney director, member of Disney's compensation committee, and past Disney board chairman who had helped structure Wells's and Eisner's compensation packages] of the proposed Ovitz options. Ovitz's options were set at 75% of parity with the options previously granted to Eisner and to Frank Wells. Because the compensation committee had established those earlier benchmark option grants to Eisner and Wells and were aware of their value, a simple mathematical calculation would have informed them of the potential value range of Ovitz's options. Also, in August and September 1995, Watson and Irwin Russell [a Disney director and chairman of the compensation committee] met with Crystal to determine

(among other things) the value of the potential Ovitz options, assuming different scenarios. Crystal valued the options under the Black-Scholes method, while Watson used a different valuation metric. Watson recorded his calculations and the resulting values on a set of spreadsheets that reflected what option profits Ovitz might receive, based upon a range of different assumptions about stock market price increases. Those spreadsheets were shared with, and explained to, the committee members at the September meeting.

The committee's second source of information was the amount of "downside protection" that Ovitz was demanding. Ovitz required financial protection from the risk of leaving a very lucrative and secure position at CAA, of which he was a controlling partner, to join a publicly held corporation to which Ovitz was a stranger, and that had a very different culture and an environment which prevented him from completely controlling his destiny. The committee members knew that by leaving CAA and coming to Disney, Ovitz would be sacrificing "booked" CAA commissions of \$150 to \$200 million—an amount that Ovitz demanded as protection against the risk that his employment relationship with Disney might not work out. Ovitz wanted at least \$50 million of that compensation to take the form of an "up-front" signing bonus. Had the \$50 million bonus been paid, the size of the option grant would have been lower. Because it was contrary to Disney policy, the compensation committee rejected the up-front signing bonus demand, and elected instead to compensate Ovitz at the "back end," by awarding him options that would be phased in over the five-year term of the OEA.

It is on this record that the Chancellor found that the compensation committee was informed of the material facts relating to an NFT payout. If measured in terms of the documentation that would have been generated if "best practices" had been followed, that record leaves much to be desired. The Chancellor acknowledged that, and so do we. But, the Chancellor also found that despite its imperfections, the evidentiary record was sufficient to support the conclusion that the compensation committee had adequately informed itself of the potential magnitude of the entire severance package, including the options, that Ovitz would receive in the event of an early NFT.

The OEA was specifically structured to compensate Ovitz for walking away from \$150 million to \$200 million of anticipated commissions from CAA over the five-year OEA contract term. This meant that if Ovitz was terminated without cause, the earlier in the contract term the termination occurred the larger the severance amount would be to replace the lost commissions. Indeed, because Ovitz was terminated after only one year, the total amount of his severance payment (about \$130 million) closely approximated the lower end of the range of Ovitz's forfeited commissions (\$150 million), less the compen-

sation Ovitz received during his first and only year as Disney's President. Accordingly, the Court of Chancery had a sufficient evidentiary basis in the record from which to find that, at the time they approved the OEA, the compensation committee members were adequately informed of the potential magnitude of an early NFT severance payout.

The shareholders' final claim in this category is that the Court of Chancery erroneously held that the remaining members of the old Disney board had not breached their duty of care in electing Ovitz as President of Disney. This claim lacks merit, because the arguments shareholders advance in this context relate to a different subject—the approval of the OEA, which was the responsibility delegated to the compensation committee, not the full board.

The Chancellor found and the record shows the following: well in advance of the September 26, 1995 board meeting the directors were fully aware that the Company needed—especially in light of Wells' death and Eisner's medical problems—to hire a "number two" executive and potential successor to Eisner. There had been many discussions about that need and about potential candidates who could fill that role even before Eisner decided to try to recruit Ovitz. Before the September 26 board meeting Eisner had individually discussed with each director the possibility of hiring Ovitz, and Ovitz's background and qualifications. The directors thus knew of Ovitz's skills, reputation and experience, all of which they believed would be highly valuable to the Company. The directors also knew that to accept a position at Disney, Ovitz would have to walk away from a very successful business—a reality that would lead a reasonable person to believe that Ovitz would likely succeed in similar pursuits elsewhere in the industry. The directors also knew of the public's highly positive reaction to the Ovitz announcement, and that Eisner and senior management had supported the Ovitz hiring. Indeed, Eisner, who had long desired to bring Ovitz within the Disney fold, consistently vouched for Ovitz's qualifications and told the directors that he could work well with Ovitz.

The board was also informed of the key terms of the OEA (including Ovitz's salary, bonus and options). Russell reported this information to them at the September 26, 1995 executive session, which was attended by Eisner and all non-executive directors. Russell also reported on the compensation committee meeting that had immediately preceded the executive session. And, both Russell and Watson responded to questions from the board. Relying upon the compensation committee's approval of the OEA and the other information furnished to them, the Disney directors, after further deliberating, unanimously elected Ovitz as President.

Based upon this record, we uphold the Chancellor's conclusion that, when electing Ovitz to the Disney presidency the

remaining Disney directors were fully informed of all material facts, and that the shareholders failed to establish any lack of due care on the directors' part.

B. Claims Arising from the Payment of the NFT Severance Payout to Ovitz

The shareholders contend that: (1) only the full Disney board with the concurrence of the compensation committee—but not Eisner alone—was authorized to terminate Ovitz; (2) because Ovitz could have been terminated for cause, Sanford Litvack [Disney's general counsel and member of the Disney board] and Eisner acted without due care and in bad faith in reaching the contrary conclusion; and (3) the business judgment rule presumptions did not protect the new Disney board's acquiescence in the NFT payout, because the new board was not entitled to rely upon Eisner's and Litvack's contrary advice.

The Chancellor determined that although the board as constituted upon Ovitz's termination (the "new board") had the authority to terminate Ovitz, neither that board nor the compensation committee was required to act, because Eisner also had, and properly exercised, that authority. The new board, the Chancellor found, was not required to terminate Ovitz under the company's internal documents. Without such a duty to act, the new board's failure to vote on the termination could not give rise to a breach of the duty of care or the duty to act in good faith.

Article Tenth of the Company's certificate of incorporation in effect at the termination plainly states that:

The officers of the Corporation shall be chosen in such a manner, shall hold their offices for such terms and shall carry out such duties as are determined solely by the Board of Directors, subject to the right of the Board of Directors to remove any officer or officers at any time with or without cause.

Article IV of Disney's bylaws provided that the Board Chairman/CEO "shall, subject to the provisions of the Bylaws and the control of the Board of Directors, have general and active management, direction, and supervision over the business of the Corporation and over its officers. . . ."

Read together, the governing instruments do not yield a single, indisputably clear answer, and could reasonably be interpreted either way. For that reason, with respect to this specific issue, the governing instruments are ambiguous.

Here, the extrinsic evidence clearly supports the conclusion that the board and Eisner understood that Eisner, as Board Chairman/CEO had concurrent power with the board to terminate Ovitz as President. Because Eisner possessed, and exercised, the power to terminate Ovitz unilaterally, we find that the Chancellor correctly concluded that the new board was not

required to act in connection with that termination, and, therefore, the board did not violate any fiduciary duty to act with due care or in good faith.

As the Chancellor correctly held, the same conclusion is equally applicable to the compensation committee. The only role delegated to the compensation committee was "to establish and approve compensation for Eisner, Ovitz and other applicable Company executives and high paid employees." The committee's September 26, 1995 approval of Ovitz's compensation arrangements "included approval for the termination provisions of the OEA, obviating any need to meet and approve the payment of the NFT upon Ovitz's termination."

Because neither the new board nor the compensation committee was required to take any action that was subject to fiduciary standards, that leaves only the actions of Eisner and Litvack for our consideration. The shareholders claim that in concluding that Ovitz could not be terminated "for cause," these defendants did not act with due care or in good faith. We next address that claim.

After considering the OEA and Ovitz's conduct, Litvack concluded, and advised Eisner, that Disney had no basis to terminate Ovitz for cause and that Disney should comply with its contractual obligations. Even though Litvack personally did not want to grant a NFT to Ovitz, he concluded that for Disney to assert falsely that there was cause would be both unethical and harmful to Disney's reputation. In conclusion, Litvack gave the proper advice and came to the proper conclusions when it was necessary. He was adequately informed in his decisions, and he acted in good faith for what he believed were the best interests of the Company.

With respect to Eisner, the Chancellor found that faced with a situation where he was unable to work well with Ovitz, who required close and constant supervision, Eisner had three options: 1) keep Ovitz as President and continue trying to make things work; 2) keep Ovitz at Disney, but in a role other than as President; or 3) terminate Ovitz. The first option was unacceptable, and the second would have entitled Ovitz to the NFT, or at the very least would have resulted in a costly lawsuit to determine whether Ovitz was so entitled. After an unsuccessful effort to "trade" Ovitz to Sony, that left only the third option, which was to terminate Ovitz and pay the NFT. The Chancellor found that in choosing this alternative, Eisner had breached no duty and had exercised his business judgment:

. . . I conclude that Eisner's actions in connection with the termination are, for the most part, consistent with what is expected of a faithful fiduciary. Eisner unexpectedly found himself confronted with a situation that did not have an easy solution. He weighed the alternatives, received advice from counsel and then exercised his business judgment in the manner he thought best for the corporation. Eisner knew all

the material information reasonably available when making the decision, he did not neglect an affirmative duty to act (or fail to cause the board to act) and he acted in what he believed were the best interests of the Company, taking into account the cost to the Company of the decision and the potential alternatives. Eisner was not personally interested in the transaction in any way that would make him incapable of exercising business judgment, and I conclude that the shareholders have not demonstrated by a preponderance of the evidence that Eisner breached his fiduciary duties or acted in bad faith in connection with Ovitz's termination and receipt of the NFT.

These determinations rest squarely on factual findings that, in turn, are based upon the Chancellor's assessment of the credibility of Eisner and other witnesses. Even though the Chancellor found much to criticize in Eisner's "imperial CEO" style of governance, nothing has been shown to overturn the factual basis for the Court's conclusion that, in the end, Eisner's conduct satisfied the standards required of him as a fiduciary.

The shareholders' third claim of error challenges the Chancellor's conclusion that the remaining new board members could

rely upon Litvack's and Eisner's advice that Ovitz could be terminated only without cause. The short answer to that challenge is that, for the reasons previously discussed, the advice the remaining directors received and relied upon was accurate. Moreover, the directors' reliance on that advice was found to be in good faith. Although formal board action was not necessary, the remaining directors all supported the decision to terminate Ovitz based on the information given by Eisner and Litvack. The Chancellor found credible the directors' testimony that they believed that Disney would be better off without Ovitz, and the shareholders offer no basis to overturn that finding.

To summarize, the Court of Chancery correctly determined that the decisions of the Disney defendants to approve the OEA, to hire Ovitz as President, and then to terminate him on an NFT basis, were protected business judgments, made without any violations of fiduciary duty. Having so concluded, it is unnecessary for the Court to reach the shareholders' contention that the Disney defendants were required to prove that the payment of the NFT severance to Ovitz was entirely fair.

Judgment for Eisner and the other directors affirmed.

Board Opposition to Acquisition of Control of a Corporation In the last 45 years, many outsiders have attempted to acquire control of publicly held corporations. Typically, these outsiders (called **raiders**) will make a **tender offer** for the shares of a corporation (called the **target**). A tender offer is an offer to the shareholders to buy their shares at a price above the current market price. The raider hopes to acquire a majority of the shares, which will give it control of the target corporation.

Most tender offers are opposed by the target corporation's management. The defenses to tender offers are many and varied, and they carry colorful names, such as the Pac-Man defense, the white knight, greenmail, the poison pill, and the lock-up option. See Figure 1 for definitions of these and other defenses.

When takeover defenses are successful, shareholders of the target may lose the opportunity to sell their shares at a price up to twice the market price of the shares prior to the announcement of the hostile bid. Frequently, the loss of this opportunity upsets shareholders, who then decide to sue the directors who have opposed the tender offer. Shareholders contend that the directors have opposed the tender offer only to preserve their corporate jobs. Shareholders also argue that the target corporation's

interests would have been better served if the tender offer had succeeded.

Generally, courts have refused to find directors liable for opposing a tender offer because the business judgment rule applies to a board's decision to oppose a tender offer.

Nonetheless, the business judgment rule will not apply when the directors make a decision to oppose the tender offer before they have carefully studied it. In addition, if the directors' actions indicate that they opposed the tender offer in order to preserve their jobs, they will be liable to the corporation.

Court decisions have seemingly modified the business judgment rule as it is applied in the tender offer context. For example, in *Unocal Corp. v. Mesa Petroleum Co.*,³ the Supreme Court of Delaware upheld the application of the business judgment rule to a board's decision to block a hostile tender offer by making a tender offer for its own shares that excluded the raider.⁴ But in so ruling, the court held that the board may use only those defense tactics that are *reasonable* compared to the takeover threat. The board

³493 A.2d 946 (Del. Sup. Ct. 1985).

⁴Discriminatory tender offers are now illegal pursuant to Securities Exchange Act Rule 13e-4.

Figure 1 Tender Offer Defenses

**Greenmail**

The target's repurchase of its shares from the raider at a substantial profit to the raider, upon the condition that the raider sign a standstill agreement in which it promises not to buy additional shares of the target for a stated period of time.

**White Knight**

A friendly tender offeror whom management prefers over the original tender offeror — called a black knight. The white knight rescues the corporation from the black knight (the raider) by offering more money for the corporation's shares.

**Pac-Man**

The target corporation turns the tables on the tender offeror or raider (which is often another publicly held corporation) by making a tender offer for the raider's shares. As a result, two tender offerors are trying to buy each other's shares. This is similar to the Pac-Man video game, in which Pac-Man and his enemies chase each other.

**Golden Parachutes**

An incentive to attract top managers, a golden parachute requires a corporation to make a large severance payment to a top level executive such as the CEO when there is a change in control of the corporation. Payments to an individual executive may exceed \$500 million. The severance agreement in *Grimes v. Donald* on page 1052 was a golden parachute.

**Scorched Earth Tactics**

Borrowed from a war tactic, scorched earth tactics attack the raider and its management directly and indiscriminately, like a tank with a flame thrower. These tactics include public relations campaigns in which the target points out the business, legal, and ethical failings of the raider and its management. The target typically warns its employees and communities that the raider will close the target's business in its current locations and move the jobs to another state or country. Finally, the target sues the raider alleging that the hostile takeover violates state corporation law, federal and state securities law, and antitrust law.

**Long-Range Acquisition Strategy**

A corporation should have a long-run strategy for expansion of its business, including by acquisition. That strategy may be to maintain a narrow business plan that allows the corporation and its management to focus on its core competencies. Or the strategy may be to seek new business opportunities that complement current business operations. An acquisition strategy allows the board of directors to oppose a hostile takeover that threatens the strategy, in accordance with the *Unocal* test. In the *Paramount* case on page 1065, Time, Inc., was better set to oppose Paramount's bid because Time's board had a long-range acquisition strategy requiring protection of the editorial integrity of Time's magazine.

**Lock-Up Option**

Used in conjunction with a white knight to ensure the success of the white knight's bid. The target and the white knight agree that the white knight will buy a highly valuable asset of the target at a very attractive price for the white knight (usually a below-market price) if the raider succeeds in taking over the target. For example, a movie company may agree to sell its film library to the white knight.

**Friendly Shareholders**

Establishing employee stock option plans (ESOPs), by which employees of the corporation purchase the corporation's shares, and selling the corporation's shares to other shareholders likely to be loyal to management, such as employee pension funds and people in the community in which the corporation conducts its business, may create a significant percentage of friendly shareholders that are not likely to tender their shares to a raider who may be perceived as hostile to the continuation of the corporation's business in the local community. Thus, building and maintaining a base of friendly shareholders make it easier to defeat a raider.

**Poison Pill**

Also called a shareholders' rights plan. There are many types, but the typical poison pill involves the target's issuance of a new class of preferred shares to its common shareholders. The preferred shares have rights (share options) attached to them. These rights allow the target's shareholders to purchase shares of the raider or shares of the target at less than fair market value. The poison pill deters hostile takeover attempts by threatening the raider and its shareholders with severe dilutions in the value of the shares they hold.

**Stock Trading Surveillance Program**

A target should watch the volume of trading in its stock, looking for unexplained spikes in volume that would indicate a future hostile bidder is acquiring a toe-hold in the target's stock prior to announcing a hostile takeover. By detecting abnormal trading in its stock, the target obtains advance knowledge of an impending hostile bid and will have additional time to implement its antitakeover strategy.

**Control Share Law**

A target company may incorporate in a state with a so-called Control Share Law. When a raider acquires 20 percent of the target's shares in a short period of time (say 90 days), the control share law renders the shares nonvoting, unless the target's board of directors opts out of the control share law or the target's shareholders vote to allow the raider to vote the shares. The effect is to diminish the ability of a raider to acquire voting control of the target without the consent of the target. Since most raiders are unwilling to risk that shareholders will deny them voting power, hostile takeovers of companies incorporated in control share law states are mostly deterred.

may consider a variety of concerns, including the inadequacy of the price offered, nature and timing of the offer, questions of illegality, the impact on constituencies other than shareholders (i.e., creditors, customers, employees, and perhaps even the community generally), the risk of nonconsummation, and the quality of securities being offered in the exchange.

In *Unocal*, the threat was a two-tier, highly coercive tender offer. In the typical two-tier offer, the raider first offers cash for a majority of the shares. After acquiring a majority of the shares, the offeror initiates the second tier, in which the remaining shareholders are forced to sell their shares for a package of securities less attractive than the first tier. Because shareholders fear that they will be forced to take the less attractive second-tier securities if they fail to tender during the first tier, shareholders—including those who oppose the offer—are coerced into tendering during the first tier. *Unocal* and later cases specifically authorize the use of defenses to defeat a coercive two-tier tender offer.

Since its decision in *Unocal*, the Supreme Court of Delaware has applied this modified business judgment rule to validate a poison pill tender offer defense tactic in *Moran v. Household Int'l, Inc.*⁵ and to invalidate a lock-up option tender offer defense in the *Revlon*⁶ case. These

cases confirmed the *Unocal* holding that the board of directors must show that:

1. It had reasonable grounds to believe that a danger to corporate policy and effectiveness was posed by the takeover attempt.
2. It acted primarily to protect the corporation and its shareholders from that danger.
3. The defense tactic was reasonable in relation to the threat posed to the corporation.

Such a standard appeared to impose a higher standard on directors than the rational basis requirement of the business judgment rule, which historically has been interpreted to require only that a decision of a board not be manifestly unreasonable. In addition, the *Revlon* case required the board to establish an auction market for the company and to sell it to the highest bidder when the directors have abandoned the long-term business objectives of the company by embracing a bust-up of the company.

In the following *Paramount v. Time* case, the Supreme Court of Delaware expanded board discretion in fighting hostile takeovers, holding that a board may oppose a hostile takeover provided the board had a *preexisting, deliberately conceived corporate plan* justifying its opposition. The existence of such a plan enabled Time's board to meet the reasonable-tactic element of the *Unocal* test.

⁵500 A.2d 346 (Del. Sup. Ct. 1985).

⁶*Revlon Inc. v. MacAndrews & Forbes Holdings, Inc.*, 506 A.2d 173 (Del. S. Ct. 1986).

Paramount Communications, Inc. v. Time, Inc. 571 A.2d 1140 (Del. Sup. Ct. 1989)

Since 1983, Time, Inc., had considered expanding its business beyond publishing magazines and books, owning Home Box Office and Cinemax, and operating television stations. In 1988, Time's board approved in principle a strategic plan for Time's acquisition of an entertainment company. The board gave management permission to negotiate a merger with Warner Communications, Inc. The board's consensus was that a merger of Time and Warner was feasible, but only if Time controlled the resulting corporation, preserving the editorial integrity of Time's magazines. The board concluded that Warner was the superior candidate because Warner could make movies and TV shows for HBO, Warner had an international distribution system, Warner was a giant in the music business, Time and Warner would control half of New York City's cable TV system, and the Time network could promote Warner's movies.

Negotiations with Warner broke down when Warner refused to agree to Time's dominating the combined companies. Time continued to seek expansion, but informal discussions with other companies terminated when it was suggested the other companies purchase Time or control the resulting board. In January 1989, Warner and Time resumed negotiations, and on March 4, 1989, they agreed to a combination by which Warner shareholders would own 62 percent of the resulting corporation, to be named Time-Warner. To retain the editorial integrity of Time, the merger agreement provided for a board committee dominated by Time representatives.

On June 7, 1989, Paramount Communications, Inc., announced a cash tender offer for all of Time's shares at \$175 per share. (The day before, Time shares traded at \$126 per share.) Time's financial advisers informed the outside

directors that Time's auction value was materially higher than \$175 per share. The board concluded that Paramount's \$175 offer was inadequate. Also, the board viewed the Paramount offer as a threat to Time's control of its own destiny and retention of the Time editorial policy; the board found that a combination with Warner offered greater potential for Time.

In addition, concerned that shareholders would not comprehend the long-term benefits of the merger with Warner, on June 16, 1989, Time's board recast its acquisition with Warner into a two-tier acquisition, in which it would make a tender offer to buy 51 percent of Warner's shares for cash immediately and later buy the remaining 49 percent for cash and securities. The tender offer would eliminate the need for Time to obtain shareholder approval of the transaction.

On June 23, 1989, Paramount raised its offer to \$200 per Time share. Three days later, Time's board rejected the offer as a threat to Time's survival and its editorial integrity; the board viewed the Warner acquisition as offering greater long-term value for the shareholders. Time shareholders and Paramount then sued Time and its board to enjoin Time's acquisition of Warner. The trial court held for Time. Paramount and other Time shareholders appealed to the Supreme Court of Delaware.

Horsely, Justice

Our decision does not require us to pass on the wisdom of the board's decision. That is not a court's task. Our task is simply to determine whether there is sufficient evidence to support the initial Time-Warner agreement as the product of a proper exercise of business judgment.

We have purposely detailed the evidence of the Time board's deliberative approach, beginning in 1983–84, to expand itself. Time's decision in 1988 to combine with Warner was made only after what could be fairly characterized as an exhaustive appraisal of Time's future as a corporation. Time's board was convinced that Warner would provide the best fit for Time to achieve its strategic objectives. The record attests to the zealotry of Time's executives, fully supported by their directors, in seeing to the preservation of Time's perceived editorial integrity in journalism. The Time board's decision to expand the business of the company through its March 4 merger with Warner was entitled to the protection of the business judgment rule.

The revised June 16 agreement was defense-motivated and designed to avoid the potentially disruptive effect that Paramount's offer would have had on consummation of the proposed merger were it put to a shareholder vote. Thus, we decline to apply the traditional business judgment rule to the revised transaction and instead analyze the Time board's June 16 decision under *Unocal*.

In *Unocal*, we held that before the business judgment rule is applied to a board's adoption of a defensive measure, the burden will lie with the board to prove (a) reasonable grounds for believing that a danger to corporate policy and effectiveness existed; and (b) that the defensive measure adopted was reasonable in relation to the threat posed.

Paramount argues a hostile tender offer can pose only two types of threats: the threat of coercion that results from a two-tier offer promising unequal treatment for nontendering shareholders; and the threat of inadequate value from an all-shares,

all-cash offer at a price below what a target board in good faith deems to be the present value of its shares.

Paramount would have us hold that only if the value of Paramount's offer were determined to be clearly inferior to the value created by management's plan to merge with Warner could the offer be viewed—objectively—as a threat.

Paramount's position represents a fundamental misconception of our standard of review under *Unocal* principally because it would involve the court in substituting its judgment as to what is a "better" deal for that of a corporation's board of directors. The usefulness of *Unocal* as an analytical tool is precisely its flexibility in the face of a variety of fact scenarios. Thus, directors may consider, when evaluating the threat posed by a takeover bid, the inadequacy of the price offered, nature and timing of the offer, questions of illegality, the impact on constituencies other than shareholders, the risk of nonconsummation, and the quality of securities being offered in the exchange.

The Time board reasonably determined that inadequate value was not the only threat that Paramount's all-cash, all-shares offer could present. Time's board concluded that Paramount's offer posed other threats. One concern was that Time shareholders might elect to tender into Paramount's cash offer in ignorance or a mistaken belief of the strategic benefit which a business combination with Warner might produce.

Paramount also contends that Time's board had not duly investigated Paramount's offer. We find that Time explored the available entertainment companies, including Paramount, before determining that Warner provided the best strategic "fit." In addition, Time's board rejected Paramount's offer because Paramount did not serve Time's objectives or meet Time's needs. Time's board was adequately informed of the potential benefits of a transaction with Paramount. Time's failure to negotiate cannot be fairly found to have been uninformed. The evidence supporting this finding is materially enhanced by the

fact that 12 of Time's 16 board members were outside independent directors.

We turn to the second part of the *Unocal* analysis. The obvious requisite to determining the reasonableness of a defensive action is a clear identification of the nature of the threat. This requires an evaluation of the importance of the corporate objective threatened; alternative methods of protecting that objective; impacts of the defensive action; and other relevant factors.

The fiduciary duty to manage a corporate enterprise includes the selection of a time frame for achievement of corporate goals. Directors are not obliged to abandon a deliberately conceived corporate plan for a short-term shareholder profit

unless there is clearly no basis to sustain the corporate strategy. Time's responsive action to Paramount's tender offer was not aimed at "cramming down" on its shareholders a management-sponsored alternative, but rather had as its goal the carrying forward of a preexisting transaction in an altered form. Thus, the response was reasonably related to the threat. The revised agreement did not preclude Paramount from making an offer for the combined Time-Warner company or from changing the conditions of its offer so as not to make the offer dependent upon the nullification of the Time-Warner agreement. Thus, the response was proportionate.

Judgment for Time affirmed

Complying with the Unocal Test To avoid liability when opposing a takeover of the corporation, the board of directors must act in a manner similar to which it complies with the business judgment rule. First, the board must make a reasonable investigation into the threats the takeover poses to the corporation's policies and effectiveness. Having a preexisting acquisition and expansion plan, as Time, Inc., had in the *Paramount* case, will provide a basis for determining whether there is an threat to the company's policies. An investment banker can help the company investigate the facts that reveal threats to the corporation and help define an acquisition strategy, if one does not currently exist.

Second, the board must be motivated primarily to protect the company from the raider's threat, not to save their positions as directors, including the compensation and power that go with the position of director. The *Unocal* test recognizes that directors may be conflicted by their interest in saving their jobs, yet it allows directors to oppose the takeover if they mostly are concerned about protecting the company from the takeover's threat to the company's policies, such as a preexisting acquisition or expansion strategy that would be frustrated by the takeover.

Third, the board may adopt only those takeover defenses that are reasonable in relation to the threat. While this requirement seems to limit board discretion, in practice once the board has identified a credible threat to the corporation's policies, the board may engage in nearly any legal maneuver to stop that threat. That is especially true if the threat is to a preexisting acquisition or expansion strategy, such as a long-existing corporate strategy to remain an independent company or to grow by purchasing smaller competitors.

Duties of Loyalty Directors and officers owe a duty of **utmost loyalty and fidelity** to the corporation. Judge Benjamin Cardozo stated this duty of trust. He declared that a director:

owes loyalty and allegiance to the corporation—a loyalty that is undivided and an allegiance that is influenced by no consideration other than the welfare of the corporation. Any adverse interest of a director will be subjected to a scrutiny rigid and uncompromising. He may not profit at the expense of his corporation and in conflict with its rights; he may not for personal gain divert unto himself the opportunities which in equity and fairness belong to his corporation.⁷

Directors and officers owe the corporation the same duties of loyalty that agents owe their principals, though many of these duties have special names in corporation law. The most important of these duties of loyalty are the duties not to *self-deal*, not to *usurp a corporate opportunity*, not to *oppress minority shareholders*, and not to *trade on inside information*.

Conflicting Interest Transactions A director or officer has a conflicting interest when a director or officer deals with his corporation. The director or officer with a **conflict of interest** may prefer his own interests over those of the corporation. The director's or officer's interest may be *direct*, such as his interest in selling his land to the corporation, or it may be *indirect*, such as his interest in having another business of which he or his family is an owner, director, or officer supply

⁷*Meinhard v. Salmon*, 164 N.E.2d 545, 546 (N.Y. Ct. App. 1928).

goods to the corporation. When a director has a conflict of interest, the director's transaction with the corporation may be voided or rescinded.

Under the MBCA, a director's conflicting interest transaction will not be voided merely on the grounds of a director's conflict of interest when *any one* of the following is true:

1. The transaction has been approved by a majority of informed, disinterested directors,
2. The transaction has been approved by a majority of the shares held by informed, disinterested shareholders, or
3. The transaction is fair to the corporation.

Nonetheless, even when disinterested directors' or shareholders' approval has been obtained, courts will void a conflict-of-interest transaction that is unfair to the corporation. Therefore, every corporate transaction in which a director has a conflict of interest must be fair to the corporation. If the transaction is fair, the interested director is excused from liability to the corporation. A transaction is fair if reasonable persons in an *arm's-length bargain* would have bound the corporation to it. This standard is often called the **intrinsic fairness standard**.

The function of disinterested director or disinterested shareholder approval of a conflict-of-interest transaction is merely to shift the burden of proving unfairness. The burden of proving fairness lies initially on the interested

director. The burden of proof shifts to the corporation that is suing the interested officer or director if the transaction was approved by the board of directors or the shareholders. Nonetheless, when disinterested directors approve an interested person transaction, substantial deference is given to the decision in accordance with the business judgment rule, especially when the disinterested directors compose a majority of the board.

Generally, *unanimous* approval of an interested person transaction by informed shareholders *conclusively* releases an interested director or officer from liability even if the transaction is unfair to the corporation. The rationale for this rule is that fully informed shareholders should know what is best for themselves and their corporation.

Complying with the Intrinsic Fairness Standard

Complying with the intrinsic fairness standard is not much different than complying with the business judgment rule, despite the higher standard of conduct. The board must make a reasonable investigation to discover facts that will permit an informed decision. Almost always, the board will be aided in its investigation by officers and other employees of the corporation and by investment bankers, other consultants, and legal counsel. When relying on others' investigations, the board must receive written and oral reports in sufficient time to absorb the information, to ask questions of those who made the investigation, and to debate and to deliberate after receiving all relevant information.

Ethics in Action

Sarbanes–Oxley Act of 2002 Prohibits Loans to Management

Early corporation law prohibited loans by a corporation to its officers or directors, on the grounds that such loans may result in looting of corporate assets. Today, however, the MBCA and most other general corporation statutes allow loans to directors and officers, although they require either shareholder approval or compliance with conflicting interest transaction rules.

In 2002, Congress took steps to return to the past. After it was revealed that several executives of public companies were using their corporations as personal banks to fund extravagant lifestyles—some of which loans were never repaid and some of which corporations became bankrupt—Congress included in the Sarbanes–Oxley Act of 2002 a section generally prohibiting public companies from making loans to their directors

or executive officers. This includes the company's CEO and CFO, any vice president in charge of a principal business unit or function, and any other officer or other person who performs a policy-making function. If the corporation is not a public company or if the loan is made to a nonexecutive, the Sarbanes–Oxley Act does not prohibit the corporate loan.

- Do you think the Congress has gone too far in banning loans to directors and officers? What are the ethical justifications to ban loans? What would a rights theorist argue? What would a utilitarian argue? What would a profit maximizer argue?
- Do you think that the Sarbanes–Oxley Act should have banned all corporation loans to its employees? Would you prohibit a bank from making loans to its employees, officers, and directors?

Investment bankers, other consultants, and legal counsel are especially helpful in ascertaining and disclosing any director's conflict of interest. By compiling a list of questions and quizzing the board members, consultants can help the board determine the extent of a director's conflict and ensure that the conflict is fully disclosed to the board. They should also make sure that only board members who are independent of the conflicted directors approve the conflicting interest transaction.

Finally, the board must make a decision that is fair to the corporation. Investment bankers and other consultants can help with this determination by demonstrating the decision's close fit with the firm's corporate strategy and the facts revealed by a reasonable investigation. They must ensure the decision is one that a reasonable person would make acting at arm's length.

Parent-Subsidiary Transactions Self-dealing is a concern when a parent corporation *dominates* a subsidiary corporation. Often, the subsidiary's directors will be directors or officers of the parent also. When persons with dual directorships approve transactions between the parent and the subsidiary, the opportunity for *overreaching* arises. There may be *no arm's-length bargaining* between the two corporations. Hence, such transactions must meet the *intrinsic fairness* test.

Usurpation of a Corporate Opportunity Directors and officers may steal not only assets of their corporations (such as computer hardware and software) but also *opportunities* that their corporations could have exploited. Both types of theft are equally wrongful.

As fiduciaries, directors and officers are liable to their corporation for **usurping corporate opportunities**.

The opportunity must come to the director or officer *in her corporate capacity*. Clearly, opportunities received at the corporate offices are received by the manager in her corporate capacity. In addition, courts hold that CEOs and other high level officers are nearly always acting in their corporate capacities, even when they are away from their corporate offices.

The opportunity must have a *relation or connection* to an *existing or prospective* corporate activity. Some courts apply the *line of business test*, considering how closely related the opportunity is to the lines of business in which the corporation is engaged. Other courts use the *interest or expectancy test*, requiring the opportunity to relate to property in which the corporation has an existing interest or in which it has an expectancy growing out of an existing right.

The corporation must be *able financially* to take advantage of the opportunity. Managers are required to make a good faith effort to obtain external financing for the corporation, but they are not required to use their personal funds to enable the corporation to take advantage of the opportunity.

A director or officer is free to exploit an opportunity that has been rejected by the corporation.

In the following case, *Guth v. Loft*, the court found that an opportunity to become the manufacturer of Pepsi-Cola syrup was usurped by the president of a corporation that manufactured beverage syrups and operated soda fountains. Note that the court ordered the typical remedy for usurpation: the officers forfeiture to the corporation of all benefits the officer received.

Guth v. Loft, Inc.

5 A. 2d 503 (Del. Sup. Ct. 1939)

Loft, Inc., manufactured and sold candies, syrups, and beverages and operated 115 retail candy and soda fountain stores. Loft sold Coca-Cola at all of its stores, but it did not manufacture Coca-Cola syrup. Instead, it purchased its 30,000-gallon annual requirement of syrup and mixed it with carbonated water at its various soda fountains.

In May 1931, Charles Guth, the president and general manager of Loft, became dissatisfied with the price of Coca-Cola syrup and suggested to Loft's vice president that Loft buy Pepsi-Cola syrup from National Pepsi-Cola Company, the owner of the secret formula and trademark for Pepsi-Cola. The vice president said he was investigating the purchase of Pepsi syrup.

Before being employed by Loft, Guth had been asked by the controlling shareholder of National Pepsi, Megargel, to acquire the assets of National Pepsi. Guth refused at that time. However, a few months after Guth had suggested that Loft purchase Pepsi syrup, Megargel again contacted Guth about buying National Pepsi's secret formula and trademark for only \$10,000. This time, Guth agreed to the purchase, and Guth and Megargel organized a new corporation, Pepsi-Cola Company, to acquire the Pepsi-Cola secret formula and trademark from National Pepsi. Eventually, Guth and his family's corporation owned a majority of the shares of Pepsi-Cola Company.

Very little of Megargel's or Guth's funds were used to develop the business of Pepsi-Cola. Instead, without the knowledge or consent of Loft's board of directors, Guth used Loft's working capital, credit, plant and equipment, and executives and employees to produce Pepsi-Cola syrup. In addition, Guth's domination of Loft's board of directors ensured that Loft would become Pepsi-Cola's chief customer.

By 1935, the value of Pepsi-Cola's business was several million dollars. Loft sued Guth, asking the court to order Guth to transfer to Loft his shares of Pepsi-Cola Company and to pay Loft the dividends he had received from Pepsi-Cola Company. The trial court found that Guth had usurped a corporate opportunity and ordered Guth to transfer the shares and to pay Loft the dividends. Guth appealed.

Layton, Chief Justice

Public policy demands of a corporate officer or director the most scrupulous observance of his duty to refrain from doing anything that would deprive the corporation of profit or advantage. The rule that requires an undivided and unselfish loyalty to the corporation demands that there shall be no conflict between duty and self-interest.

The real issue is whether the opportunity to secure a very substantial stock interest in a corporation to be formed for the purpose of exploiting a cola beverage on a wholesale scale was so closely associated with the existing business activities of Loft, and so essential thereto, as to bring the transaction within that class of cases where the acquisition of the property would throw the corporate officer purchasing it into competition with his company.

Guth suggests a doubt whether Loft would have been able to finance the project. The answer to this suggestion is two-fold. Loft's net asset position was amply sufficient to finance the enterprise, and its plant, equipment, executives, personnel and facilities were adequate. The second answer is that Loft's resources were found to be sufficient, for Guth made use of no other resources to any important extent.

Guth asserts that Loft's primary business was the manufacturing and selling of candy in its own chain of retail stores, and that it never had the idea of turning a subsidiary product into a highly advertised, nationwide specialty. It is contended that the Pepsi-Cola opportunity was not in the line of Loft's activities, which essentially were of a retail nature.

Loft, however, had many wholesale activities. Its wholesale business in 1931 amounted to over \$800,000. It was a large company by any standard, with assets exceeding \$9 million, excluding goodwill. It had an enormous plant. It paid enormous rentals. Guth, himself, said that Loft's success depended upon the fullest utilization of its large plant facilities. Moreover, it was a manufacturer of syrups and, with the exception of cola syrup, it supplied its own extensive needs. Guth, president of Loft, was an able and experienced man in that field. Loft, then, through its own personnel, possessed the technical knowledge, the practical business experience, and the resources necessary

for the development of the Pepsi-Cola enterprise. Conceding that the essential of an opportunity is reasonably within the scope of a corporation's activities, latitude should be allowed for development and expansion. To deny this would be to deny the history of industrial development.

We cannot agree that Loft had no concern or expectancy in the opportunity. Loft had a practical and essential concern with respect to some cola syrup with an established formula and trademark. A cola beverage has come to be a business necessity for soft drink establishments; and it was essential to the success of Loft to serve at its soda fountains an acceptable five-cent cola drink in order to attract into its stores the great multitude of people who have formed the habit of drinking cola beverages.

When Guth determined to discontinue the sale of Coca-Cola in the Loft stores, it became, by his own act, a matter of urgent necessity for Loft to acquire a constant supply of some satisfactory cola syrup, secure against probable attack, as a replacement; and when the Pepsi-Cola opportunity presented itself, Guth having already considered the availability of the syrup, it became impressed with a Loft interest and expectancy arising out of the circumstances and the urgent and practical need created by him as the directing head of Loft.

The fiduciary relation demands something more than the morals of the marketplace. Guth did not offer the Pepsi-Cola opportunity to Loft, but captured it for himself. He invested little or no money of his own in the venture, but commandeered for his own benefit and advantage the money, resources, and facilities of his corporation and the services of his officials. He thrust upon Loft the hazard, while he reaped the benefit. In such a manner he acquired for himself 91 percent of the capital stock of Pepsi-Cola, now worth many millions. A genius in his line he may be, but the law makes no distinction between the wrongdoing genius and the one less endowed.

Judgment for Loft affirmed.

Oppression of Minority Shareholders

Directors and officers owe a duty to manage a corporation in the best interests of the corporation and the shareholders as a whole. When, however, a group of shareholders has been isolated for beneficial treatment to the detriment of another isolated group of shareholders, the disadvantaged group may complain of **oppression**.

For example, oppression may occur when directors of a close corporation who are also the majority shareholders pay themselves high salaries yet refuse to pay dividends or to hire minority shareholders as employees of the corporation. Since there is no market for the shares of a close corporation (apart from selling to the other shareholders), these oppressed minority shareholders have investments that provide them no return. They receive no dividends or salaries, and they can sell their shares only to the other shareholders, who are usually unwilling to pay the true value of the shares.

Generally, courts treat oppression of minority shareholders the same way courts treat director self-dealing: The transaction must be intrinsically fair to the corporation and the minority shareholders.

A special form of oppression is the **freeze-out**. A freeze-out is usually accomplished by merging a corporation with a newly formed corporation under terms by which the minority shareholders do not receive shares of the new corporation but instead receive only cash or other securities. The minority shareholders are thereby *frozen out as shareholders*.

Going private is a special term for a freeze-out of shareholders of *publicly owned corporations*. Some public corporations discover that the burdens of public ownership exceed the benefits of being public. For example, the SEC requires public companies to provide to shareholders annual reports that include audited financial statements. The Sarbanes–Oxley Act has increased the cost of being public by requiring, in section 404, that annual reports include an internal control report acknowledging management’s responsibility to maintain “an adequate internal control structure and procedures for financial reports.” For some firms, section 404 compliance consumes as much as 3 percent of profits. Today, therefore, some publicly owned companies choose to freeze out their minority shareholders to avoid such burdens.

Freeze-Out Methods The two easiest ways to freeze out minority shareholders are the freeze-out merger and the reverse share split. With the freeze-out merger, the majority shareholders form a new corporation owned only by the majority shareholders. Articles of merger are drafted that will merge the old corporation into the new corporation. Under the merger terms, only shareholders

of the new corporation will survive as shareholders of the surviving new corporation; the shareholders of the old corporation will receive cash only. Since the majority shareholders control both corporations, the articles of merger will be approved by the directors and shareholders of both corporations. The freeze-out merger was used in the *Coggins* case, which follows at the end of this section.

Using a reverse share split to freeze out the minority shareholders is simpler. Here the articles are amended to reduce the number of outstanding shares by a multiplier, say 1/50,000, that will result in the majority shareholders having whole shares but the minority shareholders having only fractional shares. The articles amendment will be approved by directors and shareholders since the majority shareholder controls the corporation. After the reverse share split, corporation law permits the corporation to repurchase any fractional shares, even if the shareholders don’t consent. The corporation buys the minority shareholders’ fractional shares for cash, leaving only the majority shareholder owning the corporation.

Legal Standard Often, going private transactions appear abusive because the corporation goes public at a high price and goes private at a much lower price. Some courts have adopted a fairness test and a business purpose test for freeze-outs. Most states apply the **total fairness test** to freeze-outs. In the freeze-out context, total fairness has two basic aspects: *fair dealing* and *fair price*. Fair dealing requires disclosing material information to directors and shareholders and providing an opportunity for negotiation. A determination of fair value requires the consideration of all the factors relevant to the value of the shares, except speculative projections.

Some states apply the **business purpose test** to freeze-outs. This test requires that the freeze-out accomplish some legitimate business purpose and not serve the special interests of the majority shareholders or the managers.

Other states place no restrictions on freeze-outs provided a shareholder has a **right of appraisal**, which permits a shareholder to require the corporation to purchase his shares at a fair price.

In addition, the SEC requires a *publicly held* company to make a statement on the fairness of its proposed going private transaction and to discuss in detail the material facts on which the statement is based.

In the *Coggins* case, the court required that a freeze-out of minority shareholders of the New England Patriots football team meet both the business purpose and intrinsic fairness tests. The court held that freezing out the minority shareholders merely to allow the corporation to repay the majority shareholder’s personal debts was not a proper business purpose.

Coggins v. New England Patriots Football Club, Inc. 492 N.E.2d 1112 (Mass. Sup. Jud. Ct. 1986)

In 1959, the New England Patriots Football Club, Inc. (Old Patriots), was formed with one class of voting shares and one class of nonvoting shares. Each of the original 10 voting shareholders, including William H. Sullivan, purchased 10,000 voting shares for \$2.50 per share. The 120,000 nonvoting shares were sold for \$5 per share to the general public in order to generate loyalty to the Patriots football team. In 1974, Sullivan was ousted as president of Old Patriots. In November 1975, Sullivan succeeded in regaining control of Old Patriots by purchasing all 100,000 voting shares for \$102 per share. He again became a director and president of Old Patriots.

To finance his purchase of the voting shares, Sullivan borrowed \$5,350,000 from two banks. The banks insisted that Sullivan reorganize Old Patriots so that its income could be used to repay the loans made to Sullivan and its assets used to secure the loans. To make the use of Old Patriots' income and assets legal, it was necessary to freeze out the nonvoting shareholders. In November 1976, Sullivan organized a new corporation called the New Patriots Football Club, Inc. (New Patriots). Sullivan was the sole shareholder of New Patriots. In December 1976, the shareholders of Old Patriots approved a merger of Old Patriots and New Patriots. Under the terms of the merger, Old Patriots went out of business, New Patriots assumed the business of Old Patriots, Sullivan became the only owner of New Patriots, and the nonvoting shareholders of Old Patriots received \$15 for each share they owned.

David A. Coggins, a Patriots fan from the time of its formation and owner of 10 Old Patriots nonvoting shares, objected to the merger and refused to accept the \$15 per share payment for his shares. Coggins sued Sullivan and Old Patriots to obtain rescission of the merger. The trial judge found the merger to be illegal and ordered the payment of damages to Coggins and all other Old Patriots shareholders who voted against the merger and had not accepted the \$15 per share merger payment. Sullivan and Old Patriots appealed to the Massachusetts Supreme Judicial Court.

Liacos, Justice

When the director's duty of loyalty to the corporation is in conflict with his self-interest, the court will vigorously scrutinize the situation. The dangers of self-dealing and abuse of fiduciary duty are greatest in freeze-out situations like the Patriots merger, when a controlling shareholder and corporate director chooses to eliminate public ownership. Because the danger of abuse of fiduciary duty is especially great in a freeze-out merger, the court must be satisfied that the freeze-out was for the advancement of a legitimate corporate purpose. If satisfied that elimination of public ownership is in furtherance of a business purpose, the court should then proceed to determine if the transaction was fair by examining the totality of the circumstances. Consequently, Sullivan and Old Patriots bear the burden

of proving, first, that the merger was for a legitimate business purpose, and second, that, considering the totality of circumstances, it was fair to the minority.

Sullivan and Old Patriots have failed to demonstrate that the merger served any valid corporate objective unrelated to the personal interests of Sullivan, the majority shareholder. The sole reason for the merger was to effectuate a restructuring of Old Patriots that would enable the repayment of the personal indebtedness incurred by Sullivan. Under the approach we set forth above, there is no need to consider further the elements of fairness of a transaction that is not related to a valid corporate purpose.

Judgment for Coggins affirmed as modified.

Trading on Inside Information Officers and directors have *confidential access* to nonpublic information about the corporation. Sometimes, directors and officers purchase their corporation's securities with knowledge of confidential information. Often, disclosure of previously nonpublic, **inside information** affects the value of the corporation's securities. Therefore, directors and officers may make a profit when the prices of the securities increase after the inside information has been disclosed publicly. Shareholders of the corporation

claim that they have been harmed by such activity, either because the directors and officers misused confidential information that should have been used only for corporate purposes or because the directors and officers had an unfair informational advantage over the shareholders.

In this century, there has been a judicial trend toward finding a duty of directors and officers to disclose information that they have received confidentially from the corporation before they buy or sell the corporation's securities. As will be discussed fully in Chapter 45,

Securities Regulation, the illegality of insider trading is already federal law under the Securities Exchange Act; however, it remains only a minority rule under state corporation law.

Director's Right to Dissent A director who assents to an action of the board of directors may be held liable for the board's exceeding its authority or its failing to meet its duty of due care or loyalty. A director who attends a board meeting is deemed to have assented to any action taken at the meeting, unless he dissents.

Under the MBCA, to register his **dissent** to a board action, and thereby to protect himself from liability, the director must **not vote in favor** of the action and **must make his position clear** to the other board members. His position is made clear either by requesting that his dissent appear in the minutes or by giving written notice of his dissent to the chairman of the board at the meeting or to the secretary immediately after the meeting. These procedures ensure that the dissenting director will attempt to dissuade the board from approving an imprudent action.

Generally, directors are not liable for failing to attend meetings. However, a director is liable for *continually failing* to attend meetings, with the result that the director is unable to prevent the board from harming the corporation by its self-dealing.

Duties of Directors and Officers of Nonprofit Corporations Directors and officers of nonprofit corporations owe fiduciary duties to their corporations that are similar to the duties owed by managers of for-profit corporations. Directors and officers owe a duty of care and duties of loyalty to the nonprofit corporation. They must act in good faith, with the care of an ordinarily prudent person, and with a reasonable belief that they are acting in the best interests of the corporation. In addition, a director should not have a conflict of interest in any transaction of the nonprofit corporation. As with for-profit corporations, conflict-of-interest transactions must meet the intrinsic fairness standard. Finally, a nonprofit corporation may not lend money to a director.

Liability concerns of directors of nonprofit corporations, especially public benefit corporations in which directors typically receive no compensation, have made it difficult for some nonprofit corporations to find and retain directors. Therefore, the Model Nonprofit Corporation Act permits nonprofit corporations to limit or eliminate the liability of directors for breach of the duty of care. The articles may not limit or eliminate a director's liability for failing to act in good faith, engaging in intentional misconduct, breaching the duty of loyalty, or having a conflict of interest.

Ethics in Action

Sarbanes–Oxley Act Imposes Duties and Liabilities on Corporate Management

In the early 2000s, it was revealed that some high-level officers of public corporations reaped millions of dollars of bonuses and profits from their sale of their corporations' stock during periods in which the corporations' profits were fraudulently inflated. In the Sarbanes–Oxley Act, Congress took a two-barreled approach, increasing top management's responsibility for the accuracy of financial statements and eliminating management's ability to profit personally from misstated financial data.

First, the Sarbanes–Oxley Act requires the CEO and the CFO of public companies to certify that to their knowledge all financial information in annual and quarterly reports filed with the Securities and Exchange Commission fairly presents the financial condition of the company and does not include untrue or misleading material statements. The purpose of the certification requirement is to protect shareholders and

investors who rely on corporate financial statements. If a CEO or CFO certified materially false financial statements that she knew were false or misleading, she is subject to a fine of \$5 million and 20 years' imprisonment. In addition, the officer could have civil liability to shareholders far exceeding the fine limitation.

Second, the act requires the CEO and the CFO of a public company to disgorge any bonus, incentive-based or equity-based compensation, and the profit from the sale of corporate securities received during any period in which the corporation was required to restate a financial statement due to a wrongful material noncompliance with a financial reporting requirement. This reimbursement of the corporation applies to the CEO and the CFO even if the wrongdoing was by some other officer or employee. In addition, the act expands the disgorgement remedy available against any wrongdoing officer who receives bonuses or stock profits during the period of time the stock price is inflated by false financial information. The act permits recovery of not only improper gains but also any other relief necessary to protect and to mitigate harm to investors.

The Global Business Environment

Directors' Duties around the Globe

The fiduciary duties that American directors owe to their corporations are echoed in corporate law throughout the world. In Brazil, for example, an officer must apply the same principles he would apply in his own business. A Brazilian director breaches the duty of loyalty if the director uses inside information for his own benefit or for that of third parties, acts negligently in the use or protection of the company's rights, or engages in a business opportunity to gain personal advantage. For public companies, Brazil adds a duty that does

not exist under American corporation law: to supply information to the shareholders and the public. In the United States, this duty is generally imposed on the corporation, not the directors.

Under German law, the management board and supervisory board of an AG owe shareholders a duty of loyalty. Members of the management board have a statutory obligation of confidentiality, and each member of the management board must exercise the care of a diligent and prudent business executive.

Corporate and Management Liability for Torts and Crimes

When directors, officers, and other employees of the corporation commit torts and crimes while conducting corporate affairs, the issue arises concerning who has liability. Should the individuals committing the torts and crimes be held liable, the corporation, or both?

Liability of the Corporation For **torts**, the vicarious liability rule of *respondeat superior* applies to corporations. The only issue is whether an employee acted within the scope of her employment, which encompasses not only acts the employee is authorized to commit but may also include acts that the employee is expressly instructed to avoid. Generally, under the doctrine of *respondeat superior*, a corporation is liable for an employee's tort that is reasonably connected to the authorized conduct of the employee.

The traditional view was that a corporation could not be guilty of a **crime** because criminal guilt required intent. A corporation, not having a mind, could form no intent. Other courts held that a corporation was not a person for purposes of criminal liability.

Today, few courts have difficulty holding corporations liable for crimes. Modern criminal statutes either expressly provide that corporations may commit crimes or define the term *person* to include corporations. In addition, some criminal statutes designed to protect the public welfare do not require intent as an element of some crimes, thereby removing the grounds used by early courts to justify relieving corporations of criminal liability.

Courts are especially likely to impose criminal liability on a corporation when the criminal act is requested, authorized, or performed by:

1. The board of directors,
2. An officer,
3. Another person having responsibility for formulating company policy, or
4. A high level administrator having supervisory responsibility over the subject matter of the offense and acting within the scope of his employment.

In addition, courts hold a corporation liable for crimes of its agent or employee committed within the scope of his authority, even if a higher corporate official has no knowledge of the act and has not ratified it.

Directors' and Officers' Liability for Torts and Crimes

A person is always *liable for his own torts and crimes*, even when committed on behalf of his principal. Every person in our society is expected to exercise independent judgment and not merely to follow orders. Therefore, directors and officers are personally liable when they commit torts or crimes during the performance of their corporate duties.

A director or officer is usually not liable for the torts of employees of the corporation, since the corporation, not the director or the officer, is the principal. He will have **tort** liability, however, if he *authorizes* the tort or *participates* in its commission. A director or officer has **criminal** liability if she *requests*, *authorizes*, *conspires*, or *aids and abets* the commission of a crime by an employee.

The early 21st century has been a busy time for verdicts in criminal cases against CEOs accused of acceding to accounting irregularities or looting their companies in the late 1990s and early 2000s. Bernard Ebbers, former CEO of WorldCom, was found guilty of helping to mastermind the \$11 billion accounting fraud that saw the firm seek bankruptcy. Ebbers received a 25-year prison sentence. The jury rejected his defense that he knew nothing of the fraud that was orchestrated by WorldCom CFO Scott Sullivan. The jury believed that as CEO Ebbers must have known of the fraud and was motivated to prop up the price of WorldCom stock to increase the value of stock options he held. Sullivan, who pled guilty and testified against Ebbers, cooperated with the prosecution and received a five-year prison sentence, despite his central role in the fraud.

Also in 2005, Adelphia founder and former CEO John Rigas received a 15-year prison sentence and his son and former CFO Scott, 20 years, after being found guilty of looting Adelphia. According to prosecutors, the Rigases used Adelphia as their “private ATM” to provide \$50 million in cash advances, buy \$1.6 billion in securities, and repay \$252 million in margin loans. Also, Tyco’s former CEO Dennis Kozlowski received up to 25 years in prison for looting Tyco, including using company funds for his wife’s \$2 million birthday party. Kozlowski was also fined \$70 million and ordered to repay \$134 million to Tyco.

The following *Jensen* case involves one of the most highly publicized options backdating cases. The case is a primer on why corporations backdated options for their top executives and how courts determine an appropriate sentence, including imprisonment, for executives who willingly violate the law.

United States v. Jensen

537 F. Supp. 2d 1069 (N.D. Cal. 2008)

On March 18, 2006, The Wall Street Journal published an article analyzing how some companies were granting stock options to their executives. According to the article, companies issued a suspiciously high number of options at times when the stock price hit a periodic low, followed by a sharp price increase. The odds of these well-timed grants occurring by chance alone were astronomical—less likely than winning the lottery. Eventually it was determined that such buy-low, sell-high returns simply could not be the product of chance. In testimony before Congress, Professor Erik Lie identified three potential strategies to account for these well-timed stock option grants. The first strategy included techniques called “spring-loading” and “bullet-dodging.” The practice of “spring-loading” involved timing a stock option grant to precede an announcement of good news. The practice of “bullet-dodging” involved timing a stock option grant to follow an announcement of bad news. A second strategy included manipulating the flow of information—timing corporate announcements to match known future grant dates. A third strategy, backdating, involved cherry-picking past, and relatively low, stock prices to be the official grant date. Backdating occurs when the option’s grant date is altered to an earlier date with a lower, more favorable price to the recipient.

A company grants stock options to its officers, directors, and employees at a certain “exercise price,” giving the recipient the right to buy shares of the stock at that price, once the option vests. If the stock price rises after the date of the grant, the options have value. If the stock price falls after the date of the grant, the options have no value. Options with an exercise price equal to the stock’s market price are called “at-the-money” options. Options with an exercise price lower than the stock’s market price are called “in-the-money” options. By granting in-the-money, backdated options, a company effectively grants an employee an instant opportunity for profit.

Granting backdated options has important accounting consequences for the issuing company. For financial reporting purposes, companies granting in-the-money options have to recognize compensation expenses equal to the difference between the market price and the exercise price. APB 25 is the accounting rule that governed stock-based compensation through June 2005; it required companies to recognize this compensation expense for backdated options. For options granted at-the-money, a company did not have to recognize any compensation expenses under APB 25.

Backdating stock options by itself is not illegal. Purposefully backdated options that are properly accounted for and disclosed are legal. On the other hand, the backdating of options that is not disclosed or does not result in the recognition of a compensation expense is fraud.

A motive for fraudulent backdating may be to avoid recognizing a compensation expense, or a hit to the earnings, while awarding in-the-money options. To accomplish the fraud, those responsible assign an earlier date to the stock options—a

date where the stock price was attractively low—and pretend the option was awarded on that earlier date, rather than the real date. In other words, fraudulent backdating disguises in-the-money options (which require recognizing compensation expenses) as at-the-money options (which do not require recognizing compensation expenses). The paperwork and phony grant dates allow the company to avoid compensation expenses, while aware that the price on the true grant date is higher than the price on the phony grant date.

A company's failure to account properly for in-the-money options would inflate the bottom line such that the company's net income would be higher than it should have been from an accounting perspective. As a result, the company would report excessive earnings per share, one of the more important metrics that investors used to evaluate a company's performance.

After 2002, a company's ability to backdate fraudulently option grants became much more difficult. On August 29, 2002, Congress passed the Sarbanes–Oxley Act, which instituted new reporting requirements for stock option grants. Before Sarbanes–Oxley, an employee who received a stock option grant had to file financial forms with the SEC within 45 days after the company's fiscal year-end. After Sarbanes–Oxley, an employee must file financial forms with the SEC within two days of receiving the stock option grant. After Sarbanes–Oxley, a company fraudulently backdating stock options by a few weeks or months would not file the required SEC forms on time, raising red flags with the SEC.

There have been several highly publicized options backdating cases involving American corporations. One involved Brocade Communications issuing backdated options to its CEO Gregory Reyes. Not only were Brocade Communications and Reyes prosecuted for violating federal securities laws, but also Stephanie Jensen, a Brocade vice president and director of its human resources department. At their trial, Dr. John Garvey, an expert witness for the prosecution, provided testimony about the size of the compensation expenses that went unstated as a result of Brocade's options pricing practices. Dr. Garvey testified that Brocade failed to recognize more than \$173 million of compensation expenses in 2001 and more than \$161 million in 2002. He further testified that, if Brocade had properly accounted for the stock options it had backdated, then the company would have recorded a loss of \$110 million in 2001, rather than the profit of \$3 million it actually reported, and would have recorded a loss of \$45 million in 2002, rather than the profit of nearly \$60 million it actually reported.

In December 2007, a federal district court jury convicted Jensen of willingly and knowingly falsifying Brocade's records over a three-year period to conceal the actual date when stock options were granted to Reyes. The district court judge next considered whether a proper sentence for Jensen included imprisonment.

Breyer, Judge

The Securities Exchange Act's penalty provision, 15 U.S.C. § 78ff, precludes imprisonment "for the violation of any rule or regulation if [the defendant] proves that he had no knowledge of such rule or regulation." Concerned that a great mass of rules and regulations would be issued by the SEC in the wake of the Securities Act and Securities Exchange Act, Congress enacted the No Knowledge Clause, thereby rendering ludicrous a strict adherence to the fiction of presumed knowledge of the law.

The No Knowledge Clause is an affirmative defense to a sentence of imprisonment. As such, the defendant bears the burden of proving no knowledge by a preponderance of the evidence. To be more specific, Jensen bears the burden of proving that she did not know there was any applicable SEC rule prohibiting the falsification of books and records. It is not a defense for Jensen to argue that she did not know, for example, the precise number or common name of the rule, the book and page where it was to be found, or the date upon which it was promulgated.

Accordingly, the question becomes whether Jensen has satisfied her burden of proving by a preponderance that she was unaware of an SEC rule or regulation prohibiting the falsification of books and records. In the Court's opinion, she has not. Jensen argues that: (1) her background and experience are in areas that have nothing to do with SEC rules and regulations; (2) her job responsibilities had nothing to do with SEC rules or regulations; (3) Jensen had nothing to do with the SEC reporting process; (4) none of the individuals who worked with Jensen drew any connection between their work on options grants and SEC regulations; and (5) none of the more than 50 deponents in the SEC action recall discussing anything connected to any SEC rule with Jensen.

There is no smoking gun conclusively demonstrating that Jensen was aware that falsification of books was outlawed by SEC regulation. However, the circumstantial evidence that Jensen offers up is insufficient to carry her burden in light of the evidence established at trial. There is substantial evidence that Jensen knew her conduct was wrongful, including the fact that Jensen attempted to minimize the

obviousness of backdated options, concealed the way options were actually dated, and directed employees not to communicate about options over the phone or email. To be sure, Jensen can only be imprisoned if she knew her conduct was unlawful *and* knew that it was prohibited by SEC rule or regulation. But in light of the evidence demonstrating that Jensen knew her conduct affected Brocade finances, the Court is assured that Jensen also knew she was violating an SEC rule or regulation.

For example, Jensen received emails establishing that options had an effect on Brocade financials and audits. On January 28, 2002, Jensen received an email from Brocade comptroller Bob Bossi, asking for the stock grant list to support an upcoming quarter-end audit from Arthur Andersen. Similarly, Jensen received an email confirming that the stock options grant lists and compensation committee meetings would be used in Brocade's year-end audit. The only reasonable conclusion to draw is that Jensen knew that stock options, and how they were priced, affected the audited results of the company.

Moreover, there was evidence at trial that after Jensen shepherded options through the pricing process, the forms were then given to the finance department so that finance could ensure that the grants were accurate. It can be reasonably assumed that as director of human resources, Jensen understood the chain for processing option grants and that stock options went from human resources directly to finance. A reasonably intelligent corporate official would understand that if the options forms went directly to finance, that was so because the forms had an effect on Brocade's financials. Falsifying options grants would therefore impair the integrity of the company's financials, which a reasonable official would know is illegal under SEC rule and regulation.

In short, the Court does not believe that Jensen was so far removed from the financial side of the process that she would not know her conduct was prohibited by the SEC. Jensen clearly knew her conduct was unlawful and, the Court believes, knew that her conduct affected Brocade's finances and audits. Under the circumstances, Jensen has not persuasively established that she was unaware her conduct violated any SEC rule or regulation.

In determining the sentence of co-defendant Gregory Reyes, the Court concluded that it would be inappropriate to enhance the sentence for loss, number of victims, and sophisticated means. The Court reaches the same conclusion with respect to Jensen's sentence. As to other enhancements, the Court will impose a two-level abuse of trust enhancement and a two-level enhancement for obstruction of justice, but rejects the government's request for an aggravating role enhancement and a public officer enhancement.

In general, the government bears the burden of proving, by a preponderance of the evidence, the facts necessary to enhance a defendant's offense level under the Sentencing Guidelines. However, when a sentencing factor has an extremely disproportionate effect on the sentence relative to the offense of conviction, due process requires that the government prove the facts underlying the enhancement by clear and convincing evidence.

The government has *not* demonstrated—at least not by clear and convincing evidence—that Jensen was the kind of Vice President who owed a heightened fiduciary duty to shareholders. Brocade proxy statements, 10-Qs, and 10-Ks frequently listed corporate officers, including the Vice Presidents in charge of Engineering, Operations, and Sales—core decisional and policy-making roles—but never Jensen. In addition, the government has identified no securities law that imposes heightened duties on executives in divisions such as human resources, as opposed to divisions more closely connected to the operational functions of the company.

To be sure, Jensen played an important *internal* role in the organization. Jensen was one of only nine executives who reported directly to Reyes, in contrast to sixteen Vice Presidents who did not. But the government has not pointed to persuasive evidence demonstrating that Jensen played the kind of role in relation to *shareholders* such that as head of Human Resources, she owed them a heightened fiduciary duty. Accordingly, the Court will not impose the four-level public officer enhancement.

Because the Court will not impose the public officer enhancement, it may consider whether to impose an enhancement for abuse of trust. To impose an enhancement for abuse of trust, the government must establish by clear and convincing evidence that: (1) Jensen occupied a position of trust; and (2) Jensen abused her position in a manner that significantly facilitated the commission or concealment of the offense.

Jensen used her managerial position to escort the backdated stock option grants through the necessary processes. It was Jensen who involved and oversaw employees in the human resources department tasked with the picking of lower dates, Jensen who ordered her employees to conceal the picking of past dates by not using email or phones, and Jensen who coordinated the signing of falsified dates by Reyes, providing the CEO with an array of earlier dates from which he could select. A lesser employee of the firm could not have accomplished these things which significantly facilitated the scheme's success and concealment.

Even if Jensen did not owe a heightened fiduciary duty to shareholders, she was entrusted with accurately maintaining

books and records that affected the financials of the company. Thus, there can be no doubt that shareholders were obligated to trust that Jensen would properly maintain any books and records bearing on Brocade's assets. Because Jensen occupied a position of trust and abused that position to commit and conceal the falsification of books and records, a two-level enhancement is appropriate.

The Court will enhance Jensen's sentence by two levels because she impeded justice by proffering—through counsel—a false declaration in support of her motion to sever. Jensen's arguments that the declaration was truthful and that she should not be punished for the conduct of her attorney are unpersuasive.

In his declaration, Reyes declared, "I told Ms. Jensen that the option grant dates were the dates that I made the granting decisions. *Options were priced at the fair market value on the grant dates.*" (Emphasis added.) Jensen argues that no one obstructed justice because the declaration did not provide false information to the Court. According to Jensen, Reyes' declaration intended to convey that he *sometimes* priced grant dates on the same day he made granting decisions, but was not intended to deny that on other occasions, Reyes did backdate option grants with Jensen's help.

Even if Jensen is correct that, technically speaking, Reyes' statement was not per se false, the Court still finds that the declaration impeded justice because it was seriously misleading. Reyes' declaration, in combination with the statements of counsel, misled the Court into believing that Reyes' declaration related to *all* stock option grants. Whether or not Reyes and Jensen's counsel subjectively believed that the declaration only related to some grants, there was no way for the Court to discern that subtle distinction.

Jensen sat in court while her lawyer argued that Reyes' declaration provided "absolutely exculpatory" evidence that precluded the jury from convicting Jensen for backdating options. Jensen also sat idly by while her lawyer argued that there was no evidence Jensen actually knew that Reyes was backdating. But at the time, Jensen did know that Reyes had backdated, and therefore knew that Reyes' declaration was not "absolutely exculpatory."

Because Jensen knew that Reyes' declaration was not accurate, the Court is also unpersuaded by her assertion that any obstruction was not willful. There can be no doubt that Jensen acted with the intent to mislead the Court. Jensen *knew* that Reyes backdated, but she nonetheless sat idly by while her lawyer represented to the court that a severance was justified because Reyes would testify otherwise. Put simply, that kind of conduct is not permitted, because when a defendant's lawyer proffers misleading evidence to the court, which the defendant knows to be inaccurate, the failure to act can form the basis of an enhancement for obstruction.

Because Jensen has not carried her burden of proving that the No Knowledge Clause controls her sentence, the Court will impose a sentence with an eye towards—among other factors—the Sentencing Guidelines. With a base offense level of six, plus two-level enhancements for abuse of trust and obstruction of justice, the Guidelines recommend a sentence of 6–12 months. The minimum term may be satisfied by a sentence of imprisonment that includes a term of supervised release with a condition that substitutes community confinement or home detention, provided that at least one month is satisfied by imprisonment.

Order entered sentencing Jensen to imprisonment.

Insurance and Indemnification

The extensive potential liability of directors deters many persons from becoming directors. They fear that their liability for their actions as directors may far exceed their fees as directors. To encourage persons to become directors, corporations **indemnify** them for their outlays associated with defending lawsuits brought against them and paying judgments and settlement amounts. In addition, or as an alternative, corporations purchase **insurance** that will make such payments for the directors. Indemnification and insurance are provided for officers, also.

Mandatory Indemnification of Directors

Under the MBCA, a director is entitled to *mandatory indemnification* of her reasonable litigation expenses when she is sued and *wins completely* (is *wholly successful*). The greatest part of such expenses is attorney's fees. Because indemnification is mandatory in this context, when the corporation refuses to indemnify a director who has won completely, she may ask a court to order the corporation to indemnify her.

Permissible Indemnification of Directors

Under the MBCA, a director who loses a lawsuit

Ethics in Action

Expanding Indemnification

The MBCA permits a corporation to expand the grounds on which it may indemnify a director, within limits. For example, the corporation may provide for indemnification of a director's liability (including a judgment paid to the corporation) when the director acted carelessly and in bad faith, but did not intend to harm the corporation or its shareholders and did not receive an improper financial benefit.

- Do you think it is ethical for a corporation to indemnify a careless director for the amount for which she was liable to the corporation? Would a rights theorist support indemnification in that context? Would a utilitarian? Would a profit maximizer?
- Would you be a shareholder in a corporation that permits indemnification in the context above?
- Would you be a director in a corporation if it did not indemnify you in that context?

may be indemnified by the corporation. This is called *permissible indemnification*, because the corporation is permitted to indemnify the director but is not required to do so.

The corporation must establish that the director acted in *good faith* and reasonably believed that she acted in the *best interests* of the corporation. When a director seeks indemnification for a *criminal* fine, the corporation must establish a third requirement—that the director had no reasonable cause to believe that her conduct was unlawful. Finally, any permissible indemnification must be approved by someone independent of the director receiving indemnification—a disinterested board of directors, disinterested shareholders, or independent legal counsel. Permissible indemnification may cover not only the director's reasonable expenses but also fines and damages that the director has been ordered to pay.

A corporation may not elect to indemnify a director who was found to have received a *financial benefit* to which he was not entitled. Such a rule tends to prevent indemnification of directors who acted from self-interest. If a director received no financial benefit but was held liable to his corporation or paid an amount to the corporation as part of a *settlement*, the director may be indemnified only for his reasonable expenses, not for the amount that he paid to the corporation. The purpose of these rules is to avoid the circularity of having the director pay damages to the corporation and then having the corporation indemnify the director for the same amount of money.

Advances A director may not be able to afford to make payments to her lawyer prior to the end of a lawsuit. More important, a lawyer may refuse to defend a director who cannot pay legal fees. Therefore, the MBCA permits

a corporation to make advances to a director to allow the director to afford a lawyer, if the director affirms that she meets the requirements for permissible indemnification and she promises to repay the advances if she is found not entitled to indemnification.

Court-Ordered Indemnification A court may order a corporation to indemnify a director if it determines that the director meets the standard for *mandatory* indemnification or if the director is *fairly and reasonably* entitled to indemnification in view of all the relevant circumstances.

Indemnification of Nondirectors Under the MBCA, officers and employees who are not directors are entitled to the same mandatory indemnification rights as directors.

Insurance The MBCA does not limit the ability of a corporation to purchase insurance on behalf of its directors, officers, and employees. Insurance companies, however, are unwilling to insure all risks. In addition, some risks are *legally uninsurable as against public policy*. Therefore, liability for misconduct such as self-dealing, usurpation, and securities fraud is uninsurable.

Nonprofit Corporations A nonprofit corporation may obtain insurance and indemnify its officers and directors for liabilities incurred in the course of their performance of their official duties. The MNCA requires indemnification when the director or officer wins the lawsuit completely. A corporation is permitted to indemnify an officer or director who is found liable if he acted in good faith and reasonably believed he acted in the best interests of the corporation.

Problems and Problem Cases

1. Pantry Pride, Inc., made a hostile tender offer to acquire the shares of Revlon, Inc., for \$47.50 per share. Pantry Pride's plan thereafter was to sell Revlon's various lines of business individually. Recognizing that a takeover was inevitable, Revlon's board negotiated a friendly acquisition with Forstmann Little & Co. for \$56 per share. Revlon's board also agreed to break up the company by selling its cosmetic division. Forstmann wanted to sell two other Revlon divisions after the purchase. Eventually, Forstmann upped its offer price to \$57.25. In return, Revlon's board gave Forstmann a lock-up option, promising to sell two valuable divisions to Forstmann at nearly \$200 million below their market value if Pantry Pride took over Revlon instead of Forstmann. The purpose and effect of the lock-up option was to prevent any other bidder, including Pantry Pride, from being willing to purchase Revlon. What standard or test judges whether Revlon's board acted properly in giving a lock-up option to Forstmann? Did Revlon's board comply with that test?
2. Deborah Goode, Thomas Goode, Cynthia Mann, and Hodges Mann were the only shareholders and directors of Star Communications, Inc. Each owned 25 shares. The Goodes were married to each other, as were the Manns. When the Goodes had marital problems, notice was given for a directors' meeting, the stated purpose of which was to oust Mrs. Goode as a director. The Goodes and Manns attended the meeting. There was some discussion whether the meeting was a directors' or shareholders' meeting, but the issue was never clearly resolved. Nonetheless, a vote was taken to remove Mrs. Goode as a director. The Manns voted for removal, Mrs. Goode voted against, and Mr. Goode abstained. May Mrs. Goode invalidate her removal on grounds that she was removed without cause and that she was removed by action of the directors, not the shareholders?
3. Countrywide Financial Corporation created for its employees a pension plan that allowed employees to select how their pension plan amounts are invested, including investing in the common stock of Countrywide. When the value of the common stock of Countrywide Financial Corporation declined from over \$40 per share to \$6 in a six-month period in 2007 and 2008 due to the collapse of the subprime lending market, Countrywide employees sued Countrywide and its directors for breaching a fiduciary duty to the employees by not exercising its discretion to suspend both offering Countrywide stock as a plan investment and matching employees' investment in Countrywide stock. Has the board of directors breached a fiduciary duty to the employees?
4. Lillian Pritchard was a director of Pritchard & Baird Corporation, a business founded by her husband. After the death of her husband, her sons took control of the corporation. For two years, they looted the assets of the corporation through theft and improper payments. The corporation's financial statements revealed the improper payments to the sons, but Mrs. Pritchard did not read the financial statements. She did not know what her sons were doing to the corporation or that what they were doing was unlawful. When Mrs. Pritchard was sued for failing to protect the assets of the corporation, she argued that she was a figurehead director, a simple housewife who served as a director as an accommodation to her husband and sons. Was Mrs. Pritchard held liable?
5. The Chicago National League Ball Club, Inc. (Chicago Cubs), operated Wrigley Field, the Cubs' home park. Through the 1965 baseball season, the Cubs were the only major league baseball team that played no home games at night because Wrigley Field had no lights for nighttime baseball. Philip K. Wrigley, director and president of the corporation, refused to install lights because of his personal opinion that baseball was a daytime sport and that installing lights and scheduling night baseball games would result in the deterioration of the surrounding neighborhood. The other directors assented to this policy. From 1961 to 1965, the Cubs suffered losses from their baseball operations. The Chicago White Sox, whose weekday games were generally played at night, drew many more fans than did the Cubs. A shareholder sued the board of directors to force them to install lights at Wrigley Field and to schedule night games. What did the court rule? Why?
6. James Gray was the president and managing officer of Peoples Bank and Trust Company. Frank Piccara was an old customer of the bank. Piccara was president of Mirage Construction, Inc. Gray directed Peoples Bank to make a \$536,000 loan to a trust

managed by Piccara, the loan proceeds to be used to provide working capital for Mirage. Gray obtained a security interest in Mirage's accounts receivable and contract rights for work Mirage was to perform for Rogers Construction. Gray did not perfect the security interest or notify Rogers that it should remit payments for Mirage's work directly to Peoples Bank. Piccara and Mirage defaulted on the loan to Peoples Bank. Gray was sued by his employer for breaching his fiduciary duty. Has Gray complied with the business judgment rule?

7. Paramount Communications, Inc., was the target of an unsolicited \$90 per share takeover bid by QVC Network, Inc. To thwart QVC's bid, Paramount's board of directors adopted defense tactics to facilitate a friendly takeover by Viacom, Inc., at a price of \$85 per share. Paramount agreed to grant Viacom a lock-up option to purchase almost 20 percent of Paramount's shares at a bargain price. In addition, Paramount promised to pay Viacom a termination fee of \$100 million, which was about 10 percent of Paramount's assets, if Paramount terminated the merger because of a competing transaction or if its shareholders voted against the merger. Has Paramount's board of directors acted legally?
8. Nook Pharmacies, Inc., is a small public company that operates 50 pharmacies in six states. Nook's board of directors is aware that CVS and Walgreen, the dominant companies in the pharmacy industry, are buying many of the remaining small pharmacy companies. Nook's directors prefer that Nook remain an independent company that will grow internally as it embraces new markets near its current pharmacies. The board wants to oppose any attempt by CVS or Walgreen to take over Nook. Nook's board has consulted you for advice on how to oppose a hostile takeover bid. In anticipation of a hostile bid, with what standard of conduct do you advise Nook's board to plan to comply? What do you advise Nook's board to do now to help Nook's board comply with that standard of conduct?
9. Lymon Properties Group, Inc., is a developer and operator of retail shopping malls. Lymon owns 75 percent of the shares of LDC, Inc., whose business is investing in undeveloped land. All of LDC's directors are appointed by Lymon. LDC owns 320 acres of land that Lymon wants to purchase for mall construction. LDC purchased the land two years ago for \$6.4 million. Lymon has offered to purchase the land for \$8.2 million. When approving the purchase, with what standard of conduct must Lymon's board comply? What should LDC's board of directors do before accepting the offer in order to reduce the likelihood that LDC's minority shareholders will be able to sue LDC's board successfully for selling the land for too low a price?
10. Gimble Hardt Corporation (GHC) is a manufacturer of aluminum wiring. Jason Gimble owns 82 percent of the 2 million outstanding shares of GHC. The remaining 360,000 shares are owned by 832 minority shareholders, none of whom owns more than 1,200 shares. Gimble wants to freeze out the minority shareholders using a reverse share split. Describe that procedure, including a statement of who must approve the transaction. What legal standard must the freeze-out transaction meet? Does it matter that Gimble wants to freeze out the minority shareholders so that GHC is no longer a public company that has to comply with the costly rules of the Sarbanes-Oxley Act?
11. In 1997, Peter Zaccagnino sold to investors historical bonds—issued by railroad and foreign governments—that he claimed were high-yield securities. In reality, the bonds had no value to anyone other than to collectors of historical documents. Peter obtained over \$6.8 million from the sale of these bonds. During this time, his wife, Gigi, attended meetings where her husband represented to investors that the bonds could yield 7 to 30 percent of their valuation within a year. Zaccagnino sold the historical bonds through two corporate entities and deposited most of the sales proceeds into the corporations' accounts. One of those corporations was Wonder Glass Products, of which Gigi was the secretary, treasurer, and director. She received \$5,200 a month from her employment with Wonder Glass. In March 1998, Gigi incorporated a business called Diamond in the Rough (DIR) in the British Virgin Islands, of which she was president, secretary, and director. Peter promoted DIR as a firm that placed client funds into high-yield offshore investment programs, promising investors substantial earnings. At one DIR meeting with prospective purchasers, Gigi sat at a table and made prospective investors promise that they would not record the meeting. Meanwhile, Peter told them that they could make huge sums of money with the

proposed investments and that he had been arranging similar investments successfully for so long that he was ready to retire. This foreign investment scheme earned Peter millions in addition to the money from the historical bond sales. When the federal government prosecuted Peter and Gigi for conspiracy and racketeering, Gigi claimed that she became aware of the criminal conduct only in December 1999, when she overheard her husband and one of his business partners laughing about the falsity of the statements they sent to investors. Did the court accept Gigi's argument or was she found to have willfully engaged in criminal conduct while acting for the corporations?

12. Shareholders of Barney Slaney, Inc., brought a derivative suit against the corporation's board of directors for failing to supervise adequately the corporation's loan officers, who made several high-risk loans to substandard borrowers. Almost 40 percent of the high-risk borrowers defaulted on the loans, resulting in a loss of \$55 million to Barney Slaney. The directors asked the corporation to advance to them the cost of legal fees for defending themselves against the charges. Under what conditions may the corporation make advances of legal fees to the directors?

Online Research

The Credit Crisis and Directors' Fiduciary Duties

The credit crunch of 2008 and 2009 was caused in part by decisions of banks like Countrywide Financial to make loans to borrowers who had insufficient income to repay the loans, as well as by investment banks like Bear Stearns which purchased many of those loans from banks in the secondary market. Check online to see how shareholders of banks and investment banks are faring in their lawsuits against the officers and directors who owed a fiduciary duty to make prudent decisions when issuing and purchasing loans.

You Be the Judge

Consider completing the case "LIABILITY: Office Party Blame Game" from the You Be the Judge Web site element after you have read this chapter. Visit our Web site at www.mhhe.com/mallor14e for more information and activities regarding this case segment.

chapter 44

SHAREHOLDERS' RIGHTS AND LIABILITIES

Four business associates create a business that will develop and sell information technology software. The business will be incorporated. The four will provide 90 percent of the initial capital needs of the business, but none of them has the IT skills to develop marketable software. In addition, none of the four wants to be involved in the day-to-day management of the business. The four associates have found, however, an IT engineer to develop software and another person who is willing to manage the business. The engineer and the general manager each want a 5 percent equity interest in the corporation, which the four associates are willing to grant to them. Although the engineer and the GM would each like to elect a representative to the corporation's board of directors, the four associates want to control the business absolutely, with each associate owning an equal share of the corporation and sitting on the board.

- Using classes of shares, create an equity structure for the corporation that meets the wants of the four associates, the engineer, and the GM.
- In this context, why is using classes of shares preferable to using one class of shares with cumulative voting for directors?

THE SHAREHOLDERS ARE THE owners of a corporation, but a shareholder has *no right to manage* the corporation. Instead, a corporation is managed by its board of directors and its officers for the benefit of its shareholders.

The shareholders' role in a corporation is limited to electing and removing directors, approving certain important matters, and ensuring that the actions of the corporation's managers are consistent with the applicable state corporation statute, the articles of incorporation, and the bylaws.

Shareholders also assume a few responsibilities. For example, all shareholders are required to pay the promised consideration for shares. Shareholders are liable for receiving dividends beyond the lawful amount. In addition, controlling shareholders may owe special duties to minority shareholders.

Close corporation shareholders enjoy rights and owe duties beyond the rights and duties of shareholders of publicly owned corporations. In addition, some courts have found close corporation shareholders to be fiduciaries of each other.

This chapter's study of the rights and responsibilities of shareholders begins with an examination of shareholders' meetings and voting rights.

Shareholders' Meetings

The general corporation statutes of most states and the Model Business Corporation Act (MBCA) provide that an **annual meeting of shareholders** shall be held. The purpose of an annual shareholders' meeting is to elect new directors and to conduct other necessary business. Often, the shareholders are asked to approve the corporation's independent auditors and to vote on shareholders' proposals.

Special meetings of shareholders may be held whenever a corporate matter arises that requires immediate shareholders' action, such as the approval of a merger that cannot wait until the next annual shareholders' meeting. Under the MBCA, a special shareholders' meeting may be called by the board of directors or by a person authorized to do so by the bylaws, usually the president or the chairman of the board. In addition, the holders of

at least 10 percent of the shares entitled to vote at the meeting may call a special meeting.

Notice of Meetings To permit shareholders to arrange their schedules for attendance at shareholders' meetings, the MBCA requires the corporation to give shareholders **notice** of annual and special meetings of shareholders. Notice of a *special meeting* must list the purpose of the meeting. Under the MBCA, notice of an *annual meeting* need not include the purpose of the meeting unless shareholders will be asked to approve extraordinary corporate changes—for example, amendments to the articles of incorporation and mergers.

Notice need be given only to shareholders entitled to vote who are **shareholders of record** on a date fixed by the board of directors. Shareholders of record are those whose names appear on the share-transfer book of the corporation. Usually, only shareholders of record are entitled to vote at shareholders' meetings.

Conduct of Meetings To conduct business at a shareholders' meeting, a **quorum** of the outstanding shares must be represented at the meeting. If the approval of more than one class of shares is required, a quorum of each class of shares must be present. A quorum is a majority of shares outstanding, unless a greater percentage is established in the articles. The president or the chairman of the board usually presides at shareholders' meetings. Minutes of shareholders' meetings are usually kept by the secretary.

A majority of the votes cast at the shareholders' meeting will decide issues that are put to a vote. If the approval of more than one class of shares is required, a majority of the votes cast by each class must favor the issue. The articles may require a greater than majority vote. Ordinarily, a shareholder is entitled to cast as many votes as he has shares.

Shareholders have a right of *full participation* in shareholders' meetings. This includes the right to offer resolutions, to speak for and against proposed resolutions, and to ask questions of the officers of the corporation.

Typical shareholder resolutions are aimed at protecting or enhancing the interests of minority shareholders and promoting current social issues. Proposals have included limiting corporate charitable contributions, restricting the production of nuclear power, banning the manufacture of weapons, and requiring the protection of the environment.

Shareholder Action without a Meeting

Generally, shareholders can act only at a properly called meeting. However, the MBCA permits shareholders to

act without a meeting if *all of the shareholders entitled to vote consent in writing* to the action.

Shareholders' Election of Directors

Straight Voting The most important shareholder voting right exercised at a shareholder meeting is the right to elect the directors. Normally, directors are elected by a single class of shareholders in **straight voting**, in which each share has one vote for each new director to be elected. With straight voting, a shareholder may vote for as many nominees as there are directors to be elected; a shareholder may cast for each such nominee as many votes as she has shares. For example, in a director election in which 15 people have been nominated for 5 director positions, a shareholder with 100 shares can vote for up to 5 nominees and can cast up to 100 votes for each of those 5 nominees.

Under straight voting, the nominees with the most votes are elected. Consequently, straight voting allows a majority shareholder to elect the entire board of directors. Thus, minority shareholders are unable to elect any representatives to the board without the cooperation of the majority shareholder.

Straight voting is also a problem in close corporations in which a few shareholders own equal numbers of shares. In such corporations, no shareholder individually controls the corporation, yet if the holders of a majority of the shares act together, those holders will elect all of the directors and control the corporation. Such control may be exercised to the detriment of the other shareholders.

Two alternatives to straight voting aid minority shareholders' attempts to gain representation on the board and prevent harmful coalitions in close corporations: cumulative voting and classes of shares.

Cumulative Voting With cumulative voting, a corporation allows a shareholder to cumulate her votes by multiplying the number of directors to be elected by the shareholder's number of shares. A shareholder may then allocate her votes among the nominees as she chooses. She may vote for only as many nominees as there are directors to be elected, but she may vote for fewer nominees. For example, she may choose to cast all of her votes for only one nominee.

See Figure 1 for a further explanation of the mechanics of cumulative voting.

Figure 1 Cumulative Voting Formula

The formula for determining the minimum number of shares required to elect a desired number of directors under cumulative voting is:

$$X = \frac{S \times R}{D + 1} + 1$$

X = Number of shares needed to elect the desired number of directors

S = Total number of shares voting at the shareholders' meeting

R = Number of director representatives desired

D = Total number of directors to be elected at the meeting

Example: Sarah Smiles wants to elect two of the five directors of Oates Corporation. One thousand shares will be voted. In this case:

$$S = 1,000$$

$$R = 2$$

$$D = 5$$

Therefore:

$$X = 333.33$$

Fractions are ignored; thus, Sarah will need to hold at least 333 shares to be able to elect two directors.

Classes of Shares A corporation may have several classes of shares. The two most common classes are *common shares* and *preferred shares*, but a corporation may have several classes of common shares and several classes of preferred shares. Many close corporations have two or more classes of common shares with different voting rights. Each class may be entitled to elect one or more directors, in order to balance power in a corporation.

For example, suppose a corporation has four directors and 100 shares held by four shareholders—each of whom owns 25 shares. With straight voting and no classes of shares, no shareholder owns enough shares to elect himself as a director, because 51 shares are necessary to elect a director. Suppose, however, that the corporation has four classes of shares, each with the right to elect one of the directors. Each class of shares is issued to only one shareholder. Now, as the sole owner of a class of shares entitling the class to elect one director, each shareholder can elect himself to the board.

Using classes of shares is the cleanest way to allocate among shareholders the power to elect directors, as well as allocate equity ownership of the corporation. To protect such allocations, however, the articles should require

approval of every class of shares to change the rights of any class or to create a new class of shares.

Shareholder Control Devices While cumulative voting and class voting are two useful methods by which shareholders can allocate or acquire voting control of a corporation, there are other devices that may also be used for these purposes: voting trusts; shareholder voting agreements; and proxies, especially irrevocable proxies.

Voting Trusts With a **voting trust**, shareholders transfer their shares to one or more voting trustees and receive voting trust certificates in exchange. The shareholders retain many of their rights, including the right to receive dividends, but the voting trustees vote for directors and other matters submitted to shareholders.

The purpose of a voting trust is to control the corporation through the concentration of shareholder voting power in the voting trustees, who often are participating shareholders. If several minority shareholders collectively own a majority of the shares of a corporation, they may create a voting trust and thereby control the corporation. You may ask why shareholders need a voting trust when they are in apparent agreement on how to vote their shares. The reason is that they may have disputes in the future that could prevent the shareholders from agreeing how to vote. The voting trust ensures that the shareholder group will control the corporation despite the emergence of differences.

The MBCA limits the duration of voting trusts to 10 years, though all or part of the participating shareholders may agree to extend the term for another 10 years. Also, a voting trust must be made public, with copies of the voting trust document available for inspection at the corporation's offices.

Shareholder Voting Agreements As an alternative to a voting trust, shareholders may merely agree how they will vote their shares. For example, shareholders collectively owning a majority of the shares may agree to vote for each other as directors, resulting in each being elected to the board of directors.

A shareholder voting agreement must be written; only shareholders signing the agreement are bound by it. When a shareholder refuses to vote as agreed, courts specifically enforce the agreement.

Shareholder voting agreements have two advantages over voting trusts. First, their duration may be *perpetual*. Second, they may be kept secret from the other shareholders; they usually do not have to be filed in the corporation's offices.

Proxies A shareholder may appoint a **proxy** to vote his shares. If several minority shareholders collectively own a majority of the shares of a corporation, they may appoint a proxy to vote their shares and thereby control the corporation. The ordinary proxy has only a limited duration—11 months under the MBCA—unless a longer term is specified. Also, the ordinary proxy is *revocable* at any time. As a result, there is no guarantee that control agreements accomplished through the use of revocable proxies will survive future shareholder disputes.

However, a proxy is *irrevocable* if it is coupled with an interest. A proxy is coupled with an interest when, among other things, the person holding the proxy is a party to a shareholder voting agreement or a buy-and-sell agreement. The principal use of irrevocable proxies is in conjunction with shareholder voting agreements.

In the *RHCS* case, the court found that the parties created only a revocable proxy when they wanted a long-term shareholder voting agreement. The case is a good example of the need for careful drafting of corporate documents.

Reynolds Health Care Services, Inc. v. HMNH, Inc. 217 S.W.3d 797 (Ark. Sup. Ct. 2005)

John Reynolds was the sole shareholder and manager of his family's longtime business, the Hillsboro Manor Nursing Home, Inc., in El Dorado, Arkansas. In 1993, Reynolds needed capital to expand the nursing home, so he approached Dr. James Sheppard, who contacted three additional investors: Sheppard's two brothers, Andrew and Courtney Sheppard, and his brother-in-law, Eugene Bilo. The Sheppards and Bilo formed a corporation called HMNH, Inc., to acquire 80 percent ownership of Hillsboro Manor. HMNH, Inc., made a contract with Reynolds Health Care Services, Inc. (RHCS), a corporation in which Reynolds was the sole shareholder. Under the contract, RHCS agreed to manage the nursing home in return for 6 percent of HMNH's gross revenues. HMNH agreed to provide adequate working capital and oversight on budgets, policies, and personnel. Of course, RHCS hired Reynolds as administrator of the facility.

To buy the nursing home, HMNH and Hillsboro Manor Nursing Home, Inc., entered into a stock purchase agreement by which HMNH purchased all of the stock of Hillsboro Manor Nursing Home, Inc., for \$1,804,000. Hillsboro Manor Nursing Home, Inc., was merged into HMNH, Inc., with the three Sheppards, Bilo, and RHCS each receiving 20 shares of stock of the 100 outstanding shares of stock in HMNH. The Sheppards and Bilo also agreed to give RHCS the power to vote 7.5 of each of their shares on any matter submitted to shareholders in the next 20 years. The affect of the voting agreement was to give RHCS 50 percent voting control, which meant that Reynolds, who owned RHCS, could veto any matter submitted to HMNH's shareholders.

By 1999, HMNH had become concerned with the way Reynolds was running the nursing home. The shareholders held a meeting on September 14, 2000, at which the Sheppards and Bilo were present, but Reynolds was absent. The Sheppards voted their combined 60 shares to elect a new board of directors comprising the three Sheppards, Bilo, and Reynolds. At the directors' meeting, held immediately thereafter, all five men were elected as officers of HMNH, although Reynolds—while now present—abstained from the vote. Andrew Sheppard then made a motion that the board of directors authorize its attorney to institute a lawsuit in the name of HMNH against Reynolds and RHCS to recover damages caused by RHCS's breach of the management contract. The Sheppards and Bilo voted to adopt the resolution. On January 19, 2001, HMNH filed suit against RHCS and Reynolds, alleging that RHCS had breached the management contract. Reynolds and RHCS asked the trial court to dismiss the lawsuit on the grounds that HMNH's board had no authority to bring the lawsuit. Reynolds and RHCS argued that the directors were not properly elected, because the Sheppards voted all their shares to elect the new directors, a violation of the shareholder voting agreement that gave RHCS the power to vote 7.5 of each of their shares. The trial court disagreed, ruling that the voting agreement was merely a revocable proxy, which the Sheppards revoked at the September 2000 shareholder meeting, and therefore, the Sheppards could vote all of their shares. Reynolds and RHCS appealed to the Arkansas Supreme Court.

Glaze, Justice

On appeal, RHCS argues that the trial court erred in refusing to enforce the parties' voting agreement. Ark. Code Ann. §4-27-731 provides as follows:

(a) Two (2) or more shareholders may provide for the manner in which they will vote their shares by signing an agreement

for that purpose. A voting agreement created under this section is not subject to the provisions of §4-27-730.

(b) A voting agreement created under this section is specifically enforceable.

This statute was adopted as part of the Arkansas Business Corporation Act, and the language used therein was taken from the

Model Business Corporation Act. The “Historical Background” information that accompanies the Model Act provides the following discussion:

A voting agreement (sometimes called a pooling agreement) is an agreement among shareholders relating to the voting of shares; it is primarily used as a means to effect a specific allocation of representation on the board of directors of a closely held corporation. It differs fundamentally from a voting trust, which involves a transfer of the legal title of shares to the trustees and a change in the record ownership of the shares. *Model Bus. Corp. Act* §7.31 (Supp. 1996).

A voting agreement is also distinguished from an irrevocable proxy in that it does not necessarily result in the creation of an agency relationship, and need not involve the use of a proxy to effectuate it. However, the line of demarcation is not always clear, and some voting agreements have been treated as irrevocable proxies.

In a broad sense, the term “shareholders’ agreement” refers to any agreement among two or more shareholders regarding their conduct in relation to the corporation whose shares they own. Such agreements are generally utilized in closely held corporations, and they may be used to guarantee to a minority shareholder such things as restrictions on the transfer of stock; a veto power over hiring and decisions concerning salaries, corporate policies or distribution of earnings; or procedures for resolving disputes or making fundamental changes in the corporate charter.

Shareholder or voting agreements differ from proxies in that a proxy is simply an authority given by the holder of the stock who has the right to vote it to another to exercise the holder’s voting rights. Thus, a proxy differs from a voting agreement in that the former gives another person the authority to vote one’s shares, while the latter purports to direct how the other person is to vote.

RHCS argues that it entered into a voting agreement with the Sheppards and Bilo when they signed a document titled “Option to Purchase Stock.” In particular, RHCS points to the following language in support of its contention that a voting agreement was created:

[HMNH] shall grant to [RHCS] a proxy to vote one-half of the issued and outstanding shares of stock of HMNH, Inc. pending the term of this option to purchase stock, which proxy shall be reduced to twenty-five percent of the issued and outstanding shares of stock of the corporation for a period of twenty years from the effective date of the Agreement to Provide Management Services to a Health Care Facility executed the 8th day of January, 1993, as set forth in paragraph IV thereof, by and between Reynolds Health Care Services, Inc., and HMNH, Inc., upon the exercise of this option and transfer to [RHCS] of the shares of stock subject to this option.

A subsequent agreement among the shareholders, dated September 19, 1996, provided that the Sheppards and Bilo “shall execute a proxy to Reynolds Health Care Services, Inc., appointing Reynolds Health Care Services, Inc. as [their] proxy to vote 7.5 shares of each of the said shareholder’s stock held in HMNH, Inc.” Those proxies were executed by each of the Sheppards and Bilo on October 21, 1996; the proxy agreements provided as follows:

I, the undersigned shareholder of HMNH, Inc., an Arkansas corporation, do hereby appoint Reynolds Health Care Services, Inc., an Arkansas corporation, my true and lawful attorney and agent, for me and in my name, place and stead to vote as my proxy 7.5 shares of stock held by me in HMNH, Inc. at any stockholders’ meetings to be held between the date of this proxy and 20 years from the effective date of the Agreement to Provide Management Services to a Health Care Facility dated January 7, 1993, as set forth in Paragraph IV thereof, by and between Reynolds Health Care Services, Inc., and HMNH, Inc., and I authorize Reynolds Health Care Services, Inc. to act for me and in my name and stead as fully as I could act if I were personally present, giving to Reynolds Health Care Services, Inc., attorney and agent, full power of substitution.

The trial court found that these agreements were not voting agreements, but rather were revocable proxies. Under Ark. Code Ann. §4-27-722 (Repl. 2001), proxies are revocable by a shareholder “unless the appointment form conspicuously states that it is irrevocable and the appointment is coupled with an interest.” An appointment coupled with an interest includes the appointment of “a party to a voting agreement created under §4-27-731.” None of the proxy agreements stated conspicuously on its face that it was irrevocable; indeed, in its reply brief, RHCS abandons its argument that the proxies were irrevocable. Nonetheless, RHCS maintains that the proxies “were merely the means of implementing the parties’ foundational voting agreement,” by which the Sheppards and Bilo gave RHCS the right to vote fifty percent of their shares in HMNH for twenty years.

However, we conclude that the document that RHCS calls a “voting agreement” is nothing more than a revocable appointment of proxy. The plain language of the agreement says nothing about how the stock is to be voted; it merely gives RHCS the right to vote a percentage of the stock. Because the agreement does not “provide for the manner in which” the shares are to be voted, it is not a voting agreement; it is a proxy.

Further, the proxies assigned to RHCS were revocable. Thus, the Sheppards and Bilo were acting within their rights as shareholders when they voted to revoke their proxies at the September 2000 shareholders’ meeting. Accordingly, the trial court did not err when it concluded that the actions of the duly elected board of directors in voting to authorize the instant lawsuit were valid.

Judgment for HMNH affirmed.

Ethics in Action

By using classes of shares (or a perpetual shareholder voting agreement), shareholders that individually are minority shareholders but collectively control a majority of the corporation's shares may control the corporation absolutely. For example, suppose five shareholders create a corporation and decide at incorporation that it will have five classes of shares, one for each of the five shareholders. They decide that each of the five classes will elect its own director to the board of directors and that the consent of each class is required to amend the articles of incorporation, such as to increase the number of authorized shares of a class or to create a new class of shares. They also could agree that no shares may be issued without the consent of each class of shares. In the future, if they want to issue shares to employees of the corporation or public investors, by a vote of the five classes of shareholders they could create a class of shares that has a small (say, 20 percent) equity interest in the corporation,

either has no right to vote for directors or elects a nonvoting director, has a preferential right to dividends, and has no right to veto any action the five original classes of shares approve. The creation of the new share class would permit the five original shareholders to continue their control of the corporation while receiving an infusion of capital into the company.

- Do you think it is ethical for the five original shareholders to dominate the corporation in this way? If you were one of the five original shareholders, would you set up a different equity structure? Would you give more rights to the shareholders of the class with limited rights?
- Would you buy shares of the class that has limited rights? After you buy those shares, would it be ethical for you to argue for greater rights?
- Would your answers change if the corporation became a public company with over 2,000 shareholders?

Fundamental Corporate Changes

Other matters besides the election of directors require shareholder action, some because they make fundamental changes in the structure or business of the corporation.

Because the articles of incorporation embody the basic contract between a corporation and its shareholders, shareholders must approve most **amendments of the articles of incorporation**. For example, when the articles are amended to increase the number of authorized shares or reduce the dividend rights of preferred shareholders, shareholder approval is needed.

A **merger** is a transaction in which one corporation merges into a second corporation. Usually, the first corporation dissolves; the second corporation takes all the business and assets of both corporations and becomes liable for the debts of both corporations. Usually, the shareholders of the dissolved corporation become shareholders of the surviving corporation. Ordinarily, both corporations' shareholders must approve a merger.

Corporation law allows great flexibility in the terms of a merger. For example, a merger may freeze out minority shareholders by paying them cash only while allowing majority shareholders to remain as shareholders of the surviving corporation. Freeze-outs are covered in Chapter 43.

A **consolidation** is similar to a merger except that both old corporations go out of existence and a new corporation takes the business, assets, and liabilities of the old corporations. Both corporations' shareholders must approve the

consolidation. Modern corporate practice makes consolidations obsolete, since it is usually desirable to have one of the old corporations survive. The MBCA does not recognize consolidations. However, the effect of a consolidation can be achieved by creating a new corporation and merging the two old corporations into it.

A **share exchange** is a transaction by which one corporation becomes the owner of all of the outstanding shares of a second corporation through a *compulsory* exchange of shares: The shareholders of the second corporation are compelled to exchange their shares for shares of the first corporation. The second corporation remains in existence and becomes a wholly owned subsidiary of the first corporation. Only the selling shareholders must approve the share exchange.

A **sale of all or substantially all of the assets** of the business other than in the regular course of business must be approved by the shareholders of the selling corporation, since it drastically changes the shareholders' investment. Thus, a corporation's sale of all its real property and equipment is a sale of substantially all its assets, even though the corporation continues its business by leasing the assets back from the purchaser. However, a corporation that sells its building, but retains its machinery with the intent of continuing operations at another location, has not sold all or substantially all of its assets. Under the MBCA, a corporation that retains at least 25 percent of its business activity and either its income or revenue has not disposed of substantially all its assets.

A **dissolution** is the first step in the termination of the corporation's business. The typical dissolution requires

The Global Business Environment

In recent years, shareholder activism and discontent has been exported from the United States to affect corporations based in other nations. In some cases, American shareholders of non-American corporations have exercised their rights by attempting to oppose management through the ballot box or takeovers. In other cases, citizens of other nations have taken cues from their American cousins and attempted to assert their rights as shareholders.

For example, in late 2005, VNU NV, the Netherlands-based publishing and market research firm, faced pressure from a shareholder group that included Boston-based Fidelity Investments. The shareholder group, which held 40 percent of VNU's shares, opposed VNU's bid to acquire IMS Health, Inc., a Connecticut-based corporation. When shareholders first announced their opposition to the acquisition, VNU attempted to placate them by selling some assets, increasing a share buyback, and eventually replacing its CEO. Refusing to

be appeased, the shareholders continued their opposition to VNU's acquisition of IMS Health.

Earlier in 2005, shareholders in Deutsche Borse AG, the German stock exchange company, prevented the company from completing an attempt to acquire London Stock Exchange PLC. The shareholders eventually forced the resignation of longtime CEO Werner Seifert. Despite Seifert's turning Deutsche Borse into the largest stock exchange during his 12-year tenure, his misjudgment of shareholder opposition to what he thought was the best strategy for the company ultimately led to his downfall.

In 2007 and 2008, U.S. activist investor Knight Vinke Asset Management engaged U.K.-based HSBC in a review of strategy in light of HSBC's significant losses in the U.S. subprime loan market. Knight Vinke has called on HSBC's board to appoint independent financial advisers to review future subprime loan business, criticized its new executive compensation plan, and expressed concern about the independence of its board of directors.

shareholder approval. Dissolution of corporations is covered more fully at the end of this chapter.

The articles of incorporation and the bylaws may require or permit other matters to be submitted for shareholder approval. For example, loans to officers, self-dealing transactions, and indemnifications of managers for litigation expenses may be approved by shareholders. Also, many of the states require shareholder approval of share option plans for high level executive officers, but the MBCA does not.

Procedures Required Similar procedures must be met to effect each of the above fundamental changes. The procedures include approval of the board of directors, notice to all of the shareholders whether or not they are entitled to vote, and majority approval of the votes held by shareholders entitled to vote under the statute, articles, or bylaws. Majority approval will be insufficient if a corporation has a supermajority shareholder voting requirement, such as one requiring two-thirds approval.

If there are two or more classes of shares, the articles may provide that matters voted on by shareholders must be approved by each class substantially affected by the proposed transaction. For example, a merger may have to be approved by a majority of the preferred shareholders and a majority of the common shareholders. As an alternative, the articles may require only the approval of the shareholders as a whole.

Under the MBCA, voting by classes is required for mergers, share exchanges, and amendments of the articles if these would substantially affect the rights of the

classes. For example, the approval of preferred shareholders is required if a merger would change the dividend rights of preferred shareholders.

In many states, no approval of shareholders of the *surviving corporation* is required for a merger *if* the merger does not fundamentally alter the character of the business or substantially reduce the shareholders' voting or dividend rights.

Also, many statutes, including the MBCA, permit a merger between a parent corporation and its subsidiary without the approval of the shareholders of either corporation. Instead, the board of directors of the parent approves the merger and sends a copy of the merger plan to the subsidiary's shareholders. This simplified merger is called a **short-form merger**. It is available only if the parent owns a high percentage of the subsidiary's shares—90 percent under the MBCA and the Delaware statute.

Dissenters' Rights

Many times, shareholders approve a corporate action by less than a unanimous vote, indicating that some shareholders oppose the action. For the most part, the dissenting shareholders have little recourse. Their choice is to remain shareholders or to sell their shares. For close corporation shareholders, there is no choice—the dissenting close corporation shareholder has no ready market for her shares, so she will remain a shareholder.

Some corporate transactions, however, so materially change a shareholder's investment in the corporation or

have such an adverse effect on the value of a shareholder's shares that it has been deemed unfair to require the dissenting shareholder either to remain a shareholder (because there is no fair market for the shares) or to suffer a loss in value when he sells his shares on a market that has been adversely affected by the news of the corporate action. Corporate law has therefore responded by creating **dissenters' rights** (right of appraisal) for shareholders who disagree with specified fundamental corporate transactions. Dissenters' rights require the corporation to pay dissenting shareholders the *fair value* of their shares.

Under the MBCA, the dissenters' rights cover mergers, short-form mergers, share exchanges, significant amendments of the articles of incorporation, and sales of all or substantially all the assets other than in the ordinary course of business. Some statutes cover consolidations also.

A dissenting shareholder seeking payment of the fair value of his shares must have the *right to vote* on the action to which he objects; however, a shareholder of a subsidiary in a short-form merger has dissenters' rights despite his lack of voting power. In addition, the shareholder must *not vote in favor* of the transaction. The shareholder may either vote against the action or abstain from voting.

The MBCA and many states' statutes exclude from dissenters' rights shares that are traded on a recognized securities exchange such as the New York Stock Exchange. Instead, these statutes expect a shareholder to sell his shares on the stock exchange if he dissents to the corporate action. The MBCA also excludes shares held by at least 2,000 holders or having a market value of at least \$20 million.

Generally, a shareholder must notify the corporation of his intent to seek payment before the shareholders have voted on the action. Next, the corporation informs a dissenting shareholder how to demand payment. After the dissenting shareholder demands payment, the corporation and the shareholder negotiate a mutually acceptable price. If they cannot agree, a court will determine the fair value of the shares and order the corporation to pay that amount.

To determine fair value, most judges use the **Delaware Block Method**, a weighted average of several valuation techniques—such as market value, comparisons with

other similar companies, net present value of future cash flows, and book value. Ironically, the Supreme Court of Delaware has abandoned the Delaware Block Method, recognizing the need for courts to value shares by methods generally considered acceptable to the financial community. The MBCA values shares using “customary and current valuation concepts and techniques generally employed for similar businesses.”

The Delaware appraisal statute provides that a court:

shall appraise the shares, determining their fair value exclusive of any element of value arising from the accomplishment or expectation of the merger or consolidation, together with a fair rate of interest, if any, to be paid upon the amount determined to be the fair value. In determining such fair value, the Court shall take into account all relevant factors. 8 Del. Code § 262(h).

In *Weinberger v. UOP*,¹ the Delaware Supreme Court reconciled the dual mandates of section 262(h), which direct a court to determine fair value based upon all relevant factors, yet exclude any element of value arising from the accomplishment or expectation of the merger. In making that reconciliation, the *Weinberger* court wrote:

Only the speculative elements of value that may arise from the “accomplishment or expectation” of the merger are excluded. We take this to be a very narrow exception to the appraisal process, designed to eliminate use of *pro forma* data and projections of a speculative variety relating to the completion of a merger. But elements of future value, including the nature of the enterprise, which are known or susceptible of proof as of the date of the merger and not the product of speculation, may be considered. When the trial court deems it appropriate, fair value also includes any damages, resulting from the taking, which the stockholders sustain as a class. If that was not the case, then the obligation to consider “all relevant factors” in the valuation process would be eroded.²

In the following case, the court applied the *Weinberger* test when reviewing competing valuations of minority shares. The case is a model for sophisticated financial valuations in litigation.

²457 A.2d at 713.

Montgomery Cellular Holding Co., Inc. v. Dobler 880 A.2d 206 (Del. S. Ct. 2005)

Price Communications Corporation (Price) owned all the shares of Price Communications Wireless (PCW). PCW owned all the shares of Palmer Wireless Holdings Inc. (Palmer). Palmer owned controlling interests in 16 cellular telephone systems in Georgia, Florida, and Alabama, including Montgomery Cellular Holding Company (MCHC). Palmer owned 94.6 percent of MCHC stock. MCHC was a holding company with no operating assets. MCHC's sole asset was 100 percent of the stock of

Montgomery Cellular Telephone Co. (Montgomery). Montgomery was a cellular telephone system located in the area around Montgomery, Alabama.

As a group, Palmer's holdings formed a valuable cluster of cellular systems in the southeastern United States. Price entered into discussions with various cellular telecommunications system operators about a possible sale of Palmer's cellular systems. Price hired the investment bank, Donaldson, Lufkin & Jenrette (DLJ), to solicit interest in acquiring Palmer. Verizon emerged as the potential acquirer.

In 2000, Price agreed to sell Palmer to Verizon for \$2.06 billion. Because Palmer did not control 100 percent of the stock in MCHC and other subsidiaries, the agreement obligated Price to acquire those minority shareholder interests. If Palmer failed to acquire the minority interests, the agreement allowed Verizon to reduce the purchase price by an amount equal to the minority shareholders' pro rata share of fiscal year 2000 EBITDA multiplied by 13.5. To receive the full \$2.06 billion purchase price, Price would have to freeze out all the minority shareholders of MCHC. As a result of the agreement, Price had a strong incentive to squeeze out all the minority shareholders at a price that was lower than Verizon's corresponding price reduction.

On June 30, 2001, Price caused Palmer to buy out MCHC's minority shareholders by a short-form merger under Delaware law. In determining the price to be paid to MCHC's minority shareholders, Price made no effort to obtain an independent valuation, which its CEO viewed as "very costly." Instead, Palmer relied on Price's settlement of an appraisal action with the dissenting minority shareholders of a different Palmer subsidiary, Cellular Dynamics (CD).

CD, like MCHC, was the operator of a cellular telephone company in the southeastern United States and, like MCHC, was majority-owned by Price. In 1999, Price bought out the minority shareholders of CD by a short-form merger. After a lengthy negotiation using POPs as the valuation tool, the minority shareholders agreed to a settlement based upon a value of CD derived by multiplying the estimated population by \$470 per POP. POP is a shorthand reference to the census population of a specific geographic area. POPs are a common cellular industry metric for valuing cellular systems.

Despite overwhelming evidence that the CD settlement was negotiated using POPs and not EBITDA, Price claimed that it had valued CD's stock using an EBITDA multiplier of 10.05 to arrive at the \$8,102.23 per share price that was offered to MCHC minority shareholders as fair value. In contrast, multiplying the \$470 per POP metric by MCHC's POPs (323,675) would have yielded a value of \$15,212.74 per share.

Although Price had bought out MCHC minority shareholders and was entitled to receive the full agreed merger price of \$2.06 billion, the initial Verizon deal was not consummated. Later, Price and Verizon agreed to a reduced purchase price of \$1.7 billion. That second transaction was consummated on August 15, 2002.

Gerhard Dobler and other minority MCHC shareholders challenged the buyout price of \$8,102.23 per share, and they sued Price, Palmer, and MCHC in the Delaware Court of Chancery. At the trial, the minority shareholders' expert, Marc Sherman, previously a KPMG partner in charge of its corporate transactions practice, valued MCHC at \$21,346 per share. MCHC's expert, Kenneth D. Gartrell, previously an Ernst & Young auditor, testified that the stand-alone value of MCHC was \$7,840 per share.

Although both experts used similar methods to value MCHC, Sherman looked to third-party experts to create his forecasts, whereas Gartrell did not consult outside appraisers or other sources of relevant information. Moreover, only Sherman performed a comparable transaction analysis.

MCHC's expert, Gartrell, employed two valuation methodologies: a comparable company analysis and a discounted cash flow (DCF) analysis. The Court of Chancery found that Gartrell's valuation approach was legally and factually flawed, and must be disregarded in its entirety, for three reasons. First, Gartrell's overall theoretical framework was invalid as a matter of law, because Gartrell valued MCHC as if it were not a going concern that had contractual relationships with other cellular providers. Second, Gartrell's DCF analysis was flawed because he used a generic growth rate (the long-term growth rate of GNP) as his growth rate for MCHC without any valid, credible explanation and despite his having had access to industry-specific growth rates; Gartrell used a constant growth rate, which would yield the same value for MCHC regardless of the time frame; and Gartrell created the financial projections based entirely on his own judgment, without reference to other available sources of relevant information. Third, the Court of Chancery found that Gartrell's comparable company analysis was invalid because of his methodology and his data. Gartrell switched between the mean and the median at critical points. Had Gartrell used the mean numbers consistently throughout, the value of MCHC based on EBITDA would be over \$163 million, which when added to the nonoperating assets, would be \$183 million—a figure much closer to the value reached by the shareholders' expert.

The Court of Chancery accepted the shareholders' expert, Sherman's, valuation of MCHC with some modification, and it valued the minority shares at \$19,621.74. MCHC asked the Delaware Supreme Court to review the chancery court's nearly full acceptance of Sherman's valuation. MCHC did not appeal the court's rejection of MCHC's expert's valuation.

Jacobs, Justice

The shareholders' expert, Marc Sherman, performed three different financial analyses of MCHC: a comparable transactions analysis, a DCF analysis, and a comparable company analysis. In his comparable transactions analysis, Sherman split the selected comparable transactions into three categories: similar sized transactions, the initial Verizon transaction, and the CD settlement. For the similar sized transactions category, Sherman considered five transactions that occurred between May 2000 and January 2001, each involving a cellular company with approximately the same number of POPs. The remaining two categories (the initial Verizon transaction and the CD settlement) involved single transactions that were included in the analysis because they were related to the sale of MCHC.

Sherman then analyzed each category using his four cellular system metrics (POPs, subscribers, EBITDA, and revenue). For each metric, Sherman computed a value of MCHC based on the category of comparable transactions, and then weighted these values to derive his final overall valuation. Sherman did that as follows: he first weighted the metrics based on their importance in valuing cellular companies. He then weighted the category of comparable transactions within each metric. The result of that process is shown *infra* on the table:

| Category | Valuation | Metric Weighting | Category Weighting |
|----------------------------|---------------|------------------|--------------------|
| POPs | | 45% | |
| Verizon Transaction | \$199,278,316 | | 20% |
| CD Settlement | \$199,286,698 | | 10% |
| Similar Sized Transactions | \$136,352,297 | | 15% |
| Subscribers | | 20% | |
| Verizon Transaction | \$226,758,135 | | 15% |
| CD Settlement | \$225,865,136 | | 5% |
| Operating Cash Flows | | 25% | |
| Verizon Transaction | \$160,650,176 | | 20% |
| CD Settlement | \$226,738,142 | | 5% |
| Revenue | | 10% | |
| Verizon Transaction | \$236,517,971 | | 7% (sic) |
| CD Settlement | \$224,240,681 | | 7% (sic) |
| Total | | 100% | 100% |

Multiplying the valuations by their respective weightings, Sherman computed a value of \$192 million based on comparable transactions. To that figure he added the \$20 million value of the non-operating assets to arrive at a comparable transactions value for MCHC of \$212 million.

Sherman also performed a DCF analysis. Because of the lack of management projections, Sherman created forecasts of MCHC's cash flows based on predictions by others for the cellular industry and the economy. Sherman relied primarily on Paul Kagan, an outside industry expert. Sherman also looked to industry growth reports that showed an annual growth rate for the wireless industry of 16 percent.

The next step in Sherman's DCF analysis was to determine the discount rate using a weighted average cost of capital (WACC) approach. Applying that approach to the inputs he determined for each component of the WACC formula, Sherman arrived at a discount rate of 13.25 percent.

For his DCF projection period, Sherman used a ten-year period from June 1, 2001 to May 31, 2011. Before projecting the cash flows, however, Sherman first adjusted them by removing two "irregularities": (i) a nonrecurring \$861,000 bad debt expense resulting from Montgomery having installed a new billing system, and (ii) the rent of \$638,000 MCHC paid annually to Old North, a wholly owned subsidiary of Palmer. Lastly, using a capitalization rate of 9.25 percent and a growth rate of 4 percent, Sherman calculated a terminal value of \$258 million.

From these inputs, Sherman arrived at a final enterprise (DCF) valuation of \$150 million for Montgomery as a going concern, operating asset of MCHC. To that figure Sherman added the value of Montgomery's non-operating assets, which increased his valuation to \$170 million. Finally, to that sum, Sherman applied a control premium of 31 percent, thereby increasing his DCF valuation to \$216 million.

In his third (comparable company) analysis, Sherman found only two comparable companies, neither of which was similar in size to Montgomery. Sherman excluded companies that had international operations, multiple lines of business, or prepaid customers, as well as companies that used PCS technology. After selecting his comparable companies, Sherman applied the same metrics that he used in his comparable transactions analysis and gave them the same weight. That approach resulted in a valuation of \$206 million. After adding in the value of the non-operating assets, Sherman's ultimate comparable company valuation of MCHC was \$226 million.

Thus, Sherman's three analyses valued MCHC within a range of from \$212 million to \$226 million. Sherman derived

his final fair value by combining the results of his three analyses into a weighted average, giving 80 percent weight to the comparable transactions value, 15 percent weight to the DCF value, and 5 percent weight to the comparable company value. Sherman's heavy weighting of the comparable transactions analysis reflected his judgment that the transaction data, particularly the initial Verizon transaction price, were the best indication of value for MCHC. In contrast, Sherman gave little weight to the DCF analysis because of his concerns about the reliability of MCHC's financial data and the lack of management projections. He gave even less weight to the comparable company valuation because of the scarcity of publicly traded companies to which MCHC could reliably be compared. Combining the results of the three analyses into a weighted average yielded a fair value for MCHC of \$213,455,619, or \$21,346 per share.

In making its independent determination of MCHC's fair value, the Court of Chancery adopted Sherman's overall valuation framework, and most of Sherman's inputs. The Court made adjustments to some of the inputs that it did not adopt. The result was to reduce Sherman's valuation of \$213,455,619 (\$21,346 per share) to a final valuation of MCHC of \$196,217,373, or \$19,621.74 per share.

First, with respect to the comparable transaction analysis, the Vice Chancellor determined that the Verizon transaction price and the CD settlement price were valid inputs. But, the Court adjusted Sherman's CD settlement price by eliminating what Sherman perceived (incorrectly, the Court determined) to be a minority discount. The Court then independently increased the CD settlement figure (\$470 per POP) by 15 percent to eliminate a so-called "settlement haircut," to arrive at a value of \$540.50 per POP.

Second, the Court adjusted Sherman's DCF valuation by eliminating the 31 percent control premium that Sherman had added to his DCF value. That adjustment reduced Sherman's DCF valuation of MCHC from \$216 million to \$170 million.

Third, and most significant, the Court adjusted the weights that Sherman had accorded to the values derived by his three valuation methods. Sherman had weighted the comparable transaction value at 80 percent of total fair value. Because the effect of that weighting was to give the Verizon transaction an overall weight of 50 percent—a weight the Court found to be "too significant"—the Vice Chancellor reduced the weight accorded to the comparable transactions valuation from 80 percent to 65 percent.

Finally, because Sherman had corrected the figures derived from MCHC's financial statements in a reasonable manner, and also had looked to third party authority for guidance on other inputs, the Court determined that the 15 percent weight Sherman had accorded to the DCF valuation should be increased to 30 percent.

On appeal, MCHC does not challenge the Court of Chancery's adoption of Sherman's overall valuation framework. Instead, MCHC limits its attack to selected inputs to the valuation model that Sherman used.

Specifically, MCHC contends that the Court of Chancery erred in three different respects, namely by: (1) including in its comparable transactions analysis the price that Verizon Wireless initially agreed to pay to acquire Palmer; (2) adding a 15 percent premium to the price that the minority shareholders of CD, a separate Palmer subsidiary, had agreed to accept to settle their appraisal action; (3) subtracting the management fees that Palmer charged to MCHC, as reported in MCHC's financial statement.

We conclude that none of the challenged findings is clearly wrong, and indeed, all have firm support in the evidentiary record.

1. The Verizon Transaction

MCHC argues that the Court of Chancery erroneously included the Verizon transaction, because the transaction price contained synergistic elements of value whose inclusion is proscribed by 8 *Del. C.* § 262. That statute requires the Court of Chancery to appraise the subject shares by "determining their fair value exclusive of any element of value arising from the accomplishment or expectation of the merger or consolidation." In determining statutory "fair value," the Court must value the appraisal company as a "going concern." In performing its valuation, the Court of Chancery is free to consider the price actually derived from the sale of the company being valued, but only after the synergistic elements of value are excluded from that price.

The Court found Palmer offered *no business-related* combinatorial value to MCHC, and MCHC was probably the most valuable company in Palmer's cluster. Thus, the Vice Chancellor concluded, the only synergies included in the purchase price were dealmaking—not business-related—synergies.

That conclusion is supported by the evidence. The Verizon merger with Palmer did not add any synergistic business value to MCHC because Montgomery was a metropolitan statistical area (MSA), which is generally more valuable than a rural service area (RSA), and Montgomery had superior demographics relative to Palmer's other cellular holdings. Therefore, the only synergies required to be eliminated from the Verizon transaction price were the Palmer-related "deal-making" synergies. The question became how to determine the value of those synergies.

The Court of Chancery was unable precisely to quantify those "deal-making" synergies, because MCHC did not present any reliable evidence at trial of what those synergies were worth. Having received no helpful evidence from MCHC, the

Court of Chancery had to—and did—account for the synergies in a different way, namely, by reducing the total weight accorded to the comparable transactions component of the overall valuation, from 80 percent to 65 percent. Although in a perfect world that may not have been the ideal solution, in this world it was the only one permitted by the record evidence, given MCHC's failure to obtain a pre-merger valuation and to present legally reliable expert valuation testimony during the trial.

MCHC next contends that including the Verizon transaction in its comparable transaction analysis led the Court of Chancery to commit reversible error by not valuing MCHC as a going concern. Delaware law requires that in an appraisal action, a corporation must be valued as a going concern based on the "operative reality" of the company as of the time of the merger. In determining a corporation's "operative reality," the use of "speculative" elements of future value arising from the expectation or accomplishment of a merger is proscribed, but elements of future value that are known or susceptible of proof as of the date of the merger may be considered. Any facts which were known or which could be ascertained as of the date of the merger and which throw any light on future prospects of the merged corporation are not only pertinent to an inquiry as to the value of the dissenting stockholder's interest, but must be considered by the agency fixing the value.

MCHC argues that the Verizon transaction was not part of MCHC's "operative reality." At the time of the MCHC-Palmer merger, the transaction was not expected to close. MCHC characterizes the Verizon transaction as a mere "option" whose exercise was entirely within Verizon's control and which neither Price nor Verizon realistically expected to close at the time the MCHC-Palmer merger occurred.

The Vice Chancellor rejected MCHC's argument that because the Verizon-Price agreement was conditional, it was impermissibly "speculative" and did not reflect MCHC's going concern value. The Court of Chancery found that the Verizon transaction was more than an offer. Rather, it was a validly executed enforceable transaction agreement which bound Verizon to the implied covenant of good faith and fair dealing that inheres in every contract.

2. Adjustment of the CD Settlement Price to Eliminate the Settlement Discount

MCHC's second claim of error is that the Court of Chancery improperly adjusted the "CD settlement" price to eliminate what the Court regarded as a "settlement haircut."

The CD settlement was a settlement of litigation that arose out of Price's elimination, in a short form merger, of the minority shareholders of Cellular Dynamics (CD), a cellular company located in the southeastern United States. The minority shareholders of CD sued, and after protracted negotiations the

parties agreed to a settlement price of \$470 per POP. For purposes of valuing MCHC, both parties agreed that the CD settlement was a comparable transaction. Accordingly, Sherman utilized the \$470 per POP metric in performing his comparable transactions analysis.

The Vice Chancellor upheld Sherman's use of the CD settlement price, but adjusted that price to reflect what the Court described as a "settlement haircut"; that is, a discount that reflected factors unrelated to CD's fair value, such as the costs of litigation and the uncertainty of the appraisal action's outcome. To eliminate that settlement discount, the Court of Chancery increased the CD settlement price by 15 percent, thereby reaching a value of \$540.50 per POP as more fairly reflective of the value of CD. The Court then included that upwardly-adjusted CD settlement value in the comparable transactions analysis.

There was ample evidence to support the Court of Chancery's finding that the CD settlement reflected a discount from CD's fair value. The record included an exchange of several letters between Price and CD during settlement negotiations. Those letters included an offer by CD, on December 19, 2000, to settle the litigation for \$500 per POP. In that December 19 letter, the CD minority shareholders specifically stated that the \$500 per POP offer was less than CD's fair value, but was being made in an effort to resolve the matter quickly. That letter evidences that CD's minority shareholders were willing to settle for an amount below fair value to avoid the costs and delays of litigation.

Although there was no evidence of the precise magnitude of the actual CD settlement discount, the Court of Chancery did not err by selecting 15 percent as a reasonable measure. That percentage was based on evidence that the CD minority shareholders had accepted a price lower than CD's fair value, as well as the Court of Chancery's extensive expertise in the appraisal of corporate enterprises—an expertise that this Court has recognized on several occasions. To reiterate, where, as here, one side of the litigation presents no competent evidence to aid the Court in discharging its duty to make an independent valuation, we will defer to the Vice Chancellor's valuation approach unless it is manifestly unreasonable, *i.e.*, on its face is outside a range of reasonable values.

3. Eliminating the Management Fees Paid by MCHC to Palmer as an Input to the DCF Valuation

MCHC's third claim of error challenges the Court of Chancery's adjustment of MCHC's financial statements to eliminate from the DCF valuation the management fees Palmer had charged MCHC. The Court found that those fees were essentially a pretext, unrelated to the actual furnishing of management services.

Because there were no management projections upon which Sherman could rely to project MCHC's future cash flows,

Sherman had to create his own forecasts. To do that he relied upon various sources, including MCHC's financial statements. But Sherman did not accept MCHC's financial statements at face value. In his review of those statements, he identified several irregularities. The management fees that Palmer charged to MCHC represented one of those irregularities. The evidence established that since 1998, Palmer had charged MCHC more than \$3 million in management fees, and that in the first five months of 2001 alone, those fees totaled \$603,000. To determine MCHC's future cash flows more accurately, Sherman eliminated those fees.

None of Price's officers who testified were able to explain what management services Palmer had provided to MCHC,

or how those management fees were calculated. Indeed, Price's CEO characterized the fees (under oath) as "accounting bullshit." The Court was also troubled by the fact that Palmer charged management fees only to its subsidiaries that had minority shareholders, but not to those subsidiaries that Palmer wholly owned. Tellingly, after Palmer eliminated MCHC's minority shareholders in the merger, Palmer stopped charging management fees to MCHC. That evidence strongly supports the elimination of the management fees as an expense.

Judgment for Dabler affirmed in part and reversed in part. Remanded to the Chancery Court.

Shareholders' Inspection and Information Rights

Inspecting a corporation's books and records is sometimes essential to the exercise of a shareholder's rights. For example, a shareholder may be able to decide how to vote in a director election only after examining corporate financial records that reveal whether the present directors are managing the corporation profitably. Also, a close corporation shareholder may need to look at the books to determine the value of his shares.

Many corporate managers are resistant to shareholders' inspecting the corporation's books and records, charging that shareholders are nuisances or that shareholders often have improper purposes for making such an inspection. Sometimes, management objects solely on the ground that it desires secrecy.

Most of the state corporation statutes specifically grant shareholders inspection rights. The purpose of these statutes is to facilitate the shareholder's inspection of the books and records of corporations whose managements resist or delay proper requests by shareholders. A shareholder's lawyer or accountant may assist the shareholder's exercise of his inspection rights.

The MBCA grants shareholders an **absolute right of inspection** of an alphabetical listing of the shareholders entitled to notice of a meeting, including the number of shares owned. Access to a shareholder list allows a shareholder to contact other shareholders about important matters such as shareholder proposals.

The MBCA also grants an absolute right of inspection of, among other things, the articles, bylaws, and minutes of shareholder meetings within the past three years.

Shareholders have a **qualified right to inspect** other records, however. To inspect accounting records, board

and committee minutes, and shareholder minutes more than three years old, a shareholder must make the demand in *good faith* and have a *proper purpose*. Proper purposes include inspecting the books of account to determine the value of shares or the propriety of dividends. On the other hand, learning business secrets and aiding a competitor are clearly improper purposes.

Shareholders also have the right to receive from the corporation **information** that is important to their voting and investing decisions. The MBCA requires a corporation to furnish its shareholders *financial statements*, including a balance sheet, an income statement, and a statement of changes in shareholders' equity. The Securities Exchange Act of 1934 also requires publicly held companies to furnish such statements, as well as other information that is important to shareholders' voting and investing decisions. To protect shareholders of public companies, the Sarbanes-Oxley Act requires the CEO and the CFO of public companies to certify that to their knowledge all financial information filed with the Securities and Exchange Commission fairly presents the financial condition of the company and does not include untrue or misleading material statements.

Preemptive Right

The market price of a shareholder's shares will be reduced if a corporation issues additional shares at a price less than the market price. In addition, a shareholder's proportionate voting, dividend, and liquidation rights may be adversely affected by the issuance of additional shares. For example, if a corporation's only four shareholders each own 100 shares worth \$10 per share, then each shareholder has shares worth \$1,000, a 25 percent interest in any dividends declared, 25 percent of the

voting power, and a claim against 25 percent of the corporation's assets after creditors' claims have been satisfied. If the corporation subsequently issues 100 shares to another person for only \$5 per share, the value of each shareholder's shares falls to \$900 and his dividend, voting, and liquidation rights are reduced to 20 percent. In a worst-case scenario, the corporation issues 201 shares to one of the existing shareholders, giving that shareholder majority control of the corporation and reducing the other shareholders' interests to less than 17 percent each. As a result, the minority shareholders will be dominated by the majority shareholder and will receive a greatly reduced share of the corporation's dividends.

Such harmful effects of an issuance could have been prevented if the corporation had been required to offer each existing shareholder a percentage of the new shares equal to her current proportionate ownership. If, for example, in the situation described above, the corporation had offered 50 shares to each shareholder, each shareholder could have remained a 25 percent owner of the corporation: her interest in the corporation would not have been reduced, and her total wealth would not have been decreased.

Corporation law recognizes the importance of giving a shareholder the option of maintaining the value of his shares and retaining his proportionate interest in the corporation. This is the shareholder's **preemptive right**, an option to subscribe to a new issuance of shares in proportion to the shareholder's current interest in the corporation.

The MBCA adopts a comprehensive scheme for determining preemptive rights. It provides that the preemptive right does not exist except to the extent provided by the articles. The MBCA permits the corporation to state expressly when the preemptive right arises.

When the preemptive right exists, the corporation must notify a shareholder of her option to buy shares, the number of shares that she is entitled to buy, the price of the shares, and when the option must be exercised. Usually, the shareholder is issued a **right**, a written option that she may exercise herself or sell to a person who wishes to buy the shares.

Distributions to Shareholders

During the life of a corporation, shareholders may receive distributions of the corporation's assets. Most people are familiar with one type of distribution—dividends—but there are other important types of distributions to shareholders, including payments to shareholders upon the corporation's repurchase of its shares.

There is one crucial similarity among all the types of distributions to shareholders: Corporate assets are transferred to shareholders. Consequently, an asset transfer to shareholders may harm the corporation's creditors and others with claims against the corporation's assets. For example, a distribution of assets may impair a corporation's ability to pay its creditors. In addition, a distribution to one class of shareholders may harm another class of shareholders that has a liquidation priority over the class of shareholders receiving the distribution. The existence of these potential harms compels corporation law to restrict the ability of corporations to make distributions to shareholders.

Dividends One important objective of a business corporation is to make a profit. Shareholders invest in a corporation primarily to share in the expected profit either through appreciation of the value of their shares or through dividends. There are two types of dividends: *cash or property dividends* and *share dividends*. Only cash or property dividends are distributions of the corporation's assets. Share dividends are *not* distributions.

Cash or Property Dividends Dividends are usually paid in cash. However, other assets of the corporation—such as airline discount coupons or shares of another corporation—may also be distributed as dividends. Cash or property dividends are declared by the board of directors and paid by the corporation on the date stated by the directors. Once declared, dividends are *debts* of the corporation, and shareholders may sue to force payment of the dividends. The board's dividend declaration, including the amount of dividend and whether to declare a dividend, is protected by the business judgment rule.

Preferred shares nearly always have a set dividend rate stated in the articles of incorporation. Even so, unless the preferred dividend is mandatory, the board has discretion to determine whether to pay a preferred dividend and what amount to pay. Most preferred shares are *cumulative preferred shares*, on which unpaid dividends cumulate. The entire accumulation must be paid before common shareholders may receive any dividend. Even when preferred shares are noncumulative, the current dividend must be paid to preferred shareholders before any dividend may be paid to common shareholders.

The following *Dodge v. Ford* case is one of the few cases in which a court ordered the payment of a dividend to common shareholders. The court found that Henry Ford had the wrong motives for causing Ford Motor Company to refuse to pay a dividend.

Dodge v. Ford Motor Co.

170 N.W. 668 (Mich. Sup. Ct. 1919)

In 1916, brothers John and Horace Dodge owned 10 percent of the common shares of the Ford Motor Company. Henry Ford owned 58 percent of the outstanding common shares and controlled the corporation and its board of directors. Starting in 1911, the corporation paid a regular annual dividend of \$1.2 million, which was 60 percent of its capital stock of \$2 million but only about 1 percent of its total equity of \$114 million. In addition, from 1911 to 1915, the corporation paid special dividends totaling \$41 million.

The policy of the corporation was to reduce the selling price of its cars each year. In June 1915, the board and officers agreed to increase production by constructing new plants for \$10 million, acquiring land for \$3 million, and erecting an \$11 million smelter. To finance the planned expansion, the board decided not to reduce the selling price of cars beginning in August 1915 and to accumulate a large surplus.

A year later, the board reduced the selling price of cars by \$80 per car. The corporation was able to produce 600,000 cars annually, all of which, and more, could have been sold for \$440 instead of the new \$360 price, a forgone revenue of \$48 million. At the same time, the corporation announced a new dividend policy of paying no special dividend. Instead, it would reinvest all earnings except the regular dividend of \$1.2 million.

Henry Ford announced his justification for the new dividend policy in a press release: "My ambition is to employ still more men, to spread the benefits of this industrial system to the greatest possible number, to help them build up their lives and their homes." The corporation had a \$112 million surplus, expected profits of \$60 million, total liabilities of \$18 million, \$52.5 million in cash on hand, and municipal bonds worth \$1.3 million.

The Dodge brothers sued the corporation and the directors to force them to declare a special dividend. The trial court ordered the board to declare a dividend of \$19.3 million. Ford Motor Company appealed.

Ostrander, Chief Justice

It is a well-recognized principle of law that the directors of a corporation, and they alone, have the power to declare a dividend of the earnings of the corporation, and to determine its amount. Courts will not interfere in the management of the directors unless it is clearly made to appear that they are guilty of fraud or misappropriation of the corporate funds, or they refuse to declare a dividend when the corporation has a surplus of net profits which it can, without detriment to the business, divide among its stockholders, and when a refusal to do so would amount to such an abuse of discretion as would constitute a fraud, or breach of that good faith that they are bound to exercise towards the shareholders.

The testimony of Mr. Ford convinces this court that he has to some extent the attitude towards shareholders of one who has dispensed and distributed to them large gains and that they should be content to take what he chooses to give. His testimony creates the impression that he thinks the Ford Motor Company has made too much money, has had too large profits, and that, although large profits might be still earned, a sharing of them with the public, by reducing the price of the output of the company, ought to be undertaken. We have no doubt that certain sentiments, philanthropic and altruistic, creditable to Mr. Ford, had large influence in determining the policy to be pursued by the Ford Motor Company.

There should be no confusion of the duties that Mr. Ford conceives that he and the shareholders owe to the general public and the duties that in law he and his co-directors owe to protest-

ing, minority shareholders. A business corporation is organized and carried on primarily for the profit of the shareholders. The powers of the directors are to be employed for that end.

We are not, however, persuaded that we should interfere with the proposed expansion of the Ford Motor Company. In view of the fact that the selling price of products may be increased at any time, the ultimate results of the larger business cannot be certainly estimated. The judges are not business experts. It is recognized that plans must often be made for a long future, for expected competition, for a continuing as well as an immediately profitable venture. We are not satisfied that the alleged motives of the directors, in so far as they are reflected in the conduct of the business, menace the interests of shareholders.

Assuming the general plan and policy of expansion were for the best ultimate interest of the company and therefore of its shareholders, what does it amount to in justification of a refusal to declare and pay a special dividend? The Ford Motor Company was able to estimate with nicety its income and profit. It could sell more cars than it could make. The profit upon each car depended upon the selling price. That being fixed, the yearly income and profit was determinable, and, within slight variations, was certain.

There was appropriated for the smelter \$11 million. Assuming that the plans required an expenditure sooner or later of \$10 million for duplication of the plant, and for land \$3 million, the total is \$24 million. The company was a cash business. If the total cost of proposed expenditures had been withdrawn in cash

from the cash surplus on hand August 1, 1916, there would have remained \$30 million.

The directors of Ford Motor Company say, and it is true, that a considerable cash balance must be at all times carried by such a concern. But there was a large daily, weekly, monthly receipt of cash. The output was practically continuous and was continuously, and within a few days, turned into cash. Moreover, the contemplated expenditures were not to be immedi-

ately made. The large sum appropriated for the smelter plant was payable over a considerable period of time. So that, without going further, it would appear that, accepting and approving the plan of the directors, it was their duty to distribute on and near the 1st of August 1916, a very large sum of money to stockholders.

Judgment for the Dodge brothers affirmed.

To protect the claims of the corporation's creditors, all of the corporation statutes limit the extent to which dividends may be paid. The MBCA imposes two limits: (1) the *solvency test* and (2) the *balance sheet test*.

Solvency Test A dividend may not make a corporation insolvent; that is, unable to pay its debts as they come due in the usual course of business. This means that a corporation may pay a dividend to the extent it has *excess solvency*—that is, liquidity that it does not need to pay its currently maturing obligations. This requirement protects creditors, who are concerned primarily with the corporation's ability to pay debts as they mature.

Balance Sheet Test After the dividend has been paid, the corporation's assets must be sufficient to cover its liabilities and the liquidation preference of shareholders having a priority in liquidation over the shareholders receiving the dividend. This means that a corporation may pay a dividend to the extent it has *excess assets*—that is, assets it does not need to cover its liabilities and the liquidation preferences of shareholders having a priority in liquidation over the shareholders receiving the dividends. This requirement protects not only creditors but also preferred shareholders. It prevents a corporation from paying to common shareholders a dividend that will impair the liquidation rights of preferred shareholders.

Example Batt Company has \$27,000 in excess liquidity that it does not need to pay its currently maturing obligations. It has assets of \$200,000 and liabilities of \$160,000. It has one class of common shareholders. Its one class of preferred shareholders has a liquidation preference of \$15,000. Examining these facts, we find that Batt's excess solvency is \$27,000, but its excess assets are only \$25,000 ($\$200,000 - 160,000 - 15,000$). Therefore, Batt's shareholders may receive a maximum cash or property dividend of \$25,000, which will eliminate

all of Batt's excess assets and leave Batt with \$2,000 of excess solvency.

Share Dividends and Share Splits Corporations sometimes distribute additional shares of the corporation to their shareholders. Often, this is done in order to give shareholders something instead of a cash dividend so that the cash can be retained and reinvested in the business. Such an action may be called either a *share dividend* or a *share split*.

A **share dividend** of a *specified percentage of outstanding shares* is declared by the board of directors. For example, the board may declare a 10 percent share dividend. As a result, each shareholder will receive 10 percent more shares than she currently owns. A share dividend is paid on outstanding shares only. Unlike a cash or property dividend, a share dividend may be revoked by the board after it has been declared.

A **share split** results in shareholders receiving a specified number of shares in exchange for each share that they currently own. For example, shares may be split two for one. Each shareholder will now have two shares for each share that he previously owned. A holder of 50 shares will now have 100 shares instead of 50.

The MBCA recognizes that a share split or a share dividend in the same class of shares does not affect the value of the corporation or the shareholders' wealth, because no assets have been transferred from the corporation to the shareholders. The effect is like that produced by taking a pie with four pieces and dividing each piece in half. Each person may receive twice as many pieces of the pie, but each piece is worth only half as much. The total amount received by each person is unchanged.

Therefore, the MBCA permits share splits and share dividends of the same class of shares to be made merely by action of the directors. The directors merely have the corporation issue to the shareholders the number of shares needed to effect the share dividend or split. The corporation must have a sufficient number of authorized,

unissued shares to effect the share split or dividend; when it does not, its articles must be amended to create the required number of additional authorized shares.

Reverse Share Split A *reverse share split* is a decrease in the number of shares of a class such that, for example, two shares become one share. Most of the state corporation statutes require shareholder action to amend the articles to effect a reverse share split because the number of authorized shares is reduced. The purpose of a reverse share split is usually to increase the market price of the shares.

A reverse share split may also be used to freeze out minority shareholders. By the setting of a high reverse split ratio, a majority shareholder will be left with whole shares while minority shareholders will have only fractional shares. Corporation law allows a corporation to repurchase fractional shares without the consent of the fractional shareholders. Freeze-outs are discussed in Chapter 43.

Share Repurchases Declaring a cash or property dividend is only one of the ways in which a corporation may distribute its assets. A corporation may also distribute its assets by repurchasing its shares from its shareholders. Such a repurchase may be either a *redemption* or an *open-market repurchase*.

The right of **redemption** (or a call) is usually a right of the corporation to force an *involuntary* sale by a shareholder at a fixed price. The shareholder must sell the shares to the corporation at the corporation's request; in most states, the shareholder cannot force the corporation to redeem the shares.

Under the MBCA, the right of redemption must appear in the articles of incorporation. It is common for a corporation to issue preferred shares subject to redemption at the corporation's option. Usually, common shares are not redeemable.

In addition, a corporation may repurchase its shares **on the open market**. A corporation is empowered to purchase its shares from any shareholder who is willing to sell them. Such repurchases are usually *voluntary* on the shareholder's part, requiring the corporation to pay a current market price to entice the shareholder to sell. However, a corporation may force a shareholder with a fractional share to sell that fractional share back to the corporation.

A corporation's repurchase of its shares may harm creditors and other shareholders. The MBCA requires a corporation repurchasing shares to meet tests that are the same as its cash and property dividend rules, recognizing that financially a repurchase of shares is no different

from a dividend or any other distribution of assets to shareholders.

Ensuring a Shareholder's Return on Investment

Obtaining a return on her investment in a corporation is important to every shareholder. In a publicly held corporation, a shareholder may receive a return in the form of dividends and more significantly an increase in the value of her shares, which she may sell in the public securities markets.

For a shareholder in a close corporation, obtaining a return on his investment is often a problem, especially for minority shareholders. The majority shareholders dominate the board of directors, who usually choose not to pay any dividend to shareholders. And since the close corporation has no publicly traded shares, minority shareholders have little if any ability to sell their shares. The majority shareholders in a close corporation don't suffer the same effect, because they are usually officers and employees of the corporation and receive a return on their investment in the form of salaries.

What can a minority shareholder do? Rarely will a court, as in *Dodge v. Ford*, require the payment of a dividend. The only way a minority shareholder can protect himself is to bargain well prior to becoming a shareholder. For example, a prospective minority shareholder may insist on a mandatory dividend, that he be employed by the corporation at a salary, or that the corporation or majority shareholders be required to repurchase his shares upon the occurrence of certain events, such as the failure of the corporation to go public after five years. There is a limit to what a minority shareholder may demand, however, for the majority shareholders may refuse to sell shares to a prospective shareholder who asks too much.

Shareholders' Lawsuits

Shareholders' Individual Lawsuits A shareholder has the right to sue in his own name to prevent or redress a breach of the shareholder's contract. For example, a shareholder may sue to recover dividends declared but not paid or dividends that should have been declared, to enjoin the corporation from committing an *ultra vires* act, to enforce the shareholder's right of inspection, and to enforce preemptive rights.

Shareholder Class Action Suits When several people have been injured similarly by the same

persons in similar situations, one of the injured people may sue for the benefit of all the people injured. Likewise, if several shareholders have been similarly affected by a wrongful act of another, one of these shareholders may bring a **class action** on behalf of all the affected shareholders.

An appropriate class action under state corporation law would be an action seeking a dividend payment that has been brought by a preferred shareholder for all of the preferred shareholders. Any recovery is prorated to all members of the class.

A shareholder who successfully brings a class action is entitled to be reimbursed from the award amount for his *reasonable expenses*, including attorney's fees. If the class action suit is unsuccessful and has no reasonable foundation, the court may order the suing shareholder to pay the defendants' reasonable litigation expenses, including attorney's fees.

If the derivative action succeeds and damages are awarded, the damages ordinarily go to the corporate treasury for the benefit of the corporation. The suing shareholder is entitled only to reimbursement of his reasonable attorney's fees that he incurred in bringing the action.

Eligible Shareholders Although allowing shareholders to bring derivative suits creates a viable procedure for suing wrongdoing officers and directors, this procedure is also susceptible to abuse. **Strike suits** (lawsuits brought to gain out-of-court settlements for the complaining shareholders personally or to earn large attorney's fees, rather than to obtain a recovery for the corporation) have not been uncommon. To discourage strike suits, the person bringing the action must be a current shareholder who also held his shares at the time the alleged wrong occurred. In addition, the shareholder must fairly and adequately represent the interests of shareholders similarly situated in enforcing the right of the corporation.

One exception to these rules is the **double derivative suit**, a suit brought by a shareholder of a parent corporation on behalf of a subsidiary corporation owned by the parent. Courts regularly permit double derivative suits.

Demand on Directors Since a corporation's decision to sue someone is ordinarily made by its managers, a shareholder must first **demand** that the board of directors bring the suit. A demand informs the board that the corporation may have a right of action against a person that the board, in its business judgment, may decide to pursue. Therefore, if a demand is made and the board decides to bring the suit, the shareholder may not institute a derivative suit.

Ordinarily, a shareholder's failure to make a demand on the board prevents her from bringing a derivative suit. Nonetheless, the shareholder may initiate the suit if she proves that a demand on the board would have been useless or **futile**. Demand is futile, and therefore **excused**, if the board is unable to make a disinterested decision regarding whether to sue. Futility may be proved when all or a majority of the directors are interested in the challenged transaction, such as in a suit alleging that the directors issued shares to themselves at below-market prices.

If a shareholder makes a demand on the board and it **refuses** the shareholder's demand to bring a suit, ordinarily the shareholder is not permitted to continue the derivative action. The decision to bring a lawsuit is an ordinary business decision appropriate for a board of

Stanford Law School maintains the Securities Class Action Clearinghouse. It provides detailed information relating to the prosecution, defense, and settlement of federal class action securities litigation.

Shareholders' Derivative Actions When a corporation has been harmed by the actions of another person, the right to sue belongs to the corporation and any damages awarded by a court belong to the corporation. Hence, as a general rule, a shareholder has no right to sue in his own name when someone has harmed the corporation, and he may not recover for himself damages from that person. This is the rule even when the value of the shareholder's investment in the corporation has been impaired.

Nonetheless, one or more shareholders are permitted under certain circumstances to bring an action for the benefit of the corporation when the directors have failed to pursue a corporate cause of action. For example, if the corporation has a claim against its chief executive for wrongfully diverting corporate assets to her personal use, the corporation may not sue the chief executive because she controls the board of directors. Clearly, the CEO should not go unpunished. Consequently, corporation law authorizes a shareholder to bring a **derivative action** (or derivative suit) against the CEO on behalf of the corporation and for its benefit. Such a suit may also be used to bring a corporate claim against an outsider.

directors to make. The business judgment rule, therefore, is available to insulate from court review a board's decision not to bring a suit.

Of course, if a shareholder derivative suit accuses the board of harming the corporation, such as by misappropriating the corporation's assets, the board's refusal will not be protected by the business judgment rule because the board has a conflict of interest in its decision to sue. In such a situation, the shareholder may sue the directors despite the board's refusal.

Shareholder Litigation Committees In an attempt to ensure the application of the business judgment rule in demand refusal and demand futility situations, interested directors have tried to isolate themselves from the decision whether to sue by creating a special committee of the board, called a *shareholder* or *special litigation committee* (SLC) (or independent investigation committee) whose purpose is to decide whether to sue. The SLC should consist of directors who are not defendants in the derivative suit, who are not interested in the challenged action, are independent of the defendant directors, and, if possible, were not directors at the time the wrong occurred. Usually, the SLC has independent legal counsel that assists its determination whether to sue. Because the SLC is a committee of the board, its decision may be protected by the business judgment rule. Therefore, an SLC's decision not to sue may prevent a shareholder from suing.

Shareholders have challenged the application of the business judgment rule to an SLC's decision to dismiss a

shareholder derivative suit against some of the directors. The suing shareholders argue that it is improper for an SLC to dismiss a shareholder derivative suit because there is a *structural bias*. That is, the SLC members are motivated by a desire to avoid hurting their fellow directors and adversely affecting future working relationships within the board.

When demand is **not futile**, most of the courts that have been faced with this question have upheld the decisions of special litigation committees that comply with the business judgment rule. The courts require that the SLC members be *independent* of the defendant directors, be *disinterested* with regard to the subject matter of the suit, make a *reasonable investigation* into whether to dismiss the suit, and act in *good faith*.

When demand is **futile or excused**, most courts faced with the decision of an SLC have applied the rule of the *Zapata* case, which follows.

The MBCA has adopted the *Zapata* rule in all contexts, whether or not an SLC is used. When a majority of directors are not independent, the corporation has the burden of proving that the *Zapata* test has been met: good faith and reasonable investigation by the directors making the decision to dismiss the action and a determination by those directors that the best interests of the corporation are served by dismissal. If, however, a majority of the directors are independent, the shareholders bringing the derivative action have the burden of proving that there was bad faith or no reasonable investigation or that bringing the action is in the best interest of the corporation.

Zapata Corp. v. Maldonado

430 A.2d 779 (Del. Sup. Ct. 1981)

Zapata Corporation had a share option plan that permitted its executives to purchase Zapata shares at a below-market price. Most of the directors participated in the share option plan. In 1974, the directors voted to advance the share option exercise date in order to reduce the federal income tax liability of the executives who exercised the share options, including the directors. An additional effect, however, was to increase the corporation's federal tax liability.

William Maldonado, a Zapata shareholder, believed that the board action was a breach of a fiduciary duty and that it harmed the corporation. In 1975, he instituted a derivative suit in a Delaware court on behalf of Zapata against all of the directors. He failed to make a demand on the directors to sue themselves, alleging that this would be futile since they were all defendants.

The derivative suit was still pending in 1979, when four of the defendants were no longer directors. The remaining directors then appointed two new outside directors to the board and created an Independent Investigation Committee consisting solely of the two new directors. The board authorized the committee to make a final and binding decision regarding whether the derivative suit should be brought on behalf of the corporation. Following a three-month investigation, the committee concluded that Maldonado's derivative suit should be dismissed as against Zapata's best interests.

Zapata asked the Delaware court to dismiss the derivative suit. The court refused, holding that Maldonado possessed an individual right to maintain the derivative action and that the business judgment rule did not apply. Zapata appealed to the Supreme Court of Delaware.

Quillen, Justice

We find that the trial court's determination that a shareholder, once demand is made and refused, possesses an independent, individual right to continue a derivative suit for breaches of fiduciary duty over objection by the corporation, as an absolute rule, is erroneous.

Derivative suits enforce corporate rights, and any recovery obtained goes to the corporation. We see no inherent reason why a derivative suit should automatically place in the hands of the litigating shareholder sole control of the corporate right throughout the litigation. Such an inflexible rule would recognize the interest of one person or group to the exclusion of all others within the corporate entity.

When, if at all, should an authorized board committee be permitted to cause litigation, properly initiated by a derivative stockholder in his own right, to be dismissed? The problem is relatively simple. If, on the one hand, corporations can consistently wrest bona fide derivative actions away from well-meaning derivative plaintiffs through the use of the committee mechanism, the derivative suit will lose much, if not all, of its effectiveness as an intracorporate means of policing boards of directors. If, on the other hand, corporations are unable to rid themselves of meritless or harmful litigation and strike suits, the derivative action, created to benefit the corporation, will produce the opposite, unintended result. It thus appears desirable to us to find a balancing point where bona fide shareholder power to bring corporate causes of action cannot be unfairly trampled on by the board of directors, but the corporation can rid itself of detrimental litigation.

We are not satisfied that acceptance of the business judgment rationale at this stage of derivative litigation is a proper balancing point. We must be mindful that directors are passing judgment on fellow directors in the same corporation and fellow directors, in this instance, who designated them to serve both as directors and committee members. The question naturally arises whether a "there but for the grace of God go I" empathy might not play a role. And the further question arises whether inquiry as to independence, good faith and reasonable investigation is sufficient safeguard against abuse, perhaps subconscious abuse.

We thus steer a middle course between those cases that yield to the independent business judgment of a board committee and this case as determined below, which would yield to unbridled shareholder control.

We recognize that the final substantive judgment whether a particular lawsuit should be maintained requires a balance of many factors—ethical, commercial, promotional, public relations, employee relations, fiscal, as well as legal. We recognize the danger of judicial overreaching but the alternatives seem to us to be outweighed by the fresh view of a judicial outsider.

After an objective and thorough investigation of a derivative suit, an independent committee may cause its corporation to file a motion to dismiss the derivative suit. The Court should apply a two-step test to the motion. First, the Court should inquire into the independence and good faith of the committee and the bases supporting its conclusions. The corporation should have the burden of proving independence, good faith, and reasonable investigation, rather than presuming independence, good faith, and reasonableness. If the Court determines either that the committee is not independent or has not shown reasonable bases for its conclusions, or if the Court is not satisfied for other reasons relating to the process, including but not limited to the good faith of the committee, the Court shall deny the corporation's motion to dismiss the derivative suit.

The second step provides the essential key in striking the balance between legitimate corporate claims as expressed in a derivative stockholder suit and a corporation's best interests as expressed by an independent investigating committee. The Court should determine, applying its own independent business judgment, whether the motion should be granted. The second step is intended to thwart instances where corporate actions meet the criteria of step one, but the result does not appear to satisfy its spirit, or where corporate actions would simply prematurely terminate a stockholder grievance deserving of further consideration in the corporation's interest. The Court of course must carefully consider and weigh how compelling the corporate interest in dismissal is when faced with a non-frivolous lawsuit. The Court should, when appropriate, give special consideration to matters of law and public policy in addition to the corporation's best interests.

The second step shares some of the same spirit and philosophy of the statement of the trial court: "Under our system of law, courts and not litigants should decide the merits of litigation."

Judgment reversed in favor of Zapata. Case remanded to the trial court.

Litigation Expenses If a shareholder is successful in a derivative suit, she is entitled to a reimbursement of her reasonable litigation expenses out of the corporation's

damage award. On the other hand, if the suit is unsuccessful and has been brought without reasonable cause, the shareholder must pay the defendants' expenses,

Ethics in Action

After reading *Zapata Corp. v. Maldonado* and the MBCA rules for dismissal of shareholder derivative actions, you may predict that a court will almost always respect the recommendation of a special litigation committee, even when a former or existing board member is a defendant. That is not always the case because the corporation does not have a valid right of action against a director, but often because an SLC has adopted the right process (good faith and reasonable inquiry) and easily can justify that the expense of litigation and the distraction of current management outweigh the likely recovery to the corporation from the wrongdoing director.

- Do you think is it ethical for an SLC to recommend dismissal of an action against a director who has harmed the corporation? Is that sending the right message to other directors and officers? Are there other ways to discipline a

director or officer than by suing him? Are those alternatives sufficient deterrents or punishments?

- Do you think it would be justifiable for an SLC to recommend dismissal of an action against former officers who, like some top officers in Adelphia, Tyco, and Enron, either looted the corporation or caused it to overstate its earnings or understate its liabilities? Is it justifiable for a corporation not to sue directors and officers of corporations, like Apple Inc. and The Home Depot, Inc., who authorized or permitted the backdating of options given to the CEO and other officers, which nearly guaranteed that the officers would profit from the options? Is it clear that options backdating is unethical? Or is options backdating merely an alternative way of guaranteeing compensation to high quality officers? Would a utilitarian or profit maximizer be more likely to recommend dismissal than a rights theorist?

including attorney's fees. The purpose of this rule is to deter strike suits by punishing shareholders who litigate in bad faith.

Defense of Corporation by Shareholder Occasionally, the officers or managers will refuse to defend a suit brought against a corporation. If a shareholder shows that the corporation has a valid defense to the suit and that the refusal or failure of the directors to defend is a breach of their fiduciary duty to the corporation, the courts will permit the shareholder to defend for the benefit of the corporation, its shareholders, and its creditors.

Shareholder Liability

Shareholders have many responsibilities and liabilities in addition to their many rights. In Chapters 41 and 42, we studied shareholder liability when a shareholder pays too little consideration for shares, when a corporation is defectively formed, and when a corporation's veil is pierced. In this section, four other grounds for shareholder liability are discussed.

Shareholder Liability for Illegal Distributions Dividends and other distributions of a corporation's assets received by a shareholder with *knowledge of their illegality* may be recovered on behalf of the corporation. Under the MBCA, primary liability is placed on the directors who, failing to comply with the business

judgment rule, authorized the unlawful distribution. However, the directors are entitled to contribution from shareholders who received an asset distribution knowing that it was illegally made. These liability rules enforce the limits on asset distributions that were discussed earlier in this chapter.

Shareholder Liability for Corporate Debts One of the chief attributes of a shareholder is his *limited liability*: Ordinarily, he has no liability for corporate obligations beyond his capital contribution. Defective attempts to incorporate (in Chapter 42) and piercing the corporate veil (in Chapter 41) are grounds on which a shareholder may be held liable for corporate debts beyond his capital contribution. In addition, a few states impose personal liability on shareholders for *wages owed to corporate employees*, even if the shareholders have fully paid for their shares.

Sale of a Control Block of Shares The per share value of the shares of a majority shareholder of a corporation is greater than the per share value of the shares of a minority shareholder. This difference in value is due to the majority shareholder's ability to control the corporation and to cause it to hire her as an employee at a high salary. Therefore, a majority shareholder can sell her shares for a *premium* over the fair market value of minority shares.

Majority ownership is not always required for control of a corporation. In a close corporation it is required, but

in a publicly held corporation with a widely dispersed, hard-to-mobilize shareholder group, minority ownership of from 5 to 30 percent may be enough to obtain control. Therefore, a holder of minority control in such a corporation will also be able to receive a premium.

Current corporation law imposes no liability on any shareholder, whether or not the shareholder is a controlling shareholder, *merely* because she is able to sell her shares for a premium. Nonetheless, if the premium is accompanied by wrongdoing, controlling shareholders have been held liable either for the amount of the premium or for the damages suffered by the corporation.

For example, a seller of control shares is liable for selling to a purchaser who harms the corporation if the seller had or should have had a *reasonable suspicion* that the purchaser would mismanage or loot the corporation. A seller may be placed on notice of a purchaser's bad motives by facts indicating the purchaser's history of *mismanagement and personal use of corporate assets*, by the purchaser's *lack of interest in the physical facilities* of the corporation, or the purchaser's great *interest in the liquid assets* of the corporation. These factors tend to indicate that the purchaser has a short-term interest in the corporation.

The mere payment of a premium is not enough to put the seller on notice. If the *premium is unduly high*, however, such as a \$50 offer for shares traded for \$10, a seller must doubt whether the purchaser will be able to recoup his investment without looting the corporation.

When a seller has, or should have, a reasonable suspicion that a purchaser will mismanage or loot the corporation, he must not sell to the purchaser unless a *reasonable investigation* shows there is no reasonable risk of wrongdoing.

A few courts find liability when a selling shareholder takes or sells a *corporate asset*. For example, if a purchaser wants to buy the corporation's assets and the controlling shareholder proposes that the purchaser buy her shares instead, the controlling shareholder is liable for usurping a corporate opportunity.

A more unusual situation existed in *Perlman v. Feldman*.³ In that case, Newport Steel Corporation had excess demand for its steel production, due to the Korean War. Another corporation, in order to guarantee a steady supply of steel, bought at a premium a minority yet controlling block of shares of Newport from Feldman, its chairman and president. The court ruled that Feldman was required to share the premium with the other share-

holders because he had sold a corporate asset—the ability to exploit an excess demand for steel. The court reasoned that Newport could have exploited that asset to its advantage.

Shareholders as Fiduciaries A few courts have recognized a fiduciary duty of controlling shareholders to use their ability to control the corporation in a fair, just, and equitable manner that benefits all of the shareholders proportionately. This is a duty to be **impartial**—that is, not to prefer themselves over the minority shareholders. For example, controlling shareholders have a fiduciary duty not to cause the corporation to repurchase their own shares or to pay themselves a dividend unless the same offer is made to the minority shareholder.

One of the most common examples of impartiality is the **freeze-out** or *squeeze-out* of minority shareholders, which is wrongful because of its **oppression** of minority shareholders. It occurs in close corporations when controlling shareholders pay themselves high salaries while not employing or paying dividends to noncontrolling shareholders. Since there is usually no liquid market for the shares of the noncontrolling shareholders, they have an investment that provides them no return, while the controlling shareholders reap large gains. Such actions by the majority are especially wrongful when the controlling shareholders follow with an offer to buy the minority's shares at an unreasonably low price.

Some courts have held that all close corporation shareholders—whether majority or minority owners—are fiduciaries of each other and the corporation, on the grounds that the close corporation is an incorporated partnership. Thus, like partners, the shareholders owe fiduciary duties to act in the best interests of the corporation and the shareholders as a whole.

Some statutes, such as the Statutory Close Corporation Supplement to the MBCA, permit close corporation shareholders to dispense with a board of directors or to arrange corporate affairs as if the corporation were a partnership. The effect of these statutes is to impose management responsibilities, including the fiduciary duties of directors, on the shareholders. In essence, the shareholders are partners and owe each other fiduciary duties similar to those owed between partners of a partnership.

The next case, *Brodie v. Jordan*, is a decision of the Supreme Judicial Court of Massachusetts, a leading court in fashioning rights for minority shareholders in close corporations. The court found that the majority shareholders who oppressed a minority shareholder by

³219 F.2d 173 (2d Cir. 1955).

excluding her from the business operations were required to permit the minority shareholder to enjoy the financial or other benefits from the business to the extent that her

ownership interest justified. The court refused, however, to order the majority shareholders to repurchase the minority shareholder's shares.

Brodie v. Jordan

857 N.E.2d 1076 (Mass. Sup. Jud. Ct. 2006)

Mary Brodie, Robert Jordan, and David Barbuto were the only shareholders of Malden Centerless Grinding Co., Inc., a Massachusetts corporation that operated a small machine shop. Mary's deceased husband, Walter Brodie, was one of the founding members of the company and served as its president from 1979 to 1992. Barbuto was a shareholder, director, and treasurer of the company since its formation. Jordan was an employee of the company since 1975 and a shareholder, director, and officer since 1984; he was in charge of the day-to-day operation of the business.

Beginning in 1984, Walter, Barbuto, and Jordan each held one-third of the shares of the corporation, and all three served as directors. By 1988, however, Walter was no longer involved in the company's day-to-day operation and only met with Barbuto and Jordan two to three times each year. After Walter disagreed with Barbuto and Jordan over management issues, Walter requested that the company purchase his shares, but those requests were rejected. Neither the articles of incorporation nor any corporate bylaw obligated Malden, Barbuto, or Jordan to purchase the stock of a shareholder.

The corporation had not paid any dividends to shareholders since 1989. As an employee, Jordan received a salary at a rate set by the board of directors (Barbuto and himself). Jordan participated in a profit-sharing plan made available by the corporation and had the use of a company vehicle. Barbuto received director's fees from the corporation until 1998. He owned the building that housed Malden's corporate offices and received rent from the corporation. Barbuto also owned a separate corporation, Barco Engineering, Inc., which was a customer of Malden and for which Malden regularly performed services. Walter received compensation from the company prior to 1992, when he was voted out as president and director of Malden. Walter was paid a consultant's fee in 1994 and 1995. He died in 1997, and Mary inherited his one-third interest in Malden. Neither Walter nor Mary received any compensation or other money from the corporation after 1995.

In July 1997, Mary attended a Malden shareholders' meeting, at which she nominated herself as a director; she was not elected as Barbuto and Jordan voted against her. At this same meeting, Mary asked Barbuto and Jordan to perform a valuation of the company so that she could value her shares, but a valuation was never performed.

In 1998, Mary sued Barbuto and Jordan claiming that they breached a fiduciary duty by freezing her out of the corporation. By the time the case came to trial, Barbuto and Jordan had failed to hold an annual shareholder's meeting for the previous five years, and Mary had not participated in any company decision making. The trial court found that Barbuto and Jordan had breached a fiduciary duty and oppressed Mary. The court ordered Barbuto and Jordan to purchase Mary's shares. After a court of appeals affirmed, Barbuto and Jordan appealed to the Massachusetts Supreme Judicial Court.

Cowin, Judge

The parties do not dispute that Malden is a close corporation, in that it has (1) a small number of stockholders; (2) no ready market for the corporate stock; and (3) substantial majority stockholder participation in the management, direction and operations of the corporation. "Stockholders in a close corporation owe one another substantially the same fiduciary duty in the operation of the enterprise that partners owe to one another" that is, a duty of "utmost good faith and loyalty." *Donahue v. Rodd Electrotype Co. of New England, Inc.*, 367 Mass. 578, 593, 328 N.E.2d 505 (1975).

Majority shareholders in a close corporation violate this duty when they act to "freeze out" the minority. We have defined freeze-outs by way of example: The squeezers (those who employ the freeze-out techniques) may refuse to declare

dividends; they may drain off the corporation's earnings in the form of exorbitant salaries and bonuses to the majority shareholder-officers and perhaps to their relatives, or in the form of high rent by the corporation for property leased from majority shareholders; they may deprive minority shareholders of corporate offices and of employment by the company; they may cause the corporation to sell its assets at an inadequate price to the majority shareholders. What these examples have in common is that, in each, the majority frustrates the minority's reasonable expectations of benefit from their ownership of shares.

We have previously analyzed freeze-outs in terms of shareholders' "reasonable expectations" both explicitly and implicitly. See *Bodio v. Ellis*, 401 Mass. 1, 10, 513 N.E.2d 684 (1987) (thwarting minority shareholder's "rightful expectation" as to

control of close corporation was breach of fiduciary duty); *Wilkes v. Springside Nursing Home, Inc.*, 370 Mass. 842, 850, 353 N.E.2d 657 (1976) (denying minority shareholders employment in corporation may “effectively frustrate their purposes in entering on the corporate venture”).

In the present case, the Superior Court judge properly analyzed the defendants’ liability in terms of the plaintiff’s reasonable expectations of benefit. The judge found that the defendants had interfered with the plaintiffs reasonable expectations by excluding her from corporate decision-making, denying her access to company information, and hindering her ability to sell her shares in the open market. In addition, the judge’s findings reflect a state of affairs in which the defendants were the only ones receiving any financial benefit from the corporation. The Appeals Court determined that the findings were warranted, and the defendants have not sought further appellate review with respect to liability. Thus, the only question before us is whether, on this record, the plaintiff was entitled to the remedy of a forced buyout of her shares by the majority. We conclude that she was not so entitled.

The proper remedy for a freeze-out is to restore the minority shareholder as nearly as possible to the position she would have been in had there been no wrongdoing. Because the wrongdoing in a freeze-out is the denial by the majority of the minority’s reasonable expectations of benefit, it follows that the remedy should, to the extent possible, restore to the minority shareholder those benefits which she reasonably expected, but has not received because of the fiduciary breach.

If, for example, a minority shareholder had a reasonable expectation of employment by the corporation and was terminated wrongfully, the remedy may be reinstatement, back pay, or both. Similarly, if a minority shareholder has a reasonable expectation of sharing in company profits and has been denied this opportunity, she may be entitled to participate in the favorable results of operations to the extent that those results have been wrongly appropriated by the majority. The remedy should neither grant the minority a windfall nor excessively penalize the majority. Rather, it should attempt to reset the proper balance between the majority’s conceded rights to what has been termed “selfish ownership” and the minority’s reasonable expectations of benefit from its shares.

Courts have broad equitable powers to fashion remedies for breaches of fiduciary duty in a close corporation. Here, the Superior Court judge ordered the defendants to buy out the plaintiff at the price of an expert’s estimate of her share of the corporation, a remedy that no Massachusetts appellate court has previously authorized. The problem with this remedy is that it placed the plaintiff in a significantly *better* position

than she would have enjoyed absent the wrongdoing, and well exceeded her reasonable expectations of benefit from her shares.

The remedy in *Donahue v. Rodd Electrotype Co. of New England, Inc.*, 367 Mass. 578, 603, 328 N.E.2d 505 (1975), is readily distinguishable. There, the majority had caused the corporation to purchase majority shareholders’ stock at a favorable price while denying minority shareholders the same opportunity. We held that, to comply with its fiduciary duties, the majority had to either rescind the sale of its own shares to the corporation or cause the corporation to purchase the minority’s shares on the same terms. Here, there is no allegation that Malden purchased the defendants’ shares without giving the plaintiff a similar opportunity.

One of the defining aspects of a close corporation is the absence of a ready market for corporate stock. It is well established that in the absence of an agreement among shareholders or between the corporation and the shareholder, or a provision in the corporation’s articles of organization or by-laws, neither the corporation nor a majority of shareholders is under any obligation to purchase the shares of minority shareholders when minority shareholders wish to dispose of their interest in the corporation. In this case, it is undisputed that neither the articles of organization nor any corporate bylaw obligates Malden or the defendants to purchase the plaintiff’s shares. Thus, there is nothing in the background law, the governing rules of this particular close corporation, or any other circumstance that could have given the plaintiff a reasonable expectation of having her shares bought out.

In ordering the defendants to purchase the plaintiffs stock at the price of her share of the company, the judge created an artificial market for the plaintiff’s minority share of a close corporation—an asset that, by definition, has little or no market value. Thus, the remedy had the perverse effect of placing the plaintiff in a position superior to that which she would have enjoyed had there been no wrongdoing.

The remedy for the defendants’ breach of fiduciary duty is one that protects the plaintiff’s reasonable expectations of benefit from the corporation and that compensates her for their denial in the past. An evidentiary hearing is appropriate to determine her reasonable expectations of ownership; whether such expectations have been frustrated; and, if so, the means by which to vindicate the plaintiff’s interests. For breaches visited upon the plaintiff resulting in deprivations that can be quantified, money damages will be the appropriate remedy. Prospective injunctive relief may be granted to ensure that the plaintiff is allowed to participate in company governance, and to enjoy financial or other benefits from the business, to the extent that her ownership interest justifies.

In devising a remedy that grants the plaintiff her reasonable expectations of benefit from stock ownership in Malden, the judge may consider the fact that the plaintiff has received no economic benefit from her shares. If the defendants have denied the plaintiff any return on her investment while draining off the corporation's earnings for themselves, the judge may

consider, among other possibilities, the propriety of compelling the declaration of dividends.

Judgment for Mary Brodie affirmed in part and reversed in part. Remanded to the trial court.

Members' Rights and Duties in Nonprofit Corporations

In a for-profit corporation, the shareholders' rights to elect directors and to receive dividends are their most important rights. The shareholders' duty to contribute capital as promised is the most important responsibility. By contrast, in a nonprofit corporation, the members' rights and duties—especially in a mutual benefit corporation—are defined by the ability of the members to use the facilities of the corporation (as in a social club) or to consume its output (as in a cooperative grocery store) and by their obligations to support the enterprise periodically with their money (such as dues paid to a social club) or with their labor (such as the duty to work a specified number of hours in a cooperative grocery store).

Nonprofit corporation law grants a corporation and its members considerable flexibility in determining the rights and liabilities of its members. The Model Nonprofit Corporation Act (MNCA) provides that all members of a nonprofit corporation have equal rights and obligations with respect to voting, dissolution, redemption of membership, and transfer of membership, unless the articles or bylaws establish classes of membership with different rights and obligations. For other rights and obligations, the MNCA provides that all members have the same rights and obligations, unless the articles or bylaws provide otherwise.

For example, a mutual benefit corporation that operates a golf country club may have two classes of membership. A full membership may entitle a full member to use all the club's facilities (including the swimming pool and tennis courts), grant the full member two votes on all matters submitted to members, and require the full member to pay monthly dues of \$500. A limited membership may give a limited member the right to play the golf course only, grant the limited member one vote on all matters submitted to members, and require the limited members to pay monthly dues of \$300 per month.

While members are primarily concerned about their consumption rights and financial obligations—such as those addressed above—that are embodied in the articles and the bylaws, they have other rights and obligations as well, including voting, inspection, and information rights similar to those held by shareholders of for-profit corporations.

Members' Meeting and Voting Rights

A nonprofit corporation must hold an annual meeting of its members and may hold meetings at other times as well. Members holding at least 5 percent of the voting power may call for a special meeting of members at any time.

All members of record have one vote on all matters submitted to members, unless the articles or bylaws grant lesser or greater voting power. The articles or bylaws may provide for different classes of members. Members of one class may be given greater voting rights than the members of another class. The articles or bylaws may provide that a class has no voting power.

Members may not act at a meeting unless a quorum is present. Under the MNCA, a quorum is 10 percent of the votes entitled to be cast on a matter. However, unless at least one-third of the voting power is present at the meeting, the only matters that may be voted on are matters listed in the meeting notice sent to members. The articles or bylaws may require higher percentages.

Members may elect directors by straight or cumulative voting and by class voting. The articles or bylaws may also permit members to elect directors on the basis of chapter or other organizational unit, by region or other geographical unit, or by any other reasonable method. For example, a national humanitarian fraternity such as Lions Club may divide the United States into seven regions whose members are entitled to elect one director. Members also have the right to remove directors they have elected with or without cause.

In addition to the rights to elect and to remove directors, members have the right to vote on most amendments

of the articles and bylaws, merger of the corporation with another corporation, sale of substantially all the corporation's assets, and dissolution of the corporation. Ordinarily, members must approve such matters by two thirds of the votes cast or a majority of the voting power, whichever is less. This requirement is more lenient than the rule applied to for-profit corporations. Combined with the 10 percent quorum requirement, members with less than 7 percent of the voting power may approve matters submitted to members.

However, the unfairness of such voting rules is offset by the MNCA's notice requirement. A members' meeting may not consider important matters such as mergers and articles amendments unless the corporation gave members fair and reasonable notice that such matters were to be submitted to the members for a vote.

In addition, the MNCA requires approval of each class of members whose rights are substantially affected by the matter. This requirement may increase the difficulty of obtaining member approval. For example, full members of a golf country club may not change the rights of limited members without the approval of the limited members. In addition, the articles or bylaws may require third-person approval as well. For example, a city industrial development board may not be permitted to amend its articles without the consent of the mayor.

Members may vote in person or by proxy. They may also have written voting agreements. However, member voting agreements may not have a term exceeding 10 years. Members may act without a meeting if the action is approved in writing by at least 80 percent of the voting power.

Member Inspection and Information Rights

A member may not be able to exercise his voting and other rights unless he is informed. Moreover, a member must be able to communicate with other members to be able to influence the way they vote on matters submitted to members. Consequently, the MNCA grants members inspection and information rights.

Members have an absolute right to inspect and copy the articles, bylaws, board resolutions, and minutes of members' meetings. Members have a qualified right to inspect and copy a list of the members. The member's demand to inspect the members' list must be in good faith and for a proper purpose—that is, a purpose related to the member's interest as a member. Improper purposes include selling the list or using the list to solicit money. Members also have a qualified right to inspect minutes of board meetings and records of actions taken by committees of the board.

A nonprofit corporation is required to maintain appropriate accounting records, and members have a qualified right to inspect them. Upon demand, the corporation must provide to a member its latest annual financial statements, including a balance sheet and statement of operations. However, the MNCA permits a religious corporation to abolish or limit the right of a member to inspect any corporate record.

Distributions of Assets Because it is not intended to make a profit, a nonprofit corporation does not pay dividends to its members. In fact, a nonprofit corporation is generally prohibited from making any distribution of its assets to its members.

Nonetheless, a mutual benefit corporation may purchase a membership and thereby distribute its assets to the selling member, but only if the corporation is able to pay its currently maturing obligations and has assets at least equal to its liabilities. For example, when a farmer joins a farmers' purchasing cooperative, he purchases a membership interest having economic value—it entitles him to purchase supplies from the cooperative at a bargain price. The mutual benefit corporation may repurchase the farmer's membership when he retires from farming. Religious and public benefit corporations may not repurchase their memberships.

Resignation and Expulsion of Members

A member may resign at any time from a nonprofit corporation. When a member resigns, generally a member may not sell or transfer her membership to any other person. A member of a mutual benefit corporation may transfer her interest to a buyer if the articles or bylaws permit.

It is fairly easy for a nonprofit corporation to expel a member or terminate her membership. The corporation must follow procedures that are fair and reasonable and carried out in good faith. The MNCA does not require the corporation to have a proper purpose to expel or terminate a member but only to follow proper procedures. The MNCA places no limits on a religious corporation's expulsion of its members.

The MNCA does not require a nonprofit corporation to purchase the membership of an expelled member, and—as explained above—permits only a mutual benefit corporation to purchase a membership. Members of mutual benefit corporations who fear expulsion should provide for repurchase rights in the articles or bylaws.

Derivative Suits Members of a nonprofit corporation have a limited right to bring derivative actions on

The Global Business Environment

Chapter 43 covered some of the corporate governance differences between the United States and other countries, specifically Germany, including the makeup of corporate boards. There are many similarities but also quite a few differences in the powers of shareholders, including matters that must be submitted for shareholder approval. In Germany, the management board must obtain the approval of the shareholders to create new shares of the corporation, to transfer major assets, and to liquidate the company. The differences include German law requiring shareholder approval to declare dividends, issue new shares, and waive shareholders' preemptive right. In addition, many matters that in the United States may be included by director action in the bylaws

must be included in German articles of incorporation, which cannot be modified without shareholder approval.

Shareholders of German companies have limited power to force a corporate right of action against someone who has harmed the corporation. A German corporation must sue members of the management board if a shareholders' meeting decides or if shareholders holding at least 10 percent of the shares demand the action. Beyond that, German law rarely permits an *actio pro socio*, the equivalent of an American derivative action. Moreover, German corporation law does not provide for direct actions by shareholders against members of the management board for breach of duty, such as wrongfully providing false financial information to shareholders.

behalf of the corporation. A derivative action may be brought by members having at least 5 percent of the voting power or by 50 members, whichever is less. Members must first demand that the directors bring the suit or establish that demand is futile. If the action is successful, a court may require the corporation to pay the suing members' reasonable expenses. When the action is unsuccessful and has been commenced frivolously or in bad faith, a court may require the suing members to pay the other party's expenses.

Dissolution and Termination of Corporations

The MBCA provides that a corporation doing business may be dissolved by action of its directors and shareholders. The directors must adopt a dissolution resolution, and a majority of the shares outstanding must be cast in favor of dissolution at a shareholders' meeting. For a **voluntary dissolution** to be effective, the corporation must submit articles of dissolution to the secretary of state. The dissolution is effective when the articles are filed by the secretary of state.

A corporation may also be dissolved **without its consent** by administrative action of the secretary of state or by judicial action of a court. The secretary of state may commence an administrative proceeding to dissolve a corporation that has not filed its annual report, paid its annual franchise tax, appointed or maintained a registered office or agent in the state, or whose period of duration has expired. **Administrative dissolution** requires that the secretary of state give written notice to the corporation of the grounds for dissolution. If, within 60 days, the corporation has not corrected the default or demonstrated that the default does not exist, the secretary dissolves the corporation by signing a certificate of dissolution.

The shareholders, secretary of state, or the creditors of a corporation may ask a court to order the involuntary dissolution of a corporation. Any **shareholder** may obtain judicial dissolution when there is a deadlock of the directors that is harmful to the corporation, when the shareholders are deadlocked and cannot elect directors for two years, or when the directors act illegally, oppressively, or

CONCEPT REVIEW

Roles of Shareholders and the Board of Directors

| Corporate Action | Board's Role | Shareholders' Role |
|---|---|---|
| Day-to-Day Management | Selects officers; supervises management | Elect and remove directors |
| Issuance of Shares | Issues shares | Protected by preemptive right |
| Merger and Share Exchange | Adopts articles of merger or share exchange | Vote to approve merger or share exchange; protected by dissenters' rights |
| Amendment of Articles of Incorporation | Proposes amendment | Vote to approve amendment |
| Dissolution | Proposes dissolution | Vote to approve dissolution |
| Dividends | Declares dividends | Receive dividends |
| Board of Directors Harms Individual Shareholder Rights | Has harmed shareholders | Bring individual or class action against directors or the corporation |
| Directors Harm Corporation | Sues wrongdoing directors | Bring derivative action against wrongdoing directors |

fraudulently. The **secretary of state** may obtain judicial dissolution if it is proved that a corporation obtained its articles of incorporation by fraud or exceeded or abused its legal authority. **Creditors** may request dissolution if the corporation is insolvent.

Under the MBCA, a corporation that has not issued shares or commenced business may be dissolved by the vote of a majority of its incorporators or initial directors.

Many close corporations are nothing more than incorporated partnerships, in which all the shareholders are managers and friends or relatives. Corporation law reflects the special needs of those shareholders of close corporations who want to arrange their affairs to make the close corporation more like a partnership. The Close Corporation Supplement to the MBCA recognizes that a **close corporation shareholder** should have more dissolution power, like a partner had under the Uniform Partnership Act. This section, like similar provisions in many states, permits the articles of incorporation to empower any shareholder to dissolve the corporation at will or upon the occurrence of a specified event such as the death of a shareholder.

Winding Up and Termination A dissolved corporation continues its corporate existence but may

not carry on any business except that appropriate to winding up its affairs. Therefore, winding up (liquidation) must follow dissolution. Winding up is the orderly collection and disposal of the corporation's assets and the distribution of the proceeds of the sale of assets. From these proceeds, the claims of creditors will be paid first. Next, the liquidation preferences of preferred shareholders will be paid. Then, common shareholders receive any proceeds that remain.

After winding up has been completed, the corporation's existence terminates. A person who purports to act on behalf of a terminated corporation has the liability of a person acting for a corporation prior to its incorporation. See Chapter 42. Some courts impose similar liability on a person acting on behalf of a dissolved corporation, especially when dissolution is obtained by the secretary of state, such as for the failure to file an annual report or to pay annual taxes.

Dissolution of Nonprofit Corporations

A nonprofit corporation may be dissolved voluntarily, administratively, or judicially. Voluntary dissolution will usually require approval of both the directors and the members. However, a nonprofit corporation may include a provision in its articles requiring the approval of a third

person also. For example, such a third person might be a state governor who appointed some of the directors to the board of a nonprofit corporation organized to encourage industrial development in the state. The dissolution is effective when the corporation delivers articles of dissolution to the secretary of state and the secretary of state files them. The dissolved corporation continues its existence, but only for the purpose of liquidating its assets and winding up its affairs.

The secretary of state may administratively dissolve a nonprofit corporation that fails to pay incorporation taxes or to deliver its annual report to the secretary of state, among other things. Minority members or directors may obtain judicial dissolution by a court if the directors are deadlocked, the directors in control are acting illegally or fraudulently, or the members are deadlocked and cannot elect directors for two successive elections, among other reasons.

Problems and Problem Cases

1. At the annual shareholders' meeting of Levisa Oil Corporation, management proposed to increase the number of directors to five from four. Quigley and one other shareholder owning together more than 50 percent of the outstanding shares objected to the proposal. When Quigley was ruled out of order by the chairman of the board, Quigley and the other opposing shareholder stormed out of the meeting. The remaining shareholders voted to elect a five-member board. The new board then voted to issue new shares, which were issued to the minority shareholders. The effect of the issuance was to give the minority shareholders majority ownership of the corporation. Quigley later objected to the actions taken at the meeting. Were the actions taken after Quigley left invalid due to the lack of a quorum?
 2. Kinetic Solutions, LLC, is an Internet software business with 15 members. Five members are the only managers of the business; the other 10 members are only investors. The five managing members want to sell part of the business to public investors. Before doing so, they opt to organize the business as a corporation. The five controlling shareholders want to be able to manage the corporation with little interference from other shareholders, and they want to continue to be compensated as managers of the business. The other 10 shareholders want some management control because of their sizable investments, especially if the business is not profitable. They are also concerned about being able to sell their shares at some point in the future. All 15 shareholders plan to raise an additional \$50 million in capital by selling shares in the corporation to 1,000 wealthy public shareholders. The 15 original shareholders are unwilling to give the new investors any power to control the corporation or its management. The original shareholders expect that by having 1,000
- new shareholders, a public market will be created in their shares. Sketch an ownership control structure (a structure that determines how shareholders own and control the corporation through their rights as shareholders) that serves the ownership control interests of the five controlling shareholders and the 10 other shareholders. What is the best way for the five controlling shareholders to receive returns on their investment in the corporation? What is the best way for the 10 other shareholders to receive returns on their investment in the corporation?
3. The Eliason family owned a majority (5,238) of the 9,990 shares of Brosius-Eliason Co., a building and materials company, with James Eliason (3,928 shares) and his sister Sarah Englehart (1,260) holding the controlling block. The Brosius family owned a total of 3,690 shares. Frank Hewlett owned the remaining 1,062 shares. On July 31, James Eliason executed a proxy giving his daughter, Louise Eliason, authority to vote his shares. Only in the notary public's acknowledgement verifying James's signature did the proxy state that it was irrevocable. The body of the proxy, the part signed by James, did not state it was irrevocable. Two weeks later, James and his sister Sarah made a voting agreement that ensured Eliason family control over the corporation by requiring their shares to be voted as provided in the agreement. The voting agreement was irrevocable, because it was coupled with an interest in each other's shares. Soon after, Sarah and Louise had a falling out when Louise tried to assert her family's control of the company. Consequently, Sarah voted her shares with the Brosiuses and Hewlett in violation of the agreement with James. She argued that she was not bound by the voting agreement with James on the grounds that James could not make the agreement, because he had given Louise an irrevocable proxy two weeks earlier. Was Sarah right?

4. Myron Lasky was a shareholder in Kramett, Inc., a manufacturer of novelty candies. When Kramett's business declined, its board of directors chose to save the business by selling it to a larger candy company, Narron Confectioners, Inc. Narron's shares were trading on the market at \$9.25 per share, while Kramett's shares traded at \$0.50 per share. Kramett's and Narron's boards of directors approved a merger in which each Kramett shareholder would receive one share of Narron for each 20 shares of Kramett. Both the shareholders of Kramett and Narron approved the merger. What right should Lasky exercise if he objects to the merger terms? What must he do to exercise that right?
5. Karen Shaw, a dairy farmer in Vermont, was a member of a cooperative stock corporation, Agri-Mark, Inc., which was formed to process and market milk and other dairy products for its member farmers in New England and New York. Agri-Mark's equity consisted of contributions from its members. Its members, however, were not shareholders. The only shareholders were directors, who were elected by regional delegates, who in turn were elected by members. If Shaw had a proper purpose, did she have the right to inspect Agri-Mark's member list and the compensation of the corporation's five highest paid executives?
6. For 22 consecutive years, Marston Corporation, a steel producer, has paid a quarterly dividend to its common shareholders. The annual dividend amount has ranged from 1 percent to 4 percent of the market price of Marston's common shares. Marston's board of directors decides not to declare a common dividend for the next three years. Its steel plants are over 40 years old, and several need to be updated or replaced. The board estimates the cost of updating or replacing its steel plants at \$2.3 billion. Eliminating the common share dividend will result in Marston retaining an additional \$634 million over a three-year period. Marston currently has retained earnings of \$1.2 billion. Marston's minority shareholders sue Marston to force the board of directors to declare the dividend. Will their action be successful?
7. Pomeroy Carnivals Co., Inc. (PCC), is a family-owned corporation that operates carnival rides at fairs and festivals. The founders of the business, Les and Clara Pomeroy, own 79 percent of the shares, and their three children own 21 percent. Les and Clara are the only members of the board of directors of PCC. Acting as directors of PCC, Les and Clara decide to sell 40 percent of its carnival rides and to reduce by 30 percent the number of fairs and festivals in which PCC will operate rides. The sale will result in a one-time cash infusion of \$34,000,000, which Les and Clara plan to invest for PCC in commercial real estate. PCC's annual net income from carnivals will drop by \$1,650,000, about 55 percent of current annual net income. The children want to sue PCC's board of directors to stop the sale of the carnival rides and the investment of the proceeds in real estate. What is the process by which the children will sue the directors? Can Les and Clara stop the suit?
8. Water Works, Inc., was a closely held corporation operating an automatic car wash in Wisconsin Rapids. Its 204 shares were issued to Duane and Sharon Jorgensen; their daughter, Doreen Barber, and her husband, James; and two family friends, Gary and Mary Tesch. Each received 34 shares, and each was a director. Duane was president; Sharon, Gary, and James were vice presidents; Mary was treasurer; and Doreen was secretary. The corporation's written business plan stated that Duane would be in charge of management and that the six shareholders would be permanent directors. An oral agreement of shareholders stated that Duane would oversee management as long as he lived. Each shareholder received weekly payments from the corporation, the amount of which was determined by the shareholders agreement. In 1995, Duane discovered that some of the officers and directors were engaged in illegal activity on property owned by the corporation and using the corporation's property for their own personal benefit. When Duane demanded the activities stop, the Barbers and Tesches removed the Jorgensens from the board of directors and stopped making payments to them. The Jorgensen's sued the Barbers and Tesches for breach of fiduciary duty. The Barbers and Tesches claimed they owed fiduciary duties only to the corporation and, therefore, the Jorgensens, as shareholders, could not sue in their own names. Were they right?
9. H. F. Ahmanson & Co. was the controlling shareholder of United Savings and Loan Association. There was very little trading in the Association's shares, however. To create a public market for their shares, Ahmanson and a few other shareholders of

the Association incorporated United Financial Corporation and exchanged each of their Association shares for United shares. United then owned more than 85 percent of the shares of the Association. The minority shareholders of the Association were not given an opportunity to exchange their shares. United made two public offerings of its shares. As a result, trading in United shares was very active, while sales of Association shares decreased to half of the formerly low level, with United as virtually the only purchaser. United offered to purchase Association shares from the minority shareholders for \$1,100 per share. Some of the minority shareholders accepted this offer. At that time, the shares held by the majority shareholders were worth \$3,700. United also caused the Association to decrease its dividend payments. Has Ahmanson done anything wrong?

10. Rexford Rand Corporation had three shareholders, Selwyn Ancel, who owned 50 percent of the shares, and his sons Gregory and Albert who owned 25 percent each. It sold over 200 products to 5,800 customers in many states. In 1991, Gregory was fired as vice president and treasurer, but remained a shareholder. From that point, he received no salary from the corporation, and the corporation never paid dividends. In 1993, Rexford Rand failed to file its annual report with the state of Illinois and, as a result, was administratively dissolved. The dissolution resulted in the name Rexford Rand becoming available for other businesses. Gregory learned of the dissolution but did not inform the other share-

holders. Will Gregory act wrongly if he reserves the name Rexford Rand for his own corporation?

11. Jerry Yarmouth was the sole shareholder, director, and officer of J & R Interiors, Inc. The corporation's registered agent was its lawyer. Because the corporation's lawyer closed his office, when the secretary of state mailed a notice for payment of the annual fee and filing of the annual report, Yarmouth never received the notice. Consequently, the secretary of state administratively dissolved the corporation. Believing the corporation was still in existence, Yarmouth continued to transact on behalf of J & R Interiors, including making a contract to buy a \$20,000 workbench from Equipto Division Aurora Equipment. Is Yarmouth personally liable on the contract with Equipto?

chapter 45

SECURITIES REGULATION

You are the CEO of L'Malle LLC, a nonpublic company that builds and manages shopping malls. L'Malle plans to raise \$4,400,000 for construction of L'Malle's newest shopping center complex, Grande L'Malle Geneva. In an effort to avoid the application of the Securities Act of 1933, L'Malle's CFO has proposed that L'Malle issue 22 Profit Participation Plans (PPPs) to two insurance companies, four mutual funds, and 16 individual investors. Under the PPPs, each owner will contribute \$200,000 cash to finance the construction of Grande L'Malle Geneva (GLG) and receive 3 percent of the profits generated by GLG. L'Malle will be the exclusive manager of GLG, making all decisions regarding its construction and operation, for which L'Malle will receive a fee equal to 34 percent of GLG's profits.

- Are the PPPs securities under the Securities Act of 1933?
- If the PPPs are securities, may L'Malle sell them pursuant to a registration exemption from the Securities Act of 1933 under Regulation A, Rule 504, Rule 505, or 506?

L'Malle decides to sell the PPPs directly to investors by making a Regulation A offering. As CEO, you will accompany L'Malle's CFO and communications vice president when they visit prospective investors. During those visits, you and the other L'Malle's executives will present copies of the offering circular to prospective investors and make oral reports about the offering, GLG, and L'Malle's business and prospects. You will also answer the investors' questions about L'Malle and GLG.

- Should you be fearful about having liability to the investors under Section 12(a)(2) of the 1933 Act and Rule 10b-5 of the Securities Exchange Act of 1934?

L'Malle decides to make a public offering of its common shares by registering the offering under the Securities Act of 1933 and complying with the requirements of Section 5 of the 1933 Act. The shares will be sold by a firm commitment underwriting.

- Under what legal conditions may L'Malle release earnings reports and make other normal communications with its shareholders and other investors?
- After L'Malle has filed its 1933 Act registration statement with the Securities and Exchange Commission and before the SEC has declared the registration statement effective, under what legal conditions may you (the CEO) and L'Malle's CFO conduct a road show where you pitch the shares to mutual fund investment managers in several cities?
- During that waiting period, may L'Malle post its preliminary prospectus and have an FAQ page for prospective investors at the offering's Web site?
- After the SEC has declared the registration statement effective, under what legal conditions may L'Malle confirm the sale of shares to an investor?
- During that post-effective period, under what legal conditions may L'Malle direct prospective investors from the offering's Web site to L'Malle's corporate Web site, where investors may obtain additional information about L'Malle?

MODERN SECURITIES REGULATION AROSE from the rubble of the great stock market crash of October 1929. After the crash, Congress studied its causes and discovered several common problems in securities transactions, the most important ones being:

1. Investors lacked the necessary information to make intelligent decisions whether to buy, sell, or hold securities.
2. Disreputable sellers of securities made outlandish claims about the expected performance of securities and sold securities in nonexistent companies.

Faced with these perceived problems, Congress chose to require securities sellers to disclose the information that investors need to make intelligent investment decisions. Congress found that investors are able to make intelligent investment decisions if they are given sufficient information about the company whose securities they are to buy. This **disclosure scheme** assumes that investors need assistance from government in acquiring information but that they need no help in evaluating information.

Purposes of Securities Regulation

To implement its disclosure scheme, in the early 1930s Congress passed two major statutes, which are the hub of federal securities regulation in the United States today. These two statutes, the **Securities Act of 1933** and the **Securities Exchange Act of 1934**, have three basic purposes:

1. To require the disclosure of meaningful information about a security and its issuer to allow investors to make intelligent investment decisions.
2. To impose liability on those persons who make inadequate and erroneous disclosures of information.
3. To regulate insiders, professional sellers of securities, securities exchanges, and other self-regulatory securities organizations.

The crux of the securities acts is to impose on issuers of securities, other sellers of securities, and selected buyers of securities the affirmative duty to disclose important information, even if they are not asked by investors to make the disclosures. By requiring disclosure, Congress hoped to restore investor confidence in the securities markets. Congress wanted to bolster investor confidence in the honesty of the stock market and thus encourage more investors to invest in securities. Build-

ing investor confidence would increase capital formation and, it was hoped, help the American economy emerge from the Great Depression of the 1930s.

Congress has reaffirmed the purposes of the securities law many times since the 1930s by passing laws that expand investor protections. Most recent is the enactment of the Sarbanes–Oxley Act of 2002, a response to widespread misstatements and omissions in corporate financial statements. Many public investors lost most of their life savings in the collapses of firms like Enron, while insiders profited. As we learned in Chapters 4 and 43 and will learn in this chapter and Chapter 46, the Sarbanes–Oxley Act imposes duties on corporations, their officers, and their auditors and provides for a Public Company Accounting Oversight Board to establish auditing standards.

The Securities Lawyer's Deskbook is maintained by the Center for Corporate Law at the University of Cincinnati College of Law. You can find the text of all the federal securities statutes and SEC regulations.

Securities and Exchange Commission

The Securities and Exchange Commission (SEC) was created by the 1934 Act. Its responsibility is to administer the 1933 Act, 1934 Act, and other securities statutes. Like other federal administrative agencies, the SEC has legislative, executive, and judicial functions. Its legislative branch promulgates rules and regulations; its executive branch brings enforcement actions against alleged violators of the securities statutes and their rules and regulations; its judicial branch decides whether a person has violated the securities laws.

SEC Actions The SEC is empowered to investigate violations of the 1933 Act and 1934 Act and to hold hearings to determine whether the acts have been violated. Such hearings are held before an administrative law judge (ALJ), who is an employee of the SEC. The administrative law judge is a finder of both fact and law. Decisions of the ALJ are reviewed by the commissioners of the SEC. Decisions of the commissioners are appealed to the U.S. court of appeals. Most SEC actions are

not litigated. Instead, the SEC issues consent orders, by which the defendant promises not to violate the securities laws in the future but does not admit to having violated them in the past.

The SEC has the power to impose civil penalties (fines) up to \$500,000 and to issue **cease and desist orders**. A cease and desist order directs a defendant to stop violating the securities laws and to desist from future violations. Nonetheless, the SEC does not have the power to issue injunctions; only courts may issue injunctions. The 1933 Act and the 1934 Act empower the SEC only to ask federal district courts for injunctions against persons who have violated or are about to violate either act. The SEC may also ask the courts to grant ancillary relief, a remedy in addition to an injunction. Ancillary relief may include, for example, the disgorgement of profits that a defendant has made in a fraudulent sale or in an illegal insider trading transaction.

To reduce the risk that a securities issuer's or other person's behavior will violate the securities law and result in an SEC action, anyone may contact the SEC's staff in advance, propose a transaction or course of action, and ask the SEC to issue a **no-action letter**. In the no-action letter, the SEC's staff states it will take no legal action against the issuer or other person if the issuer or other person acts as indicated in the no-action letter. Issuers often seek no-action letters before making exempted offerings of securities and excluding shareholder proposals from their proxy statements, issues we discuss later in the chapter. Since a no-action letter is issued by the SEC's staff and not the commissioners, it is not binding on the commissioners. Nonetheless, issuers that comply with no-action letters rarely face SEC action.

est or participation in any profit-sharing agreement, . . . preorganization certificate or subscription, . . . investment contract, voting trust certificate, . . . fractional undivided interest in oil, gas, or mineral rights, any put, call, straddle, option, or privilege on any security, . . . or, in general, any interest or instrument commonly known as a "security."

The 1934 Act definition of security is similar, but excludes notes and drafts that mature not more than nine months from the date of issuance.

While typical securities like common shares, preferred shares, bonds, and debentures are defined as securities, the definition of a security also includes many contracts that the general public may believe are not securities. This is because the term **investment contract** is broadly defined by the courts. The Supreme Court's three-part test for an investment contract, called the *Howey* test, has been the guiding beacon in the area for more than 50 years.¹ The *Howey* test states that an investment contract is an **investment of money** in a **common enterprise** with an expectation of **profits solely from the efforts of others**.

In the *Howey* case, the sales of plots in an orange grove along with a management contract were held to be sales of securities. The purchasers had investment motives (they intended to make a profit from, not to consume, the oranges produced by the trees). There was a common enterprise, because the investors provided the capital to finance the orange grove business and shared in its earnings. The sellers, not the buyers, did all of the work needed to make the plots profitable.

In other cases, sales of limited partnership interests, Scotch whisky receipts, and restaurant franchises have been held to constitute investment contracts and, therefore, securities.

Courts define in two ways the common enterprise element of the *Howey* test. All courts permit horizontal commonality to satisfy the common enterprise requirement. Horizontal commonality requires that investors' funds be pooled and that profits of the enterprise be shared pro rata by investors. Some courts accept vertical commonality, in which the investors are similarly affected by the efforts of the person who is promoting the investment.

Courts have used the *Howey* test to hold that some contracts with typical security names are not securities. The courts point out that some of these contracts possess few of the typical characteristics of a security. For example, in *United Housing Foundation, Inc. v. Forman*,² the

LOG ON

You can read more about the SEC at the SEC Web site.

What Is a Security?

The first issue in securities regulation is the definition of a security. If a transaction involves no security, then the law of securities regulation does not apply. The 1933 Act defines the term **security** broadly:

Unless the context otherwise requires the term "security" means any note, stock, treasury stock, security future, bond, debenture, evidence of indebtedness, certificate of inter-

¹*SEC v. W. J. Howey Co.*, 328 U.S. 293 (U.S. Sup. Ct. 1946).

²*United Housing Foundation Inc. v. Forman*, 421 U.S. 837 (U.S. Sup. Ct. 1975).

Supreme Court held that although tenants in a cooperative apartment building purchased contracts labeled as stock, the contracts were not securities. The “stock” possessed few of the typical characteristics of stock and the economic realities of the transaction bore few similarities to those of the typical stock sale: The stock gave tenants no dividend rights or voting rights in proportion to the number of shares owned, it was not negotiable, and it could not appreciate in value. More important, tenants bought the stock not for the purpose of investment but to acquire suitable living space.

However, when investors are misled to believe that the securities laws apply because a seller sold a contract bearing both the name of a typical security and significant characteristics of that security, the securities laws do apply to the sale of the security. The application of this doctrine led to the Supreme Court’s rejection of the sale-of-business doctrine, which had held that the sale of 100 percent of the shares of a corporation to a single purchaser who would manage the corporation was not a security. The rationale for the sale-of-business doctrine was that the purchaser failed to meet element 3 of the *Howey* test because he expected to make a profit from his own efforts in managing the business. Today, when a business sale is effected by the sale of stock, the transaction is covered by the securities acts if the stock possesses the characteristics of stock.

In 1990, the Supreme Court further extended this rationale in *Reves v. Ernst & Young*,³ adopting the **family resemblance test** to determine whether promissory notes were securities. The Supreme Court held that it is inappropriate to apply the *Howey* test to notes. Instead, applying the family resemblance test, the Court held that notes are presumed to be securities unless they bear a “strong family resemblance” to a type of note that is not a security.

The five characteristics of notes that are not securities are:

1. There is no recognized market for the notes.
2. The note is not part of a series of notes.
3. The buyer of the note does not need the protection of the securities laws.
4. The buyer of the note has no investment intent.
5. The buyer has no expectation that the securities laws apply to the sale of the note.

Types of notes that are not securities include consumer notes, mortgage notes, short-term notes secured by a lien on a small business, short-term notes secured by accounts receivable, and notes evidencing loans by commercial banks for current operations.

In the following case, the Supreme Court applied the *Howey* test.

³494 U.S. 56 (U.S. Sup. Ct. 1990).

SEC v. Edwards

540 U.S. 389 (U.S. S. Ct. 2004)

Charles Edwards was the chairman, chief executive officer, and sole shareholder of ETS Payphones, Inc. ETS sold pay telephones to the public. The payphones were offered with a site lease, a five-year leaseback and management agreement, and a buyback agreement. All but a tiny fraction of purchasers chose this package, although other management options were offered. The purchase price for the payphone packages was approximately \$7,000. Under the leaseback and management agreement, purchasers were promised \$82 per month, which was a 14 percent annual return on the purchase price. Purchasers were not involved in the day-to-day operation of the payphones they owned. ETS selected the site for the phone, installed the equipment, arranged for connection and long-distance service, collected coin revenues, and maintained and repaired the phone. Under the buyback agreement, ETS promised to refund the full purchase price of the package at the end of the lease or within 180 days of a purchaser’s request.

In its marketing materials and on its Web site, ETS trumpeted the “incomparable payphone” as “an exciting business opportunity,” in which recent deregulation had “opened the door for profits for individual payphone owners and operators.” According to ETS, “very few business opportunities can offer the potential for ongoing revenue generation that is available in today’s pay telephone industry.”

In reality, the payphones did not generate enough revenue for ETS to make the payments required by the leaseback agreements, so the company depended on funds from new investors to meet its obligations. In September 2000, ETS filed for bankruptcy protection. The SEC brought a civil enforcement action alleging that Edwards and ETS had violated the registration

requirements of Section 5 of the Securities Act of 1933 and the antifraud provisions of the 1933 and 1934 securities acts. The district court concluded that the payphone sale-and-leaseback arrangement was an investment contract within the meaning of the federal securities laws. *Edwards and ETS* appealed to the court of appeals, which reversed the district court's decision. It held that ETS's scheme did not offer either capital appreciation or a participation in the earnings of the enterprise and that the purchasers' returns on their investments was not derived solely from the efforts of others because the purchasers had a contractual entitlement to the return. The SEC asked the Supreme Court of the United States to review the decision of the court of appeals.

O'Connor, Justice

"Opportunity doesn't always knock . . . sometimes it rings." And sometimes it hangs up. So it did for the 10,000 people who invested a total of \$300 million in the payphone sale-and-leaseback arrangements touted by ETS under that slogan. In this case, we must decide whether a moneymaking scheme is excluded from the term "investment contract" simply because the scheme offered a contractual entitlement to a fixed, rather than a variable, return.

Congress' purpose in enacting the securities laws was to regulate *investments*, in whatever form they are made and by whatever name they are called. To that end, it enacted a broad definition of "security," sufficient to encompass virtually any instrument that might be sold as an investment. Section 2(a)(1) of the 1933 Act and § 3(a)(10) of the 1934 Act define "security" to include "any note, stock, treasury stock, security future, bond, debenture, . . . investment contract, . . . [or any] instrument commonly known as a 'security.'" "Investment contract" is not itself defined.

The test for whether a particular scheme is an investment contract was established in our decision in *SEC v. W. J. Howey Co.*, 328 U.S. 293 (1946). We look to whether the scheme involves an investment of money in a common enterprise with profits to come solely from the efforts of others.

When Congress included "investment contract" in the definition of security, it was using a term the meaning of which had been crystallized by the state courts' interpretation of their "blue sky" laws. The state courts had defined an investment contract as a contract or scheme for the placing of capital or laying out of money in a way intended to secure income or profit from its employment, and had uniformly applied that definition to a variety of situations where individuals were led to invest money in a common enterprise with the expectation that they would earn a profit solely through the efforts of the promoter or a third party. Thus, when we held that "profits" must "come solely from the efforts of others," we were speaking of the profits that investors seek on their investment, not the profits of the scheme in which they invest. We used "profits" in the sense of income or return, to include, for example, dividends, other periodic payments, or the increased value of the investment.

There is no reason to distinguish between promises of fixed returns and promises of variable returns for purposes of the test, so understood. In both cases, the investing public is attracted by representations of investment income, as purchasers were in this case by ETS's invitation to watch the profits add up. More-

over, investments pitched as low-risk (such as those offering a "guaranteed" fixed return) are particularly attractive to individuals more vulnerable to investment fraud, including older and less sophisticated investors. Under the reading Edwards advances, unscrupulous marketers of investments could evade the securities laws by picking a rate of return to promise. We will not read into the securities laws a limitation not compelled by the language that would so undermine the laws' purposes.

Edwards protests that including investment schemes promising a fixed return among investment contracts conflicts with our precedent. We disagree. No distinction between fixed and variable returns was drawn in the blue sky law cases that the *Howey* Court used, in formulating the test. Indeed, two of those cases involved an investment contract in which a fixed return was promised. *People v. White*, 12 P.2d 1078 (Cal. 1932) (agreement between defendant and investors stated that investor would give defendant \$5,000, and would receive \$7,500 from defendant one year later); *Stevens v. Liberty Packing Corp.*, 161 A. 193 (N.J. 1932) ("ironclad contract" offered by defendant to investors entitled investors to \$56 per year for 10 years on initial investment of \$175, ostensibly in sale-and-leaseback of breeding rabbits).

None of our post-*Howey* decisions is to the contrary. In *United Housing Foundation, Inc. v. Forman*, 421 U.S. 837 (1975), we considered whether "shares" in a nonprofit housing cooperative were investment contracts under the securities laws. We identified the "touchstone" of an investment contract as "the presence of an investment in a common venture premised on a reasonable expectation of profits to be derived from the entrepreneurial or managerial efforts of others," and then laid out two examples of investor interests that we had previously found to be "profits." Those were "capital appreciation resulting from the development of the initial investment" and "participation in earnings resulting from the use of investors' funds." We contrasted those examples, in which "the investor is attracted solely by the prospects of a return on the investment," with housing cooperative shares, regarding which the purchaser "is motivated by a desire to use or consume the item purchased." Thus, *Forman* supports the commonsense understanding of "profits" in the *Howey* test as simply financial returns on investments.

The Eleventh Circuit's perfunctory alternative holding, that respondent's scheme falls outside the definition because purchasers had a contractual entitlement to a return, is incorrect

and inconsistent with our precedent. We are considering investment *contracts*. The fact that investors have bargained for a return on their investment does not mean that the return is not also expected to come solely from the efforts of others. Any other conclusion would conflict with our holding that an investment contract was offered in *Howey* itself.

We hold that an investment scheme promising a fixed rate of return can be an “investment contract” and thus a “security” subject to the federal securities laws.

Judgment reversed in favor of the SEC; remanded to the Court of Appeals.

Securities Act of 1933

The Securities Act of 1933 (1933 Act) is concerned primarily with public distributions of securities. That is, the 1933 Act regulates the sale of securities while they are passing from the hands of the issuer into the hands of public investors. An issuer selling securities publicly must make necessary disclosures at the time the issuer sells the securities to the public.

The 1933 Act has two principal regulatory components: (1) registration provisions and (2) liability provisions. The registration requirements of the 1933 Act are designed to give investors the information they need to make intelligent decisions whether to purchase securities when an issuer sells its securities to the public. The various liability provisions in the 1933 Act impose liability on sellers of securities for misstating or omitting facts of material significance to investors.

Registration of Securities under the 1933 Act

The Securities Act of 1933 is primarily concerned with protecting investors when securities are sold by an issuer to investors. That is, the 1933 Act regulates the process during which issuers offer and sell their securities to investors, primarily public investors.

Therefore, the 1933 Act requires that *every* offering of securities be registered with the SEC prior to any offer or sale of the securities, unless the offering or the securities are exempt from registration. That is, an issuer and its underwriters may not offer or sell securities unless the securities are registered with the SEC or exempt from registration. Over the next few pages, we will cover the registration process. Then the exemptions from registration will be addressed.

Mechanics of a Registered Offering

When an issuer makes a decision to raise money by a public offering of securities, the issuer needs to obtain the assistance of securities market professionals. The issuer will contact a managing underwriter, the primary

person assisting the issuer in selling the securities. The managing underwriter will review the issuer’s operations and financial statements and reach an agreement with the issuer regarding the type of securities to sell, the offering price, and the compensation to be paid to the underwriters. The issuer and the managing underwriter will determine what type of underwriting to use.

In a **standby underwriting**, the underwriters obtain subscriptions from prospective investors, but the issuer sells the securities only if there is sufficient investor interest in the securities. The underwriters receive warrants—options to purchase the issuer’s securities at a bargain price—as compensation for their efforts. The standby underwriting is typically used only to sell common shares to existing shareholders pursuant to a preemptive rights offering.

With a **best efforts underwriting**, the underwriters are merely agents making their best efforts to sell the issuer’s securities. The underwriters receive a commission for their selling efforts. The best efforts underwriting is used when an issuer is not well established and the underwriter is unwilling to risk being unable to sell the securities.

The classic underwriting arrangement is a **firm commitment underwriting**. Here the managing underwriter forms an underwriting group and a selling group. The underwriting group agrees to purchase the securities from the issuer at a discount from the public offering price—for example, 25 cents per share below the offering price. The selling group agrees to buy the securities from the underwriters also at a discount—for example, 12½ cents per share below the offering price. Consequently, the underwriters and selling group bear much of the risk with a firm commitment underwriting, but they also stand to make the most profit under such an arrangement.

Securities Offerings on the Internet Increasingly, issuers are using the Internet to make public securities offerings, especially initial public offerings (IPOs) of companies’ securities. The Internet provides issuers and underwriters the advantage of making direct offerings to all investors simultaneously, that is, selling directly to investors without the need for a selling group. The first

Internet securities offering that was approved by the SEC was a firm commitment underwriting. Internet offerings have increased dramatically since 1998. In the future, the Internet will become the dominant medium for marketing securities directly to investors.

Registration Statement and Prospectus

The 1933 Act requires the issuer of securities to register the securities with the SEC before the issuer or underwriters may offer or sell the securities. Registration requires filing a **registration statement** with the SEC. Historical and current data about the issuer, its business, its officers and directors, full details about the securities to be offered, and the use of the proceeds of the issuance, among other information, must be included in the registration statement prepared by the issuer of the securities with the assistance of the managing underwriter, securities lawyers, and independent accountants. Generally, the registration statement must include audited balance sheets as of the end of each of the two most recent fiscal years, in addition to audited income statements and audited statements of changes in financial position for each of the last three fiscal years.

The registration statement becomes effective after it has been reviewed by the SEC. The 1933 Act provides that the registration statement becomes effective automatically on the 20th day after its filing, unless the SEC delays or advances the effective date.

The **prospectus** is the basic selling document of an offering registered under the 1933 Act. Most of the information in the registration statement must be included in the prospectus. It must be furnished to every purchaser of the registered security prior to or concurrently with the sale of the security to the purchaser. The prospectus enables an investor to base his investment decision on all of the relevant data concerning the issuer, not merely on the favorable information that the issuer may be inclined to disclose voluntarily.

Although most prospectuses are delivered in person or by mail, the growth of the Internet as a communication tool has resulted in many issuers transmitting their prospectuses in their Web pages.

Section 5: Timing, Manner, and Content of Offers and Sales

The 1933 Act restricts the issuer's and underwriter's ability to communicate with prospective purchasers of the securities. Section 5 of the 1933 Act states the basic rules regarding the timing, manner, and content of offers and sales. It creates three important periods of time in the life of a securities offering: (1) the pre-filing period, (2) the waiting period, and (3) the post-effective period.

The Pre-filing Period Prior to the filing of the registration statement (the pre-filing period), the issuer and any other person may **not offer or sell** the securities to be registered. The purpose of the pre-filing period is to prevent premature communications about an issuer and its securities, which may encourage an investor to make a decision to purchase the security before all the information she needs is available. The pre-filing period also marks the start of what is sometimes called the **quiet period**, which continues for the full duration of the securities offering. A prospective issuer, its directors and officers, and its underwriters must avoid publicity about the issuer and the prospective issuance of securities during the pre-filing period and the rest of the quiet period.

The SEC has created a few nonexclusive safe harbors that allow issuers about to make public offerings to continue to release information to the public yet not violate Section 5. Under Rule 168, public issuers are permitted to continue to release regularly released factual business and forward-looking information. The type of information, as well as the timing, manner, and form, must be similar to past releases by the public issuer. Under Rule 169, nonpublic issuers may release only factual business information of the type they have previously released. For both types of issuers, the information may not mention the offering or be a part of it.

In addition, Rule 163A now allows any issuer to communicate *any* information about itself more than 30 days prior to the filing of a registration statement, provided the issuer does not reference the upcoming securities offering.

During the 30 days prior to the filing date, however, Rule 163 allows only well-known, seasoned issuers to use a **free-writing prospectus**. Well-known seasoned issuers are public issuers with at least \$700 million of public float, that is, the value of its common shares held by non-affiliates of the issuer, which excludes officers and directors. A free-writing prospectus is a written offer that may contain any information about the issuer or its securities that does not conflict with the registration statement. It must include a legend that indicates an investor may

LOG ON

Google Prospectus

To see an example of a prospectus, log on the SEC's EDGAR site and find the prospectus that Google, Inc., filed when it made its April 2004 public offering.

www.sec.gov/Archives/edgar/data/1288776/000119312504073639/ds1.htm#toc16167

obtain a prospectus at the SEC Web site. The free-writing prospectus must usually be filed with the SEC not later than the filing date of the registration statement.

SEC Rule 135 permits the issuer to publish a notice about a prospective offering during the pre-filing period. The notice may contain only the name of the issuer, the amount of the securities offered, and a basic description of the securities and the offering. It may not name the underwriters or state the price at which the securities will be offered.

The Waiting Period The waiting period is the time between the filing date and the effective date of the registration statement, when the issuer is waiting for the SEC to declare the registration statement effective. During the waiting period, Section 5 permits the securities to be **offered but not sold**. However, not all kinds of offers are permitted. Face-to-face oral offers (including personal phone calls) are allowed during the waiting period. However, written offers may be made only by a statutory prospectus, usually a **preliminary prospectus**, or a free-writing prospectus. During the waiting period, the preliminary prospectus often omits the price of the securities. (A final prospectus will be available after the registration statement becomes effective. It will contain the price of the securities.) Other so-called free writings are not permitted during the waiting period.

The waiting period is part of the quiet period, but the issuer may continue to disclose regularly released factual business and forward looking information about itself.

In addition, one type of general advertisement, called the **tombstone ad**, is permitted during the waiting period and thereafter. The tombstone ad, which appears in financial publications, is permitted by SEC Rule 134, which allows disclosure of the same information as is allowed by Rule 135 plus the general business of the issuer, the price of the securities, and the names of the underwriters who are helping the issuer to sell the securities. In addition, Rule 134 requires the tombstone ad to state where a hard copy of a prospectus may be obtained or downloaded from the Internet. See Figure 1.

Under Rules 433 and 164, well-known seasoned issuers may continue to use a free-writing prospectus with few limitations after the waiting period, including a legend that the investor may obtain a prospectus at the SEC Web site. Other issuers may use a free-writing prospectus only after the filing date and only after the investor receiving it has also received a prospectus or an e-mail with a hyperlink to the prospectus. Although the free-writing prospectus may include information not in the registration statement, it may not conflict with information in the registration statement or other documents filed with the SEC

under the 1934 Act. All issuers must file the free-writing prospectus with SEC by the date of its first use.

Issuers making public offerings will typically send their CEOs and other top officers on the road to talk to securities analysts and institutional investors during the waiting period. These road shows are permissible, whether an investor attends in person or watches a Web cast, provided it is a live, real-time road show to a live audience.

Road shows that are not viewed live in real-time by a live audience are considered written offers, but are permitted during the waiting period if they meet the requirements of free-writing prospectuses. That means that issuers other than well-known seasoned issuers must provide a prospectus to investors who view an electronic road show that is not live. Such issuers must also make a copy of the electronic road show available to any investor or file a copy of the electronic road show with the SEC.

The Internet is an exceptional medium to communicate with investors during the waiting period. Investors may easily view a tombstone ad, watch a road show, and download a prospectus from an offering Web page.

The waiting period is an important part of the regulatory scheme of the 1933 Act. It provides an investor with adequate time (at least 20 days) to judge the wisdom of buying the security during a period when he cannot be pressured to buy it. Not even a contract to buy the security may be made during the waiting period.

The Post-effective Period After the effective date (the date on which the SEC declares the registration effective), Section 5 permits the security to be **offered and also to be sold**, provided that the buyer has received a **final prospectus** (a preliminary prospectus is not acceptable for this purpose). Road shows and free-writing prospectuses may continue to be used. Other written offers not previously allowed are permitted during the post-effective period, but only if the offeree has received a final prospectus.

The Internet can be used extensively during the post-effective period. From the issuer's Web page, an investor may be required to download a final prospectus in order to obtain access to other written information about the issuer and the offering. Since the final prospectus download would be a delivery of the final prospectus to the investor, all communications thereafter would be legal even if they were written.

Liability for Violating Section 5 Section 12(a)(1) of the 1933 Act imposes liability on any person who violates the provisions of Section 5. Liability extends to any *purchaser* to whom an illegal offer or sale was made. The purchaser's remedy is *rescission* or damages.

Figure 1 Rule 134 Tombstone Ad

*This announcement is neither an offer to sell nor solicitation of an offer to buy these securities. The offer is made only by the Prospectus.
Copies of the Prospectus may be obtained in any State from only such of the underwriters as may lawfully
offer these securities in compliance with the securities laws of such State.*

Exemptions from the Registration Requirements of the 1933 Act

Complying with the registration requirements of the 1933 Act, including the restrictions of Section 5, is a burdensome, time-consuming, and expensive process. Planning and executing an issuer's first public offering may consume six months and cost in excess of \$1 million. Consequently, some issuers prefer to avoid registration when they sell securities. There are two types of exemptions from the registration requirements of the 1933 Act: securities exemptions and transaction exemptions.

Securities Exemptions Exempt securities never need to be registered, regardless who sells the securities, how they are sold, or to whom they are sold. The following are the most important securities exemptions.⁴

1. Securities issued or guaranteed by any government in the United States and its territories.
2. A note or draft that has a maturity date not more than nine months after its date of issuance.
3. A security issued by a nonprofit religious, charitable, educational, benevolent, or fraternal organization.
4. Securities issued by banks and by savings and loan associations.
5. Securities issued by railroads and trucking companies regulated by the Surface Transportation Board.
6. An insurance policy or an annuity contract.

Although the types of securities listed above are exempt from the registration provisions of the 1933 Act, they are not exempt from the general antifraud provisions of the securities acts. For example, any fraud committed in the course of selling such securities can be attacked by the SEC and by the persons who were defrauded under Section 17(a) of the 1933 Act and Section 10(b) of the 1934 Act.

Transaction Exemptions The most important 1933 Act registration exemptions are the transaction

⁴Excluded from the list of securities exemptions are the intrastate offering and small offering exemptions. Although the 1933 Act denotes them (except for the section 4(6) exemption) as securities exemptions, they are in practice transaction exemptions. An exempt security is exempt from registration forever. But when securities originally sold pursuant to an intrastate or small offering exemption are resold at a later date, the subsequent sales may have to be registered. The exemption of the earlier offering does not exempt a future offering. The SEC treats these two exemptions as transaction exemptions. Consequently, this chapter also treats them as transaction exemptions.

exemptions. If a security is sold pursuant to a transaction exemption, that sale is exempt from registration. Subsequent sales, however, are not automatically exempt. Future sales must be made pursuant to a registration or another exemption.

The transaction exemptions are exemptions from the registration provisions. The general antifraud provisions of the 1933 Act and the 1934 Act apply to exempted and nonexempted transactions.

The most important transaction exemptions are those available to issuers of securities. These exemptions are the intrastate offering exemption, the private offering exemption, and the small offering exemptions.

Intrastate Offering Exemption Under Section 3(a)(11), an offering of securities solely to investors in one state by an issuer resident and doing business in that state is exempt from the 1933 Act's registration requirements. The reason for the exemption is that there is little federal government interest in an offering that occurs in only one state. Although the offering may be exempt from SEC regulation, state securities law may require a registration. The expectation is that state securities regulation will adequately protect investors.

The SEC has defined the intrastate offering exemption more precisely in Rule 147. An issuer must have at least 80 percent of its gross revenues and 80 percent of its assets in the state and use at least 80 percent of the proceeds of the offering in the state. Resale of the securities is limited to persons within the state for nine months.

Although Rule 147 is not an exclusive rule, the SEC scrutinizes closely an intrastate offering that does not comply with it.

Private Offering Exemption Section 4(2) of the 1933 Act provides that the registration requirements of the 1933 Act "shall not apply to transactions by an issuer not involving any public offering." A private offering is an offering to a small number of purchasers who can protect themselves because they are wealthy or because they are sophisticated in investment matters and have access to the information that they need to make intelligent investment decisions.

To create greater certainty about what a private offering is, the SEC adopted Rule 506. Although an issuer may exempt a private offering under either the courts' interpretation of Section 4(2) or Rule 506, the SEC tends to treat Rule 506 as the exclusive way to obtain the exemption.

Rule 506 Under Rule 506, which is part of Securities Act Regulation D, investors must be qualified to purchase the securities. The issuer must reasonably believe

that each purchaser is either (a) an accredited investor or (b) an unaccredited investor who “has such knowledge and experience in financial and business matters that he is capable of evaluating the merits and risks of the prospective investment.” Accredited investors include institutional investors (such as banks and mutual funds), wealthy investors, and high-level insiders of the issuer (such as executive officers, directors, and partners). Issuers should have purchasers sign a suitability or **investment letter** verifying that they are qualified.

An issuer may sell to no more than 35 unaccredited purchasers who have sufficient investment knowledge and experience; it may sell to an unlimited number of accredited purchasers, regardless of their investment sophistication.

Each purchaser must be given or have access to the information she needs to make an informed investment decision. For a public company making a nonpublic offering under Rule 506 (such as General Motors sellings \$5 billion of its notes to 25 mutual funds plus 5 other, unaccredited investors), purchasers must receive information in a form required by the 1934 Act, such as a 10-K or annual report. The issuer must provide the following audited financial statements: two years’ balance sheets, three years’ income statements, and three years’ statements of changes in financial position.

For a nonpublic company making a nonpublic offering under Rule 506, the issuer must provide much of the same nonfinancial information required in a registered offering. A nonpublic company may, however, obtain

some relief from the burden of providing audited financial statements to investors. When the amount of the issuance is \$2 million or less, only one year’s balance sheet need be audited. If the amount issued exceeds \$2 million but not \$7.5 million, only one year’s balance sheet, one year’s income statement, and one year’s statement of changes in financial position need be audited. When the amount issued exceeds \$7.5 million, the issuer must provide two years’ balance sheets, three years’ income statements, and three years’ statements of changes in financial position. In any offering of any amount by a nonpublic issuer, when auditing would involve unreasonable effort or expense, only an audited balance sheet is needed. When a limited partnership issuer finds that auditing involves unreasonable effort or expense, the limited partnership may use financial statements prepared by an independent accountant in conformance with the requirements of federal tax law.

Rule 506 prohibits the issuer from making any general public selling effort. This prevents the issuer from using the radio, newspapers, and television. However, offers to an individual one-on-one are permitted.

In addition, the issuer must take reasonable steps to ensure that the purchasers do not resell the securities in a manner that makes the issuance a public distribution rather than a private one. Usually, the investor must hold the security for a minimum of six months.

In the *Mark* case, the issuer failed to prove it was entitled to a private offering exemption under Rule 506. The case features the improper use of an investment letter.

Mark v. FSC Securities Corp.

870 F.2d 331 (6th Cir. 1989)

FSC Securities Corp., a securities brokerage, sold limited partnership interests in the Malaga Arabian Limited Partnership to Mr. and Mrs. Mark. A total of 28 investors purchased limited partnership interests in Malaga. All investors were asked to execute subscription documents, including a suitability or investment letter in which the purchaser stated his income level, that he had an opportunity to obtain relevant information, and that he had sufficient knowledge and experience in business affairs to evaluate the risks of the investment.

When the value of the limited partnership interests fell, the Marks sued FSC to rescind their purchase on the grounds that FSC sold unregistered securities in violation of the Securities Act of 1933. The jury held that the offering was exempt as an offering not involving a public offering. The Marks appealed.

Simpson, Judge

Section 4(2) of the Securities Act exempts from registration with the SEC “transactions by an issuer not involving any public offering.” There are no hard and fast rules for determining whether a securities offering is exempt from registration under the general language of Section 4(2).

However, the “safe harbor” provision of Regulation D, Rule 506, deems certain transactions to be not involving any public offering within the meaning of Section 4(2). FSC had to prove

that certain objective tests were met. These conditions include the general conditions not in dispute here, and the following specific conditions:

- (i) Limitation on number of purchasers. The issuer shall reasonably believe that there are no more than thirty-five purchasers of securities in any offering under this Section.
- (ii) Nature of purchasers. The issuer shall reasonably believe immediately prior to making any sale that each purchaser who is not an accredited investor either alone or

with his purchaser representative(s) has such knowledge and experience in financial and business matters that he is capable of evaluating the merits and risks of the prospective investment.

In this case, we take the issuer to be the general partners of Malaga. FSC is required to offer evidence of the issuer's reasonable belief as to the nature of each purchaser. The only testimony at trial competent to establish the issuer's belief as to the nature of the purchasers was that of Laurence Leafer, a general partner in Malaga. By his own admission, he had no knowledge about any purchaser, much less any belief, reasonable or not, as to the purchasers' knowledge and experience in financial and business matters.

Q: What was done to determine if investors were, in fact, reasonably sophisticated?

A: Well, there were two things. Number one, we had investor suitability standards that had to be met. You had to have a certain income, be in a certain tax bracket, this kind of thing. Then in the subscription documents themselves, they, when they sign it, supposedly represented that they had received information necessary to make an informed investment decision, and that they were sophisticated. And if they were not, they relied on an offering representative who was.

Q: Did you review the subscription documents that came in for the Malaga offering?

A: No.

Q: So do you know whether all of the investors in the Malaga offering met the suitability and sophistication requirements?

A: I don't.

FSC also offered as evidence the Marks' executed subscription documents, as well as a set of documents in blank, to establish the procedure it followed in the Malaga sales offering. Although the Marks' executed documents may have been sufficient to establish the reasonableness of any belief the issuer may have had as to the Marks' particular qualifications, that does not satisfy Rule 506. The documents offered no evidence from which a jury could conclude the issuer reasonably believed each purchaser was suitable. Instead, all that was proved was the sale of 28 limited partnership interests, and the circumstances under which those sales were intended to have been made. The blank subscriptions documents simply do not amount to probative evidence, when it is the answers and information received from purchasers that determine whether the conditions of Rule 506 have been met.

Having concluded that the Malaga limited-partnership offering did not meet the registration exemption requirement of Rule 506 of Regulation D, we conclude that the Marks are entitled to the remedy of rescission.

Judgment reversed in favor of the Marks; remanded to the trial court.

Small Offering Exemptions Sections 3(b) and 4(6) of the 1933 Act permit the SEC to exempt from registration any offering by an issuer not exceeding \$5 million. Several SEC rules and regulations permit an issuer to sell small amounts of securities and avoid registration. The rationale for these exemptions is that the dollar amount of the securities offered or the number of purchasers is too small for the federal government to be concerned with registration. State securities law may require registration, however.

Rule 504 SEC Rule 504 of Regulation D allows a nonpublic issuer to sell up to \$1 million of securities in a 12-month period and avoid registration. Rule 504 sets no limits on the number of offerees or purchasers. The purchasers need not be sophisticated in investment matters, and the issuer need disclose information only as required by state securities law. Rule 504 permits general selling efforts, and purchasers are free to resell the securities at any time but only if the issuer either registers the securities under state securities law or sells only to accredited investors pursuant to a state securities law exemption.

Rule 505 Rule 505 of Regulation D allows any issuer to sell up to \$5 million of securities in a 12-month period and avoid registration. No general selling efforts are allowed, and purchasers may not resell the securities for at least six months or one year, depending on the type of issuer. Like Rule 506, the issuer may sell to no more than 35 unaccredited purchasers, and there is no limit on the number of accredited purchasers. The purchasers, however, need not be sophisticated in investment matters. Rule 505 has the same disclosure requirements as Rule 506.

Regulation A Regulation A permits a nonpublic issuer to sell up to \$5 million of securities in a one-year period. There is no limit on the number of purchasers, no purchaser sophistication requirement, and no purchaser resale restriction.

The Regulation A disclosure document is the offering circular, which must be filed with the SEC. The offering circular is required to contain a balance sheet dated within 90 days before the filing date of the offering circular. It must also contain two years' income statements, cash flow statements, and statements of shareholder

equity. Ordinarily, the financial statements need not be audited unless the issuer is otherwise required to have audited financial statements.

There is a 20-day waiting period after the filing of the offering circular, during which offers may be made. Oral offers are permitted, as are brief advertisements and written offers by an offering circular. Sales are permitted after the waiting period.

Regulation A also permits issuers to determine investors' interest in a planned offering prior to undertaking the expense of preparing an offering circular.

Securities Offerings on the Internet

With the emergence of the Internet as a significant communication tool, small issuers have sought to make offerings to investors over the Internet. Such offerings can easily run afoul of Rules 505 and 506 of Regulation D, which prohibit public solicitations of investors. Spring Street Brewing Company, the first issuer to offer securities via the Web in 1995, avoided registration by using the Regulation A exemption. Other issuers have used Rule 504, and some have made registered offerings exclusively over the Internet.

Transaction Exemptions for Nonissuers

Although it is true that the registration provisions apply primarily to issuers and those who help issuers sell their securities publicly, the 1933 Act states that every person who sells a security is potentially subject to Section 5's restrictions on the timing of offers and sales. You must learn the most important rule of the 1933 Act: **Every transaction in securities must be registered with the SEC or be exempt from registration.**

This rule applies to every person, including the small investor who, through the New York Stock Exchange, sells securities that may have been registered by the issuer 15 years earlier. The small investor must either have the issuer register her sale of securities or find an exemption from registration that applies to the situation. Fortunately, most small investors who resell securities will have an exemption from the registration requirements of the 1933 Act. The transaction ordinarily used by these resellers is Section 4(1) of the 1933 Act. It provides an exemption for "transactions by any person other than an issuer, underwriter, or dealer."

For example, if you buy GM common shares on the New York Stock Exchange, you may freely resell them without a registration. You are not an issuer (GM is). You are not a dealer (because you are not in the business of selling securities). And you are not an underwriter (because you are not helping GM distribute the shares to the public).

Application of this exemption when an investor sells shares that are already publicly traded is easy; however, it is more difficult to determine whether an investor can use this exemption when the investor sells **restricted securities**.

Sale of Restricted Securities Restricted securities are securities issued pursuant to Rules 505 and 506 and sometimes under Rule 504. Restricted securities are supposed to be held by a purchaser unaffiliated with the issuer for at least six months if the issuer is a public company and one year if the issuer is not public. If they are sold earlier, the investor may be deemed an underwriter who has assisted the issuer in selling the securities to the general public. Consequently, both the issuer and the investor may have violated Section 5 of the 1933 Act by selling nonexempted securities prior to a registration of the securities with the SEC. As a result, all investors who purchased securities from the issuer in the exempted offering may have the remedy of rescission under Section 12(a)(1), resulting in the issuer being required to return to investors all the proceeds of the issuance.

For example, an investor buys 10,000 common shares issued by Arcom Corporation pursuant to a Rule 506 private offering exemption. One month later, the investor sells the securities to 40 other investors. The original investor has acted as an underwriter because he has helped Arcom distribute the shares to the public. The original investor may not use the issuer's private offering exemption because it exempted only the issuer's sale to him. As a result, both the original investor and Arcom have violated Section 5. The 40 investors who purchased the securities from the original investor—and all other investors who purchased common shares from the issuer in the Rule 506 offering—may rescind their purchases under Section 12(a)(1) of the 1933 Act, receiving from their seller the return of their investment.

SEC Rule 144 allows purchasers of restricted securities to resell the securities and not be deemed underwriters. The resellers must hold the securities for at least six months if the securities issuer is a public company and for one year if the issuer is nonpublic, after which the investors may sell all or part of the restricted securities. After the passage of those time periods, investors not affiliated with the issuer may sell all or part of the restricted securities they hold. For investors affiliated with the issuers, such as an officer or director, the rules are more complex. In any three-month period, the affiliated reseller may sell only a limited number of securities—the greater of 1 percent of the outstanding securities or the average weekly volume of trading. The reseller must file a notice (Form 144) with the SEC.

CONCEPT REVIEW

Issuer's Exemptions from the Registration Requirements of the Securities Act of 1933

| | Type of Issuer | Amount of Securities Sold | Number of Purchasers | Purchaser Qualifications |
|---------------------|---|----------------------------------|---|---|
| Rule 504 | Nonpublic issuer | \$1,000,000 in a 12-month period | No limit | None |
| Rule 505 | Any issuer | \$5,000,000 in a 12-month period | Same number of purchasers as Rule 506 | None |
| Rule 506 | Any issuer | Unlimited | <ul style="list-style-type: none"> • 35 unaccredited purchasers and • Unlimited accredited purchasers <ul style="list-style-type: none"> • High-level insiders, • Income > \$200,000, • NW > \$1,000,000, or • Institutional investors | Issuer must reasonably believe that each purchaser is either <ul style="list-style-type: none"> • accredited or • alone or with his purchaser representative has such knowledge and experience in financial and business matters to be capable of evaluating the merits and risks of the investment |
| Regulation A | Nonpublic issuer | \$5,000,000 in a one-year period | No limit | None |
| Rule 147 | <ul style="list-style-type: none"> • Issuer organized and doing business in the offerees' and purchasers' state • Issuer has 80% of its assets in the state • Issuer generates 80% of its gross revenues from the state • Issuer uses 80% of the offering's proceeds in the state | Unlimited | No limit | All offerees and purchasers must reside in the issuer's state |

Consequence of Obtaining a Securities or Transaction Exemption

When an issuer has obtained an exemption from the registration provisions of the 1933 Act, the Section 5 limits on when and how offers and sales may be made do not apply. Consequently, Section 12(a)(1)'s remedy of rescission is unavailable to an investor who has purchased securities in an exempt offering.

When an issuer has attempted to comply with a registration exemption and has failed to do so, any offer or sale of securities by the issuer may violate Section 5. Because the issuer has offered or sold nonexempted securities prior to filing a registration statement with the SEC, any purchaser may sue the issuer under Section 12(a)(1) of the 1933 Act.

Although the registration provisions of the 1933 Act do not apply to an exempt offering, the antifraud

CONCEPT REVIEW

| Disclosure Requirements | General Solicitations | Resale Restrictions |
|---|---|--|
| None | Permitted, if the issuer registered the securities under state law or sold the securities only to accredited investors pursuant to a state securities exemption | No resale restrictions, if the issuer registered the securities under state law or sold the securities only to accredited investors pursuant to a state securities exemption |
| Same disclosure requirements as Rule 506 | Not permitted | Same resale restrictions as Rule 506 |
| <p>If issuer sells only to accredited purchasers: the issuer must give the investors only the information requested by investors.</p> <p>If issuer sells to any unaccredited purchasers, the issuer must give investors:</p> <ul style="list-style-type: none"> • the same nonfinancial information as required for a registered offering • audited financial statements • Public issuer: 2 balance sheets, 3 income statements, 3 statements of changes in financial position • Nonpublic issuer: if amount of securities sold is <ul style="list-style-type: none"> • ≤\$2,000,000: 1 balance sheet • >\$2,000,000 but ≤\$7,500,000: 1 balance sheet, 1 income statement, 1 statement of changes in financial position • >\$7,500,000: 2 balance sheets, 3 income statements, 3 statements of changes in financial position • Nonpublic issuer, if auditing involves unreasonable effort or expense: <ul style="list-style-type: none"> • 1 balance sheet <p>Any information given to one investor must be given to all investors.</p> | Not permitted | <ul style="list-style-type: none"> • Investors may not sell securities of a public issuers for at least six months • Investors may not sell securities of a nonpublic issuer for at least one year • After the passage of the time periods above, a nonaffiliated investor may sell the securities without volume restrictions • After the passage of the time periods above, an affiliated investor may sell in any three-month period the greater of <ul style="list-style-type: none"> • 1% of the issuer's outstanding shares or • the average weekly volume of the issuer's shares |

| None | Permitted | Investors may not sell the securities outside the issuer's state for nine months |

provisions of the 1933 Act and 1934 Act, which are discussed later, are applicable. For example, when an issuer gives false information to a purchaser in a Rule 504 offering, the issuer may have violated the antifraud provisions of the two acts. The purchaser may obtain damages from the issuer under the antifraud rules even though the transaction is exempt from registration.

Liability Provisions of the 1933 Act

To deter fraud, deception, and manipulation and to provide remedies to the victims of such practices, Congress included a number of liability provisions in the Securities Act of 1933.

Ethics in Action

Section 5 of the 1933 Act and many of the exemptions from registration put severe limits on an issuer's ability to inform prospective investors during a registered or exempted offering. For example, during the quiet period of a registered offering, the SEC takes a dim view of an issuer's attempt to publicize itself and its business. Rules 505 and 506 prohibit general solicitations.

- Are those limitations consistent with the principles of a country that has a market-based economy and elevates freedom of speech to a constitutional right? Would a rights theorist support American securities law? How about a profit maximizer?
- Might a believer in justice theory view be more likely to support American law regulating issuances of securities? Whom would a justice theorist want to see protected?
- Who is the typical securities purchaser? Is it not someone from the wealthier classes of citizens? Is securities regulation welfare for the wealthy?

Note that Section 5 of the 1933 Act does not require that investors receive a preliminary prospectus during the waiting period. In fact, an issuer can completely avoid giving investors a prospectus until a sale is confirmed during the post-effective period. That means an investor may not receive a prospectus until he has made his purchase decision. Moreover, many investors find the prospectus overwhelming to read, and if they do read it, it is often couched in legalese that is difficult to understand. Finally, the prospectus mostly comprises historical information. It is more correctly a “retrospectus,” not a prospectus, and contains information that is already in the marketplace. Yet professionals like auditors and investment bankers make millions of dollars by being involved in the preparation of the prospectus, which is not received by investors at the right time, not read, not readable, and not relevant to investment decisions.

- Is it ethical for professionals to profit enormously from their role of putting together a prospectus that provides little real value to investors?

Liability for Defective Registration Statements

Section 11 of the 1933 Act provides civil liabilities for damages when a 1933 Act registration statement on its effective date misstates or omits a material fact. A purchaser of securities issued pursuant to the defective registration statement may sue certain classes of persons that are listed in Section 11—the issuer, its chief executive officer, its chief accounting officer, its chief financial officer, the directors, other signers of the registration statement, the underwriter, and experts who contributed to the registration statement (such as auditors who issued opinions regarding the financial statements or lawyers who issued an opinion concerning the tax aspects of a limited partnership). The purchaser's remedy under Section 11 is for damages caused by the misstatement or omission. Damages are presumed to be equal to the difference between the purchase price of the securities less the price of the securities at the time of the lawsuit.

Section 11 is a radical liability section for three reasons. First, reliance is usually not required; that is, the purchaser need not show that she relied on the misstatement or omission in the registration statement. In fact, the purchaser need not have read the registration statement or have seen it. Second, privity is not required; that is, the purchaser need not prove that she purchased the securities from the defendant. All she has to prove is that the defendant is in one of the classes of persons liable under Section 11. Third, the purchaser need not prove that the defendant negligently or intentionally misstated or omitted a material fact. Instead, a defendant who

otherwise would be liable under Section 11 may escape liability by proving that he exercised due diligence.

Section 11 Defenses A defendant can escape liability under Section 11 by proving that the purchaser knew of the misstatement or omission when she purchased the security. In addition, a defendant may raise the **due diligence defense**. It is the more important of the two defenses.

Any defendant except the issuer may escape liability under Section 11 by proving that he acted with due diligence in determining the accuracy of the registration statement. The due diligence defense basically requires the defendant to prove that he was not negligent. The exact defense varies, however, according to the class of defendant and the portion of the registration statement that is defective. Most defendants must prove that after a **reasonable investigation** they had **reasonable grounds to believe** and **did believe** that the registration statement was true and contained no omission of material fact.

Experts need to prove due diligence only in respect to the parts that they have contributed. For example, independent auditors must prove due diligence in ascertaining the accuracy of financial statements for which they issue opinions. Due diligence requires that an auditor at least comply with generally accepted auditing standards (GAAS). Experts are those who issue an opinion regarding information in the registration statement. For example, auditors of financial statements are experts under Section 11 because they issue opinions regarding

the ability of the financial statements to present fairly the financial position of the companies they have audited. A geologist who issues an opinion regarding the amount of oil reserves held by an energy company is a Section 11 expert if her opinion is included in a registration statement filed by the limited partnership.

Nonexperts meet their due diligence defense for parts contributed by experts if they had no reason to

believe and did not believe that the expertised parts misstated or omitted any material fact. This defense does not require the nonexpert to investigate the accuracy of expertised portions, unless something alerted the nonexpert to problems with the expertised portions.

The *BarChris* case is the most famous case construing the due diligence defense of Section 11.

Escott v. BarChris Construction Corp.

283 F.Supp. 643 (S.D.N.Y. 1968)

BarChris Construction Corporation was in the business of constructing bowling centers. With the introduction of automatic pinsetters in 1952, there was a rapid growth in the popularity of bowling, and BarChris's sales increased from \$800,000 in 1956 to over \$9 million in 1960. By 1960, it was building about 3 percent of the lanes constructed, while Brunswick Corporation and AMF were building 97 percent. BarChris contracted with its customers to construct and equip bowling alleys for them. Under the contracts, a customer was required to make a small down payment in cash. After the alleys were constructed, customers gave BarChris promissory notes for the balance of the purchase price. BarChris discounted the notes with a factor. The factor kept part of the face value of the notes as a reserve until the customer paid the notes. BarChris was obligated to repurchase the notes if the customer defaulted.

In 1960, BarChris offered its customers an alternative financing method in which BarChris sold the interior of a bowling alley to a factor, James Talcott, Inc. Talcott then leased the alley either to a BarChris customer (Type A financing) or to a BarChris subsidiary that then subleased to the customer (Type B financing). Under Type A financing, BarChris guaranteed 25 percent of the customer's obligation under the lease. With Type B financing, BarChris was liable for 100 percent of its subsidiaries' lease obligations. Under either financing method, BarChris made substantial expenditures before receiving payment from customers and, therefore, experienced a constant need of cash.

In early 1961, BarChris decided to issue debentures and to use part of the proceeds to help its cash position. In March 1961, BarChris filed with the SEC a registration statement covering the debentures. The registration statement became effective on May 16. The proceeds of the offering were received by BarChris on May 24, 1961. By that time, BarChris had difficulty collecting from some of its customers, and other customers were in arrears on their payments to the factors of the discounted notes. Due to overexpansion in the bowling alley industry, many BarChris customers failed. On October 29, 1962, BarChris filed a petition for bankruptcy. On November 1, it defaulted on the payment of interest on the debentures.

Escott and other purchasers of the debentures sued BarChris and its officers, directors, and auditors, among others, under Section 11 of the Securities Act of 1933. BarChris's registration statement contained material misstatements and omitted material facts. It overstated current assets by \$609,689 (15.6 percent), sales by \$653,900 (7.7 percent), and earnings per share by 10 cents (15.4 percent) in the 1960 balance sheet and income statement audited by Peat, Marwick, Mitchell & Co. The registration statement also understated BarChris's contingent liabilities by \$618,853 (42.8 percent) as of April 30, 1961. It overstated gross profit for the first quarter of 1961 by \$230,755 (92 percent) and sales for the first quarter of 1961 by \$519,810 (32.1 percent). The March 31, 1961, backlog was overstated by \$4,490,000 (186 percent). The 1961 figures were not audited by Peat, Marwick.

In addition, the registration statement reported that prior loans from officers had been repaid, but failed to disclose that officers had made new loans to BarChris totaling \$386,615. BarChris had used \$1,160,000 of the proceeds of the debentures to pay old debts, a use not disclosed in the registration statement. BarChris's potential liability of \$1,350,000 to factors due to customer delinquencies on factored notes was not disclosed. The registration statement represented BarChris's contingent liability on Type B financings as 25 percent instead of 100 percent. It misrepresented the nature of BarChris's business by failing to disclose that BarChris was already engaged and was about to become more heavily engaged in the operation of bowling alleys, including one called Capitol Lanes, as a way of minimizing its losses from customer defaults.

Trilling, BarChris's controller, signed the registration statement. Auslander, a director, signed the registration statement. Peat, Marwick consented to being named as an expert in the registration statement. All three would be liable to Escott unless they could meet the due diligence defense of Section 11.

McLean, District Judge

The question is whether Trilling, Auslander, and Peat, Marwick have proved their due diligence defenses. The position of each defendant will be separately considered.

Trilling

Trilling was BarChris's controller. He signed the registration statement in that capacity. Trilling entered BarChris's employ in October 1960. He was Kircher's [BarChris's treasurer] subordinate. When Kircher asked him for information, he furnished it.

Trilling was not a member of the executive committee. He was a comparatively minor figure in BarChris. The description of BarChris's management in the prospectus does not mention him. He was not considered to be an executive officer.

Trilling may well have been unaware of several of the inaccuracies in the prospectus. But he must have known of some of them. As a financial officer, he was familiar with BarChris's finances and with its books of account. He knew that part of the cash on deposit on December 31, 1960, had been procured temporarily by Russo [BarChris's executive vice president] for window-dressing purposes. He knew that BarChris was operating Capitol Lanes in 1960. He should have known, although perhaps through carelessness he did not know at the time, that BarChris's contingent liability on Type B lease transactions was greater than the prospectus stated. In the light of these facts, I cannot find that Trilling believed the entire prospectus to be true.

But even if he did, he still did not establish his due diligence defenses. He did not prove that as to the parts of the prospectus expertised by Peat, Marwick he had no reasonable ground to believe that it was untrue. He also failed to prove, as to the parts of the prospectus not expertised by Peat, Marwick, that he made a reasonable investigation which afforded him a reasonable ground to believe that it was true. As far as appears, he made no investigation. He did what was asked of him and assumed that others would properly take care of supplying accurate data as to the other aspects of the company's business. This would have been well enough but for the fact that he signed the registration statement. As a signer, he could not avoid responsibility by leaving it up to others to make it accurate. Trilling did not sustain the burden of proving his due diligence defenses.

Auslander

Auslander was an outside director, i.e., one who was not an officer of BarChris. He was chairman of the board of Valley Stream National Bank in Valley Stream, Long Island. In February 1961, Vitolo [BarChris's president] asked him to become a director of BarChris. In February and early March 1961, before accepting Vitolo's invitation, Auslander made some

investigation of BarChris. He obtained Dun & Bradstreet reports that contained sales and earnings figures for periods earlier than December 31, 1960. He caused inquiry to be made of certain of BarChris's banks and was advised that they regarded BarChris favorably. He was informed that inquiry of Talcott had also produced a favorable response.

On March 3, 1961, Auslander indicated his willingness to accept a place on the board. Shortly thereafter, on March 14, Kircher sent him a copy of BarChris's annual report for 1960. Auslander observed that BarChris's auditors were Peat, Marwick. They were also the auditors for the Valley Stream National Bank. He thought well of them.

Auslander was elected a director on April 17, 1961. The registration statement in its original form had already been filed, of course without his signature. On May 10, 1961, he signed a signature page for the first amendment to the registration statement which was filed on May 11, 1961. This was a separate sheet without any document attached. Auslander did not know that it was a signature page for a registration statement. He vaguely understood that it was something "for the SEC."

At the May 15 directors' meeting, however, Auslander did realize that what he was signing was a signature sheet to a registration statement. This was the first time that he had appreciated the fact. A copy of the registration statement in its earlier form as amended on May 11, 1961, was passed around at the meeting. Auslander glanced at it briefly. He did not read it thoroughly. At the May 15 meeting, Russo and Vitolo stated that everything was in order and that the prospectus was correct. Auslander believed this statement.

In considering Auslander's due diligence defenses, a distinction must be drawn between the expertised and nonexpertised portions of the prospectus. As to the former, Auslander knew that Peat, Marwick had audited the 1960 figures. He believed them to be correct because he had confidence in Peat, Marwick. He had no reasonable ground to believe otherwise.

As to the nonexpertised portions, however, Auslander is in a different position. He seems to have been under the impression that Peat, Marwick was responsible for all the figures. This impression was not correct, as he would have realized if he had read the prospectus carefully. Auslander made no investigation of the accuracy of the prospectus. He relied on the assurance of Vitolo and Russo, and upon the information he had received in answer to his inquiries back in February and early March. These inquiries were general ones, in the nature of a credit check. The information which he received in answer to them was also general, without specific reference to the statements in the prospectus, which was not prepared until some time thereafter.

It is true that Auslander became a director on the eve of the financing. He had little opportunity to familiarize himself

with the company's affairs. The question is whether, under such circumstances, Auslander did enough to establish his due diligence.

Section 11 imposes liability upon a director, no matter how new he is. He is presumed to know his responsibility when he becomes a director. He can escape liability only by using that reasonable care to investigate the facts that a prudent man would employ in the management of his own property. In my opinion, a prudent man would not act in an important matter without any knowledge of the relevant facts, in sole reliance upon general information which does not purport to cover the particular case. To say that such minimal conduct measures up to the statutory standard would, to all intents and purposes, absolve new directors from responsibility merely because they are new. This is not a sensible construction of Section 11, when one bears in mind its fundamental purpose of requiring full and truthful disclosure for the protection of investors.

Auslander has not established his due diligence defense with respect to the misstatements and omissions in those portions of the prospectus other than the audited 1960 figures.

Peat, Marwick

The part of the registration statement purporting to be made upon the authority of Peat, Marwick as an expert was the 1960 figures. But because the statute requires the court to determine Peat, Marwick's belief, and the grounds thereof, "at the time such part of the registration statement became effective," for the purposes of this affirmative defense, the matter must be viewed as of May 16, 1961, and the question is whether at that time Peat, Marwick, after reasonable investigation, had reasonable ground to believe and did believe that the 1960 figures were true and that no material fact had been omitted from the registration statement which should have been included in order to make the 1960 figures not misleading. In deciding this issue, the court must consider not only what Peat, Marwick did in its 1960 audit, but also what it did in its subsequent S-1 review. The proper scope of that review must also be determined.

The 1960 Audit

Peat, Marwick's work was in general charge of a member of the firm, Cummings, and more immediately in charge of Peat, Marwick's manager, Logan. Most of the actual work was performed by a senior accountant, Berardi, who had junior assistants, one of whom was Kennedy.

Berardi was then about 30 years old. He was not yet a CPA. He had had no previous experience with the bowling industry. This was his first job as a senior accountant. He could hardly have been given a more difficult assignment.

It is unnecessary to recount everything that Berardi did in the course of the audit. We are concerned only with the

evidence relating to what Berardi did or did not do with respect to those items which I have found to have been incorrectly reported in the 1960 figures in the prospectus. More narrowly, we are directly concerned only with such of those items as I have found to be material.

First and foremost is Berardi's failure to discover that Capitol Lanes had not been sold. This error affected both the sales figure and the liability side of the balance sheet. Fundamentally, the error stemmed from the fact that Berardi never realized that Heavenly Lanes and Capitol were two different names for the same alley. Berardi assumed that Heavenly was to be treated like any other completed job.

Berardi read the minutes of the board of directors meeting of November 22, 1960, which recited that "the Chairman recommended that the Corporation operate Capitol Lanes." Berardi knew from various BarChris records that Capitol Lanes, Inc., was paying rentals to Talcott. Also, a Peat, Marwick work paper bearing Kennedy's initials recorded that Capitol Lanes, Inc., held certain insurance policies.

Berardi testified that he inquired of Russo about Capitol Lanes and that Russo told him that Capitol Lanes, Inc., was going to operate an alley someday but as yet it had no alley. Berardi testified that he understood that the alley had not been built and that he believed that the rental payments were on vacant land.

I am not satisfied with this testimony. If Berardi did hold this belief, he should not have held it. The entries as to insurance and as to "operation of alley" should have alerted him to the fact that an alley existed. He should have made further inquiry on the subject. It is apparent that Berardi did not understand this transaction.

He never identified this mysterious Capitol with the Heavenly Lanes which he had included in his sales and profit figures. The vital question is whether he failed to make a reasonable investigation which, if he had made it, would have revealed the truth.

Certain accounting records of BarChris, which Berardi testified he did not see, would have put him on inquiry. One was a job cost ledger card for job no. 6036, the job number which Berardi put on his own sheet for Heavenly Lanes. This card read "Capitol Theatre (Heavenly)." In addition, two accounts receivable cards each showed both names on the same card, Capitol and Heavenly. Berardi testified that he looked at the accounts receivable records but that he did not see these particular cards. He testified that he did not look on the job cost ledger cards because he took the costs from another record, the costs register.

The burden of proof on this issue is on Peat, Marwick. Although the question is a rather close one, I find that Peat, Marwick has not sustained that burden. Peat, Marwick has not proved that Berardi made a reasonable investigation as far as

Capitol Lanes was concerned and that his ignorance of the true facts was justified.

I turn now to the errors in the current assets. As to cash, Berardi properly obtained a confirmation from the bank as to BarChris's cash balance on December 31, 1960. He did not know that part of this balance had been temporarily increased by the deposit of reserves returned by Talcott to BarChris conditionally for a limited time. I do not believe that Berardi reasonably should have known this. It would not be reasonable to require Berardi to examine all of BarChris's correspondence files [which contained correspondence indicating that BarChris was to return the cash to Talcott] when he had no reason to suspect any irregularity.

The S-1 Review

The purpose of reviewing events subsequent to the date of a certified balance sheet (referred to as an S-1 review when made with reference to a registration statement) is to ascertain whether any material change has occurred in the company's financial position which should be disclosed in order to prevent the balance sheet figures from being misleading. The scope of such a review, under generally accepted auditing standards, is limited. It does not amount to a complete audit.

Berardi made the S-1 review in May 1961. He devoted a little over two days to it, a total of 20½ hours. He did not discover any of the errors or omissions pertaining to the state of affairs in 1961, all of which were material. The question is whether, despite his failure to find out anything, his investigation was reasonable within the meaning of the statute.

What Berardi did was to look at a consolidating trial balance as of March 31, 1961, which had been prepared by BarChris, compare it with the audited December 31, 1960, figures, discuss with Trilling certain unfavorable developments which the comparison disclosed, and read certain minutes. He did not examine any important financial records other than the trial balance.

Due Diligence Meeting Officers, directors, underwriters, accountants, and other experts attempt to reduce their Section 11 liability by holding a due diligence meeting at the end of the waiting period, just prior to the effective date of a registration statement. At the due diligence meeting, the participants obtain assurances and demand proof from each other that the registration statement contains no misstatements or omissions of material fact. If it appears from the meeting that there are inadequacies in the investigation of the information in the reg-

In substance, Berardi asked questions, he got answers which he considered satisfactory, and he did nothing to verify them. Since he never read the prospectus, he was not even aware that there had ever been any problem about loans from officers. He made no inquiry of factors about delinquent notes in his S-1 review. Since he knew nothing about Kircher's notes of the executive committee meetings, he did not learn that the delinquency situation had grown worse. He was content with Trilling's assurance that no liability theretofore contingent had become direct. Apparently the only BarChris officer with whom Berardi communicated was Trilling. He could not recall making any inquiries of Russo, Vitolo, or Pugliese [a BarChris vice president].

There had been a material change for the worse in BarChris's financial position. That change was sufficiently serious so that the failure to disclose it made the 1960 figures misleading. Berardi did not discover it. As far as results were concerned, his S-1 review was useless.

Accountants should not be held to a standard higher than that recognized in their profession. I do not do so here. Berardi's review did not come up to that standard. He did not take some of the steps which Peat, Marwick's written program prescribed. He did not spend an adequate amount of time on a task of this magnitude. Most important of all, he was too easily satisfied with glib answers to his inquiries.

This is not to say that he should have made a complete audit. But there were enough danger signals in the materials which he did examine to require some further investigation on his part. Generally accepted auditing standards require such further investigation under these circumstances. It is not always sufficient merely to ask questions.

Here again, the burden of proof is on Peat, Marwick. I find that burden has not been satisfied. I conclude that Peat, Marwick has not established its due diligence defense.

Judgment for Escott and the other purchasers.

istration statement, the issuer will delay the effective date until an appropriate investigation is undertaken.

Statute of Limitations Under Section 11, a defendant has liability for only a limited period of time, pursuant to a statute of limitations. A purchaser must sue the defendant within one year after the misstatement or omission was or should have been discovered by the purchaser. In addition, the purchaser may sue the defendant not more than three years after the securities were offered to the

CONCEPT REVIEW

Due Diligence Defenses under Section 11 of the 1933 Act

| | For Expertised Portion of the Registration Statement | For Nonexpertised Portion of the Registration Statement |
|--|---|--|
| <p>Expert Liable only for the expertised portion of the registration statement contributed by the expert. Examples: Auditor that issues an audit opinion regarding financial statements; Geologist that issues an opinion regarding mineral reserves; Lawyer that issues a tax opinion regarding the tax deductibility of losses</p> | After a reasonable investigation, had reason to believe and did believe that there were no misstatements or omissions of material fact in the expertised portion of the registration statement contributed by the expert. | Not liable for this portion of the registration statement. |
| <p>Nonexpert Liable for the entire registration statement. Examples: Directors of the issuer; CEO, CFO, and CAO of the issuer; Underwriters who assist in the sale of the securities and help prepare the registration statement</p> | Had no reason to believe and did not believe that there were any misstatements or omissions of material fact in the expertised portions of the registration statement. | After a reasonable investigation, had reason to believe and did believe that there were no misstatements or omissions of material fact in the nonexpertised portion of the registration statement. |

public. Although the word “offered” is used in the statute, the three-year period does not usually begin until after the registered securities are first delivered to a purchaser. The Sarbanes–Oxley Act of 2002 arguably extends the statute of limitations to two years after discovery of facts constituting a violation of Section 11 and five years after the violation.

Other Liability Provisions Section 12(a)(2) of the 1933 Act prohibits misstatements or omissions of material fact in any written or oral communication in connection with the general distribution of any security by an issuer (except government-issued or government-guaranteed securities). Section 17(a) prohibits the use of any device or artifice to defraud, or the use of any untrue or misleading statement, in connection with the offer or sale of any security. Two of the subsections of Sec-

tion 17(a) require that the defendant merely act negligently, while the third subsection requires proof of scienter. Scienter is the intent to deceive, manipulate, or defraud the purchaser. Some courts have held that scienter also includes recklessness.

Since these liability sections are part of federal law, there must be some connection between the illegal activity and interstate commerce for liability to exist. Section 11 merely requires the filing of a registration statement with the SEC. Sections 12(a)(1), 12(a)(2), and 17(a) require the use of the mails or other instrumentality or means of interstate communication or transportation. Chapter 46 has more information on liability under Sections 11, 12(a)(2), and 17(a).

Criminal Liability Section 24 of the 1933 Act provides for criminal liability for any person who willfully

violates the Act or its rules and regulations. The maximum penalty is a \$10,000 fine and five years' imprisonment. Criminal actions under the 1933 Act are brought by the attorney general of the United States, not by the SEC.

Securities Exchange Act of 1934

The Securities Exchange Act of 1934 is chiefly concerned with requiring the disclosure of material information to investors. Unlike the 1933 Act, which is primarily a one-time disclosure statute concerned with protecting investors when an issuer sells its shares to investors, the 1934 Act requires **periodic disclosure** by issuers with publicly held equity securities. That is, the 1934 Act is primarily concerned with protecting investors after the issuer becomes a public company. An issuer with publicly traded equity securities must report annually to its shareholders and submit annual and quarterly reports to the SEC. Also, any material information about the issuer must be disclosed as the issuer obtains it, unless the issuer has a valid business purpose for withholding disclosure.

In addition, the 1934 Act regulates insiders' transactions in securities, proxy solicitations, tender offers, brokers and dealers, and securities exchanges. The 1934 Act also has several sections prohibiting fraud and manipulation in securities transactions. The ultimate purpose of the 1934 Act is to keep investors fully informed to allow them to make intelligent investment decisions at any time.

Registration of Securities under the 1934 Act Under the 1934 Act, issuers must **register classes of securities**. This is different from the 1933 Act, which requires issuers to register issuances of securities. Under the 1933 Act, securities are registered only for the term of an issuance. Under the 1934 Act, registered classes of securities remain registered until the issuer takes steps to deregister the securities. The chief consequence of having securities registered under the 1934 Act is that the issuer is required periodically to disclose information about itself to its owners and the SEC.

Registration Requirement Two types of issuers must register securities with the SEC under the 1934 Act.

1. An issuer whose total assets exceed \$10 million must register a class of equity securities held by at least 500 holders if the securities are traded in interstate commerce.
2. An issuer must register any security traded on a national security exchange, such as common shares traded on the New York Stock Exchange or NASDAQ.

To register the securities, the issuer must file a 1934 Act **registration statement** with the SEC. The information required in the 1934 Act registration statement is similar to that required in the 1933 Act registration statement, except that offering information is omitted.

Termination of Registration An issuer may avoid the expense and burden of complying with the periodic disclosure and other requirements of the 1934 Act if the issuer terminates its registration. A 1934 Act registration

The Global Business Environment

Securities Regulation of Global Issuers

All market-based economies have securities laws regulating the issuance and trading of securities. Even the Republic of China, which allows limited capitalism, has a comprehensive securities law, although not as extensive as United States law. All foreign laws regulate the issuance of securities, securities exchanges, and securities professionals.

Most countries' securities law applies equally to domestic and foreign issuers of securities. In the United States, for example, foreign issuers must register an issuance with the SEC in the same way a domestic company registers, under Regulation C.

Canadian securities law is similar to American law, although primarily enacted by the provinces and territories

instead of the national government. Nonetheless, Canadian securities law is substantially similar throughout Canada. In general, domestic and foreign issuers must make securities offerings with a prospectus that has been filed with a securities commissioner. One exemption from registration is the private issuer exemption, which may be used by a nonpublic company with no more than 50 security holders. Another exemption is for offerings to a purchaser not exceeding C\$150,000. While securities qualified by a prospectus may generally be freely traded in the secondary market, securities sold through an exemption must be held by the initial purchasers for 6 to 18 months, depending on the exemption.

For more information on international securities law, visit the Web site of the International Organization of Securities Commissions at www.iosco.org.

of a class of securities may be terminated if the issuer has fewer than 300 shareholders of that class. In addition, a registration may be terminated if the issuer has fewer than 500 shareholders of the registered class of equity securities and assets of no more than \$10 million for each of the last three years. However, an issuer with securities listed on a national securities exchange would not be able to terminate a registration of the listed securities.

Periodic Reporting Requirement To maintain a steady flow of material information to investors, the 1934 Act requires public issuers to file periodic reports with the SEC. Three types of issuers must file such reports:

1. An issuer whose total assets exceed \$10 million and who has a class of equity securities held by at least 500 holders, if the securities are traded in interstate commerce.
2. An issuer whose securities are traded on a national securities exchange.
3. An issuer who has made a registered offering of securities under the 1933 Act.

The first two types of issuers—which are issuers that must also register securities under the 1934 Act—must file several periodic reports, including an annual report (Form 10-K) and a quarterly report (Form 10-Q). They must file a current report (Form 8-K) when material events occur. Comparable reports must also be sent to their shareholders. The third type of issuer—an issuer who must disclose under the 1934 Act only because it has made a registered offering under the 1933 Act—must file the same reports as the other issuers, except that it need not provide an annual report to its shareholders. 1934 Act disclosure required of the third type of issuer is in addition to the disclosure required by the 1933 Act.

The 10-K annual report must include audited financial statements plus current information about the conduct of the business, its management, and the status of its securities. It includes management's description and analysis of the issuer's financial condition (the so-called MDA section) and the names of directors and executive officers, including their compensation (such as salary and stock options). The 10-K auditing requirements are the same as for a 1933 Act registration statement—two years' audited balance sheets, three years' audited income statements, and three years' audited statements of changes in financial position.

The quarterly report, the 10-Q, requires only a summarized, unaudited operating statement and unaudited

figures on capitalization and shareholders' equity. The 8-K current report must be filed within four business days of the occurrence of the event, such as a change in the amount of securities, an acquisition or disposition of assets, a change in control of the company, a revaluation of assets, or "any materially important event."

The SEC permits issuers to file reports electronically, transmitting them by telephone or by sending computer tapes or disks to the SEC. These electronic filings are made with the SEC's Electronic Data Gathering, Analysis, and Retrieval system (EDGAR).

LOG ON

www.sec.gov/edgar.shtml

The SEC's Internet homepage gives anyone access to the EDGAR database.

Issuers have historically mailed to their shareholders written copies of their annual reports and other periodic disclosure statements. Today, issuers are able to transmit such reports over the Internet. The Internet increases investors' access to information and can reduce the issuer's costs as well.

Suspension of Duty to File Reports An issuer's duty to file periodic reports with regard to a class of securities is suspended if the issuer has fewer than 300 holders of that class. In addition, a suspension occurs if the issuer has fewer than 500 holders of that class of securities and assets of no more than \$10 million. However, an issuer with securities traded on a national securities exchange would remain obligated to file periodic reports with respect to those securities.

Holdings and Trading by Insiders Section 16 of the 1934 Act is designed to promote investor confidence in the integrity of the securities markets by limiting the ability of insiders to profit from trading in the shares of their issuers. Section 16(a) requires statutory insiders to disclose their ownership of their company's securities within 10 days of becoming owners. In addition, statutory insiders must report any subsequent transaction in such securities within two business days after the trade.

A statutory insider is a person who falls into any of the following categories:

1. An officer of a corporation having equity securities registered under the 1934 Act.

2. A director of such a corporation.
3. An owner of more than 10 percent of a class of equity securities registered under the 1934 Act.

Section 16(b) prevents an insider from profiting from short-swing trading in his company's shares. Any profit made by a statutory insider is recoverable by the issuer if the profit resulted from the purchase and sale (or the sale and purchase) of any class of the issuer's equity securities within less than a six-month period. This provision was designed to stop speculative insider trading on the basis of information that "may have been obtained by such owner, director, or officer by reason of his relationship to the issuer." The application of the provision is without regard to intent to use or actual use of inside information. However, a few cases have held that sales made by a statutory insider without actual access to inside information do not violate Section 16(b).

Proxy Solicitation Regulation In a public corporation, shareholders rarely attend and vote at shareholder meetings. Many shareholders are able to vote at shareholder meetings only by **proxy**, a document by which shareholders direct other persons to vote their shares. Just as investors need information to be able to make intelligent investment decisions, shareholders need information to make intelligent voting and proxy decisions.

The 1934 Act regulates the solicitation of proxies. Regulation 14A requires any person soliciting proxies from holders of securities registered under the 1934 Act to furnish each holder with a **proxy statement** containing voting information. Usually, the only party soliciting proxies is the corporation's management, which is seeking proxies from common shareholders to enable it to reelect itself to the board of directors.

If the management of the corporation does not solicit proxies, it must nevertheless inform the shareholders of material information affecting matters that are to be put to a vote of the shareholders. This **information statement**, which contains about the same information as a proxy statement, must be sent to all shareholders that are entitled to vote at the meeting.

The primary purpose of the SEC rules concerning information that must be included in the proxy or information statement is to permit shareholders to make informed decisions while voting for directors and considering any resolutions proposed by the management or shareholders. Information on each director nominee must include the candidate's principal occupation, his shareholdings

in the corporation, his previous service as a director of the corporation, his material transactions with the corporation (such as goods or services provided), and his directorships in other corporations. The total remuneration of the five directors or officers who are highest paid, including bonuses, grants under stock option plans, fringe benefits, and other perquisites, must also be included in the proxy statement.

SEC rules regarding the content of proxies ensure that the shareholder understands how his proxy will be voted. The proxy form must indicate in boldface type on whose behalf it is being solicited—for example, the corporation's management. Generally, the proxy must permit the shareholder to vote for or against the proposal or to abstain from voting on any resolutions on the meeting's agenda. The proxy form may ask for discretionary voting authority if the proxy indicates in bold print how the shares will be voted. For directors' elections, the shareholders must be provided with a means for withholding approval for each nominee.

Modern technology has greatly increased the ease with which shareholders may participate in shareholder votes and meetings, as well as reducing the cost of counting shareholder votes. Shareholders can vote electronically by phone and on the Internet. Some companies broadcast their shareholder meetings by satellite, and others webcast their shareholder meetings.

SEC Rule 14a-9 prohibits misstatements or omissions of material fact in the course of a proxy solicitation. If a violation is proved, a court may enjoin the holding of the shareholders' meeting, void the proxies that were illegally obtained, or rescind the action taken at the shareholders' meeting.

Proxy Contests A shareholder may decide to solicit proxies in competition with management. Such a competition is called a proxy contest, and a solicitation of this kind is also subject to SEC rules. To facilitate proxy contests, the SEC requires the corporation either to furnish a shareholder list to shareholders who desire to wage a proxy contest or to mail the competing proxy material for them.

Perhaps the most hotly contested proxy battle ever was fought in 2002 between the management of Hewlett-Packard, which wanted to merge with Compaq, and Walter Hewitt, the son of H-P's co-founder and leader of shareholders opposed to the merger. Both sides were well organized, and each deluged shareholders with proxy solicitation material. A mere 51 percent of H-P shareholders gave the merger a narrow victory. By contrast, about 90 percent of Compaq shareholders approved the merger.

Ethics in Action

Sarbanes–Oxley Act of 2002

In 2001 and 2002, the discovery of financial irregularities in financial statements of nearly two dozen companies—notably Enron, Global Crossing, and WorldCom—led to the bankruptcy of some companies, cost investors billions of dollars, and contributed to the bear stock market of 2001 and 2002. While many ordinary investors lost a lifetime of savings, corporate insiders received and profited from lucrative stock options, bonuses, and favorable loans that were sometimes not repaid.

Consequently, Congress passed the Sarbanes–Oxley Act of 2002 (SOX), which was designed to restore integrity to corporate financial statements and revive investor confidence in the securities markets. The Sarbanes–Oxley Act attempts to accomplish these objectives by imposing a wide array of new responsibilities on public corporations and their executives and auditors. All the provisions result from the crisis of ethics, in which some corporate officers and auditors preferred their selfish interests over those of the corporation and its shareholders, creditors, and other stakeholders.

Because some public companies were manipulating their balance sheets by omitting liabilities of certain affiliate entities, SOX requires that 10-Ks and 10-Qs filed with the SEC disclose material off-balance sheet transactions. To increase the likelihood that auditors will not give in to corporate executives' pressure to account improperly for corporate transactions, SOX requires greater independence between the auditor and the corporation by prohibiting the audit firm from performing most types of consulting services for the corporation. Moreover, officers and directors are prohibited from coercing auditors into creating misleading financial statements. To ensure that auditors are serving the interests of shareholders and not those of corporate managers, SOX requires auditors to be hired and overseen by an audit committee whose members are independent of the CEO and other corporate executives.

In addition, the CEO and CFO of a public company must certify that the corporation's financial reports fairly present the company's operations and financial condition. To eliminate the CEO and CFO's incentive to manipulate earnings, the CEO and CFO must disgorge bonuses, other incentive-based compensation, and profits on stock sales that were received during the 12-month period before financial statements are restated due to material misstatements or omissions. Public corporations are also generally prohibited from making loans to officers and directors. To encourage the use of ethics codes, SOX requires public companies to

disclose whether they have ethics codes for senior financial officers.

Finally, SOX gives the SEC several new powers, including the authority to freeze payments to officers and directors during any lawful investigation. The SEC may also bar “unfit” persons from serving as directors and officers of public companies. The previous standard was “substantial unfitness.”

SOX Section 404

The most controversial part of the Sarbanes–Oxley Act has been Section 404, which requires that annual reports include an “internal control report” acknowledging management's responsibility to maintain “an adequate internal control structure and procedures for financial reports.” The benefits of Section 404 are evident and substantial, yet the costs are as well. The benefits include more active participation by the board, audit committee, and management in internal controls; increased embedding of control concepts including a better understanding by operating personnel and management of their control responsibilities; improvements in the adequacy of audit trails; and a revival of basic controls such as segregation of duties and reconciliation of accounts that have been eroded as businesses downsized and consolidated.

The cost of initial compliance with Section 404 averaged about \$3 million per company in 2004. That cost included an increase in employee hours, averaging about 26,000, when the SEC had estimated that only 383 staff hours would be required. In addition, companies paid higher fees to auditors, who have the additional Section 404 burden of attesting to the assessment made by management. At one extreme, General Electric estimated it spent \$30 million to comply with Section 404. One study concluded that the total private cost of Section 404 compliance was \$1.4 trillion. Another study found that only 14 percent of firms believed that the benefits of Section 404 exceeded the up-front costs of Section 404 compliance. By 2007, the cost of complying with Section 404 was an average of \$1.7 million for companies with a market capitalization above \$75 million. Nonetheless, Financial Executives International found that 69 percent of financial executives agreed that compliance with SOX Section 404 resulted in more investor confidence in their companies' financial reporting. Fifty percent agreed that financial reports were more accurate.

Go to www.sec.gov/news/testimony/2007/ts121207cc.htm, where you will find the congressional testimony of SEC Chairman Christopher Cox concerning the benefits and costs of SOX Section 404.

Shareholder Proposals In a large public corporation, it is very expensive for a shareholder to solicit proxies in support of a proposal for corporate action that she will offer at a shareholders' meeting. Therefore, she usually asks the management to include her proposal in its proxy statement. SEC Rule 14a-8 covers proposals by shareholders.

Under SEC Rule 14a-8, the corporation must include a shareholder's proposal in its proxy statement if, among other things, the shareholder owns at least 1 percent or \$2,000 of the securities to be voted at the shareholders' meeting. A shareholder may submit only one proposal per meeting. The proposal and its supporting statement may not exceed 500 words.

Under Rule 14a-8, a corporation's management may exclude many types of shareholder proposals from its proxy statement. For example, a proposal is excludable if:

1. The proposal deals with the ordinary business operations of the corporation. For example, Pacific Telesis Group was permitted on this ground to omit a proposal that the board consider adding an environmentalist director and designate a vice president for environmental matters for each subsidiary. However, TRW, Inc., was required to include in its proxy statement a proposal that it establish a shareholder advisory committee that would advise the board of directors on the interests of shareholders.
2. The proposal relates to operations that account for less than 5 percent of a corporation's total assets and is not otherwise significantly related to the company's business. For example, Harsco Corp. could not omit a proposal that it sell its 50 percent interest in a South African firm even though the investment was arguably economically insignificant—only 4.5 percent of net earnings—because the issues raised by the proposal were significantly related to Harsco's business.
3. The proposal requires the issuer to violate a state or federal law. For example, one shareholder asked North American Bank to put a lesbian on the board of directors. The proposal was excludable because it may have required the bank to violate antidiscrimination laws.
4. The proposal relates to a personal claim or grievance. A proposal that the corporation pay the shareholder \$1 million for damages that she suffered from using one of the corporation's products would be excludable.

In addition, Rule 14a-8 prevents a shareholder from submitting a proposal similar to recent proposals that have been overwhelmingly rejected by shareholders in recent years.

Liability Provisions of the 1934 Act

To prevent fraud, deception, or manipulation in securities transactions and to provide remedies to the victims of such practices, Congress included provisions in the 1934 Act that impose liability on persons who engage in wrongful conduct.

Liability for False Statements in Filed Documents

Section 18 is the 1934 Act counterpart to Section 11 of the 1933 Act. Section 18 imposes liability on any person responsible for a false or misleading statement of material fact in any document filed with the SEC under the 1934 Act. (Filed documents include the 10-K report, 8-K report, and proxy statements, but the 10-Q report is not considered filed for Section 18 purposes.) Any person who relies on a false or misleading statement in such a filed document may sue for damages. The purchaser need not prove that the defendant was at fault. Instead, the defendant has a defense that he acted in good faith and had no knowledge that the statement was false or misleading. This defense requires only that the defendant prove that he did not act with scienter.

Section 10(b) and Rule 10b-5

The most important liability section in the 1934 Act is Section 10(b), an extremely broad provision prohibiting the use of any manipulative or deceptive device in contravention of any rules that the SEC prescribes as "necessary or appropriate in the public interest or for the protection of investors." Rule 10b-5 was adopted by the SEC under Section 10(b). The rule states:

It shall be unlawful for any person, directly or indirectly, by use of any means or instrumentality of interstate commerce or of the mails, or of any facility of any national securities exchange,

- (a) to employ any device, scheme, or artifice to defraud,
- (b) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or
- (c) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person, in connection with the purchase or sale of any security.

Rule 10b-5 applies to all transactions in all securities, whether or not registered under the 1933 Act or the 1934 Act.

Elements of a Rule 10b-5 Violation The most important elements of a Rule 10b-5 violation are a misstatement or omission of material fact and scienter. In addition, private persons suing under the rule must be purchasers or sellers of securities who relied on the misstatement or omission.

Misstatement or Omission of Material Fact Rule 10b-5 prohibits only *misstatements or omissions of material fact*. A person **misstates** material facts, for example, when a manager of an unprofitable business induces shareholders to sell their stock to him by stating that the business will fail, although he knows that the business has become potentially profitable.

Liability for an **omission of a material fact** arises when a person fails to disclose material facts when he has a duty to disclose. For example, a securities broker is liable to his customer for not disclosing that he owns the shares that he recommends to the customer. As an agent of the customer, he owes a fiduciary duty to his customer to disclose his conflict of interest. In addition, a person is liable for omitting to tell all of the material facts after he has chosen to disclose some of them. His incomplete disclosure creates the duty to disclose all of the material facts.

Materiality Under Rule 10b-5, the misstated or omitted fact must be **material**. In essence, material information is any information that is likely to have an impact on the price of a security in the market. A fact is material if there is a substantial likelihood that a reasonable investor would consider it important to his decision, that the fact would have assumed actual significance in the deliberations of the reasonable investor, and that the disclosure of the fact would have been viewed by the reasonable investor as having significantly altered the total mix of information made available.

When there is doubt whether an important event will occur, the *Texas Gulf Sulphur*⁵ case holds that materiality of the doubtful event can be determined by “a balancing of both the indicated probability that the event will occur and the anticipated magnitude of the event in light of the totality of the company activity.”

Scienter Under Rule 10b-5, the defendant is not liable unless he acted with **scienter**. Scienter is an intent to deceive, manipulate, or defraud. Scienter includes gross recklessness of the defendant in ascertaining the truth of his statements. Mere negligence is not scienter, but some courts hold that simple recklessness is sufficient proof of scienter.

Other Elements Rule 10b-5 requires that private plaintiffs seeking damages be **actual purchasers or sellers** of securities. Persons who were deterred from purchasing securities by fraudulent statements may not recover lost profits under Rule 10b-5.

Under Rule 10b-5, private plaintiffs alleging damages caused by misstatements by the defendant must prove that they **relied** on the misstatement of material fact. The SEC as plaintiff need not prove reliance. For private plaintiffs, reliance is not usually required in omission cases; the investor need merely prove that the omitted fact was material. In addition, the misstatement or omission must **cause the investor’s loss**.

The following *Carr* case considers whether an investor was entitled to rely on the misstatements of a securities salesman that contradicted a writing disclosing the risks of an investment.

⁵*SEC v. Texas Gulf Sulphur Co.*, 401 F.2d 833 (2d Cir.1968).

Carr v. CIGNA Securities, Inc.

95 F.3d 544 (7th Cir. 1996)

Kenny Carr was a professional basketball player in the National Basketball Association (NBA) when in 1984 he paid CIGNA Securities, Inc., \$450,000 for limited partner interests in two commercial real estate limited partnerships that CIGNA had created. Carr said that the CIGNA salesman told him the limited partnerships were safe, conservative investments. The CIGNA salesman gave Carr documents that disclosed the riskiness of the investment, but Carr did not read or understand them. Carr also said that the salesman “knew that I didn’t understand them. He said they were boilerplate kind of stuff, and breezed through them. He just explained them in his own words. He didn’t say they were contrary to what he had told me. What I understood was what he told me.”

When the commercial real estate market collapsed in the late 1980s, Carr lost his entire investment. Carr sued CIGNA for fraudulently selling securities in violation of Securities Exchange Act Rule 10b-5. The district court dismissed the action, and Carr appealed.

Posner, Chief Judge

We are going to come directly to the merits of the fraud claim. Carr's claim is barred by a very simple, very basic, very sensible principle of the law of fraud. If a literate, competent adult is given a document that in readable and comprehensive prose says X (X might be, "this is a risky investment"), and the person who hands it to him tells him orally, not-X ("this is a safe investment"), our literate, competent adult cannot maintain an action for fraud against the issuer of the document. This principle is necessary to provide sellers of goods and services, including investments, with a safe harbor against groundless, or at least indeterminate, claims of fraud by their customers. Without such a principle, sellers would have no protection against plausible liars and gullible jurors. The sale of risky investments would be itself a very risky enterprise. Risky investments by definition often fizzle. If the documents an investor was given, warning him in capitals and bold face that it was a **RISKY** investment, do not preclude a suit, it will simply be his word against the seller's concerning the content of an unrecorded conversation.

Carr was a fully literate, fully competent adult investing \$450,000, which even to an NBA player is not such chicken feed that a busy person could not realistically be expected to take the time to read a lot of fine-print legal mumbo-jumbo. Carr points out that he was not in 1984 a sophisticated investor, knowledgeable about limited partnerships or commercial real estate. He argues that CIGNA's salesman invited him to repose trust in the salesman's advice and by doing so created a fiduciary relationship. The general rule, however, is that a broker is not the fiduciary of his customer unless the customer entrusts him with discretion to select the customer's investments, which Carr did not do. But it hardly matters. A fiduciary relationship

places on the fiduciary a duty of candor, and concomitantly excuses the principal from having to take the same degree of care that is expected of a participant in an arm's-length contractual relationship. But the fiduciary relationship does not excuse the principal from taking the most elementary precautions against a salesman's pitch, such as the precaution of reading a short and plain statement of what one is buying for one's \$450,000.

We do not say that a written disclaimer provides a safe harbor in every fiduciary case. Not all principals of fiduciaries are competent adults; not all disclaimers are clear; and the relationship may involve such a degree of trust as to dispel any duty of self-protection by the principal. But we are dealing here with a case in which, if there is a fiduciary duty—and probably there is not—it lies at the outer limits of the fiduciary principle. In so attenuated a fiduciary relation, and with so much money at stake, the principal has a duty to read.

Carr points out that CIGNA handed him 427 pages of documents when he bought the shares of the limited partnerships. We agree that it would be unreasonable to expect Carr to pore through 427 pages of legal and accounting mumbo-jumbo looking for nuggets of intelligible warnings. But the subscription agreements for each of the limited partnerships were only eight pages long and rich in lucid warnings, such as: "the Units are speculative investments which involve a high degree of risk of loss by the undersigned of his entire investment in the Partnership."

Professional athletes may be a common prey of financial predators. But their vulnerability does not justify a rule that would have the effect of making financial advisors the guarantors of risky investments.

Judgment for CIGNA affirmed.

Several courts have held that an investor's reliance on the availability of the securities on the market satisfies the reliance requirement of Rule 10b-5 because the securities market is defrauded as to the value of the securities. This **fraud-on-the-market theory** is based on the hypothesis that, in an open and developed securities market, the price of a company's stock is determined by the available material information regarding the company and its business. With the presence of a market, the market is interposed between seller and buyer and, ideally, transmits information to the investor in the processed form of a market price. Thus, the market is performing a substantial part of the valuation process performed by the investor in a face-to-face transaction. The market is acting as the unpaid agent of the investor, informing him

that given all the information available to it, the value of the stock is the same as the market price. Misleading statements will therefore defraud purchasers of stock even if the purchasers do not directly rely on the misstatements and even if the defendants never communicated with the plaintiffs.

In *Basic, Inc. v. Levinson*,⁶ the Supreme Court held that the fraud-on-the-market theory permits a court to presume an investor's reliance merely from the public availability of material misrepresentations. That presumption, however, is rebuttable, such as by evidence that an investor knew the market price was incorrect.

⁶*Basic, Inc. v. Levinson*, 485 U.S. 224 (1988).

For Rule 10b–5 to apply, the wrongful action must be accomplished *by the mails, with any means or instrumentality of interstate commerce, or on a national securities exchange*. This element satisfies the federal jurisdiction requirement. Use of the mails or a telephone within one state has been held to meet this element.

The scope of activities proscribed by Rule 10b–5 is not immediately obvious. While it is easy to understand that actual fraud and price manipulation are covered by the rule, two other areas are less easily mastered—the corporation’s continuous disclosure obligation and insider trading.

Continuous Disclosure Obligation The purpose of the 1934 Act is to ensure that investors have the information they need in order to make intelligent investment decisions at all times. The periodic reporting requirements of the 1934 Act are especially designed to accomplish this result. If important developments arise between the disclosure dates of reports, however, investors will not have all of the information they need to make intelligent decisions unless the corporation discloses the material information immediately. Rule 10b–5 requires a corporation to disclose material information immediately, unless the corporation has a valid business purpose for withholding disclosure. When a corporation chooses to disclose information or to comment on information that it has no duty to disclose, it must do so accurately.

Until 1988, courts had disagreed on whether Rule 10b–5 requires disclosure of merger and other acquisition negotiations prior to an agreement in principle. In *Basic, Inc. v. Levinson*, the Supreme Court of the United States held that materiality of merger negotiations is to be determined on a case-by-case basis. The Court held that materiality depends on the probability that the transaction will be consummated and on its significance to the issuer of the securities. In addition, the Court stated that a corporation that chooses to comment on acquisition negotiations must do so truthfully.

In response to the *Basic* decision, the SEC released guidelines to help public companies decide whether they must disclose merger negotiations. A company is not required to disclose merger negotiations if all three of the following requirements are met:

1. The company did not make any prior disclosures about the merger negotiations,
2. Disclosure is not compelled by other SEC rules.
3. Management determines that disclosure would jeopardize completion of the merger transaction.

Trading on Inside Information One of the greatest destroyers of public confidence in the integrity of the securities market is the belief that insiders can trade securities while possessing corporate information that is not available to the general public.

Rule 10b–5 prohibits **insider trading** on nonpublic corporate information. A person with nonpublic, confidential, inside information may not use that information when trading with a person who does not possess that information. He must either disclose the information before trading or refrain from trading. The difficult task in the insider trading area is determining when a person is subject to this **disclose-or-refrain** rule.

In *United States v. Chiarella*,⁷ the Supreme Court laid down the test for determining an insider’s liability for trading on nonpublic, corporate information:

The duty to disclose arises when one party has information that the other party is entitled to know because of a fiduciary or similar relation of trust and confidence between them. A relationship of trust and confidence exists between the shareholders of a corporation and those insiders who have obtained confidential information by reason of their position with that corporation. This relationship gives rise to a duty to disclose because of the necessity of preventing a corporate insider from taking unfair advantage of the uninformed stockholders.

Under this test, **insiders** include not only officers and directors of the corporation, but also anyone who is *entrusted with corporate information for a corporate purpose*. Insiders include outside consultants, lawyers, independent auditors, engineers, investment bankers, public relations advisers, news reporters, and personnel of government agencies who are given confidential corporate information for a corporate purpose.

Tippees are recipients of inside information (tips) from insiders. Tippees of insiders—such as relatives and friends of insiders, stockbrokers, and security analysts—are forbidden to trade on inside information and are subject to recovery of their profits if they do.

In *Dirks v. SEC*, the Supreme Court stated the applicability of Rule 10b–5 to tippees. The Court held that a tippee has liability if (1) an insider has breached a fiduciary duty of trust and confidence to the shareholders by disclosing to the tippee and (2) the tippee knows or should know of the insider’s breach. In addition, the Court held that an insider has not breached her fiduciary duty to the shareholders unless she has received a personal benefit by disclosing to the tippee. See the Concept Review after the *Dirks* case for a comprehensive explanation of insider and tippee liability.

⁷445 U.S. 222 (U.S. Sup. Ct. 1980).

Dirks v. SEC

463 U.S. 646 (U.S. Sup. Ct. 1983)

On March 6, 1973, Raymond Dirks, a security analyst in a New York brokerage firm, received nonpublic information from Ronald Secrist, a former officer of Equity Funding of America, a seller of life insurance and mutual funds. Secrist alleged that the assets of Equity Funding were vastly overstated as the result of fraudulent corporate practices. He also stated that the SEC and state insurance departments had failed to act on similar charges of fraud made by Equity Funding employees. Secrist urged Dirks to verify the fraud and to disclose it publicly.

Dirks visited Equity Funding's headquarters in Los Angeles and interviewed several officers and employees of the corporation. The senior management denied any wrongdoing, but certain employees corroborated the charges of fraud. Dirks openly discussed the information he had obtained with a number of his clients and investors. Some of these persons sold their holdings of Equity Funding securities.

Dirks urged a Wall Street Journal reporter to write a story on the fraud allegations. The reporter, fearing libel, declined to write the story.

During the two-week period in which Dirks investigated the fraud and spread the word of Secrist's charges, the price of Equity Funding stock fell from \$26 per share to less than \$15 per share. The New York Stock Exchange halted trading in Equity Funding stock on March 27. On that date, Dirks voluntarily presented his information on the fraud to the SEC. Only then did the SEC bring an action for fraud against Equity Funding. Shortly thereafter, California insurance authorities impounded Equity Funding's records and uncovered evidence of the fraud. On April 2, The Wall Street Journal published a front-page story based largely on information assembled by Dirks. Equity Funding immediately went into receivership.

The SEC brought an administrative proceeding against Dirks for violating Rule 10b-5 by passing along confidential inside information to his clients. The SEC found that he had violated Rule 10b-5, but it merely censured him, since he had played an important role in bringing the fraud to light. Dirks appealed to the Court of Appeals, which affirmed the judgment. Dirks then appealed to the Supreme Court.

Powell, Justice

In *U.S. v. Chiarella* (1980), we accepted the two elements set out in *In Re Cady, Roberts*, 40 S.E.C. 907 (1961) for establishing a Rule 10b-5 violation: (i) the existence of a relationship affording access to inside information intended to be available only for a corporate purpose, and (ii) the unfairness of allowing a corporate insider to take advantage of that information by trading without disclosure. The Court found that a duty to disclose under Section 10(b) does not arise from the mere possession of nonpublic market information. Such a duty arises from the existence of a fiduciary relationship.

There can be no duty to disclose when the person who has traded on inside information was not the corporation's agent, was not a fiduciary, or was not a person in whom the sellers of the securities had placed their trust and confidence.

This requirement of a specific relationship between the shareholders and the individual trading on inside information has created analytical difficulties for the SEC and courts in policing tippees who trade on inside information. Unlike insiders who have independent fiduciary duties to both the corporation and its shareholders, the typical tippee has no such relationship. In view of this absence, it has been unclear how a tippee acquires the duty to refrain from trading on inside information.

Not only are insiders forbidden by their fiduciary relationship from personally using undisclosed corporate information to their advantage, but also they may not give such information

to an outsider for the same improper purpose of exploiting the information for their personal gain. The transactions of those who knowingly participate with the fiduciary in such a breach are as forbidden as transactions on behalf of the trustee himself. Thus, the tippee's duty to disclose or abstain is derivative from that of the insider's duty. The tippee's obligation has been viewed as arising from his role as a participant after the fact in the insider's breach of a fiduciary duty.

A tippee assumes a fiduciary duty to the shareholders of a corporation not to trade on material nonpublic information only when the insider has breached his fiduciary duty to the shareholders by disclosing the information to the tippee and the tippee knows or should know that there has been a breach.

In determining whether a tippee is under an obligation to disclose or abstain, it thus is necessary to determine whether the insider's tip constituted a breach of the insider's fiduciary duty. Whether disclosure is a breach of duty therefore depends in large part on the purpose of the disclosure. Thus, the test is whether the insider personally will benefit, directly or indirectly, from his disclosure. Absent some personal gain, there has been no breach of duty to stockholders. And absent a breach by the insider, there is no derivative breach.

This requires courts to focus on objective criteria, i.e., whether the insider receives a direct or indirect personal benefit from the disclosure, such as a pecuniary gain or a reputational benefit that will translate into future earnings. For example, there may be a relationship between the insider and the recipient

that suggests a *quid pro quo* from the latter, or an intention to benefit the particular recipient. The elements of fiduciary duty and exploitation of nonpublic information also exist when an insider makes a gift of confidential information to a relative or friend who trades. The tip and trade resemble trading by the insider himself followed by a gift of the profits to the recipient.

Under the inside-trading and tipping rules set forth above, we find that there was no violation by Dirks. Dirks was a stranger to Equity Funding, with no pre-existing fiduciary duty to its shareholders. He took no action, directly or indirectly, that induced the shareholders or officers of Equity Funding to repose trust or confidence in him. There was no expectation by Dirks's sources that he would keep their information in confidence. Nor did Dirks misappropriate or illegally obtain the information about Equity Funding. Unless the insiders breached their *Cady, Roberts* duty to shareholders in disclosing the nonpublic information to Dirks, he breached no

duty when he passed it on to investors as well as to *The Wall Street Journal*.

It is clear that neither Secrist nor the other Equity Funding employees violated their *Cady, Roberts* duty to the corporation's shareholders by providing information to Dirks. Secrist intended to convey relevant information that management was unlawfully concealing, and he believed that persuading Dirks to investigate was the best way to disclose the fraud. The tippers received no monetary or personal benefit for revealing Equity Funding's secrets, nor was their purpose to make a gift of valuable information to Dirks. The tippers were motivated by a desire to expose the fraud. In the absence of a breach of duty to shareholders by the insiders, there was no derivative breach by Dirks. Dirks therefore could not have been a participant after the fact in an insider's breach of a fiduciary duty.

Judgment reversed in favor of Dirks.

CONCEPT REVIEW

Rule 10b-5 Liability for Trading on Inside Information

| | For Trading by Insider | For Trading by Tippee |
|---------------------------------|---|--|
| Insider-Tipper Liability | Liable if insider breached the fiduciary duty of confidentiality by using corporate information that was entrusted to insider solely for corporate purposes | Liable if insider breached the fiduciary duty of confidentiality (which breach requires that the tipper receive a personal benefit) by disclosing confidential corporate information to the tippee |
| Tippee Liability | Not liable | Liable if: <ol style="list-style-type: none"> 1. Insider-tipper breached the fiduciary duty of confidentiality by disclosing confidential corporate information to the tippee, and 2. The tippee knew or should have known of the insider-tipper's breach of the fiduciary duty of confidentiality |

When is a person a corporate insider?

That is, when does a person owe a fiduciary duty of confidentiality to the corporation?

1. The corporation entrusts corporate information to a person for corporate purposes, and
2. The corporation has a proper business purpose for keeping the information confidential.

When does a person breach the fiduciary duty of confidentiality?

1. When the person uses the entrusted corporate information for his personal benefit, or
2. When the person discloses the entrusted corporate information to someone other than for corporate purposes and the person receives a personal benefit.

When does a person NOT breach the fiduciary duty of confidentiality?

1. When the person discloses the entrusted corporate information to someone who needs the information for corporate purposes.
2. When the person does not receive a personal benefit by disclosing or using the entrusted corporate information.
3. When the corporation does not have a proper business purpose for keeping the information confidential.

In June 1997, the Supreme Court held that Rule 10b–5 liability attaches to anyone who trades in securities for personal profit using confidential information misappropriated in a breach of fiduciary duty owed to the *source of the information*. Under the **misappropriation theory**, a person violates Rule 10b–5 not only when he steals confidential information from his company and trades in its shares, but also, for example, if he steals confidential information about his firm’s intent to make a tender offer for another firm and buys securities of the second firm.

Extent of Liability for Insider Trading Section 20A of the 1934 Act allows persons who traded in the securities at about the same time as the insider or tippee to recover damages from the insider or tippee. Although there may be several persons trading at about the same time, the insider or tippee’s total liability cannot exceed the profit she has made or the loss she has avoided by trading on inside information.

This limitation, which merely requires disgorgement of profits, has been assailed as not adequately deterring insider trading, because the defendant may realize an enormous profit if her trading is not discovered, but lose nothing beyond her profits if it is. In response to this issue of liability, Congress passed an amendment to the 1934

Act permitting the SEC to seek a civil penalty of three times the profit gained or the loss avoided by trading on inside information. This treble penalty is paid to the Treasury of the United States. The penalty applies only to SEC actions; it does not affect the amount of damages that may be recovered by private plaintiffs. The 1934 Act also grants the SEC power to award up to 10 percent of any triple-damage penalty as a bounty to informants who helped the SEC uncover insider trading.

Liability for Aiding and Abetting Persons who are not the primary actors that violate Rule 10b–5 but merely aid and abet another’s violation of the rule nonetheless may be prosecuted by the SEC. To have aiding and abetting liability, there must be (1) a primary violation by another person, (2) the aider and abettor’s knowledge of that violation, and (3) substantial assistance by the aider and abettor in the achievement of the primary violation. Although the SEC may prosecute aiders and abettors, investors harmed by a primary violation may recover their damages only from primary violators, not from aiders and abettors.

In the *Stoneridge* case, the Supreme Court considered whether actors who were aiders and abettors could be liable otherwise under Rule 10b–5.

Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc. 128 S. Ct. 761 (U.S. Sup. Ct. 2008)

Stoneridge Investment Partners, LLC, was a shareholder in Charter Communications, Inc., a television cable service provider. Stoneridge sued Charter for engaging in a variety of fraudulent practices so that its quarterly reports would meet Wall Street expectations for cable subscriber growth and operating cash flow. The fraud included misclassification of its customer base, delayed reporting of terminated customers, improper capitalization of costs that should have been shown as expenses, and manipulation of the company’s billing cutoff dates to inflate reported revenues.

Despite these efforts, in late 2000 Charter executives realized that the company would miss projected operating cash flow numbers by \$15 to \$20 million. To help meet the shortfall, Charter decided to alter its existing arrangements with Scientific-Atlanta and Motorola, which supplied Charter with the digital cable converter boxes that Charter furnished to its customers. Charter arranged to overpay Scientific-Atlanta and Motorola \$20 for each set top box it purchased until the end of the year, with the understanding that Scientific-Atlanta and Motorola would return the overpayment by purchasing advertising from Charter. The transactions, it is alleged, had no economic substance, but because Charter would then record the advertising purchases as revenue and capitalize its purchase of the set top boxes, in violation of generally accepted accounting principles, the transactions would enable Charter to fool its auditor into approving a financial statement showing it met projected revenue and operating cash flow numbers. Scientific-Atlanta and Motorola agreed to the arrangement.

So that Charter’s independent auditor, Arthur Andersen LLP, would not discover the link between Charter’s increased payments for the boxes and the advertising purchases, the companies drafted documents to make it appear the transactions were unrelated and conducted in the ordinary course of business. Following a request from Charter, Scientific-Atlanta sent documents to Charter stating falsely that it had increased production costs. It raised the price for set top boxes for the rest of 2000 by \$20 per box. As for Motorola, in a written contract Charter agreed to purchase from Motorola a specific number of

set top boxes and pay liquidated damages of \$20 for each unit it did not take. The contract was made with the expectation Charter would fail to purchase all the units and pay Motorola the liquidated damages.

To return the additional money from the set top box sales, Scientific-Atlanta and Motorola signed contracts with Charter to purchase advertising time for a price higher than fair value. The new set top box agreements were backdated to make it appear that they were negotiated a month before the advertising agreements. The backdating was important to convey the impression that the negotiations were unconnected, a point Arthur Andersen considered necessary for separate treatment of the transactions. Charter recorded the advertising payments to inflate revenue and operating cash flow by approximately \$17 million. The inflated number was shown on financial statements filed with the Securities and Exchange Commission and reported to the public.

Scientific-Atlanta and Motorola had no role in preparing or disseminating Charter's financial statements. Their own financial statements booked the transactions as a wash, under generally accepted accounting principles.

Nonetheless, Stoneridge filed a securities fraud class action against Scientific-Atlanta and Motorola on behalf of purchasers of Charter stock. Stoneridge alleged that Scientific-Atlanta and Motorola, by entering wash transactions with Charter, violated § 10(b) of the Securities Exchange Act of 1934 and SEC Rule 10b-5, because they knew or were in reckless disregard of Charter's intention to use the transactions to inflate its revenues and knew the resulting financial statements issued by Charter would be relied upon by research analysts and investors.

The district court granted Scientific-Atlanta and Motorola's motion to dismiss for failure to state a claim on which relief can be granted. The court of appeals affirmed on the grounds that the allegations did not show that Scientific-Atlanta and Motorola made misstatements relied upon by the public or that they violated a duty to disclose. At most, the court observed, Scientific-Atlanta and Motorola had aided and abetted Charter's misstatement of its financial results, but, it noted, there is no private right of action for aiding and abetting a § 10(b) violation. Stoneridge asked the United States Supreme Court to grant certiorari and review the decision.

Kennedy, Justice

Decisions of the Courts of Appeals are in conflict respecting when, if ever, an injured investor may rely upon §10(b) to recover from a party that neither makes a public misstatement nor violates a duty to disclose but does participate in a scheme to violate §10(b). Compare *Simpson v. AOL Time Warner Inc.*, 452 F.3d 1040 (9th Cir. 2006), with *Regents of Univ. of Cal. v. Credit Suisse First Boston (USA), Inc.*, 482 F.3d 372 (5th Cir. 2007). We granted certiorari.

Section 10(b) of the Securities Exchange Act makes it "unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce or of the mails, or of any facility of any national securities exchange . . . [t]o use or employ, in connection with the purchase or sale of any security . . . any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors." 15 U.S.C. § 78j. The SEC, pursuant to this section, promulgated Rule 10b-5.

Rule 10b-5 encompasses only conduct already prohibited by §10(b). Though the text of the Securities Exchange Act does not provide for a private cause of action for §10(b) violations, the Court has found a right of action implied in the words of the statute and its implementing regulation. In a typical §10(b) private action a plaintiff must prove (1) a material misrepresentation or omission by the defendant; (2) scienter; (3) a connection between the misrepresentation or omission and the purchase or

sale of a security; (4) reliance upon the misrepresentation or omission; (5) economic loss; and (6) loss causation.

In *Central Bank of Denver, N. A. v. First Interstate Bank of Denver, N. A.*, 511 U.S. 164 (1994), the Court determined that §10(b) liability did not extend to aiders and abettors. The Court found the scope of §10(b) to be delimited by the text, which makes no mention of aiding and abetting liability. The Court doubted the implied §10(b) action should extend to aiders and abettors when none of the express causes of action in the securities acts included that liability. It added the following: "Were we to allow the aiding and abetting action proposed in this case, the defendant could be liable without any showing that the plaintiff relied upon the aider and abettor's statements or actions. Allowing plaintiffs to circumvent the reliance requirement would disregard the careful limits on 10b-5 recovery mandated by our earlier cases." *Central Bank*, at 180.

The decision in *Central Bank* led to calls for Congress to create an express cause of action for aiding and abetting within the Securities Exchange Act. Then-SEC Chairman Arthur Levitt, testifying before the Senate Securities Subcommittee, cited *Central Bank* and recommended that aiding and abetting liability in private claims be established. Congress did not follow this course. Instead, in §104 of the Private Securities Litigation Reform Act of 1995 (PSLRA), it directed prosecution of aiders and abettors by the SEC.

The §10(b) implied private right of action does not extend to aiders and abettors. The conduct of a secondary actor

must satisfy each of the elements or preconditions for liability; and we consider whether the allegations here are sufficient to do so.

The Court of Appeals concluded Stoneridge had not alleged that Scientific-Atlanta and Motorola engaged in a deceptive act within the reach of the §10(b) private right of action, noting that only misstatements, omissions by one who has a duty to disclose, and manipulative trading practices are deceptive within the meaning of the rule. If this conclusion were read to suggest there must be a specific oral or written statement before there could be liability under §10(b) or Rule 10b-5, it would be erroneous. Conduct itself can be deceptive, as Scientific-Atlanta and Motorola concede. In this case, moreover, Scientific-Atlanta's and Motorola's course of conduct included both oral and written statements, such as the backdated contracts agreed to by Charter and Scientific-Atlanta and Motorola.

A different interpretation of the holding from the Court of Appeals opinion is that the court was stating only that any deceptive statement or act Scientific-Atlanta and Motorola made was not actionable because it did not have the requisite proximate relation to the investors' harm. That conclusion is consistent with our own determination that Scientific-Atlanta's and Motorola's acts or statements were not relied upon by the investors and that, as a result, liability cannot be imposed upon Scientific-Atlanta and Motorola.

Reliance by the plaintiff upon the defendant's deceptive acts is an essential element of the §10(b) private cause of action. It ensures that, for liability to arise, the requisite causal connection between a defendant's misrepresentation and a plaintiff's injury exists as a predicate for liability. We have found a rebuttable presumption of reliance in two different circumstances. First, if there is an omission of a material fact by one with a duty to disclose, the investor to whom the duty was owed need not provide specific proof of reliance. Second, under the fraud-on-the-market doctrine, reliance is presumed when the statements at issue become public. The public information is reflected in the market price of the security. Then it can be assumed that an investor who buys or sells stock at the market price relies upon the statement.

Neither presumption applies here. Scientific-Atlanta and Motorola had no duty to disclose; and their deceptive acts were not communicated to the public. No member of the investing public had knowledge, either actual or presumed, of Scientific-Atlanta's and Motorola's deceptive acts during the relevant times. Stoneridge, as a result, cannot show reliance upon any of Scientific-Atlanta's and Motorola's actions except in an indirect chain that we find too remote for liability.

Invoking what some courts call "scheme liability," Stoneridge nonetheless seeks to impose liability on Scientific-Atlanta and Motorola even absent a public statement. In our

view this approach does not answer the objection that Stoneridge did not in fact rely upon Scientific-Atlanta's and Motorola's own deceptive conduct.

Liability is appropriate, Stoneridge contends, because Scientific-Atlanta and Motorola engaged in conduct with the purpose and effect of creating a false appearance of material fact to further a scheme to misrepresent Charter's revenue. The argument is that the financial statement Charter released to the public was a natural and expected consequence of Scientific-Atlanta's and Motorola's deceptive acts; had Scientific-Atlanta and Motorola not assisted Charter, Charter's auditor would not have been fooled, and the financial statement would have been a more accurate reflection of Charter's financial condition.

In effect Stoneridge contends that in an efficient market investors rely not only upon the public statements relating to a security but also upon the transactions those statements reflect. Were this concept of reliance to be adopted, the implied cause of action would reach the whole marketplace in which the issuing company does business; and there is no authority for this rule.

As stated above, reliance is tied to causation, leading to the inquiry whether Scientific-Atlanta's and Motorola's acts were immediate or remote to the injury. In considering Stoneridge's arguments, we note §10(b) provides that the deceptive act must be "in connection with the purchase or sale of any security." Though this phrase in part defines the statute's coverage rather than causation, the emphasis on a purchase or sale of securities does provide some insight into the deceptive acts that concerned the enacting Congress. In all events we conclude Scientific-Atlanta's and Motorola's deceptive acts, which were not disclosed to the investing public, are too remote to satisfy the requirement of reliance. It was Charter, not Scientific-Atlanta and Motorola, that misled its auditor and filed fraudulent financial statements; nothing Scientific-Atlanta and Motorola did made it necessary or inevitable for Charter to record the transactions as it did.

Stoneridge's theory, moreover, would put an unsupportable interpretation on Congress' specific response to *Central Bank* in §104 of the PSLRA. Congress amended the securities laws to provide for limited coverage of aiders and abettors. Aiding and abetting liability is authorized in actions brought by the SEC but not by private parties. Stoneridge's view of primary liability makes any aider and abettor liable under §10(b) if he or she committed a deceptive act in the process of providing assistance. Were we to adopt this construction of §10(b), it would revive in substance the implied cause of action against all aiders and abettors except those who committed no deceptive act in the process of facilitating the fraud; and we would undermine Congress' determination that this class of defendants should be pursued by the SEC and not by private litigants.

The practical consequences of an expansion, which the Court has considered appropriate to examine in circumstances like these, see *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 737, n. 5 (1975), provide a further reason to reject Stoneridge's approach. In *Blue Chip*, the Court noted that extensive discovery and the potential for uncertainty and disruption in a lawsuit allow plaintiffs with weak claims to extort settlements from innocent companies. Adoption of Stoneridge's approach would expose a new class of defendants to these risks. As noted in *Central Bank*, contracting parties might find it necessary to protect against these threats, raising the costs of doing business. Overseas firms with no other exposure to our securities laws could be deterred from doing business here. This, in turn, may raise the cost of being a publicly traded company under our law and shift securities offerings away from domestic capital markets.

The history of the §10(b) private right and the careful approach the Court has taken before proceeding without congressional direction provide further reasons to find no liability here. The §10(b) private cause of action is a judicial construct that Congress did not enact in the text of the relevant statutes. It is settled that there is an implied cause of action only if the underlying statute can be interpreted to disclose the intent to create one. This is for good reason. In the absence of congressional intent the Judiciary's recognition of an implied private right of action necessarily extends its authority to embrace a dispute Congress has not assigned it to resolve. This runs contrary to the established principle that the jurisdiction of the federal courts is carefully guarded against expansion by judicial interpretation and conflicts with the authority of Congress under Art. III to set the limits of federal jurisdiction.

Concerns with the judicial creation of a private cause of action caution against its expansion. The decision to extend the cause of action is for Congress, not for us. Though it remains

the law, the §10(b) private right should not be extended beyond its present boundaries.

Secondary actors are subject to criminal penalties and civil enforcement by the SEC. The enforcement power is not toothless. Since September 30, 2002, SEC enforcement actions have collected over \$10 billion in disgorgement and penalties, much of it for distribution to injured investors. And in this case both parties agree that criminal penalties are a strong deterrent. In addition some state securities laws permit state authorities to seek fines and restitution from aiders and abettors. All secondary actors, furthermore, are not necessarily immune from private suit. The securities statutes provide an express private right of action against accountants and underwriters in certain circumstances and the implied right of action in §10(b) continues to cover secondary actors who commit primary violations. *Central Bank, supra*, at 191.

Here Scientific-Atlanta and Motorola were acting in concert with Charter in the ordinary course as suppliers and, as matters then evolved in the not so ordinary course, as customers. Unconventional as the arrangement was, it took place in the marketplace for goods and services, not in the investment sphere. Charter was free to do as it chose in preparing its books, conferring with its auditor, and preparing and then issuing its financial statements. In these circumstances the investors cannot be said to have relied upon any of Scientific-Atlanta's and Motorola's deceptive acts in the decision to purchase or sell securities; and as the requisite reliance cannot be shown, Scientific-Atlanta and Motorola have no liability to Stoneridge under the implied right of action. This conclusion is consistent with the narrow dimensions we must give to a right of action Congress did not authorize when it first enacted the statute and did not expand when it revisited the law.

Judgment for Scientific-Atlanta affirmed.

Securities Fraud and the Internet In recent years, the Internet has become a new source of securities fraud. In response, the SEC has included the investigation of Internet users in its antifraud arsenal. The SEC has announced that it will use search engines to conduct Internet searches of phrases such as “get high returns with low investment” to detect likely fraud. Some securities professionals have objected to the SEC tactics as an invasion of privacy.

Statute of Limitations A purchaser or seller bringing an action under Rule 10b-5 must file his suit in a timely

fashion or else be precluded from litigating the issue. The Sarbanes-Oxley Act of 2002 extends the statute of limitation by requiring an action under Rule 10b-5 to be commenced within two years after discovery of the facts constituting a violation of Rule 10b-5 and within five years of the violation.

Regulation FD Regulation FD (Fair Disclosure) was passed by the SEC to allow general investors to have more nearly equal access to information that in the past was selectively disclosed to institutional investors and securities analysts. The regulation, which applies

only to public companies, provides that when an issuer or person acting for the issuer discloses material nonpublic information to securities market professionals and holders of the issuer's securities, it must make public disclosure of that information. An *intentional* selective disclosure occurs when the discloser knows or is reckless in not knowing that the information is material and nonpublic. In such a situation, the remedy is that the issuer must make public disclosure simultaneously, that is, at the same time it discloses the information selectively. When the disclosure of material nonpublic information is selective but *nonintentional*, the issuer must make the public disclosure promptly, that is, as soon as reasonably practical after a senior official learns of the disclosure and knows it is material and nonpublic. This must be no later than 24 hours after the selective disclosure or by the commencement of the next day's trading on the NYSE, whichever is later. The required public disclosure may be made by filing or furnishing a Form 8-K or by another method that is reasonably designed to effect broad, nonselective disclosure to the public.

The SEC has taken action against several firms under Regulation FD. Most make the same mistake: a material disclosure from corporate management to a select audience in private conversations or at an invitation-only meeting. In one case, the CEO said in a public conference call that the company had a negative business outlook. Three weeks later, at an invitation-only technology conference, he presented attendees with a positive view of the company's prospects, and the price of its stock immediately rose 20 percent. In fining the company \$250,000, the SEC said the public did not have access to the technology conference and was unable to benefit from the information disclosed there. In another case, the SEC prosecuted one company for making material nonpublic disclosures to securities analysts following one of its investor conferences.

One other case shows the importance of taking quick action when an inadvertent selective disclosure is made. A company's CEO, working from his home, participated in a conference call with a portfolio manager and a salesperson from an investment advisory group. From her office, the company's director of investor relations also took part in the conversation. During the call, the director realized the CEO unwittingly disclosed nonpublic information, but she didn't interrupt him. As soon as the conference call ended, she tried to reach him by telephone but was able to leave him only a

voice-mail message expressing her concern over his inadvertent selective disclosure. Not until an hour later did the CEO get her message. He then asked the other call participants to keep the information confidential, but took no further action. At the time the CEO learned of his disclosure error, he had 24 hours to publicly disseminate the material information. That much time was available because his selective release was unintentional. The next day, however, the CEO intentionally selectively disclosed the material information to analysts without issuing a press release. This intentionally selective disclosure invoked a different part of Regulation FD: it had to be accompanied by a simultaneous public announcement. The company did not meet this requirement, instead issuing a press release three hours later, thus violating the rule. By then its stock had risen nearly 15 percent since the CEO's first nonpublic disclosure.

How can companies comply with Regulations FD? They should

- Establish clear rules for the content of information that may be disclosed.
- Require previews of any material disclosure by a qualified team of executives, such as legal counsel and an investor relations officer.
- Use several mass communications outlets, including submissions to the SEC, press releases, and Internet-based sound and video presentations.
- Adopt procedures for appropriate corrective action as soon as possible after a selective disclosure occurs.

An issuer should adopt absolute rules that provide guidance to its CEO, CFO, and others who regularly communicate with securities analysts and institutional investors. Clear rules can help prevent errors in judgment that can lead to inadvertent violations during an unscripted conference call or presentation. For instance, a company may have a rule that after the CEO gives his outlook on the company earnings in a press release or conference call, the CEO does not update the earnings outlook unless the company finds that the earnings are so far off that another release is required.

As an example of a preview process, consider W. R. Grace & Co., which circulates draft press releases by e-mail to its financial, executive, and legal groups. For Grace, the process consumes only a few hours typically and only a few days when the release is about a complex subject such as quarterly earnings.

Criminal Liability Like the 1933 Act, the 1934 Act provides for liability for criminal violations of the act. Section 32 provides that individuals may be fined up to \$5 million and imprisoned up to 20 years for willful violations of the 1934 Act or the related SEC rules. Businesses may be fined up to \$25 million.

Tender Offer Regulation

Historically, the predominant procedure by which one corporation acquired another was the merger, a transaction requiring the cooperation of the acquired corporation's management. Since the early 1960s, the **tender offer** has become an often used acquisition device. A tender offer is a public offer by a **bidder** to purchase a **subject company's** equity securities directly from its shareholders at a specified price for a fixed period of time. The offering price is usually well above the market price of the shares. Such offers are often made even though there is opposition from the subject company's management. Opposed offers are called hostile tender offers. The legality of efforts opposing a tender offer is covered in Chapter 43.

The Williams Act amendments to the 1934 Act require bidders and subject companies to provide a shareholder with information on which to base his decision whether to sell his shares to a bidder. The aim of the Williams Act is to protect investors and to give the bidder and the subject company equal opportunities to present their cases to the shareholder. The intent is to encourage an auction of the shares with the highest bidder purchasing the shares. The Williams Act applies only when the subject company's equity securities are registered under the 1934 Act.

The Williams Act does not define a tender offer, but the courts have compiled a list of factors to determine whether a person has made a tender offer. The greater the number of people solicited and the lower their investment sophistication, the more likely it is that the bidder will be held to have made a tender offer. Also, the shorter the offering period, the more rigid the price, and the greater the publicity concerning the offer, the more likely it is that the purchase efforts of the bidder will be treated as a tender offer. Given these factors, a person who offers to purchase shares directly from several shareholders at a set price for only a few days risks having a court treat the offer like a tender offer. The Williams Act does not regulate a tender offer unless the bidder intends to become a holder of at least 5 percent of the subject company's shares.

A bidder making a tender offer must file a tender offer statement (Schedule TO) with the SEC when the offer commences. The information in this schedule includes the terms of the offer (for example, the price), the background of the bidder, and the purpose of the tender offer (including whether the bidder intends to control the subject company).

The SEC requires the bidder to keep the tender offer open for at least 20 business days and prohibits any purchase of shares during that time. This rule gives shareholders adequate time to make informed decisions regarding whether to tender their shares. Tendering shareholders may withdraw their tendered shares during the entire term of the offer. This rule allows the highest bidder to buy the shares, as in an auction.

All tender offers, whether made by the issuer or by a third-party bidder, must be made to all holders of the targeted class of shares. When a bidder increases the offering price during the term of the tender offer, all of the shareholders must be paid the higher price even if they tendered their shares at a lower price. If more shares are tendered than the bidder offered to buy, the bidder must prorate its purchases among all of the shares tendered. This proration rule is designed to foster careful shareholder decisions about whether to sell shares. Shareholders might rush to tender their shares if the bidder could accept shares on a first-come, first-served basis.

After an initial offering period has expired, a bidder is permitted to include a "subsequent offering period" during which shareholders who tender will have no withdrawal rights. The SEC created the new offering period to allow shareholders a last opportunity to tender into an offer.

The management of the subject company is required to inform the shareholders of its position on the tender offer, with its reasons, within 10 days after the offer has been made. It must also provide the bidder with a list of the holders of the equity securities that the bidder seeks to acquire or mail the materials for the bidder.

SEC Rule 14e-3 prohibits persons who have knowledge of an impending tender offer from using such information prior to its public disclosure. The rule limits insider trading in the tender offer context.

Private Acquisitions of Shares The Williams Act regulates private acquisitions of shares differently from tender offers. When the bidder privately

seeks a controlling block of the subject company's shares on a stock exchange or in face-to-face negotiations with only a few shareholders, no advance notice to the SEC or disclosure to shareholders is required. However, a person making a private acquisition is required to file a Schedule 13D with the SEC and to send a copy to the subject company within 10 days after he becomes a holder of 5 percent of its shares. A Schedule 13G (which requires less disclosure than a 13D) must be filed when a 5 percent holder has purchased no

more than 2 percent of the shares within the past 12 months.

State Regulation of Tender Offers

Statutes that apply to tender offers have been enacted by about two-thirds of the states. State statutes have become highly protective of subject companies. For example, the Indiana statute gives shareholders other than the bidder the right to determine whether the shares acquired by the bidder may be voted in directors' elections

The Global Business Environment

The Foreign Corrupt Practices Act

The Foreign Corrupt Practices Act (FCPA) was passed by Congress in 1977 as an amendment to the Securities Exchange Act of 1934. Its passage followed discoveries that more than 400 American corporations had given bribes or made other improper or questionable payments in connection with business abroad and within the United States. Many of these payments were bribes to high level officials of foreign governments for the purpose of obtaining contracts for the sale of goods or services. Officers of the companies that had made the payments argued that such payments were customary and necessary in business transactions in many countries. This argument was pressed forcefully with regard to facilitating payments. Such payments were said to be essential to get lower level government officials in a number of countries to perform their nondiscretionary or ministerial tasks, such as preparing or approving necessary import or export documents.

In a significant number of cases, bribes had been accounted for as commission payments, as normal transactions with foreign subsidiaries, or as payments for services rendered by professionals or other firms, or had in other ways been made to appear as normal business expenses. These bribes were then illegally deducted as normal business expenses in income tax returns filed with the Internal Revenue Service.

The Payments Prohibition

The FCPA makes it a crime for any American firm—whether or not it has securities registered under the 1934 Act—to offer, promise, or make payments or gifts of anything of value to foreign officials and certain others. Payments are prohibited if the person making the payment knows or should know that some or all of it will be used for the purpose of influencing a governmental decision, even if the offer is not accepted or

the promise is not carried out. The FCPA prohibits offers or payments to foreign political parties and candidates for office as well as offers and payments to government officials. Payments of kickbacks to foreign businesses and their officers are not prohibited unless it is known or should be known that these payments will be passed on to government officials or other illegal recipients.

Facilitating or grease payments are not prohibited by the FCPA. For example, suppose a corporation applies for a radio license in Italy and makes a payment to the government official who issues the licenses. If the official grants licenses to every applicant and the payment merely speeds up the processing of the application, the FCPA is not violated.

Substantial penalties for violations may be imposed. A company may be fined up to \$2 million. Directors, officers, employees, or agents participating in violations are liable for fines of up to \$100,000 and prison terms of up to five years.

Record-Keeping and Internal Controls Requirements

The FCPA also establishes record-keeping and internal control requirements for firms subject to the periodic disclosure provisions of the Securities Exchange Act of 1934. The purpose of such controls is to prevent unauthorized payments and transactions and unauthorized access to company assets that may result in illegal payments.

The FCPA requires the making and keeping of records and accounts “which, in reasonable detail, accurately, and fairly reflect the transactions and dispositions of the assets of the issuer” of securities. It also requires the establishment and maintenance of a system of internal accounting controls that provides “reasonable assurances” that the firm's transactions are executed in accordance with management's authorization and that the firm's assets are used or disposed of only as authorized by management.

and other matters. The statute, which essentially gives a subject company the power to require shareholder approval of a hostile tender offer, has been copied by several states.

Other states, such as Delaware, have adopted business combination moratorium statutes. These statutes delay the effectuation of a merger of the corporation with a shareholder owning a large percentage of shares (such as 15 percent) unless the board of directors' approval is obtained. Because the typical large shareholder in a public company is a bidder who has made a tender offer, these state statutes primarily affect the ability of a bidder to effectuate a merger after a tender offer and, therefore, may have the effect of deterring hostile acquisitions.

State Securities Law

State securities laws are frequently referred to as blue-sky laws, since the early state securities statutes were designed to protect investors from promoters and security salespersons who would “sell building lots in the blue sky.” The first state to enact a securities law was Kansas, in 1911. All of the states now have such legislation.

The National Conference of Commissioners on Uniform State Laws has adopted the Uniform Securities Act of 1956. The act contains antifraud provisions, requires the registration of securities, and demands broker-dealer registration. About two-thirds of the states have adopted the act, but many states have made significant changes in it.

All of the state securities statutes provide penalties for fraudulent sales and permit the issuance of injunctions to protect investors from additional or anticipated fraudulent acts. Most of the statutes grant broad power to investigate fraud to some state official—usually the attorney general or his appointee as securities administrator. All of the statutes provide criminal penalties for selling fraudulent securities and conducting fraudulent transactions.

Registration of Securities Most of the state securities statutes adopt the philosophy of the 1933 Act that informed investors can make intelligent investment decisions. The states with such statutes have a registration scheme much like the 1933 Act, with required disclosures for public offerings and exemptions from registration for small and private offerings. Other states reject the contention that investors with full information can make intelligent investment decisions. The securities statutes in these states have a **merit registration** requirement, giving a securities administrator power to deny registration on the merits of the security and its issuer. Only securities that are not unduly risky and promise an adequate return to investors may receive administrator approval.

All state statutes have a limited number of exemptions from registration. Most statutes have private offering exemptions that are similar to Securities Act Rule 506 of Regulation D. In addition, a person may avoid the registration requirements of state securities laws by not offering or selling securities.

Registration by Coordination The Uniform Securities Act permits an issuer to register its securities by coordination. Instead of filing a registration statement under the Securities Act of 1933 and a different one as required by state law, registration by coordination allows an issuer to file the 1933 Act registration statement with the state securities administrator. Registration by coordination decreases an issuer's expense of complying with state law when making an interstate offering of its securities.

Capital Markets Efficiency Act of 1996 Congress passed the Capital Markets Efficiency Act (CMEA) to facilitate offerings of securities by small investors. The CMEA preempts state registration of offers and sales of securities to “qualified purchasers,” as defined by the SEC, as well as offerings exempt under Rule 506 of Regulation D. An issuance of securities listed on the New York Stock Exchange or NASDAQ is also exempted from state registration provisions. Nonetheless, states may apply their antifraud laws despite the preemption of their registration provisions.

LOG ON

Many state securities commissioners maintain Web sites that warn investors of risky or fraudulent securities. Visit the Ohio Division of Securities Web site. Click on links under “Alerts” to see examples of investor warnings.

Problems and Problem Cases

1. A viatical settlement is a contract by which an investor purchases the life insurance policy of a terminally ill patient—typically an AIDS victim—who is in need of immediate cash to pay mounting medical expenses. Depending on the insured's life expectancy, the buyer pays 60 to 80 percent of the death benefit. When the insured dies, the investor receives the death benefit. The investor's profit is the difference between the death benefit collected from the insurer and the discounted purchase price paid to the insured, less insurance premiums paid by the investor. Life Partners, Inc. (LPI), acts as a middleman between the insured and investors. LPI assembles the purchasers of each insurance policy, selling fractional interests to investors for as little as \$650. Individual investors may receive as little as 3 percent of the death benefits of a policy. The investors become owners of the insurance policy. After the purchase, LPI monitors the insured's health, makes sure the policy does not lapse, collects on the policy when the insured dies, and disburses the proceeds to the investors. Is LPI selling a security?
2. Mickie Wenwoods, an outstanding collegiate golfer, graduates from college and decides to turn professional. To finance her effort to qualify for the LPGA Tour and to cover the cost of travel, housing, food, and a caddy, Wenwoods asks 20 of her family friends to contribute \$10,000 each to her efforts. In return for their contributions, each friend will receive 1 percent of Wenwoods's revenues from her golfing efforts, including tournament prize money and endorsement fees from sponsors, less Wenwoods's expenses. Whether Wenwoods is able to generate revenue is dependent on how well she plays in golf tournaments and whether she is able to convince sponsors to sign her as an endorser. Wenwoods will also determine the amount of her expenses for travel, food, housing, and a caddy. Is Wenwoods selling a security when she asks for contributions from her friends?
3. AltaVerba, Inc., is a nonpublic company controlled by its majority shareholder, Robyn Streef. AltaVerba wants to make an initial public offering by selling 300 million Class B common shares in a firm commitment underwriting, with Goldman Sachs acting as the lead underwriter. AltaVerba is not a public company required to file periodic reports with the SEC under the Securities Exchange Act of 1934. AltaVerba and Goldman are considering the communications they may have with existing and prospective investors and securities analysts before and during the registered offering and comply with Section 5 of the Securities Act of 1933. Seventy-two days before the 1933 Act registration statement will be filed with the SEC, AltaVerba wants to release historical information about its business and financial results. What are the restrictions on the release of such information at that time? Twenty-three days before the 1933 Act registration statement will be filed with the SEC, AltaVerba wants to release forward-looking information about its business and financial results. May AltaVerba do that? After the registration statement has been filed with the SEC, Streef and AltaVerba's vice president of finance want to speak on the phone about the issuance with an investment manager of Fidelity Magellan Fund. Is that communication legal at that time? At the same time, AltaVerba and Goldman want to conduct a road show in five cities. Selected very wealthy investors, securities analysts, and mutual fund managers will attend the road show in person. Under what conditions may AltaVerba and Goldman conduct a legal road show? After the registration statement has been declared effective by the SEC, AltaVerba wants to use a free-writing prospectus that includes historical and forward-looking information about AltaVerba. What conditions must the free-writing prospectus meet to be legal under Section 5?
4. EMG, Corp., a public corporation, decides to enter the Internet marketing business by creating a subsidiary corporation, GME, Inc., that will be 51 percent owned by EMG and 49 percent owned by other investors. The plan is that GME will not be not a public corporation required to file periodic reports with the Securities and Exchange Commission under the Securities Exchange Act of 1934. GME plans to sell 100 million shares for \$20 each to EMG and to the following investors:
 - An investor who has annual income of \$4,080,000 and a net worth of \$12,200,000.
 - GME's chief operations officer, whose annual income is \$175,000 and net worth is \$350,000.
 - A pension fund established for EMG's employees.
 - 14 mutual funds, each of which has assets exceeding \$20 billion.

GME wants to sell its common shares to the above investors in an exemption from the registration requirements of the Securities Act of 1933 under Rule 506. Is the \$2 billion amount of the offering too large for Rule 506? Is the number of purchasers a problem under Rule 506? Are the listed investors qualified purchasers under Rule 506? Under Rule 506, for how long must GME restrict the purchasers' resales of the common shares? If GME is unsure whether the offering it proposes meets the requirements of Rule 506, what document should GME request from the staff of the SEC?

5. Real Options, Inc. (ROI), is a company not required to provide periodic reports to investors under the Securities Exchange Act of 1934. ROI wants to raise \$700,000 by selling preferred shares to 150 investors, including its customers, suppliers, and employees. Is ROI eligible to make the offering under Rule 504 of the Securities Act of 1933? What must ROI do to comply with Rule 504?
6. Podcast Services Company is incorporated in Illinois. It has 200 employees that work in an office building leased by Podcast in Alton, Illinois. Most of Podcast's employees reside in Illinois, but a few reside in Missouri near St. Louis. All of Podcast's assets are in Illinois. It sells its services to clients in 20 states. About 35 percent of its business is conducted with clients in Missouri in the St. Louis area. Podcast wants to sell debentures to its employees, the proceeds of which will be used to purchase the building Podcast currently leases in Alton. May Podcast make the offering in compliance with Securities Act Rule 147? What must Podcast do to comply with Rule 147?
7. Commonwealth Edison Co. registered 3 million common shares with the SEC and sold the shares for about \$28 per share. The price of the purchasers' stock dropped to \$21 when the Atomic Safety and Licensing Board denied ComEd's application to license one of its reactors. It was the first and only time the Board had denied a license application. ComEd assumed that the license would be granted; therefore, its registration statement failed to disclose the pendency of the license application. Did ComEd violate Section 11 of the Securities Act?
8. Joseph Crotty was a vice president of United Artists Communications, Inc. (UA), a corporation with equity securities registered under the Securities Exchange Act of 1934. Crotty was the head film buyer of UA's western division. He had virtually complete and autonomous control of film buying for the 351 UA theaters in the western United States, including negotiating and signing movie acquisition agreements, supervising movie distribution, and settling contracts after the movies had been shown. Crotty knew how many contracts were being negotiated at any one time and the price UA was paying for the rental of each movie. Crotty was required to consult with higher officers only if he wanted to exceed a certain limit on the amount of the cash advance paid to a distributor for a movie. This occurred no more than two or three times a year. The gross revenue from Crotty's division was about 35 percent of UA's gross revenue from movie exhibitions and around 17 percent of its total gross revenue. During a six-month period, Crotty purchased 7,500 shares of UA and sold 3,500 shares, realizing a large profit. Has Crotty violated Section 16(b) of the 1934 Act?
9. Shareholders of General Electric Company have asked the board of directors to include several shareholder proposals in its annual proxy statement. One proposal is that GE's articles of incorporation be amended to provide that shareholders will elect directors by cumulative voting of their shares. A second proposal asks that no GE director be permitted to serve on more than three corporate boards of directors, including GE's board. A third proposal asks GE to prepare a report outlining the vulnerability and substantial radiation risks of storage of irradiated fuel rods at all GE-designed nuclear reactor sites. May GE omit these shareholder proposals from its proxy statement under Rule 14a-8?
10. Michael Broudo and other investors purchased stock in Dura Pharmaceuticals, Inc., on the public securities market between April 15, 1997, and February 24, 1998. During this period, they allege that Dura or its officers made false statements concerning both Dura's drug profits and future Food and Drug Administration approval of a new asthmatic spray device. They also allege that Dura falsely claimed that it expected that its drug sales would prove profitable. Regarding the asthmatic spray device, they allege Dura falsely claimed that it expected the FDA

would soon grant its approval. On February 24, 1998, Dura announced that its earnings would be lower than expected, principally due to slow drug sales. The next day Dura's shares lost almost half their value falling from about \$39 per share to about \$21. Eight months later in November 1998, Dura announced that the FDA would not approve Dura's new asthmatic spray device. Soon after, Broudo and the other investors sued Dura and its officers under Rule 10b-5 of the Securities Exchange Act of 1934. In their complaint, they stated that in reliance on the integrity of the market, they paid artificially inflated prices for Dura securities and suffered damages. They did not specify or attempt to calculate the amount of damages caused by the alleged misstatements made by Dura. Dura defended on the grounds that Broudo and the other investors failed adequately to allege loss causation. Did the U.S. Supreme Court agree with Dura?

11. The managements of Combustion Engineering, Inc. (CEI), and Basic, Inc., entered negotiations regarding CEI's acquiring Basic. Despite the secrecy of the merger negotiations, there were repeated instances of abnormal trading in Basic's shares, with trading volume rising from 7,000 per day to 29,000. Basic issued a public statement that "the company knew no reason for the stock's activity and that no negotiations were under way with any company for a merger." Did Basic's statement violate Securities Exchange Act Rule 10b-5?
12. When he was the Oklahoma Sooner football coach, Barry Switzer attended a track meet, where he spoke with friends and acquaintances, including G. Platt, a director of Phoenix Corporation and chief executive officer of Texas International Company (TIC), a business that sponsored Switzer's coach's television show. TIC owned more than 50 percent of Phoenix's shares. Switzer moved around the bleachers at the track meet in order to talk to various people. After speaking with Platt and his wife, Linda, for the last of five times, Switzer lay down to sunbathe on a row of bleachers behind the Platts. G. Platt, unaware that Switzer was behind him, carelessly spoke too loud while talking with his wife about his desire to sell or liquidate Phoenix. He also talked about several companies making bids to buy Phoenix. Switzer also overheard that an announcement of a possible liquidation of Phoenix might be made within a week.
13. Switzer used the information he obtained in deciding to purchase Phoenix shares. Did Switzer trade illegally on inside information?
13. First City Financial Corp., a Canadian company controlled by the Belzberg family, was engaged in the business of investing in publicly held American corporations. Marc Belzberg identified Ashland Oil Company as a potential target, and on February 11, 1986, he secretly purchased 61,000 shares of Ashland stock for First City. By February 26, additional secret purchases of Ashland shares pushed First City's holdings to just over 4.9 percent of Ashland's stock. These last two purchases were effected for First City by Alan "Ace" Greenberg, the chief executive officer of Bear Stearns, a large Wall Street brokerage. On March 4, Belzberg called Greenberg and told him, "It wouldn't be a bad idea if you bought Ashland Oil here." Immediately after the phone call, Greenberg purchased 20,500 Ashland shares for about \$44 per share. If purchased for First City, those shares would have increased First City's Ashland holdings above 5 percent. Greenberg believed he was buying the shares for First City under a put and call agreement, under which First City had the right to buy the shares from Bear Stearns and Bear Stearns had the right to require First City to buy the shares from it. Between March 4 and 14, Greenberg purchased an additional 330,700 shares. On March 17, First City and Bear Stearns signed a formal put and call agreement covering all the shares Greenberg purchased. On March 25, First City announced publicly for the first time that it intended to make a tender offer for all of Ashland's shares. First City filed a Schedule 13D on March 26. Has First City violated the Williams Act?
14. Amenity, Inc., was incorporated with 1 million authorized shares, which were issued to Capital General Corporation (CGC) for \$2,000. CGC distributed 90,000 of those shares to about 900 of its clients, business associates, and other contacts to create and maintain goodwill among its clients and contacts. CGC did not receive any monetary or other direct financial consideration from those receiving the stock. Amenity had no actual business function at this time, and its sole asset was the \$2,000 CGC had paid for the 1 million shares. Through CGC's efforts, Amenity was acquired by another company,

which paid CGC \$25,000 for its efforts. The Utah Securities Division sought to suspend the public trading of Amenity stock on the grounds that when CGC distributed the shares it had sold them in violation of the Utah Securities Act. Was CGC's distribution a sale of securities?

Online Research

Internet Offerings of Securities

Using the term *Internet Securities Offerings*, you can find several Web sites and publications that explain how an issuer may make an Internet offering of securities without violating state or federal securities law. These resources can help you answer the following questions:

- Why will an Internet offering create problems if the issuer is trying to exempt the offering under Rules 505 or 506?
- Why are Rule 504 and Regulation A good exemptions for Internet offerings?
- What are the dos and don'ts for communications during an Internet registered offering?

chapter 46

LEGAL AND PROFESSIONAL RESPONSIBILITIES OF AUDITORS, CONSULTANTS, AND SECURITIES PROFESSIONALS

Credit Deutsch First Chicago LLP (CDFC) is a financial consulting and investment banking firm. Angst & Yearn LLP (A&Y) is a public accounting firm. A client of both firms is Macrohard Corporation, a public issuer of securities required to file periodic reports with the Securities and Exchange Commission under the Securities Exchange Act of 1934. Because Macrohard has a short-term cash flow problem due to a downturn in the economy, CDFC advises Macrohard to issue 300 promissory notes, each with a face value of \$10,000,000, interest of 9 percent, and a due date 11 months after issuance. CDFC recommends that the notes be sold to mutual funds, insurance companies, pension funds, and other institutional investors using the Rule 506 exemption from registration under the Securities Act of 1933.

The notes are offered in part by an offering circular, which includes financial statements audited by A&Y. A&Y's unqualified audit opinion is also included in the offering circular. A&Y receives a \$6,500,000 fee for auditing Macrohard's financial statements and reviewing the financial statements for inclusion in the offering circular.

CDFC assists Macrohard with the offering of the notes by calling prospective investors on the phone, visiting investors in person, and sending e-mails to prospective investors urging them to buy the notes. In all three contacts, CDFC emphasizes that the notes carry an interest rate that is 3 percent higher than the 30-year Treasury bond rate and, therefore, offer an excellent return on investment. As compensation for its role in the notes offering, CDFC will receive 0.5 percent of the proceeds from the sale of the notes.

- What standard of care must CDFC meet when recommending that Macrohard issue promissory notes as a solution to its liquidity problems?
- If one of CDFC's managing partners during the course of the offering negligently makes false statements about Macrohard's financial position to purchasers of the notes, does CDFC have potential liability to the purchasers under Section 12(a)(2) of the Securities Act of 1933? Especially consider whether CDFC is a proper type of defendant under that section.
- Is CDFC a proper type of defendant under Rule 10b-5 of the Securities Exchange Act of 1934 due to its communications with purchasers, if one of its partners negligently makes false statements?
- Should A&Y fear liability to the note purchasers under Section 12(a)(2) of the 1933 Act?
- If A&Y negligently audited Macrohard's financial statements and as a result the financial statements materially misstate Macrohard's financial position, does A&Y have potential liability to the purchasers under Rule 10b-5 of the 1934 Act? Especially consider whether A&Y is a proper type of defendant under that rule.

- Does CDFC have potential liability to any of the note purchasers under the state law of negligent misrepresentation in a state that has adopted the *Ultramares* test?
- If A&Y knows that the audited financial statements will be used in the offering circular to sell the notes, but it does not know to which institutional investors the notes will be sold, does A&Y have potential liability to any of the note purchasers under the state law of negligent misrepresentation in a state that adopted the *Ultramares* test? How about a state that has adopted the rule of the *Restatement (Second) of Torts*?

Suppose that instead of making a Rule 506 offering, Macrohard issues preferred stock in a public offering registered under the 1933 Act. CDFC is Macrohard's underwriter for the public offering, receiving a 25-cent spread for each share sold. The financial statements audited by A&Y and its audit opinion are included in the registration statement. Unknown to CDFC and A&Y, there are material misstatements of fact in the financial statements included in the registration statement, and there are also omissions of material facts in the portions of the registration statement that describe Macrohard's business and the material risks of investing in the preferred stock.

- Is CDFC a statutory defendant under Section 11 of the 1933 Act? For what portions of the registration statement is CDFC liable under Section 11? What is CDFC's due diligence defense for errors in the financial statements audited by A&Y? What is CDFC's due diligence defense for errors in the portions of the registration statement that describe Macrohard's business and material risks?
- Is A&Y a statutory defendant under Section 11 of the 1933 Act? For what portions of the registration statement is A&Y liable under Section 11? What is A&Y's due diligence defense?
- Compile a checklist that will help CDFC and A&Y meet their due diligence defenses under Section 11.

Each year, many accounting and finance students choose to become CPAs and seek jobs as auditors of public companies. Many students, however, opt for positions in consulting and other fields connected to the securities industry. Therefore, this chapter covers the legal responsibilities of not only accountants and auditors, but also consultants and securities professionals. The chapter's primary focus is on auditors of financial statements, tax accountants, consultants who provide management and financial advice to clients, investment bankers, securities underwriters, securities analysts, and securities brokers.

This chapter will first cover the general standard of performance required of professionals. Next, we will study professionals' liability to their clients, especially under state law. The largest part of this chapter comprises liability to nonclient third parties. We will also examine criminal liability of professionals and end the chapter with coverage of the law protecting the integrity of communications between professionals and their clients.

General Standard of Performance

The general duty that auditors, consultants, and securities professionals owe to their clients and to other

persons who are affected by their actions is to exercise the skill and care of the ordinarily prudent professional in the same circumstances. Hence, professionals must act carefully and diligently; they are *not* guarantors of the accuracy of their work or that the advice they give to clients will work out well. The professional's duty to exercise reasonable care is a subset of the negligence standard of tort law. Two elements compose the general duty of performance: skill and care.

A professional must have the **skill of the ordinarily prudent person in her profession**. This element focuses on education or knowledge, whether acquired formally at school or by self-instruction. For example, to audit financial records, an accountant must know generally accepted auditing standards (GAAS) and generally accepted accounting principles (GAAP). GAAS and GAAP are standards and principles embodied in the rules, releases, and pronouncements of the Securities and Exchange Commission, the American Institute of Certified Public Accountants (AICPA), the Financial Accounting Standards Board (FASB), the Public Company Accounting Oversight Board (PCAOB), and the International Accounting Standards Board (IASB). To assist a corporate client's development of an expansion strategy, a consultant must be knowledgeable of similar

businesses and the opportunities for expansion. To assist a securities issuer making an initial public offering (IPO), an investment banker must know the mechanics of a public offering and the market for securities. In recommending stocks to an investor, a broker or investment adviser must know fundamental investment analysis and portfolio theory.

The care element requires a professional to act **as carefully as the ordinarily prudent person in her profession**. For example, in preparing a tax return, a tax accountant must discover the income exclusions, the deductions, and the tax credits that the reasonably careful accountant would find are available to the client. When recommending a corporate acquisition to a client, an investment banker must investigate the value of the acquired firm and check the acquired firm's fit with the business and strategy of the acquiring firm. A broker recommending a security to his customer must carefully investigate the security and its fit with the customer's investment goals, securities portfolio, and financial status.

Courts and legislatures usually defer to the members of a profession in determining what the ordinarily prudent professional would do. Such deference recognizes the lawmakers' lack of understanding of the nuances of professional practice. However, a profession will not be permitted to establish a standard of conduct that is harmful to the interests of clients or other members of society.

Professionals' Liability to Clients

Professionals are sometimes sued by their clients. For example, an accountant may wrongfully claim deductions on a client's tax return. When the IRS discovers the wrongful deduction, the individual will have to pay the extra tax, interest, and perhaps a penalty. The individual may sue his accountant to recover the amount of the penalty. For another example, consider a securities broker who churns the securities account of a 92-year-old investor by executing daily trades in risky Internet stocks. When the value of the investor's portfolio declines from \$500,000 to near zero as high commissions and capital losses mount, the investor may sue the broker for making imprudent investment decisions and for churning the account merely to earn the commissions.

When clients sue professionals, there are three principal bases of liability: contract, tort, and trust.

Contractual Liability As a party to a contract with her client, a professional owes a duty to the client to perform as she has agreed to perform. This includes an implied duty to perform the contract as the ordinarily prudent person in the profession would perform it. If the professional fails to perform as agreed, ordinarily she is

Ethics in Action

Public Company Accounting Oversight Board

One of the main features of the Sarbanes–Oxley Act (SOX) is the creation of an independent board that oversees the audits of public companies. Congress's perception was that auditing firms were not sufficiently independent of the public companies they audited due in part to the audit firms' receiving sizable nonaudit consulting fees from their audit clients. Thus, SOX created a Public Company Accounting Oversight Board (PCAOB). Public accounting firms that audit financial statements of public companies are required to register with PCAOB and submit to its rules. The board is charged with adopting rules establishing auditing, quality control, ethics, and independence standards. It has the power to regulate the nonaudit services that audit firms may perform for their clients. The PCAOB has the power to inspect periodically public accounting firms and to issue reports of the results of the reviews. The purpose of inspections is to assess the degree of compliance with the requirements of SOX,

professional auditing standards, and the rules of the PCAOB and the SEC in the performance of audits and the issuance of audit reports of public companies. In addition, the PCAOB may investigate and discipline audit firms and their partners and employees.

The PCAOB is not a federal agency, but a nonprofit corporation with broad regulatory power like the National Association of Securities Dealers, a self-regulatory organization that regulates securities brokers and dealers. It has five members, only two of which may be CPAs. No board member may receive any share of profits or compensation from a public accounting firm.

- Do you think that the creation and work of the PCAOB results in greater independence of auditors of public companies?
- If auditing of financial statements is required primarily for the protection of public investors, should not all PCAOB members be taken from the investment community that uses audited financial statements?

The Global Business Environment

U.S. Moving to International Accounting Standards?

In 2008, the SEC announced that it would consider requiring American companies to comply with international accounting standards adopted by the International Accounting Standards Board (IASB). The SEC proposal is designed to move the world to one set of accounting standards and, thereby, permit investors to compare more easily companies operating in differing parts of the world. The proposal, it is claimed, would also make it easier for companies to raise capital by allowing them to sell securities in securities markets anywhere in the world.

Under the SEC proposal, a small number of very large American firms (about 110) would be permitted to use international accounting standards in 2010. The SEC would

require large American companies to move to the international standards in 2014 with small companies making the move in either 2015 or 2016.

- From time to time, the SEC has exercised its power to block an accounting standard issued by the FASB when it deems inappropriate the treatment required or permitted by the rule. Do you think the SEC will exercise the same power when it views as wrong an IASB standard?
- Under the Securities Exchange Act of 1934, the SEC has the power to set accounting standards for U.S. public companies. Do you think the SEC abdicated its responsibility by allowing the FASB today and the IASB in the future to set American accounting standards? Whom do you trust more to adopt reasonable accounting standards: the SEC, the FASB, or the IASB?

liable only for compensatory damages and those consequential damages that are contemplated by the client and the professional at the time the contract was made, such as the client's cost of hiring another consultant or auditor to complete the work. For example, an auditor agrees to provide audited financial statements for inclusion in a client's bank loan application. The loan will be used to expand the client's business. When the auditor fails to complete the audit on time, the auditor will not ordinarily be liable for the client's lost profits from the unexecuted expansion, unless the auditor had agreed to be liable for such lost profits.

A professional is not liable for breach of contract if the client obstructs the performance of the contract. For example, an investment banker is not liable for failing to make a timely public offering of a client's securities if the client delays giving the investment banker the information it needs to complete the securities offering registration statement.

A professional may not delegate his duty to perform a contract without the consent of the client. Delegation is not permitted because the performance of a contract for professional services depends on the skill, training, and character of the professional. For example, PricewaterhouseCoopers, a public accounting firm, may not delegate to Ernst & Young, another public accounting firm, the contractual duty to audit the financial statements of Apple Inc., even though both firms are nearly equally skillful and careful.

Tort Liability Professionals' tort liability to their clients may be based on the common law concepts of

negligence and fraud or on the violation of a statute, including the federal and state securities laws.

Negligence The essence of negligence is the failure of a professional to exercise the skill and care of the ordinarily prudent person in the profession. A professional is negligent when he breaches the duty to act skillfully and carefully and proximately causes damages to the client. For example, a corporate client may recover from an investment banker when the client overpays for an acquired firm due to the investment banker's careless valuation of the acquired firm.

Under the **suitability** and **know-your-customer rules** of the NASD and stock exchanges, a securities broker is required to know the financial circumstances and investment objectives of his client before recommending securities or executing securities transactions for the client. A broker who does not know his customer is negligent and may be liable for losses from securities transactions that are inappropriate for the client. A broker that warns a client of the risks and inappropriateness of an investment has met his duty and is not liable, for example, to a client that disregards the risk and authorizes trading in the risky investment. The suitability and know-your-customer rules may also justify a client's action on *contract* grounds when the customer signs an account agreement that requires a broker to handle the account in accordance with industry standards.

See *Millan v. Dean Witter Reynolds* on page 925 of Chapter 36 for a case in which a securities brokerage was held liable to its client for negligence and gross negligence.

Audit Duties Audit engagements are a unique area of professional liability. Sometimes, an accountant will audit a company, yet fail to uncover fraud, embezzlement, or other intentional wrongdoing by an employee of the company. Ordinarily, an accountant has no specific duty to uncover employee fraud or embezzlement. Nonetheless, an accountant must uncover employee fraud or embezzlement if an ordinarily prudent accountant would have discovered it. The accountant who fails to uncover such fraud or embezzlement is negligent and liable to his client. In addition, an accountant owes a duty to investigate suspicious circumstances that tend to indicate fraud, regardless of how he became aware of those circumstances. Also, an accountant has a duty to inform a proper party of his suspicions. It is *not enough* to inform or confront the person suspected of fraud.

When an accountant is hired to perform a fraud audit to investigate suspected fraud or embezzlement, she has a greater duty to investigate. She must be as skillful and careful as the ordinarily prudent auditor performing a fraud audit.

When an accountant negligently fails to discover embezzlement, generally he is liable to his client only for an amount equal to the embezzlement that occurred after he should have discovered the embezzlement. The accountant is usually not liable for any part of the embezzlement that occurred prior to the time he should have uncovered

the embezzlement unless his tardy discovery prevented the client from recovering embezzled funds.

Contributory and Comparative Negligence of Client

Courts are reluctant to permit a professional to escape liability to a client merely because the client was **contributorily negligent**. Since the accountant or consultant has skills superior to those of the client, courts generally allow clients to rely on an accountant's duty to discover employee fraud, a consultant's duty to make reasonable recommendations, and an underwriter's advice on what type of security to issue. The client is not required to exercise reasonable care to discover these things itself.

Nonetheless, some courts allow the defense of contributory negligence or the defense of **comparative negligence**, such as when clients negligently fail to follow a consultant's advice or when clients possess information that makes their reliance on an investment banker unwarranted.

In the following *Fehribach* case, the appeals court considered the scope of an auditor's duty when conducting an audit and the greater ability of the client to know its financial condition and, thereby, protect itself. Note also that the court, applying the *Ultramares* rule we will study later in this chapter, found that the bankruptcy trustee was a proper plaintiff only because he sued the auditor on behalf of the auditor's client.

Fehribach v. E&Y LLP

493 F.3d 905 (7th Cir. 2007)

In October 1995, Ernst & Young LLP (E&Y) issued an audit report for fiscal year 1995 regarding its client, Taurus Foods, Inc., a small company engaged in the distribution of frozen meats and other foods. American Institute of Certified Public Accountants, Statement on Auditing Standards No. 59 (1988) requires an auditor report to indicate the auditor's substantial doubt about the audited company's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. E&Y's report on Taurus indicated that E&Y had "no substantial doubt" that Taurus would continue as a going concern until at least January 1996.

Several months after E&Y's audit report was received by Taurus, its chief lender, Bank One, became alarmed by the deterioration in Taurus's financial condition. The bank imposed restrictions on Taurus that increased the company's business troubles. To stave off disaster, Lisa Corry, the company's chief financial officer (and the daughter of one of Taurus's two owners), started defrauding Bank One by inflating the company's sales and accounts receivable in daily reports that Taurus was required to make to the bank. She was eventually caught, prosecuted, convicted, and sent to prison. Soon after, in 1998, Taurus entered in a bankruptcy proceeding.

Taurus's bankruptcy trustee, Gregory Fehribach, asked the district court to require E&Y to pay damages for failing to include a going concern qualification in its audit report for the 1995 fiscal year. The trustee argued that if E&Y had issued the qualification, the owners of Taurus—who were active owners who managed the company—would have realized that the company had no future and would immediately have liquidated, averting costs of some \$3 million that the company incurred as a result of its continued operation under the restrictions imposed by Bank One. E&Y moved for summary judgment, which the district court granted. Taurus's bankruptcy trustee appealed to the Seventh Circuit Court of Appeals.

Posner, Circuit Judge

The trustee's damages claim is based on the theory of "deepening insolvency." This controversial theory allows damages sometimes to be awarded to a bankrupt corporation that by delaying liquidation ran up additional debts that it would not have incurred had the plug been pulled sooner. As originally formulated, the theory was premised on the notion that borrowing after a company becomes insolvent would "ineluctably" hurt the shareholders. That was a puzzling suggestion because by hypothesis a company harmed by *deepening* insolvency was insolvent before the borrowing spree, so what had the shareholders to lose? But a corporation can be insolvent in the sense of being unable to pay its bills as they come due, yet be worth more liquidated than the sum of its liabilities and so be worth something to the shareholders.

The theory could also be invoked in a case in which management in cahoots with an auditor or other outsider concealed the corporation's perilous state which if disclosed earlier would have enabled the corporation to survive in reorganized form. However, the theory makes no sense when invoked to create a substantive duty of prompt liquidation that would punish corporate management for trying in the exercise of its business judgment to stave off a declaration of bankruptcy, even if there were no indication of fraud, breach of fiduciary duty, or other conventional wrongdoing. Nor would it do to fix liability on a third party for lending or otherwise investing in a firm and as a result keeping it going, when management misused the opportunity created by that investment. Management could have instead used that opportunity to turn the company around and transform it into a profitable business. They did not, and therein lies the harm to the company.

The owners of Taurus lost their entire investment when the company became insolvent. They had nothing more to lose. The only possible losers from the prolongation of the corporation's miserable existence were the corporation's creditors. In a state that allows creditors (or shareholders) of the audited firm to sue the auditor for negligent misrepresentation, provided that the creditors' reliance on the auditor's report was foreseeable—or, in some states, was actually foreseen—Taurus's creditors could sue E&Y directly. But Indiana adheres to a close approximation to *Ultramares Corp. v. Touche*, 255 N.Y. 170, 174 N.E. 441 (N.Y. 1931). And under the *Ultramares* doctrine, creditors in the position of Taurus's creditors, not having a contractual relation with the auditor, have no claim against it.

Taurus had the contractual relation, and thus could sue, though because it is in bankruptcy and has been liquidated the suit is really on behalf of the creditors; anything that reduces the liquidation value of the corporation hurts them. That doesn't make the suit an impermissible end run around Indiana's limitation of creditor (or shareholder) suits against auditors.

Remember that under Indiana law E&Y has no duty of care to the creditors. But it does of course have such a duty to its client, Taurus, and that duty, on which this suit is founded, does not evaporate just because the client is bankrupt and any benefits from suing will accrue to its creditors.

The trustee's claim fails nevertheless, but fails on the facts, though not because Taurus survived for more than a year (in fact three years) after the audit period. A going-concern qualification is just a prediction; if it should have been included in the audit report and harm resulted as a foreseeable consequence of its omission, the auditor is liable to the firm audited for that harm. Such cases are rare because it is unusual for the audited firm to be able to make a plausible contention that it could not have been expected to recognize its financial peril on its own even though it supplied the financial information on which the audit was based. The purpose of an audit report is to make sure the audited company's financial statements—which are prepared by the company, not by the auditor—correspond to reality, lest they either have been doctored by a defalcating employee or innocently misrepresent the company's financial situation. The auditor is therefore required to state whether, in his opinion, the financial statements are presented in conformity with generally accepted accounting principles and to identify those circumstances in which such principles have not been consistently observed in the preparation of the financial statements of the current period in relation to those of the preceding period. There is no contention that E&Y failed to notice discrepancies between the statements and the company's actual financial situation. There were no discrepancies. And no information that the report contained or should have contained if the audit was carefully done indicated that Taurus couldn't limp through another year—the report revealed positive though slight net income in the most recent fiscal year and no obligations that would mature in the next year and by doing so might drive the firm under.

It is true that the report failed to warn Taurus of ominous trends in the frozen-meat distribution business. Intensified competition from national firms was causing Taurus to lose customers, thus depressing the firm's revenues; at the same time, the company's costs were rising because of higher workers' compensation premiums and other untoward developments. But predicting Taurus's future cash flow on any basis other than the financial statements for the audit year (which would for example reveal existing loan-repayment obligations) was not the function of the audit report. E&Y had not contracted to provide Taurus with management-consulting services. An auditor's duty is not to give business advice; it is merely to paint an accurate picture of the audited firm's financial condition, insofar as that condition is revealed by the company's books and inventory and other sources of an auditor's opinion.

But there is need to qualify what we have just said. The requirement that the auditor disclose in its report any substantial doubt it has that the firm will still be a going concern in a year expands the auditor's duty beyond that of verifying the accuracy of the company's financial statements. The accounting standards require the auditor to be on the lookout for certain conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The following are examples of such conditions and events:

Negative trends—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios.

Other indications of possible financial difficulties—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, non-compliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets.

Internal matters—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations.

External matters that have occurred—for example, legal proceedings, legislation, or similar matters that might jeopardize an entity's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood.

American Institute of Certified Public Accountants, "The Auditor's Consideration of an Entity's Ability to Continue as

a Going Concern," in *Codification of Statements on Accounting Standards*, § 341.06 (2007). It is the last bullet point, referring to "external matters," that stretches the auditor's duty—especially, so far as bears on this case, the reference to "loss of a principal customer or supplier." Elsewhere the standards emphasize that the auditor must have "an appropriate understanding of the entity *and its environment*" *Id.*, §§ 314.01-.02 (emphasis added).

Yet nowhere is the auditor required to *investigate* external matters as distinct from discovering them during the engagement. An accounting firm that conducts an annual audit of a multitude of unrelated firms in a multitude of different industries cannot be expected to be expert in the firms' business environments. Large accounting firms like E&Y do divide their practice into industry groups, and the accountants assigned to a particular group doubtless know a lot about the companies. But the auditor is not hired to assess the supply and demand conditions facing the audited firm. If the auditor is told by the firm or otherwise learns from the information that it collects in conducting the audit that the firm's near-term prospects are endangered by pending legislation, the loss of a customer, or other "conditions or events," then it must factor the information into its assessment of the firm's risk of going under within a year. But it is not expected to duplicate the expertise assumed to reside in the firms themselves and in management consultants specializing in the firm's industry. E&Y could not have been expected to know more about trends in the frozen-meat distribution business than Taurus, which had been in that business for more than 20 years.

Judgment for E&Y affirmed.

Fraud A professional is liable to his client for fraud when he misstates or omits facts in communications with his client and acts with **scienter**. A person acts with scienter when he knows of the falsity of a statement or he recklessly disregards the truth. Thus, accountants are liable in fraud for their intentional or reckless disregard for accuracy in their work.

For example, an accountant chooses not to examine the current figures in a client's books of account, but relies on last year's figures because he is behind in his work for other clients. As a result, the accountant understates the client's income on an income statement that the client uses to apply for a loan. The client obtains a loan, but he has to pay a higher interest rate because his low stated income makes the loan a higher risk for the bank.

Such misconduct by the accountant proves scienter and, therefore, amounts to fraud.

Scienter also includes recklessly ignoring facts, such as an auditor's finding obvious evidence of embezzlement yet failing to notify a client of the embezzlement. An investment banker defrauds its client when it withholds information concerning the value of the client's shares and causes the client to issue the shares for too little consideration, perhaps to an affiliate of the investment banker who, therefore, profits unreasonably. As you can see, fraud is extremely reprehensible conduct, and a defrauder deserves to be punished. Fraud actions are not designed to impose liability on honest professionals who sometimes make careless errors.

The chief advantage of establishing fraud is that the client may get a higher damage award than when the accountant is merely negligent. Usually, a client may receive only compensatory damages for a breach of contract or negligence. By proving fraud, a client may be awarded punitive damages as well.

Breach of Trust A professional owes a duty of trust to his client. Information and assets that are entrusted to an accountant, broker, or investment banker, for example, may be used only to benefit the client. The duty of trust requires the professional to maintain the confidentiality of the client's information entrusted to the firm. Therefore, a professional may not disclose sensitive matters such as a client's income and wealth or use secret information about a client's new product to purchase the client's securities. In addition, for example, an accountant or securities broker may not use the assets of his client for his own benefit.

Securities Law Federal and state securities law creates several rights of action for persons harmed in connection with the purchase or sale of securities. These rights of action are based in tort. Although some securities law sections permit clients to sue professionals, they are rarely used for that purpose. Usually, only third

parties (nonclients) sue under the securities law. Therefore, the securities law sections that apply to professionals are discussed later in this chapter.

Professionals' Liability to Third Persons: Common Law

Other persons besides a professional's clients may use her work product. Banks may use financial statements reviewed by a loan applicant's accountant in deciding whether to make a loan to the applicant. Investors may use financial statements audited by a company's auditors in deciding whether to buy or sell the company's securities. These documents prepared by an accountant may prove incorrect, resulting in damages to the nonclients who relied on them. For example, banks may lend money to a corporation only because an income statement

Ethics in Action

The Sarbanes–Oxley Act: Auditor Independence Standards

When Congress studied the causes of financial statement irregularities in 2002, it became convinced that some auditors failed to challenge their clients' financial reporting practices for fear that the audit firms would lose lucrative consulting contracts with the clients. The belief was that firms undercharged for audit services to acquire valuable consulting clients. To ensure that audit firms are free from conflict-of-interest and lack of independence charges that can undermine the quality of their audits, the Sarbanes–Oxley Act (SOX) bans most types of services by audit firms for audit clients, including:

- Bookkeeping.
- Financial information system design.
- Appraisal or valuation services.
- Actuarial services.
- Internal audit outsourcing.

- Management or human resource services.
- Broker, dealer, investment banker, and investment adviser services.
- Legal and expert services related to the audit.
- Other services as determined by the Public Company Accounting Oversight Board.

The PCAOB also has power on a case-by-case basis to exempt services performed by an audit firm for an audit client. An audit firm may provide permissible nonaudit services for an audit client, such as tax services, only if the client's audit committee approves the services in advance.

In addition, SOX requires that the audit partner-in-charge be rotated every five years at a minimum. SOX also charges the General Accounting Office to study whether all public companies should be required to rotate audit firms on a regular basis. Finally, no audit firm may audit a public company that within the past year has hired an audit firm employee as a CEO, CFO, or CAO.

prepared by an accountant overstated the corporation's income. When the corporation fails to repay the loan, the bank may sue the accountant to recover the damages it suffered.

Nonclient actions are rarer outside the accountant context because the work product of nonaccounting professionals is infrequently used by others in an expectable way. For example, consulting advice is almost never passed from a client to a third party. A securities broker's client rarely relays the broker's investment advice to a friend; when the friend attempts to sue the broker if the advice turns out to be bad, the friend usually is not able to recover damages from the broker.

However, investment bankers often prepare documents for their clients that are created expressly to sell securities to nonclients, that is, shareholders and other holders of the client's securities. Therefore, purchasers who buy the client's securities based on false statements in a document prepared for investors by an investment banker may sue the investment banker.

Nonclients may sue professionals for common law negligence, common law fraud, and violations of the securities laws. In this section, common law negligence and fraud are discussed.

Negligence and Negligent Misrepresentation When a professional fails to perform as the ordinarily prudent professional would perform, she risks having liability for negligence. Many courts have restricted the ability of nonclients to sue a professional for damages proximately caused by the professional's negligent conduct. These courts limit nonclient suits on the grounds that nonclient users of a professional's work product have not contracted with the professional and, therefore, are not in **privity of contract** with her. Essentially, these courts hold that a professional owes no duty to nonclients to exercise ordinary skill and care.

This judicial stance conflicts with the usual principles of negligence law under which a negligent person is liable to all persons who are reasonably foreseeably damaged by his negligence. The rationale for the restrictive judicial stance was expressed in the *Ultramares* case,¹ a decision of the highest court in New York. In that case, Judge Benjamin Cardozo refused to hold an auditor liable to third parties for mere negligence. His rationale was stated as follows:

If liability for negligence exists, a thoughtless slip or blunder, the failure to detect a theft or forgery beneath the cover

of deceptive entries, may expose accountants to a liability in an indeterminate amount for an indeterminate time to an indeterminate class.

The *Ultramares* privity requirement protects an auditor or other professional who does not know the user or the extent of use of its work product and, therefore, is unable to assess the potential dollar amount of liability or the user's propensity to sue. *Ultramares* allows auditors and other professionals to manage the known risks of their work product being used by nonclients either by insuring against the risk, increasing the client's engagement fee, or declining the engagement.

Ultramares dominated the thinking of judges for many years, and its impact is still felt today. However, many courts understand that many nonclients use and reasonably rely on the work product of professionals, especially accountants. To varying degrees, these courts have relaxed the privity requirement and expanded the class of persons who may sue an accountant or other professional for negligent conduct. Today, most courts adopt one of the following three tests to determine whether a nonclient may sue a professional for negligence.

Primary Benefit Test The *Ultramares* court adopted a primary benefit test for imposing liability for negligence. Under this test, a professional's duty of care extends only to those persons for whose primary benefit the professional audits or prepares financial reports and other documents. The professional must actually foresee the nonclient's use and prepare the document primarily for use by a specified nonclient. That is, the nonclient must be a **foreseen user** of the professional's work product. The professional must know three things: (1) the name of the person who will use her work product, (2) the particular purpose for which that person will use the work product, and (3) the extent of the use, such as the dollar amount of the nonclient's transaction.

Suppose an investment banker acts as a broker for a client issuing \$100 million of securities to 10 mutual funds identified as prospective buyers. To assist the client's sale of the securities, the investment banker prepares an offering memorandum for the client. If due to the investment banker's negligence the offering memorandum misstates material facts, and the client gives the offering memorandum to the previously identified mutual funds, the investment banker may have liability to the mutual funds that relied on the misstated facts.

Foreseen Users and Foreseen Class of Users Test By 1965, a draft of the *Restatement (Second) of Torts* proposed that the law of professional negligence expand

¹*Ultramares Corp. v. Touche*, 174 N.E. 441 (N.Y.Ct.App. 1931).

the class of protected persons to **foreseen users** and **users within a foreseen class of users** of reports. Under this test, the professional must know the use and extent of use to be made of the work product. The protected persons are (1) those persons who a professional knows will use the work product and (2) those persons who use the work product in a way the professional knew the work product would be used.

For example, an accountant prepares an income statement that he knows his client will use to obtain a \$50 million loan at Bank X. Any bank to which the client supplies the statement to obtain a similar loan, including Bank Y, may sue the accountant for damages caused by a negligently prepared income statement. Bank X is a foreseen user, and Bank Y is in a foreseen class of users. On the other hand, if an accountant prepares an income statement for a tax return and the client, without the accountant's knowledge, uses the income statement to apply for a loan from a bank, the bank is not among the protected class of persons—the accountant did not know that the tax return would be used for that purpose.

Also, if the accountant prepared the client's income statement for the purpose of aiding the client to obtain a \$50 million loan, but instead the client obtained a \$200 million loan, the accountant would not be liable to the nonclient bank: the accountant did not know the extent of the bank's use, that is, the dollar amount of risk to which she was exposed.

In the securities professional context, when an underwriter prepares an offering document for a client issuing a known amount of securities, the *Restatement* test extends an underwriter's liability for negligence to any pur-

chaser of the securities whether known or not to the underwriter. This is because the underwriter knows the type of person who will use the offering document, that is, buyers of the securities, the use, and the extent of the use, that is, the dollar amount of securities to be bought.

Nonetheless, when the *Restatement* test is applied to securities brokers, liability rarely extends past the broker's client. A broker who gives investment advice to a client is rarely found liable to a nonclient who receives the advice secondhand on the grounds that investment advice is crafted specifically for the broker's client. That rationale is generally followed even in the context of a published investment newsletter, where usually only subscribers to the newsletter are permitted to sue the publisher of the newsletter.

Foreseeable Users Test A very few courts have applied traditional negligence causation principles to professional negligence. They have extended liability to **foreseeable users** of an accountant's audit and other reports who suffered damages that were proximately caused by the accountant's negligence. To be liable to a nonclient under this test, an accountant need merely be reasonably able to expect or foresee the nonclient's use of the accountant's work product. It is not necessary for the nonclient to prove that the accountant actually expected or foresaw the nonclient's use.

In the next case against accounting giant PwC, the court reviewed the scope of *Ultramares* and other cases in the course of interpreting the Illinois statute defining those persons to whom a professional may be liable for negligent misrepresentation.

Tricontinental Industries, Ltd. v. PricewaterhouseCoopers, LLP 475 F.3d 824 (7th Cir. 2007)

Anicom, Inc., was a wire distribution company founded in the early 1990s. Its stock became publicly traded, and the company adopted a strategy to increase market share and to expand its operations. Between 1995 and 1997, Anicom acquired 12 companies. Each of these transactions involved some payment in the form of Anicom stock. During this time, PricewaterhouseCoopers, LLP, rendered accounting, audit, and various types of consulting services to Anicom.

In 1996, Anicom began engaging in improper accounting procedures to enable it to report that it had met sales and revenue goals. The procedures included the use of fictitious sales orders or prebills for goods that were not ordered. PwC became aware of these practices in July 1997 when it was asked to investigate Anicom's billing practices. After conducting its investigation, PwC reported to Donald C. Welchco, Anicom's vice president and CFO, that improper billing had occurred at Anicom branches and that, in the absence of controls, the practice might arise at other branches as well. No mention of these irregularities was made in PwC's audits of Anicom's 1998 and 1999 financial statements. Indeed, PwC issued opinions that Anicom's financial statements were accurate, complete, and conformed with GAAP and that its audits were performed according to GAAS.

In September 1998, Anicom made an Asset Purchase Agreement to acquire the wire and cable distribution assets of three companies: Texcan Cables Ltd. (known now as Tricontinental Distribution Ltd.), Texcan Cables, Inc., and Texcan Cables International, Inc. Anicom acquired those assets in exchange for cash and Anicom stock. After the transaction, Tricontinental Distribution and Texcan Cables, Inc., transferred their stock to Tricontinental Industries, Ltd.

On July 18, 2000, Anicom announced that it was investigating possible accounting irregularities that could result in revision of its 1998, 1999, and first quarter 2000 financial statements by as much as \$35 million. Accordingly, Anicom announced that its 1998 and 1999 financial statements should no longer be relied upon. After conducting an internal investigation, Anicom further announced that, subject to audit, it believed that, for the period from the first quarter of 1998 to the first quarter of 2000, the company had overstated revenue by approximately \$39.6 million. None of the company's announcements or disclosures ever stated that full-year 1997 revenue or net income had been materially misstated or that any of Anicom's prior financial results were inaccurate in any way. On January 5, 2001, Anicom filed for bankruptcy protection.

In July 2001, Tricontinental Industries filed an action against PwC for negligent misrepresentation. Tricontinental maintained that PwC knew that Tricontinental was relying on Anicom's audited financial statement for 1997 and, specifically, was relying on PwC's representation that the audit was performed in a manner consistent with GAAS and that Anicom's financial statements conformed with GAAP. These statements, Tricontinental alleged, were materially false, misleading, and without reasonable basis.

PwC moved to dismiss Tricontinental's complaint on the grounds that PwC owed no duty to Tricontinental, because the Illinois Public Accounting Act (IPAA) limited PwC's liability to persons who were either in privity of contract with PwC or for whose primary intent Anicom had secured PwC's services. The district court granted PwC's motion. Tricontinental appealed.

Ripple, Circuit Judge

In order to state a claim for negligent misrepresentation under Illinois law, a party must allege:

(1) a false statement of material fact; (2) carelessness or negligence in ascertaining the truth of the statement by the party making it; (3) an intention to induce the other party to act; (4) action by the other party in reliance on the truth of the statement; (5) damage to the other party resulting from such reliance; and (6) a duty on the party making the statement to communicate accurate information.

The Illinois courts have considered, on several occasions, the application of these requirements, specifically, the element of duty, as it applies to public accountants. The Illinois Appellate Court first spoke to this issue in *Brumley v. Touche, Ross & Co.*, 463 N.E.2d 195 (Ill. App. Ct. 1984) (*Brumley I*). In that case, the court reviewed the various approaches that courts around the country had adopted for accountant liability to third parties: (1) the standard set forth in *Ultramares Corp. v. Touche*, 174 N.E. 441 (N.Y. 1931), which held that public accountants could not be liable in negligence to third parties absent privity, (2) a reasonable foreseeability standard; and (3) a more limited foreseeability rule that public accountants may be liable to plaintiffs, who are not exactly identifiable, but who belong to a limited class of persons whose reliance on the accountant's representations is specifically foreseen. The appellate court held that the plaintiff's complaint was insufficient to set forth a duty on the part of defendant to plaintiff because "the complaint did not allege Touche Ross knew of plaintiff or that

the report was to be used by KPK to influence plaintiff's purchase decision nor does it allege that was *the primary purpose and intent* of the preparation of the report by Touche Ross for KPK." *Id.* (emphasis added).

In *Brumley v. Touche, Ross & Company*, 487 N.E.2d 641 (Ill. App. Ct. 1985) (*Brumley II*), the court revisited this standard. In *Brumley II*, the plaintiff had argued that the Supreme Court of Illinois had altered the standard for liability for attorneys, which necessitated a change by the appellate court with respect to accountant liability. The appellate court rejected this argument: it is apparent that to be sufficient plaintiff's complaint must allege facts showing that *the purpose and intent of the accountant-client relationship* was to benefit or influence the third-party plaintiff. 487 N.E.2d at 644-45 (emphasis added).

Shortly after *Brumley II*, the Illinois legislature enacted the Illinois Public Accounting Act, 225 ILCS 450/30.1, which provides:

No person, partnership, corporation, or other entity licensed or authorized to practice under this Act . . . shall be liable to persons not in privity of contract with such person, partnership, corporation, or other entity for civil damages resulting from acts, omissions, decisions or other conduct in connection with professional services performed by such person, partnership, corporation, or other entity, except for:

- (1) such acts, omissions, decisions or conduct that constitute fraud or intentional misrepresentations, or
- (2) such other acts, omissions, decisions or conduct, if such person, partnership or corporation was aware that a

primary intent of the client was for the professional services to benefit or influence the particular person bringing the action; provided, however, for the purposes of this subparagraph (2), if such person, partnership, corporation, or other entity (i) identifies in writing to the client those persons who are intended to rely on the services, and (ii) sends a copy of such writing or similar statement to those persons identified in the writing or statement, then such person, partnership, corporation, or other entity or any of its employees, partners, members, officers or shareholders may be held liable only to such persons intended to so rely, in addition to those persons in privity of contract with such person, partnership, corporation, or other entity.

Following IPAA's passage, there was some question regarding the effect of the IPAA on accountant liability. We are obliged, however, to follow the interpretation given the language by the state appellate court in *Chestnut Corp. v. Pestine, Brinati, Gamer, Ltd.*, 667 N.E.2d 543, 546-47 (Ill. App. Ct. 1996). The Illinois court took the view that the first clause of subparagraph (2) states the general rule of accountant liability as set out in *Brumley* while the second clause creates a legislative exception to the general rule. Continued the court:

[T]o adopt the defendants' interpretation of the statute would require us to hold, as a matter of law, that accountants are never liable to third parties, absent fraud or intentional misrepresentation, unless they agree in writing to expose themselves to liability. The law in Illinois would have come full circle then and returned to the rationale of *Ultramares* in 1931. Absent a clear signal from the legislature or the supreme court that such a return is intended, we believe the observation of the trial court and the evolution of the law since *Ultramares* provides a useful background as one measures the statute's meaning.

Id. at 547.

Although the Supreme Court of Illinois has not spoken to the issue, Illinois Appellate Courts seem to agree that the IPAA embodies the rule applied to accountants in *Brumley II*: The plaintiff must show that a primary purpose and intent of the accountant-client relationship was to benefit or influence the third-party plaintiff.

The primary intent rule, however, has proven to be somewhat difficult to define in practical terms. For instance, disputes have arisen regarding whether the "primary intent" of the client must be contemporaneous with the accountant's work product on which the third party relies. With respect to this issue, the Illinois Appellate Court has stated:

In terms of timing, we do not read the statute to strictly require that an accountant be made aware of his client's intention to influence or benefit a third party only at the time the work product was created as defendant contends. The stan-

dard requires that a plaintiff prove that the primary purpose and intent of the client was to benefit or influence the third party. In *Brumley II*, we held that the plaintiff in that case met the standard because he alleged that the defendant knew of the plaintiff's reliance on the defendant's reports and that the defendant had subsequently verified its accuracy. We do not, however, read *Brumley II* as *per se* requiring independent verification in order to meet the standard in *Pelham*. Other conduct may be sufficient to satisfy *Pelham*.

Builders Bank v. Barry Finkel & Assocs., 790 N.E.2d 30, 37 (Ill. App. Ct. 2003) (emphasis added).

Further, although Illinois case law has established that "independent verification" is not a *per se* requirement, Illinois courts have not set forth in detail what "other conduct" may satisfy the "primary intent" standard. The cases, however, do establish that *some* affirmative action on behalf of the defendant-accountant is necessary. For instance, in *Builders Bank*, the record indicated that Finkel, the accountant, was told by Urkov, the company owner, that UMC was applying for a loan and requested that financial statements be furnished to UMC. The record further establishes that Finkel personally met with UMC on two occasions to discuss issues related to the loan. In at least one meeting, UMC was seeking an increase of \$200,000 on a loan that had already been approved. In our view, it is reasonable to infer that Finkel played an active role in securing the loan or increasing the loan amount for UMC. From this evidence, a finder of fact could conclude, pursuant to the statute, that Finkel knew its work was being used to influence UMC at least at the time of the second meeting and that defendant, at minimum, presented its work as accurate. *Id.*

Similarly, in *Freeman, Freeman & Salzman, P.C. v. Lipper*, 812 N.E.2d 562 (Ill. App. Ct. 2004), the court held that the standard had been met by the allegation that the accountant to an investment fund had "issued clean audit opinions on each investment partner's capital accounts for those years"; had "addressed and sent its clean audit opinions to the partners who invested in those funds, including plaintiffs"; and had "prepared federal income tax Schedules K-1 for plaintiffs and the limited partners each year." *Id.* at 566-67. Furthermore, "each Schedule K-1 purported to reflect each partner's proportionate share of the partnership's net income for the year, as well as each partner's capital account balance at the beginning and end of each year." *Id.* at 567.

Finally, in *Chestnut Corp.*, the court held that the plaintiffs had stated a claim for negligent misrepresentation by alleging that the plaintiff's representatives had gone to the offices of the defendant-accountants to discuss their possible investment in the client company and to review its financial condition. In response to specific inquiries by the plaintiff's representatives, the defendants "stated that the audit was accurately performed

according to generally accepted auditing standards.” *Chestnut Corp.*, 667 N.E.2d at 545.

In sum, the duty owed by a professional accountant to non-client third-parties is the standard articulated in *Brumley II* and codified in the IPAA. The IPAA provides that an individual accountant, partnership or firm will be liable to a third party for negligence only “if such person, partnership or corporation was aware that a primary intent of the client was for the professional services to benefit or influence the particular person.” This “primary intent” may be demonstrated by “independent verification” or by other affirmative actions taken by the accountant and directed to the third party.

With this standard in mind, we turn to the allegations set forth in the Amended Complaint to determine whether they state a claim for relief.

With respect to the negligent misrepresentation claim, Tricontinental alleged as follows:

163. Prior to the time that PwC conducted its 1997 audit, PwC had assisted Anicom in raising money for acquisitions and finding acquisition candidates. And, in 1997, PwC well knew that Anicom was seeking to complete additional acquisitions. PwC most certainly knew that acquisition candidates, such as Plaintiffs, would rely on the 1997 Form 10-K in making their decisions on whether to invest in Anicom’s securities.

164. PwC knew prior to the closing of the Texcan transaction that Plaintiffs were negotiating to sell significant assets to Anicom in exchange in part for Anicom securities. PwC was on the circulation lists for drafts of the Asset Purchase Agreement and PwC conducted due diligence of Texcan for Anicom. PwC knew that Plaintiffs had received and were relying on Anicom’s Form 10-K for 1997 and, in particular, PwC’s unqualified audit report, and that Anicom intended that Plaintiffs rely on the 10-K and PwC’s audit report in assessing an investment in Anicom. Despite its awareness of these facts, and despite its knowledge from its own investigation and its involvement in the business of Anicom that Anicom was engaged in improper accounting practices and lacked

adequate controls to prevent these irregular practices, PwC intentionally or recklessly failed to withdraw its audit opinion on the 1997 financial statements. Instead, PwC allowed Plaintiffs to rely on the false and misleading information contained in Anicom’s Form 10-K for 1997.

As noted by the district court, these allegations do not demonstrate any “independent verification” provided by PwC to Tricontinental. However, such verification to the third party is not a per se requirement. “Other conduct” by PwC directed to Tricontinental also may satisfy the “primary intent” requirement of the IPAA. Tricontinental alleges that PwC knew of its reliance on the 1997 audit opinion, knew of the misrepresentation contained in the statement and “allowed plaintiffs to rely on the false and misleading information.” However, Illinois cases, fairly read, make clear that the IPAA requires more. In order to state a claim under the IPAA, Tricontinental must allege that it was a primary purpose “of the accountant-client relationship . . . to benefit or influence” Tricontinental. None of the allegations contained in the above-recited paragraphs support such an inference. Indeed, the opposite appears to be the case. The actions taken by PwC—assisting Anicom in raising money for acquisitions, conducting due diligence “for Anicom,” and being included on the circulation lists during the transaction—are examples of Anicom’s use of PwC’s services for its own benefit, not that of Tricontinental. Consequently, although we agree with Tricontinental that neither privity nor independent verification need to be asserted or shown in order to state a claim, Tricontinental must set forth a short and plain statement of the claim showing that it is entitled to relief. Absent an allegation that fairly states that Anicom’s primary intent in retaining and utilizing PwC’s services and work product during the transaction was to influence Tricontinental, or absent factual allegations that support such an inference, Tricontinental has not stated a claim for negligent misrepresentation under Illinois law.

Judgment for PricewaterhouseCoopers affirmed.

Fraud Fraud is such reprehensible conduct that all courts have extended a professional’s liability for fraud to all foreseeable users of his work product who suffered damages that were proximately caused by the fraud. Privity of contract, therefore, is not required when a person sues a professional for fraud, even in a state that has adopted the *Ultramares* test for negligence actions. To prove fraud, a nonclient must establish that a professional acted with scienter.

Some courts recognize a tort called constructive fraud that applies when a professional misstates a material fact. For a misstatement to amount to constructive fraud, the professional must have recklessly or grossly negligently failed to ascertain the truth of the statement. As with actual fraud, a professional’s liability for constructive fraud extends to all persons who justifiably rely on the misstatement.

CONCEPT REVIEW

Common Law Bases of Liability of Professional to Nonclients for Use of Professional's Work Product

| Basis of Liability | | |
|---|--|--|
| Privity Test Adopted by State | Negligence | Fraud |
| Primary Benefit Test (<i>Ultramares</i>) | Professional liable only to foreseen users (professional knew name of user, purpose of the user's use, and extent of the use) | Professional liable to all persons whose damages were caused by their reliance on professional's fraud |
| Restatement (<i>Second</i>) of Torts Test | Professional liable to foreseen users and users in a foreseen class of users (professional knew at least the purpose and extent of the user's use) | |
| Foreseeable Users Test | Professional liable to all reasonably foreseeable users (professional can reasonably expect or foresee the purpose and extent of the user's use) | |

Professional's Liability to Third Parties: Securities Law

The slow reaction of the common law in creating a negligence remedy for third parties has led to an increased use of securities law by nonclients—that is, persons not in privity with a professional. Many liability sections in these statutes either eliminate the privity requirement or expansively define privity.

Securities Act of 1933 There are several liability sections under the Securities Act of 1933 (1933 Act). The most important liability section of the Securities Act of 1933 is Section 11, but Sections 12(a)(2) and 17(a) are also important, especially for securities professionals.

Section 11 Liability Section 11 imposes liability on underwriters and experts for misstatements or omissions of material fact in Securities Act registration statements. The 1933 Act registration statement must be filed with the Securities and Exchange Commission by an issuer making a public distribution of securities. The most common expert is an auditor who issues an opinion regarding financial statements. An underwriter, although knowledgeable, skillful, and experienced in securities offerings, is not an “expert” under Section 11.

An auditor or underwriter is liable to any purchaser of securities issued pursuant to a defective registration statement. The purchaser need not establish privity of contract with an underwriter or auditor. Because the underwriter is not an expert under Section 11, the underwriter is liable for errors in the *entire* registration statement. Since an auditor is an expert, the auditor is liable only for the part of the registration statement contributed by the auditor, that is, the auditor's opinion regarding the audited financial statements and those audited financial statements. Usually, the purchaser need not prove he relied on the misstated or omitted material fact; he need not even have read or seen the defective registration statement.

For example, an auditor issues an unqualified opinion regarding a client's income statement that overstates net income by 85 percent. The defective income statement is included in the client's registration statement pursuant to which the client sells its preferred shares. Without reading the registration statement or the income statement, a person buys from the client 1,000 preferred shares for \$105 per share. After the correct income figure is released, the price of the shares drops to \$25 per share. The auditor will most likely be liable to the purchaser for \$80,000, unless the auditor proves the purchaser's damages were caused by other persons or factors.

Under Section 11, auditors and underwriters may escape liability by proving that they exercised due

diligence. For auditors, who are experts, this **due diligence defense** requires that an auditor issuing an opinion regarding financial statements prove that she made a reasonable investigation and that she reasonably believed that there were no misstatements or omissions of material fact in the financial statements at the time the registration statement became effective. Because the effective date is often several months after an audit has been completed, an auditor must perform an additional review of the audited statements to ensure that the statements are accurate as of the effective date. In essence, due diligence means that an auditor was not negligent, which is usually proved by showing that she complied with GAAS and GAAP.

For underwriters, who are liable for the entire registration statement, the due diligence defense varies depending on the part of the registration statement. For parts of the registration statement contributed by experts (so-called expertised portions, such as an auditor's opinion and the financial statements covered by that opinion), underwriters are entitled to rely on the expert. Therefore, the underwriter's due diligence defense for errors in audited financial statements generally requires no independent investigation by the underwriter. The underwriter will have no liability for mistakes in an expertised portion if the underwriter had no reason to believe and did not believe that there were any misstatements or omissions of material fact in the audited financial statements. If, however, the underwriter has information leading her to believe that an audited financial statement misstates or omits material facts, she has a duty to investigate until she no longer has that belief and no longer has a reason to have that belief.

For errors in parts of the registration statement not contributed by experts (the nonexpertised portion), the underwriter's defense is that after a reasonable investigation, she had a reasonable belief that there were no misstatements or omissions of material fact in those parts. The nonexpertised portion constitutes the bulk of the registration statement and includes the description of the securities, the statement of the underwriter's compensation, the use of the proceeds of the securities issuance, the description of the issuer's business, the statement of the securities' material risks, and unaudited financial statements.

Standards for complying with the due diligence defense are explained more fully in *Escott v. BarChris Construction Corp.*, which appears in Chapter 45, Securities Regulation, at page 1131.

Section 12(a)(2) Section 12(a)(2) imposes liability on any person who misstates or omits a material fact in

connection with an offer or sale of a security that is part of a general distribution of securities by an issuer. Privity of contract between the plaintiff and the defendant apparently is required, because Section 12(a)(2) states that the defendant is liable to the person *purchasing* the security *from him*.

Under Section 12(a)(2), a defendant must have direct contact with a buyer of a security to be liable. Merely performing professional services, such as auditing financial statements, is not enough for Section 12(a)(2) liability. A person must actively solicit the sale, motivated at least by a desire to serve his own financial interest. Such a financial interest is unlikely to be met by an auditor whose compensation is a fee unconnected to the proceeds of the securities sale. In addition, the *Central Bank* case² makes it fairly clear that auditors who merely *aid and abet* a client's Section 12(a)(2) violation will not have liability under Section 12(a)(2).

Securities professionals have a greater risk of liability under Section 12(a)(2), because they frequently have direct contact with purchasers. Underwriters helping clients with public offerings sell securities or at least actively solicit sales by speaking with investors and writing the prospectus or other offering document. Since underwriters receive compensation for their services in the form of a commission or a spread (the difference between the amount underwriters pay the issuer and the price they sell at), they have the requisite financial stake in the sale. Securities brokers and dealers also are sellers or actively solicit securities sales and have a financial stake in the sale when they assist issuer distributions of securities and receive a commission or spread.

In the event that a person has sufficient contact with a purchaser to incur Section 12(a)(2) liability, the defendant may escape liability by proving that she did not know and could not reasonably have known of the untruth or omission; that is, she must prove that she was not negligent.

Section 17(a) Under Section 17(a), a purchaser of a security must prove his reliance on a misstatement or omission of material fact for which an accountant or securities professional is responsible. Under two of the subsections of Section 17(a), the investor need prove only negligence by the accountant, underwriter, broker, or adviser. Under the third, the investor must prove the accountant or securities professional acted with scienter.

²*Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.*, 511 U.S. 164 (1994).

Whether there is a private right of action for damages under Section 17(a) is unclear. The courts of appeals are in disagreement, and the Supreme Court has not ruled on the issue.

Securities Exchange Act of 1934 Two sections of the 1934 Act—Section 18 and Section 10(b)—especially affect the liability of professionals to nonclients.

Section 18 Section 18 of the 1934 Act imposes liability on persons who furnish misleading and false statements of material fact in any report or document filed with the Securities and Exchange Commission under the 1934 Act. Such reports or documents include the annual 10-K report—which includes auditors’ opinions regarding financial statements—the 8-K current report, and proxy statements.

Under Section 18, a purchaser or seller of a security may sue an auditor if he relied on the defective statement in the filed document and it caused his damages. Usually, this means that a plaintiff must have *read and relied* on the defective statement in the filed document. The purchaser or seller may sue the auditor even if they are not in privity of contract.

An auditor may escape Section 18 liability by proving that she acted in *good faith* and had *no knowledge* that the information was misleading. That is, she must show that she acted *without scienter*. For this reason, as well as the difficulty of proving reliance, Section 18 liability for auditors is extremely rare.

Although securities professionals, such as brokers and dealers, may file reports under the 1934 Act, those documents are not the type normally used by investors making investment decisions. Section 18 liability is, therefore, not an issue for securities professionals.

Section 10(b) and Rule 10b-5 Securities Exchange Act Rule 10b-5, pursuant to Section 10(b), has been the basis for most of the recent suits investors have brought against auditors and securities professionals. Rule 10b-5 prohibits any person from making a misstatement or omission of material fact in connection with the purchase or sale of any security. Rule 10b-5 applies to misstatements or omissions in any communications with investors, including the use of audited financial statements resulting in a purchase or sale of a security. The wrongful act must have a connection with interstate commerce, the mails, or a national securities exchange.

A purchaser or seller of a security may sue an auditor, underwriter, or broker who has misstated or omitted a material fact. Privity is not required. The purchaser or seller must rely on the misstatement or omission. In omission cases, reliance may be inferred from materiality.

In addition, the defendant must act with scienter. In this context, scienter is an intent to deceive, manipulate, or defraud. For some courts, reckless misconduct is sufficient to prove scienter. Negligence, however, is not enough.

In the next case, the court found that the allegations against auditor Ernst & Young did not establish that E&Y had acted with scienter. The court gives several examples of what does and does not constitute scienter.

Ferris, Baker Watts, Inc. v. Ernst & Young, LLP 395 F.3d 851 (8th Cir. 2005)

MJK Clearing, Inc. (MJK), was a broker-dealer engaged in the risky business of securities borrowing. In securities borrowing, a party lent a security to MJK, which paid cash collateral slightly exceeding the value of the security. The cash collateral was “marked to market” so that if the market price of the security rose, MJK paid additional cash to the lender of the security. If the market price of the security fell, however, the lender owed MJK cash. In addition to borrowing securities, MJK was also a lender and therefore subject to the risk that it would be required to pay additional cash if the securities fell in value. MJK had lent securities to Ferris, Baker, Watts, Inc. (FBW), another broker-dealer, and received cash collateral.

By March 31, 2001, MJK had paid \$160 million cash—representing nearly one-half of its accounts receivable and 21 percent of its total assets—to another broker-dealer, Native Nations Securities, Inc., in exchange for borrowed securities. These securities were mostly from three thinly traded issuers, including GenesisIntermedia, Inc. In 2001, the price of GenesisIntermedia fell, and Native Nations did not pay the cash collateral it owed MJK. As a result, MJK collapsed, and the Securities Investor Protection Corporation began the liquidation of MJK.

Consequently, FBW was unable to reclaim \$20 million of cash collateral it had paid MJK. To recover its loss, FBW sued MJK’s independent auditor, Ernst & Young, LLP. FBW argued that it dealt with MJK relying on E&Y’s audit of MJK’s financial statements, as of year-end March 31, 2001. FBW alleged that E&Y’s audit violated Section 10(b) of the Securities Act of

1934 and SEC Rule 10b–5 by recklessly misrepresenting that its audit met generally accepted auditing standards and that MJK’s financial statements were fairly presented in accordance with generally accepted accounting principles. The district court dismissed the action, holding that the complaint insufficiently alleged that E&Y had acted with scienter. FBW appealed.

Benton, Circuit Judge

Section 10(b) and Rule 10b–5 prohibit fraudulent conduct in the sale and purchase of securities. Claims require four elements: (1) misrepresentations or omissions of material fact or acts that operated as a fraud or deceit in violation of the rule; (2) causation, often analyzed in terms of materiality and reliance; (3) scienter on the part of the defendants; and (4) economic harm caused by the fraudulent activity occurring in connection with the purchase and sale of a security. Only scienter—the intent to deceive, manipulate, or defraud—is at issue here.

Mere negligence does not violate Rule 10b–5. Severe recklessness, however, may. Recklessness is limited to those highly unreasonable omissions or misrepresentations that involve not merely simple or even inexcusable negligence, but an extreme departure from the standards of ordinary care, and that present a danger of misleading buyers or sellers which is either known to the defendant or is so obvious that the defendant must have been aware of it. This level of recklessness requires that defendants make statements that they know, or have access to information suggesting, are materially inaccurate.

FBW argues it pleaded that E&Y knew of, or had access to, facts that permit a strong inference that its audit opinion was knowingly or recklessly false or misleading. It claims E&Y falsely stated that it conducted the audit in accordance with GAAS, when: (1) E&Y’s review of internal control of MJK’s securities-borrowing department—the largest and most rapidly growing part of the company—revealed a complete absence of internal control, imposing a duty of heightened scrutiny that E&Y ignored; (2) E&Y failed to investigate whether the \$160 million receivable from Native Nations was impaired; and (3) E&Y failed to investigate any subsequent events after the audit (but before issuance of the audit opinion) as to the collectibility of MJK’s account receivable from Native Nations, which investigation would have revealed defaults.

FBW further alleges that E&Y disregarded GAAP, which a reasonable accountant follows. Thus, FBW says, a strong inference of scienter arises that E&Y’s audit opinion that MJK’s financial statements conformed with GAAP was a knowing or reckless misstatement of fact. Specifically, FBW alleges that the financial statements do not disclose as required by GAAP: (1) the concentration of credit risk in the \$160 million receivable from Native Nations; (2) the risk that the Native Nations receivable was impaired or uncollectible; and (3) the “going concern” risk from the Native Nations receivable.

Finally, FBW alleges that E&Y failed to disclose—as required by SEC Rule 17a–5—material inadequacies in MJK’s internal controls known to E&Y, permitting a strong inference that the nondisclosure was knowing or reckless.

“Allegations of GAAP violations are insufficient, standing alone, to raise an inference of scienter. Only where these allegations are coupled with evidence of corresponding fraudulent intent might they be sufficient.” *In re Navarre Corp. Sec. Litig.*, 299 F.3d 735, 745 (8th Cir. 2002). *See also Kushner v. Beverly Enters., Inc.*, 317 F.3d 820, 827, 831 (8th Cir. 2003) (affirming dismissal of complaint alleging failure to establish accounting reserves); *In re K-Tel Int’l, Inc. Sec. Litig.*, 300 F.3d 881, 894–95 (8th Cir. 2002) (affirming dismissal of complaint based on overstatement of assets and “sheer magnitude” of GAAP violations).

Assuming GAAP and GAAS violations occurred here, FBW’s catch-all and blanket assertions that E&Y acted recklessly or knowingly are not evidence of corresponding fraudulent intent. This is not a case like *Green Tree*, where a defendant published statements knowing that crucial information in them was based on discredited assumptions. *Florida State Bd. of Admin. v. Green Tree Fin. Corp.*, 270 F.3d 645, 665 (8th Cir. 2001).

FBW asserts that the district court misreads *Kushner*, *K-Tel*, and *Navarre*. In fact, the lower court follows not only this court’s cases, but also those from other Circuits. *See, e.g., Novak v. Kasaks*, 216 F.3d 300, 309 (2d Cir. 2000) (Allegations of GAAP violations or accounting irregularities, standing alone, are insufficient to state a securities fraud claim.); *Stevelman v. Alias Research Inc.*, 174 F.3d 79, 84 (2d Cir. 1999) (Allegations of a violation of GAAP provisions or SEC regulations, without corresponding fraudulent intent, are not sufficient to state a securities fraud claim.); *Fidel v. Farley*, 392 F.3d 220, 230 (6th Cir. 2004) (The failure to follow generally accepted accounting procedures does not in and of itself lead to an inference of scienter.); *DSAM Global Value Fund v. Altris Software, Inc.*, 288 F.3d 385, 387 (9th Cir. 2002) (affirming dismissal of allegations of a “seriously botched audit” and “a compelling case of negligence—perhaps even gross negligence”); *In re Software Toolworks Inc. Sec. Litig.*, 50 F.3d 615, 627–28 (9th Cir. 1994) (affirming summary judgment for auditor, stating that “mere publication of inaccurate accounting figures, or a failure to follow GAAP, without more, does not establish scienter”).

FBW repeatedly asserts that E&Y’s audit was so cursory and superficial as to amount to “no audit at all.” *See Software*

Toolworks, 50 F.3d at 628 (auditing that is “no audit at all” shows scienter). The facts alleged here show otherwise. FBW’s complaint says that E&Y was fully aware of the risks associated with MJK’s securities borrowing and lending operations, and had an audit plan that recognized the need for closer testing of securities borrowing. FBW states that E&Y did confirm the account receivable with Native Nations, noting its excess over the value of the collateral securities, and its concentration in three issuers. According to the complaint, E&Y did interview MJK’s securities-borrowing department manager, who described the processes and procedures, and represented that he performed credit reviews “anywhere from monthly to annually by reviewing other Broker FOCUS reports.” FBW pleads that E&Y examined five files of MJK’s (approximately) 60 customers for the presence of signed agreements and annual

credit evaluations, inquired as to deficiencies in the files, and verified that securities-borrowing personnel prepared numerous reports, including daily “Balance Order Fail Reports.” According to FBW, E&Y conducted tests of internal control activities, and identified reconciliations of balance-sheet cash accounts to bank accounts, and balance-sheet securities ledgers to securities accounts. E&Y concluded that internal controls were effective, and could be relied upon to reduce the substantive audit procedures (and increase reliance on management’s representation that no subsequent events occurred after fieldwork, but before issue of the opinion). In sum, FBW alleges a poor audit, not the intent to deceive, manipulate, or defraud required for securities fraud.

Judgment for Ernst & Young affirmed.

Aiding and Abetting Until the mid-1990s, a common way investors held an auditor liable under Rule 10b–5 was to prove that the auditor aided and abetted a client’s fraud. Most courts had recognized aiding and abetting liability under Rule 10b–5 by requiring (1) a primary violation by another person (such as a client fraudulently overstating its earnings), (2) the person’s knowledge of the primary violation, and (3) the person’s substantial assistance in the achievement of the primary violation (such as an auditor’s failure to disclose a client’s fraud known to the auditor).

In 1994 in the *Central Bank* case discussed earlier, the Supreme Court of the United States held that those who merely aid and abet Rule 10b–5 violations have no liability to those injured by the fraud. The court drew a distinction between those **primarily** responsible for the fraud—who retain Rule 10b–5 liability—and those **secondarily** responsible—who no longer have liability under Rule 10b–5. The distinction between primary and secondary responsibility is unclear. Issuing unqualified opinions regarding false financial statements is primary fault and would impose Rule 10b–5 liability on the auditor. However, an independent accountant’s work in connection with false unaudited statements or other financial information released by a client may be only secondary and may not impose Rule 10b–5 liability on the accountant.

The Supreme Court affirmed and explained its *Central Bank* ruling in *Stoneridge Investment Partners*.³ You can read that case in Chapter 45 on page 1146.

Although auditors are not liable to private litigants for merely secondary activities, Congress has made it clear that the SEC may prosecute accountants for aiding and abetting a client’s violation of Rule 10b–5. Even so, the risk of liability is slight, because Rule 10b–5 liability is imposed only on those who act with scienter.

Securities professionals may be primarily responsible for misstatements or omissions of material facts in a variety of contexts, and therefore may have Rule 10b–5 liability to nonclients and clients. For example, an underwriter who drafts an offering memorandum for a client’s Rule 506 securities offering is primarily responsible for that document, as well as oral statements the underwriter makes about the issuer and the securities to a prospective investor. Securities brokers may have Rule 10b–5 liability for churning their clients’ accounts to generate high commissions for the broker. In addition, brokers may have liability under Rule 10b–5 for giving fraudulent advice to clients. Such cases are difficult to prove, as illustrated in *Carr v. CIGNA Securities, Inc.*, which appears in Chapter 45, Securities Regulation, on page 1141.

Extent of Liability The Private Securities Litigation Reform Act limits the liability of most auditors and securities professionals to the amount of an investor’s loss for which the defendant is responsible. This means that a defendant has *proportionate liability* and need no longer fear being liable for investors’ entire losses when a fraudulent client is unable to pay its share of the damages. The determination of the percentage of the loss for which a defendant is responsible is a question for the jury. Note, however, the Reform Act provides that when a person knowingly commits a violation of the securities laws, the

CONCEPT REVIEW

Liability Sections of the 1933 Act and 1934 Act

| | Wrongful Conduct | Covered Communications | Who May Sue? | Must the Plaintiff Prove Reliance on the Wrongful Conduct? |
|---|--|--|---|--|
| Securities Act of 1933 Section 11 | Misstatement or omission of material fact | 1933 Act registration statement only | Any purchaser of securities issued pursuant to the registration statement | No |
| Securities Act of 1933 Section 12(a)(2) | Misstatement or omission of material fact | Any communication in connection with a general distribution of securities by an issuer (except government issued or guaranteed securities) | Any purchaser of the securities offered or sold | No |
| Securities Act of 1933 Section 17(a) | Misstatement or omission of material fact | Any communication in connection with any offer to sell or sale of any security | Any purchaser of the securities offered or sold | Yes |
| Securities Exchange Act of 1934 Section 10(b) and Rule 10b-5 | Misstatement or omission of material fact | Any communication in connection with a purchase or sale of any security | Any purchaser or seller of the securities | Yes |
| Securities Exchange Act of 1934 Section 18 | False or misleading statement of material fact | Any document filed with the SEC under the 1934 Act (includes the 1934 Act registration statement, 10-K, 8-K, and proxy statements) | Any purchaser or seller of a security whose price was affected by the statement | Yes |

defendant may be required to pay an investor's entire loss.

State Securities Law All states have securities statutes with liability sections. Most of the states have a liability section similar to Section 12(a)(2) of the Securities Act.

Securities Analysts' Conflicts of Interest

For years, investors have known that stock recommendations and research reports by securities analysts in major investment banking firms are almost always overly

Liability Sections of the 1933 Act and 1934 Act

| Who May Be Sued? | Must the Plaintiff and Defendant Be in Privity of Contract? | Defendant's Level of Fault | Who Has the Burden of Proving or Disproving Defendant's Level of Fault? |
|---|---|--|--|
| Issuer, underwriters, directors, signers (CEO, CFO, and CAO must sign), and experts who contribute to the registration statement (such as auditors of financial statements) | No | Negligence, except for the issuer. Issuer is liable without regard to fault. | Defendant, except issuer, may escape liability by proving due diligence. There are two defenses, but for most defendants for most parts of the registration statement, the defense is that he made a reasonable investigation and had reason to believe and did believe there were no misstatements or omissions of material fact. |
| Any person who sells a security or actively solicits a sale of a security | Yes (although met by a defendant who has a financial interest in a sale of securities) | Negligence | Defendant may escape liability by proving he did not know and could not reasonably have known of the misstatement or omission of material fact. |
| Any person responsible for the misstatement or omission | No | Negligence for some parts of Section 17(a); scienter for one part | Plaintiff must prove the defendant acted negligently or with scienter, depending on the subsection. |
| Any person primarily responsible for the misstatement or omission | No, but defendant must communicate with the plaintiff or know or should know plaintiff will receive the communication with the misstatement or omission | Scienter | Plaintiff must prove the defendant acted with scienter. |
| Any person who made or caused the statement to be made | No | Scienter | Defendant may escape liability by proving he acted in good faith with no knowledge that the statement was false or misleading. |

optimistic. Few analysts have recommended that investors sell a stock. Almost all recommendations are strong buy, buy, accumulate, or hold, with a few sell recommendations sprinkled in. The reasons for such optimism vary from an unwillingness to say anything bad to a belief that a bull market will sustain rising securities prices. But the

reason that caught the attention of securities regulators is that analysts may have a conflict of interest. The belief is that full-service investment firms that have securities research, brokerage, and investment banking departments discourage their securities analysts from giving poor recommendations for a public company's stock for

The Global Business Environment

Global Internet Offerings

In a world linked by e-mail and the Internet, local offerings of securities can become international and attract the interest of securities regulators in countries whose citizens access a foreign securities offering Web site. When a foreign issuer does not register its issuance with the SEC in the United States, the issuer or a securities broker must make sure that offering materials are not sent to American investors. When offering information is sent by e-mail, there is a clear violation. When a securities offering is made on a Web page, it may be difficult to determine whether the securities offering was sent to American investors. An SEC release attempts to clarify the matter by stating that Web offerings will not come under U.S. regulation as long as the broker takes precautionary measures that are “reasonably designed to ensure that offshore Internet offers are not targeted” at the American investors. In practice, the Internet makes it difficult to discern what constitutes targeting U.S. investors. However, the SEC

provides a safe harbor for foreign brokers by allowing them to post a conspicuous disclaimer on the Web site either listing the countries in which the broker’s services are available or stating that the services are not available to American investors.

In the United Kingdom, the Financial Services Authority (FSA) has strict provisions for the treatment of material on overseas Web sites that is accessible in the U.K. but not intended for U.K. investors. The law states that any Web offering will fall within the definition of restricted activities in the U.K. if it contains any unauthorized invitation to buy securities. Unlike U.S. law, U.K. law provides that conspicuous disclaimers by themselves are insufficient to stop an investment advertisement from being made available to U.K. investors. In Australia, the Securities and Investments Commission issued a policy statement that Australian law covers investments that target people in Australia or operate within Australia. Therefore, Australian securities law does not regulate offshore offerings that do not affect Australians.

fear that a poor recommendation will offend the company’s management and cause the company to award valuable investment banking business to a more cooperative investment firm. Some investment firms even threatened to lower public companies’ stock recommendations unless the companies awarded investment banking business to the firms.

The Sarbanes–Oxley Act (SOX) directed the SEC to adopt or to direct the national securities exchanges and NASD to adopt rules to address research analysts’ conflicts of interest. SOX requires the rules to accomplish the following:

- Restrict prepublication approval of analysts’ research reports by investment banking or other nonresearch personnel in the firm.
- Limit supervision and evaluation of securities analysts’ compensation to persons not in the investment banking side of the firm.
- Prohibit investment banking personnel from retaliating against a securities analyst because of a negative research report.
- Set time periods during which firms involved in an underwriting of public issuances may not publish research reports about the issuer and its securities.
- Place information partitions to separate research analysts from review, pressure, or oversight by those whose investment banking activities might bias their judgment.
- Require securities analysts to disclose in public appearances and research reports any conflict of interest,

including whether the analyst owns the issuer’s securities, whether compensation has been received by the firm or analyst, and whether the issuer is currently or has been a client of the firm in the last year.

The SEC has adopted Regulation AC (Analyst Certification). Although not designed to implement the requirements of SOX, Regulation AC requires an analyst’s research report to include the analyst’s certification that the views expressed in the report accurately reflect her personal views. Regulation AC also requires a securities analyst to certify whether or not any part of her compensation is related to her recommendation of a security or to her views contained in a company research report. The rule also restricts the relationship between research and investment banking departments of a securities firm, as well as their relationships with companies covered by a securities firm’s research reports.

The SEC also has approved NYSE and NASD rules regarding analysts’ conflicts of interest. The rules are substantially similar. They prohibit a securities firm from offering favorable research to a company in order to induce the company to use the securities firm’s investment banking service. The rules increase analyst independence by prohibiting investment banking personnel from supervising analysts or approving research reports. Analyst compensation may not be tied to a specific investment banking services transaction. Also, an analyst is restricted in trading for his personal account in securities he recommends. The SEC release discussing and

Ethics in Action

Securities and Investment Banking Firms Lose and Settle Conflict of Interest Cases

In the past few years, several securities firms and investment companies have settled or lost actions brought by investors, the SEC, the NASD, and other government and regulatory bodies in the face of allegations of conflicts of interest.

In 2003, securities firm and investment bank Goldman, Sachs & Co. agreed with the SEC, NASD, NYSE, and state regulators to pay \$25 million in restitution and an additional \$25 million in penalties, plus \$50 million to provide the firm's clients with independent research and \$10 million for investor education. The settlement stemmed from allegations that Goldman's research analysts were subject to inappropriate influence by Goldman's investment banking services. For example, Goldman required its analysts to prepare business plans that discussed the steps analysts planned to take to assist investment banking efforts. In preparing these business plans, analysts were required to answer such questions as "How much of your time will be devoted to IBD [investment banking division]?" and "How can you work more effectively with IBD to exploit the opportunities available to the firm?" In response to the question "What are the three most important goals for you in 2000?" one analyst replied, "1. Get more investment banking revenue. 2. Get more investment banking revenue. 3. Get more investment banking revenue."

A NASD arbitration panel ordered securities firm Merrill Lynch to pay \$1 million to a Florida couple for failing to disclose that its analysts were recommending companies to Merrill Lynch customers that they privately disparaged. The analysts gave the companies positive recommendations in order for Merrill Lynch to obtain the companies' investment banking business.

Securities firm Morgan Stanley was charged by the NASD with improperly rewarding its brokers with tickets to concerts and sporting events in an attempt to boost sales of Morgan Stanley's mutual funds. Morgan Stanley agreed to pay a fine of \$2 million.

In settlements with the SEC and state prosecutors, several mutual fund sellers, including Bank of America, FleetBoston Financial, and Putnam Investments agreed to pay hefty fines and make restitution to investors in light of allegations their employees engaged in "market timing" of the firms' mutual funds. Market timing involves frequent trading, usually in international funds, to exploit "stale" mutual fund prices that exist due to time zone differences. The practice allegedly hurts the returns of long-term shareholders of the mutual funds. Bank of America agreed to pay \$250 million in restitution and \$125 million in fines; FleetBoston, \$70 million in restitution and \$70 million in fines; Putnam, \$10 million in restitution and \$100 million in fines.

approving the NYSE and NASD rules may be viewed at www.sec.gov/rules/sro/34-48252.htm.

The NASD and the NYSE also passed rules on analysts' conflicts of interest prior to passage of SOX. The rules are substantially similar. They ban favorable research for pay, prohibit analyst compensation based on specific investment banking services, and limit the submission of a research report to an issuer prior to publication of the report.

Limiting Professionals' Liability: Professional Corporations and Limited Liability Partnerships

Every state permits professionals to incorporate their business under a professional incorporation statute.

While there are significant taxation advantages to incorporation, the principal advantage of incorporation—*limited liability of the shareholders*—does not isolate

professionals from liability for professional misconduct. For example, an accountant who injures his client by failing to act as the ordinarily prudent accountant would act has liability to his client, despite the incorporation of the accountant's business.

When two or more professionals conduct business as co-owners, however, the corporation—unlike the partnership—does offer them limited liability. While partners in a partnership are jointly and severally liable for each other's negligence, states permit incorporated professionals to escape liability for their associate's torts, unless the professional actually supervised the wrongdoing associate or participated in the tort.

Reacting to the large personal liability sometimes imposed on lawyers and accountants for the professional malpractice of their partners, Texas enacted in 1991 the first statute permitting the formation of limited liability partnerships (LLP). An LLP is similar to a partnership, except that a partner's liability for his partners' professional malpractice is limited to the partnership's assets, unless the partner supervised the work of the wrongdoing partner. A partner retains unlimited liability for his

own malpractice and, in some states, for all *non*-professional obligations of the partnership.

Nearly every state and the District of Columbia have passed LLP statutes. The LLP has become the preferred form of business for professionals who do not incorporate.

For more information on the limited liability partnership, see Chapters 37–39.

Qualified Opinions, Disclaimers of Opinion, Adverse Opinions, and Unaudited Statements

After performing an audit of financial statements, an independent auditor issues an opinion letter regarding the financial statements. The **opinion letter** expresses whether the audit has been performed in compliance with GAAS and whether, in the auditor's opinion, the financial statements fairly present the client's financial position and results of operations in conformity with GAAP. Usually, an auditor issues an **unqualified opinion**—that is, an opinion that there has been compliance with GAAS and GAAP. Sometimes, an auditor issues a qualified opinion, a disclaimer of opinion, or an adverse opinion. Up to this point, you have studied the liability of an auditor who has issued unqualified opinions yet has not complied with GAAS and GAAP.

What liability should be imposed on an auditor who discloses that he has not complied with GAAS and GAAP? An auditor is relieved of responsibility only to the extent that a qualification or disclaimer is specifically expressed in the opinion letter. Therefore, letters that purport to disclaim liability totally for false and misleading financial statements are too general to excuse an accountant from exercising ordinary skill and care.

For example, an auditor qualifies his opinion of the ability of financial statements to present the financial position of a company by indicating that there is uncertainty about how an antitrust suit against the company may be decided. He would not be held liable for damages resulting from an unfavorable verdict in the antitrust suit. He would remain liable, however, for failing to make an examination in compliance with GAAS that would have revealed other serious problems.

For another example, consider an auditor who, due to the limited scope of the audit, disclaims any opinion on the ability of the financial statements to present the financial position of the company. She would nonetheless be liable for the nondiscovery of problems that the limited audit should have revealed.

Likewise, an accountant who issued an adverse opinion that depreciation had not been calculated according to GAAP would not be liable for damages resulting from the wrongful accounting treatment of depreciation, but he would be liable for damages resulting from the wrongful treatment of receivables.

Merely preparing unaudited statements does not create a disclaimer as to their accuracy. The mere fact that the statements are unaudited only permits an accountant to exercise a lower level of inquiry. Even so, an accountant must act as the ordinarily prudent accountant would act under the same circumstances in preparing unaudited financial statements.

Criminal, Injunctive, and Administrative Proceedings

In addition to being held liable for damages to clients and third parties, a professional may be found criminally liable for his violations of securities, tax, and other laws. For criminal violations, he may be fined and imprisoned. His wrongful conduct may also result in the issuance of an injunction, which bars him from doing the same acts in the future. In addition, his wrongful conduct may be the subject of administrative proceedings by the Securities and Exchange Commission and state licensing boards. An administrative proceeding may result in the revocation of a professional's license to practice or the suspension from practice. Finally, disciplinary proceedings may be brought by professional societies and self-regulatory organizations such as the AICPA or NASD.

Criminal Liability under the Securities Laws

Both the Securities Act of 1933 and the Securities Exchange Act of 1934 have criminal provisions that can be applied to professionals. The 1933 Act imposes criminal liability for willful violations of any section of the 1933 Act, including Sections 11, 12(a)(2), and 17(a), or any 1933 Act rule or regulation. For example, willfully making an untrue statement or omitting any material fact in a 1933 Act registration statement imposes criminal liability on a person. The maximum penalty for a criminal violation of the 1933 Act is a \$10,000 fine and five years' imprisonment.

The 1934 Act imposes criminal penalties for willful violations of any section of the 1934 Act, such as Sections 10(b) and 18, and any 1934 Act rule or regulation, such as Rule 10b–5. For example, willfully making false or misleading statements in reports that are required to be filed under the 1934 Act incurs criminal liability.

Such filings include 10-Ks, 8-Ks, and proxy statements. An individual may be fined up to \$5 million and imprisoned for up to 20 years for a criminal violation of the 1934 Act; however, an individual who proves that he had no knowledge of an SEC rule or regulation may not be imprisoned for violating that rule or regulation. A professional firm may be fined up to \$25 million.

Most of the states have statutes imposing criminal penalties on professionals who willfully falsify financial

statements or other reports in filings under the state securities laws and who willfully violate the state securities laws or aid and abet criminal violations of these laws by others.

In *Natelli*, accountants permitting a client to book unbilled sales after the close of the fiscal period subjected the accountants to the criminal penalties of the 1934 Act.

United States v. Natelli

527 F.2d 311 (2d Cir. 1975)

Anthony Natelli was the partner in charge of the Washington, D.C., office of Peat, Marwick, Mitchell & Co., a large CPA firm. In August 1968, Peat, Marwick became the independent public auditor of National Student Marketing Corporation. Natelli was the engagement partner for the audit of Student Marketing. Joseph Scansaroli was Peat, Marwick's audit supervisor on that engagement.

Student Marketing provided its corporate clients with a wide range of marketing services to help them reach the lucrative youth market. In its financial statements for the nine months ended May 31, 1968, Student Marketing had counted as income the entire amount of oral customer commitments to pay fees in Student Marketing's "fixed-fee marketing programs," even though those fees had not yet been paid. They were to be paid for services that Student Marketing would provide over a period of several years. Standard accounting practice required that part of the unpaid fees be considered income in the present year but that part be deferred as income until the years when Student Marketing actually performed the services for which the fees were paid. Therefore, in making the year-end audit, Natelli concluded that he would use a percentage-of-completion approach on these commitments, taking as income in the present year only those fees that were to be paid for services in that year.

The customer fee commitments were oral only, making it difficult to verify whether they really existed. Natelli directed Scansaroli to try to verify the fee commitments by telephoning the customers but not by seeking written verification. However, Scansaroli never called Student Marketing's clients. Instead, Scansaroli accepted a schedule prepared by Student Marketing showing estimates of the percentage of completion of services for each corporate client and the amount of the fee commitment from each client. This resulted in an adjustment of \$1.7 million for "unbilled accounts receivable." The adjustment turned a loss for the year into a profit twice that of the year before.

By May 1969, a total of \$1 million of the customer fee commitments had been written off as uncollectible. The effect of the write-off was to reduce 1968 income by \$209,750. However, Scansaroli, with Natelli's approval, offset this by reversing a deferred tax item of approximately the same amount.

Student Marketing issued a proxy statement in September 1969 in connection with a shareholders' meeting to consider merging six companies into Student Marketing. The proxy statement was filed with the Securities and Exchange Commission. It contained several financial statements, some of which had been audited by Peat, Marwick. Others had not been audited, but Peat, Marwick had aided in their preparation. In the proxy statement, a footnote to the financial statements failed to show that the write-off of customer fee commitments had affected Student Marketing's fiscal 1968 income.

The proxy statement required an unaudited statement of nine months' earnings through May 31, 1969. This statement was prepared by Student Marketing with Peat, Marwick's assistance. Student Marketing produced a \$1.2 million commitment from the Pontiac Division of General Motors Corporation two months after the end of May, but it was dated April 28, 1969. At 3 AM on the day the proxy statement was to be printed, Natelli informed Randall, the chief executive officer and founder of Student Marketing, that this commitment could not be included because it was not a legally binding contract. Randall responded at once that he had "a commitment from Eastern Airlines" for a somewhat comparable amount attributable to the same period. Such a letter was produced at the printing plant a few hours later, and the Eastern commitment was substituted for the Pontiac sale in the proxy. Shortly thereafter, another Peat, Marwick accountant, Oberlander, discovered \$177,547 in "bad" commitments from 1968. These were known to Scansaroli in May 1969 as being doubtful, but they had not been written off. Oberlander suggested to the company that these commitments plus others, for a total of \$320,000, be written off, but Scansaroli, after consulting with Natelli, decided against the suggested write-off.

There was no disclosure in the proxy statement that Student Marketing had written off \$1 million (20 percent) of its 1968 sales and over \$2 million of the \$3.3 million of unbilled sales booked in 1968 and 1969. A true disclosure would have shown that Student Marketing had made no profit for the first nine months of 1969.

Subsequently, it was revealed that many of Student Marketing's fee commitments were fictitious. The attorney general of the United States brought a criminal action against Natelli and Scansaroli for violating the Securities Exchange Act of 1934 by willfully and knowingly making false and misleading statements in a proxy statement. The district court jury convicted both Natelli and Scansaroli, and they appealed.

Gurfein, Circuit Judge

The original action of Natelli in permitting the booking of unbilled sales after the close of the fiscal period in an amount sufficient to convert a loss into a profit was contrary to sound accounting practice. When the uncollectibility, and indeed, the nonexistence of these large receivables was established in 1969, the revelation stood to cause Natelli severe criticism and possible liability. He had a motive, therefore, intentionally to conceal the write-offs that had to be made.

Honesty should have impelled Natelli and Scansaroli to disclose in the footnote that annotated their own audited statement for fiscal 1968 that substantial write-offs had been taken, after year-end, to reflect a loss for the year. A simple desire to right the wrong that had been perpetrated on the stockholders and others by the false audited financial statement should have dictated that course.

The accountant owes a duty to the public not to assert a privilege of silence until the next audited annual statement comes around in due time. Since companies were being acquired by Student Marketing for its shares in this period, Natelli had to know that the 1968 audited statement was being used continuously.

Natelli contends that he had no duty to verify the Eastern commitment because the earnings statement within which it was included was unaudited. This raises the issue of the duty of the CPA in relation to an unaudited financial statement contained within a proxy statement where the figures are reviewed and to some extent supplied by the auditors. The auditors were associated with the statement and were required to object to anything they actually knew to be materially false. In the ordinary case involving an unaudited statement, the auditor would not be chargeable simply because he failed to discover the invalidity of booked accounts receivable, inasmuch as he had not undertaken an audit with verification. In this case, however,

Natelli knew the history of post-period bookings and the dismal consequences later discovered.

In terms of professional standards, the accountant may not shut his eyes in reckless disregard of his knowledge that highly suspicious figures, known to him to be suspicious, were being included in the unaudited earnings figures in the proxy statement with which he was associated.

There is some merit to Scansaroli's point that he was simply carrying out the judgments of his superior, Natelli. The defense of obedience to higher authority has always been troublesome. There is no sure yardstick to measure criminal responsibility except by measurement of the degree of awareness on the part of a defendant that he is participating in a criminal act, in the absence of physical coercion such as a soldier might face. Here the motivation to conceal undermines Scansaroli's argument that he was merely implementing Natelli's instructions, at least with respect to concealment of matters that were within his own ken. The jury could properly have found him guilty on the specification relating to the footnote.

With respect to the Eastern commitment, Scansaroli stands in a position different from that of Natelli. Natelli was his superior. He was the man to make the judgment whether or not to object to the last-minute inclusion of a new commitment in the nine-months statement. There is insufficient evidence that Scansaroli engaged in any conversations about the Eastern commitment or that he was a participant with Natelli in any check on its authenticity. Since in the hierarchy of the accounting firm it was not his responsibility to decide whether to book the Eastern contract, his mere adjustment of the figures to reflect it under orders was not a matter for his discretion.

Conviction of Natelli affirmed. Conviction of Scansaroli affirmed in part and reversed in part.

Other Criminal Law Violations

Tax Law Federal tax law imposes on professionals a wide range of penalties for a wide variety of wrongful conduct. At one end of the penalty spectrum is a \$50 fine for an accountant's failing to furnish a client with a copy of his income tax return or failing to sign a client's re-

turn. At the other end is a fine of \$500,000 and imprisonment of five years for tax fraud. In between is the penalty for promoting abusive tax shelters. The fine is \$1,000, or 100 percent of the defendant's income from her participation in the tax shelter, whichever is lesser. In addition, all of the states impose criminal penalties for specified violations of their tax laws.

Mail Fraud Several other federal statutes also impose criminal liability on professionals. The most notable of these statutes is the general mail fraud statute, which prohibits the use of the mails to commit fraud. To be held liable, a professional must know or foresee that the mails will be used to transmit materials containing fraudulent statements provided by her.

In addition, the general false-statement-to-government-personnel statute prohibits fraudulent statements to government personnel. The false-statement-to-bank statute proscribes fraudulent statements on a loan application to a bank or other financial institution.

RICO The Racketeer Influenced and Corrupt Organizations Act (RICO) makes it a federal crime to engage in a pattern of racketeering activity. Although RICO was designed to attack the activities of organized crime enterprises, it applies to professionals who conduct or participate in the affairs of an enterprise in almost any pattern of business fraud. A pattern of fraud is proved by the commission of two predicate offenses within a 10-year period. Predicate offenses include securities law violations, mail fraud, and bribery. Individuals convicted of a RICO violation may be fined up to \$250,000 and imprisoned up to 20 years.

A person who is injured in his business or property by reason of a professional's conduct or participation, directly or indirectly, in an enterprise's affairs through a pattern of racketeering activity may recover treble damages (three times his actual damages) from the professional. In *Reves v. Ernst & Young*,⁴ the Supreme Court held that merely by auditing financial statements that substantially overvalued a client's assets, an accounting firm was not conducting or participating in the affairs of the client's business. The Court held that the accounting firm must participate in the "operation or management" of the enterprise itself to be liable under RICO.

Other Criminal Laws While there are many other criminal laws that may be violated by professionals, one final law bears mentioning: laws against the destruction of evidence that may be used against a professional in a criminal trial. All accounting and securities firms have rules regarding document retention and destruction. For the most part, retaining documents helps a firm prove that it has met its duty to its clients. Retained documents can establish that the firm acted in a reasonable manner when it conducted an audit or made an investment recommendation, for example.

On the other hand, documents may show that the professional or her client has acted inappropriately or even illegally. In general, professionals are not compelled to retain documents that prove their or a client's guilt, provided they do not destroy documents with the intent to obstruct a criminal prosecution. The *Andersen* case, which appears near the end of this chapter, held that Arthur Andersen LLP could not be found guilty when its employees shredded evidence regarding the Enron fraud, unless it was proved that Andersen intended to impede the prosecution of a particular criminal action at the time the shredding occurred.

Injunctions Administrative agencies such as the SEC and the Internal Revenue Service may bring injunctive actions against an auditor or securities professional in a federal district court. The purpose of such an injunction is to prevent a defendant from committing a future violation of the securities or tax laws.

After an injunction has been issued by a court, violating the injunction may result in serious sanctions. Not only may penalties be imposed for contempt, but also a criminal violation may also be more easily proven.

Administrative Proceedings The SEC has the authority to bring administrative proceedings against persons who violate the provisions of the federal securities acts. In recent years, the SEC has stepped up enforcement of SEC Rule of Practice 102(e). Rule 102(e) permits the SEC to bar temporarily or permanently from practicing before the SEC a professional who has demonstrated a lack of the qualifications required to practice before it, such as an accountant who has prepared financial statements not complying with GAAP. In the Sarbanes-Oxley Act, Congress amended the 1934 Act to include the language of Rule 102(e) almost word for word.

The SEC may discipline accountants who engage in a single instance of highly unreasonable conduct that leads to a violation of professional accounting standards. The SEC may also discipline an accountant who engages in repeated, unreasonable conduct that results in a violation of professional accounting standards. For example, an auditor's conduct in reviewing a client's financial statements is unreasonable when the auditor knew or should have known that heightened scrutiny is warranted yet failed to exercise the additional scrutiny while conducting an audit.

Rule 102(e) also permits the SEC to take action against a professional who has willfully violated or aided and abetted another's violation of the securities acts. An SEC administrative law judge hears the case and makes

⁴507 U.S. 170 (1993).

an initial determination. The SEC commissioners then issue a final order, which may be appealed to a federal court of appeals.

Rule 102(e) administrative proceedings can impose severe penalties on an accountant. By suspending an accountant from practicing before it, the SEC may take away a substantial part of an accountant's practice. Also, the SEC may impose civil penalties up to \$500,000.

In addition, state licensing boards may suspend or revoke an accountant's license to practice if she engages in illegal or unethical conduct. If such action is taken, an accountant may lose her entire ability to practice accounting.

Securities Exchange Act Audit Requirements

The Private Securities Litigation Reform Act of 1995 imposes significant public duties on independent auditors that audit the financial statements of public companies. In part added to the Securities Exchange Act as Section 10A, the Reform Act requires auditors to take specific steps if they learn during the course of an audit that a client may have committed an illegal act (that is, a violation of any law, rule, or regulation). First, the auditor is required to determine whether an illegal act has in fact occurred. If the auditor determines that the client has committed an illegal act, the auditor must calculate the prospective impact on the client's financial statements, including fines, penalties, and liability costs such as damage awards to persons harmed by the client. As soon as practical, the auditor must inform the client's management and audit committee of the auditor's determination, unless the illegal act is clearly inconsequential.

If the client's management does not take appropriate remedial action with respect to an illegal act that has a material effect on the financial statements of the client—and if the failure to take remedial action is reasonably expected to result in the auditor's issuance of a nonstandard report or resignation from the audit engagement—the auditor must make a report to the client's board of directors. The board of directors has one business day to inform the SEC of the auditor's report; if the board does not submit a report to the SEC, the auditor has one additional business day to furnish a copy of its report to the SEC, whether or not the auditor also resigns from the audit engagement.

Section 10A imposes a significant whistle-blowing duty on independent auditors, consistent with the watchdog function that Congress and the courts have continu-

ally assigned to auditors. To encourage auditors to make such reports, Section 10A also provides that an auditor will have no liability to a private litigant for any statement in the auditor's reports given to management, the board of directors, or the SEC.

Section 10A is also the repository of many of the new securities provisions enacted under the Sarbanes–Oxley Act, including the list of services audit firms may not provide for audit clients, the audit partner rotation requirement, and the standards and duties of audit committees.

SOX Section 404 The most controversial part of the Sarbanes–Oxley Act has been Section 404, which requires public issuers to include in their annual reports an “internal control report” acknowledging management's responsibility to maintain “an adequate internal control structure and procedures for financial reports.” The purpose of Section 404 is to improve the quality of accounting records and financial statements, which had eroded in the 1990s as management and audit committees lost control of internal accounting processes.

SOX Section 404 requires management's internal control report to include:

- A statement of management's responsibility for establishing and maintaining adequate internal control over financial reporting for the company;
- Management's assessment of the effectiveness of the company's internal control over financial reporting;
- A statement identifying the framework used by management to evaluate the effectiveness of the company's internal control over financial reporting; and
- A statement that the public accounting firm that audited the company's financial statements has issued an attestation report on management's assessment of the company's internal control over financial reporting.

Thus, SOX Section 404 requires not only that management maintain adequate internal controls, but also that auditors attest to management's assessment of internal controls. This requirement imposes new duties on auditors, yet at the same time provides new opportunities for providing services at a fee.

Auditors are experienced in performing attestation engagements on a broad variety of subjects. It was not surprising, therefore, that the rulemaking body charged with setting standards for Section 404, the Public Company Accounting Oversight Board, adopted the standard used in other contexts, SSAE No. 10, as the appropriate standard for Section 404 assessments. See Chapters 4 and 45 at pages 104, 105, and 1139 for additional materials on Section 404, including the benefits and costs of compliance.

The AICPA and the Center for Audit Quality maintain the Sarbanes–Oxley Act Implementation Central. Here you will find a summary of the Sarbanes–Oxley Act and articles on how to comply with SOX.

Ownership of Working Papers

The personal records that a client entrusts to a professional during an engagement, such as accounting records during an audit, remain the property of the client. A professional must return these records to his client. Nonetheless, material created by a professional, such as working papers produced by independent auditors, belong to the accountant, not the client.

Working papers are the records made during an audit. They include such items as work programs or plans for the audit, evidence of the testing of accounts, explanations of the handling of unusual matters, data reconciling the accountant’s report with the client’s records, and comments about the client’s internal controls. The client has a right of access to the working papers. The accountant must obtain the client’s permission before the working papers can be transferred to another accountant.

No doubt in reaction to the massive shredding of Enron-related documents by the Arthur Andersen audit firm, Congress included in the Sarbanes–Oxley Act a requirement that all audit or review working papers be retained for seven years. A knowing or willful violation of the document retention rule is subject to 10 years’ imprisonment, and, if corruptly done, 20 years. The *Andersen* case follows the next section.

Professional–Client Privilege

The attorney–client privilege is well established as necessary to protect confidential communications between a lawyer and her client and to permit a lawyer to perform her professional duties for her client. The privilege protects communications between clients and their attorneys from the prying eyes of courts and government agencies. It also protects a lawyer’s working papers from the discovery procedures available in a lawsuit.

Although other professionals owe a duty of confidentiality to their clients, in general communications between clients and nonlawyer professionals are not protected from judicial and administrative agency scrutiny when the professional’s client is a party to legal or

administrative action or the professional possesses evidence probative to an action. Thus, consultants, investment bankers, underwriters, brokers, and other securities professionals may be required to testify about client communications and produce documents concerning their clients, despite the objections of the client.

Accountants, however, enjoy a status somewhere between attorneys and other professionals. While the common law does not recognize an accountant–client privilege, a large number of states have granted such a privilege by statute. An accountant–client privilege of confidentiality protects communications between accountants and their clients as well as accountants’ working papers. The provisions of the state statutes vary, but usually the privilege belongs to the client, and an accountant may not refuse to disclose the privileged material in a courtroom if the client consents to its disclosure.

Generally, the state-granted privileges are recognized in both state and federal courts deciding questions of state law. Nonetheless, federal courts do not recognize the privilege in matters involving federal questions, including antitrust, securities, and criminal matters.

In federal tax matters, for example, no privilege of confidentiality is recognized on the grounds that an accountant has a duty as a public watchdog to ensure that his client correctly reports his income tax liability. Consequently, an accountant can be required to bring his working papers into court and to testify as to matters involving the client’s tax records and discussions with the client regarding tax matters. In addition, an accountant may be required by subpoena to make available his working papers involving a client who is being investigated by the IRS or who has been charged with tax irregularities. The same holds true for SEC investigations.

Although no accountant–client privilege exists in federal tax matters, an attorney–client privilege does exist. Moreover, the attorney–client privilege will protect communications between a client and a professional when the professional is assisting an attorney in rendering advice to the client.

As Enron Corporation’s financial difficulties became public in 2001, Arthur Andersen LLP, Enron’s auditor, instructed its employees to destroy Enron-related documents pursuant to its document retention policy, actions culminating in the following case. The Supreme Court mentions a concern regarding the professional–client privilege. The holding, however, focuses on when a professional can be found guilty for destroying working papers and other evidence.

Arthur Andersen LLP v. United States

544 U.S. 696 (U.S. S. Ct. 2005)

Enron Corporation, during the 1990s, switched its business from operation of natural gas pipelines to an energy conglomerate, a move that was accompanied by aggressive accounting practices and rapid growth. Arthur Andersen LLP audited Enron's publicly filed financial statements and provided internal audit and consulting services to it. Andersen's engagement team for Enron was headed by global managing partner David Duncan. Enron's financial performance began to suffer in 2000 and continued to worsen in 2001. On August 14, 2001, Jeffrey Skilling, Enron's CEO, unexpectedly resigned. Within days, Sherron Watkins, a senior accountant at Enron, warned Kenneth Lay, Enron's newly reappointed CEO, that Enron could "implode in a wave of accounting scandals." She also informed Duncan and Michael Odom, an Andersen partner who supervised Duncan, of the problems.

A key accounting problem involved Enron's use of "Raptors," which were special-purpose entities used to engage in "off-balance-sheet" activities. Andersen's engagement team had allowed Enron to "aggregate" the Raptors for accounting purposes so that they reflected a positive return. This was a clear violation of generally accepted accounting principles.

On August 28, 2001, an article in The Wall Street Journal suggested improprieties at Enron, and the SEC opened an informal investigation. By early September, Andersen had formed an Enron "crisis-response" team, which included Nancy Temple, an in-house lawyer. On October 8, Andersen retained outside counsel to represent it in any litigation that might arise from the Enron matter. The next day, Temple discussed Enron with other in-house lawyers. Her notes from that meeting reflect that "some SEC investigation" is "highly probable."

On October 10, Odom spoke at a general training meeting attended by 89 employees, including 10 from the Enron engagement team. Odom urged everyone to comply with the firm's document retention policy. He added: "If it's destroyed in the course of normal policy and litigation is filed the next day, that's great. . . . We've followed our own policy, and whatever there was that might have been of interest to somebody is gone and irretrievable." On October 12, Temple entered the Enron matter into her computer, designating the "Type of Potential Claim" as "Professional Practice—Government/Regulatory Investigation." Temple also e-mailed Odom, suggesting that he "remind the engagement team of our documentation and retention policy."

Andersen's policy called for a single central engagement file, which "should contain only that information which is relevant to supporting our work." The policy stated that, "in cases of threatened litigation, . . . no related information will be destroyed." It also separately provided that, if Andersen is "advised of litigation or subpoenas regarding a particular engagement, the related information should not be destroyed." The policy statement set forth "notification" procedures for whenever "professional practice litigation against Andersen or any of its personnel has been commenced, has been threatened or is judged likely to occur, or when governmental or professional investigations that may involve Andersen or any of its personnel have been commenced or are judged likely."

On October 16, Enron announced its third quarter results, disclosing a \$1.01 billion charge to earnings. The following day, the SEC notified Enron by letter that it had opened an investigation and requested certain information and documents. On October 19, Enron forwarded a copy of that letter to Andersen.

On the same day, Temple also sent an e-mail to a member of Andersen's internal team of accounting experts and attached a copy of the document retention policy. On October 20, the Enron crisis-response team held a conference call, during which Temple instructed everyone to "make sure to follow the [document] policy." On October 23, Enron CEO Lay declined to answer questions during a call with analysts because of "potential lawsuits, as well as the SEC inquiry." After the call, Duncan met with other Andersen partners on the Enron engagement team and told them that they should ensure team members were complying with the document retention policy. Another meeting for all team members followed, during which Duncan distributed the policy and told everyone to comply. These, and other smaller meetings, were followed by substantial destruction of paper and electronic documents.

On October 26, one of Andersen's senior partners circulated a New York Times article discussing the SEC's response to Enron. His e-mail commented that "the problems are just beginning and we will be in the cross hairs. The marketplace is going to keep the pressure on this and is going to force the SEC to be tough." On October 30, the SEC opened a formal investigation and sent Enron a letter that requested accounting documents.

Throughout this time period, Andersen continued to destroy documents, despite reservations by some of Andersen's managers. For example, on October 26, John Riley, another Andersen partner, saw Duncan shredding documents and told him "this wouldn't be the best time in the world for you guys to be shredding a bunch of stuff." On October 31, David Stulb, a

forensics investigator for Andersen, met with Duncan. During the meeting, Duncan picked up a document with the words “smoking gun” written on it and began to destroy it, adding “we don’t need this.” Stulb cautioned Duncan on the need to maintain documents and later informed Temple that Duncan needed advice on the document retention policy.

On November 8, Enron announced that it would issue a comprehensive restatement of its earnings and assets. Also on November 8, the SEC served Enron and Andersen with subpoenas for records. On November 9, Duncan’s secretary sent an e-mail that stated: “Per Dave—No more shredding. . . . We have been officially served for our documents.” Enron filed for bankruptcy less than a month later. Duncan was fired and later pleaded guilty to witness tampering.

In March 2002, Andersen was indicted in the Southern District of Texas on one count of violating witness tampering provisions 18 U.S.C. §§1512(b)(2)(A) and (B). The indictment alleged that, between October 10 and November 9, 2001, Andersen knowingly, intentionally, and corruptly persuaded Andersen’s employees, with intent to cause them to withhold documents from, and alter documents for use in, an official proceeding. The case went to a jury, which deadlocked after deliberating for seven days. The district court instructed the jury that it could find Andersen guilty if Andersen intended to “subvert, undermine, or impede” governmental factfinding by suggesting to its employees that they enforce the document retention policy. After three more days of deliberation, the jury returned a guilty verdict. Andersen appealed to the court of appeals, which affirmed the conviction. The court of appeals held that the jury instructions properly conveyed the meaning of “corruptly persuades” and “official proceeding” and that the jury need not find any consciousness of wrongdoing. The Supreme Court granted Andersen’s request to review the decision.

Rehnquist, Chief Justice

Chapter 73 of Title 18 of the United States Code provides criminal sanctions for those who obstruct justice. Sections 1512(b)(2)(A) and (B), part of the witness tampering provisions, provide in relevant part:

Whoever knowingly uses intimidation or physical force, threatens, or corruptly persuades another person, or attempts to do so, or engages in misleading conduct toward another person, with intent to . . . cause or induce any person to . . . withhold testimony, or withhold a record, document, or other object, from an official proceeding [or] alter, destroy, mutilate, or conceal an object with intent to impair the object’s integrity or availability for use in an official proceeding . . . shall be fined under this title or imprisoned not more than ten years, or both.

In this case, our attention is focused on what it means to “knowingly . . . corruptly persuade” another person “with intent to . . . cause” that person to “withhold” documents from, or “alter” documents for use in, an “official proceeding.”

We have traditionally exercised restraint in assessing the reach of a federal criminal statute, both out of deference to the prerogatives of Congress and out of concern that a fair warning should be given to the world in language that the common world will understand, of what the law intends to do if a certain line is passed.

Such restraint is particularly appropriate here, where the act underlying the conviction—“persuasion”—is by itself innocuous. Indeed, “persuading” a person “with intent to . . . cause” that person to “withhold” testimony or documents from a Government proceeding or Government official is not inherently malign. Consider, for instance, a mother who suggests to her son that he

invoke his right against compelled self-incrimination or a wife who persuades her husband not to disclose marital confidences.

Nor is it necessarily corrupt for an attorney to “persuade” a client “with intent to . . . cause” that client to “withhold” documents from the Government. In *Upjohn Co. v. United States*, 449 U.S. 383 (1981), for example, we held that Upjohn was justified in withholding documents that were covered by the attorney–client privilege from the Internal Revenue Service. No one would suggest that an attorney who “persuaded” Upjohn to take that step acted wrongfully, even though he surely intended that his client keep those documents out of the IRS’s hands.

“Document retention policies,” which are created in part to keep certain information from getting into the hands of others, including the Government, are common in business. It is, of course, not wrongful for a manager to instruct his employees to comply with a valid document retention policy under ordinary circumstances.

Acknowledging this point, the parties have largely focused their attention on the word “corruptly” as the key to what may or may not lawfully be done in the situation presented here. Section 1512(b) punishes not just “corruptly persuading” another, but “knowingly . . . corruptly persuading” another. The Government suggests that “knowingly” does not modify “corruptly persuades,” but that is not how the statute most naturally reads. It provides the *mens rea*—“knowingly”—and then a list of acts—“uses intimidation or physical force, threatens, or corruptly persuades.” The Government suggests that it is questionable whether Congress would employ such an inelegant formulation as “knowingly . . . corruptly persuades.” Long experience has not taught us to share the Government’s doubts on this score, and we must simply interpret the statute as written.

The parties have not pointed us to another interpretation of “knowingly . . . corruptly” to guide us here. In any event, the natural meaning of these terms provides a clear answer. “Knowledge” and “knowingly” are normally associated with awareness, understanding, or consciousness. “Corrupt” and “corruptly” are normally associated with wrongful, immoral, depraved, or evil. Joining these meanings together here makes sense both linguistically and in the statutory scheme. Only persons conscious of wrongdoing can be said to “knowingly . . . corruptly persuade.” And limiting criminality to persuaders conscious of their wrongdoing sensibly allows §1512(b) to reach only those with the level of “culpability . . . we usually require in order to impose criminal liability.”

The outer limits of this element need not be explored here because the jury instructions at issue simply failed to convey the requisite consciousness of wrongdoing. Indeed, it is striking how little culpability the instructions required. For example, the jury was told that, “even if Andersen honestly and sincerely believed that its conduct was lawful, you may find Andersen guilty.” The instructions also diluted the meaning of “corruptly” so that it covered innocent conduct.

The District Court based its instruction on the definition of that term found in the Fifth Circuit Pattern Jury Instruction for §1503. This pattern instruction defined “corruptly” as “knowingly and dishonestly, with the specific intent to subvert or undermine the integrity” of a proceeding. The Government, however, insisted on excluding “dishonestly” and adding the term “impede” to the phrase “subvert or undermine.” The District Court agreed over Andersen’s objections, and the jury was told to convict if it found Andersen intended to “subvert, undermine, or impede” governmental factfinding by suggesting to its employees that they enforce the document retention policy.

These changes were significant. No longer was any type of “dishonesty” necessary to a finding of guilt, and it was enough for petitioner to have simply “impeded” the Government’s factfinding ability. “Impede” has broader connotations than “subvert” or even “undermine,” and many of these connotations do not incorporate any “corruptness” at all. The dictionary defines “impede” as “to interfere with or get in the way of the progress of” or “hold up” or “detract from.” By definition, anyone who innocently persuades another to withhold information from the Government “gets in the way of the progress of” the Government.

The instructions also were infirm for another reason. They led the jury to believe that it did not have to find *any* nexus between the “persuasion” to destroy documents and any particular proceeding. In resisting any type of nexus element, the Government relies heavily on §1512(e)(1), which states that an official proceeding “need not be pending or about to be instituted at the time of the offense.” It is, however, one thing to say that a proceeding “need not be pending or about to be instituted at the time of the offense,” and quite another to say a proceeding need not even be foreseen. A “knowingly . . . corrupt persuader” cannot be someone who persuades others to shred documents under a document retention policy when he does not have in contemplation any particular official proceeding in which those documents might be material. If the defendant lacks knowledge that his actions are likely to affect the judicial proceeding, he lacks the requisite intent to obstruct.

For these reasons, the jury instructions here were flawed in important respects.

Judgment reversed in favor of Andersen.

Problems and Problem Cases

1. Lincoln Assurance Company engages audit firm Accent Pointe LLP to review its financial statements and internal controls. Accent Pointe examines Lincoln’s expense ledger, which lists the creditors to whom Lincoln has made payments for supplies and services rendered to Lincoln, such as stationery, electricity, and phone. Accent Pointe makes no effort to verify that the payments were made to real creditors by randomly asking creditors to confirm that they had billed Lincoln and received payment. As a result, Accent Pointe fails to uncover an ongoing embezzlement by Lincoln’s bookkeeper, who for the

past six months has been writing checks to a fictitious creditor and then cashing the checks herself. The total amount of the checks is \$155,000. When Lincoln uncovers the embezzlement scheme three months later, the bookkeeper has embezzled an additional \$45,000. Is Accent Pointe liable to Lincoln for failing to uncover the embezzlement scheme?

2. Diversified Graphics, Ltd., hired Ernst & Whinney to assist it in obtaining a computer system to fit its data processing needs. DG had a long-standing relationship with E&W and developed great trust and reliance on E&W’s services. Because DG lacked computer expertise, it decided to entrust E&W with the selection and implementation of an in-house

computer data processing system. E&W promised to locate a “turnkey” system, which would be fully operational without the need for extensive employee training. Instead, DG received a system that was difficult to operate and failed to meet its needs. Is E&W liable to DG?

3. Sonny Martinez opened a securities brokerage account with Edelstein & Co., depositing \$680,000 in the account. Martinez was 10 years from his retirement and wanted his funds to be invested in blue chip stocks, which through capital appreciation and dividends would increase in value to \$1,300,000 by the time of his retirement. Martinez’s broker at Edelstein invested Martinez’s funds in blue chip stocks like IBM, Procter & Gamble, and Merck, but he traded the account almost daily, sometimes holding a stock for only a matter of days and holding no stock for longer than 13 months. The broker executed over 4,000 trades in a two-year period, generating commissions of over \$200,000. As a result of the broker’s trading strategy, the value of Martinez’s account declined to \$300,000. During the same period, the Dow Jones Industrial Average increased 22 percent. May Martinez recover from the broker under contract law, the law of negligence, and Rule 10b–5 of the 1934 Act?
4. Scioto Memorial Hospital Association, Inc., planned the construction of Richmond Place, a 170-unit retirement center in Lexington, Kentucky. Scioto hired Price Waterhouse to review the work of the architect, the financial underwriter, and the marketing consultant and to recommend whether Scioto should proceed with the Richmond Place investment. PW’s engagement letter represented that PW would issue a preliminary feasibility study and review a detailed financial forecast of the project. Financial forecasts represent management’s judgment of the most likely set of conditions and management’s most likely course of action. Instead of reviewing a financial forecast for Richmond Place, PW reviewed only a financial projection compiled by the underwriter of the construction. As PW explained in its letter to Scioto, a projection “represents management’s estimate of its possible, but not necessarily most probable, future course of action.” PW’s final report to Scioto assumed an occupancy rate of 98 percent. Unfortunately, construction of Richmond Place was slow and delayed by a fire. While Scioto used insurance proceeds to rebuild, sales of the units were slow, and a year after opening, only 15 residents occupied Richmond Place. Scioto sued PW for negligence and breach of contract. PW defended on the grounds that Scioto’s delays in construction and its lack of business interruption insurance caused Scioto’s damages. Was PW found liable to Scioto?
5. Piece Goods Shops Company, L.P., hired Price Waterhouse LLP to audit its 1992 financial statements. Piece Goods forwarded the audited 1992 financial statements to Marcus Brothers Textiles, Inc., which made several extensions of credit to Piece Goods up to April 1993 in reliance on the 1992 balance sheet. When Piece Goods filed for bankruptcy in April 1993, Piece Goods owed Marcus Brothers almost \$300,000. Marcus Brothers sued PW for negligent misrepresentation under state law on the grounds PW negligently conducted the audit of the 1992 financial statements, which Marcus Brothers alleged contained several material misstatements. PW moved to dismiss the case on the grounds that PW did not know that Marcus Brothers would be using the financial statements to make credit extension to Piece Goods. Marcus Brothers produced evidence that PW had been Piece Goods’s auditor since 1986. A PW internal memo stated that PW had historically reported on Piece Goods’s financial statements and that its vendors were accustomed to receiving those financial statements. A PW audit partner signed a memo stating that some of PW’s audit clients typically provided their audited financial statements to their trade creditors in reference to obtaining loans or extensions of credit. An audit manager who oversaw the audit of Piece Goods’s 1992 financial statements testified that audited financial statements are used by management of the company and possibly outsiders and that such outsiders could include trade creditors such as Marcus Brothers. Piece Goods’s bankruptcy filing revealed that 43 of its trade creditors had received the audited 1992 financial statements. Under the *Restatement (Second) of Torts*, is Marcus Brothers a proper plaintiff to whom PW owed a duty not to be negligent when conducting the audit?
6. Due to alleged overstatements of the value of loans held by First National Bank of Keystone (Keystone), the federal Office of the Comptroller of the Currency (OCC) began investigating Keystone. OCC required Keystone to retain an auditor to determine the appropriateness of Keystone’s accounting treatments of its purchased loans and securitization of loans. Keystone hired Grant Thornton LLP to perform an audit

of Keystone's financial statements. In April 1999, Grant Thornton issued an audit opinion to Keystone stating that its 1998 financial statements—which showed shareholder equity of \$84 million—were fairly stated in accordance with GAAP. In fact, Keystone was insolvent. Grant Thornton's audit report stated that "This report is intended for the information and use of the Board of Directors and Management of The First National Bank of Keystone and its regulatory agencies and should not be used by third parties for any other purpose." Gary Ellis, a candidate to become Keystone's next president, reviewed in April 1999 the 1998 financial statements audited by Grant Thornton. At the time, Ellis was president of another bank and not an employee of Keystone. He became a candidate for the Keystone presidency in late March 1999. Relying on the audit, Ellis decided to accept Keystone's offer to be its president at a base salary of \$375,000. He also purchased \$49,500 in Keystone stock. When Keystone failed, Ellis claimed he lost over \$2 million in compensation he would have earned had he not taken the Keystone presidency, as well as losing the full amount of his investment in Keystone stock. He sued Grant Thornton for negligent misrepresentation. Under the *Restatement (Second) of Torts*, was Ellis a proper plaintiff to whom Grant Thornton owed a duty not to be negligent when conducting the audit?

7. Kibbmann & Co., an investment banking firm, acted as the underwriter for Vartarian Corporation's public issuance of common shares. Kibbmann prepared the 1933 Act registration statement that was filed with the SEC and the prospectus that investors received. Kibbmann also accompanied Vartarian's CEO and CFO to road shows where Kibbmann spoke with mutual funds and other institutional investors interested in purchasing Vartarian's stock. Kibbmann's compensation for assisting Vartarian was a 25-cent spread on each share sold. Due to its negligent investigation of Vartarian's business, Kibbmann made material misstatements of fact in the registration statement and prospectus and during the road show. Did Kibbmann have liability to purchasers of the shares who attended the road show under Section 12(a)(2) of the 1933 Act, Rule 10b-5 of the 1934 Act, and the common law of negligent misrepresentation? Did Kibbman have liability to purchasers of the shares under Section 11 of the 1933 Act?
8. Sonya Kwan, a 75-year-old retired factory worker, opened a securities account with Barton & Associates, a brokerage firm. She completed a customer account agreement form in which she disclosed her assets, liabilities, income, expenses, and investment objectives. That form indicated that it was important for her to maintain a steady income stream to augment her pension and Social Security income. Nonetheless, Kwan's broker advised her to purchase the stock of a high-risk company that paid no dividends to its shareholders. Kwan, who was not a sophisticated investor, followed her broker's advice and purchased the stock. Within two months, the company was dissolved and Kwan lost her entire investment. Kwan later discovered that her broker was a significant investor in the company. May Kwan recover from the analyst under Rule 10b-5 of the 1934 Act? Is Kwan able to recover under the common law of negligent misrepresentation, fraud, or breach of trust?
9. Norman Cross was the independent auditor for Home-Stakes Production Company, a company that offered investors interests in oil and gas drilling programs. The programs offered investors both income and tax deductions. Cross issued unqualified opinions regarding Home-Stakes's financial statements. He prepared consolidated financial statements and start-up balance sheets for two programs. All these documents were included, with Cross's consent, in 1933 Act registration statements filed with the SEC and included in prospectuses and program books distributed to investors. When Home-Stakes collapsed after it was discovered that the oil and gas drilling programs were a classic Ponzi scheme (with investments from new investors providing the "profits" to old investors), purchasers of the programs sued Cross under Securities Exchange Act Section 10(b) and Rule 10b-5. Was Cross found liable, or was he only an aider and abettor to Home-Stakes's fraud with no Rule 10b-5 liability?
10. Floogle, Inc., a provider of a variety of Internet services, decides to make a public offering of its common shares. It retains investment bank Sturm & Drang Company to underwrite the offering and assist in the marketing of the common shares. Accounting firm Barnes Jonson LLP audits the financial statements that will be included in the 1933 Act registration statement that will be filed with the SEC. Floogle's income statement for the last fiscal year materially overstates Floogle's earnings, indicating that earnings were \$1.25 per share when in reality earnings were only \$0.03 per share. The

earnings misstatement is known both to Sturm & Drang and Barnes Jonson. Nonetheless, when meeting with prospective investors, Sturm & Drang tells investors “last year’s earnings were a robust \$1.25 per share.” Barnes Jonson also issues an opinion that Floogle’s financial statements fairly present the financial position of Floogle. Investors purchase Floogle’s common shares relying on Sturm & Drang’s representation of Floogle’s earnings and Barnes Jonson’s audit opinion. When Floogle’s real earnings are released three months later, the purchasers of Floogle’s shares sue both Sturm & Drang and Barnes Jonson under Rule 10b–5 of the Securities Exchange Act of 1934. Both Sturm & Drang and Barnes Jonson claim they are not liable under Rule 10b–5, because they merely aided and abetted Floogle’s fraud. Are they correct?

11. Walter Piecyk, a broker and analyst with securities firm Fulcrum Global Partners, heard a rumor that Nokia Corp., the largest customer of RF Micro Devices Inc., was going to delay equipment orders from RF Micro. After short-selling RF Micro stock, Piecyk spread the rumor, which was highly sensational. RF Micro’s stock fell 5 percent that day. The next day, when RF Micro publicly denied the rumor (which was completely false), the stock fell another 8 percent, apparently because the market believed the rumor, not RF Micro. The market price continued to fall, as the rumor persisted, and Piecyk eventually covered his short sale, making a profit of about \$8,000. RF Micro asked the NASD to take disciplinary action against Piecyk on the grounds that he had not adequately investigated whether there was a reasonable basis for the rumor. Did the NASD discipline Piecyk?
12. Accounting firm Procenture LLP was hired to audit fiscal year 2008 financial statements of Bard-Gramercy Corporation, a public company with assets of \$7.3 billion and a market value of \$2.7 billion. Procenture completed the audit, and its audit opinion was included in Bard-Gramercy’s annual report filed with the SEC. Because of time constraints, Procenture did a cursory review of Bard-Gramercy’s internal financial controls, essentially asking management and receiving oral confirmation that management was satisfied with Bard-Gramercy’s processes for recording financial transactions. Although Procenture’s audit

opinion made no mention of Bard-Gramercy’s internal controls, Procenture was confident based on its inquiries that Bard-Gramercy’s internal controls were adequate. Did Procenture meet its duty under the Sarbanes–Oxley Act of 2002?

13. Media personality Martha Stewart was investigated by the SEC for alleged insider trading in the stock of ImClone Systems. Stewart was a friend of Sam Waksal, founder and former chief executive of ImClone, who pleaded guilty in October 2002 to several counts of bank fraud, securities fraud, conspiracy to obstruct justice, and perjury. Stewart sold nearly 4,000 shares of ImClone stock in December 2001, just one day before the U.S. Food and Drug Administration announced it would reject ImClone’s application for approval of its cancer-fighting drug Erbitux. That announcement sent the company’s stock into a tailspin. The SEC believed Stewart may have been tipped off by Waksal about the looming FDA decision, but Waksal did not implicate Stewart. Stewart asserted that she told her broker, Peter Bacanovic of Merrill Lynch, to sell her shares if ImClone’s stock dropped below \$60 a share. The stock fell to \$58 the day she sold. If the SEC wanted to know all communications between Stewart and her broker Bacanovic, may Stewart invoke a professional–client privilege to prevent the SEC’s discovery of her confidential communications with Bacanovic?

Sarbanes–Oxley Act Section 404

The cost of initial compliance with SOX Section 404 has made it a lightning rod for criticism by companies, especially small issuers. Keep abreast of the current status of SOX Section 404, especially these issues:

- Has the cost of complying with SOX 404 fallen as management and auditors have become more experienced at performing assessments and attestations?
- Have the expected benefits of SOX 404 been realized?
- In light of the credit crunch of 2008–2009, has Congress taken steps to lighten the burdens of SOX 404 or expand them?

ADMINISTRATIVE AGENCIES

During the mid-1990s, the Food and Drug Administration (FDA) adopted various regulations that restricted advertising and other marketing practices regarding tobacco products. The FDA premised these regulations on the theory that nicotine was a “drug” and cigarettes were a drug-delivery “device” for purposes of the Food, Drug, and Cosmetic Act, which gives the FDA the authority to regulate such items.

Various tobacco companies and other parties challenged the regulations in federal court, arguing that Congress had not given the FDA authority to regulate tobacco products and that in any event, the advertising restrictions contemplated by the regulations violated the First Amendment. The litigation, which made its way to the ultimate forum—the United States Supreme Court—suggested fundamental questions that arise in the field of *administrative law*:

- In what subject matter area has the relevant administrative agency been granted authority to regulate by Congress or, at the state level, by the state legislature? What are the specific boundaries of that subject matter area?
- In what ways has the administrative agency been empowered by Congress or the state legislature to exercise its regulatory authority? What restrictions, if any, have been placed by Congress or the state legislature on the ways in which the agency may regulate?
- Do regulations (i.e., rules) adopted by an administrative agency have the same force of law that statutes have?
- How do constitutional provisions affect the regulatory actions that administrative agencies may take?

As you will see, the Supreme Court held in *FDA v. Brown & Williamson Tobacco Corp.*, 529 U.S. 120 (2000), that given a series of statutes enacted over the years, Congress did not intend for the FDA to have authority to regulate tobacco as part of its otherwise broad authority in the Food, Drug, and Cosmetic Act. Because the FDA did not have authority to regulate tobacco, the Court did not need to address the full list of questions set forth above. Your understanding of administrative law, however, will be enhanced if you consider the questions as you study this chapter.

Keep in mind, too, that changes in prevailing political winds may influence congressional decisions on whether to extend regulatory authority to an administrative agency. Authority not previously delegated by Congress can be delegated, and vice versa. For instance, the U.S. House of Representatives overwhelmingly passed a 2008 bill that, if enacted, would extend tobacco regulatory authority to the FDA. As this book went to press in 2008, the Senate appeared likely to pass the bill, though probably not by a veto-proof margin (an apparent problem because President Bush had promised a veto if both houses passed the bill). However, with President-Elect Obama having expressed support for the bill, prospects that the FDA would ultimately be granted authority to regulate tobacco appeared good.

TODAY’S BUSINESSES OPERATE IN a highly regulated environment. The *administrative agency* serves as a primary vehicle for the creation and enforcement of

modern regulation. As governmental bodies that are neither courts nor legislatures, administrative agencies have the legal power to take actions affecting the rights of

Ethics in Action

Controversies over the roles and actions of administrative agencies often present both legal and ethical issues. Consider the example of the federal Food and Drug Administration (FDA), whose various legal responsibilities include issuing so-called *new drug approvals* before newly developed medications can lawfully be sold in the United States. A pharmaceutical maker seeking a new drug approval must provide the FDA with considerable documentary information, including clinical trial results, in order to enable the FDA to determine that the medication is likely to be effective for its intended purposes without posing undue dangers to consumers who will use it.

Although the determination just mentioned is of course a legal matter, ethical questions necessarily are present as well. For instance, in deciding whether to approve a new drug, how should decision makers at the FDA balance the health benefits many consumers would be likely to receive against the harm that other consumers could experience as a result of clinically documented side effects? What are the potential consequences for society if the new medication is approved and, alternatively, if it is not approved? If a new drug appears likely to produce tremendous health benefits for most users but potentially devastating health consequences for other users, has the FDA discharged any ethical obligations it may have if it allows the new drug to be sold but requires a warning on the product's label or in its package insert?

Other questions combining legal and ethical concerns may arise if, after FDA approval occurs and a medication becomes

widely used and generally successful for its intended purpose, serious health dangers for some users come to light. Such a situation arose in recent years in regard to prescription pain relievers in the COX-2 inhibitor category. After Merck & Co.'s Vioxx brand pain reliever became heavily prescribed with largely positive results, the adverse experiences of some users led to concern over possible links between long-term Vioxx use and an increased risk of heart attacks or strokes. Merck eventually withdrew Vioxx from the market on a voluntary basis, but not before some commentators criticized the FDA for supposedly devoting too many FDA resources to the initial drug approval process and not enough resources to follow-ups designed to assess the postapproval track records of pharmaceutical products. Whether fair or not in the case of Vioxx, such criticisms suggest that there may be ethical dimensions to administrative agencies' decisions on how to allocate agency resources when the agency has various responsibilities to fulfill.

Of course, other legal and ethical questions arise in regard to private parties' dealings with administrative agencies. For instance, consider the concern expressed by some observers regarding alleged failures of some COX-2 inhibitor producers to disclose adverse health indications they supposedly learned of after receiving FDA approval to market their medications. If a pharmaceutical company receives reliable information of that nature after it wins FDA approval for a new drug and begins selling it, does that company owe the FDA or the public an obligation to disclose the information?

private individuals and organizations. The influence of administrative agencies has become so sweeping that they are sometimes referred to as the "fourth branch" of a government that officially consists of three branches (legislative, executive, and judicial).

This chapter focuses on federal administrative agencies. It is important to remember, however, that the past century's significant growth in *federal* regulation has been accompanied by a comparable growth in *state* and *local* regulation by agencies at those levels of government.

It is difficult to think of an area of modern individual life that is not somehow touched by the actions of administrative agencies. The energy that heats and lights your home and workplace, the clothes you wear, the food you eat, the medicines you take, the design of the car you drive, the programs you watch on television, and the contents of (and label on) the pillow on which you lay your head at night are all shaped in some way by regulation.

This observation is even more appropriate regarding corporations. Almost every significant aspect of contemporary corporate operations is regulated to the point that the *legal* consequences of a corporation's actions are nearly as important to its future success as the *business* consequences of its decisions.

Administrative agencies have always been objects of controversy. Are they protectors of the public or impediments to business efficiency? Are they guardians of competitive market structures or shields behind which noncompetitive firms have sought refuge from more vigorous competitors? Have they been impartial, efficient agents of the public interest or are they more often overzealous, or inept, or "captives" of the industries they supposedly regulate? At various times, and where various agencies are concerned, each of the above allegations is likely to have been true. Why, then, did we resort to such controversial entities to perform the regulatory function?

Origins of Administrative Agencies

In the 19th century's latter decades, the United States was in the midst of a dramatic transformation from an agrarian nation to a major industrial power. Improved means of transportation and communication facilitated dramatic market expansions. Large business organizations acquired unprecedented economic power, and new technologies promised additional social transformations.

The tremendous growth that resulted from these developments, however, was not attained without some cost. Large organizations sometimes abused their power at the expense of their customers, distributors, and competitors. New technologies often posed risks of harm to large numbers of citizens. Yet traditional institutions of legal control, such as courts and legislatures, were not particularly well suited to the regulatory needs of an increasingly complex, interdependent society in the throes of rapid change.

Courts, after all, are passive institutions that must await a genuine case or controversy before they can act. In addition, they are constrained by rules of procedure and evidence that make litigation a time-consuming and expensive process.

Legislatures, on the other hand, are theoretically able to anticipate social problems and to act in a comprehensive fashion to minimize social harm. In reality, however, legislatures rarely act until a problem has become severe enough to generate strong political support for a regulatory solution. Legislatures may also lack (as do courts) the expertise necessary to make rational policy regarding highly technical activities.

What was needed, therefore, was a new type of governmental entity: one that would be exclusively devoted to monitoring a particular area of activity; one that could, by its exclusive focus and specialized hiring practices, develop a reservoir of expertise concerning the relevant area; and one that could provide the continuous attention and constant policy development demanded by a rapidly changing environment. Such new entities, it was thought, could best perform their regulatory tasks if they were given considerable latitude in the approaches they utilized to achieve regulatory goals.

The modern regulatory era was born in 1887 when Congress, in response to complaints about discriminatory ratemaking practices by railroads, passed the Interstate Commerce Act. This statute created the Interstate Commerce Commission and empowered it to regulate transportation industry ratemaking practices. Since then, new

administrative agencies have been added whenever *pressing social problems* (e.g., the threat to competition that led to the creation of the Federal Trade Commission) or *new technologies*, such as aviation (Federal Aviation Administration), communications (Federal Communications Commission), and nuclear power (Nuclear Regulatory Commission), have generated a political consensus in favor of regulation. More recently, developing scientific knowledge about the *dangers that modern technologies and industrial processes pose* to the environment and to industrial workers has led to the creation of new federal agencies empowered to regulate environmental pollution (Environmental Protection Agency) and promote workplace safety (Occupational Safety and Health Administration).

Sometimes, Congress may conclude that a new administrative agency need not be created to address a particular problem if an already existing agency's lines of authority and responsibility can be stepped up (something that tends to require an increase in the agency's budget). For example, following a series of horror stories about risks to children from large numbers of lead-contaminated toys that were being imported into the United States, Congress enacted—and the president signed into law—a 2008 statute that significantly increased the budget of the Consumer Product Safety Commission and charged the agency with taking a more active regulatory role.

The following sections examine the legal dimensions of the process by which administrative agencies are created.

Agency Creation

Enabling Legislation Administrative agencies are created when Congress passes **enabling legislation** specifying the name, composition, and powers of the agency. For example, consider the following language from Section 1 of the Federal Trade Commission Act:

A commission is created and established, to be known as the Federal Trade Commission [FTC], which shall be composed of five commissioners, who shall be appointed by the President, by and with the advice and consent of the Senate.

Section 5 of the FTC Act prohibits “unfair methods of competition” and “unfair or deceptive acts or practices in commerce,” and empowers the FTC to prevent such practices.¹ Section 5 also describes the procedures the

¹Section 5 of the FTC Act is discussed in detail in Chapter 48.

commission must follow to charge persons or organizations with violations of the act, and provides for judicial review of agency orders. Subsequent portions of the statute give the FTC the power “to make rules and regulations for the purpose of carrying out the provisions of the Act,” to conduct investigations of business practices, to require reports from interstate corporations concerning their practices and operations, to investigate possible violations of the antitrust laws,² to publish reports concerning its findings and activities, and to recommend new legislation to Congress.

Thus, Congress has given the FTC powers typically associated with the three traditional branches of government. The FTC may, for instance, act in a legislative fashion by *promulgating rules* that have binding legal effect on future behavior. (As will be seen, however, an agency’s regulations will not have binding effect if they go beyond the scope of the power delegated to the agency by Congress.) It may also take the executive branch–like actions of *investigating* and *prosecuting* alleged violations. Finally, the FTC may act much as courts do and *adjudicate* disputes concerning alleged violations of the law. Most other federal administrative

agencies have a similarly broad mix of governmental powers, making these agencies potentially powerful agents of social control.

Great power to do good things, however, may also be great power to cause harm. Regulatory bias, zeal, insensitivity, or corruption, if left unchecked, may infringe on the basic freedoms that are the essence of our system of government. Accordingly, the fundamental problem in administrative law—a problem that will surface repeatedly in this chapter—is how to design a system of control over agency action that minimizes the potential for arbitrariness and harm yet preserves the power and flexibility that make administrative agencies uniquely valuable instruments of public policy.

Administrative Agencies and the Constitution Because administrative agencies are governmental bodies, administrative action is *governmental action* that is subject to the basic constitutional checks discussed in Chapter 3. This “fourth branch” of government is bound by basic constitutional guarantees such as *due process*, *equal protection*, and *freedom of speech*, just as the three traditional branches are. The *Pearson* case, which follows, deals with First Amendment limitations on the Food and Drug Administration’s regulatory authority.

²The antitrust laws are discussed in detail in Chapters 49 and 50.

Pearson v. Shalala

164 F.3d 650 (D.C. Cir. 1999)

A federal statute prohibits marketers of dietary supplements from including on container labels any claim characterizing the relationship of the dietary supplement to the prevention or alleviation of a disease or health-related condition, unless the claim has been submitted to the Food and Drug Administration (FDA) for preapproval. According to one of its regulations, the FDA will authorize such a “health claim” only if the FDA finds “significant scientific agreement” among experts that the claim is supported by the available evidence. Dietary supplement marketers Durk Pearson and Sandy Shaw asked the FDA to authorize four separate health claims regarding their dietary supplements’ preventative effects on health conditions such as cancer or heart disease.

The FDA refused to authorize any of the four health claims, not because there was a dearth of supporting evidence but because, in the FDA’s view, the evidence was inconclusive and thus failed to give rise to “significant scientific agreement.” The FDA declined to consider an alternative suggested by Pearson and Shaw: permitting the making of the health claims on the appropriate labels but requiring the use of a corrective disclaimer such as “The FDA has determined that the evidence supporting this claim is inconclusive.”

Pearson, Shaw, and organizations representing health care practitioners and consumers of dietary supplements sought relief in the federal district court. The court rejected their arguments and upheld the FDA’s action. Pearson, Shaw, and the organizations appealed to the U.S. Court of Appeals for the District of Columbia Circuit.

Silberman, Circuit Judge

Appellants raise a host of challenges to the [FDA’s] action. [T]he most important are that their First Amendment rights have been impaired and that under the Administrative Procedure Act,

the FDA was obliged . . . to articulate a standard a good deal more concrete than the undefined “significant scientific agreement.” Normally we would discuss the non-constitutional argument first, particularly because we believe it has merit. We

invert the normal order here to discuss [the argument] that the government has violated the First Amendment by declining to employ a less draconian method—the use of disclaimers—to serve the government’s interests. [We do so because] even if “significant scientific agreement” were given a more concrete meaning, appellants might be entitled to make health claims that do not meet that standard—with proper disclaimers.

It is undisputed that the FDA’s restrictions on appellants’ health claims are [to be] evaluated under the commercial speech doctrine [and] that the FDA has unequivocally rejected the notion of requiring disclaimers to cure “misleading” health claims for dietary supplements. The government makes two alternative arguments in response to appellants’ claim that it is unconstitutional for the government to refuse to entertain a disclaimer requirement for the proposed health claims: first, that health claims lacking “significant scientific agreement” are *inherently* misleading and thus entirely outside the protection of the First Amendment; and second, that even if the claims are only *potentially* misleading, . . . the government is not obliged to consider requiring disclaimers in lieu of an outright ban on all claims that lack significant scientific agreement.

If such health claims could be thought inherently misleading, that would be the end of the inquiry. [Although nonmisleading commercial speech about lawful activities receives an intermediate degree of First Amendment protection, misleading commercial speech goes wholly unprotected by the First Amendment.] [The government’s] first argument runs along the following lines: that health claims lacking “significant scientific agreement” are inherently misleading because they have such an awesome impact on consumers as to make it virtually impossible for them to exercise any judgment *at the point of sale*. It would be as if the consumers were asked to buy something while hypnotized, and therefore they are bound to be misled. We think this contention is almost frivolous. We reject it. But the government’s alternative argument is more substantial. It is asserted that health claims on dietary supplements should be thought at least potentially misleading because the consumer would have difficulty in independently verifying these claims. We are told, in addition, that consumers might actually assume that the government has approved these claims.

Under *Central Hudson Gas & Electric Corp. v. Public Service Commission* (U.S. Sup Ct. 1980), we are obliged to evaluate a government scheme to regulate potentially misleading commercial speech by applying a . . . test [that first asks] whether the asserted government interest is substantial. The FDA advanced two general concerns: protection of public health and prevention of consumer fraud. [In view of applicable precedent,] a substantial government interest is undeniable. The more significant questions under *Central Hudson* are the next two factors: “whether the regulation directly advances the governmental

interest asserted,” [quoting *Central Hudson*,] and whether the fit between the government’s ends and the means chosen to accomplish those ends “is not necessarily perfect, but reasonable” [quoting *Board of Trustees v. Fox* (U.S. Sup. Ct. 1989)].

[Although any advancement of the underlying public health interest may seem more indirect than direct,] the government would appear to advance directly its interest in protecting against consumer fraud through its regulatory scheme. If it can be assumed—and we think it can—that some health claims on dietary supplements will mislead consumers, it cannot be denied that requiring FDA preapproval and setting the standard extremely, perhaps even impossibly, high will surely prevent any confusion among consumers. We also recognize that the government’s interest in preventing consumer fraud/confusion may well take on added importance in the context of a product, such as dietary supplements, that can affect the public’s health.

The difficulty with the government’s consumer fraud justification comes at the final *Central Hudson* factor: Is there a reasonable fit between the government’s goals and the means chosen to advance those goals? The government insists that it is never obliged to utilize the disclaimer approach, because the commercial speech doctrine does not embody a preference for disclosure over outright suppression. Our understanding of the doctrine is otherwise. [The Supreme Court has stated that when allegedly incomplete advertising is not inherently misleading,] “the preferred remedy is more disclosure, rather than less.” *Bates v. State Bar of Arizona* (U.S. Sup. Ct. 1977). In more recent cases, the Court has reaffirmed this principle, repeatedly pointing to disclaimers as constitutionally preferable to outright suppression. [Moreover, when] government chooses a policy of suppression over disclosure—at least where there is no showing that disclosure would not suffice to [prevent or minimize] misleadingness—government disregards a far less restrictive means. [As a result, a reasonable fit between the regulatory scheme and the underlying government interest would be lacking.]

Our rejection of the government’s position that there is no general First Amendment preference for disclosure over suppression . . . does not determine that any supposed weaknesses in the [health] claims at issue can be remedied by disclaimers. [We therefore examine the particular claims.] The FDA deemed the first three claims—(1) “Consumption of antioxidant vitamins may reduce the risk of certain kinds of cancers,” (2) “Consumption of fiber may reduce the risk of colorectal cancer,” and (3) “Consumption of omega-3 fatty acids may reduce the risk of coronary heart disease”—to lack significant scientific agreement because existing research had examined only the relationship between consumption of *foods* containing these components and the risk of these diseases. The FDA logically determined that the specific effect of the *component*

of the food constituting the dietary supplement could not be determined with certainty. But certainly this concern could be accommodated, in the first claim for example, by adding a prominent disclaimer to the label along the following lines: “The evidence is inconclusive because existing studies have been performed with *foods* containing antioxidant vitamins, and the effect of those foods on reducing the risk of cancer may result from other components in those foods.” A similar disclaimer would be equally effective for the latter two claims.

The FDA’s concern regarding the fourth claim—“.8mg of folic acid in a dietary supplement is more effective in reducing the risk of neural tube defects than a lower amount in foods in common form”—is different from its reservations regarding the first three claims: the agency simply concluded that “the scientific literature does not support the superiority of any one source over others.” [W]e suspect that a clarifying disclaimer could be added to the effect that “the evidence in support of this claim is inconclusive.”

The government’s general concern that . . . consumers might assume that a claim on a supplement’s label is approved by the government suggests an obvious answer. The agency could require the label to state that “The FDA does not approve this claim.” Similarly, the government’s interest in preventing the use of labels that are true but do not mention adverse effects would seem to be satisfied—at least ordinarily—by inclusion of a prominent disclaimer setting forth those adverse effects.

The government disputes that consumers would be able to comprehend appellants’ proposed health claims in conjunction

with the disclaimers we have suggested. [T]his mix of information would, in the government’s view, create confusion among consumers. But all the government offers in support is the FDA’s pronouncement that “consumers would be considerably confused by a multitude of claims with differing degrees of reliability.” Although the government may have more leeway in choosing suppression over disclosure as a response to the problem of consumer confusion where the product affects health, it must still meet its burden of justifying a restriction on speech. [H]ere, the FDA’s conclusory assertion falls far short.

We do not presume to draft precise disclaimers for each of appellants’ four claims; we leave that task to the agency in the first instance. Nor do we rule out the possibility that where evidence in support of a claim is outweighed by evidence against the claim, the FDA could deem it incurable by a disclaimer and ban it outright. For example, if the weight of the evidence were against the hypothetical claim that “Consumption of Vitamin E reduces the risk of Alzheimer’s disease,” the agency might reasonably determine that adding a disclaimer such as “The FDA has determined that *no* evidence supports this claim” would not suffice to mitigate the claim’s misleadingness. Finally, while we are skeptical that the government could demonstrate with empirical evidence that disclaimers similar to the ones we suggested above would bewilder consumers and fail to correct for deceptiveness, we do not rule out that possibility.

District court decision reversed; case remanded with instructions that FDA reconsider appellants’ health claims.

Separation of Powers One basic constitutional principle is uniquely important when the creation of administrative agencies is at issue: the principle of *separation of powers*. A fundamental attribute of our Constitution is its allocation of governmental power among the three branches of government. Lawmaking power is given to the legislative branch, law-enforcing power to the executive branch, and law-interpreting power to the judicial branch. By limiting the powers of each branch, and by giving each branch some checks on the exercise of power by the other branches, the Constitution seeks to ensure that governmental power remains accountable to the public will.

Administrative agencies, which exercise powers resembling those of each of the three branches of government, create obvious concerns about separation of powers. In particular, the congressional delegation of legislative power to an agency in its enabling legislation may be challenged as violating the separation of powers principle if the legislation is so broadly worded as to indicate that

Congress has abdicated its lawmaking responsibilities. Early judicial decisions exploring the manner in which Congress could delegate its power tended to require enabling legislation to contain fairly specific guidelines and standards limiting the exercise of agency discretion.

More recently, courts have often sustained quite broad delegations of power to administrative agencies. Section 5 of the FTC Act contains such a delegation of power. A great range of unspecified behavior falls within the statute’s prohibition of “unfair methods of competition” and “unfair or deceptive acts or practices.” Courts tend to approve broad delegations of power when Congress has expressed an “intelligible principle” to guide the agency’s actions.³

The *American Trucking Associations* decision, which follows, examines the delegation of power question.

³*J. W. Hampton, Jr. & Co. v. United States* (U.S. Sup. Ct. 1928).

Whitman v. American Trucking Associations 531 U.S. 457 (U.S. Sup. Ct. 2001)

The federal Clean Air Act requires the Environmental Protection Agency (EPA) to promulgate and periodically revise national ambient air quality standards (NAAQS) for each air pollutant that meets certain statutory criteria. Section 109 of the statute calls for the EPA to set, for each pollutant, a standard reflecting a concentration level “requisite to protect the public health” with an “adequate margin of safety.” In July 1997, the EPA issued final rules revising the NAAQS for particulate matter and ozone. Various parties, including American Trucking Associations, Inc., filed petitions for review in the United States Court of Appeals for the District of Columbia Circuit. The D.C. Circuit held, among other things, that the Clean Air Act did not permit the EPA to consider costs of implementation in setting NAAQS, and that in any event, the challenged rules had been formulated pursuant to an unconstitutional delegation of power from Congress in § 109. However, the D.C. Circuit remanded the proceedings to the EPA, in order to allow the agency to construe § 109 in a way that would cure the delegation problem.

The U.S. Supreme Court granted the EPA’s petition for certiorari. In a portion of the opinion not included here, the Supreme Court agreed with the D.C. Circuit’s holding that costs of implementation could not be considered by the EPA in the setting of NAAQS. The Court then turned to the delegation of power issue.

Scalia, Justice

In a delegation challenge, the constitutional question is whether the statute has delegated legislative power to the agency. Article I, § 1, of the Constitution vests “all legislative Powers herein granted . . . i n a Congress of the United States.” This text permits no delegation of those powers, and so we repeatedly have said that when Congress confers decisionmaking authority upon agencies, *Congress* must “lay down by legislative act an intelligible principle to which the person or body authorized to [act] is directed to conform.” *J. W. Hampton, Jr. & Co. v. United States* (1928). We have never suggested that an agency can cure an unlawful delegation of legislative power by adopting in its discretion a limiting construction of the statute. The idea that an agency can cure an unconstitutionally standardless delegation of power by declining to exercise some of that power seems to us internally contradictory. The very choice of which portion of the power to exercise—that is to say, the prescription of the standard that Congress had omitted—would *itself* be an exercise of the forbidden legislative authority. Whether the statute delegates legislative power is a question for the courts, and an agency’s voluntary self-denial has no bearing upon the answer.

We agree with the Solicitor General[, who argued on behalf of the United States. According to the Solicitor General’s argument,] the text of § 109 of the Clean Air Act at a minimum requires that “for a discrete set of pollutants and based on published air quality criteria that reflect the latest scientific knowledge, [the] EPA must establish uniform national standards at a level that is requisite to protect public health from the adverse effects of the pollutant in the ambient air.” Requisite, in [the words of the Solicitor General], “means sufficient, but not more than necessary.” These limits on the EPA’s discretion are strikingly similar to the ones we approved in [a 1991 decision], which permitted the Attorney General to designate a drug as a

controlled substance for purposes of criminal drug enforcement if doing so was “necessary to avoid an imminent hazard to the public safety.” They also resemble the Occupational Health and Safety Act provision requiring the agency to “set the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no employee will suffer any impairment of health”—which the Court upheld in [a 1980 decision].

The scope of discretion § 109 allows is in fact well within the outer limits of our nondelegation precedents. In the history of the Court we have found the requisite “intelligible principle” lacking in only two statutes, one of which provided literally no guidance for the exercise of discretion, and the other of which conferred authority to regulate the entire economy on the basis of no more precise a standard than stimulating the economy by assuring “fair competition.” We have, on the other hand, upheld the validity of [a section of] the Public Utility Holding Act of 1935, which gave the Securities and Exchange Commission authority to modify the structure of holding company systems so as to ensure that they are not “unduly or unnecessarily complicated” and do not “unfairly or inequitably distribute voting power among security holders.” *American Power & Light Co. v. SEC* (1946). We have approved the wartime conferral of agency power to fix the prices of commodities at a level that “will be generally fair and equitable and will effectuate the purposes of [the relevant statute].” *Yakus v. United States* (1944). And we have found an “intelligible principle” in various statutes authorizing regulation in the “public interest.” See, e.g., *National Broadcasting Co. v. United States* (1943). In short, we have “almost never felt qualified to second-guess Congress regarding the permissible degree of policy judgment that can be left to those executing or applying the law.” *Mistretta v. United States* (1989) (Scalia, J., dissenting).

It is true enough that the degree of agency discretion that is acceptable varies according to the scope of the power congressionally conferred. While Congress need not provide any direction to the EPA regarding the manner in which it is to define “country elevators,” which are to be exempt from new stationary-source regulations governing grain elevators, it must provide substantial guidance on setting air standards that affect the entire national economy. But even in sweeping regulatory schemes we have never demanded, as the Court of Appeals did here, that statutes provide a “determinate criterion” for saying “how much [of the regulated harm] is too much.” [In the controlled substance designation case referred to above,] for example, we did not require the statute to decree how “imminent” was too imminent, or how “necessary” was necessary enough, or even—most relevant here—how “hazardous” was too hazardous. Similarly, the statute at issue in [another Supreme Court decision] authorized agencies to recoup “excess profits” paid under wartime government contracts, yet we did not insist that

Congress specify how much profit was too much. It is therefore not conclusive for delegation purposes that, as [American Trucking Associations and the other parties challenging the NAAQS] argue, ozone and particulate matter are “nonthreshold” pollutants that inflict a continuum of adverse health effects at any airborne concentration greater than zero, and hence require the EPA to make judgments of degree. “[A] certain degree of discretion, and thus of lawmaking, inheres in most executive or judicial action. *Mistretta* (Scalia, J., dissenting).

Section 109 (b) (1) of the CAA, which we interpret as requiring the EPA to set air quality standards at the level that is “requisite”—that is, not lower or higher than is necessary—to protect the public health with an adequate margin of safety, fits comfortably within the scope of discretion permitted by our precedent.

Court of Appeals decision reversed as to delegation of power issue.

Agency Types and Organization

Agency Types Administrative agencies may be found under a variety of labels. They may be called “administration,” “agency,” “authority,” “board,” “bureau,” “commission,” “department,” “division,” or “service.” They sometimes have a governing body, which may be appointed or elected. They almost invariably have an administrative head (variously called “Chairman,” “Commissioner,” “Director,” etc.), and a staff. Because our focus is on federal administrative agencies, it is important to distinguish between the two basic types of federal administrative agencies: executive agencies and independent agencies.

Executive Agencies Administrative agencies that reside within the Executive Office of the President or within the executive departments of the president’s cabinet are called **executive agencies**. Examples of such agencies and their cabinet homes are the Food and Drug Administration (Department of Health and Human Services); the Nuclear Regulatory Agency and the Federal Energy Regulatory Agency (Department of Energy); the Occupational Safety and Health Administration (Department of Labor); and the Internal Revenue Service (Treasury Department). In addition to their executive home, such agencies share one other important attribute. Their

administrative heads serve “at the pleasure of the President,” meaning that they are appointed and removable at his will.

Independent Agencies The Interstate Commerce Commission was the first independent administrative agency created by Congress. Much of the most significant regulation businesses face emanates from independent agencies such as the FTC, the National Labor Relations Board, the Consumer Product Safety Commission, the Equal Employment Opportunity Commission, the Environmental Protection Agency, and the Securities and Exchange Commission. Independent agencies are usually headed by a board or a commission (e.g., the FTC has five commissioners) whose members are appointed by the president “with the advice and consent of the Senate.” Commissioners or board members are usually appointed for fixed terms (e.g., FTC commissioners serve seven-year, staggered terms) and are removable only for cause (e.g., FTC commissioners may be removed only for “inefficiency, neglect of duty, or malfeasance in office”). Enabling legislation often requires political balance in agency appointments (e.g., the FTC Act provides that “[n]ot more than three of the commissioners shall be members of the same political party”).

Department of Homeland Security In 2002, Congress enacted legislation creating the cabinet-level Department of Homeland Security. This new department,

whose creation had been proposed in various versions of House and Senate bills since shortly after the September 11, 2001, attacks on the United States, absorbed more than 20 different functions previously undertaken by other federal departments and agencies. The Department of Homeland Security employs roughly 170,000 workers, with the vast majority coming to that department by way of transfer from existing positions as federal government employees. With the creation of this new department and the resulting reassignments of employees and areas of responsibility, the 2002 enactment called for the most sweeping governmental reorganization in more than a half-century.

Agency Organization An agency's organizational structure is largely a function of its regulatory mission. The FTC's operational side, for instance, is divided into three bureaus: the Bureau of Competition, which enforces the antitrust laws and unfair competitive practices; the Bureau of Consumer Protection, which focuses on unfair or deceptive trade practices; and the Bureau of Economics, which gathers data, compiles statistics, and furnishes technical assistance to the other bureaus. The commission is headquartered in Washington, D.C. It maintains regional offices in Atlanta, Boston, Chicago, Cleveland, Dallas, Denver, Los Angeles, New York, San Francisco, and Seattle. This regional office system enhances the commission's enforcement, investigative, and educational missions by locating commission staff closer to the public it serves.

Agency Powers and Procedures

Nature, Types, and Source of Powers

The powers administrative agencies possess may be classified in various ways. Some agencies' powers are largely *ministerial*—concerned primarily with the routine performance of duties imposed by law. The most important administrative agencies, however, have broad *discretionary* powers that necessitate the exercise of significant discretion and judgment when they are employed. The major discretionary powers agencies can possess are **investigative power**, **rulemaking power**, and **adjudicatory power**.

The formal powers an agency possesses are those granted by its enabling legislation. Important federal agencies such as the FTC normally enjoy significant

levels of each of the discretionary powers. However, even such powerful agencies face significant limitations on the exercise of their powers. In addition to explicit limits on agency proceedings contained in enabling legislation, basic constitutional provisions restrict agency action.

A federal agency's exercise of its rulemaking and adjudicatory powers is also constrained by the *Administrative Procedure Act (APA)*. The APA was enacted by Congress in 1946 in an attempt to standardize federal agency procedures and to respond to critics who said that administrative power was out of control. The APA applies to all federal agencies, although it will not displace stricter procedural requirements contained in a particular agency's enabling legislation. Besides specifying agency procedures, the APA plays a major role in shaping the conditions under which courts will review agency actions and the standards courts will use when conducting such a review. Most states have adopted "baby APAs" to govern the activities of state administrative agencies.

Finally, as later parts of this chapter will confirm, each of the three traditional branches of government possesses substantial powers to mold and constrain the powers of the "fourth branch." That being said, one final point should be made before we turn to a detailed examination of formal agency powers and procedures. An agency's formal powers also confer on it significant *informal* power. Agency "advice," "suggestions," or "guidelines," which technically lack the legal force of formal agency regulations or rulings, may nonetheless play a major role in shaping the behavior of regulated industries because they carry with them the implicit or explicit threat of formal agency action if they are ignored. Such gentle persuasion can be a highly effective regulatory tool, and one that is subject to far fewer constraints than formal agency action.

Investigative Power Administrative agencies need accurate information about business practices and activities not only for the detection and prosecution of regulatory violations, but also to enable the agencies to identify areas in which new rules are needed or existing rules require modification. Much of the information agencies require to do their jobs is readily available. "Public interest" groups, complaints from customers or competitors, and other regulatory agencies are all important sources of information.

However, much of the information necessary to effective agency enforcement can come only from sources

that may be strongly disinclined to provide it: the individuals and business organizations subject to regulation. This reluctance may stem from the desire to avoid or delay the regulatory action that disclosure would generate. It might also be the product, however, of more legitimate concerns, such as a desire to protect personal privacy, a desire to prevent competitors from acquiring trade secrets and other sensitive information from agency files, or a reluctance to incur the costs that may accompany compliance with substantial information demands. Agencies, therefore, need the means to compel unwilling possessors of information to comply with legitimate demands for information. The two most important (and most intrusive) investigative tools employed by administrative agencies are *subpoenas* and *searches and seizures*.

Subpoenas There are two basic types of subpoena: the subpoena *ad testificandum* and the subpoena *duces tecum*. Subpoenas *ad testificandum* may be used by an agency to compel unwilling witnesses to appear and testify at agency hearings. Subpoenas *duces tecum* may be used by an agency to compel the production of most types of documentary evidence, such as accounting records and office memoranda.

Unlimited agency subpoena power risks sacrificing individual liberty and privacy in the name of regulatory efficiency. Accordingly, courts have formulated a number of limitations that seek to balance an agency's legitimate need to know against an investigatory target's legitimate privacy interests.

Agency investigations must be *authorized by law* and *conducted for a legitimate purpose*. The former requirement means that the agency's enabling legislation must have granted the agency the investigatory power it seeks to assert. The latter requirement prohibits bad faith investigations pursued for improper motives (e.g., Internal Revenue Service investigations undertaken solely to harass political opponents of an incumbent administration).

Even when the investigation is legally authorized and is undertaken for a legitimate purpose, the information sought must be *relevant to that purpose*. The Fourth Amendment to the Constitution provides this limitation on agency powers. However, an agency issuing an administrative subpoena need not possess the "probable cause" that the Fourth Amendment requires in support of regular search warrants.⁴ In the words of the Supreme

Court, an agency "can investigate merely on the suspicion that the law is being violated, or even just because it wants assurance that it is not."⁵ This lesser standard makes sense in the agency context, because the only evidence of many regulatory violations is documentary and "probable cause" might be demonstrable only after inspection of the target's records. In such cases, a probable cause requirement would effectively negate agency enforcement power.

Similarly, agency information demands must be *sufficiently specific* and *not unreasonably burdensome*. This requirement derives from the Fourth Amendment's prohibition against "unreasonable searches and seizures." It means that agency subpoenas must adequately describe the information the agency seeks. It also means that the cost to the target of complying with the agency's demand (e.g., the cost of assembling and reproducing the data, the disruption of business operations, or the risk that proprietary information will be indirectly disclosed to competitors) must not be unreasonably disproportionate to the agency's interest in obtaining the information.

Finally, the information sought *must not be privileged*. Various statutory and common law privileges may, at times, limit an agency's power to compel the production of information. By far the most important privilege in this respect is the Fifth Amendment *privilege against compelled testimonial self-incrimination*, or "the right to silence." As you learned in Chapter 5, however, this privilege is subject to serious limitations in the business context. The right to silence in the administrative context is further limited by the fact that it is only available in *criminal* proceedings. In some regulatory contexts, the potential sanctions for violation may be labeled "civil penalties" or "forfeitures." Only when such sanctions are essentially punitive in their intent or effect will they be considered "criminal" for the purpose of allowing the invocation of the privilege.

Public policy concerns provide another subpoena power limitation that may apply even if neither the Fifth Amendment nor another privilege bars production of the documents sought by an agency. As indicated in the *Collins* case, which follows, courts may conclude that an agency subpoena should not be enforced if its enforcement would tend to compromise important operations being conducted by another agency or arm of the government.

⁴The Fourth Amendment is discussed in Chapter 5.

⁵*United States v. Morton Salt* (U.S. Sup. Ct. 1950).

Commodity Futures Trading Commission v. Collins

997 F.2d 1230 (7th Cir. 1993)

The Commodity Futures Trading Commission (CFTC) was investigating Thomas Collins for possible civil violations of the Commodity Exchange Act. Among the violations of which Collins was suspected was the trading of commodities futures contracts other than on a commodities exchange. The CFTC's staff suspected that these trades were spurious trades, which (the staff theorized) were intended to enable Collins to reallocate losses to persons who would reap the maximum tax benefits from the losses. As part of this investigation, the CFTC issued a subpoena directing Collins to produce copies of his federal income tax returns for examination by the CFTC's staff. The staff's reasoning was that the presence of tax motives would be evidence of a likely violation of rules enforced by the CFTC.

Collins resisted the subpoena on the ground that it would force him to incriminate himself. Collins argued that the tax returns contained information that could be evidence—or could lead to evidence—of felony violations of federal law. The CFTC argued that the tax returns were required records and that compelling their disclosure therefore would not violate the Fifth Amendment. [See Chapter 5's discussion of the required-records doctrine, which operates to eliminate Fifth Amendment privilege claims regarding the contents of such records.] The district court agreed with the CFTC and entered an enforcement order requiring Collins to obey the subpoena. Collins appealed.

In a portion of its opinion not set forth here, the Seventh Circuit Court of Appeals concluded that the required-records doctrine was inapplicable because the subpoena sought a taxpayer's copies of his tax returns—copies that the taxpayer was not required by law to make—rather than the actual tax returns whose preparation and filing with the Internal Revenue Service were required by law. The Seventh Circuit then (as set forth below) continued its analysis of Collins's Fifth Amendment argument and addressed other policy concerns triggered by the CFTC's subpoena.

Posner, Judge

[The inapplicability of the required-records doctrine] does not end our inquiry. The [required-records] doctrine only comes into play if, were it not for the doctrine, the government would be forcing a person to incriminate himself. *Garner v. United States* (1976) holds that the taxpayer who includes incriminating information on his return is like the witness who blurts out incriminating testimony rather than invoking the Fifth Amendment and keeping mum: he has not been compelled to testify against himself, so he has no Fifth Amendment claim. *Garner* . . . is consistent with the cases which hold that there is no Fifth Amendment privilege in already created documents, because the disclosures in them were not compelled. *Garner* and [the cases dealing with already created documents] make the required-records exception to the Fifth Amendment privilege largely, perhaps entirely, superfluous, because records that are not required are by the same token not privileged. And those decisions suggest another reason for doubting that Collins has any Fifth Amendment claim: Collins created copies of his tax returns voluntarily, so any information in the copies, however incriminating, was not compelled by the government.

In light of all this it is doubtful that Collins has any constitutional leg to stand on. No matter. All constitutional concerns to one side, we think it was an abuse of discretion for the district judge to enforce this subpoena. Income tax returns are highly sensitive documents; that is why [federal law provides

that agencies such as the CFTC] cannot get Collins's tax returns directly from the Internal Revenue Service. The self-reporting, self-assessing character of the income tax system would be compromised were they promiscuously disclosed to agencies enforcing regulatory programs unrelated to tax collection itself. The CFTC made no showing that it needed Collins's tax returns. All it legitimately wants to know is whether Collins traded off the exchange and if so, why. It can ask him. If it doubts his answer, it can ask for substantiation. If he refuses to furnish it on the ground that it would compel him to incriminate himself, the CFTC can draw the appropriate inference—for example, that he was trading off the exchange in order to reap tax benefits. No law forbids a regulatory agency to draw the logical inference from a regulated entity's refusing on Fifth Amendment grounds to play ball with the agency. Should the government want to prosecute Collins criminally the Fifth Amendment would be a potential bar—but a very feeble one, in light of our previous discussion.

We are not experts in the investigation of violations of the commodity laws, so we may have overlooked reasons why, despite appearances, the effectiveness of the CFTC's investigation of Collins depends on its having access to his tax returns. The CFTC has not advanced any such reasons. It asked for and obtained the enforcement of the subpoena as a matter of rote, upon its bare representation that the tax returns might contain information germane to the investigation. That is not enough, if an appropriate balance is to be struck between the privacy of

income tax returns and the needs of law enforcement. [L]arger interests are at stake than those of the immediate parties—namely the interest, unrepresented by . . . the parties to this case (for the CFTC is not represented by the Department of Justice, which might be assumed to be speaking for the Internal

Revenue Service as well), in the effective administration of the federal tax laws.

District court order enforcing subpoena reversed in favor of Collins.

Searches and Seizures Sometimes the evidence necessary to prove a regulatory violation can be obtained only by entering private property such as a home, an office, or a factory. When administrative agencies seek to gather information by such an entry, the Fourth Amendment's prohibition against unreasonable searches and seizures and its warrant requirement come into play. Owners of commercial property, although afforded less Fourth Amendment protection than the owners of private dwellings, do have some legitimate expectations of privacy in their business premises.

Not all agency information-gathering efforts, however, will be considered so intrusive as to amount to a prohibited search and seizure. In *Dow Chemical Co. v. United States* (U.S. Sup. Ct. 1986), for instance, the Environmental Protection Agency's warrantless aerial photography of one of Dow's plants was upheld. Furthermore, in *State of New York v. Burger* (U.S. Sup. Ct. 1987), the Supreme Court upheld the constitutionality of warrantless administrative inspections of the premises of "closely regulated" businesses so long as three criteria are satisfied: (1) there must be a substantial government interest in the regulatory scheme in question, (2) the warrantless inspections must be necessary to further the scheme, and (3) the inspection program must provide a constitutionally adequate substitute for a warrant by giving owners of commercial property adequate notice that their property is subject to inspection and by limiting the discretion of inspecting officers.

Rulemaking Power An agency's rulemaking power derives from its enabling legislation. For example, the FTC Act gives the FTC the power "to make rules and regulations for the purpose of carrying out the provisions of this Act." The Administrative Procedure Act (APA) defines a rule as "an agency statement of general or particular applicability and future effect designed to complement, interpret or prescribe law or policy." All agency rules are compiled and published in the *Code of Federal Regulations*.

Types of Rules Administrative agencies create three types of rules: procedural, interpretive, and legislative. *Procedural rules* specify how the agency will conduct itself. For instance, agencies typically have procedural rules dealing with such matters as the manner in which advance notice of agency rulemaking proceedings will be communicated.

Interpretive rules are designed to advise regulated individuals and entities of the manner in which an agency interprets the statutes it enforces. For example, the FTC has promulgated a rule interpreting the term *consumer product*, as used in the Magnuson-Moss Warranty Act (a statute the FTC has the legal responsibility to enforce). Interpretive rules technically do not have the force of law. Therefore, they are not binding on businesses and the courts. Courts interpreting regulatory statutes often give agency interpretations substantial weight, however, in deference to the agency's familiarity with the statutes it administers and its presumed expertise in the general area being regulated. Business is also likely to pay attention to agency interpretive rules because such rules indicate the circumstances in which an agency is likely to take formal enforcement action.

If consistent with an agency's enabling legislation and the Constitution, and if created in accordance with the procedures dictated by the APA, *legislative rules* have the full force and effect of law. Legislative rules thus are binding on the courts, the public, and the agency. Federal agencies have promulgated very large numbers of legislative rules, many of which address highly specific matters. For example, an FTC legislative rule states that if a party sells a quick-freeze aerosol spray product designed for the frosting of beverage glasses and the product contains an ingredient known as Fluorocarbon 12, the seller must issue a warning (on the product label) that the product should not be inhaled in concentrated form, in view of the risk that such behavior may lead to severe harm or death.

Given the greater relative importance of legislative rules, you should not be surprised to learn that the

process by which they are promulgated—unlike the process by which procedural and interpretive rules are created—is highly regulated by the APA and closely scrutinized by the courts. There are three basic types of agency rulemaking: informal, formal, and hybrid.

Informal Rulemaking *Informal rulemaking* (or “notice and comment” rulemaking) is the method most commonly employed by administrative agencies that are not forced by their enabling legislation to follow the more stringent procedures of formal rulemaking. The informal rulemaking process commences with the publication of a “Notice of Proposed Rulemaking” in the *Federal Register*. The APA requires that such notices contain a statement of the time and place at which the proceedings will be held; a statement of the nature of the proceedings; a statement of the legal authority for the proceedings (usually the agency’s enabling legislation); and either a statement of the terms of the proposed rule or a description of the matters to be addressed by the rule.

Publication of notice must then be followed by a *comment period* during which interested parties may submit written comments detailing their views about the proposed rule. After comments have been received and considered, the agency must publish the regulation in its final form in the *Federal Register*. As a general rule, the rule cannot become effective until at least 30 days after this final publication. The APA, however, recognizes a “good cause” exception to the 30-day waiting period requirement, and to the notice of rulemaking requirement as well, when notice would be impractical, unnecessary, or contrary to the public interest.

Agencies tend to favor the informal rulemaking process because it allows quick and efficient regulatory action. Such quickness and efficiency, however, are purchased at a significant cost—a minimal opportunity for interested parties to participate in the rule-formation process. Giving interested parties the opportunity to be heard may, ultimately, further regulatory goals. For example, the vigorous debate about a proposed rule that a public hearing can provide may contribute to the creation of more effective rules. Also, providing interested parties an adequate opportunity to participate in the rulemaking process lends credibility to that process and the rules it produces, thereby enhancing the chances of voluntary compliance.

Formal Rulemaking *Formal rulemaking* is designed to give interested parties a far greater opportunity to make their views heard than that afforded by informal rulemaking. As does informal rulemaking, formal rulemak-

ing begins with publication of a “Notice of Proposed Rulemaking” in the *Federal Register*. Unlike the notice employed to announce informal rulemaking procedures, however, this notice must include notice of a time and place at which a public hearing will be held. Such hearings resemble trials in that the agency must produce evidence justifying the proposed regulation, and interested parties are allowed to present evidence in opposition to it. Both sides may examine each other’s exhibits and cross-examine each other’s witnesses. At the conclusion of the proceedings, the agency must prepare a formal, written document detailing its findings based on the evidence presented at the hearing.

Although the formal rulemaking process affords interested parties greatly enhanced opportunities to be heard, this greater access is purchased at significant expense and at the risk that some parties will abuse their access rights in an effort to impede the regulatory process. By tireless cross-examination of government witnesses and lengthy presentations of their own, opponents seeking to derail or delay regulation may consume months, or even years, of agency time. A classic example of such behavior would be the Food and Drug Administration’s hearings on a proposed rule requiring that the minimum peanut content of peanut butter be set at 90 percent. Industry forces favored an 87 percent minimum and were able to delay regulation for almost 10 years.

Hybrid Rulemaking Frustrated over the lack of access afforded by informal rulemaking and the potential for paralyzing the regulatory process that is inherent in formal rulemaking, some legislators have attempted to create a rulemaking process that combines some of the elements of informal and formal procedures. Although hybrid rulemaking procedures are insufficiently established and standardized at this point to permit a detailed discussion of them, some general tendencies are evident. Hybrid procedures bear some resemblance to those of formal rulemaking in that both involve some sort of hearing. Unlike formal rulemaking procedures, however, hybrid procedures tend to limit the right of interested parties to cross-examine agency witnesses.

Failure to Promulgate Rules When Congress has granted an agency rulemaking authority without specifically requiring the promulgation of regulations on a given topic, the agency normally has considerable freedom to decide not to exercise its rulemaking authority in a particular context. Despite the deference usually paid to an agency’s decision not to engage in rulemaking, failure-to-regulate decisions may sometimes be subject

The Global Business Environment

With the many administrative agencies that exist at the federal, state, and sometimes even local levels, the United States surely possesses more extensive and expansive administrative law than any other nation. (Whether this is viewed as a good or bad thing may have a great deal to do with one's philosophical and political perspectives.) Many nations that lack the vast administrative agency "infrastructure" present in the United States nevertheless tend to have some regulatory—or at least advisory—bodies charged with addressing certain types of issues that, in the United States, would fall within the regulatory authority of administrative agencies.

For instance, in the European Union (EU), individual countries typically have *ministries* that may help shape govern-

mental policy on issues falling within their respective areas of responsibility. At the EU level, the European commission's primary responsibility is to propose legislation to the Council of Ministers. The commission, however, does have limited rulemaking authority that it may exercise on its own in a manner similar to—though clearly on a lesser scale than—administrative agencies' exercising of rulemaking authority in the United States. In fulfilling its responsibilities, the commission frequently relies on the research assistance, recommendations, and other input provided by subject matter-specific advisory bodies known as the Directorates General.

to judicial review. *Massachusetts v. Environmental Protection Agency*, a 2007 Supreme Court decision that appears later in the chapter, furnishes an illustration.

Adjudicatory Power Most major federal agencies possess substantial adjudicatory powers. Besides having the authority to investigate alleged behaviors and to produce regulations that have legal effect, agencies often have the power to conduct proceedings to determine whether regulatory or statutory violations have occurred. The administrative adjudication process is at once similar to, but substantially different from, the judicial process you studied in Chapter 2.

The administrative adjudication process normally begins with a complaint filed by the agency. The party charged in the complaint (called the *respondent*) files an answer. Respondents are normally entitled to a hearing before the agency. At this hearing, they may confront and cross-examine agency witnesses and present evidence of their own. Respondents may be represented by legal counsel. No juries are present in administrative adjudications, however. The cases are heard by an agency employee usually called an **administrative law judge (ALJ)**. Unlike criminal prosecutions, the burden of proof in administrative proceedings is normally the civil *preponderance of the evidence* standard. Constitutional procedural safeguards such as the exclusionary rule do not protect the respondent.⁶

The agency, in effect, functions as police officer, prosecutor, judge, and jury. The APA attempts to deal with the obvious potential for abuse inherent in this combination in a number of ways. First, the APA attempts to ensure that ALJs are as independent as possible by requiring internal separation between an agency's judges and its investigative and prosecutorial functions. The APA also prohibits ALJs from having private consultations with any party to an agency proceeding and shields them from agency disciplinary action other than for "good cause." Finally, insufficient separation between an agency's adjudication function and its other functions can be contrary to basic due process requirements.

After each party to the proceeding has been heard, the ALJ renders a decision stating her findings of fact and conclusions of law, and imposing whatever penalty she deems appropriate within the parameters established by the agency's enabling legislation (e.g., a fine or a cease-and-desist order). If neither party challenges the ALJ's decision, it becomes final. The losing party, however, may appeal an ALJ's decision, which will then be subjected to a **de novo review** by the governing body of the agency (e.g., appeals from FTC ALJ decisions are heard by the five FTC commissioners). *De novo review* means that the agency's governing body may treat the proceedings as if they were occurring for the first time and may ignore the ALJ's findings. Often, however, the agency's governing body will adopt the ALJ's findings. In any event, those findings will be part of the record if a disappointed respondent seeks judicial review of an agency's decision.

Finally, it is important to note that many agency proceedings are settled by a **consent order** before completion

⁶The exclusionary rule and the beyond a reasonable doubt standard employed in criminal cases are discussed in Chapter 5. The preponderance of the evidence standard is discussed in Chapter 6.

of the adjudication process. Consent orders are similar to the *nolo contendere* pleas discussed in Chapter 5. Respondents who sign consent orders do not admit wrongdoing, but they waive all rights to judicial review, agree to accept a specific sanction imposed by the agency, and commonly agree to discontinue the business practice that triggered the agency action.

Controlling Administrative Agencies

By this point in our discussion, we have already encountered certain legal controls on agency action, such as the terms of an agency's enabling legislation, the procedural requirements imposed by the APA, and the basic constraints that the Constitution places on all governmental action. The following sections continue to focus on agency control by examining the various devices through which the three traditional branches of government influence and control the actions of administrative agencies.

Presidential Controls The executive branch has at its disposal a number of tools that may be employed to shape agency action. The most obvious among them is the president's power to appoint and remove agency administrators. This presidential power is obviously more limited in the case of independent agencies than it is where executive agencies are concerned, but the president generally has the power to appoint the heads of independent agencies and demote the prior chairpersons without cause. Skillful use of the new chair's managerial powers, probably the most important of which is the power to influence agency hiring policies, can eventually effect substantial changes in agency policy. Also, significant and sustained policy differences between an independent agency and the executive branch often eventually trigger resignations by agency commissioners, thus providing the president with the opportunity to appoint new members whose philosophies are more congruent with his own.

The executive branch also exercises significant control over agency action through the Office of Management and Budget (OMB). The OMB plays a major role in the creation of the annual executive budget the president presents to Congress. In the process, the OMB reviews, and sometimes modifies, the budgetary requests of executive agencies. In addition, an executive order requires executive agencies to prepare cost-benefit and least-cost analyses for all major proposed rules and to submit this information to the OMB for review prior to seeking

public comments. This order and a subsequent executive order requiring agencies to give the OMB early warning of possible rule changes have made the OMB a powerful player in the rulemaking process.

Finally, the president's power to *veto* legislation concerning administrative agencies represents another point of executive influence over agency operations.

Congressional Controls The legislative branch possesses a number of devices, both formal and informal, by which it may influence agency action. Obvious avenues of congressional control include the Senate's "advice and consent" role in agency appointments, the power to amend an agency's enabling legislation (what Congress has given, Congress can take away), and the power to pass legislation that mandates changes in agency practices or procedures. Examples of the latter include the National Environmental Policy Act (NEPA), which dictated that administrative agencies file *environmental impact statements* for every agency action that could significantly affect the quality of the environment, and the Regulatory Flexibility Act, which ordered changes in agency rulemaking procedures designed to give small businesses improved notice of agency rulemaking activities that may have a substantial impact on them. Congress can also pass *sunset legislation* providing for the automatic expiration of an agency's authority unless Congress expressly extends it by a specified date. Such legislation ensures periodic congressional review of the initial decision to delegate legislative authority to an administrative agency.

Congress enjoys several other less obvious, but no less important, points of influence over agency action. For example, Congress must authorize agency budgetary appropriations. Thus, Congress may limit or deny funding for agency programs with which it disagrees. Also, the Governmental Operations Committees of both houses of Congress exercise significant oversight over agency activities. These committees review agency programs and conduct hearings concerning proposed agency appointments and appropriations. Finally, individual members of Congress may seek to influence agency action through "casework"—informal contacts with an agency on behalf of constituents who are involved with the agency.

Judicial Review As important as the roles of the executive and legislative branches are in controlling agency action, the courts exercise the greatest control over agency behavior, perhaps because they are the branch of government most accessible to members of the

public aggrieved by agency action. The APA provides for judicial review of most agency action, which takes place either in one of the U.S. courts of appeals or a U.S. district court, depending on the nature of the agency action at issue. The Supreme Court, if it chooses to grant certiorari, is the court of last resort for review of agency action.

Not all agency actions are subject to judicial review. Moreover, only certain parties may challenge those that are reviewable. An individual or organization seeking judicial review must demonstrate that the agency action being challenged is *reviewable*, that the challenging party has *standing to sue*, that *necessary administrative remedies have been exhausted*, and that the dispute is *ripe for judicial review*. These requirements are discussed below.

Reviewability Only reviewable agency actions may be challenged by dissatisfied individuals and organizations. Normally, it is not difficult for aggrieved parties to show that the agency action is reviewable because the APA creates a strong presumption in favor of reviewability. This presumption may be overcome only by a showing that “statutes preclude review” or that the decision in question is “committed to agency discretion by law.” These limitations on reviewability come from Congress’s power to dictate the jurisdiction of the federal courts and from judicial deference to the proper functions of the

other branches of government (e.g., a decision relating to matters of foreign policy is likely to be seen as outside the proper province of the judiciary).

Standing to Sue Once reviewability of an agency action has been established, the challenging party must demonstrate that he, she, or it has standing to sue. This means that the individual or organization seeking judicial review is “an aggrieved party” whose interests have been substantially affected by the agency action. Initially, courts took a relatively restrictive view of this basic requirement, requiring plaintiffs to show harm to a legally protected interest. More recently, however, courts have liberalized the standing requirement somewhat, requiring plaintiffs to demonstrate that they have suffered an “injury” to an interest that lies within the “zone of interests” protected by the statute or constitutional provision that serves as the basis of their challenge. Demonstrating an economic loss remains the surest way to satisfy the “injury” requirement, but emotional, aesthetic, and environmental injuries have been found sufficient on occasion.

Massachusetts v. Environmental Protection Agency, which follows, addresses issues presented by the standing requirement. The case also furnishes an illustration of judicial review of an agency decision not to take regulatory action.

Massachusetts v. Environmental Protection Agency

549 U.S. 497 (2007)

The federal Clean Air Act was enacted in 1970 and was later amended on more than one occasion. Section 202(a)(1) of the Act, 42 U.S.C. § 7521(a)(1), provides:

The [Environmental Protection Agency (EPA)] Administrator shall by regulation prescribe (and from time to time revise) in accordance with the provisions of this section, standards applicable to the emission of any air pollutant from any class or classes of new motor vehicles or new motor vehicle engines, which in his judgment cause, or contribute to, air pollution which may reasonably be anticipated to endanger public health or welfare. . . .

The Act defines “air pollutant” to include “any air pollution agent or combination of such agents, including any physical, chemical, biological, radioactive . . . substance or matter which is emitted into or otherwise enters the ambient air.” § 7602(g).

In 1999, a group of 19 private organizations filed a rulemaking petition asking EPA to regulate “greenhouse gas emissions from new motor vehicles under § 202 of the Clean Air Act.” The petition alleged that 1998 was the “warmest year on record”; that carbon dioxide, methane, nitrous oxide, and hydrofluorocarbons are “heat trapping greenhouse gases”; that greenhouse gas emissions have significantly accelerated climate change; and that a 1995 report of the Intergovernmental Panel on Climate Change (IPCC), a multinational scientific body organized under the auspices of the United Nations, warned that “carbon dioxide remains the most important contributor to [man-made] forcing of climate change.” The petition further alleged that climate change will have serious adverse effects on human health and the environment. In addition, the petition noted that in a 1998 legal opinion, EPA’s general counsel concluded that “CO₂ emissions are within the scope of EPA’s authority to regulate,” even though EPA had so far declined to exercise that authority.

After requesting public comment on the issues raised in the petition, EPA received more than 50,000 comments. Before the close of the comment period, the White House requested that the National Research Council provide “assistance in identifying the areas in the science of climate change where there are the greatest certainties and uncertainties.” The result was a 2001 report titled *Climate Change: An Analysis of Some Key Questions (NRC Report)*, which, drawing heavily on the 1995 IPCC report, concluded that “[g]reenhouse gases are accumulating in Earth’s atmosphere as a result of human activities, causing surface air temperatures and subsurface ocean temperatures to rise.”

In 2003, EPA denied the rulemaking petition. The agency gave two reasons: (1) that contrary to the opinion of EPA’s by-then former general counsel, the Clean Air Act did not authorize EPA to issue mandatory regulations to address global climate change; and (2) that even if the agency had the authority to set greenhouse gas emission standards, it would be unwise to do so. The organizations that had filed the rulemaking petition, various states (including Massachusetts), and various local governments sought review of EPA’s order in the United States Court of Appeals for the District of Columbia Circuit. Two of the three judges on the D.C. Circuit panel agreed that the EPA administrator acted properly in denying the petition for rulemaking. The court therefore denied the petition for review. Of the two judges who concluded that denial was appropriate, one took the position that none of the parties seeking review had legal standing to challenge EPA’s order. The other avoided making a clear statement on the standing issue, but reasoned that the EPA administrator had appropriately taken into account not only scientific evidence but also policy considerations. The U.S. Supreme Court granted the petitioners’ certiorari request.

Stevens, Justice

A well-documented rise in global temperatures has coincided with a significant increase in the concentration of carbon dioxide in the atmosphere. Respected scientists believe the two trends are related. For when carbon dioxide is released into the atmosphere, it acts like the ceiling of a greenhouse, trapping solar energy and retarding the escape of reflected heat. It is therefore a species—the most important species—of a “greenhouse gas.”

Calling global warming “the most pressing environmental challenge of our time,” [the petitioners allege] that EPA has abdicated its responsibility under the Clean Air Act to regulate the emissions of four greenhouse gases, including carbon dioxide. Petitioners have asked us to answer two questions concerning the meaning of § 202(a)(1) of the Act: whether EPA has the statutory authority to regulate greenhouse gas emissions from new motor vehicles; and if so, whether its stated reasons for refusing to do so are consistent with the statute. In response, EPA [has] correctly argued that we may not address those two questions unless at least one petitioner has standing to invoke our jurisdiction under Article III of the Constitution.

Standing

Article III of the Constitution limits federal-court jurisdiction to “Cases” and “Controversies.” Those two words confine “the business of federal courts to questions presented in an adversary context and in a form historically viewed as capable of resolution through the judicial process.” [Case citation omitted.]

The parties’ dispute turns on the proper construction of a congressional statute, a question eminently suitable to resolution in federal court. Congress has moreover authorized this type of challenge to EPA action. See 42 U.S.C. § 7607(b)(1). That authorization is of critical importance to the standing

inquiry: “Congress has the power to define injuries and articulate chains of causation that will give rise to a case or controversy where none existed before.” *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 580 (1992) (Kennedy, J., concurring in part and concurring in judgment). “In exercising this power, however, Congress must at the very least identify the injury it seeks to vindicate and relate the injury to the class of persons entitled to bring suit.” *Id.* We will not, therefore, “entertain citizen suits to vindicate the public’s non-concrete interest in the proper administration of the laws.” *Id.* at 581.

EPA maintains that because greenhouse gas emissions inflict widespread harm, the doctrine of standing presents an insuperable jurisdictional obstacle. We do not agree. At bottom, “the gist of the question of standing” is whether petitioners have “such a personal stake in the outcome of the controversy as to assure that concrete adverseness which sharpens the presentation of issues upon which the court so largely depends for illumination.” *Baker v. Carr*, 369 U.S. 186, 204 (1962).

To ensure the proper adversarial presentation, *Lujan* holds that a litigant must demonstrate that it has suffered a concrete and particularized injury that is either actual or imminent, that the injury is fairly traceable to the defendant, and that it is likely that a favorable decision will redress that injury. See *Lujan*, 504 U.S. at 560–561. However, a litigant to whom Congress has “accorded a procedural right to protect his concrete interests,”—here, the right to challenge agency action unlawfully withheld—“can assert that right without meeting all the normal standards for redressability and immediacy.” *Id.* at 572. When a litigant is vested with a procedural right, that litigant has standing if there is some possibility that the requested relief will prompt the injury-causing party to reconsider the decision that allegedly harmed the litigant. *Id.*

Only one of the petitioners needs to have standing to permit us to consider the petition for review. See *Rumsfeld v. Forum for Academic and Institutional Rights, Inc.*, 547 U.S. 47, 52 (2006). We stress here . . . the special position and interest of Massachusetts. It is of considerable relevance that the party seeking review here is a sovereign state and not, as it was in *Lujan*, a private individual. Well before the creation of the modern administrative state, we recognized that states are not normal litigants for the purposes of invoking federal jurisdiction. As Justice Holmes explained in *Georgia v. Tennessee Copper Co.*, 206 U.S. 230, 237 (1907), a case in which Georgia sought to protect its citizens from air pollution originating outside its borders:

The case has been argued largely as if it were one between two private parties; but it is not. The very elements that would be relied upon in a suit between fellow-citizens as a ground for equitable relief are wanting here. The state owns very little of the territory alleged to be affected, and the damage to it capable of estimate in money, possibly, at least, is small. This is a suit by a state for an injury to it in its capacity of *quasi*-sovereign. In that capacity the state has an interest independent of and behind the titles of its citizens, in all the earth and air within its domain. It has the last word as to whether its mountains shall be stripped of their forests and its inhabitants shall breathe pure air.

Just as Georgia's "independent interest . . . in all the earth and air within its domain" supported federal jurisdiction a century ago, so too does Massachusetts' well-founded desire to preserve its sovereign territory today. That Massachusetts does in fact own a great deal of the "territory alleged to be affected" only reinforces the conclusion that its stake in the outcome of this case is sufficiently concrete to warrant the exercise of federal judicial power.

When a state enters the Union, it surrenders certain sovereign prerogatives. Massachusetts cannot invade Rhode Island to force reductions in greenhouse gas emissions, it cannot negotiate an emissions treaty with China or India, and in some circumstances the exercise of its police powers to reduce in-state motor-vehicle emissions might well be preempted. These sovereign prerogatives are now lodged in the federal government, and Congress has ordered EPA to protect Massachusetts (among others) by prescribing standards applicable to the "emission of any air pollutant from any class or classes of new motor vehicle engines, which in [the Administrator's] judgment cause, or contribute to, air pollution which may reasonably be anticipated to endanger public health or welfare." 42 U.S.C. § 7521(a)(1). Congress has moreover recognized a concomitant procedural right to challenge the rejection of its rulemaking petition as arbitrary and capricious. § 7607(b)(1). Given that procedural right and Massachusetts' stake in protecting its

quasi-sovereign interests, [Massachusetts] is entitled to special solicitude in our standing analysis.

With that in mind, it is clear that petitioners' submissions as they pertain to Massachusetts have satisfied the most demanding standards of the adversarial process. EPA's steadfast refusal to regulate greenhouse gas emissions presents a risk of harm to Massachusetts that is both "actual" and "imminent." *Lujan*, 504 U.S. at 560. There is, moreover, a "substantial likelihood that the judicial relief requested" will prompt EPA to take steps to reduce that risk. *Duke Power Co. v. Carolina Environmental Study Group, Inc.*, 438 U.S. 59, 79 (1978).

The harms associated with climate change are serious and well recognized. Indeed, the NRC Report itself—which EPA [has called] an "objective and independent assessment of the relevant science,"—identifies a number of environmental changes that have already inflicted significant harms, including "the global retreat of mountain glaciers, reduction in snow-cover extent, the earlier spring melting of rivers and lakes, [and] the accelerated rate of rise of sea levels during the 20th century relative to the past few thousand years. . . ." Petitioners allege that this only hints at the environmental damage yet to come. According to the [affidavit of] climate scientist Michael MacCracken, "qualified scientific experts involved in climate change research" have reached a "strong consensus" that global warming threatens (among other things) a precipitate rise in sea levels by the end of the century, "severe and irreversible changes to natural ecosystems," a "significant reduction in water storage in winter snowpack in mountainous regions with direct and important economic consequences," and an increase in the spread of disease. He also observes that rising ocean temperatures may contribute to the ferocity of hurricanes.

That these climate-change risks are widely shared does not minimize Massachusetts' interest in the outcome of this litigation. According to petitioners' unchallenged affidavits, global sea levels rose somewhere between 10 and 20 centimeters over the 20th century as a result of global warming. These rising seas have already begun to swallow Massachusetts' coastal land. Because [Massachusetts] owns a substantial portion of the state's coastal property, it has alleged a particularized injury in its capacity as a landowner. The severity of that injury will only increase over the course of the next century: If sea levels continue to rise as predicted, one Massachusetts official believes that a significant fraction of coastal property will be "either permanently lost through inundation or temporarily lost through periodic storm surge and flooding events." Remediation costs alone, petitioners allege, could run well into the hundreds of millions of dollars.

EPA does not dispute the existence of a causal connection between man-made greenhouse gas emissions and global

warming. At a minimum, therefore, EPA's refusal to regulate such emissions "contributes" to Massachusetts' injuries. EPA nevertheless maintains that its decision not to regulate greenhouse gas emissions from new motor vehicles contributes so insignificantly to petitioners' injuries that the agency cannot be haled into federal court to answer for them. But EPA overstates its case. Its argument rests on the erroneous assumption that a small incremental step, because it is incremental, can never be attacked in a federal judicial forum. Yet . . . [a]gencies, like legislatures, do not generally resolve massive problems in one fell regulatory swoop. They instead whittle away at them over time, refining their preferred approach as circumstances change and as they develop a more-nuanced understanding of how best to proceed. That a first step might be tentative does not by itself support the notion that federal courts lack jurisdiction to determine whether that step conforms to law.

And reducing domestic automobile emissions is hardly a tentative step. Even leaving aside the other greenhouse gases, the United States transportation sector emits an enormous quantity of carbon dioxide into the atmosphere—according to the MacCracken affidavit, more than 1.7 billion metric tons in 1999 alone. That accounts for more than 6% of worldwide carbon dioxide emissions. To put this in perspective: Considering just emissions from the transportation sector, which represent less than one-third of this country's total carbon dioxide emissions, the United States would still rank as the third-largest emitter of carbon dioxide in the world, outpaced only by the European Union and China. Judged by any standard, U.S. motor-vehicle emissions make a meaningful contribution to greenhouse gas concentrations and hence, according to petitioners, to global warming. While it may be true that regulating motor-vehicle emissions will not by itself *reverse* global warming, it by no means follows that we lack jurisdiction to decide whether EPA has a duty to take steps to *slow* or *reduce* it.

In sum—at least according to petitioners' uncontested affidavits—the rise in sea levels associated with global warming has already harmed and will continue to harm Massachusetts. The risk of catastrophic harm, though remote, is nevertheless real. That risk would be reduced to some extent if petitioners received the relief they seek. We therefore hold that petitioners have standing to challenge the EPA's denial of their rulemaking petition.

The Merits

The scope of our review of the merits of the statutory issues is narrow. [A]n agency has broad discretion to choose how best to marshal its limited resources and personnel to carry out its delegated responsibilities. That discretion is at its height when the agency decides not to bring an enforcement action. Therefore, in *Heckler v. Chaney*, 470 U.S. 821, 105 S. Ct. 1649, 84 L. Ed.

2d 714 (1985), we held that an agency's refusal to initiate enforcement proceedings is not ordinarily subject to judicial review.

There are key differences[, however,] between a denial of a petition for rulemaking and an agency's decision not to initiate an enforcement action. In contrast to non-enforcement decisions, agency refusals to initiate rulemaking "are less frequent, more apt to involve legal as opposed to factual analysis, and subject to special formalities, including a public explanation." [Case citation omitted.] They moreover arise out of denials of petitions for rulemaking which (at least in the circumstances here) the affected party had an undoubted procedural right to file in the first instance. Refusals to promulgate rules are thus susceptible to judicial review, though such review is "extremely limited" and "highly deferential." [Case citation omitted.]

EPA concluded in its denial of the petition for rulemaking that it lacked authority under 42 U.S.C. § 7521(a)(1) to regulate new vehicle emissions because[, in its view,] carbon dioxide is not an "air pollutant" as that term is defined in § 7602. In the alternative, it concluded that even if it possessed authority, it would decline to do so because regulation would conflict with other administration priorities.

On the merits, the first question is whether § 202(a)(1) of the Clean Air Act authorizes EPA to regulate greenhouse gas emissions from new motor vehicles in the event that it forms a "judgment" that such emissions contribute to climate change. We have little trouble concluding that it does. In relevant part, § 202(a)(1) provides that EPA "shall by regulation prescribe . . . standards applicable to the emission of any air pollutant from any class or classes of new motor vehicles or new motor vehicle engines, which in [the Administrator's] judgment cause, or contribute to, air pollution which may reasonably be anticipated to endanger public health or welfare." 42 U.S.C. § 7521(a)(1). Because EPA believes that Congress did not intend it to regulate substances that contribute to climate change, the agency maintains that carbon dioxide is not an "air pollutant" within the meaning of the provision.

The statutory text forecloses EPA's reading. The Clean Air Act's sweeping definition of "air pollutant" includes "*any* air pollution agent or combination of such agents, including *any* physical, chemical . . . substance or matter which is emitted into or otherwise enters the ambient air. . . ." § 7602(g) (emphasis added). On its face, the definition embraces all airborne compounds of whatever stripe, and underscores that intent through the repeated use of the word "any." Carbon dioxide, methane, nitrous oxide, and hydrofluorocarbons are without a doubt "physical [and] chemical . . . substance[s] which [are] emitted into . . . the ambient air." The statute is unambiguous.

Rather than relying on statutory text, EPA invokes post-enactment congressional actions and deliberations it views as

tantamount to a congressional command to refrain from regulating greenhouse gas emissions. Even if such post-enactment legislative history could shed light on the meaning of an otherwise-unambiguous statute, EPA never identifies any action remotely suggesting that Congress meant to curtail its power to treat greenhouse gases as air pollutants. That subsequent Congresses have eschewed enacting binding emissions limitations to combat global warming tells us nothing about what Congress meant when it amended § 202(a)(1) in 1970 and 1977. And unlike EPA, we have no difficulty reconciling Congress' various efforts to promote interagency collaboration and research to better understand climate change with the agency's pre-existing mandate to regulate "any air pollutant" that may endanger the public welfare. Collaboration and research do not conflict with any thoughtful regulatory effort; they complement it.

EPA's reliance on *FDA v. Brown & Williamson Tobacco Corp.*, 529 U.S. 120 (2000), is similarly misplaced. In holding that tobacco products are not "drugs" or "devices" subject to Food and Drug Administration (FDA) regulation pursuant to the Food, Drug and Cosmetic Act (FDCA), we found critical at least two considerations that have no counterpart in this case. First, we thought it unlikely that Congress meant to ban tobacco products, which the FDCA would have required had such products been classified as "drugs" or "devices." Here, in contrast, EPA jurisdiction would lead to no such extreme measures. EPA would only *regulate* emissions, and even then, it would have to delay any action "to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance." § 7521(a)(2).

Second, in *Brown & Williamson* we pointed to an unbroken series of congressional enactments that made sense only if adopted "against the backdrop of the FDA's consistent and repeated statements that it lacked authority under the FDCA to regulate tobacco." We can point to no such enactments here: EPA has not identified any congressional action that conflicts in any way with the regulation of greenhouse gases from new motor vehicles. Even if it had, Congress could not have acted against a regulatory "backdrop" of disclaimers of regulatory authority. Prior to the order that provoked this litigation, EPA had never disavowed the authority to regulate greenhouse gases, and in 1998 it in fact affirmed that it *had* such authority. There is no reason, much less a compelling reason, to accept EPA's invitation to read ambiguity into a clear statute.

EPA finally argues that it cannot regulate carbon dioxide emissions from motor vehicles because doing so would require it to tighten mileage standards, a job (according to EPA) that Congress has assigned to the Department of Transportation (DOT). But that DOT sets mileage standards in no way licenses EPA to shirk its environmental responsibilities. EPA has been charged with protecting the public's "health" and "welfare," 42

U.S.C. § 7521(a)(1), a statutory obligation wholly independent of DOT's mandate to promote energy efficiency.

The alternative basis for EPA's decision—that even if it does have statutory authority to regulate greenhouse gases, it would be unwise to do so at this time—rests on reasoning divorced from the statutory text. While the statute does condition the exercise of EPA's authority on its formation of a "judgment," 42 U.S.C. § 7521(a)(1), that judgment must relate to whether an air pollutant "cause[s], or contribute[s] to, air pollution which may reasonably be anticipated to endanger public health or welfare." Put another way, the use of the word "judgment" is not a roving license to ignore the statutory text. It is but a direction to exercise discretion within defined statutory limits.

If EPA makes a finding of endangerment, the Clean Air Act requires the agency to regulate emissions of the deleterious pollutant from new motor vehicles. *Id.* (stating that "[EPA] shall by regulation prescribe . . . standards applicable to the emission of any air pollutant from any class of new motor vehicles"). EPA no doubt has significant latitude as to the manner, timing, content, and coordination of its regulations with those of other agencies. But once EPA has responded to a petition for rulemaking, its reasons for action or inaction must conform to the authorizing statute. Under the clear terms of the Clean Air Act, EPA can avoid taking further action only if it determines that greenhouse gases do not contribute to climate change or if it provides some reasonable explanation as to why it cannot or will not exercise its discretion to determine whether they do. To the extent that this constrains agency discretion to pursue other priorities of the Administrator or the President, this is the congressional design.

EPA has refused to comply with this clear statutory command. Instead, it has offered a laundry list of reasons not to regulate. For example, EPA said that a number of voluntary executive branch programs already provide an effective response to the threat of global warming, that regulating greenhouse gases might impair the President's ability to negotiate with key developing nations to reduce emissions, and that curtailing motor-vehicle emissions would reflect an inefficient, piecemeal approach to address the climate change issue. [T]hese policy judgments . . . have nothing to do with whether greenhouse gas emissions contribute to climate change. Still less do they amount to a reasoned justification for declining to form a scientific judgment. In particular, while the President has broad authority in foreign affairs, that authority does not extend to the refusal to execute domestic laws.

Nor can EPA avoid its statutory obligation by noting the uncertainty surrounding various features of climate change and concluding that it would therefore be better not to regulate at this time. If the scientific uncertainty is so profound that it precludes EPA from making a reasoned judgment as to whether

greenhouse gases contribute to global warming, EPA must say so. That EPA would prefer not to regulate greenhouse gases because of some residual uncertainty . . . is relevant. The statutory question is whether sufficient information exists to make an endangerment finding.

In short, EPA has offered no reasoned explanation for its refusal to decide whether greenhouse gases cause or contribute to climate change. Its action was therefore “arbitrary, capricious, . . . or otherwise not in accordance with law.”⁴²

Exhaustion and Ripeness Once standing has been established, two further obstacles—exhaustion and ripeness—confront the party challenging an agency action. Courts do not want to allow regulated parties to short-circuit the regulatory process. They also want to give agencies the chance to correct their own mistakes and to develop fully their positions in disputed matters. Accordingly, they normally insist that aggrieved parties *exhaust necessary administrative remedies* before they will grant judicial review.⁷ The requirement that a dispute be *ripe* for judicial review is a general requirement emanating from the Constitution’s insistence that only “cases or controversies” are judicially resolvable. In determining ripeness, the courts weigh the hardship to the parties of withholding judicial review against the degree of refinement of the issues still possible.

Legal Bases for Challenging Agency Actions

Assuming that the above prerequisites to judicial review are met, there are various legal theories on which agency action may be attacked. It may be alleged that the agency’s action was *ultra vires* (exceeded its authority as granted by its enabling legislation). For example, in a 2000 case, the Supreme Court struck down the Food and Drug Administration’s 1996 regulations dealing with cigarettes and smokeless tobacco. The Court held that in the Food, Drug, and Cosmetic Act, Congress neither gave, nor intended to give, the FDA authority to regulate tobacco products.⁸ (When this book went to press in 2008, however, Congress seemed poised to grant such authority to the FDA. See the discussion in this chapter’s opening

U.S.C. § 7607(d)(9)(A). We need not and do not reach the question whether on remand EPA must make an endangerment finding, or whether policy concerns can inform EPA’s actions in the event that it makes such a finding. We hold only that EPA must ground its reasons for action or inaction in the statute.

Court of Appeals decision reversed, and case remanded for further proceedings.

problem.) In a 2005 decision, *American Library Association v. Federal Communications Commission*, the U.S. Court of Appeals for the District of Columbia Circuit held that the Federal Communications Commission (FCC) exceeded the scope of its regulatory authority when it promulgated a regulation requiring makers of televisions and computers to install “broadcast flag” technology in order to impede consumers’ ability to copy digitally distributed programs. Using unusually strong language as it invalidated the regulation, the court stressed that the FCC’s assertion of authority was “strained and implausible” and that “nothing in [the relevant federal] statute, its legislative history, the applicable case law, or agency practice indicat[es] that Congress meant to provide the sweeping authority the FCC now claims.”

Alternatively, it may be alleged that the agency *substantially deviated from procedural requirements* contained in the APA or in the agency’s enabling legislation. Agency action may also be challenged as *unconstitutional* or as the product of an *erroneous interpretation of statutes*. Finally, agency action may be overturned if it is *unsubstantiated by the facts* before the agency when it acted.

Standards of Review The degree of scrutiny that courts will apply to agency action depends on the nature of issues in dispute and the type of agency proceedings that produced the challenged action. Courts are least likely to defer to agency action when *questions of law* are at issue. Although courts afford substantial consideration to an agency’s interpretations of the statutes it enforces, the courts are still the ultimate arbiters of the meaning of statutes and constitutional provisions.

When *questions of fact or policy* are at issue, courts are more likely to defer to the agency because it presumably has superior expertise and because the agency fact finders who heard and viewed the evidence were better situated to judge its merit. When agency factual judgments

⁷Necessary administrative remedies are those a statute or regulation establishes as mandatory steps to be completed before judicial review can be sought.

⁸*Food and Drug Administration v. Brown & Williamson Tobacco Corp.*, 529 U.S. 120 (U.S. Sup. Ct. 2000).

CYBERLAW IN ACTION

Does a federal statute, the Telecommunications Act of 1996, require cable companies to allow other firms to use their systems in order to offer high-speed Internet access services? In answering that question “no” by enacting an agency regulation to that effect, did the Federal Communications Commission improperly interpret the federal statute? The U.S. Supreme Court took up that issue and related questions in *National Cable and Telecommunications Association v. Brand X Internet Services*, 545 U.S. 967 (2005).

The Telecommunications Act of 1996 regulates providers of telecommunications services in various ways. One provision of the statute labels firms that provide “telecommunications service” as common carriers and requires them to sell other companies access to their networks (including their basic telephone service networks and their DSL Internet access lines) on a nondiscriminatory basis. Cable Internet firms furnish broadband service, which provides faster Internet access than the dial-up Internet service offered by various providers. Dial-up service providers and consumer groups, hoping to increase competition in Internet access services—particularly concerning the faster broadband variety—began asserting that cable Internet firms were subject to the Telecommunications Act provision that required the provider of a “telecommunications service” to sell other interested parties access to that provider’s network. The cable Internet firms, not wanting to be forced to open up their networks to other providers, maintained that they were not subject to the Telecommunications Act requirement.

The argument that cable Internet service is a “telecommunications service” for purposes of the federal statute rested on the notion that cable Internet service consists of two parts. One part—simple data communication—is supposedly a telecommunications service. The other part, which involves the providing of more elaborate information services, is not a telecommunications service. Dial-up firms and consumer groups argued that the telecommunications service aspect of cable Internet service fell within the Telecommunication Act’s

section requiring the provider of a telecommunications service to allow, for a fee and on a nondiscriminatory basis, access to its networks.

In 2002, the Federal Communications Commission (FCC) rejected the position of the dial-up firms and consumer groups. The FCC did so by promulgating a regulation that interpreted the Telecommunications Act and its provision-of-access-to-networks provision as inapplicable to cable Internet service providers. In the FCC’s view, as expressed in the regulation, cable Internet service providers were information service providers, not “telecommunications service” providers for purposes of the statute. Brand X Internet Services, a dial-up provider that believed it was entitled (for a fee) to obtain access to a cable Internet service provider’s broadband network, filed suit alleging that the FCC’s regulation was an invalid and incorrect interpretation of the Telecommunications Act. The U.S. Court of Appeals for the Ninth Circuit agreed with Brand X and held that the FCC regulation was invalid.

The Supreme Court, however, reversed the Ninth Circuit’s decision. In an opinion authored by Justice Thomas, a six-justice majority stated that the Telecommunications Act provision at issue in the case was ambiguous and that when an appropriate administrative agency issues a reasonable interpretation of an ambiguous statute, courts must defer to the agency’s interpretation. The majority noted that such deference is appropriate even if the Court thinks the agency’s interpretation, though reasonable, is not necessarily the best interpretation. According to the Court, the FCC’s 2002 regulation interpreting the Telecommunications Act qualified as a reasonable interpretation, so the Court deferred to it. In dissent, Justice Scalia called the FCC’s interpretation of the statute implausible and contrary to the wishes of Congress. Parties disappointed by the Court’s decision expressed concerns that competition among providers of broadband access would suffer, that concentration in the providing of such access would be restricted to a relatively small number of firms, and that such interests as enhanced consumer choice and low-cost Internet access were likely to be thwarted.

are at stake, the APA provides for three standards of review, the most rigorous of which is *de novo* review.

When conducting a *de novo* review, courts make an independent finding of the facts after conducting a new hearing. Efficiency considerations plainly favor limited judicial review of the facts. Accordingly, *de novo* review is employed only when required by statute, when inadequate fact-finding proceedings were used in an agency adjudicatory proceeding, or when new factual issues that

were not before the agency are raised in a proceeding to enforce a nonadjudicatory agency action.

When courts review formal agency adjudications or formal rulemaking, the APA calls for the application of a **substantial evidence** test. Only agency findings that are “unsupported by substantial evidence” will be overturned. In conducting substantial evidence reviews, courts look at the reasonableness of an agency’s actions in relation to the facts before it rather than conducting

an independent fact-finding hearing. The substantial evidence test also tends to be employed in hybrid rulemaking cases.

The judicial standard of review used in cases involving informal agency adjudications or rulemaking is the **arbitrary and capricious** test. (For an example of an application of this test, see the *Massachusetts v. EPA* case, which appears earlier in the chapter.) This is the least rigorous standard of judicial review, in view of the great degree of deference it accords agency decisions. In deciding whether an agency's action was arbitrary and capricious, a reviewing court should not substitute its judgment for that of the agency. Instead, it should ask whether there was an adequate factual basis for the agency's action, and should sustain actions that do not amount to a "clear error of judgment." Although the substantial evidence and arbitrary and capricious tests are separate and distinct in theory, the distinctions often tend to blur in actual practice.

Information Controls

Over roughly the last four decades, Congress has enacted three major statutes aimed at controlling administrative agencies through the regulation of information. Each of these statutes represents a compromise between competing social interests of significant importance. On one hand, we have a strong democratic preference for public disclosure of governmental operations, believing that "government in the dark" is less likely to be consistent with the public interest than is "government in the sunshine." On the other hand, we recognize that some sensitive governmental activities must be shielded from the scrutiny of unfriendly parties, and that disclosure of some information may unjustifiably invade personal privacy, hinder government law enforcement efforts, or provide the competitors of a company about which information is being disclosed with proprietary information that could be used unfairly to the competitors' advantage.

Freedom of Information Act The *Freedom of Information Act* (FOIA) has existed for nearly 35 years. Congress enacted it to enable private citizens to obtain access to documents in the government's possession. Agencies must normally respond to public requests for documents within 10 days after such a request has been received. An agency bears the burden of justifying a denial of any FOIA request. Denials are appealable to an appropriate federal district court. Successful plaintiffs may recover their costs and attorney's fees.

Not all government-held documents are obtainable under the FOIA, however. The FOIA exempts from disclosure documents that:

1. Must be kept secret in the interest of national security.
2. Concern an agency's internal personnel practices.
3. Are specifically exempted from disclosure by statute.
4. Contain trade secrets or other confidential or privileged commercial or financial information.
5. Are interagency or intra-agency memos or letters that would not be subject to discovery in litigation.
6. Appear in individual personnel or medical files, or in similar files if disclosure would constitute a clearly unwarranted invasion of personal privacy.
7. Would threaten the integrity of a law enforcement agency's investigations or jeopardize an individual's right to a fair trial.
8. Relate to the supervision or regulation of financial institutions.
9. Contain geological or geophysical data.

Frequent users of the FOIA include the media, industry trade associations, public interest groups, and companies seeking to obtain useful information about their competitors. The *Klamath Water Users* case, which follows shortly, deals with the fifth exemption listed above. It is important to note that although the FOIA allows agencies to refuse to disclose exempted documents, it does not impose on them the affirmative duty to do so. The Supreme Court has held that individuals cannot compel an agency to deny an FOIA request for allegedly exempt documents that contain sensitive information about them.

FOIA compliance has recently been the focus of considerable controversy on three points. First, budgetary cutbacks have combined with growing numbers of requests for information to produce agency delays as long as two years in responding to information requests. Courts tend to tolerate agency delays if the agency can show that it made a "due diligence" effort to respond. Second, the dramatic increase in computerized information storage that has occurred since the passage of the FOIA has created problems not specifically contemplated by the statute, which focuses on information stored in documentary form. Do interested parties have the same rights of access to data stored in agency computers that they have to government documents? May the government destroy electronic mail messages, or must it save them? Future legislative or judicial action may be necessary for definitive resolution of such questions.

Third, some members of Congress, media organizations, and public interest groups have criticized the federal government for what they see as excessive and unreasonable

reliance on FOIA exemptions in order to keep documents under wraps. Legislation designed to deal with this supposed problem seems likely in the coming years.

Department of the Interior v. Klamath Water Users Protective Association 532 U.S. 1 (U.S. Sup. Ct. 2001)

The Department of the Interior's Bureau of Reclamation (Reclamation) administers the Klamath Irrigation Project, which uses water from the Klamath River Basin to irrigate parts of Oregon and California. After the Department began developing the Klamath Project Operation Plan (Plan) to provide water allocations among competing uses and users, the Department asked the Klamath and other Indian Tribes (Basin Tribes or Tribes) to consult with Reclamation on the matter. A memorandum of understanding between those parties called for assessment, in consultation with the Tribes, of the impacts of the Plan on tribal trust resources. During roughly the same period, the Department's Bureau of Indian Affairs (Bureau) filed claims on behalf of the Klamath Tribe in an Oregon state court proceeding intended to allocate water rights. Because the Bureau is responsible for administering land and water held in trust for Indian tribes, it consulted with the Klamath Tribe. The Bureau and the Klamath Tribe then exchanged written memos on the appropriate scope of the claims ultimately submitted by the government for the benefit of the Tribe.

The Klamath Water Users Protective Association (Water Users Association) is a nonprofit organization, most of whose members receive water from the Klamath Irrigation Project. Because of the scarcity of water, most Water Users Association members have interests adverse to the tribal interests. The Water Users Association filed a series of requests with the Bureau under the Freedom of Information Act (FOIA), seeking access to communications between the Bureau and the Basin Tribes. In response, the Bureau turned over several documents but withheld others on the basis of FOIA Exemption 5. The Water Users Association then sued the Bureau and the Department under FOIA to compel release of the documents. A federal district court granted the government summary judgment but the U.S. Court of Appeals for the Ninth Circuit reversed, holding that Exemption 5 did not apply. The U.S. Supreme Court granted the government's petition for certiorari.

Souter, Justice

Upon request, FOIA mandates disclosure of records held by a federal agency, unless the documents fall within enumerated exemptions. “[T]hese limited exemptions do not obscure the basic policy that disclosure, not secrecy, is the dominant objective [of FOIA].” *Department of Air Force v. Rose* (U.S. Sup. Ct. 1976). “Consistent with [FOIA’s] goal of broad disclosure, these exemptions have been consistently given a narrow compass.” *Department of Justice v. Tax Analysts* (U.S. Sup. Ct. 1989).

Exemption 5 protects from disclosure “inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency.” To qualify, a document must thus satisfy two conditions: its source must be a government agency, and it must fall within the ambit of a privilege against discovery under judicial standards that would govern litigation against the agency that holds it.

Our prior cases on Exemption 5 have addressed the second condition, incorporating civil discovery privileges. So far as they might matter here, those privileges include the privilege for attorney work product and what is sometimes called the “deliberative process” privilege. Work product protects “mental processes of the attorney” [citation omitted], while deliberative

process covers “documents reflecting advisory opinions, recommendations, and deliberations comprising part of a process by which governmental decisions and policies are formulated” [citation omitted]. The deliberative process privilege rests on the obvious realization that officials will not communicate candidly among themselves if each remark is a potential item of discovery and front page news. [Its] object is to enhance the quality of agency decisions by protecting open and frank discussion among those who make them within the government.

The point is not to protect government secrecy pure and simple, however, and the first condition of Exemption 5 is no less important than the second; the communication must be “inter-agency or intra-agency.” Statutory definitions underscore the apparent plainness of this text. With exceptions not relevant here, “agency” means “each authority of the Government of the United States,” and “includes any executive department, military department, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government . . . , or any independent regulatory agency.”

Although neither the terms of the exemption nor the statutory definitions say anything about communications with outsiders, some Courts of Appeals have held that in some

circumstances a document prepared outside the government may nevertheless qualify as an “intra-agency” memorandum under Exemption 5. Typically, courts taking [this] view have held that the exemption extends to communications between government agencies and outside consultants hired by them. In such cases, the records submitted by outside consultants played essentially the same part in an agency’s process of deliberation as documents prepared by agency personnel might have done. To be sure, the consultants in these cases were independent contractors and were not assumed to be subject to the degree of control that agency employment could have entailed; nor do we read the cases as necessarily assuming that an outside consultant must be devoid of a definite point of view when the agency contracts for its services. But the fact about the consultant that is constant in the typical cases is that the consultant does not represent an interest of its own, or the interest of any other client, when it advises the agency that hires it. Its only obligations are to truth and its sense of what good judgment calls for, and in those respects the consultant functions just as an employee would be expected to do.

The Department purports to rely on this consultant corollary to Exemption 5 in arguing for its application to the Klamath Tribe’s communications to the Bureau in its capacity of fiduciary for the benefit of the Indian Tribes. The existence of a trust obligation is not, of course, in question. The fiduciary relationship has been described as “one of the primary cornerstones of Indian law,” and has been compared to one existing under a common law trust, with the United States as trustee, the Indian tribes or individuals as beneficiaries, and the property and natural resources managed by the United States as the trust corpus. The Department is surely right in saying that confidentiality in communications with tribes is conducive to a proper discharge of its trust obligation.

From the recognition of this interest in frank communication . . . , the Department would have us infer a sufficient justification for applying Exemption 5 to communications with the Tribes, in the same fashion that Courts of Appeals have found sufficient reason to favor a consultant’s advice that way. But the Department’s argument skips a necessary step, for it ignores the first condition of Exemption 5, that the communication be “intra-agency or inter-agency.” The Department seems to be saying that “intra-agency” is a purely conclusory term, just a label to be placed on any document the government would find it valuable to keep confidential.

There is, however, no textual justification for draining the first condition of independent vitality, and once the intraagency condition is applied, it rules out any application of Exemption 5 to tribal communications on analogy to consultants’ reports (assuming, which we do not decide, that these reports may qualify

as intra-agency under Exemption 5). As mentioned already, consultants whose communications have typically been held exempt have not been communicating with the government in their own interest or on behalf of any person or group whose interests might be affected by the government action addressed by the consultant. In that regard, consultants may be enough like the agency’s own personnel to justify calling their communications “intra-agency.” The Tribes, on the contrary, necessarily communicate with the Bureau with their own, albeit entirely legitimate, interests in mind. While this fact alone distinguishes tribal communications from the consultants’ examples recognized by several Courts of Appeals, the distinction is even sharper, in that the Tribes are self-advocates at the expense of others seeking benefits inadequate to satisfy everyone.

As to those documents bearing on the Plan, the Tribes are obviously in competition with nontribal claimants, including those irrigators represented by the Water Users Association. The record shows that documents submitted by the Tribes included, among others, “a position paper that discusses water law legal theories” and “addresses issues related to water rights of the tribes,” a memorandum “containing views on policy the BIA could provide to other governmental agencies,” “views concerning trust resources,” and a letter “conveying the views of the Klamath Tribe concerning issues involved in the water rights adjudication.” While these documents may not take the formally argumentative form of a brief, their function is quite apparently to support the tribal claims. The Tribes are thus urging a position necessarily adverse to the other claimants, the water being inadequate to satisfy the combined demand. As the Court of Appeals said, “the Tribes’ demands, if satisfied, would lead to reduced water allocations to members of the [Water Users] Association and have been protested by [those] members who fear water shortages and economic injury in dry years.” The position of the Klamath Tribe . . . is thus a far cry from the position of the paid consultant.

All of this boils down to requesting that we read an “Indian trust” exemption into the statute, a reading that is out of the question. There is simply no support for the exemption in the statutory text, which we have elsewhere insisted be read strictly. In FOIA, after all, a new conception of government conduct was enacted into law, “a general philosophy of full agency disclosure.” *Department of Justice v. Tax Analysts* (1989) (quoting FOIA legislative history). “Congress believed that this philosophy, put into practice, would help ensure an informed citizenry, vital to the functioning of a democratic society.” *Id.* Congress had to realize that not every secret under the old law would be secret under the new.

Judgment of Court of Appeals affirmed.

Privacy Act of 1974 The **Privacy Act of 1974** allows individuals to inspect files that agencies maintain on them and to request that erroneous or incomplete records be corrected. It also attempts to prevent agencies from gathering unnecessary information about individuals and forbids the disclosure of an individual's records without his written permission, except in certain specifically exempted circumstances. For example, records may be disclosed to employees of the agency that collected the information if those employees need the records to perform their duties (the “need to know” exception), to law enforcement agencies, to other agencies' personnel for “routine use” (uses for purposes compatible with the purpose for which the record was collected), and to persons filing legitimate FOIA requests. In addition, records may be disclosed if a court order requires disclosure.

Government in the Sunshine Act The **Government in the Sunshine Act of 1976** was designed to ensure that “[e]very portion of every meeting of an agency shall be open to public observation.” However, complete public access to all agency meetings could have the same negative consequences that unrestrained public access to agency records may sometimes produce. Accordingly, the Sunshine Act exempts certain agency meetings from public scrutiny under circumstances similar to those under which documents are exempt from disclosure under the FOIA.

Issues in Regulation

“Old” Regulation versus “New” Regulation Some interested observers of regulatory developments over roughly the past 50 years have noted significant differences between the regulations that originated during the Progressive (1902 to 1914) and New Deal (1933 to 1938) eras and many regulations promulgated more recently. They argue not only that the number and scope of regulatory controls have increased substantially in recent years, but also that the focus and the impact of regulation have changed significantly.

Whereas earlier regulation often focused on business practices that harmed the economic interests of specific segments of society (e.g., workers, small-business owners, investors), many modern regulations focus on the health and safety of all citizens. Furthermore, whereas earlier regulations often focused on a particular industry or group of industries (e.g., the railroads or the securities industry), many modern regulations affect large segments of industry (e.g., Title VII of the Civil Rights Act

of 1964 and regulations governing environmental pollution and workplace safety). Finally, whereas earlier congressional delegations of regulatory power tended to be quite broad, many more recent regulatory statutes have been extremely detailed.

What are the consequences of these changes in the nature of regulation? Far more businesses than ever before feel the impact of federal regulation, and far more areas of internal corporate decision-making are affected by regulation. These changes tend to erode the historic distinction between “regulated” and other industries, and to heighten the importance of business–government relations. Detailed regulatory statutes also increase Congress's role in shaping regulatory policy at the expense of administrative discretion, making regulatory policy arguably more vulnerable to legislative lobbying efforts.

“Captive” Agencies and Agencies’ “Shadows” Proponents of regulation have traditionally feared that regulatory agencies would become “captives” of the industries they were charged with regulating. Through “revolving door” appointments by which key figures move back and forth between government and the private sector, and through excessive reliance on “experts” beholden to industry, the independence of administrative agencies may be compromised and their effectiveness as regulators destroyed.

More recently, commentators sympathetic to business have argued that similar dangers to agency independence exist in the form of the nonindustry “shadow” groups that public interest organizations maintain to monitor agency actions (e.g., the Center for Auto Safety, which monitors the work of the Highway Transportation Safety Administration). Agencies may develop dependency relationships with their shadows or at least make decisions based in part on their shadows' anticipated reactions. Such informal means of shaping regulatory policy, when combined with the ability to challenge agency actions in court, have made public interest organizations important players in the contemporary regulatory process.

Deregulation versus Reregulation A useful axiom for understanding the process of social and legal evolution is that *the cost of the status quo is easier to perceive than the cost of change*. Few things are more illustrative of the operation of this axiom than the history of regulation in the United States.

In the latter years of the 19th century, the social costs of living in an unregulated environment were readily apparent. Large business organizations often abused their power at the expense of their customers, suppliers,

Ethics in Action

As noted elsewhere on these pages, a long-standing concern about administrative agencies focuses on the prospect of a “revolving door” situation in which top agency personnel leave the agency to take positions in the industry regulated by the agency, or in which agency officials’ desire for an eventual position in the industry causes them to go “soft” on businesses the agency is charged with regulating. The “revolving door” prospect may take other forms, such as where an industry executive philosophically opposed to the work of a certain administrative agency ends up being appointed to a prominent position in that agency when the White House would like to see the agency become less active. Consider these potential issues regarding the revolving door situation:

- What ethical obligations does an administrative agency official owe when she leaves her agency position to accept a job in the industry regulated by the agency?
- What ethical obligations does an executive of a corporation owe when he leaves his corporate position to accept a job

with an administrative agency that regulates the industry in which the corporation does business?

- Is it ethical for an official of an administrative agency to inquire about possible employment in the very industry the agency is charged with regulating? What about the reverse of this situation?
- If the prevailing political winds lead to circumstances in which an avowed opponent of a certain administrative agency’s work is appointed to a high-level position in that agency, does this new agency official have an ethical obligation to “buy in” to the work of the agency? If so, to what extent? Does this new agency official, on the other hand, have an ethical obligation to make efforts to change the agency? If so, to what extent?
- Is a revolving door between an administrative agency and its regulated industry necessarily a bad thing? May it be beneficial for the agency, the industry, and society in general? If so, in what way or ways?

employees, and distributors, and sought to increase their power by acquiring their competitors or driving them out of business. Market forces, standing alone, were apparently unable to protect the public from defective, and in some cases dangerous, products. As a result of these and numerous other social and historical factors, the 20th century witnessed a tremendous growth in government and in government regulation of business.

Regulation, too, has its costs. Regulatory bureaucracies generate their own internal momentum and have their own interests to protect. They may become insensitive to the legitimate concerns of the industries they regulate and the public they supposedly serve. They may continue to seek higher and higher levels of safety, heedless of the fact that life necessarily involves some elements of risk and that the total elimination of risk in a modern technological society may be impossible—or if possible, obtainable at a cost that we cannot afford to pay. At a time when many Americans are legitimately concerned about economic efficiency, as well as the ability of U.S. companies to compete effectively in world markets against competitors who operate in less regulated environments, these and other costs of regulation are also readily apparent.

As a result, in the last 25 to 30 years, we have witnessed substantial deregulation in a number of industries such as the airline, banking, railroad, and trucking industries. The results of these efforts are, at best, mixed. The

case of airline regulation should suffice to make the point. Proponents of deregulation cite the generally lower fares that deregulation has produced. Opponents tend to point to increased airline overbooking practices, reduced or eliminated services to smaller communities, and increased safety problems, all of which, they argue, are products of deregulation. The costs of deregulation have generated predictable calls for reregulating the airline industry. The ultimate outcome of the deregulation versus reregulation debate will depend on which costs we as a society decide we would prefer to pay.

Regulations That Preempt Private Lawsuits?

As this book went to press in 2008, a controversial development suggested potential for litigation over whether agency regulations had gone too far. In the waning months of the Bush Administration, certain federal agencies expressed interest in promulgating regulations whose content would call for preemption of state law–based private lawsuits alleging negligence or other failures to comply with state law in instances in which the federal regulations arguably would have been satisfied. (When federal preemption occurs, a state law–based claim cannot serve as a basis for obtaining damages or other legal relief.)

What made this proposed action by certain agencies controversial? It was the frequent absence of a preemption clause in the relevant federal statute from which the

agencies derived their authority to regulate. Proponents of such action by agencies saw it as an appropriate way to reinforce the federal control that they believed should be present when a detailed federal regulatory regime existed. Critics condemned such action as overreaching attempts by federal agencies to go beyond the authority extended to them by Congress, and as backdoor devices

for achieving, through regulations promulgated by unelected agency personnel, what could not be achieved in the political give-and-take of the congressional arena. In view of the potentially high stakes associated with the controversy, it seems inevitable that we will see litigation over the appropriateness—or inappropriateness—of preemption by agency regulation.

Problems and Problem Cases

1. Title X of the Public Health Service Act provides federal funding for family-planning services. Section 1008 of the statute specifies that none of the federal funds provided under Title X are to be “used in programs where abortion is a method of family planning.” In 1988, the Secretary of Health and Human Services issued new regulations that, among other things, prohibited family-planning services that receive Title X funds from engaging in counseling concerning the use of abortion as a method of family planning, referrals for abortion as a method of family planning, and activities amounting to encouragement or advocacy of abortion as a method of family planning. Various Title X grantees and physicians supervising Title X funds challenged the validity of the regulations and sought an injunction against their implementation. Were the regulations a permissible interpretation of Section 1008? Did the regulations violate constitutional guarantees?
2. Section 9 of the Endangered Species Act (ESA) makes it unlawful for any person to “take” an endangered or threatened species of fish or wildlife. A definition section in the ESA states that *take* means “to harass, harm, pursue, hunt, school, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.” The Secretary of the Department of the Interior (the Secretary) promulgated a regulation that defined the term *harm* for purposes of the statutory language just quoted. This regulation stated that *harm* “means an act which actually kills or injures wildlife” and that “[s]uch act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding or sheltering.” A declaratory judgment action attacking the validity of this regulation was brought against the Secretary by a group of landowners, logging companies, and families dependent on

the forest products industries, and by organizations representing those parties’ interests. The plaintiffs sought a judicial ruling that the regulation defining *harm* as including habitat modification or degradation was an unreasonable and erroneous interpretation of the ESA. The plaintiffs alleged that they had been injured economically by the government’s application of the *harm* regulation to the red-cockaded woodpecker, an endangered species, and the northern spotted owl, a threatened species. Was the Department of the Interior’s regulation a reasonable interpretation of the statute?

3. Small lodges in remote regions of Alaska cater to hunters and fishermen. These lodges provide food and shelter, guide services, and air transportation to and from the lodge and on side trips, all for a flat fee. Hunting and fishing guides employed by the lodges often pilot light aircraft as part of their guiding service. Beginning in 1963, the Federal Aviation Administration, through its Alaskan Region office, consistently advised guide pilots that they were not governed by FAA regulations dealing with commercial pilots. This advice stemmed from a 1963 Civil Aeronautics Board decision in a case in which the FAA had attempted to sanction a guide pilot who had not complied with FAA regulations applicable to commercial pilots. The Civil Aeronautics Board concluded that the guide pilot’s flight with a hunter was merely incidental to the guiding business, that the guide pilot was not a commercial pilot, and that the FAA’s commercial pilot regulations therefore did not apply. During the 1990s, officials at FAA headquarters in Washington, D.C., began expressing concern about the safety of guide pilots and their passengers. In 1998, the FAA published an announcement that was aimed at guide pilots. This announcement stated that guide pilots must abide by all FAA regulations applicable to commercial pilots. In a petition for judicial review of this FAA action, the Alaska Professional Hunters Association (APHA) attacked the

validity of the announcement and the new rule it purported to adopt. APHA contended that because the FAA sought to adopt a rule that was contrary to the long-standing interpretation of the FAA's regulations and contrary to the expectations of the guide pilots and the lodges for which they worked, the FAA at a minimum needed to follow the "notice and comment" (informal rulemaking) procedure before adopting a new rule. Simply announcing the new rule, APHA argued, was improper. Was APHA's contention correct?

4. On December 10, 1986, a federal grand jury indicted James Mallen for allegedly making false statements to the Federal Deposit Insurance Corporation (FDIC) and for allegedly making false statements to a bank for the purposes of influencing the actions of the FDIC. Mallen was the president and a director of a federally insured bank at the time he was indicted. On January 20, 1987, the FDIC issued an ex parte order stating that Mallen's continued service could "pose a threat to the interests of the bank's depositors or threaten to impair public confidence in the bank." The order suspended Mallen as president and as a director of the bank and prohibited him "from further participation in any manner in the conduct of the affairs of the bank, or any other bank insured by the FDIC." In issuing the suspension order without first holding a hearing on the matter, the FDIC acted pursuant to a section of the Financial Institutions Supervisory Act. A copy of the FDIC's order was served on Mallen on January 26, 1987. Four days later, his attorney filed a written request for an "immediate administrative hearing" to commence no later than February 9. The FDIC scheduled a hearing for February 18, but on February 6, Mallen filed suit against the FDIC. Arguing that the FDIC's action denied him due process, Mallen sought a preliminary injunction against the suspension order. Was Mallen denied due process?
5. John Doe began work at the Central Intelligence Agency (CIA) in 1973 as a clerk-typist. Periodic fitness reports consistently rated him as an excellent or outstanding employee. By 1977, he had been promoted to covert electronics technician. In January 1982, Doe voluntarily told a CIA security officer that he was a homosexual. Almost immediately, the CIA placed Doe on paid administrative leave and began an investigation of his sexual orientation and conduct. Doe submitted to an extensive polygraph

examination during which he denied having sexual relations with foreign nationals and maintained that he had not disclosed classified information to any of his sexual partners. The polygraph officer told Doe that the test results indicated that his responses had been truthful. Nonetheless, a month later Doe was told that the CIA's Office of Security had determined that his homosexuality posed a threat to security. CIA officials declined, however, to explain the nature of the danger. Doe was asked to resign. When he refused to do so he was dismissed by CIA Director William Webster, who "deemed it necessary and advisable in the interests of the United States to terminate [Doe's] employment with this Agency pursuant to section 102(c) of the National Security Act." The statutory section cited by the director allows termination of a CIA employee whenever the director "shall deem such termination necessary or advisable in the interests of the United States." Doe filed suit against the CIA, arguing that his termination was unlawful under section 102(c) and various constitutional guarantees. The CIA moved to dismiss Doe's complaint, arguing that the director's decision was a decision committed to agency discretion by law and thus was not subject to judicial review. Was the CIA's argument correct?

6. Scott Armstrong submitted a Freedom of Information Act (FOIA) request that, among other things, called for the federal government to reveal a list of names of lower-level FBI agents who attended certain meetings at the White House during the mid-1980s. When the government refused to reveal the agents' names, Armstrong filed suit under the FOIA. Upholding this refusal, the district court agreed with the government's contention that the names of FBI agents should always be exempt from disclosure under the FOIA exemption for "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." On appeal, Armstrong argued that the district court erred in concluding that the FOIA's privacy exemption justifies a categorical rule that FBI agents' names are exempt from disclosure. Was Armstrong correct?
7. For many years, section 109 of the Federal Credit Union Act provided that "[f]ederal credit union membership shall be limited to groups having a common bond of occupation or association, or to groups within a well-defined neighborhood, community, or

rural district.” Until 1982, the National Credit Union Administration and its predecessor agencies consistently interpreted section 109 as requiring that the same common bond of occupation unite every member of an occupationally defined credit union. In 1982, however, the NCUA reversed its long-standing policy in order to permit credit unions to be composed of multiple unrelated employer groups. The NCUA thus began interpreting section 109’s common bond requirement as applying only to each employer group in a multiple-group credit union, rather than to every member of that credit union. Several banks and the American Bankers Association sought judicial review of this action by the NCUA. They alleged that the NCUA’s 1982 interpretation of section 109 was improper and impermissible. Were the banks and the Bankers Association correct?

8. Section 7(a)(2) of the federal Endangered Species Act of 1973 divides responsibilities concerning protection of endangered species between the secretary of the interior and the secretary of commerce. The statute also requires each federal agency to consult with the relevant secretary in order to ensure that any action funded by the agency would be unlikely to jeopardize the existence or habitat of an endangered or threatened species. In 1978, the two secretaries promulgated a joint resolution stating that the obligations imposed by § 7(a)(2) extended not only to actions taken in the United States but also to actions taken in foreign nations. A revised joint regulation, reinterpreting § 7(a)(2) to require consultation only for actions taken in the United States or on the high seas, was promulgated in 1986. Defenders of Wildlife (DOW), an organization dedicated to wildlife conservation and other environmental causes, sued the secretary of the interior, seeking a declaratory judgment that the 1986 regulation erroneously interpreted the geographic scope of § 7(a)(2). DOW also sought an injunction requiring the secretary to develop a new regulation restoring the interpretation set forth in the 1978 regulation. DOW took the position that it should be regarded as having standing to sue because the 1986 regulation’s elimination of the consultation requirement concerning actions in foreign nations would hasten the endangerment and possible extinction of certain species, and would thus adversely affect DOW members’ ability to observe animals of those species when the members made trips to nations elsewhere in the world. The federal district court denied the secretary’s motion for summary judgment on the issue of whether DOW had standing to sue, granted DOW’s motion for summary judgment on all issues, and ordered the secretary to develop a revised regulation. After the U.S. Court of Appeals for the Eighth Circuit affirmed, the U.S. Supreme Court granted certiorari. Did DOW possess standing to sue?
9. An agent of the Pennsylvania Department of Environmental Resources saw Disposal Service’s loaded trash truck backing into a building that was used to compact waste to be loaded onto tractor-trailers for transportation and final disposal. Knowing the building’s purpose and that Disposal Service did not have a permit to operate it as a transfer station, as required by the state Solid Waste Management Act (SWMA), the agent entered the property, went into the building, and observed the operation. Disposal Service was later prosecuted for operating a transfer station without a permit. Disposal Service moved to suppress the agent’s evidence, arguing that his warrantless entry onto the property violated the Fourth Amendment. The state argued that the SWMA’s provisions allowing such warrantless inspections were constitutional. Should the evidence be suppressed?
10. Relying on the Freedom of Information Act (FOIA), Public Citizen Health Research Group asked the Food and Drug Administration (FDA) for documents relating to drug applications that had been abandoned for health or safety reasons. When the FDA denied this request, Public Citizen sued in federal court. Schering Corporation, which had submitted five investigational new drug applications (INDs) of the sort requested by Public Citizen, intervened as a defendant. The FDA and Schering contended that certain documents in the five INDs contained confidential commercial information and could therefore be withheld under Exemption 4 of the FOIA. Public Citizen argued that disclosure would prevent other drug companies “from repeating Schering’s mistakes, thereby avoiding risk to human health.” In addition, Public Citizen argued that under Exemption 4, the court should gauge whether the competitive harm done to the sponsor of an IND by the public disclosure of confidential information is outweighed by the strong public interest in safeguarding the health of human trial participants. Were Public Citizen’s arguments regarding Exemption 4 legally correct?

Were the requested documents subject to being withheld under Exemption 4?

11. Section 203(a) of the federal Communications Act required communications common carriers to file tariffs with the Federal Communications Commission (FCC). Section 203(b) of the same statute authorized the FCC to “modify any requirement made by or under” section 203. Relying on its modification authority under section 203(b), the FCC issued a series of orders during the 1980s and early 1990s. These orders made tariff filing optional for all non-dominant long-distance carriers. American Telephone and Telegraph Co. (AT&T), the only long-distance carrier classified as dominant, asked the U.S. Court of Appeals for the District of Columbia Circuit to

reverse these FCC orders. AT&T contended that making tariff filing optional for nondominant long-distance carriers was not a valid exercise of the FCC’s modification authority under section 203(b). Was AT&T correct in this contention?

Online Research

The FCC and the FOIA

Locate the Web site of the Federal Communications Commission (FCC). Review it to find an explanation of how to file Freedom of Information Act (FOIA) requests. Then prepare a brief description of the filing options available to a party who wishes to submit an FOIA request to the FCC.

chapter 48

THE FEDERAL TRADE COMMISSION ACT AND CONSUMER PROTECTION LAWS

Doan's is a brand name used for more than 90 years for back pain medication sold on an over-the-counter basis. Shortly after its 1987 purchase of the *Doan's* trademark and the right to produce the underlying product, Ciba-Geigy Corporation (Ciba) conducted a marketing study concerning consumer perceptions of the *Doan's* medication for back pain. The study revealed that this medication had a weak image in comparison to the leading brands of analgesics, and indicated that Ciba would benefit from positioning *Doan's* as a more effective product that was strong enough for the types of pain typically experienced by persons susceptible to backaches.

In an effort to strengthen the image of *Doan's*, Ciba mounted a television and newspaper advertising campaign that lasted from 1988 to 1996. The advertisements characterized *Doan's* as an effective remedy specifically for back pain and stated that the product contained a special ingredient (magnesium salicylate) not found in other over-the-counter analgesics. Some of the advertisements displayed images of competing over-the-counter pain remedies. In 1998, the Federal Trade Commission (FTC) instituted an administrative proceeding against Ciba's successor-in-interest, Novartis Corporation, on the ground that the 1988 to 1996 advertisements for *Doan's* were deceptive, in supposed violation of § 5 of the Federal Trade Commission Act. The FTC's theory was that even though the *Doan's* advertisements were truthful in stating that the product was effective for back pain and that it contained a special ingredient not present in other over-the-counter analgesics, the combination of the two literally true statements created an implied representation for which there was no substantiation: that because of its special ingredient, *Doan's* was superior to other analgesics in relieving back pain. It was this implied representation that the FTC alleged to be deceptive. Consider the following questions as you study this chapter:

- In FTC administrative proceedings, what legal test controls the determination of whether an advertisement was deceptive?
- May the FTC validly base a deceptive advertising proceeding on the theory that an advertisement consisting of literally true statements may nevertheless be deceptive in what it implies?
- If the theory just noted is valid, were the *Doan's* advertisements deceptive?
- If the *Doan's* advertisements were deceptive, what potential legal consequences could follow for Novartis? In particular, may that firm be ordered to engage in corrective advertising, or would a corrective advertising order violate the firm's right to freedom of speech?

DURING THE PAST several decades, *direct government regulation* of consumer matters has become a prominent feature of the legal landscape at the federal and state levels. This chapter addresses federal consumer protection regulation. It begins with a general discussion of America's main consumer watchdog, the Federal Trade Commission (FTC). After describing how the FTC operates, the chapter examines its regulation of anticompetitive, deceptive, and unfair business practices. Then we discuss various federal laws that deal with consumer credit and other consumer matters.

The Federal Trade Commission

The Federal Trade Commission (FTC) was formed shortly after the 1914 enactment of the Federal Trade Commission Act (FTC Act).¹ Because the FTC is an independent federal agency, it is outside the executive branch of the federal government and is less subject to political control than agencies that are executive departments. The FTC is headed by five commissioners appointed by the president and confirmed by the Senate for staggered seven-year terms. The president designates one of the commissioners as chairman of the FTC. The FTC has a Washington headquarters and several regional offices located throughout the United States.

The FTC's Powers The FTC's principal missions are to keep the U.S. economy both *free* and *fair*. Congress has given the commission many tools for accomplishing these missions. By far the most important, however, is § 5 of the FTC Act, which empowers the commission to prevent *unfair methods of competition* and *unfair or deceptive acts or practices*. We examine these bases of FTC authority later in this chapter. The commission also enforces the consumer protection and consumer credit measures discussed in the last half of the chapter. Finally, the FTC enforces numerous other federal laws relating to specific industries or lines of commerce.

FTC Enforcement Procedures The FTC has various legal means for ensuring compliance with the statutes it administers. The three most important FTC enforcement devices are its procedures for facilitating voluntary compliance, its issuance of trade regulation rules, and its adjudicative proceedings.

Voluntary Compliance The FTC promotes voluntary business behavior by issuing advisory opinions and industry guides. An **advisory opinion** is the commission's response to a private party's query about the legality of proposed business conduct. The FTC is not obligated to furnish advisory opinions. The commission may rescind a previously issued opinion when the public interest requires. When the FTC does so, however, it cannot proceed against the opinion's recipient for actions taken in good faith reliance on the opinion, unless it gives the recipient notice of the rescission and an opportunity to discontinue those actions.

Industry guides are FTC interpretations of the laws it administers. Their purpose is to encourage businesses to abandon certain unlawful practices. To further this end, industry guides are written in lay language. Although industry guides lack the force of law, behavior that violates an industry guide often violates one of the statutes or other rules the commission enforces.

Trade Regulation Rules Unlike industry guides, **FTC trade regulation rules** are written in legalistic language and have the force of law. Thus, the FTC can proceed directly against those who engage in practices forbidden by a trade regulation rule. This may occur through the *adjudicative proceedings* discussed immediately below. The commission may also obtain a federal district court *civil penalty* of up to \$10,000 for each knowing violation of a rule. Furthermore, it may institute court proceedings to obtain various forms of *consumer redress*, including the payment of damages, the refund of money, the return of property, and the reformation or rescission of contracts.

FTC Adjudicative Proceedings Often, the FTC proceeds against violators of statutes or trade regulation rules by administrative action within the commission itself. The FTC obtains evidence of possible violations from private parties, government bodies, and its own investigations. If the FTC decides to proceed against the alleged offender (the *respondent*), it enters a formal complaint. The case is heard in a public administrative hearing called an *adjudicative proceeding*. An FTC administrative law judge presides over this proceeding.² The judge's decision can be appealed to the FTC's five commissioners and then to the federal courts of appeals and the U.S. Supreme Court.

The usual penalty resulting from a final decision against the respondent is an FTC **cease-and-desist**

¹See Chapter 47 for further discussion of the FTC's creation, organization, powers, and status as an independent agency.

²Chapter 47 describes federal administrative proceedings.

order. This is a command ordering the respondent to stop its illegal behavior. As you will see later in the chapter, however, FTC orders may go beyond the command to cease and desist. The civil penalty for noncompliance with a cease-and-desist order is up to \$10,000 per violation. Where there is a continuing failure to obey a final order, each day that the violation continues is considered a separate violation.

Many alleged violations are never adjudicated by the FTC. Instead, they are settled through a **consent order**. This is an order approving a negotiated agreement in which the respondent promises to cease certain activities. Consent orders normally provide that the respondent does not admit any violation of the law. The failure to observe a consent order is punishable by civil penalties.

LOG ON

The Federal Trade Commission's Web site, www.ftc.gov, contains a wealth of information regarding topics addressed in this chapter.

Anticompetitive Behavior

Section 5 of the FTC Act empowers the commission to prevent “unfair methods of competition.” This language allows the FTC to regulate anticompetitive practices made unlawful by the Sherman Act. The commission also has statutory authority to enforce the Clayton and Robinson-Patman Acts.³

For the most part, § 5's application to anticompetitive behavior involves the orthodox antitrust violations discussed in the following two chapters. Section 5, however, also reaches anticompetitive behavior *not covered by other antitrust statutes*. In addition, § 5 enables the FTC to proceed against *potential* or *incipient* antitrust violations.

Deception and Unfairness

Section 5 of the FTC Act also prohibits “unfair or deceptive acts or practices” in commercial settings. This language enables the FTC to regulate a wide range of activities that disadvantage consumers. In doing so, the commission may seek to prove that the activity is *deceptive*, or that it is *unfair*. Here, we set out the general standards that the FTC uses to define each of these § 5

violations. Much of this discussion involves FTC regulation of advertising, but the standards we outline apply to many other misrepresentations, omissions, and practices. Although their details are beyond the scope of this text, the commission also has enacted numerous trade regulation rules defining specific deceptive or unfair practices.

Deception The FTC determines the deceptiveness of advertising and other business practices on a case-by-case basis. Courts often defer to the commission's determinations. To be considered deceptive under the FTC's Policy Statement on Deception, an activity must (1) involve a *material* misrepresentation, omission, or practice; (2) that is *likely to mislead* a consumer; (3) who acts *reasonably* under the circumstances.

Representation, Omission, or Practice Likely to Mislead Sometimes, sellers *expressly* make false or misleading claims in their advertisements or other representations. As revealed in the *Kraft* case, which follows shortly, an advertiser's false or misleading claims of an *implied* nature may also be challenged by the FTC. The same is true of a seller's deceptive *omissions*. Finally, certain deceptive *marketing practices* may violate § 5. In one such case, encyclopedia salespeople gained entry to the homes of potential customers by posing as surveyors engaged in advertising research.

In all of these situations, the statement, omission, or practice must be *likely to mislead* a consumer. Actual deception is not required. Determining whether an ad or practice is likely to mislead requires that the FTC evaluate the accuracy of the seller's claims. In some cases, moreover, the commission requires that sellers *substantiate* objective claims about their products by showing that they have a reasonable basis for making such claims.

The “Reasonable Consumer” Test To be deceptive, the representation, omission, or practice must also be likely to mislead *reasonable consumers under the circumstances*. This requirement aims to protect sellers from liability for every foolish, ignorant, or outlandish misconception that some consumer might entertain. As the commission noted many years ago, advertising an American-made pastry as “Danish Pastry” does not violate § 5 just because “a few misguided souls believe . . . that all Danish Pastry is made in Denmark.”⁴ Also, § 5 normally is not violated by statements of opinion, sales talk, or “puffing,” statements about matters that consumers can easily evaluate for themselves, and statements regarding subjective

³Chapter 49 discusses the Sherman Act. Chapter 50 discusses the Clayton and Robinson-Patman Acts.

⁴*Heinz v. W. Kirchner*, 63 F.T.C. 1282, 1290 (1963).

The Global Business Environment

In most developed nations, the problem of misleading advertising is addressed through self-regulation and through regulatory schemes established by law. Self-regulation includes voluntary action by companies and resolution of parties' advertising-related disputes under industry codes of conduct or other agreed procedures that exist outside the formal legal system.

Since the passage of a 1984 European Union (EU) Directive on Misleading Advertising, EU nations have been obligated to have domestic laws addressing misleading advertising. The domestic laws of EU nations typically have not contemplated a significant role for direct government regulation of the sort in which the Federal Trade Commission and other government agencies engage in the United States. Instead, EU countries depend more on litigation instituted by private parties—competitors and, in some countries, consumer organizations—as the chief legal means of dealing with misleading advertising. In this sense, the approach taken by EU nations resembles a different aspect of advertising regulation

in the United States: the indirect regulation that comes with private parties' false advertising lawsuits under § 43(a) of the Lanham Act. (Section 43(a) and the types of cases that may be brought under it are discussed in Chapter 8.)

Sweden and the other Scandinavian countries have established, by law, a consumer ombudsman who hears advertising complaints, resolves them when possible, and resorts to litigation if necessary. The ombudsman also has some power to promulgate advertising rules that carry legal force. In this sense, the ombudsman's role resembles that of the FTC in the United States.

Advertising laws contemplate significant regulatory roles for government agencies in New Zealand, Australia, and Japan, though industry self-regulation remains prominent in at least the latter two of those nations. In Great Britain, the traditional emphasis on self-regulation through the private Advertising Standards Authority has been supplemented during recent decades by government regulation through the office of the Director General of Fair Trading.

matters such as taste or smell. Such statements are unlikely to deceive reasonable consumers.

Materiality Finally, the representation, omission, or practice must be *material*. Material information is important to reasonable consumers and is likely to affect their choice of a product or service. Examples include statements or omissions regarding a product's cost,

safety, effectiveness, performance, durability, quality, or warranty protection. In addition, the commission presumes that express statements are material.

The *Kraft* case, which follows, illustrates the application of the FTC's deception test to an advertising claim of an implied nature. *Kraft* also reveals the commission's broad discretion in fashioning appropriate orders once deceptive advertising has been proven.

Kraft, Inc. v. Federal Trade Commission

970 F.2d 311 (7th Cir. 1992)

Individually wrapped slices of cheese and cheeselike products come in two major types: process cheese food slices, which must contain at least 51 percent natural cheese according to a federal regulation; and imitation slices, which contain little or no natural cheese. Kraft, Inc.'s "Kraft Singles" are process cheese food slices. In the early 1980s, Kraft began losing market share to other firms' less expensive imitation slices. Kraft responded with its "Skimp" and "Class Picture" advertisements, which were designed to inform consumers that Kraft Singles cost more because each slice is made from 5 ounces of milk. These advertisements, which ran nationally in print and broadcast media between 1985 and 1987, also stressed the calcium content of Kraft Singles.

In the broadcast version of the Skimp advertisements, a woman stated that she bought Kraft Singles for her daughter rather than "skimping" by purchasing imitation slices. She noted that "[i]mitation slices use hardly any milk. But Kraft has 5 ounces per slice. Five ounces. So her little bones get calcium they need to grow." The commercial also showed milk being poured into a glass that bore the label "5 oz. milk slice." The glass was then transformed into part of the label on a package of Singles. In March 1987, Kraft added, as a subscript in the television commercial and as a footnote in the print media version, the disclosure that "one 3/4 ounce slice has 70% of the calcium of five ounces of milk."

The televised version of the *Class Picture* advertisements cited a government study indicating that “half the school kids in America don’t get all the calcium recommended for growing kids.” According to the commercial, “[t]hat’s why Kraft Singles are important. Kraft is made from five ounces of milk per slice. So they’re concentrated with calcium. Calcium the government recommends for strong bones and healthy teeth.” The commercial also included the subscript disclaimer mentioned above.

The Federal Trade Commission instituted a deceptive advertising proceeding against Kraft under § 5 of the FTC Act. According to the FTC’s complaint, the *Skimp* and *Class Picture* advertisements made the false implied claim that a *Singles* slice contains the same amount of calcium as 5 ounces of milk (the milk equivalency claim). The FTC regarded the milk equivalency claim as false even though Kraft actually uses 5 ounces of milk in making each *Singles* slice because roughly 30 percent of the calcium contained in the milk is lost during processing.

The administrative law judge (ALJ) concluded that the *Skimp* and *Class Picture* advertisements made the milk equivalency claim, which was false and material. He concluded that Kraft’s subscript and footnote disclosures of the calcium loss were inconspicuous and confusing and therefore insufficient to dispel the misleading impression created by the advertisements. The ALJ ordered Kraft to cease and desist making the milk equivalency claim regarding any of its individually wrapped process cheese food slices or imitation slices. In addition, the ALJ ordered Kraft not to make other calcium or nutritional claims concerning its individually wrapped slices unless Kraft had reliable scientific evidence to support the claims.

Kraft appealed to the FTC commissioners (referred to here as “the Commission”). The Commission affirmed the ALJ’s decision but modified it. According to the Commission, the *Skimp* and *Class Picture* advertisements made the false and material milk equivalency claim. The Commission modified the ALJ’s orders by extending their coverage from Kraft’s individually wrapped slices to “any product that is a cheese, related cheese product, imitation cheese, or substitute cheese.” Kraft appealed to the U.S. Court of Appeals for the Seventh Circuit. (In a portion of the opinion not set forth here, the Seventh Circuit concluded, as had the ALJ and the Commission, that some of the Kraft advertisements made a further false claim of an implied nature: that Kraft *Singles* slices contain more calcium than imitation slices. The following portion of the Seventh Circuit’s opinion addresses the milk equivalency claim.)

Flaum, Circuit Judge

[A]n advertisement is deceptive under [§ 5 of the FTC Act] if it is likely to mislead consumers, acting reasonably under the circumstances, in a material respect.

In determining what claims are conveyed by a challenged advertisement, the Commission relies on two sources of information: its own viewing of the ad and extrinsic evidence. Its practice is to view the ad first and, if it is unable on its own to determine with confidence what claims are conveyed . . . , to turn to extrinsic evidence. The most convincing extrinsic evidence is a [consumer] survey . . . , but the Commission also relies on other forms of extrinsic evidence including consumer testimony, expert opinion, and copy tests of ads.

Kraft has no quarrel with this approach when it comes to determining whether an ad conveys *express* claims, but contends that the FTC should be required . . . to rely on extrinsic evidence rather than its own subjective analysis in all cases involving allegedly *implied* claims. The Commissioners, Kraft argues, are simply incapable of determining what implicit messages consumers are likely to perceive. Kraft [also] asserts that the Commissioners are predisposed to find implied claims because the claims have [already] been identified in the complaint.

Here, the Commission found implied claims based solely on its own intuitive reading of the ads (although it did reinforce

that conclusion by examining the proffered extrinsic evidence). Had the Commission fully and properly relied on available extrinsic evidence, Kraft argues it would have conclusively found that consumers do not perceive the milk equivalency . . . claim in the ads. Kraft’s arguments . . . are unavailing as a matter of law. Courts, including the Supreme Court, have uniformly rejected imposing such a requirement on the FTC. We hold that the Commission may rely on its own reasoned analysis to determine what claims, including implied ones, are conveyed in a challenged advertisement, so long as those claims are reasonably clear from the face of the advertisement.

[Kraft relies on] the faulty premise that implied claims are inescapably subjective and unpredictable. In fact, implied claims fall on a continuum, ranging from the obvious to the barely discernible. The Commission does not have license to go on a fishing expedition to pin liability on advertisers for barely imaginable claims. However, when [implied] claims [are] conspicuous, extrinsic evidence is unnecessary because common sense and administrative experience provide the Commission with adequate tools to make its findings. The implied claims Kraft made are reasonably clear from the face of the advertisements, and hence the Commission was not required to utilize consumer surveys in reaching its decision.

Alternatively, Kraft argues that substantial evidence does not support the FTC’s finding that the *Class Picture* ads convey

a milk equivalency claim. We find substantial [supporting] evidence in the record. Although Kraft downplays the nexus in the ads between milk and calcium, the ads emphasize visually and verbally that five ounces of milk go into a slice of Kraft Singles; this image is linked to calcium content, strongly implying that the consumer gets the calcium found in five ounces of milk. Furthermore, the Class Picture ads contained one other element reinforcing the milk equivalency claim, the phrase “5 oz. milk slice” inside the image of a glass superimposed on the Singles package.

Kraft asserts that the literal truth of the . . . ads—[Kraft Singles] *are* made from five ounces of milk and they *do* have a high concentration of calcium—makes it illogical to render a finding of consumer deception. The difficulty with this argument is that even literally true statements can have misleading implications. Here, the average consumer is not likely to know that much of the calcium in five ounces of milk (30 percent) is lost in processing, which leaves consumers with a misleading impression about calcium content.

Kraft next asserts that the milk equivalency . . . claim, even if made, [is] not material to consumers. A claim is considered material if it involves information that is important to consumers and, hence, likely to affect their choice of, or conduct regarding, a product. In determining that the milk equivalency claim was material to consumers, the FTC cited Kraft surveys showing that 71 percent of respondents rated calcium content an extremely or very important factor in their decision to buy Kraft Singles, [and that a substantial percentage of respondents] reported significant personal concerns about adequate calcium consumption. [The Commission] rationally concluded that a 30 percent exaggeration of calcium content was a nutritionally significant claim that would affect consumer purchasing decisions. This finding was supported by expert witnesses who agreed that consumers would prefer a slice of cheese with 100 percent of the calcium in five ounces of milk over one with only 70 percent. [T]he FTC [also] found evidence in the record that Kraft designed the ads with the intent to capitalize on consumer calcium deficiency concerns.

Significantly, the FTC found further evidence of materiality in Kraft’s conduct. Before the ads even ran, ABC television raised a red flag when it asked Kraft to substantiate the milk and calcium claims in the ads. Kraft’s ad agency also warned Kraft in a legal memorandum to substantiate the claims before running the ads. Moreover, in October 1985, a consumer group warned Kraft that it believed the Skimp ads were potentially deceptive. Nonetheless, a high-level Kraft executive recommended that the ad copy remain unaltered because the “Singles business is growing for the first time in four years due in large part to the copy.” Finally, the FTC and the California

Attorney General’s Office independently notified the company in early 1986 that investigations had been initiated to determine whether the ads conveyed the milk equivalency claims. Notwithstanding these warnings, Kraft continued to run the ads and even rejected proposed alternatives that would have allayed concerns over their deceptive nature. From this, the FTC inferred—we believe, reasonably—that Kraft thought the challenged milk equivalency claim induced consumers to purchase Singles and hence that the claim was material to consumers.

The Commission’s cease and desist order prohibits Kraft from running the Skimp and Class Picture ads, as well as from advertising any calcium or nutritional claims not supported by reliable scientific evidence. This order extends not only to the product contained in the deceptive advertisements (Kraft Singles), but to all Kraft cheeses and cheese-related products.

Kraft argues that the scope of the order is not reasonably related to Kraft’s violation of the [FTC] Act because it extends to products that were not the subject of the challenged advertisements. The FTC has discretion to issue multi-product orders, so-called “fencing-in” orders, that extend beyond violations of the Act to prevent violators from engaging in similar deceptive practices in the future.

[The Commission] concluded that Kraft’s violations were serious, deliberate, and easily transferable to other Kraft products, thus warranting a broad fencing-in order. We find substantial evidence to support the scope of the order. The Commission based its finding of seriousness on the size (\$15 million annually) and duration (two and one-half years) of the ad campaign and on the difficulty most consumers would face in judging the truth or falsity of the calcium claims. [T]he FTC properly found that it is unreasonable to expect most consumers to perform the calculations necessary to compare the calcium content of Kraft Singles with five ounces of milk given the fact that the nutrient information given on milk cartons is not based on a five ounce serving.

As noted previously, the Commission [reasonably] found that Kraft’s conduct was deliberate because it persisted in running the challenged ad copy despite repeated warnings from outside sources that the copy might be implicitly misleading. Kraft made three modifications to the ads, but two of them were implemented at the very end of the campaign, more than two years after it had begun. This dilatory response provided a sufficient basis for the Commission’s conclusion. The Commission further [made the reasonable finding] that the violations were readily transferable to other Kraft cheese products given the general similarity between Singles and other Kraft cheeses.

Commission’s order upheld and enforced.

Unfairness Section 5's prohibition of *unfair* acts or practices enables the FTC to attack behavior that, while not necessarily deceptive, is objectionable for other reasons. As demonstrated by the case discussed in an Ethics in Action box that appears later in the chapter, the FTC focuses on *consumer harm* when it attacks unfair acts or practices. To violate § 5, this harm:

1. *Must be substantial.* Monetary loss and unwarranted health and safety risks usually constitute substantial harm, but emotional distress and the perceived offensiveness of certain advertisements generally do not.
2. *Must not be outweighed by any offsetting consumer or competitive benefits produced by the challenged practice.* This element requires the commission to balance the harm caused by the act or practice against its benefits to consumers and to competition generally. A seller's failure to give a consumer complex technical data about a product, for example, may disadvantage the consumer, but it may also reduce the product's price. Only when an act or practice is injurious in its *net effects* can it be unfair under § 5.
3. *Must be one that consumers could not reasonably have avoided.* An injury is considered reasonably unavoidable when a seller's actions significantly interfered with a consumer's ability to make informed decisions that would have prevented the injury. For example, a seller may have withheld otherwise unavailable information about important product features, or used high-pressure sales tactics on vulnerable consumers.

Remedies Several types of orders may result from a successful FTC adjudicative proceeding attacking deceptive or unfair behavior. One possibility is an order telling the respondent to *cease* engaging in the deceptive or unfair conduct. Another is the *affirmative disclosure* of information whose absence made the advertisement deceptive or unfair. Yet another is *corrective advertising*. This requires the seller's future advertisements to correct false impressions created by its past advertisements. In certain cases, moreover, the FTC may issue an *all-products order* extending beyond the product or service whose advertisements violated § 5, and including future advertisements for other products or services marketed by the seller. The *Kraft* case, which appeared above, illustrates such an order. Finally, the FTC may sometimes go to court to seek injunctive relief or the civil penalties or consumer redress noted earlier.

Consumer Protection Laws

The term *consumer protection* includes everything from Chapter 20's product liability law to packaging and labeling regulations. Here, we examine federal regulation of telemarketing practices, product warranties, consumer credit, and product safety.

Telemarketing and Consumer Fraud and Abuse Prevention Act In the Telemarketing and Consumer Fraud and Abuse Prevention Act (Telemarketing Act), Congress required the FTC to promulgate regulations defining and prohibiting *deceptive* and *abusive* telemarketing acts or practices. The FTC responded to this directive with the Telemarketing Sales Rule (TSR).

For purposes of the TSR, a *seller* is a party who (or which), in connection with a telemarketing transaction, offers or arranges to provide customers with goods or services in exchange for consideration. The TSR defines *telemarketer* as "any person who, in connection with telemarketing, initiates or receives telephone calls to or from a customer." It defines *telemarketing* as "a plan, program, or campaign which is conducted to induce the purchase of goods or services by use of one or more telephones and which involves more than one interstate telephone call." Exemptions from the telemarketing definition are provided for sellers that solicit sales through the mailing of a catalog and then receive customers' orders by telephone, and for sellers that make telephone calls of solicitation to a consumer but complete the transaction in a face-to-face meeting with the consumer.

A major feature of the TSR makes it a deceptive practice for telemarketers and sellers to fail to disclose certain information to a customer before she pays for the goods or services being telemarketed. The customer is regarded as having paid for goods or services once she provides information that may be used for billing purposes. The mandatory disclosures specified in the TSR include the total cost of the goods or services, any material restrictions or conditions on the purchase or use of the goods or services, and the terms of any refund or exchange policy mentioned in the solicitation (or, if the seller has a policy of not allowing refunds or exchanges, a disclosure of that policy). Various other disclosures are necessary if the telemarketing solicitation pertains to a prize promotion. The TSR also makes it a deceptive practice for a telemarketer or seller to misrepresent information required to be disclosed in the mandatory disclosures, or to misrepresent any other information

CYBERLAW IN ACTION

Reacting to frequently voiced concerns of e-mail users that their inboxes were being inundated by unwanted, sometimes misleading, and often offensive e-mail messages from commercial providers, Congress enacted the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003. This statute, usually referred to as the CAN-SPAM Act, took effect on January 1, 2004.

In the CAN-SPAM Act, Congress outlawed various commercial e-mail practices, including the use of a false or misleading statement on the “from” line of a commercial message and the use of false or misleading subject headings in a commercial message. The CAN-SPAM Act also required that a sender of commercial e-mail use a functioning reply address or “opt-out” mechanism by which consumers could elect not to receive more messages from that sender, and that the sender send no further messages to a consumer more than ten days after the consumer has opted out. In addition, the CAN-SPAM Act required that commercial e-mail messages contain three components: clear identification that the message is an advertisement or solicitation; conspicuous notice that the recipient may decline to receive further messages from the sender; and a listing of the sender’s postal

address. A further CAN-SPAM Act provision required warning labels on commercial e-mail messages that feature sexually oriented material. Enforcement authority for violations of the CAN-SPAM Act was given to the FTC (which can launch adjudicative proceedings or initiate litigation in court), to state attorneys general (who can sue in federal court concerning certain violations), and to providers of Internet access services (which can sue in federal court concerning certain other violations).

The CAN-SPAM Act also required the FTC to promulgate regulations to implement the statute and further its purposes. The regulations promulgated by the FTC took effect in 2008. It is perhaps too early to make a full and fair assessment of the CAN-SPAM Act’s effectiveness in dealing with the problem it was designed to address. Nevertheless, critics have lamented that the statute and the related regulations may not prove to be particularly effective. They have pointed to a continued proliferation of unwanted commercial e-mail as an indication that purveyors of such material have either ignored the legal requirements or have found it relatively easy to modify their e-mail techniques enough to comply with the law while still maintaining an ability to flood in-boxes with unsolicited messages.

concerning the performance, nature, or characteristics of the goods or services being offered for sale.

According to the TSR, a telemarketer or seller engages in an abusive practice if he directs threats, intimidation, or profane or obscene language toward a customer; causes the telephone to ring, or engages a person in a telephone conversation, repeatedly and with the intent to harass, abuse, or annoy a person at the called number; or initiates a call to a person who has previously stated that she does not wish to receive a call made by or on behalf of the seller whose goods or services are being offered.

The TSR also makes it an abusive practice for a telemarketer to call a person’s residence at any time other than between 8:00 AM and 9:00 PM at the called person’s location. In addition, the telemarketer engages in an abusive practice if, in a telephone call he initiated, he does not promptly and clearly disclose the identity of the seller, the sales purpose of the call, the nature of the goods or services, and the fact that no purchase or payment is necessary in order to win a prize or participate in a prize promotion (if a prize or prize promotion is being offered). Still other abusive practices are enumerated in the TSR.

The FTC and state attorneys general may bring enforcement proceedings against violators of the Telemarketing Act and the TSR. Civil penalties of up to \$10,000 per violation are among the available remedies in government-initiated proceedings. Under some circumstances, private citizens may sue violators for damages and injunctive relief.

Do-Not-Call Registry Regulations promulgated in 2003 by the FTC and the Federal Communications Commission created a legal mechanism by which consumers who preferred not to receive telemarketing calls of a commercial nature could have their home telephone numbers listed on a national “do-not-call” registry. Commercial telemarketers became legally obligated not to place calls to the numbers listed. The do-not-call registry became popular among consumers, with many millions taking action to have their numbers placed on the list within the first several months of its existence. Affected commercial telemarketers initiated litigation questioning the legal validity of the do-not-call registry. In the *Mainstream Marketing* case, which follows, a federal court of appeals upheld the do-not-call

registry against challenges brought on lack-of-statutory authority and First Amendment grounds. Additional information regarding the origins, purposes, and effect of

the do-not-call registry appears in the statement of facts preceding the edited version of the *Mainstream Marketing* opinion.

Mainstream Marketing Services, Inc. v. Federal Trade Commission 358 F.3d 1228 (10th Cir. 2004)

In 2003, the Federal Trade Commission (FTC) and the Federal Communications Commission (FCC) promulgated rules that together created the national do-not-call registry. This registry is a list containing the personal telephone numbers of telephone subscribers who have voluntarily indicated that they do not wish to receive unsolicited calls from commercial telemarketers. Consumers can register their personal phone numbers for the do-not-call list either online or by phone. Commercial telemarketers are generally prohibited from calling phone numbers that have been placed on the do-not-call registry. As of early 2004, consumers had registered more than 50 million phone numbers.

The do-not-call registry's restrictions apply only to telemarketing calls made by or on behalf of sellers of goods or services, and not to charitable or political fundraising calls. Under exceptions to the general do-not-call rule, a seller may still call consumers who have signed up for the national registry if the seller has an established business relationship with the consumer or if the consumer has given that seller express written permission to call. Consumer listings on the do-not-call registry remain valid for five years.

Since the early 1990s, Congress, the FCC, and the FTC had been involved in a regulatory effort aimed at protecting the privacy rights of consumers and curbing the risk of telemarketing abuse. The do-not-call registry was the eventual product of this effort. In the Telephone Consumer Protection Act of 1991 (TCPA), under which the FCC enacted its do-not-call rules, Congress found that telemarketing sales calls constitute an intrusive invasion of the privacy of many consumers. Moreover, the TCPA's legislative history cited statistics indicating that "most unwanted telephone solicitations are commercial in nature" and that "unwanted commercial calls are a far bigger problem than unsolicited calls from political or charitable organizations." The TCPA therefore authorized the FCC to establish a national database of consumers who object to receiving "telephone solicitations," which the act defined as commercial sales calls.

In the Telemarketing and Consumer Fraud and Abuse Prevention Act of 1994 (Telemarketing Act), under which the FTC enacted its do-not-call rules, Congress found that consumers lose an estimated \$40 billion each year as a result of telemarketing fraud. Therefore, Congress authorized the FTC to prohibit sales calls that a reasonable consumer would consider coercive or abusive of his or her right to privacy. The FCC and FTC initially sought to accomplish the goals of the TCPA and the Telemarketing Act by adopting rules that called for company-specific lists to be maintained by sellers. These lists were to contain the phone numbers of consumers who had requested not to be called by that particular solicitor. Telemarketers were obligated to honor those requests. The FCC and FTC later concluded that the company-specific lists had proven unworkable and had failed to achieve the objectives of Congress. Therefore, the agencies promulgated the regulations setting up a more expansive program: the national do-not-call registry.

Organizations engaged in commercial telemarketing filed various lawsuits that raised legal challenges to the do-not-call registry. In one of these cases, a federal district court held that the FTC lacked statutory authority to promulgate the regulations establishing the do-not-call registry. In another case, a federal district court held that the do-not-call registry violated the telemarketers' First Amendment right to freedom of speech. Those two cases, as well as others presenting challenges to parts of the regulations that established the do-not-call registry, were consolidated for purposes of appeal in the U.S. Court of Appeals for the Tenth Circuit. The following is an edited and reorganized version of the portions of the Tenth Circuit's opinion dealing with the statutory authority and First Amendment issues.

Ebel, Circuit Judge

The cases consolidated in this appeal involve challenges to the national do-not-call registry, which allows individuals to register their phone numbers on a national "do-not-call list" and prohibits most commercial telemarketers from calling the numbers on that list.

In [one of the consolidated cases], the district court held that the FTC lacked statutory authority to enact the do-not-call registry. In the Telemarketing Act, Congress authorized the FTC to "prescribe rules prohibiting deceptive telemarketing acts or practices and other abusive telemarketing acts or practices." More specifically, Congress directed the FTC to include

“a requirement that telemarketers may not undertake a pattern of unsolicited telephone calls which the reasonable consumer would consider coercive or abusive of such consumer’s right to privacy.” The FTC’s conclusion that this language authorized it to enact the national do-not-call registry is entitled to deference [from this court]. In light of this deference, we conclude that the FTC did have statutory authority to promulgate its do-not-call regulations because the agency’s view that the Telemarketing Act authorized it to enact those rules is at least a permissible construction of that statute.

Moreover, even if some doubt once existed, Congress erased it through subsequent legislation. In the Do-Not-Call Implementation Act, Congress directed the FCC and FTC to maximize consistency between their respective do-not-call rules and . . . , in response to the district court’s decision [regarding statutory authority,] expressly ratified the FTC’s do-not-call regulations. The FTC’s statutory authority is now unmistakably clear.

The primary issue [before the court] is whether the First Amendment prevents the government from establishing an opt-in telemarketing regulation that provides a mechanism for consumers to restrict commercial sales calls but does not provide a similar mechanism to limit charitable or political calls. [As we explain more fully below, we] hold that the do-not-call registry is a valid commercial speech regulation. . . . We express no opinion as to whether the do-not-call registry would be constitutional if it applied to political and charitable callers.

The national do-not-call registry’s telemarketing restrictions apply only to commercial speech. Like most commercial speech regulations, the do-not-call rules draw a line between commercial and noncommercial speech on the basis of content. [Chapters 3 and 5 contain discussion of the distinction between commercial and noncommercial speech and of the Supreme Court’s decisions establishing that commercial speech receives a lesser degree of First Amendment protection than noncommercial speech receives.] In reviewing commercial speech regulations, we apply the *Central Hudson* test. *Central Hudson Gas & Electric Corp. v. Public Service Commission*, 447 U.S. 557 (U.S. Sup. Ct. 1980), established a three-part test governing First Amendment challenges to regulations restricting non-misleading commercial speech that relates to lawful activity. First, the government must assert a substantial interest to be achieved by the regulation. Second, the regulation must directly advance that governmental interest, meaning that it must do more than provide “only ineffective or remote support for the government’s purpose.” Third, . . . the regulation . . . must be narrowly tailored not to restrict more speech than necessary. Together, these final two factors require that there be a reasonable fit between the government’s objectives and the means it chooses to accomplish those ends.

The government bears the burden of asserting one or more substantial governmental interests and demonstrating a reasonable fit between those interests and the challenged regulation. The government asserts that the do-not-call regulations are justified by its interests in 1) protecting the privacy of individuals in their homes, and 2) protecting consumers against the risk of fraudulent and abusive solicitation. Both of these justifications are undisputedly substantial governmental interests.

In *Rowan v. United States Post Office Dept.*, 397 U.S. 728 (U.S. Sup. Ct. 1970), the Supreme Court upheld the right of a homeowner to restrict material that could be mailed to his or her house. The Court emphasized the importance of individual privacy, particularly in the context of the home, stating that “the ancient concept that ‘a man’s home is his castle’ into which ‘not even the king may enter’ has lost none of its vitality.” In *Frisby v. Schultz*, 487 U.S. 474 (U.S. Sup. Ct. 1988), the Court again stressed the unique nature of the home and recognized that “the State’s interest in protecting the well-being, tranquility, and privacy of the home is certainly of the highest order in a free and civilized society.” [According to the Court in *Frisby*,] “we have repeatedly held that individuals are not required to welcome unwanted speech into their own homes and that the government may protect this freedom.” Additionally, the Supreme Court has recognized that the government has a substantial interest in preventing abusive and coercive sales practices. *Edenfield v. Fane*, 507 U.S. 761 (U.S. Sup. Ct. 1993) (“The First Amendment . . . does not prohibit the State from insuring that the stream of commercial information flows cleanly as well as freely.”).

A reasonable fit exists between the do-not-call rules and the government’s privacy and consumer protection interests if the regulation directly advances those interests and is narrowly tailored. See *Central Hudson*. In this context, the “narrowly tailored” standard does not require that the government’s response to protect substantial interests be the least restrictive measure available. All that is required is a proportional response. In other words, the national do-not-call registry is valid if it is designed to provide effective support for the government’s purposes and if the government did not suppress an excessive amount of speech when substantially narrower restrictions would have worked just as well. These criteria are plainly established in this case. The do-not-call registry directly advances the government’s interests by effectively blocking a significant number of the calls that cause the problems the government sought to redress. It is narrowly tailored because its opt-in character ensures that it does not inhibit any speech directed at the home of a willing listener.

The telemarketers assert that the do-not-call registry is unconstitutionally underinclusive because it does not apply to charitable and political callers. First Amendment challenges based on underinclusiveness face an uphill battle in the

commercial speech context. As a general rule, the First Amendment does not require that the government regulate all aspects of a problem before it can make progress on any front.

As discussed above, the national do-not-call registry is designed to reduce intrusions into personal privacy and the risk of telemarketing fraud and abuse that accompany unwanted telephone solicitation. The registry directly advances those goals. So far, more than 50 million telephone numbers have been registered on the do-not-call list, and the do-not-call regulations protect these households from receiving most unwanted telemarketing calls. According to the telemarketers' own estimate, 2.64 telemarketing calls per week—or more than 137 calls annually—were directed at an average consumer before the do-not-call list came into effect. Accordingly, absent the do-not-call registry, telemarketers would call those consumers who have already signed up for the registry an estimated total of 6.85 billion times each year. To be sure, the do-not-call list will not block all of these calls. Nevertheless, it will prohibit a substantial number of them, making it difficult to fathom how the registry could be called an ineffective means of stopping invasive or abusive calls, or a regulation that furnishes only speculative or marginal support for the government's interests.

[T]he type of unsolicited calls that the do-not-call list does prohibit—commercial sales calls—is the type that Congress, the FTC, and the FCC have all determined to be most to blame for the problems the government is seeking to redress. According to the legislative history accompanying the TCPA, “complaint statistics show that unwanted commercial calls are a far bigger problem than unsolicited calls from political or charitable organizations.” Similarly, the FCC determined that calls from solicitors with an established business relationship with the recipient are less problematic than other commercial calls.

Additionally, the FTC has found that commercial callers are more likely than noncommercial callers to engage in deceptive and abusive practices. Specifically, the FTC concluded that in charitable and political calls, a significant purpose of the call is to sell a cause, not merely to receive a donation, and that noncommercial callers thus have stronger incentives not to alienate the people they call or to engage in abusive and deceptive practices. The speech regulated by the do-not-call list is therefore the speech most likely to cause the problems the government sought to alleviate in enacting that list, further demonstrating that the regulation directly advances the government's interests.

Although the least restrictive means test is not the test to be used in the commercial speech context, commercial speech regulations do at least have to be “narrowly tailored” and provide a “reasonable fit” between the problem and the solution. Whether or not there are numerous and obvious less-burdensome alternatives is a relevant consideration in our narrow tailoring analysis. A law is narrowly tailored if it “promotes a substantial

government interest that would be achieved less effectively absent the regulation.” [Case citation omitted.] Accordingly, we consider whether there are numerous and obvious alternatives that would restrict less speech and would serve the government's interest as effectively as the challenged law.

We hold that the national do-not-call registry is narrowly tailored because it does not overregulate protected speech; rather, it restricts only calls that are targeted at unwilling recipients. The do-not-call registry prohibits only telemarketing calls aimed at consumers who have affirmatively indicated that they do not want to receive such calls and for whom such calls would constitute an invasion of privacy.

The Supreme Court has repeatedly held that speech restrictions based on private choice (in other words, an opt-in feature) are less restrictive than laws that prohibit speech directly. In *Rowan*, for example, the Court approved a law under which an individual could require a mailer to stop all future mailings if he or she received advertisements that he or she believed to be erotically arousing or sexually provocative. Likewise, in rejecting direct prohibitions of speech (even fully protected speech), the Supreme Court has often reasoned that an opt-in regulation would have been a less restrictive alternative. In *Martin v. City of Struthers*, 319 U.S. 141 (U.S. Sup. Ct. 1943), [for instance,] the Court struck down a city ordinance prohibiting door-to-door canvassing, noting that the government's interest could have been achieved in a less restrictive manner by giving householders the choice of whether or not to receive visitors.

The idea that an opt-in regulation is less restrictive than a direct prohibition of speech applies not only to traditional door-to-door solicitation, but also to regulations seeking to protect the privacy of the home from unwanted intrusions via telephone, television, or the Internet. See *United States v. Playboy Entertainment Group, Inc.*, 529 U.S. 803 (U.S. Sup. Ct. 2000) (opt-in targeted blocking of offensive television programming “enables the Government to support parental authority without affecting the First Amendment interests of speakers and willing listeners. . . . Simply put, targeted blocking is less restrictive than banning. . . .”). Like the do-not-mail regulation approved in *Rowan*, the national do-not-call registry does not itself prohibit any speech. Instead, it merely “permits a citizen to erect a wall . . . that no advertiser may penetrate without his acquiescence.” See *Rowan*. Almost by definition, the do-not-call regulations only block calls that would constitute unwanted intrusions into the privacy of consumers who have signed up for the list. Moreover, it allows consumers who feel susceptible to telephone fraud or abuse to ensure that most commercial callers will not have an opportunity to victimize them. Under the circumstances we address in this case, we conclude that the do-not-call registry's opt-in feature renders it a narrowly tailored commercial speech regulation.

The do-not-call registry's narrow tailoring is further demonstrated by the fact that it presents both sellers and consumers with a number of options to make and receive sales offers. From the seller's perspective, the do-not-call registry restricts only one avenue by which solicitors can communicate with consumers who have registered for the list. In particular, the do-not-call regulations do not prevent businesses from corresponding with potential customers by mail or by means of advertising through other media.

Finally, none of the telemarketers' proposed alternatives would serve the government's interests as effectively as the national do-not-call list. Primarily, the telemarketers suggest that company-specific rules effectively protected consumers. Yet as the FTC found, "the record in this matter overwhelmingly shows the contrary . . . it shows that the company-specific approach is seriously inadequate to protect consumers' privacy from an abusive pattern of calls placed by a seller or telemarketer."

First, the company-specific approach proved to be extremely burdensome to consumers, who had to repeat their do-not-call requests to every solicitor who called. In effect, this system gave solicitors one free chance to call each consumer, although many consumers find even an initial unsolicited sales call abusive and invasive of privacy. Second, the government's experience under the company-specific rules demonstrated that commercial solicitors often ignored consumers' requests to be placed on their company-specific lists. Third, consumers have no way to verify whether their numbers have been removed from a solicitor's calling list in response to a company-specific do-not-call request. Finally, company-specific rules are difficult to enforce because they require consumers to bear the evidentiary burden of keeping lists detailing which telemarketers have called them and what do-not-call requests they have made.

[T]he telemarketers [also] argue that it would have been less restrictive to let consumers rely on technological alternatives—

such as caller ID, call rejection services, and electronic devices designed to block unwanted calls. Each of these alternatives puts the cost of avoiding unwanted telemarketing calls on consumers. Forcing consumers to compete in a technological arms race with the telemarketing industry is not an equally effective alternative to the do-not-call registry.

In sum, the do-not-call registry is narrowly tailored to restrict only speech that contributes to the problems the government seeks to redress, namely the intrusion into personal privacy and the risk of fraud and abuse caused by telephone calls that consumers do not welcome into their homes. No calls are restricted unless the recipient has affirmatively declared that he or she does not wish to receive them. Moreover, telemarketers still have the ability to contact consumers in other ways, and consumers have a number of different options in determining what telemarketing calls they will receive. Finally, there are not numerous and obvious less-burdensome alternatives that would restrict less speech while accomplishing the government's objectives equally as well.

The national do-not-call registry offers consumers a tool with which they can protect their homes against intrusions that Congress has determined to be particularly invasive. Just as a consumer can avoid door-to-door peddlers by placing a "No Solicitation" sign in his or her front yard, the do-not-call registry lets consumers avoid unwanted sales pitches that invade the home via telephone, if they choose to do so. We are convinced that the First Amendment does not prevent the government from giving consumers this option.

Judgment striking down do-not-call registry as being outside FTC's statutory authority reversed; judgment striking down do-not-call registry on First Amendment grounds also reversed.

Magnuson-Moss Warranty Act The Magnuson-Moss Warranty Act of 1975 mainly applies to *written warranties* for *consumer products*. Nothing in the act requires sellers to give a written warranty. Sellers who decline to provide such a warranty generally escape coverage. A consumer product is personal property that is ordinarily used for personal, family, or household purposes. In addition, many Magnuson-Moss provisions apply only when a written warranty is given in connection with the sale of a consumer product to a *consumer*. A consumer is a buyer or transferee who does not use the product for resale or in his own business.

Chapter 20 discusses Magnuson-Moss's provisions giving consumers minimum warranty protection. Here,
